A university is a community of scholars and artists, a place where faculty and students pursue truth and enrich human understanding. Universities have been regarded as essential attributes of civilized societies for hundreds of years, providing training for the professions and more general educational opportunities in scientific and humanistic studies.

The University of Washington has become one of the finest universities in the country, richly combining its research, instructional, and public service missions. It is an exciting place to be, and its contributions to the state and the nation will continue to grow as we all face the formidable challenges of the late twentieth century.

William P. Gerberding, President 1979-1995

University of Washington
(Name of office and location)
Seattle, Washington 98195

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability or status as a disabled veteran or veteran of the Vietnam era. Any discriminatory action can be a cause for disciplinary action. This policy applies to all programs and facilities, including, but not limited to, admissions, educational programs, employment, and patient and hospital services. Discrimination is prohibited by Presidential Executive Order 11246, as amended, Titles VI and VII of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Sections 503 and 504 of the Rehabilitation Act of 1973, Age Discrimination in Employment Act of 1975, Vietnam Era Veterans Readjustment Assistance Act of 1974, Americans with Disabilities Act of 1990, State of Washington Gender Equity in Higher Education Act of 1989, other federal and state statutes and regulations, and University policy. Coordination of the compliance efforts of the University of Washington with respect to all of these laws and regulations is under the direction of the Assistant Provost for Human Rights and Affirmative Action, Dr. Helen Remick, University of Washington, Equal Employment and Affirmative Action Office, JA-26, 4045 Brooklyn Avenue Northeast, Seattle, Washington 98195, telephone (206) 543-1830, VTD.

Additional information concerning the equal opportunity and affirmative action policies and procedures, including grievance procedures, is in the Operations Manual, D 46.1, D46.2, D46.3, and D46.4, and the UW Handbook, Vol. IV, p. 44.

For information on disabilities accommodation, students should call the Disabled Student Services Office at 543-8924 Voice or 543-8925 VTD; others call the Office of the ADA Coordinator at 543-8450 Voice or 543-8452 TDD. E-mail: access@u.washington.edu.

Copies may be purchased from the University Book Store, 4329 University Way Northeast, Seattle, Washington 98105, telephone (206) 634-3400.

University of Washington Bulletin

USPS 070-880

General Series No. 1275

June 1994

Published monthly in January, April, June, July, September, and October, at Seattle, Washington, by the University of Washington, 5900 Seventh Avenue Northeast, Seattle, Washington 98195. Second-class postage paid at Seattle, Washington 98195.

Postmaster: Send address changes to University of Washington Bulletin, 3900 Seventh Avenue Northeast, Seattle, Washington 98195.
The material in this catalog has been compiled and organized to provide the reader with a comprehensive overall view of the programs and courses at the University of Washington—Seattle. It includes academic requirements and procedures necessary for admission and graduation. Information on programs, faculty, and courses is usually arranged in alphabetical order following departmental structure within each school or college.

Because curriculum revisions and program changes usually occur during the two-year period the General Catalog is in circulation, students should assume the responsibility of consulting the appropriate academic unit or adviser for more current or specific information. The quarterly Time Schedule gives information on courses offered, class hours, and classroom locations, and has the latest calendar dates, fees, and details on registration.

All announcements in the General Catalog are subject to change without notice and do not constitute an agreement between the University of Washington—Seattle and the student.
The University

Founded in 1861, the University of Washington is the oldest state-assisted institution of higher education on the Pacific coast. From its original site on a ten-acre tract of wooded wilderness that is now located in downtown Seattle, the campus has grown to comprise 680 acres of trees, landscape, and buildings. Located between the shores of Lake Washington and Lake Union, it is in a residential section of the city that long has been considered one of the most attractive in the nation.

Enrollment at the University in autumn quarter 1993 was 34,000, of which 24,938 were undergraduates and the balance were in professional and graduate programs. Approximately ninety percent of the undergraduates enter as freshmen from Washington high schools or as transfer students from Washington community colleges or other colleges and universities in the state. The grade-point average for the regularly admitted freshman class entering in autumn quarter 1993 was 3.56. In 1993, the full-time teaching faculty of the University numbered 2,798 members.

The University recognizes as one of its highest educational priorities the need to increase the number of qualified minorities in certain academic fields and professions to which they have been historically denied access or have been traditionally underrepresented. Special educational support services are provided through the Office of Minority Affairs and the Graduate School's Minority Education Division to facilitate the entry of persons from underrepresented minorities and to enhance their likelihood of success while attending the University.

Academic Assessment

As part of an ongoing effort to assure the quality of the education received by its students, the University of Washington has instituted a comprehensive assessment program designed to measure student learning outcomes. This assessment program conforms with guidelines established by the state's Higher Education Coordinating Board. From time to time, students may be asked to participate in outcomes assessment by completing satisfaction surveys, sitting for achievement examinations, compiling portfolios of their academic work, or providing other academic performance indicators. The purpose of all such activities is to monitor the quality of our academic programs.

While it is a University requirement that students participate in these assessment activities when asked to do so, participants can be assured that assessment results will be treated in the strictest professional confidentiality. Whenever those results appear in University assessment reports or other public documents, they will be presented anonymously and in aggregate fashion.

Academic Sessions

University instruction is offered during autumn, winter, and spring quarters, each lasting approximately eleven weeks. The nine-week summer quarter is divided into two 4½-week terms.

Accreditation

The University is accredited by the Northwest Association of Schools and Colleges and is a member of the Association of American Universities. Individual schools and colleges are members of the various accrediting associations in their respective fields.

Academic Programs

The University offers a wide range of undergraduate, graduate, and professional degree programs at its Seattle campus. In addition to these programs, the following educational opportunities are available.

Branch Campuses

The University offers bachelor's and master's degree programs at two branch campuses designed to provide additional educational opportunities principally for residents of the Central Puget Sound region. The campuses are located in Bothell, 20 miles to the north of the Seattle campus, and in Tacoma, 40 miles to the south. Undergraduate programs at Bothell and Tacoma are offered at the upper-division level, for students who have already completed the first two years (90 credits) of undergraduate study. At the present time the following programs are available at both campuses: liberal studies; with concentrations in U.S. studies and international studies, leading to the Bachelor of Arts; business administration, with concentrations in marketing and management; leading to the Bachelor of Arts in Business Administration; nursing, designed for registered nurses, leading to the Bachelor of Science in Nursing; education, leading to the Master of Education. In addition, a teaching certificate program is also available at both campuses for students preparing to teach at the K-8 grade levels. Further information is provided in the University Branch Campuses section of this catalog.

Certificate Programs

UW Extension offers nearly forty carefully planned certificate programs of study in several areas. Some certificate programs address such personal interest areas as film, writing, and studio art. Other programs focus on specific careers or industries and offer specialized training that supplements other education and work experience. Students are prepared to enter new fields or to grow professionally. All certificate programs and instructors have been approved by the appropriate academic units. Programs are designed by advisory boards consisting of leading professionals in the field and UW faculty. To accommodate working professionals, UW Extension schedules most classes to meet evenings or weekends. Course fees and admission requirements vary, and enrollment in all certificate programs is limited. More information may be obtained by consulting the quarterly UW Extension catalog, available by telephone, (206) 543-2320.

Evening Classes

Opportunities for evening study at the University are varied to serve individual student interests and academic goals. Matriculated students may enroll in day or evening courses listed in the quarterly Time Schedule. For nonmatriculated (not formally admitted) students, UW Extension offers hundreds of evening credit courses and evening noncredit courses, which are described in the UW Extension section of this catalog. Matriculated students enrolling in courses listed only in the UW Extension catalog pay course fees in addition to regular tuition.

Evening Degree Program

Students can complete a bachelor's degree in the evening through the University of Washington Evening Degree Program on the Seattle campus. A wide variety of junior- and senior-level courses are scheduled for the convenience of evening degree students.

Evening students can earn baccalaureate degrees offered by the College of Arts and Sciences in anthropology, communications, English, general studies, history, political science, psychology, and sociology. The School of Business Administration will offer the Bachelor of Arts in Business Administration degree in the evening beginning autumn 1994. For an evening degree catalog, call (206) 543-2220 or 543-0898 (TDD).

Summer Quarter

During summer quarter, more than fifteen hundred courses in most major fields are available to graduate and undergraduate students pursuing degree programs on a year-round basis as well as to summer-only students seeking to broaden, intensify, or refresh their subject-matter competence. Summer-only students can apply for admission as nonmatriculated students, and can earn credits which may apply toward a degree at another college. The catalog also accommodates teachers and school administrators who take special interest courses to earn additional university credits and postbaccalaureate students who do not desire formal admission to a graduate, or second undergradu-
A unique UW program provides early University entry to exceptionally bright, highly motivated adolescents who are ready for college-level work by age fourteen, the usual age of entering high school. A transition school provides an intensive, one-year bridge to regular, full-time University enrollment; counseling support and a "home base" are also provided to full-time students. Information is available from the Halbert Robin Center for the Study of Capable Youth, Guthrie Annex II, 543-4160.

Office of Educational Assessment
Testing and educational evaluative services for University departments and individual students are available at the Office of Educational Assessment. Of particular interest to prospective and entering students are the office's programs for admissions testing, including the Scholastic Aptitude Test (SAT), and for placement testing in mathematics and foreign languages. For the University student approaching graduation, the office administers tests required for admission to graduate, law, medical, and other professional schools, as well as those tests often requested by prospective governmental or private employers. The office is located on the fourth floor of Schmitz Hall.

English As A Second Language Center
The English As A Second Language Center offers a variety of courses to nonnative speakers of English from many different countries. Additional information appears in the University Extension section of this catalog.

Hall Health Center
The University provides outpatient health and medical care for students through the Hall Health Center. Located on campus, the center is staffed by physicians and nurse practitioners and is accredited by the Accreditation Association for Ambulatory Health Care. Services include preventive care, health education, and diagnosis and treatment of illness or injury.

The following specialties are represented: chest disease, dermatology, family practice, minor out-patient surgery, gynecology, internal medicine, orthopaedics, physical therapy, psychiatry, and sports medicine. Common conditions in other specialties also may be treated. The Health Education staff offers a variety of health promotion services including providing learning resources, assistance with self-care, and educational programs.

All graduate and undergraduate students, registered for full- or part-time courses and paying student fees, are eligible for health service upon presentation of a current University student identification card. There is no charge for professional consultation by physicians or nurses. Moderate fees are charged for x-rays, laboratory tests, physical examinations, mental-health visits, physical therapy, allergy injections, and a few other services. Students must pay for outside laboratory and medical services and for prescriptions filled at the pharmacy.

Student health insurance, available through the University of Washington, should not be confused with services through Hall Health Center. A student may use Hall Health Center services without having student insurance. For major surgery and the occasional illness of exceptional severity that requires treatment elsewhere, the student should protect himself or herself against the expense by obtaining student health insurance. A low-cost medical-surgical-hospital policy, designed to meet those specific needs, may be purchased at the time of registration.

During autumn, winter, and spring quarters, the Hall Health Center is open Monday, Wednesday, Thursday, and Saturday from 9 a.m. to 5 p.m. and Tuesday from 9 a.m. to 6 p.m. During summer quarter the center is closed from 12 p.m. to 1 p.m. Emergency service is available at the Acute Care Clinic weekdays from 5 p.m. to 7 p.m.; Saturday, Sunday and holidays, from 10 a.m. to 6 p.m., during the regular school year; (Saturday, 9 a.m. to 12 p.m., during summer quarter.)

Additional information may be obtained from Hall Health Center, GS-10, University of Washington, Seattle, Washington 98195, (206) 685-1011.
symposia, and an active publishing program. The University's permanent collection includes a large research collection of ethnic textiles and Western dresses as well as a small but distinguished collection of European and American paintings, prints, drawings, photographs, and contemporary American ceramics and Japanese folk pottery. The collections are available for viewing by appointment: students, classes, and researchers. The Henry Gallery Association offers membership to students, faculty members, and the community for the purpose of supporting this multifaceted program. Open six days each week, the gallery is closed on Mondays and some holidays. UW students are admitted free.

**Intercollegiate Athletics**

The Department of Intercollegiate Athletics operates an integrated program for men and women. Intercollegiate competition is limited to full-time students. There are eleven women's teams: cross-country, soccer, volleyball, gymnastics, basketball, swimming, track and field, tennis, golf, softball, and crew. Women's competition is in the ten-team Pacific-10 Conference (Pac-10).

Ten sports are offered for men's competition: baseball, basketball, crew, cross-country, football, golf, soccer, swimming, tennis, and track and field. Men's teams compete on a full Pac-10 Conference schedule, as well as with other institutions locally, regionally, and nationally. The University is a member of the National Intercollegiate Athletic Association.

Facilities available to intercollegiate athletic teams are Hec Edmundson Pavilion, Pavilion Addition, Husky Stadium, Grande Ballroom and Field Complex, Conibear Shellhouse and other crew facilities on Lake Washington at the eastern boundary of the campus, the Lloyd Nordstrom Tennis Center, and a variety of golf courses throughout the greater Seattle area.

**Office of International Programs and Exchanges**

The Office of International Programs and Exchanges (OUI) administers and cooperates in more than forty international study programs in Latin America, Europe, the Middle East, Africa, and Asia. Qualified undergraduate and graduate students are enrolled concurrently at the University and abroad, earning UW credit and maintaining residency and financial aid eligibility. Quarter, semester, and academic year programs are offered. Opportunities for study include language and liberal arts courses (in English) in Avignon, Cologne, Guadalajara, Jerusalem, London, and Siena; advanced language programs requiring 2 to 3 years college-level language preparation in Beijing, Cairo, St. Petersburg, Mexico City, Nantes, Rennes, and Seville; and specialized professional programs in Denmark, England, Finland, and Japan. The University also has reciprocal exchange agreements with major research institutions abroad, including universities in Tokyo, Mexico City, Montpellier, Tashkent, and Tubingen and the Institut d'Études Politiques in Paris. These arrangements allow qualified UW students to enroll in regular courses at the foreign university and maintain full UW standing.

Many overseas programs are supported by scholarships from private endowments. Additional scholarship support is available to undergraduate students and special consideration is given to underrepresented minority students.

Program information and counseling are available in the Office of International Programs and Exchanges, 516 Schmitz, PA-10; telephone (206) 543-9272.

**Language Learning Center**

The Language Learning Center (LLC), located in the daylight basement of Denny Hall, provides support and services to the university community for the teaching, learning, and researching of languages and cultures. Available services include: audio cassette listening/recording facilities; duplication of audio cassettes onto user cassettes; safe of pre-recorded audio cassettes; facilities for viewing video tape, CD-ROM, laserdisc, and satellite materials; and access to foreign telecasts via satellite. The LLC has recording facilities and several electronic classrooms equipped with audio, video, and cable television equipment. Instructors can reserve the electronic classrooms for speaking/listening practice, viewing of foreign video tapes and satellite programming, informal conversation practice, and for the celebration of holidays of the world. Computer-Assisted Language Learning (CALL), integrated with digital multimedia, is available to students enrolled in targeted UW language classes for which programs have been developed.

**University Libraries**

The University Libraries, with more than five million volumes, consist of the Suzzallo Library, Odegaard Undergraduate Library, Health Sciences Library and Information Center, East Asia Library, eighteen branch libraries, and the Bothei and Tacoma Branch Campus Libraries. The University Libraries maintains nationally-ranked collections in fisheries, forestry, East Asian languages and literature, Scandanavian studies, and Slavic and South Asian area studies. In addition to books and periodicals, the libraries' holdings include archival materials and manuscripts, maps, newspapers, microforms, research reports, media materials, CD-ROMs, government publications, photographs, and architectural drawings. The online catalog is a fully integrated, computerized system that provides information and circulation status for the cataloged holdings of the University Libraries. The University Libraries and Computing & Communications are working together to provide electronic access to a multitude of information sources—online catalogs, journal databases, the daily news, the weather, an encyclopedia, the Internet—through UWIN (University of Washington Information Navigator).

The Suzzallo and Allen Libraries, a combined facility, houses the major social sciences and humanities collections. The Suzzallo Library serves as the central acquisitions and processing unit of the campus librarians' system and contains the interlibrary borrowing service, fee-based document delivery service (Library Express), and the public service divisions of Government Publications, Microform and Newspaper Collections, Reference and Research Services, Periodicals, and International Studies (Near East, Slavic and Eastern Europe, South Asia, and Southeast Asia). Reference assistance is available most hours the library is open. The Allen Library houses the Natural Sciences Library, the Special Collections and Preservation Division, which includes the Pacific Northwest Collection, and Manuscripts and University Archives. The Libraries' administrative offices are also located in Allen.

The Odegaard Undergraduate Library (OUGL) collection supports the undergraduate curriculum and is interdisciplinary, with an emphasis on materials in the social sciences and the humanities. The primary reserve unit for non-health sciences subjects is in OUGL. Media services and materials for course-related usage are provided in the University Libraries Media Center in OUGL. Almost all study materials needed by undergraduates may be found in this library. OUGL librarians also offer classes on how to use the library, including computerized indexes and search strategies for term papers.

The Health Sciences Library and Information Center (HSILC) collection houses the largest and most comprehensive collection of health sciences materials in the Pacific Northwest. The library supports education, research, and patient care in the fields of dentistry, medicine, nursing, pharmacy, public health, and social work, as well as in the related behavioral, biological,
and quantitative sciences. In addition to a print collection of almost 350,000 volumes, the library offers access to a wide range of non-print resources and provides extensive user services, including curriculumbased microcomputer instructional support; interlibrary loan services for health sciences personnel, and document delivery services for affiliates and non-affiliates. Services to faculty and students at Harbview Medical Center are provided through the K. K. Sherwood Library in Harbview Hall. Services to the School of Social Work are provided through a library located in the School of Social Work Building. HLSIC serves as headquarters for the National Network of Libraries of Medicine/Pacific Northwest Region (NNLM, PNR), with responsibility for promoting access to biomedical information resources in Alaska, Idaho, Montana, Oregon, and Washington. The library houses administrative offices for the UW Health Sciences Center IAIMS (Integrated Advanced Information Management System) program and the HLSIC/School of Medicine’s Research Funding Service.

The East Asia Library is one of the major resource centers of its kind in the United States and is an international leader in the provision and development of automated services for its subject areas. The collections are especially strong in anthropology, archaeology, economics, history, art, languages, literature, law, music, political science, religion, and sociology with respect to the histories and cultures of China (including Taiwan and Hong Kong), Japan, Korea, Inner Asia, and Tibet.

University Research Facilities

In addition to the campus facilities described in this section, the University has numerous educational and cultural resource centers. Academic or research facilities and facilities that are of general significance in all or many fields of knowledge throughout the University are listed in the Research section of this catalog; others are described in individual school or college sections.

University Theatres

The School of Drama operates three theatres: the Playhouse, with a thrust stage; the Penthouse Theatre, the first theatre-in-the-round built in America; and Meany Studio Theatre, which seats approximately three hundred and contains a proscenium stage. Faculty- and student-directed plays drawn from the full range of world dramatic literature are presented throughout the year.

The school also mounts annual productions in the two theatres of Meany Hall, and it gives technical and design support to opera and dance productions of the School of Music.

Women’s Center

The Women’s Center, located in Imogen Cunningham Hall, promotes the advancement of women on campus and in the community by offering a wide variety of non-credit workshops and classes. Free support services are available to both the campus and off-campus communities including an Information and Referral Service; financial aid and scholarship indexes; a re-entry program providing counseling and support for the older, returning student; a library; an art gallery; and conferences and events of interest to women.

Housing and Food Service

University-Owned Housing

Residence Halls

The University of Washington provides housing for about 4,000 students in seven residence halls. All are located within easy walking distance of classrooms and other campus facilities. Food service is available to residence hall students at locations throughout the campus through the use of A La Carte Plus™, a debit card system. Students live in an environment of responsibility freedom, and a residential life staff enhances the University experience through a variety of educational, cultural, and social programs.

Interest houses in the residence halls are available for students seeking a particular learning experience. These special living environments include Freshman House, Outdoor House, International House, and Russian House.

To obtain more information and applications for residence halls, call (206) 543-4059 or write to the Student Services Office, 301 Schmitz, PC-50, Seattle, Washington 98195.

Single-Student Apartments

The University also has apartments available for single students, twenty years of age or older. Stevens Court provides four- and six-bedroom apartments, that have private bedrooms, a common kitchen and living room, and bathrooms.

An application form or additional information on single-student apartments may be obtained by writing to the Student Services Office, 301 Schmitz, PC-50, Seattle, Washington 98195, or calling (206) 543-4059.

Family Housing

Convenient and economical apartment housing is available for about 550 student families. Community programs for adults and children are presented by the Family Housing and Single Student Apartments Residence Services Office. To obtain information about family housing facilities, eligibility requirements, and application procedures, write to the Student Services Office, 301 Schmitz, PC-50, Seattle, Washington 98195, or call (206) 543-4059.

Food Service

University Food Services operates dining facilities throughout the campus. The diverse schedules and dietary preferences of the campus community are accommodated by providing full meal service and a la carte menu items, and by keeping convenient hours of operation.

Food may be purchased through the A La Carte™ program at all University Food Services facilities and two on-campus convenience stores. This program, required for residence hall students and available to the entire campus community, offers prepaid meal service through the use of a debit card. The A La Carte™ program provides the flexibility for purchase of food at any of twelve locations on campus. For more information on the A La Carte™ program, call (206) 543-7222.

Transportation and the U-PASS

The U-PASS transportation program makes numerous commute options available at a deeply discounted price. With a U-PASS sticker, you gain access to unlimited rides on all Metro and most Community Transit routes, carpool parking, and the Night Ride (a night van service to nearby neighborhoods)—all for the price of the pass. In addition, the U-PASS subsidizes a vanpool program, and a number of local merchants offer discounts to pass holders. U-PASS funds have also provided bicycle improvements, including more secure racks, lockers, the East Campus bike route, and other safety improvements around campus.

Limited student parking is available for a daily fee in the Montlake lot on the east side of campus. Student carpools with three U-PASS holders may park free on main campus. Two-person U-PASS carpools may park free in the Montlake lot by arriving between 7:00 a.m. and 9:30 a.m. A few parking permits are available from the Parking Division to commuter students on a first-come, first-served basis the first day of each quarter.

For more information, visit a staffed Commuter Center at Parking Division, 3931 University Way, South Campus Parking, T-466A Health Sciences; or the HUB information desk. Unstaffed Commuter Centers, which contain brochures and bus timetables, are located at By George, Schmitz Hall, the Visitors Information Center, E Court (south entrance), South Campus Center, and the UW Medical Center main entrance.
Student Services

Office of the Vice President for Student Affairs

The Division of Student Affairs assists the University in fulfilling its academic mission by providing a broad range of services and programs designed to further the educational and personal development of students. The division consists of ten units: Admissions and Records, Center for Career Services, Student Counseling Center, Disabled Student Services, Housing and Food Services, International Services Office, Recreational Sports Programs, Student Financial Aid, Student Publications, and Student Activities and Union Facilities.

Students are encouraged to contact the Office of the Vice President for Student Affairs, 543-4972, 476 Schmitz, for information concerning various aspects of extra-class life at the University.

Center for Career Services

The University's Career Center, which includes a Minority Job Placement Program, offers career information and services to assist undergraduates, graduate students, and degree- or certificate-holding alumni (1) to make a viable connection between their academic backgrounds and their career or long-range employment objectives, (2) to develop effective job-seeking strategies, and (3) to find suitable employment upon leaving the University or to change employment thereafter. A variety of programs are offered and include individual and group career counseling, job search seminars, career-related internships, campus interviews, and summer employment listings. A 24-hour telephone jobline to access internship and noncareer-related jobs is also available.

Students are encouraged to begin using the services of the center early in their academic careers. This is best accomplished by visiting the center at 301 Loew Hall or calling 543-0535 to make an appointment with a career counselor.

Childcare Program

The Childcare Program provides eligible student-parents with direct financial assistance to purchase services at licensed childcare facilities in the Seattle-King County area. To apply, students must submit the Free Application for Federal Student Aid (FAFSA) to the designated processor and a Childcare Request Application to the Childcare Office, 466 Schmitz. Brochures describing the program are available at 466 Schmitz, 543-1041.

Student Counseling Center

All matriculated students at the University may make use of the services of the Student Counseling Center and its staff of psychologists and counselors to discuss educational progress, personal concerns, or career goals. Individual, couples, and group counseling is provided for a variety of issues including academic, career, personal, and social. Psychological tests, when necessary, are provided as part of the center's counseling service. Also available is an interactive computer-assisted career guidance and information system (SIGI-PLUS). The video, Where There's A Will, There's An A, is a component of academic counseling. Workshops on special topics such as test anxiety, time management, and stress management are also available.

Students are not charged for the first assessment appointment, which is provided to determine if the Student Counseling Center's services are appropriate. Individual appointments after the first visit currently cost $16 each. Fees for participation in the group program range from $40 to $80. For students financially unable to pay the fee, efforts are made to find other alternatives. The center is located on the fourth floor of Schmitz Hall.

Treatment for substance abuse and long term therapy (beyond fifteen sessions) is not provided.

Disabled Student Services

The University provides program access to students with either permanent or temporary disabilities through a variety of services and equipment. The Disabled Student Services (DSS) office coordinates academic accommodations for enrolled disabled students. Accommodations may include classroom relocation, sign language interpreters, recorded course materials, notetaking, and priority registration. DSS also provides needs assessment, mediation, and referrals. Services must be arranged in advance and require documentation of the disability.

Technical and adaptive equipment is available through both DSS and Computing & Communications. Information and equipment locations on campus may be obtained from DSS. Publications include: Access Guide, (showing classroom access, elevator locations, ramps, parking, and restrooms), Campus Mobility Map, Adaptive Equipment List, and a quarterly newsletter.

To the maximum extent possible, disabled students are integrated into the general student population and their problems are solved through the usual channels. Various other departments offer additional services: Transportation Department provides free on-campus transportation with wheelchair lifts through Dial-a-Ride, (telephone 685-1511), UW Night Ride (after 6 p.m.) telephone 799-4151), and Disabled Student Commission.

An accident and sickness insurance plan is available for matriculated University students (Seattle campus) and their dependents on a voluntary basis. A student may enroll in the plan at the time of registration each quarter. The appropriate premium must be paid by the quarterly tuition due date. Brochures describing the insurance eligibility, coverage, and costs are available at the Student Insurance Office, 466 Schmitz, telephone (206) 543-6202, Hall Health Center, HUB, and information window in Schmitz Hall.

The University also sponsors a field-trip accident insurance plan. Application forms may be requested from the Risk Management Office, 22 Administration, AD-76, telephone (206) 543-3419.

Insurance for Foreign Students

All students from foreign countries are required to have a health-and-accident insurance policy in force while registered at the University. This may be achieved by purchasing either the student accident and sickness insurance offered through the University or other coverage, of which proof must be furnished to the International Services Office and for which an insurance waiver must be obtained. To avoid cancellation of registration, international students must pay tuition and either pay for the University-sponsored insurance or have a waiver on file by the tuition due date.

International Services Office

The International Services Office provides assistance to international students, scholarships, and faculty in meeting United States Immigration and Naturalization Service regulations dealing with such matters as maintaining lawful status, extensions of stay, transfers of schools/programs, and working authorizations. This office also provides a formal orientation to the campus and community for new students and visiting faculty; advice and counsel for educational, financial, and personal problems; dissemination of important and timely information through newsletters and workshops. The office is located in 459 Schmitz, 543-0840.

Office of Special Services

The Office of Special Services, 460 Schmitz, assists students eligible for veterans' educational benefits, including tuition or fee reductions; advises and monitors students who must meet English As A Second Language requirements; and administers other tuition reduction programs (see Procedures and Fees section below).

Office of Student Financial Aid

The Office of Student Financial Aid, 105 Schmitz, administers federal, state, and private financial aid programs designed to help students pay for their education. Assistance is offered in the form of grant aid, scholarships, long-term loans that must be repaid after leaving school, and work opportunities. An information packet describing the different programs, eligibility criteria, and application procedures may be obtained by telephoning, (206) 543-6101.

Both undergraduate and graduate students may apply for aid through the Office of Student Financial Aid; graduate student assistance is generally limited to long-term loans and work opportunities. Information on graduate fellowships, scholarships, and teaching and research assistantships may be obtained from the graduate program coordinator in the individual department or program (see Graduate School section of this catalog).
THE UNIVERSITY

Student Organizations

Students at the University are encouraged to become active in at least one of the campus’s approximately three hundred voluntary student organizations, which include honorary, professional, and social organizations; service and coordinating clubs; activity groups; and religious and fraternal organizations. Voluntary student organizations that register with the University receive various benefits and services to assist their respective activities. Additional information is available from the Student Activities Office, 207 HUB, telephone 543-2380.

Associated Students, University of Washington

The Associated Students, University of Washington (ASUW), is a voluntary, nonprofit association of students designated by the University Board of Regents to carry out a variety of student activities and to represent student interests. In order to vote in ASUW elections, hold ASUW office, or be employed by the ASUW, a student must be a member of the ASUW. Membership is open to all students by providing an affirmative answer on the University registration form each quarter.

The ASUW has an annual budget of approximately $1.2 million, supported by the services and activities fee paid as part of tuition and from program revenue. The government of the ASUW is headed by an eleven-member board of control elected by the student body each year, and one representative from the Graduate and Professional Student Senate. The ASUW maintains agencies and service groups to provide students with a varied program of activities during the school year and nominates students for service on a number of University committees. ASUW services include lecture notes, a poster printing service, Experimental College, bicycle repair shop, and a writing lab. Questions regarding the ASUW and its services should be directed to either the ASUW office, 204L HUB, telephone 543-1792, or the Student Activities Office, 207 HUB, telephone 543-2380.

Graduate and Professional Student Senate

The Graduate and Professional Student Senate (GPSS) serves primarily as an advocate for the academic welfare of graduate and professional students. It is composed of representatives elected from each graduate and professional degree-granting unit. Funded from student services and activities fees, GPSS dedicates a portion of its budget each year to direct allocations for departmental student groups and for special programs benefiting students from many departments. GPSS publishes informational bulletins, monitors legislative issues, and represents student interests to the University Board of Regents. GPSS maintains a graduate student representation on University administrative committees, assists with personal or academic grievances and, in general, seeks to represent graduate student issues and concerns within the University community. Questions regarding the GPSS should be directed to either the GPSS office, 300 HUB, 543-8576, or the Student Activities Office, 207 HUB, 543-2380.

Recreational Sports

The Department of Recreational Sports Programs provides a comprehensive program of over 60 sports and fitness activities designed to meet the diverse needs and interests of students. To provide this service, the department manages recreation facilities that include the Intramural Activities (IMA) Building, Golf Driving Range, Waterfront Activities Center, outdoor facilities (Denny Field and tennis courts), swimming pool and locker rooms at Hutchinson Hall, and the Practice Climbing Rock. A varied program of intramural sports, co-recreational activities, sports skill classes, club sports, special events, and general recreation is open to every student with a valid student identification card. Non-credit instruction is offered in aerobics, archery, conditioning, dance (jazz), fencing, golf, gymnastics,
THE UNIVERSITY

hydro-aerobics, judo, karate, racquetball, rock climbing, roller skating, ski conditioning, skin diving and scuba, soccer, springboard diving, squash, swimming, tae kwan do, tennis, volleyball, and weight training.

Club sports exist for aikido, archery, climbing, cycling, fencing, gymnastics, ice hockey, judo, karate, kayaking, kendo, kung fu, lacrosse, racquetball, rowing, rugby, sailing, synchronized swimming, skiing, skin diving and scuba, soccer, squash, tae kwan do, volleyball, and water polo.

Intramural sports are offered for men, women, and men and women combined (Co-Rec) in a variety of activities, including basketball, bowling, flag football, innertube basketball, soccer, softball, swimming, tennis, track and field, ultimate frisbee, and volleyball, as well as a variety of special events. More information regarding these programs may be obtained by telephoning Intramural Sports, 543-8558; Club Sports, 543-9499; Instruction, 543-2571; IMA Building, 543-4590, Waterfront Activities Center, 543-9433; or the Golf Range, 543-8759.

Student Rights and Responsibilities

Student Conduct Code

The University Board of Regents has adopted a Student Conduct Code, which applies to both academic and nonacademic conduct for students while in attendance at the University. The code specifies standards of conduct, jurisdiction for hearing disciplinary matters, and due process. Interested students may obtain copies through either their advisers or the Office of the Vice President for Student Affairs, 476 Schmitz.

Computer Use and Software Copyright Policy

All faculty, staff, and students who use any computer at the University are responsible for using computer resources in an ethical and legal manner. For more detailed information, contact Computing & Communications at 543-5970.

University Policy on Student Education Records

A copy of the University's policy on a student's right to inspect his or her education records and the University's responsibility to maintain the confidentiality of such records is located at each departmental reference station. The policy is filed under the Washington Administrative Code 478-140-010. Copies of the policy are available at the Registration Office, 225 Schmitz.

Sexual Harassment Grievance Procedure

Students and members of the faculty and staff who wish to file a complaint regarding sexual harassment may contact either of two offices: Ombudsman for Sexual Harassment, 543-0283, or Human Rights Office, 4045 Brooklyn Avenue Northeast, 543-7217. Personnel in these offices are available to discuss and provide assistance in resolving such complaints.

Office of Minority Affairs

The Office of the Vice President for Minority Affairs provides a variety of services to underrepresented minority students and to students from economically and educationally disadvantaged backgrounds. These services include statewide recruitment, admissions, tutoring, and a counseling service that offers academic advising and help with financial aid, housing and other kinds of University-related problems. The Office of Minority Affairs (OMA) also maintains two outreach programs: Upward Bound and Early Scholars Outreach. The Early Identification Program (EIP) is a graduate school preparation program for minority students interested in earning postbaccalaureate degrees. It particularly encourages students to aim for the doctorate and faculty careers. EIP provides enrichment opportunities, including exposure to research processes, faculty mentors, seminars, and advising, as well as assistance with the graduate school admissions process.

The Ethnic Cultural Center (ECC) is a facility for student-organized events and activities. Nineteen of the University's minority student organizations reside at the ECC as their center of activity. The staff of the Center offers students opportunities for the development of organization and leadership skills through the planning and implementation of cultural, social, student government, and career development programs. The Ethnic Cultural Center complex also maintains a theatre and offers opportunities for students interested in creating on-stage productions and other programs.

The Office of the Vice President for Minority Affairs is located on the third floor of Schmitz Hall.

The Office of the Vice President for Minority Affairs is located on the third floor of Schmitz Hall.
Procedures and Fees

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in, and the graduation from, the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students will follow the University regulations and procedures as they are stated in the General Catalog. Appeals may be filed with the student's Dean or with the Vice President for Student Affairs in nonacademic matters.

Registration

The University provides registration services through STAR (Student Telephone Assisted Registration), a touchtone telephone registration system. This system allows students to register at the University from any touchtone telephone.

Detailed information and procedures pertaining to registration and withdrawal are outlined in the quarterly Time Schedule.

Registration Period I

Designed to accommodate currently registered matriculated students and students eligible to register under the Quarter Off Eligibility Policy, Registration Period I occurs during the latter half of the quarter preceding the quarter for which the student is registering. However, currently enrolled students registering for autumn quarter do so in spring quarter.

Registration Period II

Registration occurs after Registration Period I closes and is intended primarily to accommodate new and returning students. Continuing students who fail to register during Registration Period I may register during this phase.

Registration Period III

Students who have been admitted may register late, but are charged a late registration fee.

Registration Period IV

Period IV is open for dropping courses through the seventh week of the quarter. No adds or registrations are accepted. A $20 change fee will be assessed for all registration changes occurring during the same day.

Faculty/Staff and Washington State Classified Employee Tuition Exemption Programs

Eligible faculty and staff, including state classified employees may enroll for limited credits each quarter under these tuition exemption programs. Because such students are registered on a space-available basis, they must register after other students. The quarterly Time Schedule lists registration dates when students enrolling under these exemption programs may register. Eligibility information may be obtained from either the Staff Training and Development Office or the Registration Office.

“Access” Program for Older Adults

The University of Washington allows Washington residents sixty years of age or older to audit certain courses on a space-available basis. Students who attend the University under the Access program are limited to two courses per quarter. There is a nominal registration fee. As auditors, students do not receive credit and do not complete laboratory work or take examinations.

Change of Registration to Drop or Add Courses

1. Registered students may add and drop classes during Registration Periods I, II, or III. Instructions are available in the quarterly Time Schedule.

2. All students may add and drop courses through the second week of the quarter and drop courses through the seventh week of the quarter by following instructions in the quarterly Time Schedule. A $20 change fee is assessed for any number of add, drop, or change transactions processed during a given day beginning the eighth calendar day of the quarter. No adds are accepted after the twelfth calendar day of the quarter.

Adding Courses/Permission Guidelines

For reasons of public safety and instructional quality, it is important to limit course enrollment to no more than the approved classroom capacity. Toward this end, the Office of the Registrar monitors course enrollment and accepts student registration in fully enrolled courses according to the following guidelines:

1. Through the second week of the quarter, department may choose to overload courses up to 115% of the room capacity to offset expected student course drops and withdrawals as demonstrated by past experience.

Students must secure entry codes from instructors or departments and use STAR for adding closed courses. However, if enrollment is at 115% of room capacity, registration requests are denied. Students should be informed when receiving entry codes to overload courses. That registration is not guaranteed if enrollment exceeds 115% of room capacity.

If centralized room capacity records do not correctly reflect the actual seating capacity, notification should be made to Room Assignments in the Office of the Registrar.

2. Generally, course adds are not accepted after the second week of the quarter. However, situations may arise that necessitate an exception, such as a student needing a course to graduate in the current quarter. In this case, students must complete a "Late Add Petition" form and obtain the signatures of both the instructor and the department chair. Forms are turned in to the Registration Office, and if approved, the course is added to the student's schedule within two working days. Department chairs should, in no case approve a late add after the second week of the quarter if the class is enrolled at 100% of room capacity.

3. An audited course may not be changed to credit registration after the first two weeks of the quarter. Credit courses may be changed to audit through the seventh week of the quarter. A change to audit after the second week of the quarter is treated as a course drop. See below for transcript entry.

Dropping a Course

Undergraduates dropping a course during the first two weeks of a quarter shall have no entry on their permanent academic transcript. If all courses are dropped, then a complete withdrawal date is recorded on the transcript.

A course drop made during the third through the seventh week of the quarter is recorded on an undergraduate student's transcript with a W grade and a number designating the week of the quarter in which
PROCEDURES AND FEES

the course drop was transacted. A W grade only is recorded on the transcript of graduate or professional students.

A student who does not drop a course officially through STAR or the offering department is given a grade of 0.0.

Students receiving or applying for financial aid should check with the Office of Student Financial Aid, 105 Schmitz, telephone 543-6101, before dropping a class because it may affect their eligibility.

Complete Withdrawal

From the University

for a Registered Quarter

Once registered, a student must officially withdraw if he or she later chooses not to attend the University for the registered quarter. Official withdrawal must be made by the fifth day of the quarter for the student to avoid further financial obligation (see Tuition, Fees, and Special Charges for refund information on withdrawals).

1. To be official, a withdrawal from the University must be turned in at the Registration Office, 225 Schmitz. Withdrawal forms are available at advising offices and the Registration Office. An official withdrawal is effective the day it is received in the Registration Office, or if submitted by mail, the date of the postmark.

2. Students who drop the last course on their schedules on STAR will be considered withdrawn for the quarter. Students who drop courses beginning the eighth calendar day of the quarter are charged $20 per day for any course drops.

3. Submission of a graduate On-Leave application does not constitute official withdrawal from the University.

4. Refer to grading section in the Undergraduate Study or the Graduate School: Graduate Study sections.

5. Recipients of veterans' benefits should immediately notify the Office of Special Services of withdrawal.

6. Students with a scholarship or loan awarded through the University should notify the Office of the Registrar when their address changes. Call the Admissions Office.

7. Students who withdraw due to conscription into the armed forces or who are called to active duty military service may be entitled to either a full refund of tuition and fees or academic credit, depending on when in the quarter official withdrawal occurs. Students should contact the Registration Office for complete information.

Credits Required for Full- or Half-Time Status Requirements

Some agencies require that a student have full-time status to receive maximum benefits. To be classified as a full-time student by the University, an undergraduate or professional student must register for and complete at least 12 credits per quarter and a graduate student must register for and complete at least 9 credits per quarter. To be classified as a half-time student by the University, an undergraduate or professional student must register for at least 6 credits per quarter and a graduate student must enroll for at least 5 credits per quarter.

Address Change

Students are responsible for notifying the Office of the Registrar when their address changes. Call the Address Change Telephone Service at (206) 543-3988 twenty-four hours a day, seven days a week or visit the Registration Office in 225 Schmitz to keep your ad-

dress current. The mailing of notices to the last address on record constitutes official notification.

Restrictions on Attending Classes

No person, other than a faculty member attending informally with the approval of the instructor, may attend a University course in which that person has not been registered.

An instructor may allow a student to attend his or her class only if the student's name is on the official class list from the Office of the Registrar.

Student Identification

New or returning students should come to the Student ID Card Center, 229 Schmitz, to be issued a permanent student identification card. A quarterly validation sticker is mailed with the registration confirmation to each registered student. The student ID card is used for a variety of campus services. It is the student's means of identifying his or her status as a student at the University.

Registered students whose identification cards have been lost or stolen can have them replaced at the Student ID Card Center. Students who request such replacement are charged a nonrefundable fee. Replacement of cards made invalid by changes in a students' name or rendered unusable by normal wear and tear is provided without charge upon return of the original card to the Student ID Card Center. Two pieces of identification (one with a photo) are required to obtain a replacement card.

Cards that have been tampered with or misused may be confiscated by the University agency or department involved. The incident may be referred to the Office of the Vice President for Student Affairs for appropriate University action.

Transcripts

Official copies of student academic records at the University of Washington must bear the official seal of the University, the signature of the Registrar, and the date of issue.

Transcript Fee

A charge of $4, payable to the Transcript Office in advance, is required for each transcript.

Transcripts From Other Schools

A transcript covering a student's previous secondary and college education that has been submitted to the University as a requirement for admission becomes part of the official file and is not returned to the student. Any student who desires transcripts of his or her course work undertaken elsewhere must order official transcripts from the institution. The University does not issue or certify copies of transcripts from other institutions.

Tuition, Fees, and Special Charges

Estimated Expenses

The cost of a student's education at the University varies, the amount depending on his or her classification, status as resident or nonresident, and field of study. In computing college costs, a student should consider such additional expenses as insurance coverage, books, and laboratory supplies. Personal expenses (e.g., clothing, laundry, recreation, and transportation), which vary with each individual, as well as between-quarter expenses, should not be overlooked.

The following figures are prepared and updated each year by the Office of Student Financial Aid and reflect modest, but adequate, probable costs for students attending the University during the nine-month academic year. They should be used only as a guide in determining the year's expenses.

PROCEDURES AND FEES

Enrollment Confirmation Deposit
A new or returning former student or a continuing student in a new classification (e.g., undergraduate, post-baccalaureate [fifth-year], graduate) is required to confirm his or her intention to enroll by paying a nonrefundable $100 Enrollment Confirmation Deposit (not required of students admitted summer quarter). The $100 is applied toward tuition and fees assessed for the quarter for which the student is determined to be admissible and subsequently enrolls. A student who pays the fee for a given quarter but does not register in that quarter is not entitled to refund except by petition in the situations listed below:

1. A new or returning matriculated student who is unable to obtain courses required for the completion of the degree or certificate program, or courses which are determined by an appropriate academic adviser to be acceptable alternate courses. A written verification from the appropriate academic adviser must be attached to this petition. Such requests for refund must be submitted by Friday of the second week of the quarter.

2. A new or returning matriculated student who, after meeting with an appropriate academic adviser, determines that the program for which admission has been granted differs substantially from what the student was led to expect based upon earlier available information, is eligible for a refund of the Enrollment Confirmation Deposit. This petition for refund must be submitted before the student registers for courses and in no case later than the first day of the quarter for which admission has been granted. A written verification from the appropriate academic adviser must be included.

3. A new or returning student who applies by the prescribed deadline for financial aid administered by the University’s Office of Student Financial Aid, and who cannot be awarded financial aid adequate to his or her needs as determined by that office, and who is therefore unable to attend the University, is eligible for a refund of the Enrollment Confirmation Deposit. This petition and a copy of the Notice of Award and Acceptance must be submitted no later than two weeks after receipt of notice of the financial aid award.

4. A new or returning student who is unable to attend the University because of pregnancy, disability, or death, or because of being called involuntarily into the military service of the United States or its civil guard, may be refunded the Enrollment Confirmation Deposit. Documentation is required.

Fee Payment
An obligation to pay tuition and fees in United States dollars is incurred when a student registers. A fee statement is mailed to the student's address on file in the Registrar's Office.

Payment of this obligation is due by Friday of the third week of the quarter. Nonpayment of tuition and fees by the due date results in: (1) charge of $10 to $30 for late payment, if payment is received within the one-week late payment period; (2) cancellation of registration, if payment is not made by the end of the fourth week. One-half of tuition is assessed when registration is canceled for nonpayment of tuition and fees. The Summer Quarter bulletin and Time Schedule should be consulted for fees and fee payment schedule applicable to summer quarter only.

When the payment is not in conformance with the tuition and fee billing, specific instructions on how the payment is to be applied must accompany the payment. In the absence of instructions, the University makes a default interpretation of the student's intent and accounts for the funds accordingly. The student number must be specified on all payments.

*Does not apply to first professional/majors students.

Fees are subject to change without notice.

Tuition rates for resident and nonresident students apply to the academic year (autumn, winter, and spring quarters). Summer quarter tuition is listed in the Summer Quarter bulletin and Time Schedule. Except for students in the Schools of Dentistry or Medicine, nonresident students are charged resident tuition during summer quarter.

Special Course and Laboratory Fees
The amounts listed above cover normal University charges for course registration. Some courses, however, have extraordinary expenses associated with them, and in such cases the University may charge additional fees in amounts that approximate the added instructional or laboratory costs.

Other Fees
Auditors: There is no reduction in fees for auditors.

Admission Application Fees: Undergraduate, $35; Graduate, $35; Medicine, Dentistry, $35; Law, $50. Former students returning in the same classification, $35.

On-Leave Registration Fee: This fee of $35, charged graduate students only, provides for a maximum On-Leave registration period of four successive academic quarters or any part thereof and is not refundable.

Late Registration/Reregistration Fees: A late registration service charge of $25 is assessed when a student registers for the first time after the last scheduled day of Period II registration and through the tenth day. Students registering after the tenth day may pay a $75 late registration fee. A student who must reregister as a result of a cancellation for nonpayment of tuition must also pay a $75 fee. Waiver or refund of the registration service charge may be petitioned in the Registration Office. Waiver or refund of the $75 reregistration fee may be petitioned in the Student Accounts and Cashiers Office.

Change of Registration Fee: A charge of $20 is made for any number of add, drop, or change transactions processed during a given day beginning the eighth calendar day of the quarter.

Transcript Fees: A charge of $4, payable to the University's Transcript Office in advance, is required for each transcript.

Thesis and Dissertation Fees: Publication binding fee, $25; dissertation microfilming fee, $52; abstract-only microfilming fee, $50; optional copyright service fee, $35.

Replacement Fees: Duplicate diploma, $10; student identification card, $5 (non-photo), $10 (photo).

Credit by Examination Fee: In order to obtain credit for independent study, a regularly admitted and currently enrolled student may take an examination prepared by the department concerned. The fee is $25 per examination. Appropriate forms must be obtained from the Graduations and Academic Records Office, 264 Schmitz.

U-PASS Fee: A U-PASS validation sticker is mailed quarterly with a student's registration confirmation. The U-PASS is valid on all Metro and most Community Transit routes at all times and provides parking privileges to carpoolers, riding privileges to vanpool and Night Ride passengers, and merchant discounts. The quarterly fee of $27 is included on the tuition bill. Students who do not wish to participate in the U-PASS program must return the validation sticker to the University by the tuition payment deadline. The sticker can be returned by mail in the return envelope provided, or mailed with the tuition payment, or returned in person at the Student Accounts and Cashiers Office. For further information consult the quarterly Time Schedule.

All fees are subject to change without notice.

Cancellation of Tuition
Registered students must pay full tuition and fees. Tuition may be canceled or reduced if a student makes an official withdrawal or drops a course during the period specified by state statute. Refunds are given when a cancellation or reduction results in an overpayment.

Continuing Students
1. A student who withdraws on or before the seventh calendar day of the quarter does not pay tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition.
3. A student who withdraws after the thirtieth calendar
day must pay full tuition.

New and Returning Students
1. A student who withdraws on or before the seventh
calendar day forfeits the $100 Enrollment Confirmation
Deposit but does not pay the regular tuition.
2. A student who withdraws after the seventh calendar
day through the thirtieth calendar day of the quarter
must pay one-half tuition. The $100 Enrollment Confi-
rmation Deposit is applied toward payment of tuition.
3. A student who withdraws after the thirtieth calendar
day of the quarter must pay full tuition. The $100 Enroll-
ment Confirmation Deposit is applied toward payment
of tuition.

Fee Forfeiture
A student who does not completely withdraw but is
dropping one or more courses may be eligible for lower
tuition, depending on the total number of credits re-
main ing after the course drop and on the time period
when the drop was made. Tuition for students making a
course drop on or before the seventh calendar day of
the quarter is determined by the total credits remain-
ing. Tuition for students making a course drop after
the seventh calendar day through the thirtieth calendar
day of the quarter is computed on the total credits re-
main ing plus one-half the difference between the old
tuition and the new tuition. There is no cancellation or
reduction in tuition for courses dropped after the thirti-
eth calendar day of the quarter.

Fee Refund
When a fee payment is made by check, a waiting pe-
riod is required before a refund can be authorized. An
application for refund may be refused, unless it is
made during the quarter in which the fees apply. A stu-
dent who withdraws for disciplinary reasons forfeits all
rights to refund or cancellation of any portion of his or
her fees.

Financial Obligations
The Comptroller is authorized to place a hold (adminis-
trative) on the records of any student who fails to pay
amounts due the University.

Until this hold is cleared, the University (1) does not
release the student's record or any information based
upon the record, (2) does not prepare transcripts or
certified statements, and (3) denies registration.

In cases of serious financial delinquency, the Com-
ptroller, with the consent of the Registrar, may order that
a student's registration be canceled and that privileges of
attendance be withdrawn.

Tuition and fees not paid by the end of the academic
quarter are subject to an interest charge of 1 percent
per month, or a fraction thereof (12 percent APR), be-
ginning the month following the end of the quarter.

An administrative hold or cancellation also may occur
when a student has not complied with other University
rules, procedures, or obligations. The hold may be
placed on the student's record by the authorized Uni-
versity office responsible for enforcement of the rule,
procedure, or obligation involved. The student is not
permitted to register for any subsequent quarter or to
obtain a transcript of his or her record or a certified
statement except on the written release of the office
that placed the hold.

Residence Classification
Requirements
Residence classification information is available from
the Graduations and Academic Records Office, 264
Schmitz.

Veterans and Children of
Totally Disabled Veterans and
Personnel in the Armed Forces

Information on educational benefits and tuition re-
duction programs for veterans and their dependents
is available from the Office of Special Services, 460
Schmitz.

Veterans and members of the armed forces who apply
for admission to the University are subject to the
same minimum requirements as regular students and
are expected to enroll in accordance with University
requirements.

The University's academic programs of study are ap-
proved by the Washington State Higher Education Co-
rating Board's State Approving Agency (HECB/ . SAA) for enrollment of persons eligible to receive edu-
cational benefits under Title 38 and Title 10 USC.

Tuition Reductions
The following categories of students may be eligible for
reduced tuition and fees. Students in these categories
may contact the offices shown either for information on
the reduction or to obtain the appropriate form to apply
for the reduction. Most of the reductions must be re-
newed before the beginning of each quarter. The vari-
ous categories of reductions are established by legis-
lative mandate and may be revoked by the legislature
at any time.

Undergraduate Academic Services

34 Communications

Director
Louis Fox

Scholarship Program

Coordinator
Lori Collander

The Undergraduate Scholarship Program provides information to current University of Washington undergraduates about various merit-based scholarships, including quarterly newsletters, scholarship workshops, and applications and information.

New-Student Programs

Director
Michaelann Jundt

New-Student Programs facilitates student transition to the University of Washington through Orientation Programs, Freshman Seminars, and Freshman Interest Groups.

Edward E. Carlson Leadership and Public Service Office

Director
Kim Johnson-Bogart

The Carlson Leadership and Public Service Office coordinates service and service-learning programs that enable students to volunteer with community-based human service or environmental agencies. Opportunities include tutoring or mentoring school children individually, in small groups, or as part of a course.

The Internship Program provides students with information about local, national, and international internships; how to obtain an internship; and how to arrange credit.

Freshman Interest Group Program

Director
Louis Fox

Freshman Interest Groups (FiGs) make the University smaller and less imposing by providing incoming freshmen a chance to meet, discuss, and study with other freshmen who have similar interests. The program runs each autumn quarter for that quarter only.
Each FIG consists of twenty to twenty-four students who share a cluster of two or three courses organized around a common theme, such as international relations, pre-engineering, or origins of Western civilization. In all cases there is at least one class (usually English composition) in which members of the group are the only members of the class.

In addition to sharing the same classes, students in each FIG attend a weekly freshman pro-seminar (G ST 199), led by a peer adviser, whose major or background is relevant to the group’s theme. These sessions give students an opportunity to get valuable insights into making the best use of campus resources, understanding university rules and procedures, and improving study skills. Of equal importance, FIGs help with adjustment to college by providing a support group of other freshmen as well as the knowledge and experience of a peer adviser. Students exchange their ideas and impressions about their courses, meet as a small group with their professor, and attend various social and cultural events together.

**Undergraduate Advising Center**

9 Communications

**Director**
Richard Simkins

**Associate Director**
Richard Newcomb

**Academic Counselors**
Diccon Conant
Nancy Hennes
Janet Kime
Beret Kischner
Lindsay Michimoto
Kelli Jayn Nichols
Deborah Prince-Fenner
Jeanne Sauvage

Students who do not make a definite choice of major when entering the University are designated premajor students. An adviser in the Undergraduate Advising Center will assist them in designing a program of studies that will meet general requirements and provide them with information about possible major fields. The Undergraduate Advising Center also provides the following: assistance in exploring academic options; information about degree programs; preprofessional advising for such areas as medicine, dentistry, law; options for students on academic probation; preliminary career counseling; a wide range of information on registration, course offerings, degree requirements, and administrative procedures. Premajor students normally select a major by the time they have earned 105 credits. Transfer to a department major from premajor status requires completion of prerequisite courses, attainment of a minimum specified GPA, or selection by the department from among a group of prospective majors.

**University Honors Program**

**B102 Padelford**

**Director**
John S. Edwards

**Associate Director**
Randolph Y. Hennes
B102 Padelford

The four-year Honors Program features special counseling, honors courses, honors sections of regular courses, faculty/student colloquia, and opportunities for independent study. It provides expanded opportunities for undergraduate education to those students who show exceptional intellectual promise.

**Admission Requirements:** To be considered for admission to the University Honors Program at entrance, students must apply during their final high school semester to the Director of Honors. Selection is based on high school records, test scores, and recommendations from the secondary school. Students also may seek admission based on superior academic performance during their freshman year at the University.

**Graduation Requirements:** The University Honors curriculum consists of two parts: a general education component and a component in the student’s major department. The general education component, which satisfies Areas-of-Knowledge requirements, consists of three sequences of courses, each lasting three quarters. One of these sequences is taken in Western Civilization, one in World Civilization, and one in the Natural Sciences. Each sequence carries 15 credits total. In addition, students complete one honors writing link (5 credits) and 4 additional credits of honors seminars.

The second component begins when a student, usually by the junior year, is accepted into a department that offers an honors curriculum. Such a student is graduated “With College Honors” in the appropriate discipline. A student who is not a member of the University Honors Program but who demonstrates superior abilities in a particular field of study may, at the invitation of that department, participate in a departmental honors curriculum and receive a degree “With Distinction” in the major field.

An honors degree can be earned through the following departments and programs within the College of Arts and Sciences: Anthropology; Art History; Asian Languages and Literature; Atmospheric Sciences; Biology; Botany; Chemistry; Classics; Comparative History of Ideas; Comparative Literature; Comparative Religion; Computer Science; Economics; English; General Studies; Geography; Geological Sciences; Germanics; History; International Studies; Japan Studies; Linguistics; Mathematics; Microbiology; Music; Near Eastern Languages and Civilization; Philosophy; Physics; Political Science; Psychology; Romance Languages and Literature; Russian, East European, and Central Asian Studies; Scandinavian Languages and Literature; Slavic Languages and Literature; Sociology; Speech and Hearing Sciences; Speech Communication; Women Studies; Zoology.

An honors degree may also be earned through the College of Engineering.

By special arrangement, it is possible for students to complete a degree “With College Honors” in departments not offering a formal honors option.

**College Studies Program**

**B103 Padelford**

**Director**
Leroy Searle

Students may fullfil all or part of the general education requirement in certain schools or colleges of the University, by selecting sequences from the College Studies Program.

(1) A 15 credit College Studies sequences may substitute for a regular 20 credit Areas-of-Knowledge requirement in one or more of the following: Visual, Literary, & Performing Arts; Individuals & Societies; the Natural World.

(2) Students who satisfy all three Areas-of-Knowledge requirements by taking College Studies sequences may then complete their general education requirement by taking an additional College Studies sequence, or any 15 credits of general education courses, in any area.
All individual courses included in College Studies sequences will count for general education credit. Students who are unable to complete a College Studies sequence will thus receive regular general education credit for the courses they do complete.

A list of College Studies Program sequences appears below. Updated lists may be found in the Bachelor's Degree Planbook and the College Studies brochure, available in 9 Communications and in the College Studies Program Office, B103 Padelford.

**College Studies Program Sequences**

Comparative History of Ideas
B102 Padelford
Chair
John E. Toews
Associate Director
James D. Clowes

Comparative history of ideas provides for the interdisciplinary study of intellectual history by bringing together thematically related courses from such fields as literature, history, anthropology, philosophy, the arts, and religious studies. Courses within the program have been chosen and designed to explore the history of specific ideas or themes, to examine the history of particular intellectual cultures (Western and non-Western), or to study comparatively the underlying assumptions and attitudes of different intellectual worlds. As a unique approach to liberal humanistic studies, the program provides a solid basis for postgraduate study in, for example, law, administration, medicine, education, journalism, or area studies.

Requirements for the Bachelor of Arts degree are shown in the Arts and Sciences section of this catalog.

General Studies
9 Communications

Director
Kenneth Etzkorn

General Studies provides students an opportunity to obtain an interdisciplinary degree. Students may pursue an individually designed "atypical major" or one of several organized interdisciplinary programs.

Requirements for the Bachelor of Arts or Bachelor of Science degree are shown in the Arts and Sciences section of this catalog. Also offered under General Studies are the following: a course in university learning skills (G ST 101); independent fieldwork (G ST 350); and a general Evening Degree Program through UW Extension with options in the humanities and social sciences.
Undergraduate Majors

To graduate from the University of Washington, students must complete one of the majors listed below. In many cases, the student need not make a final choice until the beginning of the junior year, although programs with considerable mathematics and science (e.g., engineering and premedicine) include lock-step requirements that are best started early on.

Students can enter some majors directly (e.g., those in Forest Resources, in Ocean and Fishery Sciences, and some in Arts and Sciences), but most students start out as premajors in the College of Arts and Sciences. As premajors, they take courses to fulfill general requirements and admission requirements for the major. Most majors require one or two years of pre-admission course work, although a few require more. Admission to many majors is competitive, which means students may not be accepted even if they complete all the prerequisites for the major, and are expected to enter a major and to graduate after completion of a reasonable number of credits.

The General Catalog shows requirements for all majors, but students should see an adviser to ask about changes, course sequences, or new options.

Satisfactory Progress

Students admitted to the University to pursue baccalaureate degrees are expected to make satisfactory progress toward the attainment of the degree and are expected to enter a major and to graduate after completion of a reasonable number of credits.

By the time undergraduate students have completed 105 credits, they either must be accepted in their major or have their premajor status extended temporarily by an adviser.

Students who do not either declare a major or have their premajor status extended by the time they have earned 105 credits will have a "hold" placed against registration beginning the following quarter.

Students must normally graduate with their first baccalaureate degree by the time they have completed 30 credits beyond the credits required for the first degree or concurrent degrees. Departmental advisers may grant extensions beyond the 30-credit limit.

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree, or working toward a certificate. Students admitted as "postbaccalaureate undeclared" must declare a major by the time they have earned 30 credits beyond their last degree, and once a degree objective has been declared, must make progress toward that degree as evidenced by the courses they have completed satisfactorily. College advisers may grant extensions beyond the 30-credit limit.

The Committee on Admissions and Academic Standards may terminate a student’s enrollment if the student demonstrates lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. The student may be reinstated with the approval of the student’s college and the committee. EOP students may be reinstated in consultation with the Office of Minority Affairs.

* Offered through General Studies.  
† Offered through Anthropology or General Studies.
Admission

The Undergraduate Admissions Office is responsible for admitting to the University matriculated freshmen, transfer, and postbaccalaureate students, including U.S. and international students. Nonmatriculated summer-only students also apply through the Admissions Office. Applications and information, including admissions counseling, are available at the Office of Admissions, PC-30, 320 Schmitz Hall, 1410 NE Campus Parkway, Seattle, Washington 98195; telephone: (206) 543-9686. See section below for Undergraduate School admission.

Other special admission categories such as Office of Minority Affairs students, nonmatriculated students, auditors, and returning former students should contact those program offices, listed under Special Categories of Admission, for further information.

Campus Visits

Students and their parents are encouraged to call, write, or visit the campus. Free campus tours are available without reservations every weekday, except holidays. Tours leave 320 Schmitz Hall at 1:30 p.m. Additionally, the Office of Admissions Student Visit Program offers prospective freshmen and transfer students the opportunity to be a student for a day, stay overnight in a residence hall with a student host, meet with an admissions counselor and take a guided tour of the campus. Contact the Student Visit Program at (206) 543-5429 at least four weeks in advance for further details.

Information Sessions

Freshman Information Sessions are held for prospective freshmen and their families every Friday (except holidays) at 1:30 p.m. in the Admissions Office, 320 Schmitz Hall. The information sessions consist of a 20- to 30-minute presentation by an admissions staff member, followed by questions and discussion. Reservations are not required.

General Admission Policy

Eligibility for admission is determined by the Higher Education Coordinating Board and the University faculty. In general, admission is competitive, which means that there are more qualified applicants than the University can accommodate. Applicants are evaluated on two principal criteria:

- completion of high school subject requirements and
- academic performance as measured by grade-point average (GPA) and test scores.

Although exceptions are made (see below, Special Admission and the Appeal of Admission Decisions), the University's policy is to offer admission to those applicants who have completed the subject requirements and who rank the highest in academic performance. A complete discussion of each admission criterion follows.

High School Core Subject Requirements

The first major admission criterion ensures that freshmen and transfer students entering the University have an introduction to the liberal arts and are adequately prepared to succeed in their college careers. The UW faculty and the State of Washington Higher Education Coordinating Board have determined that all applicants are required to complete a minimum level of preparation in six subject areas, known as the high school core subject requirements. Almost all applicants satisfy these requirements through high school courses. Because these are admission—not graduation—requirements, they must be completed before enrolling at the University.

The chart on the next page summarizes the number of years of high school study required in each core subject. If a student's high school preparation was insufficient in any subject, there are several ways to make up a high school core requirement before enrolling at the University. Students may present college equivalents or may combine course work at the high school and college level to satisfy a core requirement. In general, five quarter credits (or three semester credits) at the college level count as the equivalent of one year of high school study.

The chart on the next page summarizes the number of years of high school study required in each core subject. If a student's high school preparation was insufficient in any subject, there are several ways to make up a high school core requirement before enrolling at the University. Students may present college equivalents or may combine course work at the high school and college level to satisfy a core requirement. In general, five quarter credits (or three semester credits) at the college level count as the equivalent of one year of high school study.

Admission Index

To determine an applicant's competitive standing for admission, the University uses a statewide system for public universities. This system, based on a student's probability of academic success, determines competitive standing by calculating an Admission Index (AI) for each student. The AI is based on two factors—GPA and test scores—with GPA being the predominant factor.

Freshman Admission

Although the Index ranges from a low of 0 to a high of 100, the state-mandated minimum to qualify for routine freshman admission to the UW is 28 AI. However, the UW typically uses a higher AI as its minimum for admission, because the number of qualified applicants exceeds the number of spaces available for new students at the UW.

Transfer Admission

There is no state-mandated minimum for routine transfer admission. The minimum AI ranking required for admission varies from quarter to quarter, depending on the number of applicants and the University's enrollment. Applicants needing more information are encouraged to contact the Office of Admissions for counseling.

Academic Performance

The second major admission criterion is the applicant's academic performance on grades earned in courses and scores on national admission tests. To be considered for admission, applicants must have achieved a minimum, cumulative GPA of 2.00. Beyond that, however, there is no one GPA that will guarantee admission, and in fact, applicants must present GPAs from their course work well above 2.00 to be admitted.

English Core Subject Requirements

Immigrant, refugee, or international students from non-English speaking countries must satisfy the same core subject requirements as other applicants. In certain cases, however, a native language other than English can be used to satisfy the foreign-language requirement.

Academic Performance

The second major admission criterion is the applicant's academic performance on grades earned in courses and scores on national admission tests. To be considered for admission, applicants must have achieved a minimum, cumulative GPA of 2.00. Beyond that, however, there is no one GPA that will guarantee admission, and in fact, applicants must present GPAs from their course work well above 2.00 to be admitted.

English Core Subject Requirements

Immigrant, refugee, or international students from non-English speaking countries must satisfy the same core subject requirements as other applicants. In certain cases, however, a native language other than English can be used to satisfy the foreign-language requirement.
## High School Core Subject Requirements

### ENGLISH

**4**

Four years of study are required, at least three of which must be in composition and literature. One of the four years may be satisfied by courses in drama as literature, public speaking, debate, journalistic writing, business English, or English as a Second Language (ESL). (English courses taken in foreign countries are considered ESL, except those taken in Australia, Canada, Ireland, New Zealand, and the United Kingdom.) Courses that are generally not acceptable include those identified as remedial or applied (e.g., developmental reading, remedial English, basic English skills, review English, yearbook/annual, newspaper staff, acting, library).

### MATHEMATICS

**3**

The mathematics admission requirement stipulates that applicants attain a minimum level of study in mathematics, in addition to completing the specified number of years. Three years of mathematics study are required, at least at the level of algebra, geometry, and advanced (second-year) algebra. (Preferably, the second year of algebra included a component of introductory trigonometry, but this is not mandatory.) More advanced mathematics courses are recommended, such as trigonometry, mathematical analysis, elementary functions, and calculus. Arithmetic, pre-algebra, business mathematics, and statistics courses will not count toward the requirement. An algebra course taken in the eighth grade may satisfy one year of the requirement if second-year algebra is completed in high school.

### SOCIAL SCIENCE

**3**

Three years of study are required in history or in any of the social sciences, e.g., anthropology, contemporary world problems, economics, geography, government, political science, psychology, sociology. Credit awarded for student government, leadership, community service, or other applied or activity courses will not count toward the requirement.

### SCIENCE

**2**

Two years of science are required, of which one full year—both semesters in the same field—must be completed in the basic principles of biology, chemistry, or physics, with a laboratory experience. The second year of science may be completed in any course that satisfies your high school’s graduation requirement in science. Two years of agricultural science is equivalent to one year of science.

### FOREIGN LANGUAGE

**2**

Two years of study are required. The two years must be devoted to a single foreign language and must be in sequence, with no repetition of any prior term of study and without a reduction in what would normally be a full, second year of study. Any natural language that has been formally studied may be used to satisfy this requirement, including American Sign Language (AMESLAN, the language of the deaf community), and languages no longer spoken, such as Latin and ancient Greek. However, neither computer “languages” nor forms of deaf signing aside from AMESLAN are acceptable. A foreign language course taken in the eighth grade may satisfy one year of the requirement if the second-year course is completed in high school.

**Note:** The foreign-language admission requirement will be considered satisfied for students from non-English-speaking countries who entered the United States educational system at the eighth grade or later.

### THE ARTS

**1/2**

One-half year or one trimester of study is required in the fine, visual, or performing arts, to be chosen from art appreciation, band, ceramics, choir, dance, dramatic performance and production, drawing, fiber arts, graphic arts, metal design, music appreciation, music theory, orchestra, painting, photography, print making, and sculpture. Courses generally not acceptable include architecture, calligraphy, color guard, creative writing, drafting, fashion design, interior design, sewing, and woodworking.

### ELECTIVES

**1/2**

Electives are courses in the six subject areas (defined above) in which you have completed more than the minimum number of years.

If your high school preparation in mathematics was insufficient, you must complete one of the courses listed below:

- A course in intermediate algebra. At UW Extension, as well as at many community colleges in Washington, MATH 101 is the necessary course. The course must be completed with a grade of ‘C’ (2.0) or better, even though it does not transfer to the UW as college credit and the grade earned in the course is not used in computing the transfer GPA.
- MATH 104 (Trigonometry) or its equivalent. The course must be completed with a grade of ‘C’ (2.0) or better, even though it does not transfer to the UW as college credit and the grade earned in the course is not used in computing the transfer GPA.
- MATH 107 (Mathematics: A Practical Art) or its equivalent. The course must be completed with a grade of ‘C’ (2.0) or better.
- Mathematics courses with intermediate algebra as a prerequisite (except statistics courses). This includes any higher-level math courses such as elementary functions, calculus, and beyond.

If you believe you have acquired sufficient knowledge of a foreign language without formal study, contact the Office of Admissions to arrange for an examination.

For purposes of admission, each quarter of language in college is considered equivalent to one year in high school. Applicants who have never studied a foreign language will need to complete ten quarter credits of a single foreign language. However, an applicant who studied French for one year in high school needs to complete only the second quarter (e.g., FREN 102) or the second semester of a first-year language sequence. Of course, you may prefer to begin with 101 to refresh your memory. (The UW’s Summer Quarter offers intensive foreign language programs to enable students to complete ten to fifteen credits in one quarter, but these programs are not normally recommended for students with little background in languages.)

If you made up through college course work:**

- In general, 5 quarter credits (or 3 semester credits) at the college level count as the equivalent of one year of high school study.
- Two quarter credits (2 semester credits) chosen from any of the following subjects will satisfy the requirement: art, art history, cinema/filmmaking, dance, music, or photography; any course in drama except drama as literature courses. Courses in architecture are generally not acceptable, except for those in architectural history.
- Two quarter credits or 1.5 semester credits chosen from the six subject areas described above count toward this requirement.

Courses in the social sciences—e.g., anthropology, economics, ethnic studies, history, philosophy, political science, psychology, sociology—will count toward the requirement.
Freshman Admission

In general, a freshman is anyone who has not attempted college course work after leaving high school. In addition, see information below on the Running Start Program. See the General Admission Policy section above regarding high school core subject requirements and the Admission Index.

GPA and Test Scores

GPA: A GPA based on a 4.0 scale is calculated for every applicant. Test scores: Applicants for freshman admission are required to submit scores from one of the following tests:

- Scholastic Assessment Test (SAT; effective autumn 1993, this test became the SAT I) or
- American College Test (ACT).

If an applicant submits more than one set of scores from the same test, or scores from different tests, the highest combined score from a single test date will be used. (If a test mathematics score from one test date will not be combined with the best verbal score from another test date.)

Freshman Review Committee

The University recognizes that factors other than school grades and admission test scores can be important in assessing a student's likelihood of success in college. Consequently, for autumn quarter the files of those students whose academic records are close to the standards set for routine admission are submitted to the Freshman Review Committee for more detailed evaluation before a decision is reached. The Committee is interested in any evidence of academic strength that would not be reflected in the overall GPA, such as:

- a pattern of grade improvement during the high school years,
- completion of a substantial number of academic courses beyond the required minimum,
- enrollment in Advanced Placement, International Baccalaureate, or honors courses,
- exceptional talent in an artistic field, or
- persistent evidence of an unusually stringent grading system in the high school.

Using these criteria, the committee offers admission to the best qualified applicants. Applicants whose files are evaluated by the Freshman Review Committee will be notified of a decision slightly later than other applicants, but in time to respond to offers of admission from other colleges or universities.

Running Start Program

Definition of Running Start Applicants

A Running Start applicant is someone who applies to the UW while participating in the Washington state Running Start Program. Students who matriculate (enroll to earn a degree) at another institution after leaving high school are not considered Running Start applicants.

Admission: High School Core Subject Requirements

Each applicant must satisfy the Higher Education Coordinating (HEC) Board and UW high school core subject requirements for admission by completing the appropriate high school or college courses.

Admission: Freshman or Transfer?

To determine whether a Running Start student is a freshman or transfer applicant, the UW will count the number of college credits earned by the student by the end of the freshman or transfer applicant's autumn quarter. In cases where students have attempted college course work before high school, they must apply by the transfer application closing date and have the required high school transcripts in addition to their high school and test score records. They will be notified of an admission decision at the same time as other transfer applicants.

Scholarships

Running Start students who have completed fewer than 40 credits will be considered for the same freshman scholarships as other applicants. Those who have completed more than 40 credits will not be eligible for freshman scholarships. After enrollment at the UW for one year, they are eligible to compete with other UW students for other scholarships.

Transfer Credit Policy

The UW will grant full transfer credit for Running Start courses if they are college level and are recorded on an official college transcript. All University restrictions on transfer credit apply, as listed below under "Academic Credit."

Transfer Admission

In general, a transfer applicant is someone who has attempted college credit after leaving high school. In addition, please see the section directly above regarding Running Start.

Transfer applicants are required to complete the high school core subject requirements described above under General Admission Policy.

Admission Index

For those qualifying for admission under the Direct Transfer Agreement (see below, Direct Transfer Agreement with Washington State Community Colleges), admission is based on the Admission Index (see above, under General Admission Policy).

Test Scores

Applicants for transfer admission, except for those qualifying under the Direct Transfer Agreement, are required to submit scores from one of the following tests:

- Scholastic Aptitude Test (SAT)
- American College Test (ACT)
- Washington Pre-College Test (WPCT).

Although it is sometimes possible to be admitted to the UW without submitting test scores (see the chart below), it is advisable for all applicants to submit scores. Because minimum admission criteria vary from quarter to quarter, it is not possible to predict exactly what college GPA may result in an admission Index. Submitting test scores will never hinder someone's chances for gaining admission. However, neglecting to submit scores that may have been required or, if not required, could possibly have resulted in a higher Admission Index will definitely hurt an applicant's chances for admission.

When students submit scores from more than one test or multiple scores from the same test, the Office of Admissions always uses the highest combined score from a single test date. (The highest mathematics score from one test date will not be combined with the best verbal score from another test date.)
How Many Credits Do I Need to Transfer to the UW?

Transfer students often want to know if they must complete a minimum number of credits before transferring. As the chart below demonstrates, they can transfer with any number of credits, but the basis for the admission decision will vary with the number of transfer credits completed.

<table>
<thead>
<tr>
<th>If an applicant has, by the application closing date, submitted transcripts showing the completion of:</th>
<th>Then an admission decision will be based on:</th>
</tr>
</thead>
<tbody>
<tr>
<td>0-14 transferable(^1) quarter credits</td>
<td>the applicant's high school record. High school GPA + test scores must meet minimum Admission Index for freshmen. Student must achieve minimum cumulative GPA of 2.00 for transferable college course work, but college GPA is not otherwise considered.</td>
</tr>
<tr>
<td>15-39 transferable(^1) quarter credits</td>
<td>the applicant's high school and college record. High school GPA + test scores must meet minimum Admission Index for freshmen and college GPA + test scores must meet minimum Admission Index for transfer.</td>
</tr>
<tr>
<td>40-74 transferable(^1) quarter credits (30 credits must be graded(^2))</td>
<td>the applicant's college record. College GPA + test scores must meet minimum Admission Index for transfer. High school GPA not considered.</td>
</tr>
<tr>
<td>75 or more transferable(^1) quarter credits (60 credits must be completed and graded(^2))</td>
<td>the applicant's college record. College GPA + test scores must meet minimum Admission Index for transfers. High school GPA not considered. Applicants with high college GPAs may not need to submit test scores, but because the minimum Admission Index (and therefore the minimum college GPA) varies from quarter to quarter, all applicants are urged to submit test scores.</td>
</tr>
</tbody>
</table>

\(^1\) Transferable quarter credits: credits earned for college-level academic courses completed at regionally accredited colleges and universities. Quarter credits are those earned at institutions on a quarter system; one semester credit = 1.5 quarter credits. Transferable college credit includes credits attempted but not completed, i.e., those for which a grade of "F" (0.0) was earned. A maximum of 15 credits earned in vocational-technical program may be accepted in transfer but will not be used in the transfer GPA.

\(^2\) Graded credit: Credit taken for a grade (not pass/fail or satisfactory/not satisfactory) in college-level academic courses at regionally accredited institutions. Credits earned in vocational-technical programs do not count as graded credit.
complete the associate degree in spring 1995 must submit transcripts through winter 1995. If the applicant in January 1995 submits an application and an initial set of transcripts showing grades through autumn 1994, an updated transcript showing winter 1995 grades will have to be sent to Admissions in March or early April. Nonetheless, early application is encouraged.

If an applicant continues to enroll at a community college or enrolls at a four-year college or university as a nonmatriculated student after the associate degree is completed, the Direct Transfer Agreement requires that the student's GPA in transferable course work does not drop below 2.75.

An applicant will not qualify for admission under the Direct Transfer Agreement if:

- the applicant fails to complete the associate degree before matriculation at the University;
- the applicant matriculates at a four-year institution after obtaining the associate degree;
- the GPA is below 2.75 at the time the associate degree is completed, or
- the GPA drops below 2.75 for transfer work taken after obtaining the associate degree.

**Postbaccalaureate Admission**

Because the University's primary commitment is to undergraduates who are completing their first bachelor's degree, only a small number of applicants are admitted every quarter as postbaccalaureate (fifth-year) students. Postbaccalaureate is a matriculated status, reserved for students who are working toward a second bachelor's degree or preparing for entrance to graduate or professional school. A student who is inadmissible as a postbaccalaureate may still take advantage of many educational opportunities at the UW by enrolling as a nonmatriculated student through University Extension (see the section of the catalog entitled UW Extension).

**Admissions Policy**

All postbaccalaureate applicants must submit a supplemental statement (discussed below) at the time of application to the University. A small number of applicants may be admitted in summer/autumn and autumn quarters on the basis of GPA alone, but the supplemental statement is required regardless of GPA. An application submitted without the statement will be considered incomplete and will not be reviewed.

**Admission by GPA**

When a minimum GPA is established for routine admissions, it will be in the range of 3.40 to 3.80. In calculating the cumulative undergraduate GPA, the Office of Admissions uses all grades earned at accredited four-year colleges and universities prior to the completion of the first bachelor's degree. Grades from community college course work are not included.

If a postbaccalaureate applicant applies for a department that uses selective admission criteria and is denied admission to the program, the applicant will also be denied admission to the University.

**Admission in Winter and Spring Quarters**

Because admission to the University may be more competitive in winter and spring quarters than in summer/autumn and autumn quarters, Admissions cannot guarantee that any postbaccalaureate applicants will be admitted on the basis of GPA alone for winter or spring.

**Postbaccalaureate Review Committee**

Supplemental statements are reviewed by the Postbaccalaureate Review Committee (PRC). Decision are made on a rolling basis: applicants whose supplemental files are completed early will receive priority consideration. Supplemental statements should be typed or written on stationary or plain white paper; there is no special form. The applicant will be notified in writing of the final decision after evaluation of transcripts and the supplemental statement.

**Evidence for Consideration**

In reviewing supplemental statements, the PRC considers evidence of the following kind:

- a clearly defined statement of purpose for postbaccalaureate study, including an explanation of reasons for pursuing further studies, particularly if entering a new academic field;
- a list of specific courses required at the UW in cases of intended short-term study;
- a demonstrated need to enroll at the UW as a matriculated student at this stage of the applicant's educational career;
- a probability or assurance of admission to a specific degree program. If an applicant is seeking admission to an undergraduate program with selective admission criteria, the written statement should be accompanied by a letter of support from the department/program;
- one or two letters of recommendation if they are clearly relevant to the applicant's academic pursuits, i.e., if they can attest to academic promise;
- a record of high academic performance in postbaccalaureate or graduate study when that study is relevant to academic plans at the University.

**Admission Process**

**Filing an Application**

Prospective students may obtain the University of Washington undergraduate application form from the Office of Admissions by calling the application request line at (206) 543-5150 or by writing to the Office of Admissions. Departmental applications for programs with special admission requirements (see following section) must be obtained directly from the department. High school students within Washington State are encouraged to obtain the Uniform Undergraduate Application Form from their high school counselors. The University accepts applications transmitted electronically, either through the College Board's ExPAN program or through steps provided by XAP. Contact your high school counselor for more information.

Applicants in all categories are advised to apply early since limited availability of space may necessitate closure of admission prior to the closing dates. In addition, many departments have earlier closing dates. High school and international applicants are encouraged to apply early in December for summer or autumn quarters. Transfer and postbaccalaureate applicants should plan to submit all required documents at least six weeks before the published closing date or departmental deadline; applicants for autumn quarter often begin applying in January/February (see Application Closing Dates table on the next page).

A complete application file consists of the following materials:

- **Application**
- **Application fee of $35 (U.S. funds).** This fee is nonrefundable and must be submitted with each application.
- **Official high school transcript.** This record is required of all freshman and transfer applications for the...
UNDERGRADUATE STUDY

purpose of verifying completion of core subject requirements. For applicants with 40 or more graded transferable quarter credits, high school performance (GPA) will not be considered in determining admissibility.

Applicants are responsible for contacting any high school(s) they have attended and requesting appropriate documents. The Office of Admissions will keep for one calendar year any transcripts or other credentials it receives.

For freshman applicants, a high school transcript must show grades at least through the junior year (grades 9-11).

For transfer applicants, a high school transcript must be a final transcript, showing all course work completed, beginning with grade 9 and through the highest grade completed, regardless of whether the student graduated. Preferably, mathematics and foreign language courses completed in the 8th grade should be recorded on the high school transcript, but this is not required.

A transcript is official if it bears the official seal and authorization signature of the issuing institution and is:

- sent directly by the school to the Office of Admissions or
- sealed by the school and mailed or delivered to Admissions by the applicant. If the envelope is opened, the transcript is no longer official.
- Freshman and transfer applicants only: Official test scores from SAT or ACT. Scores from WPCT are acceptable if the applicant took the exam by June 1, 1989.

Test scores are official if they are:

- sent directly from the testing agency to the UW or
- sent directly from the high school (handwritten scores are not acceptable).

Test scores sent directly from the testing agency will enable the Office of Admissions to process an application more quickly.

- Two official transcripts from each regionally accredited college attended.

Applicants may not exclude or omit any colleges, regardless of how many credits they earned there or the nature of the program in which they were enrolled.

An application file that is incomplete on the application closing date is not considered further unless space availability permits an extension of the deadline. The application fee will not be returned or applied to a future application. To be considered for a future quarter, it is necessary to submit a new application, an application fee and current documents. Any documents that were submitted in support of an application are retained for twelve months and are transferred to a new application if they are the most current records available.

An application is good only for the specific quarter requested.

Applicants may not delay or defer enrollment. Applicants will have to reapply and pay another application fee if (1) the applicant is accepted but would like to enroll for a later quarter, (2) applicant was not accepted and wishes to apply for a future quarter, or (3) applicant submitted an application and application fee but does not complete application file.

Academic Programs with Special Admission Requirements

Admission to the Major

There are three types of departmental admissions policies at the UW:

- Majors without supplemental admission requirements. An applicant who declares one of these majors on the admission application and is admitted to the UW will be accepted directly into the major also. Examples: oceanography, philosophy.
- Majors that students may apply to only after enrolling at the UW. An applicant who declares one of these majors on the admission application will enter the UW as a "premajor" and will apply after completing required courses. Examples: English, history, political science.
- Majors that have competitive admission standards which fluctuate from quarter to quarter depending on the number of applicants. An applicant who is offered general admission to the UW has no guarantee of eventually being admitted to one of these majors. An applicant who declares one of these majors on the admission application and is not admissible to the academic program may be required to enter the UW as a "premajor" and can begin completing the college courses required for admission to the major of choice. Examples: business, communications, engineering, nursing.

Fulfilling University admission requirements does not guarantee admission to a specific department or program. The departments listed below have admission requirements in addition to the general University requirements. Applicants to these departments should submit a completed application form to the Office of Admissions at least six weeks prior to the appropriate departmental deadline to allow time for the department to request any supplementary information from the applicant. If a supplemental application form is required, it needs to be obtained from the department. Complete Information on departmental admission requirements and procedures may be obtained from the appropriate department.

Special Categories of Admission

Nonresident Applicants

As a state-supported university, the UW gives priority to residents and expects nonresident applicants to meet admission standards significantly higher than those required for residents. Under Washington state residency laws, students are defined as either financially independent of parents or as financially dependent on parents.

For financially dependent students to be classified as residents, one or both parents or legal guardians must claim the student as a dependent, and one must be a resident of the state for at least one year before the quarter for which the student is intending to enroll.

Students who are financially independent must establish a permanent residence in Washington for at least twelve consecutive months before the quarter of application. Establishing a permanent residence includes ties such as obtaining a Washington driver’s license, voter registration, and other means, be financially independent of parents for the current and previous calendar years, and cannot be claimed as a dependent on federal income tax returns.

Applicants whose residency status is unclear will be asked to submit documentation. Questions about residency status should be directed to the Graduation and Academic Records Office at (206) 543-4168.

International Students

The University believes its greatest contribution to international education can be made in the area of graduate study. Because of limited University facilities and departmental restrictions, only a small number of international undergraduate applicants are accepted each year. International undergraduate applicants are considered for admission only for summer quarter or autumn quarter, must present academic records well above the average to be competitive for admission, and must have adequate preparation in academic subjects. Such students also must present evidence of English language proficiency by providing scores from the Test of English as a Foreign Language (TOEFL). The only exceptions are native-born citizens of Australia, Canada, United Kingdom, Ireland, and New Zealand.

Applicants from non-English-speaking countries may demonstrate their English proficiency also by examination. Any one of the following scores will meet this requirement:

- SAT I Verbal 450
- ACT English 20
- Test of English as a Foreign Language (TOEFL) 580
- Michigan Language Test (MLT) 90

Applicants who do not score high enough on one of these tests will be required to take remedial courses in English as a Second Language (ESL) when they first enroll at the University. Additional fees, currently $318, is charged for each ESL course a student is required to take. Specific information on this requirement may be obtained from the Office of Admissions or, for admitted students, from the Office of Special Services.

More information on the TOEFL appears under English As A Second Language (ESL) Center in the UW Extension section of this catalog.

Specific information on admission of international undergraduates accompanies the special application form for international applicants.

Special Admissions and the Appeal of Admission Decisions

The University's admission policies must comply with Washington State regulations and faculty-authorized requirements. It is the responsibility of the Office of Admissions to apply these standards consistently and fairly. The faculty recognizes, however, that exceptions should be granted occasionally for students in unusual situations. Applicants who do not meet the University's requirements for admission may write a petition requesting special admission consideration. Such requests for special consideration are reviewed by the Committee on Admissions and Academic Standards. Applicants do not need to be denied before they petition. Applicants planning to submit petitions should request from the Office of Admissions Undergraduate Admissions Pamphlet #2, which provides specific guidelines on the petitioning process.

Applicants with disabilities may choose to enclose a statement with their application describing their disability if appropriate. Admissions will use such statements to work together admission core requirements or to authorize substitutions.

To request disability accommodation in the application process, contact the Office of Admissions at 206/543-9686 (Voice) or 1-800-833-6388 (Washington State Relay Service TDD).

Office of Minority Affairs

Educational Opportunity Program

The Office of Minority Affairs (OMA) is responsible for fostering diversity at the University by providing access and support services to underrepresented ethnic minority and economically disadvantaged students within the undergraduate program. Applications are reviewed to determine if applicants are admissible under routine criteria, or if they meet the eligibility criteria for alternate admission through the Educational Opportunity Program. Admission is limited to applicants who are U.S. citizens or permanent residents, with priority given to Washington state residents. As a formal part of the alternate admissions process, applicants may also submit an OEP Supplemental Admissions Application.

Students admitted through the EOP are provided special services such as counseling, placement testing, academic tutoring, and special instruction. Applicants interested in receiving consideration through the EOP alternate admissions program should print "OMA" at the top of the admission application form. Material, such as the EOP Supplemental Admissions Application will be mailed directly to the student, or the student may request this form in advance by phone. For more information, contact the Office of Minority Affairs 206/543-5715.

Returning Former Students

A returning undergraduate or professional student who has not been enrolled for a quarter or more and who did not complete the preceding quarter or a graduate student returning from Official On-Leave status is required to complete and file a Returning Student Reenrollment Application by the application deadline. A student is eligible to apply as a returning former student only when returning in the same classification as when previously enrolled. Students applying for a new category (e.g., postbaccalaureate, professional, or graduate) must complete the appropriate application for that category. A returning undergraduate or professional student is required to pay a $35 application fee by the closing date. Returning former students who have been away from the University less than two quarters have the highest priority for readmission. A student previously enrolled in an academic program with restricted enrollment and/or special admission requirements should consult his or her adviser about procedures for readmission. Returning nonmatriculated students are enrolled only for summer quarter.

The closing dates for returning former student applications are: autumn, July 1; winter, November 1; spring, February 1; summer, May 15.

A returning student must pay a nonrefundable enrollment confirmation deposit of $100 by the date indicated in the offer of readmission.

The Procedures and Fees section of this catalog contains additional information about registration, tuition, and fees.

Nonmatriculated Students

Many students find their educational needs met through nonmatriculated (non-degree) enrollment. Matriculated status is reserved for students who have met competitive admission standards and who are enrolled primarily for the purpose of earning a degree. For more information about nonmatriculated enrollment, consult the UW Extension section of this catalog.
Auditors
Individuals who wish only to audit University courses should apply for admission with nonmatriculant standing. (See UW Extension section of this catalog.) Attendance in courses as an auditor is by consent of the instructor involved and is conditioned by the extent to which space is available. Permission to audit is ordinarily granted for lecture classes only. An auditor may not participate in class discussion or laboratory work, and his or her registration may be canceled at the discretion of the instructor. No record of audited courses is kept. Regular tuition and fees are charged. To receive credit for an audited course, the student must register for the class for credit in a subsequent quarter.

Other Application Forms
FINANCIAL AID
Application for financial aid is a process entirely separate from application for admission. Interested students should contact the University's Office of Student Financial Aid, 105 Schmitz Hall; telephone: (206) 543-6101, or the counselors at their own school for information about financial aid availability.

UNIVERSITY HOUSING
Admission to the University does not automatically reserve residence hall space. Additional information on student housing appears in The University section of this catalog.

Academic Credit
Credit
The basic rule for determining academic credit is: 1 credit represents a total student time commitment of three hours each week in a ten-week quarter, or a total of thirty hours in a quarter. Total time includes time spent in class, if any; time devoted to individual conferences with instructors; time devoted to reading or other study, problem solving, writing, laboratory work, exercises, or any other activity required of the student. A specified number of credits must be earned for a degree.

There are three basis types of credit:
- Residence credit is academic credit earned in courses offered by the University of Washington—Seattle through the quarterly Time Schedule and other approved courses offered by UW Extension. To gain residence credit, students must register for such courses during the official registration period.
- Extension credit or credit earned through examination is that credit earned by completing courses offered as extension courses or credit earned through special examinations. Such courses are not included in the UW grade-point average.
- No more than 90 UW extension credits may be counted toward the baccalaureate degree. No more than 45 credits earned in extension courses at other institutions may be counted toward the baccalaureate degree. Ordinarily, extension and independent (correspondence) study credits may not be applied toward the final year.

Transfer credit is credit earned at another institution that is accepted by the University as being applicable toward satisfaction of degree requirements.

Quarter Credit Versus Semester Credit
Colleges and universities that operate on a semester basis (i.e., divide the academic year into two parts, exclusive of a summer session) award semester credit. Quarter credits multiplied by two-thirds equal semester credits. Some credits multiply by one and one-half equal quarter credits. For example, a student attending the University who earns 45 quarter credits during an academic year would have earned 30 semester credits at an institution operating on the semester plan.

Credit for Courses Completed in Unaccredited Institutions
Course work completed at unaccredited institutions may be validated or certified through examination described under Earning Credit by Special Examination below.

Transfer Credit
The Office of Admissions awards transfer credit according to the guidelines listed below. It reserves the right to accept or reject credits earned at other institutions of higher education. In general, it is University policy to accept credits earned at institutions fully accredited by the regional accrediting association, provided that such credits have been earned in university-level courses (see exceptions below) appropriate to the student's degree program at the University.

It is University policy to grant credit for course work on the basis of the student's acceptance at the time the course was taken. Courses taken at a Washington community college during the 1994/95 and 1995/96 academic years will transfer to the University according to the equivalencies listed in the 1994-96 Transfer Guide regardless of when the student transfers to the University.

Transfer Credit Evaluation
After the student confirms enrollment—usually by paying a $100 enrollment confirmation deposit—and shows that the student is matriculated at the University, the Office of Admissions completes a course-by-course evaluation of transfer credit. (The enrollment confirmation deposit is deducted from the first quarter's tuition but is not refundable if the student does not enroll, and any transfer credits earned the summer before or during the fall quarter are not required to pay an enrollment confirmation deposit and, therefore, automatically receive the evaluation in the mail.) One copy of the evaluation is sent to the student; a second copy is sent to the student's academic advising office.

The information recorded on the transfer credit evaluation—including the transfer GPA—becomes a part of the student's permanent record at the University. If a student applies to an academic program with special admission requirements, transfer course work and the transfer GPA will be considered. The official UW transcript—which the student may request sent to other institutions—will not include the transfer GPA or a detailed listing of the transfer credit the UW awarded; it merely lists other colleges the student has attended and the total number of transfer credits awarded. After the student enrolls at the UW, transfer grades are not included in the University GPA.

Appeal Procedure
If not all courses transfer as the student had anticipated, and the academic adviser cannot explain the discrepancy, the student should consult an admission specialist in the Office of Admissions. Further appeal can be directed to the UW Transfer Officer in the Admissions Office.

Applicability of Transfer Credit to Degree Requirements
Before a student first registers for classes at the University, he/she will meet with an academic adviser to plan a program of study. The adviser will determine how transfer credits shown on the evaluation may be applied to UW degree requirements. Although admissions to the University will vary, a student who has completed a baccalaureate degree, for example, might be able to transfer only 70 of those credits if they apply toward the various graduation requirements for a student's degree program.

The Associate Degree Agreement with Washington Community Colleges
Many community college students who plan to transfer to the University ask about the advantage of earning an associate degree before they transfer. There are two separate agreements that may benefit such students. Both agreements apply only to students with academic-transfer (as opposed to vocational/technical) associate degrees, and to only those whose degrees are from community colleges in Washington.

One of these, the Direct Transfer Agreement, applies to students of priority consideration for admission to the UW. (See above for a complete discussion.) Admission under the Direct Transfer Agreement does not guarantee admission to any specific program within the University.

The other agreement, called the Associate Degree Agreement, affects how courses from the community college apply toward graduation requirements at UW. To qualify for the agreement, a student must complete all the requirements for their associate degree before regular admission to UW; earlier enrollment as a nonmatriculated student in summer quarter, UW Extension, or UW correspondence courses, however, is allowed. Unlike the Direct Transfer Agreement, the Associate Degree Agreement may also apply to students who have matriculated at another four-year institution between earning the associate degree and transferring to the UW.

A common misconception seems to be that earning the associate degree means that all UW general education requirements have been satisfied. For many programs, including those in the College of Arts and Sciences, requirements are grounded in the assumption that general education should continue throughout the entire career. For associate degree courses that should be completed in the junior and senior years. Thus, these requirements are not automatically waived for students who enter under the Associate Degree Agreement.

Nevertheless, students entering Architecture, Arts and Sciences, Business Administration, Medical Technology, Nursing, Occupational Therapy, Oceanography, Physical Therapy, Prosthetics and Orthotics, and Social Work with an associate degree do receive certain benefits that may reduce requirements.

Benefits of the Associate Degree
The primary benefit is that students may count transfer courses toward Areas-of-Knowledge (formerly distribution) requirements if the community college counted them, even if the courses are not listed as counting for Areas of Knowledge in the UW Transfer Guide. Humanities courses will count for Visual, Literary, and Performing Arts; Social Science courses for Individuals & Societies; and Natural Science courses for the Natural World. (Note: Completing the Areas of Knowledge requirement does not automatically mean that an application has fulfilled the high school core requirements.) There are three possible pitfalls, however:

1. Credit for Courses Completed in Unaccredited Institutions
2. Transfer Credit
3. Appeal Procedure
• some courses in the student's major department will not be counted for distribution;
• some courses will not be counted for both Areas of Knowledge and proficiency (e.g., for a student in the College of Arts and Sciences who has only one foreign language, the first year of that foreign language would not count for Visual, Literary, & Performing Arts, because it must be used for the foreign-language proficiency requirement instead); and
• a course that does not transfer for credit (e.g., intermediate algebra) does not count toward graduation requirements.

Many students with associate degrees have earned fewer than the required credits in each of the three Areas of Knowledge (the Natural World, Individuals & Societies, and the Visual, Literary, & Performing Arts), and thus will be completing the requirements at the UW. Students are not exempted from other specific general education requirements of their UW school/college.

1994 Requirements
The schools and colleges of the University will implement new general education requirements, effective autumn of 1994. Although students who have already begun college may use the old requirements, the new requirements are likely to be more attractive. The Associate Degree Agreement will be honored in relation to the new requirements in the same spirit as it has been in the past.

Bachelor Degree Planning
Students often assume that work on a major does not begin until the junior year. It is important to investigate the requirements of any intended major. Some community colleges have associate-degree options that allow students to earn the A.A. while fulfilling the requirements of specific UW majors. Lacking those options (and depending on the likelihood of being admitted without recourse to the Direct Transfer Agreement), students may sometimes be better off not earning the associate degree, particularly for programs outside the College of Arts and Sciences, such as engineering or pharmacy, that have very specific prerequisites. In some cases, it may even be better to transfer with fewer than ninety credits: For example, students planning to major in certain languages may need to start earlier than their junior year if course work is available only at the UW. Students in some preprofessional programs such as premedicine or predentistry will probably not need to transfer early, but they should talk with an advisor at the UW late in their freshman year.

Class Standing
A student's class standing is determined by the total number of transfer credits awarded by the University of Washington, not by the number of years of college study or completion of an associate degree.

The following table lists the required credits for each class:
- Freshman: 0-44
- Sophomore: 45-89
- Junior: 90-134
- Senior: 135 or more

Satisfying UW graduation requirements depends not only on the number of credits completed (a minimum of 180) but also on completion of all college and major requirements.

Notable Restrictions on Credit

COLLEGE-LEVEL EXAMINATION PROGRAM (CLEP) CREDIT
The University does not accept or award credit for CLEP general or subject examinations. Any such credit awarded by other institutions, or through independent testing, will not be transferred to the University.

COMMUNITY COLLEGE CREDIT
A maximum of 90 credits from community college coursework may be applied toward the credits required for the bachelor's degree. All of the courses transferred from two-year colleges may be used toward graduation requirements, but a student must still complete at least 90 credits of course work at a baccalaureate granting institution (see senior residency requirement, below). Think of transfer courses as a "bank" from which to draw. All of a student's transferable courses remain in the bank to be applied toward specific degree requirements, but 90 additional credits must be earned.

EXTENSION CREDIT FROM OTHER SCHOOLS
Extension credit earned at other schools may not exceed 45 credits. Military credit, discussed below, is included in the 45 extension credit limit.

GUIDANCE/PERSONAL DEVELOPMENT
A maximum of 3 credits is awarded for courses in this area as part of the 15 credits allowed for vocational/technical courses.

LIMITATION ON ROTC CREDITS
Credits earned in first- and second-year military training courses may not be counted in the basic 180 credits that are required for graduation. Some third- and fourth-year courses may count, depending on the student's college or school.

MILITARY CREDIT
Credits earned in Armed Forces Training Schools (AFTS) and through USAFI and DANTES may not exceed 30 credits and are included in the 45 extension credit limit. Official transcripts or DD-214 or DD-295 forms must be submitted, and credit will not be awarded until after the student has enrolled. Scores received in such course work are not included in the transfer GPA.

NATIVE LANGUAGE
No credit is awarded for an entry-level language course if the language was previously taken in high school for two full years and therefore used to meet the UW admission requirement. For example, if you studied Spanish in high school for two years and enroll in SPAN 101 at the UW or another college, you would not receive credit for the class (unless you entered college before autumn of 1987).

First-year (elementary) or second-year (intermediate) foreign-language coursework may not be granted either by examination or by course completion in a student's native language. "Native language" is defined as the language spoken in the student's home during the first six years of his or her life and in which he or she received instruction through the seventh grade.

OUT OF SEQUENCE COURSES
Credit is not awarded for prerequisite courses taken after a more advanced-level course has been completed. For example, students will not be awarded credit for SPAN 102 if taken after SPAN 103.

PHYSICAL EDUCATION
No more than 3 quarter credits will be allowed for physical education activity fees, or courses.

VOCATIONAL-TECHNICAL COURSES
A maximum of 15 transfer credits will be awarded for a wide range of college-level courses that are vocational-technical, rather than academic, in content, for example, bookkeeping, electronics, physical therapy technician. These credits may apply only to the elective credit components of a baccalaureate degree and only with departmental approval.
Courses Receiving No Credit

Courses receiving no transfer credit include (but are not limited to):
- courses below college level (usually numbered below 100)
- repeated or duplicate courses
- courses work taken at an institution that is not accredited by its regional association of schools and colleges
- courses that give instruction in a particular religious doctrine
- mathematics courses considered below college level, including basic math, business math, beginning and intermediate algebra, and trigonometry
- any course in the following categories:
  - Air Conditioning/Heating/Refrigeration
  - Allied Health (Optics)
  - Auto Mechanics
  - Beginning Keyboarding
  - Beginning Typing
  - Carpentry/Construction Methods
  - Cooking/Baking
  - Cosmetology
  - Custodial Training/Maintenance
  - Diesel Mechanics
  - Fire Science
  - Graphics Reproduction
  - Horseshoeing/Farriery
  - Military Science (lower-division)
  - Remedial English/Reading
  - Replacement Parts
  - Stationary Steam Engineering
  - Water Science Technology

Transferring from Washington Community Colleges

The University of Washington subscribes to the statewide Policy on Inter-College Transfer and Articulation Among Washington Public Colleges and Universities endorsed by the public colleges and universities of Washington and the State Board for Community and Technical College Education, and adopted by the Higher Education Coordinating Board. The policy deals with the rights and responsibilities of students and the review and appeal process in transfer credit disputes.

Earning Credit by Special Examination

With departmental approval, regularly admitted and currently enrolled students may "challenge a course," by special examination to gain credit without being enrolled in specific courses.

1. For independent study.
2. For work completed with private teachers.
3. For work completed in unaccredited institutions if a formal examination is deemed necessary by the Chairperson of the concerned department(s). (In some cases, credit may be validated without an examination. Students who wish to validate credit should inquire at the Office of Admissions.)

The following restrictions apply:

a. No one may take a credit examination for a course in which he or she has previously registered.

b. All credits earned by examination are counted as extension credit and if earned at the UW, are included in the 90-credit maximum that may be applied toward the baccalaureate degree. (Transfer extension credit is limited to 45 quarter credits.) No credit is allowed by examination if the grade earned is less than 2.0. Grades earned are not included in the GPA.

college credit at the University in their Higher Level subjects. Five quarter credits are granted for each Higher Level subject in which a grade of 5 or higher is earned with the following exceptions:

Art/Design
- No credit; see art adviser for placement.

Biology
- Credit varies; see biology adviser.

Chemistry
- No credit; see chemistry adviser for possible exemption from course work.

Economics
- No credit; see economics adviser for placement.

Music
- Credit varies; see music adviser.

Physics
- No credit; see physics adviser for possible exemption from course work.

**University Placement Tests**

Information concerning mathematics, chemistry, and foreign language placement tests is included with the offer of admission or in the leaflet on registration instructions, which is mailed to applicants upon receipt of their enrollment confirmation. Additional information on recommended tests may be obtained from the appropriate college or departmental advising office. Testing information is also available at the Office of Educational Assessment, 453 Schmitz.

**Grading System**

The University of Washington uses a numerical grading system with certain exceptions in the schools of Dentistry, Law, and Medicine. Instructors may report grades from 4.0 to 0.7 in 0.1 increments and the grade 0.0. The number 0.0 is assigned for failing work or unofficial withdrawal. Grades in the range 0.6 to 0.1 may not be assigned. Grades reported in this range are converted by the Office of the Registrar to 0.0. Numerical grades may be considered equivalent to letter grades as follows:

- A: 4.0-3.9
- A-: 3.8-3.5
- B+: 3.4-3.2
- B: 3.1-2.9
- B-: 2.8-2.5
- C+: 2.4-2.2
- C: 2.1-1.9
- C-: 1.8-1.5
- D+: 1.4-1.2
- D: 1.0-0.9
- D-: 0.8-0.7
- E: 0.0

Lowest passing grade.

Additional information on grades and scholarship rules may be obtained from the Graduations and Academic Records Office, 264 Schmitz. The following letter grades also may be used:

N: No grade. Used only for hyphenated courses (courses not completed in one quarter) and courses numbered 600, 601, 700, 750, and 800.

I: Incomplete. An Incomplete is given only when the student has been in attendance and has done satisfactory work until within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student’s control. To obtain credit for the course, an undergraduate student must convert an Incomplete into a passing grade no later than the last day of the next quarter. The student should never reregister for the course as a means of removing the Incomplete. An Incomplete grade not made up by the end of the next quarter is converted to the grade of 0.0 by the Registrar unless the instructor has indicated, when assigning the Incomplete grade, that a grade other than 0.0 should be recorded if the incomplete work is not completed. The original Incomplete grade is not removed from the permanent record.

In no case can an Incomplete received by an undergraduate be converted to a passing grade after a lapse of one year.

S: Satisfactory grade for courses taken on a satisfactory/not-satisfactory basis. An S grade is automatically converted from a numerical grade of 2.0 or above for undergraduates. The grade S may not be assigned directly by the instructor, but is a grade conversion by the Office of the Registrar. Courses so graded can only be used as free electives and cannot be used to satisfy a University, college, or department course requirement. S is not computed in GPA calculations.

NS: Not-satisfactory grade for courses taken on a satisfactory/not-satisfactory basis. A grade less than 2.0 for undergraduates is converted to NS. NS is not included in GPA calculations. No credit is awarded for courses in which an NS grade is received.

CR: Credit awarded in a course offered on a credit/no credit basis. A student may choose to take a CR/NC course (a course where credit is granted or no credit is assigned). A CR grade is determined, and the grade is awarded directly, by the instructor. CRs are not computed in GPA calculations.

NC: Credit not awarded in a course offered on a credit/no credit basis or in courses numbered 600, 601, 700, 750, and 800. The grade is awarded directly by the instructor and is not included in GPA calculations.

W: Official withdrawal or drop from a course from the third through the seventh week of the quarter for undergraduates. A number designating the week of the quarter is recorded with the W when a course is dropped. It is not computed in GPA calculations.

HW: Grade assigned when an undergraduate is allowed a hardship withdrawal from a course after the seventh week of the quarter. It is not computed in GPA calculations.

**Nontraditional Grading Options**

**CREDIT/NO CREDIT-ONLY AS A COURSE OPTION**

With appropriate departmental review and approval, a course may be offered on a credit/no credit-only basis. The standard for granting credit in credit/no credit-only courses under this option is the demonstration of competence in the material of the course to the instructor’s satisfaction.

**SATISFACTORY/NOT SATISFACTORY GRADE OPTION**

Certain students are eligible to choose that a limited number of their courses be graded satisfactory/not satisfactory rather than with regular numerical grades. Any student who wishes to register for a course on a satisfactory/not-satisfactory basis should check first with his or her adviser to determine restrictions and eligibility, because colleges and departments vary in their rules concerning this grading option (e.g., students in the College of Arts and Sciences may not take courses S/N until they have earned 45 or more college credits). In no case is a student allowed to register for more than 6 credits (or for one course, if that course is offered for more than 6 credits) on a satisfactory/not-satisfactory basis in a given quarter. No more than 25 satisfactory/not-satisfactory credits may be applied to a four-year undergraduate degree. Such courses may not be used to satisfy University, college, or departmental course requirements (i.e., may be applied only to the elective component of a degree).

Generally, a student may not switch to or from satisfactory/not-satisfactory grading for a particular course after the second week of the quarter. Only students in good academic standing (i.e., not on academic warning or probation) are eligible for the S/N grading option. Veterans receiving benefits should check with the Office of Special Services regarding nontraditional grading options.

It should be noted that the possibility of future objective evaluation of the student’s total academic record is reduced by the extent to which the record includes course work that is evaluated by a grading system other than the numerical system. A student should be aware that he or she may jeopardize future educational opportunities, particularly for graduate or postbaccalaureate study, when other systems of performance evaluation are used.

**Grade-Point Average (GPA)**

The University’s cumulative GPA is based solely on courses taken in residence at the University of Washington; this includes some, but not all, courses taken through UW Extension. The UW transcript also reflects grades for UW Extension course work that is not resident credit, and the grades for extension courses are not included in the University’s cumulative GPA. These latter grades do not affect the University cumulative GPA.

**Computation of GPA**

The GPA for graduation is computed by dividing the total cumulative grade points by the total graded credits attempted for courses taken in residence at the University. Grade points are calculated by multiplying the number of credits by the numeric value of the grade for each course. The sum of the grade points is then divided by the total graded credits attempted. Courses elected on an S/N basis are counted as follows: Satisfactory grades are recorded on the permanent record as an S and do not count in the quarterly or cumulative GPA, but they do count as credits earned toward graduation. Not-satisfactory grades, NS, do not count in the quarterly and cumulative GPA and do not count as credits earned toward graduation.

**EXAMPLE 1**

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
<th>Grade</th>
<th>Grade Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>CLAS 205</td>
<td>3</td>
<td>CR</td>
<td>3</td>
</tr>
<tr>
<td>OCEAN 101</td>
<td>5</td>
<td>2.7</td>
<td>13.5</td>
</tr>
<tr>
<td>HST 111</td>
<td>5</td>
<td>4.0</td>
<td>20.0</td>
</tr>
<tr>
<td>SCAND 100</td>
<td>2</td>
<td>3.3</td>
<td>6.6</td>
</tr>
</tbody>
</table>

Total credits earned toward graduation: 15.0

Total graded credits attempted: 12

GPA = 40.1 + 3.34 = 40.41

The total graded credits attempted, not the credits earned toward graduation, are used in computing the GPA.
EXAMPLE 2

Course Credits Grade Grade points
ENGL 121 5 2.3 = 11.5
OCEAN 101 5 0.0 = 0.0
SPHSC 100 3 2.7 = 8.1
ART 105 5 I = 0.0
Total credits earned toward graduation 8
Total graded credits attempted 13 19.6
GPA = 19.6 + 13 = 1.51

The student attempted 18 credits, but only 13 are graded, because the incomplete (I) is not computed in the GPA. The 0.0 for OCEAN 101 is computed in the GPA, but no credit is awarded toward graduation.

If the work in ART 105 is not made up by the end of the next quarter, the I is converted to a numeric grade and the GPA is recomputed.

Repeating Courses
With the approval of the academic department offering the course, an undergraduate may repeat a course once. Both the original grade and the second grade are computed in the GPA but credit is allowed only once. Veterans receiving benefits must receive approval from the Office of Special Services before a course is repeated.

Grading Procedures

Change of Grade
Except in case of error, no instructor may change a grade that he or she has turned in to the Registrar. A student who finds administrative errors or errors in a grade report must make application to the Registrar for a review not later than the last day of the student's next quarter in residence, but in no case after a lapse of two years. Grades used to meet graduation requirements cannot be changed after the degree has been granted. Time spent in military service is not counted as part of the two-year limitation. Students are not automatically notified of grade changes posted after the first of the quarter.

Grade Appeal Procedure
A student who believes he or she has been improperly graded first discusses the matter with the instructor. If the student is not satisfied with the instructor’s explanation, the student may submit a written appeal to the Chairperson of the department, or in a nondepartmental college, to the Dean, with a copy of the appeal also sent to the Instructor. The Chairperson, or Dean, consults with the instructor to ensure that the evaluation of the student's performance has not been arbitrary or capricious. Should the Chairperson believe the instructor’s conduct to be arbitrary or capricious and the instructor declines to revise the grade, the Chairperson (or the Dean in a nondepartmentalized school or college), with the approval of the voting members of his or her faculty, shall appoint an appropriate member, or members, of the faculty of that department to evaluate the performance of the student and assign a grade. The Dean and Provost should be informed of this action.

Once a student submits a written appeal, this document and all subsequent actions on this appeal are recorded in written form for deposit in a department or college file.

Grade Reports
Grade reports are mailed to all students, except those in the School of Medicine, at the close of each quarter. The grade reports are sent to the mailing address on file with the Registration Office. To ensure delivery of grades, changes in the mailing address should be reported in-person to the Registration Office, 225 Schmitz, or by telephone on the Address Change Telephone Service, 543-3868, by the last day of instruction. Copies of the quarterly grade reports are also sent to each student’s Dean and major department.

Scholarship

Low Scholarship

Academic Warning
An undergraduate student whose GPA falls below 2.00 in his or her first quarter at the University receives an academic warning. If a cumulative GPA of at least 2.00 for courses earned in residence at the University is not achieved by the end of the next quarter, he or she is placed on academic probation.

Probation and Dismissal for Low Scholarship
An undergraduate student is placed on academic probation at the end of any quarter (except for the first quarter at the University when an academic warning is issued) in which his or her cumulative GPA falls below 2.00. The student remains on probation until the cumulative GPA is raised to 2.00. If this requires more than one quarter's work, the student must maintain a quarterly GPA of at least 2.50 each succeeding quarter or the student is dropped for low scholarship.

Reinstatement
A student who has been dropped under low-scholarship rules is readmitted to the University only at the discretion of the Dean of the school or college to which readmission is sought. A student readmitted after being dropped under these rules reenters on academic probation. The student's GPA is the same as when dropped from the University, and the student may not use grades from other colleges or universities to raise his or her UW GPA. A readmitted student is dropped if he or she fails to attain either a 2.50 GPA for the following quarter's work or a cumulative UW GPA of 2.00 at the end of that quarter. The student is removed from probation at the end of the quarter in which a cumulative GPA of 2.00 or better is reached.

Senior in Final Quarter
A senior who has completed the required number of credits for graduation, but whose work in what would normally be his or her final quarter results in his or her being dropped for low scholarship, does not receive a degree until removed from probation. A senior who has completed the required number of credits for graduation, but whose work in his or her last quarter results in his or her being dropped for low scholarship, does not receive a degree until readmitted and removed from probation.

High Scholarship

Quarterly High-Scholarship List
The quarterly high-scholarship list includes the names of matriculated undergraduate students who have attained a quarterly GPA of 3.50 in the final grades for at least twelve graded credits. Appropriate high-scholarship entries are made on the student's permanent academic record.

Yearly Undergraduate Honors
The yearly award for high scholarship is recorded on the academic transcript of students who have achieved the following:
- A cumulative GPA of 3.50 in at least three quarters of the academic year (summer, autumn, winter, spring) and 12 graded credits or more for each of the three quarters, exclusive of Satisfactory/No Satisfactory (S/N) and Credit/No Credit-only (C/NC) courses.

Students who have attended the UW four quarters of the school year (summer through spring) must have a
GPA of 3.50 for each of any three quarters, a minimum of 12 graded credits (exclusive of SNS and C&C courses) for each of the three quarters, and a cumulative GPA of 3.50 for the four quarters.

Certificates of High Scholarship
Certificates of high scholarship are awarded to students in the sophomore, junior, and senior classes who have high scholastic records for their freshman, sophomore, or junior years, respectively. The Honors Committee determines the GPA required for the awarding of certificates.

Baccalaureate Honors
Baccalaureate honors (summa cum laude, magna cum laude, cum laude) are awarded only to recipients of a first baccalaureate degree. These honors are earned by those students who have completed no fewer than 90 residence credits at this institution. At least 60 of the 90 credits must have been acquired on a graded basis.

The University's Honors Committee determines annually the grade-point requirement for each baccalaureate honor. In recent years, approximately nine percent of the students have been awarded baccalaureate honors. Credits earned by correspondence courses are not counted toward honors eligibility.

Sophomore Medal, Junior Medal, President's Medal
Annually, the junior having the most distinguished academic record for the first two years of his or her program receives the sophomore medal from the President of the University. The senior having the most distinguished academic record for the first three years of his or her program receives the junior medal from the President of the University.

The President's Medal, which is conferred at commencement, recognizes the graduating senior who has the most distinguished academic record. Only students who have earned at least 90 credits in residence at the University may be considered.

Honorary Societies
In addition to the honors discussed above, students with distinguished academic records may participate in several University-wide honorary societies, described below, and specific college or school honorary societies. Information concerning specific college or school honorary societies appears in the respective sections of this catalog.

Golden Key National Honor Society. A national, non-profit academic honors organization founded in 1977 for the purpose of recognizing and encouraging scholastic achievement among students from all academic fields. Membership is by invitation only.

Mortarboard. A national college senior honor society whose membership is based on scholarship, leadership, and service. The local Tolo chapter was first founded in 1909 and became part of the national organization in 1925. Students of junior standing apply winter quarter for selection in spring quarter.

Phi Beta Kappa. A national collegiate honorary society, founded in 1776, with the Washington Alpha Chapter established in 1914. Phi Beta Kappa recognizes distinguished scholarship, especially in the acquisition of an education in the liberal arts and sciences. Students are elected to membership on the basis of GPA and breadth of education. Additional information on honorary societies may be obtained from academic advisers and the respective campus representatives.

Graduation

Graduating Senior Priority
Graduating seniors or postbaccalaureate students with a degree application on file in the Graduations and Academic Records Office may register on the first day of Period I for their first two quarters. Students who postpone their graduation may save their priority quarters by not registering before their regular senior or postbaccalaureate priority day. When students have used their Graduating Senior Priority for two quarters, their registration priority reverts to the regular senior or postbaccalaureate schedule. See the quarterly Time Schedule for current information.

Filing an Application for Baccalaureate Degree
A student should file a written application for his or her degree with the Graduations and Academic Records Office. 264 Schmitz, two to three quarters before the expected date of graduation. The absolute deadline for filing an application is Friday of the third week of the quarter in which the student intends to graduate.

It is the student's responsibility to apply for a degree and/or certificate, because degrees are not automatically awarded when requirements have been satisfied. Application forms and diploma cards are available at the Graduations and Academic Records Office and in the major departments.

The signature of the department head or of an authorized adviser must appear on the application in the space provided for "Signature of major adviser." If the student's major is in a college other than Arts and Sciences, the signature of the dean or a designated representative is required. The student is also required to sign the application.

After the application is reviewed, the second and third copies are sent to the department or college office and the original is retained in the Graduations and Academic Records Office. If a problem regarding the application arises, the Graduations and Academic Records Office notifies the student. Departmental advisers should notify the Graduations and Academic Records Office of any changes made to the courses and credits listed on the application.

If an applicant is ineligible to graduate because of a deficiency, the Graduations and Academic Records Office notifies the student.

University Requirements for Baccalaureate Degree
To graduate, a student must meet University, college or school, and departmental requirements. Only University requirements are listed in this section. Requirements of colleges, schools, and departments appear in the section pertaining to the college, school, or department concerned.

Scholastic Standards Required
To be eligible for the baccalaureate degree, a student must earn a cumulative GPA of 2.00 for all work done in residence at the University.

The graduation GPA is computed when the student has completed all work for the degree and includes only credits earned while in residence at the University.

Credits Required
To be eligible for graduation from the University with the baccalaureate degree, a student must satisfy all other specific requirements and must offer a minimum of 180 academic credits.

University General Education and Proficiency Requirements
The University has adopted minimum general education and proficiency requirements. Individual schools and colleges maintain general education and proficiency requirements in excess of University requirements. Consult the undergraduate program section of each school or college for specific graduation requirements.
Limitation on ROTC Credits
Credits earned in first- and second-year military training courses cannot be counted in the basic 180 credits required for graduation. Some third- and fourth-year courses may count, depending on the student’s college or school.

Limitation on Physical Education Activity Credits
No more than 3 physical education activity credits can apply toward a degree.

Final-Year Residence Requirement
To be recommended for a first or subsequent degree, the student must complete the final 45 credits as a matriculated student in residence at the University. The granting of exceptions to this rule is the responsibility of the Dean of the college or school awarding the degree. If an exception is granted, the student must present a minimum of 45 credits taken in residence as a matriculated student to be awarded a UW degree.

Effective Date for Graduation Requirements
If fewer than ten years have elapsed since a student’s admission into her or his major program, she or he may choose to graduate under the major program requirements in effect at the time of admission, or under any subsequent requirements. The choice shall be subject to approval of the student’s departmental chairperson and dean, according to the procedures established in Section 23-46 of the Faculty Code.

If the student wishes to obtain a degree after a lapse of more than ten years from the date of admission to the major program, she or he must meet the requirements in effect at the time of graduation unless permission to use earlier requirements is granted, either as a general policy or expressly for the individual student, by the department, school, or college whose requirements are in question.

These provisions do not apply to the requirements for teaching certificates, which are prescribed by the College of Education at the time the certificate is to be granted.

Waiver of Graduation Requirements
A request for waiver of college or University graduation requirements is petitioned to the college graduation committee, which refers the petition to the Committee on Admissions and Academic Standards if an all-University requirement is involved. These petition forms are available at the Graduations and Academic Records Office or the advisory office and should be filed with the application for degree or as soon as possible if the need arises. A student should see his or her academic adviser to initiate a petition. Because the Committee on Admissions and Academic Standards meets only quarterly, petitions involving University requirements should be filed early in the quarter.

An exemption from an all-University graduation requirement that is granted by the Committee on Admissions and Academic Standards becomes void at the end of two calendar years from the date such exemption is granted if all degree requirements have not been completed within that period.

Graduation Requirements for ROTC Students
As a prerequisite for graduation from the University, students accepted for the third- and fourth-year advanced ROTC program must complete the advanced program unless excused or dismissed from this requirement by regulations prescribed by the Secretary of the Army, the Navy, or the Air Force, whoever has the authority in the individual case.

Two Majors or Two Degrees
Second Baccalaureate Degree
A second baccalaureate degree may be granted, but a student must earn a minimum of 45 credits beyond the number required for the first baccalaureate degree. These credits usually must be earned in residence, with the granting of exceptions to the residency rule being the responsibility of the college or school awarding the degree. Students working for a second baccalaureate degree are not registered in the Graduate School. The student must achieve no less than a 2.00 cumulative GPA in the credits required for the second degree.

Degrees with Two Majors
Some colleges allow a baccalaureate degree with two majors. The student’s application for such a degree must show both majors and be approved by the advisors of both departments. Both majors appear on the transcript and both must be either Bachelor of Arts or Bachelor of Science degrees.

Two Baccalaureate Degrees Concurrently
Two baccalaureate degrees, associated with different majors, may be granted at the same time, but the total number of academic credits earned must be at least 45 credits in excess of the number required for the first baccalaureate degree.

Academic Minors
Degrees with Minor: departments, schools, and colleges are authorized to provide a course of study leading to an undergraduate academic minor. Requirements are within the purview of the department, school, or college. The minor shall consist of no fewer than 25 credits. Interdisciplinary minors are acceptable. Completion of the minor will appear on the permanent record.

Requirements for Teaching Certification
The College of Education offers professional programs approved by the State Board of Education leading to teaching and other certificates. Additional information appears in the College of Education section of this catalog, or the student may write to the College of Education advisory office, 211 Miller.

Commencement
Formal commencement exercises are conducted at the close of spring quarter. During April of each year, commencement information is sent to each student entitled to participate the following June (i.e., those who graduated the previous August, December, or March and those who anticipate graduating in the current June and August).

Diploma Distribution
Diplomas are available twelve weeks after the end of the quarter in which they are earned. Diplomas are mailed if requested by the student.

In 1885, the University of Washington awarded its first graduate degree, a Master of Arts in the field of classical languages. In 1914, the University awarded its first Doctor of Philosophy degree, in the field of chemistry. The University has conferred more than forty-five thousand master's degrees and nine thousand doctoral degrees, exclusive of medical, dental, and first legal doctorates.

Graduate study is guided by the Dean of the Graduate School and a Graduate Faculty of over twenty-five hundred members, selected for their scholarly and research qualifications and their concern with graduate education. Approximately eight thousand graduate students are now in residence, working toward master's or doctoral degrees. Programs in the Graduate School leading to master's and doctoral degrees are offered in eighty-four departments or other organizational units of the University. The Graduate School directly sponsors nine interdisciplinary degree programs by organizing Graduate School groups of interested faculty members and assisting them in developing such programs. It also administers the Graduate School of Library and Information Science and its departmental programs. The University has obligated itself to promote greater internationalism, which includes the recruitment and retention of ethnic minority students in areas of underrepresentation, the division administers several federal and private scholarship programs which provide financial aid and contribute to the overall environment of support for minority graduate students.

The Dean of the Graduate School is also a Vice Provost with responsibilities for strengthening the international dimensions of all aspects of the University’s mission—teaching, research, and community service. The Vice Provost’s responsibilities are to encourage the international initiatives of all units and individuals on campus, to advocate the University’s international mission both nationally and externally, to actively work to identify needed programs, to help create these programs, to facilitate cooperative efforts across campus, to urge that international activities and programs have a high priority for funding, and to develop and nurture partnerships internationally and with other institutions in the region and with foreign universities and alumni organizations. These efforts are necessary in securing opportunities for students and faculty to study and conduct research abroad, improve our international programs, and to foster the integration of education and research to the benefit of both. Through graduate programs, the University is guided by the Dean of the Graduate School, who, serves as an important link between the unit and the Graduate School. Students are advised to seek the help of the graduate program coordinator when questions concerning Graduate School and departmental degree requirements arise.

The Graduate School also has been given a number of responsibilities that relate to its primary ones, such as the administration of the Graduate School Fund and certain fellowship programs, as well as such central facilities as the University of Washington Press, and the Walker-Ames and the Jessie and John Danz distinguished visiting professorships. The University has obligated itself to promote greater access to advanced study by women and members of ethnic minority groups. Within the Graduate School, the Minority Education Division actively solicits applications for admission, facilitates their review, and helps with various procedures related to the enrollment of minority graduate students. The division offers financial aid to students who need such help. In addition to a special appropriation of funds by the Washington State Legislature to encourage the recruitment and retention of ethnic minority students in areas of underrepresentation, the division administers several federal and private scholarship programs which provide financial aid and contribute to the overall environment of support for minority graduate students.

Graduate Study Programs Offered

Graduate degree programs are reviewed by the Graduate School on a ten-year cycle, or at determined shorter intervals. For further information, see Graduate School Memorandum No. 7, Periodic Review of Existing Degree Programs, or contact the Academic Programs Office in the Graduate School.

earned in this category to degree requirements should they later be accepted into a graduate program. Applicants should meet minimum Graduate School admission requirements but admission as a graduate nonmatriculated student does not imply admission to a graduate degree program. The Application to Graduate Nonmatriculated Status must be obtained from the program to which you wish to apply. Official sealed transcripts from all collegiate institutions previously attended must be sent to the Graduate Nonmatriculated Office, AD-10, University of Washington, Seattle, WA 98195. (Refer to Graduate School Memorandum #37 for further information.)

Admission to the University of Washington is necessarily a selective process. The prospective student must hold a baccalaureate degree from an accredited college or university in this country or its equivalent from a foreign institution. The student's record should be a strong one with an average grade of B or a 3.00 grade-point, or better. The primary criterion and the priority for admission of new applicants into a graduate program is the applicant's ability, as decided by the appropriate faculty, to complete the graduate program expeditiously with a high level of achievement. One aspect of meeting this criterion is the matching of interests between applicants and faculty. Also to be considered is maintenance of a diverse student body within the Graduate School and the individual programs.

Factors which may be considered during the admissions process include:

• Undergraduate grades, especially for subjects in or closely related to the field of the proposed graduate study.
• Consistency in completing an undergraduate degree program.
• Required test scores.
• Personal interviews.
• Career objectives and the ability of the graduate program to prepare a student for them.
• Degree objectives.
• Written and oral recommendations from those qualified to evaluate the applicant's academic record and promise.

Importance given to these factors will vary among degree programs.

Most Graduate School admissions are for summer or autumn quarters. Admissions for winter and spring quarters may be severely restricted due to considerations of space. The following are graduate admissions closing dates. It is important to remember that individual departments often have much earlier deadlines which supersede those listed below, particularly for autumn quarter.

• Autumn Quarter—July 1
• Winter Quarter—November 1
• Spring Quarter—February 1
• Summer Quarter—May 15

Each academic program at the University of Washington has a Graduate Program Coordinator who is responsible for providing advice, guidance, and assistance to applicants as well as to students working toward graduate degrees. Prospective graduate students are urged to contact the Graduate Program Coordinator in their program of interest for information about any aspect of graduate study, including research, curriculum, faculty, and financial support in the form of teaching and research assistantships, grants, and scholarships.

Admission Process

The application forms for both graduate and graduate nonmatriculated status must be obtained from the Graduate Program Coordinator. Visiting graduate applications are available from the Office of Graduate Admissions. It is very important to submit all application documents in time to meet departmental deadlines as these will supersede graduate admissions deadlines.

Required Examinations

The Graduate Record Examination (GRE) is required for admission as a graduate student except in the following circumstances:

• Applicants to Art, Dance, Drama, and to the Master of Music and Doctor of Musical Arts degree in Music.
• Applicants holding earned doctorates (such as Ph.D., D.D.S., M.D., Ed.D., J.D.) from U.S. institutions.
• Applicants to the M.B.A. or M.P.Acc. degrees in the School of Business Administration, who must submit scores from the Graduate Management Admission Test (GMAT).

Scores must be received directly from the Educational Testing Service.

For further information you may write to:
Graduate Record Examinations
Educational Testing Service
P.O. Box 6000
Princeton, NJ 08541-6000
(609) 771-7670 or (610) 696-1200

Graduate Admissions

The Office of Graduate Admission
98 Administration AD-10
University of Washington
Seattle, WA 98195
(206) 543-5929

The University of Washington provides equal opportunity in education without regard to race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled or Vietnam era veteran in accordance with University of Washington policy and applicable federal and state statutes and regulations. In addition, sustained efforts are made to include qualified students who are members of groups that have been subject to discrimination or who are underrepresented in certain disciplines. You may apply to the University of Washington through the Office of Graduate Admissions in three ways. It is important to understand the distinctions between the categories.

• A graduate student is a person working toward a master's or doctoral degree or earning a school administrator's credential. Students must be admitted to this status in order to earn a degree. The Application for Admission to the Graduate School is obtained from the program to which you wish to apply.

• A visiting graduate student is a person who plans to transfer graduate credits earned at the University of Washington to another institution where he or she is actively pursuing a graduate degree. Admission is based on availability of resources. Visiting graduate applicants must have been admitted to another recognized graduate school, be currently pursuing a graduate degree, and in good standing. Although transcripts need not be provided with the application, a Certificate of Status signed by the home institution is required. The Application and Certificate should be obtained directly from the Office of Graduate Admissions at the address above.

• Some graduate programs have chosen to offer admission to graduate nonmatriculated students. These students are not presently seeking a graduate degree but may wish to apply a maximum of 12 credits...
International Applicants

In addition to the other requirements for all applicants, a minimum score of 500 on the Test of English as a Foreign Language (TOEFL) must be presented by applicants who are not citizens of the United States unless they meet one of the following exceptions:

- Citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom.
- Applicants holding bachelor's or advanced degrees from accredited institutions in the U.S. or in one of the countries listed above.

Applicants offered admission with TOEFL scores between 550 and 580 will be required to fulfill an English as a Second Language (ESL) requirement.

With the exception of citizens of the countries listed above, all international and immigrant status applicants who intend to apply for teaching assistantships must also take the Test of Spoken English (TSE).

Due to the time required for evaluation of applications, overseas applicants for autumn quarter are strongly encouraged to submit the application and transcripts to the Office of Graduate Admissions no later than the prior December 1. Applications received after this date will be processed as soon as possible but significant delays may result.

Registration

After successful applicants have been offered admission, the Registration Office sends a request for a $100 Enrollment Confirmation Deposit to indicate the intent to register. This nonrefundable fee will apply toward the first quarter’s tuition.

The University provides registration services through STAR (Student Telephone Assisted Registration), a touch-tone telephone registration system. See the quarterly Time Schedule for detailed information and procedures.

Once admitted, graduate students are expected to maintain registered or on-leave status until the degree is conferred. (See section on Continuous Enrollment.)

Financial Aid for Graduate Students

Students applying for fellowships, traineeships, and assistantships, or associateships must make certain that complete transcripts and other credentials are on file by February 15 (earlier submission of applications and supporting documents is urged by all departments and required by some). Awards and appointments are usually made about April 1. Application forms may be obtained by writing to the graduate program coordinator of the appropriate department.

Fellowships, Traineeships, and Scholarships

A limited number of fellowships, traineeships, and scholarships are available through the Graduate School or through individual departments to outstanding students in fields of study leading to advanced degrees. Application forms may be obtained from the graduate program coordinators in the departments or from the Fellowship and Assistantship Division in the Graduate School.

The Graduate School also provides computer searches to assist enrolled graduate students, faculty, and staff in locating fellowships, grants, and other sources of funding. The data base contains over three thousand awards from foundations, government agencies, associations, and other non-University organizations. These awards are made on a national competitive basis, and application must be made directly to these foundations or organizations.

Graduate Student Service Appointments

The University provides for the employment of many graduate students as teaching, research, and staff assistants, predoctoral associates, predoctoral instructors, and predoctoral lecturers. Approximately two thousand such appointments were made during the past year.

The University’s policy regarding these appointments is set forth in detail in Executive Order 28. Copies of this statement are available from the graduate program coordinator or the Graduate School. Some of the information is provided below.

Appointments are granted only to graduate students who have carefully defined educational goals and who exhibit the highest intellectual competence and attainment. Succeeding appointments may be made if the student maintains high scholarship and continues to make satisfactory progress toward the degree.

Graduate appointments are granted to graduate students only. An initial appointment may be offered to a student before being admitted formally to the Graduate School, but the appointment is contingent upon admission to graduate status before the beginning of the appointment.

1993-94 GRADUATE STUDENT SERVICE APPOINTMENTS

Students holding these appointments for at least 20 hours per week and for live of the six pay periods of an academic quarter will receive a waiver of the operating fee portion of "tuition and fees" and will be required to pay approximately $121 tuition per quarter.

Salary for Half-time Service (20 hours per week)

Effective September 16, 1993—September 15, 1994

10,458

* Minimum

Graduate students appointed to the beginning level of graduate teaching appointments are not permitted to be in overall charge of a course, but are given an appropriate degree of responsibility and supervision of laboratory or classroom work so that they may be introduced to teaching activities gradually and effectively. Student appointees may also serve as assistants in research activities for which a faculty member is responsible.

Two special categories for teaching appointments and one for research appointments are provided above the predoctoral associate level: predoctoral lecturer, for a mature and competent graduate student who needs to teach his or her classes and is ready for increased teaching responsibility; predoctoral lecturer, for a mature and competent graduate student who is already teaching and is ready for increased teaching responsibility; predoctoral research assistant, for the student who has special skills or qualifications obtained outside of his or her academic experience who, as a graduate student or who carries major responsibilities in relation to research activities. For the 1993-94 academic year these appointments carry a minimum stipend of $1,162 per month (half-time) with no designated maximum so that the stipend may be adjusted to a level appropriate to the appointee's experience and, his or her teaching and research responsibilities.

International students with teaching appointments (teaching assistant, predoctoral teaching associate I and II, predoctoral instructor, predoctoral lecturer) must meet a spoken-English requirement before they may be given classroom duties.

An additional series of appointments titled Graduate Staff Assistant and Predoctoral Associates I and II is provided for University service activities that are not appropriately described as teaching or research but are closely related to the student's field of advanced study. Appointments of specific graduate students to these positions may not be made until after the position itself has been specifically approved.

Students who hold any of the above appointments are required to render twenty hours of service per week to the University. The appointments may be on a nine-month basis and ordinarily cover the period from September 16 through June 15. Some of these appointment times may be extended to eleven or twelve months. Graduate student appointments do not provide for paid vacations or sick leave. Students who accept these University service appointments normally confine their employment to such appointments.

A graduate student service appointee must register for, and carry throughout each quarter except summer quarter, a minimum of 9 credits in formal courses or in research, thesis, or dissertation work. These credits must be in courses that are applicable toward an advanced degree.

Work Study Graduate Assistantships

Graduate students who are eligible for the need-based college work study program may qualify for work study graduate assistantships in teaching or research. Students must submit financial aid applications to the Office of Student Financial Aid by the February 28 deadline to be considered for these positions. Information is available from the Office of Student Financial Aid.

Employment Opportunities

The campus offers other job opportunities for graduate students. Students may apply directly to the Chairperson of the department in which they wish to work or to the Student Employment Office. Students seeking part-time employment must be enrolled and on campus before they may obtain jobs.

Advisory positions in University residence halls paying room and board are available for single graduate students, both men and women. Additional information may be obtained from the Director of Residence Halls Programs, 301 Schmitz.

Spouses of married students also may apply for regular full- and part-time University employment. These positions cover a wide range of occupations and offer pay comparable to the prevailing salaries in the community. Some carry such fringe benefits as vacations, sick leave, and opportunities to enroll in University courses. Inquiries may be directed to the Staff Employment Office, 1320 Northeast Campus Parkway, Seattle.

Loans

Long-term educational loans are available to graduate students through the Perkins Direct Student Loan and the Stafford Student Loan programs.

The Perkins Direct Student Loan Program usually provides a maximum annual loan to graduate students of $3,000 and bears an interest rate of five percent. There are certain cancellation provisions in the Perkins Direct Student Loan Program for combat-zone veterans and teachers of the disadvantaged. Loan application forms for this program are available in the Office of Student Financial Aid, PE-29, 105 Schmitz, telephone (206) 543-6101.

The application deadline is February 28 for the following autumn quarter.
Students should meet the application deadline even if they have not yet been admitted to the Graduate School.

The Stafford Student Loan Program is based on the student's financial need and provides for a long-term bank loan in which the graduate student can borrow up to a maximum of $7,500 per year, depending on individual lending institutions' policies. This loan currently bears an eight to ten percent interest rate. Nonresident students may obtain application forms from the student's bank. Washington residents must obtain application forms from the Office of Student Financial Aid. Lending institutions establish their own application deadlines and policies for making Stafford student loans. An early inquiry to the student's bank is advisable. Nonresidents should check with the lending institutions in their home states. Three months are usually required to process this loan.

Short-term emergency loan funds also are available through the Office of Student Financial Aid. Several different types of short-term loans are possible, from $300 interest-free loans to approximately $700 loans at six percent interest. In an emergency, students may also borrow the amount equal to resident graduate tuition or a twenty-five percent advance on a Stafford student loan. More information is available from the Office of Student Financial Aid.

Financial Aid for Minority Graduate Students

The Minority Education Division of the Graduate School administers a variety of fellowships and assistantships based on need and on merit. Financial support is open to men and women whose ethnic origin is either Black/African American, American Indian/Alaskan Native, Asian American/Pacific Islander, or Hispanic/Mexican American. These awards are generally made through the nomination and support of the department in which the student is enrolled. Students must be U.S. citizens or permanent residents to be eligible. Supplemental awards ranging from $250 to $1,000 are based upon an evaluation of the student's need as established by the Free Application for Federal Student Aid (FAFSA) and the University's Office of Student Financial Aid. A limited number of tuition scholarships are also available.

Financial assistance from individual departments may also be available, and students should apply directly to the chairperson of their department.

Further information may be obtained by writing the University of Washington, Graduate School, Minority Education Division, AG-10, Seattle, Washington 98195.

All awards are contingent upon the student's admission to the University of Washington Graduate School.

Graduate Degree Policies

Generally focused on a specific field of knowledge, graduate study is conducted through a variety of means, including lectures, seminars, independent advanced study, special reading courses, internships, and participation in research. Graduate programs leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees emphasize the development of the student's ability for independent scholarly work and the creation of new knowledge through research. Practice-oriented programs, which ordinarily lead to the degree of master or doctor in a particular professional field, emphasize preparation of the student for professional practice at the frontiers of existing knowledge.

Many master's and all doctoral programs culminate in the presentation of a thesis or dissertation conveying the results of the independent study and research carried out by the student. A master's thesis contributes to knowledge, reviews or critiques the state of knowledge in a field, creates a new design or composition, or represents some other appropriate kind of independent contribution. A doctoral dissertation must set forth a significant contribution to knowledge or understanding in the student's field, be presented in scholarly form, and demonstrate that the student is competent to engage independently in the pursuit of solutions to important problems. The student must defend the doctoral dissertation in a Final Examination conducted by a faculty committee and open to all other Graduate Faculty members. A member of the Graduate Faculty from some other discipline participates as an official representative of the entire Graduate Faculty in all aspects of the student's program, including various major evaluations such as the General Examination and Final Examination.

Graduate Program Coordinator

The graduate student's initial work at the University is guided by the graduate program coordinator in his or her field. The coordinator must be a senior tenured member of the Graduate Faculty and is the official representative of the academic unit that offers the graduate degree program. The graduate program coordinator maintains familiarity with policies and procedures of the Graduate School and provides overall coordination of graduate activities within the unit.

Graduate Courses

Graduate courses are intended for, and ordinarily restricted to, either students enrolled in the Graduate School or graduate nonmatriculated students, and are given numbers from 500 through 800. Some courses at the 300 and 400 levels are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the supervisory committee and the Graduate School, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only. Courses at the 300 level are not included in the calculation of grade-point average (GPA) and will not apply toward the minimum Graduate School requirement of 18 graded credits for the master's or doctoral degree. Approved 400-level courses are accepted as part of the major as well as minor or supporting fields. Courses numbered 498 and entitled Special Topics or Special Projects normally are not applicable to a graduate degree program if addressed primarily to introductory content and undergraduate students. Undergraduate research (499) is not accepted as part of the graduate program. Graduate School Memorandum No. 36 offers additional information on graduate courses. With the exception of summer, students are limited to a maximum of 9 credits per quarter of any combination of courses numbered 600, 700, or 800.

Grading System for Graduate Students

In reporting grades for graduate students, units that offer graduate degrees use the system described herein. Grades are entered as numbers, the possible values being 4.0, 3.9, . . . , and decreasing by one-tenth until 1.7 is reached. Grades below 1.7 are recorded as 0.0 by the Registrar and do not count toward residency, total credit count, or grade and credit requirements. A minimum of 2.7 is required in each course that is counted toward a graduate degree. A minimum GPA of 3.0 is required for graduation.

Correspondence between number grades and letter grades is as follows:

<table>
<thead>
<tr>
<th>Numeric grade-point equivalent</th>
<th>Letter grade</th>

Repeating Courses

Graduate students may repeat any course. Both the first and second grades will be included in the cumulative GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once. The following letter grades also may be used:

Incomplete. An incomplete may be given only when the student has been in attendance and has done satisfactory work to within two weeks of the end of the
quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control. A written statement giving the reason for the incomplete and indicating the work required to remove it must be filed by the instructor with the head of the unit in which the course is offered.

To obtain credit for the course, a student must successfully complete the work by the last day of the next quarter in residence. This rule may be waived by the Dean of the college in which the course is offered. In no case may an incomplete be converted into a passing grade after a lapse of two years or more. An incomplete received by a graduate student does not automatically convert to a 0.0 but will remain a permanent part of the student's record.

No grade. Used only for hyphenated courses and courses numbered 600 (Independent Study or Research), 601 (Internship), 700 (Master's Thesis), 750 (Internship), or 800 (Doctoral Dissertation). An N grade indicates that satisfactory progress is being made, but evaluation depends on completion of the research, thesis, internship, or dissertation, at which time the instructor or supervisory committee chairperson should change the N grade(s) to one reflecting the final evaluation.

SNS Satisfactory/not satisfactory. A graduate student, with the approval of the graduate program coordinator or supervisory committee chairperson, may elect to be graded SNS in any numerically graded course for which he or she is eligible. The choice must be indicated at the time of registration or by the tenth day of the quarter. (As with all registration changes, a $20 change fee will be charged beginning the second week of the quarter.) Only in very unusual cases may SNS grades be converted to numeric grades or vice versa. The instructor submits a numeric grade to the Registrar's Office for conversion to S (numeric grades of 2.7 and above) or NS (numeric grades lower than 2.7).

CRNC Credit/no credit. With the approval of the faculty in the academic unit, any course may be designated for grading on the credit/no credit basis by notice in the appropriate Time Schedule. For such courses, the instructor submits a grade of CR or NC to be recorded by the Registrar's Office for each student in the course at the end of the quarter. All courses numbered 600, 601, 700, 750, and 800 may be graded with a decimal grade, a CRNC, or N at the instructor's option.

Withdrawal. Official withdrawal from a course may be done by calling STAR through the seventh week of the quarter. During the first two weeks of the quarter no entry is made on the permanent academic record. The third week through the seventh week of the quarter, a W is recorded on the transcript. Refer to the Time Schedule after the seventh week of the quarter.

Hardship withdrawal. Grade assigned when a graduate student is allowed a hardship withdrawal from a course after the seventh week of the quarter.

Unofficial withdrawal from a course shall result in a grade of 0.0.

The grades of W and HW count neither as completed credits nor in computation of the GPA.

Of the minimum number of credits required for a graduate degree, at least nine are to be earned in passing grades in at least eighteen quarter hours of course work taken at the University of Washington. These numerical grades may be earned in approved 400-level courses and 500-level courses.

The student may petition the Dean of the Graduate School to modify the procedures stated above. The petition should be accompanied by comments and recommendations from the graduate program coordinator or supervisory committee chairperson.

Scholarship

A cumulative GPA of 3.00 or above is required to receive a degree from the Graduate School. A graduate student's GPA is calculated entirely on the basis of numeric grades in 400- and 500-level courses. The grades of SNS, CR, NC, and N are excluded as are all grades in courses numbered 600, 601, 700, 750, and 800, and in courses at the 100, 200, and 300 levels.

Failure to maintain a 3.00 GPA, either cumulative or for a given quarter, constitutes low scholarship and may lead to a change-in-status action by the Graduate School.

Failure to maintain satisfactory performance and progress toward a degree may also result in a change-in-status action by the Graduate School.

(See Graduate School Memorandum No. 16 for additional information.)

Withdrawal Policy

1. During the first two weeks of the quarter, graduate students may withdraw from all courses for any reason by filing an appropriate form with the Registration Office. A withdrawal of S grade(s) will be recorded on the permanent academic record. The date of complete withdrawal is recorded on the student's transcript.

2. Starting the third week of the quarter, a grade of W is recorded when graduate students drop any course or withdraw completely.

3. Graduate students have until the end of each quarter to withdraw completely from all courses.

4. The withdrawal schedule shown above applies to quarters of the regular academic year. The deadlines for summer quarter are established by the Dean of Summer Quarter.

5. Unofficial withdrawal from a course results in a grade of 0.0.

Language Competence Requirements and Examinations

Competence in one or more languages in addition to English is desirable for all fields of advanced study and is often required, especially in the scholarly and research-oriented programs leading to the Master of Arts, Master of Science, and Doctor of Philosophy.

Requirements for foreign-language competence are established by the Graduate Faculty in the unit offering the graduate program. Language competence in certain languages other than English (i.e., languages that may be significant to scholarship in the field) may be specified as helpful or desirable or may be required. Students should consult the graduate program coordinator for information and advice about desirable or required competence in foreign languages.

When appropriate, students are urged to establish foreign-language competence as undergraduates before entering the Graduate School or as early as possible in their graduate careers. The University's language competence requirements in French, German, and Spanish may be satisfied by successful completion of the standardized examinations given by the Educational Testing Service (ETS). These examinations are given at the University and elsewhere throughout the United States and in many foreign countries. For foreign languages, examinations are given at the University of Washington on the dates announced at the beginning of each term.

It is assumed that students from English-speaking countries who are admitted to the Graduate School are competent in the English language; students from non-English-speaking countries must demonstrate a satisfactory command of English, both for admission and for completion of all requirements for the graduate degree. This includes the passing of the master's final examination or doctoral final examinations, the passing of the thesis or dissertation, and the receiving of the degree.

Summer quarter On-Leave enrollment is automatic for all graduate students who are either registered or on leave for the spring quarter. Failure to maintain continuous enrollment results in the automatic dismissal of graduate students from the Graduate School.

A student's petition for On-Leave status must be approved by the departmental graduate program coordinator or alternate and submitted to the Registrar's Office.
fice no later than the fifth day of the quarter. To be eligible for On-Leave status, the student must have registered for, and completed, at least one quarter in the University of Washington Graduate School and have been registered or On-Leave for the immediate past quarter (excluding summer). An On-Leave student is entitled to use the University Libraries and to sit for foreign-language competence examinations, but is not entitled to any of the other University privileges of a regularly enrolled and registered full- or part-time student. The student pays a nonrefundable fee to obtain On-Leave student status covering four successive academic quarters or any part thereof. An On-Leave student returning to the University on or before the termination of the period of the leave must file a Former Student Enrollment Application (available at 225 Schmitz) by the deadline stated on the form and register in the usual way as a full- or part-time student (see Graduate School Memorandum No. 9 for procedures). A student who returns before the termination of the On-Leave period and maintains registration for any part of a quarter cancels On-Leave status. Please note: Periods spent On-Leave are included as part of the maximum time periods allowed for completion of a graduate degree.

READEMISSION
A student previously registered in the Graduate School who has failed to maintain graduate student status but who wishes later to resume studies must file an application in person or by mail for readmission to the Graduate School by the regularly published closing dates. If the student is readmitted, registration will occur during the usual registration period. If the student has attended any other institution during the period when not registered at the University of Washington, official transcripts in duplicate of the student's work must be submitted. An application for readmission carries no preference and is treated in the same manner as an application for initial admission, including the requirement of payment of the application fee.

The Graduate School normally allows six years to complete requirements for a master's degree and ten years for a doctoral degree. Periods spent On-Leave or out of status are included.

Master's Degree

SUMMARY OF REQUIREMENTS
It is the responsibility of each master's candidate to meet the following Graduate School minimum requirements:

1. Under a thesis program, a minimum of 36 or more quarter credits (27 course credits and a minimum of 9 credits of thesis) must be presented. Under a nonthesis program, a minimum of 36 or more quarter credits of course work is required.

2. At least 18 of the minimum 36 quarter credits for the master's degree must be for work numbered 500 and above. (In a thesis program, 9 of the 18 must be course credits and 9 may be for 700, Master's Thesis.)

3. Numerical grades must be received in at least 18 quarter credits of course work taken at the University of Washington. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.

4. A minimum of three full-time quarters of residence credit must be earned. Part-time quarters may be accumulated to meet this requirement (see detailed information under Residence).

5. In a thesis degree program, a thesis, approved by the supervisory committee, must be submitted to the Graduate School. A student must register for a minimum of 9 credits of thesis (700). With the exception of summer, students are limited to a maximum of 9 credits per quarter of thesis (700).

6. A final master's examination, either oral or written, as determined by the student's supervisory committee, must be passed.

7. Any additional requirements imposed by the graduate program coordinator in the student's major department or by the student's supervisory committee must be satisfied. A master's degree student usually takes some work outside the major department. The graduate program coordinator in the major department or the student's supervisory committee determines the requirements for the minor or supporting courses.

8. The graduate student must apply for the master's degree at the Graduate School within the first two weeks of the quarter in which he or she expects the degree to be conferred, in accordance with Application for the Master's Degree, as described below.

9. The graduate student must maintain registration as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).

10. All work for the master's degree must be completed within six years. This includes quarters spent On-Leave or out of status and applicable work transferred from other institutions (see detailed information under Transfer Credit).

11. A student must satisfy the requirements for the degree that are in force at the time the degree is to be awarded.

A second master's degree may be earned at the University of Washington by completing an additional set of requirements. Please refer to Concurrent Degree Programs later in this section and to Graduate School Memorandum No. 35 (revised September 25, 1989) for more specific information.

TRANSFER CREDIT
A student working toward the master's degree may petition the Dean of the Graduate School for permission to transfer to the University of Washington the equivalent of a maximum of 12 quarter credits of graduate level course work from a recognized graduate student in another recognized graduate school. These credits may not have been used to satisfy requirements for another degree. The petition must include a written recommendation from the graduate program coordinator and an official transcript indicating completion of the course work. Transfer credits are not entered on the UW transcript.

University of Washington students who are within 6 credits of completing their undergraduate degree and who have met the requirements for admission to the Graduate School may request the transfer of credits earned while within that degree that are in force at the time the degree is to be conferred, in accordance with Application for Transfer Credit (see Graduate School Memorandum No. 35). The Graduate School may not transfer into a graduate program credit by either independent study through correspondence or advanced credit examinations is not transferrable.

THESIS PROGRAM
The master's thesis should be evidence of the graduate student's ability to carry out independent investigation and to present the results in clear and systematic form. Two copies of the thesis, written in the English language, along with the appropriate forms signed by the members of the supervisory committee from the student's graduate program, must be submitted to the Graduate School by the end of the quarter in which degree requirements are completed. The faculty in the graduate program may require that the student present an additional copy for its own use. The Graduate School publishes a booklet, Style and Policy Manual for Theses and Dissertations, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly before the student begins writing the thesis. The thesis must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School for consultation during the thesis preparation process.

A $25 binding fee is payable at 129 Schmitz before the thesis is submitted to the Graduate School.
NONTHESES PROGRAMS
The faculty in some graduate programs has arranged programs of study for the master's degree that do not require the preparation of a thesis. These nontheses programs normally include a more comprehensive plan of courses and examinations than are required in thesis programs, or they may include some approved research activity in lieu of a thesis.

FINAL EXAMINATION FOR MASTER'S DEGREE
As soon as is appropriate, the faculty in the student's graduate program appoints a supervisory committee, consisting of two to four members, and the majority, including the chairperson, must be members of the Graduate Faculty (see Graduate School Memorandum No. 13). The committee chairperson arranges the time and place of the final examination, the results of which must be reported to the Graduate School by the last day of the quarter in which degree requirements are met. The examination may be oral or written, and all members of the supervisory committee must certify its results. At least two members of the committee must sign the Master's Application (warrant). If the examination is not satisfactory, the committee may recommend to the Dean of the Graduate School that the student be allowed to take another examination after a period of further study.

APPLICATION FOR MASTER'S DEGREE
The student must apply for the master's degree at the Graduate School in the first two weeks of the quarter in which he or she expects to complete degree requirements. The filing of the application is the responsibility solely of the student. When the application is received, the student's record is reviewed in the Graduate School. All for-mer exams for the degree must be met by the end of the current quarter if the application is to be approved. If this is not possible, the applicant is notified of deficiencies by the Graduate School. Once approved, the application is forwarded to the appropriate graduate program. Registration must be maintained for the entire quarter in which application for the degree is made. If a student should withdraw during the quarter, the application becomes void and a new one must be submitted at the appropriate time.

Master's degree applications are valid for two consecutive quarters, and if requirements for the degree are not completed during the quarter of the initial application, the student's application may be retained by the graduate program coordinator for the quarter immediately following (e.g., autumn to winter, winter to spring, spring to summer, summer to autumn) and returned to the Graduate School by the end of the second quarter. Thereafter, the application is void and the student must file a new application for the degree in the Graduate School during the first two weeks of the quarter in which work for the degree is to be completed.

Upon completion of departmental requirements, the master's degree application is signed by the Supervisory Committee and returned to the Graduate School. It must be received by the last day of the quarter if the degree is to be conferred that quarter. If all requirements are completed after this deadline, registration for the following quarter is required.

The student and the graduate program coordinator should be thoroughly acquainted with the requirements for the particular degree.

MASTER OF ARTS FOR TEACHERS
Master's degree programs for experienced teachers, which focus upon the fields of knowledge normally taught in the common school and the community college, have been developed in the University. These programs provide alternatives to the research-oriented Master of Arts and Master of Science degree programs, which emphasize particular fields of knowledge. Programs leading to the M.A.T. degree are offered in Biology Teaching and English.

Doctoral Degree
The doctoral degree is by nature and tradition the highest certificate of membership in the academic community. As such, it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctoral degree are devices whereby the student may demonstrate present capacities and future promise for scholarly work.

SUMMARY OF REQUIREMENTS
In order to qualify for the doctoral degree, it is the responsibility of the student to meet the following Graduate School minimum requirements:

1. Completion of a program of study and research as planned by the graduate program coordinator in the student's major department or college and the Supervisory Committee. Half of the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the General Examination.

2. Presentation of a minimum of nine full-time quarters of resident study (see detailed information under Residence requirements). Two of them being at the University of Washington with at least one year in continuous full-time residence. The continuous year may be divided into two full-time quarters, at least one of which must come after the student passes the preliminary examinations. If this is not possible, the applicant must complete a minimum of 12 full-time quarters, at least one of which must be in the common school and the community college.

3. Numerical grades must be received in at least 18 full-time quarters of course work at the University of Washington prior to scheduling the General Examination. The Graduate School accepts numerical grades of 3.00 GPA of 3.00 is required for a graduate degree at the University.

4. Creditable passage of the General Examination. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

5. Preparation of and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. The Candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the Preliminary Examination. With the consent of the major, and in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.

6. Creditable passage of a Final Examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The General and Final Examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the exam is taken and the degree is conferred.

7. Completion of all work for the doctoral degree within ten years. This includes quarters spent On-Leave or out of status as well as applicable work from the student's completed course work. Degree completion from another institution is allowed in this total, and credit is transferable from the University to the student's degree from another institution, if applied toward one year of resident study other than the continuous full-time year of study.

8. Registration maintained as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).

9. A student must satisfy the requirements that are in force at the time the degree is to be awarded.

APPOINTMENT OF DOCTORAL SUPERVISORY COMMITTEE
A Supervisory Committee is appointed by the Dean of the Graduate School to guide and assist a graduate student working toward an advanced degree and is expected to evaluate the student's performance throughout the program. The Supervisory Committee must be appointed no later than four months prior to the General Examination. Appointment of the Supervisory Committee indicates that the Graduate Faculty in the student's field finds the student's performance and achievement a sufficient basis for admission into a program of doctoral study and research. "Preliminary" examinations, if required, should be completed prior to the request for appointment of the Supervisory Committee. If "preliminary" examinations are not an academic unit's requirement, it is appropriate to request appointment of the Supervisory Committee during the student's first year of study (see Graduate School Memorandum No. 13, Supervisory Committees for Graduate Students).

ADMISSION TO CANDIDACY FOR DOCTORAL DEGREE
At the end of two years of graduate study, the chairperson of the Supervisory Committee may present to the Dean of the Graduate School, for approval, a warrant petition for admission to candidacy for the doctoral degree. This means that, in the opinion of the committee, the student's background of study and preparation is sufficient to undertake the General Examination. The warrant is approved by the Dean of the Graduate School only after the prescribed requirements of residence and study have been met and any specified language requirement has been fulfilled. The warrant must be received at least three weeks prior to the proposed examination date. Written and oral examinations prior to the oral are the responsibility of the graduate program and do not need Graduate School approval. During the oral examination, the chairperson, the Graduate Faculty representative, and at least two additional examining committee members must be present. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

If the student's performance is judged by the Supervisory Committee to be satisfactory, the signed warrant certifying successful completion of the General Examination is filed in the Graduate School. If the General Examination is unsatisfactory, the Supervisory Committee may recommend that the Dean of the Graduate School permit up to a maximum of two additional reexaminations, after a further period of study. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School.

