Nature of Organization
This is a lab that studies the early development of zebrafish embryos. Currently all in our research group are undergraduates who strive for a future in research and biomedical sciences. We have a water recycling fish facility with 300 adults fish.
Duties and Responsibilities
Duties include: Clean cages, feed fish. Feed baby fish. Prepare solutions and fish water for adults and embryos. Autoclave bottles and solutions for zebrafish care. Set up cages for zebrafish Spawning. Sort embryos for breeding. Euthanize adult fish. Cleaning laboratory glassware. Could include making sterile solutions and plates for bacterial culture.
Minimum Qualifications
Minimum qualification include: Willingness to be careful. Remembering when to feed and take care of fish. Willingness to feed fish on Saturdays and Sundays in a shared manner, so must live relatively near the UW. Will be trained on the job.
Educational Benefits
Benefits include: experience caring for adult and baby zebrafish, experience making sterile solutions and organizing parts of the lab, hours can be fit to course and study schedule. May interact with undergraduates doing research in the lab and attend lab meetings.
