UW UNDERGRADUATE MAJORS

Some UW majors are open to all students who want to pursue them. You can be admitted to these **open majors** at any time, even as a freshman. Other majors have **minimum admission requirements**—after you complete the prerequisite courses, with the required grades, you can be admitted to the major. Still other majors have **competitive admission**—prerequisite courses, a minimum GPA, and sometimes other application requirements such as recommendations, a statement of purpose, a writing sample, and/or a portfolio. Completion of the admission requirements does not guarantee admission to a competitive major.