Thereafter, the student is identified and designated as a Candidate for the appropriate doctoral degree and is awarded the Candidate's certificate. After achieving Candidate status, the student ordinarily devotes his or her time primarily to the completion of research, writing of the dissertation, and preparation for the Final Examination. The Candidate certificate and the doctoral degree may not be awarded the same quarter.

CANDIDATE'S CERTIFICATE
The Candidate's certificate gives formal recognition of the student's progress toward the Ph.D. It is awarded the doctoral degrees awarded through the Graduate School: Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts. Students who have previously earned a Master's degree from the University or have completed all requirements for the degree except the dissertation and the Final Examination are awarded the Candidate certificate.
DISSERTATION AND FINAL EXAMINATION

The Candidate must present a dissertation demonstrating original and independent investigation and achievement. The dissertation should reflect not only mastery of research techniques but also ability to select an important problem for investigation and to deal with it competently. Normally the dissertation is written in the English language. However, if there are circumstances in which the dissertation is written in a foreign language, approval must be received from the Dean of the Graduate School. The Graduate School publishes a booklet, Style and Policy Manual for Theses and Dissertations, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly before the student begins writing the dissertation. The dissertation must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School, and students are encouraged to consult with them throughout the dissertation preparation process.

When the Supervisory Committee agrees that the doctoral Candidate is prepared to take the Final Examination, the Dean of the Graduate School should be informed of the decision and asked to designate a Reading Committee from among the members of the Supervisory Committee.

Once the Reading Committee is established officially with the Graduate School, a Request for Final Examination (signed by the Supervisory Committee chairperson and the members of the Reading Committee) is presented to the Graduate School three weeks prior to the Final Examination date, and if the Candidate has met all other requirements, a warrant authorizing the Final Examination is issued by the Graduate School.

The Reading Committee prepares a report briefly summarizing findings of the research and the methods used, and the results. One copy of the report with the original signatures of the Reading Committee must be submitted to the Graduate School after the Final Examination.

If the Final Examination is satisfactory, the Supervisory Committee signs the warrant and returns it to the Graduate School by the last day of the quarter in which degree requirements are completed. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean. If the examination is unsatisfactory, the Supervisory Committee may recommend that the Dean of the Graduate School permit a second examination after a period of additional study.

After the Final Examination, the doctoral Candidate has sixty days in which to submit the dissertation to the Graduate School. Registration as a graduate student is required for the quarter the dissertation is submitted and the degree is conferred.

PUBLICATION OF DOCTORAL DISSERTATIONS

Part of the obligation of research is publication of the results, and in the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to planned publication in all of the dissertation and provides worldwide distribution of the work. The Candidate signs the publication agreement when the dissertation is presented to the Graduate School. Publication in microfilm does not preclude other forms of publication.

The following fees for microfiling the doctoral dissertation are paid to the Cashier's Office, 129 Schmitz (all fees are subject to change):

- Microfiling the entire dissertation, $52; optional copyright fee (applicable only when the entire dissertation is microfilmed), $35; or
- Microfiling only the abstract, $50.

These fees are in addition to the $25 binding fee.

SPECIAL INDIVIDUAL PH.D. PROGRAM

The Graduate School maintains the Special Individual Ph.D. (SIPh.D.) Program for exceptionally able students whose research interests are interdisciplinary in nature that cannot be met within one of the University units authorized to grant the Ph.D. degree. The program is intended for dissertation topics that require supervision from two or more of the disciplines in which the University offers the Ph.D. degree. It is not intended as a mechanism for offering the Ph.D. degree within units that do not have their authorized own Ph.D. programs.

A graduate student may apply to the SIPh.D. Program when he or she has completed the master's degree, or has been admitted to the Graduate School and has completed at least three quarters of full-time work at the University of Washington, and has carefully planned an appropriate program of studies.

Proposals, including GRE scores, are due by December 15 of each year, and decisions on admission are made by May 15 of the following year. Graduate School Memorandum No. 25, Special Individual Ph.D. Programs (revised January 10, 1969), contains additional information, proposal forms, and instructions and may be obtained from the Graduate School.

CONCURRENT DEGREE PROGRAMS

Concurrent programs are defined as a pair of programs that may be taken at the University of Washington by a postbaccalaureate student resulting in the satisfaction of the requirements for either two graduate degrees or a graduate and a professional degree. Rather than sequentially completing first one and then the other degree, the student's time and the University's resource allocations may sometimes be conserved by providing arrangements that permit the student to proceed in a coordinated way toward completion of the degree objectives.

To earn two master's degrees, a student must complete two separate sets of minimum Graduate School degree requirements of 36 credits each for a total of 72 credits. If a program requires more than 36 credits for the master's degree, a graduate student, with prior approval of both graduate programs, may apply a maximum of 12 credits beyond 36 earned in one program toward the master's degree in the second program. Thus, the minimum number of additional credits for the second degree, with those 12 approved credits, is 24. Up to 12 credits earned toward a Ph.D. degree may be counted toward a master's degree in another program with the approval of both degree-granting units.

Graduate School Memorandum No. 35, Concurrent Degree Programs (revised September 25, 1989), contains additional information and is available from the Academic Programs office in the Graduate School.

Graduate School Support for Research and Training

The objective of the Graduate School Fund (GSF) is to support the overall goals of graduate education through funding in the following areas: (1) initiation or completion of faculty research projects, (2) graduate student research, (3) faculty research, (4) graduate student travel, and (5) book publication.

GSF revenues come from (1) state funds provided in the University's biennial budget; (2) federal grants to the University that permit discretionary support of research programs; (3) private donations; (4) institutional allowances for graduate fellowships and traineeships; (5) patent, invention, and copyright royalties accruing to the University.

GSF policies and procedures are available from the Graduate School, 213 or 200 Administration, AG-10. Telephone 685-2629.

Related to its primary responsibilities for graduate education, the Graduate School has responsibility for the following programs:

Special Professors and Lectureships

The Walker-Ames Fund was established in the 1930s through a bequest from the estates of Maud Walker and her husband, Edwin Gardner Ames. Its stated purpose is to enable the University of Washington "to guarantee to the state of Washington the scholarly and educational services of the most distinguished minds available in this and other countries."

Chaired by the Dean of the Graduate School, a committee of University faculty members considers nominations from their colleagues and makes recommendations to the President for the appointment to Walker-Ames Professorships of distinguished scholars of national and international reputation.

Since 1936, when the first Walker-Ames Visiting Professor was named, over 50 distinguished scholars and members of the professions have come to the University as temporary members of the faculty, enriching the intellectual life of the University community and the state.

The Jessie and John Danz Fund was established in 1961 by a gift and bequest from John Danz, an additional gift was made to the Danz fund in 1969 by his wife, Jessie Mohr Danz. The Danz fund is intended primarily to enable the University to bring to the campus each year "distinguished scholars with worlds of national and international reputation who have concerned themselves with the impact of science and philosophy on man's perception of a rational universe."

Nominations and appointments for the Danz lectureships are made in the same manner as the Walker-Ames professorships. Since 1961 when the lectureship was established there have been 76 appointed lecturers. Other arrangements compatible with the Danz bequest (e.g., the publicizing of the Danz Lectures) may be made upon approval of the committees involved.

Questions pertaining to the Walker-Ames Fund and the Jessie and John Danz Fund may be directed to the Dean of the Graduate School.

In addition to regular academic offerings, the University maintains a wide range of programs and facilities that provide special opportunities for graduate study and research. The following units are administered by the Graduate School:

Center for Law and Justice

Joseph G. Weis, Director.
117 and 119 Savery, DK-40

The Center for Law and Justice is a multidisciplinary research center established in 1975. Its goals are to engage in research, to contribute to the education and training of students, to offer consultation, and to provide services to those interested in the law and justice. To achieve these goals the center: (1) apprises faculty members of research opportunities and assists in the development of proposals; (2) involves students from different disciplines in research training and education and sponsors biweekly colloquia; and (3) provides consultation to the judicial system and responds to the broader informational needs of the community.

University of Washington Press

Donald R. Ellegood, Director
1326 Fifth Avenue, Suite 555, JA-20

The University of Washington Press, the book-publishing division of the University, has, over a thousand titles in print, with special emphasis on art, anthropology, Asian-American studies, Asian studies, environmental studies, ethnology, history, literary criticism and linguistics, international studies, national studies. The Press publishes about fifty new books each year, including reprints and imports. Authors include both members of the University faculty and scholars outside the University. Nonbook publications include diagnostic tests and audiovisual materials. In addition to its own publishing program, the Press distributes art books and catalogues for numerous museums.
Institutional Support for Research

The Office of Research administers the Royalty Research Fund (RRF) derived from royalty and licensing fees income generated by the University’s technology transfer program. The purpose of the RRF is to support meritorious research of faculty members at the UW. The goal of the RRF is to stimulate additional scholarly initiatives, to encourage faculty to explore new directions in research and scholarship, and to improve the environment for intellectual endeavors at the University. Proposals must demonstrate a high probability of generating important new scholarly materials or resources, significant data or information, or essential instrumentation resources that are likely to lead to external funding or that might lead to a new technology. RRF guidelines, procedures and application forms are available from the Office of Research, B80 Administration, AC-20, telephone 685-9316.

Special Programs and Facilities

In addition to regular academic offerings, the University maintains a wide range of special programs and facilities that provide unique opportunities for research. It is not possible to list all of them but the following are illustrative of the range and diversity of these programs and facilities:

**FRIDAY HARBOR LABORATORIES**
A. O. Dennis Willows, Director
Friday Harbor, Washington 98250
University Office: 208 Kincaid, NJ-22

The Friday Harbor Laboratories facility is the principal marine science field station of the University of Washington. Its faculty is drawn from various academic units of the University, including botany, fisheries, oceanography, and zoology, as well as visiting faculty members from many other U.S. and foreign institutions.

The Laboratories, located approximately eighty miles north of Seattle near the town of Friday Harbor on San Juan Island, offers a biological preserve of nearly 500 acres of wooded land with about two miles of shoreline. The island is one of the largest of the 172 that make up the San Juan Archipelago, located in the northwest section of the state of Washington between Vancouver Island and the United States mainland. In addition to the Friday Harbor site, the Laboratories’ administration has the responsibility for overseeing biological preserves leased or owned by the University on San Juan Island (False Bay and Argyle Lagoon), Shaw Island (uplands adjacent to Point George and Parks Bay; Cedar Rock Biological Preserve), and Lopez Island (Point Colville and Iceberg Point). Goose and Deadman islands, biological preserves owned by the Nature Conservancy, are also under the stewardship of the Laboratories.

The Laboratories are close to seawaters that range from oceanic to those highly diluted by streams, some with depths to a thousand feet, others with bottoms varying from mud to rock, and water movements ranging from those of quiet bays and lagoons to those of swift tidalways. The waters about the San Juan Archipelago abound in varied marine flora and fauna.
The Laboratories offer opportunities for independent and supervised research, as well as a varied program of instruction for graduate and undergraduate students. Throughout the year, use of the Laboratories' facilities for research in various areas of marine science is encouraged.

JOINT INSTITUTE FOR STUDY OF THE ATMOSPHERE AND OCEAN
John M. Wallace, Director
402 Atmospheric Sciences-Geophysics, AK-40

Established by an agreement between the University of Washington and the National Oceanic and Atmospheric Administration (NOAA), the Joint Institute for Study of the Atmosphere and Ocean (JISAO) is intended to facilitate and strengthen cooperation between the two organizations in research and other collaborative efforts in the oceanographic and atmospheric sciences. It brings to the campus scientists from NOAA laboratories and from other nations to join with University faculty and students in research projects initially directed toward mechanisms of climate change and studies of estuarine processes.

NORTHWEST CENTER FOR RESEARCH ON WOMEN
Angela B. Ginorio, Director
111 Cunningham, AJ-50

The Northwest Center for Research on Women (NWCROW) is a multidisciplinary center designed to encourage and facilitate research on women and on gender-related issues. NWCROW aims to respond to the concerns of feminist researchers and women faculty at the University of Washington and in the Puget Sound region, and to increase the scope of projects on women.

The center's own research focuses on "Women, Science, and Technology," addressing the concerns of women scientists as well as exploring the impact of science and technology on women's lives.

QUATERNARY RESEARCH CENTER
Stephen C. Porter, Director
19 Johnson, AK-60

Quaternary research focuses on the processes presently shaping the environment and those that have operated on it for the past several million years. To foster such study, the Quaternary Research Center (QRC) was established at the University in 1967. Cooperating faculty members come from anthropology, atmospheric sciences, botany, forest resources, geological sciences, geophysics, oceanography, and zoology. They have in common a commitment to linking the past, present, and future through interdisciplinary study and research. The result is a broad spectrum of interdisciplinary research possibilities.

In addition to various geophysical laboratories, the Quaternary Research-Geophysics Building includes laboratories for palynology, potassium-argon dating, radiocarbon dating research, oxygen isotope research, and periglacial studies.

OFFICE OF TECHNOLOGY TRANSFER
Margaret Wagner Dahl, Acting Director
1107 N.E. 45th St., Suite 200, Seattle, WA 98105

The Office of Technology Transfer (OTT) promotes the early identification of inventions and new technology and helps to facilitate their transfer to the private sector. To achieve this, OTT encourages the faculty, staff, and students to be alert to the potential commercial applications of their research that will benefit the public. The University shares any income from new technologies with the inventor and the inventor's school and department. Through copyrighting, patenting, and/or licensing the technologies produced by research, OTT assists in safeguarding University and inventor interests while promoting the broadest use of these technologies as part of the University's tradition of public service.

CENTERS, INSTITUTES, AND INTERCOLLEGE PROGRAMS

Aerospace and Energetics Research Program. An interdisciplinary and interdisciplinary program within the College of Engineering.

Alcohol and Drug Abuse Institute. Coordination of research and training in the fields of alcoholism and drug abuse; provides community consultation.

Applied Physics Laboratory. A research and development organization within the College of Ocean and Fisheries Sciences with capabilities in ocean and environmental sciences and engineering, arctic technology, energy resource research, ecosystems engineering, and forest engineering.

Center for Bioengineering, Program of the College of Engineering and the School of Medicine that applies the concepts and techniques of engineering to problems of biology and medicine.

Center for International Business Education and Research. A unit within the School of Business Administration that serves as a catalyst for the expansion and improvement of international business education in the entire region, and a significant national resource on international business education.

Center for International Trade in Forest Products. A unit of the College of Forest Resources that provides a sound basis for research, outreach, education, and information services on the problems and opportunities for forest products trade to the benefit of industry, government, associations, and the economic welfare of the region.

Center for Process Analytical Chemistry. A facility, established with National Science Foundation support and now funded jointly by the UW and private industrial firms, to develop analytical tools that will improve the productivity of industrial processes.

Center for Quantitative Science in Forestry, Fisheries, and Wildlife. A broad program in applied mathematics and in mathematical sciences concerned with quantitative descriptions of the management of both aquatic and terrestrial ecosystems.

Center for Research in Oral Biology. Assists in the national effort to reduce the toll of oral disease and to promote the general level of oral health.

Center for Policy and Practice Research. Supports policy and practice research in such areas as health and mental health, child welfare, income maintenance, individual and family adjustment, corrections, and gerontology.

Center for Urban Horticulture. Offers research, education, and public service problems in the utilization of plants to create, maintain, and enhance the quality of urban environments. In addition to its research and teaching programs at the Union Bay facility, the center manages the Washington Park Arboretum, a 200-acre living laboratory within Seattle devoted to the study of woody plants.

Child Development and Mental Retardation Center. Provides facilities for teaching and research programs related to mental retardation and child development.

Institute on Aging. A multidisciplinary educational and research unit designed to focus attention on the social, health, psychological, political, and economic issues of human aging.

Institute for Environmental Studies. An interdisciplinary educational unit established to develop environmentally related programs in teaching, research, and public service.

Institute for Ethnic Studies in the United States. Encourages multi-ethnic, cross-ethnic, and ethnic-specific interdisciplinary research in generic problems of ethnicity with a thrust toward generating significant scholarly publications and other scholarly activity.

Institute of Forest Resources. The research, continuing education, and information branch of the College of Forest Resources.

Institute for Public Policy and Management. This unit of the Graduate School of Public Affairs coordinates and promotes the efforts of other University units to deal
with problems of public policy and administration in the state of Washington and the Pacific Northwest.

Regional Primate Research Center. One of seven throughout the nation funded by the National Institutes of Health; provides opportunities in biomedical research on nonhuman primates.

Treaty Research Center. Created and maintains the world's first and largest computerized data base on international treaties. The data base is the foundation of the center's major publication, the World Treaty Index, a five-volume set of over four thousand pages covering forty-five thousand treaties in fifty languages and available worldwide in major research libraries.

Washington Sea Grant Program. Fosters the wise use of the sea and its resources through a regional program of research, education, and advisory services.

SPECIAL FACILITIES (ON CAMPUS)

Academic Computer Center. Provides instructional and research computing services for the University.

Burke Memorial Washington State Museum. An educational and cultural center whose function is to collect, preserve, research, exhibit, and interpret the natural and cultural objects of the human environment, particularly the Pacific Ocean, its islands, and mainland shores.

Drug Plant Garden. Viable seeds and plants of medicinal and pharmaceutical interest are maintained for experimental purposes.

Henry Art Gallery. The art museum of the University of Washington.

Locke Computer Center. Provides computing services to the health sciences complex and to hospitals and clinics in the community for medical research, teaching, training, and patient-care programs.

KUOW Public Radio. Broadcasts programs of an educational, cultural, scientific, informational, and public affairs nature; communicates information on University activities to students, alumni, and the public.

NUCLEAR PHYSICS LABORATORY. Houses a Van de Graaff accelerator and a cyclotron for research in physics, chemistry, cancer therapy, nuclear medicine, radiation biology, and related fields.

Oceanographic Research Vessels. Operated for field study and research in Puget Sound and the Pacific Ocean.

Speech and Hearing Clinic. Serves as a center for research in speech science, speech and language pathology, and audiology, and provides services to the public.

University of Washington Medical Center/Harborview Medical Center. The University operates two major teaching hospitals: its own 450-bed University of Washington Medical Center and, under contract with King County, the 413-bed Harborview Medical Center.

University Libraries. With more than five million volumes, an equal number of microforms, several million items in other formats, and more than fifty-five thousand serial titles, the University of Washington Libraries houses one of the top research collections in the country. The fully integrated, computerized Online Catalog provides bibliographic information and circulation status for the cataloged holdings of the Libraries. The University Libraries and Computing & Communications office are working together to provide electronic access to a multitude of information sources—online catalogs, journal databases, the daily news, the weather, an encyclopedia, the Internet—through UWIN (the University of Washington Information Navigator). The Libraries also offer an extensive array of services in each of its twenty-five units. The Suzzallo and Allen Libraries, the Odegaard Undergraduate Library, the Health Sciences Library and Information Center, the East Asia Library, and the eighteen branch libraries each provide reference services and offer instruction in the use of library resources. Access to more than three hundred commercially produced databases in science and technology, business and industry, and the humanities is available on a cost-per-search basis in a number of the campus libraries through Computer-Based Reference Services. Many CD ROM products are also available in various libraries for free and independent use.

SPECIAL FACILITIES (OFF CAMPUS)

Apache Point Observatory. Located in New Mexico, this new facility uses computer technology to permit remote control of the instruments from the Physical/Astronomy Hall (as well as other remote sites at other institutions). Access is limited to contributing members of the consortium which constructed the facility. The facility for rapid instrument changes allows scientists to seize unexpected observing opportunities.

Big Beef Creek Laboratory. Located at Seabeck, Washington; provides opportunities for research and instruction in fisheries and several other fields.

Energy Test Homes. Four single-family houses, used as student housing, along with a single "energy cell" which affords energy efficiency measurement for various types of wall and roof design and construction.

Forest Resources. The College of Forest Resources maintains a variety of field facilities throughout the state that provide a general natural science laboratory for research and teaching of natural resource behavioral patterns and management. Prominent among these is the 4200-acre Charles Lathrop Pack Demonstration Forest (Pack Forest) located sixty-five miles south of the campus.

Olympic Natural Resources Center. This center located near Forks, Washington, includes laboratories, conference rooms and overnight facilities, and has a direct relationship to an 80,000-acre state experimental forest. Its mission is to conduct research education in natural resource management practices that integrate the generation of economic benefits with the maintenance and enhancement of ecological values. Biological, physical and social scientists cooperate on projects ranging from basic scientific research to public policy assessment.

Primate Field Station (Medical Lake). A research center and primate breeding facility maintained by the Regional Primate Research Center.

Thomas G. Thompson. This 274-foot, state of the art, ocean-going research vessel is intended for use in sponsored oceanographic research projects by investigators from institutions around the country.
Research at the University of Washington

The University of Washington enjoys an international reputation for excellence in research. It is one of a handful of research universities with noteworthy programs across the whole spectrum of intellectual disciplines in the sciences, arts, and humanities. For many years, the University has been among the leading institutions in the country in federal money received for research. Achievements of its faculty have been recognized in the form of numerous professional awards.

The University of Washington is the major research university in the Pacific Northwest, a region encompassing one-third the landmass of the United States. Its location has led to the development of research programs dealing with regional concerns and has stimulated the growth of disciplines whose interests lie well beyond the nation's borders.

The climate of research excellence offers students the opportunity of learning from, and participating in, research with the leading scholars in virtually every field. Perhaps as important is the opportunity for collaborative ventures with outstanding researchers from related fields. The University's reputation also brings to campus many of the world's outstanding scholars to deliver seminars and lectures and to work with faculty members and students.

The following sections contain brief descriptions of some interesting research under way at the University of Washington:

Earth, Ocean, and Atmospheric Sciences

UW geologists have a long tradition of concentrating on regional studies to learn more about the forces that continue to shape the Pacific Northwest. But studies ranging as far as the Amazon and Africa also form a regular part of the geological sciences' activity.

Recent work suggests that great earthquakes of magnitude 7 or 8 on the Richter scale have occurred in the Pacific Northwest in the not-too-distant past, and, because the forces are the same, are likely to recur at some time in the future.

A network of seismic stations, established to monitor activity in the vicinity of Mount St. Helens, has played an important role in helping scientists examine in detail the forces at work in the region.

Atmospheric scientists are engaged in a variety of research—global, regional, and local—to develop models of weather and climate prediction. Studies range from small-scale phenomena, such as storm cells, to long-term, slow changes in ocean and atmospheric circulation patterns.

Oceanographers, whose studies range worldwide, have made their own contributions to the unfolding story of the region's geological history. A University oceanography team traveling on a U.S. Geological Survey research vessel discovered active hydrothermal vents off the Washington-Oregon coast and opened vast new research opportunities. Their existence was predicted by a University oceanographer several years ago. Photographs taken by a camera "flown" several feet from the ocean floor revealed plant and animal life flourishing near the vents. The unusual concentrations of living creatures and their ability to exist without sunshine suggest that they may be among the most ancient forms of life on earth.

UW scientists have long been interested in polar research, including both the Arctic and the Antarctic. The University is one of the major centers in the world for studies of ocean currents, ice formation, ice movement, and air-sea-ice interaction in these regions. UW personnel have developed unusual expertise for operation in polar regions. Principally through the Applied Physics Laboratory, UW investigators regularly conduct studies from bases sited on Arctic pack ice and have deployed a series of weather buoys on the ice and in Arctic waters that form part of a worldwide weather-forecasting system.

A group of researchers in atmospheric sciences has pioneered the study of clouds and weather systems by flying into the heart of storms approaching, or at, the Washington coast. Using one of the best equipped research airplanes in the country, they have developed techniques for examining the structure of these storms in detail. Their expanding base of knowledge will one day permit weather forecasting that is more precise than is possible with conventional tools.

A unique scientific resource exists in the UW's Friday Harbor Laboratories. Located on one of the larger islands of the San Juan Archipelago, the laboratories draw researchers from all over the world, who use the pristine Puget Sound water pumped into the laboratories for sensitive studies of reproduction, physiology, and development. One of the most abundant and diverse sources of marine life is found in the surrounding waters; animals and plants that are characteristically found at the bottom of oceans are relatively close to the laboratories.

Physical Sciences

Basic research in the physical sciences is aided by exceptional research tools. The Department of Chemistry has acquired state-of-the-art equipment for studies involving magnetic resonance imaging (MRI), a sensitive probe for determining complex molecular structures. Besides being used to determine the rates of chemical reactions, MRI is used by health researchers studying complex biological processes, because it is one of the few tools that can analyze a reaction while it is taking place.

The Center for Process Analytical Chemistry is a joint University/industry effort to develop devices and techniques for continuous monitoring of chemical processes used in the manufacturing setting. It has been recognized as being one of the nation's most successful ventures of its kind.

The University has one of four Department of Energy-supported nuclear physics laboratories located at American universities. This laboratory is equipped with a superconducting booster to a tandem Van de Graaff accelerator, placing the nuclear physics research facility on a par with the best in the world in its energy range. The particle physics group and the Visual Techniques Laboratory are engaged internationally in research at the frontiers of knowledge as it relates to high-energy particles created both in the laboratory and by nature.

Extremely high precision measurements of atomic properties are the forte of a strong atomic physics group, and brought recognition in the form of a Nobel Prize awarded to Professor Hans Dehmelt in 1989. Later that year, a Department of Energy competition for its first nuclear theory institute was won by the University. Since that time a distinguished staff and an international visitor program have made the University a center for research in fundamental nuclear physics and associated problems in astrophysics and particle physics.

The University has been a leader in the development and use of XAFS, a sophisticated x-ray tool for determining the structure of materials. Physicists studying condensed matter are engaged in the development of the Advanced Photon Source, a high energy x-ray source that will be the most intense in the world when it is completed in 1998. With this source it will be possible to carry out detailed studies of topics as diverse as the growth and structure of liquid crystal films, protein structure on an atomic scale, the structure of tailored drugs, and films from one-atom thickness to heterostructures with multiple layers of different materials many-atoms thick.

Astronomers at the University conduct research in a wide variety of astronomical fields, from the study of solar system bodies to the nature of the universe as a whole. The University's Interplanetary Dust Laboratory pioneered the discovery and study of cometary and asteroidal dust particles in the Earth's upper atmosphere. University planetary scientists have been involved in many space-based projects, from the Halley comet rendezvous to the planetary probes to Mars and Jupiter. Astronomers studying stars in our galaxy have extensively used the Hubble Space Telescope. University faculty and students are probing the secrets of stellar evolution, coming up with fresh understanding of the way that stars are formed, as well as new insight into how they die. Several staff are exploring the nature of galaxies, their puzzling patterns of evolution and
their mysterious content of "dark matter." The nature of cosmic black holes is a topic of research, and the violent events involved in the collisions of galaxies, galaxy mergers and the quasar phenomenon are topics of study.

The University is part of a consortium that has constructed a large optical telescope, with a 3.5-meter-diameter mirror, making it one of the largest university-operated telescopes in the country. It is located at Apache Point in the high, clear New Mexico mountains, and is operated by faculty and students remotely from a laboratory in the new Astronomy-Physics Building on the UW campus.

Applied Sciences
A multidisciplinary approach to the study of materials has led to important discoveries of how to design materials to meet specific needs. An early application of this work made important contributions to NASA's space program. Currently, scientists and engineers are working on developing fundamental design principles for new types of ceramic-polymer composites. These materials have a wide range of applications in the aerospace industry, the medical field.

The Washington Technology Center (WTC), established in 1983, is a state resource, funded by the combined Department of Community and Economic Development. It was established to encourage collaborative industry-university research and technology development in new and emerging technologies to benefit the economic vitality of the state of Washington. Current research areas include advanced materials and manufacturing, biotechnology, computer systems and software, microelectronics, and human interface technology. The WTC promotes faculty collaborations with industry within the state and co-sponsors applied research at the state's research universities, directed to the needs and interests of state industries. The state-wide headquarters of the WTC are located in Fluke Hall at the University of Washington.

One stem of mechanical engineering research concentrates on technology to improve product design and develop advanced automated manufacturing systems. Examples are design application of new composite materials, new geometric computing algorithms for casting design, non-traditional material removal processes, and sensors and associate computer logic for on-line control of surface quality. Another area addresses problems in energy conversion and management. Typical research topics are engine modification for alternate fuels and to minimize pollutant production, energy conservation in buildings and industrial processes, and basic research on turbulent fluid mechanics.

Chemical engineers are studying polymers that may replace metals in many structures, including airplanes. Several faculty members and graduate students also are studying processes that occur at the interface between two substances—work that has applications in making better paints and dyes, and deinking of waste paper. The preparation of electronic materials is aided by study of those materials under high vacuum.

Civil engineers are studying problems of air pollution and the technology to detect, analyze, and prevent it: problems of water pollution, acid rain, and toxic waste; methods of predicting the effects of earthquakes on man-made structures; transportation systems that take advantage of the latest advances in technology and computer modeling; and new materials for road surfaces that can replace petroleum-based products with no sacrifice in quality.

In the Center for Biomedical Engineering, problems facing physicians in diagnosis and treatment are solved with the help of engineers from a variety of disciplines. The center is the home of pioneering work in diagnostic ultrasound, which enables physicians to study a patient's circulatory system in detail without surgery. The center's team also has developed a laser scalpel, a device that markedly reduces blood loss during surgery, which can be an especially serious problem with burn patients. A renowned group of researchers has made important strides in understanding how to design materials that are compatible with the human body. Such research is important in artificial-organ research as well as in other health-related work.

Life Sciences
A strong program in zoology includes research on the neurological basis of behavior and the origin of circadian rhythms, the physiology of insect development and the role of hormones in metamorphosis, and the ecology of intertidal communities. Understanding why and how certain creatures evolved as they did often requires multiple approaches, including field research, construction of physical models in the laboratory, and computer simulation.

Since its establishment more than thirty years ago, the UW Health Sciences Center has become well known for its teaching, research, and patient care. University physicians and staff members pioneered the first successful long-term kidney dialysis techniques, which have led to lifesaving treatments for tens of thousands of persons. Continuing research in this field has as one of its aims the production of more-portable and simpler devices for persons suffering kidney failure. Medit I, a system of rapid response for victims of accidents and heart attacks, is based at Harborview Medical Center, one of the University's two teaching hospitals. It has provided a national model for immediate pre hospital care.

UW research in cancer continues to improve the prognosis for several forms of the disease. University physicians have been leaders in the development of bone marrow transplantation, which offers the hope of curing several forms of leukemia. University programs explore the genetic basis of cellular abnormalities that occur in response to aging or to environmental insults. An active and recognized group of researchers explores the response of the immune system to cancerous cells.

The schools of the Health Sciences Center receive approximately half of all research money that goes to the University, which reflects their strength and diversity. Research programs in the study of heart disease, diabetes, and sexually transmitted diseases have achieved international recognition. The University's Child Development and Mental Retardation Center is recognized for its pioneering work in the causes, prevention, and treatment of diseases and disorders leading to mental retardation.

The School of Pharmacy has a strong program in pharmacokinetics, the study of how drugs are metabolized and the rate at which they affect target organs and are eliminated by the body. Researchers are involved at the scientific analysis and prediction of drug effects through the development of sophisticated mathematical models.

The rapidly expanding field of research made possible by genetic engineering techniques is found in the health sciences and in units within the College of Arts and Sciences. The Department of Genetics, a leader in understanding the genetics of yeast, has conducted basic research that could lead to cheaper methods for producing interferon, as well as antigens that are found in hepatitis vaccines. Other projects using recombinant DNA include studies of the immune system and the expression of foreign genes in higher plants.

Social Sciences
Interactions among individuals and groups determine the texture of society. The study of these interactions is the province of social scientists, whose work ranges from basic research on perception to the effect of interest groups on public policy.

Nationwide attention has been given to the work of UW investigators studying couples and the common factors that underlie successful relationships. In related research, several investigators are examining the processes of interaction in small groups, from families to work teams.

Important research in leadership and motivation, in human memory, and in alcoholism and addictive behavior is being carried on in a number of academic disciplines. Alcoholism studies range from physiological experiments to model counseling programs for pregnant women to participant-observer studies of addictive behavior. The focus for this effort is the Alcohol and Drug Abuse Institute.

Social scientists have performed provocative studies on the changing role of urban neighborhood organizations. Another group has concentrated on deviant behavior, including juvenile delinquency and possible prevention strategies. Their work is part of a larger effort by faculty members and graduate students to explore the ways that society's institutions react to deviant behavior.

Anthropologists are studying the changes in fertility, medical history, and cultural adaptation of the Japa­nese-American community in the Pacific Northwest, and the challenges faced by immigrants from Vietnam and Laos. Other faculty members are pursuing problems in distant locales and times, such as the beginning of agriculture in the Nile Valley.

Geographers are studying regional issues, such as the economic linkages between the Pacific Northwest and other parts of the country, the design and financing of efficient and equitable transit systems, the recent surge in population of nonmetropolitan areas and its policy implications, and the geography of access to health care.

Economists continue working on models to predict the results of federal monetary and fiscal policy. A group of researchers is breaking ground in a relatively new area, the economics of crime, by comparing the costs and benefits of different patterns of usage. These investigations are designed to help policy makers evaluate alternatives.

Social scientists at the University have a special interest in international relations. The University has been a pioneer in research concerning the Near and Far East,
and this important role was emphasized with the establishment of the School of International Studies in 1978 (now the Henry M. Jackson School of International Studies), the culmination of more than sixty years of scholarly activity in area studies and international relations. Scholars in political science, anthropology, sociology, and the humanities study the role of culture in international affairs. Economists and geographers study development, resource management, and international economics. Historians complement the work of social scientists in exploring the basis of current thought, and scholars in languages and literature provide essential knowledge of original texts and the relationship of language to culture.

Humanities and the Arts

Research in the humanities often fulfills a primary mission of humanistic study—the preservation of the literary and artistic achievements of mankind. One aspect of this research is textual scholarship, involving the identification and authentication of original texts and artifacts. New knowledge is also generated through reassessment of earlier texts and works of art. Texts that form part of Egypt’s Nag Hammadi Library, found more than a quarter of a century ago but only recently translated from Coptic, may lead to a reinterpretation of early Christianity. Located near the upper Nile, the library contains documents from little-known monastic groups, previously unknown Christian gospels, and both familiar and unfamiliar sayings of Jesus. A UW scholar studying these texts expects them to have as great an impact as the discovery of the Dead Sea Scrolls. The texts also will shed more light on the Heretical Gnostic movement, which offers a radically different interpretation of Genesis.

A faculty member in the Department of English, working in the British Library, discovered several issues of a previously unknown periodical written by Henry Fielding, the famous eighteenth-century novelist. He has prepared annotated facsimiles of the issues, which shed new light on aspects of Fielding’s life, as well as adding some important material to the history of journalism.

Research often is meant to describe exclusively the generation of new knowledge, but in the humanities a growing number of faculty members explore the theoretical basis underlying our knowledge and the means of transmitting it. The focus for these studies has been a colloquium in theory involving faculty members and graduate students. Discussions on problems in the theory of narrative, for instance, may span literature, history, science, and psychoanalysis—in fact, whatever the written word is used. The colloquia have acted as catalysts for several scholarly articles and may lead to an expanded program encompassing other disciplines.

Theoretical studies also form an important component of research in the arts. Some faculty in the School of Music conduct extensive research in the scientific analysis of sound, known as systematic musicology. Studies in this field include the influence of vibrato on judgments of vocal blend; context and time in musical perception; and rhythmic responses of preschool children. Other faculty members are exploring new ways of creating music, including the use of computers.

The concept of scholarly achievement in the arts often is synonymous with performance or exhibition. The UW School of Music has on its faculty a number of nationally recognized composers, including two longtime recipients of research funds from the American Society of Composers, Authors, and Publishers (ASCAP). The awards are designed to encourage and assist writers of serious music. The School of Music also is home to one of the finest opera programs in the country.

The School of Art faculty includes nationally and internationally known artists and scholars in nearly every one of its ten studio, art history, and design disciplines. Studio artists carry on the age-old quest for aesthetic quality but also pursue stylistic innovation, as well as developing new techniques in such diverse areas as non-toxic water-soluble printing and computer-generated imagery. Many of the School’s art historians have helped reshape this young discipline through their studies of art as cultural expression.

The UW School of Drama houses the famous Professional Actors’ Training Program, which, besides teaching basic acting skills, provides an intensive introduction to the practice of the theater arts. The program attracts dedicated students who work for demanding, scrupulous visiting directors from the commercial stage as well as for permanent faculty members with extensive professional experience. Graduate research in the history and practice of theater forms an integral part of the School’s diverse program.

The University’s program in creative writing is one of the oldest in the country. It achieved prominence in the 1950s and 1960s, when its faculty included Theodore Roethke, winner of the Pulitzer Prize in 1953. The tradition of excellence continues, with current University poets and authors receiving critical acclaim throughout the nation, including the 1990 National Book Award for Fiction. This concentration of talent has made the University a center for literary activity in the Pacific Northwest.

...
UW Extension

Vice Provost, Continuing Education,
UW Extension, and Summer Quarter
Richard L. Lorenzen

Associate Vice Provost
David Szatmary

Established in 1912, UW Extension brings the University’s resources to the community by providing access to quality educational programs which meet ongoing professional and personal needs.

This section describes the various programs currently part of UW Extension. The quarterly UW Extension catalog contains details of the program offerings. It is mailed without charge to residents of western Washington, who may receive it by telephoning (206) 543-2320 or by writing to UW Extension, GH-24, Seattle, Washington 98195.

Evening Credit Program
Many credit courses are offered each quarter for those who are not formally admitted to the University. The classes are intended for non-traditional degree seekers as well as for postbaccalaureate individuals pursuing new skills and knowledge. All evening credit courses are taught by University faculty members and lecturers, approved by the appropriate academic units. UW credit is awarded and the grades earned are included in GPA calculations. Matriculated students enrolling in these courses pay course fees in addition to regular tuition.

Graduate Nonmatriculated Program
Individuals not admitted to a graduate program who wish to enroll in a graduate-level course may apply for graduate nonmatriculated student (GNM) status. Credits earned as a GNM may be applicable toward a degree upon subsequent admission to a graduate program. Application forms are available from participating departments. The Graduate School Graduate Study section of this catalog offers more details.

Independent Study
Independent Study offers approximately 110 under-graduate courses. Courses typically consist of assigned texts, study guides, assignments and examinations, and such supplementary materials as audiotapes, computer diskettes, videotapes, and laboratory kits. Many courses use email to enhance interactions with instructors as well as other students. Certain noncredit courses required for University entrance are available to those who wish to qualify for admission. Other courses provide subject matter for professional continuing education.

Courses are open to persons who, because of distance, work schedule, physical disability, or educational preference, require an alternative to on-campus classroom meetings. Resident University students often find Independent Study a convenient way to earn extra credits during summers or leaves of absence or a way of taking courses that would otherwise be unavailable due to schedule conflicts.

Formal admission to the University is not required for enrollment in Independent Study. Students may register at any time and have between six months and one year in which to complete their work. As many as 90 credits earned through Independent Study may be applied to a University baccalaureate degree. Upon successful completion of a course, the grade and number of credits earned are recorded on an official University transcript. Grades earned, however, are not computed in the University GPA, which is based solely on courses taken in residence.

A bulletin listing independent study courses may be obtained by telephone, (206) 543-2350 or 1-800-543-2320, by writing to Independent Study, UW Extension, GH-23, Seattle, Washington 98195; or by sending email to instudy@uw.washington.edu. (Include name, address, and social security number.)

English As A Second Language Center
The English As A Second Language (ESL) Center, 103 Lewis, provides nonnative speakers of English who are interested in improving language skills with the following services and resources:

1. Academic ESL courses for UW students. English is the language of instruction at the University, and many international students need additional English training to facilitate participation in regular University programs.

International students (whose native language is not English) admitted with TOEFL scores of at least 500 but below 780, or Michigan Proficiency Test scores of at least 80 but below 90, are required to take the University's ESL diagnostic test before matriculating. Students whose test results show their English to be adequate for full-time University study are excused from ESL course work. Others must take those ESL courses designated as required each quarter until the language requirement is completed.

During the academic year, the courses offered are designed for international students officially enrolled in a degree program at the University as either undergraduate or graduate students. These students take ESL courses along with their regular programs of study. English As A Second Language courses count as the equivalent of 5 credits each for the purposes of satisfying visa requirements but do not count toward graduation. As they are special tuition courses, fees must be paid before students may register for them.

2. UW Extension ESL courses for all nonnative speakers. The ESL Center offers a separate series of noncredit courses that are open year-round to any adult nonnative speaker who would like to study English. These courses do not require formal admission to the University. Application may be made to the address below.

Additional information about ESL services, including complete listings and descriptions of current ESL course offerings at the University, is available at the ESL Center, 103 Lewis, telephone (206) 543-6524.

Noncredit Classes
UW Extension offers a broad range of courses, certificate programs, institutes, conferences, and seminars for adults, students, and children. Noncredit classes offer opportunities for professional development and personal enrichment. Specific programs are announced quarterly in the UW Extension catalog. To receive a catalog, call (206) 543-2320.

Career Development Services
Career Development Services provides individual counseling and testing for adults focusing their educational goals or considering a career change. Courses and seminars explore vocational and educational choices. Employer outplacement services are also available. For additional information, call (206) 543-3900, or write Career Development Services, UW Extension, GH-21, Seattle, Washington 98195.
University Branch Campuses

Two branch campuses of the University, established by action of the Washington State Legislature in May 1989, enrolled their first students in the autumn of 1990. The branches were opened in order to provide new higher education opportunities principally for the residents of the Central Puget Sound region. The academic programs offered at the branches have been selected to respond to the identified needs of the regional population and economy. The branch campuses offer undergraduate programs for students who have previously completed two years of college. The degrees offered include the Bachelor of Arts in Liberal Studies and in Business Administration, and the Bachelor of Science in Nursing. At the graduate level the Master of Education degree is available. A teacher certification program opened at Tacoma in 1994 and at Bothell in 1995. Planning has begun for other academic programs to be added as state funding permits: at the Bothell campus, plans are being developed for an undergraduate program in software engineering and for master's degree programs in nursing and liberal studies; at Tacoma, master's degrees in social work, public administration, nursing, and liberal studies are being considered.

The campuses are housed in temporary facilities while the permanent sites and buildings are under development. The Tacoma campus is located in two buildings in downtown Tacoma: the Perkins Building at 11th and A Streets, and the Tacoma Security Building on Pacific Avenue. Temporary housing for the Bothell campus is located in the Canyon Park Business Center, near the intersection of Interstate 405 and state route 527. The University's plan for development of the campuses, subject to ongoing review by the state, calls for a gradual increase of branch campus enrollments, through the opening of additional academic programs; by 1997 the Bothell campus is expected to enroll approximately 1,000 students, the Tacoma campus about 1,200 students.

Degree Programs

Detailed descriptions of the academic programs offered at Bothell and Tacoma can be obtained by calling the Office of Admissions at the appropriate campus and requesting a copy of the current campus catalog. Bothell Admissions: 206/685-5300. Tacoma Admissions: 206/552-4400. A brief overview of the programs is provided below. All undergraduate programs at Bothell and Tacoma are offered at the upper-division level; students are expected to have completed their first two years (90 quarter credits) of college study prior to entry, and then to complete 90 additional credits at the upper-division level to earn the bachelor's degree. All programs give particular attention to the development of skills appropriate to an advanced level of study, in writing and oral communication, in analysis and assessment of information, and in collaborative work with other students in project teams.

Liberal Studies: an undergraduate course of study leading to the Bachelor of Arts, with concentrations in United States studies and international studies. The liberal studies program is an innovative, interdisciplinary program combining the methods, materials, and intellectual tools of a number of disciplines devoted to study of the arts and of human beings both as individuals and in societies—disciplines traditionally known as the humanities and social sciences. Students engage in comparative studies of the beliefs, philosophies, arts, and social and economic characteristics of diverse social and cultural groups in the United States and selected regions of the world.

Business Administration: undergraduate studies leading to the Bachelor of Arts in Business Administration, with concentrations in management and marketing. The business program offers an integrated approach to the study of business concepts and tools. Students complete a common core of studies, culminating in a business policy and strategy course, and select a concentrated course of studies in either management or marketing, or both. In addition, business majors complete several liberal studies courses to explore the larger social and cultural world constituting the environment within which business organizations must operate.

Nursing: an undergraduate course of studies designed for experienced registered nurses, leading to the Bachelor of Science in Nursing. Nursing students complete a battery of tests based on learning attained during their professional experience, to earn their junior year credits, and then complete the senior year in a combination of theoretical and clinical courses at Bothell or Tacoma. Most students complete the program within four quarters of study, beginning in summer quarter and ending the following spring quarter.

Education: a graduate course of studies designed for certificated K-12 teachers currently engaged as teachers in school classrooms, leading to the Master of Education. The education program provides advanced studies in several areas, designed to enhance the teaching abilities and professional mastery of working teachers. Students may choose to concentrate their studies in one of four study options: (1) the integrated curriculum, (2) multicultural education, (3) the "at risk" student population, (4) an individually defined course of study.

Further information may be obtained by contacting the appropriate program office, the Office of Admissions and Student Services, or the office of the dean at the particular campus. Campus telephone numbers are as follows: Bothell—206/685-5300; Tacoma—206/552-4400.
KEY TO SYMBOLS AND ABBREVIATIONS

The symbols and abbreviations below are used in the listings of faculty members and course descriptions. Colleges, schools, and departments are presented in alphabetical order. If you are unable to locate the department or program of your choice, consult the Index.

Faculty
Entries include appointment to the Graduate School faculty (indicated by "*) year of appointment to the University; graduate or professional degree; date; and institution. Entries also may indicate Acting, Adjunct, Affiliate, Clinical, Emeritus, or Research faculty; and area(s) of interest.

Course Descriptions
Each course listing includes prefix, course number, title, and credits. Each listing also may include general education designator(s), names of instructor(s), description of the course, prerequisite(s), and quarter(s) offered.

Specific information on courses offered in a particular quarter, including descriptions of courses approved since the publication of this catalog, appears in the quarterly Time Schedule.

Course Numbers
100-299 Lower-division courses primarily for freshmen and sophomores.
300-499 Upper-division courses primarily for juniors, seniors, and postbaccalaureate (fifth-year) students. Graduate students may enroll in 300- and 400-level courses. When acceptable to the major department and the Graduate School, approved 400-level courses may be applied as graduate credit in the major field and approved 300-level courses may be applied in the supporting field(s).
500- Restricted to graduate students. (Courses numbered in the 500 and 600 series with P suffix denote professional courses for students in the schools of Dentistry and Medicine, and such courses may not be applied as graduate credit in the Graduate School.) Undergraduate, postbaccalaureate, and nonmatriculated students who wish to register for 500-level courses must obtain permission from the instructor of the class, departmental Chairperson, or other designated person.

Graduate courses numbered 600, 601, 700, 750, or 800 are restricted to students in the Graduate School. They appear by number and title only where applicable under the departmental course listings in this catalog. Descriptions for these courses are listed below.

(PREFIX) 600 Independent Study or Research (*)
Individual readings or study, including Independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

(PREFIX) 601 Internship (3-9, max. 9)
Internship required of students in a graduate degree program. Permission of Supervisory Committee chairperson or graduate program adviser is a prerequisite.

(PREFIX) 700 Master's Thesis (*)
Research for the master's thesis, including research preparatory or related thereto. Limited to premaster graduate students (i.e., those who have not yet completed the master's degree in their major field at the University of Washington). Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

(PREFIX) 750 Internship (*)
Internship required of all graduate students in the Doctor of Arts degree program.

(PREFIX) 800 Doctoral Dissertation (*)
Research for the doctoral dissertation and research preparatory or related thereto. Limited to graduate students who have completed the master's degree or the equivalent, or Candidate-level graduate students. Premaster students initiating doctoral dissertation research should register for 600. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

Credit Designation
ART 100 (5) 5 credits are received for the quarter.
ART 101-102 (5-5) Hyphenated course. Credit is earned, but may not be applied toward graduation until the entire sequence is completed. (An N grade may be given the first quarter and the final grade the second quarter.)
ART 100-105 5 credits may be taken over more than one quarter to complete. Repeated registration may be necessary. An N grade is received until the final grade is submitted.
ART 100 (2, max. 8) 2 credits per quarter; course may be repeated up to four times to earn a maximum of 8 credits.
ART 100 (1-5) Up to 5 credits may be taken in a given quarter. Specific number is determined in consultation with instructor or adviser.
ART 100 (1-5, max. 15) Up to 5 credits may be taken in a given quarter. Course may be repeated to a maximum of 15 credits.
ART 100 (*, max. 10) Credit to be arranged per quarter; course may be repeated to a maximum of 10 credits.
ART 100 (3/5) 3 or 5 credits are earned in a given quarter. Specific amount is determined by school or college offering the course. The Time Schedule may indicate 3 credits, 5 credits, or 3 or 5 credits. Credits may vary by section.

Undergraduate General Education Requirement Designators
VLPA Visual, Literary, & Performing Arts (Areas-of-Knowledge requirement).
I&S Individuals & Societies (Areas-of-Knowledge requirement).
NW The Natural World (Areas-of-Knowledge requirement).
QSR Quantitative, Symbolic, or Formal Reasoning.
C English Composition.
Courses marked C may be used for the English Composition requirement or the additional-writing (W-course) requirement, but not both; none may count for the Areas-of-Knowledge requirements. Courses marked QSR may be used for both the QSR requirement and an Areas-of-Knowledge requirement, if one is listed. Courses marked with more than one Areas-of-Knowledge designator (VLPA, I&S, and/or NW) may be used for any one of the areas indicated, but not for more than one.

Background Required
Prerequisites Courses to be completed or conditions to be met before a student is eligible to enroll in a specific course.

Quarters Offered
A,W,Sp,S Indicates the quarter(s) the course is offered. A = Autumn, W = Winter, Sp = Spring, S = Summer.
Examples:

ART 100 AWSp ART 100 offered Autumn, Winter, and Spring quarters.
ART 100, 101 A,W ART 100 offered Autumn Quarter. ART 101 offered Winter Quarter.
ART 100, 101 AW,W,Sp ART 100 offered Autumn and Winter quarters. ART 101 offered Winter and Spring quarters.
ACADEMIC PROGRAMS, FACULTY, AND COURSES

College of Architecture and Urban Planning

224 Gould
Dean
Paul Schell
Associate Deans
Katrina Deines
Anne Vernez Moudon

The College of Architecture and Urban Planning comprises four departments that are directly concerned with the design and development of the physical environment: Architecture, Building Construction, Landscape Architecture, and Urban Design and Planning. The College offers a variety of programs and degrees focusing on the environmental design disciplines within a liberal arts education. The undergraduate programs of the departments of Building Construction and Landscape Architecture lead to the professional degrees that serve as the educational credentials for careers in their respective fields. The preprofessional undergraduate degree in architectural studies prepares students for professional programs as well as related roles in society. Master’s degrees are also offered in the College: Master of Architecture, Master of Urban Planning, and Master of Landscape Architecture. Master’s students may elect to work toward the Certificate in Urban Design or the Certificate in Preservation Planning and Design. An interdisciplinary doctoral program in urban design and planning is available through the Graduate School. All curricula encompass an appropriate level of design and technical understanding and include broader social, economic, and cultural issues fundamental to understanding, preserving, and enriching our built and natural environments.

As part of a major university and metropolitan in the Pacific Northwest, the College is able to reinforce its program by using its setting as a laboratory for study. It works closely with its various professional communities to build curricula and a faculty attuned to the understanding and creation of an appropriate physical environment.

Cascadia Community and Environment Institute
410 Gould
Anne Vernez Moudon, Director

Cascadia Institute emphasizes interdisciplinary education and applied research in community and environment. Research activities are shaped by the needs of clients in the community. Areas of emphasis are flexible, reflecting current planning and design issues. Housed in the University’s College of Architecture and Urban Planning, Cascadia Institute draws upon College disciplines—architecture, building construction, landscape architecture, and urban design and planning—as well as other University disciplines such as public policy, law, business, and social work.

Interdisciplinary Research Centers include:
- Center for Real Estate and Community Development
- Center for Architecture and Education: Design of Learning Environments
- Center for Sustainable Communities

Educational programs include:
- Certificate Programs
- Urban design
- Preservation planning and design
- Continuing Education/Extension Programs
- Architecture
- Facilities management
- Real estate

Preservation Planning and Design Certificate Program
410 Gould
Gail L. Dubrow, Director
Nelle Graham, Program Coordinator

The College of Architecture and Urban Planning administers a special graduate-level program that leads to the Certificate of Achievement in Preservation Planning and Design. This 45-50 credit interdisciplinary program is available to students accepted for graduate work by the departments of Architecture, Landscape Architecture, or Urban Design and Planning. There are two tracks in this program: one for students in architecture and the other for students in landscape architecture and urban planning. The curriculum offered by the sixteen-member faculty, which is drawn from the College along with visiting lecturers from the preservation community, provides students with a grounding in the history, theories, methods, and practices of historic preservation planning and design.

Urban Design Certificate Program
410 Gould
Richard Untermann, Director
Nelle Graham, Program Coordinator

The College of Architecture and Urban Planning administers a special graduate-level program that leads to the Certificate of Achievement in Urban Design. Since 1968, this interdisciplinary program has provided a collective framework that allows students to specialize in the study and design of the urban environment as part of their professional education.

The fourteen-member faculty offers backgrounds in urban design as well as in architecture, landscape architecture, and urban planning. In addition, the communities of the Puget Sound region provide a unique learning laboratory for students to experience the issues and professional activities of urban design. A core curriculum and mandatory course work in four substantive areas provide the student with a firm grounding in theory, methods, and practical skills. The program normally requires seven quarters in length, concurrent with the master’s program.

Students accepted for graduate work by the departments of Architecture, Landscape Architecture, or Urban Design and Planning are eligible for the program if they possess the necessary design abilities prior to enrollment in advanced studies.

International Programs
224 Gould

The departments of the College offer many opportunities for foreign study in which participants earn academic credit while studying abroad. Architecture in Rome I and II, Italian Huttowns, and Landscape in Great Britain are sponsored on a regular basis. In addition, various study and exchange opportunities exist in such locations as Germany, the Scandinavian countries, People’s Republic of China, Mexico, and Japan. Faculty exchanges with foreign institutions occur regularly.

University of Washington Rome Center
95 Piazza del Biscione, Rome, Italy

The College maintains a permanent year-round facility in Rome. Studio and classroom spaces, as well as limited housing accommodations for visiting scholars, are provided in the Palazzo Pio on the Campo de’ Fiori. A library shared with the departments of Classics and Romance Languages and Literature, a substantial slide collection, and a resident support staff are accessible to students. The Rome Center fosters interaction among students from the University and other institutions, together with practicing professionals residing in or visiting Rome. Several major universities regularly share studio critics and lecturers.

Remote Sensing Applications Laboratory
12 Gould
Frank Wetterlund, Director

The Remote Sensing Applications Laboratory (RSAL) is a facility for teaching, research, and public service applications of remote sensing and geographic information technologies in environmental planning and design. Remote sensing includes aerial photography and satellite systems such as Landsat for recording earth surface data in image or digital form for subsequent interpretation by visual or computer techniques and incorporation into geographic information systems. Research applications have included land-use mapping, urban form analyses, growth management studies, development siting, natural resource inventories, and environmental analysis. The RSAL houses an extensive collection of air photo, satellite data, maps, and documentary resources. In addition to optical photo interpretation equipment, the laboratory utilizes software systems such as ERDAS for digital image processing and the ARC/INFO geographic information system.

Facilities

Computing

The College has numerous Macintosh and PC computers connected in a College network which, in turn, is connected to the Internet. Central University computing and data resources are available through these machines. The College employs one full-time Computer Resources Manager and several student consultants.

General Purpose Labs. A general purpose Macintosh computer lab is available to all students in the College. Consisting of nine computers, this lab is networked to a College file server and laser printer. A wide variety of software (e.g., spreadsheets, word processors, two and three-dimensional graphics) is available. The College also supports two DOS/Windows labs with a variety of software, including CAD, spreadsheet, and word processing, available from the Novell file server. Plotting and printing are provided via the network.

Electronic Design Studio. The Electronic Design Studio ("Studio-E") consists of high-end Macintosh computer...
ers as well as scanners, access to laser printing, and plotting. Software includes computer-aided design (CAD) and 3D modeling, graphics, rendering, and animation.

The BCon Lab. The BCon computer lab in Gould Hall has DOS/Windows based on 486DX/266 workstations networked under a server. Software includes scheduling, estimating, bid analysis, project management, modeling, and design programs. The lab has laser printers and access to plotting.

SUN Workstation. The College has a computer system based on a SUN Sparc10 Model 20 workstation, Solaris/UNIX operating system, and peripherals including CD-ROM drive and digitizer. This system is used for advanced research applications of geographic information systems, remote sensing/image processing, and visual and other simulation modeling employing software such as ERDAS, ARC/INFO, and ARC/VIEW.

Lighting Applications Laboratory

The Lighting Applications Laboratory includes a variety of facilities for use by students and faculty members in conjunction with lighting classes, design studio courses, and research work. Equipment in the lighting workshop includes lighting fixtures and lamps, modeling-building materials, an artificial sky, a direct-beam sunlight simulator, assorted light meters, and demonstration displays. The Lighting Simulation Laboratory contains dimmable task and ambient light, a simulated window, and computerized data-gathering facilities.

The Department of Architecture is a cosponsor of the Lighting Design Lab. The lab, a ten thousand square foot, half-million dollar facility, was designed to demonstrate state-of-the-art architectural lighting technology. It is operated by Seattle City Light in downtown Seattle. Students can take various positions in the lab as interns. It is also available to assist in their architectural design, as it does with regional architectural offices.

Photography Laboratory

A photography laboratory is provided with studio and darkroom facilities for use by photography classes, design studio classes, special instruction, and independent activity.

Shop

A fully staffed and equipped wood-, plastic-, and metal-working shop provides students with an opportunity to design and build selected projects. The shop is used as an instructional facility in conjunction with studio, structures, and materials classes. Thesis and other individual activity also can be accommodated.

Library

The Architecture-Urban Planning Library, 334 Gould, is a branch of the University of Washington Libraries and the primary location for materials on architecture, building construction, landscape architecture, and urban design and planning. The collection numbers 36,000 volumes, 7,500 microforms, and 328 current received serial subscriptions. Computer terminals in the library provide access to the library system's online public catalog (LCAT) and a number of campus network databases, including Avery Index to Architectural Periodicals, Expanded Academic Index, National Newspaper Index, Business Index, INSPEC, ERIC, and PayINFO; Art Index is available on CD-ROM. The network also provides a gateway to other libraries on the Internet.

Slide Collection

The slide collection consists of approximately one hundred thousand images covering architectural, landscape, design and planning, and construction subject matter, supporting the curricular and research needs of the College. New materials for lectures and projects are continually added.

Student Organizations

Chapters of American Institute of Architects Students, American Society of Landscape Architects, Associated General Contractors of King County, Building Simulation Association, and the Historic Preservation Association provide opportunities for undergraduate and graduate students to meet informally and to participate in a variety of projects and events.

CAUP Courses

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

CAUP 200 Introduction to Environmental Design and Planning (3) VP/LAS Lectures, demonstrations introducing basic curricular elements. Development of basic skills in methods and graphic expression of design and planning process-analysis, synthesis, evaluation in building technology; simulation, modeling; person-environment relations; history; theory; policy; professional roles. Prerequisites: ENV S 203 and 205 or permission of program director.

CAUP 270 Computers in Environmental Design and Planning (3) Laboratories, lectures, and demonstrations to introduce computing in environmental design and planning. Basic skills development in text and word processing, data-base management; two- and three-dimensional graphics; land-use modeling and modeling aspects of a spreadsheet analysis, and utilizing VAX, CDC, and microcomputer systems. Prerequisites: ENV S 203 and 205 or permission of program director.

CAUP 300 Environmental Design and Planning I: Visual (6) VP/LAS Laboratories, lectures, and demonstrations in the perception of visual qualities, the principles of visual structure and organization, and the fundamentals of the design process. Prerequisites: 200 and 270 or permission of program director.

CAUP 301 Environmental Design and Planning II: Technology (6) VP/LAS Laboratories, lectures, and demonstrations in the technological foundations of the design and planning process. Prerequisite: 300 or permission of program director.

CAUP 340 People-Environment Relations (3) JA/S Principles of visual structure and organization, and the fundamentals of the design process. Prerequisite: upper division standing.

CAUP 401 Environmental Design and Planning III: Interdisciplinary (6) VP/LAS Laboratories, lectures, and demonstrations in the integration of the architecture, landscape architecture, and urban design and planning disciplines in a design studio problem-solving format. Prerequisite: satisfactory completion of preprofessional bachelor of arts program core courses or permission of program director.

CAUP 466 Special Projects (1-12) Instruction-initiated and college-approved systematic study of specialized subject matter. Topics vary and are announced in preceding quarter. Entry code required.

Architecture

208 Gould

The Department of Architecture serves two roles at the University; it offers the Master of Architecture degree, M.Arch., degree, as the only professional architectural degree, and it administers an architectural studies major in the College Bachelor of Arts degree program. The professional program is based on the student's need to be a generalist who is well-rounded in the liberal arts, who possesses a full command of the practical arts of the profession of architecture, and who can assume an enlightened, responsible, and creative role in society. The B.A. in architectural studies is both a professional program with advanced standing, as well as preparation for other roles in society—in research, government, development, management, planning, etc. While most of these occupations do not require a professional license, they do require an understanding of and exposure to a professional education.

The curriculum embodies a range of both broad and focused courses that cover the many and various aspects of architecture: design, graphics, structural engineering, building sciences, history, theory, ecology, sociology, psychology, law, and professional practice. The faculty consists of a large and diverse group of teachers, practitioners, scholars, and researchers, who represent a wide spectrum of background, experience, and viewpoints. Thirty-five permanent faculty members are supplemented by dozens of part-time professional practitioners from the region and around the country, as well as by exchange scholars from foreign institutions.

Priorities stressed by the faculty reflect changing notions of architecture. The celebration of region—the local blend of climate, topography, vegetation, building materials, and regional history, and mythology—is presently the vertical focus of many design studios within the department. In addition to this vertical studio focus, studios are sequenced, providing broadening experiences or specializations leading to an increasingly independent attitude at the advanced level. The studio sequence not only helps to clarify the student's experience, but also ensures that students get a broad and coherent cross-section of design problems and instructors.

Architectural education at the University of Washington requires a minimum of six years of higher education to attain the first professional degree, Master of Architecture. The curriculum is divided into three two-year segments of course work. The first two-year segment is taken prior to admission to the College of Architecture and Urban Planning. It includes 20 credits of preparatory architectural course work, which must be taken at the UW, in addition to a broad liberal arts foundation in humanities, social sciences, natural sciences (including mathematics), and electives to provide for some free exploration. These liberal arts courses may be taken at the UW or at any other institution, as long as they meet the transfer equivalent standards of the UW.

Upon admission to the College of Architecture and Urban Planning, students may elect a major in architectural studies administered by the Department of Architecture. This second two-year segment, consisting of upper-division courses, offers basic preprofessional studies in architectural design, theory, and technology, with an appropriate balance of upper-division electives taken within the disciplines of the College and the University. The College of Architecture and Urban Planning awards a Bachelor of Arts with a major in architectural studies upon completion of this second segment.

The professional degree, Master of Architecture, is awarded only upon completion of the third segment. The curriculum of the graduate program is composed
Undergraduate Program

Bachelor of Arts Degree

The College of Architecture and Urban Planning offers a Bachelor of Arts degree program with a major in architectural studies administered by the Department of Architecture. Building on a firm liberal arts foundation, the undergraduate curriculum provides a broadly based general education with a focus on architecture and the built environment that prepares the student for professional level graduate work in architecture or an allied discipline. In addition, it provides a general education for a wide variety of students and career opportunities in business, government, and other professions.

Years 1 and 2 of the curriculum have three basic educational objectives: (1) to increase the student's ability to understand, evaluate, and communicate ideas; (2) to prepare students to make informed decisions regarding their academic and career choices; and (3) to provide a broad academic foundation of principles in subject areas considered essential to subsequent study in architecture.

The objectives of years 3 and 4 are: (1) to provide a firm foundation in the vocabularies, principles, and interactions of a broad range of environmental design influences essential to professional work in architecture; and (2) to provide opportunities for students to develop their basic skills, knowledge, perceptions, and insights in areas related to the built environment.

Before applying to the College of Architecture and Urban Planning program (the second two-year segment), students must take 20 credits of preparatory course work at the UW. These courses can be taken through UW Extension prior to gaining admission to the University proper, or can be taken during the sophomore year on campus. Application to the architectural studies major is made at the junior level. After acceptance to the architectural studies major, students must complete 90 additional credits before receiving the Bachelor of Arts degree.

Admission Requirements: Junior standing (90 or more credits completed); including successful completion of the liberal arts component (70 credits), 20 credits of elective course work, and acceptance by the program admissions committee. While the cumulative GPA is an important admissions evaluation factor, the committee places emphasis on the evaluation of performance in the preparatory architectural course work the student has taken. It is to the student's advantage to take as many of these courses as possible before applying to the program. Majors will normally be admitted autumn quarter only. The application deadline is May 15 for admission the following autumn quarter. Applications for admission are available in 208 Gould, 543-4217.

Graduation Requirements: Satisfactory completion of 180 credits of course work in the following three categories: 70 credits of liberal arts course work, 20 credits of preparatory architectural course work, 69 credits of professional course work, and 21 credits of approved upper-division electives. The final 45 credits must be completed as a matriculated student in residence at the UW. To be eligible for graduation, students must maintain a minimum 2.5 cumulative GPA for all work done in residence.

Advising: Advising for program premajors is done the Undergraduate Advising Center, 9 Communications, 543-2551. Advising for architectural studies majors is provided by the program faculty adviser in the College of Architecture and Urban Planning, 208 Gould, 543-4217.

Minor

See department for requirements.

Graduate Program

Master of Architecture Degree

The Master of Architecture degree is the only professional degree offered by the Department of Architecture. Completion of the requirements of this nationally accredited degree program satisfies the usual educational prerequisites for the practice of architecture. The program accommodates three groups of undergraduate-degree holders: (1) persons holding a preprofessional four-year degree, such as the College of Architecture and Planning at the University of Washington, (2) persons holding an undergraduate degree in a field other than architecture, (3) persons holding a professional degree such as a five-year Bachelor of Architecture. The program varies in duration and specific course work required, depending on the student's prior academic and professional experience and whether the student elects to pursue a Certificate of Achievement in Urban Design or Preservation Planning and Design.

Candidates with a preprofessional four-year degree, such as Bachelor of Arts (in architectural studies) or Bachelor of Engineering (in architectural engineering), usually undertake six full-time quarters of study plus completion of a thesis for the M.Arch. degree. This program typically requires 99 credits of course work, including 36 of design courses, 36 of approved core courses, 9 of thesis, and 18 of electives. Special interests and certificate programs often can be accommodated within the 18 credits of electives and design studio options. Students are reviewed for satisfactory progress in their first year, and some may be required to take additional studio(s) and other course work or be counseled to consider postponing or terminating further enrollment in the program.

Persons holding degrees in other fields normally undertake three quarters of preparatory course work to develop knowledge and skills equivalent to those of students who enter the program from undergraduate architecture programs. Some entering students may be required to take courses during the summer quarter prior to matriculating as well as additional preparatory studio(s). Upon completion of preparatory course work, the students merge with students in the two-year program described above.

Candidates holding an accredited architectural degree, such as the five-year Bachelor of Architecture, may undertake postprofessional study culminating in the Master of Architecture degree. For these candidates, a substantial (but not in-depth) study of a specific area or interest in the field. As such, each student's program is developed on an individual basis in consultation with faculty advisers. The approved program of study becomes the student's curriculum, which must be completed for award of the degree. Typically this program involves a minimum of 45 credits of required course work, including a thesis, and may be completed in four or five quarters.

Students are admitted to the program in architecture only in autumn quarter. All application materials should be submitted no later than the preceding January 15. Notices of admission are mailed in early April. The prospective student should note that in addition to Graduate Record Examination general test scores, transcripts of previous degree programs and of additional academic study, with a 3.00 grade point requirement, three letters of recommendation, a statement of intent, and a portfolio of work in some field or aspect of art, craft, or design are required as part of the application. Incomplete applications and those received after January 15, are not considered by the admissions committee.

Graduate students may elect to participate in the College-wide certificate programs in urban design and preservation planning and design. See program descriptions in the preceding College section.

The department offers the Architecture in Rome program at the Palazzo Pio, described under the University of Washington Rome Center. Students may study for one or two quarters in Rome with departmental faculty members and guests. A summer program on Italian hill towns at Civita di Bagnoregio is also offered. Other foreign study opportunities include study in Denmark, England, Germany, Hong Kong, and Mexico.

Financial Aid

Each spring quarter, the department awards scholarships and assistantships that apply to the following academic year. These are more typically available to students already enrolled in the program in architecture at the time of the awarding, although some financial aid is offered to newly entering students. Other financial aid and assistantship possibilities may be found through the Graduate School Fellowship Division and the Office of Student Financial Aid in Schmitz Hall.

Faculty

Chairperson

Douglas Zuberbuhler

Professors

Bonsteel, David * 1963, (Emeritus); March, 1964, University of Washington; design process, computer applications, research.

Bosworth, Thomas L. * 1968; M.Arch, 1969, Yale University; design process, history, professional practice.

Ching, Francis D. K. 1985; B.Arch, 1966, University of Notre Dame; design graphics.

Claussen, Meredith L. * 1978; PhD, 1975, University of California (Berkeley); aesthetics and twentieth-century architecture.

Dietz, Robert H. * 1947, (Emeritus); M.Arch, 1944, Massachusetts Institute of Technology; design, housing.

Emery, Ashley F. * 1961, (Adjunct); PhD, 1961, University of California (Berkeley); bioengineering, energy conservation in buildings and air conditioning.

Hildebrand, Grant * 1948; M.Arch, 1964, University of Michigan; history, preservation design.

Jacobian, Phillip L. * 1982, (Emeritus); M.Arch, 1969, Finnish Institute of Technology (Helsinki); design, professional practice.

Johnston, Norman J. * 1960, (Emeritus); PhD, 1964, University of Pennsylvania; urban design, history.

Kelbaugh, Douglas S. * 1985; M.Arch, 1972, Princeton University; design, energy conservation, professional practice, theory.

Kiyak, H. Asuman * 1972, (Adjunct); PhD, 1977, Wayne State University; health psychology, gerontology, geriatrics, environmental psychology.

Kolb, Keith R. * 1962, (Emeritus); M.Arch, 1950, Harvard University; design, professional practice.

Lovett, Wendell H. * 1948, (Emeritus); M.Arch, 1948, Massachusetts Institute of Technology; architecture.

Nyberg, Folke E. * 1969; B.Arch, 1960, Yale University; theory, urban design, professional practice.

Pundt, Hermann G. * 1968; PhD, 1969, Harvard University; history, historical preservation.

Schneider, Raymond C. * 1964, (Emeritus); Ed.D, 1955, Stanford University; educational facilities design.

Associate Professors

Chapman, Robert * 1967; M.Arch, 1966, University of Washington; research, illustration, communication.

Hendrix, Dana * 1963, (Adjunct); M.A., 1963, University of Washington; research, illustration, communication.
Colleges of Architecture and Urban Planning / Architecture

Seligmam, Claus * 1964; Diplom, 1960, London Polytechnic (UK); design, design process, theory.
Small, Robert * 1965, (Emeritus); MArch, 1955, University of Oregon; design, community practice, barrier-free design, housing, site planning, design process.
Staub, Christiari 1967, (Emeritus); Certificate, 1944, Swiss Institute For Industrial Design, Arts & Crafts; photography.
Streetfield, David C. * 1974, (Adjunct); MLA, 1965, University of Pennsylvania; regional landscape planning, landscape, architectural, and environmental history.
Streissguth, Daniel M. * 1955, (Emeritus); MArch, 1949, Massachusetts Institute of Technology; design process.
Thiel, Philip * 1961, (Emeritus); MS, 1948, University of Michigan; visual design, design process, person-environment relations, experiential notation.
Venez Moudon, Anne * 1980; DSc, 1987, École Polytechnique Fédérale de Lausanne (Switzerland); urban design, city form and neighborhood studies, design research.
Zarina, Astra * 1970; MArch, 1955, University of Massachusetts; design, foreign studies.

Associate Professors
Albrecht, Robert G. * 1960; MSCE, 1960, University of Massachusetts; structures.
Bentil, Kwaku K. * 1991, (Adjunct); PhD, 1990, University of Florida; project management, construction safety, construction practice, estimating.
Curtis, J. William * 1962, (Emeritus); MA, 1969, University of Washington; design process, professional studies.
Deines, Katrina * 1965; MArch, 1979, University of Washington; design theory and foreign studies.
Donette, James J. * 1966; MArch, 1969, University of Washington; graphics, design.
Goldblatt, Steven M. 1982, (Adjunct); JD, 1977, Golden Gate University; construction accounting, labor relations, and construction law.
Heerwaagen, Dean Reese * 1975; MS, 1967, University of Massachusetts; environmental controls (passive and active).
Hill, Warren * 1959, (Emeritus); MA, 1961, New York University; interior design; design, history.
La Tourelle, Elaine Day * 1975; MArch, 1984, Yale University; design, professional practice.
Lebert, Edgar A. 1965; MS, 1967, University of Washington; structures.
Loveland, Joel E. * 1986; MArch, 1980, University of California (Los Angeles); energy conservation, design, research.
Miller, David E. * 1989; MArch, 1972, University of Illinois; design development, design.
Millet, Marietta * 1976; MArch, 1972, Massachusetts Institute of Technology; illumination, environmental controls.
Minah, Galen F. * 1970; MArch, 1968, University of Pennsylvania; design process, design, environmental controls.
Pyatak, Michael * 1990; MArch, 1967, Harvard University; design of affordable housing for lower income communities—urban and suburban regions.
Rohrer, John * 1948, (Emeritus); BArch, 1937, University of Washington; graphics, design.
Rolle, George R. * 1984, (Adjunct); MArch, 1966, University of Pennsylvania; urban development process, finance, feasibility and market analysis, urban design processes.
Rosen, Arnold S. * 1966, (Emeritus); MSCE, 1949, California Institute of Technology; design process, building technology, computers.
Ryan, Dennis M. * 1974; PhD, 1976, University of Pennsylvania.
Sassanoft, Robert * 1963; MCP, 1968, University of California (Berkeley); design process, person-environment relations.
Yager, Paul * 1987, (Adjunct); PhD, 1980, University of Oregon; physical chemistry and applications of biomembranes.

Assistant Professors
Mohler, Richard Ernest J. * 1968; MArch, 1984, University of Pennsylvania; architecture and community; design of housing and urban public open space.
Ochsen, Jeffrey K. * 1987; MArch, 1976, Rice University; history; preservation design, urban design.
Palleroni, Sergio A. * 1992; MS, 1987, Massachusetts Institute of Technology; the relationship between cultures, their histories, and the production of architecture.

Senior Lecturers
Onouye, Barry S. * 1967; MSCE, 1969, University of Washington; integration of structural technology into architectural design education.
Vanags, Andris 1969; BFA, 1968, University of Washington; building science, design.
Zuberbuhler, Douglas * 1967; MArch, 1968, University of Washington; graphics, design, building technology.

Lecturers
Dee, Jennifer 1982; MArch, 1984, University of Washington; theory, design.
Johnson, Brian Robert 1978; MArch, 1981, University of Washington; computer applications.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
ARCH 150, 151 Appreciation of Architecture I, II (2/3, 2/3) VLPA Bosworth, Pundt. Historical survey of the architecture of Western civilization. For nonmajors.
ARCH 250 American Architecture and Urban Environments (2) VLPA Pundt. Study and critical investigation of architecture and the problems of urban design in North America from colonial times to the present. For nonmajors.
ARCH 302 Architectural Design I (6) VLPA Studio problems in dwelling design with emphasis on regionalist building typology and design methodologies. Entry code required. Prerequisites: 310 and 311.
ARCH 303-304-305 Introduction to Architectural Design I, II, III (6-6-6) VLPA Studio problems that develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degree in other fields. Entry code required. Prerequisites: first-year student standing in three-year Master of Architecture program.
ARCH 310 Graphic Visualization and Representation (3) Lectures and laboratory exercises in concepts, conventions, and techniques of graphic visualization and representation in the design of professions: lettering, drafting, multi-view projection, axonometric projection, oblique projection, descriptive geometry, and topographical drawings. Entry code required.
ARCH 311 Graphic Simulation and Presentation (3) Lectures and laboratory exercises in concepts and techniques of graphic simulation and presentation of design precepts, including perspective projection and sun and shadow. Entry code required. Prerequisite: 310.
ARCH 313 Introduction to Architectural Photography (2) VLPA Basic elements and processes of architectural photography to include camera controls, exposure technique, and photo processing. Student must provide own camera with lens, shutter, and aperture controls.
ARCH 314 Introduction to Architectural Drawing (2) Skill development in conceptualization of forms and their relationships through observation and recording in freehand graphic manner. Proportion, scales, light effect, value, texture, and various perspective techniques.
ARCH 315 Architectural Sketching (2) VLPA Skill development in conceptualization of forms and their relationships through observation and recording in freehand graphic manner. Proportion, scales, light effect, value, texture, and various perspective techniques. Prerequisites: 314 and permission of instructor.
ARCH 320 Introduction to Structures I (3) Albrecht, Lebert, Onouye, Ratti. Statics and strength of materials. Entry code required.
ARCH 321 Introduction to Structures II (3) Design of structural elements in timber and steel.
ARCH 322 Introduction to Structures III (3) Building framing systems; wind and seismic loads, long-span structures.
ARCH 340 People-Environment Interactions (3) I&S Lecture and discussion on the dynamics of people-environment interactions. A spectrum of environmental scales and cultural contexts addressed. Builds on the theoretical and empirical work in the field and relates to studio design work in 303.
ARCH 350 Architecture of the Ancient World (3) VLPA Bosworth. Architectural history in the Western world from beginnings to AD 550.
ARCH 351 Romanesque, Gothic, and Renaissance Architecture (3) VLPA Hildebrand. Architectural history in the Western world from AD 550 to 1750.
ARCH 352 History of Modern Architecture (3) VLPA Architectural history in the Western world from 1750 to the present.
ARCH 360 Introduction to Architectural Theory (3) VLPA/IBS Function of architectural theory in comprehending and ordering various human purposes in architecture, types of architectural purpose, and types of theories. Current concerns.
ARCH 400 Architectural Design II (6) VLPA Various studio problems in residential building design to develop basic skills in the synthesis and integration of building form. Prerequisite: 302.
ARCH 402 Architectural Design III (6) VLPA Student chooses from among many separate sections that introduce particular architectural design theories and methodologies. Focus and format vary. Prerequisite: CAUP 401.
ARCH 403 Architectural Problems (6) Entry code required.
ARCH 410 Architectural Working Drawings (2-3) Lectures and optional laboratory exercises focusing on the content, organization, and conventions commonly used in preparing working drawings for the building industry, specifically in relation to the other contract documents, construction practices, and legal considerations.
ARCH 411 Computer Graphics Applications (3) Johnson. Lectures and hands-on laboratory experience that focuses on learning to use general purpose graphics software, including VISIT, the MOVIE.BYU programs, and AutoCAD. Prerequisite: CAUP 270.

ARCH 412 Architectural Illustration and Presentation (3) Issues, conventions, and techniques used in architectural renderings, including line drawings, shaded drawings, use of color, composition, organization, advanced perspective, scale figures, entourage, reflections, and media. Prerequisite: 311.

ARCH 413 Architectural Photography Projects (2) VLPA Projects involving the study of illumination and perspective as related to the representation and perception of space, form, color, texture, pattern, and scale of architectural subjects. Students must provide their own camera with lens, shutter, and aperture controls. Prerequisite: 313.

ARCH 415 Architectural Sketching (3) Exercises in freehand representational drawing using charcoal, graphite, and conte crayon with emphasis on line, proportion, values, and composition. Studies progress from geometric to nongeometric forms.

ARCH 418 Watercolor Drawing (3) Introduction to the principles and practice of using transparent watercolor for the naturalistic representation of objects, people, and interior and exterior space.

ARCH 420 Structural Design I (4) Reinforced concrete fundamentals. Prerequisite: 322.

ARCH 421 Structural Design II (4) Design of steel structures.

ARCH 422 Structural Design III (4) Design of reinforced concrete structures.

ARCH 426 Structural Unit Masonry (3) Labor behavior and design of reinforced brick, tile, and unit masonry structures. Offered: jointly with CIVE 455.

ARCH 430 Materials and Processes (3) Vanags. Lectures, field trips, and laboratory sessions directed toward the nature, potentials, and limitations of a variety of materials (wood, metal, plastics, inorganic cement, asbestos, rocks, and clay) and the processes involved with their production, fabrication, and system compatibility.

ARCH 432 Construction Materials and Techniques II (3) Schneider. Survey of construction materials and techniques of steel, masonry, and concrete buildings. Prerequisite: CAUP 301.

ARCH 433 Active Control Systems for Building Operation (3) NW Heerwagen. Electrical, mechanical (HVAC), plumbing, and fire safety systems for buildings. Descriptions of what these systems do, where they are used, how they are integrated into the overall building design; rules of thumb, design strategies, and short cuts for anticipating system design and use.

ARCH 435 Principles and Practices of Environmental Lighting (3) Miller. Perception-based approach to principles of natural and artificial lighting. Practical considerations of lighting involving environmental evaluations, calculations and the use of lamps and fixtures. Sketch and model studies for applica-
tions. Impact of lighting design on energy conserva-
tion. Relation of lighting design process to architectural design concepts.

ARCH 436 Building Acoustics (3) NW Heerwagen. Description of principles and practices for manipulating and enhancing sound in buildings. Information about sound behavior and the organization of architectural elements (deployment of design features, including various geometries and materials) for the control of sound in enclosed spaces and between adjacent spaces. Entry code required.

ARCH 437 Passive Thermal Controls (3) NW Heerwagen. Devices for achieving energy-efficient buildings, analytical methods for evaluating likely thermal performances of buildings and building envelopes, resistance and capacitance of building materials, flows through and around buildings, energy codes and industry standards, and strategies for integrating analytic techniques and guidelines into the architectural design process.

ARCH 439 Light Frame Building Assemblies (3) Vanags. Fundamentals of light-frame construction from soil excavation, foundation systems to framing systems, and electrical, plumbing, and heating/cooling into the structure. Prerequisite: College of Architecture and Urban Planning major or permission of instructor.

ARCH 447 Physical Structure and Human Interactions (3) Sasanoff. Effect of physical structure on human interaction.

ARCH 449 Designing Environments for the Elderly (3) Introduces students of design disciplines to geriatrics, gerontology and considerations necessary in designing for an aging population.

ARCH 452 Characteristics of Puget Sound Architecture and Towns (3) Hildebrand. Puget Sound architectural and town environment in terms of its historical development, but specifically including recent and pending changes affecting this environment in significant ways.

ARCH 454 Greek Architecture (3) VLPA· Langdon. Detailed study of Greek architecture from the beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ART H and CL AR 446; alternate years.

ARCH 455 Special Studies in Gothic Art and Architecture (3) VLPA· Hildebrand. Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Offered: jointly with ART H 455.

ARCH 456 Design Theory and Analysis (3) VLPA/IA & S Dee, Minah, Seligman. Problematical nature of philosophies of architecture; interaction of philosophical concepts and architectural form and expression. Fundamentals of architectural criticism.

ARCH 481 Recent Developments in Architectural Theory (3) VLPA/IA & S. Concentrates particularly on developments that spring from recent work in the epistemology of science and in philosophy.

ARCH 487 Architectural CAD Systems (4) Johnson. Development, use, and limitations of architectural computer-aided design systems in the professional office. Lectures, readings, and exercises utilizing the college's CAD system as well as other computers. Prerequisites: 411 and CAUP 270.

ARCH 488 American Architecture (3) VLPA/IA & S. Larsen. American architecture from the seventeenth-century colonial period to the present. Emphasis on architects and buildings, including feature of urban development. Offered: jointly with ART H 488.

ARCH 493 Rome Preparation Seminar (2) Seminar dealing with history, culture, topography, and customs of Rome, Italy. Required for students enrolling in 493, 496, or 497.

ARCH 495 Architectural Studies Abroad (3) Urban history and development of the city of Rome through first-hand studies of its topography and morphology. City's more recent quarters become subject of group research related to problems and potentials of growth and future development. Students may be required concurrently in an appropriate studio section. Entry code required. Prerequisite: 493.

ARCH 496 Architectural Studies Abroad (3) Studio-oriented projects and application of experience gained during preceding program. Seminars held in collaboration with Italian students, professionals, and educators. Prerequisite: 495.

ARCH 497 Italian Hilltowns (9) I&S Zarina. Introduction to origins and development of built forms prevalent in the hilltowns of central Italy, a comparative analysis of domestic architecture in the agricultural context of the confluence zone of Tuscany, Umbria, and Latium and a historical survey of castles, palaces, villas, and gardens of upper Latium. Entry code required. Prerequisite: 493.

ARCH 498 Special Projects (1-12) Instructor-initiated and department-approved systematic study and offering of specialized subject matter. Topics vary and are announced in preceding quarter.

ARCH 499 Undergraduate Research (1-6) Entry code required.

Courses for Graduates Only

ARCH 500-501-502 Architectural Design Studio (6-6-6) Architectural design, with emphasis on development of professional skills in design synthesis. Specific focus on preservation design (500), urban design (501), and design development (502). Majors only.

ARCH 503-504-505 Architectural Design Studio Options (6-6-6) Advanced studies in various general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: 502.

ARCH 506 Advanced Architectural Studies (6) Advanced experimental studies dealing with significant architectural relationships that involve scholarly investigation, development, and presentation of results.

ARCH 522 Skin-Resistant Structures (3) Albrecht. Resistance mechanisms, structural systems employing plates, folded plates, shells, and membranes with applications to the structural design process.

ARCH 535 Graduate Seminar, Study Topics in Environmental Lighting (3) Miller. Focus on individual student projects involving research and design for lighting.

ARCH 551 Scandinavian Architecture of the Nineteenth and Twentieth Centuries (3) Nyberg. Introduction to the contribution of Scandinavian architecture to early functionalism with emphasis on its relationship to neoclassicism and vernacular architecture.

ARCH 552 Special Studies in Architecture in the Ancient World (3) Bosworth. Study and critical analysis of a selected topic from classical or pre-classical periods. Prerequisite: 530.

ARCH 554 Special Studies in Modern Architecture (3) Pundt. Study and critical analysis of a selected number of distinguished professionals (architects, planners, educators, critics) and their contributions to the evolution of modern and contemporary architectural practice and thought.

ARCH 556 History of Chicago School Architecture (3) Pundt. Study and critical investigation of the history and architectural development of Chicago, the Midwest, and the West Coast from circa 1870 to 1920.

ARCH 557 Neoclassicism and Romanism in Europe and America (3) Pundt. Study and critical investigation of European and American architecture and urban design from 1750 to 1850.
Building Construction

ARCH 580 Independent Study or Research (*) Credit/no credit only. Entry code required.
ARCH 700 Masters Thesis (*) Credit/No credit only. Entry code required.

Undergraduate Program

Bachelor of Science in Building Construction Degree

The undergraduate program in building construction provides the knowledge and skills to prepare graduates for entry-level supervisory or managerial positions in the construction industry. When course work is combined with work experience, graduates find employment as superintendent, project managers, construction managers, or in the founding of their own firms.

Because the number of applicants is large and the department's resources are limited, the process of admission is very selective. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent aptitude, and personal motivation.

The core curriculum is concentrated in the upper division during a typical student's junior and senior years. The first two years can be completed at the UW (or other four-year institutions) as a pre-major in the College of Arts and Sciences or at a community college.

Admission Requirements: Applicants must contact the department to obtain its individual application form and prospectus, which contain details of requirements for admission. Closing date for receipt of applications by the department is April 1; however, the University admission application form and its accompanying material must be filed separately at the admissions office much earlier than the department's closing date. Selection for acceptance to the program, which begins autumn quarter, is made each year by early May, and all applicants are notified of the admissions committee decision shortly thereafter. Because each application is valid only once, a student whose application for admission is denied must reapply if consideration is desired in any subsequent year. Preference is given to those applicants who have successfully completed the lower-division requirement (prerequisites), and who are, in the judgment of the department, well qualified and prepared to undertake its curriculum. The department strongly urges ethnic minorities and women to apply for admission.

In order to meet the lower-division requirements, the program requires the satisfactory completion of a minimum of 90 credits of course work in the following four categories (courses should be taken concurrently with those preparing individuals for professional practice): (1) a minimum of 183 approved credits, (2) a minimum 2.50 cumulative GPA in required upper-division core courses, and (3) a minimum 2.30 cumulative GPA in a student's final six quarters. The last 65 credits must be earned as a matriculated student in residence at the UW. Consult the departmental prospectus for details.

Internship

An internship is required for completion of the degree program. Every student is encouraged to seek summer employment in the building industry. The main objective is to provide students with a taste of "real-world" experience by giving them the opportunity to work at a construction site or in a construction firm's office and exposing them to as many facets of the construction process as possible. Monetary compensation, if any, is negotiable between the student and employer. While the department makes every effort (through a selection and interview process) to place students in a number of unfilled positions usually offered by participating firms, most students seek internships with construction firms on their own initiative during the winter and spring quarters of their junior year. Students participating in the summer internship program register for B CON 412, Construction Practice, for the following autumn quarter and acquire three upper-division credits upon completion of the summer internship. Submission of a required written report, attendance at class during autumn quarter, and an oral class presentation are required.

Correspondence and Information

Faculty

Chairperson
Kweku K. Bentil

Professor
Hinze, Jimmie W. *1984, (Adjunct); PhD, 1976, Stanford University; construction engineering and management.

Associate Professor
Bentil, Kweku K. *1991; PhD, 1990, University of Florida; project management, construction safety, construction practice, estimating.

ARCH 558 Seminar in Twentieth-Century Architecture (3) Claußen Specific focus changes from quarter to quarter. Prerequisite: graduate standing with background in architecture, architectural history, or permission of instructor. Offered: jointly with ART H 591.

ARCH 559 American Utilitarian Architecture (3) Hildebrand Significant American environmental design efforts arising from utilitarian needs, e.g., factories, bridges, skyscrapers, and associated technical building innovations.

ARCH 560 Graduate Seminar on Architecture Theories (3) Dyck, Nagy, Solbrig Recent developments in architectural theory, urban design theory, criticism, and the methodology of criticism.

ARCH 561 Urban Design Theory (3) Nyberg Study of development of nineteenth- and twentieth-century urban design theories and parallel developments in architecture and urban planning. Theoretical premises are related to current practices of urban design in various sociopolitical contexts. European as well as American. Evolutionary nature of theory emphasized. Prerequisite: URBDP 479 or permission of instructor.

ARCH 571 Project Feasibility (3) Wright Social, political, and economic factors affecting the location, design, financing, construction, and marketing of buildings.

ARCH 572 Specifications and Contracts (3) Brown Detailed organization and composition of contracts, specifications, and related contract documents.

ARCH 573 Professional Practice (3) Rees Operation of an architectural office and professional practice.

ARCH 574 Law for Architects and Engineers (3) Goldberg Legal issues facing architects and engineers, focusing on liability avoidance. Topical areas include: basic doctrines, the design professional/client relationship, the construction process, and professional practice problems.

ARCH 580 History of Historic Preservation in Europe (3) Pundt European achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

ARCH 581 Historic Preservation of Architecture, USA (3) Pundt American achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

ARCH 582 Technical Issues in Preservation Design (3) Swirski Issues, practices, and procedures involved in preservation and reuse of old and historic buildings. Technical and aesthetic means by which practicing professionals approach the analysis, interpretation, and resolution of problems such work raises. Emphasis on recent and local projects and related experiences.

ARCH 583 Residential Design: Methods and Practices (3) Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on contemporary issues in neighborhood and dwelling design, methods, and practices. Offered: jointly with URBDP 574.

ARCH 596 Fieldwork in Professional Practice (*, max. 9) On-location study under the supervision of a practicing professional involved in an aspect of environmental design. Credits/no credit only. Entry code required.

ARCH 598 Special Topics for Graduate Students (1-4) Systematic discussion of specialized subject matter. Topics vary and are announced in the preceding quarter. May be repeated for credit.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

B CON 310 Construction Contract Documents I (3) Introduction to working drawings, specifications, and other documents designed to enable the student to read and interpret complete set of contract documents for residential and light commercial projects. Emphasis on the organization and uses of architectural engineering drawings and specifications in the construction process. Entry code required. Prerequisites: ENGR 123 or equivalent.

B CON 311 Building Technology I (3) Aaronson Introduction to the functional and constructional characteristics of building components, including electrical distribution, lighting, heating, air conditioning, plumbing, fire protection, walls, floors, and roofs. Entry code required. Prerequisites: PHYS 115, 118.

B CON 312 Introduction to the Construction Industry (3) Bent Introduction to the construction process, including general overview of organization, relationships, practices, terminology, project types, procurement methods, industry standards, contract documents, and career opportunities. Entry code required. Open to nonmajors on space-available basis.

B CON 313 Construction Methods and Materials I (3) Aaronson Review of basic building materials, with emphasis on assembly and utilization in residential and light construction, including materials such as stone, brick, and wood. Entry code required.

B CON 320 Construction Contract Documents II (3) Comprehensive review of working drawings, specifications, and other documents required for commercial construction project, including technical specifications and building codes. Emphasis on document requirements in relation to time, materials, resources necessary to estimate, schedule, and manage projects. Entry code required. Prerequisites: 310, 312, and 313 or equivalent or permission of department.

B CON 321 Building Technology II (3) Aaronson Introduction to the functional and constructional characteristics of building components: electrical distribution, lighting, heating, air conditioning, plumbing, fire protection, walls, floors, and roofs. Entry code required.

B CON 322 Construction Equipment Management (3) Introduction to principles and techniques for selecting and managing construction equipment. Review and evaluation of the types of earth moving and other construction equipment, including the estimating and analysis of production, ownership, and operating costs. Entry code required. Prerequisites: 312 and 313 or equivalent or permission of department.

B CON 323 Construction Methods and Materials II (3) Review and evaluation of structural and nonstructural systems for commercial, institutional, and industrial building types, including erection and coordination of specialty trades work. Entry code required.

B CON 332 History of Building (3) Rollie Historical survey of building techniques and materials as conditioned by environmental, technical, and social influences. Entry code required. Open to nonmajors on space-available basis.

B CON 333 Construction Safety (3) Bent Exposition of requirements of the Occupational Safety and Health Act and other related federal and state legislation as applied to the building construction industry. Standards for accident prevention and responsibility for compliance emphasized. Entry code required.

B CON 411 Project Planning and Control (3) Review and execution of the basic principles, techniques, and practices needed as tools by contractors to plan, control, and manage building construction projects. Entry code required. Prerequisites: 310, 311, 312, 320, 321, 322, 323, and 311 or equivalent or permission of department.

B CON 412 Construction Practice (3) Bent Integration of construction theory with practical experience through direct, on-the-job application for one summer. Entry code required. Prerequisites: 310, 311, 312, 320, 321, 322, 323, and 311 or equivalent or permission of department.

B CON 413 Construction Accounting (3) Goldblatt Introduction to accounting for the contractor, placing emphasis on the analysis and use of financial statements and a job cost accounting system. Entry code required. Open to nonmajors on space-available basis.

B CON 420 Temporary Construction Structures (3) Bent Introduction of design principles and technical requirements of temporary structures commonly utilized by contractors at construction sites, including the planning, design, fabrication, and installation of such structures. Entry code required. Prerequisites: ARCH 320, 321, 322, and 420 or equivalent or permission of department.

B CON 421 Project Management I (3) Systematic study of management functions in the building industry: planning and scheduling, organization, time and equipment utilization, monitoring and expediting, project administration, cost control. Entry code required. Prerequisites: 410, 411, 412, and 413.

B CON 423 Soils and Foundations (3) Tweleker Origin, classification, and physical properties of soil as used in engineering and construction applications, together with loads and stresses of soil on, and from, the more common types of engineering structures. Entry code required. Prerequisites: GEOL 101, ARCH 320, 321, 322, and 420.

B CON 424 Construction Labor Relations (3) Goldblatt Introduction to construction labor topics, including labor-management organization, legislation and regulation, collective bargaining, and job site administration. Entry code required. Open to nonmajors on space-available basis.

B CON 431 Project Management II (4) Capstone project ridge of case studies to apply skills, knowledge, techniques, and concepts developed in prior courses. Emphasis on the concept of integrated project management, including cost estimating and bidding, scheduling, cost control, safety, project organization, and documentation. Entry code required. Prerequisites: senior standing, 310, 320, 321, 322, 331, 410, 411, 421, and 424.

B CON 432 Computer Applications in Construction (3) Fredley Introduction to microcomputer applica tions in construction industry. Discussion of available hardware and software is combined with practical assignments using estimating and scheduling programs designed for contractors, architects, and developers. Entry code required. Prerequisites: 331, 410, 411, 412, 413, 421, and graduating senior.

B CON 433 Construction Seminar (2) Presentations by professionals and faculty members to broaden understanding of the construction process, reinforce concepts learned in course work, and help develop a sense of professionalism for future careers in industry. Entry code required. Prerequisites: senior Building Construction student in the last quarter prior to graduation.

B CON 434 Construction Law (3) Goldblatt Basic legal aspects of construction of private and governmental projects. Survey of general principles relating to rights and liabilities of the contractor and other parties under construction contracts, including union-labor agreements. Major statutory and regulatory requirements affecting the contractor, including lien laws, environment, and minority hiring practices. Entry code required. Open to nonmajors on space-available basis.

Landscaping Architecture

348 Gould

Undergraduate Program
Bachelor of Landscape Architecture Degree

The Bachelor of Landscape Architecture (B.L.A.) program is a professional program accredited by the American Society of Landscape Architects. It is a five-year undergraduate sequence of lecture and studio courses which introduce students to historic and contemporary concepts in landscape architecture. Course work recognizes the effect of human interaction with the landscape and upon natural resources.

Program goals are to provide students with a strong design education, foster creativity, develop graphic and verbal communication skills, facilitate cognitive abilities, and encourage computer proficiency. Departmental courses include the history of landscape architecture, design theory and practice, construction, graphics, and professional practice. Required courses from other departments include urban horticulture, soils, geology, botany, and ecology.

Course work is given practical application in design studies led by departmental faculty and members of the professional community. Studio topics include planning design, planning for large undeveloped areas, land planning and housing design for communities, urban landscape design, and design for natural and semi-natural areas. Studio projects emphasize American Society of Landscape Architects' focal areas: an understanding of the functioning of natural systems and an awareness of the cultural and sociological forces that influence the landscape architect's work. Individual as well as team-oriented projects encourage the development of strong interactive, verbal, and evaluative skills.

Students with prior course work which meets departmental prerequisites and University requirements for graduation, may enter the three-year program which comprises the focused area of the program. In addition
to required course work, the program encourages students to pursue personal interests through directed research and independent study within the department and in other departments. The program is structured to permit students to explore design-related areas which allow them to realize most fully their creative potential and professional growth.

Satisfactory completion of University requirements in English composition, Reasoning and Writing in Context, and Areas of Knowledge is a prerequisite for entry into the program. Undergraduate students currently enrolled at the UW may apply for admission to the department after completion of a minimum of 60 credits of general education requirements. Major status is normally granted upon completion of 80 credits and after formal application to the department has been reviewed and accepted. The five-year B.L.A. program requires completion of 225 credits.

Transfer students from other academic institutions must satisfy University admission requirements. Students applying to the program for a second bachelor's degree are assumed to have completed the University's general education requirements.

Admission to the B.L.A. program is competitive and based on academic record, evidence of creative potential, and graphic and verbal fluency. Completion of prerequisite courses is required prior to admission. All students must submit their application forms and materials to the department by February 15 to be considered for admission the following autumn quarter.

Please contact the department for application materials and detailed information on admission, prerequisites, and required course work.

Graduate Program

Master of Landscape Architecture Degree

The Master of Landscape Architecture program is an accredited professional program that offers advanced training in landscape design and design research. The program's diverse courses allow students to experience a range of project scales and to develop a specialty under professional guidance. The department curriculum emphasizes the following:

- Design Education. The majority of the faculty are designers interested in social and ecological issues and in interdisciplinary design work. Most classroom investigations result in design proposals that foster the strong physical design tradition associated with landscape architecture. Landscape design is holistically defined in the classroom and could include the development of policies or standards leading to positive physical change, the detailed siting of landscape features such as a road or building, and the development of maintenance or rehabilitation procedures.

- Complex Landscape Issues. The core courses of study focus on complex landscape issues that balance political, ecological, social, or physiographic considerations. These issues are generally people-oriented and involve urbanization, land conversion, or recycling existing environments.

- Design Scholarship. Students are expected to advance their skills by exploring various research methods and techniques. The design studios are a testing ground for the development and exploration of different research perspectives, and students complete their studies with a thesis.

Graduate students may elect to participate in the College-wide certificate programs in urban design and preservation planning and design. See program descriptions in the preceding College section.

Program Requirements

The curriculum is tailored to each student's needs. Students follow a specific course path based on their previous education, experience, and individual educational goals. Students with a B.L.A. degree begin with the core curriculum, while students with no design or science background take several additional quarter courses in architecture, landscape, and science. The core-level program requires completion of a minimum of 72 approved credits.

The typical program for students with a limited design or science background varies, and course work depends on the entrance proficiency of the applicant. The typical three-year program requires completion of the two-year core, plus the required professional core at the undergraduate level.

A scholarly thesis is required of all candidates except for those who hold a Ph.D. The thesis allows students to select a subject for investigation, develop a research methodology, and analyze the subject for presentation in written and graphic form. The faculty places considerable importance on the thesis, and graduates have produced significant results.

Admission Requirements

Candidates applying to the Master of Landscape Architecture program must apply to both the Graduate School and to the Department of Landscape Architecture by January 15 to be considered for admission the following autumn quarter.

Admission to the Graduate School requires: 1) that candidates hold a baccalaureate degree from an accredited United States college or university (or its equivalent in a foreign institution), and a GPA of 3.00 (B) or better in the last 90 graded quarter hours; or the last 60 graded semester hours; and 2) a Graduate Record Examination (GRE) score taken within the last five years.

Admission to the Master of Landscape Architecture program is a competitive process with priority given to the applicant whose apparent abilities, as determined by the department's Admissions Committee, will enable them to complete the program expeditiously and with a high level of achievement. Contact the department for additional information.

Witherspoon, Boykin 1990; MLA, 1990, Louisiana State University; computer applications in landscape architecture, urban planning, GIS, resource management.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

L ARC 200 Landscape Architecture Field Trips (2) VLPARI\&S Five field trips introduce typical landscape architectural projects and demonstrate scope of the landscape architecture field. Visits to major projects in the Puget Sound region include city and county parks, river parks, harbors, downtown redevelopments, streetscapes, campus headquarters, and others. Open to nonmajors. Required for admission to the Bachelor of Landscape Architecture program.

L ARC 300 Introductory Landscape Architecture Design Studio (6) VLPAR Introduction to history and environmental influences in field while developing design and graphic skills. Site analyses and drawing to convey design concepts. Relationship of visual perception to drawing, role of values in design, verbal communication, and behavioral analysis of design process. Required for admission to Bachelor of Landscape Architecture program.

L ARC 301 Site Planning Studio (6) Introduction to site planning and landscape design, covering the factors of site analysis and planning, resource utilization, site suitability related to specific programs and activities; and planning, design, and behavioral studies for selected case study projects. Includes design graphics and issues relating to professional awareness.

L ARC 302 Site Design In Urban Context (5) Design of public use areas in the urban area. Project types for this course are waterfront development, commercial areas, campus and cultural centers, plazas and historical sites; recommendation for policy to be established as part of the design solution.
L ARC 303 Natural Processes Studio (3) Project design studies related to natural systems. Computer applications are introduced.

L ARC 310 Landscape Architecture Field Sketching (2) Introductory level sketching of landscape subjects: natural and urban sites, plants, animals, and architectural elements. Emphasis on perspective. Various media, including pencil, charcoal, markers, ink wash, water color.

L ARC 311 Introduction to Design Graphics (2) Introduction to communication techniques for various phases of the design process. Many techniques are introduced; subjects include design specificities and appropriateness for different purposes explored.

L ARC 322 Introduction to Planting Design (3) VLPA Traditional ways plants are used in landscape design. Composition and design characteristics of plant materials. Technical considerations for selection, climate, cultural suitability, availability, costs, and maintenance. Open to nonmajors.

L ARC 351 Landscape Construction (4) Basic course in site engineering, correlating the design and technical aspects of site development and suitability. Grading, drainage, circulation requirements and alignment, organization concepts relative to landscape resources, site evaluation, utilization and protection, and building and site program analysis and coordination.

L ARC 341 Site Planning (3) Introduction to site planning and landscape design, covering the factors of site suitability related to specific programs and activities; and planning, design, construction, and behavioral studies for selected case study projects. Open to nonmajors.

L ARC 352 History of Landscape Architecture (3) VLPA/i&S Survey of the development of landscape architecture from Mesopotamia to the eighteenth century to the present, with major emphasis on twentieth century.

L ARC 353 History of Modern Landscape Architecture (3) VLPA/i&S Development of profession and art of landscape architecture in the United States, Europe, South America, and Japan in relation to prevailing social, economic, political, and cultural factors. Relationships with other professions, especially architecture and urban planning, and other arts, such as painting and sculpture. Open to nonmajors.

L ARC 361 Theory and Perception of Landscape Architecture (3) VLPA/i&S Reciprocal relationships of man/nature are explored, with particular attention given to the cultural variations and interpretations of esthetics, landscape materials, and human behavior and their effects on site planning and project design. Landscape architecture philosophy related to the physical design problems and potentials of the Pacific Northwest. Open to nonmajors.

L ARC 382 Landscape Design In Urban Contexts (3) VLPA Introductory lecture course relating methods, procedures, and rationale for use of natural processes information in planning and site design. Discussion covering environmental constraints and landscape sensitivity. Open to nonmajors.

L ARC 383 Natural Processes as Planning and Design Determinants (3) NW Introductory lecture course relating methods, procedures, and rationale for use of natural process information-soils, vegetation, hydrology, physiography, wildlife, and geology. The planning/design process covers areas of critical concern, environmental constraints, natural systems, landscape character, and capacity of site to recover from human intervention. Open to nonmajors.

L ARC 401 Urban Recreation Design (6) VLPA/i&S Special studies in metropolitan, urban, and neighborhood recreation areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARC 402 Site Design/Cluster Housing (5) Large-scale site planning and design. Generally related to housing, new communities, and institutional projects. Emphasis on design, policy, and concerns of problems, site costs, factors, design alternatives and implications for architectural direction, policy for land acquisition. Program development to maximize site utilization and preservation of natural attributes.

L ARC 403 Cultural Landscape Studio (6) Studies of the landscape at various scales and in diversified contexts. Offers better understanding of visual components of landscapes, designer's capacity to evaluate and change these components, and resultant interaction with, and effect on, landscape user.

L ARC 405 Individual Design Studio (6) Senior projects in landscape architecture; projects vary according to the student's particular emphasis and needs.

L ARC 411 Landscape Graphics (3) Delineation techniques for landscape perspectives, sections, rendering of plant materials. Historical and contemporary examples of landscape drawing.

L ARC 412 Landscape Communications (2) Multimedia and video production techniques and presentation methods suitable for public hearings, citizen groups, design commissions, and private clients. Individual projects and case-study examples.

L ARC 423 Planting Design Studio (3) Utilization of plants as design elements to manipulate space and modify the landscape for various activities and resolutions of site problems. Factors that determine the appropriate use and arrangement of plant materials in an urban environment. Composition, plant selection, planting techniques, and maintenance requirements are major components of this class. Prerequisites: 322 and BOT 331 or equivalent.

L ARC 424 Advanced Planting Design Seminar (2) Analyzes the complex relationship between plants, men, and environment and affords opportunity to explore methods of utilizing these relationships to plant and design more responsive landscapes.

L ARC 425 Advanced Planting Design Studio (6) Advanced seminar/studio in planting design. Provides opportunity to explore ecological, technical, and aesthetic principles for selecting plants to meet specific site conditions. Project types include historical sites, multifamily housing projects, plazas, landfills, and reclamation sites.

L ARC 433 Large-Scale Site Construction (4) Includes studies of natural determinants and restraints on large-scale construction, development affected by service and utility systems, physiographic suitability of site, cost-benefit analysis, and critical path methodology for site construction projects. Prerequisites: 331, 332, and GEO 313.

L ARC 450 History of Environmental Design in the Pacific Northwest (3) VLPA Development of landscape architecture, architecture, and urban planning in the Pacific Northwest from the nineteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.

L ARC 451 History of Environmental Design on the West Coast (3) VLPA Development of the environmental arts of landscape architecture, architecture, and urban planning from the eighteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.

L ARC 463 Urban Recreational Design (3) VLPA/i&S Special recreational studies in metropolitan, urban, and neighborhood recreation areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARC 470 Landscape Architecture Tutorial (2, max. 6) Various aspects of project organization, production, scheduling of work loads, graphic and verbal communication problems, data collection methods and interpretation, methodologies for landscape planning and design. Prerequisites: fourth- or fifth-year standing and one quarter advance permission of instructors.

L ARC 473 Professional Practice (3) Professional practice in private office, academic institutions, and public agencies. Evolution of landscape architecture as a profession, possible scenarios for future, variety of practice types and their relationships, ethical and legal/contractual responsibilities of a professional.

L ARC 474 Project Design (6) Detailed design studies of small- to medium-scale projects. General focus on particular area of landscape design and exploration of uses of site. Specific focus on design development and professional office presentation. Prerequisite: fifth-year standing in the Bachelor of Landscape Architecture program.

L ARC 476 Professional Operations (3-6) Practicum course for landscape architecture majors for internship and exposure to the profession with working experiences at various levels of professional endeavor. Student apprenticeship in selected private offices and public agencies. Credit/no credit only.

L ARC 477 Landscape Architecture Consultancy Studio (3-6) Simulation of the professional relationship of the landscape architect as a consultant to University students in other design planning and management disciplines. Focus is on site analysis, master planning, schematic designs and detailed design, working drawings, and planting plans associated with student projects. Prerequisite: fourth- or fifth-year standing in the department.

L ARC 495 Landscape Architectural Studies Abroad (1-10, max. 30) Studies conducted under faculty supervision in various locations outside the United States. Prerequisite: permission of instructor.

L ARC 498 Special Projects (1-10, max. 30) Special projects as arranged. Open to nonmajors.

L ARC 499 Undergraduate Research (1-6) Individual or small-group studies pertaining to special problems, theories, or issues of landscape architecture and environmental issues. Prerequisite: approval of a faculty sponsor.

Courses for Graduates Only

L ARC 501 Landscape Design and Planning I (6) Enhances perceptual awareness and design sensitivity to natural and man-made landscapes. Basic skills necessary for more advanced course work required in the Master of Landscape Architecture degree program. Examination of landscape environment through problem-solving techniques that acknowledge holistic approach to the environment.

L ARC 503 Landscape Design of Communities (6) Methods and techniques for developing physical design solutions and implementation strategies in neighborhoods and small communities. Social, economic, political, and individual forces affecting community development and growth. Comparison of several communities, identifying pertinent landscape issues, potential design solutions, and methods for achieving design goals through the political process.
Urban Design and Planning

410 Gould

Urban planning deals with critical issues of human settlement and urban development requiring special knowledge and skills to provide communities with an informed basis for coordinated action. Urban planning and design constitute a professional mode of growing complexity to respond to the urban complexities of the twentieth century. The Department of Urban Design and Planning fosters an integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built environment; the financial, administrative, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas.

Departmental faculty are active participants in the University's Interdisciplinary Committee on Growth Management Studies and advise the State in its land-mark growth management legislation. The Growth Management Planning and Research Clearinghouse, established in 1990, is based in the College. The department also administers the Remote Sensing Applications Laboratory (RSAL), which has as its primary mission the development of applications for information produced by remote sensing technology. This includes aerial photography and newer systems, such as Landsat. The College has the ARC/INFO geographic information systems system, which provides an array of techniques for the research and geographic educational activities in which the department is involved.

Graduate Program

Frank V. Westerlund, Graduate Program Coordinator, M.U.P. Program
Richard L. Morrill, Graduate Program Coordinator, Ph.D. Program

The Department offers two graduate degrees: the Master of Urban Planning (M.U.P.) and the interdisciplinary Doctor of Philosophy (Ph.D.). The M.U.P. is the professional degree, and the Ph.D. is for students planning to enter research and teaching positions in urban planning and design. A concurrent degree program is possible with the J.D. in the School of Law.

The graduate program focuses on the physical environment and its socio-economic and political determinants. Students are encouraged to conduct research and studies in specializations such as urban design dealing with physical form, character, and quality issues; urban real estate development focusing on the public/private context of development processes; public policy, physical development and design, finance, and community development processes; historic preservation; and land-use planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects.

Graduate students may elect to participate in the College-wide certificate programs in urban design and preservation planning and design. See program descriptions in the preceding College section.

Master of Urban Planning Degree

The Master of Urban Planning degree is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms. It is a two-year, or six-quarter program, requiring a minimum of 72 credits.

Requirements for graduate-level study include a satisfactory academic record and undergraduate training in one of a variety of disciplines, including urban planning and environmental design or other appropriate fields, such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or architecture and landscape architecture. Students planning to enter the program should have completed at least one college-level course in each of the following areas: economics, mathematics, statistics, American government, environmental systems, and cultural diversity. Students without sufficient background must take these prerequisite courses concurrently with their graduate studies.

The primary objective is to educate professional planners with a broad range of competence in planning and design; a second objective is to provide opportunities for individual study in selected professional areas. The course required includes 30 credits covering the history and theory of planning and urban design, profiles and resources for planning in the local context, urban form, communication methods, processes and methods of planning, planning law, research methods, and a first-year planning studio. 14 credits of restricted electives are required, including a course in advanced methods and a second studio; both may be in an area of specialization. In addition, a course in land-use planning and in urban development economics is required. A 9 credit thesis or professional project is required upon completion of all other degree coursework. 18 credits of the 72 minimum required for the degree may be in open electives.

The core provides a foundation in urban design and planning for all students. A specialization in one area of planning is encouraged. Four major specialized areas offered in the department include physical land-use planning and growth management, urban real estate development, and urban design and preservation. Other opportunities include transportation planning with Civil Engineering, public policy and management with Public Affairs, environmental resource planning with Forest Resources, and environmental studies and coastal planning with Marine Affairs.

Students are admitted to the M.U.P. program primarily in autumn quarter and all application material should be submitted by the department no later than the preceding February 1. Graduate Record Examination general test scores, three letters of recommendation, transcripts of previous degree programs and any additional academic study, and a statement of purpose are required.

Doctor of Philosophy Degree

Some of the departmental faculty are part of an interdisciplinary faculty group which offers doctoral study in urban design and planning. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of the catalog.

Correspondence and Information

Master of Urban Planning Program Graduate Program Coordinator 410 Gould, JO-40

Faculty

Chairperson

Dennis M. Ryan

Professors

Amoss, Harold L. 1963, (Emeritus); PhD, 1951, University of California (Berkeley).
URBDP 370 Reading the City (3-5) VLPA/I&S Hancock, Moudon Comprehending cities as reflections of individuals and societies. Students trained to read their environment as visible evidence of the city. Addresses interests of travelers as well as students wanting to become active participants in decisions affecting the quality of the urbanized environment. Field trips, readings, lectures, visual learning techniques.

URBDP 399 Future Patterns of Settlement (3) I&S Frerichs A study of future patterns of settlement and their relationship to urban development within a high density area. Examination of the environment from apocalyptic to glorious. Review of landscape evolution. Problems of long-range regional and national planning. Prerequisite: 340 or GEOG 207 or 277 or permission of instructor. Offered: jointly with GEOL 399.

URBDP 407 Urban Planning Studio (5) VLPA/I&S Ryan Synthesis of urban design and planning problems and methods in a laboratory section. Prerequisites: 300 and CAUP 401 or permission of instructor.

URBDP 420 Database Systems and Planning Analysis (3) Bell Applications of relational database management systems in urban planning. Emphasis placed on the practical aspects of database design and implementation. Enrollment limited to 30. Use of a local area microcomputer network and use actual urban databases. Students create and modify databases, enter and update data, create menus, and design databases.

URBDP 446 Practical Experience (4, max. 8) Ryan Off-campus internship under academic supervision in situations useful to the education of planners, such as public/private planning and design offices, projects related to cultural, racial, religious, and decision making. Assistance in identifying appropriate projects. Prerequisite: permission of instructor.

URBDP 451 Housing (3) I&S Ludwig Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 300 or permission of instructor.

URBDP 452 Urban Development and Spatial Structure (3) I&S Miller Physical and functional structure of urban areas, with major focus on locational decision making in households, firms, and other organizations, and space demands of these urban activities. Selected land-use models illustrating use of this theoretical understanding for forecasting competition, land-use conflicts, and the land-conversion process.

URBDP 460 History of City Development (3) VLPA/I&S Dubrow, Hancock Analysis of city forms and designs, emphasizing their relation to the culture of each period.

URBDP 461 History of Urban Planning in the United States (3) I&S Hancock Seminar in origins, development, and significance of the American planning movement and the profession that emerged from it, as defined by some of its seminal innovators, theories, practices, and achievements, and as evaluated by cultural realities thereby served.

URBDP 465 Land Use (3) I&S Westerland Substantive presentation of land use as a focus for planning issues. Development of problems: consideration of analysis, programming, and implementation methods. Seminar and group project sections.

URBDP 466 Infrastructure and Community Facilities (3) I&S Westerland Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste and transportation. Covers their relationships to comprehensive plans, project permitting and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

URBDP 468 Land Use From Satellite Data (3) Westerland Digital data from Landsat and other sources used to determine land-use and land-cover classification in urban and rural areas. Hands-on exercises on computers. Photo interpretation, statistics, land-use classification, and verification are incorporated. Prerequisite: 465, 467, or permission of instructor.

URBDP 470 Introduction to Urban Design (3) VLPA/I&S Kasprisin, Ryan Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning.

URBDP 471 History of Urban Design (3) VLPA/I&S Streftield Aspects of form, pattern, and space that mark efforts of individuals and groups to express their values and goals in the design of their cities. Special attention given to both historical and modern examples.

URBDP 479 The Urban Form (3) VLPA Moudon, Nyberg Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

URBDP 488 Special Topics (1-9, max. 15) Systematic study of specialized subject matter. Topics for each quarter vary, depending upon current interest and need, and are announced in the preceding quarter. Prerequisite: permission of instructor.

URBDP 499 Special Projects (1-12) Independent research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty advisor most appropriate for the project proposed. A report and results of the study is required. Prerequisites: senior standing and permission of supervising instructor.

URBDP 501 Resources for Urban Planning (2) Introduction to areas of specialized study in environmental planning and policy programming. Organization for planning in the Seattle region; range of activities and emphases, established and changing roles. Required of new graduate students.

URBDP 507 General Urban Planning Laboratory (5) Laboratory exercise in applied professional planning, utilizing a local study area to examine the realities of problem solving in situations of functional and normative conflict. Integration of analysis, programming, implementation, and presentation phases of the planning process.

URBDP 508 Specialized Planning Laboratory (5, max. 10) Several options are offered each year, such as regional-environmental planning, housing, metropolitan planning, and urban design. Prerequisites: 500 and 501. Additional prerequisite for some sections: urban planning seminar or lecture courses.

URBDP 510 Theories and Methodologies of Planning I (4) Survey of the philosophy, methods, and analytical techniques used in planning public actions and policies, with emphasis on the logic and assumptions upon which these are based. Various planning surveys and methods. Open to graduate students in urban design and planning and to graduate students seeking the urban design certificate. Prerequisite: 500.

URBDP 511 Theories and Methodologies of Planning II (4)

URBDP 512 Research Seminar (2) Dubrow, Hancock Development and presentation of advanced topics of individual investigation.

URBDP 520 Quantitative Methods in Urban Design and Planning (4) Bell Methods of statistical and mathematical analysis in design and planning. Emphasizes the use of computer packages for analyzing urban data. Regression, matrix methods, cohort-survival population methods, and example solved on microcomputers. Prerequisite: college mathematics and basic course in probability and statistics.

URBDP 525 Evaluation in Urban Planning (3) Miller Methods and techniques for a priori assessment of physical improvement plans, program designs, public policies. Includes cost effectiveness and matrix or goal achievement, as well as more conventional cost-benefit and cost-effectiveness analysis of design. Emphasis on understanding the reasoning and issues in evaluation, and gaining a working competence in at least one of the methods treated.

URBDP 529 Urban Region Geocoding and Land-Based Information Systems (3) Bell, Westerlund Multipurpose geocoding system, automated map overlay systems, and cadastral file information use. Applications to land surveying, urban and transportation planning and, geographic analysis. Offered jointly with CETS/GEOS 529.

URBDP 530 Land-Use/Transportation Models (3) Schneider Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land-use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered jointly with CETS 570.

URBDP 537 Open Space Land Uses (3) Westerland Exploration of public and private values of open space; its aesthetic, environmental, recreational, natural resource uses from development sites to metropolitan regions. Methods of open space inventory, analysis; legal and administrative tools for preserving; managing open space; development of multipurpose open space programs in local governments. Prerequisites: 500 and 510.

URBDP 548 Practicum (4, max. 6) Off-campus experience under academic supervision in situations useful to the education of planners, such as planning offices, public bureaucracies, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects.

URBDP 547 Professional Project (1-6) Independent development of client oriented project involving application of professional planning/design methods and approaches. Professional-quality report relates project to larger professional context, addresses alternative approaches/methods and includes an evaluation of the project. Master of Urban Planning students only, taken in lieu of 700. Not recommended for those continuing into Ph.D. program. Credit/no credit only. Prerequisite: permission of instructor.

URBDP 552 Urban Development and the Real Estate Market (3) Topical survey of urban development. Provides substantive information, methodology, theory, and base for additional courses and seminars in area. Includes urban economy and determinants of land use, capital investment, in urban development, land tenure, urban functions and public sector, urban development policy and strategy. Prerequisite: permission of instructor.

URBDP 553 Urban Real Estate Finance and Investment (3) Develops principles for evaluating opportunities to invest in urban real estate, discusses the question of determining the cost of capital for such investments, investigates some problems in the application of an appropriate investment criterion to specific types of opportunities, and explores some aspects of the urban renewal problem. Prerequisite: 552 or permission of instructor.

URBDP 570 Urban Design Process (3) Kasprisin The study of concepts, methods, and processes basic to planning, design, and effectuation. Credit/no credit only. Prerequisites: specialization in urban design or permission of instructor.

URBDP 571 Research and Analytical Methods for Urban Design (3) Moudon Conceptual framework for an epistemology of urban design and physical planning. Review of relevant research in related fields and disciplines. Prerequisite: specialization in urban design or permission of instructor.

URBDP 572 Case Studies in Urban Design and Development (3) Wide range of urban design and development projects recently completed. Effective urban design implementation, including design process, decision making, administration, management. Tools and techniques such as design analysis, policy making, regulation, design review, taxation, financing. Prerequisites: 510 and 580 and/or permission of instructor.

URBDP 574 Residential Design: Methods and Practices (3) Moudon Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods and practices. Offered jointly with ARCH 593.

URBDP 575 Implementation in Preservation Planning and Urban Design (3) Analysis of recent case studies in implementation of preservation planning and urban design in terms of planning and design products and related processes, decision making, administration, management. Tools and techniques include design analysis, policy-making, regulation, design review, taxation, financing, public participation. Prerequisite: introductory course in preservation or urban design.

URBDP 580 Legal and Administrative Framework for Planning (4) Political, legal, and administrative institutions closely related to the planning process. Issues of devolution of authority and public representation and participation. Legal basis for planning and associated regulation.

URBDP 591-592-593 Doctoral Seminar I, II, III (4-4-4) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: masters degree or equivalent in a planning discipline.

URBDP 598 Special Topics (1-6, max. 15) Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

Morgan Thomas—Social Sciences
Gary Christian—Natural Sciences

The departments and schools of the College of Arts and Sciences offer nearly one hundred curricula leading to the degree of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science, as well as graduate study leading to master's and doctoral degrees.

Undergraduate Study

Graduation Requirements
To be awarded a baccalaureate degree, a student in the College must fulfill requirements in the following areas: Language Skills, Reasoning and Writing in Context, Areas of Knowledge, and a Major. All required courses must be taken for a numerical grade. In addition, the student must present at least 90 credits outside the major department and must meet minimum GPA requirements as specified below. Detailed information on graduation requirements is provided in the Bachelor's Degree Planbook, available from the Undergraduate Advising Center, 9 Communications.

Language Skills
To receive a degree from the College of Arts and Sciences, students entering any college or university autumn quarter 1985, or thereafter, are required to satisfy language skills standards in English composition and foreign language. English composition may be satisfied by successful completion of college courses. The foreign-language requirement may be satisfied by successful completion of college courses or proficiency examinations.

Reasoning and Writing in Context
Students who first entered college autumn quarter 1985, or thereafter, must complete a minimum of 5 credits in Quantitative and Symbolic Reasoning (Q/SR) and 10 credits of courses that emphasize the development of writing skills in the context of an academic discipline. Q/SR and writing courses, if they apply, may also count toward Areas of Knowledge or major requirements. The writing requirement is in addition to the English composition requirement mentioned in the preceding paragraph.

Areas of Knowledge
The Areas-of-Knowledge requirement is the means by which the College seeks to develop a student's breadth of knowledge. Undergraduate courses are currently divided into three large fields of knowledge: Visual, Literary, & Performing Arts; Individual & Societies; and the Natural World. Each student must select at least 20 credits in courses from each of the three fields and an additional 15 credits from any courses in the three fields. Of the 75 total credits required, 15 may be from courses in the major department. As an alternative, a student may fulfill 10 credits of this requirement by taking sequences in the College Studies Program (see below).

College Studies Program
Students may fulfill all or part of the general education requirement by selecting sequences from the College Studies Program. For a description of options available, see the Undergraduate Study section of this catalog.

Major
In fulfilling the requirements for a major, the student engages in thorough study of a discipline or subject, aimed at developing knowledge in depth. This part of the student's program is determined by the department, school, or faculty committee with which the major study is associated. Requirement is in addition to the Program requires the following: 75 college credits, normally to include Arts and Sciences language skills requirements (English composition, one year of a single foreign language), the reasoning-in-context requirement (quantitative and symbolic reasoning), and a substantial portion of the writing-in-context and general education requirements. Students who have only a few remaining prerequisite courses to complete may, under certain circumstances, be admitted as premajors. Admission requirements for departmental majors in the Evening Degree Program—anthropology, communications (only the media studies option is offered), English, history, political science, psychology, sociology—are identical to requirements for the day programs, shown under departmental listings, below.

Minor
Completion of a minor, available through many departments, is optional. Requirements are shown under individual department undergraduate programs, below, or in a minors handbook available in the Undergraduate Advising Center, 9 Communications.

Credits Required Outside Major Department
So that the student will not be tempted to specialize prematurely, the College limits to 90 the number of credits from a single department that the student may elect to count in the 180 credits required for the baccalaureate degree. A department itself may require no more than 70 credits from courses within the department, and no more than 90 credits from within the department and related fields combined, as constituting its major program for the baccalaureate degree. Exceptions to these restrictions may be granted by the Dean under very unusual circumstances.

GPA Required for Graduation
To be eligible to receive the baccalaureate degree, the student must achieve at least a 2.00 cumulative GPA in the major (some departments prescribe a higher minimum GPA for the major), as well as a 2.00 cumulative GPA for all work done in residence at the University.

Applying for Graduation
Students should apply for the baccalaureate degree no later than the first quarter of their final year. Students who apply by announced quarterly deadlines will receive Graduating Senior Registration Priority (GSP), allowing them to register first for the following quarter. Students who apply by announced quarterly deadlines will receive Graduating Senior Registration Priority (GSP), allowing them to register first for the following quarter. All students may graduate under the College requirements published in this catalog. Students may use the department requirements in effect at the time they are admitted to the major, if they graduate within 10 years of that time. Otherwise, the department may insist on more recent requirements. Students wishing to fulfill a previous set of requirements should see an adviser for details and options. All responsibility for fulfilling graduation, requirements rests with the student concerned.

Limits on Physical Education and ROTC Courses Allowed Toward Graduation
A student graduating from the College of Arts and Sciences may count a maximum of three credits of 100-level physical education courses taken at the University of Washington, or their equivalents at other collegiate institutions, as elective credits toward graduation. At present, physical education courses are not offered at the University. Up to 18 credits in upper-division ROTC courses also may be counted as elective credits toward graduation, but no lower-division ROTC credits may be counted.

Evening Degree Program
Students may earn a degree with a major in anthropology, communications, English, history, humanities, political science, psychology, social sciences, or sociology through the Evening Degree Program. Admission to the Program requires the following: 75 college credits, normally to include Arts and Sciences language skills requirements (English composition, one year of a single foreign language), the reasoning-in-context requirement (quantitative and symbolic reasoning), and a substantial portion of the writing-in-context and general education requirements. Students who have only a few remaining prerequisite courses to complete may, under certain circumstances, be admitted as premajors. Admission requirements for departmental majors in the Evening Degree Program—anthropology, communications (only the media studies option is offered), English, history, political science, psychology, sociology—are identical to requirements for the day programs, shown under departmental listings, below.

Major Requirements: Humanities and Social Sciences
Minimum 2.00 GPA for all courses taken in residence at the University of Washington and minimum 2.25 GPA for courses taken to satisfy the major requirements.

Humanities—60 credits as follows: at least 30 credits from one of the following three tracks: communication and critical thinking; literature and culture; ideas and beliefs in social history; 5 credits senior seminar; remaining credits from courses outside the principal track.

Social Sciences—60 credits as follows: 15 credits of social science survey courses (e.g., ANTH 202, SOC 271, POL S 202); 25 credits from one of the following four tracks: social and ethical theory; law, politics, and the state; culture and identity; economy and ecology; 15 credits track electives (selected from courses outside the principal track); 5 credits senior seminar.

Major requirements are to include at least 40 credits in 300- and 400-level courses. For course lists, consult the Evening Degree Program adviser (housed in UW Extension, 6501 22nd Avenue N.E.) or the Undergraduate Advising Center (9 Communications).

Major Requirements: Departmental Options
Requirements are the same as for day-school majors and are shown below in the undergraduate program section for each department.

Graduate Study
Students who intend to work toward advanced degrees must apply for admission to the Graduate School and must meet the general requirements outlined in the Graduate School section of this catalog, as well as the requirements established by the graduate faculty in the department or unit offering the degree program. Graduate students must satisfy the requirements for an advanced degree that are in force at the time the degree is to be awarded.

Afro-American Studies
See American Ethnic Studies.
American Ethnic Studies

The primary focus of the American Ethnic Studies major is to expose students to key content, methodologies, and theories in the comparative and interdisciplinary study of African Americans, Asian American, and Chicano in the United States. The department also prepares students for entry into graduate and professional schools.

The core courses require students to explore various methodologies and core concepts within both the social sciences and humanities. The advanced core courses provide a capstone experience for students in their final year, during which students articulate, demonstrate their facility with, and evaluate the content of their major experience.

Requirements within the department cross disciplines and divisions provide students with the opportunity to develop a general knowledge of the field of American ethnic studies. The focus areas afford students the opportunity to demonstrate mastery in a specialized discipline and cultural area within American ethnic studies. The major requires the completion of 55 credits.

Faculty

Chairperson
John C. Walter

Professors
Bereano, Philip L. * 1975, Adjunct; JD, 1965, Columbia University; technology assessment, alternative technology, public policy and social values regarding technology.
Butler, Johnellia E. * 1987; EdD, 1979, University of Massachusetts; Afro-American literature, multicultural education.
Gil, Carlos B. * 1974; PhD, 1975, University of California (Los Angeles); Latin America and the history of the Chicano people.
Scott, Joseph W. * 1985; PhD, 1963, Indiana University; political sociology, family sociology, race/ethnic relations.
Waier, John C. * 1989; PhD, 1972, University of Maine; African American history, American women’s history, the New Deal.

Associate Professors
Crutchfield, Robert D. * 1979, Adjunct; PhD, 1980, Vanderbilt University; deviance, criminology, social control, stratification.
Kashima, Tetsuden * 1976; PhD, 1975, University of California (San Diego); sociology.
Selas, Elizabeth 1987; PhD, 1987, University of California (Los Angeles); Uhied States women’s history, Chicana history.
Wong, Shawn H. * 1984; MA, 1974, San Francisco State University; creative writing, Chinese-American area studies.
Yee, Shirley J. * 1988, Adjunct; PhD, 1987, Ohio State University; U.S. women’s history, African-American history, nineteenth-century U.S. social history.

Assistant Professors
Friaz, Guadalupe M. 1989; PhD, 1989, University of California (Berkeley); economics, labor management.
Revilla, Linda 1989; PhD, 1989, University of California (Los Angeles); developmental psychology.
Tien, Liang 1988; PsyD, 1985, University of Denver; clinical psychology.

Lecturer
Maulana, Seyed M. 1984; MUP, 1988, University of Washington; urban planning, Swahili.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

American Ethnic Studies

AES 150 Introductory History of American Ethnic Groups (5) &S 151 Race and Gender: Historical Perspectives (5) &S 270 The intersection of race and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, sexism, activism, sexuality, and interracial dynamics between women of color groups. Offered: joint with WOMEN 230.

AES 322 Race and Gender: Historical Perspectives (5) &S 323 Minorities In the Military (5) &S 324 Race and Gender: Historical Perspectives (5) &S The experiences of racial minorities in the military examine topics including: segregation of units, desegregation of military, career limitations and opportunities, minority women, military families, racism and role of veterans in civil rights struggles after service.

AES 350 Ethnic Minority Group Life in America (5) &S Examines the sociological characteristics of ethnic minority group life in America. Covers American ethnic minorities, such as Japanese, Chinese, Filipino, Pacific Islander, Black Americans, Mexican Americans, and Native Americans. Offered: jointly with WOMEN 320.

AES 360 Political Economy of Race in the United States (5) &S 361 Ethnicity, Business, Unions, and Society (5) &S Scott, interrelationships of ethnicity, business, unions, and the larger society. Examines how the business and management sector is structured financially and sociologically, how this sector performs, and the consequences of these performances for selected ethnic groups in the United States. Prerequisites: introductory course in ethnic studies and either economics or sociology.

AES 362 Intellectual Foundations of Ethnic Studies (5) &S Seeks to define the essence of a "discipline" and to locate ethnic studies on the spectrum of disciplines.

AES 364 American Ethnicity in the Twenty-first Century (5) &S Through analysis of past and present literature and trends, examines the potential for extinction and/or preservation of ethnicity and ethnic American culture in twenty-first century America.

AES 401 Junior Seminar: Introduction to Research Techniques (5) &S, QSR Survey of research techniques current in the fields of sociology, political science, history, law, and in linguistic approaches to social knowledge. Prepares majors to write senior thesis. Prerequisites: 250, 251, and 362 which may be taken concurrently.

AES 491 Comparative Ethnic Race Relations in the Americas (5) &S Sketches the ethnoracial systems operating in American society. Studies these systems as systems, and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with SOC 462.

AES 492 Comparative Race and Ethnic Relations (5) &S Scott, Race and ethnicity are examined as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: AES/SOC 302. Offered: jointly with SOC 462.

AES 494 Community Practicum and Internship (3-5, max. 10) Faculty supervised practicum and internships in agencies, e.g., ethnic specific agencies, government and civic community-based offices. Students contribute skills and knowledge to respective communities and gain experience by working with professionals and community organizers. Credit/no credit only. Recommended: AES major with junior or senior standing.

AES 495 Senior Seminar: Senior Thesis (5) &S Focuses on the individual research topics of senior American Ethnic Studies majors. All students focus on a central comparative theme.

AES 496 Special Topics in American Ethnic Studies (1-5, max. 15) &S Designed to provide the student an opportunity to concentrate on one specific aspect of American Ethnic Studies, through a comparative, interdisciplinary approach.

AES 498 Independent Study or Research (1-5, max. 10) Independent readings and/or research under the supervision of a faculty member. Open to qualified students by permission of instructor.

American Ethnic Studies

AFRAM 150 Afro-American History (5) &S Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Basic introductory course for sequence of lecture courses and seminars in Afro-American history. Offered: jointly with HSTA 150.
AFRAM 200  Proseminar in Afro-American Studies  (5) I&S Interdisciplinary survey of Afro-American Studies, presenting the unique Black perspective on the relevant disciplines in arts and sciences.

AFRAM 202  Introduction to Black Studies  (5) I&S History, culture, religion, institutions, politics, economics, arts, and psychology of peoples of African descent as developed from experience in both the old and new worlds. Multidisciplinary analysis of social life from a Black perspective as illustrated in selected historical and contemporary writings. Not open for credit to students who have taken 100.

AFRAM 210  Resources in Afro-American Research  (3) I&S Compilation of annotated subject bibliography of Afro-American Studies topics, with emphasis on secondary sources, general reference sources, and social sciences. Not open for credit to students who have taken 230.

AFRAM 212  Creative Expression for African-American Children  (5) VLPA/AS Five new and developing theories and practices of creative expression for African-American children. Students demonstrate techniques and practices learned. Not open for credit to students who have taken 290.

AFRAM 214  Survey of Afro-American Literature  (5) VLPA A chronological survey of African-American literature in all genres from its beginnings to the present day. Emphasizes African-American writing as a literary art; the cultural and historical context of African-American literary expression and the aesthetic criteria of African-American literature. Offered: jointly with ENGL 258.

AFRAM 250  The Afro-American and the United States Supreme Court  (5) L&S Laws passed by Congress, and the Constitution as interpreted by the Supreme Court, dealing with the conditions of Afro-Americans in the United States.

AFRAM 260  Black Male/Female and Family Relationships  (5) I&S The Black family in the United States as a social institution. Effects of residential and race-conscious society on interpersonal relationships between Black men and women. Exploration of proposals for strengthening the Black family in the United States.

AFRAM 261  The African American Experience Through Literature  (5) VLPA/AS Scott Instructs students in hermeneutical and sociological methods of analyses. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personhood. Offered: jointly with SOC 260.

AFRAM 270  The Jazz Age  (5) I&S Worter Intersubjectively, study of the period after World War I to the Great Crash. Afro-American and Anglo-American currents and impulses that flowed together in the Roaring Twenties. Covers politics of normacy, economics of margin, literature of indulgence and confusion, transformation of race relations, and cultural influence of jazz.

AFRAM 272  History of the South Since the Civil War  (5) I&S Worter Reconstruction and its aftermath, the Agrarian (Populist) revolt, disfranchisement and segregation, the effects of urbanization and subqua- horseman's-labor revolution, and the struggle for civil rights. Examines the New South, the conflict of ideology with structural and material change, and the place of the South in contemporary America.

AFRAM 309  Intensive Basic Swahili  (15) Maulana First-year Kiswahili language. Introduces students to Kiswahili and allows them to explore and understand not only the language but also the diverse cultures and traditions of the people of East Africa. Provides a basic foundation in speaking, reading, and writing. Primary emphasis on basic structure of Kiswahili and its operation.

AFRAM 320  Black Women In Drama  (5) VLPA Character types of Black women as represented in plays by Black women. Some Black male playwrights are juxtaposed with Black female writers for comparative analysis. Playwrights include Georgia Douglas Johnson, Angelina Grimke, Alice Childress, Lorraine Hansberry, Ira Aldridge, LeRoi Jones. Prerequisites: 200, 212 or permission of instructor.

AFRAM 321  History of Afro-American Women and Their Families  (3-5) I&S From early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Offered: jointly with WOMEN 321.

AFRAM 340  The Harlem Renaissance: A Literary Study  (5) VLPA Worter Harlem Renaissance—1912 through mid-1930's—as establishing a role for twentieth-century African American writer, encompassing literature, politics, and decolonization of the image of Africa, and solidifying integrationist and nationalistic schools of thought. Examines images, themes, and characterizations in creating a literary aesthetic simultaneously American and African American.

AFRAM 370  Afro-American Political Thought  (5) I&S Worter Political ideologies and philosophies of pivotal Afro-American historical figures and the conditions under which these ideologies are developed, rejected, and transformed. How ideologies relate to solution of Afro-American political problems. Prerequisites: SOC 362, PHIL 110, or permission of instructor.

AFRAM 401, 402, 403  Intermediate Swahili  (5,5,5) VLPA Focus on the cultural aspects of the language. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisites: 308 or equivalent for 401; 401 for 402; 402 for 403.

AFRAM 437  Blacks in American Law  (5) I&S Worter Historical continuity for changing relationship between American jurisprudence and Black Americans. 1600-1986. Statutory and case law which determined role of Blacks in American society, and use of law by Blacks to gain civil and personal rights. Prerequisites: 271, 334, or upper level HSTAA. Recommended: junior, senior, or appropriate graduate standing.

AFRAM 440  Community Practica  (3-5, max. 15) Internship in various Seattle community service agencies, e.g., CAMP, Planned Parenthood. Students contribute their newly acquired skills and knowledge to the Afro-American community. Experience in working with specific community organizations. Not open for credit to students who have taken 301. Recommended: junior or senior standing.

AFRAM 460  Contemporary Issues in Afro-American Studies  (5) I&S Five issues selected for their contemporary importance in Afro-American studies. Synthesis of different perspectives and approaches to the study of the Black experience. Prerequisites: senior standing and 201 or completion of Afro-American Studies core courses.

AFRAM 490  Research in the Black Community  (1-5, max. 10) Identification and investigation of the problems and needs of the Black community. Methods and alternatives of approaching these problems and needs. Students designate their areas of interest and subsequently pursue research and problem solving. Prerequisite: permission of instructor.

AFRAM 492  Special Topics in Afro-American Studies  (3-5, max. 15) Topics in which students and faculty have developed an interest as a result of work done or as a result of the need to investigate in greater depth Afro-American Studies issues. Topics vary. Prerequisite: 200 or permission of instructor.

Asian American Studies

AAS 205  Asian American Cultures  (5) I&S Revilla, Wong Asian American subcultures; evolution of Asian American cultures in the United States from 1850 to 1950—immigration patterns, evolution of subcultures, evacuation, interracial relations, assimilation, and signs of social disorganization.

AAS 206  Contemporary Problems of Asian Americans  (5) I&S Worter, Asian American identity issues from 1970 to the present. Topics include ghetto communities, civil rights, identity problems and ethnicity, social organizations, political movements, and recent immigration.

AAS 210  Asian American Identity  (5) I&S Revilla, Wong Recent Asian American identity issues from 1970 to the present. Topics include ghetto communities, civil rights, identity problems and ethnicity, social organizations, political movements, and recent immigration.

AAS 305  Asian American Cultures for Teachers  (5) Worter, Asian American subcultures and culture; evolution of Asian American cultures in the United States from 1850 to 1950—immigration patterns, evolution of subcultures, evacuation, interracial relations, assimilation, and signs of social disorganization.

AAS 306  Asian American Political Thought  (5) I&S Worter Political ideologies and philosophies of pivotal Asian American historical figures and the conditions under which these ideologies are developed, rejected, and transformed. How ideologies relate to solution of Asian American political problems. Prerequisites: SOC 362, PHIL 110, or permission of instructor.
learn more about the history, culture, and current concerns of Asians in the United States. Implications for elementary and secondary school are considered. Not open to students who have taken 205. Prerequisite: permission of instructor.

AAS 355 Chinese American History and Culture (5) I&S Wong Experience of the Chinese in America from 1850 to the present. Transformation from an immigrant to Chinese American community; immigration patterns, anti-Chinese movements, ethnic sociopolitical and economic institutions, community issues, Chinese American culture. Prerequisite: 205 or equivalent or permission of instructor.

AAS 360 Filipino American History and Culture (5) I&S Revilla History and culture of the Filipino in America and the influence of an admixture of Filipino, Spanish, and American traditions on the Filipino immigrant and his or her descendants. Prerequisite: 205 or equivalent or permission of instructor.

AAS 370 Japanese American History and Culture (5) I&S Historical roots and subsequent changes in the Japanese American group examined through an interdisciplinary approach. Topics include historical events, cultural, social, and community structures, institutions, occupations, and future orientations. Prerequisite: 205 or equivalent or permission of instructor.

AAS 372 Internment Camps in North America: United States and Canada (5) I&S Comparative study of United States and Canadian internment camps incorporating Japanese Americans and Japanese Canadians during World War II. Focuses on early history, dislocation and internment, effects (disorganization and adjustments), effects on the internees and society, and present situation.

AAS 375 The United States Supreme Court and Asian American (5) Covers relevant decisions of the United States Supreme Court related to Asian Americans, examines the effects of those decisions on that ethnic group. Includes evolving notions of equal protection, due process and relevant statutes such as the 1954 Civil Rights Act. Prerequisites: 205, 206, 370.

AAS 380 Asian American Communities and Social Policies (5) History, culture, social organization, leadership patterns and interethnic relations of Asian American (Chinese, Filipino, Japanese, and Korean) communities. Origins and impact of social policies relevant to Asian American communities. Not open for credit to students who have taken 300. Prerequisite: 205 or equivalent or permission of instructor.

AAS 385 Asian Americans: The Law and Immigration (5) I&S Traces the evolution of United States immigration law and policy from the nineteenth century to modern day, from free immigration to immigration restriction, through the elimination of race as a criterion, and culmination in the passage of the Simpson-Mazzoli bill. Prerequisites: 205, 206.

AAS 390 Asian American Family and Personality (5) I&S Tien Examines the changes of Asian American family patterns through successive generations from the late 1800s to the present. The influence of Asian culture, Asian American experience, family patterns, and racial discrimination examined to understand their impact on the personality of Asian Americans. Prerequisites: 205 or 206.

AAS 392 Asian American Women (5) I&S Tien History of and contemporary issues related to Asian American women in the United States. Prerequisite: 205 or 206. Offered jointly with WOMEN 392.

AAS 401 Asian American Literature to the 1940s (5) VLP A Wong Asian American literature from nineteenth-century immigrants to the 1940s. Emphasis on Chinese, Japanese, and Filipino writings detailing the experience and sensibility of first generation immigrants. Early twentieth-century writing focuses on the development not only of Asian American community, but also of second generation American-born Asian American writers. Not open for credit to students who have taken 400.

AAS 402 Contemporary Asian American Literature (5) VLP A Wong Asian American literature from the 1940s to the present. Emphasis on the development of attitudes and identity in contemporary Asian American literature, the role of the writer in a minority culture, and the relationship of literature to self and society. Recommended: 401. Not open for credit to students who have taken 400.

AAS 403 Survey of Asian American Poetry (5) VLP A Survey of major Asian American poetry, nineteenth century to present. Readings include poetry of the early immigrant to America, cultural assimilations transferred from old world to new world, and establishment of an Asian American identity in poetry from 1870's through 1980's. Prerequisites: ENGL 110-115, or one of ENGL 111, 121, 131.

AAS 443 Undergraduate Field Experience (3-5, max. 15) Faculty-supervised practicum experience in a variety of community settings and agencies dealing with Asian Americans. Prerequisites: 205 or 206, or equivalent, and permission of instructor.

AAS 498 Asian American Studies-Special Topics (5, max. 10) Prerequisite: 205 or permission of instructor.

AAS 499 Undergraduate Independent Study (1-5) Prerequisites: 205 or permission of instructor.

CHSTU 200 Latinos in the United States (5) I&S Gambao, Salas Historical, social, and economic experience of Latinos in the United States. Major themes include race, class, and gender identity. Analyzes rapid growth of old and newly established Latino communities, based on emigration from Latin America.

CHSTU 201 Introduction to Chicano Studies (5) I&S Fraz, Gambao, Salas Selected themes in Chicano experience; studies in Chicano politics and Chicano socioeconomic concerns. Not open to students who have taken CHSTU 102.

CHSTU 202 Intermediate Chicano Studies (3) I&S Gambao Follows 201. Further understanding of selected themes in Chicano experience; studies in Chicano politics and Chicano socioeconomic concerns.

CHSTU 207 Chicano Consumer: Past and Present (3) I&S coordinates Chicano economic history with contemporary economic problems of Chicanos, emphasizing social, psychological, and financial aspects that deprive the Chicanos of their economic freedom.

CHSTU 211 Beginning Mexican Folk Dance (3) VLP A Fundamental technique course to increase appreciation and awareness of Mexican people and their culture through acquaintance with folk customs, historical background, origin, and newly established Mexican American dance forms. Regions include Oaxaca, Michoacan, Norte, and Jalisco. Open for credit to students who have taken CHSTU 110.

CHSTU 212 Beginning/Intermediate Mexican Dance (3) VLP A Regional Mexican folk dancing: dancing from boys to men, and on the regions of Oaxaca, Michoacan, Norte, and Jalisco. Not open for credit to students who have taken CHSTU 210.

CHSTU 224 History of Chicano in Washington State (5) I&S Gamboa History, extent, and results of the Chicano presence from earliest Spanish exploration to the present; contemporary problems of Chicanos in a broader national context. Not open for credit to students who have taken CHSTU 204.

CHSTU 255 Mexican Women: Past and Present (5) I&S M. A. Salas Survey of women in Mexican society from Meso-American times to the 1940s.

CHSTU 256 Chicanas: Gender and Race Issues (5) I&S Salas Contemporary issues in the Chicana movement since the 1940s. Issues range from feminism and Chicana political, educational, and social organizations, to work, family, health, and the arts.

CHSTU 300 Introduction to Chicano Politics (5) I&S Olguin Surveys the political agitation and activities of Mexican-American peoples in the United States from two perspectives: (1) Chicanos as objects of the political process of United States life, (2) contributions of the Chicano people to United States politics.

CHSTU 310 Intermediate Mexican Folk Dance (3) VLP A Expands the knowledge of Mexican folklore through research, dance, and music, enables students to create folk dance through the development of their own choreography. Prerequisite: 211 or 212 or equivalent.

CHSTU 330 Chicanas: Political History and Struggle (3) I&S Olguin Explores the issues of Chicano, or Mexican-American, identity and its development through the history of Chicanas and Chicanos, studied in order to understand the relationship between individual and society in creating identity.

CHSTU 352 Mexican Immigration: A Comparative Analysis (5) I&S Gambao, Salas Examines and compares constant Mexican immigration with that of other immigrants to the United States as one of the most important issues confronting Chicanos and other Americans in the United States.

CHSTU 354 Latinos in the United States Labor Market (5) I&S Role of Mexican American, Puerto Rican, Cuban American, Central and South American wage earners in United States labor market. Institutional approach to study of markets. Analyzes effects of educational system, market discrimination, labor unions on economic outcomes for Latino men and women. Prerequisite: 201, 202, 206, or AES 350.

CHSTU 355 The Chucano Family (5) I&S Salas The historical, psycho-social, and socio-cultural role of the Chucano family from Meso-American times to the present.

CHSTU 391 Independent Study (1-6, max. 10) Fraz, Gambao, Olguin, Salas Students work individually or in teams. Prerequisite: permission of instructor.

CHSTU 405 Advanced Chicano Studies (3) I&S Gambao Culture and related to current values and health practices, Mexican labor and immigration in both historical and contemporary setting. Chicanos politics 1848 to present. Recurrent problems of Chicanos in society; social movement for acceptance and for self-determination. Not open for credit to students who have taken 305.

CHSTU 464 Chicanas Expressive Culture (5) VLP A/ I&S Salas Expressive culture of Mexican women in United States. Cultural and artistic practices in home, film, literary (print, oral), performing and visual arts. Focused on ways Chicanas and Chicana re-visit tradition. Prerequisites: 303, 322, one additional 300-level course beyond 303, or permission of instructor. Offered jointly with SPAN/WOMEN 464.

CHSTU 491 Special Topics in Chicano Studies (3-5, max. 10) I&S Fraz, Gambao, Olguin, Salas Interdisciplinary course concentrating on one or more aspects of the Chicano experience.

CHSTU 494 Community Practicum and Internship (3-5, max. 10) Faculty-supervised practicum and internship experience in variety of settings and agencies, e.g., ethnic specific agencies, Higher Education Coordinating Board, government and civic community based offices. Students contribute newly acquired
American Indian Studies

CS14 Padelford

The American Indian Studies Center, affiliated with the Department of Anthropology, offers courses focusing on American Indian cultures, perspectives, and problems, with the goal of enriching the liberal education of the general student. The curriculum offers courses in the humanities and social sciences. A diversity of courses surveys Indian cultural developments in art, music, language, and literature and offers performance and studio experience. Other courses explore the historical and contemporary interaction of Indians in American society and the application of social science theories to Indian societies and institutions. Since American Indians have been such an integral part of the historical, cultural, and legal development of this country, these courses provide students with an opportunity to broaden their understanding of their ethnic origins.

Major Requirements: A major emphasizing American Indian Studies is available through the Department of Anthropology. All AIS courses except AIS 102 may count toward the major. No more than 6 credits of any combination of AIS 253 and AIS 350 may be counted toward the major.

Minor

Minor Requirements: Minimum 25 credits to include 10 credits of introductory course work in American Indian studies; 9-15 credits of course work on Native American ethnology, archaeology, history, or governmental relations; and 6-10 credits of course work in art, art history, music, or literature. See advisor for approved course options.

Stein, Julie K. * 1980; PhD, 1980, University of Minnesota; New World archaeology, Northwest coast archeology, geoarchaeology, shell middens.

White, Richard * 1990; PhD, 1975, University of Washington; American West, American Indian, environmental history.

Associate Professors
Findlay, John M. * 1987; PhD, 1982, University of California (Berkeley); history of the American West.

Assistant Professors
Bending, Raymond L. 1987; PhD, 1992, University of Washington; American Indian child welfare practice and policy, social work in American Indian communities.

Koepke, John A. 1987; MLA, 1990, University of Washington; project design, graphic communication, Native American values and resource management.

Wright, Robin K. * 1983; PhD, 1985, University of Washington; Native American art, particularly Northwest Coast Indian art.

Senior Lecturer
Benz, Marilyn G. * 1968; PhD, 1984, University of Washington; psychological anthropology, social change, education, North American Indians.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

AIS 110 American Indian Song and Dance Traditions (3) VLPA Vocal technique, instrumental accompaniment, and song and dance traditions from different cultural areas of native North America.

AIS 113, 114, 115 Native American Language: Navajo (5,5,5) Witherspoon Conversation, reading, and writing in Navajo. Oral literature and other aspects of Navajo culture integrated into language study. Prerequisites: 113 for 114; 114 for 115.

AIS 151 Indian Art of Northwest Coast (3) VLPA Studio course on Pacific Northwest Coast Indian/ Eskimo art. Traditional and contemporary forms: principles of form, style, and techniques; values that influence Indian/Eskimo art styles.

AIS 170 Survey of North American Indian Art (5) VLPA Major Indian art traditions of North America. Precontact and early-contact-era traditions, and the evolution of Indian art forms in contemporary times. Design and techniques in Indian art.

AIS 201 Introduction: Ethnohistory of Native American Culture (5) I&S Survey of Native American cultural origins/legacies from archaeological, historical, and native perspectives; presents traditional creation accounts and oral histories, archaeological and ethnohistorical evidence. Focus on cultural dynamics and continuity through prehistoric, protohistoric, colonial, and American periods.

AIS 202 Introduction to Contemporary Experience in Indian America (5) I&S Survey of contemporary Native American people, cultures, and issues. Focus on modern experiences through readings from Native American autobiographies, contemporary narratives and literature, and reports of important topical issues, e.g., water rights, Indian gaming, treaty law.

AIS 203 Introduction: Philosophical and Aesthetic Universes (5) I&S Witherspoon Social constructions of reality that reflect and influence social, political, and psychological processes of Native American people.

AIS 240 Native North American Women (5) I&S Benz Indian women in the social structure; historical and contemporary roles; changes in male-female relationships; problems and opportunities of contemporary women; the feminist movement and Indian rights.

AIS 253 Wood Design (3, max. 9) VLPA Oliver Studio course in wood sculpture utilizing Pacific Northwest Indian hand tools. Properties of woods and their uses.

AIS 311 North American Indians: Pacific Northwest (5) I&S Traditional societies of the Pacific Northwest from southern Alaska to northern California; significant areal features, such as rank, totemic crests, guardian spirits, the potlatch, fishing, and foraging illustrated by comparisons and by selected ethno­

AIS 316 North American Indians: The Southeast to 1850 (5) I&S Emphasis on prehistory, social organization, belief system, political alliances. European contact, effects of plantation slavery and slave trade on Indians, issues of ethnicity, and consequences of removal policies.

AIS 317 North American Indians: The Southwest (5) I&S Witherspoon Overview of history and ethnography of the Southwest with emphasis on Apaches, Puebloans, and Pimas/Yumans. Social organization, religion, worldview, and expressive culture of such specific groups as Navajo, Hopi, Zuni, Tewa, and Papago. Prerequisite: ANTH 100 or 202.

AIS 330 United States-Indian Relations (5) I&S Witherspoon Trends in interrelations of native Americans and European immigrants since 1500. Current problems in Indian-White relationships examined in historical context. Development of Indian policy and consequences of major legislative acts, including the Allotment Act, Indian-Reorganization Act, termination and relocation. Implications for contemporary Indian education, religion, and health.

AIS 335 Legal Problems of the American Indian (5) I&S Legal status of the American Indian with emphasis on the reservation; heirship, land ownership and use, mineral, water, fishing, and hunting rights; and problems related to self-determination.

AIS 340 Indian Children and Families (5) I&S Benz Cross-cultural survey of Indian child rearing, family structure, and related social issues. Includes historical changes in family structure, value orientation and adaptation to a bicultural environment, education, child welfare, health problems, and aging.

AIS 350 Two-Dimensional Art of the Northwest Coast Indians (3, max. 9) VLPA Oliver

AIS 377 Contemporary American Indian Literature (5) VLPA Stanley Creative writings-novels, short stories, poems-of contemporary Indian authors; the traditions out of which these works evolved. Differences between Indian writers and writers of the dominant European-American mainstream. Offered jointly with ENGL 359.

AIS 431 History of American Indian Education (5) I&S Traditional and European-introduced methods of schooling, the federal role in Indian education, and contemporary Indian education issues. Special attention to the development of reservation boarding school education; the role of the Bureau of Indian Affairs; current trends in bilingual and bicultural education for Indians.

AIS 450 American Indian Song and Dance Traditions: Performance (3) VLPA Performance of various American Indian social dances, songs, and games. In-depth study of various American Indian vocal styles.

AIS 469 Special Studies in American Indians (3, max. 6) I&S Deleterion and analysis of a specific
problem or related problems in American Indian Studies. Offered occasionally by visitors or resident faculty. Prerequisite: permission of instructor.

AIS 475 Special Topics in Indian Studies (1-5, max. 15) I&S Current research and readings in American Indian Studies content areas.

AIS 499 Independent Study (1-5, max. 15) Readings and/or research under faculty supervision.

Anthropology

M32 Denny

Anthropology is the study of the physical, cultural, and social development; comparative biology; and variations in the customs and beliefs of human beings. The primary fields within the discipline include archaeology, physical anthropology, and sociocultural anthropology, with anthropological linguistics being included in the latter. All of these fields are represented in the department’s curriculum and in the faculty’s research.

