

Free Computing Workshops

Most Learning and Scholarly Technologies workshops are taught by our student instructors and designed, both in content and pacing, for students. These workshops have a fun, casual atmosphere. To attend, you will need your UW NetID and Husky card, as seating preference is given to students. Some workshops (marked with an *) require registration.

Select workshops are designed specifically for UW instructors and employees (marked with a #). These workshops are taught by Learning and Scholarly Technologies professional staff and include information about best practices for use of the technology in teaching and research contexts. Registration is required for these workshops.

Find workshop descriptions, up-to-date schedules and information about requesting custom workshops at:
<http://www.washington.edu/lst/workshops>

Help Center

If you can't make it to a workshop, why not check out the online help center? It contains how-to guides for all of the software we teach in workshops as well as related tasks, tips, and cautions that can help save you time.
