

## 8 Fuel Saving Tips

[www.uwfleet.com](http://www.uwfleet.com)

1. **Consider downsizing.** Drive the right vehicle for the job or trip. Fleet Services can provide you with the perfect vehicle to suit your needs.
2. **Slow and steady.** Accelerate gradually and your fuel economy will improve dramatically.
3. **Consolidate trips.** Before leaving the office or shop, check to see if there are other tasks you can accomplish in the one trip.
4. **Check your tire pressure.** Underinflated tires equals poor gas mileage. Let Fleet Services check the tire pressure and do a basic diagnostic check on your UW vehicle.
5. **Dirty air filter?** Dirty air filters slow down the flow of air into the engine, reducing efficiency.
6. **Live without AC.** Roll down the windows and let the air in. Enjoy the breeze while your vehicle uses less gas.
7. **Lighten the load.** Clean out your vehicle! The more weight you haul around, the more fuel you use.
8. **Walk, bike or take the bus** to your next business meeting. Then make it a habit.