Undergraduate Program

Director of Student Services
Diane Guerra
243 Denny

Bachelor of Arts Degree

Major Requirements: PHY A 201, ANTH 202, 203, ARCHY 205; one of the following: STAT 220, STAT 311, Q SCI 381, BIOS 472; 30 additional credits in anthropology selected from both upper- and lower-division courses, but excluding ANTH 100, AIS 102, and ARCHY 105, which may not be counted toward the major. No more than 6 credits from any combination of AIS 293 and AIS 350 may be counted toward the major. At least 25 credits in the major must be with the grade of 3.0 or above. Courses in which a grade of 1.9 or less is received may not be counted toward the 55 credits required. Transfer students must complete a minimum of 15 upper-division credits in anthropology at the UW. Required courses in anthropology taken by transfer and returning students more than 10 years past must be repeated; in limited circumstances, this requirement may be waived by petition to the departmental undergraduate adviser. Students who plan to undertake graduate work should elect one foreign language.

Graduate Program

David H. Spain, Graduate Program Coordinator

The department recognizes three principal subfields of anthropology within its faculty, programs, and curriculum: sociocultural anthropology, biological anthropology, and archaeological anthropology (including archaeological linguistics). The department offers three distinct Ph.D. programs within the subdisciplines and an M.A. program in biocultural anthropology. A Ph.D. program in sociocultural anthropology with emphasis in ethnomusicology is offered in cooperation with the School of Music. The M.A. degree may be earned within the Ph.D. programs as a thesis or non-thesis degree. Graduate students are admitted to, and specialize in, their chosen subfields from the beginning of their graduate studies.

Admission Requirements

Applicants are admitted to begin study only during the autumn quarter and are advised to have their application materials completed by the beginning of the prior February. A complete application file includes the Graduate School Application, two official transcripts, the Supplementary Information Form, three recommendations, and scores from the Graduate Record Examination (GRE). Foreign students (except for those from English-speaking countries) are required to take the TOEFL exam as well as the GRE.

Program Requirements

For each of the respective graduate programs, completion of the core requirements and a reading knowledge of one foreign language are required. Under the guidance of a supervisory committee selected from his/her subfield, the student forms an individual program. The major areas emphasized in the faculty and curriculum are: North America, Africa, Japan, China, Southeast Asia, and Oceania. The M.A. programs usually require two years of graduate study; the Ph.D. programs usually require at least three years beyond the master’s level, including a year of independent field research and a year to organize field materials and write a doctoral dissertation.

Financial Aid

Fellowships are awarded to a few outstanding entering students. A limited number of teaching and research assistantships and hourly positions are offered primarily to advanced students. Modest travel grants are available for summer fieldwork under faculty grants and department-supported fellowships. Some students may be qualified for a few National Resource Fellowships for Language Studies. The Ronald J. Olson Fellowship provides resident tuition for three quarters to entering students with interests in Native North America. Work study positions are also available for eligible graduate students.

Newell, Laura L. * 1957; PhD, 1957, University of Washington; ethnoarchaeology; growth and development, human biology, evolutionary aspects of dermatoglyphics.

Neuman, Marshall T. 1966, (Emeritus); PhD, 1941, Harvard University; anthropology.

Nute, Peter E. * 1970; PhD, 1969, Duke University; genetics and evolution.

Osborne, Oliver H. * 1969, (Adjunct); PhD, 1969, Michigan State University; ideology, policy and health care systems, transcultural health.

Ottenberg, Simon * 1955, (Emeritus); PhD, 1957, Northwestern University; art, aesthetics, politics, law, ethnicity.

Quimby, George I. * 1965, (Emeritus); MA, 1937, University of Michigan; museology, culture history, North America.

Read, Kenneth E. * 1956, (Emeritus); PhD, 1948, University of London (UK); social structure and organization, Oceania. Sakata, Hiromi L. * 1977, (Adjunct); PhD, 1976, University of Washington; ethnomusical.

Schiffman, Harold F. * 1967, (Adjunct); PhD, 1969, University of Chicago; Dravida; language and literature, sociolinguistics, Tamil, languages policy.

Smith, Eric A. * 1980; PhD, 1980, Cornell University; ecology, evolutionary theory, culture, behavioral ecology, demography, Native Americans, Car-adian Inuit.

Spain, David H. * 1968, PhD, 1968, Northwestern University; sociocultural anthropology, African studies, research methods.

Stein, Julia K. * 1980; PhD, 1980, University of Minnesota; New World archaeology, Northwest coast archaeology, geoarchaeology, shell middens.

Swindler, Doris R. * 1966, (Emeritus); PhD, 1959, University of Pennsylvania; primates behavior, anatomy and growth and development.

van den Burgh, Pierre L. * 1969, (Adjunct); PhD, 1969, Harvard University; prehistory, social evolution, religion, China, Taiwan.

Walsh, Edgar V. * 1957; PhD, 1959, University of California (Los Angeles); politics, economics and law, Africa, the developing world.

Waterson, Gary J. * 1987, PhD, 1970, University of Chicago; language, art and history, Indians of the Southwest.

Associate Professors

Eck, Gerald G. * 1974; PhD, 1974, University of California (Berkeley); primates paleontology, especially African Pliocene-Pleistocene monkeys and hominoids.

Ellington, Terry J.* 1983, (Adjunct); PhD, 1979, University of Wisconsin; ethnobiology.

Jacobs, Sue-Hellen * 1974, (Adjunct); PhD, 1970, University of Colorado (Boulder); anthropological studies of women, socio-cultural applied anthropology, ethnography, North America.

Kahn, Miriam * 1986; PhD, 1980, Bryn Mawr College; museology, ecology, agricultural development, food symbolism, gender relations, Malaysia and Oceania.

Leonetti, Donna * 1978; PhD, 1978, University of Washington; biological and sociocultural interactions in population adaptation, epidemiology, Japanese Americans.
(3) I&S Contemporary and temporary archaeology, physical films in ethnography; their use in anthropological training required for the major of artistic expression, cultural contexts, styles, sub-Saharan African, Middle East and North Africa. First half of the

PhD, 1991, University of Michigan; etymology of the state, ideology and popular culture, Chicanos, Chicano society, Chicano history.

Hagstrum, Melissa 1991: PhD, 1989, University of California (Los Angeles); New World complex societies, household archaeology, craft specialization, ceramics.

Senior Lecturers

Bentz, Marilyn G. * 1991: Emeritus; PhD, 1984, University of Washington; cross cultural, mental health, comparative religion, West Indies, Pakistan, Islam.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

General

ANTH 100 Introduction to Anthropology (5) I&S Introduction to the subfield: of archaeology, physical anthropology, and sociocultural anthropology through the examination of selected problems in human physical, cultural, and social evolution. Not recommended for students who have had various courses in anthropology, archaeology, or physics I anthropology. May not be counted toward the 55 credits required for the major in anthropology. Offered: AWSp.

Sociocultural Anthropology

ANTH 202 Principles of Sociocultural Anthropology (5) I&S Comparison of key features of various non-Western and Western peoples. Introduction to basic theories and methods used in the field. Offered: AWP.

ANTH 203 Introduction to Anthropological Linguistics (5) VLP/IAS Linguistic methods and theories used within anthropology. Descriptive and theoretical linguistics compared; regional and comparative method; sociolinguistics; language and culture; human language and animal communication compared; survey of history of anthropological linguistics in North America. Offered: jo intly with LING 203; ASSp.

ANTH 216 Oceania (3) I&S Cor temporary and traditional life in the Pacific Basin.

ANTH 220 Biological and Cultural Bases of Human Behavior (6) I&S/NE Survey of the views held by anthropologists and other scholars about the basis of human behavioral variability with emphasis on the interaction of "nature" (evolutionary history and genetic inheritance) and "culture" (what one learns as a member of a particular society.)

ANTH 230 Comparative Tribal Religion (5) I&S World's "folk" or "little traditions" of religious belief and practice. Cosmologies, eschatologies, notions of causality and of human nature. "Little traditions" as examples of man's imaginative attempts to create a relatively closed, knowable, and more-or-less manageable cosmos.

ANTH 301 Human Nature and Culture (3) I&S Comparison of various anthropological perspectives on the sources of variation in customs, values, and beliefs of human groups, including non-Western peoples and contemporary Americans. Offered: AWSp.

ANTH 302 Plants, Animals, and People (3) I&S Human emphasis on the knowledge of, and attitudes toward, plants and animals of non-Western peoples. Role of resource species as food and medicine and in tool manufacture, myth, and ritual. Hunters and gatherers, pastoralists, and agriculturalists studied in comparison with contemporary Western societies.

ANTH 310 Native North American Societies (5) I&S Smith Traditions of cultures of North America north of Mexico, emphasizing diversity of North American Indian and Eskimo societies. Origins of Native American cultural areas, emerging systems; social systems; levels of social organization; European conquest and colonization; and description of representative cultures from the ten culture areas. Recommended: 100 or 202.

ANTH 314 Civilization of Island Southeast Asia (5) I&S Pemberton Cultural, political, economic traditions of insular Southeast Asia, Indonesia, Malayasia, the Philippines, Early Indialized states; growing influence of Islam; Western European conquests; development of colonial societies, their legacies; modern nationalism, problems faced by newly independent states; important cultural continuities. Prerequisite: one 200-level International Studies or anthropology course, or permission of instructor. Offered: jointly with SISSE 314.

ANTH 315 Southeast Asian Civilization: Buddhist and Vietnamese (5) I&S Keyes Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos, and many societies of Southeast Asia. Culture of tribal peoples who live on psychological, social, and economic activities. Cultural transformations consequent upon the war in Indochina and resettlement of Indo-Chinese refugees in United States. Offered: jointly with SISSE 315.

ANTH 316 Peoples and Cultures of the Islamic Middle East (3) I&S Survey of cultures and peoples of Islamic Middle East and North Africa. First half of the course emphasizes the integration of peasant, urban, and nomadic societies in the traditional culture and economy; the second half concentrates on the transformation of these traditional styles through the process of westernization and modernization.

ANTH 331 Northwest Coast Indian Arts (5) VLP/ASA Introduction to arts of Indians of the Pacific Northwest from precontact to present. Themes explored include diversity of artistic expression, cultural contexts, styles, artists' responses to foreign trade and settlement, and ways in which art may reflect historical developments in the lives of the Indians. Offered: jointly with ART H 331.

ANTH 350 Cultural Evolution (3) I&S Evolution of culture and society with emphasis on ecology. Development of urban life in light of common and distinctive character of cities, peasants, and tribal groups or bands. Process of urbanization, disappearance of true primitive peoples, emergence of peasantry, rise of a world system. Selected case studies, past and present.

ANTH 352 Buddhism and Society: Theravada Buddhist Tradition in South and Southeast Asia (5) I&S Introduction to the religious traditions of Theravada Buddhism (as practiced in Sri Lanka, Burma, Thailand, Laos, and Cambodia) and examination of the variations in ethical orientations developed through Theravada Buddhist ideas. Recommended: RELIG 202 or knowledge of one Eastern religious tradition. Offered: jointly with RELIG 350.

ANTH 353 Anthropological Studies of Woman (5) I&S Cross-cultural and comparative survey of the varieties of women's cultural experiences, statuses, and roles in cultural context and the anthropological theories used to account for them. Topics include biological factors, studies of primates, women in the workplace, preindustrial and industrial societies, women in folklore and music, matriarchy and matrilineal kinship, childbirth, and women's roles in economic development. Prerequisites: 202 and WOMEN 200, or permission of instructor. Offered: jointly with WOMEN 353.

ANTH 354 The Comparative Study of Societies (5) I&S Compares entire societies at various levels of technological complexity to explore problems of their development and structural organization. Examines both historical and contemporary, West and non-Western societies. Prerequisite: 202 or SOC 110. Offered: jointly with SOC 354.

ANTH 355 Aging in Crosscultural Perspective (3) I&S Survey of strategies for dealing with the fact of aging in various sociocultural systems. Relates the various cultural, social, and political policies on aging, drawn from psychology and medicine, with emphasis on non-Western societies. Prerequisite: 202 or permission of instructor.

ANTH 356 Visual Anthropology (3) I&S The place of photography and films in ethnography; their use in the documentation and interpretation of cultural and social systems.

ANTH 371 Political Anthropology (3) I&S Theories of the development of political forms and of the social structural analysis of political organization. Authority, power, and concepts of politics and administration. Prerequisite: 202.

ANTH 372 Anthropology of Law (3) I&S Major theories and studies in legal anthropology. Dispute settlement, juridical processes, and concepts of law and legal activities. Prerequisite: 202.
ANTH 373 Stateless Societies: An Ethnographic Approach to Noncentralized Political Systems (5) I&S Comparative examination of modes of governance in noncentralized societies. Forms of decision making, competition for supports, resolution of conflicts, and boundary maintenance with adjacent groups. Cases discussed in the context of alternative theories of the development of polities. Prerequisites: 202 and POL S 273.

ANTH 375 Comparative Systems of Healing (3) I&S Introduction to the anthropological study of healing. Examines four healing traditions and addresses their similarities and differences. Includes anthropological theories of healing and religion. Prerequisite: Junior or senior standing in departmental honors program.

ANTH 399 Junior Honors Seminar (5) I&S Teaches skills required to write senior honors thesis, including evaluation of academic and scientific writing, formulation of problem, collection of bibliographic and other resources, evaluation of research proposals, and research proposal preparation. Final product is a formal thesis prospectus. Prerequisite: Junior or senior standing in departmental honors program.

ANTH 401 West African Societies (3) I&S Social and cultural features of coastal and interior West African societies, including the Western Sudan. Detailed study of selected societies. Prerequisite: 202 or permission of instructor.

ANTH 402 Societies of Eastern and Southern Africa (5) I&S Historical background and contemporary life of cultural groups in eastern and southern Africa with special study of selected cases of political and economic organization and cultural change. Prerequisite: 202 or permission of instructor.

ANTH 403 Traditional Chinese Society (5) I&S Late traditional (Ming-Qing) China as a social system. Systematic analysis of temporal and spatial variation in family, kinship, local organization, social class, government, and antigovernment activity. Prerequisite: 202, HSTAS 454, graduate standing, or permission of instructor. Offered: jointly with SISEA 443.

ANTH 404 South America (5) I&S Survey of anthropological research among the traditional peoples of South America. Historical background and contemporary life of cultural groups of the Amazonian Basin. Transformation of traditional life-styles through the process of European conquest and the aftermath of colonialism. Detailed study of selected societies. Prerequisites: 100 or 202.

ANTH 405 Peoples of Russia (5) I&S Traditional cultural and social organizations of the various nationalities in Russia. Particular emphasis on peoples of Siberia. Role of traditional culture in shaping contemporary lifestyles in a multiethnic, diversified setting. Prerequisite: ANTH 202 or permission of instructor. Offered: jointly with SISEA 443.

ANTH 408 New Guinean Societies (5) I&S Peoples and cultures of coastal and interior New Guinea and adjacent islands. Deals intensively with selected general problems of ethnographic method and ethnological and sociological interpretation. Character of small autonomous societies in Melanesia; ecology, economics, gender, systems of exchange, social organization, magic and ritual, warfare. Prerequisite: 202 or permission of instructor.

ANTH 409 Micronesian Societies (3) I&S Comparative social anthropology of the social systems of high islands. Emphasis on research and intensive treatment of the kinship, religion, ecology, and politics in both traditional and contemporary periods. Prerequisites: 202 and either 216 or permission of instructor.

ANTH 411 Cross-cultural analysis of the processes of social change. Applied ethnography as research method. Prerequisite: 202 or permission of instructor.

ANTH 412 South Asian Social Structure (5) I&S Caste dynamics, political control, economic organization, and religion in Hindu-village India. Prerequisite: 202 or permission of instructor.

ANTH 413 Applied Ethnography (5) I&S Examine the social context of ethnographic research. Prepares students for nontraditional uses of anthropological theory, knowledge, and training. Rationale for applied ethnographic research, professional training, the research proposal/contract, social change, applied anthropology, the research product.

ANTH 418 Indian Heritage of Mexico and Central America (5) I&S Indian civilization of Mexico and Guatemala. Their origins and ecological foundations. Contemporary communities of Mexico and Guatemala, focusing on creative adaptation of pre-Columbian traditions to modern national realities. Prerequisite: 202 or permission of instructor.

ANTH 419 Islamic Peoples of Southwest and South Asia (5) I&S Analysis of ethnographic issues in the study of Islamic peoples of India, Pakistan, Afghanistan and Iran, with attention as appropriate to contiguous areas of the Middle East. Topics include ethnic diversity, family patterns, gender, food expressions of Islam, and recent social change. Prerequisite: 202 or permission of instructor.

ANTH 420 Psychoanalysis and the Study of Culture (5) I&S Spain Anthropological use of theories developed by Freud to understand culture. Reviews psychoanalytic theory as a foundation for examining the work of Reichenfrech, Devereaux, Kardiner, and Spiro, among others. Topics covered include the universality of oedipality and the utility of psychoanalytic theories in non-Western cultures.

ANTH 421 Belief, Ritual, and the Structure of Religion (5) I&S Systematic survey of concepts, models, and theories that characterize the anthropological study of religion. Consideration of the primacy of universal basis of religion and of diverse ways in which religions are constructed and related to social experience. Prerequisites: 202 or 321, or RELIG 201 and 202.

ANTH 424 Hunter-Gatherer Societies (4) I&S Comparative examination of human foraging societies, emphasizing ethnographic cases and socioecological analysis. Foraging and human evolution; rationality of foraging societies; population and reproductive strategies; variability in social organization and land use; power relations between the sexes; ritual and belief; contemporary status of hunter-gatherer populations. Prerequisite: 202 or permission of instructor.

ANTH 425 Ethnicity and Nationality in the USSR and Its Successor States (5) I&S Creation of the Soviet Union: Leninist and Stalinist approaches to the "national question." Contemporary processes of ethnic assimilation and dissimulation. Formation of national elites, rise of various forms of nationalism, position of religion in national cultures. Specific cases include Russian nationalism, Islam in Central Asia. Offered: jointly with SISRE 425.

ANTH 426 Peasant Culture and Society (5) I&S Place of peasants in state, civilization, and global economy, especially as seen from peasants' perspectives. Emphasis on recent anthropological studies. Prerequisite: 202 or permission of instructor.

ANTH 427 Anthropology in Urban Settings (3) I&S Cross-cultural examination of theoretical issues in anthropology as studied in urban places. Focuses on ethnicity, identity, the integration of urban ethnic groups; migration and its rural and urban consequences; family and kinship organization as an adaptation to urban complexity; the nature of urban voluntary associations, law and order, and law among children and adolescents in different societies. Comparative approaches, diverse theoretical perspectives, and empirical research findings are used. Recommended: courses in urban development or introductory anthropology. Prerequisite: jointly with CHCS 495.
ANTH 441 Psychological Anthropology (5) I&S Assessment of mutual relevance of cultural and psychological variables in anthropology. Historical development of principal topics (e.g., cognition, national character, enculturation, personality and social change, nature of culture, sex and temperament, deviance, and psychoanalytic studies of culture). Prerequisite: 202 or introductory psychology or personality theory or permission of instructor.

ANTH 443 Anthropology of Modern Japan (5) I&S Examines the problem of modernity in Japan since the late nineteenth century, with emphasis on contemporary Japan. Critically addresses some previous anthropological work concerning patterns of Japanese "culture." Particular focus on the influence of modern forms of power, media, and exchange in the construction of present-day Japan. Offered: jointly with SISEA 447.

ANTH 444 Contemporary Chinese Society (5) I&S Analysis of society in the People's Republic of China as a product of traditional Chinese society and the changes wrought upon it by the impact of the West and by the revolutionary policies and practices of the Chinese Communist Party. Prerequisites: 403 or SISEA 443 or another acceptable course on Chinese society, or permission of instructor. Offered: jointly with SISEA 444.

ANTH 447 Religion in China (5) I&S Place of religion in Chinese society, examining the doctrines, practices, and social consequences of the eclectic folk religion, the Confucian, Taoist, and Buddhist traditions, syncretic sects, and imported Christianity. Prerequisite: one course in Chinese society, politics, or history, or permission of instructor. Offered: jointly with SISEA 445.

ANTH 448 Modern Korean Society (5) I&S Social organization and values of twentieth-century Korea. Changes in family and kinship, gender relations, rural society, urban life, education and industrial organization since 1900. Differences between North and South Korea since 1945. Prerequisites: SISEA 212, HSTAS 482 or permission of instructor. Offered: jointly with SISEA 448.

ANTH 449 Social Transformation of Modern East Asia (5) I&S Comparative study of social changes in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale social units in rural and urban areas under both communist and capitalist political systems. Prerequisites: two courses on East Asian history or society. Offered: jointly with SIS 449.

ANTH 451, 452, 453 Phonology I, II, III (4,4,4) VLPA I&S Speech sounds, mechanisms of their production, and the structuring of sounds in languages; generative view of phonology. Prerequisite: LING 200 or 400, either of which may be taken concurrently, or permission of instructor. Offered: jointly with LING 451, 452, 453.

ANTH 454 Women, Words, Music, and Change (5) VLPA I&S Comparative analysis of use of myths, tales, music, and other forms of expressive culture to account for, reinforce, and change women's status and roles; cross-cultural analysis of planned change and development. Prerequisite: 353 or permission of instructor. Offered: jointly with WOMEN 454.

ANTH 455 Areal Linguistics (3, max. 6) VLPA I&S Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes: vocabulary specialization, lexical change, language death and revival. Offered: jointly with LING 455.

ANTH 456 Contemporary Ethnography (5) I&S Techniques and theories of ethnographic description for the anthropological analysis of contemporary life. Materials drawn from the contemporary United States, with a focus on issues and events in the Seattle area. Includes fieldwork projects. Prerequisite: permission of instructor.

ANTH 457 Ecological Anthropology (5) I&S Survey of anthropological research on interaction between human societies and their environments. Logic of different subsistence systems; intensification and transformation of land use; competition and cooperation; regulation and control; ecological aspects of human nutrition, disease, floral organization, ethnicity, social stratification, conflict, and cooperation; historical roots of current ecological crisis. Prerequisite: permission of instructor.

ANTH 460 History of Anthropology (5) I&S Sources and development of leading concepts, issues, and approaches in anthropology. Findings of anthropology in relation to scientific and humanistic implications and to practical application. Main contributors to field, their work and influence. Past, present, and future perspectives, including anthropological modernity of the modern life. Prerequisites: 202 and 15 additional credits in anthropology.

ANTH 461, 462, 463 Syntax I, II, III (4,4,4) VLPA I&S Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: LING 200 or 400, which may be taken concurrently, or permission of instructor. Offered: jointly with LING 461, 462, 463.

ANTH 464 Language Policy and Cultural Identity (3) VLPA I&S Decision making regarding language in sociopolitical contexts. Language and ethnicity, educational policy, and use of language in developing nations. Plans to modernize, purify, standardize, reform, and revive language. Language loyalty and motives for second-language acquisition. Prerequisite: LING 200 or 400. Offered: jointly with LING 463.

ANTH 465 Critical Anthropology of Mass Culture (5) I&S Icy Critical theories of ways of mass culture and their relationship to current anthropological practice. Analyses of the historical interconnections among capitalism and commodity fetishism, modernity and representation, and media and consumption. Prerequisite: upper-division standing or permission of instructor.

ANTH 486- Anthropology Honors Thesis (1-9) max. 18 I&S Individual research under the direction of a faculty advisor culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

ANTH 489 Special Studies in Anthropology (3-5, max. 15) I&S Delineation and analysis of a specific problem or related problems in anthropology. Offered occasionally by visitors or resident faculty. Prerequisite: 202 or permission of instructor.

ANTH 470 Minority Peoples of China (5) I&S Interaction between China and the peoples of its periphery, including inner Asia, Tibet, northern mainland Southeast Asia, and aboriginal peoples of Taiwan. Focus on ethnicity, ethnic group consciousness, role of the Chinese state, and social stratification. Prerequisite: 403 or 422 or 428 or HSTAS 454. Offered: jointly with SISEA 470.

ANTH 475 Perspectives in Medical Anthropology (5) I&S Introduction to medical anthropology. Explores the relationships among culture, society, and medicine. Examples from Western medicine to the rest of the world. Offered: jointly with HSERV 475.

ANTH 476 Culture, Medicine, and the Body (5) I&S Explores the relationships between the body and society, with emphasis on the role of medicine as a mediator between them. Case study material, primarily from contemporary biomedical phenomena, as well as critical, postmodern, and feminist approaches to the body introduced within a general comparative anthropological framework.

ANTH 480 Introduction to Museology (3) I&S Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics. Prerequisite: upper-division standing or permission of instructor.

ANTH 481 Museum Collection Management: Ethnology (3) I&S Lecture and work experience in museum ethnology and management in the anthropology collections of the Burke Memorial Washington State Museum, including identification, cataloging, fumigation, storage, cleaning, inventory, and specimen preparation for exhibition of archival and nonarchival museum specimens from North America, the Pacific, and Pacific Rim areas. Prerequisite: 480 or permission of instructor.

ANTH 482 Museum Conservation (5) I&S Lecture and laboratory work in the recognition and treatment of museum conservation problems for specimens of wood, fiber, stone, metal, and bone. Application of basic principles to specific conservation and restoration problems faced by curatorial personnel. Prerequisites: 480, 481 or permission of instructor.

ANTH 483 Women In Evolutionary Perspective (5) I&S Critical appraisal of major theories accounting for evolution of sex and gender roles and status differences; cross-cultural testing for sociobiological, evolutionary, cultural, or historical explanations for the "female power and male dominance." Prerequisite: 353 or permission of instructor. Offered: jointly with WOMEN 483.

ANTH 486 Human Family Systems: Biological and Social Aspects (5) I&S Biological bases for human mating and reproduction, and an examination of the range of cross-cultural variability in human systems of kinship and marriage; comparisons among a wide range of human and nonhuman species, and between Western and non-Western human societies; interplay of biological, ecological, and sociocultural factors in determining the structure and function of family systems. Prerequisite: 100 or PHY A 201 or SOC 110. Offered: jointly with SOC 486.

ANTH 489 Anthropology Practicum (3-5, max. 15) I&S Faculty-supervised off-campus internships in organizations utilizing anthropological skills in nonacademic settings. Establishing educationally valuable individual projects for internships with faculty sponsor. Organizations include museums, social service and other governmental agencies, and private nonprofit service agencies. Prerequisite: major in anthropology and permission of instructor.

ANTH 491 Honors Colloquium (2, max. 12) I&S Introduction to anthropological research. Students read original articles and papers and discuss them with authors. Research presenters include department faculty, visiting faculty, and advanced graduate students. Prerequisite: students in the department honors program, or other social science or biological science honors programs. Credit/no credit only. Offered: ANWSp.

ANTH 492 Anthropology of Refugees (3) I&S The refugee phenomenon, its emergence in the post-colonial world, and the structure of the life history of refugees. Ethnic change, involuntary deculturation, and acculturation as they occur in refugee life histories. Prerequisite: 202 or permission of instructor. Offered: jointly with CHS 492.

ANTH 493 Advanced Topics in Expressive Culture (3, max. 6) VLPA I&S Analysis and testing of special topics in anthropological, sociocultural, and aesthetic areas: graphic arts, oral literature, dance, and humor among non-Western peoples. Prerequisites: 202, 429, or permission of instructor.

ANTH 495 Advanced Problems in Ethnology (3, max. 6) I&S Current problems in ethnology. Seminar format. Prerequisites: 25 credits in anthropology and permission of instructor.
ANTH 499 Undergraduate Research (* max. 18)
Prerequisite: permission of instructor.

Archaeology
ARCHY 105 World Prehistory (5) I&S Prehistoric human ancestors from three million years ago; their spread from Africa and Asia into the Americas, survival during ice ages, development of civilizations. Well-known archaeological finds (e.g., Olduvai-Gorge; Ne- and the analysis of spatial patterning in artifact distributions. Prerequisite: 371 or permission of instructor.

ARCHY 487 Prehistoric Archaeological Analysis: Geoarchaeology (6) I&S Identification, analysis, and interpretation of sediments and soils associated with archaeological remains. Laboratories deal with sediment description and chemical analysis; field trips and student projects focus on archaeological applications of these subjects. Prerequisite: 371 or permission of instructor.

ARCHY 489 Quantitative Archaeological Analytic Techniques (5) I&S Introduction to quantitative approaches to archaeological problems; data screening, numerical methods of classification and identification, graphically and computer-based seriation techniques, and the analysis of spatial patterning in artifact distributions. Prerequisite: 487 or permission of instructor.

ARCHY 498 Archaeological Method and Theory II: Explanatory Theory (5) I&S Conceptual frameworks employed by archaeologists in obtaining explanation in the prehistoric Americas. Development of theory, history, cultural reconstruction, and explanatory prehistory, considering the nature of explanation as conceived in these areas, the basic assumptions employed in achieving these aims, and an introduction to the methods employed. Prerequisites: 205, 497.

ARCHY 499 Undergraduate Research (* max. 12)
Prerequisite: permission of instructor.

Physical Anthropology
PHY A 201 * Principles of Physical Anthropology (5) NW Evolution and adaptation of the human species. Evidence from fossil record and living populations of monkeys, apes, and humans. Interrelationships between human physical and cultural variation and environment: role of natural selection in shaping our evolutionary past, present, and future. Offered: AWSPS.

PHY A 370 Introduction to Primates (5) NW Origins, major evolutionary trends, and modern taxonomic relationships of the nonhuman primates. Their distribution in the habitat in relation to the cultural and morphological adaptations and their status as endangered species. Prerequisite: 201.

PHY A 372 Uses and Abuses of Evolutionary Views of Human Behavior (5) I&S/NW Newell Interaction of human behavior and biology as it has been interpreted within an evolutionary framework. Discusses various challenges to Darwinian theory, particularly Lamarckism and creationism. Topics include biological determinism as exemplified by racism, myth of human origins, the clash between biological and cultural determinism, and modern genetics and behavior.

PHY A 375 Biology of Human Race (3) NW Worldwide distribution of variation in human biology: shape, size, skin color, body composition, human performance. Natural selection, historical factors, random biological events. History of attempts to classify people into racial groups and problems associated with such efforts. Prerequisite: 201 or permission of instructor.

PHY A 387 Ecological Perspectives on Environmental Stress, Adaptation, and Health (5) NW Leonetti How human populations respond to environmental stressors in biological-behavioral terms and the relationship of this adaptational process to health. Nutritional, climatic, and sociocultural stress and associated patterns of birth, disease, and death throughout human history in hunting, gathering, farming, pre-industrial, and industrial societies. Prerequisite: 201 or permission of instructor.

PHY A 388-389 Human Fossils and Evolution (5-5) NW Evolution of human anatomy and behavior as adaptations to changing environments. Human fossils: their geological context, age, ecological setting used to reconstruct the evolution of our species during the last six million years of earth history. Prerequisite: 201, or BIOL 201, 202, 203. Must take both sections to receive a grade.
PHY A 466- Biocultural Anthropology Honors Thesis (1-9), max. 18 NW Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

PHY A 469- Special Topics in Physical Anthropology (3, max. 6) NW Delineation and analysis of a specific problem or a more general area in physical anthropology. Offered occasionally by visitors or resident faculty. Prerequisite: permission of instructor.

PHY A 473 - Biological Adaptability of Human Populations (5) NW Mechanisms enabling humans to maintain homeostasis in extreme environments: high altitude, heat, cold, nutritional deficiency, radiation. Adaptive process operating at levels of physiology, metabolism, and population, including the strategies of fertility and birth spacing. Prerequisites: 201 and physiology, or permission of instructor.

PHY A 476 - Sociocultural Ecology and Health (3) NW Sociocultural ecology of health/illness, focusing on humans as bioculturally integrated beings and on populations as biocultural units of adaptation. Examples of research on disease (infectious, chronic) and patterns of morbidity and mortality (infant, maternal, old age) with particular attention to situations of sociocultural change.

PHY A 482 - Human Population Genetics (5) NW Micro-evolutionary changes in human populations. Effects of mutation, selection, inbreeding, gene flow, and genetic drift as causes of evolutionary change. Mathematical fundamentals used but high school not required. Prerequisite: 201 or permission of instructor.

PHY A 483 - Human Genetics, Disease, and Culture (5) NW Considers relationships among genetic aspects of human disease, cultural behavior, and natural habitat for a wide variety of conditions. Also considers issues of biological versus environmental determinism, adaptive aspects of genetic disease, and the role of cultural selection. Prerequisite: 201; a general background in biology.

PHY A 484 - Human Life Cycle (5) NW Human growth and physical/social development: fetal life to old age. Cultural, ecological, and evolutionary aspects of the life cycle population differences in age and sex related to morbidity and mortality. Prerequisite: 201 or permission of instructor.

PHY A 485 - Research in Growth and Development (2, max. 8) NW Discussion and research on topics relating to primate growth and development, using either published materials or data from ongoing studies at this university. Prerequisites: 486, 489, or permission of instructor.

PHY A 486 - Primate Socioecology (3) NW Focus on the variety of social systems exhibited by nonhuman primates and adaptive significance of these societies; social systems in terms of the present ecology and evolutionary past of the species; the function of communicatory gestures and vocalizations, tradition, kinship, and social roles in maintaining and structuring groups over generations; the relationship among mating systems, foraging strategies, ranging patterns, and ecological separation/resource partitioning and their contribution to species-typical social organization. Prerequisite: 201.

PHY A 487 - Human and Comparative Osteology (3) NW Introduction to the vertebrate skeleton. The skeleton is described in detail, and various methods of determining age and sex are presented, as well as osteological and modern statistical methods for handling such data. Prerequisite: permission of instructor.

PHY A 489 - Early Evolution of the Hominidae (5) NW Data and interpretations basic to the Pliocene and early Pleistocene evolution of the family Hominidae. Presentation of the geological contexts, ages, faunal associations, fossil and cultural remains of the hominid lineages. Practical experience with the hominid fossil material, and explanation of the morphological and contextual similarities and differences. Prerequisite: 201 or permission of instructor.

PHY A 490 - Later Evolution of the Hominoids (3) NW Data and interpretations basic to the middle and late Pleistocene evolution of the family Hominidae. Presentation of the geological contexts, ages, faunal associations, fossil and cultural remains of the hominid images. Practical experience with the hominoid fossil material and explanation of the morphological and contextual similarities and differences. Prerequisite: 201 or permission of instructor.

PHY A 499 - Undergraduate Research (*, max. 18) NW Prerequisite: permission of instructor.

Courses for Graduates Only

ANTH 600 - Independent Study or Research (*, max. 2) NW Considers problems of a more general, area in physical anthropology. Prerequisite: 201 or permission of instructor.

ANTH 800 - Doctoral Dissertation (*) NW Credit/no credit only.

Sociocultural Anthropology

ANTH 500 - Preceptorial Reading (6) NW For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the analysis and comparison of social and cultural systems. Not open to graduate students in the sociocultural anthropology program.

ANTH 503 - Preceptorial Reading in Linguistic Anthropology (6) NW For beginning graduate students who have not had prior training in the problems, principles, and methods involved in linguistic anthropology. See also course description for 203. Not open to graduate students in the linguistics program.

ANTH 507, 508 - Current Issues in Sociocultural Anthropology (2, max. 9) Biweekly presentations by participants and guest lecturers of current literature and ongoing research in topics pertaining to social, cultural, and linguistic anthropology. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty. Credit/no credit only.

ANTH 559 - Sociocultural Anthropology Problem Paper (4) NW First year graduate students in sociocultural anthropology select a topic for independent research and prepare a paper of about 25-50 pages on the topic chosen. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

ANTH 510 - Seminar on North American Indians (3) NW Advanced comparative treatment of selected aspects of the Indian cultures and societies of North America.

ANTH 514 - Regional Seminar (3, max. 12) NW Comparative treatment of selected aspects of cultures and societies of a particular region or area.

ANTH 517 - Seminar on South Asia (3) NW Advanced analysis of selected problems in South Asian ethnology and sociocultural structure. Prerequisite: 412.

ANTH 520 - Ecology, Evolution, and Anthropological Theory (3-5) NW Critical examination of models and theories from evolutionary ecology, sociobiology, and ecological anthropology. Potential and actual utility of such models in explaining aspects of human social behavior, cultural variation, and the role of adaptations in strategies of production and reproduction.

ANTH 521 - Seminar on the Anthropological Study of Religion (3, max. 9) NW Advanced seminar in the anthropological study of religion designed for students who have a background in the theory and applications of theory developed in the anthropological study of religion. Seminar topics vary each quarter. Prerequisites: 422 and graduate standing; permission of instructor for graduate students in Comparative Religion.

ANTH 522 - Seminar on South American Indians (3) NW Advanced comparative treatment of selected aspects of the Indian cultures and societies of South America.

ANTH 525 - Seminar in Culture Processes (3, max. 6) NW The concept of process and its application to the study of culture.

ANTH 527 - Acculturation and Ethnicity (3) NW Systematic analysis of psychological, social, and cultural implications of the contact of peoples.

ANTH 529 - Seminar in Expressive Culture (3) NW Tabled study of selected topics in expressive culture from an anthropological point of view. Prerequisite: 429 or permission of instructor.

ANTH 530 - Dialectology (3) NW Principles of dialect division as related to linguistic structure and usage. Prerequisite: 452 or permission of instructor. Offered jointly with Ling 330.

ANTH 536 - Seminar in Visual Anthropology (3) NW Significance of anthropological cinema and photography placed in historical perspective. Screening of films to determine the role of the anthropologist as filmmaker, as well as the role of the filmmaker as anthropologist.

ANTH 537 - Political Anthropology and Law (3, max. 6) NW Seminar on special topics in politics and law and their interrelationships. Prerequisites: 437, 439, or permission of instructor.

ANTH 538 - Politics of Representation (3) NW Pemberton: Representations of power and the powers of representation. Critical approaches to representation in colonial and postcolonial worlds. Divine kings, exemplary centers, the New World Order, voting subjects, and the possibilities of transgression.

ANTH 540 - Anthropology and the Subject (3) NW Seminar on recent theories of the "subject" and their importance for current anthropology. Work on the "self" and "person" distinguished from emphasis on the "subject." Analysis of various theories of language, translation, psychoanalysis, ideology, and power for a general reconsideration of the "subject" and anthropology. Prerequisite: graduate standing.

ANTH 541 - Seminar in Psychological Aspects of Culture (3, max. 8) NW Selected problems in the relation of culture and personality types. Prerequisite: 441 or permission of instructor.

ANTH 542 - Seminar in Cognitive Anthropology (3) NW Examine the intellectual history of cognitive anthropology; assess its major findings in kinship, folk biology, color classification, and decision and planning theory. Replicates key studies, using cognitive anthropological methods. Evaluates influences from linguistics, psychology, and artificial intelligence research. Practical applications and future prospects.

ANTH 550 - Field Techniques in Ethnography (5) NW Techniques of collecting, ordering, and utilizing ethnographic data in the field. Problems of rapport, elicitation, observation, interpretation, and ethnography. Credit/no credit only.

ANTH 551 - Research Design (3) NW Principles of research design, including problem delineation and selection of appropriate methods, as applied to current issues in sociocultural anthropology. Prerequisite: permission of instructor.

ANTH 552 - Practicum in Ethnographic Research (3) NW Techniques of data recording, analysis, and writing for the field ethnographer. Prerequisites: 550 and 551. Not recommended for non-anthropology graduate students.

ANTH 553 - Analysis of Linguistic Structures (3, max. 6) NW Syntactic, semantic, or phonological analysis.
Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with LING 553.

ANTH 555 Discourses in Feminist Anthropology Seminar (5) Jacobs Exploration of feminist anthropological theories and the work of their critics. Ways of using feminist anthropology in preparation for and conducting fieldwork. Topics include foundations in feminist anthropology, grand theories, variation in feminist theoretical foci within the "four fields," responses to critics. Prerequisite: graduate standing. Offered: jointly with WOMEN 555.

ANTH 556 The Evolution of the Family (3) Geological evolution of species-specific behaviors; forms of sociality linked to human mating, reproduction, parenting. Cultural evolution of human systems of kinship, marriage as fitness-maximizing adaptations to wide range of habitats. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior. Offered: jointly with SOC 556.

ANTH 558 Types and Techniques of Transcription (3) Analysis of aims and problems in the written symbolization of structured data. Emphasis on field transcription of human movement, music, and language. Prerequisite: 520C or permission of instructor.

ANTH 559 Seminar in Language and Culture (3, max. 8) Theoretical and methodological problems in language and culture.

ANTH 561 Seminar in Methods and Theories (3, max. 9)

ANTH 562 Clinically Applied Anthropology (3) Anthropology as it relates to interdisciplinary delivery of health care. Cultural variation in illness beliefs and behavior, types of healing practices, illness prevention, and social support networks. Prerequisites: graduate standing and permission of instructor. Offered: jointly with CHCS 562.

ANTH 565, 566, 567 Theory of Sociocultural Anthropology (5, 3, 3) Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisites: graduate standing in anthropology or permission of instructor; 565 for 566; 566 for 567.

ANTH 571 Communication Anthropology (3-9)

ANTH 575 Cultural Construction of Illness: Seminar in Medical Anthropology (5) Historical and comparative examination of depression, neurasthenia, somatization, hypochondriasis, and hysteria. Anthropology of psychosomatics and psychiatry, including cultural analysis of selected biomedical, indigenous folk medical, and popular common-sense conceptualizations of illness.

ANTH 584 Ways of Speaking (6) Theory and literature of the ethnography of communication, with special emphasis on the descriptive-comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with SPCH 584.

ANTH 590 Seminar in Museum Theory (3) Fundamental theoretical issues involved in current museum administrative and operations work, including administrative structure, organizational conflicts, museum-community relations, and museum educational programming. Prerequisite: permission of instructor.

ANTH 591 Seminar in Museum Operations (3) Designing hypothetical museums and creating a first year of operations. Design elements include architectural plan, staffing plan, initial and recurring budgets, security system, records system, educational plan, and policy making. Prerequisite: 590 or permission of instructor.

ANTH 592 Seminar in Museum Specimen Documentation (3) Seminar discussion of museum specimens, documentation research approaches, including technological, institutional, and aesthetic studies, and aesthetic studies. Documentation of a collection and reference work. Prerequisites: 590, 591, or permission of instructor.

ANTH 599 Effective Teaching of Anthropology (1) Class required of all graduate students who accept teaching assistantships: instruction in teaching methods and issues, e.g., motivational ethics, preparing and delivering lectures, leading discussion groups, test writing and grading, diversity in the classroom.

Archaeology

ARCHY 501 Preceptorial Reading (6) For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the reconstruction of prehistory. Not open to graduate students in the archaeology program.

ARCHY 520 Principles of Archaeological Theory (5) Review of principles of archaeological theory. Student presentation of research on archaeological theory and seminar discussion or presentations. Open only to first-year graduate students in anthropology.

ARCHY 560 Seminar in Archaeological Methods (5, max. 9) Basis material methods, and applications of a particular archaeological analytical method, or closely related set of methods. Prerequisite: permission of instructor.

ARCHY 570 Seminar in Archaeological Theory (3, max. 12) Detailed consideration of a particular archaeological theory or closely related set of theories, including their methodological and epistemological bases. Prerequisites: 497, 498.

ARCHY 571 Field Course in Archaeology (5) Introduction to field acquisition of archaeological data through survey and excavation. Ongoing field projects; instructional emphasis on recovery and recording techniques and on management of field projects. Prerequisite: permission of department.

ARCHY 572 Seminar in North American Archaeology (3, max. 6) Selected problems in the archaeology of North America. Not open to graduate students in the archaeology program.

ARCHY 575 Archaeological Field Research Design (6) Nature of the archaeological record, and methods and techniques of field research, to illustrate range of data sources and modern techniques of general applicability. Practical experience in mapping, map interpretation, sampling design, remote sensing, photogrammetry, and research proposal writing. Prerequisite: permission of instructor.

ARCHY 576 Designing Grant Proposals (6) Design and writing of grant proposals for archaeological research at both dissertation and senior investigator levels, with particular emphasis on National Science Foundation structure and requirements. Prerequisites: upper-level graduate standing and permission of instructor.

ARCHY 591 Advanced Field Course in Archaeology (5-9) For students with previous field experience and graduate work in archaeology. Emphasis on decision making in field and project management. Prerequisites: 497, 498, 571, 575, or permission of instructor.

ARCHY 600 Independent Study or Research (*) Prerequisite: permission of instructor.

ARCHY 601 Independent Study (3-9, max. 9) Credit/no credit only.

Physical Anthropology

PHY A 502 Preceptorial Reading (6) For beginning graduate students who have not had adequate training in the study of primate behavior, and methods involved in the study of evolution, human genetics, and the evolution of modern populations. Not open to graduate students in the physical anthropology program.

PHY A 510, 511 Theory and Human Evolution (3, 3) Extensive discussion of evolutionary theory from the views of Darwin through those of contributors to the modern synthesis. Human evolution is stressed, as are controversial aspects of human evolutionary history. Prerequisite: adequate standing or permission of instructor for 510, 510 or permission for 511.

PHY A 550 Skeletal Biology (5) Newell Composition and structure of skeletal tissue. Principles of growth, development, and remodeling applied to the interpretation of microstructure. Various techniques used to analyze bone are covered including histomorphometry and isotope analysis as is their contribution to interpretation of the archaeological record.

PHY A 558 Human Reproductive Ecology (3) A consideration of the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, nuptiality, duration of birth intervals, and reproductive senescence. Prerequisite: permission of instructor.

PHY A 569 Demographic Analysis in Biological and Social Anthropology (5) Leonetti Demographic analysis relevant to anthropological research on small populations. Use of data collected through local surveys, genealogical methods, and from other sources. Focuses on the use of demography to analyze social and biological processes with adaptive and/or cultural-historical significance. Theoretical approaches to these processes are emphasized.

PHY A 583 Topics in Growth and Development (3, max. 9) Seminar on various topics of human or nonhuman primate growth and physical/behavioral development. Subject matter varies by quarter. Prerequisite: 484 or permission of instructor.

PHY A 584 Topics in Ecology and Adaptation (3, max. 9) Seminar dealing with various aspects of ecology and adaptation. Topics vary each quarter. Prerequisite: permission of instructor.

PHY A 588 Topics in Primate Evolution (3) Emphasis on fossil taxa and their importance in understanding the morphologies and distributions of members of the modern genus. Prerequisites: 488 and permission of instructor.

PHY A 589 Topics in Hominid Evolution (3) Emphasis on the fossil taxa and their importance in understanding the evolutionary history of the modern genus. Prerequisites: 489 and permission of instructor.

PHY A 590 Current Issues in Human and Nonhuman Primate Evolution (2, max. 18) Biweekly presentation by participants and guest lecturers of current literature and ongoing research in topics pertaining to human and nonhuman primate evolution, biology, anatomy, genetics, variation, and behavior. Prerequisite: graduate standing in physical anthropology or permission of instructor.

PHY A 600 Independent Study or Research (*) Prerequisite: permission of instructor.
for graduate students in applied mathematics. Students interested in an undergraduate curriculum in applied mathematics are advised to enter the mathematics program for the Bachelor of Science degree in the Department of Mathematics and to elect the applied mathematics concentration. They are encouraged to consult the Chairperson of Applied Mathematics for counseling.

**Graduate Program**

The Department of Applied Mathematics offers graduate programs of study leading to the degrees of Master of Science and Doctor of Philosophy. These programs involve (1) broad training in those mathematical methods and techniques that have been found useful in applications, (2) in-depth study in at least one field of application, and (3) opportunities to explore various specialized aspects of applied mathematics.

**Master of Science, Doctor of Philosophy Degrees**

Admission Requirements: Prospective students for the Master of Science program should hold an undergraduate degree either in mathematics with a strong background in applications or in physical, engineering, biological, or social science with a strong background in applications-oriented mathematics. Students who wish to apply to the doctoral program need to show evidence of completion of course work equivalent to that described for the master's degree, with at least a 3.0 GPA. In addition, admission to the doctoral program is contingent upon passing a qualifying examination and indication of the ability or potential to perform independent research.

It is required that the Graduate Record Examination be taken and the results sent to Graduate Admissions. Three letters of recommendation are required in support of each application and they should be sent directly to the department. After receiving notification of admission to the Graduate School and a registration appointment, the student should contact the department. (On the Application for Graduate School Admission form, the student should be sure to indicate the desire to enter the Department of Applied Mathematics, rather than Mathematics.)

**Master of Science Degree**

The M.S. degree program is designed to provide the student with a working knowledge of several basic areas of applied mathematics, together with exposure to at least one specific area of application. The applied mathematics areas include complex variables, ordinary and partial differential equations, applied linear algebra, numerical analysis, calculus of variations or optimization, and applied probability and statistics. In addition, M.S. students must take the department course offering in mathematical modeling and must acquire some experience in high-speed computation before receiving a degree. The specific area of application is chosen by the student from a broad range of outside fields, including engineering, the physical, biological, and certain areas of medical science. After fulfilling the basic course requirements, the student can obtain the M.S. degree by additional course work to complete the required 40 credits for the degree. Students may elect to do an M.S. thesis in lieu of a maximum of 6 additional course credits. Detailed requirements for the M.S. degree are listed in the applied mathematics graduate program guidelines.

**Doctor of Philosophy Degree**

The Doctor of Philosophy degree in applied mathematics is primarily a research degree, not conferred as a result of course work alone. The granting of the degree is based on general proficiency and attainment in applied mathematics, together with a demonstrated ability to carry out an independent investigation which is described in a doctoral dissertation. Proficiency and attainment in applied mathematics is demonstrated by passing the General Examination which tests the student's ability to probe a new area of research and to exercise critical judgment on a technical issue of current importance in the chosen field of research. The doctoral dissertation must exhibit original mathematical contributions in an important area of application. The Final Examination and defense of the dissertation is a research seminar presentation open to the public. The detailed requirements for the doctoral degree are listed in the applied mathematics graduate program guidelines.

**Financial Aid**

Both research and teaching assistantships are available to full-time students who qualify. In addition, fellowship funds for the study of applied mathematics are available and awarded on a competitive basis.

**Research Facilities**

Students in applied mathematics have access to a departmental computing lab equipped with 15 UNIX workstations and X-terminals, with centralized file storage. Software for scientific visualization, numerical analysis, symbolic mathematics, programming, and document preparation is available. The lab is connected to the campus network and the global Internet, providing access to supercomputing facilities and other resources.

**Correspondence and Information**

Graduate Program Coordinator 408 Guggenheim, FS-20

**Faculty**

**Chairperson**

Ka Kii Tung

**Professors**

Baker, Marcia * 1971, (Adjunct); PhD, 1971, University of Washington; cloud physics, atmospheric geophysics.

Criminale, William O. * 1968; PhD, 1960, Johns Hopkins University; fluid dynamics, mathematical physics, nonlinear mechanics, stability theory.

Ishimaru, Akira * 1953, (Adjunct); PhD, 1958, University of Washington; electromagnetics, optics, acoustics, image processing, computational electromagnetics, scattering theory.

Kevorkian, Jirair * 1964; PhD, 1961, California Institute of Technology; partial differential equations, perturbation theory.

Kostly, George * 1980, (Adjunct); PhD, 1974, Eotvos Lorand University (Hungary); applications of stochastic processes,-reacting turbulent flows, reactor dynamics, two-phase flow.

Le Veque, Randall J. * 1985; PhD, 1982, Stanford University; numerical analysis and solution of nonlinear partial differential equations.

Murray, James D. * 1968; PhD, 1956, Oxford University (UK); mathematical biology, biological pattern formation, wound healing, spread of epidemics.

O'Malley, Robert E. Jr. * 1990; PhD, 1966, Stanford University; singular perturbations and asymptotic methods.

Pearson, Carl E. * 1967, (Emeritus); PhD, 1949, Brown University; wave propagation, fluid dynamics, numerical analysis, optimization.

Riley, James J. * 1983, (Adjunct); PhD, 1971, Johns Hopkins University; fluid mechanics, especially turbulent flows.

Rockafellar, R. T. * 1966; PhD, 1963, Harvard University; variational analysis and optimization.

Tung, Ka Kii * 1988; PhD, 1977, Harvard University; atmospheric and geophysical fluid dynamics.

Vagners, Juris * 1967; PhD, 1967, Stanford University; dynamics, controls and optimization.

Wan, Frederic Y. * 1983; PhD, 1965, Massachusetts Institute of Technology; solid mechanics and mathematical modeling.

**Associate Professors**

Adams, Joyce M. * 1985; PhD, 1983, University of Virginia; numerical algorithms for parallel computers.

Breher, Christopher S. * 1984; PhD, 1984, Massachusetts Institute of Technology; computer science, software design, and computer systems.

Storl, Duane W. * 1983, (Adjunct); PhD, 1983, Cornell University; nonlinear dynamics and vibrations, dynamical systems, perturbations and bifurcations.

Yeh, Harry H. * 1983, (Adjunct); PhD, 1983, University of California (Berkeley); fluid mechanics, water wave motion, coastal and hydraulic engineering.

**Assistant Professors**

Kot, Mark * 1989; PhD, 1987, University of Arizona; mathematical ecology, nonlinear dynamics, and population biology.

Schmidt, Peter J. * 1993; PhD, 1993, Massachusetts Institute of Technology; computational fluid dynamics, hydrodynamic stability theory, transition to turbulence.

Winters, Craig B. * 1984, (Affiliate); PhD, 1989, University of Washington.

**Course Descriptions**

See page 55 for explanation of course numbers, symbols, and abbreviations.

**Courses for Undergraduates**

**AMATH 351, 352** Quantitative Methods I, II (3,3) NW Applications of mathematical techniques to problems in the sciences and engineering. Emphasis on formulation, solution, and interpretation of results. 351: ordinary differential equations. 352: approximate methods; Fourier series; partial differential equations; boundary-value problems. Prerequisites: one year of physics and MATH 126 for 351; MATH 307 for 352. Offered: jointly with MATH/OCEAN 351, 352.

**AMATH 353** Quantitative Methods III (3) NW Development and application of numerical methods and algorithms to problems in the applied sciences and engineering. Topics include linear algebra, curve fitting, root-finding algorithms, numerical integration, and ordinary differential equations. Prerequisite: MATH 126. Offered: jointly with OCEAN 353.

**AMATH 381, 382, 383** Introduction to Mathematical Modeling (3,3,3) NW Simple discrete and continuous models of diverse natural and social phenomena with particular reference to the unity of the tools of mathematical analysis useful in their study. 381: discrete methods; 382: mixture of discrete and continuous methods; 383: continuous methods. Mathematical topics and phenomena. Prerequisites: MATH 126 and MATH 306 for 381; MATH 307 or AMATH 351 for 382; MATH 324 or AMATH 351 and 352 for 383. Offered: jointly with MATH 381, 382, 383; A.W.Sp.

**AMATH 400** Methods of Engineering Analysis (3) NW Applications of mathematics to problems in chemical engineering, vector calculus, properties and methods of solution. Prerequisites: MATH 125 or permission of instructor. Offered: jointly with CH E 400 A.

**AMATH 401** Methods in Applied Mathematics I (4) NW Emphasis on acquisition of solution techniques; ideas illustrated, specific example problems arising in science and engineering. Applications of vector differ-
ent calculus, complex variables. Line, surface integrals; integral theorems; Taylor and Laurent series, contour integration. Prerequisites: MATH 206, MATH 304 and AMATH 311 or MATH 307 or permission of instructor. Offered: jointly with ENGR 401.

AMATH 402 Methods in Applied Mathematics II (4) NW See 401. Applications of ordinary differential equations; review of elementary concepts for first and second order equations; power series and Frobenius solutions. In particular, solution of systems of differential equations, eigenvalues. Prerequisites: MATH 205, MATH 324 and AMATH 351 or MATH 307 or permission of instructor. Offered: jointly with ENGR 402.

AMATH 403 Methods in Applied Mathematics III (4) NW See 401. Applications of partial differential equations; linear and quasilinear first order equations, characteristics; classification of linear second order equations; basic solution techniques for parabolic, elliptic, and hyperbolic equations; Green’s functions and integral methods. Prerequisites: 402 or permission of instructor. Offered: jointly with ENGR 403.

Courses for Graduates Only

AMATH 500 Special Studies in Applied Mathematics (1-12) Lectures and discussions of topics of current interest in applied mathematics. May not be offered every quarter; content may vary from one offering to another. Prerequisite: permission of instructor.

AMATH 501 Seminar in Applied Mathematics (1, max. 5) Topics and selected problems of current interest in applied mathematics. Credit/no credit only.

AMATH 502 Applied Mathematics Clinic (1-2) The clinic provides consulting service for problems from different academic units requiring assistance in formulation, analysis, and interpretation of mathematical models. Students learn to delineate sources of difficulties, identify or devise a method of solution, and effectively communicate it to clients. Credit/no credit only. Prerequisites: 566, 569, and 584.

AMATH 503 Mathematical Biology (13) Mathematical modeling in biomedical sciences (mainly ecology, epidemiology, physiology, and zoology). Topics covered include models (continuous and discrete), population interactions, disease dynamics, reaction kinetics, biological oscillators, oscillator generated wave phenomena, epidemics, and the dynamics of infectious diseases. Prerequisite: 402 or equivalent. Offered: A.

AMATH 504 Mathematical Biology II (3) Mathematical modeling in the biomedical sciences (mainly ecology, epidemiology, and zoology). Topics include spatial spread of populations, traveling wave phenomena in biology, reaction diffusion theory, biological pattern formation mechanisms, mechanochemical theory of morphogenesis, spatial spread of epidemics. (May be taken independently of 503.) Prerequisites: 402, 403 or equivalents; ordinary, partial differential equations. Offered: W.

AMATH 505 Introduction to Fluid Dynamics (3) Eulerian equations of mass and motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress and strain relations; Kelvin’s theorem, vortex dynamics; potential flows, conformal mapping; flows with high, low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisites: 401, 402, 403, or permission of instructor. Offered: A.

AMATH 506 Applied Probability Models (4) Overview of probability models, random variables, independence and conditional probability. Markov chains, stationary time series. Prerequisites: some advanced calculus and linear algebra; familiarity with elementary discrete probability models. Offered: jointly with STAT 506; Sp.

AMATH 509 Theory of Optimal Control (3) Trajectories obtained from ordinary differential equations with control variables. Controllability, optimality, the maximum principle. Relaxation and the existence of solutions. Prerequisites: 515 or MATH 307; MATH 324, 325 for 507; 508. Recommended: 402, 403, or MATH 428, 429. Offered: jointly with MATH 507, 508.

AMATH 510 Applications of Optimization in Engineering Design (3) Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering design. Prerequisites: EGR 515 and MATH 324 or permission of instructor. Offered: jointly with IND E 510.

AMATH 514 Networks and Combinatorial Optimization (3) Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems; Algorithms and applications. Prerequisites: MATH 308 and 324 or equivalents. Offered: jointly with MATH 514.

AMATH 517 Optimization Under Uncertainty (3) Sequential optimization problems involving random variables. Dynamic programming, stochastic programming, Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications to optimal stopping, inventory control, resource management. Prerequisite: 506 (or an introduction to basic concepts of probability such as STAT 390 or 394, 395), MATH 308 and 324. Offered: jointly with MATH 517.

AMATH 518 Topics in Applied Optimization (3) Problems and techniques in special areas of optimization, such as engineering design, resource management, stochastic programming, games, variational inequalities, and parameter identification in mathematical models. Prerequisites: MATH 324, or permission of instructor. Offered: jointly with MATH 518; odd years.

AMATH 519 Tensor Analysis (3) Cartesian tensors; motivation, manipulation, applications; Riemannian space; Christoffel symbols, geodesics, covariant differentiation. Curvature tensor, geodesic deviations, flat space. Special local coordinate systems. Applications to classical mechanics, continuum mechanics, electromagnetism, relativity, special. Prerequisites: 401 or MATH 324, or permission of instructor. Offered: jointly with MATH 519; odd years.

AMATH 520 Mathematical Modeling (3) Processes used in physical, biological, and economic sciences, as well as in engineering, for providing mathematical descriptions of various phenomena pertinent to these disciplines. Emphasis on the modeling rather than on the solution. Students must have an undergraduate background in one or more mentioned areas. Offered: W.

AMATH 521 Mathematical Ecology (4) Emphasis on mathematical dynamics of populations. Topics include single species deterministic and stochastic models, delays, discrete systems, bifurcations, multiple-species interactions (competition, predation, mutualism), oscillations and chaos, optimal control theory, resource management, age-structured models, and multi-sex models. Prerequisite: 402 or equivalent. Offered: Sp.

AMATH 530 Parallel Numerical Algorithms (3) Characteristics of parallel architectures, design and complexity analysis of parallel algorithms (communication, speedup, execution time, problem decomposition, problem ordering, problem mapping issues), parallel methods for parabolic and hyperbolic PDEs, case studies of applications on current parallel machines. Prerequisite: 584 or equivalent.

AMATH 550 Mathematical Topics in Analytical Dynamics (3) In-depth study of one or more aspects of current interest in analytical dynamics, such as the stability of many body systems, resonance and passage through resonance, exact and adiabatic invariants. Prerequisites: 403, others depending on topics. Recommended: basic graduate course in analytical dynamics.

AMATH 551 Mathematical Topics in Solid Mechanics (3) Topics vary and include: foundations of plate theories; structure of linear shell theory, static-geometric duality; asymptotic solutions for nonlinear plates and shells; bifurcation theory and solution methods; wave propagation and stability problems in random environments. Prerequisites: 403; graduate-level course in mechanics; and others, depending on topics.

AMATH 552 Mathematical Topics in Fluid Dynamics (3) Mathematical development and foundations in fluid dynamics; topics selected from boundary layers, stability theory, turbulence, rotating-stratified fluid motion, gas dynamics. Prerequisites: 403, others depending on topics. Recommended: graduate-level course in fluid dynamics.

AMATH 588 Analysis in Engineering and Science II (3) Survey of practical solution techniques for ordinary differential equations. Linear systems of equations; eigenvalues, eigenvectors, stability of linear systems; asymptotic expansions; regular and singular perturbations. Recommended: 402 or equivalent. Offered: jointly with A A 568; W.

AMATH 569 Partial Differential Equation (3) Analytical solution techniques for linear partial differential equations. Discussion of how these arise in engineering and science. Transform and Green's function methods. Classification of second-order equations, theory and applications of method of characteristics. Prerequisite: 403, 568 or MATH 426 or permission of instructor. Offered: jointly with AAMATH 569; Sp.

AMATH 574 Nonlinear Dynamics and Chaos (3) Overview of ways in which complex dynamics arise in nonlinear dynamical systems. Topics include bifurcation theory, difference equations, universality, Poincaré maps, routes to chaos, horseshoe maps, Hamiltonian chaos, fractal dimensions, Liapunov exponents, and the analysis of time series. Examples from biology, mechanics, and other fields. Prerequisite: 568 or equivalent.

AMATH 577, 578 Perturbation Theory I, II (3,3) Basic concepts of asymptotic expansions with applications to linear partial differential equations. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniform valid solutions, the methods of multiple scales and averaging, weakly nonlinear wave propagation problems and resonant phenomena, nonlinear wave propagation in fluid, solid and particle mechanics. Post-master's sequence. Prerequisites: 567, 568, 569, or equivalent. Offered: even years.

AMATH 587 Asymptotics and Special Functions (3) Origin and properties of higher transcendent functions, theoretical basis and applications of Laplace, Fourier, Bessel, Meijer transforms; asymptotic analysis, including methods of steepest descent and stationary phase, WKB. Prerequisite: 567, 568, 569, or equivalent. Offered: jointly with MATH 587.

AMATH 594, 595, 596 Numerical Analysis (3,3,3) Error analysis, linear systems, LU, QR and SVD factorizations, eigenvalues, least squares, iterative methods for linear and nonlinear systems, optimization, interpolation, approximation, splines, Fourier series, FFTs. Prerequisite: 584 or MATH 465 or permission of instructor. Offered: jointly with MATH 594, 595, 596.

AMATH 597, 598, 599 Numerical Solutions of Differential Equations (3,3,3) Numerical quadrature and solution of ordinary differential equations, initial- and boundary-value problems, solution of partial differential equations by finite difference and finite element methods, stability analysis and boundary conditions, solution of large sparse linear systems. Prerequisites: 584 or MATH 465 or permission of instructor. Offered: jointly with MATH 597, 598, 599.

AMATH 600 Independent Research or Study (*) Credit/no credit only.

AMATH 700 Master's Thesis (*) Credit/no credit only.

AMATH 800 Doctoral Dissertation (*) Credit/no credit only.

Postbaccalaureate applicants who hope to transfer to art from other schools, departments, or colleges on the campus may pick up a supplementary form from the School of Art advising office. This supplementary form, a complete academic record, and slides of studio work are required and may be submitted to the School of Art advising office at any time.

Bachelor of Arts Degree

MAJOR REQUIREMENTS

General Art: ART 120, 121, 122, 123, 124 and one course chosen from 131, 132, 133, 134; ART H 203 plus 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits in non-Western art; 43 credits chosen from the following optional fields. Note that one option includes no more than 20 credits and the others no more than 15 credits each. These credits to be drawn from undergraduate courses in art history, ceramics, drawing, fiber, metal, painting, photography, printmaking, or sculpture, but not to duplicate the above foundations courses.

Bachelor of Fine Arts Degree

A minimum of 198 credits is required for graduation with a Bachelor of Fine Arts degree.

MAJOR REQUIREMENTS

Ceramic Art: ART 120, 121, 122, 123, 124, 201, 353 (15 credits), 485 (15 credits), 486 (10 credits); 15 credits selected from the following: ART 256, 258, 272, 335, 337, 357, 21 studio art or related elective credits to include one course from 131, 132, 133, 134; ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits of non-Western art; 3 elective art history credits.

Fiber Arts—Surface Design Option: ART 120, 121, 122, 123, 204, 205, 206, 215, 227, 228 (10 credits), 259, 268, 327 (10 credits), 440, 441, 442; 26 studio art or related elective credits to include one course from 131, 132, 133, 134, and 15 credits from 201 202, 230, 258, 349; ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits of non-Western art; ART 251.

Fiber Arts—Weaving Construction Option: ART 120, 121, 122, 123, 204, 205, 206, 207, 365, 366, 368, 376, 377, 378, 466, 467, 468, 478, 479, 480; 13 studio art or related elective credits to include one course from 131, 132, 133, 134; ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits of non-Western art; 3 elective art history credits.

Graphic Design: ART 120, 121, 122, 123, 124, 125, 204, 205, 206, 207, 365, 366, 368, 376, 377, 378, 466, 467, 468, 478, 479, 480; 13 studio art or related elective credits to include one course from 131, 132, 133, 134; ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits of non-Western art; 3 elective art history credits.

Industrial Design: ART 105, 106, 109, 110, 254, 261, 262, 263, 316, 317, 318, 321, 322, 422, 445, 446, 447, 22 studio art or related elective credits. ARCH 498 (8 credits); CAUP 270, 280; 120 credits from PHYS 110, 111, 214, 215, 216, ART H 201, 202, 203; 3 elective credits.

Metal Design: ART 120, 121, 122, 123, 124, 125, 204, 205, 206, 207, 370, 358, 359, 356, 357, 460 (15 credits); 15 credits from 201, 202, 252, 255, 272, 335, 337, 26 studio art or related elective credits to include one course from 131, 132, 133, 134; ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits in non-Western art; 3 elective art history credits.

Painting: ART 120, 121, 122, 123, 124, 125, 204, 205, 206, 207, 370 (10 credits), 360 (10 credits), 463 (15 credits); 26 studio art or related elective credits to include one course from 131, 132, 133, 134; ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits in non-Western art; any twelfth-century art history course.
Photography: ART 120, 121, 122, 123, 124, 230, 370, 371, 372, 411 (15 credits), 10 credits from 412, 413, 414; 415 (10 credits); 31 studio art or related elective credits to include one course from 131, 132, 133, 134, ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits in non-Western art; ART H 232.

Printmaking: ART 120, 121, 122, 123, 124, 345, 347, 349; 5 credits from 245, 246, 348, 350; 30 credits from 450, 452, 453, 454, 455; 256, 260, 265 (10 credits); 16 studio art or related elective credits to include one course from 131, 132, 133, 134; ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits in non-Western art; any twentieth-century art history course.

Sculpture: ART 120, 121, 122, 123, 124, 233, 235, 272, 274, 332 (10 credits), 335, 337, 436 (15 credits); 31 studio art or related elective credits to include one course from 131, 132, 133, 134; ART H 203; 10 credits from ART H 201, 202, 204, 205, 206, 330, 331 with a minimum 5 credits in non-Western art; 3 elective art history credits.

**Graduate Program**

Norman K. Lundin, Graduate Program Coordinator

Students accepted for admission into the Master of Fine Arts degree program in ceramic art, fiber arts, graphic design, industrial design, metal design, painting, photography, printmaking, or sculpture will be required to complete a minimum of 63 credits of scheduled class work and 9 credits of thesis for a total of 72 credits for the degree. No foreign language is required or the Graduate Record Examination. The thesis is in the nature of a studio project, such as a series of paintings, prints, ceramic objects, or sculptures.

A selection of the student's thesis work must be included in the annual studio master's exhibition of the School of Art.

Graduate students may participate in the School of Art's study abroad program.

**Admission Requirements**

Graduate standing is granted only on presentation of credentials from art schools or university art departments whose standards are recognized by this school. Samples of work done in these schools or art departments also must be presented by applicants for admission to the Master of Fine Arts degree program.

Students who desire to pursue a course of study leading to the master's degree must have a GPA of 3.00 or better in the undergraduate art major and must have completed the equivalent of the undergraduate degree requirements in the School of Art, University of Washington. Undergraduate work beyond the basic minimum may be required if it is necessary to make up deficiencies.

**Financial Aid**

The studio divisions offer several scholarships and financial aid programs for students who qualify. These programs include endowments and organizational and privately supported scholarships. Information concerning scholarships is available from the graduate program coordinator. Also available to graduate students are teaching assistantships, usually awarded to a limited number of candidates after the first quarter in residence.

**Correspondence and Information**

Graduate Program Coordinator 102 Art, DM-10
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Foundation Courses

ART 120 Issues and Influences (2) VLPA Introduction to the historical, contemporary, and future issues and directions from each of the School's ten programs. Credit/noncredit only. Prerequisite: art major.

ART 121 Drawing I (5) VLPA Drawing studied as the means of creating a coherent visual and expressive statement. Development of ability in the fundamentals of drawing: line, tone, and gesture, theory and practice of linear and aerial perspective, and basic concepts of composition. Prerequisite: art major. Offered: AWSp.

ART 122 Drawing II (5) VLPA Introduction of new materials and procedures, and varied conceptual approaches with greater individualization of expression and treatment of subject. Emphasis on abstract thinking as a factor in interpreting the visual world. Prerequisite: 121. Offered: AWSp.

ART 123 Two-dimensional Design: Structure and Color (5) VLPA Exploration of fundamental visual phenomena as defined by relationship and context. Compositional studies that allow for analysis of line, form, mass, tonality, and color. Exercises begin with subject interpretation and translation, progress to abstraction, and conclude with a series of variations on a visual theme. Prerequisite: art major. Offered: AWSp.

ART 124 Three-dimensional Design Fundamentals (5) VLPA Through use of a variety of materials, three-dimensional fundamentals are investigated for formal and conceptual concerns as they apply to the visual arts. Prerequisite: art major. Offered: AWSp.

Foundation Electives

ART 131 Alternative Approaches to Art and Design (5) VLPA Presentation of process through which artists discover and translate ideas, feelings, and concepts into images or objects. Use of a wide variety of methods and approaches, from traditional to technological, to promote visual expression. Discussion and critiques leading toward better understanding of the creative process. Prerequisites: foundation courses.

ART 132 Introduction to Figure Drawing (5) VLPA Introduction to the human figure as historically traditional subject matter as well as an important component in self expression. Covers proportion, foreshortening, and composition. Prerequisites: foundation courses.

ART 133 Color Theory and Practice (5) VLPA Examination of color as distinct visual phenomenon with investigations of its practical, theoretical, and illustratory aspects. Various media and materials employed in exercises and compositions that demonstrate properties of color, symbolism, and perception and their potential applications to art and design. Prerequisites: foundation courses.

ART 134 Concepts in Three-dimensional Art (5) VLPA Exploration, study, and application of thematic concepts not generally associated with traditional three-dimensional art forms. Investigation of themes such as installation, performance, public, and socio-political art. Prerequisite: foundation courses.

ART 201 Ceramic Art: Handbuilding (5) VLPA Introduction to handbuilding; kiln firing and glazing processes. Examination of contemporary sculpture in clay. Prerequisites: foundation courses.

ART 202 Ceramic Art: Wheel Throwing (5) VLPA Introduction to wheel throwing, glazing, and kiln firing processes. Emphasis on contemporary vessel form in clay. Prerequisites: foundation courses.

ART 203 Design and Materials: Fabric Construction (5, max. 15) VLPA Knotting, hooking, stitching, and other nonwoven constructional techniques with a variety of textile fibers. Prerequisites: foundation courses.

ART 205 Graphic Design (5) VLPA Basic graphic design problem solving. Prerequisites: foundation courses and pre-graphic design major.

ART 206 Graphic Design (5) VLPA Basic graphic design problem solving. Prerequisite: 205.

ART 207 Typographic Design: Methods and Processes (5) VLPA Investigates operational typographic and reproduction methods as a foundation for two-dimensional design and laboratory assignments. Primary objective is understanding computerized phototypesetting, offset lithography, and photomechanical techniques as they relate to the design process. Prerequisite: 206.

ART 215 Principles of Dyes and Dyeing (5) VLPA History of dyes and dyed textiles from ancient world use through current industrial practices. Emphasis on dye studio practices and practical application of various dyes for accuracy and safety. Fiber preparation, dye fixation, and record-keeping of dye tests. Prerequisites: art major.

ART 226 Fiber Arts: Introductory Weaving (5) VLPA Basic techniques and processes of four-harness loom woven structures. Fundamentals of drafting and loom design and operation, including study of fiber technology and dye chemistry. Prerequisites: foundation courses.

ART 227 Design and Materials: Surface Design for Fabric (5, max. 15) VLPA Printing and dyeing of textiles. Techniques include block printing, batik, tie and dye, discharging. Prerequisites: foundation courses.

ART 230 Introductory Photography (5) VLPA Introduction to theory, techniques, and processes of still photography. Emphasis on darkroom procedures and camera use. Projects stress the visual and creative potential of photography as an art form. Students must provide a camera with lens, shutter, and aperture controls. Prerequisite: foundation courses and permission of adviser.

ART 232 Conceptual Art Studio (5) VLPA Beginning level conceptual art studio focusing on non-traditional formats, idea oriented artworks, and performance art. Prerequisite: foundation courses.

ART 245 Introduction to Printmaking (5) VLPA Introduction to contemporary printing methods such as mono-print, monoprint, and photopoly. Survey of historical and current approaches to the art of printmaking. Prerequisites: foundation courses.

ART 246 Images on Paper (5, max. 10) VLPA Combines traditional printmaking with drawing and painting. Experimental in nature. Student works with various media and, in traditional printmaking, from one medium to another, deals with the unique characteristics of each. Prerequisites: foundation courses.

ART 251 History of Textiles (3) VLPA Overview of Western textiles from Coptic tapestry through industrialization. Discussion of textiles not only in aesthetic terms but also as cultural documents arising from, and reflecting, a broad range of societal pressures and concerns. Special topics in contemporary issues and non-Western textiles with emphasis on holdings in the University collection.

ART 254 Design and Materials: Metal (3) VLPA Basic techniques in manipulation and construction of metals. Prerequisites: foundation courses.

ART 256 Painting (5) VLPA Beginning oil painting. Prerequisites: foundation courses.

ART 257 Painting (5) VLPA Oil painting. Prerequisite: 256.

ART 258 Jewelry Design (5) VLPA Introduction to jewely design and construction through techniques of sawing, filing, soldering, forging, and casting in silver, copper, bronze, and brass, as well as simple stone setting. Prerequisites: foundation courses.

ART 259 Water-Soluble Medias (5, max. 15) VLPA Prerequisites: foundation courses.

ART 260 Art Works on Paper (5, max. 15) VLPA Experiments and projects in various techniques of drawing, assemblage, and painting on paper. Prerequisite: 257.

ART 261, 262, 263 Introduction to Industrial Design (5,5,5) VLPA Fundamentals of three-dimensional design. Form studies in relation to geometry, structure, value, production, meaning, and context. Prerequisites: foundation courses and permission of instructor for 261; 261 for 262; 262 for 263.

ART 265 Intermediate Drawing (5, max. 15) VLPA Prerequisites: foundation courses.

ART 272 Beginning Sculpture Composition (5) VLPA Fundamentals of composition in the round and relief. Prerequisites: foundation courses.

ART 274 Life Sculpture (5, max. 15) VLPA Work in clay from the posed model. Prerequisites: foundation courses.

ART 275 A World History of Art in Public Places (5) VLPA Historical introduction to, and overview of, the placement of art in the public domain, examining major visual and conceptual developments in the history of art. Examples of how various public artworks have manifested or been affected by elements of these developments.

ART 276 Contemporary Directions, Art in Public Places (5) VLPA Contemporary directions in public art focusing on innovative public artworks, artists, and art programs of Washington State. Prerequisite: 275.

ART 307 Intermediate Painting (5, max. 10) VLPA Prerequisite: 257.

ART 309 Portrait Painting (5, max. 10) VLPA Prerequisite: 10 credits in 307.

ART 310 Landscape Painting (5) VLPA Study of the visual, painterly factors that go into the construction of illusion as it pertains to landscape. Aerial perspective and color space as they relate to deep and shallow space emphasized. Prerequisite: 257.

ART 316, 317, 318 Design for Industry (5,5,5) VLPA Product design, working drawings, models, presentation drawings, product analysis, display, marketing. Prerequisites: junior standing in industrial design for 316; 316 for 317; 317 for 318.

ART 321 Furniture Design (5) VLPA Design of a furniture piece. Methodologies and construction, types of hardware, special shop techniques, scale modeling and full-scale functional designs.

ART 322 Industrial Design Materials and Methods (3) VLPA Product form development in current design practice. Prerequisite: junior standing in industrial design.
ART 325 Advanced Drawing (5, max. 15) VLPA
Study at an advanced level involving history, practice, and theory of drawing as an art form. Prerequisite: 15 credits in 265.

ART 326 Intermediate Weaving (5) VLPA Introduction to weaver-controlled structures and tapestry weaving. Alternative weaving tools and loom construction; studio dying processes. Prerequisite: 226.

ART 327 Design for Printed Fabrics (5, max. 15) VLPA Hand-block and silk-screen printing; mass-production design. Prerequisite: 227.

ART 332 Intermediate Sculpture Composition (5, max. 15) VLPA Advanced work in various media and techniques. Prerequisite: 272.

ART 335 Metal Casting (5, max. 15) VLPA Introduction to foundry techniques as applied to fine arts casting of ferrous and nonferrous material. Prerequisite: 272.

ART 337 Welding (5, max. 10) VLPA Study and application of welding methods as a sculpture technique, making use of oxyacetylene, electric arc, and heliarc. Prerequisite: 272.

ART 345 Intaglio (5) VLPA Monotype, collage, dry point, etching, engraving, and aquatint. Photographic and hand-drawn methods. Black and white and color work. Historical overview with emphasis on contemporary developments. Prerequisites: foundations courses.

ART 347 Lithography (5) VLPA Metal plate lithography, photographic, and hand-drawn methods. Traditional stone lithography. Black and white and simple color printing. Historical overview with emphasis on contemporary developments. Prerequisites: foundation courses.

ART 349 Serigraphy (5) VLPA Water-based silk screen printing, paper stencil, photographic process, and hand-drawn methods. Emphasis on color printing on a wide range of surfaces and materials. Historical overview with emphasis on contemporary developments. Prerequisites: foundation courses.

ART 350 Printmaking Special Projects (5, max. 15) VLPA Rotating topics of special interest to printmaking students beyond basic technical instruction found in beginning level courses. Prerequisite: foundation courses.

ART 353 Intermediate Ceramic Art (5, max. 15) VLPA Advanced work in forming, decorating, and glazing. Prerequisites: 201, 202, and permission of instructor.

ART 355 Rendering and Presentation: Metal Smith (5) VLPA Rendering and presentation for the metal smith. Prerequisites: major standing and permission of adviser.

ART 356 Project Design for Industrial Processes (5) VLPA Machine techniques for the design artist. Students learn to use lathe, shaper, and vertical and horizontal mills through a series of design problems. Prerequisites: foundation courses and permission of adviser.

ART 357 Holloware (5) VLPA Processes of raising, soldering, forging in copper, pewter, silver. Prerequisites: foundation courses.

ART 358 Intermediate Jewelry Design (5) VLPA Etching, reticulation, malmeke, electroforming, repousse, and chasing as well as advanced stone setting methods. Prerequisite: 258.

ART 359 Enamelling (5) VLPA Enamel design for metal work or jewelry, champele, plique-a-jour, Limoges, cloisonne on copper, silver, or gold. Prerequisite: permission of instructor.

ART 360 Life (5, max. 10) VLPA Drawing and painting from the model. Prerequisites: 257 and 15 credits in 265.

ART 361 Art Techniques (5, max. 15) VLPA Study of materials and techniques of the artist and their application to painting and drawing. Prerequisite: 256.

ART 366, 376, 378 Graphic Design (5,5,5) VLPA 366: visualizations; 367: basic three-dimensional design; 378: persuasive communications. To be taken concurrently with 366, 377, 378. Prerequisites: 207 for 366; 366 for 367; 367 for 368.

ART 371 Intermediate Photography II (5) VLPA Creative application of extended photographic processes such as non-continuous tone films, electrostatic materials, photomontage, and collage. Emphasis on sequencing in time-based or book formats. Prerequisites: 370 and permission of adviser.

ART 372 Intermediate Photography III (5) VLPA Introduction to photographic color theory and processes with emphasis on color printing on type C darkroom printing. Additional traditional and experimental color materials explored. Prerequisites: 370 and permission of adviser.

ART 390 Sheet Materials (5) VLPA Research and development as part of the design process. Advanced work with sheet materials using an experimental approach. Prerequisite: industrial design major or permission of instructor.

ART 411 Advanced Photography (5, max. 15) VLPA Topics in advanced photography, including: color printing, large-format photography, artificial lighting, and photography image transformation. Prerequisites: 371, 372, and permission of adviser.

ART 412 Contemporary Issues in Photography (5) VLPA An in-depth survey of contemporary artists and issues in photography. Students produce art works that respond, react, and perhaps contradict these developments and trends. Prerequisites: 371, 372, and permission of adviser.

ART 413 Documentary Photography (5) VLPA Projects in photographic documentation involving either large- or small-format photography. Technical, conceptual, and historical considerations in documentary photography. Prerequisites: 371, 372, and permission of adviser.

ART 414 Introduction to Digital Imaging (5) VLPA Creative approach to image manipulation and transformation in two-dimensional space on both IBM and Macintosh platforms. A variety of program, procedures, hardware, input, and output considered and employed. Prerequisites: 371, 372, and permission of adviser.

ART 415 Senior Thesis in Photography (5, max. 10) VLPA Development of a coherent photographic theme or topic evolved over two consecutive quarters resulting in a final photographic portfolio. Prerequisites: 411 and permission of adviser.

ART 422 Industrial Design Computer Graphics (3) VLPA Prerequisite: senior standing in industrial design.

ART 426 Advanced Weaving (5, max. 10) VLPA Loom- and weaver-controlled structures. Topics may include warp patterning, warp painting, printing and dyeing, ikat, and multiple-harness weaves. Prerequisite: 326.

ART 438 Sculpture Composition (5, max. 15) VLPA Individual compositions in various media in large scale. Prerequisites: 15 credits in 332 and permission of instructor.

ART 440, 441, 442 Advanced Individual Projects in Fiber Arts (5,5,5) VLPA Specialized investigation involving surface design and/or fabric structures. Prerequisite: permission of instructor.

ART 445, 446, 447 Advanced Industrial Design (5,5,5) VLPA Market analysis and selected professional problems in industrial design. Consultation techniques; psychological, sociological, and economic factors involved in designing for consumer acceptance. Prerequisites: 318 for 445; 445 for 446; 446 for 447.

ART 450 Advanced Intaglio (5, max. 15) VLPA Prerequisite: 345.

ART 452 Advanced Lithography (5, max. 15) VLPA Prerequisite: 347.

ART 453 Advanced Relief (5) VLPA Prerequisite: 348.

ART 454 Advanced Serigraphy (5, max. 15) VLPA Prerequisite: 349.

ART 455 Advanced Printmaking (5) VLPA In-depth work and critical discussion for senior printmaking students. Prerequisites: 256, 265, 345, 347.

ART 456 Wire Construction (5) VLPA The use of wire to create both jewelry-scale and larger sculptural forms. Translation of textile processes such as coiling, knotting, braiding, and weaving into metal and into development of chains, chain mail, and mesh systems. Prerequisites: 256, 357, and permission of instructor.

ART 457 Advanced Holloware (5) VLPA Individual problems in metal design and construction. Prerequisite: 357.

ART 458 Advanced Jewelry Design (5) VLPA Individual problems in jewelry design and construction. Prerequisite: 359.

ART 459 Advanced Enamelling (5) VLPA Individual problems in enameling. Prerequisite: 359.

ART 460 Advanced Metal Design (5, max. 15) VLPA Advanced individual projects in metal design. Prerequisite: permission of instructor.

ART 463 Advanced Painting (5, max. 15) VLPA Development of individuality in painting through creative exercises. Prerequisites: 10 credits in 307 and 10 credits in 360.

ART 464 Advanced Painting/Drawing (5, max. 15) VLPA Advanced problems in composition. Prerequisite: 15 credits of 463.

ART 466, 467, 468 Graphic Design (5,5,5) VLPA 466: advanced two-dimensional design; 467: exhibition design; 468: independent study. To be taken concurrently with 478, 479, 480. Prerequisites: 368 and 378 for 466; 466 for 467; 467 for 468.

ART 478, 479, 480 Graphic Design (5,5,5) VLPA 478: information design I; 479: information design II; 480: design programs. To be taken concurrently with 484, 487, 489. Prerequisites: 368 and 378 for 468; 468 for 478; 479 for 480.

ART 485 Advanced Ceramics Art (5, max. 15) VLPA Pottery design and construction, stoneware, clay bodies, glazes. Prerequisites: 15 credits in 353 and permission of instructor.
ART 486 Individual Projects in Ceramics (3-5, max. 15) VLPA Advanced individual projects in ceramics with emphasis on pottery, sculpture, kiln building, presentation, and historical and contemporary directions in clay. Prerequisite: 15 credits in 485 and permission of instructor.

ART 489 Graphic Design Seminars (5, max. 15) VLPA Independent and group work in graphic design problems for production. Prerequisites: senior standing in graphic design and permission of instructor.

ART 496 Undergraduate Internship (2-5, max. 10) Faculty supervised fieldwork in art related activities. Credit/no credit only. Prerequisites: upper-division standing in art and permission of adviser.

ART 497 Study Abroad-Studio Individual Projects (3-10, max. 20) VLPA Prerequisite: permission of adviser.

ART 498 Individual Projects-Painting/Sculpture (3/5, max. 15) Prerequisite: permission of instructor.

ART 499 Individual Projects-Design (3/5, max. 15) Prerequisite: permission of instructor.

Bachelor of Arts Degree

Admission Requirements: Postbaccalaureate applicants must file an application with the Office of Admissions and subsequently complete the supplementary (form form provided by the School of Art advising office. Following School of Art review of the form, the Office of Admissions will notify applicants whether or not they are admissible.

Major Requirements: 55 credits in art history, including (1) four core courses covering art history in a variety of cultural contexts—ART H 202 or 361, 380 or 381, 204 or 311, and 330 or 331; and (2) two thematically-oriented courses—ART H 401 plus one other appropriately classified course from a faculty-approved list. One of the following options: (1) ART 121, 122, 123, and 124; or (2) 15 upper-division credits in one of the following areas (exclusive of courses offered jointly with art history): Ancient and Medieval History, Anthropology, Asian Languages and Literature, Classics, Comparative Literature, Comparative Religion, English Literature, Germanic, History of the Americas, History of Asia, Modern, Baroque, 16th-18th centuries, French, or Russian. 

Graduate Program

Patricia Failing, Graduate Program Coordinator

Master of Arts Degree

Admission to the Master of Arts program requires: (1) Bachelor of Arts degree with major in the history of art, or equivalent (students whose backgrounds are adjudged insufficient may be required to satisfy deficiencies before or after entering the program); (2) three letters of recommendation; (3) statement of professional objectives in the discipline; and (4) samples of written research work in art history. Taking the Graduate Record Examination is required.

Graduation requirements are a minimum of 30 credits, which include: (1) 60 credits in art history courses numbered 400 and above, beyond the Master of Arts degree or equivalent, and exclusive of dissertation credits; a maximum of 20 credits in related fields in numerically graded courses numbered 300 and above may be approved for credit in place of art history courses; a minimum of 10 credits must be in areas other than those tested by the General Examination; at least 30 credits must be in 500-level seminars; (2) a reading knowledge of German or French, or of Chinese or Japanese if appropriate; and (3) a research capability in a second language adjudged appropriate to the student's area of study. Knowledge of any other languages considered necessary by the faculty. Language requirements may be satisfied by passing the Graduate School Foreign Language Test (available in German, French, Spanish, and Russian only) with a minimum score of 550, by passing a reading examination administered by the faculty, or by completing the third quarter of second-year French, German, Chinese, Japanese, or other appropriate language as a graduate student at the University of Washington with a minimum grade of 3.0; (3) a General Examination, written and oral, taken prior to enrollment for dissertation credits; this examination covers three specific fields of art history chosen from the following general areas: African, Native American, and Oceanic; East Asian; Ancient; Medieval; Renaissance; Baroque and eighteenth century; Modern; no more than two fields may be selected from the same area; (4) 30 additional credits at the 800 level taken after the General Examination in preparation and defense of the dissertation. These credits must be distributed over a minimum of three quarters.

Financial Aid

The Art History division offers certain funds, as well as teaching assistantships, for art history graduate students. A limited number of grants are awarded to outstanding, talented, graduate students, but it is otherwise a policy to award financial aid and assistantships only to students who have completed at least one year of graduate study.

Art History

209 Art

Art history is the study of the creation, style, and meaning of works of art in relation to the artists and societies that created them. The history of art involves the interaction of styles, techniques, concepts, individual personalities, and social values from many places over long periods of time. This discipline is comparative in nature and requires many different skills, derived from the study of history and culture, foreign languages and literature, iconography, stylistic analysis, and connoisseurship.
ART H 202 Survey of Western Art-Medieval and Renaissance (5) VLPA The arts of the Byzantine Empire, Islam, and Western Christendom through 1520 AD. Offered: W.

ART H 203 Survey of Western Art-Modern (5) VLPA Western art from 1520 to the present. Offered: Sp.

ART H 204 Survey of Asian Art (5) VLPA Origins and interplay of major movements of South and East Asian art.

ART H 205 Survey of Tribal Art (5) VLPA Arts of Sub-Saharan Africa and Oceania from prehistoric times to the present and to the pre-Columbian arts of the Americas.

ART H 206 Survey of Native American Art (5) VLPA Introduction to Native American art north of Mexico, prehistory through the twentieth century. Regional examination of types and styles, with emphasis on aesthetics, cultural function, and factors of change.

ART H 230 African-American Art (3) VLPA History of African-American art from colonial times until the present, the African background and its extensions into the West Indies, Brazil, and Surinam.

ART H 233 Photography: Theory and Criticism (3) VLPA/AS Art traditions of photography from its origins in the nineteenth century to the present. Emphasis on photographic traditions and photographers of the twentieth century.

ART H 290 History of Architecture (5) VLPA Introduction to the study of architectural history in a variety of cultural contexts.

300-level courses cover narrower times, spaces, and types of art than 200-level surveys and constitute the core curriculum for majors (although most enroll in courses from other majors). Good basic university preparation (equivalent to upper-division standing) is needed. Relevant 200-level courses, although not required, may provide helpful background.

ART H 300 Ideas In Art (5) VLPA Selected monuments of art and architecture in the Western tradition, from the Greeks to the twentieth century, studied in relation to the intellectual background of the ages and civilizations that produced them. Slide lectures accompanied by discussion of assigned readings in philosophical, religious, scientific, political, literary, and artistic texts. Offered: jointly with CHID 300.

ART H 306 Indian Art of South Asia (5) VLPA Development of Indian art from its origins to the medieval period. Spread of Indian religions and related art forms in Tibet and Southeast Asia briefly introduced.

ART H 311 Chinese Art (5) VLPA Overview of the arts of China. Emphasis on the role of the arts in Chinese culture and on the traditional styles and techniques associated with each of the major media—painting, ceremonial bronzes, architecture, sculpture.

ART H 315 The Buddhist Art of East Asia (5) VLPA Buddhist painting and sculpture in China, Korea, and Japan. Its religious meaning, artistic development, and historical significance. Examples from the sixth to the seventeenth centuries, along with paintings and contemporary carvings.

ART H 318 Japanese Painting (5) VLPA Japanese painting traditions from earliest times to the present. Examples illustrated and discussed in the context of Japanese cultural history. Analysis of painting styles as well as that of the roles artists have played and the meaning their works have had in Japanese society.

ART H 317 Chadou Japanese Esthetics (4) VLPA History, theory, and practice of Chadou, or "Way of Tea," a Zen-inspired art that has had notable effects on Japanese society. Lectures on esthetics and cultural history supplemented by participation in Chadou, with the goal of developing sufficient understanding and skill to continue Chadou as a discipline.

ART H 321 Arts of Japan (5) VLPA The spectrum of Japanese art from prehistory to modern times. Examines the interrelationship of the major media for each historical period. Central theme: the appreciation of the varied aesthetics active in the development of Japanese painting, architecture, sculpture, and ceramics.

ART H 330 Tribal Art and Philosophy (5) VLPA Philosophical inquiry and thought in African, Amerindian, and Pacific island societies as expressed through the visual, musical, choreographic, and oral arts. Natural, moral, and ethical ideas as expressed in the arts.

ART H 331 Northwest Coast Indian Arts (5) VLPA Introduction to arts of Indians of the Pacific Northwest from precontact to present. Themes explored include diversity of artistic expression, cultural contexts, styles, artists' responses to foreign trade and settlement, and ways in which art may reflect historical developments in the lives of the Indians. Offered: jointly with ANTH 331.

ART H 337 African Art and Society (5) VLPA Explores the ideas and notions expressed visually in sculpture, painting, ceramics, textiles, and architecture and describes their relationships to man and culture in Africa.

ART H 340 Pre-Classical Art and Archaeology (3) VLPA Art and the other material remains of the civilizations in the Aegean from the Neolithic period to the end of the Bronze Age, with special emphasis on Minoan Crete and the Mycenaean kingdoms of mainland Greece; illustrated by slides. The history, techniques, and results of significant excavations. Offered: jointly with CL AR 340.

ART H 341 Greek Art and Archaeology (3) VLPA Material remains and the developing styles in sculpture, vase painting, architecture, and the minor arts from the Geometric to the Hellenistic periods; illustrated by slides. Principal sites and monuments, as well as techniques and methods of excavation, are examined in an attempt to reconstruct the material culture of antiquity. Offered: jointly with CL AR 341.

ART H 342 Roman Art and Archaeology (3) VLPA Roman architecture and art, with emphasis on the innovations of the Romans; illustrated by slides. Offered: jointly with CL AR 342.

ART H 343 Hellenistic Art and Archaeology (3) VLPA Art of Greece and the eastern Mediterranean from the time of Alexander the Great to the Roman conquest. Themes include Greek sculpture, painting, mosaics, and minor arts examined in lectures and slides. Offered: jointly with CL AR 343.

ART H 350 The City of Cairo (3) VLPA/AS Development of Fustat and Cairo, 600-1800, with special emphasis on art and architecture. Economic, social, and geographic influences on the creation of the distinct Egyptian styles of Islamic art. Offered: jointly with NE 350.

ART H 351 Early Medieval and Byzantine Art (5) VLPA Christian art and architecture of the Roman and Byzantine empires and of western Europe through the eighth century.

ART H 352 High and Late Medieval Art (5) VLPA Art and architecture of western Christendom from the time of Charlemagne to the Renaissance.

ART H 361 Italian Renaissance Art (5) VLPA Sculpture, painting, and architecture from 1300 to 1600.

ART H 366 Northern Renaissance Art (5) VLPA An overview of Dutch, Flemish, and German art in the context of religious, historical, and stylistic developments during the Renaissance in Northern Europe (c. 1400-1570).
ART H 372 Rococo to Romanticism (5) VLPA
Mainstream of European art and architecture from about 1710 to about 1830. Attention is also given to central and eastern Europe, Scandinavia, and the colonial Americas.

ART H 373 Southern Baroque Art (3) VLPA
Art of Italy and Spain, circa 1590 to circa 1710.

ART H 374 Northern Baroque Art (3) VLPA

ART H 390 Nineteenth- and Twentieth-Century Art (5) VLPA
Arts and architecture of Europe and America from Realism to the present, with emphasis on stylistic and thematic changes in painting.

ART H 381 Art Since World War II (5) VLPA
Art of the United States and the United States in the decades since World War II: painting, sculpture, and architecture, multiplication of new forms (video, performance pieces, land and installation pieces), changing context of patronage, publicity, and marketing.

ART H 382 Theory and Practice of Art Criticism (3) VLPA
Major issues in art and architectural criticism: nature and art of criticism, aims of the critic, differences between art and architectural criticism. Works by major critics and artists, mostly twentieth century.

ART H 384 American Art (5) VLPA
Major achievements in painting, sculpture, printmaking, the decorative arts, architecture, urban design, and folk art in the United States from about 1600 to the present.

ART H 385 Survey of Early Film History (5) VLPA
Origins and development of the motion picture from circa 1889 to circa 1950; major works in documentary avant-garde, and animated film, as well as theatrical film, are shown and studied from an historical and critical standpoint.

ART H 388 Art of Washington and the Pacific Northwest (5) VLPA
History of painting, sculpture, printmaking, and decorative arts from mid-nineteenth century to present. Emphasis on Seattle and the Puget Sound region. Major developments in Oregon and British Columbia.

ART H 387 American Art From the Revolution to the Civil War (5) VLPA
Painting, sculpture, and architecture during the federal and early industrial periods. Developments in printmaking, the decorative arts, and folk art.

ART H 391 Painting Since the Renaissance (3) VLPA
Illustrated lectures. Prerequisite: 203.

ART H 396 Study Abroad: Art in London (3, max. 15) VLPA
Advanced or specialized work in art history based on materials available in the museums, private collections, libraries, and buildings of London, conducted through lectures, reading and research projects. Specific course content is determined by the assigned faculty member and is announced in Study Abroad Bulletin. Prerequisite: permission of graduate adviser.

ART H 398 Study Abroad: Art in Provence (5, max. 15) VLPA
Monuments in and around Avignon. Emphasis on Roman and Romanesque architecture and sculpture, later medieval French painting, great works of art of the period in regions and countries in regional museums, and the Provencal landscape of Cazanede, Van Gogh, and Gauguin. Prerequisite: permission of undergraduate adviser.

ART H 399 Study Abroad: Art History Individual Projects (3-10, max. 20) VLPA
For participants in Study Abroad programs. Prerequisite: permission of undergraduate adviser.

400-level courses are intensive, quite narrow in scope, and addressed to current scholarly problems. A relatively high level of sophistication is needed. In general, sound prior humanistic training and knowledge of at least one of the following are required: art of the period or region at a general level (such as that provided by the relevant 200- or 300-level course); social or cultural history of the subject area; literature and thought of the area; an appropriate foreign language. 400-level courses are available for both undergraduate and graduate credit. Each 400-level course is accompanied by two units of ART H 599, required of graduate majors.

ART H 400 Art History and Criticism (2-5, max. 10) VLPA
Courses on special topics, frequently by visiting faculty, which cannot be offered on a continuing basis. Consult Art History office for subjects offered.

ART H 401 Thematic Studies in Art History (5) VLPA
Multidisciplinary, cross-methodological examination of selected topics and problems in art history. Focus changes yearly. Required of art history majors. Prerequisite: senior standing; non-majors by permission of department chair.

ART H 402 Honors Seminar (5) VLPA
Develops the overall theme and individual research topics of 401, and normally should be taken in tandem with that course. Prerequisites: 401 and senior standing in art history honors program; others by permission of department chair.

ART H 411 Traditional Chinese Architecture (3) VLPA
Introduction to Chinese architecture (palaces, homes, temples, tombs, urban planning, and gardens); theories of production, visual styles, historical development, and relationship to traditional Chinese cultural values.

ART H 412 Chinese Painting In the Twentieth Century (3) VLPA
Modern Chinese painting and art theories, seen in relation to China's twentieth-century struggles over nationalism and Westernization, traditionalism and modernization, individualism and the Maoist "mass line."

ART H 413 Selected Topics in Chinese Art (3, max. 15) VLPA
Specific theme or area of Chinese art, such as the art of bronze age China or Chinese painting under Communist rule.

ART H 414 Early Chinese Painting: Neolithic Period to Five Dynasties (3) VLPA
Emergence and development of Chinese painting, its styles, aesthetic theories, and techniques of production, visual styles, historical development, and relationship to traditional Chinese cultural values.

ART H 415 Chinese Painting: The Sung Period (3) VLPA
Golden age of Chinese painting, emphasizing the monumental, romantic, and Zen Buddhist landscape painting traditions of the tenth through thirteenth centuries.

ART H 416 Chinese Painting: The Yuan Period (3) VLPA
Chinese painting under Mongol rule, in the fourteenth century: a period of political and social crisis that gave rise to a revolution in painting styles.

ART H 417 Later Chinese Painting: Ming, Ch'Iing, and Modern Periods (3) VLPA
Major traditions, aesthetic attitudes, and social role of Chinese painting from the fifteenth century to the present day.

ART H 418 Political Aspects of Chinese Painting (3) VLPA
Examination of the close link between painting and politics in China, focusing on such aspects as imperial patronage and propaganda, and the arts of political protest and lament, Chinese painting under Communist rule.

ART H 419 Japanese Architecture (3) VLPA
Survey of Japanese architecture from its origins to modern times. Although Shinto architecture, tea houses, gardens, and modern developments are discussed, the primary focus is on the development of Japanese Buddhist architecture.

ART H 420 Art of the Japanese Print (3) VLPA
Foundations of Ukiyo-e Japanese genre from the health through mid-seventeenth centuries; woodblock technique from the Heian period through the early Edo period. Emphasis on the changing styles and subject matter in Ukiyo-e Hangga from Moronobu through Kuniyoshi.

ART H 421 Early Japanese Painting (3) VLPA
Survey of the development of Japanese painting from the earliest times to the end of the Muromachi period in 1567. The Shinto, Buddhist, Yamato-e, and Tosa schools of painting are discussed prior to an overview of Muromachi subokugyo painting.

ART H 422 The Kan-ga Tradition (3) VLPA
Ink paintings of Japanese Zen priests from the fourteenth century onward, and the works of professional artists belonging to the families of painters of the four families (Kano, Hasegawa, Ukiyoku, and Kano) in which Chinese academic painting has been the principal inspiration, from the sixteenth century to the present.

ART H 423 Later Japanese Painting (3) VLPA
Survey of the development of Japanese painting from the Momoyama period to the present (1568 on). The relation of the traditional schools of painting conceptions with the development of modern Japanese and Western styles in the twentieth century.

ART H 424 The Nanga Tradition (3) VLPA
Works of painting and calligraphy by Japanese artists who have been a part of the Chinese scholar-painting tradition from the late seventeenth century to the present.

ART H 425 Modern Japanese Painting (3) VLPA
Painting of the Meiji, Taisho, and Showa eras (1868 to the present) by artists working in the modern idiom of either Yoga or Nihonga.

ART H 426 Japanese Sculpture (3) VLPA
Survey of Japanese sculpture from prehistory to modern times. Although the main theme is Buddhist sculpture, Shinto sculpture, folk sculpture, and modern trends are also introduced. Examines style, religious meaning, construction techniques, and placement within architectural settings.

ART H 427 Japanese Ceramics (3) VLPA
Discusses Japanese ceramics from prehistory to the twentieth century with regard to manufacturing processes and differing sense of design. Relation of form to use also considered, especially in connection with tea ceramics.

ART H 428 East Asian Calligraphy (3, max. 9) VLPA
Classical calligraphy tradition of China and Japan in history and practice. Prerequisite: permission of undergraduate adviser.

ART H 429 Japanese Cinema (3) VLPA
Eleven masterpieces of Japanese cinema, studied in the context of what they reveal about Japanese culture and the art of the film.

ART H 431 Pre-Columbian Art (3) VLPA
Arts of pre-Columbian cultures of Central and South America from prehistoric times to European contact.

ART H 432 Oceanic Art (3) VLPA
Arts of Oceania, studied through cultures of Polynesia, Micronesia, Melanesia, and Australia.

ART H 433 Northern Northwest Coast Native American Art: Methodologies In Stylistic Analysis (3) VLPA
Stylistic and historical analysis of northern Northwest Coast art (Haida, Tlingit, Tsimshian, Northern Wakashan). Intensive analysis of formlines: stylistic variation through time and between tribal and individual artists' styles.

ART H 434 Native American Art and Ceremony of the Southern and Northeastern Northwest Coast (3) VLPA
Examination of the role of the visual arts in the ceremonial life of the Native American people of the central and southern Northwest Coast. Emphasis on the traditional social and religious aspects of ceremonials, contrasts between tribal traditions, and continuing nineteenth-century traditions.
ART H 435 Thematic Studies in Native American Art (3, max. 9) VLPA Wright Approach to Native American art through themes and issues. Focus varies from year to year (e.g., Shamanism in Native American art, gender identity in Native American art, social and political aspects of Native American art, issues in contemporary Native American art).

ART H 436 Arts of Sub-Saharan Africa I (3) VLPA Traditional arts of the Western Sudan and the Western Guinea coast with their archaeological antecedents.

ART H 437 Arts of Sub-Saharan Africa II (3) VLPA Traditional arts of the Central Guinean coast, Nigeria, Cameroon, and Gabon, from precontact times to the present.

ART H 438 Arts of Sub-Saharan Africa III (3) VLPA Arts of Zaire, Angola, the Swahili coast, and southern Africa.

ART H 442 Greek and Roman Painting (3) VLPA Painted decoration on Greek vases, and Roman wall painting, with emphasis on the historic and stylistic development of each. Offered: jointly with CL AR 442.

ART H 444 Greek and Roman Sculpture (3) VLPA History and development of Greek sculpture and sculptors, their Roman copyists, and Roman portraits and sarcophagi. Emphasis on Greek sculpture of the fifth century BC. Offered: jointly with CL AR 444.

ART H 446 Greek Architecture (3) VLPA Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with CL AR 446 and ARCH 454.

ART H 448 The Archaeology of Italy (3) VLPA Harmon Study of the principal archaeological sites in Italy with special emphasis on ancient Rome. Sites include the Alban hills, Celsis, Pompeii, Herculanum, Terquoina, Paestum, Tivoli, and Praeneste. Attention given to the relationship between material remains and their purpose in ancient life. Illustrated by slides. Offered: jointly with CL AR 448.

ART H 451 Topics in Early Christian and Byzantine Fine Art and Architecture (3, max. 9) VLPA Specific theme or area of early Christian and Byzantine art and architecture, such as early Christian and Byzantine mosaics or the art of Constantinople.

ART H 452 Art, Religion, and Politics in the Early Christian Period, 300-700 AD (3) VLPA & IS Kartsonis Evolution of the art of the early Christian period (300-700 AD) in the context of contemporary religious, political, and cultural developments. Offered: jointly with RELIG 442.

ART H 453 Art, Religion, and Politics in Byzantium, 700-1453 AD (3) VLPA & IS Kartsonis Evolution of the art of Byzantium (700-1453 AD) in the context of contemporary religious, political, and cultural developments. Offered: jointly with RELIG 443.

ART H 454 Romanesque Art (3) VLPA Western European art in the eleventh and twelfth centuries, focusing on monuments along the pilgrimage roads to Compostela in France and Spain.

ART H 455 Special Studies in Gothic Art and Architecture (3) VLPA Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Offered: jointly with ARCH 455.

ART H 456 Art of the Medieval West: Carolingian and Ottonian Art, 750-1050 AD (3) VLPA Kartsonis Examines the development of the arts during the Carolingian and Ottonian periods in the Medieval West.

ART H 461 Early Renaissance Painting in Italy (3) VLPA Painting of the fourteenth and fifteenth centuries in central and northern Italy.

ART H 462 High Renaissance Painting in Italy (3) VLPA Painting in central and northern Italy, from about 1480 to about 1530: Leonardo, Raphael, the early Michelangelo, Sanzio, Correggio, Bellini, Giorgione, and the early Titian.

ART H 463 Italian Renaissance Sculpture (3) VLPA From Nicola Pisano to Ghiberti.

ART H 464 Late Renaissance Painting in Italy (3) VLPA Painting in central and northern Italy, from about 1515 to about 1560: Pontormo, Rosso, Parmigianino, Beccafumi, the later Michelangelo, Vasari, Bronzino, Salviati, the later Titian, Tintoretto, and Veronese.

ART H 465 Italian Renaissance Architecture (3) VLPA From the cathedral of Florence to St. Peter's in Rome: the style, symbolism, and theory of architecture.

ART H 466 High Renaissance Painting in Venice (3) VLPA Painting in Venice, circa 1480 to circa 1580: Bellini, Carpaccio, Giorgione, Titian, Lotto, Dolompo, Tintoretto, and Veronese.

ART H 468 Northern European Renaissance Landscape Painting, 1400-1700 (3) VLPA Development in northern European landscape painting from 1400 to 1700 in the context of contemporary social, cultural, and artistic issues.

ART H 470 English Art: 1500-1600 (3) VLPA English art, principally painting, and, to a lesser extent, architecture. Emphasis on patronage, on the conditions that produced the peculiarities of English art, and on the final triumph of the native art tradition.

ART H 471 Rome in the Seventeenth Century (3) VLPA Painting, sculpture, and architecture; concentration on Caravaggio, Bernini, Poussin, and Borromini.

ART H 472 French Art: Seventeenth Century (3) VLPA Painting, sculpture, and prints. Special attention given to relations with Italy and the Lowlands.

ART H 473 Dutch Painting of the Golden Age (3) VLPA Art of the Dutch Republic in the late sixteenth and seventeenth centuries, concentrating on painting, prints, and drawings.

ART H 474 Studies in American Colonial Art (3, max. 9) VLPA Architecture, town design, painting, sculpture, and decorative arts in the eastern and southwestern colonies from original European settlement until the Revolutionary War. Key figures and development of movements are included.

ART H 475 Dutch Painting of the Golden Age (3) VLPA Art of the Dutch Republic in the late sixteenth and seventeenth centuries, concentrating on painting, prints, and drawings.

ART H 476 French Art: Eighteenth Century (3) VLPA Painting, sculpture, and prints. Emphasis on the successive phases of Rococo style and iconography and the emergence of Neoclassicism.

ART H 481 Italian Futurism, Dada, Surrealism (3) VLPA Survey of three European early modern art movements whose ultimate objective was the collapse of bourgeois culture. Central issues: the role of art and artists in social change; strategies for destroying public faith in logic, integration of verbal and visual signs and nonaesthetic conceptions of art.

ART H 482 Abstract Expressionism: History and Myth (3) VLPA Thematic and chronologically survey of abstract expressionism, including major genres of critical interpretation, social, and art-historical context, and revisionist scholarship. Recommended: 361.

ART H 483 American Architecture (3) VLPA American architecture from the seventeenth-century colonial period to the present. Emphasis on architects and buildings, including features of urban development. Prerequisite: some background in architectural history. Offered: jointly with ARCH 483.

ART H 491 Twentieth-Century Architecture (3) VLPA Traces the roots of today's architectural conflict: the pull of the past versus the allure of modernism. Major trends in twentieth-century architecture in this country and abroad. Prerequisite: some background in architectural history.

ART H 492 Alternative Art Forms Since 1960 (3) VLPA Survey of "post-studio" art developed in the 1960s and early 1970s by artists who did not equate making visual art with making aesthetic objects. Topics include happenings, Fluxus, mail art, projects, body art, video, artists' books, performance, and site works. Recommended: 381.

ART H 493 Architecture Since 1945 (3) VLPA Ideas and built forms in architecture, 1945 to the present. Covers attempts to break away from orthodox modernism with the structured forms of such architects as Edward D. Stone, Saarinen, and Philip Johnson. Continues to current work of Frank Gehry and other Deconstructivists. Prerequisite: some background in architectural history.

ART H 496 Art and Sexual Imagery (3) VLPA Themes and symbols of sexuality in art in a range of world cultures and time periods investigated through readings that illumine the contextual meaning of the works. Religious, political, psychological, and economic interpretations employed to understand the widespread existence and importance of these topics.

ART H 498 Individual Projects, Undergraduate Practicum (2-5, max. 10) Fieldwork or internships in art-related areas in the community. Practical experience in areas such as arts administration, gallery and museum operations, collection cataloguing, curatorial responsibilities, and art education. Credit/no credit only. Prerequisite: permission of departmental undergraduate advisor.

ART H 499 Individual Projects (2-5, max. 10) Prerequisite: permission of undergraduate advisor.
all students must obtain the permission of the instructor or the art history graduate coordinator.

ART H 500 Methods of Art History (5) Introduction to the specialized bibliography of art historical research and to the wide variety of approaches to art historical problems of all periods and regions.

ART H 501 Seminar in the General Field of Art (5, max. 15)

ART H 511 Seminar in Chinese Art (5, max. 15) Critical appraisal of the principal research methods, theories, and types of literature dealing with the art of China.

ART H 515 Seminar in Japanese Art (5, max. 15) Critical appraisal of the principal research methods, theories, and types of literature dealing with the art of Japan.

ART H 531 Seminar in Tribal Art (5, max. 15) Methodological and cross-disciplinary problems in the visual arts of precolonial Africa, Oceania, and America. Specific content varies.

ART H 533 Seminar in North American Indian Art (5, max. 15) Problems in North American Indian visual arts. Content varies.

ART H 541 Seminar in Greek and Roman Art (5) Langdon In-depth study of selected topics and problems of the art of ancient Greece and Rome. Offered jointly with CL AR 514.

ART H 551 Seminar in Early Christian, Byzantine, and/or Medieval Art and Architecture (5, max. 15) Problems in early Christian, Byzantine, and medieval art and architecture. Content varies. Prerequisite: permission of instructor.

ART H 561 Seminar in Italian Renaissance Art (5, max. 15) Problems and in-depth study of selected topics of the art of the Italian Renaissance.

ART H 565 Seminar in Museum Studies (5, max. 10) Using the fourteenth- to twentieth-century paintings at the Seattle Art Museum, student learn to look at paintings as physical objects, considering working methods and changing techniques and the impact of time and intervention on the way we see them today. Prerequisite: permission of instructor.

Asian Languages and Literature

223 Gowen

The Department of Asian Languages and Literature offers instruction in the principal languages and literatures of Asia, including East, Southeast, Central, and South Asia. Emphasis is placed on the roles of these languages within the cultures they serve as well as on linguistic, textual, and literary analysis. Several courses on Asian literature in English are offered for majors and nonmajors alike.

Undergraduate Program

Advisor 225 Gowen

Bachelor of Arts Degree

Admission Requirements: Minimum 20 credits college-level course work or department-approved equivalent in intended primary language of concentration. The most recently taken course taken in the primary language must be completed at the UW with a grade of 2.5 or higher. Completion of one writing (W-prefix) course taught in English with a grade of 2.0 or higher. Admission is possible with a cumulative GPA of 2.00, but the department strongly recommends that prospective majors present a cumulative GPA of 2.50 or higher. Applicants may submit materials in addition to transcripts clarifying any aspect of past course work. Denied applicants may appeal.

Major Requirements: Chinese—55 credits in the language, 10 beyond third-year level, including CHIN 451; 10 credits in Chinese literature, excluding 499; 3 credits in Chinese linguistics; 5 credits in area-related humanities or social science courses; 2 additional credits from literature or related humanities/social sciences. Japanese—45 credits in the language, 15 beyond second-year level; 30 credits in area-related humanities or social science courses at the 300 level or above, including a designated sequence in either Japanese literature or linguistics. Koren—45 credits in the language, 15 beyond second-year level; 30 credits in literature and area-related humanities or social science courses. Each Asian language requires 45 credits in languages, of which 45 are in the major language, 15 in the minor language; 15 credits in area-related humanities or social science courses to be chosen in consultation with advisor, including HSTAS 201 and ASIAN 401. If Tibetan is the major language, 42 major language credits, 15 minor language credits; 15 credits in area-related humanities or social science courses to be chosen in consultation with advisor, including HSTAS 201 and ASIAN 401. Thai—45 credits in the language, 15 beyond second-year level; 20 credits in area-related humanities or social science courses to be chosen in consultation with advisor.

Graduate Program

Andrew L. Markus, Graduate Program Coordinator

The Department of Asian Languages and Literature offers programs of study leading to the Master of Arts in Asian Languages and Literatures with concentrations in a) the languages and literatures of China, subsuming Chinese, Manchu, Mongolian, and Tibetan (in the context of the close linguistic and historical links between China and Tibet); b) the language and literature of Japan; c) the languages and literature of South Asia, subsuming Sanskrit, Hindi, Tamil, and Tibetan (here in the context of Tibet's close cultural affinity with South Asia). All graduate students in the department must affiliate themselves with one of these three programs. The department does not offer degrees or specializations in language pedagogy.

Financial aid for graduate students newly entering the department is very limited and is awarded on a competitive basis. All prospective students are urged to submit the Free Application for Federal Student Aid (FAFSA) with the College Scholarship Service in New Jersey, inasmuch as some financial aid is wholly or partially determined by need, and to apply for other kinds of aid mentioned in the department's cover letter to prospective students.

A full range of courses in other disciplines and aspects of Asian cultures and civilizations is available from other departments and schools of the University, such as the Departments of Anthropology, History, Linguistics, Comparative Literature, and Political Science, and the Henry M. Jackson School of International Studies. Students in the Department of Asian Languages and Literature are encouraged to avail themselves of these offerings to complement and supplement their language and literature studies.

Admission Requirements

Applicants for admission should present an undergraduate major in the language and literature of specialization (three years of language training for admission to the Chinese and Japanese programs; fewer years of language acquisition may be acceptable in South Asian languages), or the background and training equivalent to such a major. Students without such a background may be qualified for admission, but will need to complete the expected program prerequisites during the earliest stages of their graduate study.

Besides an application and one original set of transcripts of postsecondary education (a second original set should be sent directly to the Office of Graduate Admissions), the department requires a statement of academic goals, and three letters of recommendation addressed to the Graduate Program Coordinator.

Degree Requirements

The research component of the Master of Arts degree may be satisfied by the writing of either a thesis or two research papers. The Doctor of Philosophy degree requires a dissertation. In addition to the language of specialization, reading knowledge of a second (usually Western) language is required for the Master of Arts degree, and of a third (usually Asian) language for the Doctor of Philosophy degree. Neither English nor, usually, the student's native language may be used to fulfill these additional requirements.

Senior Lecturers

Haia, Huang-Yi 1973; BS, 1953, National Taiwan University; Chinese language.

Norman, Stella Chen 1984; MA, 1957, National Taiwan University; Chinese language.

Lecturers

Budman, Achmad 1992; BA, 1991, University of Brawijaya (Indonesia); Indonesian language and literature.

Hasegawa, Mitsuko 1987, MAT, 1979, Augustana College (South Dakota); Japanese language.

Kasavatana-Dohrs, Wiworn 1989; PhD, 1989, University of Michigan; Thai language and literature.

Kim, Song-Chul 1985; PhD, 1991, University of Washington; Korean language, anthropology.

Nguyen, Kim O. 1984; PhD, 1973, University of California (Los Angeles); Vietnamese language and literature.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Altai

ALT1 401, 402, 403 Written Mongolian (3,3,3) J. Norman Introduction to Mongolian written in the vertical script. Texts of different periods and genres. Prerequisite: permission of instructor. Offered: alternate years; A,W,Sp.

ALT1 405, 406, 407 Manchu (3,3,3) J. Norman Introduction to Manchu, with principal focus on the structure of the language. Reading of texts of different genres. Prerequisite: permission of instructor. Offered: alternate years; A,W,Sp.

Asian Languages and Literature

ASIAN 201 Literature and Culture of Ancient and Classical China (5) VLPA/ISS Boltz Introduction to ancient and classical Chinese literature in its cultural context. Texts in English translation. Offered: alternate years; A.

ASIAN 202 Literature and Culture of Traditional Japan (5) VLPA/ISS Markus, Treat Introduction to traditional Japanese literature in its cultural context. Texts in English translation. Offered: alternate years; W.

ASIAN 203 Literature and Culture of Ancient and Classical India (5) VLPA/ISS Introduction to ancient and classical India literature in its cultural context. Texts in English translation. Offered: alternate years; W.

ASIAN 204 Literature and Culture of China from Tradition to Modernity (5) VLPA/ISS Brandauer Introduction to modern Chinese literature in its cultural context. Texts in English translation. Offered: alternate years; A.

ASIAN 205 Literature and Culture of Japan from Tradition to Modernity (5) VLPA/ISS Markus, Treat Introduction to Japanese literature of the nineteenth and twentieth centuries. May also include some Korean literature. Texts in English translation. Offered: alternate years; W.

ASIAN 206 Literature and Culture of South Asia from Tradition to Modernity (5) VLPA/ISS Entwistle, Shapiro Introduction to medieval and modern South Asian literature in its cultural context. Texts in English translation. Offered: alternate years; Sp.

ASIAN 207 Special Topics in Literature and Culture of Asia (5) VLPA/ISS Introduction to the literature of one or more Asian traditions considered in its cultural context. Content varies depending on the specialization and interest of instructor. Texts in English translation. Offered: W.

ASIAN 401 Introduction to Asian Linguistics (5) VLPA Schiffman, Shapiro Linguistic analysis, with emphasis on languages of east, southeast, south, and central Asia. Includes phonetics, phonemics, morphology, syntax, historical reconstruction, linguistic typology, comparative grammar. Prerequisites: 401 or equivalent or permission of instructor. Offered: W.

ASIAN 404 Writing Systems (3) VLPA Boltz, Salomon Origen, nature, and development of writing systems. Alphabets, syllabaries, and logographic systems; relation of writing systems to spoken languages; decipherment of previously undeciphered scripts. Prerequisites: 401 or equivalent or permission of instructor. Offered: alternate years.

ASIAN 405 Advanced Problems in Asian Linguistics (3) VLPA Schiffman, Shapiro Advanced problems in the analysis of the languages of east, southeast, south, and central Asia. Includes phonology, morphology, syntax, lexicalography, historical reconstruction, linguistic typology, and comparative grammar. Prerequisites: 401 or equivalent or permission of instructor. Offered: alternate years.

ASIAN 488 Special Topics (1-5, max. 15) VLPA Offered occasionally by permanent or visiting faculty members. Topics vary.

Chinese

CHIN 121 Accelerated Chinese (10) S. C. Norman Covers same material as 111 and 112. In conjunction with 222 and 223, allows completion of two years' language study in one academic year. Cannot be taken for credit in combination with 111 or 112. Offered: A.

CHIN 134 First-Year Intensive Chinese (15) Equivalent of 111, 112, 113. Introduction to the standard language; correct pronunciation and basic structure; drill in oral use of the language. Especially recommended for students (particularly graduate students) who plan to devote more time to other subjects during the regular academic year. Cannot be taken for credit in combination with 111, 112, or 113. Offered: S.

taken for credit in combination with 234. Prerequisite: 113 or equivalent. Offered: A,W,Sp.

CHIN 222 Accelerated Chinese (10) VLPA S. C. Norman Covers same material as 113 and 211. In conjunction with 121 and 222, allows completion of two years' language study in one academic year. Cannot be taken for credit in combination with 113 or 211. Prerequisite: 121 or equivalent. Offered: W.

CHIN 223 Accelerated Chinese (10) VLPA S. C. Norman Covers same material as 212 and 213. In conjunction with 121 and 222, allows completion of two years' language study in one academic year. Cannot be taken for credit in combination with 212 or 213. Prerequisite: 222 or equivalent. Offered: Sp.

CHIN 224 Second-Year Intensive Chinese (15) VLPA Equivalent of 211, 212, 213. Cannot be taken for credit in combination with 211, 212, or 213 taken. Prerequisite: 113 or equivalent. Offered: S.

CHIN 311, 312, 313 Third-Year Chinese (5,5,5) VLPA Hsieh Concentrated practice in the use of Chinese as spoken in everyday life. Listening comprehension, speaking, and writing skills emphasized. Readings selected to broaden the student’s understanding of modern Chinese culture and to spark discussion of contemporary issues. Cannot be taken for credit in combination with 334. Prerequisite: 213 or permission of instructor. Offered: A,W,Sp.

CHIN 333 Intensive Business Chinese (15) VLPA Introduction to oral Chinese as employed in business contexts, illustrates the level of language common to a wide range of Sino-American business communication situations and to general situations in international trade. Prerequisite: 213 or equivalent.

CHIN 334 Third-Year Intensive Chinese (15) VLPA Equivalent of 311, 312, 313. Reading of unedited texts—newspaper articles, essays, short stories. Oral practice and structural drill. Cannot be taken for credit in combination with 311, 312, or 313. Prerequisites: 213 or equivalent and permission of instructor.

CHIN 342 The Chinese Language (3) VLPA J. Norman, Yue-Hashimoto Nature and structure of the Chinese language, covering structural characteristics, grammar, and typological affinity with other languages of the same sound system of standard Mandarin, Chinese writing system and language reforms, brief survey of the history of the Chinese language, and aspects of language in relation to culture. Prerequisite: 213 or equivalent. Offered: A.

CHIN 344 Intensive Chinese In Beijing (15) VLPA Beijing University Teaching Staff Eight weeks of intensive instruction in modern Chinese, including readings in modern Chinese texts, oral conversation drill, introduction to past and present Chinese culture, and weekly lectures on such topics as Chinese literature, art, economics, politics, and history. Informal visits with artists, writers, and scholars; weekend excursions to cultural and historic sites in and around Beijing; and a final two-week study tour of selected cities of north and east China. Prerequisite: permission of department.

CHIN 346 Spoken Chinese In Beijing (6, max. 18) VLPA Beijing University Teaching Staff Designed to increase active vocabulary, to enhance the student’s understanding of Chinese grammar, to further the student’s control of idiomatic Chinese, and, in general, to develop oral skills. Prerequisite: 313 or 344.

CHIN 348 Chinese Readings In Beijing (6, max. 18) VLPA Beijing University Teaching Staff General readings in textbooks prepared by Beijing University and selected readings in modern or traditional vernacular literature or in the social sciences. Prerequisite: 313 or 344.

CHIN 411, 412, 413 Fourth Year Chinese (5,5,5) VLPA Yue-Hashimoto Reading of unedited texts including newspaper articles, literary selections, and academic essays. Oral discussion, listening comprehension, and composition. Prerequisites: 313 or equivalent for 411; 411 or equivalent for 412; 412 or equivalent for 413. Offered: A,W,Sp.

CHIN 443 Structure of Chinese (5) VLPA Yue-Hashimoto Outline of the major syntactic structures of Chinese. Focus on learning and teaching problems. Prerequisite: 313 or equivalent. Offered: W.

CHIN 451, 452, 453 First-Year Classical Chinese (5,5,5) VLPA Bolt Exercises and selected readings in pre-Han texts. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. Topics to be taken in sequence. Prerequisite: 213 or equivalent for 451; 451 for 452; 452 for 453. Offered: A,W,Sp.

CHIN 451, 452, 453 History of Chinese Literature (5,5,5) VLPA Knechtges 463-Chinese literature from earliest times to the end of the Six Dynasties; 463-Chinese literature from the Tang to the end of the Sung; 463-Chinese literature from the Yuan to recent times. Prerequisite: 453 or equivalent. Offered: A,W,Sp.

CHIN 470 Advanced Readings In Modern Chinese (5) J. Norman Reading and translation of scholarly articles and selections in the humanities and social sciences. Prerequisite: 414 or permission of instructor. Offered: A.

CHIN 482 Advanced Readings In Modern Chinese (5) VLPA Brandauer Modern texts in the original, mainly works published since the beginning of the twentieth century. Focus on literature, primarily short story and essay. Offered: W.

CHIN 496 Special Studies In Chinese (5, max. 15) VLPA Topics vary.

CHIN Undergraduate Research (3-5, max. 15) For Chinese language and literature majors. Prerequisite: permission of instructor. Offered: AW,Sp.

HINDI

HINDI 404 Derivational Morphology of Hindi-Urdu (3) VLPA Shapiro A systematic introduction to the derivational morphology of Hindi-Urdu. Sanskrit, Persian, Arabic, and English elements in Hindi-Urdu. Treatment of derivational prefixes and suffixes, stem alternations, and methods of compound formation. Prerequisite: 403 or equivalent, or permission of instructor. Offered: alternate years; W.

HINDI 421, 422, 423 Survey of Modern Hindi Literature (3,3,3) VLPA Entwisle, Hines, Shapiro Survey of Hindi literature from the late nineteenth century to the present, covering contemporary short stories (421), poems (422), and novels (423). Prerequisites: 403 or equivalent for 421; 421 or equivalent for 422; 422 or equivalent for 423. Offered: 421 1995, Sp.

HINDI 431 Advanced Conversational Hindi (2, max. 8) VLPA Conversational practice in contemporary Hindi. Prerequisite: 323 or equivalent or permission of instructor. Offered: W.

HINDI 451 Advanced Hindi Readings (3, max. 9) Readings in Modern Standard Hindi prose texts drawn from diverse disciplines. Prerequisite: 403 or equivalent. Offered: 1995; W.

HINDI 499 Undergraduate Research (3-5, max. 15) Primarily for Hindi language and literature majors. Prerequisite: permission of instructor. Offered: AW,Sp.

Indian

INDN 400 Practicum In South Asian Languages (3, max. 18) VLPA Introduction to any one of various South Asian languages (e.g., Kannada, Nepali, Punjabi, Sinhala, Marathi, Telugu, Urdu) not taught on a regular basis. Students may receive credit for more than one such language. Prerequisite: permission of instructor.

INDN 401, 402 Pali (3,3) VLPA Cox Introduction to Pali language and literature. Prerequisite: SNKRT 403 or equivalent or permission of instructor.

INDN 403 Introduction To Written Urdu (3) VLPA Hines, Shapiro Modern written Urdu for students with at least elementary knowledge of Hindi. Prerequisite: HINDI 313 or equivalent. Offered: A.

INDN 404 Readings In Urdu Literature (3, max. 18) VLPA Hines, Shapiro Readings in Urdu prose and poetry. Urdu prose composition. Prerequisite: 403 or equivalent. Offered: AW,Sp.

INDN 410 Prakrit (3, max. 6) VLPA Salomon Introduction to the various Prakrit and Middle Indo-Aryan dialects (Gandhari, Magadhi, Maharashtrian, Sauraseni) from literary, canonical, and inscriptive sources. Prerequisite: SNKRT 303 or equivalent

INDN Undergraduate Research (3-5, max. 15) Primarily for South Asian language and literature majors. Prerequisite: permission of instructor. Offered: AW,Sp.

Indonesian

INDN 311, 312, 313 Advanced Indonesian (5,5,5) VLPA Budiman Continuation of 211, 212, 213. Expanding vocabulary; preparing for research work using original sources; improving reading fluency in modern standard written Indonesian using novels, short stories, newspapers, and other authentic material. Conversation practice centers on discussion of readings. Writing compositions. Prerequisite: 213 or equivalent. Offered: A,W,Sp.

INDN Undergraduate Research (3-5, max. 15) Primarily for Southeast Asian language program majors. Prerequisite: permission of instructor.

Japanese

JAPAN 211, 212, 213 Second-Year Japanese (5,5,5) VLPA 
Kotetsu Development of further functional communicative skills in the spoken and written lan-
guages. Prerequisite: 113 or placement by examination. Offered: A,W,Sp.

JAPAN 234 Second-Year Intensive Japanese (15) VLPA 
Equivalent of 211, 212, 213. Satisfies requirements for entry to 311, but recommended primarily for those going to Japan shortly upon completion. Prerequisite: 113 or placement by examination. Offered: S.

JAPAN 311, 312, 313 Third-Year Japanese (5,5,5) VLPA 
Hasegawa Intermediate-level communicative skills in both spoken and written languages. Some introduction to natural materials. Successful completion of this sequence constitutes a basic working command of Japanese. Prerequisite: 213 or placement by examination. Offered: A,W,Sp.

JAPAN 405-408 History of the Japanese Lan-
guage (3-3) VLPA 
Brockett Introduction to the history of Japanese, including phonology, morphology, syntax, and lexicon. Prerequisite: ASIAN 401. Offered: alternate years.

JAPAN 431, 432, 433 Readings in Modern Japa-
nese Literature (5,5,5) VLPA 
Reading and discussion of selected modern literary texts in the original language, concentrating on the short story and novel. Close attention to grammar and syntax. Prerequisite: 313 or equivalent. Offered: alternate years; A,W,Sp.

JAPAN 440 Introduction to Japanese Linguistics (5) VLPA 

JAPAN 471, 472 Classical Japanese Grammar (5,5) VLPA 
Markus Introduction to classical grammatical forms and translation of classical literary texts. Prerequisites: 313 or equivalent for 471; 471 or equivalent for 472. Offered: A, W.

JAPAN 473 Readings In Classical Japanese Literature (5) VLPA 
Markus Readings in prose, poetry, and drama, antiquity to nineteenth century. Prerequisite: 472 or equivalent. Offered: Sp.

JAPAN 499 Undergraduate Research (3-5, max. 15) 
For Japanese language and literature majors. Prerequisite: permission of instructor. Offered: AWSp.

Korean

KOR 301, 302, 303 Introduction to Korean (5,5,5) 

KOR 304 Spoken Korean (10) VLPA 
The Korean language as spoken in ordinary conversational situations. Phonetic accuracy and appropriateness of idiom. May be taken any summer after completion of first-year Korean. Prerequisite: 303 or permission of instructor. Offered: irregularly.

KOR 311, 312, 313 Introduction to Korean Writing In Mixed Script (5,5,5) VLPA 
Chinese characters as used in Korean mixed script. Systematic expansion of vocabulary and grammatical forms of standard Ko-

KOR 411, 412, 413 Readings in Contemporary Ko-

Tamil

Chinese

CHIN 540 Seminar on Chinese Linguistics (3, max. 9) J. Norman, Yue-Hashimoto Advanced topics in Chinese linguistics. Subject emphasis varies from year to year. Offered: Sp.

CHIN 541 Seminar in Chinese Grammar (3, max. 9) Boltz, J. Norman, Yue-Hashimoto Problems of theory and analysis of Chinese grammar, both synchronic and diachronic, modern and classical. Prerequisites: ASIAN 401 and permission of instructor.

CHIN 542 Chinese Historical Phonology (3) J. Norman, Yue-Hashimoto Introduction to Chinese historical phonology: emphasis on the Middle Chinese period. Prerequisite: ASIAN 401 and permission of instructor.

CHIN 543 Chinese Dialectology (3, max. 9) J. Norman, Yue-Hashimoto Methodology and theory of studying Chinese dialects. Among areas covered are fieldwork methods, dialect classification, and dialectal grammar. Prerequisites: 542, ASIAN 401, and permission of instructor.

CHIN 553 Second Year Classical Chinese (5) Boltz Continuation of 551,552. Intermediate level readings in Han and pre-Han historical and philosophical texts. Prerequisites: 551 and 552. Offered: Sp.

CHIN 554, 555, 556 Readings in Chinese Prose (5,5,3) Knechtges Selected readings from the first 1,000 years of the Chinese language. Prerequisites: 553, 554, and ASIAN 401. Offered: regular years.

CHIN 557 Introduction to Chinese Philology and Textual Criticism (5) Boltz Principles and methods of textual criticism and philological analysis of ancient Chinese texts. Study of both manuscripts and transmitted texts. Emphasis on Han and pre-Han documents; specific texts vary. Prerequisites: two years of classical Chinese and ASIAN 401. Offered: alternate years; W.

CHIN 558 Seminar in Chinese Lexicology and Grammaramy (5) Boltz Study of the Chinese script, lexicographical history, and etymological and eponymological analysis. Prerequisites: two years of classical Chinese, ASIAN 401. Offered: alternate years.

CHIN 559 Methods and Materials (5) Knechtges Introduction to the basic reference works and methods of research in Chinese language and literature. Includes a history of Sinology, survey of basic bibliographies, dictionaries, atlases, catalogs, journals, literary collections, concordances, and other sources. Prerequisites: 551, 552. Offered: alternate years; A.

CHIN 560 Prossem in Chinese (3-5) Boltz, Knechtges Methods and materials in the study of Chinese texts. Problems in textual analysis and Chinese literary history. Prerequisites: 553 and one of 554, 555, and 556.

CHIN 564, 565, 566 History of Chinese Literature (5,5,5) Knechtges Chinese literary history: 564: earliest times to Sung; 565: Sung to nineteenth century (exclusive of vernacular fiction); 566: historical coverage of traditional vernacular literature (excluding drama) and modern literature, with emphasis on transformation texts and chanteable literature, short stories, Ming and Ch'ing novels, and twentieth-century fiction and prose. Prerequisite: 559 or permission of instructor.

CHIN 573 Seminar in Chinese Poetry (5, max. 15) Wang Directed study of selected works of poetry. Subject emphasis varies each year. Prerequisite: permission of instructor. Offered: alternate years; W.

CHIN 574 Seminar in Six Dynasties Literature (5, max. 15) Knechtges Directed study of selected works of Six Dynasties. Subject emphasis varies each year. Prerequisite: permission of instructor. Offered: alternate years; Sp.

CHIN 575 Studies in Chinese Drama (5, max. 15) Wang Readings and discussion of Chinese drama. Subject emphasis varies. Prerequisite: permission of instructor. Offered: alternate years.

CHIN 577 Advanced Readings in Chinese Opera (4) Hsia Introduction to the dialogue and verses frequently used in Chinese opera. Comparisons between language spoken daily and languages used in Chinese opera. Prerequisite: 553 or permission of instructor. Offered: A.

CHIN 578 Advanced-Readings in Classical Chinese (4) S. C. Norman Study of texts from all periods. Prerequisite: 553 or permission of instruction. Offered: W.

CHIN 580 Readings in Vernacular Chinese Fiction (5, max. 15) Brandauer Readings and discussion of traditional vernacular texts. Emphasis on Sung, Yuan, and Ming short stories and on Ming and Ch'ing full-length novels. Prerequisite: permission of instructor. Offered: A.

CHIN 582 Seminar in Chinese Fiction (6, max. 15) Brandauer Directed study of selected works of fiction, focusing on the vernacular short story and novel. Prerequisite: permission of instructor. Offered: W.

CHIN 583 Seminar in Modern Chinese Literature (5) Brandauer Directed study of selected works of modern Chinese literature. Primary focus on the novel, short story, and essay. Recommended: 381, 482. Offered: Sp.
CHIN 590 Readings in the Thirteen Classics (5) Boltz Selected readings from the Thirteen Classics, and from their associated exegetical and hermeneutic traditions. Readings and emphases vary from year to year. Prerequisite: two years of Classical Chinese and 557. Offered: alternate years.

CHIN 591, 592, 593 Studies in the History of Chinese Thought (5,5,5) Chan, Knechtges Directed readings in selected traditional philosophical texts. 591: Han through T'ung; 592: Sung and Yuan; 593: Ming and Ch'ing. Prerequisite: permission of instructor.

Hindi

HINDI 501 Studies in Medieval Brāj Literature (3, max. 9) Entwistle Introduction to the Brāj dialect of Hindi and its literature. Prose readings and selected poetry by Surdas, Rasikhan, Bihari, and others. Prerequisites: 403 or equivalent. Offered: A.

HINDI 502 Studies in Medieval Avadhi Literature (3, max. 9) Entwistle Introduction to the Avadhī dialect of Hindi and its literature. Readings from Ramcarīmanas of Tulīsidas and Padmavat of Muhammad Malik Jayasi. Prerequisite: 403 or equivalent. Offered: W.

HINDI 503 Studies in Medieval Sant Literature (3, max. 9) Shapiro Introduction to the language and literature of Sant poetics. Readings include Guru Nanak's Jāgūjī and excerpts from Kabir's Grāvhamvāti. Prerequisite: 403 or equivalent.

HINDI 504 Studies in Medieval Rajasthani Literature (3) Entwistle Introduction to the literary language of Rajasthani. Reading of extracts from the prose chronicle (Khīyat) of Nainasi followed by a representative selection of bardic poetry. Prerequisite: 403 or equivalent.

HINDI 510 Structure of Hindi (3) Shapiro Grammatical analysis of Hindi, phonology, syntax, and semantics. Readings from both Western and native grammarians. Prerequisite: 403 or permission of instructor. Recommended: course in linguistics.

Indian

INDN 530 Readings in Pāli Literature (3, max. 18) Cox Reading and interpretation of intermediate and advanced texts in Pāli. Prerequisite: 402 or equivalent.

INDN 555 Topics in Dravidian Linguistics (3) Schiffman Selected topics in Dravidian linguistics. Phonological, morphological, syntactic, and historical linguistics of a selected Dravidian language or group of languages. Prerequisite: two years of a Dravidian or Indo-Aryan language or permission of instructor, and ASIAN 401 or LNG 400.

INDN 590 Special Topics in Indoology (1-5, max. 12) Studies in selected research topics in South Asian languages and literatures. Prerequisite: graduate standing and permission of instructor. Offered: Sp.

Japanese

JAPAN 501 Readings in Bibliographic Materials (5) JAPAN 510 Teaching Assistant Training Workshop (3) Brockert Introduction to issues and methods in teaching Japanese in the American college classroom. Required for all new Japanese teaching assistants. Must be taken in conjunction with ASIAN 518. Prerequisite: Permission of instructor. Offered: A.

JAPAN 540 Seminar on Japanese Linguistics (3, max. 9) Brockert Problems in the history and structure of the Japanese language. Topics vary each quarter, according to the needs and interests of the students. Prerequisites: 405-406 and permission of instructor. Offered: W.

JAPAN 551 Nō and Kyōgen (5, max. 15) Close reading and analysis of nō texts in Japanese, with some attention to kyōgen. Discussion of categorization, structure, imagery, style, mode, theme, authorship, source material, theory, and problems of translation. Prerequisites: 472 or equivalent and permission of instructor.

JAPAN 571, 572, 573 Advanced Readings in Classical Japanese Literature (5,5,5) Markus Continued readings in classical literary texts. Prerequisite: 473 or permission of instructor.

JAPAN 580 Development of Modern Japanese Fiction (5, max. 15) Reading and translation of major works of modern fiction, with emphasis on the chronological development of modern prose style and practice in literary translation. Prerequisite: permission of instructor.

JAPAN 590 Seminar in Japanese Literature (5, max. 18) Close examination of selected authors, methods, writers, or genres. Includes problems of literary criticism in Japanese literature. Prerequisite: permission of instructor. Offered: Sp.

Korean

KOR 501, 502, 503 Seminar in Korean Linguistics (5-5-5-5) Topics in Korean linguistics. For majors in Korean language and literature or linguistics. Prerequisites: background in linguistics and permission of instructor.

Sanskrit

SNKRT 550 Seminar on Sanskrit Literature (3, max. 8) Salomon Detailed study of selected authors, periods, or traditions, within the context of Indian literary history. Prerequisite: 403 or permission of instructor.

SNKRT 555 Seminar on Sanskrit Grammar (3, max. 6) Salomon Reading and critical study of traditional literature on grammar and language, including texts of Panini and other scholars. Offered: A.

SNKRT 560 Readings in Philosophical Sanskrit (3, max. 9) Cox, Potter, Salomon Intensive reading and analysis of Hindu or Buddhist philosophical texts. Prerequisite: 494 or permission of instructor. Offered: AWsp.

SNKRT 570 Seminar in Indian Epigraphy and Palaeography (3, max. 6) Salomon Introduction to the study of inscriptions and other original documents in Sanskrit and Prakrit languages and in Kharosthi, Brāhmī, and derived scripts. History of writing in India and development of Indic scripts. Methods of critical evaluation of inscriptions as sources of political and cultural history. Prerequisite: 403.

SNKRT 581, 582 Readings in Buddhist Texts (3, max. 8; 3, max. 9) Cox Interpretation of original Buddhist texts. Texts vary from year to year. Prerequisites: ability to study sources in the original languages, an introduction to Buddhist thought, and permission of instructor. Offered: 581 W.

Tamil

TAMIL 501, 502, 503 Studies in Tamil Literature (3, max. 9) Schiffman Introduction to Tamil literature beginning with Sangam poetry and culminating in modern post-independence fiction. Prerequisite: 403 or permission of instructor.

Tibetan

TIB 511, 512, 513 Advanced Literary Tibetan (3, max. 9; 3, max. 9; 3, max. 9) van der Kuijp Reading of manuscripts and xylographs with emphasis on biographical, historical, and geographical material. Prerequisite: 413 or equivalent.

TIB 531, 532, 533 Buddhist Tibetan (3, max. 9; 3, max. 9; 3, max. 9) van der Kuijp Reading and analysis of Tibetan Buddhist texts and associated literature. Selections vary each quarter and may be taken out of sequence. Prerequisite: 413 or permission of instructor. Offered: A,W,Sp.

TIB 541 Introduction to Tibetan Philology (3) van der Kuijp Philological methods in the study of Tibetan texts, blockprints as well as hand-written manuscripts. Specific examples taken from historical, biographical, and autobiographical writings. Emphasis on historical philology and semasiology. Prerequisites: 413 or 417 and permission of instructor.
Graduate Program

George Lake, Graduate Program Coordinator

Master of Science, Doctor of Philosophy Degrees

A series of graduate courses in solar system, stellar, galactic, and extragalactic astrophysics is offered. Because astronomy study depends on the fundamentals of physics, a minimum of 24 credits in physics is required for a doctorate.

The heart of the graduate program is the collaboration of students who are interested in preparation in physics and astronomy. Emphasis is placed on research, which is done in the area of stellar interiors, stellar atmospheres, planetary atmospheres and surfaces, x-ray sources, interplanetary dust, extragalactic astronomy, radio astronomy, interstellar matter, cosmology, relativistic astrophysics, and computational astrophysics.

Admission Qualifications

Entering students are not required to have a background in astronomy, although some knowledge of general astronomy is expected of those to whom a teaching assistantship is to be offered. Undergraduates interested in graduate work in astronomy are urged to concentrate on preparation in physics and mathematics.

Assistantships

A number of teaching assistantships are available, primarily in the elementary astronomy courses. Over half of the department's graduate students hold fellowships or research assistantships. Normally all students making satisfactory academic progress receive financial support.

Faculty

Chairperson
Bruce H. Margon

Professors
Adams, John B. * 1975. (Adjunct); PhD, 1961, University of Washington: planetology, remote sensing.
Balick, Bruce W. * 1975; PhD, 1971, Cornell University: radio astronomy, ionized nebulae, peculiar galaxies.
Barden, James M. * 1976. (Adjunct); PhD, 1965, California Institute of Technology: general relativity, theoretical astrophysics.
Bohm, Karl-Heinz * 1967 (Emeritus); PhD, 1954, University of Kiel (Germany); stellar atmospheres, magnetic stars.
Bohm-Vitense, Enka H. * 1967. (Emeritus); PhD, 1951, University of Kiel (Germany); stellar atmospheres, pulsating stars.
Brownlee, Donald E. * 1971; PhD, 1971, University of Washington; origin of the solar system, comets, interplanetary dust.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

ASTR 101 Astronomy (5) NW Introduction to the universe, with emphasis on conceptual, as contrasted with mathematical, comprehension. Modern theories, observations; ideas concerning nature, evolution of galaxies; quasars, stars, black holes, planets, solar system. Not open for credit to students who have taken 102 or 201; not open to upper-division students majoring in physical sciences or engineering.

ASTR 102 Introduction to Astronomy (5) NW,QSR Subject matter similar to 101 but designed for students who have had high school physics or the equivalent introduction to physics at the college level. Cannot be taken for credit in combination with 101, 201, or 301. Prerequisites: one year of high school physics or PHYS 101-102 or PHYS 110, 111, 112.

ASTR 150 The Planets (5) NW For liberal arts and beginning science students. Survey of the planets of the solar system, with emphasis on recent space exploration of the planets and on the comparative evolution of the Earth and the other planets.

ASTR 190 Modern Topics in Astronomy for Non-Science Majors (3) NW Topics of current interest, such as origin of chemical elements, novae and supernovae, white dwarfs, neutron stars, black holes, active galaxies; quasars, or interstellar medium and astrochemistry. Choice of topics depends on instructor and class interest. Prerequisite: 5 credits of astronomy courses at the 100 or 200 level of permission of instructor.

ASTR 201 The Universe and the Origin of Life (5) NW Sequel to 101 or 102, emphasizing modern views of the atomic and molecular evolution of the universe from the initial "big bang" through the formation of the solar system and the emergence of biological forms on the earth. The latter part of the course considers questions about the existence of, and communication with, extraterrestrial intelligent life, and finally the ultimate fate of the cosmos. Prerequisite: 101 or 102, or PHYS 110 or 114 or 121.

ASTR 210 Distance and Time: Size and Age In the Universe (5) NW, QSR Space and time as basic concepts in physical science. How we define and measure them, how the concepts have developed over the centuries, and how modern measurements allow us to determine the size and age of the universe.

ASTR 211 The Universe and Change (5) NW,QSR Gravity as central to the form and evolution of the universe. Conceptual formulation of gravity from the Renaissance to Einstein. Its consequences from the falling of an apple to the slowing of the expansion of the universe. Prerequisite: 101 or 211.

ASTR 212 Life In the Universe (5) NW, QSR Nebulosity, the birth of stars, galaxies, and the structure of the galaxy. Search for life. Prerequisite: 101, but the approach uses more mathematics and physics. Prerequisite: PHYS 123.

ASTR 313 Science in Civilization: Physics and Astrophysics Since 1850 (5) I&SINW Hankins, Hevly, Sullivan Organization and pursuit of the physical and astronomical sciences, focusing on the major unifying principles of physics and astronomy and the social and cultural settings in which they were created. Offered: jointly with HST 313.

ASTR 321 The Solar System (3) NW Solar system; planetary atmospheres, surfaces and interiors, the moon, comets. The solar wind and interplanetary medium. Formation of the solar system. Prerequisites: PHYS 224, which may be taken concurrently.

ASTR 322 The Contents of Our Galaxy (3) NW Introduction to astronomy. Basic properties of stars, stellar systems, interstellar dust and gas, and the structure of our galaxy. Prerequisites: PHYS 224, 225, which may be taken concurrently.

ASTR 323 Extragalactic Astronomy and Cosmology (3) NW Galaxies, optical and radio morphology and properties. Clusters of galaxies, radio sources, and quasars. Observational cosmology. Prerequisites: ASTR 322 and PHYS 224, 225, 227, which may be taken concurrently.

ASTR 421 Stellar Observations and Theory (3) NW Observations and theory of the atmospheres, chemical composition, internal structure, energy sources, and evolutionary history of stars. Prerequisites: 322, and PHYS 224, 225, 227, 228.

ASTR 422 Interstellar Material (3) NW Description and physics of the matter between the stars. Physical conditions, distribution, evolution, and motions of interstellar atoms, molecules, and dust grains. Exchange of energy and matter between stars and interstellar material. Prerequisites: 322, and PHYS 224, 225, 227, 228.

ASTR 423 High-Energy Astrophysics (3) NW High-energy phenomena in the universe, includes supernova remnants, pulsars, neutron stars, x-ray and gamma-ray sources, black holes, cosmic rays, quasistellar objects, active galactic nuclei, diffuse background radiation, gamma rays, cosmic rays, and cosmic radiation, absorption processes, and models derived from observational data. Prerequisites: PHYS 224, 225, 227, 228, or equivalent, or permission of instructor.
Undergraduate Program
Adviser
40BB Atmospheric Sciences-Geophysics

Bachelor of Science Degree

Admission Requirements: MATH 124, 125, 126; PHYS 121, 122, 123, 131, 132; with a grade of at least 2.5 in each of these courses. Special circumstances will be reviewed on a case-by-case basis.

Major Requirements: 301, 321, 340, 342, 370, 341, 342, 450, 432 and 456; CSE/ENGR 142; MATH 124, 125, 126; AMATH 351, 352; MATH 324; PHYS 121/131, 122/132, 123/133; ELEM 140. MATH 307, 308, 309 may be taken in place of AMATH 351, 352. The following courses are recommended: MATH 325; AMATH 341; PHYS 224, 225; CHEM 150, 160; OCEAN 401. A grade of 2.0 or better in each of the required courses. Petitions for other courses, such as mathematics, physics, engineering, and chemistry; and an overall GPA in these courses of 2.50.

Pregraduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, 340, 441.

Minor

Minor Requirements: ATM S 301 and other approved courses to total not less than 25 credits. Suggested tracks include: (1) Atmospheric Chemistry—ATM S 301, 340, 431, 458 and 480; (2) Synoptic/Dynamic Meteorology—ATM S 301, 370, 441, 442, 456; (3) General Meteorology—ATM S 301, 340, 370, 431, 441. Minors may include a maximum of 6 credits of independent study. 2.0 minimum grade required in each course.

Graduate Program
Graduate Program Coordinator
40BB Atmospheric Sciences-Geophysics

Master of Science, Doctor of Philosophy Degrees

Admission to the graduate program requires a baccalaureate degree in physical science, engineering, or mathematics, or its equivalent, as well as the Graduate Record Examination. The program of graduate study varies with each individual.

During the first year of graduate study, most students concentrate on developing a strong background in the fundamentals that underlie the atmospheric sciences and on getting a broad understanding of the wide range of problems encountered in the atmosphere. A qualifying examination is given toward the end of the first year of graduate study as soon as possible after the student has completed 24 credits, including 12 credits in courses numbered 500 and above. All students desiring to proceed toward the Ph.D. degree must take this examination, and students desiring the Master of Science degree may elect to take it. This examination tests understanding of the fundamental aspects of the atmospheric sciences and of the relevant mathematics and physics. Physical reasoning, rather than factual information, is stressed. Those who pass the examination with distinction are encouraged to work toward the Ph.D. degree; those who pass continue toward the Master of Science degree. Students whose objective is the Master of Science degree may elect to submit a written thesis proposal in lieu of the qualifying examination.

Research assistantships and a few teaching assistantships are available to full-time students. Applications are made through the department office.

Professors
Baker, Marcia * 1971; PhD, 1971, University of Wash­ington; cloud physics, atmospheric geophysics.
Brown, Robert A. * 1971, (Research); PhD, 1969, Univer­sity of Washington; planetary boundary layers, air­sea interaction, turbulence, remote sensing.
Businger, Joost A. * 1958, (Emeritus); PhD, 1945, Uni­versity of Utrecht (Netherlands); boundary layer met­eorology, atmosphere-ocean interaction.
Charlson, Robert J. * 1962; PhD, 1964, University of Wash­ington; atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction.
Feagle, Robert G. * 1948, (Emeritus); PhD, 1949, New York University; air-sea interaction, science policy.
Grenfell, Thomas C. * 1972, (Research); PhD, 1972, University of Washington; radiative transfer, remote sensing, sea-ice optics, microwave theory.
Harrison, Don Edmunds * 1985, (Affiliate); PhD, 1977, Harvard University; ocean circulation modeling, air­sea interaction, tropical dynamics.
Hartmann, Dennis L. * 1977; PhD, 1975, Princeton Uni­versity; climate theory, dynamic meteorology, earth radiation budget.
Hegg, Dean * 1979, (Research); PhD, 1979, Univer­sity of Washington; atmospheric chemistry, cloud physics.
Hobbs, Peter V. * 1963; PhD, 1963, University of Lon­don (UK); aerosol/cloud/precipitation physics, atmos­pheric chemistry, air pollution, mesoscale meteorolo­gy.
Holton, James Reed * 1965; PhD, 1964, Massachu­setts Institute of Technology; dynamic meteorology, middle atmosphere meteorology.
Houze, Robert A. * 1972; PhD, 1972, Massachusetts Institute of Technology; mesoscale meteorology, cloud physics and dynamics, tropical meteorology.
Katsaros, Kristina * 1969; PhD, 1969, University of Wash­ington; air-sea interaction, radiation, remote sensing.
Leevy, Conway B. * 1967; PhD, 1963, Massachusetts Institute of Technology; planetary atmospheres, middle atmosphere meteorology, remote sensing.
Maykut, Gary * 1969, (Research); PhD, 1969, Univer­sity of Washington; polar air-sea interaction, radiative transfer in ice and snow.
Parks, George K. * 1971, (Adjunct); PhD, 1966, Univer­sity of California (Berkeley); magnetospheric and space plasma physics.
Racine, Lawrence F. * 1968, (Affiliate); PhD, 1968, University of Washington; cloud and aerosol physics, airborne instrumentation and observations.
Reed, Richard J. * 1954, (Emeritus); DSc, 1949, Massa­chusetts Institute of Technology; synoptic meteorology, weather analysis and prediction, numerical modeling.
Rhines, Peter B. * 1984; PhD, 1967, Cambridge Univer­sity (UK); the circulation of the oceans and evolution of climate.

Sarachik, Edward * 1984; PhD, 1966, Brandeis Univer­sity; large scale ocean/atmosphere interaction, equa­torial dynamics, climate change.
Tung, Ka K. * 1988, (Adjunct); PhD, 1977, Harvard Uni­versity; atmospheric and geophysical fluid dynam­ics.
Untersteiner, Norbert * 1962; PhD, 1950, University of Innsbruck (Austria); air-sea interaction, polar climat­ology, sea ice physics.
Wallace, John M. * 1966; PhD, 1966, Massachusetts Institute of Technology; atmospheric dynamics, large­scale motions.
Zoiler, William H. * 1984, (Adjunct); PhD, 1969, Massa­chusetts Institute of Technology; analytical, environ­mental, and nuclear chemistry.

Associate Professors
Bates, Timothy S. * 1990, (Affiliate); PhD, 1988, Univer­sity of Washington; environmental chemistry, atmos­phere-ocean interaction, climate change.
Breidenthal, Robert E. * 1960, (Adjunct); PhD, 1979, California Institute of Technology; turbulence, mixing, combustion, vorticity.
Breiherton, Christopher S. * 1984; PhD, 1984, Massa­chusetts Institute of Technology; convective cloud sys­tems, mesoscale meteorology, climate theory.
Covert, David S. * 1975, (Research); PhD, 1974, Uni­versity of Washington; atmospheric chemistry, aerosol physics and instrumentation.
Durrant, Dale R * 1987; PhD, 1981, Massachusetts Institute of Technology; atmospheric dynamics, mes­oscale meteorology, numerical modeling.
Ferek, Ronald * 1965, (Research); PhD, 1982, Florida State University; atmospheric chemistry, global tropo­spheric chemistry, acid precipitation.
Harrison, Halstead * 1971; PhD, 1960, Stanford Uni­versity; atmospheric chemistry.
Mass, Clifford F. * 1981; PhD, 1978, University of Wash­ington; synoptic and mesoscale meteorology.

Assistant Professor
Battisti, David S. * 1983; PhD, 1988, University of Wash­ington; large-scale atmosphere-ocean dynam­ics, climate dynamics, tropical circulation.

Course Descriptions

See page 55 for explanation of course numbers, symb­ols, and abbreviations.

Courses for Undergraduates

ATM S 101 Weather (5) NW The earth's atmosphere, with emphasis on weather observations and forecasting. Daily weather map discussions. Highs, lows, fronts, clouds, storms, jet streams, air pollution, and other features of the atmosphere. Physical pro­cesses involved in weather phenomena. Intended for nonmajors. Offered: AWSpS.

