

# BE PREPARED

Be ready for failures  
and infections

- Backup your files regularly
- Be prepared to rebuild
  - Have installation CDs and software
  - Having a plan for getting OS updates
- In case of infection
  - Update your anti-virus software before scanning
  - Run scan/reboot/scan/reboot...etc. until fixed
  - You may have to rebuild your system
- Plan for upgrading
  - Support is fading for Win98 and Mac OS8