ATM S 102 Climate of the Earth and Other Planets (5) NW A global view of the earth's atmosphere. Factors controlling the earth's climate, its changes from year to year and through the ages. Natural cli­matic variations and human effects on the atmosphere. Atmospheres of other planets. Prerequisite: 101. Offered: W.

ATM S 301 Introduction to Atmospheric Sciences (5) NW Basic concepts of the atmosphere. Clouds and other phenomena. Thermodynamic processes. Solar and terrestrial radiation. Air motions. Daily weather discussions and forecasts. For majors and nonmajors. Prerequisites: PHYS 121, 122, 123 and MATH 124, 125, 126. Offered: A.

ATM S 321 Physical Climatology (3) NW Evolution and present state of earth's climate. Emphasis on physical processes determining the climate of the earth's atmosphere and surface: radiative transfer, en­ergy balance, hydrologic cycle, atmospheric and oce­anic energy transport. Factors controlling climate change. Prerequisite: 301. Offered: Sp.

ATM S 340 Introduction to Thermodynamics and Cloud Processes (5) NW Thermodynamics and hy­drosystems. Cloud and precipitation processes with emphasis on the microphysics. Prerequisite: MATH 126 or permission of instructor. Offered: W.

ATM S 359 Fundamentals of Atmospheric Chem­istry (3) NW Review of basic principles of physical chemistry; evolution and chemical composition of earth's atmosphere; half-life, residence and renewal time; sources, transformation, transport and sinks of gases in the troposphere; atmospheric aerosols; chemical cycles; air pollution; stratospheric chemistry. Prerequisite: CHEM 140. Offered: W.

ATM S 362 Instrumental and Observations (5) NW Principles of operating instruments for measuring ba­sic meteorological parameters such as pressure, tem­perature, humidity, wind, and radiation. Concepts of sensors and instruments, and the response. Manipulation of output data including digitizing, signal processing, and microprocessor data ac­quisition. Higher level language programming using UNIX workstations. Prerequisites: MATH 126 and PHYS 123. Offered: Sp.

ATM S 370 Atmospheric Structure and Analysis (5) NW Structure and evolution of extratropical cy­clones, fronts and convective systems. Surface and upper air analysis techniques. Radar and satellite data. Real-world applications of basic dynamical principles. Introduction to operational products and forecasting. Prerequisite: 301. Offered: W.

ATM S 390 Honors Tutorial in Atmospheric Sci­ences (* max. 6) Review and discussion of selected problems in atmospheric sciences. Introduction to re­search methods. Presentation of a research paper. Recommended: MATH 126 and PHYS 123. Offered: AWSpS.

ATM S 406 Geophysics: The Atmosphere (3) NW Phenomena of the lower atmosphere: simple applica­tions of the principles of classical thermodynamics and fluid dynamics to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics. Prerequisites: MATH 126, GPHYS 104 or permission of instructor. Offered: jointly with GPHYS 406; Sp.

ATM S 431 Atmospheric Physics (5) NW Energy transfer processes: solar and atmospheric radiation, turbulence, and boundary-layer structure. Applica­tions. Prerequisite: 340 or PHYS 224. Offered: A.

ATM S 441 Atmospheric Motions I (3) NW Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity; dy­namics of midlatitude disturbances. Prerequisites: AMATH 352. Offered: A.

ATM S 442 Atmospheric Motions II (5) NW Wave dynamics, numerical prediction, development of midlatitude synoptic systems, and general circulation. Includes laboratory exercises. Prerequisite: 441. Offered: W.

ATM S 450 Atmospheric Data Analysis (4) NW Statistical and other methods employed in atmos­pheric data analysis. Frequency distributions, sam­pling theory, linear correlation, elementary time-series analysis, objective map analysis. Prerequisites: 370, ENGR 142, or equivalent. Offered: W.

Diurnal and topographically-forced circulations, Aviation meteorology. Laboratories include extensive practice in forecasting and surface map analysis. Prerequisites: 370, 442, and 450. Offered: Sp.

ATM S 458 Global Atmospheric Chemistry (4) NW Global atmosphere as chemical system. Fundamental physical factors and chemical processes. Natural variabilities and anthropogenic change. Atmospheric cycling of trace substances. Connections to global issues such as climate change, acid, deposition, influences on biogeochemistry. Prerequisites: CHEM 140 and ATM S 350 or CHEM 350 or 456. Offered: jointly with CHEMENV S 456; A.

ATM S 462 Sea-Air Transfer Processes (*) (max. 6) NW Classroom work and field observations relating to the physical processes occurring at the ocean-atmosphere boundary. Transfer of energy, momentum, and moisture and their effects on small- and large-scale phenomena, including fog formation, convection, modification of air masses. Prerequisite: 442 or permission of instructor. Offered: alternate years; S.

ATM S 480 Air-Quality Modeling (3) NW Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Topics include meteorological dispersion models and various "reciprocities" models based on chemical "fingerprinting" of sources. Emphasizes current problems. Prerequisite: 458 or CHEM 458 or CIVE 490 or permission of instructor. Offered: jointly with CIVE 480; W.

ATM S 492 Readings in Meteorology or Climatology (*) Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

Courses for Graduates Only

ATM S 501 Fundamentals of Physical Meteorology (5) Fundamentals of hydrostatics, thermodynamics, radiative transfer with application to planetary atmospheres, cloud physics, and atmospheric chemistry. Prerequisite: concurrent registration in 502. Offered: A.

ATM S 502 Introduction to Dynamic Meteorology (4) Basic equations governing atmospheric motions and their elementary applications; circulation and vorticity, planetary boundary layer, general circulation, dynamics of mid latitude disturbances. Prerequisite: concurrent registration in 502. Offered: A.

ATM S 503 Introduction to Synoptic Meteorology (1) Analysis and interpretation of weather maps, vertical cross-sections, and satellite imagery with emphasis on fundamental dynamical relationships between the wind, temperature and pressure fields and the structure and evolution of typical extratropical disturbances. Prerequisite: 502 or permission of instructor. Credit/no credit only. Offered: W.

ATM S 508 Geochemical Cycles (4) Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to global flows. Emphasis on stable isotopes, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisites: CHEM 150, 350, MATH 307, 308. Offered: jointly with ENV SGPHYS 508.

ATM S 510 Physics of Ice (3) Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from the vapor and liquid phases. Physical properties of snow. Prerequisite: permission of instructor. Offered: jointly with GPHYS S 510; alternate years; W.

ATM S 511 Formation of Snow and Ice Masses (3) Snow climatology. Transport of snow by wind. Transfer of radiative, sensible, and latent heat at the surface of snow and ice. Freezing of natural water bodies. Heat and mass budgets of ice masses, remote sensing of snow and ice. Theories of ice ages. Prerequisite: permission of instructor. Offered: jointly with GPHYS S 511; alternate years; A.

ATM S 512 Dynamics of Snow and Ice Masses (3) Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with GPHYS S 512; alternate years; Sp.

ATM S 513 Structural Glaciology (3) Physical and chemical processes of snow stratigraphy and meta- morphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironments. Dynamic metamorphism from ice flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relationship between ice processes and bulk physical properties. Prerequis­ ite: permission of instructor. Offered: jointly with GPHYS S 513; alternate years; W.

ATM S 514 Ice and Climate Modeling (3) Principles of global climate modeling. Modeling seasonal cycles of snow cover and sea ice. Ice-sheet mass balance and flow. Solar radiation anomalies due to changes in earth's orbit. Climate/ice-sheet models of Pleistocene ice ages. Prerequisite: permission of instructor. Offered: jointly with GPHYS S 514; alternate years; A.

ATM S 520 Atmospheric Sciences Colloquium (1-3, max. 6) Seminars on current research in advanced topics related to atmospheric sciences, conducted by faculty and visiting scientists and professors. Includes presentation of doctoral dissertations by department graduate students. For Atmospheric Sciences graduate students only. Prerequisite: permission of department.

ATM S 521 Seminar in Atmospheric Dynamics (3) Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

ATM S 523 Seminar in Clouds and Precipitation (*) Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: ASp.

ATM S 524 Seminar in Energy Transfer and Remote Sensing (*) Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

ATM S 552 Objective Analysis (3) Review of objective analysis techniques commonly applied to atmospheric problems; examples from the meteorological literature and class projects. Supplemented with discussions on the physical processes through which these budgets are satisfied. Prerequisite: 502, 509 or OCEAN S 509, or permission of instructor. Offered: Sp.

ATM S 554 General Circulation of Atmosphere (3) Requirements of the global angular momentum, heat, mass, and energy budgets upon atmospheric motions as deduced from observations. Study of the physical processes through which these budgets are satisfied. Prerequisite: 502, 509 or OCEAN S 509, or permission of instructor. Offered: Sp.

ATM S 557 Atmospheric Radiation: Shortwave (3) Principles of radiative transfer in planetary atmospheres with emphasis on single and multiple scattering of visible and infrared radiation. Applications to atmospheric radiation and energy balance and remote sensing. Prerequisite: PHYS S 323 or permission of instructor. Offered: jointly with GPHYS S 532; alternate years; A.

ATM S 558 Atmospheric Radiation: Longwave (3) Principles of radiative energy exchange in planetary atmospheres with emphasis on emission and absorption of infrared and microwave radiation. Applications to atmospheric and surface energy balance and remote sensing. Prerequisite: PHYS S 225 or permission of instructor. Offered: jointly with GPHYS S 533; Sp.

ATM S 559 Remote Sensing of the Atmosphere and Climate System (3) Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications to atmospheric sciences. Prerequisites: 532 or 533. Offered: jointly with GPHYS S 534; alternate years; W.

ATM S 560 Mesoscale Storm Structure and Dynamics (3) Techniques of observing storm structure and dynamics by radar and aircraft, observed structures of precipitating cloud systems, comparison of observed structures with cloud models. Prerequisite: 535 or GPHYS S 535. Offered: Sp.

ATM S 562 Seminar in Clouds and Precipitation (2) Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with GPHYS S 534; alternate years; W.

ATM S 563 Regional Atmospheric Modeling (3) Regional atmospheric models. Satellite observations. Radiosonde data. Numerical integration. Prerequisite: 502, 509 or OCEAN S 509. Offered: alternate years; W.

ATM S 564 Seminar in Clouds and Precipitation (1-3, max. 6) Directed at current research in the subject. For advanced students. Credit/no credit only. Prerequisite: permission of instructor. Offered: W.

ATM S 565 Atmospheric Structure and Analysis II: Non-Convective Mesoscale Circulation (3) Thermally forced circulation systems, including sea/land breezes and mountain/valley winds. Topographic deflection, channeling and blocking in mesoscale flows. Analysis and forecasting of local mesoscale phenomen­ ena. Offered: alternate years; W.

ATM S 566 Planetary Atmospheres (3) Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all planetary atmospheres; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. For students interested in atmospheric processes or those specifically interested in planets. Offered: jointly with ASTR S 566; alternate years; A.

ATM S 567 Middle Atmosphere Meteorology (3) Composition and structure. Radiative processes. Extratropical and equatorial circulations. Sudden stratospheric warmings. Transport of trace constituents. Dynamics and chemistry of ozone layer. Prerequisites:
ATM S 558 Atmospheric Chemistry (3) Photochemistry of urban, rural, and marine tropospheric air, and of the natural and perturbed ozone in the middle atmosphere. Unity of the chemistries in these apparently different regimes. Prerequisite: 452 or 501 or CHEM 457 or permission of instructor. Offered: alternate years; Sp.

ATM S 564 Atmospheric Aerosol and Multiphase Atmospheric Chemistry (3) Physics and chemistry of particles and droplets in the atmosphere. Statistics of size distributions, mechanics, optics, and physical chemistry of atmospheric aerosols. Brownian sedimentation, impaction, condensation, and hydroscopic growth. Prerequisite: permission of instructor. Offered: alternate years; W.

ATM S 571 Advanced Physical Climatology (3) Physical processes that determine the climate of Earth and its past and future changes. Greenhouse effect. Climate modeling. Radiative and dynamical feedback processes. Orbital parameter theory. Critical analysis of climate change predictions. Prerequisite: permission of instructor. Offered: alternate years; A.

ATM S 575 Large Scale Dynamics of the Tropical Atmosphere (3) Observations and underlying dynamics of large-scale tropical circulations. Factors that determine large-scale persistent precipitation in the tropics, thermal forcing of atmospheric circulations by these regions, and temporal variability of the forcing and response. Credit/no credit only. Prerequisites: 509, 542. Offered: alternate years; W.

ATM S 591 Special Topics (1-4, max. 9) Lecture series on topics of major importance in the atmospheric sciences. Prerequisite: permission of instructor.

ATM S 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSpS.

ATM S 700 Master's Thesis (*) Offered: AWSpS.

ATM S 800 Doctoral Dissertation (*) Offered: AWSpS.

Biochemistry
109 Bagley

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes. Since the study of any chemistry-based field requires an understanding of mathematics and physics, the Bachelor of Science degree in biochemistry requires introductory courses in mathematics, physics, chemistry, and biology as well as intermediate-level courses in chemistry. These courses prepare the student for junior and senior studies in biochemistry, molecular genetics, and molecular biology. Since the subject requires a very broad scientific foundation, the program requires 200 credits. At the advanced level the student has a choice of a wide range of courses in a variety of science departments.

Undergraduate Program
Adviser
Lani Stone
109C Bagley

Bachelor of Science Degree
Admission: Recommended high school preparation includes four years of college preparatory mathematics, one year of physics, one year of chemistry, and one year of biology.

Major Requirements: MATH 124, 125, 126 (or 134, 135, 136); PHYS 114, 115, 116 (or 121/131, 122/132, 123/133 recommended); CHEM 145 (or 140); CHEM 155, 164 (or 150, 160); CHEM 141, 151, 161; CHEM 335, 336, 337, 346, 347 (or 237, 238, 239, 241, 242); CHEM 455, 456, 457 (or 352, 455, BIOG 451); BIOG 201, 202; BIOG 440, 441, 442, 449. Other courses among the following: MATH 507 and either 205 or 308 (not if 134, 135, 136 taken); CHEM 203, 401, 402; MICRO 402, 410; MICRO 317, 312, 312, 416, 417, 419, 426, 427, 435, 436, 460, 461, 462, 463, 464, 465, 471; GENET 455; ZOOL 455, 456; up to 9 credits of advanced-level undergraduate research. For all chemistry and biochemistry courses required by the major, a minimum grade of 1.7 and a GPA of 2.60. For graduation 200 credits are required with a cumulative GPA of 2.80 or better.

For faculty listing see Chemistry in the College of Arts and Sciences in the School of Medicine. For course descriptions, see the appropriate department.

Biology
318 Hitchcock

Undergraduate Program
Advisers
318 Hitchcock

Biological sciences programs leading to a baccalaureate degree in a variety of biological fields are offered by the departments of Biochemistry, Botany, Microbiology, and Zoology. An interdisciplinary program in cell and molecular biology leading to a baccalaureate degree in biology is described below. Baccalaureate degree programs with a strong biological orientation are also offered by the Department of Psychology, the Colleges of Forest Resources and Ocean and Fishery Sciences, and the Institute for Environmental Studies. The departments of Botany and Zoology jointly offer a major in Biological Sciences (additional information appears in the College of Education section of this catalog).

Bachelor of Science Degree
Major Requirements: Designed for students who wish to obtain undergraduate training that emphasizes the chemical and cellular aspects of biology, this program is particularly well suited to students who wish to pursue graduate studies in areas of genetics, biochemistry, microbiology, cell biology, and developmental biology. The following courses are required: MATH 124, 125, and either MATH 126, STAT 311, or Q SCI 381; CHEM 140 or 145; 150 or 155, 160 or 164, 223, 224 (or 237, 238, 239); CHEM 352; one chemistry laboratory beyond CHEM 141; BIOI 201, 202, 203; BIOG 440, 441, and 442; GENET 371 or 372; and 15 credits of advanced biology course work selected in consultation with a biology adviser. PHYS 114, 115, 116 or 121/131, 122/132, 123/133 strongly recommended.

Faculty
Director
John M. Palka

Professor
Palka, John M. 1969; PhD, 1965, University of California (Los Angeles); neurophysiology, sensory physiology, developmental neurobiology.

Senior Lecturers
Edwards, Ola 1982, (Emeritus); PhD, 1980, University of Washington; alpine ecology and introductory biology teaching.

Lecturers
Meary, Tekie 1988; PhD, 1981, University of Washington; applied entomology and environmental health.

Office hours: 1-3 p.m.

Periodic availability.

Office hours: 1-3 p.m.

Periodic availability.

Contact: Rudkin, Alison H. 1974; MS, 1973, University of Washington; physiology and development.

Office hours: 1-3 p.m.

Periodic availability.

Contact: Russell, Millie L. 1974; EdD, 1988, University of Washington; health science careers.

Office hours: 1-3 p.m.

Periodic availability.

Contact: Waaland, Susan 1990; PhD, 1969, University of California (Berkeley); salinity and plant physiology.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
The courses in biology listed below are administered by several departments. Other courses in biology and listed under such headings as Biochemistry, Biological Structure, Botany, Microbiology, and Zoology.

BIOI 100 Introductory Biology (5) NW Develops an awareness of science by studying basic biological principles and their application to problems of humans and society. Autumn Quarter concentrates on the organism; Winter on the cell; and Spring on ecology and the environment. For nonscience majors only. Credit allowed for only three of the following: 100, 150, 151, 152. Offered: AWSpS.

BIOI 101-102 General Biology (5-5) NW Living systems viewed from the subcellular to the community level, emphasizing the diversity, functioning, and interaction of whole organisms. Topics covered include: cell structure and function, energy, genetics, animal physiology and development in 101; plant and animal diversity, plant structure and function, general ecology and evolution in 102. Emphasizes the position of human in the biological world. For nonmajors and majors in biology-related fields who need a thorough two-quarter introduction to biology. Prerequisite: 101 for 102. Offered: A,W.

BIOI 103 Introduction to Biology (5) NW Meary Biology is the ecological concept of the relationship of human biology. For students in the Educational Opportunity Program. Cannot be taken for credit if 100 previously taken. Credit/no credit only. Prerequisite: permission of instructor. Offered: A,W.
BIOI 104 Biology for Elementary School Teachers (5) NW Butterick Basic concepts of biology, with emphasis on background needed for confident use of the new science curriculum materials in the elementary school. Prerequisite: permission of instructor. Offered: AW.

BIOI 110 Elementary Biology for Health Professions I (2) NW Russell Elementary biomedical concepts. For Equal Opportunity Program students only. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

BIOI 111 Elementary Biology for Health Professions II (2) NW Russell Elementary human anatomy and physiology, including selected areas in laboratory medicine. For Equal Opportunity Program to students only. Credit/no credit only. Prerequisite: 110. Offered: W.

BIOI 112 Elementary Biology for Health Professions III (1-4) NW Russell Field experience in a health profession. For Equal Opportunity Program students only. Credit/no credit only. Prerequisite: 111. Offered: Sp.

BIOI 113 Biology Tutorial (1-3, max. 6) NW Menery Independent study. Topics related to material taken in ZOOL 118. For Equal Opportunity Program students only. Credit/no credit only. Prerequisite: permission of instructor.

BIOI 150 Biology: The Organism (5) NW Fundamentals of living systems, with emphasis on organisms. Selected organisms, both animal and plant, examined in detail to explore how structure is related to function, and how the whole is integrated into a successful individual. For nonscience majors only. Offered: A.

BIOI 151 Biology: The Cell (5) NW Fundamentals of living systems, with emphasis on cells. Cellular and molecular biology concepts, with human health, including AIDS as a virus, DNA, and cellular replication. For nonscience majors only. Offered: W.

BIOI 152 Biology: Ecology and Evolution of Organisms (5) NW Fundamentals of living systems, with emphasis on the ecology and evolution of organisms. Considers diversity of organisms and the ways they are adapted to live in specific habitats. Studies forces which direct the evolution of organisms. For nonscience majors only. Offered: Sp.

BIOI 201, 202, 203 Introductory Biology (5,5,5) NW Introduction to biology for students intending to take advanced courses and preprofessional programs. Emphasis is on understanding how things: molecular phenomena, cell structure, metabolism, energetics, genetic basis of inheritance in 201; animal structure, function, and development in 202; plant structure and function, general ecology, and evolution in 203. Prerequisites: CHEM 140, 150, and 160; 201 for 202, 202 for 203. Offered: AWSp, AWSp, Asp.

BIOI 213 Scientific Illustration (3) VLPANW Practical course designed to acquaint the student with the techniques of illustrating, accurate and selective interpretation of shape, texture, and consistency of biological materials, working in black and white and using a variety of illustration techniques. Students may choose objects of special interest to them. Offered: through University Extension. W.

BIOI 214 Scientific Illustration (2) VLPANW Continuation of 213. Further training techniques: tone, color, and working from the live animal. Exploration of specifications for ultimate use in projection or print. Offered: through University Extension; Sp.

BIOI 401 Cell Biology (5) NW Sakken, Hille, Wakimoto, Wright Structure and function of the cell. Prerequisites: 201, 202, 203 or equivalent; one upper-division course in a related area (embryology, histology, physiology, or biochemistry).

BIOI 402 Cell Biology Laboratory (3) NW Shellenbarger Practical in modern methods (restriction enzyme digestion, blotting, hybridization, immunocytochemistry, density gradient centrifugation, electron microscopy) and other methods currently used to study plant and animal cells, nucleic acids, and proteins. Includes practice in scientific writing. Prerequisite: 401 which may be taken concurrently.

BIOI 454 Evolutionary Mechanisms (4) NW Kingsolver, Schenck Evolutionary change as determined by mutation, recombination, selection, effects of the genetic system, isolating mechanisms, hybridization, polyploidy on speciation. Examples of microevolution and macroevolution changes from plants and animal kingdoms. For advanced undergraduate and graduate students in biological sciences. Prerequisites: 201,202,203 or 101-102 or permission of instructor.

BIOI 460 Biology of Eukaryotic Microorganisms (5) NW Whisler Introduction to comparative biology of the algae, fungi, and protozoa. Emphasis on the life history, physiology, and structure of protists most commonly used in contemporary biological research. Prerequisites: 201, 202, 203 or 101-102 or introductory microbiology. Offered: alternate years; 1996 Sp.

BIOI 472 Principles of Ecology (4) NW Bliss, Kareiva, Odell, Orins, Paine Population biology, interactions between species in biological communities, relationship of community to environment, physiological ecology, principles of natural selection. Prerequisites: 15 credits in biological sciences and upper-division standing, or permission of instructor. Offered: W.

BIOI 473 Limnology (3) NW Biological, physical, and chemical features of lakes and other inland waters. Prerequisites: 15 credits in biological sciences, 10 credits in college chemistry, and upper-division standing, or permission of instructor.

BIOI 474 Ecology Laboratory (3) NW Students may be required to share a portion of the transportation costs for field trips. Prerequisites: 472, which may be taken concurrently, and permission of instructor.

BIOI 475 Limnology Laboratory (2) NW Examination of biota of fresh waters, survey of limnological methods, and analysis of data. Prerequisites: 473, which may be taken concurrently, and permission of instructor.

BIOI 476 Conservation Biology (5) NW Boersma, Orins Explores biological, managerial, economic, and ethical concepts affecting survival of species. Applications of ecology, biogeography, population genetics, and social sciences for the preservation of species in the face of widespread global habitat modification, destruction, and other human activities. Prerequisite: 472 or ENV S 204 or equivalent. Offered: joint with ENV S 476.

BIOI 491 Life Science for Elementary School Teachers (3-9) NW Rigorous introduction to life science in hands-on setting for teachers with no science background. Emphasizes Washington State Curriculum Guides and develops classroom activities; experimental design and data analysis; living organisms; connecting biological concepts, urban society, and Pacific Northwest ecosystems. Credit/no credit only. Prerequisite: teaching experience or permission of instructor. Offered: through University Extension only.

BIOI 499 Independent Study In Biology (1-5, max. 15) Individual laboratory or library explorations of selected topics. Prerequisite: permission of instructor.

Course for Graduates Only

BIOI 501 Advanced Cytology (1-5, max. 5) Detailed study of the structure and function of the cell. Prerequisite: permission of instructor.

BIOI 502 Cell Biology (3, max. 6) Four to five topics of current interest in cell biology chosen by the enrollee. Prerequisite: permission of instructor.

BIOI 577 Problem Solving in Conservation Biology (5) In-depth analyses of current issues in conservation biology and sustainable development. Emphasis on multidisciplinary approaches to address specific problems in both temperate and tropical regions. Prerequisite: only with ENV S 576.

BIOI 585 Methods and Problems in Development (3) Schubiger, Comai, Kimelman Special topics in development. Integrates classical and current ap-
Graduate Program

The Department of Botany offers programs of graduate study leading to the Master of Science and Doctor of Philosophy degrees. Each program of study is planned individually and takes into consideration the background and interests of the student.

Research Facilities

Special departmental facilities include electron microscopes, greenhouse, growth chambers for both higher plants and algal cultures, and herbarium. The Friday Harbor Laboratories on San Juan Island offer opportunities for the study of marine botany, and the great variety of habitats in the Pacific Northwest provide many opportunities for field investigations.

Special Requirements

A prospective graduate student is expected to have had the equivalent of an undergraduate major in biological science, with training in chemistry (at least through organic chemistry), general botany, plant physiology, and genetics. Calculus and/or statistics is recommended.

Financial Aid

Teaching assistantships are awarded to selected applicants. Students should inquire about other sources of support.

Correspondence and Information

Graduate Program Coordinator
430 Hitchcock
Department of Botany, KB-15

Faculty

Chairperson
Joseph F. Ammirati

Professors

Ammirati, Joseph F. • 1979; PhD, 1972, University of Michigan; mycology, taxonomy and ecology of fungi.

Bendich, Arnold J. • 1970; PhD, 1969, University of California. San Diego; plant development.

Bliss, Lawrence C. • 1978; PhD, 1956, Duke University; physiological plant ecology and ecosystem development and function, arctic, alpine environments.

Cattolico, Rose A. • 1975; PhD, 1973, State University of New York (Stoney Brook); plastid replication, nucleic acid biochemistry in synchronized unicellular algae.

Cleland, Robert E. • 1964; PhD, 1957, California Institute of Technology; physiology, plant hormones, cell wall.

del Moral, Roger • 1968; PhD, 1968, University of California (Santa Barbara); ecology, gradient analysis, community structure, phytosociology.

Hall, Benjamin D. • 1983, (Adjunct); PhD, 1959, Harvard University; molecular genetics of yeast and higher plants.

Halperin, Walter A. • 1968; PhD, 1965, University of Connecticut; plant physiology, developmental anatomy, plant cancer, tissue culture.

Haskins, Edward F. • 1966; PhD, 1965, University of Minnesota; cytology, ultrastructure of microorganisms, especially slime molds.

Krucecky, Arthur R. • 1950, (Emeritus); PhD, 1950, University of California (Berkeley); evolution, biosystematics, edaphic ecology, conservation.

Leopold, Estelle B. • 1976; PhD, 1955, Yale University; paleoecology, pollen and seed analysis, late Cenozoic environment.

Meeuse, Basilia J. D. • 1952, (Emeritus); Doctorate, 1939, University of Leyden (Netherlands); plant physiology, algal physiology, metabolism, plant biochemistry.

Nester, Eugene W. • 1962, (Adjunct); PhD, 1959, Case Western Reserve University; genetics and biochemistry of bacterial-plant cell interactions, tumorigenes.

Schimke, Douglas W. • 1989; PhD, 1977, University of Illinois; evolutionary biology, plant population biology and coevolution.

Tsukada, Matsu • 1969; DSc, 1961, Osaka City University (Japan); interpretation of Quaternary events from palynological and kindred data.

Van Valkenburgh, Elizabeth • 1982; PhD, 1980, University of Washington; leaf growth and development, cellular and biochemical levels of control.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

BOT 110 Introductory Plant Biology (5) NW Ammirati, Bliss, del Moral, Haskins Basic concepts in plant biology for nonmajors, with emphasis on plant diversity and how plants grow and reproduce. Modern ideas concerning biotechnology, ecology, agriculture, horticulture, practical horticulture, and conservation. Prerequisite: one semester of high school biology. Offered: AWSp.

BOT 113 Plant Identification and Classification (5) NW Ammirati, Bliss, del Moral, Haskins Introduction to the systematic and classification of the plant kingdom, with emphasis on the floras of the western United States. Prerequisite: one semester of high school biology. Offered: SP.

BOT 221 Diversity of Algae, Fungi, and Related Protists (5) NW Ammirati, Bliss, del Moral, Haskins Explores the diversity of form, function, and ecology of algae, fungi, related protists, and selected prokaryotes. Origin, evolution, and phylogeny, and interactions with humans, other organisms, and the environment emphasized. Prerequisite: introductory course in biology. Offered: W.

BOT 331 Landscape Plant Recognition (3) NW Hamilton, Tsukada Field identification of important groups of woody and herbaceous landscape plants, emphasizing diverse landscape uses and native and exotic forms and family relationships. Cultivated plant nomenclature. Plant descriptive characteristics evident in the field with eye and hand lens. Hardiness and landscape applications. Recommended: 113. Offered: joint with UH 331; Sp.

BOT 350 Introduction to Plant Geography (4) NW Tsukada Patterns of world vegetation distributions; the relationships between vegetation and climate; introduction to general theories of plant distribution. Emphasis on the affinities within vegetation in different parts of the world. Offered: W.
BOT 354 Introduction to Plant Ecology (5) NW Bliss Basic concepts of plant ecology, including studies of the environment, plant-environment interactions, populations, communities, and ecosystems. Laboratory includes two weekend field trips, laboratory and greenhouse experiments, and an introduction to ecological problem solving. Prerequisite: ten credits of biological sciences or permission of instructor. Offered: Sp.

BOT 371 Elementary Plant Physiology (3) NW Cleland, Van Volkenburgh Nutrition, assimilation, transport, growth, photosynthesis, and cellular respiration in plants. Prerequisites: BIOL 203 or equivalent permission of instructor. Offered: W.

BOT 372 Plant Physiology Laboratory (2), NW Cleland, Van Volkenburgh Laboratory experiments on the growth, nutrition, and metabolism of plants. Prerequisite: 371 which may be taken concurrently. Offered: W.

BOT 380 Economic Botany (3) NW Tsukada Plants useful or harmful to man; their taxonomic and morphological characteristics and chemical constituents; history, distribution, production, usage, and roles in prehistoric and modern cultures and civilization. Prerequisite: 110 or 113 or 10 credits in biological sciences. Offered: even years; A.

BOT 426 Plant Genetic Engineering (2) NW Comai Theory, strategy, and methods of genetic engineering focusing on applications to plant biology. Includes the isolation, characterization, and cloning of nucleic acids, the use of bacterial and plant vectors, and the introduction and expression of genes in plants. Prerequisites: concurrent registration in 427 and permission of instructor. Offered: odd years; W.

BOT 427 Plant Genetic Engineering Laboratory (4) NW Comai Methods and techniques in plant genetic engineering, with applications to plant biology. Emphasis on laboratory procedures and experiments. Prerequisites: current registration in 426 and permission of instructor. Offered: odd years; W.

BOT 428 Molecular and Cellular Biology of Plants (3) NW Bendich, Catto|ico, Comai Structure and function of the nucleus, the organelles, and their genomes. Review of the techniques used in cellular and molecular biology such as tissue culture, cell fractionation, nuclear acid characterization, genetic engineering, and genome mapping. Offered: W.

BOT 429 Plant Nuclear and Cytoplasmic Genetics (3) NW Bendich, Comai Covers genetic aspects specific to plants and algae, including chromosome structure, genome mapping, transposon biology, genes for floral and vegetative development, genetic engineering, plastid levels, and cytoplasmic genetics. Prerequisite: BIOL 101 or 203, and GENET 371 or 372. Offered: 1996 Sp.

BOT 441 Morphology and Anatomy of Land Plants (5) NW Halperin Comparative morphology and anatomy of land plants. Derivation of morphological structures and botanical relationships examined using living and fossil organisms. Laboratories emphasize live plants native to the Pacific Northwest. Prerequisite: ten credits of biological sciences (must include some plant science) or permission of instructor. Offered: A.

BOT 443 Origins of Our Modern Flora (4) NW Leopold Evolution and biogeographic development of our modern forest taxa and their associations. Late Cenozoic forests (last 60 million years) of western North America and their environments. Geologic and climatic shifts that have shaped temperate forest types from tropical vegetation during early Cenozoic Era. Prerequisite: 113 or equivalent. Offered: 1995 W.

BOT 445 Marine Botany (6) NW Survey of plants represented in marine environments; natural history; ecology, distribution, habitat, adaptation, and trophic interrelationships. Prerequisites: appropriate credits in biological sciences, generally BIOL 101-102 or 201,202,203; concurrent registration in ZOOL 430; and permission of the Director of Friday Harbor Laboratories. Offered: at Friday Harbor Laboratories. Offered: Sp.

BOT 446 Phycology (5) NW Catto|ico, Waaland Study of major algal groups emphasizing form, function, reproduction, and distribution. Topics include evolution, phylogeny, and classification. Ecologically useful and ecologically important algae emphasized. Prerequisite: ten credits of biological science or permission of instructor.

BOT 455 Vegetation of Western Washington (6) NW del Moral Vegetation of western Washington, including mature, saval, and weedy vegetation. Recognition of landscape patterns, sight identification of common and indicator species, classification of major communities, types, and uses of native species in landscape design. Recommended: 113 or 354 or L ARC 463. Offered: even years; A.

BOT 456 Plant Community Ecology (5) NW del Moral Development of plant community theory; theory of vegetation structure and typical identification; numerical methods for vegetation description and pattern analysis; gradient analysis, correlation, and allometry in complex systems; vegetation dynamics, niche theory. Laboratory emphasizes sampling design and field and computer methods. Two weekend field trips required. Prerequisite: 354 or permission of instructor. Offered: odd years; A.

BOT 458 Alpine Plant Ecology (5) NW Edwards Structure of plant communities in alpine regions of the Pacific Northwest. Characteristics of physical environment which influence species adaptation and distribution. Influence, impact of humans and criteria for preservation and/or management of alpine areas. Three weekend field trips required. Prerequisite: 10 credits in biological sciences or permission of instructor. Offered: Sp.

BOT 461 General Mycology (5) NW Ammirati, Whisler General survey of the fungi with emphasis on life cycles, structure, physiology, economic importance. Prerequisite: 10 credits in biological science or permission of instructor. Offered: A.

BOT 462 Mushrooms and Related Fungi (5) NW Ammirati General biology, ecology, and classification of mushrooms, polypores, puffballs, and other related basidiochloromycetes. Emphasis on Pacific Northwest species. Prerequisite: ten credits of biological sciences or permission of instructor. Offered: on demand.

BOT 466 Microscopy and Photography for Biologists (5) NW Waaland Principles and practice of light microscopy, photomicrography, and scientific photography. Illumination systems, bright-field, phase-contrast, dark-field, fluorescence, x-ray microanalysis. Prerequisite: 10 credits in biological sciences. Offered: on demand.

BOT 498 Special Problems in Botany (1-15) Students with suitable background in botany may enroll for special study in algalogy, anatomy, bralogy, cytology, mycology, morphology, paleobotany, physiology, or taxonomy. Prerequisite: permission of instructor. Offered: AWSp.

Courses for Graduates Only

BOT 501 Tutorial in Botany (1-5, max. 10) Small-group study and discussion of a specified topic in the plant sciences, largely in fields not covered by courses and existing special area seminars. Impetus for registration would come from two or more graduate students finding a faculty member who shares with them an interest in the topic. Prerequisite: permission of instructor. Offered: AWSp.

BOT 502 Teaching Assistant Orientation (3) Laboratory and lecture preparation, organization, and presentation for incoming botany graduate students. Two student presentations required, one to be self-instructor, and peer evaluated. Credit/no credit only. Offered:

BOT 520 Seminar (1, max. 18) Credit/no credit only. Offered: AWSp.

BOT 521 Topics in Plant Physiology (1-3, max. 10) Cleland, Van Volkenburgh Modern trends and methods in plant physiology. Prerequisite: permission of instructor. Offered: AWSp.

BOT 523 Selected Topics in mycology (1-3, max. 10) Ammirati, Whisler Selected topics from all phases of mycology. Prerequisite: permission of instructor. Offered: AWSp.

BOT 524 Topics in Phycolgy (1-3, max. 10) Catto|ico, Waaland Topics from all phases of phycology. Prerequisite: permission of instructor. Offered: AWSp.

BOT 525 Topics in Plant Ecology (1-3, max. 10) Bliss, del Moral, Leopold, Schemske, Tsukada Selected topics from various phases of plantecology. Prerequisite: permission of instructor. Offered: AWSp.

BOT 526 Topics in Palynology (1-3, max. 6) Leopold, Tsukada Discussion and review of literature in pollen structure, disposition in sediments, and palaeoecology. Prerequisite: permission of instructor. Offered: AWSp.

BOT 527 Advanced Topics in Plant Molecular Systematics and Evolution (1-3, max. 10) Bendich, Catto|ico In-depth discussion of topics which emphasize molecular level systematics and evolution. Credit/no credit only. Prerequisite: permission of instructor. Offered: on demand.

BOT 529 Topics in Plant Molecular Biology (1-3, max. 10) Bendich, Comai Discussions of recent developments in plant molecular biology, genetic engineering, and pertinent techniques. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

BOT 545 Marine Phycology (9) Waaland Morphology, life histories, systematics, and ecology of marine algae, with emphasis on the local flora. Prerequisite:
ten credits of biological sciences or permission of the Director of Friday Harbor Laboratories. Offered: at Friday Harbor; S.

**BOT 549** AdvancedPhyiology (9) Waaland Varied marine algal flora of the San Juan region. Topic changes from year to year. Individual research projects. Prerequisites: 545 or equivalent and permission of the Director of Friday Harbor Laboratories. Offered: at Friday Harbor.

**BOT 551** Plant Population Biology (3) Schemke An overview of the current conceptual issues in plant population biology, including modes of evolution, population structure, sex and the mating system, life-history evolution, demography, and speciation. Empirical observations and tests of hypotheses are compared to theoretical predictions. Prerequisites: BIOL 203 and 454 or permission of instructor. Offered: odd years; Sp.

**BOT 552** Vegetation of North America (5) Bliss Detailed analysis of the biomes of America north of Columbia, including principles of plant geography, floristics, climate, soils, ecophysiology, paleobotany, vegetation structure, and community patterns. Prerequisites: 350 and 354 or equivalent. Offered: even years; W.

**BOT 554** Palynology and Quaternary Phytogeography (5) Tsukada Study of former vegetation and environments by relating the fossil pollen record to modern marine algae and fungi with emphasis on palynology and pollen-analysis. Two full-day (Friday and Saturday) field trips required. Prerequisites: 113 and BIOL 472 or permission of instructor.

**BOT 565** Marine Mycology (9) Whisler Taxonomy and ecology of aquatic fungi with emphasis on marine forms. Prerequisites: 461 or 20 credits in biology and permission of the Director of Friday Harbor Laboratories. Offered: S.

**BOT 575** Transport Processes in Plants (3) Van Volkenburgh Analysis of pathways and mechanisms of water, ion, and sugar transport in higher plants, from abiological understanding of membrane properties, water potential, and electrophysiology to whole plant control of water status, nutrient transport, and carbon allocation. Prerequisites: 371 and 372 or permission of instructor. Recommended: 441. Offered: on demand; A.

**BOT 577** Plant Growth and Development (3) Cleland Control of growth, development, and differentiation in higher plants by hormones. Prerequisite: permission of instructor. Offered: even years; A.

**BOT 579** Environmental Control of Plant Growth and Development (3) Cleland Effects of light, temperature, and water stress on the growth, development, and metabolism of higher plants. Prerequisite: 371 or permission of instructor. Offered: on demand.

**BOT 587** Advanced Reading in Botany (1-3, max. 12) Reading and evaluation of subject matter in plant, algae, and fungal biology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BOT 598** Field Studies in Botany (1-6, max. 12) Field studies of plants, algae, or fungi. Emphasis on methods and techniques for gathering and evaluating field data. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BOT 599** Laboratory Studies in Botany (1-6, max. 12) Laboratory studies of plants, algae, and/or fungi. Emphasis on methods, procedures, and evaluating research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BOT 600** Independent Study or Research (*) Offered: AWSpS.

**BOT 700** Master's Thesis (*) Offered: AWSpS.

**Canadian Studies**

See International Studies.

**Chemistry**

109 Bagley Chemistry is a branch of natural science that deals principally with the properties of substances, the changes they undergo, and the natural laws that describe these changes.

**Undergraduate Program**

Adviser Lani Stone 109C Bagley

Bachelor of Science Degree

Admission: Recommended high school preparation includes four years of college preparatory mathematics, one year of physics, one year of chemistry, and one year of biology.

Major Requirements: MATH 124, 125, 126 and two courses above 200 (recommended, MATH 307 and either MATH 309 or MATH 321); (alternative MATH requirement: 134, 135, 136); one year of physics including at least 1 credit of laboratory (PHYS 114, 115, 116, 118; or PHYS 121/131, 122/132, 123/133, with the 121/131 recommended); CHEM 145 (or 140); CHEM 155, 164 (or 150, 160, 312); CHEM 141, 151, 161; CHEM 317 and 321; CHEM 335, 336, 337, 346, 347 (or 237, 238, 239, 241, 242 with a GPA of 3.00 or higher in 237, 238, and 239 or a passing score in the standard American Chemical Society examination); CHEM 416, 455, 456, 457, 14 credits of numerically graded CHEM 400 courses (not previously listed), which must include CHEM 461 and two more courses with laboratory (currently 426, 462, 463, 464, 465); strongly recommended, research credits in CHEM 399 and 499. Minimum GPA of 2.50 in chemistry courses and a minimum grade of 1.7 in all required chemistry courses. For graduation, 18 credits are required with a cumulative GPA of 2.80 or better.

Bachelor of Arts Degree

Admission Requirements: Same as for the Bachelor of Science degree.

Major Requirements: MATH 124, 125, 126 (or MATH 134, 135, 136); one year of physics, including 1 credit of laboratory; CHEM 140 (or 145); CHEM 150, 160, 312 (or 155, 164); CHEM 141, 151, 161; CHEM 321; CHEM 237, 238, 239, 241, 242 (or 335, 336, 337, 346, 347) [or (223, 224 or 237, 238, 241, 317, 416]; CHEM 455; CHEM 456, 457 (or 350, 351), (or 352); 5 credits of numerically graded CHEM 400 courses (not previously listed), which must include CHEM 461; minimum GPA of 2.00 in chemistry courses, and a minimum grade of 1.7 in all required chemistry courses.

The maximum number of credits which may be earned combining CHEM 399 and 499 is 24. Individual degree programs may impose separate credit limits.

**Minor**

Minor Requirements: (1) MATH 124 and PHYS 114 (or 121/131) (9 credits); (2) CHEM 120, 250, 312 (13 credits); or (3) MATH 140, 141, 150, 151, 160, 161, 162, 352 (23 credits); or (4) CHEM 220, 221 (10 credits); or 223, 224, 241 (11 credits); or 237, 238, 239, 241 (14 credits); or 335, 336, 337, 346 (15 credits); (4) CHEM 321 (5 credits); (5) Minimum GPA of 2.00, and a minimum grade of 1.7 for all courses presented for the minor.

**Graduate Program**

Director of Student Services Nancy J. Cooper 109E Bagley

The Master of Science and Doctor of Philosophy programs are designed to lead to positions of leadership and independent investigation with research institutes, industrial laboratories, and government agencies, and as teachers, researchers, or administrators in colleges and universities in chemistry or in fields having substantial chemistry content.

Students can pursue research opportunities in the following areas of chemistry: analytical, bioorganic, biophysical, environmental, inorganic, medicinal, nuclear, organic, organometallic, physical, polymer, process analytical, and theoretical.

Thesis research for the Master of Science degree and dissertation research for the Doctor of Philosophy degree should constitute an original contribution to knowledge worthy of report in the scientific literature.

**Master of Science Degree**

Admission Requirements: Baccalaureate degree with major in chemistry or allied sciences; Graduate Record Examination.

Graduation Requirements: With Thesis—36 approved credits with 18 in courses at the 500 level or above; 18 in courses at the 400 or 500 level taken for numerical grade; 9 credits in thesis research. Without Thesis—Same as with thesis, except that additional course work may be substituted for the required research. GPA of 3.00 required for both degrees.

**Doctor of Philosophy Degree**

Admission Requirements: Same as for the Master of Science degree.

Graduation Requirements: 18-27 credits of approved courses at the 400 or 500 level, with a total GPA of 3.00; candidacy examinations covering area of specialization; dissertation; experience as a teaching assistant or predoctoral teaching associate.

**Faculty**

Chairperson Robert O. Watts

Professors

Andersen, Niels H. * 1968; PhD, 1967, Northwestern University.

Anderson, Arthur G. * 1946, (Emeritus); PhD, 1944, University of Illinois; chemistry of nonclassical aromatic compounds and novel heterocycles.

Borden, Weston T. * 1972; PhD, 1968, Harvard University; molecular orbital theory of organic molecules and reactions, synthesis of unnatural products.

Callis, James B. * 1975; PhD, 1970, University of Washington; instrumentation development, process analytical chemistry, non-invasive clinical chemistry.

Campbell, Charles T. * 1989; PhD, 1979, University of Texas (Austin); physical chemistry of solid surfaces: chemisorption, catalysis, and surface analysis.

Charlson, Robert J. * 1962, (Adjunct); PhD, 1964, University of Washington; atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction.
Courses for Undergraduates

No more than the number of credits indicated can be counted toward graduation from the following course groups: 140, 145 (5 credits); 150, 155 (5 credits); 145, 155, 160 (10 credits); 160, 164, 312 (9 credits); 220, 223, 237, 335 (5 credits); 238, 336 (4 credits); 221, 224, 238, 337 (3 credits); 241, 345 (3 credits); 242, 347 (3 credits); 250, 350, 351, 352 (6 credits); 350, 351, 352, 456 (6 credits). If a course is completed before a prerequisite is taken, credit will not later be allowed for the prerequisite course.

CHEM 120 Introduction to General Chemistry (5) NW One quarter introduction to chemistry with laboratory for students with little or no chemistry background. Atoms and molecules and their chemical changes, including the impact of chemistry on everyday life. Can stand alone or be followed by 140, 203 or 220. Prerequisite: high school algebra or equivalent. Offered: A/WSpS.

CHEM 140 General Chemistry (4) NW, QSR For science and engineering majors; atomic nature of matter, stoichiometry, periodic table, quantum concepts, gas laws. Prerequisites: high school algebra and chemistry or 120 and MATH 111 or 120. Recommended: high school physics and concurrent registration in 141 and MATH 124. Offered: A/WSpS.

CHEM 141 General Chemistry Laboratory (1) NW Introduction to laboratory work, including experiments to illustrate analytic techniques, stoichiometry, and gas laws. Designed to complement 140. Credit/no credit only. Prerequisite: concurrent registration, or concurrent registration in 140. Offered: A/WSpS.

CHEM 145 Honors General Chemistry (5) NW, QSR For science, engineering, and other majors with strong mathematics and science background in high
CHEM 150 General Chemistry (4) NW Chemical bonding, liquids and solids, solutions, chemical equilibria, acid-base, solubility, and non-metals. Prerequisite: 140 or 145. Recommended: concurrent registration in 151. Offered: AWSpS.

CHEM 151 General Chemistry Laboratory (1) NW Experiments to illustrate acid-base titration, spectroscopy, and solubility products as well as qualitative analysis. Designed to complement 150. Credit/no credit only. Prerequisites: 120 or 141 and prior completion of, or concurrent registration in, 150. Offered: AWSpS.

CHEM 155 Honors General Chemistry (5) NW Continuation of 145. Includes integrated computer and chemistry laboratory experience. Together 145 and 155 cover material in 140, 141, 150, 151, 160, and 161. Prerequisite: 145. Offered: W.

CHEM 160 General Chemistry (4) NW Introduction to thermodynamics, electrochemistry, chemical kinetics, organic chemistry, synthetic polymers, and biopolymers. Prerequisite: 150. Recommended: concurrent registration in 161. Offered: AWSpS.

CHEM 162 General Chemistry Laboratory (2) NW Introductory experiments in electrochemistry, thermodynamics, chemical kinetics, and organic synthesis. Designed to complement 160. Prerequisite: 151 and prior completion of, or concurrent registration in, 160. Offered: AWSpS.

CHEM 164 Introductory Inorganic and Environmental Chemistry (5) NW Introduction to inorganic, environmental, and biochemical concepts. Prerequisite: 120 or 141. Offered: W.

CHEM 179 Science Outreach Training (1) Development of a scientific talk for K-12 school audience. Designed to complement 160. Prerequisite: 151 or 160 or permission of instructor. Offered: Sp.

CHEM 199 Special Problems (1, max. 6) Research in chemistry. Credit/no credit only. Prerequisites: permission of the instructor. Offered: credit available. Prerequisite: 155 or 160 or permission of instructor. Offered: W.

CHEM 203 Chemistry and the Environment (5) NW Role of small amounts (traces) of chemicals in our bodies and in global, regional, and local environments. Traces of certain chemicals influence events leading to acid rain, smog, nuclear waste management, and wastewater treatment. Intended for non-science majors. Prerequisite: 120 or equivalent.

CHEM 220 Introduction to Organic and Biochemistry (5) NW Structure and properties of organic compounds: hydrocarbons, alcohols, aldehydes, ketones, carboxylic acids, carboxylic esters, and proteins. Includes laboratory. Prerequisite: 120 or advanced placement in chemistry. Offered: AWSpS.

CHEM 221 Introduction to Biochemical Processes (5) NW Evolution of nucleic acids and proteins, gene expression, natural products, drugs and drug metabolism, nutrition and bioenergetics, vitamins and cofactors, hormones, body fluids, biosynthetic pathways. Includes laboratory. Prerequisite: 220. Offered: Asp.

CHEM 222 Organic Chemistry-Short Program (4) NW First of a two-quarter lecture series in organic chemistry; for majors in biology and related fields who elect not to complete the full year sequence. Introduction to structure, nomenclature, reactions, and synthesis of the main functional group families of organic compounds. Prerequisite: 155 or 160. No organic laboratory accompanies this course.

CHEM 224 Organic Chemistry-Short Program (4) NW Continuation of the abbreviated coverage of the main functional group classes of organic compounds. Prerequisite: 220. Recommended: concurrent registration in 223. Offered: WSp.

CHEM 227 Organic Chemistry (4) NW First course for students planning to take three quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of the main types of organic compounds. Prerequisite: 224 or 223. Offered: WSp.

CHEM 238 Organic Chemistry (4) NW Second course for students planning to take three quarters of organic chemistry. Further discussion of physical properties and transformations of organic molecules, especially aromatic and carbonyl compounds. Prerequisite: 237. Offered: WSp.

CHEM 241 Organic Chemistry Laboratory (3) NW Introduction to organic laboratory techniques. Preparation of representative compounds. Designed to be taken with 224 or 223. Prerequisites: 155 or 160; 225 or 237. Offered: WSp.

CHEM 242 Organic Chemistry Laboratory (3) NW Preparations and qualitative organic analysis. Designed to be taken with 239. Prerequisites: 224 or 238; 241. Offered: WSp.

CHEM 250 Introduction to Physical Chemistry (5) NW A presentation of chemical equilibrium, enthalpy, entropy, electrochemistry, chemical kinetics, and quantum mechanics as applied to hydrogen. Includes laboratory. Prerequisite: 120 or 140 and 245. Offered: A.

CHEM 297 Science Outreach School Visitation (1-2) Visits to K-12 classrooms to present scientific talk developed in 197. Not applicable toward chemistry degree requirements. Prerequisite: 197. Offered: W.

CHEM 321 Inorganic Chemistry (3) NW The periodic table: chemistry of representative and transition elements, including discussion of environmental, biological, and everyday aspects of inorganic chemistry. For students who have completed 140, 150, and 160 (or 145 and 155, but not 164). Prerequisites: 155 or 160; 223,237 or 335. Offered: A.

CHEM 371 Inorganic Chemistry Laboratory (3) NW Experimental exploration of the periodic table. Techniques of preparation and characterization of inorganic compounds. Prerequisites: 164 or 312; 161; 241 or 346. Recommended: 239 and 242. Offered: W.

CHEM 399 Undergraduate Research (max. 12) Research in chemistry. Credit/no credit only. Prerequisites: permission of the instructor. Offered: credit available. Prerequisite: 155 or 160 or permission of instructor. Offered: credit available. Prerequisite: 155 or 160; 161. Offered: W.

CHEM 397 Science Outreach Mentors (1) Training of Science Outreach Presenters. Preparation for group meetings, presentation of scientific talk to group, and evaluation of presentations. Not applicable toward chemistry degree requirements. Credit/no credit only. Prerequisite: 197. Offered: WSp.

CHEM 399 Undergraduate Research (max. 12) Research in chemistry. Credit/no credit only. Prerequisites: permission of the instructor. Offered: credit available. Prerequisite: 155 or 160 or permission of instructor. Offered: credit available. Prerequisite: 155 or 160 and MATH 124. Offered: WSp.

CHEM 410 Radiochemistry Laboratory (2) NW Introductory general service course for students planning either work in nuclear or tracer applications. Safety procedures, detection and measurement of nuclear radiation, radiochemical and tracer techniques. Prerequisites: 455 and 155 or 161. Offered: alternate years.

CHEM 414 Chemistry of the Main Group Elements (3) NW The elements and their compounds in relation to the periodic system. Prerequisites: 161 or 312; 351; 352, or 457, which may be taken concurrently. Offered: alternate years.

CHEM 415 The Chemical Bond (3) NW Nature of the chemical bond. Simple bonding theories, molecular orbital methods, symmetry, and group theory. Prerequisite: 455. Offered: W.

CHEM 416 Transition Metals (3) NW Survey of selected key topics in the chemistry of the transition metals, including emphasis on the structure, bonding, and reactivity of major classes of compounds. Prerequisites: 164 or 312; 455, which may be taken concurrently. Offered: A.

CHEM 417 Organometallic Chemistry (3) NW Chemistry of the metal-carbon bond for both main group and transition metals. Structure and reactivity with applications to organic synthesis and catalysis. Prerequisites: 164 or 312; 224, 239, or 337. Recommended: 416. Offered: W.

CHEM 418 Nuclear Chemistry (3) NW Natural radioactivity, nuclear systematic and reactions, radioactive decay processes, stellar nucleosynthesis, applications of radioactivity. Prerequisite: 350, 352, or 455. Offered: alternate years.

CHEM 419 Bioinorganic Chemistry (3) NW Description of transition metal-containing systems found in biology. Structural and electronic properties and reactivity of metalloproteins, metalloenzymes, and metallocofactors. Methods used to probe and model
metal sites by spectroscopic and synthetic techniques. Prerequisites: 164 or 312; 224, 239, or 337. Recommended: 416. Offered: Sp.

CHEM 426 Instrumental Analysis (3) NW Introduction to modern instrumental methods of chemical analysis, including chromatography, optical and mass spectrometry, electrochemistry and flow injection analysis. Basic concepts of transducers, spectrometers, mass analysis, separation sciences, and computerized data acquisition and reduction. Prerequisite: 321. Offered: Sp.

CHEM 427 Sampling Methodology and Wet Chemical Analysis (3) NW Includes sampling and sample dissolution, multiphase equilibria, solvent extraction, nonequivalent titrations, pH measurement, kinetic and enzyme assays. Prerequisites: 223 or 237 or 335, 321. Offered: W.

CHEM 429 Chemical Separation Techniques (3) NW Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, electrophoresis, and field flow fractionation. Prerequisites: 224, 239, or 337; 241 or 346. Recommended: 321. Offered: W.

CHEM 433 Theoretical Organic Chemistry—Predictions and Experimental Tests (3) NW Molecular orbital theory in organic chemistry. Woodward-Hoffmann rules, aromaticity, concerted reactions, photochemical reactions, and mechanistic aspects of deficient species. Prerequisite: 337 or permission of instructor. Offered: alternate years.

CHEM 435 Introductory Biophysical Chemistry (3) NW Survey of the statics and dynamics of biophysical and biochemical processes. Prerequisites: 224, 239, or 337; 351, 352, or 456, which may be taken concurrently. Recommended: BIOC 425 or 440. Offered: alternate years; W.

CHEM 436 Bioorganic Chemistry—Enzymes and Natural Products (3) NW Enzyme chemistry and inhibition, including modes of biological catalysis, stereochemistry, enzyme characterization and kinetics, and design and principles of enzyme inhibitors. Also major classes of natural products, their chemistry, biophysical activity, biosynthesis, physiological role, and ecological significance. Prerequisite: 224, 239, or 337. Recommended: BIOC 405 or 440. Offered: alternate years; Sp.

CHEM 455 Physical Chemistry (3) NW Introduction to quantum chemistry and spectroscopy. Theory of quantum mechanics presented at an advanced level laboratory; level laboratory; special emphasis on spectral interpretation skills needed for the elucidation of structure, conformation, and dynamics in organic and biological chemistry. Prerequisites: 224 or 337 or 339. Recommended: 455. Offered: ASP.

CHEM 451 Physical Chemistry Laboratory (2-3) NW Physical measurements in chemistry. Vacuum techniques, calorimetry, spectroscopic methods, electrical measurements. Prerequisites: 161 or a higher-level laboratory; 455; 351 or 352 or 457, which may be taken concurrently. Offered: A.

CHEM 460 Spectroscopic Molecular Identification (3) NW Basic theory of spectral techniques—Infrared and ultraviolet-visible spectroscopy. NMR, and mass spectrometry—with emphasis on spectral interpretation skills needed for the elucidation of structure, conformation, and dynamics in organic and biological chemistry. Prerequisites: 224 or 239 or 337. Recommended: 455. Offered: ASP.

CHEM 462 Techniques of Synthetic Organic Chemistry (2-3) NW Techniques of synthetic organic chemistry. Vacuum distillation, multistep synthesis, gas sensitive reagents, photochemistry, chromatography, and separation techniques. Prerequisite: 347 or 242; 460, which may be taken concurrently. Offered: A.

CHEM 463 Spectroscopic Techniques for Structural Identification (2) NW Laboratory techniques of spectroscopic analysis for structural determination using IR, UV, MS, mass spectrometry, NMR, which may be taken concurrently. Offered: ASP.

CHEM 464 Computers in Data Acquisition and Analysis (3) NW Introduction to the use of the computer in the chemistry laboratory. Principles of microcomputers and their use for such problems as data acquisition, noise reduction, and instrument control. Prerequisites: 455, MATH 307 and 308 or equivalent. Offered: W.

CHEM 465 Computation in Chemistry (3) NW Computer calculations on color graphics workstations applied to problems in chemistry. Numerical methods and algorithms for calculating classical dynamics, quantum wave functions, quantum mechanics, wave packet propagation, quantum mechanics, and wavepacket effects. Calculations of electronic wave functions, molecular conformations, simulations of liquids and solids. Prerequisites: 455 and 456; 457, which may be taken concurrently. Offered: Sp.

CHEM 471 Physical Chemistry of Macromolecules (3) NW Classical hydrodynamic methods, and modern, computer correlation and perturbation techniques for studying dynamical motions and conformations of macromolecules, especially biopolymers, in solution. Cooperative thermal transitions, optical properties, and polyelectrolyte effects. Prerequisites: 347 or 351 or 352, and 455. Offered: alternate years; W.

CHEM 473 Workshop In the Teaching of Chemistry (3; max. 12) NW Individual or group study projects on the improvement of instruction in chemistry for secondary level teachers. Credit/no credit only. Prerequisites: 120 or 140. Offered: S.

CHEM 498 Teaching Chemistry (3) NW Training in teaching chemistry laboratory and quiz sections. For chemistry and biochemistry majors, especially the planning graduate work or secondary education. Covers teaching strategies, student diversity, learning styles, grading, and interaction with students and faculty. Credit/no credit only. Prerequisites: 2.8 GPA in chemistry or permission of instructor. Offered: A.

CHEM 499 Undergraduate Research and Report Writing (3; max. 12) Research in chemistry and for study in the chemical literature. Credit/no credit only. Prerequisites: permission of chemistry advisor, chemistry grade-point average above 3.00, and junior standing. Offered: AWS.

Courses for Graduates Only

CHEM 502 Practical NMR Methods for Biological and Organic Structure Elucidation (4) NW Theory of NMR (rotating frame formalism, multi-pulse experiments, relaxation phenomena, 2D experiments) as applicable to structural and dynamic problems in organic and biological chemistry. Provides a basis for experiment selection and spectrum interpretation. A more advanced treatment of NMR than 460. Prerequisites: 224, 239, or 337. Recommended: 460 or equivalent, 435 or 455. Offered: W.

CHEM 508 Advanced Inorganic Chemistry (3, max. 12) Primarily for doctoral candidates in inorganic chemistry. Current topics (e.g., bioinorganic, advanced organometallic, metallic and solid state, advanced inorganic spectroscopy). See department for instructor and topics during any particular quarter. Offered: W.

CHEM 509 Current Problems in Inorganic Chemistry (3, max. 12) Primarily for doctoral candidates in inorganic chemistry. Current topics (e.g., flow injection analysis, mass spectrometry, and advanced radiochemistry). See department for instructor and topics during any particular quarter. Offered: W.

CHEM 510 Current Problems in Analytical Chemistry (2, max. 12) Primarily for doctoral candidates in analytical chemistry. Current topics (e.g., flow injection analysis, mass spectrometry, and advanced radiochemistry). See department for instructor and topics during any particular quarter. Offered: W.

CHEM 512 Analytical Electrochemistry (3) NW Theory and practice of modern electrochemistry with emphasis on instrumentation and applications in chemical analysis. Offered: alternate years.

CHEM 522 Atomic and Molecular Analytical Spectroscopy (3) Quantitative analysis of atomic and molecular species, using all forms of electromagnetic radiation, electrons, and gaseous ions. Offered: alternate years.

CHEM 525 Process Analytical Chemistry (3) NW Chemical sensors and systems approach to chemical analysis as an integral part of monitoring and controlling chemical, biological, and medical processes. Offered: alternate years.

CHEM 526 Chromometrics (3, max. 9) Mathemati- cal and statistical methods for experimental design, calibration, signal resolution, and instrument control and optimization. Offered: alternate years.

CHEM 530 Advanced Organic Chemistry (3) NW Fundamental aspects of organic structures and transformations. Structure and basicity of carbocations, substitution reactions, elimination reactions, nucleophilic addition and elimination reactions, condensation reactions, structure and rearrangements of carbocations, electrophilic addition, electrophilic substitution, neighboring group effects. Prerequisite: 337. Offered: A.

CHEM 531 Advanced Organic Chemistry (3) NW Structure, mechanism, acidity and basicity, stereochemistry, kinetics and equilibria, reactive intermediates, and catalysis. Prerequisite: 530. Offered: W.

CHEM 532 Advanced Organic Chemistry (3) NW Synthetic organic chemistry. Discussion of practical methods for the synthesis of complex organic molecules with an emphasis on synthetic strategy and the control of stereochemistry. Prerequisite: 530 and 531. Offered: Sp.

CHEM 540 Current Problems in Organic Chemistry (3, max. 18) Primarily for doctoral candidates in organic chemistry. Discussions of topics of current interest and importance. See department for instructor and topic during any particular quarter.

See International Studies.

Classics
218 Denny
Classics embraces the ancient Greek and Roman civilizations from prehistoric times to the Middle Ages. The department is concerned with both the Greek and Latin languages and their literatures, including poetry, drama, history, philosophy, rhetoric, and political theory, as well as with classical art and archaeology.

Undergraduate Program
Bachelor of Arts Degree
Major Requirements: Classical Studies: Greek or Latin through 307 or the equivalent; 36 additional credits chosen with department approval from courses in Greek and Latin at the 300 or 400 level (including 1 to 3 credits of CLAS 495, but excluding LAT 300, 301, or GRK 300, 301), classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. Classical studies is especially suited to students not preparing for graduate study in classics, but wishing to read the literature, history, art, archaeology, and philosophy of classical antiquity primarily through English translations.

Classics: 18 approved credits in Greek at the 400 level and 18 approved credits in Latin at the 400 level; 1 to 3 credits of CLAS 495, which may substitute for either Greek or Latin 400-level credit.

Greek: 27 approved credits in Greek at the 400 level plus 9 credits chosen with department approval from courses in Latin, Greek at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. The major must include 1 to 3 credits of CLAS 495.

Latin: 27 approved credits in Latin at the 400 level plus 9 credits chosen with department approval from courses in Greek, Latin at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. The major must include 1 to 3 credits of CLAS 495.

CLAS 101, 205, and HST 111 may not be offered in fulfillment of major requirements for baccalaureate degrees in the Department of Classics.

Graduate Program
James J. Clausss, Graduate Program Coordinator
The Department of Classics offers programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The M.A. degree may be in Greek, Latin, or Classics (a combination of Greek and Latin). The Ph.D. degree requires both Greek and Latin.

The program of formal instruction has been designed to ensure comprehensive and thorough training in the basic disciplines needed for teaching and research. The department offers major requirements for the Ph.D. degree reading list. Seminars introduce research techniques through the study of more specialized topics, which vary from quarter to quarter. Students may include in their program courses and seminars given by other departments in such subjects as ancient philosophy, ancient and medieval history, comparative literature, and linguistics. A brochure, The Graduate Program in Classics, available from the department, gives additional information.

The Suzzallo Library has an extensive classics collection. The department's seminar room in Denny Hall, with courses in Latin, Greek, and ancient languages, contains a noncirculating library with reference works as Pauly-Wissowa, L'Annee Philologique, the Thesaurus Linguae Latinae, the Muller Handbuch series, the Teubner and Oxford texts, commentaries on the classical authors, standard collections of inscriptions and fragments, and a number of important serials. The department also possesses an illyrian scholarly computer and a license for the Thesaurus Linguae Graecae, Thesaurus Linguae Latinae, and other data bases.

Applicants for admission to the M.A. program should present an undergraduate major or its equivalent in Greek, Latin, or Classics. Prospective aspirants for the Ph.D. degree should have had two years of upper-division courses in both languages, but may be admitted with less preparation in one language if their preparation in the other language is exceptionally strong. Admission to the M.A. program may be granted after completion of the requirements for the M.A. degree.

M.A. degree requirements are a minimum of 27 credits in courses or seminars in Greek or Latin or both, and in related subjects approved by the department; a reading knowledge of French and German; and a reading knowledge of French or German; either an acceptable thesis or 9 additional credits in approved graduate courses and seminars and a research paper.

Doctor of Philosophy degree requirements are a minimum of 72 credits in courses or seminars in Greek or Latin or both, and in related subjects approved by the department; a reading knowledge of French or German; and a reading knowledge of French and German; and a reading knowledge of French or German; or a reading knowledge of other major field(s) as well as four field(s) in which students must have teaching experience before completing requirements for their terminal degree.

A number of teaching assistantships are available. Assistantships teach sections of an elementary course in Latin and Greek derivatives, hold discussion sections in classical literature in translation, or assist faculty members with other courses. The teaching load is four to five hours a week throughout the academic year.

Michael R. Halleran
Profs.
Blizuë, Lawrence J. * 1969; PhD, 1968, Stanford University; Greek oratory, Greek historiography and historians, Greek and Roman medicine.

Grummel, William C. * 1954, (Emeritus); PhD, 1949, New York University; Latin literature and philosophy, Roman historians.

Harmon, Daniel P. * 1973; PhD, 1968, Northwestern University; Greek and Roman religion, Latin poetry, archaic Rome, classical linguistics.

MacKay, Pierre A. * 1966; PhD, 1964, University of California (Berkeley); Greek literature, post-classical and Byzantine Greek literature, numismatics.

McDermid, John B. * 1949, (Emeritus); PhD, 1940, Johns Hopkins University; Greek literature and philosophy.

Pascal, Paul * 1953, (Emeritus); PhD, 1953, University of North Carolina; Latin literature, and paleography, medieval Latin.

Assoc. Profs.
Blundell, Mary Whitlock * 1965; PhD, 1984, University of California (Berkeley); Greek and Roman philosophy and literature.

Claus, James J. * 1984; PhD, 1983, University of California (Berkeley); Latin poetry and prose, Hellenistic literature, Latin literature of the Empire.

Gowing, Alain M. * 1968; PhD, 1968, Bryn Mawr College; Latin and Greek historiography, Latin literature of the Empire.

Hallinan, Michael R. * 1983; PhD, 1981, Harvard University; Greek literature, especially tragedy, Neoteric and Augustan poetry.

Hinds, Stephen E. * 1992; PhD, 1985, Cambridge University (UK); Latin poetry, especially elegy and epic; literary criticism and theory.

Langdon, Marke K. * 1976; PhD, 1972, University of Pennsylvania; Greek archaeology, epigraphy, topography, and history.

Asst. Profs.
Colwell, Sheila M. 1990; PhD, 1992, Princeton University; archaic Greek literature, mythology, epic tradition.

Connors, Catherine M. * 1990; PhD, 1989, University of Michigan; Roman epic, ancient novel, women in Greek and Roman antiquity.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Classical Archaeology

CL AR 340 Pre-Classical Art and Archaeology (3) VLP A Langdon Survey of the art and the other material remains of the civilizations in the Aegean from the Neolithic Age to the end of the Bronze Age, with special emphasis on Minoan Crete and the Mycenaean kingdoms of mainland Greece, illustrated by slides. The history, techniques, and results of significant excavations are examined. Offered: jointly with ART H 340.

CL AR 341 Greek Art and Archaeology (3) VLP A Blizuë, Langdon Survey of the material remains and the developing styles in sculpture, vase painting, architecture, and the minor arts from the geometric to the Hellenistic periods, illustrated by slides. Principal sites and monuments, as well as techniques and methods of excavation, are examined in an attempt to reconstruct the material culture of antiquity. Offered: jointly with ART H 341.

CL AR 342 Roman Art and Archaeology (3) VLP A Harmon Roman architecture and art, with emphasis on the innovations of the Romans; illustrated by slides. Offered: jointly with ART H 342.

CL AR 442 Greek and Roman Painting (3) VLP A Langdon Study of painted decoration on Greek vases, and Roman wall painting, with emphasis on the historical and stylistic development of each. Offered: jointly with ART H 442.

CL AR 444 Greek and Roman Sculpture (3) VLP A Langdon History and development of Greek sculpture and sculptors, their Roman copyists, arc, and Roman portraits and sarcophagi. Emphasis on Greek sculpture of the fifth century BC. Offered: jointly with ART H 444.

CL AR 446 Greek Architecture (3) VLP A Langdon Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ARCH 454/ART H 446.

CL AR 448 The Archaeology of Italy (3) VLP A Harmon Study of the principal archaeological sites in Italy with special emphasis on ancient Rome. Sites include the Alban hills, Ostia, Pompeii, Herculaneum, Tarquinia, Paestum, Tivoli, and Praeneste. Attention given to the relationship between material remains and their purpose in ancient life, illustrated by slides. Offered: jointly with ART H 448.

Classics Courses in English

Upper-division classics courses in English (300 and 400 level) in the Department of Classics do not generally have prerequisites. Most 400-level courses deal with a single genre of literature or with a limited area of classical studies. The 300-level courses are designed to deal with broader subjects at a relatively advanced level. Both are primarily for juniors and seniors, but they are open to freshmen and sophomores with an interest or background in the subject of the course.

CL AS 105 Latin and Greek in Current Use (2) VLP A Designed to improve facility in Latin and Greek vocabularies through a study of the Latin and Greek elements in English, with emphasis on words in current literary and scientific use. No auditors. Knowledge of Latin or Greek is not required. Offered: AWSpS.

CL AS 102 Grammar and Syntax through Latin (3) VLP A Improve familiarity with basic grammar, syntax, logic through study of mechanics of the Latin language. For Educational Opportunity Program students only. No auditors. Knowledge of Latin or Greek not required.

CL AS 205 Bioscientific Vocabulary Building from Latin and Greek (3) VLP A Designed to help the student master the scientific vocabulary of his or her particular field of study and of Latin and Greek roots that are used to create the majority of scientific terms. No auditors. Knowledge of Latin or Greek is not required. Offered: AWSpS.

CL AS 210 Greek and Roman Classics in English (5) VLP A Blizuë, Blundell, Claus, Connors, Gowing, Hallinan, Hinds, Langdon, MacKay Texts in ancient language are used to study the major Greek and Latin authors in modern translation. Offered: AWSpS.

CL AS 320 Greek and Roman Private and Public Life (5) VLP A/B I&S Blizuë Study of the civic and social practices and institutions of everyday Greek and Roman private and public life, including the family, social classes, the courts and legal systems, military service and war, technology and the trades, money and banking, agriculture and rural life. Many lectures illustrated by slides. Offered: A.

CL AS 322 Intellectual History of Classical Greece (5) VLP A/B I&S Blundell Uses Plato's Republic as a core text to explore a range of issues of ancient and contemporary interest, such as justice, political theory, male attitudes toward women, and the nature of the soul. Besides the Republic and other works of Plato, readings are taken from Homer, tragedy, comedy, Aristotle, and others. Offered: Sp.

CL AS 324 Greek and Roman Athletics (3) I&S Langdon Greek and Roman athletic festivals and events, and the place of athletes and sport in ancient society.

CL AS 326 Women in Antiquity (3) VLP A/B I&S Colwell, Connors A broad survey of primary sources in medicine, law, philosophy, religious ritual, myth, history, and ethnography, informed by perspectives from literature, art, and archaeology. Provides students the tools to analyze the social roles of women in ancient Greece and Rome.

CL AS 328 Sex, Gender, and Representation in Greek and Roman Literature (3) VLP A/Hinds Affirmation and inversion of gender roles in Greek and Roman literature, myths of male and female heroism; marginalization of female consciousness; interaction of gender, status, and sexual preference in love poetry. Readings from epic, drama, historiography, romance, and lyric.

CL AS 399 Study Abroad: Classics (3-15, max. 20) VLP A For participants in Classics overseas study programs. Specific course content determined by assigned faculty member. Credit not applicable to majors in the Classics Department without approval. Prereq: permission of department Chair.

CL AS 424 The Epic Tradition (5) VLP A Clauss, Hallinan, MacKay Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, Aeneid, and Roland; or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies according to instructor's preference. Offered: jointly with C LIT 424.

CL AS 427 Greek and Roman Tragedy In English (5) VLP A Hallinan Study of the development of Greek and Roman tragedy, with extensive readings in representative plays of Aeschylus, Sophocles, Euripides, and Seneca.

CL AS 428 Greek and Roman Comedy In English (3) VLP A Colwell Readings from the comedies of Aristophanes, Plautus, and Terence.

CL AS 430 Greek and Roman Mythology (3/5) VLP A Clauss, Colwell, Connors, Gowing, Hallinan, Hinds, Domer Principals myths found in classical and later literature. Offered: AWSpS.

CL AS 432 Classical Mythology In Film (3/5) VLP A Clauss Comparison and discussion of classical myths and modern films inspired by them. Promotes access to the reading of classical mythology. Analyzes significant differences between ancient literary and modern cinematic representations of the myth.

CL AS 435 The Ancient Novel (3) VLP A Connors Study of the origins and growth of fiction and the novel in the Latin tradition.

CL AS 445 Greek and Roman Religion (3) VLP A/B I&S Harmon, Langdon Religion in the social life of the Greeks and Romans, with emphasis placed on their public rituals and festivals. Attention is given to the priesthoods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Many lectures illustrated by slides. Prerequisite: one course in ancient history, or classics, or religious studies; RELIG 201 preferred. Offered: jointly with RELIG 445.

LAT 300, 301 Latin Language, Accelerated (5,5) Intensive introduction to classical Latin. Not accepted as upper-division credit toward a major in Greek or classics. Prerequisites: some previous experience in, or study of, a foreign language for 300; 300 for 301. Offered: W, Sp.

LAT 305 Introduction to Latin Literature (5) VLPA Readings in prose and poetry from various Latin authors from the Augustan era. Prerequisites: permission of instructor. Offered: alternate years; A,W,Sp.

LAT 306 Cicero and Ovid (5) VLPA Readings from the orations of Cicero and the poetry of Ovid; elementary exercises in Latin prose composition. Prerequisite: 305 or equivalent. Offered: W,Sp.

LAT 307 Vergil (5) VLPA Readings from the first six books of the Aeneid; elementary exercises in Latin prose composition or metrics. Prerequisite: 306 or equivalent. Offered: Sp.

LAT 308 Homer (5) VLPA Translation of selections from the Iliad or the Odyssey; Attic prose composition. Prerequisites: 300, 301, or equivalents.

LAT 315 Homeric Poetry (3) VLPA Reading and discussion of the Iliad and the Odyssey; elementary exercises in Latin prose composition or metrics. Prerequisite: 300 or equivalent. Offered: Sp.

LAT 316 Attic Prose (5,5) VLPA Translation of selections from Attic prose; elementary exercises in Attic prose composition. Prerequisites: 103, 301, or equivalents.

LAT 422 Thucydides and the Peloponnesian War (3) VLPA Bliuez, Langdon See above. Offered: alternate years; W.

LAT 424 Thucydides and the Peloponnesian War (3) VLPA Bliuez, Langdon See above. Offered: alternate years; W.

LAT 425 Epicurean Philosophy (3) VLPA Mackay See above. Offered: alternate years; W.

LAT 430 Latin Prose Composition (3) VLPA Elementary exercises in Latin prose composition. Prerequisite: permission of instructor. Offered: alternate years; Sp.

LAT 432 Cicero and Sallust (3) VLPA Claus, Gowing Offered: alternate years; Sp.

LAT 435 Roman Epic (3) VLPA Claus, Gowing Offered: alternate years; W.

LAT 449 Roman Epic (3) VLPA Colwell, Haileran Mackay See above. Offered: alternate years; A.

LAT 450 Latin Prose Composition (3) VLPA Elementary exercises in Latin prose composition. Prerequisite: permission of instructor. Offered: alternate years; W.

LAT 451 Lyric Poetry (3) VLPA Colwell, Haileran Mackay See above. Offered: alternate years; A.

LAT 452 Literature of Classical Athens (3-5, max. 15) VLPA Readings and discussion of selected authors of the early Greek period.

LAT 453 Hellenistic Greek Literature (3-5, max. 15) VLPA Readings and discussion of selected authors of the Hellenistic Age.

LAT 480 Special Supervised Study (max. 18) Special work in literary and philosophical texts for graduates and undergraduates. Prerequisite: permission of undergraduate advisor.

LAT 485 Roman Topography and Monuments (5, max. 10) VLPA Claus, Gowing, Harmon Study of the material remains of ancient Rome from the archaic period through the imperial age. Reading of source materials and inscriptions in Latin. Conducted in Rome. Offered: Sp.

LAT 478 Improvement of Teaching: Latin (5) VLPA Claus, Gowing Examination and evaluation of the various methods of teaching Latin; audiovisual aids; testing materials; textbooks; relation of Latin to other languages; Latin derivatives in English vocabulary. Offered: jointly with EDC&1 438; S.

LAT 490 Supervised Study (max. 18) Special work in literary and philosophical texts for graduates and undergraduates. Prerequisite: permission of undergraduate advisor.

Courses for Graduates Only

Classical Archaeology

CL AR 513 Athenian Topography (5) Langdon Detailed consideration of the topography and monuments of ancient Athens from the beginning through the Roman period.

CL AR 541 Seminar in Greek and Roman Art (3) Langdon In-depth study of selected topics and problems of the art of ancient Greece and Rome. Offered: jointly with ART H 541.

Classics

CLAS 700 Master's Thesis (*)

CLAS 800 Doctoral Dissertation (*)

Classical Linguistics

CL LI 501 Comparative Phonology of Greek and Latin (5) Harmon Phonological developments of Greek and Latin from Indo-European to the classical periods of both languages.

CL LI 503 History of the Greek Language (5) Morphological and syntactical development of the Greek language from Homer through the New Testament; the development of prose and poetic style.

CL LI 555 History of the Latin Language (5) Harmon Morphological and syntactical development of the Latin language; the development of Latin as a literary language.

CL LI 506 Italic Dialects (5) Harmon Principal remains of the non-Latin languages and dialects of ancient Italy.

Greek

GRK 500 Grammar and Composition (3) Bliuez, Blundell, Mackay Translation of passages from English to Greek for the purpose of acquiring advanced knowledge of the grammar and the style of the classical tongue.

GRK 501 Homer (5) Colwell, Haileran Readings from the Iliad or the Odyssey.

GRK 503 Aristophanes (5) Bliuez * Select comedies.

GRK 504 Plato (5) Blundell The Republic or other dialogues.

GRK 506 Aristotle (5) Blundell Politics and/or Ethics.
The School of Communications offers undergraduate professional preparation in advertising, broadcast journalism, editorial journalism, public relations, and media studies. Undergraduate majors are given training in communication skills and opportunities for practical experience in their fields. The undergraduate program requires additional course work in social sciences and literature.

Bachelor of Arts Degree

Admission Requirements: 65 graded college-level credits but not more than 120 college-level credits; CMU 203 (or equivalent); no more than 20 credits in School of Communications courses; at least 12 graded credits earned at the UW prior to application; completion of the three Areas of Knowledge—Visual, Literary, & Performing Arts; Individuals & Societies; the Natural World—with at least one course from each group; a minimum 3.27 GPA in the past three quarters (or 45 credits), either at the UW or at any other collegiate institution. Satisfaction of these minimum requirements ensures consideration; it does not guarantee acceptance. Applications, which must include reasons for seeking admission to a specific sequence, are available in 118 Communications the first day of autumn, winter, and spring quarters.

Major Requirements: 10 credits from courses in literature; 35 credits in the general education category, Individuals & Societies, courses to be selected from anthropology, economics, geography, history, philosophy, political science, psychology, and sociology, including at least 20 credits in one department and 20 credits in courses at the 300 and 400 levels; core requirements of 45 credits within the school, including the following: CMU 203, 315, 320; two additional communications courses at the 400 level (excluding CMU 496); and one of the following areas of study: Advertising—CMU 340, 341, 344, 345; Broadcast Journalism—CMU 350, 356, 356; Editorial Journalism—CMU 322, 328; Public Relations—CMU 330, 330, 339.

A Media Studies option is also offered and requires CMU 201, 202, 203, 310, 410, and an appropriate number of 400-level communications courses to equal 45 credits in the school.

To continue as a major in the school, a student must maintain an acceptable GPA for all courses in the school and an average no more than .30 of a point below the all-University average for all course work outside the school.

Internship Programs: A maximum of 6 credits of internship may be taken in the major. These credits apply to the 45 communications credits that must be earned for graduation. Internships are not available in the media studies option.

Minor
See department for requirements.

Graduate Program

Graduate Program Coordinator

The School of Communications offers programs leading to the degrees of Master of Arts, Doctor of Philosophy, and Master of Communications.

The Master of Arts degree program provides training in research and scholarship and can be either preparation for doctoral study or a terminal degree. A thesis is required.

The Doctor of Philosophy degree program is designed to develop conceptual and methodological capabilities in a substantive area of communication. Substantive scholarly interests represented in the school may be found in the faculty listing below. Doctoral students are expected to apply these capabilities as apprentice scholars in the teaching and research functions of the school.

The Master of Communications degree program offers the practicing professional journalist an opportunity to develop a substantive specialty in conjunction with the academic study of communication.

A foreign language, if appropriate to the student's program of study, may be required in the M.A. and Ph.D. programs.

Special Requirements

Full-time students are admitted to programs in the autumn quarter only. All foreign and Ph.D. students must attend full time. February 15 is the deadline for all applicants who wish to be considered for financial support. All required application materials must be received by that date. The deadline for initiating applications for autumn quarter admission is April 1.

Graduate Program Coordinator

Financial Aid

Applications for teaching and research assistantships should be submitted to the school by February 15. Notices of financial aid are sent in most cases on or about April 1.

Research Facilities

The Communications Research Center facilitates the research of the school's graduate students and faculty.

Five laboratories offer word-processing, text-editing, and computing capabilities to facilitate research and computer-assisted instruction. Three of the labs are connected to the University's mainframe computers and Internet for statistical analysis, data-base management, document preparation, and access to worldwide information sources and E-mail. The school has its own closed-circuit television laboratory.

Director

Edward P. Bassett

Professors

Bassett, Edward P. • 1989; PhD, 1967, University of Iowa; telecommunications technologies and information dissemination.

Carter, Richard Fremont • 1967; PhD, 1957, University of Wisconsin; communications theory, methodology, behavioral analysis.

Edelstein, Alex S. • 1955, (Emeritus); PhD, 1958, University of Minnesota; comparative communication research, public opinion, propaganda, international communication.

Giffard, Charles A. • 1978; PhD, 1968, University of Washington; international news systems, news flow, editing and reporting.

Lang, Gladys Engel • 1984, (Emeritus); PhD, 1954, University of Chicago; political effects of mass media, sociology of art, political movements and crowd behavior.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

CMU 201 History and Development of Communication and Journalism (5) I&S History and development of communication from prehistoric times; social and technical inventions; political and economic contexts.

CMU 202 The Phenomena of Communicating (5) I&S Types of communicating behaviors in progressing order of complexity: communication through interpersonal interactions to mass communicating.

CMU 203 Mass Communications and Society (5) I&S Structure and functions of mass media communication systems; audiences and content; alternative structures; implications of new technologies.

CMU 300 Fundamentals of Applied Communication (5) I&S Practice in communicating in variety of social relationships: intimate; employer-employee; institutional; customer-to-customer; social networking; and international issues. Classroom focus includes lectures by outside experts.

CMU 301 Advanced Advertising Copy and Layout (3) I&S Multimedia creative and writing experience. Open to majors only. Prerequisites: 341 or 344.

CMU 302 Legal Aspects of Communications (5) I&S Regulations governing publication and broadcasting in the mass media. Open to nonmajors.

CMU 322 Reporting (4) I&S News gathering and writing. Open only to majors. Prerequisite: 315.

CMU 323 Special Reporting Topics (4, max. 12) I&S Topics vary with instructor. Open only to majors. Prerequisite: 322.

CMU 324 Critical Writing for the Mass Media (4) I&S Editorials, commentaries, reviews. Prerequisite: 315.

CMU 325 Copy Editing (4) I&S Training in the making of editorial judgments, writing of headlines, editing of copy, handling photos, and dummying of pages. Open only to majors. Prerequisite: 322.

CMU 327 Legislative Reporting (12) I&S Full-time coverage of Washington legislature for a daily newspaper. Selected students live in Olympia, interview legislative delegations, report committee and floor sessions, state political figures. Offered: jointly with POL S 304.

CMU 328 News Laboratory (8) I&S Consists of full-time work in school's King County News Laboratory, reporting for area's newspapers and radio stations, covering all county offices/services. Involves heavy news writing and production. Open only to majors. Prerequisite: 315, 322, 323, or 327 for editorial journalism majors; 350 or 356 for broadcast journalism majors; permission of instructor.

CMU 399 Editorial Journalism Internship (2-6, max. 6) Supervised academic work done in connection with editorial internship. Designed to extend the student's knowledge of professional perspectives. Does not apply to required 50 credits in communications. Open only to majors. Credit/no credit only. Prerequisites: 315, 320, 322, and permission of instructor.

Public Relations

CMU 300 Fundamentals of Applied Communication (5) I&S Practice in communicating in variety of social relationships: intimate; employer-employee; institutional; customer-to-customer; social networking; and international issues. Classroom focus includes lectures by outside experts.

CMU 399 Problems in Public Relations (5) I&S Field experience in public relations. Design of public relations campaign for local non-profit organizations and design and writing of printed public relations tools. Emphasis on individual performance. Open only to majors. Prerequisites: 300, 315, and 330.

Advertising

CMU 340 Introduction to Advertising (5) I&S Overview of the advertising industry, its history, structure, operations, and institutional role.

CMU 345 Advertising Campaigns (5) I&S Preparation of an advertising plan for a product or service. Open only to majors. Prerequisites: 340, 344.

CMU 346-347 Promotional Campaigns (3-3) I&S Bowen, Collins Developing and producing promotional campaigns for non-profit organizations. Local advertising agencies and public relations firms supervise and mentor student efforts throughout the creative process. Open only to majors. Credit/no credit only. Prerequisites: 345 or 339.

CMU 348 Advertising Research (3) I&S Problems relevant to advertisers, agencies, media, and syndicated services. Conceptualization in mass communication context. Review of literature. Open only to majors. Prerequisite: 315.

CMU 349 Advertising Internship (2-5, max. 6) Internships are assigned to qualified students through the cooperation of the industry working with the school. Open only to majors. Does not apply to required 50 credits in communications. Prerequisites: 341 or 344, depending on nature of internship; 120 credits completed. Credit/no credit only.

Lecturer

Collins, Janay M. 1990; MA, 1983, Michigan State University; advertising, media planning, and campaigns.

Assistant Professors

Baldasty, Gerald J. * 1974; PhD, 1978, University of Washington; communication history and law, government, large organizations, First Amendment philosophy and theory.

Bowen, Lawrence * 1973; PhD, 1974, University of Wisconsin; advertising, media research, consumer information-seeking and -processing behaviors.

Bowes, John E. * 1974; PhD, 1971, Michigan State University; media and communication, public opinion, international communication.

Chan, Anthony B. * 1990; PhD, 1980, York University (Canada); history and politics of Pacific Rim communication systems.

Cranson, Patricia * 1954, (Emeritus); MA, 1954, University of Texas (Austin); broadcast journalism, history, writing and production of documentaries.

Jackson, Kenneth M. * 1974, (Emeritus); PhD, 1970, University of Washington; institutional communications, media research, mass media and public policy.

Klebowicz, Richard B. * 1984; PhD, 1984, University of Minnesota; communication history, impact of technology on press and society.

Labunski, Richard * 1984; PhD, 1979, University of California (Santa Barbara); mass media law, regulation, and broadcast news.

Samuelson, Merrill * 1962, (Emeritus); PhD, 1960, Stanford University; research methods, processes of reading, patterns in reader selection of new stories.

Simpson, Roger A. * 1968; PhD, 1973, University of Washington; communication history, law of communication, media economics, editorial journalism.

Graduate Faculty

Aadland, I. Post SolS

Collins, Janay M. 1990; MA, 1983, Michigan State University; advertising, media planning, and campaigns.
Broadcast Journalism

CMU 350 Writing and Reporting Broadcast News (5) I&S Writing and producing news stories and newscasts for broadcasting. Open to majors only. Prerequisite: 315.

CMU 356 News Broadcasting (3) I&S Preparation and presentation of news broadcasts; editing radio news program; use of visuals; television newscast performance. Open only to majors. Prerequisites: 315, 350.

CMU 359 TV News Reporting and Editing (5) I&S Preparation and presentation of news broadcasts, including reporting, scripting, and use of visuals. Prerequisites: 315, 350.

CMU 365 Advanced Television News Production (3) I&S Supervised undergraduate workshop experience in the preparation of news materials for television. Prerequisite: 350 or permission of instructor.

CMU 367 Broadcast Internship (2-5, max. 6) Experience in the day-to-day operation of a broadcast station. Internship credit may not be applied to fulfill specific course requirements or to 45-credit requirement for a communications major. For majors only. Prerequisites: 315, 320, 350, and courses determined by faculty coordinator. Credit/No credit only.

CMU 377 The Documentary (3) I&S History, background, aims, creative aspects, and function in mass media.

Courses for Undergraduate and Graduate Students

CMU 400 Communications Theory (3) I&S Applicability of theory. Important communication phenomenon and principles of communicating. Nature of communicating. Useful perspectives on communicating. Analysis of communicating and its effects. Prerequisite: 202 or permission of instructor.

CMU 405 Mass Communications Research (5) I&S Sample surveys, content analysis, or experimental techniques, depending upon interests of class and instructor. Recommended: relevant courses in the social sciences.

CMU 407 Content Analysis (3) I&S Techniques used in the systematic study of messages.

CMU 408 Survey Research Methods In Communication (3) I&S Practical exercises, readings, and discussion of survey research applications, including sampling theory, survey designs, measurement and questionnaire design, data collection and processing, data presentation and interpretation. Prerequisite: 405 or equivalent.

CMU 409 Experimentation In Communication (3) I&S Techniques of experimentation in the study of communicating. Prerequisite: elementary statistics.

CMU 410 Seminar In Media Studies (3) I&S Exploration of particular contemporary issues in mass media. Discussion and analysis of current problems. Directed, independent research project. Prerequisite: 310.

CMU 417 History and Communications (5) I&S Development of mass communication in the United States. Journalism and its response to change in social, political, and ethical patterns. Individual research project. Prerequisite: 201.

CMU 419 Issues In Mass Communication (5, max. 10) I&S Topics vary. Recommended: background in social sciences.

CMU 419 Government and Mass Communications (5) I&S The Anglo-American concept of freedom of communication; its evolution under federal and state constitutions. Tension areas, judicial decisions, statutes, and administrative regulations affecting publishing, broadcasting, individual research project.

CMU 421 Structure and Process of the Mass Media (5) I&S Organization for information and enforcement. Consequences of public policy. Place in American political economy. Individual research project. Prerequisite: 201 or 203 or permission of instructor.

CMU 422 Journalism and Literature (5) I&S Explores the relationship between journalism and fiction writing in the United States. Examines writers who began their careers as journalists and forged a fiction-writing philosophy related to what they learned in journalism. Readings in fiction and journalism. Prerequisite: 203.

CMU 423 Journalism Ethics (5) I&S Ethical issues in journalism; philosophical positions; historical context. Prerequisites: 315, 322.

CMU 424 The Intellectual Foundations of American Journalism (5) I&S Examines the thinkers and philosophers who have influenced modern journalism. Studies the main ideas in the development of modern thought and their impact on today's journalists. Explores the role communications systems have played in the creation of the world's cultures. Prerequisite: introductory work in the social sciences.

CMU 430 Crisis Communications (5) I&S Focuses on examples of crises faced by organizations and businesses and the ways in which public relations helped or failed to help in the recovery from crisis and return to normalcy. Prerequisite: 330.

CMU 443 The Social Function of Advertising (3) I&S Examination of the social and economic functions of advertising as an institution in contemporary society with special attention to controls over advertising. Emphasis on current issues.

CMU 446 Communication In International Markets (5) I&S Advertising and closely related promotional practices used in international market development. Economic, social, and political aspects of such activities in different industries.

CMU 447 Communication and Consumer Behavior (3) I&S Consumer information processing and buying behavior. Review of research. Prerequisite: 202 or permission of instructor.

CMU 463 Television Production Workshop for Teachers (5) I&S Presentation of instruction through television. Open only to nonmajors.

CMU 468 Children and Electronic Media (5) I&S Examinations research on children and the electronic media. Topics include television and video game violence and aggressive behavior, television commercials and purchasing and eating habits, stereotypes and impressions of people in the real world, and program production and regulation.

CMU 470 Theory and Criticism of Broadcasting (3) I&S Application of critical standards to sociological functions and aesthetic elements of broadcast media. Recommended: relevant courses in the social sciences or humanities.

CMU 471 Comparative Media Systems (5) I&S Comparative analysis of national media systems in the context of cultural, economic, and social milieu in which they operate. Prerequisite: introductory course work in the social sciences. Offered: jointly with SISCA 471.

CMU 473 Intercultural Communication (5) I&S Investigates intercultural communication theory and its application for varying levels of human interaction: interpersonal, intergroup, organizational, and international relations. Open to nonmajors but prior course work in communications, sociology, anthropology, political science, or international studies required.

CMU 475 Communications and International Relations (5) I&S Political, economic, and cultural issues with respect to media development and cross-border Information flow. Prerequisite: Introductory course work in the social sciences.

CMU 476 Noncommercial Radio and Television (3) I&S History of educational radio and television as it relates to the current public and institutional system of broadcasting. Emphasis on political and financial relationships.

CMU 477 Cross Cultural Communications Research (5) I&S Explores the methodological issues particular to the design or analysis of cross cultural communications research. Prerequisite: 405 or equivalent.

CMU 479 International Media Images (5) I&S How media construct the world around us. Looks, in particular, at media portrayals of other nations and cultures and introduces a framework for analyzing media images. Prerequisite: introductory course work in the social sciences.

CMU 481 Public Opinion and Communication (5) I&S Collective behavior and its methodology. Polls evaluated as recommendations on government policies, as manipulative instruments, and as expressions of the commonality of thought. Role of the mass media. Individual research project. Recommended: relevant courses in political science, sociology, psychology, or communications.

CMU 485 History and Impact of Communications Technologies (5) I&S Study of the power of select communication technologies from printing to computers and the interaction with societal institutions. Development of a framework for analyzing technology and change. Prerequisite: some background in social sciences and humanities.

CMU 486 Telecommunications Policy and Research (5) I&S Considers new telecommunications technologies as they influence, and are influenced by, behavioral, social, economic, and policy matters. Discussion in lay terms of technologies per se. Prerequisite: major standing or permission of instructor.

CMU 498 Problems of Communications (1-5, max. 10) Research and individual study. Prerequisite: permission of instructor.

Courses for Graduates Only

CMU 500 Seminar In Theory of Communication (6) Procedures for analyzing concepts and theoretical materials to provide basis for one's research. How to make productive use of the literature. Procedures for theorizing about empirical findings and generalizations. Typologies, models, theories, laws, and working hypotheses. Prerequisite: permission of instructor.
CMU 501 Development of Mass Communication (5) Institutions of mass communication. Political and social roles.

CMU 502 Mass Communication Process and Its Effects (5) Analytic approach to conceptualization and research in the field since 1900.

CMU 503 Research Methods (5) Introduces and compares basic methods of research in communication.

CMU 505 Communication and Politics (3) Primary literature dealing with communication and American political behavior. Prerequisite: 421.

CMU 506 Critical Theory Applications in Mass Communication (5) Major approaches in critical theory: Marxism, psychoanalysis, structuralism, and semiotics. Synthesizes these approaches by viewing the "cultural studies" tradition. Assesses critical theory through empirical study of network television in the United States and the United Kingdom.

CMU 507 Computer Applications in Communication Research (5) Potential of the computer for use in behavioral science. Prerequisites: elementary programming, elementary statistics.

CMU 508, 509 Communication Research (5,5) Basic methodological questions in communication research. Foundations in history and philosophy of science. Prerequisite: permission of instructor.

CMU 511 Seminar in Communication Research (3, max. 15) Individual research projects undertaken collectively within a given area of study, under direction of faculty member. Prerequisite: permission of instructor.

CMU 512 Content Analysis (5) Content analysis as a technique for making inferences from texts, including traditional, manual methods of analysis and computer coding.

CMU 513 Survey Research Methods in Communications (5) Faculty-directed project in survey research in which basic principles of survey design, including sampling, observation, measurement, data analysis, and data interpretation, are all applied. Prerequisite: elementary statistics or permission of instructor.

CMU 515 Field Seminar in Communication Historiography (5) Readings in communications history.

CMU 516 Communications History Research Methods (5) Development of the historical approach to communications research. Study of historical methods, bibliography, and criticism.

CMU 517 Seminar in Communications History (5) Topical research seminar in communications history.

CMU 519 Seminar in Government and Mass Communications (5) Legal problems of mass communication, institutions, and media operations.

CMU 521 Seminar in Media Structure (5) Directed independent research into structural aspects of American mass communications. Prerequisite: graduate standing.

CMU 543 Seminar in Advertising in Society (3) Interacting historical, social, economic, and legal influences shaping institutional character. Prerequisite: permission of instructor.

CMU 547 Seminar in Communication and Consumer Behavior (3) Directed reading and research in communication and consumer behavior. Emphasis on conceptualization and original research. Prerequisite: permission of instructor.

CMU 550 Advanced Communication Methods (1-3) Directed individual projects at a level acceptable by print or broadcast media. Advanced techniques of research and production analyzed and applied. Open only to students seeking the Master in Communications degree.

CMU 570 Seminar in the Theory and Criticism of Broadcasting (3) Criticism of the function and performance of broadcasting. Use of primary sources, including systematic data gathering and analysis. Prerequisite: 470.

CMU 571 Seminar in Regional Communication Systems (5) Communication as a factor in economic, sociocultural, and political relations among nations of a region. Focus varies with specialization of instructor. Consult graduate secretary for details. Interdisciplinary focus.

CMU 577 Seminar in International Communications Research (5) Methodological issues particular to the design or analysis of research that deals with data from different countries, cultures, or sub-cultures. Prerequisite: 503 or equivalent.

CMU 579 Seminar in Media and Foreign Policy (5) The role of communications media in how nations interact. The media as source, actor, and catalyst in international affairs. Interdisciplinary focus.

CMU 581 Seminar in Public Opinion and Communication (5) Conceptual and methodological approaches to public opinion and communication as historical and behavioral phenomena. United States and international perspectives. Recommended: appropriate background in the social sciences.

CMU 586 Telecommunications Structure and Policy (3) Structures and policies guiding the functioning of communication technologies and data flow: United States and international perspectives. Interdisciplinary approach.

CMU 587 Practicum in Communication Research (1-3, max. 8) Student participation in faculty-directed research projects.

CMU 598 Selected Readings (1-5, max. 10) Prerequisite: permission of supervisory committee chairperson.

CMU 600 Independent Study or Research (*) Prerequisite: permission of supervisory committee chairperson.

CMU 700 Master's Thesis (*)

CMU 800 Doctoral Dissertation (*)

Comparative History of Ideas

Comparative history of ideas provides for the interdisciplinary study of intellectual history by bringing together thematically related courses from such fields as literature, history, anthropology, philosophy, the arts, and religious studies. Courses within the program have been chosen and designed to explore the history of specific ideas or themes, to examine the history of particular intellectual cultures (Western and non-Western), or to study comparatively the underlying assumptions and attitudes of different intellectual worlds. As a unique approach to liberal humanistic studies, the program provides a solid basis for postgraduate study in, for example, law, administration, medicine, education, journalism, or area studies.

Undergraduate Program

Bachelor of Arts Degree

Major Requirements: 55 credits with a 2.50 GPA including colloquium in the history of ideas, six core courses distributed in three areas, and the remaining credits chosen among approved electives. At least half the credits presented for the major must be at the upper-division level. An optional senior thesis requiring an additional 15 credits is available.

Minor

Minor Requirements: 30 credits including 5 credits in Group A, or CHID 110; 5 credits in Group B, subgroup 1; 5 credits in Group B, subgroup 2; 5 credits in Group C; 5 credits CHID 390; 5 credits CHID 498. See department for current lists of Group A, B, and C courses.

Professors

Behler, Ernst H. * 1965; PhD, 1951, University of Munich (Germany); romanticism, literary theory, history of criticism.

Toews, John E. * 1979; PhD, 1973, Harvard University; modern European intellectual history.

Webb, Eugene * 1966; PhD, 1965, Columbia University; modern English, French, and German literature, comparative religion.

Associate Professor

Blundell, Mary Whitlock * 1985; PhD, 1984, University of California (Berkeley); Greek and Roman philosophy and literature.

Collins, Douglas P. * 1980; PhD, 1978, University of Missouri; twentieth-century French literature.

Mish'alani, James K. * 1963; PhD, 1961, Brown University; ethics, philosophical anthropology, contemporary continental philosophy.

Seale, Lercy F. * 1977; PhD, 1970, University of Iowa; twentieth-century literature, critical theory, American studies.

Lecturer

Clowes, James D. 1994; MA, 1988, University of Montana; modern European intellectual history, early German romanticism, pedagogy.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

CHID 110 The Question of Human Nature (5) &S

Clowes Considers the relationship between the individual and his/her culture. Traces the evolution of the notion of human nature in Europe and the United States and compares this tradition with representations of the human being from other cultural traditions.
Undergraduate Program

Adviser
Willis Konnick
B524 Padelford

Bachelor of Arts Degree

Major Requirements: 50 credits including the following: C LIT 200, 300, 400; three additional courses in comparative literature at the 300 or 400 level; and at least one course in a literature, studied in the original tongue, other than the student's native literature. Remaining credits are to be earned, with few exceptions, in 300- and 400-level courses from among the offerings of Comparative Literature and the eight participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages, Scandinavian Languages and Literature, Slavic Languages and Literature. Departmental courses in foreign literature in translation are listed under the respective departments.

Minor

Minor Requirements: 30 credits including C LIT 200, 300, 400; an upper-division literature course in a language other than the student's major language, and the remaining credits in upper-division literature courses offered through Comparative Literature and the eight participating departments above.

Graduate Program

Sven H. Rossett, Graduate Program Coordinator

The Department of Comparative Literature offers a program of study for faculty members from the following participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Languages and Literature, Slavic Languages and Literature. Study of literature in the program leads to a Master of Arts or Doctoral Philosophy degree. Students concentrate on graduate courses in comparative literature and specialize in two or more national literatures of major interest to them, studied in the original language. With permission, a Ph.D. aspirant may choose as a third area of study a field outside of literature (e.g., philosophy, religion, art, political thought). On receiving the advanced degree, the student is qualified for teaching and research in comparative and general literature, as well as the language and literature of his or her specialization.

Special Requirements

Applicants for the M.A. program are required to have a B.A. degree in comparative literature, English, or another foreign language, or an equivalent background; applicants for the Ph.D. program are required to have an M.A. in one of the above. M.A. students are required to demonstrate advanced competence in one foreign language and a basic reading knowledge of a second. Ph.D. students are required to demonstrate advanced competence in two foreign languages and a basic reading knowledge of a third. Advanced competence usually results from participation in the program, and the reading knowledge is required before M.A. or Ph.D. examinations are administered. Language competence is evaluated by comparative literature faculty through departmental examinations or by evidence of completion of satisfactory advanced (400- or 500-level) course work in the language.

Ph.D. Program in Critical Theory

This is a joint-doctoral program with nine participating doctoral programs (Asian Languages and Literature; Classics: Comparative Literature; Drama; English; Germanics; Romance Languages and Literature; Scandinavian Languages and Literature; and Slavic Languages and Literature). The program combines the doctoral program in one of the participating departments with an additional set of courses in critical theory into an integrated course of study. The purpose is to broaden a student's perspective and to increase awareness of different critical approaches to literature and related fields. Study in this program leads to a Ph.D. in the respective major field and critical theory.

Admission Requirements

Applicants must have been admitted to one of the participating literature departments and have received a Master's degree in a literature represented by these departments or in a related field.

Degree Requirements

(1) Continued satisfactory work in the student's home department; (2) completion of six literature courses from the program in critical theory; (3) completion of one colloquium in critical theory; (4) reading knowledge of two foreign languages, ancient or modern; (5) passage of the written Ph.D. examinations in the student's home department; (6) passage of the oral Ph.D. examination in the student's home department; (7) defense of a dissertation prospectus before a committee of three faculty members, two of whom are from the faculty in critical theory; (8) submission of a Ph.D. dissertation to a committee which includes one representative of the program in critical theory.

Financial Aid

Students working for advanced degrees in comparative literature are eligible to apply for teaching assistantships in the department(s) of language and literature relevant to their specialization. Comparative literature has a very limited number of teaching assistantships available and they are usually awarded to advanced students.

Jones, Frank W. 1955, (Emeritus); PhD, 1941, University of Wisconsin; translation, twelfth-century theatre, poetry.
Leiner, Jocqueline * 1963, (Emeritus); Dr ès Lettres, 1969, University of Strasburg (France); modern French literature.

Leiner, Wolfgang * 1963, (Emeritus); PhD, 1955, University of Saarland; seventeenth- and twentieth-century French and Italian literature.

MacKay, Pierre A. * 1966; PhD, 1964, University of California (Berkeley); Greek literature, post-classical and Byzantine Greek literature, numismatics.

Modiano, Raimonda * 1978; PhD, 1973, University of California (San Diego); romanticism.

Reinert, Otto * 1956, (Emeritus); PhD, 1952, Yale University; comparative literature, eighteenth-century literature.

Rossel, Sven H. * 1974; PhD, 1968, University of Copenhagen (Denmark); Danish language and literature, medieval literature, European preromanticism and romanticism.

Steene, Birgitta * 1973, (Emeritus); PhD, 1960, University of Washington; Scandinavian drama and film, children's literature, comparative literature.

Vance, Eugene * 1990; PhD, 1964, Cornell University; medieval literature, the history of criticism, and discourse analysis.

Weng, Ching-Hsien * 1971; PhD, 1971, University of California (Berkeley); Chinese poetry and comparative literature.

Wobb, Eugene * 1966; PhD, 1965, Columbia University; modern English, French, and German literature, comparative religion.

Ziaedi, Farhad * 1966, (Emeritus); LLB, 1940, University of London (UK); Arabic language and literature, Islamic law, Islamic institutions.

Associate Professors

Ammerlahn, Helmut H. * 1968; PhD, 1965, University of Texas (Austin); Goethe, eighteenth to early twentieth century, comparative literature.

Collins, Douglas P. * 1980; PhD, 1978, University of Missouri; twentieth-century French literature.

Ellrich, Robert J. * 1964, (Emeritus); PhD, 1960, Harvard University; eighteenth-century French literature.

Handwerk, Gary J. * 1984; PhD, 1984, Brown University; literary theory, English and Irish nineteenth- and twentieth-century narrative.

Kapetanac, Breda * 1975, (Emeritus); LittD, 1966, University of Zagreb (Yugoslavia); theory of comparative literature, nineteenth- and twentieth-century European literature.

Konick, Willis * 1961; PhD, 1964, University of Washington; Russian literature, nineteenth-century European literature.

Kramer, Karl D. * 1970; PhD, 1964, University of Washington; Russian literature.

McLean, Sammy K. * 1967, (Emeritus); PhD, 1963, University of Michigan; Western drama, twentieth-century poetry, psychoanalysis and literature, translation.

Seale, Leroy F. * 1977; PhD, 1970, University of Iowa; eighteenth-century literature, critical theory, American studies.

Sehmsdorf, Henning K. * 1967, (Emeritus); PhD, 1968, University of Chicago; folklore and mythology, Norwegian language and literature, comparative literature.

Shavro, Steven * 1984; PhD, 1981, Yale University; literary theory, romantic poetry, post-modernism.

Vaughan, Micaela F. * 1973; PhD, 1973, Cornell University; medieval language and literature.

Warme, Lars G. * 1975, (Emeritus); PhD, 1974, University of California (Berkeley); Swedish language and literature, Scandinavian novel, comparative literature.

Seminar Lecturer

Dornbush, Jean M. * 1980; PhD, 1976, Princeton University; medieval period, symbolism, modern literary theory.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

All Comparative Literature courses are taught in English unless otherwise indicated. It is recommended that students enrolling in 300- or 400-level courses have taken 10-15 credits in literature or general humanities courses. Content of many courses varies from quarter to quarter.

C LIT 200 Introduction to Literature (5) VLPA Reading, understanding, and enjoying literature from various countries, in different forms of expression (e.g., dramatic, lyric, narrative, rhetorical) and of representative periods. Focus upon the comparative study of literature, from the themes and motifs common to many literatures of the world. Offered: A.

C LIT 210 Literature and Science (5, max. 15) VLPA Introduces the rich and complex relationship between science and literature from the seventeenth century to the present day. Students examine selected scientific, literary, and philosophical texts, considering always in which literature and science can be viewed as forms of imaginative activity.

C LIT 211 Literature and Culture (5, max. 15) VLPA Study of literature in its relation to culture. Focuses on literature as a cultural institution, directly related to the construction of individual identity and the dissemination and critique of values.

C LIT 220 Introduction to Folklore Studies (5) VLPA Survey of the field of folkloristics, focusing on oral genres, customs, belief, and material culture. Particular attention to the issues of community, identity, and ethnicity. Offered: jointly with SCAND 220.

C LIT 240 Writing in Comparative Literature (5, max. 18) Comparative approach to literature and a workshop in preparing comparative papers in English. Emphasis on cross-cultural comparison of literary works. Readings in English with an option to read selected texts in the original languages Offered: AWSp.

C LIT 250 Themes in World Literature: Parents and Children (5) VLPA World literature, from the Renaissance to modern times, based upon the theme of "parents and children." Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the motive of generational conflict. Offered: A.

C LIT 251 Themes in World Literature: Love, Sex, and Murder (5) VLPA World literature from the Renaissance to modern times, based upon the theme of "love, sex, and murder." Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the human potential for both great violence and extraordinary compassion. Offered: W.

C LIT 270 The Visual Text: How to Read a Film (5) VLPA Introduction to film form, style, and techniques. Examples from silent film and from contemporary film. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 271 The Visual Text: Authors of Film (5) VLPA Introduction to authorship in the cinema. The work of a major director or directors. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 272 The Visual Text: Genre in Film (5) VLPA Introduction to study of film genre. Literary, mythic, and historic aspects of film genre. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 300 The Scope of Literary History (5) VLPA Raises the issue of literary history by discussing, through historical examples and theoretical issues, such questions as: What is the scope of written literary history? How do we set up the canon of literary history? How do we account for periodization and epochal change? Offered: W.

C LIT 320 Studies in European Literature (5, max. 15) VLPA Examination of the development of European literature in a variety of genres and periods. Possible areas of study include literature from romantic literature of the nineteenth century through great realist classics of second half of the century or from symbolism to expressionism and existentialism.

C LIT 321 Studies in Literature of the Americas (5, max. 15) VLPA Emphasizes connections between twentieth century literature of the United States and Canada and current literature of Latin America. Emphasizes that, despite obvious differences, much is shared in terms of culture and national sensibility across the two continents.

C LIT 323 Studies in the Literature of Emerging Nations (5, max. 15) VLPA Novels and short stories, from Africa, the Middle East, and South Asia. Discusses relationship of Western literary genres to oral literary tradition, as well as issues like colonialism, gender relations, narrative technique, native and non-native languages.

C LIT 330 The European Fairy Tale (5) VLPA An introduction to folktales and literary tales from various traditions and periods. A discussion of their origin, special characteristics, dissemination, and relevance to the contemporary reader.

C LIT 331 Folk Narrative (5) VLPA Survey of various genres of folk narratives studied in performance contexts to reveal their socio-cultural functions in a variety of milieus. History of development of folk narrative study, taxonomy, genre classification, and interpretative approaches. Recommended: 230/SCAND 230 or equivalent. Offered: jointly with SCAND 331.

C LIT 332 Folk Belief and World View (5) VLPA Study of folk belief and world view expressed in memora, legends, magic formulas, and other examples of oral tradition. Analysis of forms and origins of belief genres, their esthetic and social functions, and the role of oral tradition as a tool of social control and change. Offered: jointly with SCAND 332.

C LIT 333 Folklore and Material Culture (5) VLPA DuBois Material culture in traditional and contemporary Scandinavia. Comprehensive examination of non-verbal genres (including vernacular architecture, settlement, textile 'foadways' with an emphasis on broad theoretical issues such as community, identity, ethnicity. Recommended: 230/C LIT 230 or equivalent. Offered: jointly with SCAND 333.

C LIT 357 Literature and Film (3-5, max. 10) VLPA The film as an art form, with particular reference to the literary dimension of film and to the interaction of literature with the other artistic media employed in the form.
Films are shown as an integral part of the course. Content varies.

C LIT 371 Literature and the Visual Arts (5) VLPA Focuses on specific theoretical problems. Examines the relationship between text and image in a variety of art forms including poetry, novels, paintings, photography, essays, comic strips, film, and advertisement. Readings, in English, from a wide variety of national literatures.

C LIT 375 Images of Women In Literature (5, max. 15) VLPA Comparative study of the ways women's image, social role, and psychology have been portrayed by writers of various nationalities and literary periods. Selection of theme varies from quarter to quarter. Works are read in English translation.

C LIT 396 Special Studies in Comparative Literature (3-5, max. 10) VLPA Offered by visitors or resident faculty. Content varies.

C LIT 400 Introduction to the Theory of Literature (5) VLPA A selection of major theoretical statements in the history of literary theory, with emphasis on fundamental issues of lasting concern and with attention to some recent emphases. Offered: Sp.

C LIT 410 Studies In Literary History (5, max. 15) VLPA Introduction to a major figure or movement associated with the development of literary history. Through the study of one aspect of literary history students gain a thorough understanding of a particular point of view, while exploring the breadth of contemporaneous approaches to literature.

C LIT 421 Studies In Connections: Literature and other Disciplines (5, max. 15) VLPA Examines the links between literature and other disciplines or art forms. Literature and history, literature and philosophy, literature and music, literature and the visual arts are all appropriate topics. Selection of focus depends on instructor.

C LIT 422 Studies In Genre (5) Major genres of world literature: poetry, fiction, drama. Readings, in English from a wide selection of national literatures.

C LIT 424 The Epic Tradition (5) VLPA Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, and Aeneid; the Roland or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies. Literary background recommended. Offered: jointly with CLAS 424.

C LIT 430 Readings In Folklore (5) VLPA DuBois, Sehnsdorf Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Prerequisite: C LIT/SCAND 230 or equivalent. Offered: jointly with SCAND 430.

C LIT 470 Senior Seminar In Folklore (5) VLPA Investigates ethnic and several American folk traditions in the Pacific Northwest through extensive fieldwork. Prerequisite: C LIT/SCAND 230 or equivalent. Offered: jointly with SCAND 470.

C LIT 490 Directed Study or Research (1-5, max. 10) Individual study of topics in comparative literature by arrangement with the instructor and the Comparative Literature office.

C LIT 493 Comparative Literature Honors Seminar (5, max. 15) VLPA Special topics in comparative literature. Required of honors students in comparative literature. Prerequisite: permission of honors adviser.

C LIT 495 Honors Thesis (4) VLPA Preparation of an honors thesis under the direction and supervision of a faculty member. Prerequisites: 493 and permission of honors adviser.

C LIT 496 Special Studies In Comparative Literature (3-5, max. 15) VLPA Offered occasionally by visitors or resident faculty.

Courses for Graduates Only

Consult the Comparative Literature office for information on the quarter and year the courses below will be offered. Graduate-level course numbers merely distinguish courses and do not indicate ascending level of knowledge required to take the course. Reading knowledge of at least one foreign language recommended.

C LIT 500 The Theory of Literature I: The Literary Text (5, max. 15) An investigation into the nature of literature in contrast to other forms of writing and into essential feature of literature such as genres, imagery, modes of communication, and structure.

C LIT 501 The Theory of Literature II: History of Literary History (5, max. 15) An exploration of topics of literary history such as periods, traditions, the writing of literary history, and literary history in contrast to other histories.

C LIT 502 The Theory of Literature III: Literary Value (5, max. 15) An analysis of the function of literature in public and private life, the concept of literature in the context of the humanities, and the problem of evolution in literature.

C LIT 507 History of Literary Criticism and Theory I (5, max. 15) A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, Including Plato, Aristotle, Longinus, and the major medieval critics. Offered: jointly with ENGL 507.

C LIT 508 History of Literary Criticism and Theory II (5, max. 15) Literary criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Offered: jointly with ENGL 508.

C LIT 509 History of Literary Criticism and Theory III (5, max. 15) Literary Criticism and theory from Kant's Critique of Judgment to the mid-twentieth century and the work of Northrop Frey. Offered: jointly with ENGL 509.

C LIT 510 History of Literary Criticism and Theory IV (5, max. 15) A study of the major issues in literary criticism and theory since about 1955. Offered: jointly with ENGL 510.

C LIT 511 Literary Translation (5, max. 15) Lectures on principles of translating literary works into readable English. Students present and comment on translations made by them and write seminar papers on problems of translation in theory and practice.

C LIT 516 Colloquium In Criticism (5, max. 15) Recent trends in literary criticism, taught by representatives from various literature departments, covering critical trends such as structuralism, poststructuralism, hermeneutics, reception theory, and sociological approaches to literature.

C LIT 517 Colloquium In Folklore (5) Recent trends in folklore studies, taught by representatives from various literature departments and disciplines in the social sciences.

C LIT 518 Colloquium In Medieval Studies (5) Salient literary aspects of the European Middle Ages, taught by representatives from various literature departments as well as from related disciplines, such as philosophy, art history, history, and comparative religion.

C LIT 530 Cultural Criticism and Ideology Critique I (5, max. 15) A study of the main attempts to come to an understanding of the humanities and the nature of historical interpretation in a cultural context.

C LIT 535 Cultural Criticism and Ideology Critique II (5, max. 15) Offerings vary to cover individual theorists and particular manifestations of cultural criticism and ideology critique.

C LIT 545 Medieval Studies (3/5, max. 15) Literature, intellectual history, and sociology of the Middle Ages, 500-1200. Topics may include "renaissance" of the twelfth century: the educational ideal; rise of universities; philosophical concepts.

C LIT 546 Studies In Renaissance and Baroque (3-5, max. 10) Aspects of Western European literature during the Renaissance and Baroque period. Course content varies.

C LIT 547 Studies In Eighteenth-Century Literature (3-5, max. 10) Examination of various trends in eighteenth-century literature including the Enlightenment, Rationalism, Pre-Romanticism, and Neo-Classicism. Course content varies with instructor.

C LIT 548 Studies In Nineteenth-Century Literature (3-5, max. 10) Examination of various trends in nineteenth century literature including Romanticism, Realism, Naturalism, and Symbolism.

C LIT 549 Twentieth-Century Literature (3-5) Selected movements, schools, and trends of significance in twentieth-century literature of Europe and Americas. Symbolism, surrealism, dada, expressionism, surrealism, existentialism, nouveau roman, and absurd may be considered. Texts in English, French, and German figure most prominently, but Spanish, Italian, Russian, and other materials may be examined. Content and emphasis vary.

C LIT 570 The Novel: Theory and Practice (3-5, max. 15) Study of the novel as a genre, examining two or more novels of varying national literatures. Course content varies.

C LIT 571 The Lyric: Theory and Practice (3-5, max. 15) Examination of central questions in the study of the lyric genre as approached from an international point of view. Course content varies.

C LIT 572 The Epic: Theory and Practice (3-5, max. 15) Examination of epic literature as exemplified by selected works chosen from various cultures and periods (e.g., French and German medieval courtly epic, the epic in Renaissance and baroque Europe, traditions of the mock epic). Course content varies.

C LIT 573 The Drama: Theory and Practice (3-5, max. 15) Examination of various aspects of the drama as a major literary genre, as approached from international and multilingual points of view. Course content varies.

C LIT 576 Seminar In East-West Literary Relations (3-5, max. 15) Comparative investigation of literary topics requiring the study of both Eastern and Western documents. Explores parallels and contradictions between the two, in concepts, ideas, and specific topics. A comparative paper on a chosen topic with qualified conclusions is required. Emphasis varies. Prerequisite: at least one East Asian language.

C LIT 586 Special Studies In Comparative Literature (3-5, max. 15) Offered occasionally by visiting or resident faculty. Course content varies.

C LIT 599 Special Seminar or Conference (1-9, max. 30) Group seminars or individual conferences scheduled to meet special needs. Prerequisite: permission of graduate program adviser.

C LIT 600 Independent Study or Research (*)

C LIT 700 Master's Thesis (*)

C LIT 800 Doctoral Dissertation (*)

114 Sieg

A Bachelor of Science degree in computer science is offered by the Department of Computer Science and Engineering, and is administered through the College of Arts and Sciences. The department also offers a Bachelor of Science in Computer Engineering degree, and graduate degrees in computer science, administered through the College of Engineering. While the department offers both computer science and computer engineering, the computer science major is more appropriate for students who want to have a double major with another College of Arts and Sciences program (for example, mathematics or economics), who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who want more theory of computation. The computer engineering major is more appropriate for students who are interested in building systems that include both custom hardware and software components, who have strong interests in electrical engineering, or who specifically want an engineering degree. More information concerning these programs can be found under Computer Science and Engineering in the College of Engineering section of this catalog.

Computer science is the study of information and algorithms within the context of real and abstract computing devices. Computer scientists are interested in such topics as the representation and storage of information, algorithms to access, display, edit, and transfer information, programming languages to express algorithms, and hardware and software processors to execute algorithms. These concerns lead to practical developments in computer systems software and in application areas such as artificial intelligence, computer graphics, and databases, and to theoretical investigations of computers, algorithms, and data.

The objective of undergraduate education in computer science is to develop broadly educated and competent graduates for professional careers or graduate studies. Especially important is a foundation that will endure as technology advances and changes.

The computer field has a broad base of industrial and governmental jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, technical salesman, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers.

Undergraduate Programs

Bachelor of Science in Computer Engineering Degree
See Computer Science and Engineering in the College of Engineering section.

Bachelor of Science Degree
Adviser
Jan Sneegas

114 Sieg

Admission Requirements: 45 credits completed, including MATH 124, 125, 126; PHYS 121/131 or 122/132 or 123/133; CSE/ENGR 142 and CSE 143. A minimum 3.00 GPA for all courses at this or other universities. These conditions guarantee consideration, but not acceptance.

Major Requirements: (1) Preparatory Component (39 credits): MATH 124, 125, 126 and three courses selected from MATH 307, 308, 309, STAT 311, or any approved senior elective mathematics or statistics courses (who has completed the undergraduate handbook available in 114 Sieg); PHYS 121/131, 122/132, 123/133; either PHYS 334 or ENGR 213. (2) Inner Core Component (20 credits): CSE/ENGR 142, CSE 143, 321, 322, 325, 341, 376. (3) Outer Core Component (minimum of four courses): Selected from 370 or 470 (but not both), 401, 403, 421, 431, 444, 451, 457, 471, and 473 (if more than 12 credits are taken, excess credits may count toward senior electives). (4) Elective Component (minimum of 10 credits): 400-level CSE courses (not including PHYS 334 or ENGR 213) and the following approved senior elective mathematics or statistics courses: MATH 493; technique (12 credits minimum at 300 level: 6 credits minimum in both ballet and modern dance). The dance program is designed as part of a liberal arts curriculum and provides students with a foundation for future advanced work in performance or movement-related work. It is recommended that majors supplement their dance studies with work that will provide a foundation for later specialization in dance ethnology, dance history and criticism, performance art, education, movement therapy, or movement science.

Graduate Program

Bachelor of Arts Degree

Admission Requirement: Students should complete a minimum of one quarter of basic dance technique at the level before applying for acceptance into the major program. Admission is once a year. Students must apply by the end of the fifth week of spring quarter for admission the following autumn. Transfer students and out-of-town freshmen should consult the department for audition arrangements.

Major Requirements: Minimum 70 credits in dance to include 166, 254, 256, 261, 262, 266, 270, 272 (2 credits, one crew minimum), 344, 345, 346, 356, 366, 390, 420, 480, 493; technique (12 credits minimum at 300 level: 6 credits minimum in both ballet and modern dance). Minimum 10 credits from the following: ART H 203, 302; DRAMA 250, 251, 252, 253; MUSIC 270, 316, 317, 318, 331, 386; PSYCH 306, 310; B STR 301. Students must demonstrate consistent and acceptable progress in technique, performance, and academic areas toward the attainment of a degree.

Graduate Program

Hannah C. Wiley, Graduate Program Coordinator

The dance program offers graduate study leading to a Master of Fine Arts degree. This program is designed specifically for professional dance performers who are anticipating retirement and wish to prepare for a transition into college teaching careers. All graduate students will comprise the Chamber Dance Company and will hold teaching assistantships.

During the two-year program, a student must complete at least 73 credits, of which a minimum of 21 must be in an area of specialization, e.g., choreography/production, history/research/criticism, ethnology, Laban Movement Analysis, or individually Designed Specialization (IDS). The master's project may be artistic or scholarly in nature.

Admission Requirements

(1) A letter of application and résumé; (2) an undergraduate degree; (3) a minimum of eight years of professional performance experience; (4) the ability to demonstrate movement skills at a professional level in at least one idiom: an in-person audition or performance video tape; (5) three letters of reference verifying success and responsibility in the professional dance arena. Neither a foreign language nor the Graduate Record Examination is required. Application deadline is January 15.

Financial Aid

All graduate students will receive tuition waivers and teaching assistant stipends.

Faculty

Director
Hannah Wiley

Professors
Boris, Ruthanna 1965, (Emeritus); DTR, 1948; ballet technique and dance therapy.
Knapp, Joan S. * 1981, (Emeritus); MA, 1964, University of Illinois; dance composition, improvisation, kines­thetic training.
Russell, Francia 1988, (Affiliate); ballet.
Wiley, Hannah * 1984; MA, 1981, New York University; ballet, scientific aspects of dance, choreography, dance in higher education.

Assistant Professors
Parker, Rip 1994; MFA, 1992, University of Washington; modern, jazz, and ethnic dance; dance history, choreography.

Part-time faculty members drawn from professionals in the community.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

DANCE 101, 102, 103 Introduction to Dance (5, max. 10; 5, max. 10; 5, max. 10) VLP A Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet and modern dance techniques. Attendance required at outside events. Prerequisites: 101 for 102; 102 for 103.

DANCE 104, 105, 106 Modern Technique *(max. 8; * max. 8; * max. 8) VLP A Advanced beginner. Continued development of all beginning areas and expansion of movement vocabulary. Prerequisites: 103 or permission of instructor for 104; 104 or permission of instructor for 105; 105 or permission of instructor for 106.
DANCE 107, 108, 109 Ballet Technique I (*max. 8, *max. 6, *max. 8) VLPA Advanced beginner. Continued development of all beginning areas. Expansion of ballet vocabulary. Prerequisites: 103 or permission of instructor for 107; 107 or permission of instructor for 108; 108 or permission of instructor for 109.

DANCE 110, 111, 112 Jazz Technique I (2, max. 4; 2, max. 4; 2, max. 4) VLPA Introduction to jazz technique. Dance performance attendance required. Prerequisites: 110 or permission of instructor for 111; 111 or permission of instructor for 112.

DANCE 166 Dance Composition I (5) VLPA Introduction to the principles of dance composition through improvisation. Prerequisite: permission of instructor. Offered: alternate years.

DANCE 201, 202, 203 Ballet Technique II (*max. 8, *max. 8, *max. 8) VLPA Intermediate. Expansion of ballet vocabulary. Prerequisites: 109 or permission of instructor for 201; 201 or permission of instructor for 202; 203 or permission of instructor for 206.

DANCE 204, 205, 206 Modern Dance Technique II (*max. 8, *max. 8, *max. 8) VLPA Intermediate. Expansion of vocabulary. Prerequisites: 109 or permission of instructor for 204; 204 or permission of instructor for 205; 205 or permission of instructor for 206.

DANCE 210, 211, 212 Jazz Technique II (2, max. 4; 2, max. 4; 2, max. 4) VLPA Intermediate-level jazz technique. Continued development of beginning areas. Expansion of movement vocabulary. Dance performance attendance required. Prerequisite: 112 or permission of instructor for 210; 210 or permission of instructor for 211; 211 or permission of instructor for 212.

DANCE 230 Kinesthetic Training (3) VLPA Skinner Knowledge gained through direct perceptual experience. Uses imagery to facilitate efficient functioning of the mind/body complex in an artistic task. Offered: alternate years.

DANCE 234 Selected Idioms as Ethnic Dance (5) VLPA/S Survey course presenting selected dance idioms as they relate to ethnicity in their performance, aesthetics, and history. May have studio component. Offered: alternate years.

DANCE 262 Contact Improvisation (3) VLPA Lepore Interactive dancing based on weight sharing. Emphasis on proprioceptive and tactile sensibilities as they relate to movement improvisation. Techniques for supporting weight studied and practiced. Prerequisite: one year of dance technique. Offered: alternate years.

DANCE 266 Dance Composition II (5) VLPA Dance composition in relation to music. Emphasis on solos and small groups. Prerequisites: 166. Offered: alternate years.

DANCE 270 Dance Performance Activities (1-3, max. 8) VLPA Performance in a dance or work on a crew for a dance production, either a studio showing or public performance, conducted under faculty supervision. Prerequisite: permission of instructor. Credit/no credit only.

DANCE 301, 302, 303 Ballet Technique III (*max. 8, *max. 6, *max. 8) VLPA Advanced-intermediate level: continued development and expansion in all areas of technique. Prerequisites: permission of instructor for 301; 301 or permission of instructor for 302; 302 or permission of instructor for 303.

DANCE 304, 305, 306 Modern Dance Technique III (3, max. 6; 4, max. 6; 3, max. 6) VLPA Intermediate-advanced. Dance sequences of greater complexity. Prerequisites: permission of instructor for 304; 304 or permission of instructor for 305; 305 or permission of instructor for 306.

DANCE 310, 311, 312 Jazz Technique III (2, max. 4; 2, max. 4; 2, max. 4) VLPA Advanced-level jazz technique. Investigation of jazz styles such as Afro-Caribbean, Latin, and musical theatre. Dance performance attendance required. Prerequisites: 212 or permission of instructor for 310; 310 or permission of instructor for 311; 311 or permission of instructor for 312.

DANCE 324 Partnering Techniques (1, max. 6) VLPA Study and practice in supported dance work.

DANCE 344 Early Dance History (5) VLPA Development of Western theatrical dance through the nineteenth century. Offered: alternate years.

DANCE 345 Late Dance History (5) VLPA Twenty-first-century Western theatrical dance. Offered: alternate years; W.

DANCE 354 Laban Movement Analysis (5) VLPA Lepore Introduction to the movement theories of Rudolph Laban and his protégés. Coursework includes effort/shape, space harmony, symbology, and an introduction to Labanotation. Prerequisite: one year movement or dance technique training. Offered: alternate years; A.

DANCE 366 Dance Composition III (5) VLPA Lepore, Wellborn Dance composition in relation to production. Emphasis on larger group works. Prerequisite: 266 and dance major or permission of instructor. Offered: alternate years; Sp.

DANCE 385 Pointe Techniques (1, max. 6) VLPA Pointe technique for intermediate and advanced dancers.

DANCE 390 Dance Teaching Methodologies (5) VLPA Cave, Wiley Introduction to dance pedagogy, including educational theory, motor learning, and biomechanical principles; and to music as it relates to the teaching of dance. Prerequisite: dance major or permission of instructor. Offered: alternate years.

DANCE 401, 402, 403 Ballet Technique IV (*max. 8, *max. 8, *max. 8) VLPA Advanced level. Prerequisites: 303 or permission of instructor for 401; 401 or permission of instructor for 402; 402 or permission of instructor for 403.

DANCE 404, 405, 406 Modern Dance Technique IV (3, max. 6; 3, max. 6; 3, max. 6) VLPA Advanced technical skills applied to longer dance sequences. Prerequisites: 306 or permission of instructor for 404; 404 or permission of instructor for 405; 405 or permission of instructor for 406.

DANCE 420 Dance Aesthetics (3) VLPA/S Skinner Philosophical investigation of the expressive elements of dance. Reading and discussion of the concepts of beauty, style, and aesthetic theory.

DANCE 488 Advanced Dance Composition (3) VLPA Explores a variety of approaches to personal creative process in dance composition. Prerequisite: permission of instructor.

DANCE 490 Senior Seminar (5) VLPA Lepore, Wiley Culminating project emphasizing a synthesis of experiences in the Dance Program with a focus on individual interests. Prerequisite: senior dance major.

DANCE 492 Special Studies in Dance (1-3, max. 10) VLPA Special studies designed to address contemporary and historical concerns in the field of dance. Prerequisite: permission of instructor.

DANCE 493 Anatomy for Dance (5) VLPA/NNW Lepore, Wiley Anatomy of the musculoskeletal system and its application in dance movement. Exploration of movement principles based on Bartenieff Fundamentals. Prerequisite: dance major or permission of instructor. Offered: alternate years.

DANCE 499 Undergraduate Independent Study (*max. 6)

Courses for Graduates Only

DANCE 510 Chamber Dance Production (3, max. 9) Dance production in the university environment. Publicity, programming, budgeting, rehearsal, and performance of Chamber Dance Company repertoire. Credit/no credit only.

DANCE 515 Dance Research Methods (3) Seminar in problem identification and definition, theory development, research design, data analysis, and interpretation. Examples of various types of dance research.

DANCE 520 Dance in Higher Education (3) Readings, discussion, and observation of teaching methods. Students assist faculty in the instruction of lower-level classes. Selected anatomical, historical, and aesthetic concepts as they relate to dance pedagogy. Development of a personal teaching style appropriate for university-level dance courses.

DANCE 521 Dance Administration (3) Readings and discussion relating to dance administration in college and professional settings. Topics include: curricular development, academic advising, budgetary procedures, personnel issues, and problems related to dance as a performing art within the university structure.

DANCE 522 Applications of Dance Education (3) Readings, lecture, and discussion relating to the role of dance in the community, the university, and other social contexts. Guest lecturers in dance professions and related arts address the topic of interdisciplinary potentials and responsibilities.

DANCE 544 Early Dance History (3) Study of the evolution of dance from ritual to a theatre art form. Offered: alternate years.

DANCE 545 Late Dance History (3) Roots of contemporary dance as an art form and its relationship to developments in ballet since the turn of the century. Offered: alternate years.

DANCE 590 Dance Teaching Methodologies (3) Wiley Introduction to dance pedagogy with an emphasis on motor learning skills and biomechanics. Practical teaching experience. Offered: alternate years.

DANCE 595 Master's Project (3) Culminating project in an area of interest developed in consultation with faculty advisor and supported by elective courses. Full faculty approval of proposed project by end of first year. Formal presentation, appropriation to project's content, presented to full faculty during second year. Projects may range from creative to scholarly.

DANCE 600 Independent Study or Research (*max. 9)

Drama

101 Hutchinson

The School of Drama is concerned with the whole continuum of acting, directing, designing, theatre history, dramatic literature, and the human dramatic imagination finds expression. The school uses four theatres including the Playhouse, with a thrust stage; and the Penthouse Theatre, the first theatre-in-the-round built in America. Faculty- and student-directed plays drawn from the full range of world dramatic literature are presented throughout the year. Additional productions are mounted in the two theatres of Meaney Hall. Technical and design support is provided for opera productions of the School of Music and for programs of the dance division.
Undergraduate Program

Adviser
129 Hutchinson

Bachelor of Arts Degree

Major Requirements: A minimum of 61 credits in drama courses. Three quarters of acting: 251, 252, 253 or 351, 352, 353 (with 350 series, 3 credits of 258 or 498 also required); Three quarters of technical theatre: 210, 211, 212, 290, 291, 292. 25 credits in theatre history, dramatic literature, and criticism: 302, 371; one of 372, 373, 374, 377, 472; one of 473, 475, 476; one of 416, 494 (or substitution of additional course from two previously listed series). Electives at the 300-400 level to complete the balance. Majors are required to register for 401 each quarter they are in residence.

Minor

Minor Requirements: 34 credits consisting of DRAMA 101, 210, 211, 212, 251, 252, 253, 371. DRAMA 290, 291, and 292 recommended.

Graduate Program

The School of Drama offers programs of graduate study leading to the Master of Fine Arts and Doctor of Philosophy degrees. Areas of study for the M.F.A. degree include acting, stage direction, scene design, lighting design, costume design, and technical design. Most students should expect to spend three years to complete requirements for the M.F.A. degree.

The Ph.D. program provides students with training for scholarly research in theatre history, dramatic literature, theory, and criticism. Students are also encouraged to do interdisciplinary work with such allied programs as the Ph.D. program in critical theory.

Admission Requirements

Students may enter only in autumn quarter. Since admission requirements vary for each of the graduate programs, applicants should contact the school for current application information and deadlines.

Faculty

Director
Sarah N. Gates

Professors
Clay, Jack D. * 1966, (Emeritus); MA, 1956, Northwestern University; acting.
Comito, Mary Elizabeth * 1985, (Emeritus); PhD, 1970, University of Colorado (Boulder); playwriting.
Crida, James R. * 1952, (Emeritus); MA, 1950, University of Washington; costume design.
Dahlstrom, Robert A. * 1971; MA, 1967, University of Illinois; scene design.
Haaga, Agnes M. 1947, (Emeritus); MA, 1952, Northwestern University; child drama.
Hostetter, Paul S. * 1974, (Emeritus); PhD, 1965, Louisiana State University; theatre history, directing.
Loper, Robert B. * 1967, (Emeritus); PhD, 1957, University of Birmingham (UK); acting, directing.
Siks, Geraldine B. 1950, (Emeritus); MA, 1940, Northwestern University; child drama.
Sydow, John D. 1970, (Emeritus); MFA, 1950, Yale University; directing.
Witham, Barry B. * 1980; PhD, 1968, Ohio State University; theatre history.

Associate Professors
Forrester, William D. * 1972; MFA, 1969, Yale University; scene design.
Gates, Sarah N. * 1983; MFA, 1983, Boston University; costume design.
Lorenzen, Richard L. * 1970; PhD, 1968, Ohio State University; theatre history.
Lounsberry, Warren C. 1948, (Emeritus); MA, 1953, University of Washington; technical direction.
Valentiniti, Aurora * 1943, (Emeritus); MA, 1949, University of Washington; puppetry.

Assistant Professors
Bryant-Bertail, Sarah * 1990; PhD, 1986, University of Minnesota; dramatic criticism, semiotics, feminist theatre.
Geiger, Mary L. * 1993; MFA, 1985, Yale University; lighting design.
Hunt, Robyn * 1988; MFA, 1978, University of California (San Diego); actor training, cross cultural performances, techniques, and script writing.
Quinn, Michael L. * 1989; PhD, 1987, Stanford University; theater theory and criticism, especially semiotic theory and performance analysis.
Wolcott, John R. * 1967; PhD, 1967, Ohio State University; theatre history.

Senior Lecturer

Lecturers
Hansen, Corey A. * 1992; MFA, 1985, University of California (San Diego); acting through movement and voice, Suzuki method of actor training.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

DRAMA 101 Introduction to the Theatre (5) VLPA Qin The theatre as an art form with emphasis on the play in production. The role of the various theatre artists: actors, directors, designers, and playwrights. Required attendance at one or more performances. Lecture and discussion groups. For nonmajors. Offered: A,W,Sp.

DRAMA 102 Text and Performance (5) VLPA Play analysis for the theatre. Dramatic text as scenario for production. A consideration of how theatre practitioners use text as a source of inspiration for acting, directing, and design. The relationship between dramatic forms and theatrical production illustrated through film and study of historic productions.

DRAMA 201 Dynamic Action (5) VLPA Play structure through analysis of one-act plays in all genres, with special attention to plotting and the various means used to achieve a unity of action as the basis of all drama.

DRAMA 210, 211, 212 Theatre Technical Practice (4,4,4) VLPA Gates, Geiger. Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. 210: technical procedures; 211: costumes; 212: stage lighting.

DRAMA 250 Acting Skills for Everyday Life (4) VLPA Introduction to acting techniques as tools for nonactors. Effective communication, relaxation, and stress reduction. Role playing, goal identification and achievement in public speaking, marketing presentations, courtroom persuasion, teaching situations. Skill development through theatre games, role playing, improvisation.

DRAMA 259 Performance Practicum (2-6, max. 12) VLPA Special work in various aspects of performance technique.

DRAMA 290, 291, 292 Theatre Technical Practice Laboratory (1-3, 1-3, 1-3) VLPA Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Prerequisites: 210 for 290 or concurrent registration; 211 for 291 or concurrent registration; 212 for 292 or concurrent registration.

DRAMA 298 Theatre Production (1-2, max. 9) VLPA Laboratory course for students participating in School of Drama minor productions and projects. Credit/no credit only. Prerequisite: being cast in a production or receiving a crew assignment. Offered: AWSp.

DRAMA 302 Play Analysis (5) VLPA Bryant-Bertail, Quinn. Analyses of plays, based on leading critical traditions. Illustrates variety of approaches to a play, criteria for choosing best approach for a given play, and ways in which criticism aids in understanding dramatic effect, for both reader and practitioner. Prerequisite: some theatre background. Offered: ASp.

DRAMA 305 Computers in the Theatre (5) VLPA Wolcott. Computing and information systems as problem solving tools for the theatre. Analysis of problems in theatre production and scholarship, with approaches to solutions through computing. Database, spreadsheet and CAD system applications in the practice and study of lighting and scenic design, theatre management, and research in theatre history and criticism. Offered: A.

DRAMA 312 Lighting Technology (3) VLPA Student functions as master electrician for one production during the quarter.

DRAMA 313 Scenery Construction (3) VLPA Survey of materials, processes, and equipment in the fabrication, assembly, painting, rigging, and installation of stage scenery and properties. Prerequisite: 210 or permission of instructor.

DRAMA 314 Introduction to Design for the Performing Arts (3) VLPA Survey of the role of design (scenery, costume, lighting, and sound) in the contemporary performing arts. Consideration of communication and limitations of each of the design areas. Prerequisites: 210, 211, 212.

DRAMA 316 Theatrical Makeup (2) VLPA Basic principles, with intensive practice in application of makeup for use on proscenium and arena stages. Open to nonmajors.

DRAMA 371 Theatre and Society (5) VLPA/I&S Introduction to the history of the theatre from the Greeks to the present day. Development of the theatre
DRAMA 372 Actors, Scenes, and Machines (5) VLPA Examinations past and present productions of plays, musicals, operas, and related performances to understand the relationship between the performer, the playhouse, and scenic spectacle. Readings include selected plays and theoretical works. Prerequisite: 302 and 371.

DRAMA 373 Women In Theatre (5) VLPA Bryant-Bertail Examinations both the inclusion and exclusion of women by the cultural practice of theatre. Has two primary aims: to provide an historical overview of women to playwriting, acting, directing and criticism, and to apply contemporary social issues to the prac- tice, texts, and criticism of the stage. Prerequisite: 302 and 371.

DRAMA 374 History of the Greek Theatre and Its Drama (5) VLPA Wocott Examination of the relationship of the physical theatre and the productions that took place within that theatre, with particular emphasis on the text performed, styles of acting, scenic elements, and the critical theories that influenced the theatre of the period. Prerequisite: 302 and 371.

DRAMA 377 History of the European Renaissance Theatre and Its Drama (5) VLPA See 374 for course description. Prerequisite: 302 and 371.

DRAMA 378 History of the English Theatre and Its Drama: 1500-1700 (5) VLPA See 374 for course description. Prerequisite: 302 and 371.

DRAMA 391 Beginning Technical Practices (1-3, max. 9) VLPA Laboratory course involving specific production assignments, either in-shop or in-theatre, or both. Prerequisites: 290, 291, 292 or receiving a production assignment.

DRAMA 395 Creative Classroom Computing (5) VLPA Wocott Innovative uses of computers in the classroom. Survey of learning styles and teaching strategies, and ways to use the computer as a non-traditional teaching tool. Students develop short course software demonstrations responsive to instructional needs in their individual disciplines. Teaching and computing experience helpful, but not required.

DRAMA 401 Drama Colloquium (0-0-1, max. 3) VLPA Weekly lectures by guest artists, presentations by faculty or students of works in progress. Required of all undergraduate and graduate drama majors each quarter in residence. Offered: AWSp.

DRAMA 410 Advanced Theatre Technical Practices (2-4, max. 20) VLPA Production-related apprenticeship, in the areas of scene construction, scenic painting, costume, or lighting. Prerequisites: 210, 211, 212, 416, or permission of instructor. Offered: AWSp.

DRAMA 413 Advanced Scene Construction (3) VLPA Special problems in scene construction materials and rigging. Prerequisites: 210, 212, 290, 292, 410 or equivalent practical experience, and 420.

DRAMA 414 Scene Design (3, max. 6) VLPA Dahlstrom, Forrester Theory, practice, and rendering of scene designs. Repeat of course involves intermediate designs and models. Prerequisites: 210, ART H 203, or equivalent.

DRAMA 415 Stage Costume Design (3, max. 6) VLPA Gates Theory, practice, and rendering of costume designs for the theatre. Repeat of course involves intermediate designs. Prerequisites: 211, ART 109 and ART H 203 or equivalent or permission of instructor; 416 for repeat of course.

DRAMA 416 History of Western Dress (5) VLPA Gates Survey history of Western dress. Emphasis on use of this information by theatrical costume designers. Includes development of costume for drama, ballet, and opera. Recommended: 371, 372, or background in history, or permission of instructor.

DRAMA 417 Stage Costume Patterning and Construction (3, max. 6) VLPA Techniques of costume construction, based on the study of fabrics, with emphasis on creating patterns by draping. Prerequisites: 211, 416, or permission of instructor.

DRAMA 418 Scene Painting (3, max. 6) VLPA Forrester Lecture-laboratory with focus on techniques and principles of scene painting. Uses of varied media and types of equipment as applicable to varied scenic pieces. Prerequisite: 210 or permission of instructor.

DRAMA 419 Advanced Stage Lighting Design (3, max. 9) VLPA Geiger Development of a working process consistent with current professional practice. Includes drafting, worksheets, study of color. Students read plays and develop analytical skills. Prerequisite: senior standing and permission of instructor.

DRAMA 420 Design and Technical Drafting (2, max. 4) VLPA Laboratory and project critique covering stage design graphics and technical drafting; specifically: designer's elevations, ground plans, sections, detail drawing, transposition of design drawing information to technical drawings. Prerequisite: 210.

DRAMA 421 Drawing and Rendering Techniques for the Theatre (2, max. 4) VLPA Forrester, Gates, Walker Weekly figure-drawing laboratories with live model and weekly field trips for laboratories in drawing natural phenomena and architectural detail. Studies in historical drawing styles. Practice in use of several media and techniques of expression. Prerequisites: 210, 211.

DRAMA 441 Beginning Playwriting (5, max. 10) VLPA Comito Writing exercises and drafts of one-act plays. Provide first experience in writing for performance. Readings of representative one-act plays introduce genres and writing styles. Prerequisites: 253 or 353, 210, 211, 212, or practical theatre experience.

DRAMA 442 Intermediate Playwriting (5, max. 10) VLPA Two one-act plays written for rehearsed reading. Readings of selected one-act plays address specific problems of playwright's craft. Prerequisite: 441 or practical theatre experience.

DRAMA 450 Rehearsal Laboratory (2, max. 6) VLPA Acting in projects directed by graduate directing students. Prerequisite: one year of acting and audit.

DRAMA 454 Projects In Acting (3, max. 9) VLPA Rehearsal and classroom performance of dramatic literature of various periods and styles. Prerequisite: audition.

DRAMA 460 Introduction to Directing (3) VLPA Walker Student is introduced to the art of the stage director. Prerequisites: 302; 253 or 353; 210, 211, 212, and permission of instructor. Offered: A.

DRAMA 461, 462 Elementary Directing (3, max. 6) VLPA Walker Elementary study of the art of the stage director. Prerequisites: 460 and permission of instructor for 461; 461 and permission of instructor for 462.

DRAMA 466 Stage Management (2-5, max. 15) VLPA Study and practice of stage management. Prerequisites: 211, 212, 290, 292, or permission of instructor.

DRAMA 472 History of the English Theatre and Its Drama: 1700-1900 (5) VLPA Witham Examination of the relationship of the physical theatre and the productions that took place within that theatre. Particular emphasis on the text performed, styles of acting, scenic elements, and the critical theories that influenced the theatre of the period. Prerequisite: 302 and 371.

DRAMA 473 Modern European Theatre and Drama (5) VLPA Witham See 472 for course description. Prerequisite: 302 and 371.

DRAMA 475 Modern English Theatre and Drama (5) VLPA Witham Major trends in contemporary English theatre, post-World War II to the present. Performers, dramatists, and designers who shaped the course of the theatre following the "angry young rebellion" of the 1950s. Prerequisite: 302 and 371.

DRAMA 476 Modern American Theatre and Drama (5) VLPA Witham Major forces shaping modern American theatre, Eugene O'Neill to the present. Leading dramatists, directors, and designers of the post-World War II era. Experiments such as the federal theatre project, group theatre, and living theatre. Prerequisite: 302 and 371.

DRAMA 490 Special Studies In Acting-Directing (1-8) VLPA Prerequisite: permission of instructor.

DRAMA 491 Special Studies In Design-Technica (1-8) VLPA Prerequisite: permission of instructor.

DRAMA 492 Special Studies In Children's Drama (1-8) VLPA Prerequisite: permission of instructor.

DRAMA 494 Special Studies In Theatre and Drama (5, max. 20) VLPA Bryant-Bertail, Quinn, Witham Wocott Topics in drama, history, and criticism. See Time Schedule for specific topic. Prerequisites: 301, 473, 476, or permission of instructor.

DRAMA 495 Practicum In Design and Technical Theatre (2-4, max. 10) VLPA Emphasis on developing design and technology problem-solving skills through laboratory and project evaluation. Prerequisites: 210, 211, 212, 313, or permission of instructor.

DRAMA 496 Stage Costume Problems (2, max. 5) VLPA Specific research problems of stage costume design and execution: accessories, masks, wigs, felt production modification, millinery or construction analysis of specialized costumes. Topics vary. Prerequisites: 214, 416, and permission of instructor.

DRAMA 497 Theatre Organization and Management (3) VLPA Theoretical and practical examination of the professional theatre organization and management: legal structures, funding, business practices, and operational procedures. Open to non-majors.

DRAMA 498 Theatre Production (1-2, max. 9) VLPA Laboratory course for students participating in School of Drama major productions. Credit/no credit only. Prerequisite: being cast in a production or receiving a crew assignment. Offered: AWSp.

DRAMA 499 Undergraduate Research (1-5, max. 15) VLPA Permission of instructor.

Courses for Graduates Only

DRAMA 502 Director-Designer Analysis (4) Dahlstrom, Walker Methods of examining plays to make the collaboration of director and designer productive. Attempts to create a structural whole from visual and verbal approaches to analysis. Prerequisite graduate standing in drama.

DRAMA 510 Design Studio (3, max. 19) Dahlstrom, Forrester, Gates, Geiger Investigation of space, form, light, texture, and color in total theatre design, stressing mastery of the media, methods of presentation and execution, and intelligent and appropriate visual reaction to a dramatic text. Prerequisites: graduate standing.

DRAMA 512 Lighting Design Seminar (1/4, max. 18) Geiger Forum for graduate lighting students to further explore the art of lighting design. Assignments include paper projects, School of Drama production, and field trips to local theatres. Prerequisites: graduate standing.

DRAMA 513 Technical Direction (3, max. 9) Practice in mounting scenery for a current production; study of materials, techniques, management, and equipment of technical theatre; theatre plan-
DRAMA 514 Design and Technical Theatre Colloquium (2, max. 18) Discussion of work in progress or completed in production, centering on the conceptual work of the designer/director on the production and the methods of execution in the shops and on stage. Offered: AWSp.

DRAMA 515 Structures Analysis for the Theatre (3) Principles of engineering statics as applied to scenery construction problems.

DRAMA 516 Stage Rigging (3) Theory and practice of hemp, counterweight, and motorized rigging systems for the stage.

DRAMA 518, 519 Studies In Historic Design (3,3) Jahlstrom, Forrest, Gates Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods. Prerequisite: 518 for 519, or permission of instructor.

DRAMA 520 Advanced Theatre Practicum (1-5, max. 15) Professional student internship with professional theatres: scenery, lighting, scene painting, costume, acting, directing, stage management, theatre management. Prerequisite: permission of instructor.

DRAMA 541 Graduate Playwriting Seminar I (3-6, max. 18) Workshop for development of new plays. Lay writers develop one-act and full-length plays, which continue through rewriting until ready for public reading. Readings of representative contemporary full-length plays address specific problems of playwright's craft.

DRAMA 542 Graduate Playwriting Seminar II (3-6, max. 18) Continuation of play development through classroom critique, rehearsed readings, and twenty-four rehearsal workshop productions. Readings address more complex craft problems. Regular rewriting for each student's work.

DRAMA 551, 552, 553 Teaching of Acting (3,3,3) Seminar discussion on problems in teaching acting to undergraduate students. Prerequisites: permission of instructor and being a teaching assistant in acting.

DRAMA 555 Special Problems In Acting (6, max. 18) Hansen, Pearson, Shahn Audition techniques, style problems, popular entertainment techniques. Prerequisite: completion of the second year of the Professional Actor Training Program.

DRAMA 557 Studio I (12, max. 36) VLPA Hansen, Pearson, Shahn Fundamentals of acting, voice, speech, and movement necessary for professional training in acting. Prerequisite: admission to the Professional Actor Training Program. Offered: AWSp.

DRAMA 558 Studio II (12, max. 36) VLPA Hansen, Pearson, Shahn Continuation of 457. Prerequisites: completion of the first year of the Professional Actor Training Program. Offered: AWSp.

DRAMA 559 Studio III (6, max. 18) VLPA Hansen, Pearson, Shahn Specialized and individualized work relating to the main curriculum of the third year of the Professional Actor Training Program. Prerequisites: 458 and completion of the second year of the Professional Actor Training Program. Offered: AWSp.

DRAMA 560 Directing Apprenticeship (4, max. 12) Student works in close association with faculty and visiting directors for the entire rehearsal period in major productions of the School of Drama. Prerequisites: admission to the graduate directing program and permission of the instructor. Credit/no credit only.

DRAMA 561 Directing Projects (3-5, max. 24) Walker Directing practicum. One-act plays, scenes, or acts from full-length plays. Contemporary, experimental American and European drama. Prerequisite: graduate standing in the directing program.

DRAMA 563 Seminar In Directing (5, max. 27) Walker Seminar discussion of current productions; focused readings and discussion in specific areas of dramatic literature and problems related to stage design. Prerequisites: graduate standing in drama and permission of instructor.

DRAMA 564 Advanced Directing-Rehearsal (2, max. 6) Walker Rehearsal techniques that can be used in defining style in a variety of contemporary and historical plays. Prerequisite: completion of first year of graduate directing program.

DRAMA 571, 572, 573 Problems In Theatre History Research (5,5,5) Witham, Wolcott Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

DRAMA 575, 576, 577 Seminar In Theatre History (5,5,5) Witham, Wolcott Specific topics in theatre history, examining the drama of various national, linguistic, and religious culture in detail.

DRAMA 581, 582, 583 Analysis of Dramatic Texts (5,5,5) Bryant-Bertail, Quinn Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

DRAMA 585, 586, 587 Seminar In Dramatic Theory (5,5,5) Bryant-Bertail, Quinn Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

DRAMA 599 Advanced Studies In Theatre Arts (1-5, max. 10) Independent projects or group study of specialized aspects of theatre arts. Prerequisites: permission of instructor.

DRAMA 600 Independent Study or Research (*)

DRAMA 700 Master's Thesis (*)

Economics

302 Savery
The Department of Economics is concerned with the analysis of the ways in which societies organize the production of goods and services and the distribution of these among groups and individuals. Applied fields of study available to the student include: money and banking, industrial organization, natural resource economics, labor economics, public finance, economic history, comparative systems and development, international trade, and econometrics.

Undergraduate Program

Director of Undergraduate Studies
Michelle Turnovsky
229 Savery
Advisers
304 Savery
Bachelor of Arts Degree

Admission Requirements: (1) A minimum of 45 transferable credits, including ECON 200, 201, 311 (or STAT 311), MATH 124 (or MATH 112), and one 5 credit course in English composition; (2) a cumulative GPA for all prior college work of at least 2.80; (3) GPA for the five courses required for entrance must be at least 2.80 with a minimum of 2.0 for each course (students who have repeated any of these five courses starting winter quarter 1983 must include both grades in the average); (4) transfer students must be enrolled at the UW before they may apply.

Major Requirements: (1) Admission to the major; (2) a minimum of 50 credits in economics, including ECON 200, 201, 300, 301, 311 (or STAT 311), and at least five other upper-division courses in economics, at the 400 level, excluding ECON 496, 497, and 499; (3) grades of 2.0 or better in ECON 300 and 301; (4) one calculus course (MATH 124, 134, 112, or equivalent); (5) transfer students are required to complete a minimum of 25 upper-division economics credits in residence at the UW.

The department offers two certificates for students interested in specializing in International Economics or in Economic Theory and Quantitative Methods. Students who wish to pursue these certificates should consult with an economics adviser. The department also offers an honors curriculum for students participating in the University Honors Program and for students invited by the department to pursue departmental honors.

Graduate Program

Anil Deolalikar, Director of Graduate Studies

The department offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. The academic programs in economics are designed to develop trained economists for a variety of stimulating careers in teaching, in private industry, in government, and with international agencies at home and abroad. Frequently seminars—led by distinguished visitors from around the United States and from abroad, as well as by resident faculty and students—are conducted as an integral part of the department's broad agenda.

Special Requirements

Students need not have a full economics major as an undergraduate in order to apply, but should have taken intermediate-level courses in microeconomics and macroeconomics. Applicants should also have taken at least one year of calculus, one term of linear algebra, and one term of statistics. Applicants are required to take the Graduate Record Examination General Test and are encouraged to take the Subject Test in Economics.

Graduate requirements for the M.A. degree include ECON 500, 501, 502, 503, 508, 580, 581, and 582. In addition to this core program, M.A. students must take at least seven elective courses in economics at the graduate level. At least two of these courses must be in the same area (the field of specialization), and at least three of the courses must be in applied areas. M.A. students also must complete 6 credits of a supervised internship. Well-prepared students should be able to complete the M.A. program in two years.

Graduate requirements for the Ph.D. degree include ECON 500, 501, 502, 503, 508, 580, 580, 581, and 582. Ph.D. students are required to pass core examinations in microeconomics and macroeconomics. In addition to this core program, Ph.D. students must take eight other courses in economics at the graduate level. Each Ph.D. student must satisfy the requirements for two fields of specialization. The fields of specialization include advanced microeconomic theory, advanced microeconomic theory, comparative systems and development, econometrics, industrial organization, international trade, labor economics, natural resource economics, and public finance.

Doctoral students must complete a doctoral dissertation. A foreign language requirement is not applicable. A student with the recommended background can complete the doctoral program in four years, but most students take about five years.
Financial Aid
A number of teaching assistantships are awarded each year to incoming and continuing graduate students.

Research Facilities
The Institute for Economic Research provides support for graduate student and faculty research. The Center for Social Science Computation and Research maintains an extensive set of computer programs specifically designed for economic research.

Professors
Barzel, Yoram * 1941; PhD, 1961, University of Chicago; price theory.
Brown, Gardner * 1965; PhD, 1964, University of California (Berkeley): resource economics.
Bruce, Neil * 1990; PhD, 1975, University of Chicago; public finance (economics of the public sector) especially taxation.
Cartwright, Philip W. * 1947, (Emeritus); PhD, 1950, Stanford University; macroeconomics, state and local fiscal policy.
Crutchfield, James A. * 1960, (Emeritus); PhD, 1954, University of California (Berkeley); natural resources economics, policy and management, especially marine and environmental resources.
Gillingham, John B. 1947, (Emeritus); MA, 1941, University of Wisconsin; economics.
Halvorsen, Robert F. * 1972; PhD, 1973, Harvard University; natural resources, public finance.
Hartman, Richard C. * 1971; PhD, 1971, University of California (Berkeley); economic theory.
Lardy, Nicholas R. 1983, (Adjunct); PhD, 1975, University of Michigan; international economics and Chinese economic development and trade.
Madden, Carolyn Watts * 1975, (Adjunct); PhD, 1976, Johns Hopkins University; health economics and policy.
Mah, Feng-Hwa * 1961, (Emeritus); PhD, 1969, University of Michigan; Chinese economic and foreign trade.
McCaffrey, Kenneth M. * 1949, (Emeritus); PhD, 1950, University of Chicago; labor economics and the economics of medicine.
McGee, John S. * 1966, (Emeritus); PhD, 1952, Vanderbilt University; industrial organization.
Morris, Morris D. 1949, (Emeritus); PhD, 1954, University of California (Berkeley); economic history and the economy of India.
Nelson, Charles R. * 1975; PhD, 1969, University of Wisconsin; time series analysis, economic statistical analysis, advanced macroeconomic theory.
North, Douglas C. 1950, (Emeritus); PhD, 1952, University of California (Berkeley); economic history.
Parks, Richard * 1970; PhD, 1966, University of California (Berkeley); econometrics.
Peltzman, Robert D. * 1984, (Adjunct); PhD, 1976, University of California (Berkeley); economics of poverty, labor and social welfare policy.
Pollak, Robert A. * 1988; PhD, 1964, Massachusetts Institute of Technology; household behavior, including demand analysis and intra-household allocation, formal demography.
Sjoberg, Eugene * 1967; PhD, 1964, Purdue University; price theory.
Starz, Richard * 1984; PhD, 1978, Massachusetts Institute of Technology; macroeconomics, econometrics, banking.
Thorton, Judith Ann * 1961; PhD, 1966, Radcliffe College; comparative systems, Soviet economics.
Turnovsky, Stephen J. * 1987; PhD, 1969, Harvard University; macro and monetary economics; international economics; theory of economic stabilization.
Worcester, Dean A. * 1969, (Emeritus); PhD, 1943, University of Minnesota; comparative systems, policy related to income distribution.
Yamamura, Kozo * 1972, (Adjunct); PhD, 1964, Northwestern University; economic development and economic history of Japan, comparative economic history.

Associate Professors
Deolekar, Anil B. * 1989; PhD, 1981, Stanford University; economic development, economics of human capital, economics of population, technology transfer.
Engel, Charles M. * 1991; PhD, 1983, University of California (Berkeley); international monetary economics.
Hadjinichalas, Michael * 1969; PhD, 1969, University of Rochester; monetary theory and policy, macroeconomics, growth.
Huppert, Daniel D. * 1987; (Adjunct); PhD, 1975, University of Washington; economics and management of natural resources, especially marine fisheries.
Kochin, Levin A. * 1972; PhD, 1975, University of Chicago; macroeconomics, industrial organization.
Leffler, Keith B. * 1978; PhD, 1977, University of California (Los Angeles); industrial organization, microeconomics.
Lundberg, Shelly J. * 1984; PhD, 1981, Northwestern University; labor economics.
Rao, Polituri M. * 1973; PhD, 1969, University of Chicago; econometrics, statistics.
Thomas, Robert P. * 1966; PhD, 1964, Northwestern University; economic history.
Wong, Kar-Yiu * 1983; PhD, 1983, Columbia University; international trade and commercial policy.

Assistant Professors
Brock, Philip L. * 1991; PhD, 1982, Stanford University; economic liberalization with emphasis on financial markets and capital accumulation.
Eicher, Theo S. 1994; PhD, 1994, Columbia University; international trade, development and growth, macroeconomics.
Ellis, Gregory M. * 1988; PhD, 1992, University of California (Berkeley); environmental economics, economics of natural resources, industrial organization.
Khali, Fahad A. * 1991; PhD, 1991, Virginia Polytechnic Institute & State University; information economics and the theory of contracts.
Lawarree, Jacques P. * 1990; PhD, 1990, University of California (Berkeley); industrial organization, contract theory.
Rose, Elaina 1993; PhD, 1993, University of Pennsylvania; labor, development, applied microeconomics.
Zivot, Eric W. * 1993; PhD, 1992, Yale University; time series, econometrics, applied macroeconomics, empirical finance.

Senior Lecturers
Heyne, Paul Theodore * 1976; PhD, 1965, University of Chicago; evolution of economic theory and commercial society.
Saheli-Esfahani, Haidah 1990; PhD, 1985, University of Pennsylvania; international economics, economic development.
Turnovsky, Michelle L. H. 1987; PhD, 1978, Australian National University; microeconomics, international and environmental economics, industrial organization.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
ECON 100 Principles of Economics I&S, QSR Fundamental concepts of economic analysis with application to contemporary problems. Cannot be taken for credit if 200 or 201 previously taken.
ECON 200 Introduction to Macroeconomics I&S, QSR Analysis of markets: consumer demand, production, exchange, the price system, resource allocation, government intervention. Recommended: 1 1/2 years of high school algebra and passing score on placement test for MATH 111, or equivalent. Offered: AWSPs.
ECON 201 Introduction to Macroeconomics I&S, QSR Analysis of the aggregate economy: national income, inflation, business fluctuations, unemployment, monetary system, federal budget, international trade and finance. Prerequisite: 200. Recommended: 1 1/2 years of high school algebra and passing score on placement test for MATH 111 or equivalent. Offered: AWSPs.
ECON 299 Study Abroad: Economics (5, max. 10) I&S For participants in the Study Abroad program. Specific course content determined by assigned faculty member and announced in Study Abroad bulletins.
ECON 300 Intermediate Microeconomics I&S Analysis of decisions by individuals and by firms and of outcomes in factor and product markets. Prerequisites: 200 and MATH 112 or 124, or equivalent. Offered: AWSPs.
ECON 301 Intermediate Macroeconomics I&S Analysis of the determinants of the aggregate level of employment, output, prices, and income of an economy. Prerequisites: 201 and 300. Offered: AWSPs.
ECON 311 Introduction to Economic Statistics I&S NW, QSR Statistical concepts and their application in economics. Students may receive credit for only one of 311 and STAT 220, 301, 311. Prerequisites: 200, MATH 111 or 120.
ECON 316 Urban Economics I&S Application of economic analysis to urban trends, problems, and prescriptions, such as changing urban form and function, urban public finance, housing and renewal, poverty and race, transportation, and environmental problems. Prerequisite: 200 or equivalent. Offered: jointly with GEOG 316.
ECON 340 Labor Economics I&S Introduction to analysis of labor markets; factors determining size and composition of labor force, demand for labor services, job search and unemployment, wage differences including discrimination, impact of labor unions on wages and resource allocations. Analysis of public policy. Cannot be taken for credit if 443 or 444 previously taken. Prerequisites: 200, 201.
ECON 346 Economics of Health Care I&S Economic analysis of the health-care sector of economy: organization, demand and supply factors, pricing practices, financing mechanisms-public versus private, impact of third party, insurance and prepayment, health and economic development. Prerequisite: 200 or equivalent.
ECON 347 Introduction to Population and Economic Dynamics I&S Relationship between popu-
and Japan, and developing countries since

System (5) I&S Explanation and evaluation

micro- factors

pre- crite.

regulation.

discrimination.

Rights

War economic conditions and the
distribution

Reforms—Integration of organizations. Prerequi-

theories of desired market performance. Observed
economics

theories.

Prerequisite: 401.

Applied to the

I&S

463 Microeconomics

politics

post-1945 Local

economics of

un-

intended to regulate busi-

environmental

Prerequisite: 200.

ECON 472 International Macroeconomics (5) I&S Theory of international trade. The problem of social cost, policy instrument choice, enforcement of regulations, methods for damage assessment, and estimating benefits of environmental improvement. Prerequisite: 300 or instructor permission.

ECON 444 Topics in Labor Market Analysis (5) I&S Determinants of employment and incomes in the United States: analysis of individual and firm decisions and of equilibrium in the labor market. Topics include decisions to work and retire, education and occupation choices, compensation, discrimination, poverty, unemployment and unions. Examination of policy issues affecting the labor market. Prerequisite: 300.

ECON 444 Topics in Labor Market Analysis (5) I&S In-depth analysis of special topics in the operation of labor markets and public policies affecting incomes and employment. Course content varies by instructor. Prerequisite: 300.

ECON 445 Income Distribution and Public Policy (5) I&S Income distribution implications and economic effects of public policies toward unemployment, illness, industrial accidents, old age, poverty, and age, sex, or race discrimination. Prerequisites: 200, 201.

ECON 452 Economic Theory as Applied to the Political System (5) I&S Explanation and evaluation of political system, using elementary economics theory. Alternative voting rules, political effectiveness of wealth distribution and consequences of logrolling, and bureaucratic organizations. Prerequisites: 200 or equivalent. Offered: jointly with POL S 416.

ECON 453 State and Local Public Finance (5) I&S Analysis of Washington state taxes. Considers equity and efficiency in recent tax changes. Examines major

budgeted Washington state programs to determine beneficiaries, who bears the costs, and the income transfers associated with these programs. Prerequisite: 300 or equivalent.

ECON 454 Cost-Benefit Analysis (5) I&S Theory and practice of cost-benefit analysis of public sector projects and policies. Welfare criteria, investment criteria, shadow prices, social discount rate, marginal-willingness-to-pay for non-market goods, social risk, and special topics. Prerequisite: 300.

ECON 460 Economic History of Europe (5) I&S Origins of the modern European economy; historical analysis of economic change and growth from medi-

ev.il times that stresses the preconditions and conse-

quences of industrialization. Recommended: 200, 201. Offered: jointly with HST 481.

ECON 462 Economic History of the United States to the Civil War (5) I&S Systematic study of the changing pre-Civil War economic conditions and the consequences of these changes for the American society. Prerequisites: 200, 201, or equivalent.

ECON 463 Economic History of the United States From the Civil War to the Present (5) I&S Systematic study of the changing economic conditions since the Civil War and the consequences of these changes for the American society. Prerequisites: 200, 201, or equivalent.

ECON 468 China's Economic Reforms—Integra-

tion Into World Economy (5) I&S Systematic survey of China's economic reforms since 1978, including China's increasing integration into the world economy. Prerequisite: 466 or 490 or permission of instructor. Offered: jointly with SISEA 468.

ECON 471 International Trade (5) I&S Theory of comparative advantage and different models of international trade. Trade and welfare; the theory and prac-
tice of commercial policy. Economic integration. Factor mobility and trade flows. The North-South debate. Prerequisites: 300, 301.

ECON 472 International Macroeconomics (5) I&S Monetary problems in international trade and macro-
economics of the open economy. Features of different exchange-rate systems and their adjustment mecha-
nisms. Money and international capital movements. Policies for internal and external balance. Prerequi-
sites: 300, 301.

ECON 475 Economics of the European Union (5) I&S Analysis of economic issues relating to the Euro-

pean Union. Explores the institutional aspects, the attempt to coordinate social and economic policy—welfare, employment, commercial, fiscal, and mon-
ey—and the economic linkages between the Euro-

pean Union and the rest of the world. Prerequisites: 300 and 301.

ECON 481 Introduction to Mathematical Statistics (5) NW Probability, generating functions, method, Jacobsian, Bayes theorem, maximum likelihoods, Neyman-Pearson efficiency, decision theory, regres-
sion, correlation, bivariate normal. Students receiving credit for either STAT 341 or 390 may not receive credit for 481. Prerequisites: 311, STAT 311, or equivalent; MATH 124, 125, 126; and a course in linear algebra,
Courses for Graduates Only

ECON 500 Microeconomic Analysis I (4) Consumer demand, cost, and supply and the theory of markets. Prerequisite: 300, or permission of instructor.

ECON 501 Microeconomic Analysis II (4) Consumers and consumption; firms and production; general equilibrium; welfare economics; social choice. Prerequisite: 500.

ECON 502 Macroeconomic Analysis I (4) Theories of income, employment, and output; economic growth. Prerequisites: 300 and 301; or permission of instructor.

ECON 504 Economic History and Economic Development (3) Analysis of determinants of long-run development, emphasizing institutional, demographic, and technological changes; consideration of both theoretical and empirical studies. Prerequisite: 300 or equivalent.

ECON 505 Microeconomic Theory: Problems and Applications (3) Seminar for graduate students who have completed the basic core sequence in price theory. Designed to extend the student’s analytic and problem-solving abilities by working through a programmed set of readings and problems. The material includes both formal analytical techniques and applications of economic theory. Prerequisite: 501.

ECON 507 History of Economic Thought (3) Classical and neoclassical economics with emphasis on alternative conceptions of the nature and significance of economic science.

ECON 508 Microeconomic Analysis III (4) The role of time and uncertainty in microeconomic analysis. Prerequisites: 500, 501.

ECON 509 Macroeconomics III (4) Modern macroeconomic research models. Prerequisite: 503.

ECON 511 Advanced Microeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced microeconomics. Selected topics of special interest and significance. Prerequisites: 500, 501.

ECON 512 Advanced Macroeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced macroeconomics. Selected topics of special interest and significance.

ECON 514 General Equilibrium Analysis (3) Study of the existence, uniqueness, and stability of general equilibrium models under the assumptions of competition. Emphasis is on recent developments in the literature with consideration given to both positive and normative economics.

ECON 515 Special Topics in Mathematical Economics (3, max. 12)

ECON 516 Introduction to Noncooperative Game Theory (3) Study of both pure game theory and its applications to such problems as oligopoly pricing, non-cooperative bargaining, entry deterrence, reputation phenomena. Focus on game theory as a modeling tool as opposed to a body of known results. Prerequisite: 508.

ECON 520 The Economics of Property Rights (3) Application of standard economic theory to analyze various forms of property rights as constraints of competition; the costs associated with delineation and enforcement of rights; the costs of negotiating and enforcing contracts for right transfer; resource allocation and income distribution implied by different property right and transaction cost constraints. Prerequisites: 500 and 501, or permission of instructor.

ECON 530 Government Regulation of Business (3) Public policy in the United States with respect to industrial organization and business conduct. Economic issues in antitrust policy emphasized. Prerequisites: 500, 501.

ECON 531 Theory of Industrial Organization I (3) Analysis of the monopolist’s problem in different choice variables. Topics include the theory of the firm; pricing; choice of quality and advertising; price discrimination; and vertical control. Prerequisites: 500, 501.

ECON 532 Theory of Industrial Organization II (3) The application of game theory to problems of strategic behavior. Emphasis is on the study of industrial organization. Topics include vertical integration, short- and long-run price competition, folk theorems, empirical tests of oligopoly pricing models, entry deterrence, research and development, and product differentiation. Prerequisites: 500, 501.

ECON 533 Economic Theory of Regulation (3) Incentive mechanisms and rate designs for promoting optimal production and pricing from natural monopolies. Role of asymmetric information, auditing, and monitoring is emphasized. Competing theories of regulatory behavior examined. Prerequisites: 500, 501.

ECON 535 Economics of Natural Resources I (3) First half of integrated two-course sequence. Dynamic optimization. Renewable resources, including fisheries and forests. Valuation of environmental amenities. Prerequisites: 500, 501, or permission of instructor.

ECON 536 Economics of Natural Resources II (3) Second half of integrated two-course sequence. Non-renewable resource extraction and exploration, including effects of market structure, uncertainty, and taxation. Externalities, property rights, and pollution-control policies. Prerequisite: 535.

ECON 537 Economic Aspects of Marine Policy I (3) Development of pertinent economic concepts and their application to selected topics in marine policy decision making. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with SMA 537.

ECON 538 Economic Aspects of Marine Policy II (3) Development of pertinent economic concepts and their application to selected topics in marine policy. Prerequisite: 537 or permission of instructor. Offered: jointly with SMA 538.

ECON 539 Economics of Natural Resources Seminar III (3) Selected advanced topics in the economics of natural resources and environmental regulation. Topics may include environmental regulation as a problem in optimal mechanism design, adaptive management techniques for renewable resources, dynamical systems, and the market structure issues in the depletion of nonrenewable resources. Prerequisites: 536.

ECON 541, 542 Labor Economics (3, 3) Theoretical and empirical analysis of the labor market. The determinants of labor supply and demand, human capital investment, the pattern of compensation, employment contracts and incentives, unemployment and labor market dynamics.

ECON 543 Population Economics (3) Economic determinants and consequences of population growth; emphasis on formal theoretical models and on empirical analysis. Introduction to formal demography; welfare economics of population change, including analyses of population effects on consumption, savings, investment, and technological change; and determinants of mortality, fertility, and migration. Prerequisites: 500, 501, or permission of instructor.

ECON 546 Health Economics (3) Theoretical and empirical models of the demand for health and health care; supply of health care from physicians and hospitals; government programs that subsidize health care; occupational health; cost-benefit analyses of preventive health care and new medical technologies. Prerequisite:
ECON 547 Advanced Health Economics (3) Selected topics in health economics, including risk and insurance, health care delivery and organization, the market for physician services, and industry regulation. Prerequisite: A course in intermediate microeconomics or permission of instructor. Offered: jointly with HSERV 587.

ECON 548 Economics of Labor and Human Resources (3) Economic analysis of policy-related topics in human resources. Topics include labor demand and supply, education and occupation, wage structures and income inequality, discrimination, and poverty. Not open to economics majors. Offered: jointly with PB AF 548.

ECON 550 Public Finance: Expenditure Policy (3) Theory of public finance with emphasis on public expenditures. Social welfare maximization, public goods and externalities, decreasing cost industries, theory of collective choice, second-best analysis. Prerequisites: 500, 501, or permission of instructor.

ECON 551 Public Finance: Tax Policy (3) Theory of public finance with emphasis on taxation. Second-best analysis, optimal taxation, general equilibrium incidence analysis, issues in personal income taxation and corporate income taxation. Prerequisite: 500, 501, or permission of instructor.

ECON 553 Economic Analysis and Government Programs (3) Applications of economic analysis to public enterprises and programs.

ECON 554 Advanced Cost-Benefit Analysis (3) Techniques of, and theoretical foundation for, cost-benefit analysis as applied to the public sector. Prerequisites: 500, 501, or PB AF 553. Offered: jointly with PB AF 554.

ECON 555 Seminar in Urban Economics (3) Use of economic theory to explain land-use trends, transportation, housing and renewal, the ghetto, and the public economy in urban areas. Prerequisites: 300, 301, or equivalent. Offered: jointly with GEOG 556.

ECON 561 European Economic History (3) Economic growth of the Western world since the decline of the Roman Empire. Prerequisite: 504.

ECON 562 American Economic History (3) Analytical methods; sources and reliability of data; consideration of some major issues in current research. Prerequisites: 500, 501.

ECON 571 International Trade Theory (3) Application of international trade and investment of microeconomics, general equilibrium theory, and welfare economics. Prerequisites: 500, 501.

ECON 572 International Finance (3) Analysis of open economy macro models with emphasis on exchange rates and balance of payments determination. Prerequisites: 502, 503.

ECON 573 International Commercial Policy (3) Analysis of welfare aspects of international trade and factor mobility. Costs and benefits of protection; implications of different government policies. Important competition and response. Prerequisite: 571 or permission of instructor.

ECON 580, 581, 582 Econometrics I, II, III (4, 4, 4) Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: 580 for 581; 581 for 582.

ECON 583 Econometric Theory I (3) Estimation and testing in the classical linear regression model. Extensions of the model and applications to the analysis of economic data. Prerequisites: 580, 581, 582 or equivalent.

ECON 584 Econometric Theory II (3) Continuation of 583. Topics include serial correlation, time series models, dynamic models. Prerequisite: 583.

ECON 585 Topics in Econometric Theory (3) Economic issues that arise in applied microeconomic research. Topics include the use of panel data and models with limited and qualitative dependent variables. Prerequisite: 582 or equivalent.

ECON 590 Theory and Practice of Economic Planning (3) Analysis of incentives for, and methods of, government intervention in socialist and developing countries, with a focus on microeconomic issues.

ECON 591 Theoretical Issues in Economic Development (3) Analysis of issues in economic development with application to the less-developed countries of the world today. Prerequisites: 500, 501, or permission of instructor.

ECON 592 Development Policy (3) Theoretical and empirical analysis of macroeconomic policies pursued by developing countries. Topics include the determination of exchange rates and relative prices in small economies; the examination of government spending, taxation, banking, trade, and labor market policies; and the evaluation of market-oriented economic reform programs. Prerequisites: 503. Recommended: 591.

ECON 595 Analysis of the Transforming Socialist Economies (3) Applications of economic analysis to the economic problems of transforming socialist economies. Economic Institutions. The role of the state. Privatization and the behavior of decentralized organizations. Integration into the world market. Prerequisite: micro- and macroeconomic theory and permission of instructor.

ECON 600 Independent Study or Research (*) Credit/No credit only.

ECON 601 Internship (3-9, max. 9) Credit/no credit only.

ECON 602 Teaching Introductory Economics (1) Examines problems encountered in preparing and presenting courses in introductory economics. Credit/no credit only.

ECON 603 Doctoral Dissertation (*) Credit/no credit only.

English

A101 Padelford

Undergraduate Program

Director, Undergraduate Programs
Malcolm Griffith
A11 Padelford

Advisors
A2B Padelford

The Department of English offers courses in English, American, and related literatures; literary history and criticism; expository and creative writing; and related subjects. Courses in the English curriculum cover a wide range of interests in the study of cultural and intellectual history, pertinent to many vocations and careers, on the premise that a knowledge of language and the necessary scholarship for training in literary criticism and theory, literary history, and English language study, including rhetoric and composition. It is possible to pursue a literature or language study emphasizing the Master of Fine Arts program in creative writing emphasizes projects in imaginative writing, in fiction and poetry, supported by courses in criticism and literary periods and types. A special degree program, the Master of Arts for Teachers, is offered for English teachers in secondary schools and community colleges and a Master of Arts for Teachers (English as a Second Language). The graduate program permits completion of the master's degree requirements in four to six quarters and doctoral degree requirements in five years (including the master's degree). In a typical five-year program, a student is encouraged to complete the degree requirements (normal 75 credits) during the first three years, the General Examination for the dissertation in the fourth year, and the dissertation in the fifth year. Those admitted with a master's degree from
another university can complete the doctorate in four years: two years of course work, exam year, dissertation year.

Financial Aid
The department annually awards twenty or more new teaching assistantships. To be considered for the following autumn, applicants must submit an assistantship application and supporting materials for admission to the graduate program by January 15. A statement of purpose, three recommendations, the GRE general test, the GRE subject test (literature in English) [except M.F.A., M.A.T. (E.S.L.)] and a critical writing sample are required [except M.A.T. (E.S.L.)].

Master of Arts Degree
Admission Requirements: Bachelor of Arts degree. Major in English equivalent to that awarded by the University of Washington preferred. Graduate Record Examination general test and subject test (literature in English). Three letters of recommendation, statement of purpose, and a critical writing sample.

Graduation Requirements: Intermediate-level proficiency in a language other than English, 40 credits, including 30 credits in graduate English seminars. For students continuing to the doctoral program, a 10-credit master's essay. For a terminal master's degree, a master's degree from another institution is admitted at the post-master's level following the guidelines for admission to the M.A. option and must complete two quarters before petitioning the Graduate Studies Committee for admission to the doctoral program. Students transfering with a master's degree from other institutions may be required to submit an equivalent to the master's essay.

Graduation Requirements: 75 graded credits of electives in graduate English seminars as advised by the student's Supervisory Committee. Students with a recent master's degree from another university may count up to 30 credits from the master's program, upon approval of the director of graduate studies. Students with a master's degree from the University of Washington may count up to 40 credits in courses taken before admission to the doctoral program. Doctoral students may count up to three graduate courses taken in other departments toward fulfilling degree requirements.

Faculty Chairperson
Thomas Frank Lockwood

Professors
Adams, Robert P. *1947 (Emeritus); PhD, 1937, University of Chicago, Renaissance literature.
Alexander, Edward *1962; PhD, 1963, University of Minnesota; romantic and Victorian literature.
Blake, Kathleen *1971; PhD, 1971, University of California (San Diego); Victorian literature, children's literature, women's studies.
Brown, Marshall J. *1988; PhD, 1972, Yale University; eighteenth- and nineteenth-century literature, literary theory, music and literature.
Burns, Wayne 1948 (Emeritus); PhD, 1946, Cornell University; Victorian literature.
Butler, Johnnella E. *1987; Adjunct; Edd, 1979, University of Massachusetts; Afro-American literature, multicultural education.
Coldewey, John C. *1972; PhD, 1972, University of Colorado (Boulder); Renaissance literature, medieval drama.
Dillon, George L. *1966; PhD, 1969, University of California (Berkeley); rhetoric, composition.
Dunn, Richard J. *1967; PhD, 1964, Case Western Reserve University; Victorian literature, English novel.
Eby, E. Harold 1968 (Emeritus); PhD, 1927, University of Washington; American literature.
Fowler, David C. *1952 (Emeritus); PhD, 1949, University of Chicago; medieval literature, comparative religion.
Frey, Charles Hubbard *1978; PhD, 1971, Yale University; Renaissance literature, Shakespeare.

Doctor of Philosophy Degree
Admission Requirements: By petition to Graduate Studies Committee upon completion of the M.A. degree option in literature. Students with recent master's degrees from other institutions are admitted at the post-master's level following the guidelines for admission to the M.A. option and must complete two quarters before petitioning the Graduate Studies Committee for admission to the doctoral program. Students transfering with a master's degree from other institutions may be required to submit an equivalent to the master's essay. Students with M.F.A., M.A.T., or M.A.T. (E.S.L.) degrees from the University must complete course work and language requirements for the M.A. degree option and submit an equivalent to the master's essay.

Graduation Requirements: 75 graded credits of electives in graduate English seminars as advised by the student's Supervisory Committee. Students with a recent master's degree from another university may count up to 30 credits from the master's program, upon approval of the director of graduate studies. Students with a master's degree from the University of Washington may count up to 40 credits in courses taken before admission to the doctoral program. Doctoral students may count up to three graduate courses taken in other departments toward fulfilling degree requirements.

Fluency in at least one language other than English, plus whatever additional language study the Supervisory Committee advises. Written examinations for literature: emphasis: (1) historical period, (2) specialized field of study, (3) second period or genre; written examination for language emphasis: (1) major approach to English language study, (2) second approach to language study, (3) textual focus — can be a literary period; oral General Examination on an individualized topic; 27 credits of ENGL 800 (Dissertation) and a Final Examination based on the dissertation.

Master of Fine Arts Degree
Admission Requirements: Bachelor of Arts degree. Graduate Record Examination general test, three letters of recommendation, statement of purpose, a critical writing sample, and a creative writing sample.

Graduation Requirements: Intermediate-level proficiency in a language other than English, 65 credits, including 20 credits in creative writing, 15 credits in graduate English seminars (5 credits must be from an approved course in criticism), 5 elective credits, 15 thesis credits, M.F.A. essay. Final oral examination.

Master of Arts for Teachers Degree
Admission Requirements: Same as for the Master of Arts degree, but usually including prior teaching experience.

Graduation Requirements: 45 credits, of which 25 must be in courses numbered 500 or above; including at least one course in English language or linguistics, rhetoric and/or composition, literary criticism or critical theory, and literature; three courses must have a stated orientation on teaching English; 5 credits of M.A.T. essay. In addition to the 45 credits, a student with no regular or formal teaching experience is required to complete at least 6 credits of ENGL 601 (Internship). 15 of these may be taken outside the department in courses related to the teaching of English, subject to approval. A maximum of 10 credits may be transferred from an accredited graduate program elsewhere.

Master of Arts for Teachers Degree (English as a Second Language)
Admission Requirements: Bachelor of Arts degree. Graduate Record Examination general test, statement of purpose, three letters of recommendation. Students without training in linguistic method and theory must take LING 400 as a prerequisite for 400-level linguistics courses.

Graduation Requirements: 45-54 credits, including ENGL 571, 572, 574, 576; LING 451, 461; 12 credits from ENGL 441, 465, 466, 499, 562, 563, 564, 567, 575, LING 433/ANTH 433, LING 447/PSYCH 457, LING 452/462; one elective course; 3-6 credits of ENGL 570 Intermediate-level proficiency in a language other than English.

Gerstenberger, Donna *1960; PhD, 1958, University of Oklahoma; twentieth-century literature, Anglo-Irish literature, feminist criticism.
Harris, Markham 1946 (Emeritus); MA, 1931, Williams College; fiction writing.
Heilman, Robert B. 1948 (Emeritus); PhD, 1935, Harvard University; drama.
Irmscher, William F. *1960; Emeritus; PhD, 1950, Indiana University; rhetoric and theory of composition.
Jones, Frank W. 1955 (Emeritus); PhD, 1941, University of Wisconsin; translation, twentieth-century theatre, poetry.
Kaplan, Sydney J. *1971; PhD, 1971, University of California (Los Angeles); twentieth-century literature, women writers, feminist criticism.
Korg, Jacob *1955 (Emeritus); PhD, 1952, Columbia University; Victorian, eighteenth-century literature.
Lockwood, Thomas Frank *1967; PhD, 1967, Rice University; eighteenth-century literature.
Markley, Robert M. *1987; PhD, 1980, University of Pennsylvania; Restoration and eighteenth-century literature, literary and cultural theory.
Matchett, William H. *1954; (Emeritus); PhD, 1957, Harvard University; Renaissance literature, Shakespeare.
McCracken, J. David *1966; PhD, 1966, University of Chicago; eighteenth-century literature.
McElroy, Colleen W. *1972; PhD, 1973, University of Washington; Black literature, women writers, poetry writing.
McHugh, Heather *1982; MA, 1973, University of Denver; writing and close reading of poetry, form in nature and art.
Modiano, Raimonda *1978; PhD, 1973, University of California (San Diego); romanicism.
Pollak, Vivian R. *1985; PhD, 1969, Brandeis University; nineteenth-century American literature, American women writers, biography.
Posnock, Ross *1983; PhD, 1980, Johns Hopkins University; American literature.
Reinert, Otto *1956 (Emeritus); PhD, 1962, Yale University; comparative literature, eighteenth-century literature.
Russ, Joanna *1977 (Emeritus); MFA, 1960, Yale University; fiction writing.
Sale, Roger H. *1962; PhD, 1957, Cornell University; Renaissance literature.
Shulman, Robert *1961; PhD, 1959, Ohio State University; American literature.
Simonson, Harold P. *1967 (Emeritus); PhD, 1958, Northwestern University; American literature.
Stevick, Robert D. *1962; PhD, 1956, University of Wisconsin; medieval language and literature.
Stirling, T. Brents 1954, (Emeritus); PhD, 1934, University of Washington; Renaissance literature.
Strietberger, William R. *1973; PhD, 1973, University of Illinois; Renaissance literature, textual criticism, paleography.
Tollefson, James W. *1984; PhD, 1978, Stanford University; English as a second language, language planning.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

ENGL 100 Intermediate ESL for International Students (5) Offered as two separate sections: one for reading and written grammar, sentence patterns, and paragraph coherence; the other for basic listening and conversation management skills related to academic situations. Sections may be taken concurrently. Special fee per section: $318. Prerequisite: placement examination. Credits averaged in GPA but do not count toward graduation.

ENGL 101 High Intermediate ESL for International Students (5) Offered as two separate sections: one for reading and essay-writing skills, particularly developing controlling ideas and support; the other for listening and speaking skills related to academic lectures and class discussions. Sections may be taken concurrently. Special fee per section: $318. Prerequisite: placement examination. Credits averaged in GPA but do not count toward graduation.

ENGL 102 Advanced ESL for International Students (5) Offered as two separate sections: one for reading and essay-writing skills, particularly developing controlling ideas and support; the other for listening and speaking skills related to academic lectures and class discussions. Sections may be taken concurrently. Special fee per section: $318 (no special fee for international teaching assistant sections). Prerequisite: placement examination. Credits averaged in GPA but do not count toward graduation.

ENGL 103 ESL for EOP Students (5) Improvement of reading comprehension and vocabulary, emphasis on building strategies and developing ideas in various modes of expository prose. Credit/no credit only. Prerequisite: placement examination.

ENGL 104-105 Introductory Composition (5-5) C Development of writing skills: sentence strategies and paragraph structures. Expository, critical, and persuasive essay techniques based on analysis of selected readings. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs. Prerequisites: 104-105, or special placement.

ENGL 111 Composition: Literature (5) C Study and practice of good writing; topics derived from reading and discussing stories, poems, essays, and plays.

ENGL 121 Composition: Social Issues (5) C Study and practice of good writing; topics derived from reading and discussing essays and fiction about current social and moral issues.

ENGL 131 Composition: Exposition (5) C Study and practice of good writing; topics derived from a variety of personal, academic, and public subjects.

ENGL 182 The Research Paper (5) C Includes study of library resources of reading materials, and writing preparatory papers as basic to writing a reference or research paper. Open to all undergraduates. Prerequisite: one of 111, 121, 131, or equivalent.

ENGL 197 Interdisciplinary Writing/Humanities (5, max. 15) C Expository writing based on material studied in a specified humanities lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytical
prose. Concurrent registration in the specified course required.

ENGL 198 Interdisciplinary Writing/Social Science (5, max. 15) C Expository writing based on material presented in a specified social science lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytical prose. Concurrent registration in specified course required.

ENGL 199 Interdisciplinary Writing/Natural Science (5, max. 15) C Expository writing based on material presented in a specified natural science lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytical prose. Concurrent registration in the specified course required.

ENGL 200 Reading Literature (5) VLPA Techniques and practice in reading and enjoying literature. Examines some of the best works in English and American literature and considers such features of literary meaning as imagery, characterization, narration, and patterning in sound and sense. Emphasis on literature as a source of pleasure and knowledge about human experience.

ENGL 205 Method, Imagination, and Inquiry (5) VLPA Examines ideas of method and imagination in a variety of texts, in literature, philosophy, and science. Particularly concerned with intellectual backgrounds and methods of inquiry that have shaped modern Western literature. Offered: jointly with CHID 205.

ENGL 207 Introduction to Cultural Studies (5) VLPA Asks three questions. What is Cultural Studies? How does one read from a Cultural Studies perspective? What is the value of reading this way? Provides historical overview of Cultural Studies, its terms, and its specific way of interpreting a variety of texts, i.e., literature, visual images, music, video, and performance.

ENGL 210 Literature and the Ancient World (5) VLPA Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions to the Middle Ages.

ENGL 211 Medieval and Renaissance Literature (5) VLPA Introduction to eighteenth- and nineteenth-century literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions from the Middle Ages to the eighteenth century.

ENGL 212 Literature of Enlightenment and Revolution (5) VLPA Introduction to eighteenth- and nineteenth-century literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions from the Middle Ages to the eighteenth century.

ENGL 213 Modern and Postmodern Literature (5) VLPA Introduction to twentieth-century literature from a broadly cultural point of view, focusing on themes, characters, and cultural contexts.

ENGL 225 Shakespeare (5) VLPA Survey of Shakespeare's career as dramatist. Study of representative comedies, tragedies, romances, and history plays.

ENGL 228 English Literary Culture: To 1600 (5) VLPA British literature from Middle Ages to end of sixteenth century. Study of literature in its cultural context, with attention to changes in language, form, content, and style.

ENGL 229 English Literary Culture: 1600-1800 (5) VLPA British literature in eighteenth and nineteenth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 230 English Literary Culture: After 1800 (5) VLPA British literature in the nineteenth and twentieth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 242 Reading Fiction (5) VLPA Critical interpretation and meaning in fiction. Different examples of fiction representing a variety of types from the medieval to modern periods.

ENGL 243 Reading Poetry (5) VLPA Critical interpretation and meaning in poems. Different examples of poetry representing a variety of types from the medieval to modern periods.

ENGL 244 Reading Drama (5) VLPA Critical interpretation and meaning in plays. Different examples of drama representing a variety of types from the medieval to modern periods.

ENGL 250 Introduction to American Literature (5) VLPA Survey of the major writers, modes, and themes in American literature, from the beginnings to the present. Specific readings vary, but often included are Taylor, Edwards, Franklin, Poe, Hawthorne, Melville, Emerson, Thoreau, Whitman, Dickinson, Twain, James, Eliot, Stevens, O'Neill, Faulkner, Hemingway, Ellison, and Bellow.

ENGL 251 Introduction to American Political Culture (5) VLPA/JS Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Offered: jointly with POL S 281.

ENGL 258 African American Literature: To 1745 to Present (5) VLPA A chronological survey of Afro-American literature in all genres from its beginnings to the present day. Emphasizes Afro-American writing as a literary art; the cultural and historical context of Afro-American literary expression and the aesthetic criteria of Afro-American literature. Offered: jointly with AFRAM 214.

ENGL 264 Literature and Science (5) VLPA Explores the relationships between literature and science as ways of comprehending humanity's interaction with the world we inhabit. As a course in criticism, explores how literature and science structure and are structured by social, religious, political, and economic factors in culture.

ENGL 270 Cultural Issues In English (5) VLPA Survey of the assumptions, methodologies, and major issues of English in its cultural settings. Designed to connect English Language study with the study of literature, creativity and literacy, education, ethnicity, gender, and public policy.

ENGL 281 Intermediate Expository Writing (5) VLPA Writing papers communicating information and opinion to develop accurate, competent, and effective expression.

ENGL 283 Beginning Verse Writing (5) VLPA Intensive study of the ways and means of making a poem.

ENGL 284 Beginning Short Story Writing (5) VLPA Introduction to the theory and practice of writing the short story.

ENGL 300 Reading Major Texts (5) VLPA Intensive examination of one or a few major works of literature. Classroom work to develop skills of careful and critical reading. Book selection varies, but reading consists of major works by important authors and of selected supplementary materials.

ENGL 302 Critical Practice (5) VLPA Exercise in interpretive practices: a consideration of their powers and limits. Survey of the varieties of critical and interpretive practice from the earliest interpreters of scripture and myth to present-day critics.

ENGL 303 History of Literary Criticism and Theory (5) VLPA Literary criticism and theory from its beginnings in Plato through the early twentieth century. Philosophical and theoretical grounds for critical practice put forward by philosophers and critics.

ENGL 304 History of Literary Criticism and Theory II (5) VLPA Contemporary criticism and theory and its background in the New Criticism, structuralism, and phenomenology.

ENGL 305 Theories of Imagination (5) VLPA/JS Survey of theories of imagination since the seventeenth century. Focuses on the uses of the concept in literature, criticism, science, and society.

ENGL 307 Cultural Studies: Literature and the Age (5) VLPA Problems of literary periodization. Works by major and minor authors in the context of cultural history; critical and theoretical approaches that have led to the idea of periodization. Emphasis varies. Recommended: 300-level English course in the literary period being studied.

ENGL 310 The Bible as Literature (5) VLPA Introduction to the development of the religious idea and institutions of ancient Israel, with selected readings from the Old Testament and New Testament. Emphasis on reading the Bible with literary and historical understanding.

ENGL 311 Modern Jewish Literature in Translation (5) VLPA Survey of Jewish experience and its expression during the past hundred years. Includes selected writers from Yiddish literature (Sholom Aleichem, Perets, 1. B. Singer), European literature (Kafka, Babel, Wiesel), American literature (Bellow, Roth, Malamud, Ozk), and Israeli literature (Agnon, Applefeld, Amichai).

ENGL 313 Modern European Literature in Translation (5) VLPA Fiction, poetry, and drama from the development of modernism to the present. Works by such writers as Mann, Proust, Kafka, Gide, Hesse, Rilke, Brecht, Sarre, and Camus.

ENGL 315 Literary Modernism (5) VLPA Various modern authors, from Wordsworth to the present, in relation to such major thinkers as Kant, Hegel, Darwin, Marx, Nietzsche, Bergson, and Wittgenstein, who have helped create the context and the content of modern literature. Recommended: 300-level course in nineteenth- or twentieth-century literature.

ENGL 317 Literature of the Americas (5) VLPA Examines writings by and about people of the Americas, with a focus on intersections of gender, colonialism, race, sexuality, and ethnicity.

ENGL 320 English Literature: The Middle Ages (5) VLPA British literature of the Middle Ages in England, as seen in selected works from earlier and later periods, ages of Beowulf and of Geoffrey Chaucer. Read in translation, except for a few later works, which are read in Middle English.

ENGL 321 Chaucer (5) VLPA Chaucer's Canterbury Tales and other poetry, with attention to Chaucer's social, historical, and intellectual milieu.

ENGL 322 English Literature: The Age of Queen Elizabeth (5) VLPA The golden age of English poetry, with poems by Shakespeare, Spenser, Sidney, and others; drama by Marlowe and other early rivals to Shakespeare; prose by Sir Thomas More and the great Elizabethan translators.

ENGL 323 Shakespeare to 1603 (5) VLPA Shakespeare's career as dramatist before 1603 (including Hamlet). Study of history plays, comedies, and tragedies.

ENGL 324 Shakespeare After 1603 (5) VLPA Shakespeare's career as dramatist after 1603. Study of comedies, tragedies, and romances.

ENGL 325 English Literature: The Late Renaissance (5) VLPA A period of skepticism for some, faith for others, but intellectual upheaval generally. Poems by John Donne and the "metaphysical" school; poems
and plays by Ben Jonson and other late rivals to Shakespeare; prose by Sir Francis Bacon and other writers.

**ENGL 326** Milton (5) VLPA Milton’s early poems and the prose; Paradise Lost, Paradise Regained, and Samson Agonistes, with attention to the religious, intellectual, and literary contexts.

**ENGL 327** English Literature: Restoration and Early Eighteenth Century (5) VLPA Selections from wits and satirists; poems by John Dryden and Alexander Pope; plays by Dryden, William Congreve, and other wits; the great satires of Jonathan Swift, and the first stirring of the novel.

**ENGL 328** English Literature: Later Eighteenth Century (5) VLPA Classic age of English prose. Essays, biography, and criticism by Samuel Johnson, Oliver Goldsmith, and others; comedies by Goldsmith and Richard Brinsley Sheridan; fiction by Henry Fielding and others; poetry by a variety of writers.

**ENGL 330** English Literature: The Romantic Age (5) VLPA Literary, intellectual, and historical ferment of the period from the French Revolution to the 1830s. Readings from major authors in different literary forms; discussions of critical and philosophical issues in a time of change.

**ENGL 331** Romantic Poetry I (5) VLPA Blake, Wordsworth, Coleridge, and their contemporaries.

**ENGL 332** Romantic Poetry II (5) VLPA Byron, Shelley, Keats, and their contemporaries.

**ENGL 333** English Novel: Early and Middle Nineteenth Century (5) VLPA Studies in the novel in one of its classic phases. Authors include Austen, the Brontës, Dickens, Thackeray.

**ENGL 334** English Novel: Later Nineteenth Century (5) VLPA Studies in the novel as it passes from a classic format to formats more experimental. Authors include George Eliot, Thomas Hardy, Joseph Conrad, and others.

**ENGL 335** English Literature: The Age of Victoria (5) VLPA Literature in an era of revolution that also sought continuity, when culture faced redefinition as mass culture and found in the process new demands and creative energies, new material and forms, and transformations of old ones. Readings range from works of Tennyson, Browning, Arnold, Shaw, to Dickens, Eliot, Hardy.

**ENGL 336** English Literature: The Early Modern Period (5) VLPA Experiments in fiction and poetry. Novels by Joyce, Woolf, Lawrence, and others; poetry by Eliot and Yeats and others.

**ENGL 337** The Modern Novel (5) VLPA The novel on both sides of the Atlantic in the first half of the twentieth century. Includes such writers as Joyce, Woolf, Lawrence, Stein, Hemingway, Faulkner, and others.

**ENGL 338** Modern Poetry (5) VLPA Poetry in the modernist mode, including such poets as Yeats, Eliot, Pound, Auden, and Moore.

**ENGL 339** English Literature: Contemporary England (5) VLPA Return to more traditional forms in such writers as Bowen, Orwell, Waugh, Cery, Lessing, Drabble.

**ENGL 340** Modern Anglo-Irish Literature (5) VLPA Principal writers in English of the modern Irish literary movement—Yeats, Joyce, Synge, Gregory, and O’Casey among them—with attention to traditions of Irish culture and history.

**ENGL 342** Contemporary Novel (5) VLPA Recent efforts to change the shape and direction of the novel by such writers as Murdoch, Barth, Hawkes, Fowles, and Atwood.

**ENGL 343** Contemporary Poetry (5) VLPA Recent developments by such poets as Hughes, Heaney, Rich, Kinnell, and Hugo.

**ENGL 344** Twentieth-Century Dramatic Literature (5) VLPA Modern and contemporary plays by such writers as Shaw, Synge, O’Casey, O’Neill, Yeats, Eliot, Beckett, Pinter, and Albee.

**ENGL 345** Studies in Film (5) VLPA Typses, techniques, and issues explored by filmmakers. Emphasis on narrative, image, and point of view.

**ENGL 346** Studies in Short Fiction (5) VLPA The American and English short story, with attention to the influence of writers of other cultures. Aspects of the short story that distinguish it, in style and purpose, from longer fiction.

**ENGL 347** The Art of Prose (5) VLPA Techniques and varieties of prose—autobiography, biography, personal essay, reflective and meditative writing, social and scientific inquiry, and persuasive writing. Special attention to use of poetic, fictional, and dramatic devices. Recommended: introductory literature course.

**ENGL 348** Studies in Drama (5) VLPA Investigation of one of the major types of drama: tragedy or comedy. Emphasis on drama prior to the twentieth century.

**ENGL 349** Fantasy (5) VLPA Nonnaturalistic literature, selected folktales, fairytales, fables, nonsense, ghost stories, horror stories, science fiction, and utopian literature—the supernatural and surreal, the grotesque, the fantastical. Readings and emphasis vary.

**ENGL 350** Traditions in American Fiction (5) VLPA A literary form in which America has found its distinctively American expression. Selected readings among important novelists from the beginnings until 1900, including Cooper, Hawthorne, Melville, Twain, Chopin, James, and Wharton.

**ENGL 351** American Literature: The Colonial Period (5) VLPA Response to the New World and literary strategies in the literature of the colonies and the early republic. Works by Taylor, Edwards, Franklin, and others.

**ENGL 352** American Literature: The Early Nation (5) VLPA Conflicting visions of the national destiny and the individual identity in the early years of America’s nationhood. Works by Emerson, Thoreau, Hawthorne, Melville, and such other writers as Poe, Cooper, Irving, Whitman, Dickinson, and Douglass.

**ENGL 353** American Literature: Later Nineteenth Century (5) VLPA Literary responses to an America propelled forward by accelerating and complex forces. Works by Twain, James, and such other writers as Adams, Hawthorne, Howells, Crane, Dreiser, DuBois, and Chopin.

**ENGL 355** American Literature: Contemporary America (5) VLPA Works by such writers as Ellison, Williams, O’Connor, Lowell, Barth, Rich, and Hawkes.

**ENGL 356** Classic American Poetry (5) VLPA Poetry by Taylor, Whitman, Dickinson, and such others as Poe, Bradstreet, Crane, Robinson. The lineage and characteristics of lyric and epic in America.

**ENGL 359** Contemporary American Indian Literature (5) VLPA Creative writings—novels, short stories, poems—of contemporary Indian authors; traditions out of which they evolved. Differences between Indian writers and writers of the dominant European-American mainstream. Offered: jointly with AIS 377.

**ENGL 360** American Political Culture: To 1865 (5) VLPA American literature in its political and cultural context from the Puritan origins to the Civil War. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Prerequisite: 251.

**ENGL 361** American Political Culture: After 1865 (5) VLPA American literature in its political and cultural context from the Civil War to the present. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Content varies.

**ENGL 364** Literature and Medicine (5) VLPA How changing concepts of doctor-patient relationship and of body depicted in literary texts affect decisions throughout the human life cycle. Medicine and disease as metaphors for personal experience and social analysis.

**ENGL 367** Women and the Literary Imagination (5, max. 15) VLPA Study of women writers or ways various writers have portrayed woman’s image, social role, and psychology.

**ENGL 368** Women Writers (5, max. 15) VLPA Study of the work of women writers in English and American literature.

**ENGL 370** English Language Study (5) VLPA Wide-range introduction to the study of written and spoken English. The nature of language; ways of describing language; the use of language study as an approach to English literature and the teaching of English.

**ENGL 371** English Syntax (5) VLPA Description of sentence, phrase, and word structures in present-day English. Prerequisite: 370 or LING 200 or equivalent.

**ENGL 372** Language Variation in Current English (5) VLPA Examination of geographical, social, and occupational varieties of American English. Relationship between societal attitudes and language use.

**ENGL 373** History of the English Language (5) VLPA Evolution of English sounds, forms, structures, and word meanings from Anglo-Saxon times to the present. Prerequisite: 370 or LING 200 or equivalent.

**ENGL 374** The Language of Literature (5) VLPA Roles of explicitly describable language features in the understanding and appreciation of various verbal forms. Emphasis on literature, but attention also may be given to nontextual prose and oral forms.

**ENGL 381** Advanced Expository Writing (5) VLPA Concentration on the development of prose style for experienced writers. Recommended: sophomore standing.

ENGL 304 Intermediate Short Story Writing (5) VLPA Exploring and developing continuity in the elements of fiction writing. Methods of extending and sustaining plot, setting, character, point of view, and tone. Recommended: 284.

ENGL 407 Special Topics in Cultural Studies (5) VLPA Advanced work in Cultural Studies.

ENGL 411 Introduction to the Folktale Among Literate Peoples (3) VLPA Techniques of classification, geographic-historical distribution, theories of origin and interpretations, and related areas of investigation of the oral prose folk narrative of literate peoples.

ENGL 422 Arthurian Legends (5) VLPA Medieval romance in its cultural and historical setting, with concentration on the evolution of Arthurian romance.

ENGL 430 British Writers: Studies in Major Authors (5, max. 15) VLPA Concentration on one writer or a special group of British writers.

ENGL 431 Topics in British Literature (5, max. 15) VLPA Themes and topics of special meaning to British literature.

ENGL 440 Special Studies in Literature (3/5, max. 10) VLPA Themes and topics offering special approaches to literature.

ENGL 442 The Novel: Special Studies (5, max. 10) VLPA Readings may be English or American and drawn from different periods, or they may concentrate on different types—gothic, experimental, novel of consciousness, realistic novel. Special attention to the novel as a distinct literary form. Specific topic varies from quarter to quarter.

ENGL 443 Poetry: Special Studies (5, max. 10) VLPA A poetic tradition or group of poems connected by subject matter or poetic technique. Specific topics vary, but might include poetry as a geography of mind, the development of the love lyric, the comic poem.

ENGL 444 Dramatic Literature: Special Studies (5, max. 10) VLPA Study of a particular dramatic tradition (such as expressionism or the absurd theatre) or character (the clown) or technique (play-within-a-play, the neoclassical three unities). Topics vary.

ENGL 451 American Writers: Studies in Major Authors (5, max. 15) VLPA Concentration on one writer or a special group of American writers.

ENGL 452 Topics in American Literature (5, max. 15) VLPA Exploration of a theme or special topic in American literary expression.

ENGL 453 Introduction to American Folklore (5) VLPA Study of different kinds of folklore inherited from America's past and to be found in America today.

ENGL 457 Pacific Northwest Literature (5) VLPA Concentrates in alternate years on either prose or poetry of the Pacific Northwest. Prose works examine early exploration, conflicts of native and settler cultures, various social and economic conflicts. Pacific Northwest poetry includes consideration of its sources, formative influences, and emergence into national prominence.

ENGL 458 Gay and Lesbian Studies (5) VLPA & SIS Examination of ways gays and lesbians are represented in literature, film, performance, and popular culture and how these representations are interpreted in mainstream, gay/lesbian, and academic writing.

ENGL 470 Literature, Literary Study, and Society (5) VLPA & SIS Relationship of literature to society with particular emphasis on literary education. What social values determine the educational importance of literature, what segments of society are trained to read and to write literature, and how literature is institutionalized as part of pedagogical methodology. Emphasis varies.

ENGL 471 The Composition Process (5) VLPA Consideration of psychological and formal elements basic to writing and related forms of nonverbal expression and the critical principles that apply to evaluation.

ENGL 472 Language Learning (5) VLPA Consideration of how an individual achieves psychological and aesthetic grasp of reality through language; relates language development to reading skills, literary interpretation, grammar acquisition, oral fluency, discursive and imaginative writing.

ENGL 473 Current Developments in English Studies: Conference (5) VLPA

ENGL 474 Special Topics in English for Teachers (1-10) VLPA

ENGL 475 Colloquium in English for Teachers (1-5, max. 10) VLPA

ENGL 478 Puget Sound Writing Program Institute (1-8) Focus on the writing process and the teaching of writing, accomplished through research, writing, reflection, and demonstration of writing instruction; affiliated with the National Writing Project. Prerequisite: teaching certification and permission of instructor.

ENGL 479 Children's Literature (5) VLPA An examination of books that form a part of the imaginative experience of children, as well as a part of a larger literary heritage, viewed in the light of their social, psychological, political, and moral implications.

ENGL 483 Advanced Verse Writing (5, max. 15) VLPA Advanced course in the poetry and poetic technique of a special poet or group of poets.

ENGL 484 Advanced Short Story Writing (5, max. 10) VLPA Experience with the theory and practice of writing the short story. Recommended: 383.

ENGL 490 Literature, Literary Study, and Society (5) VLPA Relationship of literature to society with particular emphasis on literary education. What social values determine the educational importance of literature, what segments of society are trained to read and to write literature, and how literature is institutionalized as part of pedagogical methodology. Emphasis varies.

ENGL 491 Internship (1-6, max. 12) Supervised experience in local businesses and other agencies. Open only to upper-division English majors. Credit/no credit only. Prerequisite: 25 credits in English.

ENGL 492 Advanced Expository Writing Conference (3-5, max. 10) Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken. Prerequisite: permission of program director.

ENGL 493 Advanced Creative Writing Conference (3-5, max. 10) Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken. Prerequisite: permission of program director.

ENGL 494 Honors Seminar (5) VLPA Survey of current issues confronting literary critics today. Readings begin with work in the New Criticism that followed World War II and move forward to consider issues such as changing student population and role of the critic, revisions of the past, emergent technologies, and rise of interdisciplinary teaching and research.

ENGL 495 Major Conference for Honors (5) Individual study (reading, papers) by arrangement with the instructor. Required of, and limited to, honors seniors in English.

ENGL 496 Major Conference for Honors (5) Individual study by arrangement with instructor. Prerequisite: permission of director of undergraduate education.

ENGL 500 Reading Medieval Literature (5) Special problems involved in the study and interpretation of medieval texts, selected examples drawn from the beginnings of English literature to 1500.

ENGL 501 The Renaissance and Literary Tradition (5) Examination of selected texts from 1500 to 1660, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the Renaissance.

ENGL 502 English Literary Culture: 1660-1800 (5) Examination of selected texts from the Restoration and eighteenth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 503 English Literary Culture: 1800-1800 (5) Examination of selected texts from the nineteenth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 504 Backgrounds of Modern Literature (5) Examination of selected texts from the twentieth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 505 Theories of American Literature (5) Examination of selected texts in American Literature, concentrating on the specific problems of interpretation and scholarship characteristic of the study of works in this field.

ENGL 506 Critical Approaches to Literary Texts (5) Examination of a range of critical theories and practices appropriate to the study of literature.

ENGL 507 History of Literary Criticism and Theory (5, max. 15) A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle, Longinus, and the major medieval critics. Offered: jointly with C-LIT 507.
ENGL 508 History of Literary Criticism and Theory II (5, max. 15) Literary criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Offered: jointly with C LIT 508.

ENGL 509 History of Literary Criticism and Theory III (5, max. 15) Literary criticism and theory from Kant's Critique of Judgment to the mid-twentieth century and the work of Northrop Frye. Offered: jointly with C LIT 509.

ENGL 510 History of Literary Criticism and Theory IV (5, max. 15) A study of the major issues in literary criticism and theory since about 1965. Offered: jointly with C LIT 510.

ENGL 512 Introductory Reading in Old English (5)

ENGL 513 Old English Language and Literature (5, max. 15)

ENGL 514 Middle English (5, max. 15)

ENGL 515 Chaucer (5, max. 15)

ENGL 516 Topics in Medieval English Literature (5, max. 15)

ENGL 517 Sixteenth-Century Literature (5, max. 15)

ENGL 518 Shakespeare (5, max. 15)

ENGL 520 Seventeenth-Century Literature (5, max. 15)

ENGL 521 Milton (5, max. 15)

ENGL 522 Topics in the English Renaissance, 1485-1660 (5, max. 15)

ENGL 524 Restoration and Eighteenth-Century Literature (5, max. 15)

ENGL 525 Topics in Restoration and Eighteenth-Century Studies (5, max. 15)

ENGL 527 Romanticism (5, max. 15)

ENGL 528 Victorian Literature (5, max. 15)

ENGL 529 Topics in Nineteenth-Century Studies (5, max. 15)

ENGL 531 Early American Literature (5, max. 15)

ENGL 532 Nineteenth-Century American Literature (5, max. 15)

ENGL 533 Modern American Literature (5, max. 15)

ENGL 535 American Culture and Criticism (5, max. 15)

ENGL 537 Topics in American Studies (5, max. 15)

ENGL 540 Modern Literature (5, max. 15)

ENGL 541 Contemporary Literature (5, max. 15)

ENGL 543 Anglo-Irish Literature (5, max. 15)

ENGL 544 World Literature in English (5, max. 15)

ENGL 548 Topics in Twentieth-Century Literature (5, max. 15)

ENGL 550 Studies in Narrative (5, max. 15)

ENGL 551 Studies in Poetry (5, max. 15)

ENGL 552 Studies in Drama (5, max. 15)

ENGL 554 Theories of Structure, Genre, Form, and Function (5, max. 15)

ENGL 555 Feminist Theories (5, max. 15)

ENGL 556 Cultural Studies (5, max. 15)

ENGL 559 Literature and Other Disciplines (5, max. 15)

ENGL 560 The Nature of Language: History and Theory (5)

ENGL 561 Stylistics (5)

ENGL 562 Discourse Analysis (5)

ENGL 563 Comparative Grammars (5)

ENGL 564 Current Rhetorical Theory (5) Prerequisite: teaching experience.

ENGL 567 Approaches to Teaching Composition (1-5, max. 10) Readings in composition theory and discussion of practical classroom applications. Prerequisite: previous experience or concurrent assignment in teaching writing.

ENGL 569 Topics in Language and Rhetoric (5, max. 15)

ENGL 570 Practicum in Teaching English as a Second Language (3, max. 6) Discussion and practice of second-language teaching techniques. Three hours per week teaching required in addition to regular class meetings. Credit/no credit only. Prerequisite: 571 or permission of instructor.

ENGL 571 Colloquium in Teaching English as a Second Language (5, max. 10)

ENGL 572 Methods and Materials for Teaching English as a Second Language (5) Prerequisite: LING 445 or permission of instructor.

ENGL 574 Research Methods in Second-Language Acquisition (5) Prerequisite: 572, LING 449, or permission of instructor.

ENGL 575 Pedagogy and Grammar in Teaching English as a Second Language (5)

ENGL 576 Testing and Evaluation in English as a Second Language (5) Evaluation and testing of English language proficiency, including testing theory, types of tests, and teacher-prepared classroom tests. Prerequisites: 571 and 572 or permission of instructor.

ENGL 581 The Creative Writer as Critical Reader (5)

ENGL 584 Advanced Fiction Workshop (5, max. 15) Prerequisite: graduate standing.

ENGL 585 Advanced Poetry Workshop (5, max. 15) Prerequisite: graduate standing.

ENGL 586 Graduate Writing Conference (5)

ENGL 590 Master of Arts Essay (5/10, max. 10) Research and writing project under the close supervision of a faculty member and with the consultation of a second faculty reader. The field of study is chosen by the student. Work is independent and varies. The model is an article in a scholarly journal. Prerequisite: graduate standing in English.

ENGL 591 Master of Arts for Teachers Essay (5) Research and writing project under the close supervision of a faculty member expert in the field of study chosen by the student within the MAT degree orientation towards the teaching of English, and with the consultation of a second faculty reader. The model is an article in a scholarly journal.

ENGL 592 Graduate English Studies (1-5, max. 10)

ENGL 593 Textual Criticism (5) Introduction to paleography, codicology, analytical and descriptive bibliography; examination of the major contributions to textual theory in the nineteenth and twentieth centuries; practice in applying textual theory in editing literary works.

ENGL 595 Topics in Teaching Literature (5, max. 15)

ENGL 597 Directed Readings (max. 18) Intensive reading in literature or criticism, directed by members of doctoral supervisory committee. Credit/no credit only.

ENGL 598 Colloquium in English (1-5, max. 10) Lectures and seminars presented by visiting scholars or a range of local scholars relevant to English graduate studies.

ENGL 599 Special Studies in English (5, max. 15)

ENGL 600 Independent Study or Research (*)

ENGL 601 Internship (3-9, max. 9) Credit/no credit only.

ENGL 700 Master's Thesis (*)

ENGL 800 Doctoral Dissertation (*)

Environmental Studies

201 Engineering Annex

The Institute for Environmental Studies is an interdisciplinary educational unit that offers students an opportunity to broaden their understanding of complex environmental issues and concerns. The Institute's graduate introductory sequence includes core courses that explore the contributions of the physical, biological, and social sciences to an understanding of environmental problems, their effects, and possible solutions. At more advanced undergraduate levels, the Institute offers courses that integrate humanistic and scientific inquiry and provide an overview of environmental law.

Undergraduate Program

Bachelor of Arts, Bachelor of Science Degrees

Environmental Studies interdisciplinary degrees are granted through General Studies. Most students are admitted two years prior to graduation and must design an integrated program approved by faculty advisors. Although a 2.00 GPA is required for admission, a minimum 2.60 GPA is more indicative of the caliber of work required for success in the program. In addition to completing 50 credits of environmentally related courses, a student must complete a 5-credit senior thesis and is encouraged to complete 5 credits of an internship. A complete description of requirements, including prerequisite courses, is included in the Institute's brochure. Undergraduate Program in Environmental Studies. A Bachelor of Arts degree or a Bachelor of Science degree may be earned. Most environmentally related careers require a thorough grounding in a traditional discipline; consequently, students are encouraged to pursue a double major or a double degree if the complementary area is outside the College of Arts and Sciences. Additional information is available from the Institute's undergraduate adviser.

Minor

Minor Requirements: 10 credits from ENV S 101, 203, 204, 205, 206, 250; 15 credits from ENV S 307, 361, 405, 476, 481, 482, 498 (5 credits maximum). 2.0 or higher grade in each course applied to the minor.
Faculty

Professors

Bassett, Edward P. * 1989, (Adjunct); PhD, 1967, University of Iowa; telecommunication technologies and information dissemination.

Boersma, P. Dee * 1974; PhD, 1974, Ohio State University; population, ecology.

Brown, Gardner * 1965, (Adjunct); PhD, 1964, University of California (Berkeley); resource economics.

Charlson, Robert J. * 1962; PhD, 1964, University of Washington; atmospheric chemistry, aerosol physics, aerosol/cloud/convective interaction.

Dunne, Thomas J. * 1973, (Adjunct); PhD, 1969, Johns Hopkins University; geomorphology and hydrology.

Eaton, David L. * 1979; PhD, 1978, University of Kansas; biochemical and environmental toxicology, aflatoxin carcinogenesis, metabolism of toxic chemicals.

Franklin, Jerry F. * 1986, (Adjunct); PhD, 1966, Washington State University; structure and function of forest ecosystems.

Gammon, Richard H. * 1989, (Adjunct); PhD, 1970, Harvard University; atmospheric, marine, and environmental chemistry; biogeochemical cycles, global climate change.

Hunn, Eugene S. * 1972, (Adjunct); PhD, 1973, University of California (Berkeley); cognitive anthropology, ethnobiology, cultural ecology and evolution, North American Indians.

Johnson, Ralph W. * 1955, (Adjunct); LLB, 1949, University of Oregon; natural resources, legislation, Indian law.

Karr, James R. * 1991; PhD, 1970, University of Illinois (Urbana); ecology and conservation biology, water resources, environmental sciences, natural resources.

Kasting, John P. * 1972, (Adjunct); PhD, 1972, Ohio State University; social psychology, media effect on attitude, psychology and religion, emergency behavior psychology.

Kohn, Alan J. * 1961, (Adjunct); PhD, 1957, Yale University; invertebrate zoology, ecology and functional morphology of marine invertebrates.

Leopold, Estella B. * 1976; PhD, 1955, Yale University; paleoecology, pollen and seed analysis, late Cenozoic environments.

Leovy, Conway B. * 1967; PhD, 1963, Massachusetts Institute of Technology; planetary atmospheres, middle atmosphere meteorology, remote sensing.

Morrill, Richard L. * 1955; PhD, 1959, University of Washington; spatial organization, migration, population diffusion, regional planning and development, inequality.

Murray, James W. * 1973, (Adjunct); PhD, 1973, Massachusetts Institute of Technology; marine geochemistry, aquatic chemistry.

Orans, Gordon H. * 1960; PhD, 1960, University of California (Berkeley); ecology and ethology, vertebrate social systems, community structure, plant-herbivore interactions.

Schneider, Jerry R. * 1967, (Adjunct); PhD, 1966, University of Pennsylvania; metropolitan area and regional planning, transportation and other urban models.

Schlizer, Charles A. * 1960, (Emeritus); PhD, 1956, University of Michigan; fluid mechanics, heat transfer.

Taib, Frieda B. * 1959, (Adjunct); PhD, 1959, Rutgers University; ecology.

Wallace, John M. * 1986, (Adjunct); PhD, 1966, Massachusetts Institute of Technology; atmospheric dynamics, large-scale motions.

Welch, Eugene B. * 1968, (Adjunct); PhD, 1967, University of Washington; water resources and aquatic biology.

Woodruff, Gene L. * 1965, (Adjunct); PhD, 1966, Massachusetts Institute of Technology; reactor physics, fusion engineering, neutron spectroscopy, energy studies.

Associate Professors

Fenske, Richard A. * 1990; PhD, 1984, University of California (Berkeley); human use and health risk assessment, pesticide exposure.

ZumBrunnen, Craig J. * 1977, (Adjunct); PhD, 1973, University of California (Berkeley); natural resource management, and analysis, former Soviet Union, physical geography.

Assistant Professors

Liftin, Karen T. * 1991, (Adjunct); PhD, 1992, University of California (Los Angeles); international environmental politics, globalization processes, evolution of consciousness.

Stein, Carol L. * 1993, (Adjunct Research); PhD, 1977, Harvard University; environmental geochemistry, geochemical disposal of nuclear and hazardous wastes.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

ENV S 101 Introduction to Environmental Studies (5) I&S/NW Natural history and human modifications of the natural world. Evolutionary biology, physical geography, toxicology, economy, economics, law, public policy. Offered: ASP.

ENV S 203 Introduction to Physical Sciences and the Environment (5) NW ZumBrunnen Climate, water, geological, and soil processes essential to life. Broad picture of physical processes important in Earth's evolution. Not recommended for students with 15 or more credits of physical science. Offered: jointly with GEOG 205; A.

ENV S 204 Introduction to Ecology and the Biosphere (5) NW Introduction to ecology, evolutionary processes, and biogeography. Plant and animal communities, the structure and function of ecosystems, their distribution on the planet, interrelationships between living systems and the physical environment. Not recommended for students with 15 or more credits of biological science. Recommended: 203 or background in physical science. Offered: W.

ENV S 205 Social Sciences and the Environment (5) I&S Insights and approaches to environmental decision making from the standpoint of psychology, economics, and other social sciences. Offered: Sp.

ENV S 206 Laboratory in Environmental Problems (5) NW Leopold Interface between science and democratic decision making. Processes and structure of ecosystems and conflict using made of these environments. Role and application of science. Field trips to natural and human-modified ecosystems. Weekend field trips required. Prerequisite: 204 or equivalent. Offered: Sp.

ENV S 307 Introduction to Global Environmental Issues (3) NW, QSR Leavy Application of principles and data of environmental science to global environmental problems. Examines sustainability of current patterns of population growth and use of biological and energy resources. Human impacts on climate. Effects of development patterns and trade explored. Prerequisites: 203 and 204 or equivalent. Offered: Sp.

ENV S 341 Energy: Consumption Patterns, Fossil Fuels, and Conservation (3) NW Woodruff Survey of energy use, especially in the United States. Fossil fuels with emphasis on resource availability and greenhouse gas effects and other environmental consequences. Methods for reducing consumption through conservation. Offered: jointly with ENGR/PHYS 341; A.

ENV S 342 Energy: Nuclear and Solar Power (3) NW Woodruff Technology of nuclear power, especially power, including hydroelectric power, wind power, and biomass. Consideration given to the factors limiting the utilization of these sources. Offered: jointly with ENGR/PHYS 342; W.

ENV S 343 Environmental Radioactivity (3) NW Woodruff Sources of radiation in the environment, including both natural sources, especially radon, and manmade sources, especially nuclear power. Radioactivity and nuclear explosives. Emphasis given to methods for determining radiation doses from the significant sources. Offered: jointly with ENGR/ENVH/PHYS 343; Sp.

ENV S 361 Environmental Values and Perceptions (5) VLPJ/I&S Benton How individual and cultural values affect our perception of, and relation to, the environment. Explores role of individual characteristics in perceptual acuity and value formation, conflicting values within and between societies. Impingement of these conflicts on environmental problems, and possible methods of resolution with emphasis on American environmental experience. Offered: Sp.

ENV S 405 Toxic Chemicals in the Environment (3) NW Woodruff Principles underlying the behavior and effects of toxic chemicals released into the environment; sources, distribution, and fate of toxic chemicals in the environment; chemicals and cancer; chemicals and birth defects; ecological effects of chemicals; government regulation of chemical hazards. Prerequisites: BIOL 203, or BIOL 405, or 406, or equivalent. Offered: jointly with ENVH 405.

ENV S 412 Attaining a Sustainable Society (1, max. 3) NW Karr Although human actions often improve the quality of life, they also carry unintended results with substantial environmental costs. Speakers from diverse disciplines explore the extent to which human society is threatened by environmental degradation as well as propose societal policies necessary to ensure a sustainable human society. Credit/no credit only.

ENV S 458 Global Atmospheric Chemistry (4) NW Global atmosphere as chemical system. Fundamental physical factors and chemical processes. Natural variabilities and anthropogenic change. Atmospheric cycling of trace substances. Connections to global issues such as climate change, acid deposition, influences on biosphere. Prerequisites: CHEM 140 and ATM S 358 or CHEM 350 or 456. Offered: jointly with ATM S/CHM 458.

ENV S 476 Conservation Biology (3) NW Boersma Explores biological, managerial, economic, and ethical aspects affecting survival of species. Applications of ecology, biogeography, population genetics, and social sciences for the preservation of species in the face of widespread global habitat modification, destruction, and other human activities. Prerequisite: 204 or BIOL 472 or equivalent. Offered: jointly with BIOL 476; A.

ENV S 481 Environmental Law (5) I&S DuBay Legislative, administrative, and common law dealing with the environment. Introduces the fundamental concepts and classic issues underlying the body of law and policy dealing with the environment. Includes air and water quality, noise, energy policy and management, and land use. For nonlaw students. Offered: W.
ENV S 482 Special Topics in Environmental Law (3-5) Dubey Examination of current environmental law issues. Topics to be announced. Prerequisite: 481. Offered: Sp.

ENV S 488 Special Topics in Environmental Studies (1-5, max. 10) NW Lecture, seminar, and/or team study of topical area changing from quarter to quarter. Prerequisite: permission of instructor.

ENV S 499 Undergraduate Research (* max. 20) Individual or team research of selected environmental topics. Prerequisite: permission of instructor.

Courses for Graduates Only

ENV S 514, 515 Environmental and Occupational Toxicology I, II (3, 3) Eaton, Kavanagh Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisites: BIOL 212, BIOL 440, or permission of instructor for 514; 514, or permission of instructor for 515. Offered: jointly with ENVH 514, 515.

ENV S 520 Seminar in Environmental Studies (1-3, max. 12) Study and research in advanced topics of environmental studies, with focus on unpublished areas of research; conducted by visiting professors and Institute or department faculty. Prerequisite: permission of instructor.

ENV S 530 Science and Environmental Policy (4) Boersma Role of science and scientists in formulating public policy related to the environment. Conceptualizes policy processes as a means of understanding opportunities for, and limits of, science in development and implementation of public policy. Prerequisites: concurrent registration in 531 and ECON 435 or equivalent. Offered: W.

ENV S 531 Science and Environmental Policy: Case Histories (3) Boersma Examples of the use of scientific analysis in the development of environmental policies. Prerequisite: concurrent registration in 530. Offered: W.

ENV S 532 Internship Seminar (1) Preparation for an analytical paper concerning the role of science in decision making. Focuses on the agency or firm in which the student served as an intern. Prerequisites: 530, 531.

ENV S 555 Lake Management (2) Welch Application of recognized techniques/approaches to restore and manage eutrophic lakes. Includes critiques of restoration proposals. Credits include credit only. Prerequisites: CHEWAFISH 434, BIOL 473, or permission of instructor. Offered: jointly with CEWA 555.

ENV S 576 Problem Solving in Conservation Biology (5) In-depth analyses of current issues in conservation biology and sustainable development. Emphasis on multidisciplinary efforts to address specific problems in both temperate and tropical regions. Offered: jointly with BIOL 577.

ENV S 577 Risk Assessment for Environmental Health Hazards (3-4) Faustman, Omer Examines context, methodologies, data, uncertainties, institutional arrangements for risk assessment. Quantitative, qualitative approaches to identification, characterization, control of environmental hazards to health through didactic and case studies. Prerequisites: 405 or 515 and BIOST 511 and EPI 511 or permission of instructor. Offered: jointly with CEWA ENVH/PB AF 577.

ENV S 578 Species Preservation, Captive Propagation, and Reintroductions (5) Offered with Woodland Park Zoo. Explores topics relevant to management of endangered species through lectures, seminars, and workshops. Focuses on the role of zoos in contributing to species survival plans; addresses techniques for decision analysis and conflict assessment. Captive propagation, reintroductions, translocation efforts evaluated. Offered: jointly with BIOL 578.

ENV S 599 Special Topics in Environmental Studies (* max. 30) Research-level lectures, seminars, or discussions of topics of current interest in the area of environmental studies. Subject matter varies from quarter to quarter. Prerequisites: permission of the instructor and institute director.

European Studies

420 Thomson

The curriculum in European studies prepares students to pursue careers requiring an understanding of all the forces, both material and cultural, contemporary and historical, that are shaping Europe today, taking into account transitions involved in the post-Soviet era and the movement toward greater political, economic, and cultural integration among the various nations involved.

Undergraduate Program

Bachelor of Arts Degree

Major Requirements: 50 credits to include the following: (1) Core courses—15 credits: EURO 301 (5 credits); upper-division course in modern Europe (5 credits); cross-cultural case study (5 credits); (2) Foreign language—10 credits at the third-year level or beyond; (3) Foreign language—10 credits minimum; (4) Electives—15 credits from approved list; (5) Senior research seminar—10 credits. See adviser for specific course options. This program leads to a bachelor's degree with a major in general studies.

Minor

Minor Requirements: (1) Core courses—15 credits: EURO 301 (5 credits); upper-division course in modern Europe (5 credits); cross-cultural case study (5 credits); (2) Foreign language—foreign language through the sixth quarter; (3) Electives—10 credits from approved list. See adviser for specific course options.

Faculty

Professors

Behler, Ernst H. * 1985; PhD, 1951, University of Munich (Germany); romanticism, literary history, history of criticism.
Brown, Marshall J. * 1988; PhD, 1972, Yale University; eighteenth- and nineteenth-century literature, literary theory, music and literature.
Caporaso, James A. * 1988; PhD, 1968, University of Pennsylvania.
Chiroi, Daniel * 1974; PhD, 1973, Columbia University; modernization, political sociology, peasant societies.
Clausen, Meredith L. * 1979; PhD, 1975, University of California (Berkeley); aesthetics and twentieth-century architecture.
Giffard, Charles A. * 1978; PhD, 1968, University of Washington; international news systems, news flow, editing and reporting.

Gray, Richard T. * 1991; PhD, 1981, University of Virginia; eighteenth-, nineteenth- and early twentieth-century literature, literary sociology, critical theory.
Jager, C. Stephen * 1985; PhD, 1970, University of California (Berkeley); medieval German and Latin literature, medieval intellectual history, comparative literature.
Krumme, Günter * 1970; PhD, 1966, University of Washington; economic, organizational and marketing geography, location theory, regional development.
Mayer, Jonathan D. * 1977; PhD, 1977, University of Michigan; medical geography, clinical applications, philosophy.
Toews, John E. * 1979; PhD, 1973, Harvard University; modern European intellectual history.
Ullman, Joan Connelly * 1966; PhD, 1963, Bryn Mawr College; modern Spain.
Webb, Eugene * 1966; PhD, 1965, Columbia University; modern English, French, and German literature, comparative religion.

Associate Professors

Bansleben, Manfred * 1988; PhD, 1979, University of Vienna (Austria); German language and methodology, history, culture studies.
Conroy, Patricia L. * 1972; PhD, 1974, University of California (Berkeley); philology, medieval literature, Danish language and literature.
Geist, Anthony L. * 1987; PhD, 1978, University of California (Berkeley); twentieth-century Spanish literature; ideology and literary form.
Jonas, Raymond A. * 1985; PhD, 1985, University of California (Berkeley); modern France.
Jones, Christopher D. * 1984; PhD, 1975, Harvard University; post-Cold War security issues in Europe and East Asia, political economy.
Keeler, John T. * 1980; PhD, 1978, Harvard University; comparative government (Western Europe), international relations.
Kieval, Hillie J. * 1985; PhD, 1981, Harvard University; modern Jewish history, modern European history (Central and Eastern Europe).
Leiren, Terje * 1977; Adjunct; PhD, 1978, North Texas State University; Scandinavian history, area studies, immigration, Norwegian language.
Poznanski, Kazimierz * 1987; PhD, 1974, University of Warsaw (Poland).
Sjövik, Jan * 1978; PhD, 1979, Harvard University; Norwegian language and literature, prose fiction, literary theory.
Tootalin, Michael J. * 1986; PhD, 1981, Oxford University (UK); the linguistic analysis of discourse in English.
Waugh, Daniel Clarke * 1972; PhD, 1972, Harvard University; medieval Russian history.
West, James D. * 1972; PhD, 1970, Cambridge University (UK); modern Russian literature.
Wiene, Sabine * 1989; PhD, 1986, University of Mainz (Germany); critical theory, contemporary theater and film, literature and philosophy.

Assistant Professors

Dubois, Thomas A. * 1990; PhD, 1990, University of Pennsylvania; Nordic and North American folkloristics, Finnish, Sami, women's culture, adolescence.
Elaison, Leslie Carol * 1988; Adjunct; PhD, 1988, Stanford University; comparative politics, European public policy: comparative education and health care policy.
Felson, James R. * 1989; PhD, 1989, Indiana University; modern East European history.
COLLEGE OF ARTS AND SCIENCES / GENETICS 135

Hanson, Stephen E. * 1990; Other, 1991, University of California (Berkeley); Soviet, post-Soviet and comparative politics.

Ingebritsen, Christine * 1992, (Adjunct); PhD, 1992, Cornell University; Scandinavian domestic and foreign policies/European community integration and Scandinavia.

Stragia, Albert J. * 1989; PhD, 1988, University of California (Berkeley); modern and contemporary Italian literature and cinema.

Wiedmer, Caroline 1993, (Acting); PhD, 1994, Princeton University; German and Swiss literatures of the twentieth century, Holocaust, film, cultural studies.

Young, Glennys J. * 1992; PhD, 1989, University of California (Berkeley); late imperial and early Soviet Russia.

Senior Lecturer

Turnovsky, Michelle H. L. 1987; PhD, 1978, Australian National University; microeconomics, international and environmental economics, industrial organization.

Course Description

See page 55 for explanation of course numbers, symbols, and abbreviations.

EURO 301 Europe Today (5) L & S A multi-disciplinary approach to contemporary Europe focusing on social, political, cultural, and economic change, with special reference to developments in the countries of the European Union and those in Eastern Europe in the post-Soviet era. Offered: A.

General Studies

9 Communications

General Studies provides students an opportunity to obtain an interdisciplinary degree. Students may pursue an individually designed "atypical major" or one of several organized interdisciplinary programs.

Undergraduate Program

Bachelor of Arts, Bachelor of Science Degrees

Admission Requirements: A written statement describing the proposed major and a list of 50 to 70 credits specifically related to the proposal. Approval of two faculty supervisors and the General Studies committee. Prospective majors should submit proposals to the General Studies committee for review at least three quarters prior to graduation.

Major Requirements: Completion of the approved curriculum and a 5-credit required senior study (minimum 2.7 grade required for senior study). Awarding of the Bachelor of Arts or Bachelor of Science degree depends on the content of each student's program.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

GST 101 University Learning Skills (2-3) Introduction to university culture. Practice in skills necessary for academic success, including note-taking, test-taking, writing, active learning, and time and stress management. Academic planning. Introduction to university resources. Credit/no credit only. Offered: AWSp.

G ST 197 Freshman Seminar (1, max. 3) Small-group discussion with faculty representing a wide spectrum of academic disciplines. Topics and approaches vary. Instructor may introduce research techniques or findings, concentrate on readings in his/her area of interest, or illustrate problems and alternatives related to the study of a particular academic discipline. Credit/no credit only. Offered: AWSp.

G ST 199 Freshman Proseminar (1) Integrative forum for Freshman Interest Group participants. Credit/no credit only.

G ST 350 Independent Fieldwork (1-6, max. 18) Independent fieldwork in community agencies, apprenticeships, internships, as approved for College of Arts and Sciences credit. Faculty supervisor is required. Credit/no credit only. Prerequisites: permission of faculty supervisor and General Studies adviser. Offered: AWSp.

G ST 301 Supervised Study in Selected Fields (1-6, max. 15) Special supervised study in a field represented in the College of Arts and Sciences. Prerequisites: permission of faculty supervisor and General Studies adviser. Credit/no credit only. Offered: AWSp.

G ST 470 Peer Advising (2-3, max. 12) Provides instruction in group leadership and promotion of values and methods of learning within a liberal arts setting. For peer advisers in the Freshman Interest Group Program. Credit/no credit only.

G ST 480 Senior Seminar-Humanities (5) Seminar examining the relationships and parallels in language, literature, and culture. Each student required to complete a project or research paper on a topic appropriate to a humanities track. Prerequisites: senior standing, General Studies Humanities major (Evening Degree Program).

G ST 491 Senior Seminar-Social Sciences (5) Historical and contemporary issues related to tracks considered. Each student required to complete a project or research paper on a topic appropriate to the major track. Prerequisites: senior standing, General Studies Social Science major (Evening Degree Program).

G ST 493 Senior Study (5) For General Studies majors only. Prerequisites: permission of faculty supervisor and General Studies adviser. Offered: AWSp.

Genetics

J205 Health Sciences

An undergraduate degree is not offered. Students who desire an undergraduate curriculum emphasizing subject matter in genetics are advised to refer to the Cellular and molecular biology listing under Biology.

Graduate Program

Colin C. Manoli, Graduate Program Coordinator

The Department of Genetics offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. A student may choose among a wide variety of research areas, while, at the same time, receiving broad training in genetics. New graduate students join a research project in one of the faculty laboratories during each of the first three quarters in residence. New students thereby become acquainted with several different experimental approaches in research in genetics, and the projects help them choose an adviser for their thesis work at the end of the first year. In addition to graduate courses offered by the Department of Genetics, students can choose among a large number of courses in related departments to broaden their perspective. Graduate students also participate in undergraduate teaching after gaining expertise in pertinent areas. A General Examination is taken at the end of the second year to gain formal admittance to candidacy for the Ph.D. degree.

Applications for graduate work are invited from students who have emphasized biology, the physical sciences, or mathematics in their undergraduate careers. Applicants are asked to submit Graduate Record Examination scores and three letters of recommendation.

Financial Aid

The Department of Genetics offers financial support to promising students who wish to work toward the doctoral degree.

Research Facilities

The department is housed in a modern, well-equipped building shared with the Department of Biochemistry and the Howard Hughes Medical Institute. Students benefit from interdisciplinary research and teaching programs in collaboration with departments having related interests.

Correspondence and Information

Graduate Program Coordinator

J205 Biochemistry-Genetics, SK-50

Faculty

Chairperson

Breck E. Byers

Professors

Bendich, Arnold J. * 1970, (Adjunct); PhD, 1969, University of Washington; mitochondrial and chloroplast genome structure, genome mapping.

Byers, Breck E. * 1970; PhD, 1967, Harvard University; cell biology: mitosis and meiosis, mechanisms of nuclear division and crossing-over in yeast.

Deeb, Samir S. * 1986, (Adjunct Research); PhD, 1964, University of Illinois; genetic factors predisposing to hyperlipidemia and coronary artery disease.

Eisen, Harvey * 1986, (Adjunct); PhD, 1967, University of Toronto (Canada); host-parasite interactions, generation of genetic diversity.

Fangman, Walton L. * 1967; PhD, 1965, Purdue University; molecular genetics: control of replication of yeast chromosomes, plasmid and mitochondrial DNA.

Felsenstein, Joseph * 1966; PhD, 1968, University of Chicago; evolution and population genetics.

Furlong, Clement E. * 1977, (Research); PhD, 1968, University of California (Davis); human biochemical genetics in biochemistry of membrane transport systems.

Gallant, Jonathan A. * 1961; PhD, 1961, Johns Hopkins University; molecular genetics, control mechanisms in bacteria, accuracy of translation.

Gartler, Stanley M. * 1957, (Emeritus); PhD, 1952, University of California (Berkeley); mammalian somatic cell genetics with emphasis on the mechanism of x-chromosome inactivation.

Hall, Benjamin D. * 1963; PhD, 1959, Harvard University; molecular genetics of yeast and higher plants.

Hartwell, Leland H. * 1968; PhD, 1964, Massachusetts Institute of Technology; genetic analysis of chromosome transmission and of the control of division by hormoines in yeast.

Hawthorne, Donald C. * 1980, (Emeritus); PhD, 1955, University of Washington; yeast genetics, chromosome mapping, suppressors.

Laird, Charles D. * 1971, (Adjunct); PhD, 1966, Stanford University; cell and developmental biology, human genetics.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

GENET 351 Human Genetics: The Individual and Society (4) NW Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. Appropriate for nonscience majors. Offered: ASp.

GENET 371 Introductory Genetics (5) NW Explores gene transmission, chromosome mapping, quantitative traits, population genetics, genetic analysis of biological processes. Emphasizes formal genetic mechanisms but includes some molecular techniques, such as restriction mapping, cloning, RFLP analysis. For biological sciences majors. Cannot be taken for credit if 360 or 365 previously taken. Prerequisite: CHEM 150. Recommended: BIOC 201. Offered: AWSp.

GENET 372 Gene Structure and Function (5) NW Explores the structure of genes and chromosomes, the mechanisms and control of transcription and translation, and the molecular mechanisms of mutation, recombination, transposition, and development. Intended for majors in biological sciences. Cannot be taken for credit if 360 or 365 previously taken. Prerequisite: 371 or BIOC 201. Offered: WSp.

GENET 411 Gene Action (5) NW Molecular genetics: discussion of fundamental genetics processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focus is on prokaryotic organisms. Prerequisites: 371 or 372 or MICRO 410; CHEM 237. Offered: jointly with MICRO 411; W.

GENET 453 Genetics of the Evolutionary Process (5) NW Felsenstein Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: 371 or 372.

GENET 454 The Origins of Genetics (4) NW Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel's work and its rediscovery. Evidence contributing to根本 chromosome theory of heredity. Prerequisites: 351 or 371 or 372 or 10 credits in biological sciences. Offered: A.

GENET 455 Molecular Genetics (3) NW The structure of genes and molecular mechanisms of gene expression. First part of the course draws upon information obtained with viruses and bacterial cells and serves as background for a study of eukaryotic cells in the second part. Prerequisites: 371 or 411, CHEM 237, or permission of instructor.

GENET 499 Undergraduate Research (* max. 30) Prerequisite: permission of instructor.

Courses for Graduates Only

GENET 501 Introduction to Research Materials (3, max. 9) The student undertakes a research project in one of the research groups within the department for a quarter at a time. Credit/no credit only. Prerequisite: graduate standing in the Department of Genetics or permission of graduate program coordinator. Offered: AWSp.

GENET 520 Seminar (1, max. 15) Credit/no credit only. Prerequisite: graduate standing in the Department of Genetics or permission of graduate program coordinator. Offered: AWSp.

GENET 525 Current Literature in Human Genetics (1) Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Credit/no credit only. Prerequisite: graduate or postdoctoral status. Offered: AWSp.

GENET 531 Human Genetics (1) Hartwell Modern approaches to the identification of human disease genes permitted by their isolation. Functional conservation of proteins throughout eukaryotic evolution as an approach to their function in model systems such as somatic cell culture, transgenic mice, nematodes, Drosophila, and yeast. Prerequisite: second-year graduate student. Offered: alternate years.

GENET 560 Methods and Logic in Genetics (3) Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first year genetics graduate students only. Offered: A.

GENET 551 Mutation and Recombination (3) First course in a three-quarter sequence in molecular and microbial genetics: mutation rates; recombination analysis in phage, bacteria, fungi; mechanism of recombination. Offered: A.

GENET 552, 553 Structure and Function of Genetic Material I, II (3,3) Chromosome structure and DNA replication; molecular basis of recombination and transposition; regulation of gene expression; genetic analysis of relationship between protein structure and function. Prerequisite: 551 or permission of instructor. Offered: W,Sp.

GENET 554 Topics in Genetics (2, max. 6) Current problems and research methods. Credit/no credit only. Prerequisite: permission of instructor.

GENET 560 Chromosomal Behavior (3) Properties of meiotic chromosomes with special emphasis on recombination and segregation. Prerequisite: permission of instructor. Offered: alternate years.

GENET 562 Population Genetics (4) Felsenstein Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: Sp.

GENET 564 Molecular Cytogenetics (3) Byers Cellular processes of gene transfer in mitosis, meiosis, and gametogenesis, with emphasis on ultrastructure and macromolecular mechanisms. Prerequisite: permission of instructor. Offered: alternate years.

GENET 571 Immunogenetics (3) Genetic approaches to the biology of cells of the immune system. Using the immune system as a model system, genetic, developmental, and biochemical concepts and techniques are examined as they apply to eukaryotic cells. Cell-cell interactions, histocompatibility, host resistance to infectious disease, and evolution of the immune system. Offered: alternate years.

GENET 575 Developmental Genetics (3) Genetic control of early development in a range of organisms, emphasizing systems in which cellular, genetic, and molecular approaches have combined to make significant contributions to understanding. Prerequisite: permission of instructor. Offered: W.

GENET 590 Population Genetics Seminar (1) Felsenstein Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Credit/no credit only. Prerequisite: 552 or permission of instructor.

GENET 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSp.

Geography

408A Smith

Geography is a lively discipline providing a distinctive spatial approach to many of today's societal problems and issues: regional inequality, growth of service activities, residential and educational segregation, health-care delivery, urban growth management, transportation efficiency, environmental and pollution problems, economic impacts of major investments or technological changes, spatial efficiency of industrial...
production, and the activities of international corporations and political states. Geography is the study of how individuals, groups, and societies interact with their environments. Geography seeks to understand the complex processes that result in observed patterns of settlement, economic activities, patterns of development, political organization, and the linkages and direction of trade and communication. Geographers also construct analytical tools, models of information representation, and graphic portrayals (notably maps) to aid the cognitive process of understanding.

Individual undergraduate and graduate programs are built around four groups of faculty teaching competencies and research interests:

1. Urban, social, and political geography. Human population distribution, activities, migration, settlement systems, and organization. Geographic facets of ethnicity, race, and gender; wealth and poverty; and health and disease. Location of urban services, including health-care systems, urban transportation, land use and housing, and neighborhoods. Urban spatial policies. Courses include: 230, 277, 342, 371, 380, 430, 431, 442, 443, 445, 447, 478.

2. Economic geography. Location, spatial-organizational structures, interrelationships between the economy and human societies, and economic interdependencies of industrial and commercial activities. Analysis and implications of resource distribution and use, market areas, and patterns of technological change. Domestic and international trade; land, air, and water transportation networks and systems; regional and international economic development. Related policies, policy conflicts, regulations, and management. Courses include: 207, 302, 349, 350, 368, 370, 371, 430, 433, 440, 441, 443, 447, 448, 449, 450, 478, 498.

3. Area studies and international development studies. Continental and global patterns of international relations and development. Analysis of geographic concepts in the regional context, especially on such topics as population growth and migration; development history, theory, and practice; hunger, resources, and poverty; and interconnections in the global economy. Special emphasis on East Asia, Russia and the former Soviet republics, Africa, Latin America, Canada, and the United States. Courses include: 230, 292, 304, 305, 313, 330, 333, 335, 336, 349, 371, 375, 401, 404, 430, 431, 432, 433, 434, 437, 466.

**Special Research and Teaching Facilities**

The University Libraries maintain separately the Edward L. Ulman Geography Library, which houses about fifteen thousand volumes and 250 periodicals. A separate Map Center houses atlases, sheet maps, and aerial photographs. Departmental facilities include the John C. Sherman Laboratory, which houses a variety of microcomputer and computer cartography/GIS workstations connected to the campus computer network. The Department of Geography is also a member of the Center for Social Science Computation and Research, which maintains an extensive data archive and offers many statistical and software consulting services.

**Undergraduate Program**

**Advisers**

Victoria Lawson, Richard Roth

---

**Bachelor of Arts Degree**

Major Requirements: 55 credits in geography—(1) three courses from the following: 100 or 102 (but not both), 207, 230, 277; (2) one course in physical geography (205 or equivalent). Courses taken as substitutes in other departments will satisfy major requirements, but will not be included in the 55-credit minimum, nor will they be counted toward the supporting fields requirement; (3) one upper-division course in cartographic/geographic information systems; (4) one research methods course (326, 426 or equivalent); (5) one upper-division regional course; (6) a specialization track (20 credits) from the following: (a) area studies/interdisciplinary development studies; (b) cartography/geographic information systems; (c) economic geography; (d) urban, social, and political geography. A minimum of 15 of these credits must be earned in one three-course cluster plus one related 400-level elective or in two two-course pairs. Track courses may overlap with other requirements.

Supporting fields—25 credits related to the student's area of specialization. Courses are generally outside geography and must include at least 15 upper-division credits and no more than 10 language study credits. Typical related course fields include: (1) economic geography—economics, business, urban planning; (2) social, political, and urban geography—urban planning and architecture, sociology, political science, history, economics; (3) area and international development studies—international studies, history, International business, economics, political science, anthropology; (4) cartography and geographic information systems—urban design and planning, civil engineering, computer science.

Other requirements—(1) at least 15 credits from 400-level geography courses; (2) transfer students must complete a minimum of 25 upper-division geography credits at the UW; (3) maximum 5 credits of 496 and 499; (4) minimum grade of 2.0 in each course and minimum cumulative GPA of 2.50 for all geography courses; (5) recommended: MATH 124; courses to improve writing skills; 404 (Senior Essay); and 496 (Internship).

**Minor**

See department for requirements.

**Graduate Program**

**Craig ZumBrunnen**, Graduate Program Coordinator

The Department of Geography has flexible programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees.

The aspirant to the master's degree (thesis and nonthesis tracks) is expected to undertake two years of post-master's study and must take a departmental diagnostic examination upon entry, pass the General Examination, attain an appropriate level of competence in a foreign language or cognate field, and successfully complete a dissertation. Normally, doctoral program students complete all degree requirements in three to four years.

**Admission Requirements**

Admission to the graduate program normally requires a minimum GPA of 3.00 (on a 4.00 scale), or B. Students holding a master's degree must meet this minimum scholastic requirement, but also should have achieved a GPA of 3.00 for graduate studies completed. All applicants must take the Graduate Record Examination. Specific information regarding application procedures may be obtained by writing to the graduate program adviser.

**Financial Aid**

The department usually awards approximately thirteen teaching assistantships for the academic year. Most of the assistantships are for teaching quiz sections for a larger lecture course. A few of the more advanced doctoral candidates may teach a class. Normally, several research assistantships are also available.

**Correspondence and Information**

Graduate Program Coordinator

408A Smith, DP-10

---

**Faculty**

**Chairperson**

William B. Beyers

**Professors**

Beyers, William B. * 1967; PhD, 1967, University of Washington; economic geography, regional analysis, regional development.

Fleming, Douglas K. * 1963 (Emeritus); PhD, 1965, University of Washington; transportation geography (especially ocean and air), regional organization of western Europe.

Guest, Avery * 1972. (Adjunct); PhD, 1970, University of Wisconsin; demography, ecology, stratification.

Hodge, David C. * 1975: PhD, 1975, Pennsylvania State University; urban geography, urban transportation geography, equity, gender.

Jackson, W. A. Douglas * 1955 (Emeritus); PhD, 1953, University of Maryland; Canada, political systems, nature and culture.

Krumme, Günter * 1970; PhD, 1966, University of Washington; economic, organizational and marketing geography, location theory, regional development.

Marts, Marion E. * 1951 (Emeritus); PhD, 1950, University of Washington; water resources, conservation, resource policy.

Meyer, Jonathan D. * 1977; PhD, 1977, University of Michigan; medical geography, clinical applications, philosophy.

Morrill, Richard L. * 1956; PhD, 1959, University of Washington; spatial organization, migration, population diffusion, regional planning and development, inequality.

Sherman, John C. * 1939 (Emeritus); PhD, 1947, University of Washington; cartography, graphics communication, remote sensing.

Thomas, Morgan D. * 1959; PhD, 1954, Queen's University (UK); regional economics, regional planning and development, technical innovation.

Vellkonja, Joseph * 1964 (Emeritus); PhD, 1948, State University (Italy); social and political geography, international migration, immigrants in America, eastern Europe.

**Associate Professors**

Chang, Kuei-Sheng * 1966 (Emeritus); PhD, 1955, University of Michigan; economic geography of China, historical geography of exploration, Third World development.

Christman, Nicholas R. * 1987; PhD, 1982, University of Bristol (UK); geographic information systems, spatial error analysis.

Kakluchi, George H. * 1957 (Emeritus); PhD, 1957, University of Michigan; Japan, agriculture, internal migration, regional geography.

Lawson, Victoria A. * 1986; PhD, 1986, Ohio State University; Latin America, political economy of development, feminist theory in development.
Nyerges, Timothy L. * 1985; PhD, 1980, Ohio State University; GIS, spatial decision support, urban, transportation, environment.

ZumBrunnen, Craig * 1977; PhD, 1973, University of California (Berkeley); natural resource management and analysis, former Soviet Union; physical geography.

Assistant Professors

Chan, Kam Wing * 1991; PhD, 1988, University of Toronto (Canada); economic development, urbanization, migration, China, Hong Kong.

Jarosz, Lucy A. * 1990; PhD, 1990, University of California (Berkeley); social and environmental impacts of economic development in the Third World.

Mitchell, Katharyne 1993; PhD, 1993, University of California (Berkeley); urban, cultural and economic geography, Pacific Rim.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

GEOG 100 Introduction to Geography (3) I&S Jarosz, Mayer, Mitchell Introduction to the study of human geography and the major themes of the discipline. Topics include: human-environment interactions, migration and human mobility, patterns of health and nutrition, industrialization and urbanization, and the geography of culture and politics. Offered: AWSPs.

GEOG 102 World Regions (5) I&S Spatial study of world regions, based on historical, cultural, political, economic, and other factors. An attempt to understand the underlying forces that have led to the formation of regions and regional patterns.

GEOG 205 Introduction to Physical Sciences and the Environment (5) NW ZumBrunnen Major atmospheric, hydrologic, and geomorphic processes used to interpret the character, distribution, and human significance of different natural and human-altered environments. Includes laboratory exercises for science and nonscience majors, geography majors and nonmajors. Offered: jointly with ENV S 203; A.

GEOG 207 Economic Geography (5) I&S Bayers, Krumme, Thomas The changing locations and spatial patterns of economic activity, including: production in agriculture, manufacturing, and services; spatial economic principles of trade, transportation, communications, and corporate organization; regional economic development, and the diffusion of technological innovation. Offered: AW.

GEOG 230 Urbanization in Developing Nations (5) I&S Lawson Cities in their cultural and economic contexts, geographical patterns of cities, and internal city structure. Problems facing these rapidly growing cities and selected policy solutions. Offered: Sp.

GEOG 258 Maps and Map Reading (3) I&S Categories of maps and aerial photographs and their special uses; map reading and interpretation.

GEOG 277 Geography of Cities (5) I&S Hodge Study of 1) systems of cities-their location, distribution, functions, and competition; and 2) their internal structure-the location of activities within urban areas. Particular emphasis on current urban problems-sprawl, housing, segregation, economic growth, and metropolitan transportation. Offered: W.

GEOG 300 Concepts of Regions (5) I&S Historical development and application of the concept of region. Examines systematically how varied societies constitute parts of a total world order.

GEOG 301 Cultural Geography (5) I&S Jackson Analysis of the role of culture in the formation of landscape patterns; components of culture that contribute not only to a "sense of place", but also to the mosaic of settlement patterns and occupancy that can be traced to culture. Recommended: 100 or equivalent.

GEOG 302 The Pacific Northwest (3) I&S Bayers Settlement pattern in the Pacific Northwest, emphasizing economic and historical factors, including the location of resource-oriented industries, attitudes regarding the use of public lands, and bases of the development of major urban areas in the region. Offered: W.

GEOG 303 Nature and Culture (5) I&S Jackson Introduces the main theses of human perspectives on nature as expressed in geographic and other literature, emphasizing the sources of the dualistic and dialectical leading to contemporary ecological thought. Serves as an introduction to the history of geographic thought.

GEOG 304 Western Europe (5) I&S Physical and socioeconomic characteristics of western Europe. Contemporary political and economic integration trends in their regional context.

GEOG 308 Canada: A Geographic Interpretation (5) I&S Jackson Study of Canada; emergence of a political-geographic and cultural entity and identity in North America that presents significant contrasts to the United States. Components that have helped shape Canadian earth-space and landscape. Offered: jointly with SISCA 308.

GEOG 313 East Asia (5) I&S Chan Introduction to the contemporary geography of East Asia, including China, Hong Kong, Taiwan, Japan, and Korea. Topics include: physical geography, historical settings, general development patterns, agriculture, population, industry, and trade. Focuses on major geographic issues in development. Case studies from different countries used to illustrate various themes.

GEOG 316 Urban Economics (5) I&S Application of economic analysis to urban trends, problems, and prescriptions, such as changing urban form and function, urban public finance, housing and renewal, poverty and race, transportation, and environmental problems. Prerequisite: ECON 201 or equivalent. Offered: jointly with ECON 316.

GEOG 325 Historical Geography of the United States (5) I&S Morrill Changing geography of the United States from the time of modern European contact to the early twentieth century. Emphasis on the evolving settlement, land use, landscape, and regional patterns.

GEOG 326 Introduction to Geographic Research (5) I&S Chan Introduction to the foundations of geographic research. Topics include defining problems, designing research, and methods for gathering and operationalizing statistics. Provides experience defining a geographic research problem, collecting and analyzing data, and drawing conclusions from that endeavor. Offered: Asp.

GEOG 330 Latin America: Landscapes of Change (5) I&S Lawson Examine operation of economic, social, and political processes across countries of Latin America-on international, national, and local scales-to understand common issues facing the region and different impacts in particular countries. Topics include internationalization of Latin American economies; agrarian and urban change; popular movements.

GEOG 333 Russia's Changing Landscape (5) I&S Jackson The Russian landscape as it has been affected by Soviet planning, migration and settlement, urbanization, industrialization, the results of collectivization in agriculture, and the growth of a transport network. Offered: 1995; W.

GEOG 335 Geography of the Developing World (5) I&S Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Prerequisite: 100 or equivalent. Offered: jointly with SIS 335.

GEOG 338 China (5) I&S Chan China's environmental and historical settings. Human response to varied geographic conditions. Pattern and process of development in agriculture, industry, and urbanization. Offered: W.

GEOG 342 Geography and Inequality in the United States (5) I&S Morrill Geography of social and economic inequality. Spatial distribution of wealth and poverty and the possible causes. Geographic and other aspects of the alleviation of poverty. The geography of racial and ethnic discrimination, from Indian reservations to ghettos, as well as religious, gender, and age discrimination. Offered: W.

GEOG 349 Geography of International Trade (5) I&S Mitchell Examines international production and the circulation of commodities. Resource extraction and the international division of labor established during colonialism; production and trade during the period of empire and subsequent core-periphery relations; contemporary movement of commodities; role of the state in different economic systems, and growing Pacific Rim influence. Offered: 1994; A.

GEOG 360 Principles of Cartography (5) I&S, QSR Introduction to cartography, design, and methods of cartography. Principles of data representation and map design for thematic and topographic mapping. Introduction to the use of computers for mapping. Offered: Asp.

GEOG 386 Regional Development (3) I&S, QSR Thomas The process of regional economic development. Theories and conceptualizations of economic growth and structural change, technological change and industrial development, spatial variation in economic activities and government policies. Prerequisite: 207 or ECON 200 or equivalent.

GEOG 370 Problems in Resource Management (5) I&S ZumBrunnen Principles and practices of effective conservation and utilization of natural resources. Role of technology in resource use. Physical, political, and economic aspects of resource management for food, population, land, water, air, energy, and timber resources. Recommended: 100 or equivalent. Offered: 1994; A.

GEOG 371 World Hunger and Resource Development (5) I&S Jarosz Addresses issues of hunger and poverty in their relationship to resource development, population, and environmental change in Africa, Asia, and Latin America. Examines various approaches to the problem of world hunger such as population growth, agricultural development and modernization, and issues in sustainable resource development. Offered: W.

GEOG 375 Geopolitics (5) I&S Jackson Spatial aspects of international politics, with attention to the historical development of perceptions of national space, the organization of territory, and the strategic use of geography to advance state goals. Offered: jointly with SIS 375.

GEOG 380 Geographical Patterns of Health and Disease (4) I&S Mayer Geography of infectious and chronic diseases at local, national, and international scales; environmental, cultural, and social explaina-
GEOG 401 Culture, Capital, and the City (5) I&S Mitchell Examines current theoretical issues in social theory as they apply to the urban landscape. Includes the interconnections of cultural and economic processes and the spatial patterns of race, class, and gender in the modern urban context. Prerequisite: 100 or equivalent. Offered: A.

GEOG 402 United States (5) I&S Morrill Spatial pattern of economic and social life in America—how it evolved, the role of the environment and resources; problems of regional inequality in development. Offered: W.

GEOG 403 Problems in the Geography of Western Europe (5) I&S Problems stemming from contemporary political and socioeconomic changes under way in Europe. Topics include regional development, economic integration and patterns of trade. Offered: W.

GEOG 428 Quantitative Methods in Geography (5) I&S Hodge Quantitative methods for empirical research in geography. Emphasis on statistical analysis; use of geographic data bases like the United States Census; understanding special issues and problems associated with geographically ordered data; verbal and graphic presentation of data in a computer. Prerequisites: 236, a course in statistics, or permission of instructor. Offered: W.

GEOG 430 Contemporary Development Issues in Latin America (5) I&S Lawson Contemporary development issues in Latin America, seen from a spatial perspective. Concept of development; competing theories as related to various Latin American states. Economic structural transformation, migration, urbanization, regional inequality, and related policies. Offered: 1996; W.

GEOG 431 Geography and Gender (5) I&S Jarecki Examines theories and case studies across international, national, and regional scales in order to illustrate the impacts of social and economic processes upon the construction of gender in particular places. Offered: A.

GEOG 434 Southeast Asia: Conflict and Development (5) I&S Mitchell Study of complexity of ethnic, cultural, and socioeconomic background in relation to division and rivalry in past; conflict and development in contemporary Southeast Asia. Recommended: 100.

GEOG 435 Industrialization and Urbanization in China (5) I&S Examines the impacts of industrialization strategies adopted by the Peoples Republic of China on industry and rural-urban relations. Topics include: economic development strategies, industrial geography, rural industrialization, urban development patterns, migration, and urbanization policies. Prerequisites: one course on contemporary China or permission of instructor. Offered: Sp.

GEOG 441 Technology and Industrial Change (5) I&S Thomas "The technology factor" in the process of industrial change in a turbulent contemporary world. Restructuring the world economy, transnational corporations, industry strategies and government policies. Prerequisite: 207 or permission of adviser.

GEOG 443 Location and Movement Models (5) I&S Morrill Application of models of optimum location and allocation; assignment, transportation, and spatial equilibrium; spatial interaction; geographic simulation, and spatial diffusion. Offered: Sp.

GEOG 445 Population Distribution and Migration (5) I&S Lawson, Morrill Relation of population distribution to environment, economic development, and culture. Frontier and rural settlement, urbanization, and suburbanization. Regional variation in age, ethnicity, fertility, and mortality. Causes and effects of migration from the world to the local scale. Recommended: 100 or 200 or SOC 331. Offered: A.

GEOG 447 The Geography of Air Transportation (5) I&S Geographic analysis of world air routes, passenger and cargo flows, and airport activities; considerations of physical, economic, political, and institutional determinants of routes and flows. Offered: A.

GEOG 448 Geography of Transportation (5) I&S Hodge Interaction emphasizing commodity flow, the nature and distribution of rail and water transport, the role of transport in area development. Offered: 1995; W.

GEOG 449 Geography of Ocean Transportation (5) I&S Geographic analysis of ocean trade routes, cargo and passenger flows, and port activities. Evaluation of the role of the transportation carrier in international trade. Offered: W.

GEOG 450 Theories of Location (5) I&S Krumme Neoclassical and modern theories of location, land use, and spatial structure. Decision and organizational concepts. Location principles, patterns, and processes in the context of rural, commercial, industrial, and residential settings. Impact and role of government policies on the effects of transportation, communication, uncertainty, and other factors. Prerequisite: 207 and ECON 200 or permission of instructor. Offered: A.

GEOG 458 Map Sources and Errors (5) I&S Geographic analysis and appraisal of source materials used in cartographic products, including maps, atlases, globes, and geographic agencies, coverage, and quality. Focus on errors inherent in maps and map derived data; judgment of fitness for specific applications. Prerequisite: 360 or permission of instructor. Recommended: CIVE 316 or CETS 414. Offered: 1995; W.

GEOG 460 Geographic Information Systems Analyses (5) I&S Chrismar Methods of Analysis provided by geographic information systems (GIS). Operations on map information including map overlay, aggregation/disaggregation, and other spatial and statistical calculations. Exposure to raster and vector software. Review of capabilities of current available GIS software. Prerequisite: 360 or permission of instructor. Offered: A.

GEOG 461 Urban Geographic Information Systems (5) I&S Nyerges Use of geographic information systems to investigate urban/regional issues; focus on transportation, land-use issues; urban change problems considered. GIS processing strategies. Problem definition for GIS processing. Data collection, encoding issues. Data structuring strategies. Prerequisites: 277 or equivalent, 360 or equivalent; familiarity with computers. Offered: W.

GEOG 463 Geographic Information Systems Workshop (5) I&S Nyerges Practical experience applying geographic information systems tools to analyze spatial data. Workshop format requires student-motivated projects; diverse principles encouraged. Prerequisites: 460 or 461 or permission of instructor. Offered: Sp.

GEOG 465 Analytical Cartography (5) I&S Chrismar Algorithms and data structures for selected topics in computer-assisted cartography. Emphasis on point, line, area, and surface data representation, map design, generalization, and data transformations. Prerequisites: 360, CSE 142 and 143 or equivalent, or permission of instructor.

GEOG 471 Methods of Resource Analysis (5) I&S ZumBrunnen Economic and noneconomic criteria for resource analysis. Theory and methods of linear models of natural resource analysis. Includes materials-balance modeling, residual management, constrained system optimization approaches to water quality, land-use patterns and international energy use, and multiple objective planning techniques applied to natural resource problems. Prerequisite: 370 or permission of instructor. Offered: Sp.

GEOG 478 Intraurban Spatial Patterns (5) I&S Hodge, Morrill Geographic and patterns processes within metropolitan areas. Economic land-use patterns (commercial and industrial location), social land-use patterns (regression, housing, and neighborhood change), urban political geography, analysis of urban infrastructure, and assessment of contemporary and future trends in urban development. Offered: Sp.

GEOG 480 Field Research: The Seattle Region (5) I&S Hodge, Morrill Field methods for contemporary urban research. Survey designs used in the analysis of transportation, land use, location of employment, shopping and housing, political fragmentation, and environmental degradation. Field report required, based on field work in the Seattle region.

GEOG 492 Library Research in Geography (3) I&S Introduction to library research methods in geography. Review and assessment of geographical bibliographies and abstract services for monographs, periodicals, gazetteers, dictionaries, encyclopedias, government publications, and statistical sources. Credit/no credit only.

GEOG 494 Senior Essay (3) I&S Supervised individual research and writing of major paper during senior year. Prerequisites: senior standing and permission of faculty sponsor. Offered: AWSpS.

GEOG 495 Special Topics (5, max. 10) I&S Topics vary and are announced in the preceding quarter. Offered: AWSpS.

GEOG 496 Internship in Geography (3/5, max. 12) Internship in the public or private sector, supervised by a faculty member. Credit/no credit only. Prerequisites: sophomore standing or above in geography and permission of faculty sponsor and undergraduate adviser. Offered: AWSpS.

GEOG 497 Tutorial in Geography (1-3, max. 6) I&S Intensive directed study and tutoring. Literature review, formulations of project outlines and research questions, and original research in contemporary geographic thought and trends. Directed writing. Required for honors students. Prerequisite: permission of instructor. Offered: AWSpS.

GEOG 498 Undergraduate Seminar in Economic Geography and Regional Science (3) I&S Krumme Selected advanced topics and current problems in economic geography, including location, transporta-
tion, trade, marketing, international investment, regional analysis, technological change, and economic development. Emphasis on critical examinations of theoretical and empirical work. Opportunity for the development of conceptual frameworks for undergraduate (e.g., senior essay) research. Offered: Sp.

GEOG 499 Special Studies (*) (max. 15) Supervised reading programs, undergraduate and graduate library and field research; special projects for undergraduate honors students. Prerequisite: permission of instructor or department adviser. Offered: AWSpS.

Courses for Graduates Only
GEOG 500 Contemporary Geographic Thought (4, max. 8) Offered: 1994; A; 1995 W.

GEOG 505 Research Seminar: China and Northeast Asia (3, max. 8) Offered: A.

GEOG 506 Research Seminar: Southeast Asia (3, max. 6)

GEOG 507 Research Seminar: Canadian Problems (3, max. 8) Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource potential and relations with the United States, Japan, and other important trading partners. Prerequisite: 308 or permission of instructor. Offered: jointly with SISCA 507.

GEOG 509 Research Seminar: Japan (3, max. 6)

GEOG 511 Contemporary Methodologies and Philosophies in Geography (4) Overview of major philosophies and methodologies of contemporary geographic research; historical roots of contemporary geography; roles of positivism, behaviorism, and other philosophical schools in geography; the role of space and regions as unifying and explanatory concepts in geography. Offered: A.

GEOG 520 Geographic Information Representation (3) Nyerges Current issues in geographic information representation for cartography and geographic information systems. Includes representations for visualization and databases. Prerequisite: graduate standing and one course in GIS or permission of instructor. Offered: A.

GEOG 526 Advanced Quantitative Methods in Geography (4) Morrill Offered: W.

GEOG 531 Latin American Development Seminar (3) Lawson Evolution of development theory in Latin America from a spatial perspective. Theories and development issues, using case studies from Latin America. How geographers have conceptualized development problems and solutions. Prerequisite: 430: Offered: W.

GEOG 532 Rural Development Seminar (3) Contemporary issues in rural development theory related to regional and agrarian change. Offered: Sp.

GEOG 533 Research Seminar: Soviet Union (3, max. 6) Jackson, ZumBrunnen Offered: 1996; Sp.

GEOG 538 Research Seminar: Geography of Transportation (3, max. 6) Mayer

GEOG 540 Research Seminar: Industrial Geography (3, max. 6) Beyers Offered: Sp.

GEOG 542 Research Seminar: Social and Population Geography (3, max. 6) Morrill

GEOG 550 Research Seminar in Location Theory (3) Krumme

GEOG 555 Cultural Critique and the Landscape (4) Michell Focuses on important contemporary topics in cultural geography. Examines current theoretical debates in anthropology, sociology, geography, feminist criticism, and cultural studies as they relate to the landscape. Include critical questions surrounding issues of representation and ethnography. Designed to help student prepare for advanced fieldwork. Offered:

GEOG 555 Landscape Analysis (3) Methods of landscape analysis; search for a sense of place, transformation of territory into meaningful landscape; science and significance of regions; concepts of landscape change.

GEOG 556 Seminar in Urban Economics (3) Use of economic theory to explain land-use trends, transportation, housing and renewal, the ghetto, and the public economy in urban areas. Prerequisites: ECON 300, 301, or equivalent. Offered: jointly with ECON 566.

GEOG 560 Geographic Information and Analysis (3, max. 6) Chrisman Current research topics in geographic information systems. Particular emphasis on analytical methods, and their use in practical circumstances. Prerequisite: graduate status in GIS or related field. Offered: Sp.

GEOG 561 Geographic Information Systems Management (3) Nyerges Geographic information system specification, design, and implementation in an organization; base and value of geographic information as related to system design and decision-making requirements. Systems integration issues. Standards and geographic data sharing. Prerequisites: 460 or 461 or equivalent permission of instructor, or 465. Offered: Sp.

GEOG 566 Regional Development Seminar (3) Thomas Regional economic development theories and methodologies. The dynamic roles of social, economic, technical, and institutional factors in the process of regional development, impacts of industry and firm strategies and government policies.

GEOG 567 Research Seminar: Geography and Industrial Development (3, max. 6) Thomas Spatial and economic dimensions of contemporary restructuring of world economy. Explanatory roles of such factors as government, technical change, complex corporations, capital market, information costs, transfer costs, and international trade in this process of global restructuring.

GEOG 570 Research Seminar: Natural Resources Analysis (3, max. 6) ZumBrunnen Offered: Sp.

GEOG 577 Research Seminar: Internal Spatial Structure of Clites (4, max. 8) Offered: A.

GEOG 580 Medical Geography (3) Mayer Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optional location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisites: familiarity with social science research; health-related issues. Offered: jointly with HSERV 586, 1996; W.

GEOG 581 Seminar in Medical Geography (3) Mayer Research and methodologies in medical geography; biological geography of disease; interrelations of medical geography with (1) other geographical specialties, (2) other health sciences. Prerequisite: 580. Offered: 1995; W.

GEOG 588 Geography Colloquium (1, max. 3) Participation in, and critique of, student thesis and dissertation research, faculty research, and visitor contributions. Offered: AWSp.

GEOG 599 Effective Teaching of Geography (1) Designed for the ongoing development of effective teaching and professional skills. Topics/activities include micro-teaching, conversations and presentations, skills: course organization, time management, personal and small group dynamics; design of geography curricula using simulations and computer-assisted instruction in the classroom, and fostering of creative thinking. Credit/non credit only. Offered: AW.

GEOG 600 Independent Study or Research (*) Offered: AWSpS.

GEOG 700 Master's Thesis (*) Offered: AWSpS.

GEOG 800 Doctoral Dissertation (*) Offered: AWSpS.

Geological Sciences
63 Johnson

The geological sciences include the collection and interpretation of field data as well as the application of principles of physics, chemistry, biology, and mathematics to the study of the earth, its environment, its origin, and the processes by which it has been transformed and reconstituted through time. The curriculum of the department provides a base of required courses for the undergraduate and a wide variety of more specialized upper-division courses that reflect the diversity of the geological sciences.

The department is well equipped with modern analytical and experimental facilities and has sizable research/teaching collections of rock, minerals, and fossils.

Undergraduate Program

Advisors
Sara Ceka and Stan Chernicoff

The Department of Geological Sciences offers two undergraduate degrees. The Bachelor of Arts degree is designed for students who wish to obtain a broad understanding of the history, composition, and dynamics of the earth, either for personal enrichment or as training for careers such as science journalism or environmental law. The Bachelor of Science degree, which requires more credits in mathematics and physical sciences, is designed for students who intend eventually to enter a graduate program in earth science and pursue a professional career. The Biology Option allows B.S. students interested in paleontology and paleobiology to substitute certain biology courses for mathematics and physical sciences.

Courses are also offered for nonmajors interested in understanding the processes responsible for the distribution of continents, landscapes, the availability of natural resources, and the occurrence of such natural hazards as earthquakes and volcanoes.

Bachelor of Science Degree

Major Requirements: GEOI 101 or 205, 306, 311, 320, 321, 340, 401 plus 9 credits at the 400 level in geological sciences, excluding GEOI, 401, 430, 498, and 499; MATH 124, 125, 126; CHEM 140 or 145, 141, 150 or 155; PHYS 121/131, 122/132; PHYS 123/133 or CHEM 160 and one course from CHEM 237, 350; MATH 307, 308; STAT 311. Biology Option: MATH 124, 125, 126; PHYS 121/131, 122/132; PHYS 123/133 or CHEM 160 and one course from BIOL 201, 202, 203; PHYS 122/132 or CHEM 160 or STAT 311 or 3-5 credits of upper-division courses in biological sciences. All required courses must be completed with grades not lower than 2.0.

Bachelor of Arts Degree

Major Requirements: GEOI 101 or 205, 306, 311, 320, 321, 340, 401, plus 19 credits at the 300 or 400 level
Graduate Program

The Department of Geological Sciences offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. The department emphasizes a rigorous scientific approach to significant problems in the geological sciences. Study in virtually all branches of geology is possible; any emphasis on field, laboratory, or theoretical work is largely dictated by the nature of the research problem selected.

Research Facilities

Analytical, experimental, and computational research facilities include: 1) a wet chemistry laboratory, a 48-channel Baird PS-1 ICP spectrometer for elemental analysis of rocks, a JEOL 733 Superprobe with EDXS/WDS for mineral analysis, a thermal-ionization mass spectrometer and clean laboratory for separation of radiogenic and trace elements (RbSr, SmNd, U, Pb), two fully-automated single-crystal X-ray diffractometers for crystal-structure studies at high pressure and temperature, a powder X-ray diffractometer, a microcomputer laboratory, a cluster of VAX workstations for geochemistry research, a VAX 750 facility for research in crystallography and mineral physics, a remote-sensing laboratory with an image-processing system with LANDSAT tape library and spectral reflectance equipment, and gas-atmosphere-controlled furnaces. Additional facilities are provided by the Burke Memorial Washington State Museum with paleontological laboratory and collections (extensive reference collections in invertebrate, vertebrate, and plant fossils; mineralogic collections) and the Quaternary Research Center (scanning and transmission electron microscopes, radiocarbon and stable-isotope research, palynology, snow and ice research, and periglacial laboratory).

Faculty

Chairperson
Mark S. Ghiorsso

Professors
Adams, John B. • 1975; PhD, 1981, University of Washington; paleoceanography, geodynamics, structural geology.
Hawke, Brian F. • 1988, (Affiliate); PhD, 1984, University of Maryland; conglomerate, geotectonics, paleoceanography.
Clayton, Robert B. • 1964, (Emeritus); PhD, 1961, Oxford University (UK); geodynamics, geochemistry.
Brown, John M. • 1965, (Emeritus); PhD, 1965, University of California (Berkeley); geodynamics, geochemistry.
Cowan, Darrel S. • 1975; PhD, 1972, Stanford University; structural geology and regional tectonics.
Cressey, Joe S. • 1983, (Emeritus); PhD, 1983, Texas A&M University; geodynamics, geochemistry, sedimentology.
Crosson, Robert S. • 1992, (Adjunct); PhD, 1966, Stanford University; geomorphology.
Daly, John R. • 1977, (Adjunct); PhD, 1977, University of Arizona; geodynamics, geosciences, geology of the Grand Canyon.
Dunne, Thomas • 1978; PhD, 1978, Johns Hopkins University; geodynamics, geomorphology.
Evans, Bernard W. • 1969, PhD, 1969, Oxford University (UK); geology, tectonics.
Ghiorsso, Mark S. • 1980; PhD, 1980, University of California (Berkeley); geodynamics, geology.
Ghose, Subrat S. • 1972; PhD, 1975, University of Chicago; geodynamics, structural and magnetic phase transitions, thermal expansion.
Gillespie, Alan R. • 1995, (Research); PhD, 1982, California Institute of Technology; landscape evolution, paleoglaciology, geodynamics, applications of remote sensing.
Hallet, Robert B. • 1980, PhD, 1980, University of California (Los Angeles); geodynamics, geosciences, geophysics, geodynamics, geophysical investigations into the formation of the earth's crust.
Leopold, Estella B. • 1976, (Adjunct); PhD, 1955, Yale University; glaciology, soil and ice analysis, stable Cenozoic environment.
Malloy, Vincent • 1995, (Emeritus); PhD, 1995, University of California (Berkeley); biogeochemistry, micropaleontology, palaeoecology.
McCauley, Ian S. • 1970; PhD, 1968, University of Chicago; geodynamics.
Merrill, Ronald T. • 1967; PhD, 1967, University of California (Berkeley); geodynamics.
Porter, Stephen C. • 1962; PhD, 1962, Yale University; geodynamics, geosciences.
Raymond, Charles F. • 1968, (Adjunct); PhD, 1968, California Institute of Technology; geodynamics.
Rensberger, John M. • 1966; PhD, 1967, University of California (Berkeley); geodynamics, geosciences.

Financial Aid

The department awards annually a number of teaching assistantships, endowed fellowships and scholarships, and research assistantships. Industry-sponsored grants are also available. Qualified students are strongly encouraged to apply for National Science Foundation and other fellowships available through national and private agencies.

63 Johnson, AJ-20

Minor

See department for requirements.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.
Courses for Undergraduates

**GEOL 100** Dinosaurs (2) NW Rensberger Biology, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how biological and paleontological science are formulated and tested. Offered: A.

**GEOL 101** Introduction to Geological Sciences (5) NW Chemcoff Survey of the physical systems that give the earth its form. Emphasizes the dynamic nature of interior and surface processes and their relevance to mankind and stresses the value of rocks and earth forms. Includes use of equipment and course laboratory for nonscience majors. Not open for credit to students who have taken 205. Field trips. Offered: AWSp.

**GEOL 205** Physical Geology (5) NW Introduction to the physical and chemical processes of the earth's surface and interior. Plate tectonics, earthquakes, volcanism, glaciation, and other changes that accompany the development of continents and ocean basins as understood in the context of plate-tectonic forces. Study of interior and surface processes and their relevance to mankind and stresses the value of rocks and earth forms. Includes use of equipment and course laboratory for nonscience majors. Not open for credit to students who have taken 101. Offered: AW.

**GEOL 300** Geology of the National Parks (5) NW Review of fundamental geological processes, using North American parks and monuments as examples. Includes background in geology not required but science background desirable. Not open for credit to students who have taken 101. Offered: AW.

**GEOL 302** Great Ice Age (5) NW Chemcoff Growth of North American ice sheets, worldwide lowering of sea level, and other changes that accompany the glacial environments of a global ice age. Geology of the last three million years, focusing on the geological and ecological impact of our current ice age. Offered: 101 or 205.

**GEOL 303** Geologic Hazards (5) NW Geologic processes dramatically alter the earth's surface, devastating communities, taking human lives. Uses lectures and field work to examine geologic hazards affecting civilizations around the world. Northwest examples illustrate causes and effects of many catastrophic geologic processes, including: earthquakes, volcanoes, floods, glaciers, landslides. Prerequisite: 101 or 205 or permission of instructor.

**GEOL 304** Earthscapes (5) NW Introduction to study of landforms and geomorphic processes. Topics include weathering, soils, erosion, mass wasting, rivers, glaciers, coastal landscapes, and arid landscapes. Laboratory analysis of landforms, with the writing of scientific abstracts, is included. Optional weekend field trips introduce students to geomorphic landscapes found in western Washington. For nonmajors.

**GEOL 306** Evolution of the Earth (5) NW Bourgeois Earth and its physical and biological aspects throughout time. Origin of earth, its early history, and development of continents and ocean basins as chronicled by the rock and fossil record. Field trips required. Prerequisite: 101 or 205. Offered: W.

**GEOL 308** Geology of the Northwest (5) NW Chemcoff Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic maps and interpreting evidence found in landscapes and rocks. Two-day-long weekend field trips required. Prerequisite: 101 or 205 or equivalent.

**GEOL 310** Planetary Geology (5) NW Irving Up-to-date survey of geological features and processes on and within the moon and their moons and their moons obtained from sampling, remote sensing, spacecraft imagery, and theory. Comparative discussion of volcanism, tectonics, surface processes, and thermal evolution. Examination of moon rocks and meteorites. Prerequisite: 101 or 205.

**GEOL 311** Introductory Geomorphology (5) NW Dunne Processes that generate landscapes. Two one-day field trips. Prerequisites: 101 or 205, and prior or concurrent enrollment in PHYS 121. Offered: A.

**GEOL 313** Environmental Geology (4) NW Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial processes, earthquake and volcanic hazards, and environmental aspects of the development of water resources. Prerequisites: 101, 205, or upper division standing in engineering or landscape architecture or permission of instructor. Recommended: MATH 120. Offered: A.

**GEOL 320** Mineralogy (5) NW Ghiorso Introduction to mineralogy, including elementary crystallography (lattice types, external morphology, stereographic projection), electron microscope (characteristics of physical properties, including tensor properties to crystal symmetry), and elementary crystal chemistry (structures, bonding), especially of the silicates. Prerequisites: CHEM 140, MATH 124. Offered: W.

**GEOL 321** Principles of Petrology (5) NW McCallum Description, classification, and origin of igneous, metamorphic, and sedimentary rocks. Laboratory hand specimen study of rock specimens. Two one-day field excursions. Prerequisite: 320 or equivalent. Offered: Sp.

**GEOL 340** Structural Geology (5) NW Mechanics of rock deformation; description, classification, origin, and tectonic significance of common structures. Emphasizes interpretation and analysis of geologic maps and cross-sections. Prerequisites: MATH 124, PHYS 121. Offered: Sp.

**GEOL 401** Field Geology (10) NW Geologic mapping in diverse areas in the western United States. Development of skills in mapping, field interpretation, and report writing. Students are responsible for their own living expenses while in the field. Prerequisites: 321 and 340. Recommended: 306 and 311. Offered: S.

**GEOL 403** Principles of Paleobiology (4) NW Ward Fossil record and methods of analysis. Biologic systems in geologic time, including preservation, variation, population structure, adaptation, functional morphology, biostratigraphy, paleoecology, evolution, and biogeography. Prerequisites: 101 or 205, and 306.

**GEOL 405** Geophysical Methods and the Earth's Interior (3) NW Bergantz General introduction to geophysical methods with application to geologic features at a variety of scales from ore deposits and sedimentary basins to the large scale structure of the earth's core and mantle. Topics include the characterization of the earth's gravity, heat flow, seismic, and magnetic features. Prerequisite: MATH 124. Recommended: 321, 340. Offered: A.

**GEOL 409** Great Geologic Issues (3) NW Bourgeois History and development of geological and paleontological theories and controversies, philosophy and methodology that have driven scientific inquiry in the earth sciences. Prerequisite: advanced standing in geological sciences or course work in history of science (e.g., HIST 311, 312), or permission of instructor. Offered: alternate years.

**GEOL 412** Fluvioglacial Geomorphology (5) NW Dunne Hydraulic, sedimentologic, and morphologic characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Interpretation of fluvial sedimentary environments. Five field exercises emphasize the quantitative analysis of fluvial processes and channel forms and the acquisition of various skills, such as mapping, topographic surveying, and report writing. Prerequisites: 311, MATH 125, PHYS'121. Offered: alternate years; Sp.

**GEOL 413** Hillslope Geomorphology (5) NW Dunne Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Five field exercises emphasize the quantitative analysis of geomorphic processes and the acquisition of various skills, such as mapping, topographic surveying, and report writing. Prerequisites: 311, MATH 125, PHYS 121. Offered: alternate years; Sp.

**GEOL 414** Image Interpretation (4) NW Adams Image interpretation in geological remote sensing. Analysis of aircraft and satellite images to solve field problems. Aerial stereo photography, digital multispectral images, thermal IR, radar images. Prerequisite: 410. Offered: W.

**GEOL 415** Principles of Glaciology (3) NW Halliet, Maykut, Porter, Raymond, Stuiver, Warren Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of palaeocli­matology, methods of ice core analysis, theory of glacier formation. Prerequisite: permission of instructor. Offered: jointly with GPHYS 415; A.

**GEOL 416** Glacial Geology (3) NW Porter Interpretation of glacial environments and history through study of sediments and landforms; stratigraphic approaches, chronology, reconstructions, applications. Recommended: 311, 415.

**GEOL 417** Quaternary Glacial Ages (3) NW Porter Physical, biological evidence of climatic change during Quaternary Period; stratigraphy, chronology. Impact of alternating glacial/interglacial cycles on earth's terrestrial, marine environments. Theories on causes of climatic variation. Prerequisite: introductory course in earth science and biological science. Offered: jointly with QUAT 417.

**GEOL 419** Glacial Landscapes and Deposits (3) NW Halliet Development of steep-sided valleys, turquoise lakes, deep cirques, craggiy peaks. Physics of glacial erosion and deposition. Geological and geotechnical properties of glacial sediments. Prerequisites: 311, 415.

**GEOL 423** Optical Mineralogy (2) NW Evans Petrographic microscopy and recognition of common minerals in thin section. Prerequisite: 320. Offered: A.

**GEOL 424** Petrology and Petrography of Igneous Rocks (5) NW McCallum Systematic study of igneous rocks and their origin, using the petrographic microscope. Prerequisite: 423. Offered: W.

**GEOL 425** Petrography and Petrology of Metamorphic Rocks (5) NW Evans Mineralogy, textures, and origins of metamorphic rocks; metamorphic facies and metamorphic phase equilibria; concepts of metamorphism. Prerequisite: 424 or equivalent. Offered: Sp.

**GEOL 426** Petrology and Petrography of Sedimentary Rocks (5) NW Stewart Mineralogy, textures, and origin of sedimentary rocks, using petrographic microscope. Prerequisite: 320 or equivalent.

**GEOL 430** Invertebrate Paleontology (5) NW Ward Important larger invertebrate groups: morphology, classification, stratigraphic distribution, evolution, pa-
GEOG 432 Paleocology of Invertebrates (5) NW Properties of fossil populations and interpretation of habitat and habitat in the geologic past; applications to interpretation of the stratigraphic record.

GEOG 437 Fossil Vertebrates (5) NW Rensselaer Highlights in evolutionary history of the fossil vertebrates, from early Paleozoic fishes through late Cenozoic mammals. Morphology, adaptations, relationships of the major groups. Bone structures and systematic relationships. Field trip. Prerequisite: 100 or BIOL 101 or equivalent.

GEOG 438 Fossil Mammals (5) NW Rensselaer Evolutionary relationships of fossil mammals, from mammal-like reptiles of late Paleozoic to diverse Cenozoic groups. Morphology, adaptations, extinctions, evolutionary patterns. Structures and relationships of most major groups. Field trip. Prerequisite: 100 or BIOL 101 or 437.

GEOG 443 Tectonics (3) NW Development of orogenic belts in space and time, critical evaluation of large-scale zones of deformation as geological expressions of plate interactions; characteristics of modern and ancient convergent plate boundaries. Prerequisite: 340.

GEOG 452 Principles of Sediment Transport by Turbulent Flow (3) NW Theoretical and experimental techniques used in studying erosion, transportation, and deposition of sediment. Initial motion of sediments, bed-load motion, suspension of sediment by turbulent flows, erosion and deposition of sediments, and applications of sediment transport theory to problems of geological interest. Prerequisite: 455. Offered: jointly with GPHYS/GEOL 452.

GEOG 455 Introduction to Geomechanics (4) Basic principles of continuum mechanics, their application to flow of water, mud, magma; deformation of soil, rock, ice. Emphasis on sound physical understanding of these principles and their application in their application to earth sciences problems. Prerequisites: MATH 126, PHYS 123, or equivalent.

GEOG 461 Stratigraphy (4) NW Bourgeois Systematic study of stratified rocks and space-time implications. Principles of stratigraphy, including biosstratigraphy, magnetostratigraphy, stratiigraphic subsurface analysis. Basin analysis, evolution of sedimentary basins and continental margins. Prerequisites: 306, 321, or equivalents. Offered: A.

GEOG 462 Depositional Environments (4) NW Bourgeois Principles of sedimentary facies analysis, including survey of modern processes that produce sedimentary sequences. Recognition of various depositional environments represented in the geologic record, including terrestrial, marine terrigenous, and carbonate environments. Two field trips required. Prerequisite: 306 or equivalent historical geology. Recommended: 311, 321. Offered: S.

GEOG 472 Introduction to Geochemistry (4) NW Nelson Thermal and chemical aspects of the rock-forming processes, including the chemical composition and the physical properties of rocks. The Earth's interior. Prerequisites: 320, 321, CHEM 150 or 155, or permission of instructor. Offered: A.

GEOG 474 Introduction to X-ray Crystallography (3) NW Ghose Point groups and space groups. Reciprocal lattice. Theory of X-ray diffraction from single crystals. Powder diffraction; identification of unknowns and determination of precise cell dimensions. Single crystal camera (precession and Weissenberg) techniques; determination of cell dimensions and space groups; study of exsolution and phase transformation in rock-forming silicates. Structure factor formula and the use of three-dimensional Fourier and Patterson series in the determination of crystal structures. Prerequisites: 320, PHYS 123.

GEOG 476 Isotope Geology (3) NW Shuster Methods involving the application of radioactive isotopes in age dating (radioactive, ionium, potassium-argon dating), and of stable isotope variations in nature in determining the temperature history of the earth and igneous rock formations. Applications of global aspects of the hydrologic cycle, age dating in archaeology, and of geochronological cycles of elements. Prerequisite: background in introductory mathematics.

GEOG 477 Isotope Geology: Lithosphere (3) NW Nelson Radiogenic isotopes as petrogenic indicators; isotopic evolution of Earth's major geochemical reservoirs; application to problems in igneous, metamorphic, sedimentary petrology; stable isotope geotemperature; nucleosynthesis, origin and chronology of solar system formation; U-Th disequilibrium series; hydrogen, carbon, oxygen, strontium, calcium, and carbon-14 isotopes; CHEM 150 or 155, or permission of instructor.

GEOG 485 Principles of Economic Geology (5) NW Cheney Principles of economic geology and exploration as illustrated by selected types of metallic and nonmetallic ore deposits and coal. Prerequisites: 321, 340, and senior standing in geological sciences.

GEOG 488 Economic Field Geology (5) NW Cheney Identification of hydrothermally altered rocks, oxidation, and sulfide enrichment; principles of exploration, geochemistry, and remote sensing. Four- to eight-day trip to mining districts for field inspection of ore deposits. Two weekends (three days each) mapping mineral deposits. Prerequisites: 485 or equivalent and permission of instructor. Offered: S.

GEOG 490 Special Topics (2-10, max. 20) NW

GEOG 498 Undergraduate Thesis (5) NW The thesis must be submitted at least one month before graduation. Prerequisite: permission of department.

GEOG 499 Undergraduate Research (max. 15) Prerequisite: permission of department.

Courses for Graduates Only

GEOG 509 Great Geotectonic Issues (3) Bourgeois History and development of geology and palaeontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Requires a term paper analyzing primary original material. Prerequisites: 409 and graduate standing in earth sciences, or permission of instructor.

GEOG 511 Seminar in Geomorphology and Hydrology (max. 30) Dunne, Hallot, Porter Prerequisite: permission of instructor.

GEOG 512 Seminar in Quaternary Research (2) Porter Seminar with advanced readings and discussion stressing current problems in Quaternary research. Prerequisite: permission of instructor.

GEOG 518 Periglacial Geology (3) Hallot Geomorphological features and processes active in areas subjected to subfreezing temperatures. Geotechnical and environmental problems characteristic of periglacial areas. Prerequisites: 311 and prior or concurrent enrollment in GPHYS 435. Recommended: CHEM 350.

GEOG 519 Advanced Geological Remote Sensing (4) Adams Critical examination of remote sensing methods that are used to determine chemistry, mineralogy, and structure of the earth's surface and the surfaces of solar system bodies. Photographic and digital multispectral imagery, reflectance spectroscopy, thermal infrared spectroscopy, gamma ray spectroscopy, and radar imaging techniques. Emphasis on the application of satellite and aircraft measurements to terrestrial geologic problems. Prerequisite: 410 or equivalent.

GEOG 520 Advanced Mineralogy (3) Ghose Crystal symmetry; point groups, space groups. Matemathical description of crystal structures; group theory, introduction to space groups; band structure of zero-dimensional units; properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of Earth's mantle, crystal chemistry, solid state reactions. Offered: jointly with MSE 518.

GEOG 521 Metamorphic Mineralogy (5) Evans Structures, compositions, optical properties, stability, occurrence, and paragenetic associations of rock-forming metamorphic minerals. Significance of these observations in the determination of metamorphic environments. Laboratory study of material from contrasting metamorphic belts. Prerequisite: 425 or equivalent. Offered: alternate years.

GEOG 522 Metamorphic Parageneses (5) Evans Metamorphic parageneses and processes in the context of tectonic environment. Laboratory study of material from contrasting metamorphic belts. Prerequisite: 425 or equivalent. Offered: alternate years.

GEOG 524 Petrogenesis of Igneous Rocks (3) McCallum Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: 424 or equivalent. Offered: alternate years.

GEOG 525 Theoretical Metamorphic Petrology (4) Evans Theoretical treatment of metamorphic mineral assemblages and metamorphic processes. Prerequisites: 425, CHEM 456, or equivalent.

GEOG 531 Seminar in Paleontology (2-4) Advanced topics in paleontology and biostatigraphy, including paleoecology and evolution.

GEOG 533 Seminar in Vertebrate Paleontology (5, max. 8) Rensselaer Advanced topics in vertebrate evolution, morphology, classification, function, ecology, and stratigraphy. Subject to be chosen by class at beginning of quarter. Prerequisite: advanced standing in paleontology, vertebrate biology, or physical anthropology.

GEOG 548 Tectonic Evolution of Western North America (4) Cowen Survey of each of the major tectonic provinces and Cenozoic tectonic provinces in western North America, emphasizing structural styles, tectonic framework, and plate-tectonic setting. Provinces include: Laramide, Rocky Mountain thrust belt, Basin and Range, Cordilleran core complexes, Sts Andres, Sierra-Klamath, Franciscan-Great Valley, Vancouver
340; including x-ray machine, ruby fluorescence, x-ray diffraction; determination of space faults in western North America; geodetic video topics, conjugate heat transfer, crystal settling, activity of a variety of scientific disciplines that include physical and environmental analysis of laboratory, and information bourgeois coefficients. Geophysics is an interdisciplinary physical science concerned with the makeup, behavior, and planetary environment of the earth. The techniques of physics, mathematics, and chemistry are applied to the structure and dynamic behavior of the earth and other planets. Included in this interdisciplinary area are a large number of complex and interrelated natural processes ranging from processes in the earth's core to processes in the atmosphere and magnetosphere, with a wide variety of possibilities in between. An undergraduate degree is not offered.

Graduate Program

The Geophysics Program offers graduate study leading to the Master of Science and Doctor of Philosophy degree. The core courses in which the analytic techniques of physics and mathematics are brought to bear on problems of the earth and its environment. Major areas of interest are the internal and surface structures of planets, dynamical processes within the earth, oceans, and atmosphere, the associated environmental applications of these processes, and the interactions of the earth, ice, ocean, and atmosphere in the climate system.

The required curriculum is flexible so as to permit pursuit of the wide variety of scientific disciplines that may be necessary for approaching a specific geophysical problem. However, a core curriculum of basic geophysics and geomatics and a sequence of courses dealing with some of the important problems encountered in space, the atmosphere, the oceans, and the solid earth are required. Additional specialized coursework needs before embarking on a thesis project is handled on an individual basis by the student and a faculty committee.

Special Requirements

Qualification for the Ph.D. program is a process that considers course and research performance with the result of a research proposal-based oral exam normally given to students at the beginning of their second year. Students who do not qualify for the Ph.D. program by means of this process may be reconsidered following completion of an M.S. program.

Financial Aid

Most financial aid is provided through graduate research assistantships that enable students to work with individual faculty members on research projects. However, two teaching assistantships also are awarded each year.

Research Facilities

Research facilities include field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including x-ray machine, ruby fluorescence pressure measuring system, laser-induced phonon spectrometer and diamond anvil cells for studying rock and mineral properties as composition and temperature. A core laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical fluids laboratory; a space physics laboratory for preparing balloon, rocket, and satellite experiments, and a laboratory for the development of optical high-resolution instrumentation. Computer facilities include a local area network linking a high-speed, large storage server with networked personal computers and peripheral devices via Ethernet. This local net is connected to a campus-wide fiber-optic ring that provides access to other campus computers and national networks. Many of the geophysics faculty members also have laboratories or access to laboratories in other departments, thus making possible a wide diversity of research opportunities. This is particularly valuable in such fields as aeronomy, tropospheric aerosols, radioactive age dating, and geophysical fluid mechanics. In addition to laboratory work, field programs are carried out at a number of remote sites, particularly in the Washington Cascades and Olympics, and Antarctica. In marine research, joint geophysics/oceanography projects provide opportunities for studying the earth's structure and tectonic processes on the sea floor. Facilities for reflection profiling, long-range seismic refraction, and magnetic and paleomagnetic measurements are available.

John R. Booker
COLLEGE OF ARTS AND SCIENCES / GEOPHYSICS 149

Professors
Baker, Marcia * 1971; PhD, 1971, University of Washington; cloud physics, atmospheric geophysics.
Boekr, John R. * 1971; PhD, 1968, University of California (San Diego); electromagnetic geophysics, geomagnetism, inverse theory.
Brown, J. Michael * 1984; PhD, 1980, University of Minnesota; experimental and theoretical mineral physics.
Businger, Joost A. * 1958, (Emeritus); PhD, 1954, University of Utrecht (Netherlands); boundary layer meteorology, atmosphere-ocean interaction.
Charlson, Robert J. * 1962; PhD, 1964, University of Washington; atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction.
Clark, Kenneth C. * 1948, (Emeritus); PhD, 1947, Harvard University; optical spectroscopy, upper atmosphere.
Criminale, William O. * 1968; PhD, 1960, Johns Hopkins University; fluid dynamics, mathematical physics, nonlinear mechanics, stability theory.
Crosson, Robert S. * 1966; PhD, 1966, Stanford University; seismology.
Ghose, Subrata * 1972, (Adjunct); PhD, 1959, University of Chicago; lattice dynamics, structural and magnetic phase transitions, thermal expansion.
Hernandez, Gonzalo * 1989, (Research); PhD, 1962, University of Rochester; optical interference phenomena, with application to remote sensing of atmospheres.
Hobbs, Peter V. * 1963, (Adjunct); PhD, 1963, University of London (UK); aerosol/cloud/precipitation physics, atmospheric chemistry, air pollution, mesoscale meteorology.
LaChepille, Edward * 1982, (Emeritus); DSc, 1967, University of Puget Sound; snow-cover geophysics.
Leovy, Conway B. * 1967; PhD, 1963, Massachusetts Institute of Technology; planetary atmospheres, middle atmosphere meteorology, remote sensing.
Lewis, Brian T. * 1970; PhD, 1970, University of Wisconsin; marine geophysics, marine seismology, gravity, magnetics, and computer modeling of those processes.
Matone, Stephen * 1972, (Research); PhD, 1972, University of Nevada; seismicity of Cascade mountains and eastern Washington.
Mayekut, Gary * 1969, (Research); PhD, 1969, University of Washington; polar air-sea-interaction exchange, radiative transfer in ice and snow.
Merrill, Ronald T. * 1967; PhD, 1967, University of California (Berkeley); geodynamics.
Parks, George K. * 1971; PhD, 1966, University of California (Berkeley); magnetospheric and space plasma physics.
Raymond, Charles F. * 1969; PhD, 1969, California Institute of Technology; geology.
Smith, J. Dungan * 1967, (Affiliate); PhD, 1968, University of Chicago; geophysical fluid dynamics, sediment transport mechanics.
Smith, Stewart W. * 1970; PhD, 1961, California Institute of Technology; earthquake seismology.
Untersteiner, Norbert * 1962; PhD, 1950, University of Innsbruck (Austria); air-sea-interaction exchange, polar climatology, sea ice physics.

Associate Professors
Creager, Kenneth C. * 1986; PhD, 1984, University of California (San Diego); global seismology and geophysical inverse theory.
Ely, John T. 1969, (Emeritus); PhD, 1969, University of Washington; cosmic rays.
Harrison, Halstead * 1971, (Adjunct); PhD, 1960, Stanford University; atmospheric chemistry.
Holzworth, Robert * 1982; PhD, 1977, University of California (Berkeley); space physics and electrical fields.
Jay, David A. * 1987, (Research); PhD, 1987, University of Washington; wave processes, sediment transport and physical oceanography of coastal waters.
Meece, James A. * 1968, (Research); PhD, 1983, University of Washington; ocean acoustic tomography, global climate measurements, and ocean dynamic modeling.
Oamar, Anthony * 1984, (Research); PhD, 1971, University of California (Berkeley); earthquake seismology and internal structure of the earth.
Waddington, Edwin D. * 1984, (Research); PhD, 1982, University of British Columbia (Canada); ice sheet flow and thermodynamics, paleoclimate from ice cores.

Assistant Professors
Conway, Howard B. * 1987, (Research); PhD, 1986, University of Canterbury (New Zealand); glaciology with emphasis on physical process in snow and ice.
McCarthy, Michael P. * 1989, (Research); PhD, 1988, University of Washington; magnetospheric and space plasma physics.
Unsworth, Martyn * 1993, (Research); PhD, 1991, Cambridge University (UK); electromagnetic geophysics.
Wilcock, William S. D. * 1993, (Adjunct); PhD, 1992, Massachusetts Institute of Technology; marine seismology, dynamics of mid-ocean ridges, geological fluid dynamics.
Wingley, Robert M. * 1991; PhD, 1985, University of Sydney (Australia); solar-terrestrial space plasma physics, excitation of waves, acceleration of high energy particles.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
GPHYS 402 Seismology (3) NW Introduction to theoretical and observational seismology. Basic theory of elastic plate wave propagation through homogeneous and stratified media. Surface waves and eigenfunctions. Ray theory. Structure of the earth's mantle and core. Seismicity distributions, earthquake focal mechanisms and their relationship to tectonics. Prerequisite: 401 or permission of instructor. Offered: W.
GPHYS 403 Geophysics: The Earth (3) NW The earth and its interior; gravity, magnetism, heat flow, seismology. Earth's outer structure, studied through the unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Prerequisites: 402 and PHYS 322 or permission of instructor. Offered: Sp.
GPHYS 404 Geophysics: The Ocean (3) NW Introduction to geophysical fluid dynamics. An overview of fluids in geophysics with emphasis on the oceans. A nonrigorous development of the equations of motion with examples drawn from dynamical oceanography.

Prerequisites: MATH 307 and 308 or equivalent and PHY S 323, or permission of instructor. Offered: A.

GPHYS 405 Geophysics: Space (3) NW Survey of various phenomena occurring in the outer regions of the earth's atmosphere, the ionosphere, the magnetosphere, and the Van Allen radiation belts. Behavior of charged particles in the geomagnetic field and simple concepts of plasma and magnetohydrodynamic waves. Prerequisite: PHYS 323 or equivalent. Offered: W.

GPHYS 406 Geophysics: The Atmosphere (3) NW Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics and fluid dynamics to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics. Prerequisite: 404 or permission of instructor. Offered: jointly with ATM S 406; Sp.

GPHYS 415 Principles of Glaciology (3) NW Hallet, Mayuk, Porter, Raymond, Stuiver, Warren Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow and erosion, ice sheets, sea ice, frozen ground, methods of paleoecologic reconstruction, Ice Age theories. Prerequisite: permission of instructor. Offered: jointly with GEOL 415; A.

GPHYS 425 NASA Science and Engineering Research Seminar (1) NW Parks Research of current cross-campus NASA research. Emphasis varies, but topics may include global change, the solar system, aeronautical engineering, and remote sensing. Credit/ no credit only. Offered: Sp.

GPHYS 431 Seismology and Earthquake Engineering (3) NW Evans, S. Smith: Overview of earthquake processes and details of the characteristics of destructive ground motion; effects of such motion on engineering structures; current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: MATH 307 and 308 or permission of instructor. Offered: jointly with CIVE 431; A.

GPHYS 432 Applied Seismology (2) NW Interpretation methods in seismology. Seismogram interpretation, including body and surface waves. Seismic instrumentation. Earthquake location, magnitude, and fault-plane solutions. Seismic reflection and refraction methods. Measurement and interpretation of strong ground motion near the epicenter of large earthquakes. Prerequisite: concurrent registration in 402, or permission of instructor. Offered: W.

GPHYS 452 Principles of Sediment Transport by Turbulent Flow (2) NW Fine Experimental techniques in studying erosion, transportation, and deposition of sediment. Initial motion of sediments, bed-load motion, suspension of sediment by turbulent flows, erosion and deposition of sediments, applications of sediment transport theory to problems of geological interest. Prerequisite: 455. Offered: jointly with GEOL/CE 452; Sp.

GPHYS 480 Special Topics in Geophysics (2-6, max. 12) NW Intensive treatment of a selected geophysical topic presented through faculty lectures, guest lectures, and student reports. For students in geophysics and related fields. Subject varies from year to year. Prerequisite: permission of instructor. Offered: S.

GPHYS 499 Independent Study for Undergraduates (1-5, max. 10) Prerequisite: permission of instructor. Offered: AWSp.
Courses for Graduates Only

GPHYS 504 Geophysical Data Collection and Analysis (3) Crosson Theory and practical application of data collection and analysis relating to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system. Offered: A.

GPHYS 505 Geophysical Inverse Theory (3) Booker Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Prerequisites: 504 and permission of instructor. Offered: odd years; Sp.

GPHYS 510 Physics of Ice (3) Raymond Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from the vapor and liquid phases. Physical properties of snow. Prerequisite: permission of instructor. Offered: jointly with ATM S 510; odd years; W.

GPHYS 511 Formation of Snow and Ice Masses (3) Warren Snow climatology. Transport of snow by wind. Transfer of radiation, sensible and latent heat at the surface of snow and ice. Freezing of natural water bodies. Heat and mass budget of ice masses. Remote sensing of snow and ice. Theories of ice ages. Prerequisite: permission of instructor. Offered: jointly with ATM S 511; alternate years; A.

GPHYS 512 Dynamics of Snow and Ice Masses (3) Raymond Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanches and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ATM S 512; odd years; Sp.

GPHYS 513 Structural Glaciology (3) Raymond Physical and chemical processes of snow stratigraphy and metamorphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironment. Dynamic metamorphism from ice flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relations between surface and sub-surface ice layers. Prerequisite: permission of instructor. Offered: jointly with ATM S 513; even years; W.

GPHYS 514 Ice and Climate Modeling (3) Warren Principles of global climate modeling. Modeling seasonal cycles of snow cover and sea ice. Ice-sheets and sea ice in the past and present. Back-casting the evolution of climates in earth's orbit. Climate/ice-sheets models of Pleistocene ice ages. Prerequisite: permission of instructor. Offered: jointly with ATM S 514; alternate years; A.

GPHYS 520 Seminar (1-2) Review of current literature in geophysics and graduate student research with emphasis on project participation. Credit/no credit only. Offered: AWSp.

GPHYS 522 Atmospheric Electric Dynamics (3) Holzworth Global and local dynamical electric field models, including upper atmospheric and tropospheric sources as modified by propagation delays, orographic features, and transient phenomena. Radiation and plasma waves along with microphysics of corona discharge and charge separation mechanisms. Prerequisites: 406 and 405, or permission of instructor. Offered: A.

GPHYS 523 Introduction to Solar-Terrestrial Physics (3) Holzworth Introduces the student to several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisites: PHYS 321, 322, 323 or permission of instructor. Offered: Sp.

GPHYS 532 Atmospheric Radiation: Shortwave (3) Warren Principles of radiative transfer in planetary atmospheres. Emphasis on simple and multiple scattering of visible and infrared radiation. Applications to atmospheric and surface energy balance and remote sensing. Prerequisite: PHYS 323 or permission of instructor. Offered: jointly with ATM S 532; alternate years; W.

GPHYS 533 Atmospheric Radiation: Longwave (3) Leovy, Warren Principles of radiative energy exchange in planetary atmospheres with emphasis on emission and absorption of infrared and microwave radiation. Applications to atmospheric and surface energy balance and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: jointly with ATM S 533; Sp.

GPHYS 535 Cloud Microphysics and Dynamics (3) Baker, Hobbs Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535; W.

GPHYS 539 Kinetic Theory and Simulation of Space Plasmas (3) Wingle Wave-particle interactions in space plasmas. Generation of different wave modes, electrostatic and electromagnetic, Langmuir waves, ion-acoustic waves, Weibel, and maser instabilities, heavy ion interactions. Particle simulation, electrostatic and electromagnetic, for non-linear wave evolution and particle heating. Offered: W.

GPHYS 540 Observational Seismology (1, max. 18) Creager, Crosson, Malone, Qamar Quarterly reports and discussions of the student's progress to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no credit only. Prerequisite: 402 or permission of instructor. Offered: joint with ATM S 540; W.

GPHYS 541, 542 Theoretical Seismology I, II (3, 3) Creager, Crosson, Smith Advanced theoretical seismology for elastic media. Perturbation solutions for the propagation of elastic waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory. WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisites: 401, 402, and PHYS 424, or permission of instructor for 541; 541 for 542. Offered: alternate years; Sp, A.

GPHYS 543 Low-Frequency Seismology (3) Creager Represent seismic displacement field, including surface and body waves, as superposition of normal modes. Rigorous development of equations of motion, their solution, energy integrals, Rayleigh's principle, perturbation theory, attenuation, and excitation formulae. Moment-tensor representation of seismic sources. Prerequisites: 401, 402, and PHYS 424 or permission of instructor. Offered: odd years; Sp.

GPHYS 555 Planetary Atmospheres (3) Leovy Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all planetary atmospheres; roles of radiation, chemistry, and dynamical processes; new results on the atmosphere of other planets and planets other than the earth; effects of solar system evolution on planetary atmospheres. Analysis of data from earth-based telescopes and unmanned space missions. Offered: jointly with AST/RGEOL 556; odd years; Sp.

GPHYS 556 Planetary Surfaces (3) Adams Comparison of surface processes and conditions on Mercury, Venus, Earth, moon, Mars, asteroids, and satellites of the great planets. Emphasis on understanding how and why planetary surfaces differ from one another and the implied course of solar system evolution. Analysis of data from earth-based telescopes and unmanned space missions. Offered: jointly with AST/RGEOL 556; W.

GPHYS 557 Origin of the Solar System (3) Brownlee Nebular and nonnebular theories of solar system origin; collapse from the intermediate medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; the physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with AST/RGEOL 557; W.

GPHYS 567 Geodynamics (3) Advanced study of various aspects of the dynamics of the solid Earth. Topics may include plate tectonics, mantle convection, rotational dynamics, post-glacial rebound, fault mechanics, and geodetic measurement of crustal deformation. Offered: odd years; A.

GPHYS 572 Stellar Physics (3) Brown, Merrill Applications of solid-state physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the earth's mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor. Offered: alternate years; W.

GPHYS 575 Physics and Chemistry of the Earth's Interior (3) Brown, Creager, Irving, Merrill Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography, mantle plumes, and the fate of subducting lithosphere and geochronological constraints on mantle convection. Prerequisite: permission of instructor. Offered: jointly with GEOI 575; A.

GPHYS 580 Special Topics in Geophysics (2-6, max. 12) Intensive treatment of a selected topic in geophysics presented by lectures or seminars for students in geophysics and related fields. Subject matter is selected from all areas in geophysics and varies from year to year. Prerequisite: permission of instructor. Offered: AWSp.

GPHYS 600 Independent Study or Research (*) Offered: AWSp.
Undergraduate Program

Advisor
Diana Behler
343 Denny

Bachelor of Arts Degree

Major Requirements: German Language and Literature—53 credits: (1) 15 credits to include: 311; 312; 322 or 323. (2) 15 credits from the group 411, 421, 422, or 423. (3) one course from 401, 402, 403, (4) 20 credits in upper-division Germanics (which may include 210, but not more than 4 credits of 395 and/or 396). Specialization in linguistics: Students must take 404, 405 as part of the 53 credits and may, with the adviser’s permission, count relevant courses outside Germanics among electives.

German Area Studies—50 credits: (1) 15 credits to include 322: 323: 311 or 312. (2) 16 credits from the group 210, 411, 421, 422, 423. (3) 20 credits in upper-division Germanics and/or, with the permission of the adviser, courses relevant to German culture and civilization offered by other departments. Not more than 4 credits of 395 and/or 396 may be counted.

For both options above, a grade of at least 2.0 must be earned in every upper-division German course; a 2.50 GPA must be maintained in these courses.

Graduate Program

Jane K. Brown, Graduate Program Coordinator

The Department of Germanics offers a closely integrated program leading to the Master of Arts and to the Doctor of Philosophy degrees. The doctoral curriculum requires a minimum of 36 credits, critical examination, and a master’s thesis or two papers. The study period of the doctoral program is two years (minimum number of post-master’s credits is 54). The completion of the necessary course work is followed by general written and oral examinations. A third doctoral year is reserved for the writing of the dissertation.

The M.A. and Ph.D. programs concentrate on German literature, civilization, and philosophical traditions, with an option to include Germanic linguistics and courses outside the department. The doctoral dissertation must be an original contribution to scholarship and must demonstrate mastery of the pertinent methods of investigation.

The Department of Germanics also participates in the joint-doctoral program in literature and critical theory. Study in this program leads to a Ph.D. in Germanics and Critical Theory. For details see the program description under Comparative Literature.

Special Requirements

Aspirants for advanced degrees in German must have the equivalent of an undergraduate major in German. A reading knowledge of one foreign language (usually German) is a prerequisite for the M.A. degree. Reading knowledge of a second language is required before the student is admitted to the Ph.D. General Examination. The languages chosen are subject to approval by the department.

Financial Aid

A limited number of teaching assistantships are available. The teaching load consists of a five-hour course on the first- or second-year level. The teaching assistants are supervised by experienced faculty members.

Faculty

Chairperson
Richard T. Gray

Professors
Behler, Diana L. * 1969; PhD, 1970, University of Washington; romanticism, nineteenth century, comparative literature.

Gray, Richard T. * 1991; PhD, 1981, University of Virginia; eighteenth-, nineteenth- and early-twentieth-century literature, literary sociology, critical theory.

Behler, Ernst H. * 1965; PhD, 1951, University of Munich (Germany); Romanticism, literary theory, history of criticism.

Brown, Jane K. * 1988; PhD, 1971, Yale University; seventeenth, eighteenth and nineteenth century, comparative literature.

Hertling, Gunter H. * 1961; PhD, 1963, University of California (Berkeley); eighteenth- and nineteenth-century literature.

Hruby, Antonin F. * 1961, (Emeritus); PhD, 1946, Charles University (Czechoslovakia); medieval literature, comparative literature.

Jaeger, C. Stephen * 1985; PhD, 1970, University of California (Berkeley); medieval German and Latin literature, medieval intellectual history, comparative literature.

Rey, William H. 1950, (Emeritus); PhD, 1937, University of Frankfurt (Germany); nineteenth- and twentieth-century German literature.

Voiles, Joseph B. * 1965; PhD, 1965, Indiana University; Germanics and linguistics.

Associate Professors
Ammerlahn, Hellmut H. * 1966; PhD, 1965, University of Texas (Austin); Goethe, eighteenth to early twentieth century, comparative literature.

Bansleben, Manfred * 1980; PhD, 1979, University of Vienna (Austria); German language and methodology, history, culture studies.

Barrack, Charles M. * 1968; PhD, 1969, University of Washington; Germanic linguistics.

McLean, Sammy K. * 1967, (Emeritus); PhD, 1963, University of Michigan; Western drama, twentieth-century poetry, psychoanalysis and literature, translation.

Raab, Horst M. * 1983, (Emeritus); MA, 1966, University of Washington; German language and methodology.

Sauerlander, Anne M. 1949, (Emeritus); PhD, 1936, Cornell University; Germanics.

Wilke, Sabine * 1988; PhD, 1985, University of Mainz (Germany); critical theory, contemporary theater and film, literature and philosophy.

Wilke, Richard 1937, (Emeritus); PhD, 1953, University of California (Berkeley); Germanics.

Assistant Professors
Ostmeier, Dorothea 1993; PhD, 1993, Johns Hopkins University; eighteenth- and twentieth-century literature and philosophy, critical theory, German studies.

Prutti, Brigitte * 1991; DPhil, 1988, University of Graz (Austria); eighteenth-century literature, twentith-century Austrian literature, theory and history of drama.

Wiedmer, Caroline 1993; PhD, 1994, Princeton University; German and Swiss literatures of the twentieth century, Holocaust, film, cultural studies.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Lists of names under various literature courses indicate the kind of material covered but are neither comprehensive nor exclusive of other significant features. Detailed descriptions of courses are published by the Department of Germanics prior to registration each quarter.

GERM 100 Intensive First-Year German (15) Accelerated first-year German. Speaking and listening. Secondary objectives are reading and writing. Offered: S.

GERM 101, 102, 103 First-Year German (5,5,5) The methods and objectives are primarily audio-lingual, with emphasis on speaking and listening. Secondary objectives are reading and writing. (See credit note following 104.) Offered: A, W, AWSp.

GERM 104 Individualized First-Year German (1-15) Individualized approach to elementary German instruction. Students progress at their own pace. Credits vary. Depending upon amount of material mastered, any number of credits up to 15 may be earned per quarter. (See credit note following 104.) Credit/no credit only.

Credit Restrictions: Students may receive credit for only one course in each of the following: 101, 102, 103, and the first 5 credits of 104; 102, 111, and the second 5 credits of 104; 103 and the last 5 credits of 104. They may, however, receive credit for courses in different first-year sequences if the courses are taken in progression, not advanced order (e.g., the first 5 credits of 104 followed by 102 and 103). 100 is the equivalent of 101, 102, 103, or 15 credits of 104.

GERM 111 Basic German Review (5) Combines in one quarter the contents of 101 and 102. Designed for students with background in German who however feel unprepared to take 102. Highly motivated beginners are also encouraged to take the course. Offered: A.

GERM 121, 122 First-Year Reading German (5,5) Special beginning course devoted exclusively to the reading objective; 122 continuation of 121. Offered: AS, WS.

GERM 150 Conversational German Through Films (2, max. 6) Conversational practice in small groups based on films. Because films progresses through the year, beginners may enroll only Autumn Quarter. May be taken concurrently with other Germanics courses. Cannot be taken for credit if 250 previously taken. Offered: AWSp.

GERM 200 Intensive Second-Year German (15) VLP A Accelerated second-year German. Systematic review of German grammar. Intensive practice in conversational reading and writing. Prerequisite: 103 or equivalent. Offered: S.
GERM 201, 202, 203 Second-Year German (3-5,5) VLPA Systematic review of German grammar. Intensive practice in conversation, reading, and writing. Prerequisites: 103 for 201; 203 for 202 or 202, 203 or equivalent. Offered: AWSp, AWSp, AWSp.

GERM 221 The German Express: Second Year (10) VLPA Intensive version of 201 and 202. Stresses development of reading and speaking skills. Limited to students who have demonstrated exceptional skills in first-year German. Offered: A.

GERM 230 Conversational German (5) VLPA Intensive conversational German. Prerequisite: 103 or equivalent. Offered: S.

GERM 250 Advanced Conversational German Through Films (2, max. 6) VLPA Conversational practice in small groups based on films. May be taken concurrently with other Germanics courses. Offered: AWSp.

GERM 299 Supervised Study (1-5, max. 10) VLPA Prerequisite: permission of department advisor.

GERM 300 Studies In Germanics (3-5) VLPA Topics on courses of Germanic literature or language. German texts. Prerequisite: 15 credits in second-year German or equivalent.

GERM 301, 302, 303 Conversation and Writing Skills (3-5; 3-5; 3-5) VLPA Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Prerequisite: 203 or diagnostic exam. Offered: AW, WSp, Sp.

GERM 311 Critical Approaches to German Literature (3-5) VLPA Introduction to literary terminology. Diverse interpretive strategies, ranging from close reading to biographical and sociopolitical approaches. Characteristics of different genres (poetry, prose, drama). Readings primarily from twentieth-century literature. Prerequisite: second-year German or equivalent permision of instructor. Offered: A.

GERM 312 Historical Approaches to German Literature (3-5) VLPA German literature from the Middle Ages to the present: Medieval Courtly period, Baroque, Enlightenment, Storm and Stress; Classicism, Romanticism, Realism, Neo-romanticism, Expressionism. Prerequisite: reading knowledge of German. Offered: W.

GERM 313 Major Figures of German Literature (3-5) VLPA Focus on major figure such as Goethe, Schiller, Kleist, Fontane, Thomas Mann, Kafka. Emphasis on his/her cultural and sociopolitical contexts. Literary and nonliterary texts, including film, art, political, historical, and philosophical texts. Prerequisite: second-year German or permission of instructor. Offered: Sp.

GERM 322 Introduction to German Studies (3-5) VLPA German quest for national identity and the conflict of unity and division. Readings from literature, history, politics, and anthropology. Prerequisite: reading knowledge of German. Offered: W.

GERM 323 Institutions and Their Ideas (3-5) VLPA/AS Analysis of central institutions of contemporary Germany in their historical development. Prerequisite: reading knowledge of German. Offered: Sp.

GERM 333 Business German I (5) VLPA Introduction to the language and practices of German business. Covers marketing, finance, accounting, economic system, stock exchange, shipping, and production. Prerequisite: two years college-level German. Offered: A.

GERM 334 Business German 2 (5) VLPA Introduction to the language and practices of German business. Covers industry, accounting, banking, and international trade. Prerequisite: 333 or equivalent. Offered: W.

GERM 395 Proctoring of First-Year German Film Course (1-2, max. 6) VLPA Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups of participants in 150. Discussion group leaders (proctors) may participate one or two hours per week and receive 1 credit for each hour in class with 6 credits allowed in 3 quarters. Offered: AWSp.

GERM 396 Proctoring of Second-Year German Film Course (1-2, max. 6) VLPA Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups of participants in 250. Discussion group leaders (proctors) may participate one or two hours per week and receive 1 credit for each hour in class with 6 credits allowed in 3 quarters. Offered: AWSp.

GERM 401, 402, 403 Advanced Writing and Conversation (3-5; 3-5; 5-5) VLPA Texts and exercises, stylistic awareness, and the practical application of grammatical rules in written German. Prerequisite: 303 or diagnostic exam. Offered: AWSp.

GERM 404 History of the German Language (3-5) VLPA From early Germanic to the present. Prerequisite: third-year German or permission of instructor.

GERM 405 Linguistic Analysis of German (3-5) VLPA Prerequisite: third-year German or permission of instructor.

GERM 411 Studies In Medieval Literature and Culture (5) VLPA Rotating special topics in literature and culture of the Middle Ages, such as particular movements, authors, genres, themes, or problems.

GERM 412 Studies In Renaissance and Baroque Literature and Culture and (5) VLPA Rotating special topics in literature and culture of the Renaissance and Baroque, such as particular movements, authors, genres, themes, or problems.

GERM 421 Studies In Eighteenth-Century Literature and Culture and (5) VLPA Rotating special topics in literature and culture of the eighteenth century, such as particular movements, authors, genres, themes, or problems.

GERM 422 Studies In Nineteenth-Century Literature and Culture and (5) VLPA Rotating special topics in literature and culture of the nineteenth century, such as particular movements, authors, genres, themes, or problems.

GERM 423 Studies In Twentieth-Century Literature and Culture (5) VLPA Rotating special topics in literature and culture of the twentieth century, such as particular movements, authors, genres, themes, or problems.

GERM 444 Undergraduate Thesis in Germanics (5) VLPA Supervised research leading to the writing of a research thesis.

GERM 445 Undergraduate Honors Thesis In Germanics (5) VLPA Supervised research for honors students leading to the writing of an honors thesis.

GERM 473 Teaching of College-Level German (1, max. 9) VLPA For teaching assistants only.

GERM 490 Contemporary German Literature (3-5) VLPA Interpretation of selected works by contemporary German authors.

GERM 494 Studies In German Poetry (3-5) VLPA Introduction to the methods of interpretation and to their practical application.

GERM 495 Seminar in German Literature (3-5, max. 15) VLPA Special topics, the subject matter and depth of which are not included in other literature courses, arranged through consultation among students and faculty members. Prerequisite: 15 credits in third-year German or permission of Instructor.

GERM 498 History of Germanic Philology (3-5) VLPA Introduction to the works of outstanding scholars in the field of Germanics.

GERM 499 Studies In German Literature (1-6, max. 15)

GERM 500 Studies In the German Language (1-6, max. 15)

GERM 509 Studies In German Culture (1-6, max. 15)

Courses In English

GERM 210 Clasalas of German Literature and Thought (5) VLPA Introduction to major figures of German culture from the Reformation to the present, their contribution to the intellectual life of the Western world. Luther, Kant, Goethe, Schopenhauer, Marx, Freud, Nietzsche, Kafka, Brecht, and Mann.

GERM 340 Friedrich Nietzsche In English (3-5) VLPA/IS Analysis of Friedrich Nietzsche's chief works and the discussion of his position within modern German literature and thought.

GERM 341 Franz Kafka In English (3-5) VLPA Short stories and novels of Franz Kafka; emphasis on philosophical relevance and esthetic significance.

GERM 342 Thomas Mann In English (3-5) VLPA

GERM 345 Bertolt Brecht In English (3-5) VLPA Brecht's life and work, particularly his plays and writings on theatre, and some poems and short prose pieces to provide additional perspective on his life and work as a whole. The development of his writing and of his ideas and attitudes.

GERM 346 The Contemporary German Novel In English (3-5) VLPA Major novels of the postwar period (1945 to present), discussed in their historical context. Contrasts between West and East German writers, such as Mann, Frisch, Grass, Böll, Lenz, Wolf, and Plenzdorf.

GERM 349 Goethe In English (3-5) VLPA Selected major works (especially Faust) of Goethe, whose literary, philosophical, and scientific achievements are examined as integral parts of his quest for meaning, wholeness, and universality, and whose impact on Western thinking is traced up to Thomas Mann and G. Jung.

GERM 350 The German Drama In English (3-5) VLPA German drama from the eighteenth to the twentieth centuries. German history and culture as reflected in the plays. Discussion of major themes.

GERM 351 Vienna 1900 In English (3-5) VLPA/IS Interdisciplinary study of Vienna at the turn of the century. Discussion of literary texts with emphasis on other intellectual and cultural trends of this very rich and complex period.

GERM 352 Literature and Society In Weimar and National Socialist Germany In English (3-5) VLPA/IS Literature, theater, and film, with adjacent consideration of art and architecture, in relation to the German social and cultural situation circa 1918 to circa 1947.

GERM 353 Postwar Germany (3-5) VLPA/IS Postwar development and present-day character of cultural, social, and political life in Germany. Readings include literary and nonliterary texts devoted to culture and everyday life.

GERM 355 German Literature and Film In English (3-5) VLPA Relationship between literature and film in the German tradition. Content varies; focus may be on a particular time period, director, or theme. Special attention paid to critical and analytical skills required for interpreting the two mediums.

GERM 356 Pagan Germany: Myth, Religion, Folklore In English (3-5) VLPA/IS Jaeger History and
culture of the German peoples before and during the conversion to Christianity. Readings include Tacitus's Germania and other historical sources, Sueton, Nibelungenlied, Grimm's Fairy Tales, and German legal ends. Treatment of archaeological finds and a variety of materials that bear on religion, prophecy, magic, folk customs, and festivals.

GERM 390 Germanic Studies in English (3/5, max. 15) VLPA Topics or figures of German literature or language.

Courses for Graduates Only

GERM 300 Women in German Literature in English (5) Investigates the changing social roles of women in German society on the example of various literary texts from different periods.

GERM 360 Modern Methods and Materials in Teaching German literature and language (3/5, max. 15) Credit/no credit only.

GERM 300 Modern German Drama (3-5, max. 15) Representative selections from Hölderlin, the late Goethe, and from prevalent trends in nineteenth-century poetry, such as romanticism, "Young Germany," poetic realism, and the experimental poetry of naturalism.

GERM 529 Seminar in Eighteenth-Century Literature (3-5, max. 15) Study of one or more of the literary movements: Enlightenment, sentimentalism, encyclopedism, and the work of two authors such as Gottsched, Bodmer, Gellert, Lessing, Wieland, Klopstock, Herder, Lenz, Goethe, Schiller, Jean Paul.

GERM 354 Seminar in the German Literature of the Nineteenth Century (3-5, max. 15) Exegetical investigation of the connections and forms of the works of Kusnetzoff and of the work of a principal author such as Hoffmann, Heine, Leopold, Hoffmann, Heine, and Eich.

GERM 530 Seminar in Nineteenth-Century Drama (3-5, max. 15) Seminar in the German literature of the nineteenth century, with the emphasis on the Nibelungenlied and the Dietrichsök.

GERM 575 Teaching of German Literature and Civilization (3) Teaching of German language and literature on the advanced level in secondary schools and colleges. Credit/no credit only.

GERM 576 Modern Methods and Materials in Teaching German (3) The audiovisual and its application; current developments in foreign-language teaching; evaluation of teaching materials. Credit/no credit only.

GERM 577 Principles of Second Language Learning (2)

GERM 580 Seminar in German Literature (3/5, max. 15) Open topics seminar with varying content.

GERM 581 Seminar in Poetry (3/5, max. 15) Open topics seminar with varying content.

GERM 582 Seminar in Drama (3/5, max. 15) Open topics seminar with varying content.

GERM 583 Seminar in Prose (3/5, max. 15) Open topics seminar with varying content.

GERM 590 Philosophical Issues in German Culture (5, max. 15) Seminar on the special topics dealing with the impact of particular thinkers, movements, or philosophical problems in German culture.

GERM 591 Studies in German Intellectual History (5, max. 15) Seminar on the special topics dealing with the social and political problems of German life and culture.

GERM 600 Independent Study or Research (*)

GERM 700 Master's Thesis (*)

GERM 800 Doctoral Dissertation (*)

History

315 Smith

History undertakes the study of human affairs in a manner that seeks to understand change and development rather than the state of things at a given moment, taking into account societies in diverse parts of the world from the earliest times for which written records exist to the present.

Undergraduate Program

Advisers

206A Smith

Bachelor of Arts Degree

Admission Requirements: 10 credits in history with minimum 2.50 GPA; 10 credits composition/writing with minimum 2.0 grade in each course. For the history and science emphasis, 10 credits of college-level science also are required.

Major Requirements: 55 credits in history with minimum GPA of 2.25 in all history courses and minimum 2.0 grade in all history courses taken to fulfill requirements
for the major. At least 5 credits each of ancient, medi­eval, modern European, and United States history (HST 111, 112, 113, and HSTAA 201 or upper-division course, must be in courses outside the United States. One must prove substitutions for the basic courses) plus an addi­tional 5 credits in the history of some area or nation outside Europe, the United States, and Canada. At least 25 upper-division credits. One undergraduate seminar or colloquium is required, and each history degree candidate must write at least one major paper in an upper-division course. Beyond the required sub­jects, the student may or may not specialize, depend­ing upon personal interests and career plans. In ad­dition to all courses with the prefix HST, the history major may include approved courses offered outside the Department of History. A short list of these courses is main­tained by undergraduate advisers. Transfer stu­dents are required to complete a minimum of 25 upper-division credits in history at the UW.

History and Science Emphasis: 55 credits in history with minimum GPA of 2.25 in all history courses and minimum 2.0 grade in all history courses taken to fulfill requirements for the major. Requirements include 15 credits of HST 311, 312 and one additional approved course in the history of science, technology, and medicine; 5 credits for junior colloquium; 10 credits for senior thesis; of the remaining 25 credits in history at least 10 must be taken outside the history of science and must include at least one course each in European history, American history, and an area or nation outside Europe, the United States, and Canada; 35 credits of natural and social sciences to include at least 20 credits above the 100 level in the same Natural World department. Natural World courses are to be chosen from astronomy, atmospheric sciences, biol­ogy, botany, chemistry, computer science, environ­mental studies, geological sciences, mathematics, physics, psychology, and zoology.

Minor

Minor Requirements: 30 credits of history, of which 20 must be upper-division, with a minimum grade of 2.0 in each course applied toward the minor. A minimum of 15 of the 20 upper-division credits must be completed at the UW.

Graduate Program

R. Kent Guy, Graduate Program Coordinator

The Department of History offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in a large number of fields within the discipline. Students in the programs can prepare for careers as college teachers who combine teaching with scholarship and professional writing, or for positions as archivists, librarians, or editors. A few graduates enter government service, college administration, or publi­cations. The M.A. program is normally completed in four or five full academic quarters or their equivalent. The Ph.D. program requires at least three years of full-time work beyond the M.A. degree. Graduate training at both levels includes (1) course work or independent study leading to examinations in special historical fields, and (2) sustained investigation and interpreta­tion of historical problems in seminars involving the writing of essays and a thesis.

Special Requirements

Admission to the graduate program requires a sound undergraduate major in history or in one of the basic disciplines related to history completed within a college of liberal arts and sciences. The department also requires evidence of the applicant’s ability to write cogently and lucidly and to interpret historical data.

Financial Aid

Beginning graduate students may qualify for a limited number of fellowships, readerships, and work study assistantships. Students with, or who expect to re­ceive, the M.A. degree by the time they begin their studies may apply for teaching assistantships and may, with continued satisfactory scholarly progress, expect reappointment for a total of three years, provided ade­quate funds are available.

Professors

Alden, Dauri * 1959; PhD, 1959, University of California (Berkeley); Latin American history, comparative colo­nial history.

Bacharach, Jere L. * 1967; PhD, 1967, University of Michigan; history of the Middle East, Islamic.

Benson, Keith R. * 1981, (Adjunct); PhD, 1979, Oregon State University; history of modern American biology, marine biology, and evolutionary biology.

Bergquist, Charles W. * 1989; PhD, 1973, Stanford University; modern Latin American history, compar­ative labor history, Third World development.

Bestor, Arthur 1961, (Emeritus); PhD, 1938, Yale University; American constitutional and legal history.

Bobo, Imre * 1962, (Emeritus); PhD, 1962, University of Washington; Russian and East European history.

Bridgman, Jon M. * 1961; PhD, 1960, Stanford University; modern European history (especially military).

Burke, Robert E. * 1957, (Emeritus); PhD, 1950, University of California (Berkeley); American political and social history in the twentieth century.

Butow, Robert J. C. * 1960, (Emeritus); PhD, 1953, Stanford University; East Asian diplomatic history.

Chan, Hok-Lam * 1972, (Adjunct); PhD, 1967, Princeton University; late traditional China.

Conlon, Frank F. * 1966; PhD, 1969, University of Minnesota; history of India.

Ellison, Herbert J. * 1958; PhD, 1955, University of London (UK); modern Russian history.

Fauri, Arthur L. * 1964; PhD, 1964, University of Illinois; ancient Rome, military history.

Fowler, William B. * 1969; PhD, 1966, Yale University; American history (especially diplomatic).

Gil, Carlos * 1974; PhD, 1975, University of California (Los Angeles); Latin America and history of the Chicano people.

Griffiths, Gordon 1959, (Emeritus); PhD, 1942, University of California (Berkeley); Renaissance and Reforma­tion.

Hankins, Thomas L. * 1964; PhD, 1964, Cornell University; history of science.

Hanley, Susan B. * 1973, (Adjunct); PhD, 1971, Yale University; premodern Japan.

Johnson, Richard R. * 1972; PhD, 1972, University of California (Berkeley); United States colonial history.

Kirkendall, Richard S. * 1988; PhD, 1958, University of Wisconsin; recent United States history.

Levy, Fred J. * 1960; PhD, 1960, Harvard University; history of England in the sixteenth and seventeenth centuries, English historiography.

Palais, James B. * 1968; PhD, 1968, Harvard University; modern Korean history.

Pease, Oils A. * 1966; PhD, 1954, Yale University; United States in the twentieth century.

Pressly, Thomas J. * 1949, (Emeritus); PhD, 1949, Harvard University; nineteenth century U.S., Civil War and Reconstruction.

Pyle, Kenneth B. * 1964; PhD, 1965, Johns Hopkins University; modern Japanese history.

Ramet, Sabrina P. * 1983, (Adjunct); PhD, 1981, University of California (Los Angeles); politics and history of former Yugoslavia; Eastern European religion and culture.

Rorabaugh, William J. * 1976; PhD, 1976, University of California (Berkeley); United States social history.

Saum, Lewis O. * 1965; PhD, 1962, University of Mis­souri; American intellectual history.

Sugar, Peter * 1959, (Emeritus); PhD, 1959, Princeton University; political and economic history of eastern Europe and Near East since the eighteenth century.

Sullivan, Woodruff T. III * 1973, (Adjunct); PhD, 1971, University of Maryland; radio astronomy, galactic and extragalactic structure, history of astronomy.

Thomas, Carol G. * 1964; PhD, 1965, Northwestern University; ancient Greece.

Toews, John E. * 1979; PhD, 1973, Harvard University; modern European intellectual history.

Treadgold, Donald W. * 1949, (Emeritus); PhD, 1950, Oxford University (UK); modern Russian and Chinese history.

Ultman, Joan Connelly * 1966; PhD, 1963, Bryn Mawr College; modern Spain.

Walter, John C. * 1989, (Adjunct); PhD, 1972, University of Maine; African American history, American women’s history, the New Deal.

White, Richard * 1990; PhD, 1975, University of Wash­ington; American West, American Indian, environmen­tal history.

Whorton, James C. * 1970, (Adjunct); PhD, 1989, Uni­versity of Wisconsin; history of American medicine, public health, alternative healing, pharmacy and biochemistry.

Associate Professors

Behlmer, George K. * 1979; PhD, 1977, Stanford Univer­sity; modern English history.

Dull, Jack L. * 1959; PhD, 1966, University of Washing­ton; early Imperial Chinese history.

Emerson, Donald E. * 1946, (Emeritus); PhD, 1942, Johns Hopkins University; modern German history.

Findlay, John M. * 1987; PhD, 1982, University of California (Berkeley); history of the American West.

Gamboa, Erasmo 1976, (Adjunct); PhD, 1984, Univer­sity of Washington; history, Chicano experience, Pa­cific Northwest.

Glann, Susan A. * 1993; PhD, 1983, University of Cali­fornia (Berkeley); twentieth-century U.S. social history including women’s history, immigration, labor, popular culture.

Gregory, James N. * 1993; PhD, 1983, University of California (Berkeley); U.S. social and political history since 1865, labor, the West.

Guy, R. Kent * 1980; PhD, 1981, Harvard University; modern Chinese history.

Jonas, Raymond A. * 1985; PhD, 1985, University of California (Berkeley); modern France.

Kieval, Hillil J. * 1985; PhD, 1981, Harvard University; modern Jewish history; modern European history (Central and Eastern Europe).

Leiren, Terje I. * 1977, (Adjunct); PhD, 1978, North Texas State University; Scandinavian history, area studies, immigration, Norwegian language.

Assistant Professors

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
Upper-division courses (300 and 400 levels) in the Department of History do not generally require prerequisites. Most 400-level courses deal with a single nation during a limited period. The 300-level courses deal with broader subjects at a relatively advanced level. Both are primarily for juniors and seniors, but they are open to freshmen and sophomores with an interest or background in the subject of the course.

History
HST 111 The Ancient World (5) I&S Ferrill, C. Thomas Origins of Western civilization to the fall of Rome. HST 112 The Medieval World (5) I&S Bacharach, Stacey Political, economic, social, and intellectual history of the Middle Ages. Cannot be taken for credit toward a history major if HSTAM 331 or 332 or 333 previously taken. HST 113 The Modern World (5) I&S Felak Political, economic, social, and intellectual history of modern Europe. Cannot be taken for credit toward a history major if HSTEU 302 or 303 previously taken. HST 140 Russia from the Tenth Century to the Present (5) I&S Waugh Russian political, social, and economic history from the tenth century to the present. Offered: jointly with SISRE 140. HST 192 The Historian as Detective (5) I&S Examples illustrate how "clues" from the past are used by historians to build inferential "cases", collection, analysis, and interpretation of evidence as a historical method. Open to all students. Recommended for history honors students. HST 199 Foreign Study (3-5, max. 10) I&S LOWER-division history courses, for which there are no direct University of Washington equivalents, taken through the University of Washington Foreign Study Program. HST 204 Europe and America in the Era of the World Wars (5) I&S Bridgman Declining role of Europe in the world and rise of the United States from 1914 to 1945. HST 207 Introduction to Intellectual History (5) I&S Towes Ideas in historical context, Comparative and developmental analysis of Western conceptions of "community", from Plato to Freud. Offered: jointly with CHID 207. HST 215 The History of the Atomic Bomb (5) I&S Hankins History of the atomic bomb from the beginning of nuclear physics to the security hearing of J. Robert Oppenheimer, including the scientific achievements that made the bomb possible, the decision to deploy the bomb, the moral misgivings of the scientists involved. HST 250 The Jews in Western Civilization (5) I&S Kieval History of the Jews from late antiquity to the present. Examines the relationship between Jewish communities and the larger societies in which they are found. HST 261 Survey of the Muslim Near East (5) I&S Bacharach The Middle East (the Arab countries, Israel, Turkey, Iran, and Afghanistan) from the emergence of Islam in AD 622 to the present: culture, economics, politics. HST 283 Introduction to Women's History (5) I&S Yee Includes units on American, European, and Third World women that examine centers of women's activities (convents, women's clubs), women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (economic, psychological, ideology, colonization). Offered: jointly with WOMEN 283. HST 284 Honors Historiography (5) I&S Levy Readings in the great historians, from the earliest time to the beginning of the twentieth century. Investigates how perception of the human past has altered our times. Recommended for students in the department's honors program, but also open to nonhonors students. HST 307 History of Christianity (5) I&S Christian religion, including doctrine, practice, church organization, and culture, from the time of Jesus Christ to the present. No attempt to avoid the controversial aspects of the topic is made, but the necessity of finding argument on knowledge is stressed. HST 309 Marx and Nietzsche: The Assault on Bourgeois-Christian Civilization (5) I&S Towes Major themes and conflicts of modern Western consciousness through historical analysis of Marx, Nietzsche, and the movements they spawned. Emphasis on the relationship between sociocultural change, religious, and ideological innovation. Recommended: 113 or 207. HST 310 Science and Religion in Historical Perspective (5) I&S Hankins Scientific and religious ideas have been two of the major forces shaping our modern view of the world. Often regarded as being in conflict, they can equally well be seen as complimentary and interdependent. Study of the relationship between scientific and religious ideas with focus on particular episodes of history from ancient to modern times. HST 311 Science in Civilization: Antiquity to 1600 (5) I&S Hankins, Hevly From preclassical antiquity to the end of the Middle Ages, stressing the growth of scientific ideas in the cultural context in which they took shape, and their relationship to other movements of thought in the history of civilization. HST 312 Science in Civilization: Science in Modern Society (5) I&S Hankins Growth of modern science since the Renaissance, emphasizing the scientific revolution of the seventeenth century, the development of methodology, and the emergence of new fields of interest and new modes of thought. HST 313 Science in Civilization: Physics and Astrophysics Since 1850 (5) I&S/NW Hankins, Hevly, Sullivan Organization and pursuit of the physical and astrophysical sciences, focusing on the major unifying principles of physics and astronomy and the social and cultural settings in which they were created. Offered: jointly with ASTR 313. HST 314 The Psychoanalytic Revolution in Historical Perspective (5) I&S Towes Genesis and evolution of Freudian theory in context of the crisis of liberal-bourgeois culture in central Europe and parallel developments in philosophy, literature, and social theory. Focus on science and discourses on the health and psychic movements. Transformation of psychoanalysis as it was absorbed into British, French, and especially American cultural traditions. Recommended: 207 and 113 or HSTEU 303. HST 315 History of Technology to 1940 (5) I&S Hevly Technology since the Middle Ages, in its social and historical contexts. From the medieval foundations of metal working, its social consequences and the establishment of a class of engineering practitioners, to the transformation of American rural life, domestic technology, and industry before World War II. HST 335 The United States and Vietnam (5) I&S Fowler American involvement in Vietnam, including: the complex of negotiations; strategies and objectives of both sides; military, political, and economic operations of the United States; efforts at pacification; impact of Vietnam on American affairs. HST 345 War and Society (5) I&S Bridgman Analysis of the techniques of war from the Renaissance to the present with consideration of the social, political, and economic consequences of war in the Western world. HST 346 Images of War in History, Literature, and Media (5) VLP A/I&S/ Sears Explore images of war generated by historians, writers, artists, filmmakers, television producers, and journalists, analyzing the perspectives on war adopted by various observers to see what motivates their representations. Focuses on ways in which various media shape images of war and the effect of this shaping on human consciousness. HST 351 Slavery in History: A Comparative Study (5) I&S Bacharach Slavery as a universal historical phenomenon lending itself to a comparative analysis is studied in terms of its philosophicaljustifications, economic importance, and local practices. The following historical periods are surveyed: the ancient Near East, Greece, Rome, Islam, Africa, Latin America, and North America. HST 353 The Middle East Near East (5) I&S Bacharach The Middle East, scene of some of the most significant military events in modern world history, with focus on the repercussions for participants in terms of political and psychological changes. Resident military specialists supplement the historical approach by analyzing the battles and wars on these terms. HST 370 History of the Expansion of Islam (5) I&S Bacharach, Conlon Comparative perspective on the expansion of the religion and community of Islam from its origins to the modern age. Patterns and processes of expansion, conversion, and social and cultural assimilation in a number of world regions (e.g., the Arab
World, Iberia, Anatolia, West Africa, Iran, India, and Southeast Asia). Specific case studies of Islam in its regional setting (e.g., South Asia).

HST 390 Colloquium in History and Science (5) I&S Hankins Study in the history of science to bridge the gap between the natural sciences and the humanities. Students should have a strong background both in history and in a natural science. Prerequisite: permission of instructor or adviser.

HST 395 Modern Historical Writing, Honors Seminar (5) I&S McKenzie New types of problems examined by historians and new techniques that have evolved for solution. Brief historiographical introduction, reaching back to the "scientific" historians of the mid-nineteenth century, then continues by examining the impact on historians of new disciplines such as psychology, sociology, and economics, and of new techniques such as statistics and prosopography. Readings are in the theorists and in those who followed their lead. Admission by departmental invitation only.

HST 398 Advanced Historical Detection (5) I&S Examination of varieties of historical evidence and analysis by contemporary historians; discussion of weekly readings, some in common, others individually selected from three short papers, one based upon original research in University of Washington manuscript holdings. Prerequisites: 10 credits history (or equivalent), junior standing and permission of instructor.

HST 399 Advanced Foreign Study (3-5, max. 15) I&S Upper-division history courses, for which there are no direct University of Washington equivalents, taken through the University of Washington Foreign Study Program.

HST 412 Science and the Enlightenment (5) I&S Hankins The role of science in relation to intellectual, social, economic, and religious forces in the eighteenth century, and growth of the international community in science during the same period.

HST 425 History of the British Empire and Commonwealth Since 1783 (5) I&S Britain in the Caribbean, Africa, India, Southeast Asia, and the Pacific; and the settlement, economic development, and political evolution of Canada, Australia, New Zealand, and South Africa.

HST 449 Issues in Comparative Labor History (5) I&S Role of labor in the modern world. Emphasis on conditions of work and leisure in the United States, Europe, Canada, and other nations, social forces, and class struggle. Cross-registration with other social science courses, and the availability of original sources among national societies on the conceptual, research, and expository strategies of contemporary students of the labor movement and on differences and relationships between labor in developed and underdeveloped countries.

HST 461 History of the Middle East: 622-1200 (5) I&S Bacharach Historical and economic analysis of the period circa AD 600, preliminary to rise of Islam, arrival of the Turks. Muhammad's teaching and impact; Islamization and Arabization.

HST 462 History of the Middle East: 1250-1798 (5) I&S Bacharach Conquests by successors of Ghenghis Khan; creation in Egypt, Syria, and Iran of cavalry-based states on line of political, social, and economic history by Ottoman and Safavid empires. The Napoleonic invasion.

HST 463 History of the Middle East Since 1798 (5) I&S Bacharach Critical issues and themes in the changing Middle East, including Ottoman decline, nationalism, Arab-Israeli dispute, Iranian revolution, and the role of Islam.

HST 467 Nations and States in the Modern World (5) I&S Development of national consciousness in the "old nations" of Europe before the French Revolution. Replacement by nationalism, spreading into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with SIS 467.

HST 481 Economic History of Europe (5) I&S R. Thomas Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Recommended: ECON 200, 201. Offered: jointly with ECON 400.

HST 490 Senior Thesis (5, max. 10) I&S Benson Preparation of the senior thesis for the History and Science emphasis.

HST 491-492 Honors Historical Method (5-5) I&S The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism.

HST 495 History Internship (1-5, max. 10) Off-campus independent fieldwork, with a community agency in an apprenticeship or internship situation. Work to be jointly supervised by a member of the History Department and an on-site field supervisor.

HST 496-497 Public and Local History (5-5) I&S Findlay Reviews the nonacademic applications of history (museums, parks, business, archives, planning, policy-making, popular media). Includes directed study of local topics in oral and applied setting. Students ordinarily undertake a lengthy research project in an internship-like role. Prerequisite: permission of instructor.

HST 498 Colloquium in History (3-5, max. 15) I&S Each seminar examines a different subject or problem. A quarterly list of the seminars and their instructors is available in the advising office. Students must have the permission of the instructor of the seminar in which they plan to enroll.

HST 499 Undergraduate Research (1-5, max. 15) History of the Americas

HSTAA 135 The American People and Their Culture in the Modern Era: A History of the United States Since 1940 (5) I&S Kirkendall, Pease Through study of documents, personal testimony, and other source materials, through written reports on historical problems, and through discussions, lectures, films, and audiovisual presentations, students are encouraged to examine evidence and to think "historically" about persons, events, and movements within the memory of their own generation and that immediately preceding theirs. Primarily for first-year students.

HSTAA 150 Afro-American History (5) I&S Walter Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Provides some general knowledge and serves as a basic introductory course for a sequence of lecture courses and seminars in Afro-American history. Offered: jointly with AFRM 150.

HSTAA 180 History of the Chicano People to 1848 (5) I&S Gil Historical survey of the Chicano people from pre-Hispanic times to the war between the United States and Mexico.

HSTAA 181 History of the Chicano People Since 1848 (5) I&S Gil Historical survey of the Chicano people since the war between the United States and Mexico. Recommended: 180.

HSTAA 200 The Peoples of the United States (5) I&S Gregory Surveys American diversity since 1500. Immigration, how a culture of consumption was created, and. make the student aware of his or her heritage of the past and more intelligently conscious of the present.

HSTAA 202 Makers of American Foreign Policy, 1776 to the Present (5) I&S Fowler Survey of the history of American foreign relations. Focus on the interaction between the national security state and the global commitments of the twentieth century. Interaction and tension between need for an effective military force and concept of civilian control of that force.

HSTAA 212 The Military History of the United States From Colonial Times to the Present (5) I&S Hennes Development of American military policies, organizational patterns, tactics, and weaponry, from beginnings as a seventeenth-century frontier defense force to the global conflicts and military commitments of the twentieth century. Interaction and tension between need for an effective military force and concept of civilian control of that force.

HSTAA 285 Latin American History Through Film (5) VLPA I&S Bergquist Critical analysis of Latin American films as art and as history. Subjects include Luso-Brazilian, liberators, and independence. Designed for the beginning student and the nonspecialist.

HSTAA 301 Foundations of American Civilization (5) I&S Johnson Early America from the sixteenth century to the end of the American Revolution: the founding years and social development, race, religion, and religious diversity. Cross-registration with other social science courses, and the availability of original sources among national societies on the conceptual, research, and expository strategies of contemporary students of the labor movement and on differences and relationships between labor in developed and underdeveloped countries.

HSTAA 302 American Civilization: The First Century of Independence (5) I&S McKenzie, Rorabaugh, Saum Establishment of the constitutional system; national expansion; intellectual and cultural development; internal conflicts, the Civil War, and Reconstruction.

HSTAA 303 Modern American Civilization From 1877 (5) I&S Pease, Tate Emergence of modern America: the Civil War, international relations of the United States and Mexico, political, economic, and social development.

HSTAA 307 The American South Since the 1880s (5) I&S Fowler Political, social, and economic developments in the eleven states of the former Confederacy. Special attention to the questions of race relations, civil rights, and cultural distinctiveness. Recommended: 301.

HSTAA 351 American Constitutional History: From Colonial Times to the Present (5) I&S Johnson European origins; the constitution-making of the American Revolution; the growth of government; Civil War and Reconstruction as constitutional crises; reform and the new federalism; the Supreme Court and civil rights; Congress, the presidency, and modern American constitutionalism.

HSTAA 365 The History of the American Film (5) VLPA American films and film-making technology; the film industry and its financing and marketing strategies. Cultural, social, political, and economic impact of films upon American society.

HSTAA 370 Consumer Culture In the Modern Era: A History of the United States (5) I&S Benson Consumer and marketing trends. The first consumer-oriented industrial society. Topics to be considered include: the economy of mass consumption; how a culture of consumption was created, and.
the ideas of social critics who have rejected consumerism.

HSTAA 377 Social History of American Women (5) I&S Yee Multi-racial, multi-cultural study of United States' women. Sixteenth century to present: emphasis on women's unpaid work; participation in paid labor force; charitable, reform activities; feminist movements of nineteenth, twentieth centuries. Use of primary materials, i.e., diaries, letters, speeches, artifacts. Prerequisites: 201, WOMEN 200 or 283, or permission of instructor. Offered: jointly with WOMEN 383.

HSTAA 377 History of Canada (5) I&S General survey and analysis of political, economic, social, and cultural aspects of Canadian history from the foundation of New France to present: Canadian-American relations, the rise of Quebec nationalism, and the development of the Canadian West.

HSTAA 381 Latin America: The Early Colonial Period (5) I&S Alden Discovery and founding of Spanish and Portuguese empires in the New World and their development until the eighteenth-century reorganizations.

Honors

B102 Paddelford

The honors program offers outstanding undergraduate students a special curriculum featuring small classes, challenging instruction, and close contact with faculty and other honors students. An emphasis on writing is incorporated into the honors core curriculum and honors seminars. Directed and independent study are particularly encouraged for upper-division students, commonly leading to a senior honors thesis or project.

For a description of honors program requirements, see the Undergraduate Study section of this catalog.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

H A & S 251, 252, 253 Western Civilization I, II, III (5, 5, 5) Introduction to ideas and society in Western Civilization. For university honors students only. Offered: A, W, Sp.

H A & S 281, 282, 283 World Civilization I, II, III (5, 5, 5) Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: A, W, Sp.

H A & S 300 Introduction to the Professions (2-5, max. 15) Studies oriented toward professional work (law, medicine, public affairs). For university honors students only. Prerequisite: permission of honors office.

H A & S 350 Honors Seminar (2, max. 20) Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For university honors students only. Prerequisite: permission of honors office.

H A & S 396 Interdisciplinary Special Topics-Natural Science (1-5, max. 10) Special courses drawn from interdisciplinary groups in the natural sciences. Content varies. Prerequisite: one sequence of honors core courses.

H A & S 397 Interdisciplinary Special Topics-Social Science (1-5, max. 10) Special courses drawn from interdisciplinary groups in the social sciences. Content varies. Prerequisite: one sequence of honors core courses.

H A & S 398 Interdisciplinary Special Topics-Humanities (1-5, max. 10) Special courses drawn from interdisciplinary groups in the humanities. Content varies. Prerequisite: one sequence of honors core courses.

International Studies

111 Thomson

The Henry M. Jackson School of International Studies organizes and supports interdisciplinary teaching and research in international affairs. The school consists of a group of interdisciplinary language and area studies programs on major world regions, as well as topical and comparative programs study that transcend national and regional boundaries.

Undergraduate Program

Students may concentrate on a major world area within the context of the humanities and social sciences, specialize in topical studies, or pursue a more general course of study in International Studies. For all the programs listed below, the student receives a Bachelor of Arts degree. Some programs also offer a minor. See adviser for requirements.

Canadian Studies

W. A. Douglas Jackson, Chairperson

Canadian Studies offers a program that provides a broad understanding of Canadian society, culture, historical development, and contemporary problems.

Bachelor of Arts Degree

Major Requirements: 30 credits or second-year equivalent French language training; SIS 200, 201, 202; ECON 200, 201; SISEA 355, 456; minimum 18 credits from approved Canadian Studies elective course list.

China Studies

David Bachman, Chairperson

China Studies offers a program that provides a broad understanding of the Chinese people and their culture, historical development, and contemporary problems.

Bachelor of Arts Degree

Major Requirements: 30 credits or second-year equivalent Chinese language training; SIS 211; one upper-division course applicable to the major; 10 credits applicable to the major taken at the UW; minimum 2.00 overall GPA. Admission is competitive, based on GPA (emphasis on grades in courses related to program) and writing sample. Application deadline is the third Friday of each quarter; students are notified by the sixth Friday of each quarter.

Major Requirements: 30 credits or second-year equivalent Chinese language training; additional training recommended. HSTAS 211, 212; SISEA 341; SISEA 455; 25 credits in 300- and 400-level courses on China, including HSTAS 454, one course in premodern China, and one course in Chinese arts and literature. Specialization (10 credits) in one of the three fields of modern China, premodern China, and Chinese arts and literature. Minimum 25 credits in upper-division required courses. Including HSTAS 454, taken at the UW. Minimum 2.0 grade for all required courses.

Comparative Religion

Martin S. Jeffee, Chairperson

The Comparative Religion program offers four possible curriculum tracks leading to the Bachelor of Arts degree: History of Religions, Western Emphasis; History of Religions, Eastern Emphasis; Religion and Society; and Religion in Symbolic Expression.

Bachelor of Arts Degree

Major Requirements: RELIG 201, 202, 380; 35 credits in additional courses appropriate to one of the four tracks.

International Studies

Joel S. Midge, Chairperson

The general program in International Studies gives students a comprehensive and interdisciplinary perspective on world problems, plus an ability to analyze the subtle interactions of politics, economics, and culture within the global system.

Bachelor of Arts Degree

Admission: Admission is competitive, based on overall GPA, grades in the social sciences, a written statement of goal, language background, and any international experience. Before applying, students must complete either ECON 200 or 201; and either SIS 200 or 201. Grades in these courses will be given special consideration. Application deadline is the third Friday of each quarter; students are notified by the sixth Friday of the quarter in which they apply. Sophomore standing is preferred.

Major Requirements: Foreign-language competency through the second-year college level; ECON 200, 201; SIS 200, 201, 202, 401, 485, 498; three or four upper-division courses in an approved track; three upper-division interdisciplinary courses in international studies; a major paper of approximately twenty-five pages to be completed in one of the courses in the student's approved track or in one of the approved interdisciplinary courses. Majors are required to maintain a GPA of at least 2.50, both overall and in the program.

Japan Studies

Kenneth B. Pyle, Chairperson

The Japan program combines language training with interdisciplinary study. Courses are offered in interdisciplinary studies, economics, business, political science, geography, all periods of Japanese history, art, literature, and language.

Bachelor of Arts Degree

Admission Requirements: Two quarters Japanese language; SISEA 341; one upper-division course applicable to the major; 10 credits applicable to the major taken at the UW; minimum 2.00 overall GPA. Admission is competitive, based on GPA (emphasis on grades in courses related to program) and writing sample. Application deadline is the third Friday of each quarter; students are notified by the sixth Friday of each quarter.

Major Requirements: 30 credits or second-year equivalent Japanese language training; additional training recommended. HSTAS 211; SISEA 341; SISEA 455; 25 credits of 300- and 400-level courses in Japan studies from approved list. One additional background course (5 credits) in a field other than Japan studies, to be approved by the advisor. Minimum 25 credits in upper-division required courses, including SISEA 451, taken at the UW. Minimum 2.0 grade for all required courses.

Jewish Studies

Robert C. Stacey, Chairperson

Jewish Studies brings the major disciplines of the humanities and the social sciences to bear on the history and culture of the Jewish people. Courses in history, biology, modern and premodern, comparative religion, and Near Eastern languages and civilization enable the student to study the history of the Jewish people, their rich and varied culture, and the influence of this culture upon world civilizations.

Bachelor of Arts Degree

Major Requirements: 30 credits or second-year equivalent Hebrew language training; SISJE 495, Majors Seminar (5); 50 credits of other courses in the Jewish studies curriculum—RELIG 210 and SISJE 250—highly recommended. Up to 15 credits of Hebrew language study may be applied to the non-language part of the requirement.

Korea Studies

James B. Palais, Chairperson
The Korea program combines language instruction with history, society, and interdisciplinary area training for students interested in the culture and history of Korea. The program focuses on Korea within the broader context of East Asia.

**Bachelor of Arts Degree**

**Major Requirements:** 30 credits or second-year equivalent Korean language training; additional training recommended. HSTAS 211, 212; SISEA 341; HSTAS 481, 482, and SISEA 448; 20 credits in 300- and 400-level courses on East Asia.

**Latin American Studies**

Cynthia Steele, Chairperson

The Latin American Studies major combines language study in Spanish and Portuguese with work in history, the humanities, and the social sciences. It provides a comprehensive, interdisciplinary understanding of this major world region, emphasizing themes such as economic development, popular movements, cultural analyses, and hemispheric relations. At the same time, it gives students the option to develop their own particular disciplinary and thematic interests.

**Bachelor of Arts Degree**

**Major requirements:** 45 credits (or equivalent) foreign language training, to include either two years of Spanish and one year of Portuguese or two years of Portuguese and one year of Spanish; 30 credits from an approved list, to include 10 each from the following: history; literature and arts; economic development; political development; social/cultural development; 10 elective credits from approved list; 5 credit interdisciplinary seminar, and 5 credits for SISLA 493, Senior Thesis.

**Russian, East European, and Central Asian Studies**

Daniel C. Waugh, Chairperson

The Russian, East European, and Central Asian program is designed for students who wish to pursue concentrated study of these regions within an interdisciplinary framework. The curriculum covers most aspects of the historical and contemporary development of Russia, the newly independent states of the former Soviet Union, East Europe, and Central Asia.

**Bachelor of Arts Degree**

**Major Requirements:** A minimum of two years (30 credits, or equivalent proficiency—more is strongly recommended) of a relevant language, to be completed before taking the seminars in which the senior thesis is written; 15-20 credits of core courses including relevant surveys (for Russian focus, SISRE 243, 324; for Eastern Europe, SISRE 361 and 364; SISIL 375 or equivalent) and a two-quarter sequence (SISRE 343, 457) leading to the writing of a senior thesis in which the relevant foreign language is to be used; 30-35 credits in 300- and 400-level courses in social sciences and humanities, approved by the program adviser. The normal pattern is for majors to focus on one of the major geographic regions covered by the program (i.e., Russia, East Europe, or Central Asia), but in consultation with the adviser, alternative combinations of courses may be approved.

**South Asian Studies**

Frank F. Conlon, Chairperson

The South Asian Studies program combines language instruction with history and interdisciplinary area training for students interested in Bangladesh, India, Nepal, Pakistan, Sri Lanka, or Tibet.

**Bachelor of Arts Degree**

**Major Requirements:** 30 credits or second-year equivalent in one of the languages of South Asia (Hindi, Sanskrit, Tamil, or Tibetan); 10 credits in the history of India; SISSA 498; 30 credits in the area from the following disciplines—anthropology, comparative religion, economics, history, linguistics, philosophy, or political science.

**Southeast Asian Studies**

Charles F. Keyes, Chairperson

The Southeast Asian Studies program provides interdisciplinary area training and language instruction for students interested in the countries of Thailand, Vietnam, Burma, Malaysia, the Philippines, Brunei, Indonesia, Laos, Cambodia, Singapore, and Brunei. The program emphasizes social science approaches to the study of Southeast Asian history, culture and society.

**Bachelor of Arts Degree**

**Major Requirements:** 30 credits or second-year equivalent in a Southeast Asian language; 25 credits in required topic courses including: one of SIS 200, 201, 202; one of HSTAS 221, 482, 483; one of ANTH 315, 352; SISEA/ANTH 314; SISIL 490. 20 additional credits in approved elective courses.

**Graduate Program**

The Jackson School offers seven regional programs that lead to a Master of Arts degree in international studies. These include China, East Europe, Japan, Korea, the Middle East, Russia, and South Asia. Specific requirements vary from one program to another, but all stress interdisciplinary study within the context of the historical cultures, contemporary situations, and languages of the world areas. In addition, the Jackson School offers a program in Comparative Religion for the Master of Arts degree in international studies.

The Jackson School also offers a general program in International Studies that concentrates on the interaction of international economic, political, and cultural processes with states and societies around the world. This program was developed in conjunction with several professional schools and is designed as a concurrent degree program.

**Admission Requirements:** Applicants must meet the requirements of the Graduate School: a 3.00 GPA in the last 90 quarter (60 semester) graded credits and a baccalaureate degree from an accredited university. Submission of the scores of the general Graduate Record Examination (GRE) is required. Applicants must also meet the requirements of the specific Jackson School program to which they are applying. Most of them require previous study of an appropriate foreign language.

**Graduation Requirements:** Students must meet Graduate School requirements for the Master of Arts, as well as individual Jackson School program requirements. Most programs can be completed in two years.

**Financial Aid:** Financial support is available in the form of Title VI Foreign Language and Area Studies Fellowships. Some Jackson School programs have additional fellowships available for specific areas of study. Graduate students who are eligible for a limited number of teaching or research assistantships and readerships.

**Correspondence and Information**

Graduate Program Assistant

111 Thomson Hall

**Comparative Religion**

Martin S. Jaffe, Chairperson

The Comparative Religion program leading to the Master of Arts in international studies offers an interdisciplinary curriculum in the study of religion, with several choices for areas of concentration. The required core seminars focus on methodology and comparative perspectives in the study of religion. For the remaining course requirements, primary and secondary curricular concentrations are available in Buddhism, Hinduism, Judaism, Islam, Christianity, and religion and culture; further secondary curricular concentrations are available in Greco-Roman religions, East Asian indigenous traditions, and African and Native American religious traditions. Most students should expect the program to require two years, due to language requirements.

**Admission Requirements**

See above under Graduate Program. The Comparative Religion faculty reserve the right to determine in each case whether an applicant has sufficient language preparation and background in the study of religion for acceptance into the program.

**Graduation Requirements**

Completion of the third year in a language of the primary sources in the chosen concentration, and elementary reading knowledge of a secondary foreign language necessary for reading published research (e.g., German, French), demonstration of basic competency in the history of world religions; RELIG 501-502; one course focused on historical relations between religious traditions; at least four courses in a major concentration and two in a minor; one or two final research papers (s); and a comprehensive examination including both oral and written segments.

**East Asian Studies**

Three programs in East Asian Studies are offered within the Jackson School: China, Japan, and Korea Studies. The East Asian Studies faculty are drawn from several disciplines at the University. These programs are designed to prepare students with Bachelor of Arts degrees in a discipline in careers in government, journalism, business, or teaching, or as a transition to a doctoral program. Programs are structured to permit each student a maximum of individual faculty guidance plus group participation with other graduate students.

**Admission Requirements**

See above under Graduate Program. All programs are competitive. Some previous language training is highly recommended.

**China Studies**

David Bachman, Chairperson

**Graduation Requirements**

Chinese language training through the third year; two seminars: SISEA 521-522 (5 credits each) plus 26 credits in discipline study related to China from at least two different disciplines; two seminar papers or a thesis; comprehensive oral examination.

**Japan Studies**

Kenneth B. Pyle, Chairperson

**Graduation Requirements**

Japanese language training through the third year (15 credits minimum training at this university); SISEA 555 (6 credits) and SISEA 555-559 (6 credits each); 20 credits in discipline study of Japan; essay of distinction; comprehensive oral examination.

**Korea Studies**

James B. Palais, Chairperson

**Graduation Requirements**

Korean language through the third year of instruction (through the second year of instruction if the student is admitted with no previous language training); HSTAS 481-482, SISEA 448 (5 credits each), and SISEA 585 (6 credits); 15 credits in discipline study of East Asia or
international studies; two seminar papers; comprehensive oral examination.

Research Facilities
Research and training facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. In addition, the University is affiliated with the Inter-University Program for Chinese Language Studies in Taipei, language programs in the People's Republic of China sponsored by the Council on International Education Exchange, and the Inter-University Center for Japanese Language Studies in Yokohama, which provide intensive language training for advanced undergraduate and graduate students. The school has ongoing projects on China, Japan, and Korea in which advanced graduate students and recognized scholars from the United States and foreign institutions regularly participate.

International Studies
Joel S. Migdal, Chairperson

The graduate program in International Studies provides students with broad knowledge and skills in analyzing international affairs. Designed for students entering a variety of professional fields, the program trains them in international and comparative studies in a multidisciplinary setting. Students are prepared to undertake sophisticated analyses of international affairs and typically will hold positions after graduation with the international divisions of federal and state governments, international divisions of banks, trading companies, policy study institutes, corporations with international operations, and international development and educational organizations. The program usually entails concurrent enrollment in a graduate professional degree program and adds approximately one year to the student's course of study.

Admission Requirements
See above under Graduate Program. Candidates are preferred who demonstrate previous professional experience and education or who enroll concurrently in one of the following graduate programs or schools: Business Administration, Public Affairs, Marine Affairs, Forest Resources, Law, or Public Health and Community Medicine. Students accepted without adequate preparation in economics (usually intermediate-level macroeconomics and microeconomics) will be advised that preparation should be made before entering the program. Prior study of a foreign language is highly recommended.

Graduation Requirements
Japanese or Chinese language through the third year or any other modern foreign language through the second year: SIS 500, 501, and 502 (3 credits each); SIS 511-512 (3 credits each); SIS 591, 592, and 593 (1 credit each); courses in two other fields (minimum three classes—9 credits for each field): a regional studies field, a professional field, or a special topics field; two seminar papers and an oral examination. Students in concurrent graduate degree programs also must meet Graduate School requirements for the second degree.

Middle Eastern Studies
Jere L. Bacharach, Chairperson

The Middle East program is designed for students who wish to study the region within an interdisciplinary framework, focusing especially on the social, political, economic, and legal structure of the Middle East. Students interested in an M.A. degree emphasizing literature and other humanistic aspects of the Middle East should inquire about the program in the Department of Near Eastern Languages and Civilization.

Admission Requirements
See above under Graduate Program. Although knowledge of a Near Eastern language is not a prerequisite for admission, students are generally expected to have had at least the equivalent of one year's study of the language in which they plan to concentrate. Students with no language training may wish to begin their language program in an intensive summer program.

Graduation Requirements
Three 3-credit or two 5-credit Middle Eastern language courses beyond the second year (native speakers as well as non-native speakers); a core undergraduate course such as N E 210, Introduction to Islamic Civilization, or other approved courses; two courses in the modern Middle East, in at least two of the following disciplines: history, political science, or international studies; an advanced course in Middle East literature, culture, or religious developments; one approved Jackson School course; two courses in one social science discipline or in one professional school other than courses taken for preceding requirements; advanced reading courses on the Middle East; two seminar papers and a four-hour written examination or a thesis.

Russian, East European, and Central Asian Studies
Daniel C. Waugh, Chairperson

Designed primarily for students with B.A. degrees in a discipline, the programs offer a background for professional pursuits in government, journalism, business, or teaching, or for those who plan to take advanced graduate study leading to the Ph.D. degree in a discipline. The program includes language training, a concentration of study in a chosen discipline, and a combination of courses in other disciplines that focus on the region. Students usually focus on one of the specific regions (Russia, Eastern Europe, Central Asia), although they may, with permission of the adviser, take courses on more than one region.

Admission Requirements
See above under Graduate Program. A prerequisite for all applicants is two years of college-level language courses or the equivalent; for Russian Studies the language must be Russian; for other regions of the former Soviet Union and Eastern Europe, two years of a relevant language.

Graduation Requirements
Including the two years required for entry, four years of a language of the region being studied, or two years of each of two relevant languages; SISRE 500, 501, and 502 (3 credits each); 30 credits in disciplines other than language, with 15-20 credits in a discipline of concentration and 10-15 credits in at least two additional disciplines; a thesis (9 credits of SISRE 700); a written examination in the discipline of concentration and an oral interdiscplinary examination.

Research Facilities
The University of Washington is a major center for research on Eastern Europe, Russia, and the other newly independent states of the former Soviet Union, notably the countries of Central Asia. In addition to extensive holdings in Russian and East European language materials, the library has one of the best Central Asian language collections in the country. The strengths of the program are complemented by strengths in East Asian and Middle Eastern Studies.

South Asian Studies
Frank F. Conlon, Chairperson

The South Asian Studies program has been designed for students whose career objectives involve teaching and research in a traditional discipline with geographical interests within South Asia (i.e., India, Pakistan, Sri Lanka (Ceylon), Bangladesh, Nepal, and Tibet); those planning to enter professional training programs (e.g., education, business administration, journalism, law, or public affairs); or students planning a career in government service (e.g., the foreign service) who wish to acquire a special understanding of the South Asia area.

Admission Requirements
See above under Graduate Program.

Graduation Requirements
Completion of the third year of a South Asian language to include at least 7 credits at the 400 level or above; SISAA 510 and 511 (5 credits each); 28 credits in discipline course work other than language, of which 18 must be directly related to South Asia; two seminar papers and a comprehensive oral examination.

Research Facilities
The University of Washington library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka (Ceylon); and is a major participant in the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

Faculty

Director
Nicholas R. Lardy

Professors
Alden, Dauri * 1959; PhD, 1959, University of California (Berkeley); latin American history; comparative colonial history.
Augerot, James E. * 1960; PhD, 1968, University of Washington; Slavic linguistics, Romanian, Bulgarian.
Bacharach, Jere L. * 1967; PhD, 1967, University of Michigan; history of the Middle East, Islamic.
Bobia, Imre * 1962, (Emeritus); PhD, 1962, University of Washington; Russian and East European history.
Brass, Paul R. * 1965; PhD, 1964, University of Chicago; comparative government, international relations.
Butow, Robert J. C. * 1960, (Emeritus); PhD, 1953, Stanford University; East Asian diplomatic history.
Chan, Hok-Lam * 1972; PhD, 1967, Princeton University; late traditional China.
Chiodo, Daniel * 1974; PhD, 1973, Columbia University; modernization, political sociology, peasant societies.
Conlon, Frank F. * 1968; PhD, 1969, University of Minnesota; history of India.
Ellison, Herbert J. * 1968; PhD, 1955, University of London (UK); modern Russian history.
Gil, Carlos * 1974; PhD, 1975, University of California (Los Angeles); Latin American history and the Chicanos people.
Haley, John O. * 1974; LLM, 1971, University of Washington; comparative law (Japan).
Haney, Jack V. * 1967; Dphil, 1971, Oxford University (UK); medieval Russian literature, Slavic folklore.
Hanley, Susan B. * 1973; PhD, 1971, Yale University; premodern Japan.
Harrell, Stevan * 1974; PhD, 1974, Stanford University; family systems, demography, social evolution, religion, China, Taiwan.
Helfmann, Donald C. * 1967; PhD, 1964, University of California (Berkeley); Japanese politics and international relations.
Kieval, Hillet J. * 1985; PhD, 1981, Harvard University; modern Jewish history; modern European history (Central and Eastern Europe).

Konick, Willis * 1961; PhD, 1964, University of Washington; Russian literature, nineteenth-century European literature.

Lukoff, Fred 1964, (Emeritus); PhD, 1964, University of Pennsylvania; Korean language and linguistics.

Poznanski, Kazimierz * 1967; PhD, 1974, University of Warsaw (Poland).

Sorensen, Clark W. * 1969; PhD, 1981, University of Washington; Korea, social change in East Asia, peasant households and economy, development.

Waugh, Daniel Clarke * 1972; PhD, 1972, Harvard University; medieval Russian history.

West, James D. * 1972; PhD, 1970, Cambridge University (UK); modern Russian literature.

Williams, Michael A. * 1976; PhD, 1977, Harvard University; early Christianity and religions of antiquity.

Assistant Professors

Anchorodogu, Marie C. * 1989; PhD, 1986, University of California (Berkeley); Japanese politics and political economy.

Whiting, Susan H. 1994, (Acting); PhD, 1994, University of Michigan; comparative politics, China, political economy, methodology.

Young, Glennys J. * 1992; PhD, 1989, University of California (Berkeley); late imperial and early Soviet Russia.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

General

SIS 200 States and Capitalism: The Origins of the Modern Global System (5) I&S Kasaba, Migdal Political origins of the modern state system and of the world market in Europe. Interacting forces of politics and economics around the globe from the sixteenth century until World War II.

SIS 201 Introduction to International Political Economy (5) I&S Jones, Migdal International political economy through the examination of major facets of the post-World War II era. Analyzes the new postwar economic order and its crises in the 1970s and 1980s, North-South relations, the postwar political order and its East-West rivalry. Recommended: ECON 200.

SIS 202 Cultural Interactions in an Interdependent World (5) I&S Guy Cultural interaction among societies and civilizations, particularly Western versus non-Western, Intellectual, cultural, social, and artistic aspects; historical factors.

SIS 301 War (5) I&S Chieh. Origins and conduct of war; readings from anthropology, political science, economics, and history, as well as novels and some recent works on the arms-control controversy. Modern forms of warfare, including guerrilla war, world war, and nuclear war. Offered: jointly with SOC 305.

SIS 302 International Relations (5) I&S Webb Perspectives on foreign cultures through literary example. Interdisciplinary approaches to the study of culture as such and problems of intercultural relations. Prerequisite: 202 or ANTH 202.

SIS 330 Political Economy of Development (5) I&S Poznanski Growth, income distribution, and economic development in less-developed countries today. Political forces concerning trade, industrialization, the agricultural sector, human resources, and financing of development. Prerequisites: ECON 200, 201.
honors candidates. Prerequisite: admission to Jackson School honors program.

SIS 401 International Political Economy (5) I&S Poznanski Establishment, maintenance, and decay of the post-1945 international economic order. Political economy of international trade, monetary relations, inflation, and North-South relations. Prerequisites: 201 and ECON 200 and 201.

SIS 405 Political Economy of Religious Institutions (5) I&S Dull Comparative study of Buddhist, Taoist, Christian, and Islamic religious institutions as political and economic phenomena. Impact of wealth and power on religious institutions or religious ideas. Temporal coverage from the formative period to the present. Prerequisite: one course on China, Japan, Middle East, or Europe.

SIS 421 National Security and International Affairs (5) I&S Jones Major military aspects of contemporary international politics. Uses and limitations of military capabilities for sustaining a stable international order and national security. Processes by which states detect and assess threats to their security; practice of deterrence; transfer of arms among states; pursuit of arms control. Recommended: course work in international relations.

SIS 422 The United States in the Contemporary International System (5) I&S & Helliwell United States in the world: ways in which international circumstances shape the political-strategic, economic, and cultural dimensions of America's policy. Case studies from post-1945 period. Recommended: background course work in international relations or American foreign policy.

SIS 426 World Politics (5) I&S Caporaso, Modelski Nation-state system and its alternatives; world distribution of preferences and power; structures of international authority; historical world societies and their politics. Offered: jointly with POL S 426.

SIS 432 Population and Modernization (3) I&S Hirschman, Lave/y Examine role of demographic factors in process of social modernization and economic growth. Approach is historical, focusing on populations of developed countries since 1700, and analytic, stressing attempts made by different disciplinarians in the discipline to relate population with economic growth. Offered: jointly with SOC 432.

SIS 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S Brass Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Prerequisite: junior standing. Offered: jointly with POL S 436.

SIS 440 History of Communism (5) I&S Ellison, Ramet Communism from its origins in Bolshevism to its present. Treatment of the development of the ideology, the various communist parties, and the communist state. Prerequisites: two courses in modern European history or politics. Offered: jointly with HIST 440.

SIS 444 Peasants in Politics (5) I&S Young Interdisciplinary study of peasants, with special attention to questions of organization. Peasant involvement in an increasingly independent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with POL S 444.

SIS 449 Social Transformation of Modern East Asia (5) I&S Sorenson Comparative study of social change in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale social units in rural and urban areas under both communist and capitalist political systems. Prerequisites: two courses on East Asian history or society. Offered: jointly with ANTH 449.

SIS 450 Political Economy of Women and Family in the Third World (5) I&S Neuhauser Theoretical and empirical aspects of the political economy of women and family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with SOC 450.

SIS 465 Deeply Divided Societies (5) I&S Migdal Ethnic conflict seen from two perspectives: 1. the study of theoretical approaches as a means of understanding deeply divided societies; 2. a focus on one or more specific conflicts. Prerequisite: 201 or POL S 204.

SIS 467 Nations and States in the Modern World (5) I&S Development of national consciousness in the "old nations" of Europe before the French Revolution. Replacement by the new nationalism and its spread into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with HIST 467.

SIS 475 Geography of International Relations (5) I&S Selected problems of spatial patterns and dynamic relationships. Geographical problems of regional, national, and international organization. Prerequisite: GEOG 331 or permission of advisor. Offered: jointly with SOC 432.

SIS 490 Special Topics (1-5, max. 15) I&S Content varies from quarter to quarter.

SIS 491- Senior Honors Seminar (5) I&S Study of issues related to students' thesis topics. Develops thesis-writing skills. Open only to Jackson School honors students.

SIS 492 Senior Honors Seminar (5) I&S Students write a senior thesis working with their individual writing advisors. Offered: jointly with POL S 492.

SIS 495 Task Force (5) I&S Small-group seminars address current problems in international affairs. Focus on one specific policy question and producing a joint task force report. Prerequisite: majors in International Studies. Offered: 200, 201, 202, 401.

SIS 499 Undergraduate Research (1-5, max. 15) Prerequisite: permission of instructor.

African Studies

SISAF 444 African Studies Seminar (3, max. 9) I&S Interdisciplinary seminar focusing upon one particular aspect of the African continent. Emphasis may be humanistic, social scientific, or historical. African Studies faculty and visiting scholars lecture on areas of their own expertise.

Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken 441.

SISEA 551 International Relations of Northeast Asia (5) Hellmann Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on the Soviet Union, Japan, China, and the United States. A multidisciplinary approach placing contemporary problems in historical context drawing on modern social science theories. In particular, the connections between defense and economics are examined. Prerequisite: permission of instructor.
SISEA 555 Introduction to Modern Japanese Studies (3-6) Hanley Interdisciplinary Introduction to the study of Japan, with emphasis on historical development. Required seminar for first-year graduate students.

SISEA 559 Readings on Japan in the Social Sciences (5) Yamamura Seminar discussing articles in Japanese in economics, history, political science, and other social sciences. Students frame central hypotheses for their essays of distinction. Assignments from major Japanese monthlies and academic works. Prerequisites: JAPAN 313 or equivalent, and permission of instructor.

SISEA 559 Interdisciplinary Seminar on Japan (5) Yamamura Advanced readings in history and the social sciences. Prerequisite: permission of instructor.

SISEA 575 Seminar on Japanese Society (5) Hanley Interdisciplinary seminar with class-led discussions on readings from anthropology, history, sociology, and non-Japanese-language-specific society articles. Prerequisite: background on Japan. Not open to students who have taken 475.

SISEA 590 Special Topics (5, max. 10) Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

SISEA 600 Independent Study or Research (*)

Korea Studies

SISEA 585 Research Seminar: Modern Korea (3-6) Palais Advanced instruction in problems and methods of research in Korean history. Foreign language not required. Prerequisite: permission of instructor.

SISEA 600 Independent Study or Research (*)

Middle Eastern Studies

SISME 530, 531, 532 Reading Seminar on Middle East Studies (2,2,2) Middle Eastern historiography, Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East.

SISME 590 Special Topics (3-5, max. 10) Content varies.

SISME 600 Independent Study or Research (*)

SISME 700 Master's Thesis (*)

Rusisan, East European, and Central Asian Studies

SISRE 560 Interdisciplinary Seminar (max. 30) Contemporary problems in the societal, political, and economic development of Russia and East Europe. Seminars are devoted to specific topics, such as comparative cultures and ethnic minorities; economic development and environmental degradation; comparative communism; problems of a similar interdisciplinary nature. Prerequisite: permission of instructor. Required of all first-year MA students.

SISRE 501-502 Bibliography and Research Methods (3-3) Introduction to bibliographic and other scholarly research in field. Development of research techniques. Some use of relevant language required. Required of all first-year MA students.

SISRE 504 Approaches to East European Politics (3-5) Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with POL S 537.

SISRE 505 Seminar: Problems of Social and Political Development in Eastern Europe (3-6) Research seminar dealing with selected problems of continuity and change in eastern Europe. Prerequisite: some previous course work on eastern Europe.

SISRE 555 Russian Ocean Policy (3) Kacynski Russian ocean policy following perestroika and disintegration of Soviet empire. Discusses Russian navy, fishery industry, merchant marines, ocean research fleet, in light of international agreements, and joint ventures and new political, economic, and social environments. Prerequisite: knowledge of Soviet/Russian socio-economic problems or permission of instructor. Offered: jointly with SMA 555.

SISRE 590 Special Topics (5, max. 10) Course content varies. Offered occasionally by visitors or resident faculty.

SISRE 600 Independent Study or Research (*)

SISRE 700 Master's Thesis (*)

South Asian Studies

SISSA 510 Introduction to Interdisciplinary Study of South Asia (5) Salmon Examinations work done in the various disciplines focusing on South Asia.

SISSA 511 Seminar on South Asia (5) Interdisciplinary seminar for graduate students in which research and writing on individual research topics are critically developed. Designed to provide each student with an opportunity to synthesize his or her studies on South Asia. Prerequisite: 510 or permission of graduate program coordinator.

SISSA 590 Special Topics (5, max. 10) Seminar. Course content varies. Offered occasionally by visitors or resident faculty.

SISSA 600 Independent Study or Research (*)

SISSA 700 Master's Thesis (*)

Linguistics

A210 Padelford

Linguistics is the scientific study of language, which is one of the most characteristic human attributes. In contrast with other language-related disciplines, linguistics deals with languages from the point of view of their internal structure as cognitive systems. Courses provide training in the method and theory of language analysis and description, as well as studies of language change and language acquisition.

Undergraduate Program

Adviser: Sharon Hargus, A211 Padelford

Bachelor of Arts Degree

Major Requirements: LING 200 or other introductory course in linguistics; 451, 452, 461, 462, 442, 453, 463 or 481; at least one year of each of two languages, one of which must belong to a different family of languages than the student's native language; 20 additional credits of departmentally approved courses in linguistics.

Minor

Minor Requirements: LING 200 or other introductory course in linguistics; three courses from LING 442, 451, 452, 461, 462, or 481: 12 additional credits from a list of departmentally approved courses in linguistics.

Graduate Program

Ellen Kaisse, Graduate Program Coordinator A210B Padelford

The Department of Linguistics offers programs of study for graduate students leading to the degrees of Master of Arts and Doctor of Philosophy. The program is administered by the departmental faculty.

The major interest of the core faculty lies in theoretical linguistics: syntax, semantics, phonology, and developmental psycholinguistics. Courses are also offered within the department in historical linguistics and computational linguistics.

Some course work is also available in various cooperating departments: Among those fields represented outside the department are anthropological linguistics; applied linguistics; speech and phonetics; philosophy of language; and the structure and history of a number of individual languages and language families.

Admission Requirements: At least one previous course in linguistics is highly recommended, as is proficiency in one language other than the student's native language. Three letters of recommendation and Graduate Record Examination scores are required for all applicants. Doctoral degree applicants should send the department a copy of their master's thesis or a paper of high quality, or both.

Master of Arts Degree

Two courses each in syntax and phonology, one each in semantics and historical linguistics. Three more courses at the 400 or 500 level in other areas. At least three of the nine courses must be at the 500 level. Demonstrated ability to read the linguistic literature in some language other than English. An M.A. exam in areas in which the GPA is below 3.30. A short M.A. thesis.

Doctor of Philosophy Degree

Direct admission to the Ph.D. program will be considered on an individual basis for applicants holding a degree from a comparable M.A. thesis program in linguistics or a closely related field. Some applicants may be granted admission directly into the Ph.D. program, with the stipulation that they make up one or more M.A.-level deficiencies.

Requirements for the Ph.D. degree are: 27 credits of course work beyond the M.A., at least 18 credits of which must be at the 500 level and be completed before the General Examination. A year's study of an "exotic" language. Two linguistics papers delivered at a colloquium or conference. A General Examination, involving the writing of two papers in different areas of linguistics and an oral examination, in which the candidate is questioned on the papers. A dissertation suitable for publication and a Final Examination, in which the candidate defends the dissertation.
Courses for Undergraduates

LING 100 Fundamentals of Grammar (5) VLPA Introduction to basic grammatical concepts and terminology. Specifically intended for students planning to major in foreign languages or linguistics.

LING 200 Introduction to Linguistic Thought (5) VLPA Introduction to the fundamental characteristics of the human species; diversity and complexity of human languages; phonological and grammatical analysis; dimensions of language use; language and writing; impact of historical linguistics on contemporary theory. Not open for credit to students who have taken 400.

LING 201 Introduction to Linguistic Theory and Analysis (5) VLPA Introduction to the methodology of modern linguistics; behavioral and isomorphism theories of language; universal and cognitive aspects of language structure; interplay of genetic and social factors in language formation; linguistic analysis. Not open for credit to students who have taken 400.

LING 203 Introduction to Anthropological Linguistics (5) VLPA Methods, theories used within anthropology. Descriptive and theoretical linguistics compared; historical linguistics, comparative method; sociolinguistics, culture; human language, communication. Open for credit to students who have taken 200, 201, or 400. Offered: jointly with ANTH 203.

LING 242 Introduction to Meaning (5) VLPA Theory of meaning and how it functions in communication and thinking. Discussion of how and why meanings of words change through time. Prerequisite: 200 or 201.

LING 300 Introduction to the Languages of the World (5) VLPA A survey of the world's languages, focusing on their syntactic, phonological, and morphological properties. Prerequisites: 200, 201, or 203.

LING 333 Linguistics and Society (3) VLPA Introduction to the relationship between language and society, the role of linguistics in sociopolitical contexts. Political and ethical considerations involved in the application of linguistic theory.

LING 349 Descriptive Aspects of English as a Foreign Language (3) VLPA Linguistic analysis as a basis for the teaching of English as a foreign language; language as rule-governed behavior. Prerequisite: 200 or 400 or permission of instructor.

LING 400 Survey of Linguistic Method and Theory (4) VLPA An overview of major linguistic theories, methodological approaches, and their applications to language use. Prerequisites: 400 or permission of instructor. Offered: jointly with PSYCH 447.

LING 401 The Linguistic, Philosophical, and Political Thought of Noam Chomsky (3) VLPA Introduction to the work of Noam Chomsky on the nature of language and its relationship to human thought. Prerequisite: 200 or 201.

LING 402 Survey of the History of Linguistics (3) VLPA Introduction to the history of linguistics. Major figures and schools of thought in the study of language. Prerequisite: 200 or 400 or permission of instructor.
scopion, universal constraints on phonological structure, and implications of psychological speech-sound categorization for phonological theory. Prerequisites: 200, 201, or 401.

LING 451, 452, 453 Phonology I, II, III (4,4,4) VLPA & SIS Hargus, Kaiser Speech sounds, mechanism of their production, and structures of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: 200 or 400, either of which may be taken concurrently with 451. Offered: jointly with ANTH 451, 452, 453.

LING 454 Methods in Comparative Linguistics (S) VLPA Krausbender, Shapiro, Voyles Method and theory of historical and comparative linguistics. Problems of phonological, morphological, syntactic, and semantic characteristics of subgroups. Prerequisite: 400 or permission of instructor, undergraduate advisor, or graduate program coordinator.

LING 455 Areal Linguistics (3, max. 6) VLPA & SIS Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Processes such as borrowing, vocabulary specialization, lexical change, language death and revival. Offered: jointly with ANTH 455.

LING 457 Language Development (4) VLPA & SIS Dale First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisites: 400 or PSYCH 100, and senior or graduate standing. Offered: jointly with PSYCH 457.

LING 461, 462, 463 Syntax I, II, III (4,4,4) VLPA & SIS Brame, Contreras, Kim, Newmeyer Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: 200 or 400 or permission of instructor. Offered: jointly with ANTH 461, 462, 463.

LING 471 Survey of Linguistic Theories (5) VLPA Brame A comparative study of alternative models of grammatical description.

LING 472 Introduction to Computational Linguistics (S) VLPA & SIS Haerl Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation, and natural language generation. Prerequisite: 461 or permission of instructor. Offered: jointly with CSE 472.

LING 479 Formal Semantics and Natural Language (3) VLPA & SIS Oghara Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Typical topics: Tarskian definitions of truth; "truth theory" and theory of meaning; possible world semantics; Montague semantics; generative semantics; Chomsky on syntax and semantics. Recommended: PHIL 120 or 370. Offered: jointly with PHIL 479.

LING 480 Topics in Linguistics (3, max. 12) VLPA Introduction to an area of linguistic study not covered by the regular departmental course offerings.

LING 481 Introduction to Morphology (4) VLPA Brame, Hargus, Kaiser, Newmeyer Structure of words and the processes whereby they are formed. Morphological processes in a wide variety of languages. Prerequisites: 451 and 461.

LING 499 Undergraduate Research (1-5) Credit/no credit only.

Courses for Graduates Only

LING 501, 502, 503 Linguistic Analysis Laboratory (3,3,3) Graduate analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisites: 453, 453, or permission of instructor.

LING 504 Indo-European Comparative Phonology (2) Kaiser Sound systems of the principal families of Indo-European and the relation of these to a hypothetical parent tongue. Prerequisite: 406 or permission of instructor. Offered: alternate years.

LING 505 Indo-European Comparative Grammar (2) Systematic treatment, with extensive surveys of individual language groups. Prerequisite: 504.

LING 507 Syntactic Theory I (4) Introduction to the principles and parameters model of syntactic theory. The lexicon and its relation to syntactic representations. Syntactic modules and principles. Problem solving.

LING 508 Syntactic Theory II (4) Historical antecedents of the principles- and parameters theory. Lexicalism versus transformationalism. The unification of transformational operations and conditions. Origins of subtheories. Extensive reading list of primary sources. Practical training in syntactic argumentation. Prerequisites: 507 or permission of instructor.

LING 509 Syntactic Theory III (4) Current issues in syntactic theory, including logical form, empty categories, the range of parametric variation, barriers, minimality, and the status of functional categories. Training in the methodology of syntactic research. Prerequisites: 508 or permission of instructor.

LING 514 Seminar in Comparative Linguistics (3) Brame Nineteenth- and twentieth-century theories of phonological change. Prerequisite: 404 or permission of instructor.

LING 519 Mathematical Models of Grammar (3) Brame, Oghara Study of some mathematical models of language recognition, emphasizing context-free and context-sensitive grammars. Prerequisite: graduate standing in mathematics, linguistics, or psychology, or permission of instructor.

LING 522 Topics in the History of Linguistics (3) Newmeyer Intensive investigation of the main trends in the history of linguistics, concentrating on the development of nineteenth-century historical linguistics, the various schools of structural linguistics, and transformational-generative grammar. Prerequisites: 451, 461.

LING 524 Seminar in Theoretical Linguistics (4, max. 8) Individual and joint research on selected topics in theoretical linguistics. Topics change each quarter. Typical topics are semantics, generative grammar, phonological theories. Prerequisites: 453, 463.

LING 525 Seminar in Theoretical Phonology (4, max. 12) Individual and joint research on selected topics in theoretical phonology. Topics vary. Typical offerings include phonology and the lexicon, syntax and phonology, phonological representations. Prerequisite: 453.

LING 530 Dialectology (3) Schiffman The principles of dialect deviant as relation to linguistic structure and usage. Prerequisite: 452 or permission of instructor. Offered: jointly with ANTH 530.

LING 531 Problems in Romance Linguistics (2-5, max. 15) Contreras, Kaiser, Zagona Group seminar. Individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with ROM 531.

LING 540 Phonological Development (3) Stoel-Gammon Selected topics in the developmental sequence of phonological systems in normal-speaking children. Relationships between possible phonological inventories and rule systems in different languages. Prerequisites: 451, 452, or permission of instructor. Offered: jointly with SPHSC 540.

LING 541 Syntactic and Semantic Development (3) Dale Selected topics in the study of child language (e.g., cognitive basis of language, early semantic systems, development in language-handicapped children). Topics vary. Prerequisites: one course in child language development and permission of instructor. Offered: jointly with SPHSC 541.

LING 553 Analysis of Linguistic Structures (3, max. 6) Syntactic, semantic, and/or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with ANTH 553.

LING 551, 562, 563 Advanced Syntax (3, max. 9, 3, max. 9, 3, max. 9) Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisites: 451, 462, 463.

LING 555 Contrastive Linguistics (3) The attempt to look across linguistic systems for comparable and contrastive classes and subclasses. Problems of subcategorization and universal grammar. Three conceptually distinct models: structural, transfer grammar, generative. Prerequisites: 452, 463.

LING 557 Comparative Altaic Linguistics (3) Comparative phonology and morphology of Mongolian, Turkic, and other Altaic languages. Prerequisite: permission of instructor. Offered: jointly with ALTAL 557.

LING 580 Problems in Linguistics (3, max. 12) Advanced study in current theories of syntax, semantics, phonology, or morphology.

LING 599 Linguistics Colloquium (1, max. 6) Seminar attended by faculty and graduate students to discuss research in progress and topics of general interest. Attendance is required for a minimum of two quarters during the student's residence. Prerequisite: permission of instructor.

LING 600 Independent Study or Research (*)

LING 700 Master's Thesis (*)

LING 800 Doctoral Dissertation (*)

Mathematics

C138 Padelford

Mathematics is the basic language of physical science, with applications in engineering and business as well as the natural and social sciences. The department has a Mathematical Sciences option in its Bachelor of Science degree program for those students who want to prepare for careers in industry, business, or graduate study in applied mathematics or natural science. For students who want to study mathematics as a discipline in its own right, the department continues to offer the Pure Mathematics option of the B.S. degree. The Bachelor of Arts degree is intended for those students who do not wish to continue studies in either mathematics or a mathematical science.

Undergraduate Program

Thomas Duchamp, Director
Brooke Miller, Assistant Director
Julie Martinson, Adviser
C36 Padelford

In all options, a grade of 2.0 or higher must be obtained in all mathematics courses presented to satisfy the mathematics requirement, and in required related courses. A GPA of 2.00 or higher must be obtained in
all mathematics courses taken at the UW. At least 18 credits of graded mathematics courses numbered 301 or higher must be taken in residence at the UW.

**Bachelor of Arts Degree**

**Admission Requirements:** MATH 124, 125, 126 (or MATH 134, 135, 136) and at least one 200- or 300-level mathematics course required for the degree. A minimum grade of 2.0 in each course to be offered as part of the major; a minimum overall GPA of 2.00 for all mathematics courses. Application to the program should be made at the end of the sophomore year.

**LIBERAL ARTS OPTION**

**Major Requirements:** A minimum of 50 approved credits in mathematics, including MATH 124, 125, 126; 307; 205 or 306; 324 and 26 additional credits at the 300 level and above. Minimum 3 credits of computer courses chosen from CSE/ENGR 142 or MATH 187 (1 credit only), 387 (1 or 2 credits), 487 (1 or 2 credits), 464.

**TEACHER PREPARATION OPTION**

**Major Requirements:** 50 approved credits in mathematics, including MATH 124, 125, 126; 307; 205 or 306; 324; 411, 412; 444, 445, either STAT 341, 342 or MATH 341, 342, 353, 354, 38 credits of mathematics electives at the 200 level or above; minimum 2 credits of computer courses chosen from CSE/ENGR 142, MATH 187, 384, 464, 467.

**Bachelor of Science Degree**

**Admission Requirements:** A minimum of 45 credits completed, including MATH 124, 125, 126 (or MATH 134, 135, 136); 307 and one other 300-level mathematics course and PHYS 121/131, 122/132, 123/133. A minimum grade of 2.0 in each course to be offered as part of the major; a minimum overall GPA of 2.00 for all mathematics courses. Application to the program should be made at the end of the sophomore year.

**MATHEMATICAL SCIENCES OPTION**

**Major Requirements:** Option has two components, mathematics and science. **Mathematics Component** (minimum of 54 credits): must include the core (30 credits), a track (12 credits), and electives (12 credits).

1. Core must include MATH 124, 125, 126 or 134, 135, 136); 307, 308, 309; 324, 325, 326, and including at least one two-quarter sequence separate from the sequences taken for the track and core requirements. **Science Component:** must include [1] PHYS 121/131, 122/132, 123/133 (15 credits); [2] minimum 2 credits of computer courses chosen from CSE/ENGR 142, MATH 187, 384, 464, 467; [3] 15 approved credits (at the 300 level or above) in the student's chosen area of concentration (must be in an area of natural or social science). Suggested areas of concentration include: pure mathematics; applied mathematics; computer science, economics, geophysical sciences, physics, physical chemistry, and statistics. If computer science is the chosen area of concentration, then the following courses must be completed: CSE/ENGR 142 (4), CSE 143 (5), 373 (3), 410 (3), and either 413 (3), or 415 (5). If the computing requirement is satisfied by taking both CSE/ENGR 142 and CSE 143, then 12, rather than 15 credits (at the 300 level or above) in an area of natural or social science are required. Students contemplating the mathematical sciences option should seek academic advice in CSE Padelford early in the sophomore year or immediately upon transferring to the University. In particular, students who plan to continue with graduate studies will need advice.

**PURITY MATHEMATICS OPTION**

**Major Requirements:** (1) A minimum of 66 credits in mathematics. Courses must include MATH 124, 125, 126, 307, 308 (or 134, 135, 136); 309; 324, 325, 326, 427 (or 334, 335, 336); 15 credits from 402, 403, 404, 424, 426, 427, 428, 429; and any 500-level mathematics courses numbered 301 or higher, excluding 351, 352, 353, 359, 411, 412, 420, 444, 445, 498. (2) PHYS 121/131, 122/132, 123/133. (3) Minimum 2 credits of computer courses chosen from CSE/ENGR 142, MATH 187, 387, 464, 467.

See department for requirements.

**Graduate Program**

The degrees of Master of Arts, Master of Science, and Doctor of Philosophy are offered. Opportunities are available within the department for study of pure or applied mathematics for each of these degree programs. The Master of Arts degree is appropriate for students who need a broad background in advanced mathematics and who expect to continue working with mathematics of approximately the same level in their careers.

The Master of Science degree is appropriate for students who expect to be working with more specialized mathematics of increasing order of complexity in their careers. The Doctor of Philosophy degree is the highest professional degree in mathematics. It is appropriate for students who plan on a career of research and/or teaching of mathematics at the highest levels.

Of the master's degrees, the M.S. non-thesis program has the most demanding course requirements and most closely matches the early stages of the Ph.D. program. The majority of students who enter the department begin their studies with the Ph.D. or M.S. non-thesis program in mind. The M.S. programs with options in numerical analysis or optimization provide more focused training in these areas, which can be useful for students seeking employment in certain industries; however, students intending to do research in these areas would normally follow the requirements of the Ph.D. program. Note that the department does not offer a master's degree in mathematics education.

**Master of Arts Degree**

**Admission Requirement:** Bachelor of Arts degree with major in mathematics or equivalent background (minimum of 45 quarter credits, or 30 semester credits of mathematics beyond college algebra).

**Graduation Requirements:** With Thesis—A minimum of nine one-quarter courses numbered 400 or above, at least six of which are numbered 500 or higher, and the thesis. Without Thesis—A minimum of twelve approved one-quarter courses numbered 400 or above, at least six of which are numbered 500 or higher, and the thesis. For each of these degree programs, the thesis must include at least two courses in each of algebra, analysis, and another field. Demonstration of proficiency in one of the languages: French, German, or Russian. Thesis is defended in an oral examination.

**Numerical Analysis/Optimization Option—Total of twelve one-quarter courses, at least six of which are at the 500 level, chosen from 424, 425, 426, 427, 428, 429; and any 500-level mathematics courses in their careers. The Doctor of Philosophy degree is the highest professional degree in mathematics.**

**Minor**

see department for requirements.

**Graduation Requirements: With Thesis—A minimum of twelve approved one-quarter courses numbered 400 or above, at least six of which are numbered 500 or higher, and the thesis. Without Thesis—A minimum of twelve approved one-quarter courses numbered 400 or above, at least six of which are numbered 500 or higher, and the thesis.**

**Financial Support**

Most graduate students in mathematics are supported by fellowships and teaching assistantships. The workload for mathematics graduate students and faculty in two computer laboratories open 24 hours a day, seven days a week. Other computer facilities outside the department include Macintosh, IBM-PC, and NeXT computer laboratories as well as mainframe computers, high resolution printers, and plotters.

Douglas A. Lind

Professors

Arms, Judith M. * 1980; PhD, 1977, University of California (Berkeley); geometric analysis of Hamiltonian systems with symmetry. Bube, Kenneth P. * 1986; PhD, 1978, Stanford University; numerical analysis, partial differential equations. Burgari, Lutz * 1986; PhD, 1982, Princeton University; analysis/geometry (several complex variables, complex varieties). Burke, James V. * 1985; PhD, 1983, University of Illinois; optimization, nonsmooth analysis. Collingwood, David * 1987; PhD, 1983, University of Utah; representation theory. King, James Richard * 1975; PhD, 1969, University of California (Berkeley); complex manifolds, instructional computing in geometry. Kingston, J. Maurice * 1940, (Emeritus); PhD, 1939, University of Toronto (Canada); math education (secondary). Lee, John M. * 1985; PhD, 1982, Massachusetts Institute of Technology; differential geometry and partial differential equations. Monk, George Stephen * 1964; PhD, 1966, University of Minnesota; mathematics education. Moore, Robert T. * 1968; PhD, 1964, Princeton University; operator theory, group representation, mathematical software and experimental mathematics. Tuncel, Selim * 1986; PhD, 1981, University of Warwick (UK); ergodic theory, symbolic dynamics. Assistant Professors

Devinatz, Ethan S. * 1991; PhD, 1985, Massachusetts Institute of Technology; algebraic topology. McGovern, William M. * 1990; PhD, 1987, Massachusetts Institute of Technology; representation theory. Ozols, Vinils * 1968; PhD, 1967, University of California (Berkeley); Lie groups, Riemannian geometry. Rush, Jason A. * 1990; PhD, 1988, University of California (San Diego); packing and covering, coding theory, geometry of numbers. Smith, Hart F. * 1951; PhD, 1959, Princeton University; partial differential equations, Fourier analysis. Solomyak, Boris 1990; PhD, 1986, Leningrad University (USSR); ergodic theory, symbolic dynamics. Teeng, Paul Yun * 1990; PhD, 1986, Massachusetts Institute of Technology; large-scale problems. Senior Lecturers

Warfield, Virginia 1977; PhD, 1971, Brown University; probability and the teaching of mathematics. Lecturer

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

MATH 100, 102 Algebra (5,5) Similar to the first three terms of high school algebra. Assumes no previous experience in algebra. Open only to students [1] in the Educational Opportunity Program or [2] admitted with an entrance deficiency in mathematics. Offered: AW, AWP.

MATH 101 Intermediate Algebra (0) Intermediate algebra equivalent to third semester of high school algebra. Instruction provided by community colleges on UW campus. Extra fee required. Offered: AWP.

MATH 102 Introduction to Elementary Functions (5) Continues the study of algebra begun in 100 and 102 with emphasis on functions (polynomial, rational, logarithmic, exponential, and trigonometric). Open only students who have completed 102. Offered: AWP.

MATH 107 Mathematics: A Practical Art (5) NW, QSR For students not planning to take additional mathematics. The exponential function, how it applies to a wide variety of phenomena. Elementary probability and statistics; their use in a variety of applications. Prerequisites: 1½ years high school algebra and placement test, or equivalent. Offered: WSp.

MATH 111 Algebra with Applications (5) NW, QSR Use of graphs and algebraic functions as found in business and economics. Algebraic and graphical manipulations to solve problems; exponential and logarithm functions; various applications to growth of money. Prerequisites: one and a half years of high school algebra and placement test, or equivalent. Offered: AWS.
MATH 112 Application of Calculus to Business and Economics (5) NW, QSR
Rates of change, tangential, derivative, accumulation, area, integrals in specific contexts, particularly economics. Techniques of differentiation and integration. Application to problem solving. Optimization. Credit does not apply toward a mathematics major. Prerequisite: 111. Offered: AWSpS.

MATH 120 Precalculus (5) NW Polynomial, rational, exponential, and trigonometric functions. For students needing preparation for 124; not advised for students who will not take 124. Does not satisfy natural science distribution or QSR proficiency requirement. Prerequisites: two years high school algebra and placement test or equivalent. Offered: AWSpS.

MATH 124 Calculus with Analytic Geometry I (5) NW, QSR Differentiation, applications of derivative, integration. Calculus for natural sciences and engineering students. Prerequisites: four years of college preparatory mathematics or equivalent (normally including precalculus or mathematical analysis with grades of B or better) and placement test or grade of 2.5 in 120, or equivalent. Offered: AWSpS.

MATH 125 Calculus with Analytic Geometry II (5) NW Applications of integration, transcendental functions, matrix representation and improper integrals, introduction to first or second order differential equations. Prerequisite: 124. Offered: AWSpS.

MATH 126 Calculus with Analytic Geometry III (5) NW Vectors and vector functions in space, functions of several variables and applications, multiple integrals. Prerequisite: 125. Offered: AWSpS.

MATH 134, 135, 136 Accelerated [Honors] Calculus (5,5,5) NW, QSR Covers the material of 124, 125, 126; 307, 308. First year of a two-year accelerated sequence lasting at least two years. Credit may receive advanced placement (AP) credit for 124 after taking 134, and for 125 after taking 135. May not receive credit for both 126 and 136. For students with above average preparation, interest, and ability in mathematics. Prerequisites: one year of high school calculus and AP score of 4 or more, or equivalent. Offered: A,W,Sp.

MATH 170, 171 Mathematics for Elementary School Teachers (3,3) NW Basic concepts of numbers and operations (170) and of geometry (171). Emphasizes problem solving, communication of mathematics, and assessment of student learning/teaching these concepts. Credit may not apply toward a mathematics major. 170 required for elementary education students. Credit/no credit only. Prerequisites: 3 years of high school math. Offered: AWS.

MATH 187 Elementary Mathematics Computer Laboratory (1, max. 3) NW Laboratory activities designed to introduce computing as a tool for doing mathematics, to be taken jointly with a designated section of a 100-level mathematics course. Credit/no credit only. Prerequisite: concurrent registration in a designated 100-level mathematics course. Offered: AWSpS.

MATH 189 Problem Solving in Mathematics (2, max. 4) NW Lectures and problem sessions in mathematics with applications. Enrollment restricted to EOP students only. Credit/no credit only. Offered: AWS.

MATH 188 Special Topics in Mathematics (1-5, max. 15) NW Independent reading in math. Does not count as credit toward a math major. Credit/no credit only. Limited to previous enrollment in 124; approval of Director of Undergraduate Math Program, and supervision of regular faculty member. Offered: May receive advanced placement (AP) credit for 124 after taking 134, and for 125 after taking 135. May not receive credit for both 126 and 136. For students with above average preparation, interest, and ability in mathematics. Prerequisites: one year of high school calculus and AP score of 4 or more, or equivalent. Offered: A,W,Sp.

MATH 205 Elementary Linear Algebra (3) NW Systems of equations, vector spaces, matrices, linear transformations, characteristic vectors. Not open for credit to students who have taken 308. Prerequisite: 124 or 112. Offered: S.
in Hilbert space, group representations, Fourier series and integrals, topological linear spaces, potential theory, and numerical analysis.

**MATH 534, 535, 536 Complex Variable (3,5,5)** Complex numbers, analytic functions, contour integration, power series, analytic continuation, sequences of analytic functions, conformal mapping of simply connected regions. Prerequisites: 426 for 534; 534 for 535; 535 for 536.

**MATH 541, 542, 543 Special Topics In Applied Mathematics (2-3, max. 15; 2-3, max. 15; 2-3, max. 15)** Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

**MATH 544, 545, 546 Topology and Geometry of Manifolds (5,5,5)** Introduction to manifolds: point-set topology, the fundamental group, covering spaces, topological and differentiable manifolds, differential forms, Stokes' theorem, deRham cohomology, vector fields, flows, the Frobenius theorem, Lie groups, homogeneous spaces. Prerequisite: 426.

**MATH 547, 548, 549 Geometric Structures (3, max. 9; 3, max. 9; 3, max. 9)** Introduction to differential-geometric structures on manifolds. 547: Riemannian metrics, geodesics, covariant differentiation, curvature, Jacobi fields, Gauss-Bonnet theorem. 548, 549: Selected topics, such as connections in vector bundles and principal bundles, symplectic geometry, Riemannian comparison theorems, symmetric spaces, symplectic geometry, complex manifolds, Hodge theory. Prerequisite: 546.

**MATH 555 Seminar In Geometry (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 551, 552, 553 Special Topics In Geometry (2-3, max. 15; 2-3, max. 15; 2-3, max. 15)** In recent years, the following subjects have been covered: Riemannian geometry, differentiable manifolds, complex manifolds, geometry of convex bodies.

**MATH 557, 558, 559 Special Topics In Numerical Analysis (2-3, max. 15; 2-3, max. 15; 2-3, max. 15)** Such topics as linear systems, approximation theory, or the numerical solution of differential equations are covered.

**MATH 564, 565, 566 Algebraic Topology (3,3,3)** Classical and modern approaches; complexes and their homology theory; applications. Fixed points, primary obstruction; products and Poincare duality; axiomatic approaches, covering spaces. Prerequisites: 506 for 564; 564 for 565; 565 for 566.

**MATH 569 Partial Differential Equations (3)** Analytical solution techniques for linear partial differential equations, discussion of how these arise in engineering and science. Transform and Green's function methods. Classification of second-order equations, theory and applications of method of characteristics. Prerequisites: A A 403, A A 566 or 428 or permission of instructor. Offered: jointly with A A/AMATH 569.

**MATH 570 Seminar In Topology (2-5, max. 5)** Prerequisite: permission of graduate program coordinator. Credit/no credit only.

**MATH 571, 572, 573 Special Topics In Topology (2-3, max. 15; 2-3, max. 15; 2-3, max. 15)** Special topics from general and algebraic topology.

**MATH 577, 578, 579 Lie Groups and Lie Algebras (3, max. 6; 3, max. 6; 3, max. 6)** Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie groups, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisites: 506, 526 or 546.

**MATH 587 Asymptotics and Special Functions (3)** Origin and properties of higher transcendental functions; theoretical basis and applications of Laplace, Fourier, Bessel, Mellin transforms; asymptotic analysis, including methods of steepest descent and stationary phase. Prerequisite: MATH 567, 568, 569, or equivalent. Offered: jointly with MATH 587.

**MATH 590 Seminar In Probability (2-5, max. 5)** Credit/no credit only. Prerequisite: permission of instructor.

**MATH 591, 592, 593 Special Topics In Probability (2-3, max. 15; 2-3, max. 15; 2-3, max. 15)** In recent years, the following subjects have been covered: advanced probability theory, stochastic processes, distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation).

**MATH 594, 595, 596 Numerical Analysis (3,3,3)** Error analysis, linear systems, LU, QR, and SVD factorizations, eigenvalues, least squares, iterative methods for linear and nonlinear systems, optimization, interpolation, approximation, splines, Fourier series, FFTs. Prerequisites: 450 or permission of instructor. Offered: jointly with MATH 594, 555, 556.

**MATH 597, 598, 599 Numerical Solutions Of Differential Equations (3,3,3)** Numerical quadrature and numerical integration, solution of ordinary differential equations, initial and boundary value problems, solution of partial differential equations by finite difference and finite element methods, stability analysis and boundary conditions, solution of large sparse linear systems. Prerequisites: 450 or permission of instructor. Offered: jointly with MATH 597, 598, 599.

**MATH 600 Independent Study or Research (*)**

**MATH 700 Master's Thesis (*)**

**MATH 800 Doctoral Dissertation (*)**

---

**Microbiology**

**G315 Health Sciences**

Microbiology is a natural science that deals with cellular and acellular forms of life, including bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these entities, their effects on humans and the environment, and how they can be exploited to provide useful products.

---

**Undergraduate Program**

**Adviser**

Sarah Mears

G315 Health Sciences

**Bachelor of Science Degree**

**Admission Requirements:** Minimum 75 credits applicable to graduation, with an overall GPA of 2.25 in prerequisite chemistry and biology courses. Students should complete departmental requirements in biology and chemistry (inorganic and organic) before applying for admission.

**Major Requirements:** Minimum 90 credits in the biological, physical, and mathematical sciences, to include: 10-15 credits in biology, botany, and/or zoology (BIOI 201, 202, 203 preferred); 30-31 credits in required microbiology courses (MICRO 402, 410, 411, 412, 431, 441, 442, 443, 496, and 445 or 450); 3-13 credits in approved microbiology electives (MICRO 301, 302, 319, 331 cannot be used); 12 credits in inorganic chemistry (normally CHEM 140, 150, 160); 8-12 credits in organic chemistry (CHEM 223, 224; or 237, 238, 239; or 335, 336, 337); 12 credits in Physics (PHYS 114, 115, 116; or 121/131, 122/132, 123/133); 5 credits in mathematics (MATH 112 or 124; or Q SCI 381; or STAT 311). Minimum 2.25 cumulative GPA in required and elective microbiology courses used toward graduation requirement. Transfer students must complete at least 20 of the required and elective microbiology credits at the UW.

Students interested in majoring in microbiology should obtain the departmental undergraduate guide, available in G315 Health Sciences.

**Minor**

See department for requirements.

For faculty listing and course descriptions, see School of Medicine section.

---

**Middle Eastern Studies**

See International Studies.

---

**Music**

**102 Music**

The School of Music prepares students for careers as composers, performers, teachers, or researchers. It also offers general courses to nonmajors, designed to enhance the student's understanding of the art of music.

Undergraduate programs include: four-year programs leading to either the Bachelor of Arts or Bachelor of Music and five-year programs leading to the concurrent Bachelor of Arts and Bachelor of Music double degrees. A minor in music is also offered.

Two undergraduate music-related degree programs, ethnomusicology and music technology, are offered through General Studies. See music or general studies adviser for details.

Graduate programs lead to the degrees of Master of Arts, Master of Music, Doctor of Musical Arts, and Doctor of Philosophy.

---

**Undergraduate Program**

**Minor**

**Minor Requirements:** A minimum of 25 credits of music courses, i.e., courses with the following prefixes: MUSIC, MUHST, MUSEN, MUSAP, MUSED. No more than 10 credits of 100-level courses may count toward the minor.
### Major

**Admission Requirements**

All students must audition and qualify at the 800 level or better in their principal performance areas in order to be admitted as music majors and to receive private instruction. Major status in performance areas is accorded when, after admission to the College of Arts and Sciences, one of the following two requirements is met:

1. The student completes the School of Music audition and receives approval for participation in the School of Music.
2. The student successfully completed the School of Music specialization courses and receive approval for participation in the School of Music.

The student must maintain approval status in the School of Music. Students must maintain a 2.50 GPA or higher in all music courses, and a 2.0 minimum GPA in all academic courses.

**Continuation of Major Status**

Students must maintain a 2.50 GPA in all music courses and a 2.0 minimum GPA in all academic courses. Students who fail to meet these requirements will be automatically dropped from the major.

**Graduate Point Requirements**

In all cases, undergraduate music majors are required to earn a minimum grade of 2.0 in each course (core and elective) counted toward music degree requirements. An overall minimum GPA in all music courses is required for graduation. The specific requirements vary depending on the major.

### Core Requirements

The music theory-core course, required in each of the undergraduate curricula, is as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>MUSIC 111, 112, 113 First-Year Theory (3,3,3)</td>
<td>9</td>
</tr>
<tr>
<td>MUSIC 113, 114, 115 Ear Training (1,1,1)</td>
<td>3</td>
</tr>
<tr>
<td>MUSIC 210, 211, 212 2nd-Year Theory (3,3,3)</td>
<td>9</td>
</tr>
<tr>
<td>MUHST 213, 214, 215 Music After 1750 (3,3,3)</td>
<td>9</td>
</tr>
<tr>
<td>MUSIC 310 Modal Counterpoint (3)</td>
<td>3</td>
</tr>
<tr>
<td>MUSIC 312 Twentieth-Century Techniques (3)</td>
<td>3</td>
</tr>
<tr>
<td>MUHST 313, 314 Music Before 1750 (3,3)</td>
<td>6</td>
</tr>
<tr>
<td>MUSIC 326, 327, 328 Repertoire (2,2,2)</td>
<td>6</td>
</tr>
<tr>
<td>MUSIC 336 Pedagogy (2,2,2)</td>
<td>6</td>
</tr>
<tr>
<td>MUSIC 380, 381, 382 Conducting (1,1,1)</td>
<td>6</td>
</tr>
<tr>
<td>MUSIC 388 Jazz Pedagogy (2,2,2)</td>
<td>6</td>
</tr>
<tr>
<td>MUSIC 479 Senior Recital (1)</td>
<td>3</td>
</tr>
<tr>
<td>TOTAL</td>
<td>54-55</td>
</tr>
</tbody>
</table>

**Bachelor of Arts Degree**

**General Requirements:** A minimum of 180 credits, of which 60 must be taken in departments other than the School of Music. All College of Arts and Sciences graduation requirements must be met. A cumulative GPA of 2.50 for all music courses and a 2.0 minimum grade for each music course is required for graduation.

**MUSIC THEORY-HISTORY OPTION**

**Major Requirements:** Music theory-history core (including 9 credits of upper-division MUSIC or MUHST theory or history electives), plus 10 credits in vocal or instrumental instruction, and six quarters of ensemble, for a minimum of 70 credits.

**VOCAL OR INSTRUMENTAL OPTION**

**Major Requirements:** Music theory-history core (excluding the 9-10 credits in upper-division MUSIC or MUHST theory or history electives), plus 18 credits in vocal or instrumental instruction, and seven quarters in ensembles, for a minimum of 70 credits.

**Bachelor of Music Degree**

**Admission Requirements:** The Bachelor of Music majors are intended for specially qualified students who wish to emphasize professional training in performance or composition within a four-year program. Students should see the undergraduate adviser regarding special admission procedures for this program. Admission to the B.Mus. degree programs is accomplished by jury and special recommendation during the sophomore year.

**General Requirements:** A minimum of 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 55 credits in Areas of Knowledge, to include at least 20 credits each in two of the following three areas: Visual, Literary, & Performing Arts; Individuals & Societies; the Natural World. Of the 120 credits allowed in the School of Music, 100 may be in the major, but the additional 20 must be outside the primary area of the major (for applied music majors, 20 credits in nonperformance areas).

### Composition

- **Courses:**
  - Music theory-history core: 54-55 credits
  - Music 191, 291, 391, 491 Composition (3.9.9.9): 36
  - Music 487 Tonal Counterpoint (3): 3
  - Music 490 Orchestration (3): 3
  - Vocal or instrumental instruction: 18
  - Music 380, 381, 382 Conducting (1.1.1): 3
  - Musical Ensembles: 12
  - Total: 129-130

**Jazz Studies**

- **Courses:**
  - Music theory-history core: 54-55
  - Music 313, 314, but to include Music 207, 208, 209, 425, and 9-10 credits of theory-history electives chosen from:
    - Music 216, 217, 218 Introductory Composition (2,2,2)
    - Music 313, 314 Music Before 1750 (3,3)
    - Music 318, 317, 318 Music Cultures of the World (5,5,5)
    - Music 367, 369 Beginning Jazz Improvisation (1,1,1)
    - Music 423 Twentieth-Century Music: To 1945 (3)
    - Music 424 Twentieth-Century Music: After 1945 (3)
  - Additional requirements: 17-19
  - 3-5 credits from the following:
    - Music 319 Afro-American Music (5) or Music 317 Music Cultures of the World (5)
    - Music 433 Music of Latin America (3)
  - Remaining 14 credits to include:
    - Music 336 Jazz Arranging (2)
    - Music 467, 468, 469 Advanced Jazz Improvisation (1,1,1)
    - Music 388 Jazz Pedagogy (2)
    - Music 301 Private Instruction: Piano or Music 233, 234, 235 Secondary Piano (2,2,2)
    - Music 479 Senior Recital (1)
  - Applied Instruction: 39
  - Music 321 through 328 Private Instruction (two years)
  - Private Instruction: Music 464 Jazz Laboratory (9)
  - Musical Ensembles: 21
  - Total: 131-134
Page 176 COLLEGE OF ARTS AND SCIENCES / MUSIC

**ACADEMIC OPTIONS**

**MUSIC HISTORY**

Students who intend to pursue graduate studies are strongly advised to establish proficiency in German or French and to acquire some acquaintance with one or two additional foreign languages.

**VOICE**

The voice faculty strongly recommends emphasis in languages, especially Italian, which may be used for the Language Skills requirement. SPHSC 200 is strongly recommended for 5 credits of the Natural World, and some course work in acting is also strongly recommended (e.g., Music 465, Acting for Singers).

**Choral majors**

MUSAP 233-235, 220, and Music 464 Secondary Piano (2,2,2) MIDI (2) Vocal Jazz Techniques (1)

**Graduate Program**

Graduate programs in the School of Music take into consideration the dual nature of music's subject matter. First, it is one of the creative arts, requiring constant renewal through the efforts of composers, performers, and teachers. Second, it is a branch of the humanities, subject to scholarly study and interpretation of its theoretical concepts and historical development. Advanced study presupposes an emphasis in one or the other direction without entirely neglecting the alternate aspect.

**Special Requirements**

Upon admission to the Graduate School as a music major, the student must further qualify for a specific area of specialization. See below.

**Financial Aid**

A limited number of teaching and staff assistantships are available. Accompanists are also employed at hourly rates. Competitive auditions for performance scholarships for new and returning students are held each year. The School of Music office may be contacted for details.

**Research Facilities**

The Music Building contains the music library, an electronic composition laboratory, a listening center, a systematic musicology laboratory, ethnomusicology archives, and the usual studio, practice, and classroom facilities of a modern music department. Ensembles available for student participation include opera, Contemporary Group, Collegium Musicum, and several non-Western ensembles among the many traditional large and small choral and instrumental groups.

**Master of Music, Doctor of Musical Arts Degree**

The programs with more creative emphasis lead to the degrees of Master of Music and Doctor of Musical Arts. Areas of specialization: performance (piano, organ, voice, strings, other orchestral instruments), instrumental conducting, choral conducting, composition, and opera production. Except for composition, the Graduate Record Examination is not required for application to these graduate programs. All graduate students must maintain a GPA of at least 3.00, and a
minimum grade of 3.0 in courses used to fulfill School of Music graduation requirements.

Master of Music Degree

Admission Requirements: Audition required for entrance to performance and composition. Entrance to other areas by permission. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising.

Graduation Requirements: 45 credits, of which 18 must be in courses at the 500 level or above. Demonstration of proficiency in one language from French, German, Italian, and Latin. With thesis—A final oral examination is required.

Doctor of Musical Arts Degree

Admission Requirements: Audition required for performance and composition. Entrance to other areas by permission. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising.

Graduation Requirements: Three academic years of study; dissertation in lieu of a full-length dissertation; a thesis in these three parts may be substituted, of which one must be a research paper and two may be additional research papers, or musical compositions, or documented public performances, or documented lecture demonstrations. Demonstration of proficiency in one language (two languages for voice) from among French, German, Italian, and Latin, as soon as possible, but, in any case, before taking the General Examination.

Master of Arts, Doctor of Philosophy Degrees

The research-oriented programs lead to the degrees of Master of Arts and Doctor of Philosophy. Areas of specialization: music theory, music history, ethnomusicology, systematic musicology, and music education. The Graduate Record Examination is required for application to some of these graduate programs. Check individual program requirements. All graduate students must maintain a GPA of at least 3.00, and a minimum grade of 3.0 in courses used to fulfill School of Music graduation requirements.

Master of Arts Degree

Admission Requirements: Requirements vary for the different areas of specialization. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising.

Graduation Requirements: 45 credits, of which 18 must be in courses at the 500 level or above and 9 in thesis. Except for Music Education, demonstration of proficiency in one language from among French, German, Italian, and Latin or another language as is necessary for research.

Doctor of Philosophy Degree

Admission Requirements: Requirements vary for the different areas of specialization. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising.

Graduation Requirements: Three academic years of study; dissertation. Demonstration of foreign language proficiency as soon as possible, but, in any case, before taking the General Examination. Details of the General Examination requirements for each of the areas of specialization are available from the School of Music graduate program coordinator.

Professors

Bauman, Thomas A. * 1989; PhD, 1977, University of California (Berkeley); music history and literature.
Beale, James M. * 1948, (Emeritus); MMus, 1947, Yale University; theory/composition.
Bernard, Jonathan W. * 1987; PhD, 1977, Yale University; theory and analysis of twentieth-century music.
Blum, David H. 1992, (Affiliate); music essayist, conductor.
Borgir, Tharald 1993, (Affiliate); PhD, 1971, University of California (Berkeley); music history.
Brown, Marshall J. * 1988, (Adjunct); PhD, 1972, Yale University; eighteenth- and nineteenth-century literature, literary theory, music and literature.
Campbell, Patricia S. * 1989; PhD, 1981, Kent State University; music and child development, multicultural music education, comparative music education.
Carlsen, James C. * 1967, (Emeritus); PhD, 1962, Northwestern University; systematic musicology, psychomusicology, research methodology, theories of music instruction.
Chaloupka, Vladimir * 1981, (Adjunct); PhD, 1975, University of Geneva (Switzerland); experimental elementary-particle physics.
Conlon, Joan C. * 1976; DMA, 1975, University of Washington; conducting, choral literature.
Curts-Verma, Mary * 1969, (Emeritus); BA, 1943, Hollins College; voice.
Dahstrom, Robert A. * 1971, (Adjunct); MA, 1967, University of Illinois; scene design.
Eichinger, Walter A. 1936, (Emeritus); MM, 1933, Northwestern University; organ.
Erde, Peter S. * 1989; Diploma, 1958, Franz Liszt Academy; works of Richard and Siegfried Wagner; history of the Wagner family.
Gangolli, Ramash A. * 1962, (Adjunct); PhD, 1961, Massachusetts Institute of Technology; probability theory, harmonic analysis on Lie groups.
Harman, R. Alexander 1966, (Emeritus); BM, 1949, University of Durham (UK); music history and literature.
Heinitz, Eva M. 1948, (Emeritus); studied at State Academy of Music (Berlin); violoncello.
Hokanson, Randolph H. * 1949, (Emeritus); studied with Dame Myra Hess, Howard Ferguson (London); piano.
Irvin, Demar B. 1937, (Emeritus); PhD, 1937, Harvard University; music history and literature.
Jenkins, Speight 1981, (Affiliate); opera production.
Kaplan, Abraham * 1977; Diploma, 1957, Juilliard School; conducting.
Kapp, David L. * 1979; MM, 1971, University of Wisconsin; French horn performance, chamber music, and theory.
Kechley, Gerald R. 1955, (Emeritus); MA, 1950, University of Washington; theory/composition.
Kind, Silvia E. 1969, (Emeritus); Konzert-Realin-Prufung, 1934, Hochschule für Musik (Berlin); harpsichord.
Lishner, Leon 1964, (Emeritus); Diploma, 1942, Juilliard School; voice.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Music

MUSIC 110, 111, 112 First-Year Theory (3,3,3) VLPA Durand Study of basic musical concepts and terminology through a program of listening, analysis, and keyboard practice. To be taken concurrently with 113, 114, 115. Required for music majors.

MUSIC 113, 114, 115 Ear Training (1,1,1) VLPA Development of aural skills through an emphasis on dictation, using sight-singing and keyboard skills as adjuncts. Development of ability to hear melodic, rhythmic, and harmonic elements of music accurately, and to commit them to notation. To be taken concurrently with 110, 111, 112. Recommended: concurrent enrollment in basic keyboard.

MUSIC 116, 117, 118 Elementary Music Theory (2,2,2) VLPA For nonmusic majors. 116: For people with no hands-on music experience. Rudiments of music; notation of time, pitch small structures (e.g., some scales, chords, rhythmic patterns), some analysis. 117: For students who can read music having some performance experience. 118: For students who read music, have some performance experience, are familiar with scales, chords, intervals. Includes analysis composition in various styles. Prerequisites: some music training including ability to read music or 116 for 117; familiarity with scales, chords, intervals or 117 for 118.

MUSIC 119 Music Fundamentals (2) VLPA Course emphasizes the development of aural perception using musical examples from music cultures of the world. Primarily for non-majors.

MUSIC 120 Survey of Music (5) VLPA Studies in listening with emphasis on the changing components of Western art music. Illustrated lectures, laboratory section meetings, and presentations by guest artists.

MUSIC 121 The Orchestra (2) VLPA Development of the orchestra and its literature.

MUSIC 122 The Opera (2) VLPA An introduction to opera through selected masterworks, from Monteverdi to the present. Primarily for non-majors.

MUSIC 137, 138, 139 Class Instruction: Voice (1,1,1) VLPA Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly Italian and French songs. Designed primarily for Music Education majors. Prerequisites: audition and ability to sight read.

MUSIC 161 American Musical Theater (5) VLPA Historical and stylistic study of the development of the American musical theater. European roots in opera and operetta. Contributions from jazz and popular music. Selected musicals studied.

MUSIC 162 American Popular Song (5) VLPA Historical, social, and stylistic study of popular idioms from the late nineteenth century to the present. Most attention to contemporary idioms (rock, country-western, soul, disco). Various facets of the industry examined to learn how they influence taste and musical style.

MUSIC 185 The Concert Season (2) VLPA Performances from the School of Music concert season, supplemented by lecture topics related to concert repertoire. Analysis of applicable musical topics appropriate for enhanced appreciation of historical and cultural contexts of works performed. Attendance at ten concerts required.

MUSIC 191 Composition (3, max. 9) VLPA One-hour private instruction and one-hour laboratory session each week. Intended to develop skill in creative musical expression. For composition majors only.

MUSIC 200 Music, Child, and Family (3) VLPA Campbell Study of music in childhood as part of socialization and enculturation of the child within family and community. Emphasis given to songs and music listening experiences provided by parents to nurture the child’s musical, social, and intellectual development from infancy through middle childhood. For nonmajors.

MUSIC 207, 208, 209 Second-Year Ear Training (1,1,1) VLPA To be taken concurrently with 210, 211, 212. Prerequisites: 112 and 115.

MUSIC 210, 211, 212 Second-Year Theory (3,3,3) VLPA Beede, Benshoof, Bernard, Durand, Karpen, Thorne Practical writing and analytic experience in diatonic and chromatic harmony as it was used during the eighteenth and nineteenth centuries. To be taken concurrently with MUSIC 213, 214, 215. Prerequisites: 112 and 115.

MUSIC 216, 217, 218 Introductory Composition (2,2,2) VLPA For students not majoring in composition. Prerequisite: 112.

MUSIC 237 Secondary Class Instruction: Voice (2, max. 6) VLPA Continuation of basic fundamentals of good singing: breathing, diction, voice focus and repertoire. Designed for students not yet prepared for private instruction. For music majors only. Prerequisites: audition or jury; 139.

MUSIC 270 World Popular Music (5) VLPA Waterman A global survey of popular music, including Latin America, Africa, Eastern Europe, the Middle East, Asia, and the Pacific. Emphasis on students’ ability to recognize styles and to analyze the social and historical processes that have shaped them.

MUSIC 271 Composition (3, max. 9) VLPA One-hour private instruction and one-hour laboratory session per week. Prerequisite: 191.

MUSIC 300 Music of Greater Mexico (3) VLPA Vokolek Regional styles of Mexico; consideration of pre-Hispanic Indian origins and the music of Chicanos in the American Southwest.

MUSIC 301 Piano Technology (3) VLPA Evolution of the piano; intonation and temperament theory; principles of tuning, voicing, regulating, and evaluating pianos. Credit/no credit only. Prerequisite: permission of instructor.

MUSIC 302, 303, 304 Diction for Singers (2,2,2) VLPA Application of basic rules of diction, enunciation, and articulation in Italian (302), German (303), and French (304). Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; non-majors on a space-available basis.
MUSIC 310 Medieval/Renaissance Counterpoint (3) VLPA Bernard, Durand, Karpen, Thorne Intensive study in the discipline of some contrapuntal style from the Medieval or Renaissance periods. Prerequisites: 212 and MUHST 215 or equivalent; to be taken concurrently with MUHST 313.

MUSIC 311 Tonal Counterpoint (3) VLPA Beale, Bernard, Durand, Karpen, Thorne Basic techniques of tonal counterpoint and introduction to the fugue. Prerequisites: 212 and MUHST 215; to be taken concurrently with MUHST 314.

MUSIC 312 Twentieth-Century Techniques (3) VLPA Practical writing and analytical study of twentieth-century composition techniques from Debussy to the present.

MUSIC 319 Afro-American Music (5) VLPA/ISP Centers on Black music in the United States, but also clarifies the relationship of this music to the musics of other Afro-American cultures as well as to their African roots.

MUSIC 325, 327, 328 Repertoire (2,2,2) VLPA For music majors.

MUSIC 331 History of Jazz (3) VLPA Survey of the major periods and styles of jazz, New Orleans jazz to the avant-garde and popular jazz of today. Studies the main characteristics of each style.

MUSIC 334 Band Arranging (2) VLPA Prerequisite: 212.

MUSIC 336 Jazz Arranging (2) VLPA Writing in jazz style for various instrumental combinations. To be able to arrange for modern jazz orchestra. Prerequisite: 212.

MUSIC 338 Baroque Ornamentation (2) VLPA Terry Musical ornamentation in France, Spain, England, Italy, and Germany from 1600 to 1800, with special reference to the harpsichord.

MUSIC 343 Musical Acoustics (3) VLPA Keefe How musical instruments function and interact with acoustics of rooms, with particular emphasis upon musical aspects of acoustics.

MUSIC 344 Psychology of Music (3) VLPA/ISP Carlson Human response to musical phenomena, with particular emphasis on perception, learning, measurement, and functional applications.

MUSIC 345 Sociology of Music (3) VLPA/ISP Lundquist Interrelationships between music and its social context. Specific musical phenomena and the social factors influencing their development.

MUSIC 350, 351, 352 Choral Conducting (1,1,1) VLPA Kaplan Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: 212 for 350; 350 for 351; 351 for 352, or permission of instructor; to be taken concurrently with MUSEN 307, 507.

MUSIC 356 Cylinders to Platters: A Survey of Recorded Music Since 1880 (3) VLPA Music as reflected through the influences of the recording industry and the development of related technologies. Examines social and cultural impacts that the recording age has brought to American and European musical cultures. Recommended: 120 and/or 162.

MUSIC 367, 368, 369 Beginning Jazz Improvisation I, II, III (1,1,1) VLPA Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: 212 or permission of instructor.

MUSIC 370 Junior Recital (1) VLPA For participants in the Bachelor of Music degree program only. Prerequisite: permission of instructor.

MUSIC 380, 381, 382 Instrumental Conducting (1,1,1) VLPA Acquaints the beginning conductor with basic techniques and their expressive modifications, basic rehearsal techniques and score study. Prerequisites: 212 or permission of the instructor.

MUSIC 384 Ideas In Music (5) VLPA/ISP Tarici The nature and methods of music. General concepts and history of music from its earliest to the most recent developments. Open to students in music and to students with an interest in the area. Prerequisite: 316 or permission of instructor.

MUSIC 385 Jazz History and Analysis (3) VLPA/ISP Includes the gong culture traditions of the Philippines, Sundanese, Balinese, and related traditions. Open only to students in music and to students with an interest in the area. Prerequisite: 316 or permission of instructor.

MUSIC 428 Music of North India (3) VLPA/ISP Sakata Classical and folk musical traditions of Iran, Turkey, and the Arab world. Prerequisite: 316 or permission of instructor.

MUSIC 441 Composition (3, max. 9) VLPA One-hour private instruction and one-hour laboratory session each week. Prerequisite: 291.

MUSIC 445 Selected Topics in Ethnomusicology (3, max. 9) VLPA/ISP Dealt with topics not covered by regular courses in ethnomusicology. Frequently taught by visiting lecturers. Content varies with different instructors. Prerequisite: permission of instructor.

MUSIC 447 Music of Southern India (3) VLPA/ISP Classical music of South India, the Karnatic tradition, with emphasis on the concert repertoire. Recommended: background in either ethnomusicology or South Asian studies.

MUSIC 448 Instrumental Music of China (3) VLPA/ISP Instrumental traditions of China from the earliest times to the present. Confluent philosophies that relate to music, theory, scale systems, cosmology. Recommended: background in either ethnomusicology or East Asian studies.

MUSIC 449 Vocal and Dramatic Music of China (3) VLPA/ISP Vocal and dramatic traditions of China from the earliest times to the present, including the relationship of music and language. Recommended: background in either ethnomusicology or East Asian studies.

MUSIC 450 Percussion Education Institute (1) VLPA Collier, Cruize Intensive four-week institute focusing on techniques in percussion, timpani, and mallet performance. Intended for music educators with little or no percussion experience desiring additional training to enhance their careers as music teachers. Includes private instruction, master classes, and percussion ensemble participation. Prerequisite: MUSAP 217 or permission of instructor.

MUSIC 451 Summer Jazz Institute (1) VLPA Brockman, Collier, Cummings, Seales Intensive one-week institute designed for the serious jazz student as well as for music educators. Includes six hours of daily instruction in jazz theory, ear-training, improvisation, arranging, as well as emphasis on rehearsal and performance techniques through sectional workshops and small group "jam sessions." Prerequisite: permission of instructor.

MUSIC 454 Organ Pedagogy (3) VLPA Terry Pedagogical approaches to organ techniques and performance practice, provides opportunity for practical application by means of student teaching.

MUSIC 456 Choral Arranging (3) VLPA Primarily for choral conductors who need to modify, arrange or
compose material to suit the capabilities of specific choral groups and performance situations. Prerequisite: senior standing or permission of instructor.

MUSIC 456 Practical Applications of Digital Signal Processing (3) VLPA Duisberg Digital signal processing applied to scientific investigations of musical systems, computer music, and digital audio. Applications using the music workstation. Prerequisites: 403 or 488 or programming competency and MATH 126.

MUSIC 457 Audio Engineering (3) VLPA Duisberg Accoustical and electrical circuit analysis. Audio instruments, physical models, computer-aided testing procedures, and audio applications. Prerequisites: MATH 126.

MUSIC 458 Organ Repertoire: Middle Ages through Baroque (3) VLPA Terry Analysis and performance practices of organ literature, Middle Ages through baroque period. Development of the organ as a musical instrument. Prerequisites: one 400-level history course, pre-1750, in addition to history core.

MUSIC 459 Organ Repertoire: Bach to Present (3) VLPA Terry Analysis and performance practices of organ literature, classical period through the twentieth century. Development of the organ as a musical instrument. Prerequisites: one 400-level history course, post 1750, in addition to history core.

MUSIC 460 Advanced Vocal Repertoire: Pre-Nineteenth-Century Art Songs (2, max. 6) VLPA Professional preparation of pre-nineteenth-century songs with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: 326, 327, 328 or permission of instructor.

MUSIC 461 Advanced Vocal Repertoire: Nineteenth-Century Art Songs (2, max. 6) VLPA Professional preparation of works from the literature of nineteenth-century operetta and lied, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: 326, 327, 328 or permission of instructor.

MUSIC 462 Advanced Vocal Repertoire: Twentieth-Century Art Songs (2, max. 6) VLPA Preparation of works from the twentieth-century repertoire of French, German, Italian, Spanish, and English songs, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: 326, 327, 328 or permission of instructor.

MUSIC 464 Jazz Laboratory (1, max. 9) VLPA Seales Forum for testing new technical skills, improvisational techniques, and jazz compositions and arrangements in a formal laboratory setting. Prerequisite: concurrent enrollment in MUSAP 400 or higher, or permission of instructor.

MUSIC 465 Acting for Singers (2, max. 6) VLPA Workshop designed specifically for the singing actor, focusing on character analysis, movement, and audition department skills.

MUSIC 467, 468, 469 Advanced Jazz Improvisation I, II, III (1,1,1) VLPA Collier, Seales Performance techniques in jazz improvisation for the advanced student. Prerequisite: 467, 468 for 467, 468 for 468; or permission of instructor.

MUSIC 470 Contemporary Theories I: Tonal Music (3) VLPA Schoenberg, Alban Berg. A study of the various developments of the theories of Heinrich Schenker; not restricted to music written before 1900. Prerequisites: 312 and MUSH 215, or permission of instructor.

MUSIC 471 Contemporary Theories II: Non-Tonal Music, 1900-1950 (3) VLPA Includes both "free atonal" and "classical serial" music. Systematic analysis of works of Schoenberg, Webern, Berg and others.

MUSIC 472 Contemporary Theories III: Seminar In New Music (3, max. 6) VLPA Continuation of 471. Emphasis on the many organizations aspiring to extend or replace tonality; late Stravinsky and other semi-salver matrices; "total serialism" and "systematic serialism" developed by and from Milton Babbitt; recent directions in non-salver "pitch-centric" and "set-centric" systems. Prerequisite: 471 or permission of instructor.

MUSIC 473, 474 Keyboard Harmony and Transposition (3,3) VLPA Terry Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: 472 for 473, 473 for 474, or permission of instructor. Offered: alternate years.

MUSIC 475 Figured Bass Realization (3) VLPA Terry Various styles of continuo realization for keyboardists, emphasizing Bach cantatas, Haydn symphonies, and Mozart operas. Prerequisite: 473 or permission of instructor. Offered: alternate years.

MUSIC 476 Advanced Vocal Repertoire: Seventeenth and Eighteenth Centuries (2) VLPA Opera repertoire, the post-Baroque era, focusing on major composers, including Handel, Haydn, Mozart, and Beethoven. Prerequisites: 326, 327, 328 or permission of instructor.

MUSIC 477 Advanced Vocal Repertoire: Nineteenth Century (2) VLPA Opera repertoire, the post Bel Canto era through Verdi, Puccini and Verismo, and significant German, French, and Slavic repertoire. Prerequisites: 326, 327, 328 or permission of instructor.

MUSIC 478 Advanced Vocal Repertoire: Twentieth Century (2) VLPA Opera repertoire, twentieth-century opera literature (Barber, Menotti, Bartok, Dvorak); understanding of style, character and overall artistic and musical needs of the present. Prerequisites: 326, 327, 328 or permission of instructor.

MUSIC 479 Senior Recital (1) VLPA Prerequisite: permission of instructor.

MUSIC 480 The Anthropology of Music (3) VLPA/ I&S Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation, e.g., evolutionary, diffusionist, historical particularist, structuralist, functionalist, symbolist, and semiotic, through examination of seminal texts. Prerequisite: ethnomusicology major or permission of instructor. Offered: jointly with ANTH 430.

MUSIC 481 Choral Repertoire: Sixteenth and Seventeenth Centuries (3) VLPA Conlon Sacred and secular choral literature from the Renaissance through the early baroque, covering Europe and England. Various genres and styles of major composers, including performance practice, rehearsals, and conducting. Prerequisite: senior standing or above, or permission of instructor.

MUSIC 482 Choral Repertoire: Eighteenth Century (3) VLPA Conlon Sacred and secular choral literature of the eighteenth century, covering England and Europe. Choral works of Bach, his predecessors, and contemporaries. Syllabic analysis and study of performance practice. Prerequisite: senior standing or above or permission of instructor.

MUSIC 483 Choral Repertoire: Nineteenth Century (3) VLPA Conlon Sacred and secular choral literature of the nineteenth century, covering mainland Europe and England. Analysis of accompanied and a cappella choral works by major composers with implications for conducting and programming of literature. Prerequisite: senior standing or above or permission of instructor.

MUSIC 484 Choral Repertoire: Twentieth Century (3) VLPA Conlon Choral literature of the twentieth century, covering America, England, and mainland Europe. Various genres and styles, including score study and teaching strategies. Prerequisite: senior standing or above or permission of instructor.

MUSIC 486 Practicum In Music Technology (3) VLPA Duisberg Classroom, laboratory, and field experience with audio equipment in performance and recording situations. Prerequisite: 457 or permission of instructor.

MUSIC 487 Tone Control Point (3) VLPA Beale, Durand, Karpen, Rahn Evaluation of fugal practices from the baroque era to the present. Prerequisite: 311.

MUSIC 488 Computer Applications to Music (3, max. 9) VLPA Duisberg Music workstation applications using microcomputers, music synthesizers, and analog-to-digital converters: music editing and score production, transcription, waveform and spectral analysis, and introduction to programming.

MUSIC 489 Special Topics In Music Theory (3, max. 9) VLPA Prerequisites: 312, MUSH 314.

MUSIC 490 Orchestra (3) VLPA Study of the instruments of the orchestra and practical experience in combining them; to enable the student to score for the orchestra. Emphasis primarily to be taken before band arranging or jazz arranging, but is not prerequisite. music major or permission of instructor.

MUSIC 491 Composition (3, max. 18) VLPA One-hour private instruction and one-hour laboratory session each week. Prerequisite: 391.

MUSIC 492, 493 Opera Direction and Production (4, 4) VLPA Deacon Practical experience with problems of the theater. Prerequisite: permission of instructor.

MUSIC 494 Music of Japan Until 1700 (3) VLPA/ I&S Sakata Gakiku, Biwa, shakuhachi, koto, and Noh genres. Open to students in music and East Asian area studies. Prerequisite: 316 or permission of instructor.

MUSIC 495 Music of Japan After 1700 (3) VLPA/ I&S Sakata Shamisen, Bunraku, Kabuki, and Sankyo traditions. Open to students in music and East Asian area studies. Prerequisite: 316 or permission of instructor.

MUSIC 498 Senior Thesis (3, max. 9) VLPA Design and completion of an individual research project and writing of a thesis under supervision of a faculty member. Required of students in the pre-Systematic Musicology major; available to others with the permission of the appropriate program adviser. Prerequisite: permission of instructor.

MUSIC 499 Undergraduate Research (* max. 6) Courses for Graduates Only

MUSIC 511 Seminar In Field and Laboratory Methods (3) VLPA Carlsen Study of experimental methods of research in ethnomusicology along with practical experience in recording and processing field and laboratory materials. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 512 Seminar In Ethnomusicology (3, max. 18) Study of ethnological procedures in ethnomusicology and application to specific research problems. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 514 Prospective In Systematic Musicology (3) Carlsen Examination of the principal research literature in the areas of systematic musicology.
MUSIC 521 Seminar In Music Perception (3, max. 9) Carlsen Study of music perception in the aural perception of musical sounds in context. Prerequisite: 344 or 544 or permission of instructor.

MUSIC 523 Seminar In Music and Socialization (3, max. 9) Lundquist Thesocialization process and music, including the interaction whereby music culture is learned. Prerequisite: 345 or 545 or permission of instructor.

MUSIC 529 Aural Analysis (3) Formal structural and stylistic analysis of music based on the aural rather than the printed form of music. Develops and uses a vocabulary of stylistic features for identification of mu­ sical examples, which are drawn from various parts of the world.

MUSIC 530 Seminar In Music Cognition (3, max. 9) Carlsen Study of research literature in cognition and music cognition, particularly as it relates to nonverbal musical experience. Prerequisite: 344 or 544 or permission of instructor.

MUSIC 531 Preseminar In Ethnomusicology (3) Theoretical and methodological practices in ethnomu­ sicology based on existing major writings. Critical evaluations of works with a broad view toward developing ethnomusicological research. Prerequisite: permission of instructor.

MUSIC 532 Opera Direction and Production (4/6, max. 12) Deacon Practical experience with problems of the opera theatre.

MUSIC 533, 534, 535 Preceptual Readings In Eth­ nomusicology (5,5,5) Significant ethnomusicological literature on the major music cultures. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 536 Transcription and Analysis (3) Study of practice in different notational analytical systems used in non-Western music. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 537 Seminar on Opera (3, max. 6) Seminar in music history, providing a complement to history of opera series (MUHST 407, 413, 419). Prerequisite: MUHST 500.

MUSIC 541 Seminar In Music and Society (3, max. 9) Lundquist Examination of human needs and prototypes of trends in current society and the potential of music to satisfy those needs. Prerequisite: 345 or 545 or permission of instructor.

MUSIC 543 Acoustics of Musical Instruments (2) Keefe Advanced examination of the acoustics of modern instruments, including methodologies for exper­ imental and computer-aided research.

MUSIC 544 Music Perception and Cognition (3) Ladd Examines the systematic research literature on the cognitive operations involved in musical performance, composition, and listening. Topics include: the mental representation of musical concepts, communi­ cation of expressiveness in music, memory for music, processing of tonal and non-tonal music; computer models of music in thinking and in the design of musical development; composition and improvisation.

MUSIC 545 Sociomusicology (3) Lundquist Examines the significant research literature on social systems operating in music.

MUSIC 547 Seminar In Music Technology (3, max. 9) Duisberg Current issues, recent research, and developments in music technology with emphasis on computer applications. Prerequisites: 343, 456, and 488, or permission of instructor.

MUSIC 551 Practicum In Music Instruction (3, max. 9) Practical application and validation of results of investigation in curriculum, music teaching and learning, performance and theoretical studies. Prerequisite: teaching experience or permission of instructor.

MUSIC 555 Systematic Methods of Music Re­ search (3) Carlsen Seminar in problem identification and definition, theory development, research design, data analysis and interpretation; an examination of the philosophy of science in music research.

MUSIC 556 Seminar In Music Acoustics (3, max. 9) Keefe Current research issues selected from acous­ tics of rooms and instruments, subjective musical acoustics, and computer applications to music re­ search. Prerequisite: permission of instructor.

MUSIC 558 Master's Recital (3, max. 9) Public performance for students in the Master of Music de­ gree program. Prerequisite: permission of instructor and Master of Music program standing.

MUSIC 570 Seminar In Tonality (3, max. 9) Bernard, Rahn Advanced theoretical and analytical work in tonal music and related systems. Prerequisite: 470.

MUSIC 571 Seminar In Serialism (3, max. 9) Bernard, Rahn Advanced theoretical and analytical work in serialism and other non-tonal systems. Prerequisite: 471 or equivalent.

MUSIC 573 Seminar In Theory (3, max. 18) Bernard, Rahn Development and discussion of current student and faculty research in compositional/theoretical music and metatheory.

MUSIC 576 Critical Theory of Music (3, max. 18) Philosophical foundations of the criticism of music, including relevant contemporary thought in the criti­ cism of literature and the other arts.

MUSIC 580, 581, 582 Advanced Conducting (3, max. 6; 3, max. 6; 3, max. 9)

MUSIC 583 Advanced Choral Conducting (3, max. 27) Kaplan

MUSIC 589 World Music Laboratory (3, max. 18) World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied changes from year to year. Prerequisite: 470; 471 or equivalent.

MUSIC 590 Doctoral Recital (2-4, max. 18) Public performance for students in the Doctor of Musical Arts degree program. Prerequisite: permission of instructor.

MUSIC 591 Graduate Composition (max. 30) Beale, Bernard, Benshoof, Durand, Karpen, Rahn, Thomé

MUSIC 595, 596, 597 Seminar In Systematic Field and Laboratory Research (3, max. 9; 3, max. 6; 3, max. 3) Various methodologies of research in systemat­ ic musicology, state of the science in specific musical problems. Practical experience in data collection and analysis for seminar presentations. Prerequisite: 555, which may be taken concurrently.

MUSIC 599 Advanced Selected Topics (1-3, max. 27) Selected readings on current issues and problems in music. Prerequisite: permission of a supervising music faculty member.

MUSIC 600 Independent Study or Research (*)

MUSIC 700 Master's Thesis (*)

MUSIC 800 Doctoral Dissertation (*)

Courses for Undergraduates

Music History Courses 400 through 424 Prerequisite: 314.

MUHST 213, 214, 215 Music After 1750 (3,3,3) VLPA In-depth survey of music from the Enlighten­ ment to the present, through study of the major figures and characteristic genres of the following three peri­ ods: 18th: The age of Haydn, Mozart, and Beethoven; 214: Romanticism in nineteenth-century music; 215: twentieth-century music. Introduction to the study of music history on the college level, with development of appropriate listening, analytical, and critical skills. Prere­ quisites: MUSIC 112, 115 for 213; 213 for 214, 215. Taken concurrently with MUSIC 210, 211, 212. For nonmajors, MUSIC 120 and the ability to follow a score.

MUHST 260 Orchestral Music (5) VLPA Orchestral music from its beginnings in the seventeenth century through recent developments; evolution of the sym­ phonies.

MUHST 261 Mozart (5) VLPA Introduction to Mozart's music and to musical life in Habsburg Austria during the Enlightenment. Mozart's musical personality studied through masterpieces in all genres, with principal emphasis on listening. Ability to read music not required.

MUHST 262 Introduction to Twentieth-Century Music (3) VLPA Starr Listener's survey of important composers and trends from Debussy through elec­ tronic music. Prerequisite: 120 or permission of instruc­ tor.

MUHST 263 Opera (5) VLPA Contributions of music, text, and staging; study of representative works concentrating on problems of combining these ele­ ments into a composite work of art.

MUHST 313, 314 Music Before 1750 (3,3) VLPA 313: Sacred and secular music of the Middle Ages and Renaissance; 314: Music in the Baroque era, from Monteverdi to Bach, and its relationship to contempo­ rary artistic, cultural, and political trends. Prerequisites: 215 and MUSIC 212 for 313, 313 for 314; to be taken concurrently with MUSIC 310, 311.

MUHST 330 Music In the United States (5) VLPA Contribution of music to the development of American culture.

MUHST 332 Music In European Society: Antiquity to 1700 (5) VLPA In music and its relationship to aspects of European culture and society-philosophy, politics, social conditions, and the visual arts from antiquity to 1700. Prerequisite: MUSIC 120 or equiva­ lent background.

MUHST 333 Music In European Society: 1700 to Present (5) VLPA/SSMusic as related to other aspects of modern European culture and society-philosophy, politics, social conditions, and the visual arts. Prerequisite: MUSIC 120 or equivalent.

MUHST 400 Medieval Music: To 1400 (3) VLPA Gregorian chant through Machaut and Landini.

MUHST 401 Early British Music: 1300-1700 (3) VLPA Examines the history of British music from its earliest polyphony through the music of Purcell. Stylis­ tic features of English music studied, including medi­ eval polyphony, Tudor music, Elizabethan music, and seventeenth-century music through Purcell.

MUHST 402 Late Renaissance Secular Music: 1525-1630 (3) VLPA The madrigal in Italy, England, and Germany. The Chanson, Jannequin through Lassus.

MUHST 403 Late Renaissance Sacred and Instrumental Music: 1525-1630 (3) VLPA Latin church music. Willaert through G. Gabrieli; early Reformation church music, Tallis through Gibbons; instrumental music, Cabezón, the English virginal school, and Sweelinck.

MUHST 404 Baroque Keyboard Music (3) VLPA Forms and styles: Frescobaldi through J.S. Bach and C.P.E. Bach.
MUHST 405 Orchestral Music: 1620-1760 (3) VLPA Corelli through the Mannheim School

MUHST 406 Baroque Choral Music (3) VLPA Monteverdi through Handel.

MUHST 407 Baroque Opera (3) VLPA Opera of the Baroque period.

MUHST 408 Keyboard Music: 1760-1830 (3) VLPA Haydn through Schumann.

MUHST 409 Chamber Music: 1760-1830 (3) VLPA Haydn through Schubert.

MUHST 410 Orchestral Music: 1760-1830 (3) VLPA Haydn through Berlioz.

MUHST 411 Art Song, 1760-1830 (3) VLPA The art song in European culture during the classical and early romantic periods.

MUHST 412 Choral Music: 1750-1830 (3) VLPA Large works for chorus and orchestra. Haydn through Berlioz.

MUHST 413 Opera: 1750-1830 (3) VLPA Gluck through Bellini.

MUHST 414 Keyboard Music: 1830-1915 (3) VLPA Liszt through Debussy.

MUHST 415 Chamber Music: 1830-1915 (3) VLPA Schumann through Ravel.

MUHST 416 Orchestral Music: 1830-1915 (3) VLPA Liszt and Brahms through early Schoenberg and Stravinsky.

MUHST 417 Art Song: 1830-1890 (3) VLPA Bozarth The Lieder of Schumann, Brahms, Wolf, Strauss, Mahler, and Schoenberg.

MUHST 418 Choral Music: 1830-1915 (3) VLPA Selected choral masterpieces. Brahms through Britten.

MUHST 419 Opera: 1830-1915 (3) VLPA Wagner through Puccini.

MUHST 420 Authenticity and Performance (3) VLPA Bauman The practical and philosophical issues raised by historically informed performance of early music on period instruments.

MUHST 421 Music Criticism (3) VLPA Starr Study of the various forms of music criticism, with an emphasis on the writing of valid examples and evaluation of one's own work along with that of others-classmates, journalists, and academic critics.

MUHST 423 Twentieth-Century Music: to 1945 (3) VLPA Starr Intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of this century.

MUHST 424 Music Since 1945 (3) VLPA Starr Diversity of the contemporary musical scene. Vocabularies appropriate for the description and understanding of the new music, developed through study of representative composers and works, and appropriate readings.

MUHST 426 American Popular Music (3) VLPA Starr An in-depth consideration of American popular music styles and repertory from about 1920 to the present day. Analysis of representative pieces; consideration of cultural and aesthetic issues relating to popular music; relationship of popular music to "art" music and to American culture and society. Prerequisites: 314 and MUSIC 312.

MUHST 429 Music, Literature, and the Arts (3) VLPA Literary and visual art works that include musical subject matter and forms; musical genres that incorporate such other arts as opera and ballet. Related philosophical writings. Includes works of a particular time period or investigation of a specific problem in comparative arts. Prerequisite: major in one of the arts, comparative arts, or related humanities field, or permission of instructor.

MUHST 497 Special Topics In Music History (1-3, max. 6) Topics vary each quarter.

Courses for Graduates Only

MUHST 500 Seminar In Methods of Music Research (3) Taricani Explores various critical approaches to research in music at the graduate level, examining specialized bibliographical resources, controversial arguments about musical issues, and other matters of musical criticism required to begin advanced study of music. Prerequisites: for all graduate music history courses except 515.

MUHST 503 Readings In Medieval and Renaissance Music (5) Taricani Musical styles, genres, and forms of the middle ages and Renaissance. Focuses upon musicalological problems and controversy related to music composed between ca. 1000 and 1600. Prerequisite: permission of instructor.

MUHST 504 Seminar In Medieval Music (3, max. 6) Prerequisite: 500.

MUHST 505 Seminar In Renaissance Music (3, max. 6) Prerequisite: 500.

MUHST 508 Seminar In Baroque Music (3, max. 6) Bozarth Prerequisite: 500.

MUHST 509 Seminar In Nineteenth-Century Music: 1830-1890 (3, max. 6) Bozarth Prerequisite: 500.

MUHST 510 Seminar In Music Since 1890 (3, max. 6) Starr Prerequisite: 500.

MUHST 515 Seminar In Medieval and Renaissance Notation (5) Gregorian chant through sixteenth-century prints.

MUHST 519 Seminar In Modern Editorial Procedures (5) Bozarth Study of modern procedures for preparing critical editions. Related areas of study may include analysis of musical style and historical and performance problems inherent in works being edited.

MUHST 520 Seminar In American Music (3, max. 6) Starr Research in the life, works, and times of composers in the United States from colonial days to the present. Prerequisite: 500 and graduate work in the history and analysis of twentieth century music.

Courses for Undergraduates

Music Education

MUSED 301, 302, 303 Musicianship for Teachers I, II, III (1,1,1) VLPA Applied experience for prospective music teachers in sight-singing, error detection, and keyboard skills relevant to the teaching of K-12 choral/vocal/general music. Performance techniques include reading (301), barred instruments (302), and guitar (303) as classroom instruments (with relevant literature). Prerequisite: 212, MUSAP 135.

MUSED 304, 305, 306 Elementary Instrumental Methods I, II, III (1,3, 3, 3, 3, 3) VLPA Comprehensive examination of materials for training in training instrumental students. Topics include recruiting, motivation, problems associated with evaluation. Methods of starting beginners and rehearsing ensembles are demonstrated with techniques address common problems to young players on string, wind, percussion instruments. To be taken concurrently with MUSAP 205, 210 and/or 217.

MUSED 340 Music in Education (3) VLPA Campbell, Goosby An orientation to the broad scope of issues regarding music in the schools (K-12), including curriculum, the development of instructional strategies, and evaluation techniques.

MUSED 401 Tin Pan Alley: Concepts and Teaching Strategies for Music Educators (1) VLPA Overview of Tin Pan Alley phenomenon that dominated the American popular music industry for nearly 70 years. Focuses on cooperative learning strategies and performance considerations in the school environment. Recommended: MUSIC 162.

MUSED 405 Marching Band Technique (2) VLPA Basics of marching and maneuvering discussed and used to write drill. Covers selection of music, use of marching procession, and show design. Students complete a drill for their own band or for an instrumentation determined by the instructor.

MUSED 410 Instrumental Rehearsal Techniques (3) Saltzman Includes score preparation, rehearsal formats, and error detection. Prerequisite: basic conducting skills.

MUSED 431 Curriculum In Music Education (3, max. 6) VLPA Campbell, Goosby Principles and practices of curriculum design applied to the development of the music curriculum. Individual or group work on elementary and secondary school music curriculum projects. Prerequisite: music teaching, student teaching, or permission of instructor.

MUSED 432 The General Music Class (3) VLPA Lundquist The teaching of music and its literature in music classes other than traditional ensembles from grade four through adults.

MUSED 440 Music for Children (3) VLPA Campbell Identification and selection of appropriate objectives, materials, teaching strategies and evaluation techniques used in teaching music from birth through grade 3, with consideration of various approaches (e.g., Delcroze, Kodaly, Orff) for early childhood development in music.

MUSED 442 Instrumental Curriculum: Methods and Materials (3) VLPA Goosby Study of the organization and administration of school instrumental music; the selection and use of materials and teaching strategies from beginning to advanced levels of instrumental instruction.

MUSED 443 Choral Curriculum: Methods and Materials (3) VLPA Conlon, Lundquist Study of the organization and administration of school choral music; the selection and use of materials and teaching strategies from beginning to advanced levels of choral instruction. Prerequisites: 340 and permission of instructor.

MUSED 452 Ethnomusicology in the Schools (3) VLPA Lundquist Issues, teaching materials, and techniques involved in incorporating music cultures of the United States and related world music repertoires in K-12 classroom instruction.

MUSED 453 Approaches to Classroom Instruction: K-12 (3) VLPA Campbell Examines such major instructional approaches as MCCP, Orff, Kodaly, and Da Capo. Linking ideas of the study of each and the methods, materials, and instructional skills needed for classroom application. Prerequisite: 340 or permission of instructor.

MUSED 465 Seminar In Field Experience (1-3, max. 3) VLPA Goosby Observation and analysis of teaching skills and management of music classes. Prerequisites: 200 hours of observation for each credit. Supervised teaching participation required when appropriate. Prerequisite: 340 or permission of instructor.
MUSED 475 Teaching the Music of Selected Cultures (1, max. 6) VLPA Campbell Music and culture of a specific world region with particular attention to songs, stories, and instrumental pieces applicable to the teaching of music and the arts in elementary and secondary schools.

MUSED 498 Special Topics in Music Education (1-3, max. 10) VLPA Music education topics to reflect contemporary emphases and concerns in the music education profession.

Courses for Graduates Only
MUSED 501 Introduction to Research in Music Education (3) Campbell Campbell in research design and method with emphasis on identification of problems in music instruction, interpretation of data, and application of findings to classroom settings.

MUSED 502 Quantitative Research in Music Education (3) Campbell, Demorest, Goosby Seminar in quantitative research utilizing experimental, quasi-experimental, and descriptive design, with emphasis on the pursuit of solutions to pedagogical problems through appropriate research procedures, analysis, and interpretation of findings. Prerequisite: 501.

MUSED 503 Ethnographic and Historical Research in Music Education (3) Campbell, Demorest, Goosby Examination of ethnographic and historical modes of inquiry relevant to music instruction in classroom, studio, and community settings. Prerequisite: 502.

MUSED 523 Tests and Measurement (3) Goosby Examination of currently published aptitude and achievement tests in music and their use in music education. Explores the basic methods for constructing classroom tests and their use in evaluation. Selected readings include researching test construction and application of tests and measurement to program evaluation.

MUSED 524 Seminar in Music Education (3) Special problems in the teaching and supervision of music in the elementary grades. Prerequisite: one year of teaching experience.

MUSED 525 Seminar in Music Education (3) Special problems in the teaching and administration of music in the secondary school and community college. Prerequisite: one year of teaching experience.

MUSED 530 Administration and Supervision in Music Education (3) Goosby, DeMiero Survey of issues in policy and systems for facilities, student/ personnel, technique, school/community relations, and special programs in music education. Focuses on evaluating and improving existing programs. Includes supervision of student teachers.

MUSED 535 Seminar in Musical Development (3) Demorest Critical review of theories, methods of inquiry, designs, and conclusions of research in musical development and pedagogy from “common wisdom”; and to provide a venue for guest speakers. Offered: A.

Courses for Undergraduates and Graduates
Music Ensemble Courses 100 and 302 are open to all students without audition. All other ensembles are open to majors and nonmajors with an audition or permission of instructor. Graduate students should register for the 500-level ensemble courses.

MUSEN 100 University Singers (1, max. 19) VLPA
MUSEN 300, 500 University Symphony Orchestra (1, max. 15; 1, max. 9) VLPA
MUSEN 301, 501 Wind Ensemble (1, max. 15; 1, max. 9) VLPA Salzman
MUSEN 302, 502 Symphonic Band (1, max. 10; 1, max. 6) VLPA Salzman
MUSEN 303, 503 Marching Band (2, max. 10; 2, max. 6) VLPA Bissell
MUSEN 304, 504 Percussion Ensemble (1, max. 12; 1, max. 9) VLPA Collier
MUSEN 305, 505 Brass Ensemble (1, max. 12; 1, max. 9) VLPA Kappy
MUSEN 306, 506 Woodwind Ensemble (1, max. 12; 1, max. 9) VLPA Stokowek
MUSEN 307, 507 University Oratorio Chorus (1, max. 15; 1, max. 9) VLPA Kaplan
MUSEN 325, 525 Accompanying (2, max. 30; 2, max. 18) VLPA Bergman
MUSEN 340, 540 Vocal Jazz Ensemble (1, max. 6; 1, max. 9) VLPA
MUSEN 345, 545 Jazz Workshop (1, max. 12; 1, max. 9) VLPA Collier, Seales
MUSEN 346, 546 Studio-Jazz Ensemble (1, max. 6; 1, max. 9) VLPA Cummings
MUSEN 347, 547 Opera Chorus (1, max. 12; 1, max. 9) VLPA Kaplan
MUSEN 350, 560 University Chorale (1, max. 12; 1, max. 9) VLPA Conton
MUSEN 351, 551 Madrigal Singers (1, max. 15; 1, max. 9) VLPA Conton
MUSEN 351, 551 Piano Ensemble (1, max. 3; 1, max. 9) VLPA O'Donnell. Study and performance of works for four hands at one or two pianos. Designed for upper-level piano majors or students with equivalent ability. Prerequisite: permission of instructor.
MUSEN 368, 568 Harp Ensemble (1, max. 12; 1, max. 9) VLPA Vokolek
MUSEN 369, 569 Baroque Chamber Ensemble (1, max. 12; 1, max. 9) VLPA Terry, Tindemans Prerequisite: permission of instructor.
MUSEN 375, 575 Opera Workshop (1, max. 6; 1, max. 9) VLPA Deacon Preparation of music theatre repertoire. Intended for the mature voice student. Prerequisite: permission of instructor.
MUSEN 380, 580 Sinfonietta (1, max. 6; 1, max. 9) VLPA
MUSEN 381, 581 Chamber Music (1, max. 18; 1, max. 9) VLPA Prerequisite: student is at MUSAP 300 level or above.
MUSEN 382, 582 Opera Theatre (2, max. 6; 2, max. 18) VLPA Deacon Public performance of roles in opera.
MUSEN 383, 583 Collegium Musicum (1, max. 6; 1, max. 9) VLPA Tindemans
MUSEN 384, 594 Contemporary Group (1, max. 6; 1, max. 9) VLPA Dempster Exploration of notation and performance problems in today's music; preparation for public performance.
MUSEN 448 Advanced Studio Jazz Ensemble (1, max. 6) VLPA Cummings Preparation and performance of material appropriate to jazz ensemble concerts, clinics, and radio and television broadcasts. Prerequisite: permission of instructor. Recommended: three quarters of 346.
MUSEN 465, 466, 467 Duo-Sonata Repertoire (2,2,2) VLPA 465: the classical period; 466: the romantic period; 467: the twentieth century. Prerequisite: undergraduate piano performance degree or permission of instructor.

Music Applied Open to majors and nonmajors by audition. Courses 300-319 are private instruction for nonmajors. Courses 320-329 are private instruction for graduate nonmajors and graduate performance majors who have not yet been formally admitted by jury examination to the 520-539 level. (Please note that graduate students must advance to the 520-539 level within the first three quarters of study or withdraw from the program.)

MUSAP 133, 134, 135 Basic Keyboard (2,2,2) VLPA Michaelian. Keyboard harmony and simple keyboard pieces. Class instruction. Prerequisites: ability to read notes (treble and bass clefs).
MUSAP 136 Basic Jazz Keyboard (2, max. 6) VLPA Seales Basics of jazz and pop chord voicings, reading lead sheets, basic accompanying in various jazz and pop styles. Prerequisites: audition and basic knowledge of music theory.
MUSAP 205 String Techniques (2, max. 12) VLPA Designed to prepare music education students to teach beginning and intermediate strings in the public schools.
MUSAP 210 Wind Techniques (2, max. 12) VLPA Designed to prepare music education students to teach beginning and intermediate woodwinds and brass in the public schools.
MUSAP 217 Percussion Techniques (2, max. 4) VLPA Collier The study of basic percussion techniques as they apply to music in the public schools.

MUSAP 218 Guitar Techniques (1, max. 3) VLPA Novacek Includes exercises to develop a good basic technique emphasizing correct position and movement of both hands, basic folk song accompaniments including a variety of strums, finger picking patterns, hammering on and bass runs, reading guitar music, classical pieces, special effects, and access to other styles.
Courses 320-339, 420-439 are private instruction for undergraduate music majors.

MUSAP 320, 420 Private Instruction: Voice (2-3, max. 27; 2-3, max. 27) VLPA Berendsen, Pelton

MUSAP 321, 421 Private Instruction: Piano (2-3, max. 27; 2-3, max. 27) VLPA McCabe, Michaelian, O'Dean, Sheppard

MUSAP 322, 422 Private Instruction: Organ (2-3, max. 27; 2-3, max. 27) VLPA Terry

MUSAP 323, 423 Private Instruction: Harpsichord (2-3, max. 27; 2-3, max. 27) VLPA Terry

MUSAP 324, 424 Private Instruction: Violin-Viola (2-3; max. 27; 2-3, max. 27) VLPA Schweede, Shumsky, Staryk

MUSAP 325, 425 Private Instruction: Violoncello (2-3, max. 27; 2-3, max. 27) VLPA Davis, Saks

MUSAP 326, 426 Private Instruction: Double Bass (2-3, max. 27; 2-3, max. 27) VLPA Brockman

MUSAP 327, 427 Private Instruction: Flute (2-3, max. 27; 2-3, max. 27) VLPA Skowronek

MUSAP 328, 428 Private Instruction: Oboe (2-3, max. 27; 2-3, max. 27) VLPA Klein

MUSAP 329, 429 Private Instruction: Clarinet (2-3, max. 27; 2-3, max. 27) VLPA McColl

MUSAP 330, 430 Private Instruction: Bassoon (2-3, max. 27; 2-3, max. 27) VLPA Grossman

MUSAP 331, 431 Private Instruction: Saxophone (2-3, max. 27; 2-3, max. 27) VLPA Brockman

MUSAP 332, 432 Private Instruction: Horn (2-3, max. 27; 2-3, max. 27) VLPA Kappy

MUSAP 333, 433 Private Instruction: Trumpet (2-3, max. 27; 2-3, max. 27) VLPA Cummings

MUSAP 334, 434 Private Instruction: Trombone (2-3, max. 27; 2-3, max. 27) VLPA Dempster

MUSAP 335, 435 Private Instruction: Tube (2-3, max. 27; 2-3, max. 27) VLPA Vokolek

MUSAP 336, 436 Private Instruction: Harp (2-3, max. 27; 2-3, max. 27) VLPA Vokolek

MUSAP 337, 437 Private Instruction: Percussion (2-3, max. 27; 2-3, max. 27) VLPA Collier, Crusoe

MUSAP 338, 438 Private Instruction: Guitar (2-3, max. 27; 2-3, max. 27) VLPA Vokolek

MUSAP 339, 439 Private Instruction: Viola da Gamba (2-3, max. 27; 2-3, max. 27) VLPA Tindemans

MUSAP 340, 440 Timpani (2-3, max. 27; 2-3, max. 27) VLPA Crusoe

MUSAP 341, 441 Mallet Percussion (2-3, max. 27; 2-3, max. 27) VLPA Collier

MUSAP 442 Jazz and Non-Western Drumming Techniques (2/3) VLPA Collier Focused study of American jazz drumming and/or hand drumming techniques of various world music cultures to broaden the skills of percussion students, preparing them for new demands of contemporary musical styles. Design of contemporary music majors enrolled in the percussion program.

Courses 520-539 are private instruction for graduate performance majors in the Masters of Music degree program. Courses 570-589 are private instruction for graduate performance majors who have been formally admitted by jury examination to the DMA degree program.

MUSAP 520, 570 Private Instruction: Voice (3, max. 18; 3, max. 27) VLPA Berendsen, Patrick, Pelton

MUSAP 521, 571 Private Instruction: Piano (3, max. 18; 3, max. 27) McCabe, Michaelian, O'Dean, Sheppard

MUSAP 522, 572 Private Instruction: Organ (3, max. 18; 3, max. 27) Terry

MUSAP 523, 573 Private Instruction: Harpsichord (3, max. 18; 3, max. 27) Terry

MUSAP 524, 574 Private Instruction: Violin-Viola (3, max. 18; 3, max. 27) Schweede, Shumsky, Staryk

MUSAP 525, 575 Private Instruction: Violoncello (3, max. 18; 3, max. 27) Saks

MUSAP 526, 576 Private Instruction: Double Bass (3, max. 18; 3, max. 27) Lieberman

MUSAP 527, 577 Private Instruction: Flute (3, max. 18; 3, max. 27) Skowronek

MUSAP 528, 578 Private Instruction: Oboe (3, max. 18; 3, max. 27) Klein

MUSAP 529, 579 Private Instruction: Clarinet (3, max. 18; 3, max. 27) McColl

MUSAP 530, 580 Private Instruction: Bassoon (3, max. 18; 3, max. 27) Brockman

MUSAP 532, 582 Private Instruction: Horn (3, max. 18; 3, max. 27) Kappy

MUSAP 533, 583 Private Instruction: Trumpet (3, max. 18; 3, max. 27) Cummings

MUSAP 534, 584 Private Instruction: Trombone (3, max. 18; 3, max. 27) Dempster

MUSAP 535, 585 Private Instruction: Tube (3, max. 18; 3, max. 27) Salzsmeh

MUSAP 536, 586 Private Instruction: Harp (3, max. 18; 3, max. 27) Vokolek

MUSAP 537, 587 Private Instruction: Percussion (3, max. 18; 3, max. 27) Collier, Crusoe

MUSAP 538, 588 Private Instruction: Guitar (3, max. 18; 3, max. 27) Novacek

MUSAP 539, 589 Private Instruction: Viola da Gamba (3, max. 18; 3, max. 27) Tindemans

MUSAP 540, 590 Timpani (3, max. 18; 3, max. 27) Crusoe

MUSAP 541, 591 Mallet Percussion (3, max. 18; 3, max. 27) Collier

Near Eastern Languages and Civilization

Undergraduate Program

The program focuses on the languages and civilizations of the Islamic Near and Middle East and the Semitic Near East, with an emphasis on the ancient and medieval roots of these civilizations as well as more recent cultural developments. Each of the languages offered represents a major literary tradition. Arabic, Persian, Turkish, and Central Asian Turkic are the languages of the most significant literary manifestations of Islamic civilization, while Hebrew is the language of the Old Testament and Judaism. The languages are taught in conjunction with their socio-
cultural context, so that linguistic skills will be formed and enhanced by a broad and sympathetic understanding, and a firm foundation will be laid for both intellectual exploration and practical experience.

Bachelor of Arts Degree

Major Requirements—Near Eastern Languages and Civilization: An approved program of 30 credits, excluding elementary and intermediate language courses, in courses offered by the department or courses on the Near East offered by other departments, or both, plus at least 9 credits in literature or text courses at the 400 level in the major language. Usually intermediate language courses are a prerequisite for these advanced courses. All majors are required to take NE 210 and one of the following: NE 211, NE 240, or RELIG 210. Study opportunities in the Near East and in Central Asia are available on a competitive basis for a limited number of students.

Major Requirements—Near Eastern Civilization: Two years of one Near Eastern language or its equivalent as evidenced by examination; NE 210; one of the following: NE 211, NE 240, or RELIG 210; 20 credits in Near Eastern courses including at least one course from each of the following areas: Near Eastern civilization, Near Eastern religion, Near Eastern literature in translation; 8 credits in non-language, upper-division courses related to the Near East in the department or in other departments; a senior essay on a topic of Near Eastern civilization (5 credits).

Minor

Minor Requirements: 25 credits including NE 210; one course from NE 211, 240, RELIG 210; additional credits from Near Eastern civilization or language courses (may not include language courses at the beginning or intermediate level).

Graduate Program

Master of Arts Degree

The Department of Near Eastern Languages and Civilization offers a graduate program of studies leading to the Master of Arts degree. The program is designed to provide students with advanced training in at least one Near Eastern language and in a specific field of specialization. Students may concentrate in Arabic, Hebrew, Persian, or Turkish and Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended not only for those students who wish to continue their studies at the doctoral level but also for students who wish to pursue careers in government or business.

Doctor of Philosophy Degree

Some of the department faculty are part of an interdisciplinary faculty group which offers doctoral study in Near Eastern Studies. The program is located administratively within The Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of this catalog.

Correspondence and Information

The Graduate School, AG-10
(206) 355-9051

Summer Programs

The department offers Summer Intensive Language programs in Arabic, Hebrew, and Central Asian languages (Uzbek, Kazakh, Tajik, and others).

Research Facilities

The University of Washington libraries hold an extensive collection of books and materials in the languages of the Near East, the Turkic regions of Central Asia, and in European languages on Near Eastern and Central Asian Turkic subjects. Candidates for the master’s degree as well as doctoral students will find in the collection adequate resources for their research.

Currently, the library participates in the Library of Congress Middle East Cooperative program for the acquisition of Arabic serials, and the Library of Congress Cooperative program for Pakistan for the purchase of Persian books and serials.

The library staff includes Near East and Central Asia specialists responsible for acquiring and cataloging the collection. The library maintains book exchanges with the Central Asian Republics, some of these beginning as early as 1961. They are handled through the Near East Section of the University’s Suzzallo Library. Among its staff are an exchange librarian and a specialist trained in Central Asian Turkic languages. A book exchange with Xinjiang is administered through the East Asia Library.

Admission Requirements

Statement of purpose; a sample of written work; three letters of recommendation, of which at least two must attest to scholarly ability. Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had the equivalent of two years’ study of the language in which they plan to concentrate.

Graduation Requirements

Departmental requirements, in addition to those required by the Graduate School for the Master of Arts degree, include a reading knowledge of French or German, or, with the prior approval of the student’s M.A. Committee, any other language pertinent to the research in the student’s field of study; a seminar paper representing the student’s best work; a written examination consisting of (1) an oral test of the full cultural content of the Near East, (2) on the student’s field of specialization, (3) on the student’s language of concentration, (4) on a second Near Eastern language related to the language concentration.

Fulfillment of these requirements will normally entail the completion of two years of study.

Financial Aid

Teaching assistantships are available for graduate students in the department who are fluent in speaking and writing a Near Eastern language. A limited number of graduate fellowships are also available.

Exchange Agreements

The University of Washington and the Department of Near Eastern Languages and Civilization maintain exchange agreements for graduate students and faculty with the following universities and institutions: American University in Cairo, Egypt; Hebrew University of Jerusalem—Israel; Tashkent University—Uzbekistan.

In addition the department maintains a direct exchange agreement with Xinjiang University, Urumchi, People’s Republic of China; established exchanges and cooperation with the Oriental Institute at the University of Chicago, Dushanbe; and participates in an agreement of scholarly exchanges and cooperation with the Uzbek Writers’ Union, the Uzbek Academy of Sciences, and the Kazakh Academy of Sciences.

The department is an institutional member of the following organizations which also offer opportunities for study and research abroad: Center for Arabic Study Abroad in Cairo (CASA), American Research Center in Egypt, and the American Research Institute in Turkey.

Professors

Bacharach, Jere L. * 1967, Adjunct; PhD, 1967, University of Michigan; history of the Middle East, Islamic.

Cirtautas, Lisel D. * 1968, PhD, 1958, University of Hamburg (Germany); Turkic languages and literatures.

Heer, Nicholas L. * 1965, Emeritus; PhD, 1955, Princeton University; Arabic language and literature, Islamic theology and philosophy.

MacKay, Pierre A. * 1966; hD, 1964, University of California (Berkeley); Greek literature, post-classical and Byzantine Greek literature, numismatics.

Ziaed, Farhat J. * 1966, Emeritus; LLB, 1940, University of London (UK); Arabic language and literature, Islamic law, Islamic institutions.

Associate Professors

Jaffe, Martin S. * 1987, Adjunct; PhD, 1980, Brown University; rabbinic religion and literature in late antiquity.

Karimi-Hakkak, Ahmad * 1986; PhD, 1979, Rutgers University; Persian language and literature.

Sokoloff, Naomi B. * 1985, PhD, 1980, Princeton University; Hebrew language and literature.

Williams, Michael A. * 197, (Adjunct); PhD, 1977, Harvard University; early Christianity and religions of antiquity.

Assistant Professors

DeYoung, Terri Lynn * 1991 PhD, 1988, University of California (Berkeley); Arabic language and literature.

Slay, Karmel * 1993; PhD, 993, Indiana University; Turkish language and literature.

Zysow, Aron * 1988; PhD, 184, Harvard University; Arabic language and literature, Islamic law, Islamic theology.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Arabic

ARAB 401 Adab Prose: Jahiz (3) VLPA Readings in early Arabic prose, especially the writings of Jahiz. Prerequisite: 476 or equivalent.

ARAB 402 Maqamat: Hamadhan, Harfri (3) VLPA Mackay. Reading of several maqamat (essays in rhymin prose) of al-Hamadhan and al-Hariri. Examination of the maqamat genre as a whole. Prerequisite: 476 or equivalent.

ARAB 403 Historians: Tabari (3) VLPA Readings in Arab historiow with particular reference to al-Tabari and his school of historical writing. Prerequisite: 476 or equivalent.

ARAB 404 Qur'an and Tafsir (3) VLPA Zysow Reading of various sections from the Qur'an with the relevant exegetical writings on religious, philological, and grammatical points. Prerequisite: 476 or equivalent.

ARAB 405 Hadith and Law (3) VLPA Zysow Selected readings from the traditions (hadith) of Muhammad, and from works on jurisprudence and law based on the holy texts. Prerequisite: 476 or equivalent.
HEBR 414 Hebrew Poetry (3) VLPA Sokoloff Selections of poetry by prominent twentieth-century Hebrew poets whose texts comment or elaborate on biblical texts. Original source considered side-by-side with modern poetry, to examine ways recent literature models itself on, draws upon, and revises traditional sources. Prerequisite: 476 or permission of instructor.

HEBR 415 Hebrew Fiction (3) VLPA Sokoloff Selections of fiction by prominent modern Hebrew writers, including S.Y. Agnon, Aharon Appelfeld, David Shafer, Aharon Megged, and others. Prerequisite: 476 or permission of instructor.

HEBR 470 Intensive Elementary Modern Hebrew (18) VLPA Intensive study of grammar, with oral and written drill and reading of simple texts. Summer quarter only. (Cannot be taken for credit if 471, 472, 473 taken.)

HEBR 471, 472, 473 Elementary Modern Hebrew (5,5,5) Sokoloff, Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 470 taken.) Prerequisites: 471 for 472, 472 for 473 or equivalent.

HEBR 474, 475, 476 Intermediate Modern Hebrew (5,5,5) VLPA Sokoloff Readings of selected texts in modern Hebrew with continuing emphasis on grammar and syntax. Prerequisites: 473 for 474, 474 for 475, 475 for 476 or equivalent.

HEBR 490 Supervised Study (1-6, max. 18) Special work in literary texts for graduates and undergraduates. Prerequisite: 476 or equivalent.

HEBR 499 Undergraduate Research (1-6, max. 18) Prerequisite: permission of instructor.

Turkic

TKIC 471, 472, 473 Introduction to Turkic Studies (3) Cirtautas Bibliography, problems, and methods of research in the field of Turkic studies. Historical and cultural studies of the Turkic background of the modern nations of the Turkic community. Prerequisite: permission of instructor.

TKIC 486, 487, 488 Advanced Turkic (3,3,3) VLPA Advanced courses in any of the Turkic languages. Prerequisites: 476, 477, 478 or equivalent.

TKIC 490, 491, 492 Advanced Turkic (3,3,3) VLPA Advanced courses in any of the Turkic languages. Prerequisites: 476, 477, 478 or equivalent.

Coptic

COPTC 311 Introduction to Coptic (3) Williams Elements of grammar of the Sahidic dialect of the Coptic language.

COPTC 412, 413 Readings in Coptic (3,3) VLPA Williams Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi Gnostic texts.

Hebrew

HEBR 401, 402, 403 Introduction to Hebrew Literature (3,3,3) VLPA Sokoloff Literary texts and analysis. Grammar, composition, and dictionary skills. Principally modern texts—short poetry, fiction, and essays—with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: 476 or permission of instructor.
Near Eastern Languages and Civilization

Courses in English

N E 210 Introduction to Islamic Civilization (5) VLPA\&S Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Offered: jointly with ISH 210.

N E 211 Islam (5) VLPA\&IS Zysow Religious and cultural milieu of Arabia before Muhammad; Muhammad's call and struggle to establish the new faith; Qur'anic content and style; Western and Muslim Islamic religious thought; sources of Muslim religious law; and modern Muslim movements. Offered: jointly with RELIG 211.

N E 212 Qur'an in English (3) VLPA Zysow Survey of the contents of the sacred scripture of Islam, regarded by Muslims throughout the world as the literal word of God. Treats Qur'anic narrative, law, theology, and ethics. Some attention also given to the Qur'an as an historical document and to Qur'anic scholarship by non-Muslims. Offered: jointly with RELIG 212.

N E 230 Themes in Near Eastern Literature (5) VLPA Significant and interesting aspects of Near Eastern literature. Works and themes approached by literary themes. Aspects of Near Eastern life and art such as women, minority groups, mysticism, and modern literature. Content varies.

N E 242 Cultural History of Turkey: From Empire to Nation (5) VLPA, IS Major topics include: social, economic, and political structures of Ottoman and Turkish Anatolia; language, literature, and artistic tradition; social status of women, literacy and literacy; the secular enterprise of Kemal Ataturk; Islamic fundamentalism, educational institutions, Kurdish nationalism. Offered: W.

N E 250 Iranian Culture and Civilization (3) VLPA, ISR Cirtautas Origin of the heroic epos, its relation to the creation of the distinctive Persian styles of Islamic art. Offered: jointly with ART H 350.

N E 252 Islamic Theological Literature in English (3) VLPA Readings from Mut`azilite and Ash`arite works and from traditionalist works opposed to theology.

N E 421 Islamic Mystical Literature in English (3) VLPA Readings from the works of principal Sufi writers and poets.

N E 422 Islamic Philosophical and Scientific Literature in English (3) VLPA Readings in philosophy, the physical sciences, and medicine.

N E 423 Persian Literature in Translation (3) VLPA Karimi-Hakkak Designed to familiarize students with an expanding collection of works translated from Persian literature, both classical and modern, into English. Focuses on a few representative texts and offers interpretations of the culture through close readings. Prior acquaintance with Persian literature desired.

N E 425 Current Trends in Modern Near Eastern Literary and Critical Studies (3) VLPA Modern literary tradition of the Near East with emphasis on major literary movements and/or genres and literary criticism in the modern period. The literatures of the Arab world, Persia, Turkey, and Israel are considered in alternate quarters.

N E 426 Islamic Literature on Jurisprudence and Law in English (3) VLPA Zysow The origins of the shar`ah, its development throughout the Islamic period, and the modern reform of this law.

N E 435 Major Trends in Modern Arabic Fiction (3) VLPA DeYoung Development of the Arabic novel from the end of the nineteenth century to the present.

N E 440 Calligraphy in Islamic Culture (3) VLPA Sokoloff Survey of the calligraphic arts, from its beginnings in the Near East in the 7th century to its current forms and technical traditions. Offered: W only.

N E 442 Turkish Literature in Translation (3) VLPA Zysow Covers major topics concerning Ottoman literature, the development of modern Turkish literature, and the contemporary works of current writers.
and theoretical contexts. Previous study of Turkish literature not required. Prerequisite: upper division or graduate standing.

N E 450 Survey of the Cultures of the Turkic Peoples of Central Asia (3) VLPA Cirtautas No- madic and sedentary cultures of the Turkic peoples of Central Asia. Emphasis on language, literature, and adherence to traditional modes of life. Offered: jointly with SISRE 450.

N E 490 Supervised Study (1-6, max. 18) Special work in Near Eastern studies for graduates and undergraduates. Prerequisite: permission of instructor.

N E 495 Trends in the Contemporary Middle East (3) VLPA/Bacharach, de Young Perspectives on cultural, political, and other aspects of Middle Eastern societies. Focuses on background complexities rather than immediate political-military confrontations. Topics vary. Recommended: previous course work on Middle East. Offered: jointly with SISME 495.

N E 496 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) Offered occasionally by visitors or resident faculty. Content varies.

N E 499 Undergraduate Research (1-6, max. 18) Prerequisite: permission of instructor.

Near Eastern Languages and Civilization

N E 518 Foreign Language Teaching Methodology (2) Brand Current foreign language teaching methods and techniques. Learning and teaching strategies and techniques for the four skills (reading, writing, speaking, listening) including cultural notions. Current and future trends in pedagogy and technology. Offered: jointly with ASIANGERM/ROM/SLAV 518.

N E 520 Seminar on Near Eastern Civilization and Thought (3, max. 27) Content varies.

N E 521 Research Methods (3) Introduction to research in Islamic civilization. Research methods, primary sources, evidence and documentation, reference works, transliteration systems, scholarly writing style.

N E 522 Islamic Theology (3) Various schools of Islamic theology.

N E 523 Islamic Philosophy (3) Various topics and problems dealt with by the Islamic philosophers.

N E 524 Islamic Law (3) Selected topics in Islamic law that highlight major aspects of Islamic civilization.

N E 525 Islamic Institutions (3) Islamic institutions of the caliphate, the sultanate, the bureaucracy, taxation, mosques, and madrasas, as well as theories of government.

N E 530 Seminar on Near Eastern Literature (3, max. 27) Prerequisite: reading knowledge of at least one Near Eastern language. Content varies.

N E 531 Prosseminar in Literary Analysis (3, max. 9) Introduction to the theory and techniques of the study of literature in general and Near Eastern literatures in particular. Content varies. Prerequisite: reading knowledge of at least one Near Eastern language.

N E 532 Theory and Practice in Modern Near Eastern Literature (3) Application of literary theory to works of modern Near Eastern literature. Concentrates on one major theory each year. Content varies.

N E 533 Islamic Poetry and Poetics (3) Karimi-Hakkak. Detailed introduction to prosody and rhyme in classical Arabic and Persian, followed by critical analysis of selected texts. Prerequisite: advanced level of Arabic or Persian; some knowledge of the other recommended.

N E 596 Special Studies in Near Eastern Languages and Civilization (3-5, max. 15) Offered occasionally by visitors or resident faculty. Content varies.

N E 600 Independent Study or Research (*)

Peace and Strategic Studies

9 Communications

The program in Peace and Strategic Studies enhances the student's understanding of the problem of global nuclear war and also contributes to society's capacity for coping with this problem. Students have access to the experience of those working both with peace and conflict studies and with strategic studies. Offered as an option under General Studies, the program is intended to serve primarily as part of a double major with, for example, political science, psychology, or physics. See a General Studies adviser for requirements.

Philosophy

345 Savery

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, aesthetics, philosophy of science, philosophy of mind, philosophy of language, philosophy of law, and philosophy of religion.

Undergraduate Program

Bachelor of Arts Degree

Admission Requirements: There are no prerequisites to declaring a philosophy major.

Major Requirements: 50 credits in philosophy which must include: (1) at least 25 credits at the UW; (2) at least four courses at the 400 level or above, excluding transfer credits and PHIL 484, which normally cannot be used to satisfy this requirement; (3) PHIL 120 or 370; and (4) PHIL 320 and 322 (or 400-level courses in the same areas; undergraduate adviser must approve substitutions).

Minor

Minor Requirements: 30 credits in philosophy to include: (1) PHIL 115 or 120 or an upper-division course in logic; (2) at least 15 credits at the 300 level or above, excluding transfer credits and PHIL 484.

Graduate Program

Master of Arts, Doctor of Philosophy Degrees

The Department of Philosophy offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees, the M.A. program serving as the initial stage of the Ph.D. program.

The Master of Arts program option is a two-year nonthesis program which may be extended to three years depending on the outcome of the spring research papers. The student must take twelve courses in philosophy, satisfy a logic requirement, and, at the end of the second year, submit three research papers for evaluation by the graduate faculty of the department. The courses and the papers must satisfy a distribution requirement. The departmental evaluation of the student's papers and course work determines whether an M.A. degree is awarded and also whether admission to the Ph.D. program is granted. The Ph.D. program, which normally requires at least two years of study beyond the M.A., has five general requirements: (1) presentation of a paper at a philosophy colloquium, (2) teaching experience as a teaching assistant, (3) General Examination, (4) dissertation, and (5) Final Examination.

Doctor of Philosophy Degree (Philsophy and Medical Ethics)

Students who have completed the Master of Arts in medical history and ethics or who have satisfied the written portion of the General Examination requirement for a Ph.D. in philosophy may be admitted to this program after submitting an application for review by the Interdisciplinary Program Committee. A sample of written work is required from both philosophy and medical history and ethics applicants. Following admission to the program, students from medical history and ethics are required to submit three research papers (in the areas of history of philosophy, metaphysics/epistemology, and ethics) for evaluation by the graduate faculty of the Department of Philosophy in fulfillment of the written portion of the General Examination. The ethics paper requirement will be waived if the master's thesis of medical history and ethics students is judged by the committee to be an acceptable alternative. Additional requirements for all students include: completion of nine philosophy courses (satisfying a distribution requirement) and six specified medical history and ethics courses; an oral examination devoted at least in part to the student's dissertation proposal; a doctoral dissertation; and a final examination. The student's supervisory committee must include representatives from both the Department of Philosophy
### Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

### Courses for Undergraduates

**PHIL 100 Introduction to Philosophy (5) S, F**  
Boler, Coburn, Marks, Roberts  
Major philosophical questions relating to such matters as ethics, the existence of God, foundations of knowledge, and the nature of reality. Problems studied and works read vary. Offered: AWSPS.

**PHIL 101 Philosophical Classics (5) S Coburn**  
Selected works of some of the major philosophers, such as Plato, Aristotle, Descartes, Hume, Kant. The philosophers studied vary.

**PHIL 102 Contemporary Moral Problems (5) VLP/A&S**  
BonJour, Roberts, Talbott  
Philosophical consideration of some of the main moral problems of modern society and civilization, such as abortion, euthanasia, war, sexual morality, governmental paternalism, reverse discrimination, and capital punishment. Topics vary.

**PHIL 110 Introduction to Social and Political Philosophy (5) S Clatterbaugh, Coburn**  
Examination of some of the major ideals as liberty, distributive justice, democracy, peace, and human survival. Problems involved in achieving social change also considered. Content varies.

**PHIL 114 Philosophical Issues in the Law (5) S Moore**  
Analysis and critical assessment of various moral, political, and philosophical issues in law and legal reasoning. Material drawn from actual law cases, as well as writings by contemporary philosophers of law and lawyers. Topics include criminal responsibility, civil disobedience, abortion, reverse discrimination, enforcement of morals. Special legal or philosophical training not required.

**PHIL 115 Practical Reasoning (5) S, GSR**  
Introductory to logic emphasizing concepts and methods useful for practical analysis of arguments in everyday contexts. Meaning, syllogisms, logical diagrams, deductive and inductive inference, formal fallacies, argument structure, perhaps some beginning symbolic logic. A wide variety of examples, including logical puzzles, considered. Offered: AWSPS.

**PHIL 120 Introduction to Logic (5) S & NW, GSR**  
Cohen, Key, Washington  
Elementary symbolic logic. The development, application, and theoretical properties of an artificial symbolic language designed to provide a clear representation of the logical structure of deductive arguments. Offered: AWSPS.

**PHIL 160 A Historical Introduction to the Philosophy of Science (5) S & NW Clatterbaugh**  
Study of how scientific theories are justified and why they are accepted, using selected examples from the history of science.

**PHIL 200 Types of Philosophy (3-5) S Coburn**  
Introductory philosophy. The content of the course is entirely at the discretion of the instructor.

**PHIL 208 Philosophy of Feminism (3-5) S**  
Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, its relation to rational liberation, and ethical issues. Offered: jointly with POL S 212/ WOMEN 206.

**PHIL 230 Philosophic Issues in World Affaires (3) S & Coburn**  
Moral problems that arise in connection with such topics as affluence, hunger, and overpopulation; global environmental degradation; war and weaponry; restructing the international order.

**PHIL 240 Introduction to Ethics (S) S, F**  
Roberts  
Critical introduction to various philosophical views of the basis and justification of moral knowledge. Critical introduction to various types of normative ethical theory, including utilitarian deontological, and virtue theories.

**PHIL 241 Topics in Ethics (5) S & VLP/A&S Mish'alani**  
Introduction to ethics through in-depth study of one or more selected topics (e.g., limits of moral community, moral education, conscience, shame and guilt, virtue and vice, purity, saintliness and heroism, friendship, veracity, manners and morals, freedom, rights, collective responsibility). Topics vary.

**PHIL 267 Introduction to Philosophy of Religion (5) S & Mish'alani**  
Study of selected philosophers in the Western tradition, with emphasis on Augustine, Anselm, Abelard, Aquinas, and Ockham. Recommended: 320.

**PHIL 272 Medieval Philosophy (5) S & F**  
Boler  
Development of main lines of philosophical thought in the Latin West from AD 400 to 1400, with emphasis on Augustine, Anselm, Abelard, Aquinas, and Ockham. Recommended: 320.

**PHIL 282 Nineteenth-Century Philosophy (5) S & F**  
Cohen  
Examination of post-Kantian thinkers through the end of the nineteenth century considering such major themes as idealism, romanticism, positivism, historicism, humanism, existentialism, and pragmatism.

**PHIL 287 American Philosophy (5) S & F**  
Boler  
Examination of post-Cartesian thinkers through the end of the nineteenth century considering such major themes as idealism, romanticism, positivism, historicism, humanism, existentialism, and pragmatism.

**PHIL 331 History of Medieval Political Philosophy (4) S**  
Boler  
Study of the major medieval philosophers: Aquinas, Aquinas, Ockham, with special emphasis on the setting of their philosophical thought in context of their general philosophical positions. Recommended: at least one course in philosophy.

**PHIL 332 History of Modern Political Philosophy (5) S**  
Clatterbaugh  
Examination of major political

---

**Assistant Professor**  
Keyt, Christine M. 1993, (Fellow); PhD, 1980, University of Washington; philosophy of religion, existentialism.

**Associate Professor**  
Talbott, William J. 1989 PhD, 1976, Harvard University; epistemology, ethics, political philosophy, game theory, and decision theory.

**Senior Lecturer**  

---

**Research Facilities**  
The department maintains its own research library. This library of more than fifteen thousand volumes contains nearly all of the material needed for any philosophical research.

**Special Requirements**  
An undergraduate major in philosophy is not required for admission to the M.A. program. An applicant's philosophical potential is assessed primarily on the basis of a sample of his or her written work in philosophy and secondarily on the basis of his or her undergraduate record, Graduate Record Examination scores, and letters of recommendation. A reading knowledge of at least one foreign language is strongly recommended.

---

**Financial Aid**  
A number of teaching assistanships are available each year to new graduate students. At present, fifteen students of a total enrollment of thirty-nine hold assistanships.

Moore, Ronald M. 1979; PD 1971, Columbia University; philosophy of law, aesthetics.

Roberts, Jean Valerie 1979; PhD 1982, University of Pittsburgh; ancient Greek philosophy, history of ethics and political theory, feminist philosophy.
philosophy of the sixteenth century to the nineteenth century, with attention to the underlying philosophical methods and foundations.

PHIL 334 Philosophy of Marxism (3) I&S Clatterbaugh Philosophy of Marx and the Marxist tradition with attention to the philosophical method and foundation of Marxism.

PHIL 338 Philosophy of Human Rights (3) I&S Coburn Theories of human rights and the bearing of these theories on such issues of public policy as the legitimation of war and terrorism, whether people have rights to a clean environment or a welfare floor, and whether future generations have rights.

PHIL 340 History of Ancient Ethics (5) VLPA/I&S Keyt Development of moral thought from Socrates through the Stoics. Particular emphasis on the ethical writings of Plato and Aristotle. Recommended: one course in philosophy.

PHIL 342 History of Modern Ethics (5) VLPA/I&S Development of moral thought from Hobbes through Nietzsche, with particular emphasis on the ethical writings of Hume, Kant, and John Stuart Mill. Recommended: one course in philosophy.

PHIL 344 History of Recent Ethics (5) VLPA/I&S Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition. Recommended: one course in philosophy.

PHIL 345 Moral Issues (5) Life and Death (5) VLPA/I&S Coburn Examination of such topics as war and murder, famine relief, capital punishment, high-risk technologies, abortion, suicide, and the rights of future generations. Prerequisite: one course in philosophy or junior standing.

PHIL 346 Personal Values and Human Good (3) I&S Coburn Examination of the idea of a good human life. Emphasis differs from year to year. Typical topics include happiness and prudence, rationality and life plans, personal values and the meaning of life, autonomy and false consciousness, self-respect and self-esteem, honesty and self-deception, faith and "virtual lies." Prerequisites: two previous courses in philosophy.

PHIL 347 Philosophy in Literature (5) VLPA/I&S Marks, Mish'alan Study of philosophical ideas expressed in works of literature.

PHIL 350 Introduction to Epistemology (4) I&S BonJour, Talbott Theory of knowledge. Nature, definition, and possibility of knowledge. Problems about our access to the external world; memory knowledge; theoretical and practical knowledge. Prerequisites: two previous courses in philosophy.

PHIL 353 Introduction to the Philosophy of Language (5) I&S Washington Theoretical philosophical questions about the nature of language. Topics include meaning, reference, truth, propositions, relations between language and logic, relation of philosophy of language to linguistics and psychology. Recommended: 120.

PHIL 363 Introduction to the Philosophy of Mind (5) I&S Marks, Washington Various theories of the nature of mind, the relationship between mind and body, the soul, memory, the unconscious, introspection, and knowledge of other minds. Recommended: one course in philosophy.

PHIL 372 Introduction to Set Theory (5) I&S Historical development and basic concepts of set theory. Set theoretic paradoxes and their proposed solutions.

PHIL 386 Introduction to the Philosophical Systems of India (5) I&S Potter The fundamental views of classical Indian philosophical schools on epistemology and metaphysics through readings in translation of basic works. Nyaya, Vaisesika, Samkhya, Yoga, Jain philosophy, Vijnanavada and Madhyamika Buddhism. Advaita Vedanta and later developments. Prerequisite: SISSA 210 or one course in philosophy. Offered: jointly with SISSA 386.

PHIL 406 Philosophical Topics in Feminism (5) I&S Roberts Detailed examination of questions raised by recent feminist scholarship in particular areas of philosophy, such as political theory, ethics, epistemology, or philosophy of science. Emphasis varies.

PHIL 410 Social Philosophy (3) I&S Coburn, Talbott Examination of social ideals such as liberty and justice, and of social problems associated with current and prospective technological developments. Emphasis varies each year.

PHIL 411 Justice in Health Care (5) I&S Jecker Examination of the ethical problem of allocating scarce medical resources. Emphasis on fundamental principles of justice that support alternative health policies. Recommended: some previous background in philosophy or medical ethics. Offered: jointly with HME 474.

PHIL 412 Indian Philosophy (3) I&S Potter Historical survey of the major systems and the traditional problems of philosophy in India. Readings in Buddhist, Nyaya, Samkhya, and Vedanta. Recommended: 100 or 386.

PHIL 413 Studies In Indian Philosophy (3, max. 9) I&S Potter One or more individual figures or problems in Indian philosophy selected by the instructor. Prerequisite: 412.

PHIL 414 Philosophy of Law (3) I&S BonJour, Moore Nature and function of law. Relation of law to morality, legal rights, judicial reasoning. Recommended: 110 or 114 or 240.

PHIL 418 Indian and Tibetan Buddhist Philosophy (3) I&S Potter Topics from Buddhist thought, both Sravakayani and Mahayanan, touching on the following areas: epistemology, theory of liberation, metaphysics and the theory of the absolute, cosmology, and ethics. Readings in translation. At least one course in Indian philosophy or Hinduism or Buddhism recommended.

PHIL 421 Studies In Medieval Philosophy (3, max. 9) I&S Bolter Detailed study of an individual figure or problem in medieval philosophy (of the Latin West) selected by the instructor. Recommended: 321.

PHIL 422 Studies in Continental Rationalism (3, max. 9) I&S Clatterbaugh, Coburn, Marks Study of one or more of the major continental Rationalists: Descartes, Spinoza, Leibniz. Recommended: 322.

PHIL 445 Philosophy of Art (5) I&S Moore Critical examination of various accounts of the nature of art, artistic activity, the aesthetic experience. The philosophy of criticism, the role of the critic, and problems in interpretation and evaluation of works of art.

PHIL 446 Development of Esthetic Theory (5) VLPA/I&S Moore Historical development of esthetics, emphasizing such major figures as Plato, Aristotle, Hume, Kant, Hegel, and Goodman. Recommended: 100 or 445.

PHIL 447 Philosophy of Literature (3) VLPA/I&S Mischalani Investigation of philosophical questions about literature: What is literature? Why write? Must literature be interpreted? What is interpretation? Literature and ideology; criticism of literature and society.

PHIL 450 Epistemology (5) I&S BonJour, Talbott Systematic study of some of the main problems of the theory of knowledge, such as: the definition of "knowledge," evidence and knowledge, the role of the external world; memory knowledge; theoretical knowledge; knowledge of other minds; and whether knowledge has or requires a foundation. Emphasis varies from quarter to quarter. Recommended: 350 or 322.

PHIL 456 Metaphysics (5) I&S Coburn Examination of issues and problems that arise in connection with such topics as freedom of the will, the nature of persons and personal identity, the existence of God, time, necessary truth, and universals. The emphasis varies from year to year. Recommended: 120 and 322 or equivalents.

PHIL 458 Phenomenology (5) I&S Mischalani The contribution of phenomenology to selected topics in the theory of meaning, philosophy of mind, ontology, and epistemology.

PHIL 459 Philosophy of Medicine (5) I&S Jecker Emphasis: examination of philosophical issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the
relationship between theories and the world. Prerequisites: some prior course work in philosophy, the history of science, or the history of medicine. Offered: jointly with MHE 440.

PHIL 460 Philosophy of Science (5) I&S/NW BonJour, Clatterbaugh Critical study of different theories about the nature of scientific theory. Topics include the relation of theory to observation, the use of mathematics, how theories change, the requirements for the meaningfulness of a theory, and the relation between theory and methodology.

PHIL 461 Philosophical Anthropology (5) I&S Mish'alani Investigation of the question, "What is human reality?" Philosophical significance of this question and its relation to the human sciences. Typical answers. Implications of those answers for culture, religion, morals, and politics. Recommended: 100, 206, 240, or 410.

PHIL 463 Philosophy of Mind (3) I&S Marks, Washington Examination of current theories of the nature of the mind and mental processes. Recommended: 363 or permission of instructor.

PHIL 464 Philosophical Issues in the Cognitive Sciences (5) I&S Marks, Washington Philosophical problems connected with research in psychology, artificial intelligence, and other cognitive sciences. Topics vary. Readings from both philosophical and scientific literature. Accessible to nonphilosophers with suitable interests and backgrounds.

PHIL 465 Philosophy of History (3) I&S Mish'alani Analyses of basic concepts employed in historical interpretation, and study of some of the principal philosophers of history, such as Plato, St. Augustine, Hegel, Marx, Spengler, Toynbee.

PHIL 466 Philosophy of the Social Sciences (5) I&S Taibbi Examination of fundamental issues in the foundations, methodology, and interpretation of the social sciences. Topics include value orientation and objectivity, methodological individualism, functionalism, reductionism, and the status of idealized models, including models involving idealized conceptions of individual rationality. Emphasis varies from quarter to quarter. Recommended: 120 or 160 or 460.

PHIL 467 Philosophy of Religion (5) I&S BonJour Study of selected topics and problems in the philosophy of religion, such as: arguments for the existence of God; the problem of evil; atheism; faith; religious experience and revelation; the attributes of God; miracles; immortality; and the relation between religion and morality. Readings from historical and contemporary authors. Recommended: one course in philosophy, other than logic, beyond the introductory level.

PHIL 468 Existentialist Philosophy (3) I&S Critical examination of major ideas in Kierkegaard's philosophy and in Sartre's or Heidegger's philosophy. Recommended: one course in philosophy, other than logic, beyond the introductory level.

PHIL 470 Intermediate Logic (5) I&S/NW, QSR Keyt An introduction to the concepts and methods of metatheory and their application to the sentential calculus. Recommended: 120.

PHIL 472 Axiomatic Set Theory (5) I&S/NW Development of axiomatic set theory up to and including the consistency of the Axiom of Choice and Continuum Hypothesis with the Zermelo-Fraenkel Axioms. Recommended: 470 or permission of instructor.

PHIL 473 Philosophy of Mathematics (5) I&S/NW Traditional accounts of the nature of mathematical entities and mathematical truth given by logicism, intuitionism, and formalism, and the impact of Godel's incompleteness theorems on these accounts. Recommended: some background in mathematics and formal logic.

PHIL 474 Modal Logic (5) I&S/NW Notions of necessity and possibility, using the classical systems K, T, S4, and S5, and the syntax and the semantics (Kripke models) of these systems. Recommended: 470.

PHIL 477 Formal Semantics and Natural Language (3) VLP/A/IS Washington Introduction to formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and its relation to the mind and mental processes. Typical topics: Tarskian definitions of truth; "truth theory" and theory of meaning; possible world semantics; Montague semantics; generative semantics; Chomsky on syntax and semantics. Recommended: 460 or 470. Offered: jointly with LING 479.

PHIL 484 Reading in Philosophy (1-5, max. 15) Reading of approved philosophical works. Prerequisite: permission of instructor.

Courses for Graduates Only

PHIL 500 Seminar in Philosophy (5) Topics vary. Occasionally offers either an in-depth examination of the writings of a particular social philosopher or an examination of some contemporary problem in social philosophy. Prerequisite: 410 or equivalent.

PHIL 510 Seminar in Social Philosophy (5) Topics vary. Occasionally offers either an in-depth examination of the writings of a particular social philosopher or an examination of some contemporary problem in social philosophy. Prerequisite: 410 or equivalent.

PHIL 514 Seminar in Legal Philosophy (5, max. 20) Moore

PHIL 520 Seminar in Ancient Philosophy (5, max. 20) Cohen, Keyt, Roberts

PHIL 521 Seminar in Medieval Philosophy (5, max. 20) Butler

PHIL 522 Seminar in Modern Philosophy (5, max. 20) Clatterbaugh

PHIL 525 Seminar in Nineteenth-Century Philosophy (5, max. 20) Hegel

PHIL 526 Seminar in Recent Philosophy (5, max. 20) Keyt, Mish'alani

PHIL 540 Seminar in Ethics (5, max. 20) Coburn, Keyt, Roberts, Taibbi

PHIL 545 Seminar in the Philosophy of Art (5, max. 20) Moore

PHIL 550 Seminar in Epistemology (5, max. 20) BonJour, Taibbi

PHIL 553 Seminar in Philosophy of Language (5, max. 20) Washington Topics may vary, but emphasis on contemporary research in field. Sample topics: truth; intensionality and actuality; treatments of quantification; semantics for psychological verbs.

PHIL 556 Seminar in Metaphysics (5, max. 20) Coburn

PHIL 560 Seminar in the Philosophy of Science (5, max. 20) BonJour, Clatterbaugh

PHIL 563 Seminar in the Philosophy of Mind (5, max. 20) Marks, Washington

PHIL 565 Seminar in the Philosophy of History (5, max. 20) Mish'alani

PHIL 566 Seminar in Philosophy of the Social Sciences (5)

PHIL 567 Seminar in the Philosophy of Religion (5, max. 20) Coburn

PHIL 570 Seminar in Logic (5, max. 20) Keyt

PHIL 584 Reading in Philosophy (1-4, max. 12) Intensive reading in philosophical literature. Prerequisite: permission of graduate program coordinator.

PHIL 586 Seminar in Indian Philosophy (5, max. 20) Potier Prerequisite: 412.

PHIL 587 Contemporary Analytic Philosophy (5, max. 20)

PHIL 600 Independent Study or Research (*) Prerequisite: permission of graduate program coordinator.

PHIL 700 Master's Thesis (*)

PHIL 800 Doctoral Dissertation (*)

Physics

C121 Physics-Astronomy

Physics is the study of the fundamental structure of matter and the interaction of its constituents, with the goal of providing a quantitative description of nature based on a limited number of physical principles.

Undergraduate Program

Bachelor of Science Degree

Admission: Recommended preparation includes four years of college preparatory mathematics, one year of physics, and one year of chemistry.

Major Requirements: 85 credits: Core courses—PHYS 121/122/123, 224, 225, 226, 301, 331, 332, 333, 334, 335; (2) 3 credits selected from upper-division lecture courses in modern physics; (3) 3 credits selected from upper-division physics laboratory courses; (4) 3 credits in PHYS 491, 492, 493 or 494, 495, 496; (5) 5 credits selected from approved upper-division physics courses or approved courses in cognate subjects; (6) MATH 124, 125, 126, 307, 324 or MATH 134, 135, 136, 334, 335, 336; (7) 3 credits selected from physical biology, computer sciences other than computer math­ ics, or from the history or philosophy of science, in addition to any courses in these fields taken to satisfy requirement (6); (8) at least 12 credits of the physics courses presented to satisfy requirements (1) through (5) shall be in physics courses numbered 300 or above taken at the UW. Grades of 2.0 or better are required in all courses presented in fulfillment of requirements (1) through (6). Students who plan graduate study in phys­ ics are strongly advised to complete, in addition to courses listed in requirement (1), the following: PHYS 323, 324, 325, 326, 331, 421, 422, 423, 424, 425, 428, 431, 432, 433, and AMATH 401, 402, 403.

Progress Requirement: In each academic year, every undergraduate physics major who either has completed the required 200-level courses in physics or has begun physics courses beyond the 200 level must (1) complete at least 15 credits of course work acceptable in fulfillment of the departmental degree requirements exclusive of credits earned by repeating courses in which acceptable credit has been earned previously, or (2) complete satisfactorily an approved part-time program of study. Students who do not satisfy the above requirement will be dropped as physics majors unless exempted explicitly by the Physics Undergraduate Committee. Students dropped for this reason may petition the committee for readmission to the major.

Graduate Program

The Department of Physics offers studies leading to the degrees of Master of Science and Doctor of Philosophy. The department has a permanent faculty of forty-
five members and a research, visiting, and affiliated faculty that numbers about sixty. An average of thirteen Ph.D. and twenty-five M.S. degrees in physics have been awarded annually in recent years.

Research Facilities

The department is well equipped, both in staff and facilities, for instruction and research in a discipline that emphasizes fundamental problems in the understanding of the physical universe. Areas of research available to the graduate student include atomic, nuclear, physics, astrophysics, condensed-matter physics, elementary-particle physics, nuclear physics, and physics education. Experimental work in atomic physics is concentrated on the measurement of fundamental properties of atomic particles through laser, electromagnetic trap, and radiofrequency techniques. The emphasis on fundamental measurements is continued in experiments on the gravitational force, carried out by faculty and students in atomic, nuclear, and astrophysics. Condensed-matter research is conducted on the study of surfaces and interfaces, but includes materials as varied as high-temperature superconductors and water and ice. The study of properties of matter at very high pressures and low temperatures is investigated on campus. Members of high-energy experimental groups are heavily engaged in experiments with accelerators at BNL, CERN, FNAL, and SLAC. Faculty and students of the nuclear physics group use the on-campus accelerators of the Nuclear Physics Laboratory (NPL), as well as major facilities in the U.S., Canada, and Europe. The new on-campus facility provides beams of light and heavy ions with an FN tandem accelerator injecting a superconducting linac. On the theoretical side, members of the department are concerned with problems in the areas of elementary particles and quantum fields, nuclear and high-energy reactions, phase transitions and statistical mechanics; condensed-matter physics from localization in disordered systems to electron transport in mesoscopic systems, atomic physics, general relativity, and astrophysics. The Institute for Nuclear Theory, a Department of Energy-funded national facility, is closely associated with the department and offers a unique opportunity for students. The extensive research with distinguished permanent and visiting staff. Students in physics have the opportunity to obtain a physics degree in selected interdisciplinary and applied physics areas through research with faculty members in other departments.

Department facilities are housed in the new Physics-Astronomy Building and the Nuclear Physics Laboratory.

Master of Science Degree (Applications of Physics)

Admission Requirements: This option is designed for students who are currently employed and whose backgrounds are in physical science, engineering, or mathematics. Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of specialization offered in the physics department.

Graduation Requirements: In addition to the standard Graduate School requirements, students are expected to complete the sequence of core courses PHYS 441, 541, and 543 and to select appropriate specialized courses. Students are expected to undertake an independent study project in consultation with a faculty member. This project may be carried out at the University or at the student's place of employment. A written report as well as an oral presentation of the project is required. Students must take at least 3 credits of PHYS 600 and at least 12 credits in other physics graduate courses. No thesis is required.

Master of Science, Doctor of Philosophy Degrees

Admission Requirements: Undergraduate preparation to include upper-division courses in mechanics; electricity and magnetism; statistical physics and thermodynamics; modern physics, including an introduction to quantum mechanics; and advanced laboratory work. Preparation in mathematics to include vector analysis, complex variables, ordinary differential equations, Fourier analysis, boundary-value problems, and special functions. Admissibility is determined by the applicant's undergraduate program, undergraduate grades, Graduate Record Examination aptitude and advanced physics scores, letters of recommendation, and a statement of educational and professional objectives.

Graduation Requirements: Department requirements include standard Graduate School requirements. In addition, 3 credits must be in PHYS 600 and at least 12 other credits in physics graduate courses. A final examination is required. No thesis is required.

Doctor of Philosophy Degree

Admission Requirements: The student is expected to obtain here, or elsewhere with a master's degree, a background in physics equivalent to that contained in the following sequences of basic graduate courses: PHYS 505, 506; 513, 514, 515; 517, 518, 519, 520; and 524, 525; and in specialized courses appropriate to each student's interests. The student is required to pass, successively, a written qualifying examination (in the autumn of the second year), an oral General Examination for admission to candidacy, and an oral Final Examination. In order to take the General Examination, the student must have been accepted by a graduate faculty member as a research student and have completed the graduate studies outlined above. This examination covers the area in which the dissertation research is planned. Teaching experience is required of all candidates. Students holding Teaching Assistantships are required to take PHYS 501-503, courses in teaching techniques in physics.

Financial Aid

Most graduate students are supported by fellowships and assistantships. Application for these should be made along with the application for admission.

Faculty

Chairperson

Stephen D. Ellis

Professors

Arons, Arnold B. 1988, (Emeritus); PhD, 1943, Harvard University; physical electronics, physics education.

Baker, Marcia ° 1971, (Adjunct); PhD, 1971, University of Washington; cloud physics, atmospheric geophysics.

Bardeen, James M. ° 1976, PhD, 1965, California Institute of Technology; general relativity, theoretical astrophysics.

Bertsch, George F. ° 1992, PhD, 1985, Princeton University; theoretical physics, nuclear and atomic cluster physics.

Boulware, David G. ° 1965, PhD, 1962, Harvard University; field theory, theoretical elementary-particle physics, general relativity.

Bouynt, Paul ° 1970, PhD, 1967, Princeton University; high-energy astrophysics, astronomy.

Brown, Frederick C. ° 1987, PhD, 1950, Harvard University; use of synchrotron radiation in experimental solid state physics.

Burnett, Thompson H. ° 197, PhD, 1968, University of California (San Diego); experimental elementary-particle physics.

Chaloupka, Vladimir ° 1981, PhD, 1975, University of Geneva (Switzerland); experimental elementary-particle physics.

Clark, Kenneth C. ° 1948, (Emeritus); PhD, 1947, Harvard University; optical spectroscopy, upper atmosphere.

Cook, Victor ° 1959, PhD, 1956, University of California (Berkeley); experimental high-energy physics.

Cramer, John G. ° 1964, PhD, 1961, Rice University; experimental nuclear physics.

Dash, J. Gregory ° 1961, (Emeritus); PhD, 1951, Columbia University; low-temperature condensed-matter physics.

Dehmelt, Hans G. ° 1955, PD, 1950, University of Göttingen (Germany); experimental atomic physics.

Den Nijs, Marcel ° 1981, PhD, 1979, Katholieke University (Netherlands); theoretical condensed-matter physics.

Ellis, Stephen D. ° 1975, PD, 1971, California Institute of Technology; theoretical elementary-particle physics.

Engel, Thomas ° 1980, (Adjunct); PhD, 1969, University of Chicago; surface chemistry and catalysis.

Farwell, George W. ° 1948, (Emeritus); PhD, 1948, University of Chicago; experimental nuclear physics.

Fonz, Edward ° 1963, PD, 1964, Harvard University; experimental atomic physics.

Geballe, Ronald ° 1946, (Emeritus); PhD, 1943, University of California (Berkeley); atomic and molecular collisions, physics education.

Gerhart, James B. ° 1956, PhD, 1954, Princeton University; physics education.

Halpern, Isaac ° 1953, (Emeritus); PhD 1948, Massachusetts Institute of Technology; experimental nuclear physics.

Haxton, Wick C. ° 1984, PhD, 1976, Stanford University; theoretical physics, nuclear physics.

Heckel, Blayne ° 1983, PhD 1981, Harvard University; experimental neutron and atomic physics.

Henley, Ernest M. ° 1954, PD, 1952, University of California (Berkeley); theoretical nuclear physics, theoretical elementary-particle physics.

Hennuy, Frank S. ° 1991, (Filial); PhD, 1967, California Institute of Technology; theoretical ocean hydrodynamics and theoretical ocean acoustics.

Hogan, Craig J. ° 1990, PhD, 1980, Cambridge University (UK); astrophysical cosmology, especially the origin of astronomical structures in the expanding universe.

Jarboe, Thomas R. ° 1989, (Adjunct); PhD, 1974, University of California (Berkeley); plasma physics and controlled fusion, magnetic reconnection and relaxation.
controlled fusion, magnetic reconnection, and relaxation.

Lake, George Russell 1985, (Adjunct); PhD, 1979, Princeton University; stellar dynamics, galaxy structure and formation, cosmology, computational astrophysics.

Lord, Jero J. 1952, (Emeritus); PhD, 1950, University of Chicago; cosmic rays, experimental elementary-particle physics.

Lubatti, Henry J. 1969; PhD, 1966, University of California (Berkeley); experimental elementary-particle physics.

Margon, Bruce H. 1980, (Adjunct); PhD, 1973, University of California (Berkeley); galactic and extragalactic x-ray astronomy, optical counterparts of x-ray sources.

McDermott, Lillian C. 1971; PhD, 1959, Columbia University; physics education.

McDermott, Mark N. 1982; PhD, 1959, Columbia University; experimental atomic physics.

Miller, Gerald 1975; PhD, 1972, Massachusetts Institute of Technology; theoretical nuclear physics.

Mockett, Paul M. 1972, (Research); PhD, 1965, Massachusetts Institute of Technology; theoretical elementary-particle physics.

Parks, George K. 1971, (Adjunct); PhD, 1968, University of California (Berkeley); magnetospheric and space plasma physics.

Pearsall, Thomas P. 1989, (Adjunct); PhD, 1973, Cornell University; physics of semiconductors and the technology of semiconductor devices.

Peleins, Rudolf E. 1974, (Emeritus); PhD, 1929, University of Leipzig (Germany); theoretical physics.

Pufu, Robert D. 1962; PhD, 1960, Harvard University; many-body theory, statistical physics.

Rehr, John J. 1974; PhD, 1972, Cornell University; theoretical condensed-matter physics.

Riedel, Eberhard K. 1975, (Affiliate); PhD, 1966, Technical University of Munich (Germany); theoretical condensed-matter physics.

Rothberg, Joseph E. 1969; PhD, 1963, Columbia University; experimental high-energy physics.

Schick, Michael 1969; PhD, 1967, Stanford University; theoretical condensed-matter physics.

Shover, Kurt Albert 1972, (Research); PhD, 1969, Stanford University; experimental nuclear physics.

Soransen, Larry B. 1983; PhD, 1980, University of Illinois; experimental condensed-matter physics.

Spivak, Boris 1991, (Research); PhD, 1970, Leningrad Polytechnical Institute (Russia); theoretical condensed-matter physics.

Stern, Edward A. 1965; PhD, 1955, California Institute of Technology; experimental condensed-matter physics.

Strom, Derek 1979, (Research); PhD, 1970, University of Washington; nuclear physics, especially medium energy; accelerator physics.

Streb, John F. 1947, (Emeritus); PhD, 1941, California Institute of Technology; experimental nuclear physics.

Thouless, David 1980; PhD, 1958, Cornell University; theoretical condensed-matter physics.

Vandenbosh, Robert 1963, (Adjunct); PhD, 1967, University of California (Berkeley); nuclear studies, particularly fission and nuclear reaction mechanisms; heavy ion reactions.

Van Dyck, Robert S. Jr. 1971; PhD, 1971, University of California (Berkeley); experimental atomic physics.

Vitches, Oscar E. 1968; PhD, 1966, National University of Cuyo (Argentina); low-temperature condensed-matter physics.
PHYS 208 The Physics of Sports (3) NW Record performances of top athletes shown close to limits imposed by physical laws. Studies the science of motion, force, momentum, collisions, energy, and power. Emphasizes application of these ideas to human physiology and human experience such as sprinting, high jumping, baseball, tennis, football, and other sports.

PHYS 210, 211, 212 Intermediate Physics for Teachers and Students in Liberal Arts (5,5,5) NW Individualized study of selected topics emphasizing depth of understanding and development of skills essential to the scientific process. Useful as background for teaching physical sciences. Prerequisites: at least two quarters of physics at the 100 level, 210 strongly recommended prior to 211. Offered: A.W.Sp.

PHYS 214 Light and Color (5) NW, QSR Compares past explanation of certain familiar natural phenomena with present understandings. Lamps and lighting, outdoor light, optical devices, color vision, perspective, paints, and pigments. Quantitative comparison critical to the course, but college-level mathematics background not required. Intended for nonscience students. Offered: A.

PHYS 215 Order and Disorder (5) NW, QSR Includes symmetry in biological systems and in inanimate nature, relation of structure to size, and macro- and macrostructure of universe, systems in chaos. Quantitative comparison critical to course, but college-level mathematics background not required. 214, 215, 216 may be taken independently or in any order. Intended for non-science students. Offered: W.

PHYS 216 Time and Change (5) NW, QSR Includes miracles and magic, how and why things move, basic forces in nature, quantum mechanics, relativity, past and future of the universe. Quantitative comparison critical to course, but college-level mathematics background not required. 214, 215, 216 may be taken independently or in any order. Intended for non-science students. Offered: A.

PHYS 224 Thermal Physics (3) NW Introduction to heat, thermodynamics, elementary kinetic theory, and the physics of continuous media. Prerequisites: 122, which may be taken concurrently, and MATH 126. Offered: A.W.Sp.S.

PHYS 225 Modern Physics (3) NW Special theory of relativity; phenomena of modern physics with emphasis on photons, electrons, and atoms, introduction to quantum physics. Prerequisites: 123, concurrent or previous MATH 126 or 136. Offered: A.W.Sp.S.

PHYS 227, 228 Elementary Mathematical Physics (3,3) NW Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Prerequisites: 123, MATH 307; 227 for 228. Offered: W.Sp.

PHYS 311 Relativity and Gravitation (3) NW Special theory of relativity, Newtonian gravity, and relativistic effects of gravitation, including black holes, gravitation waves, and applications to cosmology. Prerequisites: 120, MATH 126.

PHYS 321, 322, 323 Electromagnetism (3,3,3) NW Charges at rest and in motion, dielectric and magnetic media; electromagnetic waves; relativity and electro-magnetism; physical optics. Prerequisites: 123, 228. MATH 328, which may be taken concurrently, for 321; 321 for 322; 322 for 323. Offered: A.W.Sp.

PHYS 324, 325 Quantum Mechanics (3,3) NW Introduction to nonrelativistic quantum mechanics. Prerequisites: 226, 228, MATH 324 for 324; 324 for 325. Offered: A.W.

PHYS 327 Introduction to Nuclear Physics (3) NW Nuclear structure, including nuclear reactions, fission, particle accelerators, and nuclear instrumentation; applications of nuclear phenomena in atomic energy and astrophysics. Prerequisite: 225 or permission of instructor. Offered: W.

PHYS 328 Statistical Physics (3) NW Elements of statistical mechanics and their applications. Prerequisites: 224, 225, 227, 324 or a similar introduction to quantum mechanics; MATH 324. Offered: Sp.

PHYS 333 Optics Laboratory (3) NW Optical and spectroscopic measurements. Prerequisites: 123 and 227. Offered: Sp.

PHYS 334, 335 Electric Circuits Laboratory (3,3) NW Basic elements of DC, AC, and transient circuits; electronic devices; electrical measurements. Prerequisites: 123, MATH 126 or 136 for 334; 334 for 335. Offered: W.Sp.

PHYS 341 Energy: Consumption Patterns, Fossil Fuels, and Conservation (3) NW Survey of energy use, especially in the United States. Fossil fuels with emphasis on resource availability and on greenhouse effects and other environmental consequences. Methods for reducing consumption through conservation. Offered: jointly with ENGR/ENV S 341; A.

PHYS 342 Energy: Nuclear and Solar Power (3) NW Technology of nuclear power, especially fission power, and the major forms of solar power, including hydro-electric power, wind power, and biomass. Consideration given to the factors limiting the utilization of these sources. Offered: jointly with ENGR/ENV S 342; W.

PHYS 343 Environmental Radioactivity (3) NW Sources of radioactivity in the environment, including both natural sources, especially radon, and man-made sources, especially nuclear power and nuclear explosions. Emphasis given to methods for determining radiation doses from the significant sources. Offered: jointly with ENGR/ENV S 343; Sp.

PHYS 405-406 Physical Science for Teachers (2-5, max. 6-2,6-5, max. 6) NW Individualized study of selected topics emphasizing depth of understanding and development of skills essential to scientific process. Useful as background for teaching physical science. Prerequisites: MATH 126 or 136.

PHYS 407, 408, 409 Physics for Teachers (5,5,5) NW Individualized study of selected topics in basic physics with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Prerequisites: permission of instructor. Strongly recommended: 407 taken prior to 408. Offered: A.W.Sp.

PHYS 410 Physical Science for In-service Teachers (1-2, max. 10) NW A "hands-on" inquiry-oriented course designed to train in-service teachers in the use of the physical science content of any of several science programs that might be selected by a school or school district. Credit/no credit only. Prerequisite: In-service teacher in cooperating school district.

PHYS 411, 412, 413 Physical Science for Lead Teachers (1-2, max. 1-4, max. 4-1, max. 4-4) NW For preservice and in-service teachers. Emphasizes the physical science content covered in previous courses and helps prepare lead teachers to train their colleagues in the use of the physical science content of any of several science programs that might be selected by a school or school district. Prerequisites: 101-102 or 400 or 405-406. Offered: A.W.Sp.

PHYS 421 Atomic and Molecular Physics (3) NW Survey of the principal phenomena of atomic and molecular physics. Prerequisites: 323 and 325, or permission of instructor. Offered: W.

PHYS 422 Nuclear and Elementary-Particle Physics (3) NW Survey of the principal phenomena of nuclear and elementary-particle physics. Prerequisites: 323 and 325, or permission of instructor. Offered: W.

PHYS 423 Solid-State Physics (3) NW Survey of the principal phenomena of solid-state physics. Prerequisites: 323 and 325, or permission of instructor. Offered: W.Sp.

PHYS 427 Applications of Physics (1-3, max. 12) NW Current applications of physics to problems in the sciences and technology.

PHYS 428 Selected Topics in Physics (1-3, max. 12) NW

PHYS 431, 432, 433 Modern Physics Laboratory (3,3,3) NW 431, 432: measurement in modern atomic, molecular, and solid-state physics. 433: techniques in nuclear and elementary-particle research. Prerequisites: 30 credits in physics or permission of instructor for 431, 432; 327 or 422 or permission of instructor for 433. Offered: A.W.Sp.

PHYS 434 Application of Computers to Physical Measurement (3) NW Laboratory giving specific instruction on an experiment interfacing a minicomputer to laboratory equipment. Prerequisite: junior standing or permission of instructor. Offered: AS.

PHYS 441 Quantum Physics (4) NW Methods of quantum mechanics and applications to physical systems. Examples from atomic and molecular systems, nuclear physics, solid-state physics. Typical preparation: 30 credits in physical science or engineering. Offered: W.

PHYS 485, 486, 487 Senior Honors Seminar (1,1,1) NW Offered: A.W.Sp.

PHYS 491, 492, 493 Independent Research (1-3, max. 3, 1-3, max. 3, 1-3, max. 3) Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished. Prerequisites: 12 credits in physics above 200-level or permission of instructor. Offered: A.W.Sp.

PHYS 494, 495, 496 Seminar on Current Problems in Physics (1-3, max. 3, 1-3, max. 3, 1-3, max. 3) Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Prerequisites: 12 credits in physics above 200-level or permission of instructor. Offered: A.W.Sp.

Courses for Graduates Only

PHYS 501, 502, 503 Tutorials in Teaching Physics (1, max. 2, 1, max. 2, 1, max. 2) Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Offered: A.W.Sp.

PHYS 505, 506 Mathematical Methods of Physica (3,3) Mathematical techniques discussed in the context of the physics problems where they arise. Differential and integral equations with boundary conditions applied to conduction and diffusion, hydrodynamics, acoustics, classical and quantum mechanics. Offered: A.W.

PHYS 507 Physical Applications of Group Theory (3) Applications of finite and continuous groups, representation theory, and conservation laws to physical systems. Offered: Sp.

PHYS 513, 514, 515 Electromagnetic and Relativity (4,4,4) Properties of electric and magnetic fields in free space and material media; boundary-value problems; radiation from accelerated charges and electromagnetic waves; the theory of special relativity.
leading to a relativistic formulation of electromagnetism and particle dynamics. Offered: A,W,Sp.

PHYS 517, 518, 519 Quantum Mechanics (4,4,4) The uncertainty principle and the interpretation of quantum mechanics. Applications of the Schrodinger equation in three dimensions; Dirac notation and matrix formulation; angular momentum; Wigner-Eckart theorem; elementary collision theory; density matrix; approximation methods; atomic structure; semiclassical radiation theory; introduction to group theory and symmetry. Offered: A,W,Sp.

PHYS 524, 525 Thermodynamics and Statistical Mechanics (3,3) Statistical mechanical basis for the fundamental thermodynamical laws and concepts; applications of thermodynamic reasoning to selected physical problems; classical statistical distribution functions; quantum statistical mechanics; introduction to equilibrium many-body problems. Prerequisite: 517, which may be taken concurrently. Offered: Sp.A.

PHYS 527, 528 Current Problems in Physics (1,1) Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: A,W.

PHYS 530 Laser Physics (4) Physics underlying laser design and operation in the context of common laboratory systems. Topics may include continuous and pulsed lasers; solid, liquid, and gas gain media; Q-switching, mode-locking, resonator theory, nonlinear optics, and others. Prerequisites: basic quantum mechanics, electromagnetism, and optics. Recommended: 541.

PHYS 531 Fluid Mechanics (4) Mechanics of ideal and viscous fluids. Topics may include turbulence, thermal conduction and diffusion, shock waves, and others.

PHYS 532 Liquid Crystal Devices (4) Physics of liquid crystals and applications to practical display devices. Phases, phase transitions, optical and dielectric properties, molecular and device "engineering," future prospects.

PHYS 541 Applications of Quantum Physics (4) Techniques of quantum mechanics applied to lasers, quantum electronics, solids, and surfaces. Emphasis on approximation methods and interaction of electromagnetic radiation with matter. Prerequisite: 421 or 441 or equivalent. Offered: Sp.

PHYS 543 Electromagnetic Waves (4) Principal concepts of electromagnetic theory. Boundary-value problems. Electromagnetic waves with applications in materials, optics, wave guides. Prerequisite: 30 credits in physical sciences or engineering. Offered: A.

PHYS 544 Electromagnetic Theory and Plasma Physics (4) Review of electromagnetic theory in terms of Maxwell's equations. Basic fluid mechanics and kinetic theory. Magnetohydrodynamics and plasma physics with the aim of providing an understanding of the principles underlying fusion reactors and other applications. Prerequisite: 543 or equivalent.

PHYS 545 Contemporary Optics (4) Coordinated lecture and laboratory treatment of topics in contemporary optics. Subjects include Fourier optics, lens systems, interference and polarization, laser optics; holography, polarization, crystal optics, bifringence, laser and conventional light sources, optical detectors. Prerequisites: 543 or equivalent.

PHYS 546 Condensed-Matter Physics (4) Experimental techniques for investigating surface geometrical and electronic structure, surface composition, and surface, i.e., thermodynamics. Auger electron spectroscopy, photo-electron spectroscopy, low-energy electron diffraction, ion scattering. Prerequisite: 441 or equivalent.

PHYS 547 Electronics for Physics Research (4) Electronic techniques as applied in physics research. Topics include noise, control-system analysis, operational amplifiers, lock-in amplifiers, precision power supplies and metering, data transmission, microprocessors. Several integrated measurement systems are examined in the context of specific research problems. Prerequisite: elementary electronics.

PHYS 548 Nuclear Instrumentation (4) Techniques of nuclear particle detection and radiation detection; position detection; signal preparation and amplification; signal transmission and termination; noise suppression; pulse height discrimination; analog signal processing; fast logic; fast and slow timing; time-to-amplitude conversion; pile-up rejection; single pulse height analysis; multiparameter pulse height analysis; computer-based data collection; interfacing. Prerequisites: 334 and 335 or equivalents.

PHYS 550, 551 Atomic Physics (3,3) Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: 519.

PHYS 552 Introduction to Cosmic Ray Physics (3) The nature and consequences of cosmic ray photons and particles. The motion and confinement of particles in the geophysical, interplanetary, and interstellar medium. Theories of the processes involved in the high-energy interaction of cosmic rays, including shower theory. Methods of measurement and current problems. Prerequisite: introductory quantum mechanics.

PHYS 557, 558, 559 High Energy Physics (3,3,3) High-energy kinematics; phenomenology of high energy collisions. Second quarter is devoted to strong interactions, and the third quarter discusses weak interactions. Experimental results are emphasized. Prerequisite: 519. Offered: A,W,Sp.

PHYS 564, 565 General Relativity (3,3) General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein's field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: 515.

PHYS 570, 571 Quantum Field Theory (3,3) Emphasis varies in different years between relativistic quantum field theory and the many-body problem. Prerequisite: 520.

PHYS 572 Modern Quantum Field Theory (3) Advanced topics in quantum field theory. Prerequisites: 570, 571.

PHYS 576 Selected Topics In Experimental Physics (*) max. 30)

PHYS 578 Selected Topics In Theoretical Physics (*) max. 30)

PHYS 580 Physics Colloquium (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 581 Seminar In High-Energy Physics (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 582 Seminar In Particle Theory (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 583 Seminar In Relativistic Astrophysics (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 584 Seminar In Atomic Physics and Coherent Spectroscopy (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 585 Seminar In Experimental Nuclear Physics (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 586 Seminar In Experimental Condensed Matter Physics (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 587 Seminar In Nuclear Theory (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 588 Seminar In Cosmic Ray Physics (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 589 Seminar In Problems of Physics Education (*) max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 590 Seminar In Statistical Physics (1, max. 30) Credit/no credit only. Offered: A,W,Sp.

PHYS 600 Independent Study or Research (*) Study or research under the supervision of individual faculty members. Prerequisite: permission of supervisor. Credit/no credit only. Offered: A,W,Sp.

PHYS 600 Doctoral Dissertation (*) Permission of Supervisory Committee chairperson. Credit/no credit only. Offered: A,W,Sp.

Political Science

101 Gowen

Students of political science examine the theory and practice of government and politics. They acquire knowledge of political institutions and processes and learn to think critically about public policies and their consequences. They learn how to evaluate individual, group, and mass behavior in political settings. Because of their understanding and interest in political systems, students who major in political science enter such career fields as government service, law, business, journalism, politics, public policy analysis, and education.

The department is organized into four major fields of study: political theory, American government and politics, international relations, and comparative politics. Several subfields—public law, law and public policy, political culture, and political economy—cut across these main areas and provide focused specializations for both undergraduate and graduate students. The department has long been renowned in comparative
and international politics, especially in the study of Asian political phenomena, in public law, and in American government and politics. Recently, the department has augmented its faculty strength in political and feminist theory as well as in political economy.

Undergraduate Program

Students begin their concentration by choosing three basic courses that define the discipline and its major fields of interest, then advance to more specialized study in the field areas. The undergraduate program is designed to provide broad knowledge of the discipline, to emphasize the acquisition of research skills for students who will seek advanced degrees, and to offer practical experience through internships and fieldwork courses for students who will seek employment after completing the baccalaureate degree.

Bachelor of Arts Degree

Admission Requirements: (1) Sophomore standing (completion of minimum 45 college credits); (2) minimum 2.00 GPA; (3) three introductory courses in the discipline, either completed or in the process of being completed, from among POL S 101, 201, 202, 203, 204, and 205 (or equivalents). Students are admitted only on recommendation and with prior consultation with advisers in 115 Gowen.

Major Requirements: 50 credits in political science, including (1) three courses (15 credits) in introductory political science field courses from POL S 101, 201, 202, 203, 204, 205; (2) three courses (15 credits) in upper-division field courses—at least one course in each of three different areas of political science study; the five areas from which to select this requirement are political theory, comparative government, international relations, American government, and research methods; (3) 20 credits of elective political science course work numbered POL S 210 and above; (4) minimum cumulative GPA of 2.25 in political science courses at graduation. Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 upper-division political science credits at the UW.

Political Economy: The department also offers a political economy focus, a specialized program of study that combines political science and economics, emphasizing rational choice theory. Students who wish to pursue this interdisciplinary concentration should consult with the undergraduate advisor. A list of recommended course work is available.

Internships: In order to prepare students for career opportunities, the department offers three internship programs that range from part-time, 5-credit assignments to full-time, 15-credit programs. Students can elect to work in local agencies (POL S 486), in the state legislature in the winter quarter (POL S 497), and in Washington, D.C. (POL S 498). Students in all majors may apply for the Washington Center Program, which places students in Washington, D.C., during every academic quarter.

Minor

See department for requirements.

Graduate Program

Master of Arts Degree

A bachelor’s degree is required for admission to the M.A. program. The M.A. program is made flexible in order to serve the needs of both students who are intending to go on to the Ph.D. and of students with more immediate goals. Approximately two-thirds of the program are made discretionary. M.A. aspirants must submit an essay of distinction (POL S 598), and pass comprehensive oral examinations in two fields. One of these fields must be chosen from four general fields: political theory, international relations, comparative politics, and American politics. The second field may be a second general field or one of the specialized fields (including, but not limited to): area study, public law, public policy, political economy, or political culture. The M.A. degree requires the completion of 46 credits, of which 23 must be at the 500 level or above. Two courses in foundations of political analysis are required.

Doctor of Philosophy Degree

An M.A. degree in political science, or equivalent, is required for admission to the doctoral program. The doctoral student must prepare a total of three fields—a minimum of one general field; a second general field and/or one or more specialized fields, and/or at most one non-designated field. Two courses in quantitative political analysis and an elective methodology course are required. Competence in a foreign language is required only if deemed appropriate by the student’s Supervisory Committee. The doctoral degree requires the completion of 124 graduate credits, of which at least 58 must be at the 500 level or above; 36 credits are allowed for the dissertation. To be advanced as a doctoral candidate, a student must complete all of the above, and a second essay of distinction (POL S 599), a written examination in each of the three fields, and an oral comprehensive oral examination. Once advanced to candidacy, students must write, and orally defend, their dissertation thesis.

The department has long been outstanding in comparative and international politics, especially in the study of Asian political phenomena. Recently, the department has augmented its faculty strength in American politics, political economy, public policy, public law, and methodology. Graduate students can pursue studies in other campus units, such as the School of Social Work, the Henry M. Jackson School of International Studies, the Institute for Environmental Studies, and the School of Law.

Research Facilities

The University library system, the largest research library in the Pacific Northwest, has a collection of five million volumes, with specialized collections for the Pacific Northwest, Near East, South Asia, and Slavic and Eastern European areas. A separate Public Policy Science Library serves the specialized needs of the department. Interactive and batch-processing computing is available through several large computers. Specialized access to these facilities and access to extensive data holdings are available through the Center for Social Science Computation and Research. The University is a member of the Inter-University Consortium for Political and Social Research.

Admission

The department admits for autumn quarter only. January 15 is the application deadline. Admission and financial aid decisions are based on the applicant’s academic transcript, Graduate Record Examination general test scores (subject test is required), three letters of reference, a statement of purpose, and a writing sample. Foreign students are required to submit TOEFL scores.

Financial Aid

Two types of financial assistance are available. J. Allen Smith fellowships in political science are awarded annually to outstanding first-year students. Teaching and research assistantships, which may include residency status, are also available to qualified students.

Correspondence and Information

Graduate Program Coordinator

101 Gowen, DE-30

Faculty

Chairperson

W. Lance Bennett

Professors

Bennett, W. Lance * 1974; PhD, 1974, Yale University; American politics, political psychology.

Brass, Paul R. * 1965; PhD, 1964, University of Chicago; comparative government, international relations.

Burstein, Paul * 1985, (Adjunct); PhD, 1974, Harvard University; political sociology, social stratification, public policy, law.

Caporaso, James A. * 1988; PhD, 1966, University of Pennsylvania.

Cassinelli, Charles W. * 1960, (Emeritus); PhD, 1953, Harvard University; comparative government (Latin America).

Gerberding, William P. * 1979; PhD, 1959, University of Chicago; political science.

Gore, William J. * 1966, (Emeritus); PhD, 1952, University of Southern California; public policy, public administration.

Hettman, Donald C. * 1967; PhD, 1964, University of California (Berkeley); Japanese politics and international relations.

Lev, Daniel S. * 1970; PhD, 1964, Cornell University; comparative politics (Southeast Asia).

Matthews, Donald Rowe * 1976; PhD, 1953, Princeton University; American government and politics.

May, Peter J. * 1979; PhD, 1979, University of California (Berkeley); policy analysis, quantitative methods, federal disaster policy.

McCann, Michael W. * 1982; PhD, 1983, University of California (Berkeley); American government and politics, public law, political theory.

McCrone, Donald J. * 1979; PhD, 1966, University of North Carolina; American politics, political economy.

Migdal, Joel S. * 1980, (Adjunct); PhD, 1972, Harvard University; state and society in the Third World; Middle East politics.

Modelski, George * 1967; PhD, 1954, University of London (UK); international relations, international political economy.

Olson, David J. * 1974; PhD, 1971, University of Wisconsin; American government and politics.

Reshef, John S. Jr. * 1957, (Emeritus); PhD, 1950, Harvard University; comparative government (Soviet Union), international relations.

Schelling, Stuari A. * 1969; PhD, 1963, University of California (Berkeley); American politics, political economy.

Taylor, Michael John * 1985; PhD, 1976, University of Essex (UK); political theory, political economy, empirical theory.

Townsend, James R. * 1968, (Emeritus); PhD, 1965, University of California (Berkeley); comparative government (China), politics of development.

Associaite Professors

Bachman, David M. * 1991, (Adjunct); PhD, 1984, Stanford University; Chinese politics and foreign policy and China's political economy (1949-present).

Di Stefano, Christine * 1985; PhD, 1984, University of Massachusetts; political theory (modern and contemporary), feminist theory, political culture.

Goldberg, Ellis * 1985; PhD, 1983, University of California (Berkeley); political economy of the Middle East.

Gottfried, Alex 1951, (Emeritus); PhD, 1952, University of Chicago; American government and politics.
Hartsock, Nancy C. M. * 1984; PhD, 1972, University of Chicago; feminist theory, Marxism, contemporary political theory.
Horowitz, Ruth L. * 1971; PhD, 1972, Stanford University; political theory and methodology.
Keeler, John T. * 1980; PhD, 1978, Harvard University; comparative government (Western Europe), international relations.
Majek, Stephen J. * 1984; PhD, 1981, Indiana University; international relations, foreign policy, peace and conflict resolution.
Pool, Jonathan Robert * 1977; PhD, 1971, University of Chicago; comparative government, methodology, political economy, political psychology.
Riley, Walter 1946, Emeritus); PhD, 1957, Stanford University; political science.
Rohr, Peter H. * 1962, Emeritus); PhD, 1958, University of Washington; international relations, international law.

Assistant Professors
Eliason, Leslie Carol 1988), (Adjunct); PhD, 1988, Stanford University; comparative politics; European public policy; comparative education and health care policy.
Gill, Anthony J. 1994, (Acting); PhD, 1994, University of California (Los Angeles); comparative politics, Latin America, political economy, methodology.
Hanson, Stephen E. * 1990; PhD, 1991, University of California (Berkeley); Soviet, post-Soviet and comparative politics.
Ingelbritsen, Christine * 1992, (Adjunct); PhD, 1992, Cornell University; Scandinavian domestic and foreign policies, European community integration and Scandinavia.
Litfin, Karen T. * 1991; PhD, 1992, University of California (Los Angeles); international environmental politics, globalization processes, evolution of consciousness.
Mayerfeld, Jason 1991; PhD, 1992, Princeton University; political theory, Latin American politics.
Simpson, Andrea Y. 1993, (Acting); PhD, 1994, Emory University; American government and politics, minority politics.
Thomson, Janice E. * 1988; PhD, 1988, Stanford University; international relations theory, state sovereignty, and international norms and institutions.
Whiting, Susan H. 1994, (Acting); PhD, 1994, University of Michigan; comparative politics, China, political economy, methodology.
Wilkinson, John D. * 1990; PhD, 1992, University of Rochester; American politics, Congress, quantitative methods.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
Most upper-division courses (300- and 400-level) do not require prerequisites. However, because these courses generally offer more advanced subject matter, they are recommended for juniors and seniors. Freshmen or sophomores who wish to enroll in upper-division courses may do so, but they should consult with the instructor or the departmental adviser first.

POL S 101 Introduction to Politics (5) I&S Political problems that affect our lives and shape the world around us. Recommended for nonmajors, for students who are thinking about political science as a major, and for political science majors who haven’t decided on an area of specialization. Offered: AWSpS.

POL S 201 Introduction to Political Theory (5) I&S Philosophical bases of politics and political activity.

Provides an introduction to the study of politics by the reading of a few books in political philosophy. Organizes several key political concepts, such as liberty, equality, justice, authority, rights, and citizenship. Offered: AWSpS.

POL S 202 Introduction to American Politics (5) I&S Institutions and politics in the American political system. Ways of thinking about how significant problems arise, and conflicts of American society are resolved politically. Offered: AWSpS.

POL S 203 Introduction to International Relations (5) I&S The world community, its politics, and government. Offered: AWSpS.

POL S 204 Introduction to Comparative Politics (5) I&S Political systems in a comparative framework. Traditional and contemporary approaches to the study of governments and societies in different countries.

POL S 205 Political Science as a Social Science (5) I&S Methodological perspectives of the various social science disciplines; commonalities and differences in assumptions, values, and paradigms. Current issues from the multiple perspective of social sciences; limits of the social sciences in resolving key social issues. Recommended: introductory course in one or more social science.

POL S 210 Ethnic Minorities and American Politics (5) I&S Ethnic groups in American politics, minorities in urban society, sources of tension and frustration, historical relationship of minorities to the political process, protest as political activity, urban services and urban politics, the effect of national politics and policies on urban minorities. Each offering focuses on one minority group.

POL S 211 The Future of American Minorities (5) I&S Alternatives open to different minority groups in the United States; their development and place in American politics, the possibilities of community formation, integration, separation, competitive economic structures, coalitions. Prerequisite: 210 or permission of instructor.

POL S 212 Philosophy of Feminism (5) I&S Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, its relation to racial liberation, and social issues. Offered: jointly with PHIL 200/206.

POL S 270 Introduction to Political Economy (5) I&S Political economy as a tool for understanding and evaluating the political world. Combines theory, methods, and insights derived from economic and political science and applies them to a range of substantive issues.

POL S 273 The Concept of Political Power (5) I&S How to understand and explain relationships of power. Readings from Marxism, Weberian sociology, anarchism, classical political philosophy, and contemporary political science. May also include works of fiction.

POL S 281 Introduction to American Political Culture (5) VLPA/IAS Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Offered: jointly with ENGL 251.

POL S 290 Introduction to Quantitative Political Science (5) I&S, QSR Scientific methods of political research. Mathematical models and statistics useful in theorizing about and describing political phenomena as Translation of equations, graphs, and tables into words and vice versa. Intensive use of computers for analysis and writing.

POL S 300 Practical Political Research (5) I&S, QSR Techniques for research and report writing in practical politics (e.g., election campaigns, public interest groups, government agencies, political analyses for the press). Supervised group research in the computer analysis of current political data. For a sequence in political statistics, students may also take 290 and/or 491.

POL S 301 Special Topics in Political Theory (5, max. 10) I&S Selected contemporary political issues. Political principles as reflected in concrete political problems. Topics might include women’s rights, civil disobedience, national health care, affirmative action, environmental protection, privacy, human rights, and redistribution of property. Recommended: introductory course in political science at the 100 or 200 level.

POL S 302 Field Experience in Politics (5, max. 10) I&S Analysis of political theory and methods of political research, combined with extensive field research in contemporary problems of government and politics experienced by people of the Seattle community.

POL S 303 Public Policy Formation in the United States (5) I&S Policy decision making with emphasis on: how issues arise, the way they become part of the policy agenda of the executive and the legislature, how these institutions organize to handle policy issues, and the roles of the legislature, the executive, and the bureaucracy. Public policy literature and familiarization with key aspects of policy decision making at the national, state, and local levels.

POL S 304 The Press and Politics in the United States (5) I&S Journalists’ role in elections and public policy. Relationship between news coverage and political campaigns. Study and analyze of local political newswriting, reporting, and response by local and state political figures. Extensive off-campus experience included. Offered: jointly with CMU 304.

POL S 305 The Politics of Mass Communication in America (5) I&S Role of mass audiences in politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics.

POL S 308 The Western Tradition of Political Thought, Ancient and Medieval (5) I&S Origin and evolution of major political concepts from ancient Greece to the medieval period, from Thales through Aquinas. Recommended: 201.

POL S 309 The Western Tradition of Political Thought, Pre-Modern (5) I&S Continuation of 308, treating materials from the fifteenth through eighteenth centuries, Maichiavelli through Rousseau. Recommended: 201.

POL S 310 The Western Tradition of Political Thought, Modern (5) I&S Continuation of 308 and 309, focusing on material from the eighteenth through twentieth centuries, from Rousseau through Lenin. Recommended: 201.

POL S 311 Individual and the State (5) I&S Individual versus the community in politics. Political and ethical implications of both. Nature of the state, liberty, responsibility, cooperation. Important individualist and collectivist literature, dealing with market institutions and citizen politics, critically assessed.

POL S 313 Women in Politics (5) I&S Political theory, historical and contemporary, including writings of the exploitation and the oppression of the political role of women in society. Empirical studies of the “apolitical” woman, and on the process of political socialization in various cultural contexts. Prerequisite: WOMEN 200 or political science course. Offered: jointly with WOMEN 313.

POL S 318 American Political Thought I (5) I&S Major thinkers and themes in American political and cultural development from Puritan origins to the Civil War.
POL S 319 American Political Thought II (5) I&S Major thinkers and themes in American political and cultural development from the Civil War to the present.

POL S 321 American Foreign Policy (5) I&S Constitutional framework; major factors in formulation and execution of policy; policies as modified by recent developments; the principal policymakers-President, Congress, public opinion, press, and interest groups. Recommended: 101 or 202. Offered: Fall-Spring.

POL S 324 Europe in World Politics (5) I&S Independent and coordinated efforts of Britain, France, and West Germany to adapt to the post-World War II global system. Creation and development of the Atlantic alliance. Relations with the Soviet bloc. Decolonization and the evolution of relations with the Third World. The movement for European integration. Prerequisite: 203 or equivalent.

POL S 325 The Arab-Israeli Conflict (5) I&S The politics of conflicting ideologies: Zionism and Arab nationalism; formation of the state of Israel; development of Palestinian nationalism; Arab-Israeli wars. Re-emergence of Palestinian activism: domestic sources of foreign policy; the role of the superpowers.

POL S 326 Scandinavia in World Affairs (5) I&S Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressure of interdependence. Offered: jointly with SCAND 326.

POL S 328 International Organizations (5) I&S Explores historical, theoretical, and empirical aspects of the United Nations, its specialized agencies, and other international organizations, both governmental and nongovernmental. Prerequisite: 203.

POL S 331 Government and Politics in the Middle East and North Africa (5) I&S Breakdown of traditional society and the problems of building modern political systems.

POL S 340 Government and Politics of South Asia (5) I&S Comparison of problems of national integration and political development in India, Pakistan, and Ceylon. Offered: jointly with SISSA 340.

POL S 342 Government and Politics of Latin America (5) I&S Analysis of the political dynamics of change in Latin America comparing various national approaches to the political problems of modernization, economic development, and social change.

POL S 343 Government and Politics of Southeast Asia (5) I&S Government and politics in the countries of Southeast Asia, with attention given to the nature of the social and economic environments that condition them.

POL S 346 Governments of Western Europe (5) I&S Modern government and politics of Great Britain, France, Germany, and Italy.

POL S 350 Government and Interest Groups in the United States (5) I&S Agrarian, labor, professional, business, and ethnic interest in politics; impact on representative institutions and governmental processes. Recommended: 101.

POL S 351 The American Democracy (5) I&S Democratic theory; constitutional theory; the Presidency; Congress; the Supreme Court; civil rights and civil liberties. Designed for nonmajors. Recommended: 202 or equivalent.

POL S 352 American Political Parties (5) I&S Theories of American parties, campaigns and voting behavior; party leadership; political socialization and participation. Recommended: 101 or 202.

POL S 355 The American Presidency (5) I&S The American presidency; its evolution, its occupants, and its place within the American system. Topics include presidential character, war, elections, Watergate, the economy, and the Constitution.

POL S 356 Society and Politics (5) I&S Focus on the causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Offered: jointly with SOC 356.

POL S 359 Introduction to United States Constitutional Law (5) I&S Growth and development of the United States Constitution as reflected in decisions of the Supreme Court; political, social, and economic effects.

POL S 361 United States Courts and Civil Liberty (5) I&S Cases and literature bearing on protection of constitutionally guaranteed private rights, with particular reference to the period since 1937.

POL S 365 Lawyers in American Politics (5) I&S Influence of lawyers on American politics. Official and unofficial political roles, lawyers as lobbyists, as legislators, in the bureaucracy, politics of the American Bar Association. Includes study of legal education, professional values, and avenues of political access.

POL S 382 State Government (5) I&S Focus on the structures, processes, and policy outputs of state governments in the United States.

POL S 383 Environmental Policy and Politics in the United States (5) I&S Interrelation between technological and environmental change and policy formation. The causes of behavior related to these phenomena and the capacity of urban public organizations to predict change and to formulate policies that can take future states into account.

POL S 389 Honors Seminar (5, max. 15) I&S Intensive and advanced studies in various aspects of political science. Open only to participants in the departmental honors program.

POL S 401 Advanced Special Topics in Political Theory (5, max. 10) I&S Topics can include, but are not limited to, analytical theory pertaining to justice, exploitation, and freedom; revolution and social changes; collective choice and action; sexuality and politics; critical theory; Marxist theory; post-structuralism. Content varies. Prerequisite: 201.

POL S 405 American Politics Seminar (5, max. 10) I&S Intensive reading and research in selected problems or fields of political analysis. Recommended: 202.

POL S 406 Marxian Political Economy (5) I&S Explores the relationship between social classes, the state, and political power in advanced capitalist societies. Investigates this relationship primarily by means of the Marxian model of the political economy and, in the process, evaluates these tools. Emphasis on theoretical perspectives, although the reading list has a few empirical applications as well. Prerequisite: 201.

POL S 407 International Conflict (5) I&S Many forms of international conflict, including global wars, localized conflicts, humanitarian emergencies, military interventions, and international crises. Several political, social, and anthropological explanations for conflicts and examination of alternative world futures.

POL S 408 Political Conflict Theory (5) I&S Verbal and mathematical models designed to explain, win, prevent, and resolve conflicts. Search for a unified conflict theory and conflict methodology. Focus on all issues (environmental, industrial, ethnic, territorial, moral) and all processes (negotiation, voting, arbitration, strikes, lawsuits, arms races, war, terrorism). Recommended: 250 or 300.

POL S 409 Undergraduate Seminar in Political Economy (5, max. 10) Seminar in political economy with focus on Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Prerequisites: 270, ECON 300, and permission of instructor. Offered: jointly with ECON 409.

POL S 410 Technology, Politics, and the State (5) I&S Relationships between politics, technological change, and development of multinational corporations. Considers whether the relations between political and economic systems of industrial societies have been fundamentally altered by the increased importance and interdependence of government, experts, and new technological possibilities for intervention in social life.

POL S 411 Theories of the State (5) I&S Topics may include origins and development of the state; arguments about the necessity, desirability, and proper role of the state; the nature and operation of modern states and the international state system; the legitimacy of modern state power.

POL S 413 Contemporary Political Theory (5) I&S Analysis of political theorists, exploring contemporary theories of humanity and society that form the basis for differing political ideas.

POL S 414 Politics and Culture (5) I&S How people interpret and shape the political world around them through the use of such cultural resources as language, symbolism, myth, and ritual. The various uses of these cultural elements establish the place of the individual in society, and also the reception and interpretation of political events, and create opportunities for individual and mass political responses. Prerequisite: junior or senior standing.

POL S 416 Economic Theory as Applied to the Political System (5) I&S Explanation and evaluation of the political system, using elementary economic theory. Topics include alternative voting rules, the political effectiveness of various types of groups, causes and consequences of logrolling, and bureaucratic organizations. Prerequisite: ECON 200 or 400 or equivalent. Offered: jointly with ECON 452.

POL S 417 Political Economy of India (5) I&S Relations among processes of economic change, political institutions, and structures of political power in contemporary India. Contrasting approaches of Indian economic development, land reform, radical and agrarian political movements, and role of foreign aid. Offered: jointly with SISSA 417.

POL S 418 Multinationals and World Order (5) I&S Multinational corporations as a problem for world order. MNCs and the global political economy; theories of multinational activity; governance and regulation; international organizations, world politics, and MNCs. Prerequisite: 203 or equivalent. Three main courses in international relations and international institutions.

POL S 420 Foreign Relations of the Soviet Union (5) I&S Ideological, historical, and strategic components of Soviet foreign policy; Comintern, Cominform, and policy formation; arms assistance; military intervention and subversion; and major conflicts. Prerequisites: 203 or equivalent.

POL S 430 Future States (5) I&S Major thinkers and themes in American political and cultural development from the Civil War to the present. Prerequisite: 203. Offered: Fall-Spring.
and international communist movement; Soviet policy in foreign trade, in international law and organization, and in specific geographic areas.

POL S 421 Relations Among Communist States (5) I&S Major disputes and types of relationships among different communist states and ruling parties; attempts at integration and methods of alliance maintenance, tensions and contradictions in relations. Nature of the socialist community and the communist state system.

POL S 423 International Law (5) I&S Origin and present status of efforts to make rules of conduct for sovereign states; simulation of a treaty-drafting conference, with students playing roles of legal advisers to foreign governments. Recommended main for sections with prior courses in international relations.

POL S 424 International Courts (5) I&S Earlier models, establishment, and operation to date of the World Court in the context of international law and politics; simulation of a court case, with students playing roles of judges and attorneys. Recommended mainly as a sequel to 423.

POL S 425 International Law Seminar (5) I&S Team research on a student-selected topic in international law; quantitative methods, computer applications, and writing skills. Prerequisite: 423 or 424 or permission of instructor.

POL S 426 World Politics (5) I&S The nation-state system and its alternatives, world distributions of preferences and power, structure of international authority, historical world societies and their politics. Offered: jointly with SIS 426.

POL S 427 International Political Economy (5) I&S Examines major theoretical problems, substantive issues, and schools of thought in international political economy (IPE), including issues of trade, production, and finance. Preparation for critical analysis of dilemmas entailed in establishing and maintaining an instrumentally effective and ethically acceptable IPE system.

POL S 431 International Relations in the Middle East (5) I&S Study of domestic sources of foreign policy in the Middle East; politics of oil; the East-West rivalry in the Middle East; conflict and collaboration among the local powers.

POL S 433 International Relations in Southeast Asia (5) I&S Analysis of the problems affecting relations among the countries of Southeast Asia. Prerequisites: 101, 343, or permission of instructor.

POL S 434 International Relations of South Asia (5) I&S Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Offered: jointly with SISSE 434.

POL S 435 Japanese Government and Politics (5) I&S Government and politics of Japan with emphasis on the period since 1945.

POL S 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Prerequisite: junior standing. Offered: jointly with SIS 436.

POL S 438 Politics in France (5) I&S Study of contemporary France. Structures of government in the Fifth Republic; nature of French voting behavior and evolution of the bipolarized political party system; behavior of political interest groups; training of France's administrative elite and functioning of the state bureaucracy; dynamics of policy-making.

POL S 440 European Fascism (5) I&S Analysis of fascism as revolutionary movement and type of political system in post-World War I Europe: Hitler's Third Reich, Mussolini's Italy, and Vichy France. Consideration of dynamics of resistance, policies that produced Holocaust, and questions raised at trials of fascist leaders in Nuremberg and elsewhere. Prerequisite: permission of instructor.

POL S 441 Government and Politics of the Soviet Union (5) I&S Ideological and historical bases of Soviet politics. Leninism, Stalinism, Communist Party structure and functions, administrative agencies, the police and military, law and the judiciary. Soviet federalism and nationality policy.

POL S 442 Government and Politics of China (5) I&S Post-1949 government and politics, with emphasis on problems of political change in modern China. Prerequisite: junior standing.

POL S 443 Comparative Political Societies (5) I&S Analysis of modern and premodern types of stable political society; special attention to contemporary representative democracy.

POL S 444 Revolutionary Regimes (5) I&S Analysis of the several types of political regimes concerned with effecting fundamental social change; emphasis on the twelfth century.

POL S 445 Politics and Society in Eastern Europe (5) I&S Political and social issues in lands east of the Elbe, treating some historical problems but focusing particularly on developments since 1945. Includes all communist states of Eastern Europe and their successors. Prerequisite: one previous course in European politics or history. Offered: jointly with SISSE 445.

POL S 446 Peasants in Politics (5) I&S Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly interdependent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with SIS 444.

POL S 447 Comparative Politics Seminar (5, max. 10) I&S Selected comparative political problems, political institutions, processes, and issues in comparative perspective. Strongly recommended: 204.

POL S 448 Politics of the European Community (5) I&S Examines the origins, structures, and political dynamics of the European Community. Attention given to themes of integration, to relations between the European Community and member states, and to the role of the European Community in world politics.

POL S 449 Politics of Developing Areas (5) I&S Comparative study of problems of national integration and political development in the new states of Asia and Africa. Prerequisite: junior standing.

POL S 452 Political Processes and Public Opinion in the United States (5) I&S The foundations and environment of opinion; organization and implementation of public opinion as a force in the development of public policy; public relations activities of government agencies.

POL S 453 The State Legislature (5) I&S Study of American state legislatures, with special reference to Washington State Legislature. Student must spend several Fridays in Olympia when the legislature is in session. Those desiring a more extensive involvement with the legislature should enroll in the political internship. Prerequisites: upper-division standing and permission of instructor.

POL S 454 The Supreme Court in American Politics (5) I&S Introductory public law course that examines the interplay of constitutional law and American politics with particular attention to the role of the Supreme Court in the formulation and implementation of public policy in such matters as criminal-law enforcement, civil rights political expression, and economic regulation.

POL S 456 The Politics of American Criminal Justice (5) I&S Political forces and values choices associated with the enforcement of criminal law. Distribution of resources among participants in the criminal justice system (e.g., police, attorneys, defendants, and judges). Understanding and evaluation of the interaction of criminal justice processes with the political system. Prerequisite: junior or senior standing.

POL S 457 Law and Public Policy in the United States (5) I&S Relationship between law and public policy, with particular attention to problems of social, economic, and political change. Considers legal and constitutional processes as they relate to such problems of public policy as race relations, the environment, and the economy. Prerequisite: junior or senior standing.

POL S 467 Comparative Law in Society (5) I&S Legal systems around the world as they actually work in their respective political, social, and economic contexts. Emergence and development of European legal systems, legal customs at variance with those of Europe, problems of legal processes in the modern state.

POL S 470 Public Bureaucracies in the American Political Order (5) I&S Growth, power, and roles of governmental bureaucracies in America: conflict and conformity with American political thought, other political institutions, and the public.

POL S 475 Public Choice (5) I&S Problems and prospects for collective action in a political democracy. Designing rules and institutions for effective central authority and effective constraints on governmental power. Social choice theory and game theory. Prerequisite: 270 or 474.

POL S 476 Strategy in Politics (5) I&S Explores the problem of finding fair methods for making social deci-
sions, and examines alternative methods of social choice. Emphasis on the importance of agenda control for outcomes and the implications of theories of social choice for common interpretations of concepts such as democracy and the general will. Prerequisite: 202 or 270.

POL S 485 Urban Politics Seminar (5) I&S Advanced undergraduate course in urban politics. Opportunity for more independent and intensive analysis of particular problems or lines of inquiry. Prerequisites: 101 or 202 or 481.

POL S 488-489 Honors Senior Thesis (5-6) I&S Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student's senior thesis. Students meet periodically as a group to discuss research in progress. Prerequisite: 15 credits in 390, senior honors standing, and permission of instructor.

POL S 490 Foundations of Political Analysis (5) I&S Fundamental issues pertaining to research in political science: "logics of inquiry," problems of concept formation, and development of research methods. Positivist, postmodernist, and other arguments about the nature of scientific knowledge.

POL S 491 Political Research Design and Analysis (5) I&S Major quantitative methods of empirical research in political science. Primary emphasis on research design, data collection, data analysis, and use of computers. Prerequisite: 250 or equivalent or graduate standing or permission of instructor.

POL S 492 Advanced Political Research Design and Analysis (5) I&S Third methods course in political research. Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to current developments in the field and with interests of instructor. Recommended: 490, 491.

POL S 493 Language and Politics (5) I&S Language as a political molecule, a tool of political power, and a source of political problems. Includes the effects of "public double speak," the role of language in racism and sexism, and the search for ways to overcome national and international language barriers in several parts of the world. Primarily for students in political science, languages, and area studies. Prerequisite: permission of instructor.

POL S 495 Study Abroad-Political Science (3-5, max. 15) I&S For participants in the study abroad program. Specific course content determined by assigned faculty member and announced in study abroad bulletin. Politics, political culture, and institutions related to their national setting.

POL S 498 Undergraduate Internship (5, max. 15) I&S Students serving in approved internships. Prerequisites: sophomore standing or above and permission of undergraduate adviser.

POL S 497 Political Internship in State Government (5, max. 20) I&S Students serving in approved internship programs in state government agencies. Prerequisite: junior standing or above and permission of undergraduate adviser.

POL S 498 The Washington Center Internship (15) Full-time academic internship with the Washington Center in Washington, DC. Includes internship activities, academic seminar, assemblies, and related activities. Credit/no credit only. Prerequisites: junior standing or above; one year at this university; application and acceptance into program; permission of undergraduate adviser.

POL S 499 Individual Conference and Research (2-5, max. 20) Intensive study with faculty supervision. No more than one registration in 499 under same instructor. Prerequisites: junior or higher standing and permission of undergraduate adviser.

Courses for Graduates Only

POL S 501 Survey of American Government (3) Contemporary developments toward American government. Alternative ways of considering policy issues. Focuses on such models as legal-constitutional, pluralistic competition, policy economy, public interest, and conflict resolution. For graduate students outside political science.

POL S 565 Comparative Politics (5) Core course. Modern theories, approaches, and methods in the study of comparative politics.

POL S 590 Analytical Political Theory (5) One of two political theory core courses. Introduction to the works of major political philosophers, past and present. Enduring controversies in political thought and on contemporary political theory literature.

POL S 591 Seminar in Ethical and Political Theory (5) Ethical writings of major political philosophers. Coherent themes arising from these works and assessment of their impact on concepts of politics. Recommended: background in political philosophy.

POL S 592 Seminar in Nationalism and Political Theory (5) Nationalism, republics, impact of mass democracy. Growth of internationalism. Role of political philosophy in probing institutions, moral perspectives, and assessing significance of nation-state, international order.

POL S 593 Issues in Feminist Theory (5) Contemporary issues in feminist theory as they affect studies of women, politics, and society.

POL S 594 Selected Topics in Political Theory (5) Core course. Emphasis on theories of justice, freedom, obligation, cooperation, the state and other fundamental political problems. Includes some classic works (Thucydides, Hobbes, E. H. Carr) to show continuity of debates in the present. Modern theories of war, conflict, cooperation, and international institutions also explored. Prerequisite: 521.

POL S 595 Problems of American Foreign Policy (3) Critical analysis of foundational and contemporary problems of foreign-policy making, with attention given to selected foreign-policy decisions. Prerequisite: 321 or permission of instructor.

POL S 596 The Chinese Political System (3) Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor.

POL S 597 Seminar on Contemporary Chinese Politics (3) Research on selected problems in contemporary Chinese politics. Prerequisite: 532 or permission of instructor.

POL S 598 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore US foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF/SIS 534.

POL S 599 International Relations of Modern China (3-5) Foreign policy of the People's Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor.

POL S 560 Seminar on the Foreign Policy of the Soviet Union (3) Selected topics in the development, methods, and objectives of the foreign policy of the Soviet Union. Prerequisite: permission of instructor.

POL S 521 International Relations I: Theory and Method (5) Part one of the core course in the field of international relations. Reviews contemporary theory, research, and methodology in the study of world politics.

POL S 522 International Political Economy (3-5) Theories of international political economy. Focuses on the emergence and development of the modern world system, the transition from feudalism to capitalism, and the institution of the nation-state system. Also examines the political economy of trade, investment, and the international division of labor from a variety of theoretical perspectives. Prerequisite: 521.

POL S 523 World System Analysis (4) Evolution of the world system. Historical-structural approaches to world politics: neo-realism; long cycles; world economy. Prerequisite: 521.

POL S 525 International Law-Policy (3) Inputs of international law into the decisional process in foreign policy. Effect of policy on law. Relevant roles of individuals and institutions in routine and crisis situations. Prerequisite: 423 or permission of instructor.

POL S 527 Special Topics in International Relations Research (3, max. 9) Examination of current topics in the theory and practice of world politics. Content varies according to recent developments in the field and research interests of the instructor.

POL S 528 Advanced International Relations Theory (5) Covers advanced works in international relations theory; e.g., realism, game theory, and theories of cooperation and conflict. Includes some classic works (Thucydides, Hobbes, E. H. Carr) to show continuity of debates in the present. Modern theories of war, conflict, cooperation, and international institutions also explored. Prerequisite: 521.

POL S 529 Problems of American Foreign Policy (3) Critical analysis of foundational and contemporary problems of foreign-policy making, with attention given to selected foreign-policy decisions. Prerequisite: 321 or permission of instructor.

POL S 532 The Chinese Political System (3) Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor.

POL S 533 Seminar on Contemporary Chinese Politics (3) Research on selected problems in contemporary Chinese politics. Prerequisite: 532 or permission of instructor.

POL S 534 International Affairs (3) Provides a broad understanding of international issues and United States policy. Students explore US foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF/SIS 534.

POL S 535 International Relations of Modern China (3-5) Foreign policy of the People's Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor.

POL S 536 Ethnic Politics and Nationality Formation (3) Seminar on analysis and theoretical understanding of two interrelated processes: ethnic group persistence and change. Includes the transformation of ethnic groups into politically self-conscious and influential nationalities. The readings and discussions deal with these two processes in the contexts of both developing societies and advanced industrial societies.

POL S 537 Approaches to East European Politics (3-5) Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Eu-
COLLEGE OF ARTS AND SCIENCES / PSYCHOLOGY

theory of law in society and development and practice of legal institutions.

POL S 567 Public Policy, Administration, and Political Theory (3) Meaning of democracy in the context of American public policies and administration. Persuasive and deliberative aspects of policy process, individual's role in organizations, functions of the public servant in the making of policy decisions, and realities of policy formulation in relation to political values. Offered: jointly with PB AF 556.

POL S 570 Bureaucratic Politics (3) Emerging literature on bureaucratic politics (e.g., principal-agent theory), and its relevance to policy processes at national or subnational levels. Offered: jointly with PB AF 501.

POL S 571 The Administrator and the Policy Process (3) Context of public administration from the perspective of the administrator. Case and research materials; field inquiries and interviews. Roles and functions of the administrator, particularly in relation to the process of implementing, making, and changing public policy. Offered: jointly with PB AF 502.

POL S 573 Topics in Public Policy (3-5, max. 10) Specialized research topics with a policy process or related theoretical content.

POL S 575 Public Policy Processes (5) Political science frameworks, approaches, and theories concerning development and implementation of public policies within American political systems. Governmental behaviors and processes, including rational, political, and bureaucratic models of governmental decision making; agenda-building processes; and normative perspectives concerning role of governmental entities. Offered: jointly with PB AF 575.

POL S 576 Political Culture (5) Values, beliefs, and rituals that guide political action in society. Some approaches emphasize symbolic sphere of value and belief over material conditions of power and economic production. Other approaches emphasize material relations. Reconciliation of symbolic and materialist approaches that explain intervention of the modern state in cultural processes.

POL S 577 The Politics of Social Movements (3-5) Theoretical inquiry directed to questions of collective action and political tactics by social movement groups. Case studies include labor, civil rights, women's, environmental, and other movements in twentieth-century United States.

POL S 581 Politics of Economic Policy Making (4) Determinants of American economic policy with particular attention paid to competing theories of government growth, to political business cycle theory, to incrementalist and other budgetary theories, to effects of party control, and to theories of class control. Interrelationships of monetary, tax, and expenditure policies.

POL S 582 The Political Economy of Social Change (5) Social change and property rights theory. Exploration of long-term secular change through works whose approaches derive from neoclassical economics and analytical Marxism. Evolution and transformation of property rights over land, labor, and capital and the consequences of the property rights structure for political and economic institutions.

POL S 583 Economic Theories of Politics (3-5) Problems of public goods provision and collective action. Collective action theories and applications as well as critical review of the concept of rationality.

POL S 584 Approaches to Subnational Government (3) Analysis of current approaches and concepts in the study of subnational government-urban, state, and regional public organization.

POL S 587 Politics of Urban Reform (3) Interpretations of urban reformers at turn of this century and during 1960s and 1970s. Historical and political science literature on the subject. Prerequisites: graduate student standing and permission of instructor.

POL S 588 Special Topics in Political Economy (3, max. 9) Evaluating research in political economy as well as developing research problems. Topics vary with instructor and with current problems in the literature. Prerequisites: 406, 416, ECON 400, and permission of instructor.

POL S 590 Seminar In Political Behavior (3, max. 6) Analysis of behavioral research in selected fields of political science.

POL S 593 Theories of Decision Making (5) Exploration of political decisions using models of such theoretical processes as preference formation, learning, heuristics, noncooperative games, collective action, agenda manipulation, and coalition formation. Examination of competing notions of political rationality and irrationality and criteria for their evaluation. Strategies for design of decision research. Prerequisite: 491 or permission of instructor.

POL S 597 College Teaching of Political Science (1)

POL S 598 Independent Writing I (3-5) Supervised research and writing for graduate students completing the MA essay of distinction.

POL S 599 Independent Writing II (3-5) Supervised research and writing for gradudate students completing the Ph.C. essay of distinction.

POL S 600 Independent Study or Research (*)

POL S 700 Master's Thesis (*)

POL S 800 Doctoral Dissertation (*)

Psychology

119 Guthrie

Psychology involves the scientific study of behavior and its causes and the understanding of human behavior in a variety of settings. Psychology is studied either as a natural science, which stresses physical and biological causes of behavior, or as a social science, which stresses the effects of the social setting on human behavior. Major areas of emphasis are human cognition, animal behavior, physiological and sensory bases of behavior, quantitative techniques, personality and clinical psychology, developmental psychology, and social psychology. The department does not have formal programs in educational, school, or counseling psychology (see the College of Education section of this catalog), engineering psychology, or industrial psychology.

Undergraduate Program

Advisers

114 Guthrie

Admission Requirements: (1) one English composition course selected from the Arts and Sciences list; (2) MATH 111, or 112, or 120, or 124; (3) minimum 15 graded credits in psychology to include 101 or 102: 205; at least one core course (200, 205, 222, 305, 308, 333, 345, 355); and other psychology courses (excluding 496-499); (4) minimum 2.50 GPA in all psychology courses taken; (5) minimum 2.00 UW cumulative GPA. Admission is competitive, based on preparation for a major in psychology as indicated by grades earned in courses required for application; GPA, with an emphasis on psychology grades, particularly in experimental design and statistics; personal statement reflecting an interest in and commitment to psychology; and other evidence of a commitment to becoming a psychology major.
The application deadline is the first Friday of each quarter, including summer quarter. Admission date is the sixth week of the same quarter. Applicants denied admission may submit written petitions requesting reconsideration. Applications and additional information are available at 114 Guthrie.

Bachelor of Science Degree

The Bachelor of Science program is intended to prepare students for doctoral programs in psychology, leading to careers in teaching, research, or clinical psychology. It may also provide desirable preparation for some health-related professions. The program emphasizes basic research experience and a strong background in related fields and mathematics, and requires a high GPA.

Major Requirements: 60 credits in psychology courses—101 or 102; 209; 217 and 218; 200, 222, or 333; 306, 345, or 355; 205 or 305; 232, 233 or 418; 231 or 361; 499; 15 graded credits of upper-division electives (excluding 496-499) with at least one course at the 400-level; and additional psychology electives to total 60 credits. 30 credits in other disciplines, to include MATH 120 and 124 (or 111 and 112); 5 credits of biology, zoology, or genetics; and 15 additional credits selected from computer science, upper-division biology, zoology, genetics, sociology, anthropology, or political science. 3.00 cumulative GPA in courses completed at the UW and 3.00 GPA in all psychology courses. Applicants must meet all the above requirements and are required to complete at least 15 graded credits in psychology at the 300 and 400 level at the UW.

Bachelor of Science Degree—Speech and Hearing Sciences Concentration

The Bachelor of Science with speech and hearing sciences concentration represents an interdisciplinary introduction to the study of sensory, perceptual, and cognitive sciences. It provides a basic foundation in the scientific study of behavior with an emphasis on human speech, language, and hearing.

Major requirements: 60 credits in psychology and speech and hearing sciences concentration courses—PSYCH 101 or 102; 209; 217 and 218; 200 or 222 or 333; 205 or 305; 306 or 345 or 355; PSYCH 231 or 232 or 233 or 381 or 419; SPHSC 310 or 311; PSYCH 498 or SPHSC 499; 15 graded credits from the following with at least one course at the 400-level: 300, 345, or 355; 231, 232, 233, 361, or 419; 15 graded credits of upper-division electives (excluding 496-499) with at least one course at the 400-level; and additional electives to total 60 credits; and MATH 111, or 112, or 120, or 124; 2.00 cumulative GPA in all courses completed at the UW; 2.50 cumulative GPA in all psychology courses. Transfer students must meet all the above requirements and are required to complete at least 15 graded credits in psychology at the 300 and 400 level at the UW.

A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

Graduate Program

Graduate work in psychology is organized primarily as preparation for the Doctor of Philosophy degree. The optional Master of Science degree is taken by some doctoral students in the course of their work toward the doctorate.

For graduate instruction, the department is organized into several content areas: adult clinical, child clinical, developmental, social psychology and personality, cognition and perception, psychology and law, animal behavior, physiological, quantitative, and conditioning and motivation.

The program in clinical psychology is accredited by the American Psychological Association and provides scientific and professional training.

The Behavioral Neuroscience Interdisciplinary Group of the Graduate School, composed of faculty from the departments of Psychology and of Physiology and Biophysics, offers an interdisciplinary program leading to the Doctor of Philosophy degree in behavioral neuroscience.

Master of Science Degree (Optional)

A master's degree only program is not available. Doctoral students have the option of obtaining a master's degree while working toward the Ph.D.

Graduation Requirements: Completion of first-year graduate program (same as for Doctor of Philosophy degree) and an appropriate research program, including a thesis examination. Foreign-language study is not required.

Doctor of Philosophy Degree

Graduation Requirements: Completion of course work in major and minor areas and breadth requirements in two other areas; completion of required course work in research design, statistical and general methodology; independent research; General Examination; dissertation; Final Examination. Minimum 3.00 GPA overall must be maintained; 3.0 grade required for all courses used to satisfy breadth and minor requirements. First-year requirements: Demonstrate competence in statistics and experimental design; complete two of the area breadth requirements; complete at least 3 credits of independent predoctoral research and report that research at the department's annual Research Festival.

Special Research Facilities

Facilities for research and graduate instruction include: teaching laboratories; machine, electronic, and carpentry shops; microprocessor room; animal vivarium; darkroom; remote-access console to computer center; and approximately sixty small, specialized laboratory research rooms.

Admissions Qualifications

Undergraduate degree in psychology is not required; some preparation in biological or social sciences is strongly advised. Applicants are judged on a number of criteria, often including their academic and research backgrounds, Graduate Record Examination aptitude scores, and written evaluations submitted by former professors or supervisors. Students with little training in psychology may be required to complete preliminary work in undergraduate courses. Admission of new students usually occurs in autumn quarter only. The deadline for receipt of admissions material is January 1.
Gottman, John M. * 1966; PhD, 1971, University of Wisconsin; development of children's friendships, marriage and family, observational research techniques.

Greenberg, Mark T. * 1977; PhD, 1978, University of Virginia; developmental psychopathology, attachment, dealness, prevention of violence.

Greenwald, Anthony G. * 1966; PhD, 1963, Harvard University; social cognition, attitudes, self and self-relevant memory, methodology.

Guralnick, Michael J. 1966; PhD, 1967, Lehigh University; developmental disabilities, peer relations, social and language development, evaluation systems.

Helman, Julia R. * 1960; (Adjunct); PhD, 1975, State University of New York (SUNY), Syracuse; sexuality and sexual relationships, prevention and treatment of family abuse.

Horst, A. Paul 1947, (Emeritus); PhD, 1931, University of Chicago; prediction of personal adjustment factor analysis, measurement techniques.

Hunt, Earl B. * 1966; PhD, 1960, Yale University; human and artificial intelligence, computer applications in teaching.

Jacobson, Neil S. * 1975; PhD, 1977, University of North Carolina; behavior marital therapy, depression, family therapy.

Keating, John P. * 1972; (Affiliate); PhD, 1972, Ohio State University; social psychology, media effect on attitude, psychology and religion, emergency behavior psychology.

Kiyak, H. Asuman * 1972; (Adjunct); PhD, 1977, Wayne State University; health psychology, gerontology, geriatrics, environmental psychology.

Kuhl, Patricia K. * 1976; PhD, 1973, University of Minnesota; speech perception.

Linehan, Marsha M. * 1977; PhD, 1971, Loyola University (Chicago); personality disorders, including borderline; suicidal behaviors, cognitive and behavior therapies.

Lockard, Joan S. * 1962; PhD, 1963, University of Wisconsin; primate social behavior, animal behavior, sociobiology, human ethology, neurobehavior.

Lotus, Elizabeth F. * 1973; PhD, 1970, Stanford University; cognition, long-term memory, eye-witness testimony, psychology and law.

Lotus, Geoffrey R. * 1972; PhD, 1971, Stanford University; visual information processing/memory, statistics, quantitative methods.

Loh, Wallace * 1974; (Adjunct); PhD, 1971, University of Michigan; contracts, criminal procedure, social science and the courts.

Lunneborg, Clifford E. * 1965; (Emeritus); PhD, 1959, University of Washington; psychometrics, multivariate models, individual differences in cognition.

Marlatt, G Alan * 1972; PhD, 1968, Indiana University; health psychology and addictive behaviors (relapse prevention and harm reduction).

Marin, Joan C. * 1972; (Adjunct); PhD, 1965, Florida State University.

McMahan, Robert J. * 1967; PhD, 1979, University of Georgia; developmental psychopathology, behavioral assessment, family interaction, pediatric psychology.

Meitzoff, Andrew N. * 1977; PhD, 1976, Oxford University (UK); development of human infants.

Mitchell, Terence R. * 1969; PhD, 1969, University of Illinois; organizational behavior.

Nelson, Thomas O. * 1971; PhD, 1970, University of Illinois; human memory, metacognition, research methodology, philosophy of science.

Robinson, Nancy M. * 1969; (Adjunct); PhD, 1958, Stanford University; psychology.

Rubel, Edwin W. * 1986; (Adjunct); PhD, 1969, Michigan State University; developmental neurobiology, with special emphasis on vertebrate auditory system development.

Sackett, Gene P. * 1970; PhD, 1963, Claremont Graduate School; primate behavior, early experience and development.

Sarason, Barbara R. * 1976; (Research); PhD, 1956, Indiana University; social support, stress, anxiety, cognitive coping skills, personality variables.

Sarason, Irwin G. * 1956; PhD, 1955, Indiana University; personality, social support, stress and anxiety.

Sax, Gilbert * 1965; PhD, 1958, University of Southern California; measurement, statistics and research design.

Simpson, John B. * 1975; PhD, 1973, Northwestern University; neural and endocrine controls of body fluid homeostasis, behavioral endocrinology.

Smith, Moncrieff H. * 1949; (Emeritus); PhD, 1947, Stanford University; psychophysiology, pathology of human memory, biological motivation.

Smith, Ronald E. * 1969; PhD, 1968, Southern Illinois University; clinical, personality, sport psychology.

Smoll, Frank L. * 1975; PhD, 1970, University of Wisconsin; developmental kinesiology, children's sports, sport psychology, behavioral assessment of coaches.

Streselguh, Ann P. * 1963; (Adjunct); PhD, 1964, University of Washington; psychology.

Strother, Charles R. 1947; (Emeritus); PhD, 1935, University of Iowa; mental retardation, psychopathology, speech pathology.

Teller, Davida Y. * 1965; PhD, 1965, University of California (Berkeley); vision, psychophysics, development of vision.

Teri, Linda 1984; (Adjunct); PhD, 1980, University of Vermont; clinical psychology.

Townes, Brenda D. * 1961; (Adjunct); PhD, 1970, University of Washington; psychology.

Vitallano, Peter P. * 1978; (Adjunct); PhD, 1975, Syracuse University.

Vitalino, Michael V. * 1982; (Adjunct); PhD, 1980, University of Washington; behavioral medicine, principles of behavioral sciences applied to medical research and practice.

Weinstein, Philip * 1972; (Adjunct); PhD, 1971, University of Kentucky; dental behavioral science, treatment and prevention of fear and pain, clinical assessment.

Westrum, Lesnick E. * 1966; (Adjunct); MD, 1963, University of Washington; neuroanatomy, synapsiology, plasticity, olfactory and trigeminal systems, dental pathways.

Woods, Stephen C. * 1972; PhD, 1970, University of Washington; physiological and conditioned drug effects, neural control of endocrine systems.

Associate Professors

Armstrong, Hubert E. 1966; (Adjunct); PhD, 1963, Syracuse University; clinical psychology.

Baer, John S. * 1986; (Research); PhD, 1966, University of Oregon; clinical psychology, addictive behaviors, early intervention.

Beil, Cecil H. Jr. * 1968; (Adjunct); PhD, 1970, Boston University; organizational behavior and administrative theory.

Brenowitz, Eliot A. * 1987; PhD, 1982, Cornell University; animal behavior, neuroethology, neuroendocrinology, animal communications.

Broedel, John W. * 1967; (Emeritus); EdD, 1968, University of Illinois; counseling, early adulthood, object relationship theory.

Brown, Jonathon D. * 1989; PhD, 1988, University of California (Los Angeles); self-enhancement processes and psychological adjustment; stress, self-concept, and physical health.

Buck, Steven L. * 1979; (Research); PhD, 1976, University of California (San Diego); psychophysiology of color vision and rod-cone interactions, perception, human and animal learning.

Burns, Edward M. * 1984; (Adjunct); PhD, 1977, University of Minnesota; psychoacoustics.

Cauce, Ana Mari * 1986; PhD, 1984, Yale University; social support and networks, at-risk adolescents, community psychology, minority populations.

Clutterbaugh, Kenneth C. * 1986; (Adjunct); PhD, 1986, (Adjunct); MDD, 1968, University of California (Los Angeles); psychology, science, modern philosophy, social philosophy.

Culbert, Sidney S. * 1947; (Emeritus); PhD, 1950, University of Washington; perception, psycholinguistics, intercultural communication.

Curry, Susan J. * 1987; (Adjunct); PhD, 1981, University of New Hampshire; health behavior change.

Dong, Willie K. * 1976; (Adjunct Research); PhD, 1974, University of California (San Francisco); function and structure of neural pain mechanisms and pain behavior.

Douglas, Robert J. * 1966; PhD, 1964, University of Michigan; neuropsychology of learning and memory, aging and inhibition.

Fitts, Douglas A. * 1981; (Research); PhD, 1978, Washington State University; neuroanatomical and neuroendocrinological substrates of thirst and hydromineral homeostasis.

George, William H. * 1990; PhD, 1982, University of Washington; alcohol effects on social/sexual behavior, treatment and cultural issues in addiction.

Gilmore, Gerald M. * 1973; (Affiliate); PhD, 1970, Michigan State University; measurement theory, assessment of student performance, program evaluation.

Kenney, Nancy J. * 1976; PhD, 1975, University of Virginia; neural and endocrine controls of food and fluid intake, physiological basis of motivation.

Kerr, F. Beth * 1974; PhD, 1974, University of Oregon; cognition, human motor control and learning, attention.

Kivlahan, Daniel R. * 1984; (Adjunct); PhD, 1983, University of Missouri; evaluating assessment, prevention, and treatment approaches for addictive behaviors.

Kohlenberg, Robert J. * 1968; PhD, 1968, University of California (Los Angeles); clinical behavior modification, learning, clinical psychophysiology, behavioral medicine.

Lee, Thomas W. * 1983; (Adjunct); PhD, 1984, University of Oregon; administrative theory and organizational behavior, human resources management.

Miyanoto, John M. * 1984; PhD, 1985, University of Michigan; mathematical models of mental processes, inductive reasoning and decision making.

Morrison, Diane M. * 1980; (Adjunct Research); PhD, 1982, University of Washington; sexual decision-making, attitudes and behavior, teen pregnancy.

Rose, Richard M. * 1966; (Emeritus); PhD, 1964, University of Pennsylvania; stochastic models, psychophysiology, sleep.

Speltz, Matthew L. * 1981; (Adjunct); PhD, 1980, University of Missouri; developmental psychotherapy, family therapy, pediatric behavioral medicine.

Spiker, Susan J. * 1983; (Adjunct Research); PhD, 1982, Cornell University; developmental psychology, infant security.

Thompson, Leigh L. * 1988; PhD, 1988, Northwestern University; social psychology, negotiation, interpersonal decision making, social cognition.
Assistant Professors
Barrett, Kimberly 1990, (Research); EdD, 1990, University of San Francisco; adolescent substance abuse, child development, parent education.

Bowen, Deborah J. * 1986, (Affiliate); PhD, 1986, Uniformed Services University of the Health Sciences; health psychology.

Corina, David F. * 1993, PhD, 1991, University of California (San Diego); cognitive neuropsychology of language, neural mediation of signed and spoken language.

Duncan, Samuel Wayne * 1988; PhD, 1984, University of Minnesota; child clinical and developmental psychology; children's emotional development; family interaction.

Ginzori, Angela B. * 1981, (Adjunct); PhD, 1979, Fordham University; violence against women, sexual harassment; racial identity, especially among Latinas.

Gonzalez, Richard D. * 1990, PhD, 1990, Stanford University; math modeling, judgement and decision making, statistics, group processes.

Miller, Margaret A. 1990, (Adjunct); PhD, 1984, University of Washington.

O'Bear, Jaime F. * 1990, PhD, 1984, University of California (Berkeley); visual system; anatomy and physiology; comparative and developmental studies.

Osterhout, Lee E. * 1991; PhD, 1990, Tufts University; psycholinguistics, particularly the cognitive and neural systems underlying language.

Ramsay, Douglas S. * 1985, (Adjunct); DMD, 1983, University of Pennsylvania; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry.

Senior Lecturers
Fagan, Corey 1989; PhD, 1987, University of Massachusetts; clinical psychology, individual and family therapy for adults and adolescents.

McDermott, Lois J. 1984; PhD, 1979, University of Chicago; human sexuality and clinical psychology.

Passer, Michael W. * 1977; PhD, 1977, University of California (Los Angeles); social psychology of sport and motor behavior.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
PSYCH 101 Psychology as a Social Science (5) &S McDermott, Osterhout, Passer Examine behaviors from a social science viewpoint. Emphasizes human social behavior and influence, personality, learning, behavior disorders, and treatment. Includes related aspects of cognition, states of consciousness, motivation and emotion, perception, development, biological influences, and research methods. Offered: AWSpS.

PSYCH 102 Psychology as a Natural Science (5) NW Bernstein, Douglas, Sackett Behavior from a biological-science viewpoint. Emphasizes sensation and perception, brain and behavior, evolution, and animal behavior. Includes related aspects of cognition, behavior disorders, states of awareness, motivation and emotion, learning, development, and research methods. Offered: AWSpS.

PSYCH 200 Comparative Animal Behavior (5) NW Barash, Beecher, Bronzowitz Research methods and findings of comparative animal behavior and their importance to an understanding of human behavior; rationale for study of behavioral differences and similarities between animal species, behavior viewed as part of the adaptation of each species to its natural habitat. Prerequisite: 102 or BIOL 201. Offered: AWSpS.

PSYCH 201 Human Performance Enhancement (3) &S, Smith Small Applications of psychological theories, research, and intervention strategies to performance enhancement in a variety of settings. Self-regulatory models and techniques; stress and emotional control; attention control and concentration; mental rehearsal; time management; goal-setting; memory enhancement; communication and interpersonal conflict resolution. Participation in various psychological training procedures. Prerequisite: 101 or 102.

PSYCH 205 Introduction to Personality and Individual Differences (4) &S Cauce, Linehan, Marlatt, Smith Basic concepts, methods, and background for more intensive study, Prerequisite: 101 or 102, or equivalent. Offered: AWSpS.

PSYCH 206 Psychosocial Aspects of Nuclear War (3) &S Barash Introduction to basic issues of nuclear war, including its effects, weaponry, and history of the arms race. Primary focus on the psychologic underpinnings of deterrence, relations between nations, and the personal and social forces operative in the arms race and peace movement.

PSYCH 207 Psychology of Peace (5) &S Barash Examination of the psychological aspects of peace in the modern world. Topics include theories of individual aggressiveness and violence, leadership personalities, crisis decision making, nuclear psychology, images of the enemy, and psychological opportunities and obstacles to the establishment of a peaceful society. Offered: 1994; A.

PSYCH 209 Fundamentals of Psychological Research (4) Buck, Kerr, Small Psychological research methodology and techniques. Topics include the logic of hypothesis testing, experimental design, fundamentals of scientific writing, research strategies and techniques, ethical issues in psychological research. Required for all psychology majors. Prerequisite: 101 or 102 or equivalent. Offered: AWSpS.

PSYCH 213 Elementary Psychological Statistics (6) GSR Phillips Statistics for psychological research. Elementary probability theory, hypothesis testing, and estimation. Satisfies the statistics requirement for majors registered in the Psychology Bachelor of Arts degree program. Prerequisite: MATH 111 or 120 Offered: AWSpS.

PSYCH 217 Introduction to Probability and Statistics for Psychology (4) GSR Flits, G. Loftus Probability theory as a model for scientific inference. Probabilistic variables and experimental outcomes, conditional probability, binomial and related distributions, experimental and clinical statistics, and sampling distributions. Prerequisites: 209 and MATH 157 or 124, or permission of instructor. Offered: AWSpS.

PSYCH 218 Statistical Inference in Psychological Research (4) GSR Flits, G. Loftus, Nelson Hypothesis testing and its probabilistic and statistical basis. Development and application of statistical inference techniques employed in psychological research: t-test, analysis of variance, correlation and regression, and nonparametric statistics. Nature and conduct of experimental and inferential error in research. Required for majors in the psychology Bachelor of Science degree program or in the psychology honors or distinction programs. Prerequisite: 217, Offered: AWSpS.

PSYCH 222 Survey of Physiological Psychology (3) NW Douglas, Olaveiras, Woods The nervous system and how it works. Learning, memory, sleep, the senses, and the emotions. For students who do not intend to specialize in physiological psychology. Prerequisite: major standing in biological science or either 101 or 102. Offered: AWSpS.

PSYCH 231 Laboratory In Human Performance (3) &S Hunt Selected aspects of human learning, perception, and performance. Prerequisites: 209 and 213 or 217. Offered: AWSpS.

PSYCH 232 Laboratory In Animal Learning (3) NW Buechel Selected aspects of animal learning emphasizing operant techniques with the rat. Prerequisite: 209. Offered: AWSpS.

PSYCH 233 Laboratory In Animal Behavior (5) NW Barash Experience with a variety of animal species and experimental procedures and instrumentation. Prerequisites: 101 or 102, 209, and 200 or BIOL 202, or equivalents. Offered: AWSpS.

PSYCH 240 Behavior Modification (4) &S, Jacobson, Kohnenburg, Linehan, Marlatt, R. Smith Survey of behavior modification for students who plan careers in human services. Behavioral approach and associated research on such topics as sexual dysfunction, stress, athletic performance, phobias, and selected aspects of animal learning emphasizing operant techniques with the rat. Prerequisite: 209. Offered: AWSpS.

PSYCH 250 Racism and Minority Groups (4) &S Barrett Overview of the causes, contexts, and consequences of racism and its effects upon minority groups and society. Emphasis on historical, cultural, politi-
through adolescence with emphasis on relations between biophysical and psychosocial development of children and youth. Prerequisite: 101 or 102 or equivalent. Offered: W-E 206.

PSYCH 322  Introduction to Drugs and Behavior (3) NW Diaz Basic concepts of drug action emphasizing the behavioral and physiological effects of the intake of a variety of drugs. Prerequisite: 222. Offered: Sp.

PSYCH 333  Sensory and Perceptual Processes (4) NW Beecher, Buck, Olavera Perception and processing by each of the senses with emphasis on behavioral studies and their relationship to underlying structure. Prerequisite: 101 or 102 or equivalent, or permission of instructor.

HUMAN FACTORS

PSYCH 335  Human Factors Psychology (4) I&S Kerr Consideration of human performance factors in the design of tools/equipment, tasks/jobs, and work and living environments. Emphasis on the importance of human perception, memory, attention, and motor control for understanding ways to optimize the relationship between people and technology. Prerequisite: 101 or 102 or 209 or equivalent.

PSYCH 345  Social Psychology (5) I&S Brown, Greenwald, Thompson Effects of the social environment upon the formation of individual attitudes, values, and beliefs, and upon individual and group behavior; major theoretical approaches; field and experimental research findings. Prerequisite: 101 or 102, or equivalent.

PSYCH 347  Psychology of Language (5) VLPA/ I&S Dale, Corina, Oosterhout Introduction to the study of language, including language structure, speech perception, language acquisition, psychological processes underlying and related to development of language, the relation between brain and language, and the question of the species-specificity of human language. Prerequisites: 101 or 102 or LING 200 or 201. Offered: jointly with LING 347.

PSYCH 350- Honors Research Seminar In Psychology (2-, max. 6) Teller Presentations by professors and advanced honors or distinction students concerning the rationale, methodology, and progress of their research projects. Required quarterly for all junior honors and distinction candidates in conjunction with 398 and 498. Graded on the basis of departmental honors advisor, offered: AASP.

PSYCH 354  Introduction to Cognitive Science (5) I&S/NW Hunt Discusses and compares approaches to cognition taken by psychology, computer science (artificial intelligence), philosophy, linguistics, and anthropology. Relevant basic material in the neurosciences also presented. Prerequisite: Introductory course in one of the disciplines listed above.

PSYCH 355  Survey of Cognitive Psychology (5) I&S Hunt, E. Loftus Current theory and research in perception, attention, memory and learning, attitudes, thinking and decision making, and language. For the student who wishes a survey or who intends additional work in any of the above content areas. Prerequisite: 101 or 102.

PSYCH 357  Psychobiology of Women (5) NW Kenney Physiological and psychological aspects of women's lives; determinants of biological sex; physiological and psychological events of puberty; menopause; sexuality; pregnancy, childbirth, and lactation; role of culture in determining psychological response to physiological events. Prerequisite: 101 or 102 or 257 or WOMEN 257 or WOMEN 200. Offered: jointly with WOMEN 357; W.

PSYCH 361  Laboratory in Social Psychology (5) I&S Greenwald Methods of systematic observation, content analysis, and field research on social behavior; individual research projects. Prerequisites: 345 and either 213 or 217, any of which may be taken concurrently. Offered: AWSp.

experimental research and basic theories primarily in animal learning. Prerequisite: 101 or 102.

PSYCH 403  Motivation (5) I&S/NW Theory and research on reinforcement, punishment, frustration, preference, instinctual mechanisms, and other factors controlling animal behavior. Prerequisite: 101 or 102.

PSYCH 405  Advanced Personality: Theory and Research (5) I&S B. Sarason, J. Sarason Intensive survey of theoretical concepts and detailed review of experimental methods and experiments in the field of personality. Prerequisite: 305 or equivalent.

PSYCH 407  History of Psychology (5) I&S Historical and theoretical background of the basic assumptions of modern psychology, including such doctrines as behaviorism, determinism, and the scientists who developed them. Prerequisite: 400 or equivalent.

PSYCH 408  Mechanisms of Animal Behavior (4) NW Beecher, Borenzwe Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisites: 200 or BIOL 101 and 102 or permission of instructor. Offered: jointly with ZOOL 408.

PSYCH 409  Sociobiology (4) NW Beecher, Rohwer Biological bases of social behavior, emphasizing evolution as a paradigm: individual versus group selection, kin selection, altruism, group versus individual living, mating systems, parental care of offspring, and competitive strategies. Prerequisites: 200 or BIOL 202 and 203, or equivalent. Offered: jointly with ZOOL 409.

PSYCH 410  Child and Adolescent Behavior Disorders (5) I&S Duncan, McMahon Introduction to psychopathology in children and adolescents, and an overview of principal modes of intervention. Particularly students interested in advanced work in clinical psychology, social work, or special education. Prerequisites: 305, 306, or equivalents.

PSYCH 411  Perceptual Development (5) I&S/NW Melzoff Origins and development of perception; nature-nurture controversy applied to perceptual development. Topics from visual, auditory, and other domains. Development of object and face perception; auditory and visual perception; speech perception; categorization; perception of three-dimensional space; cross-modal relations between vision, audition, and touch. Prerequisite: 306 or 414 or at least one course in speech and hearing sciences. Offered: jointly with SPHSC 411.

PSYCH 413  Developmental Psychobiology (3) BW Bernstein Neural basis of behavioral development in normal and abnormal manifestations; relationship between structure and function in the nervous system; brain development and effects of prenatal and postnatal experiences on the brain and behavior. Prerequisite: 222 or 421 or 422 or equivalent.

PSYCH 414  Cognitive Development (5) I&S Dale Key theoretical approaches to cognitive development from infancy through adolescence. Object permanence, language development, imitation, logical reasoning, memory, intelligence, and educational implications. Prerequisites: 305 or 401.

PSYCH 415  Personality Development of the Child (5) I&S Greenberg Socialization theory and research, infant attachment and social relationships, development of aggressive and altruistic behaviors, sex-role development, moral development, parent and adult influences. Applied issues in social development and policy. Prerequisite: 306.

PSYCH 416  Animal Communication (5) NW Beecher: Brunowitz Evolution and mechanisms of animal communication and related processes of perception, thinking, and social behavior. Prerequisite: 200 or 233 or 10 credits in biology or zoology.

PSYCH 417  Human Behavior as a Natural Science (5) I&S/NW Lockard Evolution of human social behavior and the adaptive significance of communication systems from a sociobiological and anthropological perspective. Prerequisite: 101 or an introductory zoology or anthropology course.

PSYCH 418  Primate Social Behavior (5) NW Lockard Social behavior, ecology, and group structure of monkeys and apes from an evolutionary, sociobiological, and anthropological perspective. Prerequisite: 101 or an introductory zoology or anthropology course.

PSYCH 419  Behavioral Studies of Zoo Animals (5, max. 10) NW Lockard Observational studies of behavior of zoo animals to expand basic knowledge of animal behavior, conservation of endangered species, and research methodology with discussions and tours of Woodland Park Zoo. Offered in cooperation with Woodland Park Zoo. Recommended: 200 or 231, 232, 233; or 361; or 361.

PSYCH 420  Drugs and Behavior (3) NW Diaz Animal and clinical research on the behavioral consequences of drug intake. Prerequisite: 322 or permission of instructor.

PSYCH 421  Neural Basis of Behavior (5) NW Diaz Anatomical and physiological principles and resultant behavior involved in the integrative action of the nervous system. Prerequisites: 101 or 102, and 10 credits in biology or zoology.

PSYCH 422  Physiological Psychology (5) NW Douglas Physiological mechanisms in behavior, including those basic to emotion, fatigue and sleep, learning, and memory. Prerequisite: 101 or 102, or equivalent.

PSYCH 423  Sensory Basis of Behavior (5) NW O'Leary Study of sensory mechanisms as a way to understand behavior. Basic properties of neurons, anatomy, and physiology of sensory systems, with some emphasis on the visual system. Prerequisite: 222 or 333 or permission of instructor.

PSYCH 424  Vision and its Physiological Basis (5) NW Teller Phenomena of human vision: color vision, acuity and spatial vision, light and dark adaptation, visual development. Correlation of human visual functioning with known optical, biochemical, physiological, and anatomical substrates. Recommended: some background in physical or biological sciences or engineering. Offered: jointly with PSY 424.

PSYCH 425  Surgical and Histological Techniques (5) NW Woods Practicum in basic and advanced surgical and histological techniques used in psychophysiological experimentation. Prerequisites: 421 and permission of instructor.

PSYCH 427  Behavioral Endocrinology (5) NW Woods The endocrine system and how its secretions influence and are influenced by behavior; relationships between the nervous and endocrine systems. Prerequisites: 421 and two quarters of zoology, or permission of instructor.

PSYCH 428  Human Motor Control and Learning (5) I&S/NW Kerr Current theory and research in human motor performance and skill acquisition. Prerequisite: 101 or 102 or equivalent. Offered: W.

PSYCH 429  Brain Anatomy for the Behavioral Scientist (1) NW Diaz Detailed review of the neuroana-
tomical features of the sheep brain with laboratory demonstrations. Prerequisites: 421 or equivalent, or concurrent registration in 421; and permission of instructor.

PSYCH 431 Neural Basis of Behavior (5) NW Diaz Anatomy and physiological mechanisms in behavior, including those basic to emotion, facias, and sleep, learning, and memory. Prerequisite: 421.

PSYCH 433 Regulatory Behavior (4) NW Neural and endocrine mechanisms in the control of food and water intake and the regulation of body weight and fluid balance. Prerequisite: 421 or 427 or permission of instructor.

PSYCH 434, 435 Laboratory in Vision (2,3) NW Buck Techniques of research in visual psychophysics: alignment and calibration of basic optical systems; replication of some classical vision experiments and/or design and completion of original vision experiments. Prerequisites: 424 and permission of instructor for 434; 434 and permission of instructor for 435.

PSYCH 436 Developmental Aspects of Sport Competition (4) I&S Smol Reciprocal effects of interpersonal and group influence processes. Social facilitation, behavior modification, observational learning, individual versus group performance, group cohesion, leadership, aggression. Prerequisite: 101.

PSYCH 440 Environmental Psychology (3) I&S Research and methods of environmental psychology; development of research strategies to study psychological implications of environmental issues. Prerequisites: 101 or 102, and 345, or equivalent.

PSYCH 441 Perception Processes (5) I&S/NW Theory and findings in perception with a focus on visual perception in humans. Discrimination and constancy for simple judgments, segregation and identification of visual objects, and specific areas of investigation such as: color, and computer vision. Prerequisite: 333 or equivalent.

PSYCH 445 Theories of Social Psychology (5) I&S/ Brown, Gonzalez, Thompson Evaluation of the major theories of human social behavior supported by the empirical literature; theories of social cognition and thought; major theories of social interaction, group processes, and social learning. Prerequisites: 345 or equivalent.

PSYCH 446 Objective Assessment of Personality (3) I&S R. Smith Measurement of personality variables in personality research, social psychology, and clinical psychology. Theoretical conceptions underlying various clinical and experimental scales and an assessment of their construct validity and behavioral correlates. Planning of research involving the use of objective measures of personality.

PSYCH 447 Psychology of Language II (4) VLPK/ I&S Osterhout Psychological principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisites: 101 or 102 or equivalent. Offered: jointly with LING 447.

PSYCH 448 Seminar in Psychology (1-15) Selected research topics of contemporary interest. Quarterly listings of specific offerings are available at departmental advisory office. Prerequisites: some sections require major standing or permission of instructor. Offered: AWP.

PSYCH 449 Organizational and Industrial Psychology (3) I&S Fiedler Research and methods in industrial-social psychology; application of social psychology to the understanding and management of organizational phenomena. Prerequisite: one course in elementary statistics or equivalent.

PSYCH 450- Honors Research Seminar in Psychology (2-5, max. 6) Taller Design, execution, and writing of honors thesis, supervised by faculty sponsor and committee. Open to all senior honors and distinction candidates in conjunction with 498 and 499. Prerequisite: permission of departmental honors adviser. Offered: AWP.

PSYCH 451 Health Psychology (5) I&S/NW Bowen Overview of the psychological and behavioral factors in health and disease. Includes research on both psychological causes and treatments. Topics include stress, risky behaviors, patient-provider interactions, pain, behavioral/medical treatments, and lifestyle interventions. Prerequisites: 101 or 102 or equivalent; 209 or equivalent; one from 205, 222, 306, and 345.

PSYCH 452 Psychology of the Self-Concept (4) I&S Brown Examines psychological theory and research on the self-concept and self-regulation behavior. Topics include the development of the self-concept; self-awareness; and self-esteem maintenance. Prerequisites: 345; upper division or graduate standing.

PSYCH 453 Interpersonal Conflict and Negotiation (3) I&S Thompson Examination of the origins, nature, and consequences of interpersonal conflict. Focuses on social psychological theory and empirical research in the areas of social conflict, negotiation, and bargaining. Examines the role of motivation, cognition, and social relationships on behavior in interpersonal conflict. Prerequisites: 209 and 345 or permission of instructor.

PSYCH 455 Developmental Social Psychophysiology (2-5) I&S/NW Gottman Fundamentals of psychophysiology, emotion, and social interaction in developmental research. Laboratory and lectures emphasize skills in the study of basic biological processes in the social context of the developing person. Prerequisites: 101 or 213, 306, 422, upper-division standing, or permission of instructor.

PSYCH 457 Language Development (4) VLPK I&S Dale, McKee First-language acquisition and use by validity of techniques for assessment, biological and research techniques. Prerequisite: 306 or LING 400. Offered: jointly with LING 457.

PSYCH 463 The Pathology of Human Memory (5) NW Effects of brain damage on human memory; comparison of observed kinds of losses with current theories of memory; amnesia and other impairment of intellectual functions (aphasia, agnosia, apraxia) as they relate to memory. Prerequisite: 421. Recommended: 461 or 462.

PSYCH 465 Intelligence in Psychology (3) I&S Hunt Historical and contemporary treatments of the concept of intelligence by psychology, evolution and development, measurement, and implications of intelligence in assessment, intelligence and personality, experimental and psychological indicators of the future role of intelligence in psychology. Prerequisite: 15 credits in psychology, including one statistics course.

PSYCH 466 Psychology of Judgment and Decision Making (5) I&S Gonzalez Miyamoto Human information processing in judgment and decision making, especially the interface between cognitive theories and normative and prescriptive theories of decision making. Prerequisites: introductory statistics and either 209, 231, 355, or 361 or permission of instructor.

PSYCH 467 Eyewitness Testimony (3) I&S E. Loftus Perception, memory, and retrieval of real world events. Prerequisite: psychology majors as expert witnesses regarding eyewitness accounts. Prerequisites: introductory psychology plus eight additional credits in psychology.

PSYCH 468 Information Processing (4) I&S Hunt Human thought as a phenomenon to be described by formal models. Current theories and experimental studies of rational information processing; emphasis on how man notices, recognizes, remembers, and recalls information used in rational problem solving; theoretical models of attention, memory, and recall; cognitive models of rational problem solving. Prerequisite: 231 or 355, or equivalent.

PSYCH 469 Psychology of Reasoning (4) I&S Miyamoto Cognitive processes in deductive and inductive reasoning and in problem solving. Relations between descriptive and normative theories of inference. Prerequisites: introductory statistics and either 251, 354, or 355 or graduate standing.

PSYCH 489 Clinical Psychology (3) I&S Basic issues, methods, and research professional issues, psychological assessment, and approaches to psychotherapy and behavioral change. Prerequisites: 205 and 305, and upper-division major standing.

PSYCH 490 Stress Management (3) I&S/NW Nature of stress. Physiological responses to stress and relaxation. Techniques of stress management with training in relaxation, biofeedback, meditation, cognitive restructuring, exercise, nutrition, interpersonal communication skills, and time management. Credit/no credit only. Prerequisite: 101 or 102 or equivalent.

PSYCH 495 Introduction to Law: A Social Science Perspective (4) I&S/Loth Uses and limits of social science in the legal decision-making process and the fact-finding process at trial. Critical perspectives on the role of social science, especially social psychology, in adjudication. Instruction by use of case method, Socratic questioning, and discussion. Readings in judicial opinions, jurisdictional essays, and empirical research reports. Prerequisite: upper-division or graduate standing. Offered: jointly with LAW 495.

PSYCH 496 Undergraduate Teaching Experience in Psychology (2-3, max. 6) Students are trained as assistants in quiz sections or as supplemental tutors for undergraduate psychology courses. Designed especially for those students planning graduate work or education certification. Prerequisites: upper division major standing and permission of instructor.

PSYCH 497 Undergraduate Fieldwork (1-3, max. 18) Individual consultation with faculty member and supervised practicum experience in a broad range of community settings and laboratory settings with psychological problems. An overall maximum of 18 credits in 497, 498, and 499 may apply toward a baccalaureate degree. Prerequisites: junior or senior major standing and permission of instructor.

PSYCH 498 Directed Reading in Psychology (1-3, max. 18) Readings in special interest areas under supervision of departmental faculty. Discussion of reading in conference with the instructor. An overall maximum of 18 credits in 497, 498, and 499 may apply toward a baccalaureate degree. Prerequisite: permis-
sion of a supervising psychology faculty member. Offered: AWSPS.

PSYCH 499 Undergraduate Research (1-3, max. 18) Design and completion of individual research projects. An overall maximum of 18 credits in 497, 498, and 499 may apply toward a baccalaureate degree. Prerequisites: 213 or 417, and permission of a supervising psychology faculty member. Offered: AWSPS.

Courses for Graduates Only

PSYCH 500 Laboratory in Statistical Computation I (2) Miyamoto Techniques of computing using statistical software on personal computers. Organization of data files, transformations of variables, graphical representations of data, descriptive statistics, elementary inferential statistical analyses. Prerequisite: concurrent enrollment in 513 or permission of instructor.

PSYCH 501 Laboratory in Statistical Computation II (2) Gonzalez Techniques of statistical computation using statistical software on personal computers and mainframe computers. Multiple regression, analysis of variance and covariance, frequency distributions, and confidence intervals. Data analytic diagnostics for violations of assumptions. Prerequisites: 500 and 513, concurrent enrollment in 514, or permission of instructor.

PSYCH 508 Advanced Social Psychology (4) Brown Historical overview of the fundamental principles underlying social psychological research on attitudes, interpersonal perception, and social relations; small-group and leadership processes; attribution theory. Open to advanced undergraduates with permission of instructor. Prerequisites: 213 and 445 or equivalent and some background in social science.

PSYCH 504 Biological Bases of Development (4) Bernstein Embryological, genetic, physiological, and evolutionary perspectives of human development; biological development in infancy; sensory development and its influence on the development of perception; primate models for human development. First quarter of a three-quarter sequence required for graduate majors in developmental psychology. Prerequisite: graduate standing or permission of instructor.

PSYCH 505 Early Cognitive and Linguistic Development (4) Metzoff Focus on the origins and early development of thought and language. Piagetian theory and many of its revisions of it emphasized. In-depth examination of historical and philosophical bases for current empirical research. Second quarter of a three-quarter sequence, required for graduate majors in developmental psychology. Prerequisite: graduate standing or permission of instructor. Offered: W.

PSYCH 506 Personality and Social Development (4) Greenberg Theories and empirical literature in personality and social development throughout infancy, childhood, and adulthood. Third quarter of a three-quarter sequence required for graduate majors in developmental psychology. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

PSYCH 507 Developmental Psychology: Historical and Philosophical Perspectives (4) Metzoff Origins and development of developmental psychology and the philosophy of science. Prerequisite: graduate standing in psychology or permission of instructor.

PSYCH 508 Research Methods in Social Psychology (4, max. 6) Greenwald Examination of methodological, practical, and communication problems associated with research on human behavior. Topics include: selecting research problems, use of theory, types of validity, common sense about statistics, when to replicate, dealing with unpredicted results, strategies for presentation and publication. Prerequisite: graduate standing or permission of instructor.

PSYCH 509 Leadership and Organizational Effectiveness (3) A critical evaluation of current theories of leadership and management for selection, assessment, performance, evaluation, training, task design, and the management of groups and organizations. Prerequisite: 213 or equivalent course in statistics; advanced undergraduates by permission of instructor.

PSYCH 510 Advanced Attitude Theory (5) Greenwald Theoretical, methodological, and empirical work on the concept of attitude and its practical applications. Topics include: definition of attitude, measurement of attitudes, information processing theories, functional theories, cognitive structure theories, the self as attitude object, unconscious attitudes, and processes. Prerequisites: 444, 445, 503, and 514 or equivalent; or permission of instructor.

PSYCH 511 Personality: Motivation and Psychodynamics (3) Sarason Review of personality research. Roles of cognitive, motivational, and psychodynamic processes. Critical evaluation of current personality research as it relates to concepts of personality, its antecedents, and influences over behavior. Attention to role of personality variables in social relationships. Prerequisite: graduate or professional standing or permission of instructor.

PSYCH 512 Personality Disorders (4) Examine theoretical, research, and clinical literature on personality disorders. Critical review of current diagnostic criteria, assessment instruments, validation strategies, biological and psychological research relevant to epidemiology, longitudinal course, family genetics, developmental antecedents, correctional and therapeutic disorder treatment. Prerequisite: graduate or professional standing or permission of instructor.

PSYCH 513 Introduction to Statistics and Data Analysis (4) Miyamoto Basic concepts of statistical theory and methods of data analysis. Emphasis on the integration of statistical theory, statistical computation, and psychological research methods. Required of all first-year graduate majors. Prerequisites: 500, 513; concurrent registration in 501, or permission of instructor.

PSYCH 514 Linear Models and Data Analysis (4) Gonzalez Analysis of data in the behavioral sciences. Required of all first-year graduate majors. Prerequisites: 500, 513; concurrent enrollment in 501, or permission of instructor.

PSYCH 515 Modelling Experimental and Observational Data (4) Lunneborg An introduction to statistical modelling; interactive data analyses; use of regression, ANOVA, logistic regression, and log-linear models in explanatory studies. Prerequisite: 514.

PSYCH 516 Theory of Educational and Psychological Measurement (3) Sax Theory of measurement; examination of assumptions involved in test theory; errors of measurement, factors affecting reliability and validity, and norms and their use and development. Prerequisites: 213 or 217, and permission of instructor.

PSYCH 517 Psychophysics and Fundamental Measurement (3) Application of measurement theory (drawn from set theory, finite mathematics, and probability theory) in the areas of measurement and psychophysics. Open to undergraduates with permission of instructor. Prerequisite: 514 or equivalent.

PSYCH 518 Single Subject Design and Research (3) Kohlenberg Single subject designs (reversal, multiple baseline, alternating condition) and their application to clinical cases. Prerequisite: graduate major standing in clinical psychology or permission of instructor.

PSYCH 519 Statistical Methods in Longitudinal Research (3) Sackett Those aspects of statistics and experimental design unique to, or heavily used in, developmental research; behavioral observation methods, analysis of variance and nonparametric techniques, time series and survival analysis, and repeated measure techniques for studying change over time. Prerequisites: 514 or equivalent, and graduate standing.

PSYCH 520 Emotional Development (4) Duncan Current theory and research on emotional development in infants, children and adolescents. Reviews work on emotional recognition, expression, and understanding. Special emphasis on family and social influences on emotional development, as well as links to psychopathology. Prerequisite: graduate standing or permission of instructor.

PSYCH 522 Cognitive Perception (3) Loftus Current topics in perception, psychophysics, sensory memory, pattern recognition, letter and word perception, and visual masking. Prerequisites: 411 and 517, or permission of instructor.

PSYCH 523 Cognition (5) Hunt Problem solving, concept learning, individual differences in cognition, attention, and pattern recognition; computer simulation and mathematical models of cognitive phenomena. Prerequisites: graduate standing and completion of determining mathematical and statistical requirement through 514.

PSYCH 524 Cognitive Approaches to Human Memory (4) Loftus Theories and behavioral data base of perceptual memory; short-term memory; acquisition, organization, and retention of information in long-term memory; relation between reinforcement and memory. Prerequisites: 462 and 522 or equivalents.

PSYCH 525 Assessment of Intelligence (5) Duncan Current theory and research on intelligence testing; training in administration, scoring, and interpretation of major intelligence tests; ethical issues in assessment. Prerequisite: graduate major standing in child clinical or clinical psychology, or graduate minor standing in child clinical psychology.

PSYCH 526 Psychological Assessment of Children (4) Dawson Assessment techniques appropriate to children, including those for infants, special problems in preschool and school age; projective tests, family interviews, and target observational assessment; training in administration of selected techniques. Prerequisites: 525 and permission of instructor.

PSYCH 527 Psychological Assessment of Adults (4) Broedel Training in adult assessment and development of skills in administration, scoring, and interpretation of the Rorschach with some attention to other projective techniques. Prerequisites: 525 and permission of instructor.

PSYCH 530 Negotiation Research and Theory (3) Thompson Examination of social psychological theory and empirical research and social conflict, negotiation, and bargaining. Focuses on interpersonal negotiation factors such as judgment, motivation, goals, and experience that affect negotiator behavior. Critical evaluation of theories in light of current research. Prerequisites: 508 or 345 or equivalent or permission of instructor.

PSYCH 533 Teaching of Psychology (3) Passer Examine issues concerning the teaching of psychology, including goals of education, course development, instructional methods, T.A.-student and T.A.-faculty relations, grading, student diversity, and ethics. Readings and assignments are designed to enhance students' organizational, presentational, and problem-solving skills. Credit/No credit only. Prerequisite: graduate standing in the Department of Psychology.

PSYCH 534 Foundations of Psychological Research (3) Nelson Interpretation of psychological research results, related issues from the philosophy of science, and nonstatistical pitfalls in psychological
research. Prerequisite: 513, which may be taken concurrently.

**PSYCH 535 Approaches to Psychological Assessment (4)** Problem-solving approach to psychological assessment; review of psychological tests and procedures and presentation of approaches to their clinical interpretation and use. Required for all graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology.

**PSYCH 536 Behavioral Assessment (4)** Linehan Research, theory, and technique in behavioral assessment. Emphasis on assessing for change and relationship between assessment and therapy. Interviewing, observational techniques, self-monitoring, simulated environments, and physiological, self-report, and imaginal procedures. Prerequisites: clinical psychology graduate standing and permission of instructor.

**PSYCH 538 Systems of Psychotherapy (3)** George, Marlett Theory and research of major systems of psychotherapy, including the psychodynamic, behavioral, cognitive, and family systems approaches as an introduction to subsequent practica in clinical psychology. Required for all graduate students majoring in clinical psychology. Prerequisites: graduate major standing in clinical psychology and permission of instructor.

The content of each graduate seminar (numbered 540 through 560) offered by the department changes from quarter to quarter. A list of offerings is published each quarter and can be obtained from the Department of Psychology.

**PSYCH 540 Seminar In Clinical Psychology (2)** Baer, Brodell, Cauce, Dawson, Duncan, George, Jacobson, Kohlenberg, Linehan, Marlett, McMahon, Sarason, Smith Prerequisite: permission of instructor.

**PSYCH 541 Seminar In Cognitive Processes (2)** Hunt, E. Lofthus, O. Lofthus, Nelson Prerequisite: permission of instructor.

**PSYCH 542 Seminar In Animal Behavior (2)** Barash, Beecher, Borenzweig, Lockard Prerequisite: permission of instructor.

**PSYCH 543 Seminar In Developmental Psychology (2)** Dale, Greenspan, Metzloff, Sackett Prerequisite: permission of instructor.

**PSYCH 544 Seminar In Motor Control (2)** Kerr, Small Variable topics address neural, developmental, and behavioral processes underlying motor behavior. Prerequisite: permission of instructor.

**PSYCH 545 Seminar In Learning (2)** Prerequisite: permission of instructor.

**PSYCH 547 Seminar In Motivation (2)** Prerequisite: permission of instructor.

**PSYCH 548 Seminar In Perceptual Processes (2)** Prerequisites: 441 and permission of instructor.

**PSYCH 549 Seminar In Physiological Psychology (2)** Bernstein, Diaz, Douglas, Kenney, Simpson, Teller, Woods Prerequisite: permission of instructor.

**PSYCH 550 Seminar In Psychopathology (2)** Dale, Osterhout Prerequisites: 447 and permission of instructor.

**PSYCH 551 Seminar In Psychophysics (2)** Teller Prerequisite: permission of instructor.

**PSYCH 552 Seminar In Quantitative Techniques (2)** Hunt, Luneberg, Nelson, Rose Prerequisite: permission of instructor.

**PSYCH 553 Seminar In Social Psychology (2)** Brown, Gonzalez, Greenwald, Keating, Thompson Prerequisite: permission of instructor.

**PSYCH 554 Seminar In Decision Processes (2)** Gonzalez, Miyamoto Prerequisite: permission of instructor.

**PSYCH 555 Seminar In Metacognition (2)** Nelson Prerequisite: permission of instructor.

**PSYCH 559 Seminar In Current Research In Vison (1)** Teller Prerequisite: permission of instructor.

**PSYCH 560 Seminar (* max. 30) Prerequisite: permission of instructor. Offered: AWSpS.

**PSYCH 570 Child Clinical Psychology (4)** Duncan Issues and content of child clinical psychology, promotion of student's beginning work in research. Prerequisite: graduate major or minor standing in child clinical psychology.

**PSYCH 571 Child Psychopathology (5)** McMahon Broad survey of major categories of child and adolescent disorders. Emphasis on scientific, empirical approach to description, classification, and research literature on these disorders. Required for all graduate students majoring in child clinical psychology. Prerequisite: graduate major standing in clinical psychology or permission of instructor. Offered: W.

**PSYCH 572 Approaches To Child Treatment (4)** Barret, Dawson Major approaches to child psychotherapy, including specific applications, issues in treatment, and research. Prerequisites: graduate major standing in clinical psychology or permission of instructor. Offered: Sp.

**PSYCH 574 Community Psychology (4)** Cauce Overview of key issues and concepts in the field of community psychology. History of field and overview of different models to conceptualize system-level mental health issues and delivery systems. Emphasizes theory and research rather than intervention. Prerequisite: psychology graduate student or permission of instructor. Offered: alternate years.

**PSYCH 576 Intervention Techniques With Families (3)** Theory and practice of principal methods of therapeutic intervention with families. Attention to clinical problems arising in a family context and use of family members and processes by the clinician. Prerequisites: 575, 592 and 593 or equivalent and permission of instructor.

**PSYCH 578 Affective Disorders: Theory And Research (2)** Jacobson Causes, sufferers, correlates, and consequences of affective disorders, including biological and psychosocial factors. Credit/no credit only. Required for all graduate or professional students majoring in psychological treatment or permission of instructor. Recommended: graduate course in psychopathology and personality.

**PSYCH 579 Treatment Of Affective Disorders: Methods And Evaluation (2)** Jacobson Differential diagnosis of depression and depressive subtypes; episodic mood, psychodynamic, cognitive-behavioral, and combined forms of psychological treatment of less severely incapacitated patients; biological approaches electroconvulsive therapy as alternative or adjunctive treatments in severe, psychotic, and endogenous depressions. Credit/no credit only. Prerequisites: 578, graduate or professional student standing or permission of instructor. Recommended: graduate course in psychopathology and personality.

**PSYCH 585 Research In Psychotherapy (5)** Marlett Research in psychotherapy, including process and outcome research in therapy design. Prerequisites: graduate major standing and permission of instructor.

**PSYCH 586, Clinical Personality Assessment (3)** R. Smith Use of objective personality inventories in the description of normal and abnormal personality and use of such information in case conceptualization and treatment planning. Minnesota Multiphasic Personality Inventory, Minnesota Multiphasic Personality Inventory, Million Clinical Multiaxial Inventory. Credit/no credit only. Prerequisite: clinical psychology graduate standing.

**PSYCH 587 Clinical Methods: Interviewing (2)** Fagan Provides the foundation for developing good clinical skills. Enables students to conduct an initial clinical interview and generate a diagnostic formulation, problem list, and treatment plan; assess clients for danger to themselves or others; screen clients for a history of abuse, psychosis, and gross organic impairment; and conduct a brief second year clinical psychology graduate student. Credit/no credit only. Offered: A.

**PSYCH 588 Clinical Methods: Ethics (2)** Fagan Enables students to acquire a thorough working knowledge of the American Psychological Association's Ethical Standards for Psychologists; an awareness of Washington State law as it affects psychologists; and a knowledge of how to identify and solve ethical dilemmas. Limited to and required of all second year clinical psychology graduate students. Credit/no credit only. Offered: W.

**PSYCH 589 Advanced Clinical Practicum (4)** Cauce, Dawson, Duncan, George, Jacobson, Kohlenberg, Marlett, McMahon, Ratner Supervised clinical psychology involving several individual clients. Separate consultations with instructor for intensive supervision of each case. Occasional meetings in small groups. Classroom responsibility includes discussion of case material. Assigned readings appropriate to each case with opportunities to discuss these with instructor. Prerequisites: clinical psychology graduate standing and permission of instructor. Credit/no credit only.

**PSYCH 590 Practicum In Psychological Assessment (2)** Demonstrates and practices of selected psychological testing procedures and interviewing skills. Concurrent registration in 535 required. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisites: graduate major standing in clinical or child-clinical psychology and permission of instructor.

**PSYCH 591 Issues In Clinical Psychology (1, max. 3)** Cauce Personal and professional issues in clinical psychology. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology.

**PSYCH 592 Clinical Proseminar (1, max. 3)** Introduces major theoretical areas in clinical psychology. Emphasis on applied theory. Students conceptualize a clinical case from theoretical perspective presented and develop an understanding of salient forms of intervention representative of that theoretical orientation. Limited to and required of all second year clinical psychology graduate students. Credit/no credit only.

**PSYCH 593 Clinical Colloquium and Clinic Practicum (1–6, max. 24)** Required of all clinical psychology graduate students entering the clinic. Clinical colloquium required of all second-year students, optional for others. Credit/no credit only.

**PSYCH 594 Advanced Personality Theory (5)** Linehan Conceptual models of abnormal functioning, cognition, emotion, and environment as organizers of behavior and other critical issues in personality theory. Opportunity to integrate previous courses, research, and practice, and arrive at a coherent theoretical framework. Required for graduate majors in clinical psychology. Prerequisite: graduate or professional standing or permission of instructor.

**PSYCH 595 Behavior Disorders (5)** Sarason Major types of behavior disorders, with emphasis on clinical manifestations, relevant research, and theoretical perspectives. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate major standing in clinical psychology or permission of instructor.

**PSYCH 596 Psychology Of Behavior Change (5)** Jacobson, Kohlenberg, Behavioral theory and behavioral approaches to treatment. Prerequisites: 595 and permission of instructor.
PSYCH 587 Fieldwork in Clinical Psychology (1-5, max. 30) Baer, Brodell, Cave, Dawson, Duncan, George, Jacobson, Kohlenberg, Linehan, Marriott, McMahon, N. Robinson, L. Sarason, R. Smith Prerequisites: second-year graduate major standing and permission of departmental faculty.

PSYCH 589 Directed Reading in Psychology (1-5, max. 30) Selected topics. Prerequisite: permission of a supervising psychology faculty member.

PSYCH 600 Independent Study or Research (*) Offered: AWSPs.

PSYCH 700 Master’s Thesis (*) Offered: AWSPs.

PSYCH 800 Doctoral Dissertation (*) Offered: AWSPs.

Romance Languages and Literature

C104 Padelford

The department offers a program designed to develop competence in the reading, speaking, and writing of the Romance languages (French, Spanish, Italian, Portuguese) and to study Romance literatures, culture, and linguistics.

Undergraduate Program

Adviser
C248-252 Padelford

Bachelor of Arts Degree

ADMISSION REQUIREMENTS
Spanish: SPAN 201, 202, 203, with a minimum GPA of 2.70 and no individual grade below 2.5; 10 credits English composition with a minimum 2.5 in each course.

Admission is competitive, based on the following: (1) preparation for the major as indicated by student's grades in courses required for application, (2) overall scholastic record, and (3) personal statement, in English or Spanish, of interest in and commitment to the major. Other evidence reflecting the student's interest may be appended.

Application deadline is the first Friday of autumn, winter, and spring quarters, for admission in the fifth week of the same quarter. Applicants denied admission may submit written petitions requesting reconsideration. Applications are available in C252 Padelford.

Romance Linguistics: Two college years (or equivalent) of study in each of two Romance languages.

MAJOR REQUIREMENTS
French: 54 credits beyond FREN 203. Required courses at the 300 level: FREN 301, 302, 303 (or 313), 304, 305, 306, 323. Five 400-level courses chosen to satisfy the requirements for one of two emphases: literature/culture or linguistics. Transfer credits at the 400 level are accepted only by petition to the Faculty Studies Committee.

Spanish: 55 credits in courses at the 300 and 400 levels, including SPAN 301, 302, 303, 321, 322, 323, plus two 300-level courses; 25 credits (none of which may be transfer credit) of courses numbered 400 or higher within a chosen emphasis of literature, culture, or linguistics. Students may count one course in English translation toward the major.

Italian: 50 credits in courses at the 300 and 400 levels, including ITAL 301, 302, 303; 401; 402; 403; 15 additional credits in literature courses at the 400 level. Students should consult Italian adviser about courses in translation.

Graduate Program

The Department of Romance Languages and Literature offers programs of graduate study leading to the degrees of Master of Arts and Doctor of Philosophy. Students may specialize in French, Italian, or Spanish languages and literature or in Romance linguistics or in Romance literature. The Master of Arts degree may be with thesis or without thesis and may have either of two main areas of specialization: language and literature or Romance linguistics.

Doctoral programs are offered in the following fields of specialization: Romance literature, Romance linguistics, and French or Spanish language and literature. Students specializing in a single Romance literature devote at least two-thirds of their course work to the field of specialization. In all programs, some training in basic principles of the nature of language and in bibliographic method is required.

The doctoral program in Romance literature allows a flexible combination of two or more Romance literatures. At least half the post-M.A. credits must constitute a major area within one of the departmental literary sections: French, Spanish, or Italian.

Special Requirements
Information on special requirements for the various degree programs is available upon request from the office of the graduate program adviser.

Financial Aid
The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately twenty-five students and meets five hours a week for the ten weeks of the quarter. The supervising language instruction meets with the assistants separately and in groups to discuss matters of teaching.

Faculty

Chairperson
Douglas P. Collins

Professors
Anderson, Farris Furman * 1967; PhD, 1966, University of Wisconsin; nineteenth- and twentieth-century Spanish literature.
Borch-Jacobsen, Mikel * 1986; Doctorate, 1981, University of Strasbourg (France); French twelfth-century literature, modern philosophy, psycho-analysis.
Christofides, Constantine G. * 1966, (Emeritus); PhD, 1955, University of Michigan; medieval, seventeenth century, Romance.
Contreras, Heles * 1964, (Adjunct); PhD, 1961, Indiana University; Spanish linguistics, syntax and English semantics.
Creore, A. Emerson 1940, (Emeritus); PhD, 1939, Johns Hopkins University.
Keller, Abraham C. * 1948, (Emeritus); PhD, 1946, University of California (Berkeley); sixteenth-century French literature.
Klauserung, Jurgen * 1969; PhD, 1969, University of Michigan; Romance linguistics.
Leiner, Jacqueline * 1963, (Emeritus); Dr es Lettres, 1969, University of Strasbourg (France); modern French literature.
Nostrand, Howard L. 1939, (Emeritus); Docteur, 1934, University of Paris.
Pace, Antonio 1967, (Emeritus); PhD, 1943, Princeton University; Italian language and literature.
Vance, Eugene * 1990; PhD, 1964, Cornell University; medieval literature, the history of criticism, and discourse analysis.
Wilson, Cloistde 1926, (Emeritus); PhD, 1921, University of Washington; French language and literature.

Associate Professors
Collins, Douglas P. * 1980; PhD, 1978, University of Missouri; twentieth-century French literature.

Petersen, Suzanne Helen * 1973; PhD, 1976, University of Wisconsin; medieval Spanish literature.
Sheplabge, George A. * 1967; PhD, 1966, Harvard University; Spanish Golden Age.
Steele, Cynthia * 1986; PhD, 1980, University of California (San Diego); Chicano literature, contemporary Latin-American literature (narrative).
Wilson, Cloistde 1926, (Emeritus); PhD, 1921, University of Washington; French language and literature.

Assistant Professors
Delcourt, Denysse * 1990; PhD, 1987, University of Montréal (Canada).
Herschsohn, Julia R. * 1985; PhD, 1976, University of Washington; romance linguistics, French syntax, second language acquisition.
O'Hara, Edgar * 1989; PhD, 1989, University of Texas (Austin); Spanish, Latin American poetry, writing poetry and essays.
Penn, Camillo * 1992; PhD, 1992, University of California (Berkeley); Brazilian women writers, Latin American nationalism, philosophy, literary theory, film.
Stragio, Albert J. * 1989, PhD, 1988, University of California (Berkeley); modern and contemporary Italian literature and cinema.
Strozer, Judith R. * 1987; PhD, 1976, University of California (Los Angeles); comparative Romance syntax, second language acquisition, foreign language teaching.
Sugano, Marni Z. * 1987; PhD, 1987, University of California (Berkeley); nineteenth- and twentieth-century French literature.
Yowell, Donna Lynne * 1988; PhD, 1987, University of California (Berkeley); medieval Italian literature, Dante, Occitan lyric.

Lecturers
Bodden, Rodney V. 1985; PhD, 1969, University of Wisconsin; second and third-year Spanish programs.
Tamburo, Carolyn R. 1993; PhD, 1986, University of California (Los Angeles).

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
Courses in English translation appear at the end of the listing of courses for undergraduates.

Romance Linguistics
ROM 401 Introduction to Romance Linguistics (5) VLPA Klausenburger, Zagona Descriptive analysis of the phonological, morphological, and syntactical structures of the modern Romance languages. Prerequisite: the equivalent of two college years of a Romance language or permission of instructor.

ROM 402 Introduction to Romance Linguistics (5) VLPA Klausenburger, Zagona Comparative historical survey of the development of the principal Romance tongues. Prerequisite: 401 or permission of instructor.

ROM 490 Senior Essay (2) Essay on linguistic problem of student's choice written with faculty consultation.

ROM 499 Special Topics (1-5, max. 10) Prerequisites: permission of instructor and undergraduate adviser or graduate program coordinator.

French
Credit: The sequence 121, 122, 123 is parallel to 101, 102, 103; students can receive credit for 101 and 121 but not for 102 and 122 or 103 and 123. 101 or 121 cannot be taken for credit after 102, 103, 122, or 123.

FREN 121 Intermediate French (5,5,5) VLPA Areas of linguistics that can be particularly helpful to the French teacher. Prerequisites: 323 or ROM 401 or LING 200 or 400 and two years of college-level French and permission of instructor.

FREN 327 Advanced Conversation (2, max. 8) VLPA Not open to students whose native language is French. Prerequisite: 203 or college equivalent or placement.

FREN 337 Foreign Study: Conversational French (2-6) VLPA For participants in the Foreign Study Program. Prerequisite: 203 or college equivalent.

FREN 378 The Making of Contemporary France, Studied in French (5) VLPA With S&J Study of the historical origins and subsequent development of contemporary problems and characteristics of French government and politics, economy, and society. Prerequisite: 203 or equivalent.

FREN 390 Supervised Study (2-6, max. 20) Prerequisites: permission of the instructor and the undergraduate French adviser.

FREN 397 Foreign Study: French Civilization (3/6) VLPA Foreign Study Office. Prerequisite: 203. Credit for fifteen additional credits.

FREN 400 The Syntactic Structure of French (5) VLPA Linguistic study of the syntactic of French: phrase structures and transformations (emphasis on passives, relativization, pronominalization, reflexive structures). Prerequisites: 323 or ROM 401 or permission of instructor.

FREN 401 The Morphological Structure of French (5) VLPA Linguistic study of French morphology. Prerequisite: 323 or ROM 401 or permission of instructor.

FREN 402 The Phonological Structure of French (5) VLPA The phonological component of the generative grammar of French: representations of syllactic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisites: 323 or ROM 401 or permission of instructor.

FREN 403 Background of Modern French (5) VLPA Klausenburger Linguistic analysis of the important developments in the history of the French language from its Latin origin to contemporary speech. Prerequisite: 323 or ROM 401 or permission of instructor.

FREN 404 Old French (5) VLPA Designed for acquisition of reading facility in Old French through intensive study of selected texts. Prerequisite: 323 or ROM 401 or permission of instructor.

FREN 405 Linguistics and the Teaching of French (5) VLPA Areas of linguistics that can be particularly helpful to the French teacher. Prerequisites: 323 or ROM 401 or permission of instructor.

FREN 406 Advanced French Grammar (5) VLPA Problems of French grammar. Differences between forms and structures of French and English. Problems of effective teaching of French. For students with at least three years of college French and for beginning teaching assistants. Prerequisites: 303 or permission of instructor.

FREN 409 The Phonetics of French (6) VLPA Scientific study of the French sound system with special emphasis on "lower level" phonetic rules, with integral values. Focus on data from standard French as well as socio-economic, and cultural variations. Prerequisites: 323 or ROM 401 or LING 200 or 400 and two years of college-level French.

Most of the following 400-level courses require as prerequisites FREN 303; 304, 305, 306. See adviser exceptions.

FREN 411 Topics in the Middle Ages (5) VLPA Sixteenth-century literature with emphasis on poetry and the general artistic ambiance. Prerequisites: see note above.
FREN 412 | Topics in Sixteenth Century French Literature (5) VLPA | An introduction to major French literary texts of the Sixteenth Century. Prerequisites: 303 and 304.

FREN 413 | Topics in Seventeenth Century (5) VLPA | Seventeenth-century literature, with emphasis on the development of classicism. Prerequisites: see note above.

FREN 414 | French Literature of the Eighteenth Century: Enlightenment (5) VLPA | Eighteenth-century literature, with emphasis on the development of the Enlightenment ideology. Prerequisites: see note above.

FREN 415 | French Literature of the Eighteenth Century: Post-Enlightenment (5) VLPA | Eighteenth-century literature, with emphasis on the "dark side of the Enlightenment" and nascent romanticism. Prerequisites: see note above.

FREN 416 | French Literature of the Nineteenth Century: Romanticism (5) VLPA | Nineteenth-century literature, with emphasis on romanticism and the early manifestations of realism. Prerequisites: see note above.

FREN 418 | French Literature of the Early Twentieth Century (5) VLPA | Twentieth-century literature, with emphasis on the period 1900-1939. Prerequisites: see note above.

FREN 419 | French Literature Since World War II (5) VLPA | Twentieth-century literature, with emphasis on the period 1939 to the present. Prerequisites: see note above.

FREN 421 | Psychoanalysis and Literature (5) VLPA | Birch-Jacobsen Readings from Freud and French critical writers regarding the relationship between psychoanalysis and literature. Prerequisites: 303 and 306.

FREN 422 | Literature and the Other Arts (5) VLPA | Examines the relationship between text and image in a variety of art forms. Prerequisites: 303.

FREN 424 | Fiction: 1800-1850 (5) VLPA | Prerequisites: see note above.

FREN 425 | Fiction: 1850-1900 (5) VLPA | Prerequisites: see note above.

FREN 427 | Fiction: Twentieth Century (5) VLPA | Prerequisites: see note above.

FREN 432 | Critical Approaches to French Fiction (5) VLPA | Addresses theory and practice of fiction within the context of a given century or movement. Content varies. Prerequisites: 303.

FREN 435 | Topics in Non-Fiction (5) VLPA | Content varies. Prerequisite: 303.

FREN 441 | Québécois Literature (5) VLPA | Readings of novels, plays, and, occasionally, poetry. Special attention paid to how Québécois authors represent in their works the complex socio-political reality of their culture. Conducted in French. French majors will be required to read and write in French; all others may read and write in English. Prerequisites: 303 and 306 or permission of instructor. Offered: jointly with SISCA 441.

FREN 444 | Poetry: Romantic (5) VLPA | Prerequisites: see note above.

FREN 445 | Women Writers and Feminist Theory (5) VLPA | Focus on French women writers from different periods and places. Gender issues addressed in critical fashion, considering the different historical and ideological contexts in which each of the works were produced. Prerequisites: 303.

FREN 446 | Poetry: Twentieth Century (5) VLPA | Prerequisites: see note above.

FREN 451 | History and Literature of the French Religious Wars (5) VLPA | Major political, social, and religious movements and events of, and related to, the French religious wars of 1560 to the end of the century, along with the treatment of these in the prose, poetry, and drama of the period. For students receiving French credit, readings must be done in French. Prerequisites: see note above.

FREN 454 | Nonfiction of the Classic Period (5) VLPA | Prerequisites: see note above.

FREN 455 | One Author In French Literature/Culture (5, max. 15) VLPA | In depth focus on the works of one author in French Literature or Culture. Prerequisites: 303.

FREN 457 | Seventeenth-Century Drama (5) VLPA | Prerequisites: see note above.

FREN 458 | Eighteenth-Century Drama (5) VLPA | Prerequisites: see note above.

FREN 470 | Cinema (5) VLPA | Major films and figures of French cinema from the beginnings to the present. Prerequisites: see note above.

FREN 490 | Honors Seminar (2-5, max. 10) VLPA | Special studies in French literature. Required of candidates for honors and distinction in French. Open to others by permission of French honors advisor.

FREN 486 | Poetry and Song as Elements in French Civilization (5) VLPA | Relationship of poetry and music as expressed in the chanson in several periods of French culture. Emphasis on nineteenth-century poet-composer-performers. Attention given to the medieval troubadours and to poet-musician collaboration in the Renaissance and later periods. Prerequisites: see note above.

FREN 499 | Special Topics (1-5, max. 10) Topics to meet special needs. Prerequisites: see note above.

ITAL 101, 102, 103 | Elementary (5,5,5) Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisites: 101 or college equivalent on placement for 102; 102 or college equivalent or placement for 103.

ITAL 108 | Intensive Italian Grammar and Reading (5) | Intensive two-quarter presentation of Italian grammar with emphasis on reading Italian texts. For persons who require solid reading knowledge of Italian or who plan to study in Italy. Prerequisite: 108.

ITAL 299 | Foreign Study—Intermediate (4-18) VLPA | Intermediate instruction in approved foreign study program. Evaluation by departmental adviser required to establish proficiency. Further study at 200-level subject to departmental evaluation.

ITAL 301, 302 | Advanced Syntax and Composition (5,5) VLPA | Prerequisites: 203 or college equivalent or placement for 301; 301 for 302.

ITAL 303 | Italian Stylistics (5) VLPA | Functional grammar review; creative written and oral composition and reading, with special attention to problems of style. Prerequisite: 302.

ITAL 390 | Supervised Study (2-6, max. 20) | Prerequisites: permission of the instructor and the undergraduate Italian advisor.

ITAL 400 | The Development of the Italian Language (5) VLPA | Historical survey of Italian phonology, morphology, and syntax. Evolution of the language is illustrated with study of pertinent documents from various periods. Prerequisites: 301, 302, 303, LING 400, or ROMAN 401 or permission of instructor.

ITAL 401 | Readings in Italian: Medieval (5) VLPA | Exploration of medieval Italian cultural history through a broad variety of literary and other textual traditions. Prerequisite: undergraduate student with good reading knowledge of Italian.

ITAL 402 | Readings in Italian: Early Modern (5) VLPA | Exploration of early modern Italian cultural history through a variety of literary and other textual traditions. Prerequisite: undergraduate student with good reading knowledge of Italian.

ITAL 403 | Readings in Italian: Modern (5) VLPA | Exploration of modern Italian cultural history through a broad variety of literary and other textual traditions. Limited to undergraduate students. Prerequisite: good reading knowledge of Italian.

ITAL 404, 405, 406 | Survey of Italian Literature (5,5,5) VLPA | Prerequisite: 203 or college equivalent or placement test.

ITAL 414 | Literature of the Renaissance: Cinquecento (5) VLPA | The high Renaissance. Bembo and the Petrarchans, Machiavelli, Giucicardini, Castiglione, Ariosto, Guarini, Tasso.

ITAL 423 | Seventeenth-Century Italian Literature (5) VLPA | New sciences and new poets: Campi, amelia, Serpi, Della Valle, Marino, Tesauro, Bartoli, Galilei, Redi.

ITAL 431 | Italian Theater (5) VLPA | The development of Italian theater from the Renaissance to the twentieth century. Prerequisite: 303.

ITAL 450 | The Romantic Movement (5) VLPA | Stragia Beginning with an examination of the pre-romantic works of Ugo Foscolo, focuses on the literary and critical writings of Alessandro Manzoni and Giovanni Leopardi. Discusses the Romantic movement in Italy within the context of European Romanticism. Reference made to later variations on Romantic themes. Prerequisite: 303 or permission of instructor.
ITAL 480 Verismo (5) VLPA The development of Verismo with extensive readings from its main exponents—Capuana, Verga, Serao, Deledda, Fucini, and d'Annunzio.

ITAL 485 Contemporary Italian Narrative (5) VLPA Critical reading of selected modern exponents of the short story and novel.

ITAL 470 Dante (5) VLPA Introduction to Dante's Commedia and minor works, conducted in Italian. Prerequisite: 333 or permission of instructor.

ITAL 470 Presentizer in Italian Literature (3-5) VLPA Intended to help the student achieve a mature critical mastery of Italian literature. Required of Italian majors; others by permission of instructor.

ITAL 499 Special Topics (1-5, max. 10) Topics to meet special needs. Prerequisites: permission of the instructor and the undergraduate or graduate program adviser.

Portuguese

PORT 101, 102, 103 Elementary (5,5,5) Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisites: 101 or college equivalent or placement for 102; 102 or college equivalent or placement for 103.

PORT 105 Intensive Portuguese for Spanish Speakers (6)

PORT 201, 202, 203 Intermediate (5,5,5) VLPA Modern texts, compositions, conversation, and functional grammar. Prerequisites: 103 or equivalent or permission of instructor for 201; 201 for 202; 202 for 203.

PORT 310 Introduction to Lusophone Literature (3) VLPA Introduction to the studies of Lusophone literature and culture.

Spanish

SPAN 101, 102, 103 Elementary (5,5,5) Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisites: 101 or college equivalent or placement for 102; 102 or college equivalent or placement for 103.

SPAN 104 Spanish Grammar—Intensive (5) Thorough review of the basics of Spanish grammar. Not open to students who have taken 102 or 103. Prerequisite: one year pre-university Spanish, or 101, or permission of instructor.

SPAN 121,122,123 Spanish Immersion (5,5,5) Covers the equivalent of elementary Spanish (SPAN 101, 102, 103) through an alternative "planned immersion" method with video as the central medium of presentation. Prerequisites: 101 or 121 for 122, 122 for 123.

SPAN 134 Intensive First-Year Spanish (15) Equivalent of 121, 122, 123. Emphasizes "planned immersion" method with video as the central medium of presentation. Not open for credit to students who have taken 121, 122, 123 or 102, 103. Offered: S

SPAN 199 Foreign Study—Elementary (4-16) Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through 103.

SPAN 201, 202, 203 Intermediate (5,5,5) VLPA Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on selected pieces of Spanish literature. Prerequisites: 103 or college equivalent or placement for 201; 201 or college equivalent or placement for 202; 202 or college equivalent or placement for 203.

SPAN 204 Intensive Spanish Review—Intermediate (5) VLPA Intensive review of grammar, reading composition, and oral/aural skills. For highly motivated students with at least one year of college Spanish, or equivalent. Synthesis of 201, 202, 203, and preparation for third-year work in language and literature. Prerequisites: 103, 104, or 201; or four years of high school Spanish.

SPAN 299 Foreign Study—Intermediate (4-16) VLPA Intermediate instruction in approved foreign study program. Evaluation by departmental adviser required to establish proficiency. Further study at 200-level subject to departmental evaluation.

SPAN 301, 302 Grammar and Lexicon (5,5) VLPA Prerequisites: 203 for 301; 301 for 302.

SPAN 303 Introduction to Stylistics Through Composition (5) VLPA Prerequisite: 302.

SPAN 304 Survey of Spanish Literature: 1400-1498 (3) VLPA Masterpieces of Spanish literature from origins to 1498. Prerequisites: 301.

SPAN 305 Survey of Spanish Literature: 1498-1681 (3) VLPA Prerequisites: 301.

SPAN 306 Survey of Spanish Literature: 1681 to the Present (3) VLPA Prerequisites: 301.

SPAN 307 Introduction to Latin American Literature (3) VLPA Study of selected works of twentieth-century Latin American literature and their sociohistorical context. Development of reading and writing skills. Prerequisites: 301.

SPAN 310 Readings in Hispanic Literatures and Cultures (5) VLPA Intensive reading to improve skills and increase vocabulary in preparation for 300- and 400-level coursework on developing reading comprehension through oral discussion and some writing. Prerequisite: 203. Credit may not be applied toward Spanish major requirements.

SPAN 313 Business Communication in Spanish (5) VLPA This intermediate level course offers student the opportunity develop their Spanish language skills (reading, writing, speaking, and listening) within the context of the Spanish-speaking business world. Business-specific culture emphasized. Prerequisite: 203 or equivalent or permission of instructor. Credit may not be applied toward Spanish major.

SPAN 321 Introduction to Hispanic Literary Studies (5) VLPA Acquaints the third-year student with elements of literary analysis, as applied to examples of narrative, poetry and theater, within the context of the Spanish and Latin American literary traditions. Prerequisites: 301 or equivalent.

SPAN 323 Introduction to Spanish Linguistics (3) VLPA Synchronic and diachronic linguistic analysis of Spanish, including Spanish phonetics and phonology, morphology, syntax, and evolution of the language. Prerequisite: 301.

SPAN 331 Themes in Mexican-American Studies (5) VLPA Flores Examination of significant historical and cultural themes of the Mexican-American experience. Prerequisite: speaking knowledge of Spanish.

SPAN 333 Hispanic Film Studies (3) VLPA Introduces major topics. Prerequisite: 301 or equivalent.

SPAN 337 Foreign Study Conversational Spanish (2-4) VLPA Participants in the Foreign Study Program. Prerequisites: 203 or equivalent and permission of Foreign Study Office.

SPAN 350 Drama (3) VLPA Introduction to Spanish drama. Prerequisite: 301 or college equivalent or placement.

SPAN 351 Poetry (3) VLPA Introduction to Spanish poetry. Prerequisite: 301 or college equivalent or placement.

SPAN 352 Fiction (3) VLPA Introduction to Spanish fiction. Prerequisite: 301.

SPAN 376 Introduction to Latin American Poetry (3) VLPA O'Hara Traces the oral, musical, and written traditions of Latin American poetry. Prerequisite: 301.

SPAN 390 Supervised Study (2-6, max. 20) Prerequisites: permission of the instructor and undergraduate Spanish adviser.

SPAN 393 Foreign Study (2-10, max. 20) VLPA Study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisites: 301, 302, and approval of Foreign Study Office or undergraduate adviser.

SPAN 400 The Syntactic Structure of Spanish (5) VLPA Strozer, Zagona. Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisites: 302 and 323.

SPAN 401 The Morphological Structure of Spanish (5) VLPA Strozer, Zagona. Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and constituent components of grammar. Prerequisites: 302 and 323.

SPAN 402 The Phonological Structure of Spanish (5) VLPA Strozer, Zagona. Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisites: 302 and 323.

SPAN 403 The Evolution of the Spanish Language (5) VLPA Zagona. Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisites: 302 and 323.

SPAN 400 Advanced Phonetics (5) VLPA Analysis of sounds: training in pronunciation, intonation, and close transcription of Spanish language in its modalities. Prerequisite: 302 or graduate standing.
SPAN 415 Spanish Literature: Nineteenth Century (5) VLPA Anderson Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 417 Spanish Literature From 1940 to the Present (5) VLPA Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 420 Spanish Poetry: Origins Through the Fifteenth Century (5) VLPA Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 423 Spanish Poetry: The Golden Age, Sixteenth Through Seventeenth Centuries (5) VLPA Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 424, 425, 426 Hispanic Poetry (5, 5, 5) VLPA Geist Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 433 Golden Age Prose (5) VLPA Shipley Representative, and outstanding, prose works of sixteenth-seventeenth century Spain. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 436 Spanish Novel of the Nineteenth Century (5) VLPA Anderson Representative works of Galdos, Clar, Pereda, Valera, and Blasco Ibanez. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 437 Spanish Novel: 1900-1936 (5) VLPA Spanish novel from the generation of 1898 to the beginning of the Civil War (1936). Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 438 Spanish Novel: 1936 to the Present (5) VLPA Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 439 Women Writers (5) VLPA & S Feminist analysis of selected texts by Chicana/Latina writers in the United States today. Focus on Mexican, Luso-Brazilian, and/or Spanish women writers in their specific socio-historical contexts. Prerequisites: 303, 321, and one additional 300-level course beyond 303, or permission of instructor. Offered: jointly with WOMEN 439.

SPAN 440 Spanish Drama: 1100-1600 (5) VLPA From the beginning to Lope de Vega. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 441 Spanish Drama: 1600-1835 (5) VLPA Spanish theatre of the seventeenth century, with emphasis on Lope de Vega. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 445 The Modern Theatre in Spain, 1700-1890 (5) VLPA Anderson Literature and historical context of Spanish theatre in the eighteenth and nineteenth centuries. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 446 The Modern Theatre in Spain, 1890-1936 (5) VLPA Anderson Major currents and literature of Spain’s theatre in this century, up to the Spanish Civil War in 1936. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 447 Spanish Theatre Since the Civil War (5) VLPA Works of Spain’s major dramatists of the postwar period. Special attention given to the social and political context of the theatre in Spain under the Franco regime. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 449 Spanish Drama and Play Production (5, max. 10) VLPA Anderson Prerequisite: permission of instructor.

SPAN 453 Cervantes and His Times (5) VLPA Shipley Study of Cervantes’s life and his influence in Spanish history, with special attention to his cultural and artistic environment. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 461 Cultural Background of Latin American Literature (5) VLPA Survey of ideas and art forms and their relationship to literature in four periods: pre-Columbian, colonial, early independence, and twentieth century. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 462 Early Spanish Civilization (5) VLPA Development of Spanish society and art forms from early times to 1700. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 463 Spanish Civilization Since 1700 (5) VLPA Spanish civilization and its major artistic products since 1700. Major focus on the development of Spanish society and intellectual life as reflected in music, painting, and especially literature. Taught in Spanish. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 464 Chicana Expressive Culture (5) VLPA & S Expressive culture of Mexican women in United States. Cultural and artistic practices in home, film, literary (print, oral) performing and visual arts. Focuses on ways Chicana visual artists re-visualize traditional iconography. Prerequisites: 303, 322, one additional 300-level course beyond 303 or permission of instructor. Offered: jointly with CHSTWOMEN 464.

SPAN 465 Contemporaneous Chicana Literature (5) VLPA Examination of one or more problems, themes, and/or figures in the developing body of Chicana literature. Prerequisites: 303, 322, plus one additional 300-level course beyond 303.

SPAN 466 Chicana Literature: Fiction (5) VLPA Nineteenth- and early twentieth-century fiction, as well as contemporary works, are examined in attempts to trace the development of Chicano fiction in the proper historical trajectory. Prerequisites: 303, 322, or 321, plus one additional 300-level course beyond 303.

SPAN 467 Spanish Women (5) VLPA Women’s culture in Spain, focusing on women’s experiences during Civil War; persecution and censorship of women activists, artists, and revolutionaries. Focusing on the years of change in women’s culture brought about by re-introduction of democracy; major issues addressed by contemporary Spanish feminists. Prerequisites: 303, 321, or 322, and one additional 300-level course beyond 303, or permission of instructor. Offered: jointly with WOMEN 467.

SPAN 468 Latin American Women (5) VLPA & S Issues in women’s culture from various Latin American countries, social classes, ethnic groups. Includes female creativity, relationship between female artists and the male tradition, women’s exploitation of women, relationship of middle-class to popular feminism, connections between feminism and social change. Prerequisites: 303, 322, and one additional 300-level course beyond 303. Offered: jointly with WOMEN 468.

SPAN 473 Latin American Fiction: Nineteenth Century (5, max. 15) VLPA Study of prose fiction in Latin America through the nineteenth century. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 474 Latin American Fiction: Twentieth Century (5) VLPA Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 475 Latin American Poetry: Colonial Through Nineteenth Century (5) VLPA Poetic movements of the seventeenth, eighteenth, and nineteenth centuries in Spanish America, Baroque, neoclassicism, romanticism, and modernism. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 476 Contemporary Latin American Poetry (5) VLPA Evolution of Latin American poetry, from postmodernism and vanguardism to the most recent poetic expression. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 477 Latin American Essay (5) VLPA Literary expression of ideas in Latin American countries, nineteenth and twentieth centuries. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 478 Modern Latin American Theater (5) VLPA Study of the origin, development, and achievements of Latin American theater with an overview of its history prior to the twentieth century. Prerequisites: 303, 321, plus one additional 300-level course beyond 303.

SPAN 480 Spanish Medieval Literature (5) VLPA Principal literary works of the Spanish Middle Ages in their relationship to literature outside of Spain, including courtly and artistic ambitions of the climates of the period. Covers the evolution of narrative and lyric prose and verse in both their traditional and learned manifestations. Prerequisites: 303, 321, and one additional 300-level course beyond 303.

SPAN 481 Sixteenth- and Seventeenth-Century Spanish Literature (5) VLPA Spanish literature of the sixteenth and seventeenth centuries. Close study of key texts from all genres as well as their socio-historical contexts. Prerequisites: 303, 321, and one additional 300-level course beyond 303.

SPAN 482 Eighteenth- through Twentieth-Century Spanish Literature (5) VLPA Survey of Spanish literature since 1700, and its historical context. Prerequisites: 303, 321, and one additional 300-level course beyond 303.

SPAN 483 Latin American Literature: Origins to Independence (5) VLPA Principal literary movements of Latin America, fifteenth through nineteenth centuries: native American cultures, chronicles of the Spanish conquest and resistance, colonial Baroque, independence movements, exoticism or national and resistance cultures. Offered: jointly with SISLA 483.

SPAN 484 Latin American Literature: Modernismo to the Present (5) VLPA Principal literary movements of Latin America, late nineteenth century to the present, with particular emphasis on poetry and narrative: modernismo, postmodernismo, the vanguard, nueva and nonsensism, narrative. Includes essays and autobiographical writings to help place the literary works in socio-historical perspective. Prerequisites: 303, 321, and one additional 300-level course beyond 303.

SPAN 485 Cultural Studies of Latin America (5) VLPA & S Interdisciplinary exploration of connections among culture, identity, and power, and among popular, mass, middle, and elite cultures in Latin America. Specific topics vary, but may include such problems as tradition, modernity, and postmodernism or national and resistance cultures. Offered: jointly with SISLA 485.

SPAN 490 Honors Seminar (2-5, max. 10) VLPA Special studies in Spanish literature. Required of candidates for honors in the Spanish Language and Literature. Open to others by permission of Spanish honors adviser.

SPAN 491 Individual Authors and Special Topics In Spanish Literature (5, max. 10) VLPA Focus on an individual Spanish author or a special problem in Spanish.
ish literature. Prerequisites: 303, 321, plus one addi-
tional 300-level course beyond 303.

SPAN 493 Foreign Study (2-10, max. 20) VLPA
Advanced study in Spanish speaking country outside
the standard Spanish curriculum of the University of
Washington. Prerequisites: 303, 321, and one 300-
level course above 303.

SPAN 495 Study In Spain (12) VLPA One-quarter
study group in Spain. Course content varies from year
to year. Consult the Department of Romance Lan-
guages and Literature for availability and further re-
quirements.

SPAN 499 Special Topics (1-5, max. 10) Topics
to meet special needs. Prerequisites: permission of
instructor and undergraduate adviser or graduate pro-
gram coordinator.

Courses in English
These courses are recommended as appropriate sup-
porting studies for students majoring in other depart-
ments. Courses in English translation are not usually
applicable toward undergraduate or graduate major
programs in the Department of Romance Languages
and Literature. Majors may take any of these courses
for credit as one of their electives.

French
FREN 458 French Art and Literature: Period Stud-
ies (5) VLPA Comparative studies of theme and
 technique in art and literature to illustrate major con-
 cerns of a particular period as expressed in these two
 media. Prerequisite: background in French literature
 or art history (the appropriate 300-level course in art
 or the appropriate 400-level survey course in French
 literature).

FREN 461 Twentieth-Century French Novel In
English (5) VLPA

FREN 482 French Poetry From Baudelaire to
the Present In English (5) VLPA Analysis in English of
the major trends and movements in modern French poetry
with representative works, from Baudelaire to the poets of
the 1950s.

English or English translation by Chicana!
and Latina women writers, in their specific socio-historical context. Offered:
jointly with WOMEN 330.

SPAN 332 Cervantes' Don Quixote In English
(5) VLPA Study of Cervantes' Don Quixote de la Mancha:
close study of this comic masterpiece, and the life,
times, and works of its author. Consideration of the
work's enduring influence and vitality.

Courses for Graduates Only

Romance Languages and Literature

ROMAN 593 Literary Problems: Early Modern
Period (5)

ROMAN 596 Problems In Comparative Contem-
porary Literary Studies (5) Seminar exploring contem-
porary literary thought through theoretical and/or cre-
ative literature. A selection of texts from at least two
Romance languages and literatures. Prerequisites:
competence in at least two Romance languages;
completion of several upper division literature courses;
some familiarity with critical methodologies.

ROMAN 600 Independent Study or Research (*)

ROMAN 700 Master's Thesis (*)

ROMAN 800 Doctoral Dissertation (*)

Romance Linguistics

ROM 505, 506 Advanced Romance Linguistics
(5,5) Klausenburger, Zagora Advanced problems in
the phonological, morphological, and syntactical
analysis of the Romance languages. Descriptive, compa-
rative, and historical considerations. Prerequisites:

FREN 401, 402, or SPAN 400, or FREN 541, 542,
or SPAN 541, 542.

ROM 518 Foreign Language Teaching Methodol-
ogy (2) Brandi Current foreign language teaching
methods and approaches. "Learning" and teaching
strategies and techniques for the four skills (reading,
writing, speaking, listening) including cultural notions.
Current and future trends in pedagogy and technol-
ogy. Offered: jointly with ASIAN/GERM/ES RAN/SLAV 518.

ROM 521, 522 Seminar In Romance Linguistics
(5, max. 15) Contreras, Klausenburger, Zagora Specific
problems in linguistic analysis of the Romance lan-
guages. Prerequisites: 401, 402.

ROM 531 Problems In Romance Linguistics (2-5,
max. 15) Klausenburger, Zagora Group seminars, or
individual conferences, are scheduled under this num-
ber to meet special needs. Prerequisite: permission of
graduate program coordinator. Offered: jointly with
LING 531.

ROM 551 Romance Linguistics: History, Method-
ology, and Bibliography (5) For new graduate stu-
dents in the Romance linguistics program. History of
Romance linguistics and linguistic science in the nine-
teenth and twentieth centuries as it relates to Romance
studies. Comparative and descriptive methods used in
contemporary scholarship. Prerequisites: 401 or LING
200 or equivalent.

ROM 590 Special Seminar and Conference
(1-10, max. 20) Group seminars, or individual conferences,
are scheduled under this number to meet special needs.
Prerequisite: permission of graduate program
coordinator.

ROM 600 Independent Study or Research (*)

French

FREN 510 Methodology of French Language
Teaching (3) Horschenshohn Theoretical and prac-
tical foundation of teaching French. Major topics include
modern theories of language and language acquisition
which underlie modern methods of foreign language
Teaching, teaching techniques, text and classroom
relations with emphasis on the multiple-approach di-
rect method. Required for beginning French Teaching
Assistant.

**Scottish, East European, and Central Asian Studies**

See International Studies.
Master of Arts Degree

For the M.A. degree, two options are available, each allowing the student to emphasize a target language while pursuing courses in Scandinavian languages, literature, or area studies.

1. An emphasis on Scandinavian languages and literature includes acquisition of a working knowledge of the methods of philology and literary history, theory and analysis, plus study of one secondary area.

2. An emphasis on Scandinavian area studies includes the study of Scandinavian cinema, folklore, mythology, history, politics, and society, with an emphasis in one of these areas.

Admission Requirement: Bachelor of Arts degree with major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies, or equivalent background.

Graduation Requirements: Minimum of 36 credits in courses or seminars in Scandinavian and related subjects approved by the department, of which at least 20 credits must be in courses numbered 500 and above; reading knowledge of French or German (another non-Slavic language may be substituted with faculty approval); written and oral examination; option between thesis and nonthesis program. Candidates in Scandinavian languages and literature must satisfy the departmental requirements in Old Icelandic.

Doctor of Philosophy Degree

For the Ph.D. degree, the student concentrates primarily on one of two areas: Scandinavian languages and literature or Scandinavian philology and linguistics, with an emphasis on the student's chosen target language. Major attention is given to the history of the Scandinavian languages, literary theory and genre study, and Scandinavian literary history. Opportunities for graduate work also exist in such areas as Scandinavian cinema, history, politics, mythology, and folklore.

Admission Requirement: Master of Arts degree with major in Scandinavian languages and literature or equivalent background.

Graduation Requirements: 36 credits beyond the master's degree in courses or seminars in Scandinavian languages and literature and related subjects approved by the department; one year's study of Old Icelandic; a reading knowledge of French and German (other non-Slavic languages may be substituted with faculty approval); General Examination for admission to candidacy; 27 credits of SCAND 800 (Dissertation) taken over at least three quarters and a Final Examination on the dissertation.

Financial Aid

Teaching assistantships in Danish, Norwegian, and Swedish are available, as well as occasional research assistantships.

SCAND 309 Sagas of the Vikings (2) VLPA Icelandic family sagas in the context of thirteenth-century society. 2.5 credits available Summer Quarter only.

SCAND 312 Masterpieces of Scandinavian Literature (5) VLPA Major works of Scandinavian literature selected by authors.

SCAND 325 Public Policy in Scandinavia (5) IAS Comparative and historical analysis of the evolution and change of domestic public policies in the Nordic welfare states; emphasis on health, education, social welfare, economic management, as well as the future of the welfare state. Prerequisite: 200 or equivalent.

SCAND 326 Scandinavia in World Affairs (5) IAS Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Includes a survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressures of interdependence. Offered: jointly with POL S 326.

SCAND 331 Folk Narrative (5) VLPA Survey of various genres of folk narratives studied in performance contexts to reveal their socio-cultural functions in a variety of milieus. Theory and history of folk narrative study, taxonomy, genre classification, and interpretative approaches. Offered: 200C LIT 230 or equivalent. Offered: jointly with C LIT 331.

SCAND 332 Folk Belief and World View (5) VLPA Study of folk belief and world view expressed in memories, legends, magic formulas, and other examples of oral tradition. Analysis of forms and origins of belief genres, their esthetic and social functions, and the role of oral tradition as a tool of societal control and change. Offered: jointly with C LIT 332.

SCAND 333 Folklife and Material Culture (5) VLPA Material culture in traditional and contemporary Scandinavia. Comprehensive examination of nonverbal genres (including vernacular architecture, settlement, textile foodways) with an emphasis on broad theoretical issues such as community, identity, ethnicity. Recommended: 200C LIT 230 or equivalent. Offered: jointly with C LIT 333.

SCAND 335 Scandinavian Children's Literature (5) VLPA Scandinavian children's literature from the author's perspective to the stories of such writers as Hans Christian Andersen, Elsa Beskow, Astrid Lindgren, Maria Grippe, and Tove Jansson.

SCAND 360 Scandinavian Cinema (3/5) VLPA Major Scandinavian films and film directors from the 1920s to the present.

SCAND 365 Kierkegaard and the Existentialist Tradition (3) VLPA Kierkegaard's works. Impact of existentialism on Scandinavian literature, with attention to such authors as Ibsen, Kierland, Lagerkvist, E. Johnson, Dinesen, M. A. Hansen, and Ingmar Bergman.

SCAND 370 The Vikings (5) VLPA IS Vikings at home in Scandinavia and abroad, with particular emphasis on their activities as revealed in archaeological finds and in historical and literary sources. Offered: jointly with HSTEU 370.

SCAND 380 History of Scandinavia to 1728 (5) IAS Scandinavian history with emphasis on the political, social, and economic development of Denmark, Norway, Sweden, Finland, and Iceland from the Middle Ages to the Enlightenment. Offered: jointly with HSTEU 380.

SCAND 381 History of Scandinavia since 1728 (5) IAS Scandinavian history from 1728 to the present, with an emphasis on the political, social, and economic development of the modern Scandinavian nations of Denmark, Norway, Sweden, Finland, and Iceland. Offered: jointly with HSTEU 381.

SCAND 383 Scandinavian Immigration in History and Literature (3) VLPA History and literature of Scandinavian emigration to North America, including immigrant life and culture, community structures and traditions, and the literature about, and by, Scandinavian emigrants.

SCAND 427 Scandinavian Women Writers: In English Translation (5) VLPA Selected works by major Scandinavian women writers from mid-nineteenth-century bourgeois realism to the present.

SCAND 430 Readings in Folklore (5) VLPA Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Prerequisite: C LIT/SCAND 230 or equivalent. Offered: jointly with C LIT 430.

SCAND 450 Scandinavian Literary History (3) VLPA Survey of Scandinavian literary history. Prerequisite: Knowledge of a Scandinavian language or permission of instructor.

SCAND 460 History of the Scandinavian Languages (5) VLPA Development of languages from common Scandinavian to contemporary Danish, Norwegian, Swedish, Faroese, and Icelandic. Prerequisite: two years of a Scandinavian language or permission of instructor.

SCAND 462 Isak Dinesen and Questions of Feminist Criticism (5) VLPA Isak Dinesen's (Karen Blixen) tales, stories, and essays investigated in light of current issues in feminist criticism. Close readings of Dinesen's duplicitous texts with emphasis on women's roles, sexual identity, and female creativity.

SCAND 470 Seminar in Folklore (5) VLPA Studies in folklore and the Behavism and several American folk traditions in the Pacific Northwest through extensive fieldwork. Prerequisite: C LIT/SCAND 230 or equivalent. Offered: jointly with C LIT 470.

SCAND 484 The Films of Ingmar Bergman (5) VLPA Major films of Ingmar Bergman.

SCAND 490 Special Topics (1-5, max. 15) VLPA Special topics in Scandinavian art, literature, culture, and history. Course offerings based on instructor's specialty and student demand.

SCAND 498 Senior Essay (5) VLPA Undergraduate research and the writing of a senior essay in Scandinavian area studies. Prerequisite: permission of instructor.

SCAND 499 Independent Study or Research (1-5, max. 15) Independent study or research in Scandinavian area studies. May be done in a Scandinavian language or in English. Prerequisite: permission of instructor.

Courses for Graduates Only

SCAND 500, 501, 502 Old Icelandic (3,3,3)

SCAND 503 Methods of Scandinavian Studies (5) Introduction to Scandinavian studies on the graduate level with emphasis on Scandinavian literature, folklore, history, and politics.

SCAND 504 Contemporary Literary Theory (5) Contemporary literary theory and its application to Scandinavian texts. Prerequisite: graduate student standing or permission of instructor.

SCAND 505 Scandinavian Drama (5) Selective reading in Scandinavian drama.

SCAND 513 Scandinavian Linguistics (3) Selected topics in Scandinavian linguistics.

SCAND 515 Pre-Nineteenth-Century Scandinavian Literature (5) Seminar on Scandinavian literature of the sixteenth, seventeenth, and eighteenth centuries.

SCAND 518 Modern Scandinavian Politics (5) Analyzes the political, economic, and historical development of Sweden, Norway, Denmark, Iceland, and Finland from World War II to the present. Readings focus on domestic and foreign policies that distinguish these countries from other advanced industrial societies. Offered: jointly with POL S 519.

SCAND 520 Scandinavian Poetry (5) Seminar on Scandinavian poetry from 1890 to the present.

SCAND 522 Scandinavian Romanticism (3) Backgrounds: German idealism; organicist concept of history and aesthetics; the poet as visionary genius; revolutionary tendencies and political conservatism; folklore and mythology. Genres: lyrical poetry, national epic, the beginnings of the novel and drama.
SCAND 525 Topics in Scandinavian History (5) Seminar on selected topics in Scandinavian history.

SCAND 527 Scandinavian Short Prose (3) Seminar on the Scandinavian short story and other forms of short prose.

SCAND 530 Old Norse Literature (3) Studies in the poetry and prose tradition of medieval Iceland and Norway.

SCAND 531 Scandinavian Ballads (3) Seminar on Scandinavian balladry from Middle Ages to present; origin of the ballad, its various genres in Scandinavia, and its oral and written transmission in folk tradition.

SCAND 533 Interdisciplinary Approaches to Community in Scandinavia (5) Humanistic examination of community creation, maintenance, and change in the Nordic region. Examples drawn from folklore, literature, activism, popular culture, history. Focus on issues of gender, belief, and art in relation to community. Coursework includes both individual and collaborative assignments.

SCAND 590 Special Topics in Scandinavian Literature (1-5, max. 15)

**Slavic Languages and Literature**

M253 Smith

The Department of Slavic Languages and Literature offers instruction in the principal East European languages and literatures and in Slavic linguistics, working closely with the School of International Studies. Languages include Bulgarian, Czech, Polish, Romanian, Russian, Croatian/Serbian, and Ukrainian.

---

**Undergraduate Program**

Advisers

Herbert Coats

22 Smith

Charlotte Wallace

M253S Smith

The Department of Slavic Languages and Literature offers undergraduate courses in Russian and other Slavic and East European languages and literatures. The courses are designed both for majors planning careers in teaching, translation, government service, communications, and international business, and for all students wishing to acquire a knowledge of East European regions of the world and their languages and cultures.

The department sponsors the Russian House, where students are provided an opportunity to enhance their knowledge of Russian in a Russian-speaking environment.

**Bachelor of Arts Degree**

**RUSSIAN LANGUAGE AND LITERATURE CONCENTRATION**

Major Requirements: RUS 301, 302, 303, or the equivalent; RUS 401, 402, 403, or the equivalent; RUS 321, 322, 323; 15 credits from the following: RUS 324, 351, 352, 421, 422, 423, 426, 427, 428, 429, 451, 452, 461, 463, 490, or SLAV 351.

**RUSSIAN LANGUAGE AND HISTORY CONCENTRATION**

Major Requirements: RUS 301, 302, 303, or the equivalent; RUS 401, 402, 403, or the equivalent; RUS 321, 322, 323; 15 credits from the following: RUS 324, 351, 352, 421, 422, 423, 426, 427, 428, 429, 451, 452, 461, 463, 490, or SLAV 351.

**EAST EUROPEAN LANGUAGES CONCENTRATION**

Major Requirements: Two years of a principal East European language, or the equivalent; one year of an additional Eastern European language or RUS 201, 202, 203, or the equivalent; 10 credits of course work (which may include RUS 321, 322, 323) in the appropriate literatures of the cultures involved; SLAV 351.

Minors

Minor Requirements—Russian Language: 25 credits to include RUS 301, 302, 303 and 10 credits from RUS 351, 352, 401, 402, 403, 451, 452, SLAV 351.

Minor Requirements—Slavic Languages: 25 credits to include language courses in a Slavic language other than Russian numbered 404, 405, 406 and 10 credits from CZECH 420, POLISH 420, SLAV 351.

---

**Graduate Program**

The Department of Slavic Languages and Literature offers a complete program of courses and seminars leading to the Master of Arts and Doctor of Philosophy degrees in Russian and East European literatures or Slavic linguistics with a strong component of advanced language study. Languages taught in the department include Bulgarian, Czech, Old Church Slavonic, Polish, Romanian, Russian, Croatian/Serbian, and Ukrainian.

The graduate program is organized to permit completion of the master's degree in four or five quarters and the doctoral degree in three additional years. The duration of each program, however, will depend on the extent of the student's preparation upon entrance into the program.

**Research Facilities**

The Suzulillo Library holdings include some two hundred thousand titles in the languages of Eastern Europe. While the majority of these titles are in Russian, the collection is well provided with resources in Bulgarian, Czech, Hungarian, Polish, Romanian, and Croatian/Serbian languages and literatures.

**Admission Qualifications**

For the Master of Arts program: Bachelor of Arts degree with major in a Slavic literature or linguistics. 

For the Doctor of Philosophy program: Master of Arts degree with major in a Slavic literature or linguistics.

**Assistantship Opportunities**

The department regularly offers a number of teaching assistantships. In conjunction with the Harry M. Jackson School of International Studies, students in the department are eligible for several other types of fellowships.

---

**Courses for Undergraduates**

**Bulgarian**

BULGR 401, 402, 403 Elementary Bulgarian (5,5,5) 401, 402: Introduction to Bulgarian phonology and grammar in terms of the modern spoken language. Writing conventions of literary Bulgarian. 403: reading of modern texts to increase command of grammar and vocabulary. Offered: A,W,Sp.

BULGR 404, 405, 406 Advanced Bulgarian (5,5,5) VLPA Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisites: 403 for 404; 404 for 405; 405 for 406; or permission of instructor. Offered: A,W,Sp.

**Croatian/Serbian**

CR SB 401, 402, 403 Elementary Croatian/Serbian (5,5,5) Comprehensive introduction to spoken and written literary Croatian and Serbian. Prerequisites: 401 for 402; 402 for 403 or permission of instructor. Offered: A,W,Sp.
Czech

CZECH 401, 402, 403 Elementary Czech (5,5,5) 401: introduction to spoken and written Czech. 402: modern Czech prose, leading to a command of the language as a research tool and providing an adequate basis for further study. Offered: A, W, Sp.

CZECH 404, 405, 406 Advanced Czech (5,5,5) VLPA Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisites: 403 for 404; 404 for 405; 405 for 406; or permission of instructor. Offered: A, W, Sp.

Polish

POLISH 401, 402, 403 Elementary Polish (5,5,5) 401, 402: Principal morphological and syntactical features of the Polish language through the medium of a basic vocabulary. 403: designed to enlarge general vocabulary by the reading of short texts selected from Polish authors of the nineteenth and twentieth centuries. Offered: A, W, Sp.

POLISH 404, 405, 406 Advanced Polish (5,5,5) VLPA Continuation of 401, 402, 403. Selected readings from the main works from nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisites: 401 for 404; 404 for 405; 405 for 406; or permission of instructor. Offered: A, W, Sp.

Romanian

ROMIN 401, 402, 403 Elementary Romanian (5,5,5) 401, 402: comprehensive introduction to spoken and literary Romanian to increase vocabulary and enhance knowledge of grammar through readings in modern Romanian. Offered: A, W, Sp.

ROMIN 404, 405, 406 Advanced Romanian (5,5,5) VLPA Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisites: 403 for 404; 404 for 405; 405 for 406; or permission of instructor. Offered: A, W, Sp.

Russian

Credit: Credit is not allowed for overlapping courses in two sequences (e.g., a student may receive a maximum of 15 credits for 101, 102, 103, and 150). Credit is allowed for courses in different sequences, though, if the courses are taken in progressively more advanced orders (e.g., 150 followed by 201).

Placement Policy: While students may enroll for whatever language level seems appropriate, final placement in a language course is determined by their score on a diagnostic test administered at the beginning of the quarter. The Russian program reserves the right to place students in higher or lower course, according to the test results.

RUSS 150 Intensive First-Year Russian (15) Covers material of 101, 102, 103 in one quarter. Meets four times a day. For continuation, see 200 or 201, 202, 203. See credit note above. Offered: S.

RUSS 201, 202, 203 Second-Year Russian (5,5,5) VLPA Comprehensive review of Russian grammar with continuing oral practice and elementary composition. Conducted mostly in Russian. Prerequisites: 150, 103, or permission of instructor for 201; 201 or permission of instructor for 202; 202 or permission of instructor for 203. See credit note above. Offered: A, W, Sp.

RUSS 250 Intensive Second-Year Russian (19) VLPA Covers material of 201, 202, 203 in one quarter. Meets three hours daily. Prerequisite: 150, 103, or permission of instructor. See credit note above. Offered: S.

RUSS 301, 302, 303 Intermediate Russian (5,5,5) VLPA Extensive practice in spoken and written Russian based on a variety of prose readings. Intensive review and supplementation of strategic grammatical concepts. Prerequisites: 203, 250, or permission of instructor. See credit note above. Offered: A, W, Sp.

RUSS 304 Reading and Translation (1, max. 3) VLPA Translation techniques with emphasis on development of vocabulary and reading skills. Primarily for Russian regional studies majors. Credit/no credit only. Prerequisite: 203 or permission of instructor. Offered: A, W, Sp.

RUSS 313 Business Russian (5) VLPA Emphasizes the language and practice of business in Russian today. Prerequisite 203 or equivalent.

RUSS 350 Intensive Third-Year Russian (15) VLPA Covers material of 301, 302, 303 in one quarter. Meets three hours daily. Prerequisites: 203, 250, or permission of instructor. See credit note above. Offered: S.

RUSS 351 Intermediate Russian Phonetics (3) VLPA Systematic study of the Russian sound system, including phonetic transcription and intonational patterns. Instruction in correcting individual pronunciation errors. Conducted partly in Russian. Prerequisite: 203 or 250. Offered: A.

RUSS 352 Intermediate Russian Morphology (3) VLPA Examination of Russian morphology with emphasis on; topics that are relevant to advanced courses in Russian. Conducted partly in Russian. Prerequisite: 203 or 250. Offered: W.

RUSS 381 Phonetics In St. Petersburg (2, max. 6) VLPA Systematic analysis of the Russian sound system as well as intonational patterns. Practical reading exercises. Special attention to correcting individual pronunciation errors. (2 credits for Summer Quarter program, 5 credits for seminar program.) Prerequisite: 203 for Summer Quarter, 303 for semester. Offered: AWSpS.

RUSS 382 Advanced Syntax and Composition In St. Petersburg (2, max. 6) VLPA Class lectures on Russian syntactic structures. Oral drilling and written exercises and compositions. (2 credits are offered for the six-week Summer Quarter program, 5 credits for the fourteen-week semester program.) Prerequisite: 203 for Summer Quarter, 303 for semester. Offered: AWSpS.

RUSS 383 Conversation In St. Petersburg (4, max. 12) VLPA Designed to improve active vocabulary, further the student's control of idiomatic Russian, and to develop oral skills. (4 credits are offered for the six-week Summer Quarter program, 8 credits for the fourteen-week semester program.) Prerequisite: 203 for Summer Quarter, 303 for semester. Offered: AWSpS.

Translation one full course period per week. See credit note above. Prerequisites: 303 for 401; 401 for 402; 402 for 403; or permission of instructor. Offered: AWSpS.

RUSS 404 Russian Literary Translation (5) VLPA Intensive practical work in the translation of Russian literary texts. Specific problems associated with the translation of particular kinds of texts. Prerequisite: 303 or 350.

RUSS 450 Intensive Fourth-Year Russian (15) VLPA Covers material of 401, 402, 403 in one quarter. Meets three hours daily. Prerequisite: 303, 350, or permission of instructor. See credit note above. Offered: S.

RUSS 451, 452 Structure of Russian (5,5) VLPA Descriptive analysis of contemporary standard Russian. Detailed phonetic transcription, discussion of major Great Russian dialects as well as variations in popular speech, examination of common roots and productive derivational elements in Russian words, and historical phonetic principles. (Most courses 4, max. 10) VLPA II&S Selection of courses on topics relating to economic issues. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 453 Russian Literature In St. Petersburg (15) VLPA Daily work in phonetics, grammar, conversation, translation, analytical reading, stylistics, newspaper analysis, and advanced syntax. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 481 Russian Language In St. Petersburg (5) VLPA Covers material of 401, 402, 403 in one quarter. Meets three hours daily. Prerequisite: 150, or permission of instructor. See credit note above. Offered: S.

RUSS 482 Research Project In St. Petersburg (12) VLPA Supervised research in student's selected area of concentration, combined with language instruction tailored to the student's field. Successful completion of course requires a 15-page term paper in Russian. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 483 Russian Literature In St. Petersburg (5, max. 10) VLPA Selection of courses on specialized topics in Russian literature; specific authors or periods. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 484 Russian History In St. Petersburg (5, max. 10) VLPA/I&S Selection of courses on specialized topics in Russian political, economic, social, cultural, or art history. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 485 Economics In St. Petersburg (5, max. 10) VLPA/I&S Selection of courses on topics relating to economic issues. Prerequisite: 403 or 450; prior experience in a study abroad program preferred.

RUSS 499 Directed Study or Research (1-5, max. 15) Individual study of topics to meet specific needs. By arrangement with the instructor. Prerequisite: permission of instructor and undergraduate adviser. Offered: AWSpS.

Slavic

SLAV 351 History of the Slavic Languages (5) VLPA External and internal history of Slavic literary
languages from the beginnings to the present time, including the development of writing systems, external attempts at reform, and the development of vocabulary. Offered: Sp.

SLAV 498 Senior Honors Thesis (3-9, max. 9) Directed research on a topic approved by department for a thesis presented in partial fulfillment of requirement for degrees "with honors" or "with distinction". Offered: AWSpS.

SLAV 499 Directed Study or Research (1-5, max. 15) Individual study of topics to meet specific needs. By arrangement with the instructor. Prerequisite: permission of instructor and undergraduate adviser. Offered: AWSpS.

Ukrainian

UKR 401, 402, 403 Elementary Ukrainian (5,5,5) Introduction to spoken and written Ukrainian.

Literature Courses in English

COURSES OF LITERATURE IN ENGLISH

Courses in this section usually do not require prerequisites. The 300-level courses generally deal with particular themes running through a body of literature or involve a comprehensive study of cultural history. The 400-level courses deal with Slavic literatures other than Russian or specific authors and periods in Russian literature. Both levels are primarily for juniors and seniors, but are open to freshmen and sophomores with an interest or background in the subject of the course.

Croatian/Serbian

Czech

CZECH 420 Modern Czech Literature in English (5) VLPA Representative works of Czech literature from the 1920s to the present in the context of earlier Czech literature. Literary theory and criticism applied to prose and drama of major writers, including Hasek, Capek, Vancura, Svorcicky, Kundera, Vacek, and Havel.

Polish

POLISH 420 Modern Polish Literature In English (5) VLPA Representative prose works by leading twentieth-century Polish writers. Polish literature's critique of modern European civilization. The relation of historical memory, collective victimization, and the utopian imagination in Polish literature to political power and national survival.

Russian

RUSS 321 Russian Literature and Culture to 1700 (5) VLPA/AS Literature as an element in Russian culture. Art, architecture, music, philosophy, and folklore also treated. Periods covered include medieval, Renaissance, Reforma, and baroque. Offered: A.

RUSS 322 Russian Literature and Culture 1700-1900 (5) VLPA/AS Literature as an element in Russian culture. Art, architecture, music, and philosophy also treated. Periods covered include the age of Peter the Great, romanticism, realism, and impressionism. Offered: W.

RUSS 323 Russian Literature and Culture of the Twentieth Century (5) VLPA/AS Literature as an element in modern Russian culture. Art, architecture, music, as well as theoretical, intellectual, and national topics running through the period: symbolism, revolution, post-revolution, Stalinist, the "thaw," and contemporary. Offered: Sp.

RUSS 324 Russian Folk Literature in English (5) VLPA/AS Russian popular tradition, including panegyric and its survival into modern times. Genres of the oral tradition, including the folktale, the epic, spiritual and historical songs, and legends. Special attention to modern theories and western European analogues. Offered: W.

RUSS 421 Russian Literature of the Soviet Period In English (5) VLPA Major Russian authors of the twentieth century.

RUSS 422 Russian Literature in Emigration and Exile (5) VLPA Exercises writers who left the Soviet Union during the post-Stalin period up to the fall of communism or who, though they resided in the USSR, published through unofficial channels. Discussion of Aksyonov, Sinajev, Vornov, Zinoviev, and others.

RUSS 423 Russian Film and Fiction (5) VLPA Thematic and structural interrelationships of narrative film and fiction in post-revolutionary Russia.

RUSS 426 Pushkin, Gogol, Turgenev In English (5) VLPA Selections include Eugene Oneogitch and The Queen of Spades by Pushkin, Dead Souls by Gogol, Fathers and Sons by Turgenev, and works of one or two of their contemporaries.

RUSS 427 Tolstoy In English (5) VLPA Major works of Leo Tolstoy.

RUSS 428 Dostoevsky In English (5) VLPA Introduction to the major fiction of Dostoevsky.

RUSS 429 Chekhov In English (5) VLPA Short stories and plays, as well as works of one or two of Chekhov's contemporaries.

RUSS 480 Studies in Russian Literature (3-5, max. 15) VLPA In either Russian or English. Topics vary.

Slavic

SLAV 480 Studies in Slavic Literatures (3-5, max. 15) VLPA Topics vary.

Courses for Graduates Only

Russian

RUSS 501 Russian Language for Graduate Students (2, max. 10) Develops skills of particular use to graduate students. Emphasis on rapid assimilation of vocabulary with sophisticated understanding and maximum retention of vocabulary, and ability to discuss in Russian the more theoretical and abstract kinds of material. Prerequisites: 403 or equivalent and graduate standing in Slavic Languages and Literature or in Russian, East European, and Central Asian Studies.

RUSS 502 Russian Translation (3) Introduction to the theory of translation; translation to and from Russian of selected prose passages in a variety of styles, with emphasis on idiomatic accuracy and stylistic compatibility. Prerequisite: four quarters of 501, or the equivalent established by a diagnostic test.

RUSS 512 Russian Literary Criticism (3) A study of critical positions, problems, and literary values of major Russian literary critics from Belinsky to the present.

RUSS 520 Seminar in Russian Poetry (5) Topics in Russian poetry and poetry criticism to be selected by the instructor and students. Some emphasis on recent theoretical approaches to poetry criticism that are current in Russian; readings will be assigned for both MA and PhD students. Offered: alternate years.

**SLAV 562** History of the West Slavic Languages (5) Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the South Slavic languages. Prerequisite: 560.

**SLAV 565** Old Church Slavonic (4) Rise and development of earliest Slavic literary language and a descriptive study of its orthography, phonology, morphology, and syntax. Readings from normalized texts. Offered: alternate years.

**SLAV 566** Readings in Old Church Slavonic (4) Reading and grammatical interpretation of a selected group of canonical texts, as well as some examples of the various later recensions of Old Church Slavonic. Prerequisite: 555. Offered: alternate years.

**SLAV 570** Seminar in Slavic Linguistics (3) Investigation and discussion of special topics in Slavic linguistics.

**Slavic Languages and Literature**

**SLAVC 600** Independent Study or Research (*)

**SLAVC 700** Master's Thesis (*)

**SLAVC 800** Doctoral Dissertation (*)

**Society and Justice**

101 Gowen

A multi-disciplinary approach to the study of criminal behavior and the criminal justice process in American society. Students select from a number of program offerings and are provided with research and field experience opportunities.

**Undergraduate Program**

**Bachelor of Arts Degree**

The program is under review (1994). Consult adviser about requirements.

**Admission Requirements:** One course from SOC 271, 371, or PSYCH 305; SOC 372 or SO JU 380; one research methods or statistics course; one writing (W) course; minimum 2.00 cumulative GPA, and minimum 2.50 GPA for courses taken to satisfy the above requirements. Admission is competitive, based on the following: GPA, with emphasis on grades received in courses required for admission (applicants accepted normally present cumulative GPAs considerably above 2.50); personal statement representing the student's interest in and commitment to becoming a society and justice major; other evidence of a commitment to the study of society and justice.Sophomore standing preferred. Admission is once a year during spring quarter for the following autumn. The application deadline is the second Friday of spring quarter; admission decisions are made by the end of the fifth week of the quarter.

**Major Requirements:** 400, 401, 405, 425, 430, 440, 473; two research methods courses; SOC 271, 371, 372, PSYCH 305; POL S 360 or 361. Consult departmental adviser for additional requirements.

**Course Descriptions**

See page 55 for explanation of course numbers, symbols, and abbreviations.

**SO JU 310** Research in Society and Justice (1-5, Max, 15) Supervised introductory individual and/or seminar in basic research methods of society and justice. Prerequisite: major standing.

**SO JU 380** Contemporary Issues in Criminal Justice (5) Overview of selected contemporary issues in the criminal justice system. Theoretical, empirical, and practical aspects of such topics as the war on drugs, sexual predators, community policing, family and crime, media, and criminal justice. Prerequisites: POL S 101, 202, 204, or SOC 110.

**SO JU 400** Seminar in Society and Justice (3, Max. 6) Aspects of the administration of justice. Prerequisite: major standing.

**SO JU 401** Field Experience in Society and Justice (5) Participant observation in some public or private agency relevant to the system of justice. Prerequisite: major standing.

**SO JU 405** Introduction to Organized and White Collar Crime (3) Overview of organized and white collar crime. Exposure to definitional problems, distinctive characteristics, potential areas of overlap, and barriers to more effective social control. Addresses impediments resulting from inadequate conceptualizations, legal and operational difficulties in pursuing offenders, and effects of corruption and discretion in the justice system. Prerequisite: major standing.

**SO JU 425** Introduction to the American Court System (3) Philosophical and structural bases of the American court system; roles of attorneys, judges and the public in that system. Some focus also on current challenges to the courts posed by court congestion and alternative dispute resolution, and on future prospects for the courts. Prerequisite: major standing.

**SO JU 430** The Police (5) Conceptual and empirical issues concerning multifaceted and changing roles of the American police. Prerequisite: major standing.

**SO JU 440** Criminal Law and Procedure (4) Substantive and procedural criminal law for lay persons; analysis of the philosophy behind the law, with an emphasis on due process in adult and juvenile courts; case-analysis teaching technique. Prerequisite: major standing.

**SO JU 450** Special Topics in Society and Justice (1-5, Max. 15) Examination of various current topics or issues concerning the criminal justice system in our society.

**SO JU 470** Evaluation Research in Criminal Justice (5) Social science research methods relevant to criminal justice evaluation and operations research. Ethical considerations, formulation of goals and objectives, problem definition and research design, sources and methods of data collection, descriptive statistics, data interpretation, and utilization of research results. Prerequisite: major standing.

**SO JU 473** Corrections (6) Analyzes research on diverse correctional methods, treatment of convicted offenders. Emphasis on program evaluation. Community treatment, fines, restitution, probation, parole, halfway houses, other alternatives to incarceration; correctional institutions, organization of state, federal systems. Problems of administration. Subsidies, govern-
Sociology

202 Savery

The Department of Sociology has a strong commitment to research, publication, and training and is dedicated to providing a rich undergraduate program, both for students majoring in sociology and for others who wish to learn about human society and social relations.

Undergraduate Program

Director of Instructional Programs
James Dorr
210 Savery

Bachelor of Arts Degree

Admission Requirement: No fewer than 10 credits of course work in sociology, to include SOC 110 or equivalent, with a 2.50 GPA for all sociology courses earned at the time of declaring a sociology major. Special circumstances will be reviewed on a case-by-case basis.

Major Requirements: 50 credits in sociology, including:
(1) SOC 110 or equivalent; (2) SOC 328-329, to be fulfilled as soon as possible after declaration of a major in sociology; (3) at least one course in each of the following areas of sociological study: criminology, social psychology, social change, scientific method, social research. Students are expected to have completed an M.A. degree in sociology or another field.

Graduate Program

Sociology seeks to explain social structure, social institutions, and social interaction. The department has graduate program specialization in demography and ecology; deviance and social control; race and ethnic relations; family systems; gender studies; macro-sociology; organizations and occupations; quantitative research methodology; social psychology; sociological theory; and stratification. Emphasis is on empirical research aimed at testing theories and generating new principles. Students are trained in problem formulation, research design, data gathering and analysis, and bringing data to bear on significant questions. Instruction is offered in various methods: statistical, survey design, computer, demographic and ecological, interaction observation, experimental, case study, field research, and historical. Students learn social research by participating in faculty projects or developing their own studies. Also available is an extensive program in training students to teach.

The graduate program aims at completion of the Master of Arts degree in two calendar years and the Doctor of Philosophy degree in three years beyond the M.A. degree, although not all students finish in this time. A thesis is required for the M.A. degree. For the Ph.D. degree, the student must be certified in general methodology and in a major and a minor substantive area, in addition to completing an approved dissertation.

Special Requirements

Applicants for admission to the Master of Arts program are evaluated on their undergraduate performance. Graduate Record Examination scores, statement of educational plans, recommendations, and samples of their written work are considered. Applicants for the Ph.D. program are expected to have completed an M.A. degree in sociology in this department or elsewhere. Occasionally, M.A. degrees in other fields are accepted as a basis for admission to the Ph.D. program. The department encourages applications from minority students.

Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of training.

Professors
Barth, Ernest A. T. 1955, (Emeritus); PhD, 1955, University of North Carolina.
Backer, Howard S. 1991; PhD, 1951, University of Chicago; sociology of art, sociology of science, qualitative methods.
Borgatta, Edgar F. 1980, (Emeritus); PhD, 1952, New York University; methodology, social psychology, demography-ecology, aging.
Burstein, Paul A. 1985; PhD, 1974, Harvard University; political sociology, social stratification, public policy, law.
Campbell, Frederick L. 1968; PhD, 1967, University of Michigan; population and ecology, social organization.
Chirot, Daniel 1974; PhD, 1973, Columbia University; modernization, political sociology, peasant societies.
Cook, Karen S. 1972, PhD, 1973, Stanford University; experimental social psychology, theory, organizations, medical sociology.
Costner, Herbert L. 1959; PhD, 1960, Indiana University; methodology, social change.
Grosz, Edward 1965, (Emeritus); PhD, 1949, University of Chicago; formal organizations, industrial sociology, symbolic interaction, sociology of law.
Guest, Avery 1972; PhD, 1970, University of Wisconsin; demography, ecology, stratification.
Hamilton, Gary G. 1993; PhD, 1975, University of Washington; economic sociology, historical comparative, organizational studies, East Asia.
Hirschman, Charles 1987; PhD, 1972, University of Wisconsin; demography, race and ethnic relations, social stratification, Southeast Asia.
Lang, Kurt 1984, (Emeritus); PhD, 1953, University of Chicago; political and social effects of the media on mass communication.
Larsen, Otto 1958, (Emeritus); PhD, 1955, University of Washington; mass communications, public opinion, collective behavior.
Locke, Hubert G. 1976, (Adjunct); MA, 1962, University of Michigan; criminal justice, urban policy, race and ethnic relations.
Miyamoto, Frank 1941, (Emeritus); PhD, 1950, University of Chicago; social psychology, collective behavior.

Patrick, Donald L. 1987, (Adjunct); PhD, 1972, Columbia University; aging, disablement, and health-related quality of life.
Raftery, Adrian E. 1985; Doctorate, 1980, University of Paris (France); time series, spatial statistics, population estimation, model selection, Bayesian statistics.
Schmid, Calvin F. 1925, (Emeritus); PhD, 1930, University of Pittsburgh.
Schmitt, David R. 1968; PhD, 1963, Washington University; experimental social psychology, exchange relations.
Schwartz, Pepper J. 1972; PhD, 1974, Yale University; family, gender, human sexuality, field methods.
Scott, Joseph W. 1985; PhD, 1963, Indiana University; political sociology, family, gender, human sexuality, field methods.
Stark, Rodney 1971; PhD, 1971, University of California (Berkeley); scientific methods in theory and research, religion, demography, prejudice, police.
van der Berghe, Pierre L. 1965; PhD, 1960, Harvard University; comparative sociology, stratification, race and ethnic relations, kinship, sociobiology.
Wagner, L. Wesley 1954, (Emeritus); PhD, 1959, University of Chicago; organizations/occupations, theory, culture.
Weis, Joseph G. 1974; D.Crim, 1974, University of California (Berkeley); crime, delinquency, social control, deviance.

Associate Professors

Bridges, George S. 1982; PhD, 1979, University of Pennsylvania; deviance, social control, law, and legal institutions.
Cohen, Joseph 1926, (Emeritus); PhD, 1935, University of Michigan; sociology.
Crutchfield, Robert D. 1979; PhD, 1980, Vanderbilt University; demography, criminology, social control, stratification.
Grembowski, David 1980, (Adjunct); PhD, 1982, University of Washington; dental health demand, fluidization, dental health services research.
Howard, Judith A. 1982; PhD, 1982, University of Wisconsin; social psychology, gender roles.
Kasaba, Resat 1985, (Adjunct); PhD, 1985, State University of New York (Binghamton); historical sociology, world systems, social change in the Middle East.
Kashima, Tetsuden 1976, (Adjunct); PhD, 1975, University of California (San Diego); sociology.
Kiser, Edgar V. 1988; PhD, 1987, University of Arizona; political sociology, theory, historical sociology.
Lavey, William R. 1965; PhD, 1982, University of Michigan; social demography of China.
McCann, James C. 1969; PhD, 1972, Brown University; methodology, demography.

Assistant Professors

Briones, Julie E. 1993; PhD, 1990, Harvard University; gender, stratification, family, methods.
Conley, Darlene J. 1991; PhD, 1990, Northwestern University; urban sociology, the sociology of drug abuse, philanthropic foundations.
Jefferson, Ronald L. 1990; PhD, 1992, Yale University; social theory, political sociology, comparative and institutional sociology.
Lyke, Diane N. 1988; PhD, 1989, University of Pennsylvania; patterns of family change in developed countries.
Neuhouser, Kevin L. 1990; PhD, 1990, Indiana University; political economy of developing nations (especially Latin America), gender.

222 COLLEGE OF ARTS AND SCIENCES / SOCIETY AND JUSTICE
Reisman, Sharon L. * 1991; PhD, 1991, University of Michigan; comparative historical sociology, focusing on the politics of labor movements.

Senior Lecturer

Black, Albert W. * 1972; PhD, 1976, University of California (Berkeley); race and ethnic relations, stratification, social movements, race and poverty.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Upper-division courses (300 and 400 levels) in the Department of Sociology generally require SOC 110, Survey of Sociology, or equivalent, as a prerequisite, unless another prerequisite course is designated in the course description. Courses at the 400 level generally require SOC 329-339, or instructor permission, as a prerequisite.

SOC 105 Sociology of Black Americans (5) &S Sociocultural context of the Black person’s environment and consequences of interaction with that environment.

SOC 110 Survey of Sociology (5) &S Human interaction, social institutions, social stratification, deviance, social control, social and cultural change. Course content may vary, depending upon instructor. Offered: AWSpS.

SOC 230 American Demographics (5) &S Lye Recent trends in American society from a demographic perspective. Topics include: fertility, mortality, migration, urbanization, marriage, family structure, aging, labor force, education, residential segregation, and income distribution. Discussion of how demographic change relates to changes in social, economic, political, and cultural life in the contemporary United States.

SOC 241 Introduction to Social Psychology: Perspectives on Social Interaction (5) &S Major perspectives on social interaction. Social exchange, cooperation and competition, group dynamics, social influence, leadership, altruism and aggression. Structural and personal variables that determine social interaction. Offered: AWSp.

SOC 281 The African American Experience Through Literature (5) VLPAl&S Instructs students in hermeneutical and sociological methods of analysis. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with AFFRAM 281.

SOC 270 Social Problems (5) &S Processes of social and personal disorganization and reorganization in relation to poverty, crime, suicides, family disorganization, mental disorders, and similar social problems.

SOC 271 Introduction to the Sociology of Deviance (5) &S Bridges, Crutchfield, Weis Examination of deviance, deviant behavior, and social control. Deviance as a social process; types of deviant behavior (e.g., suicide, mental illness, drug use, crime, “sexual deviance,” delinquency); theories of deviance and deviant behavior; nature and social organization of societal reactions; and social and legal policy issues. Offered: AWSp.

SOC 299 Sociology Interest Group (2) &S Provides opportunity for students new to the major, or contemplating the major, to meet twice weekly in a small group to discuss issues relating to two designated five-credit sociology courses. Concurrent enrollment in the two five-credit designated courses required. See department adviser. Offered: ASP.

SOC 301 War (5) &S Chirat Origins and conduct of war, readings from anthropology, political science, economics, and history, as well as two novels and some recent articles on the arms-control controversy. Modern forms of warfare, including guerilla war, world war, and nuclear war. Offered: jointly with SIS 301.

SOC 328-329 Methodology of Sociological Research (5-6) &S, QSR Logic of formulating, testing, and modifying hypotheses. Methods of producing social and research hypotheses; data collection methods (both, field work, and survey research); analysis of data (census data, historical data). Methods of both quantitative analysis and qualitative analysis in sociological research. Credit not given to students who have taken 320 or 323. Prerequisite: at least two prior courses in sociology. Offered: AWSpS.

SOC 330 Human Ecology (5) &S Factors and forces that determine the distribution of people and institutions.

SOC 340 Symbolic Interaction (5) &S Role of language and culture in changing the human organism into a socialized human being; interpersonal processes and how they are shaped by the symbolic environment. Offered: introductory course in social psychology.

SOC 341 Tutoring Sociology (2-4) Trains students to serve as tutors in designated courses. Teaches how to assist with writing assignments, explain course material, and lead group discussions. Credit/no credit only. Prerequisites: 240, 241, or equivalents.

SOC 344 Cognitive Social Psychology (5) &S Cognitive processes and structures and their antecedents and consequences; the family and the growth of self. Reciprocal influences of social roles, social institutions, and social cognition. Prerequisite: 240 or equivalent or permission of instructor.

SOC 345 Collective Behavior (5) &S Behavior of large numbers in crowds, masses, publics, and social movements where institutional definitions for joint action are minimal and the events are often not open for credit to students. Prerequisite: 240 or permission of instructor or adviser.

SOC 346 Group Processes (5) &S Cook, Schmitt Systematic analysis of social processes in small groups, including conformity, deviance, cooperation, competition, coalition, conflict, social identity, and role differentiation. Prerequisite: 240 or equivalent.

SOC 350 Contemporary American Institutions (5) &S Guest Origins and development of major social institutions. Sociology of economic structure, political organization, religion, education, recreation, and other institutionalized patterns.

SOC 352 The Family (5) &S The family as a social institution. Historical changes and societal variation in family patterns. Changes over the life cycle. Alternative family forms.

SOC 353 The Family in Cross-Cultural Perspective (5) &S Form, content, and functions of families through case studies of different countries. Family organization, including family structure, inheritance, sexual division of labor, and socialization with attention given to patterns of change. Offered: jointly with ANTH 354.

SOC 355 Social Change in Latin America (5) &S Neuhouser, van den Bergh Theories of development and dependency in Latin America. Relations of power and production between social classes and ethnic groups, with special emphasis on Meso-American groups. Offered: jointly with ANTH 355.

SOC 356 Society and Politics (5) &S Burstein, Jepperson, Neuhouser Causes of political change in democratic countries, including public opinion, social movement, interest group activity, and party organization. Offered: jointly with POL S 356.

SOC 360 Introduction to Social Stratification (5) &S Social class and social inequality in American society. Social class, social stratification, power, authority, and interaction are examined in depth, using material from other classes to provide a comparative and historical perspective. Sociological origins of recent conflicts involving race, sex, poverty, and political ideology.

SOC 361 Age and Sex Differentiation (5) &S Physiological and social bases of age and sex differentiation in human societies. The implications of age and sex distinctions for kinship, economic, and political social structures. The relationship between age, sex, and other bases of social inequality.

SOC 362 Race Relations (5) &S Interpersonal and institutional contacts and conflicts.

SOC 364 Women In the Social Structure (5) &S Howard Gender and social institutions; the family, politics, education, medicine, law, the labor force. Intersection of gender with other minority statuses such as race, age, socioeconomic status, and sexual orientation. Interactional, ideological, and historical determinants of gender relations. Offered: jointly with WOMEN 364.

SOC 365 Urban Community (5) &S Conley, Guest Comparative and analytic study of organization and activities of urban groups.

SOC 366 Bureaucracy in Society (5) &S Hamilton The coming of organizational societies; causes of bureaucracy; informal relations and work groups; ideologies; authority and the division of labor; social change in bureaucracies; the "faceless" bureaucrat in relationship to client needs; comparative organizations; complex organizations as settings for research.

SOC 371 Criminology (5) &S Bridges, Crutchfield, Weis Survey of legal definitions, types of criminal behavior, trends and patterns, victimization, characteristics of offenders, environmental influences, diagnostic methods, prediction, theories of crime and delinquency prevention, social policy. Recommended: 271.

SOC 372 Introduction to Criminal Justice (5) &S Weis Examines role of police, courts, and corrections in criminal justice. Applies sociological theories and perspectives to issues in law enforcement, adjudication,

SOC 375 Social Factors in White Collar Crime (5) I&S Wells Concept and etiology of white collar crime, its forms, costs, victims, and innovative developments. Prospects for theoretical explanations and social control.

SOC 399 Undergraduate Internship (2-5, max. 10) Students serve in approved internships. Recommended for sociology majors.

SOC 401 Special Topics in Sociology (5, max. 15) I&S Selected topics of current interest taught by a sociologist active in the field. Topics vary and may be substantive, theoretical, or methodological. Prerequisite: major standing or permission of instructor.

SOC 410 History of Sociological Thought (5) I&S Contributions of individual theorists (from Comte to the present); emphasis on cumulative development of concepts and principles, emergence of sociology as a science, probable future developments.

SOC 411 Selected Topics in History of Sociological Thought (5) I&S Specific areas or eras in the history of sociological thought. Emphasis on the development of sociological theory in relation to the intellectual and social setting of the time. Topics change from quarter to quarter. Some topics are: the development of concepts of order in sociological thought; conflict theories; the development of action theory in sociology; German sociology; Marx, Weber, and Simmel.

SOC 412 Classics of Social Research (5) I&S Becker Analysis of classics of social research from various subfields in sociology, designed to discover and illustrate the varieties of quality such classics exhibit.

SOC 415 Theory of Social Organization (5) I&S State and usages of theory in social organization; importance of linkage between theory and methodology; major features of social organization demonstrated by intensive examination of representative theories of social organization with particular focus on complex forms.

SOC 416 Sociological Theory (5) I&S Jepperson, Kiser Theories of individual action, social order, and institutional change. Cumulative development of solutions rather than on works of given theorists. Theories of social order. How sociological treatments of these issues compare with those offered by economists and other social scientists.

SOC 419 Fieldwork: Observation and Interviewing (5) I&S Becker Perspective, logic, and techniques of qualitative social research and analysis. Nature and uses of intensive interviewing, participant observation, and analytic ethnography. Application of field research principles. Research project required in addition to reading and analysis of classic studies. Recommended: 240 or 352. Offered: W.

SOC 420 Fieldwork: Observation and Interviewing (5) I&S Becker Logic and techniques of qualitative social research and analysis. Intensive interviewing, participant observation, qualitative data analysis (including applications of data base technology, problem formulation, and techniques of visual documentation). Results of student work reported and discussed in class. Offered: Sp.

SOC 426 Methodology: Quantitative Techniques in Sociology (3) I&S Raftery Applied regression analysis with emphasis on interactive computer graphic techniques and interpretation. Application to typical sociological problems. Prerequisites: 329 or 425. Offered: A.

SOC 427 Statistical Classification and Measurement (5) I&S Costner Application of statistical principles and methods to problems of classification and measurement in social research. Prerequisites: 425, 428-429.

SOC 428 Principles of Study Design (5) I&S Costner, Crutchfield, Guest Design study from problem formulation to the analysis and interpretation of data. Prerequisite: 329. Offered: Sp.

SOC 429 Practicum In Data Analysis (3) I&S Bridges, Crutchfield, Guest Introduction to selected programs for data analysis and practice in their application. Practice in coordination research problem, data, and mode of analysis into a coherent, interrelated set. Interpretation of results. Prerequisites: 424-425, 428. Offered: A.

SOC 431 Fertility and Mortality (3) I&S Lye Theories of fertility and mortality, demographic transitions, individual variations. Specific analytic approaches. Familiarity with basic fertility and mortality measures, and with the life table, is assumed.

SOC 432 Population and Modernization (3) I&S Hirschman Examine role of demographic factors in the process of social modernization and economic growth. The approach is both historical, focusing on populations of developed countries since 1700, and analytic, stressing the attempts made by different discipines to deal with the issues. Some on selected topics are: the development of concepts of order in sociological thought; conflict theories; the development of action theory in sociology; German sociology; Marx, Weber, and Simmel.

SOC 433 Research Methods In Demography (3) I&S Lye, McCann Basic measures and models used in demographic research. Sources and quality of demographic data. Rate construction, standardization, the life table, stable population models, migration models, population estimation and projection, measures of concentration and dispersion, measures of family formation and dissolution.

SOC 434 Demographic Issues In Asia (3-5) I&S Lye, McCann Basic measures and models used in demographic research. Sources and quality of demographic data. Rate construction, standardization, the life table, stable population models, migration models, population estimation and projection, measures of concentration and dispersion, measures of family formation and dissolution.

SOC 435 Fieldwork: Observation and Interviewing (5) I&S Becker Logic and techniques of qualitative social research and analysis. Intensive interviewing, participant observation, and analytic ethnography. Application of field research principles. Research project required in addition to reading and analysis of classic studies. Recommended: 240 or 352. Offered: W.

SOC 436 Sociological Theory (5) I&S Jepperson, Kiser Theories of individual action, social order, and institutional change. Cumulative development of solutions rather than on works of given theorists. Theories of social order. How sociological treatments of these issues compare with those offered by economists and other social scientists.

SOC 440-441 Fieldwork: Observation and Interviewing (5) I&S Becker Logic and techniques of qualitative social research and analysis. Intensive interviewing, participant observation, qualitative data analysis (including applications of data base technology, problem formulation, and techniques of visual documentation). Results of student work reported and discussed in class. Offered: Sp.

SOC 446 Methodology: Quantitative Techniques in Sociology (3) I&S Raftery Applied regression analysis with emphasis on interactive computer graphic techniques and interpretation. Application to typical sociological problems. Prerequisites: 329 or 425. Offered: A.

SOC 447 Statistical Classification and Measurement (5) I&S Costner Application of statistical principles and methods to problems of classification and measurement in social research. Prerequisites: 425, 428-429.

SOC 448 Principles of Study Design (5) I&S Costner, Crutchfield, Guest Design study from problem formulation to the analysis and interpretation of data. Prerequisite: 329. Offered: Sp.

SOC 449 Practicum In Data Analysis (3) I&S Bridges, Crutchfield, Guest Introduction to selected programs for data analysis and practice in their application. Practice in coordination research problem, data, and mode of analysis into a coherent, interrelated set. Interpretation of results. Prerequisites: 424-425, 428. Offered: A.

SOC 450 Political Economy of Women and Family In The Third World (5) I&S Neuhouser Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development and political change. Focus on selected issues, including social bases of democracy, political organization, elections, and consequences of public policy. Prerequisites: 356, and a 200-level political science course or equivalent.

SOC 457 Sociology of Religion (5) I&S Neuhouser The relations between religion, polity, economy, and society in particular, economic, political, and social impact of religious beliefs and organizations, as well as the social determination of these beliefs and organizations; the rise of secularism, the rationalization of modern life, and the emergence of political quasireligion.

SOC 460 Social Differentiation (5) I&S Analysis of societal organization based on sex, age, residence, occupation, community, class, race, and age.

SOC 461 Comparative Ethnic-Race Relations In The Americas (5) I&S Sketches the ethnoracial systems operating in American society. Studies these systems as systems, and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at a focus on labor market behavior, the comparisons of who join; characteristics of successful and unsuccessful migrants; consequences of social movement activities. Offers: with ARES 461.

SOC 464 Contemporary Society In The Peoples Republic of China (5) I&S Lye, McCann Separate development of rural and urban social institutions in the Peoples Republic of China since 1949 from a sociological perspective. Family and marriage, social control, educational institutions. Differences of contemporary Chinese and reasons for institutional change. Offered: jointly with SISEA 464.

SOC 465 Complex Organizations (5) I&S Cook Hamilton Examination of the structure of complex organizations. Attention to developing generalizations
SOC 556 The Evolution of the Family (3) van den Berghe Biological evolution of species-specific behaviors and forms of sociality linked to human mating, reproduction, and parenting. Cultural evolution of human systems of kinship and marriage as fitness-maximizing adaptations to a wide range of habitats. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior. Offered: jointly with ANTH 556.

SOC 559 Seminar on Gender Roles (3) Brines, Howard Theoretical issues concerning gender and society. Current state of empirical knowledge on the sociology of gender and strategies for research. Cross-cultural variations in gender roles, how these develop in people, how gender roles develop in society and the social structure, social inequality, and interaction. Prerequisite: graduate standing in a social science. Offered: alternate years.

SOC 561 Society, Chronic Illness, and Disability (3) Critical examination and discussion of sociological approaches—methodological, theoretical, and empirical—in the health-care field. Attention to applied studies that explore the broad implications of chronic illness for personal, social, and institutional arrangements. Prerequisite: permission of instructor. Offered: jointly with HSERV 554.

SOC 562 Seminar in Comparative Race Relations (3) van den Berghe Cross-cultural approach to race and ethnic relations, including case studies from Africa and Latin America. Prerequisite: graduate standing in social sciences.

SOC 566, 567 Seminar in Complex Organizations (3,3) Special topic seminars in the field of complex organizations or industrial sociology.

SOC 568 Social Mobility (3) Description and measurement of social mobility. Determinants of mobility and cross-national comparisons. Consequences of mobility for social behaviors. Emphasizes movement from the socioeconomic position of family of origin to adult position. Prerequisite: 518.

SOC 569 Demographic Studies of Stratification (3) Guest, Hirschman Overview of development of models of socioeconomic achievement ("status attainment" paradigm) in the field of stratification. Begins with work of Blau and Duncan. Covers elaboration of basic models to include race and ethnicity, social psychological variables, class, school and labor market effects, and other structural variables. Prerequisites: 513, 518.

SOC 574 Seminar in Methods of Criminological Research (3) Bridges, Weis Provides training in the technical analysis of published research in criminology; designs and processes studies in parole prediction, prediction of prison adjustment, and prediction of treatment effect.

SOC 581 Special Topics in Theory and the History of Sociological Thought (3, max. 9) Examination of current topics in theory and the history of sociological thought. Content varies according to recent developments in the field and the interests of the instructor.

SOC 582 Special Topics in Research Methods and Statistical Analysis in Sociology (3, max. 9) Examination of current topics in research methods and statistical analysis in sociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 583 Special Topics in Demography and Ecology (3, max. 9) Examination of current topics in demography and ecology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 584 Special Topics in Social Psychology (3, max. 9) Examination of current substantive topics in social psychology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 585 Special Topics in Marriage and Family (3, max. 9) Examination of current substantive topics in marriage and the family. Content varies according to recent developments in the field and the interests of the instructor.

SOC 586 Special Topics in Organization and Industrial Sociology (3, max. 9) Examination of current substantive topics in organizational and industrial sociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 587 Special Topics in Deviance and Social Control (3, max. 9) Examination of current substantive topics in deviance and social control. Content varies according to recent developments in the field and the interests of the instructor.

SOC 588 Special Topics in Stratification and Race Relations (3, max. 9) Examination of current substantive topics in stratification and race relations. Content varies according to recent developments in the field and the interests of the instructor.

SOC 589 Special Topics in Macrosociology (3, max. 9) Examination of current substantive topics in macrosociology. Content varies according to recent developments in the field and the interests of the instructor.

SOC 590 Special Topics in Sociology (3, max. 9) Examination of current substantive topics in sociology. Content varies according to recent developments in the field and the interests of the instructor. Topics covered in courses with this number lie outside those covered by other special topics courses numbered 581 through 588.

SOC 591 Political Sociology (3) Introduction to political sociology, considering the rise of the modern state, power, political organization, social movements, and other related topics.

SOC 600 Independent Study or Research (*) Credit/no credit only.

SOC 700 Master's Thesis (*) Credit/no credit only.

SOC 800 Doctoral Dissertation (*) Credit/no credit only.

Speech and Hearing Sciences
203 Eagleson

The speech and hearing sciences concern the processes and disorders of verbal communication. The undergraduate program includes the study of normal language development, speech acoustics, speech physiology and perception, hearing, the nature of language, speech and hearing disorders in children and adults, and the clinical processes involved in identification, prevention, and remediation of those disorders.

Undergraduate Program

Director of Student Services
Melissa Johnson
205 Eagleson

Bachelor of Science Degree

Admission Requirements: 2.50 overall GPA. Recommended preparation includes high school physics or equivalent; introductory exposure to human learning, sensory, perceptual, and cognitive processes, general physiology and the physiology of behavior, and college mathematics.

Core requirements for all options: 29 credits in the following: SPHSC 201, 202, 203, 307, 510, 311. Students following Options II, III, or IV below must have a 3.00 GPA in courses that make up the common core. Students following Options III or IV must meet additional grade-point requirements to participate in clinical practicum.

OPTION I, GENERAL ACADEMIC

Intended to provide broad perspectives of the field, but not to prepare students for professional careers in the speech and hearing sciences.

Major Requirements: Core requirements listed above; 25 credits in courses dealing with normal and abnormal language, speech, and hearing taken from the following: SPHSC 315, 330, 332, 370, 380, 401, 402, 410, 411, 416, 420, 430, 431, 459; PHYS 114 and 117, or 207; ZOOL 118.

OPTION II, BASIC SCIENCES

Intended for students who wish to continue graduate study in speech and hearing that leads to university teaching and research careers, but does not include clinical training in audiology or speech pathology.

Major Requirements: Core requirements listed above; 28-37 credits, including SPHSC 401, 402, 410, 418, 420, 499, and 6 credits in the speech pathology or clinical audiology areas; 28-30 credits outside the department, including a mathematics course that deals with calculus; one course each in statistics, psychology (learning, memory, or cognition), and human physiology; PHYS 114 and 117, or 207; ZOOL 118.

OPTION III, CLINICAL SCIENCES—AUDIOLOGY

Intended for students who wish to continue graduate study and to obtain clinical training in audiology.

Major Requirements: Core requirements listed above; 36 credits, including SPHSC 315, 330, 332, 370, 380, 401, 420, 431, 451 (audiology); at least 9 credits outside the department, in psychology (deviant personality, cognitive development, developmental psychology, neural and sensory bases of behavior), educational psychology (behavior measurement and management, statistics); PHYS 114 and 117, or 207; ZOOL 118.

OPTION IV, CLINICAL SCIENCES—SPEECH/LANGUAGE PATHOLOGY

Intended for students who wish to continue graduate study and to obtain clinical training in speech/language pathology.

Major Requirements: Core requirements listed above; 36 credits, including SPHSC 315, 330, 332, 370, 380, 401, 430, 451 (audiology); at least 9 credits outside the department, in psychology (deviant personality, cognitive development, developmental psychology, neural and sensory bases of behavior), educational psychology (behavior measurement and management, statistics); PHYS 114 and 117, or 207; ZOOL 118.

Graduate Program

The Department of Speech and Hearing Sciences offers the Master of Science and Doctor of Philosophy degrees. The program consists of a wide range of course work and seminars providing opportunities for

228 COLLEGE OF ARTS AND SCIENCES/SOCIOLOGY
the development of scholarly and professional competence in various areas of specialization: language acquisition, phonology, speech perception, hearing, audiology, and neurogenic communication disorders. Special candidates for advanced degrees are expected to have earned 50-60 credits in the speech and hearing sciences at the undergraduate level, depending upon the specific area of graduate specialization chosen. The M.S. (thesis) degree requires a minimum of 30 credits of approved course work, plus an acceptable thesis (9 credits). This degree program is recommended for students who plan to continue graduate study for the Ph.D. degree. The M.S. (non-thesis) degree is intended primarily for students who desire careers as speech and hearing clinicians, but who do not intend to continue study for the Ph.D. degree. A minimum of 45 credits is required, of which 25 must be at the 500 level or above in this program. Students also complete the academic and practical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association. These requirements necessitate more than the minimum 45-credit program for most students. A thesis is not required. For the Ph.D. degree, individually tailored programs of study are developed to focus on specialized areas of interest within speech science, experimental and clinical audiology, and speech/language pathology.

Financial Aid
A number of teaching and research assistantships are available for qualified graduate students. In addition, the department has training fellowships supported by the U.S. Department of Education, the National Institutes of Health, and the Department of Veterans Affairs.

Research Facilities
The department's research laboratories, as well as those of the Virginia Merrill Bloedel Hearing Research Center, contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Child Development and Mental Retardation Center also provide laboratories to support applied research in communication processes and remedial procedures.

Faculty

Chairperson
Patricia K. Kuhl

Professors
Dele, Philip S. 1968. Adjunct; PhD, 1968, University of Michigan; psychology, language development.
Fossum, Richard C. 1976; PhD, 1979, University of Washington; pediatric audiology; auditory evoked potentials.
Kuhl, Patricia K. 1976; PhD, 1973, University of Minnesota; speech perception.

Miner, Adah L. 1965, Emeritus and; PhD, 1962, University of Wisconsin; speech pathology, clinical supervision.
Minifie, Fred D. 1971; PhD, 1963, University of Iowa; speech acoustics.
Oswang, Lesley B. 1977; PhD, 1978, University of Washington; language development and disorders; clinical procedures in hearing impaired.
Palmer, John M. 1950, Emeritus; PhD, 1952, University of Michigan; disorders of voice and prothetic deformities, anatomy of speech.
Print, David 1966, Emeritus; PhD, 1961, University of Michigan; fluency disorders.
Stee-Lammon, Cerol 1983; PhD, 1974, Stanford University; developmental phonology and phonetics.
Thompson, Gary 1966, Emeritus; PhD, 1967, University of Minnesota; pediatric audiology, clinical evaluation.
Thompson, Marie D. 1979, (Adjunct); PhD, 1970, University of Washington; special education (hearing impaired).
Tiffany, William R. 1946, Emeritus; PhD, 1951, Iowa State University; phonetics and speech sciences.
Wilson, Wesley 1966; PhD, 1969, University of Washington; audiology, infant assessment and aural rehabilitation.
Yantis, Philip A. 1965, Emeritus; PhD, 1955, University of Michigan; audiology, clinical evaluation.
Yorkston, Kathryn 1977, (Adjunct); PhD, 1975, University of Oregon; neurogenic communication disorders in adults, electrodiagnosis, speech and hearing.
Associate Professors
Burns, Edward M. 1984; PhD, 1977, University of Minnesota; psychoacoustics.
Carpenter, Robert L. 1970; PhD, 1969, Northwestern University; language and language disorders.
Cogins, Truman E. 1974; PhD, 1976, University of Wisconsin; language disorders in children.
Cooker, Harry .S. 1976, Emeritus; PhD, 1967, University of Iowa; speech physiology.
Mateer, Catherine A. 1979, (Clinical); PhD, 1977, Western Ontario University (Canada); neuropsychology and neurolinguistics.
Miller, Robert M. 1976, (Clinical); PhD, 1976, University of Washington; speech-language pathology/adults.
Norton, Susan J. 1991, (Adjunct); PhD, 1982, University of Washington; normal and non-normal hearing, specifically cochlear mechanics, in humans and animals.
Reich, Alan R. 1977; PhD, 1975, University of Iowa; speech physiology and voice disorders.
Werner, Lynne A. 1986; PhD, 1980, Loyola University (Chicago); auditory development, infant psychoacoustics.

Assistant Professors
Dowden, Patricia A. 1993, (Clinical); PhD, 1993, University of Washington; augmentative communication, cleft palate.
Ogilvey, Suzanne M. 1993, (Clinical); PhD, 1991, University of Washington; diagnostic audiology, aural rehabilitation.
Rogers, Margaret A. 1992; PhD, 1992, University of Iowa; neurogenic speech/language disorders.
Smith, Raymond A. 1975, (Clinical); PhD, 1969, University of Washington.
Stone, Judith R. 1986, Research; PhD, 1986, University of Washington; language development and disorders, counseling.
Strand, Edythe A. 1990; PhD, 1987, University of Wisconsin; neurogenic speech/language disorders.

Takahashi, Gail A. 1992; PhD, 1990, University of Iowa; audiology, clinical evaluation.

Lecturers
Coggins, Kathleen B. 1984; MS, 1974, University of Wisconsin; speech-language disorders/child.
Grigg, Carol A. 1991; MS, 1981, University of Wisconsin; speech-language disorders/adult.
Sanborn, E. Sue 1988, PhD, 1971, University of Washington; clinical audiolog y/aural rehabilitation.
Stachowiak, Shirley A. 1991; MAT, 1975, Indiana University; speech-language disorders/child.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

SPHSC 111 The American English Sound System (2, max. 4) Steel-Gammon. For persons for whom English is not the primary language. Speech sounds of American English. Practice in listening and using American phonetic features. Credit/no credit only. Prerequisite: college-level reading knowledge of English. Offered: AWSp.

SPHSC 205 Human Communication and its Disorders (5) I&S Carpenter. Normal and disordered oral communication. Includes speech, language, and hearing disorders as well as normal processes. Required for majors: open to nonmajors. Offered: W.

SPHSC 300 Speech Science (5) NW Basic physiological and acoustical attributes of normal speech and hearing. For nonmajors only. Offered: AWSp.

SPHSC 303 Language Science (5) VLPA Steel-Gammon. Introduction to techniques of linguistic analysis in the areas of phonetics, phonology, morphology, syntax, and semantics. Required for majors. Offered: A.

SPHSC 307 Speech and Language Development (4) I&S T. Coggins, Olswang. Study of the normal acquisition of speech and language in children. Required for majors. Prerequisites: 220, 303; or permission of instructor. Offered: Wsp.

SPHSC 310 Introduction to Hearing Science (5) NW, QSR Fossum, Werner. Acoustic properties of simple and complex sounds; description of normal audition; elementary structure and function of the hearing mechanism. Required for majors. Offered: AW.

SPHSC 311 Speech Science: Speech Production (5) NW Minifie, Reich. Physiological, acoustical, and
perceptual aspects of speech production. Examples and laboratory work directed toward students with interests in speech pathology and audiology. Required for majors. Prerequisites: 201, 310, 310 may be taken concurrently. Offered: Asp.

SPHSC 315 Survey of Hearing Impairment (3) Sanborn Causes of hearing impairment and their psychological, social, and educational/vocational effects on the individual. Prerequisite: 310. Offered: Asp.

SPHSC 332 Clinical Processes I: Assessment (4) NW Owlsang, Stone Principles and procedures for the assessment of speech and language disorders. Prerequisites: 307, 330, 330 may be taken concurrently. Offered: Asp.

SPHSC 335 Clinical Processes II: Treatment (4) NW Owlsang, Stone Principles and procedures for planning the effective treatment of speech and language disorders. Prerequisites: 330, 332, and permission of director of student services. Offered: WS.

SPHSC 370 Basic Audiology (5) NW Theory and practice of the assessment of hearing function, including standard pure-tone audiometry, speech audiometry, and otoscopy. Prerequisites: 315 and permission of director of student services. Offered: WS.

SPHSC 380 Introduction to Aural Rehabilitation (4) NW Sanborn Principles and methods of using auditory and visual cues and communication strategies to improve communication functioning. Prerequisites: 370 and permission of director of student services. Offered: Sp.

SPHSC 391 Practicum in Audiology (1-4, max. 10) NW Sanborn Guided experiences in audiological assessment and aural rehabilitation of children and adults. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/WS.

SPHSC 401 Neural Bases of Speech and Language (4) NW Rogers, Strand Neuromotor and neural control bases of motor speech production and language processes. Laboratory. Prerequisite: 201 or permission of instructor. Offered: AS.

SPHSC 402 Advanced Phonetic Analysis (2) NW Steel-Gammon Transcriptional and acoustic features of speech; includes languages other than English. Prerequisite: 303 or equivalent introductory phonetics course or permission of instructor. Offered: WS.

SPHSC 410 Psychology and Physiology of Audition (4) NW Burns Physiological and behavioral bases of hearing. Correlation of human hearing with acoustic, anatomic, and physiological factors. Offered: A.

SPHSC 411 Perceptual Development (5) 168/NW Kuhl, Metzoff Origins, development of perception in human infants; nature-nurture controversy as applied to perceptual development. Topics from visual, auditory domains. Development of object and face perception; auditory pattern perception; speech perception; categorization; perception of three-dimensional space; auditory localization; cross-modal relations among touch, vision, audition. Offered: jointly with PSYCH 411; irregularly.

SPHSC 416 Speech Acoustics and Perception (3) NW Kuhl, Minifie Historical perspectives and current research on speech acoustics and perception: neuropsychological organization of the auditory system; identification and description of speech and language; machine recognition of speech; animal communication; speech evolution; implications for people with impaired communication skills. Offered: A.

SPHSC 420 Instrumentation for Speech and Hearing Sciences (3) NW General problems in design and fabrication of equipment used in the speech and hearing sciences. Laboratory problems and demonstrations. Offered: Sp.

SPHSC 430 Nature of Stuttering (3) NW Major theories of stuttering are studied in light of research concerning the characteristics of stutterers and their relatives. Prerequisite: 250 or permission of instructor. Offered: A.

SPHSC 431 Language Disorders of Children (4) NW Carpenter, Coggins Consideration of descriptions and theories, both historical and contemporary, of disordered language in children and related problems. Prerequisites: 250, 303, 307. Offered: Asp.

SPHSC 449 Special Studies in Speech Pathology and Audiology (*) max. 30 Selected special problems in speech pathology and audiology. Prerequisite: instructors permission. Offered: Sp.

SPHSC 451 Speech Pathology-Audiology Practicum in the Schools (1-10) Clinical practicum special projects, offered only in the school setting. Provides an opportunity for students to extend practicum experiences in this special environment. Credit/no credit only. Prerequisites: 350 or permission of instructor. Offered: A/WS.

SPHSC 453 Communication Augmentation for Non-Speaking Individuals (3) NW Communication needs of non-speaking individuals. Interdisciplinary approaches to the evaluation, selection, and implementation of aided and unaided communication augmentation systems. Prerequisite: basic course work in either speech and hearing sciences, physical therapy, occupational therapy, or engineering, or permission of instructor. Offered: jointly with REHAB 456; irregularly.

SPHSC 470 Hearing and Aging (3) NW Consequences of hearing impairment on speech recognition and perception in older adults. Focus on information important to the speech-language pathologist regarding assessment and management. Not open to audiology majors except by permission of instructor. Prerequisite: 370 or permission of instructor. Offered: W.

SPHSC 479 Pediatric Audiology (3) NW Faison Assessment of auditory disorders in infants and young children. Emphasis on behavioral and electrophysiological techniques and on the role of the audiologist in the clinical management of the young hearing-impaired child. Prerequisite: 370 or equivalent. Offered: Sp.

SPHSC 489 Undergraduate Research (1-5, max. 15) Prerequisite: permission of instructor. Offered: A/WS.

Courses for Graduates Only

SPHSC 502 Advanced Anatomy of Speech and Hearing Structures (2) Directed independent dissection and study of selected anatomic structures of the speech or hearing mechanisms. Prerequisites: 201 and permission of instructor. Offered: AW.

SPHSC 503 Current Issues in Speech and Hearing Sciences (3) Application of experimental methods to research in speech and hearing sciences. Offered: irregularly.

SPHSC 504 Research Methods in Speech and Hearing Sciences (3) Minifie Introduction to empirical methods in the speech and hearing sciences. Offered: AW.

SPHSC 505 Clinical Research in Communication Disorders (3) Owlsang Introduction to clinical research. Methodological issues concerning the evaluation of treatment for speech, hearing, and language disorders. Primary emphasis on time series designs. Prerequisite: 504 or permission of instructor. Offered: W.

SPHSC 510 Physiological Acoustics (3) Burns Study of pertinent literature and experimental techniques associated with speech-language disorders. Prerequisites: 410 and familiarity with algebra and trigonometry. Offered: odd years; W.

SPHSC 511 Psychoacoustics (3) Burns Review of significant literature and theory pertinent to normal auditory sensation, loudness, and other attributes of auditory sensation. Prerequisites: 410 or permission of instructor; MATH 120 or equivalent. Offered: odd years; Sp.

SPHSC 512 Auditory System Development (3) Werner Review of the anatomical, physiological, and behavioral development of the auditory system. Consideration of literature dealing with both human and nonhuman systems, with emphasis on general principles of auditory development. Prerequisite: 410 or permission of instructor. Offered: A.

SPHSC 514 Speech Physiology (3) Study of the physiological parameters of acoustic speech production. Prerequisites: 310, 311, or permission of instructor. Offered: odd years; A.

SPHSC 515 Speech Acoustics (3) Minifie Study of the acoustic and subjective parameters of speech. Prerequisites: 310, 311, 514; or permission of instructor. Offered: even years; W.

SPHSC 516 Speech Perception (3) Kuhl Study of the perceptual and linguistic parameters of speech perception. Prerequisites: 310, 311, 515; or permission of instructor. Offered: even years; Sp.

SPHSC 519 Seminar In Speech Science (2, max. 6) Offered: A/WS.

SPHSC 520 Advanced Instrumentation for Speech and Hearing Sciences (3) Design and use of electronic and electroacoustic devices in the speech and hearing sciences. Four hours of laboratory required each week. Prerequisite: 420. Offered: W.

SPHSC 525 Speech Signal Processing (3) Theory, evaluation, and use of speech signal processing algorithms such as sampling, filtering, spectral analysis, autocorrelation, and speech synthesis. Laboratory assignments develop skills in using signal analysis and synthesis software applied to normal and pathological speech. Offered: Sp.

SPHSC 531 Neurogenic Motor Speech Disorders (4) Strand The nature of dysarthria and apraxia of speech and the evaluation and treatment of those disorders. Prerequisite: 401 or permission of instructor. Offered: Sp.

SPHSC 532 Neurogenic Language Disorders (4) Rogers Nature of aphasia and other neurogenic language disorders; evaluation and treatment of those disorders. Prerequisite: 401 or permission of instructor. Offered: W.

SPHSC 533 Speech Pathology in a Medical Setting (3) Rogers For speech pathology students who intend to work in a hospital. Prerequisites: 531, 532 or permission of instructor. Offered: Sp.

SPHSC 534 Dysphagia and Associated Disorders (3) Miller Articophysiologic bases of function and dysfunction associated with speech-language disorders. Mastication and swallowing problems, their causes, assessment, and management. Prerequisites: 201, 401. Offered: irregularly.

SPHSC 535 Voice Disorders (4) Reich Physiology, acoustics, and perception of the normal and disordered human voice. Physiology, evaluation, and treatment of phonatory disorders. Offered: WS.

SPHSC 536 Assessment of Language Impairment in Children (5) Carpenter, Coggins Principles and procedures used in the assessment of speech- and language-impaired children and adolescents. Pre-
requirements: 332, 431, and permission of instructor. Offered: S.

SPHSC 537 Treatment of Stuttering (4) Description and evaluation of therapy systems for children and adults who stutter. One hour per week of clinical observation is integrated with class material. Prerequisites: 350 and 430; or permission of instructor. Offered: A.

SPHSC 540 Phonological Development (3) Stoel-Gammon Selected topics in the developmental sequence of phonological systems in normal-speaking children. Relationships between possible phonological inventories and rules systems in different languages. Prerequisites: LING 451, 452, or permission of instructor. Offered: jointly with LING 540; even years; W.

SPHSC 541 Syntactic and Semantic Development (3) Date Advanced topics in the study of first-language acquisition by children, including cognitive bases of language, cross-linguistic research, early semantic systems and their reorganization, learnability theory, and other theories of acquisition. Prerequisite: LING/PSYCH 447 or permission of instructor. Offered: jointly with LING 541; odd years; Sp.

SPHSC 550 Intervention with Communication Disorders In the School Setting (2) Cole Study of administrative and clinical issues in implementation of programs to remediate communication disorders in the school-aged population. Field experiences and professional issues. Open to nonmatriculated students with permission of director of student services. Prerequisite: graduate student in speech and hearing sciences or permission of director of student services. Offered: W.

SPHSC 551 Advanced Practicum in Speech Pathology Evaluation (1-9, max. 10) Laboratory experience in the evaluation of speech and language disorders. Credit/no credit only. Prerequisite: 526 and permission of instructor. Offered: AWPSpS.

SPHSC 552 Advanced Practicum in Speech Pathology Management (1-9) Laboratory experience in the management of speech and language disorders. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSpS.

SPHSC 555 Practicum in Speech and Hearing Sciences (1-9) Practicum in speech pathology or audiology designed to teach the clinical regimen of a participating professional center prior to assuming a full internship assignment. Credit/no credit only. Offered: AWP.

SPHSC 556 Seminar in Speech-Language Development (2, max. 6) Prerequisites: 307 and 431 or permission of instructor. Offered: Sp.

SPHSC 569 Seminar in Speech-Language Pathology (2, max. 6) Offered: AW.

SPHSC 570-571 Assessment of Auditory Dysfunction I, II (5-6) Strategies and procedures in the auditory evaluation of hearing-impaired adults. Laboratory required. Prerequisite: 370 or equivalent. Offered: A-W.

SPHSC 573 Electrophysiologic Assessment of Auditory Function (3) Folsom Consideration of electrophysiologic techniques that may be used to evaluate the normal and disordered auditory system. Outside laboratory required. Prerequisite: 310 or permission of instructor. Offered: Sp.

SPHSC 575 Medical Backgrounds in Audiology (3) Res. Diseases and injuries of the ear resulting in reduced audition. Prerequisite: 571 or permission of instructor. Offered: S.

SPHSC 581 Management of Hearing-Impaired Children (3) M. Thompson Management of hearing-impaired children, including identification of target behaviors and methods for modification such as individualized therapy programs and parent and teacher involvement. Offered: S.

SPHSC 582 Hearing Aid Amplification (4) Takahashi Acoustic amplification and methods of determining electroacoustic characteristics. Includes earmold technology. Prerequisites: 370, 390; or permission of instructor. Offered: W.

SPHSC 583 Hearing Aid Selection (4) Takahashi Consideration of strategies utilized in selecting acoustic amplification for the hearing impaired, including review of pertinent research literature. Prerequisite: 552 or permission of instructor. Offered: Sp.

SPHSC 584 Industrial and Community Hearing Conservation (3) Psychophysiological effects of environmental noise on man. Techniques of noise measurement and attenuation, including the planning of hearing conservation programs in industry and in the community. Prerequisite: 370 or permission of instructor. Offered: irregularly.

SPHSC 588 Practicum (1, max. 3) Consideration of professional issues and student/faculty research in specific areas of interest. Credit/no credit only. Offered: A.

SPHSC 589 Seminar in Audiology (2, max. 6) Prerequisite: permission of instructor. Offered: irregularly.

SPHSC 591 Advanced Practicum in Audiology (1-9, max. 10) Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSpS.

SPHSC 599 Research Practicum (max. 12) Supervised laboratory experience in experimental approach to problems in speech and hearing sciences. Prerequisite: permission of instructor. Offered: AWPSpS.

SPHSC 600 Independent Study or Research (*) Prerequisite: permission of instructor. Offered: AWPSpS.

SPHSC 601 Internship (3-9) Supervised field experiences in settings other than public schools. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWPSpS.

SPHSC 602 Internship in the Schools (3-6) Supervised field experience in a public school setting. Prerequisite: permission of instructor. Offered: AWPSpS.

SPHSC 700 Master's Thesis (*) Offered: AWPSpS.

SPHSC 800 Doctoral Dissertation (*) Offered: AWPSpS.

Speech Communication 205 Raitt

Speech communication is the study of the ways people share meanings and ideas in face-to-face interaction and in other forms of discourse. The major in speech communication is designed to enable students (1) to enhance their theoretical knowledge by understanding speech communication as a form of behavior, a social activity, and an aesthetic endeavor, (2) to improve their critical faculties through analysis of communicative behavior and discourse, and (3) to develop their abilities to apply theory to the practice of communication skills.

Undergraduate Program

Advisers Robert M. Post Beatrice Restoule

2000 Raitt

Students in the department begin their study in introductory courses in public speaking, interpersonal communication, oral interpretation, and small-group decision making. In advanced courses, students study and analyze specialized forms of communication—persuasion, argumentation, small-group facilitation, and communication in instructional settings and large organizations.

Bachelor of Arts Degree

Admission Requirements: A minimum of 30 quarter credits completed and a minimum 2.50 overall GPA (2.50 guarantees consideration, but not acceptance). Recommended courses include 10 credits in quantitative and symbolic reasoning; 10 credits in history, literature, and philosophy; and 10 credits in composition (see department for list of recommended courses). Students submit an application packet that includes (1) application form; (2) current class schedule; (3) copies of transcripts and grades reports; (4) original statement. Applications are due the end of the third week of the quarter. Admission is once a quarter—fall, winter, and spring.

Major Requirements: 60 approved credits, which include 32-33 credits of core requirements (students should consult departmental advisor upon entering the program regarding distribution of core requirements), and 27-28 elective credits, of which 15 credits must be in courses at the 400 level, excluding 499. For core requirements, students must complete 10 credits from SPCH 103, 140, 220; 5 credits from 334, 373; 14-15 credits from 270, 305, 310, 476; and 400. A 2.50 overall GPA in all speech courses taken is required.

Minor

Minor Requirements: 30 credits to include at least 5 credits in theory (SPCH 102, 103, 203, 305, 308, 310, 384, 385, 434, 455, 456, 471, 472, 474, 475, 476); at least 5 credits in criticism (SPCH 222, 270, 323, 375, 424, 425, 426, 428); and at least 5 credits in practice (SPCH 140, 220, 235, 301, 320, 334, 335, 341, 349, 368, 389, 397, 421, 440, 442, 444, 446, 473). SPCH 400 and 499 do not count toward the minor. Minimum 10 credits at the 400 level.

Graduate Program

Barbara P. Warnick, Graduate Program Coordinator

Graduate study is guided by the principle that speech communication is a unified discipline concerned with the ways persons share meanings and how shared meanings affect, and are affected by, persons and society at large. Specialty areas include communication theory; interpersonal, small-group, organizational, instructional, cultural, and developmental communication; communication education; oral interpretation; freedom of speech; argument; rhetorical theory; criticism; and public address. Emphasis is on both "social scientific" and "humanistic" methods of scholarly inquiry.

The M.A. program with thesis requires at least 31 credits of approved course work and a thesis (9 credits). The M.A. program without thesis: 45 credits, including a creative project.

The Ph.D. program usually requires four to five years of study beyond the baccalaureate degree.

Special Research Facilities

A laboratory complex accommodates studies on individuals and groups of varying sizes and includes one-way mirrors, as well as audio and video capabilities. A computer lab houses several personal computers, terminals, and printers that are linked to the University's computer systems. An instructional resource center provides support for the development and use of electronic and print materials for teaching and research.

Admission Qualifications

A background of academic work adequate for pursuit of the degree sought is required. Applicants for the
Ph.D. are normally expected to have an M.A. in speech communication or communications. A GPA and Graduate Record Examination scores that give promise of success in the department's graduate program are required.

**Financial Assistance**
The department annually awards a number of teaching assistantships.

**Correspondence and Information**
Graduate Program Coordinator
205 Reit, DL-15

---

**Course Descriptions**
See page 55 for explanation of course numbers, symbols, and abbreviations.

**Courses for Undergraduates**

- **SPCH 102** Speech, the Individual, and Society (5) VLPA/I&S Provides a basic understanding of human speech communication. Covers three major areas: (1) the nature of human communication, including models, principles, settings; (2) elements of verbal and nonverbal communication; and (3) approaches to, and functions of, human communication, including interpersonal communication, argument, propaganda, free speech. Offered: AWSp.

- **SPCH 103** Interpersonal Communication (5) VLPA/I&S Emphasizes analyzing and understanding communication variables affecting human relationships, such as person perception, feedback, idea development, nonverbal cues. Focus on informal communication settings. Offered: AWSp.

- **SPCH 140** Oral Interpretation of Literature (5) VLPA Analysis and critical study of imaginative literature through the medium of oral performance. Includes verse, prose, and drama. Offered: AWSp.

- **SPCH 203** Communication in the Classroom (5) VLPA/I&S Theory and practice of interpersonal communication in instructional settings. Designed to prepare prospective teachers to employ communication effectively as a medium of teaching and learning, to create a classroom communication environment in which interaction is open and productive. Recommended for all teacher candidates in any discipline.

- **SPCH 220** Introduction to Public Speaking (5) VLPA/I&S Emphasizes choice and organization of material, sound reasoning, audience analysis, oral style, and delivery. Overview of history of rhetoric. Classroom speeches followed by conferences with instructor. Offered: AWSp.

- **SPCH 222** Speech Communication in a Free Society (3) VLPA/I&S Problems and arguments related to freedom of speech: early English writers on freedom of expression; background of freedom of speech in the United States; contemporary freedom of speech issues.

- **SPCH 235** Parliamentary Procedure (3) VLPA/I&S Principles and practice: a study of the historical bases and contemporary uses of parliamentary procedure; methods and practice in organizing and conducting public meetings.

- **SPCH 270** Introduction to Empirical Research in Speech Communication (5) I&S Basic research principles in speech communication science; survey of substantive research findings. Recommended: any 100- or 200-level speech communication course.

- **SPCH 301** Interviewing (5) VLPA/I&S Interviewing principles and practices, with emphasis on information gathering and persuasive interviews. Purposes and types of interviews, structure of interviews, and influence of communication patterns on interview outcomes.

- **SPCH 305** Perspectives on Language in Speech Communication (5) VLPA/I&S Study of language and meaning, and survey of several approaches: meaning of the semantic, general semantic, behavioral, and analytic philosophical. Relates theories of language and meaning to the study of speech communication.

- **SPCH 330** Humanistic Approaches to Interpersonal Communication (5) VLPA Exploration of several humanistic approaches to interpersonal speech communication, emphasizing the theorists' philosophical orientations.

**SPCH 310** The Rhetorical Tradition in Western Thought (5) VLPA/I&S Analysis of the major theories that prescribe and describe the use of symbols to change attitudes and behavior. Principal emphasis is placed upon defining the nature and scope of rhetoric and upon analyzing the art's underlying assumptions about human beings as symbol users. Some background in history, philosophy, and literature is desirable. Recommended: Junior standing.

- **SPCH 320** Public Speaking (5) VLPA/I&S Practice in preparation and presentation of a variety of types of public speeches based on study of their structure and form; emphasis on organization and delivery. Recommended: 220.

- **SPCH 320** Rhetoric of Social and Political Movements (5) VLPA/I&S Inquiry into the rhetoric of social and political movements; emphasis on investigation of persuasive discourse; examination of the nonverbal symbols of persuasion.

- **SPCH 334** Essentials of Argument (5) VLPA/I&S Argument as a technique in the investigation of social problems; evidence, proof, refutation, persuasion; logic and its application to practical problems. Offered: AWSp.

- **SPCH 335** Methods of Debate (5) VLPA/I&S Debate as a method of advocacy, with emphasis on the analysis of value and policy questions. Prerequisite: 220 or 334.

- **SPCH 341** Oral Interpretation of Children's Literature (5) VLPA Study and performance of children's literature, emphasizing oral interpretation as a method of teaching literature in the elementary school.

- **SPCH 349** Readers Theatre (2, max. 10) VLPA Preparation and public presentation of programs of literary works. Creative credit only. Prerequisites: 140 and permission of instructor.

- **SPCH 368** Small Group Facilitation (3) VLPA/I&S Methods for facilitating discussion in small groups formed for the purposes of instruction. Emphasis is on each student's practical application of the insights derived. Prerequisites: permission of instructor, concurrent registration in 368. Recommended: 102.

- **SPCH 369** Small Group Facilitation Practicum (2) VLPA/I&S Implementation of the theoretical principles taught in 368. Emphasis on direct application of those principles to an assigned group of students from 102. Prerequisite: concurrent registration in 368.

- **SPCH 373** Principles of Group Discussion (5) VLPA/I&S Discussion as an everyday community activity, with emphasis on the informal cooperative speech-making methods of committees, conference, and roundtable groups.

- **SPCH 375** Ethics in Interpersonal and Public Communication (5) VLPA/I&S Ethical problems in interpersonal and public speech communication. Alternative ways of evaluating and responding to moral problems in a variety of communication situations.

- **SPCH 385** Cultural Codes in Communication (5) VLPA/I&S Social and cultural codes in interpersonal communication, with special reference to contemporary American subcultural groups and their communicative patterns.

- **SPCH 385** Fieldwork in Communication Studies (5) VLPA/I&S Theory and practice of participant observation, intensive interviewing, and discourse analysis in the study of communicative practices.

- **SPCH 400** Theoretical Backgrounds in Speech Communication (3) VLPA/I&S Speech viewed as a form of individual and social behavior, with emphasis on the function of symbols in speech communication in informal and societal settings. The development of speech as a field of study and its contemporary emphases.
SPCH 421 Advanced Speech Composition (5)  VLPA/1&S Preparation and delivery of public speeches with emphasis on style, thought organization, and proof. Analysis of model speeches. Recommended: 220 or 320.

SPCH 424 Rhetorical Perspectives in Intellectual Revolutions (5)  VLPA/1&S Rhetorical investigation of selected major writings. Examines the rhetorical dimension in the progress of ideas through analysis of documents of major intellectual revolutions as persuasive works. Relates principal revolutions in Western thought to contemporary controversy. Examines Rights of Man, Communist Manifesto, The Origin of Species.

SPCH 425 American Public Address (5)  VLPA/1&S Historical and critical study of rhetorical discourse and movements and of their relationship to American political, social, and intellectual life. Examines the discourse of the American revolution, debates on the ratification of the federal constitution, the slavery question, Reconstruction, populism, imperialism.

SPCH 428 American Public Address (5)  VLPA/1&S Historical and critical study of rhetorical discourse and movements and of their relationship to American political, social, and intellectual life. Examines Lyceum and Chaussaude movements, progressive era, World War I, the New Deal, isolationism, the Cold War era, civil rights movement, anti-nuclear movement. Recommended: 425.

SPCH 428 British Public Address (5)  VLPA/1&S Historical and critical analysis of significant speeches and speakers and of their relationship to British social, political, and religious life. Historical overview of the major periods of British oratory and of the unique role of the oration in each as a means of exhortation and advocacy.

SPCH 434 Argumentation Theory (5)  VLPA/1&S Theory and research on the structure and properties of argument, argument fields, argument modeling, the influence of audience, argument criticism, and related topics. Prerequisites: 220 or 334.

SPCH 440 Oral Interpretation of Poetry (3)  VLPA Study of forms of verse through analysis and oral presentation. Recommended: 140.

SPCH 442 Oral Interpretation of Fiction (3)  VLPA Analysis and oral interpretation of narrative perspectives in the novel and the short story. Recommended: 140.

SPCH 444 Oral Interpretation of Modern Dramatic Literature (3)  VLPA Study of dramatic literature from Ibsen to the present for purposes of developing understanding, appreciation, and ability to communicate its meaning. Recommended: 140.

SPCH 455 Communication in Children's Environments (5)  VLPA/1&S Study of the communication capacity of children with emphasis on the analysis of the communication process in formal and informal learning environments. Includes examination of communication-based educational approaches and instructional strategies.

SPCH 456 Communication in Adolescent Environments (5)  VLPA/1&S Study of the communication process in youth environments with a primary focus on formal and informal settings. Includes critical analysis of communication in contemporary instructional settings and the development of communication strategies for teaching and learning.

SPCH 471 Persuasion (3)  VLPA/1&S Analysis of the ways in which beliefs, values, attitudes, and behavior are deliberately influenced through communication. Recommended: junior standing.

SPCH 472 Empirical Approaches to Interpersonal Communication (5)  VLPA/1&S Examination of major theoretical positions and empirical research findings in current speech communication literature on interpersonal influence. Emphasis on the insights that such theory and research provides on human speech communication behavior in common interpersonal situations. Recommended: junior standing.

SPCH 473 Problems of Discussion Leadership (3)  VLPA/1&S Critical analysis of leadership in committee and conference, with emphasis on the development of speech effectiveness in the cooperative achievement of goals. Recommended: 373.

SPCH 474 Communication, Conflict, and Cooperation (3)  VLPA/1&S Role of communication in resolving informal conflicts and facilitating interpersonal and intergroup cooperation. Review of empirical literature. In-class simulations and exercises. Prerequisite: 373.

SPCH 475 Organizational Communication (5)  VLPA/1&S Role of communication in organizations, the types of problems arising, and approaches to their resolution. Communication in the human relations and productivity of organizations. Applying communication skills in various organization roles. Recommended: junior standing.

SPCH 476 Models and Theories in Speech Communication (4)  VLPA Examination of selected theories and models of communication, interpretation, and criticism of cognitive, linguistic, and social sciences, as well as of criteria applicable to them. Emphasis on the nature and function of theories and models, especially as these relate to basic principles underlying the scientific study of speech communication phenomena. Recommended: junior standing.

SPCH 498 Special Topics in Speech Communication (2-5, max. 15) Lecture, seminar, and/or team study. Topics vary.

SPCH 499 Undergraduate Research (1-5, max. 10) Prerequisite: permission of instructor. Offered: AWSPS.

Courses for Graduates Only

SPCH 501 Introduction to Graduate Research in Speech Communication (3)

SPCH 510 Rhetoric in Society (4) Selected works of major rhetorical theorists such as Aristotle, Cicero, Augustine, Campbell, Whately, Perelman, and Burke. Examines how rhetorical themes are responsive to and symptomatic of societal conditions and values.

SPCH 521 Studies in Greek and Roman Rhetoric (5) Development of the Greek tradition in rhetorical theory, style, and delivery, and of Roman rhetoric and Delsarte, Bell, Curry, and others. Emphasizes the contributions of Wilson, Ramus, Bacon, Delsarte, and many others.

SPCH 522 Studies in Medieval Rhetoric (5) Critical analysis of selected persons, works, and topics related to the development of rhetorical theory during the Middle Ages.

SPCH 523 Studies in Renaissance and Modern Rhetoric (5) Development of rhetorical theory from the mid-sixteenth to early nineteenth centuries. Examines the contributions of Wilson, Ramus, Bacon, Delsarte, Bell, Curry, and others.

SPCH 525 Rhetorical Criticism (5) History and method of rhetorical criticism. Application of critical standards to notable British and American speeches.

SPCH 526 The Rhetoric of Scientific Revolutions (3) Examines selected topics in the history of science, understanding the interplay of language, situation, culture, and prior tradition in the quest for exact knowledge of the natural world. Focuses on one science, biology, geology or psychology, examining selected revolutions within that discipline.

SPCH 530 Philosophical Issues in Rhetorical and Communication Theory (5) Survey of selected philosophical controversies among speech communication theorists, and analysis of one philosophical approach to communication. Topics include paradigm descriptions of communication, rhetoric and knowledge, linguistic analysis and communication, hermeneutics and dialogue. Prerequisite: graduate standing.

SPCH 540 History of Oral Interpretation (3) Critical analysis of writings by Sheehan, Walker, Rush, Deltsue, Bell, Curry, Emerson, and others.

SPCH 550 Instructional Design In Speech Communication (4) Research, theory, and practice relevant to instructional design in speech communication. Instructional models, writing instructional objectives, strategies, and evaluative measures.

SPCH 555 Instructional Communication (5) Communication in instructional environments. Nature of instructional communication, paradigms for instructional communication research, qualitative and quantitative approaches to instructional communication, verbal and nonverbal classroom interaction.

SPCH 560 Social Scientific Perspectives on Interpersonal Communication (5) Social scientific research and theory on the role of communication in development and maintenance of social relationships. Nature of interpersonal communication, relationships change processes, interpersonal control through communication, and personal communication networks.

SPCH 571 Organizational Communication (5) Examination of social scientific perspectives on communication in organizations. Topics include qualitative and quantitative approaches to process of organizational communication, function and structure of macro networks, superior-subordinate relationships, and the role of communication in organizational change, development, and effectiveness. Prerequisite: graduate standing in the social sciences.

SPCH 572 Theories of Human Communication (4) Description and evaluation of theoretical approaches to the study of human communication. Exploration of their applications to specific subject areas.

SPCH 575 Philosophy of Interpretive Research in Communication (5) Introduction to qualitative researchers to foundations of this approach in Dilthey, Gadamer, Schutz, Weber, Wittgenstein, and others. Emphasizes Gadamer's philosophical hermeneutics.

SPCH 576 Research Methods In Speech Communication (5) Application of behavioral research principles to problems in quantification, design, and analysis of data in speech communication research.

SPCH 577 Research Problems in Speech Communication (3,4, max. 12) Application of methodology and design principles to research problems in speech communication.

SPCH 581 Advanced Research Methods In Speech Communication (4) Application of social scientific methods to problems in quantification, design, and analysis of communication data. Emphasis on advanced data collection concerns, multivariate data analysis, and computer operation. Prerequisite: 576.

SPCH 584 Ways of Speaking (5) Theory and literature of the ethnography of communication, with special emphasis on the descriptive-comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with ANTH 584.

SPCH 588 Small-Group Communication (5) Major small-group theories relevant to communicative behavior. Descriptive and experimental research findings in current speech communication literature. Prerequisite: 473.
Statistics

B313 Pedelford

Probability provides the conceptual foundation and mathematical language for the logic of uncertainty and induction. Statistics is concerned with procedures for the acquisition, management, exploration, and use of information. In order to learn from experience in situations of uncertainty and to make decisions under risk. Statistical practice includes: design of experiments and of sampling surveys; exploration, summarization, and display of observational data; drawing inferences, and assessing their uncertainty; building mathematical models for systems with stochastic components.

By means of joint faculty appointments, courses, and seminars, the Department of Statistics maintains active academic contacts with the School of Business Administration; the College of Engineering; the Departments of Applied Mathematics, Atmospheric Sciences, Computer Science, Economics, Genetics, Geological Sciences, Geophysics, Mathematics, Psychology, Radiology, Sociology, and Zoology; the Center for Quantitative Science; the Applied Physics Laboratory; and the Applied Statistics Division of the Boeing Company. The department has an especially close relationship with the Department of Biostatistics.

Undergraduate Program

Bachelor of Science Degree

The Bachelor of Science program offers broad-based, flexible educational pathways emphasizing the theoretical, practical, or computational aspects of probability and statistics. The program serves the needs of future statisticians in science, industry, business, and government, as well as providing the necessary background and stimulation for graduate study; it also offers excellent opportunities for double-majoring in statistics and either mathematics or computer science.

Admission Requirements: (1) Completion of 45 credits, including MATH 124, 125, 126; a minimum 8 credits must be in the major, including 30 credits in the core and two upper-division courses in STAT 220, 301, 311, 390, or an approved substitute; (2) minimum grade of 2.0 in each of the above listed prerequisites and a cumulative GPA of 2.80 for these courses. Students wishing to declare a statistics major must apply by bringing transcripts which include completed prerequisites to B309 Pedelford during any quarter.

Major Requirements: MATH 124, 125, 126; 307, 308, 309, 324, 325 (the honors sequences in calculus may replace the corresponding regular sequences); ENGR/CSE 142, CSE 143; one course from STAT 220, 301, 311, 390, or approved substitute; 341, 342, 421, 423 and two other upper-division statistics courses chosen with prior approval of the statistics adviser. (Typically these are 394 and 395, which are strongly recommended as preparation for 341, 342) Electives (9 credits): one upper-division course in mathematics, statistics, or computer science, plus two upper-division courses in any discipline (including but not limited to mathematics, statistics, and computer science), all with prior approval of the statistics adviser. The first elective gives an opportunity to define the flavor of the major within interrelated fields, and the other two give a chance to broaden the basis of the major into a special interest area, chosen from the full range of upper-division courses offered at the University. Grades of 2.0 or better in all courses used to satisfy major requirements. Cumulative GPA of 2.50 in required statistics courses.

Minor

See department for requirements.

Graduate Programs

The graduate programs emphasize both the theory and application of statistics, including probability theory, mathematical statistics, data analysis, statistical computing, and scientific applications. An ongoing statistical consulting program provides the students with practical experience in using statistics and in communicating with clients. Under faculty supervision, participants in the program assist members of the University community in applying statistical methodology. The department offers Master of Science and Doctor of Philosophy degrees.

Admission Requirements

Background in mathematics, statistics, or a quantitative field, with 30 or more quarter credits in mathematics and statistics, to include a year of advanced (second-year) calculus, one course in linear algebra, and one course in probability theory. Graduate Record Examination scores, including the Advanced Mathematics subject test; three letters of recommendation from appropriate former or current faculty.

Master of Science Degree

Graduation Requirements: At least twelve approved courses numbered 400 or above with a value of 36 credits or more; of these, at least six courses must be numbered in the 500 series (exclusive of 512, 513) with a value of 18 credits or more, and with a coherent theme. Approved proficiency in statistical computing. Satisfactory participation in statistical consulting and the departmental seminar. Passage of an appropriate final examination. Successful completion of a master's thesis can count as up to three courses worth 9 credits, but cannot replace any of the six courses in the 500 series mentioned above. All programs must be approved in advance by the departmental graduate program coordinator.
### Course Descriptions

**See page 55 for explanation of course numbers, symbols, and abbreviations.**

### Courses for Undergraduates

#### STAT 111 Lectures in Applied Statistics (1) NW
Weekly lectures illustrating the importance of statistical concepts in a variety of fields, including medicine and the biological, physical, and social sciences. Contact instructor for information on emphasized fields of applications. Credit/no credit only. Offered: jointly with BIOST 111, Sp.

#### STAT 220 Basic Statistics (5) NW, QSR
Objectives and pitfalls of statistical studies. Structure of data sets, histograms, means, and standard deviations. Correlation and regression. Probability, binomial and normal, Interpretation of estimates, confidence intervals, and significance tests. Prerequisites: MATH 126, or permission of instructor. Offered: W.

#### STAT 301 Basic Statistics with Applications (5) NW, QSR
Objectives, pitfalls of statistical studies. Structure of data sets, histograms, means, standard deviations. Correlation, regression. Probability, binomial and normal, Interpretation of estimates, confidence intervals, and significance tests. Prerequisites: MATH 126, or permission of instructor. Offered: W.

#### STAT 311 Elements of Statistical Methods (5) NW, QSR
Elementary concepts of probability and sampling: binomial and normal distributions. Basic concepts of hypothesis testing, estimation, and confidence intervals; t-tests and chi-square tests. Linear regression theory and the analysis of variance. Prerequisites: MATH 111 or 120. Offered: W.

#### STAT 316 Regression Analysis and Design of Experiments (3) NW
Introduction to the analysis of data from planned experiments. Analysis of variance and regression analysis with applications in engineering. Prerequisite: ENGR 315 or permission of instructor. Offered: jointly with IND E 316.

#### STAT 341, 342 Introduction to Probability and Statistical Inference I, II (4, 4) NW
Sample spaces, random variables. Distributions: binomial, normal, Poisson, geometric. Expectation, variance, moment generating functions. Central limit theorem. Basic concepts of estimation, testing and confidence intervals. Maximum likelihood estimators and likelihood ratio tests; efficiency, introduction to regression and analysis of variance. Prerequisites: MATH 311, MATH 126. Offered: W.

#### STAT 361, 362 Statistics for Social Scientists (3, 3) NW
Introduction to statistical methodology, measurement scales, design of surveys and experiments, sampling distributions, descriptive statistics, exploratory data analysis, probability distribution, use of computer packages for statistical data analysis, point and interval estimation, hypothesis testing. Prerequisites: MATH 126, or permission of instructor. Offered: alternate years; 1995; Sp.

#### STAT 390 Probability and Statistics in Engineering and Science (4) NW
Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions. Descriptive statistics, transformations, sampling errors, confidence intervals, least squares and maximum likelihood. Ex

---

**Lunenborg, Clifford E. • 1982, (Emeritus); PhD, 1959, University of Washington; psychometrics, multivariate models, individual differences in cognition.**

**Martin, R. Douglass • 1974; PhD, 1969, Princeton University; robust methods, time series, wavelets and neural networks.**

**Nelson, Charles R. • 1975, (Adjunct); PhD, 1969, University of Wisconsin; time series analysis, economic statistical analysis, advanced macroeconomic theory.**

**O'Sullivan, S. Finbar • 1987; PhD, 1983, University of Wisconsin; nonparametric curve estimation, inverse problems, radiology.**

**Perlman, Michael D. • 1978; PhD, 1967, Stanford University; multivariate analysis, decision theory, probability inequalities, convexity.**

**Raftery, Adrian Elmes • 1985; Doctorate, 1980, University of Paris; time series, spatial statistics, population estimation, model selection, Bayesian statistics.**

**Scholz, Friedrich-Wilhelm • 1982, (Affiliate); PhD, 1971, University of California (Berkeley); large-sample theory, nonparametrics, software reliability, risk and tolerance analysis, bootstrap.**

**Shorack, Galen E. • 1965; PhD, 1965, Stanford University; empirical processes, robustness, nonparametric statistics.**

**Siegel, Andrew F. • 1983, (Adjunct); PhD, 1977, Stanford University; exploratory data analysis, statistical computing and graphics, morphometrics, quantitative methods.**

**Stuetzle, Werner • 1984; PhD, 1977, Swiss Federal Institute of Technology; nonparametric methods in multivariate analysis, statistical applications of computer graphics.**

**Thompson, Elizabeth A. • 1985; PhD, 1974, Cambridge University (UK); statistical analysis of human genetic data, statistics of conservation and computational biology.**

**Wallen, Jon A. • 1983; PhD, 1975, University of Washington; large-sample theory, asymptotic efficiency, empirical processes, semiparametric models.**

**Kooperberg, Charles L. • 1991; PhD, 1991, University of California (Berkeley); splines, density estimation, image reconstruction, spatial statistics.**

**Madigan, David • 1990; PhD, 1990, Trinity College (Ireland); Bayesian graphical models, Bayesian networks, intelligent tutoring systems, multimedia architectures.**

**Pericak, Donald D. • 1981, (Research); PhD, 1979, University of Michigan; spatial statistics and envirometrics, morphometrics, statistical consulting.**

**Zell, Judith • 1961, (Research); PhD, 1978, University of Washington; estimation of whale population size and dynamics, statistics in infectious disease research.**

---

**Assistant Professors**

**McDonald, John A. • 1985, (Research); PhD, 1982, Stanford University; scientific computing, interactive graphics, human interfaces, visualization, programming language.**

**Sampson, Paul D. • 1981, (Research); PhD, 1979, University of Michigan; spatial statistics and envirometrics, morphometrics, statistical consulting.**

**Rabiner, Laura A. • 1988, (Research); PhD, 1986, University of Illinois; signal processing, medical imaging.**

---

**Associate Professors**

**Kooperberg, Charles L. • 1991; PhD, 1991, University of California (Berkeley); splines, density estimation, image reconstruction, spatial statistics.**

**Madigan, David • 1990; PhD, 1990, Trinity College (Ireland); Bayesian graphical models, Bayesian networks, intelligent tutoring systems, multimedia architectures.**

**Pericak, Donald D. • 1979, (Affiliate); PhD, 1983, University of Washington; time series and signal analysis, computational environments, statistics of clocks.**

**Riskin, Eve A. • 1990, (Adjunct); PhD, 1990, Stanford University; image compression and processing, signal processing, medical imaging, and pattern recognition.**

---

**Senior Lecturers**

**Morita, June G. • 1982; PhD, 1985, University of California (Berkeley); survey design/implementation, quality control, survival analysis, statistical data analysis.**
Q SCI 482, 483, or permission of instructor. Offered: jointly with Q SCI 480; even years.

STAT 481 Introduction to Mathematical Statistics (5) NW Probability, generating functions; the 
distribution, Jacobians, Bayes theorem; maximum 
likelihood, Neyman-Pearson, efficiency, decision 
theory, regression, correlation, bivariate normal. (Students re-
ceiving credit for either 341 or 390 may not receive credit for 481.) Prerequisites: 311, ECON 311 or 
equivalent; MATH 124, 125, 126; and a course in linear 
Algebra, which may be taken concurrently. Offered: jointly with ECON 481; A.

STAT 486 Experimental Design (3) NW Topics in 
analysis of variance and experimental designs; choice of 
designs, comparison of efficiency, power, sample size, 
pseudoreplication, factor structure. Prerequisite: 
Q SCI 483 or equivalent, matrix algebra. Offered: jointly 
with Q SCI 486.

STAT 491, 492 Introduction to Stochastic Pro-
cesses (5,3) NW Random walks, Markov chains, 
branching processes. Poisson process, point pro-
cesses, birth and death processes, queuing theory, 
estationary processes. Prerequisites: 396 for 491; 491 
and 492. Offered: jointly with MATH 491, 492; A,W.

STAT 498 Special Topics (1-5, max. 15) NW Read-
ing and lecture course intended for special needs of 
students. Permission of instructor. Offered: when demand is 
sufficient. Offered: fall and spring.

STAT 499 Undergraduate Research (1-5, max. 15) 
Prerequisite: permission of instructor. Offered: 
AWSPs.

Courses for Graduates Only

STAT 506 Practical Methods for Data Analysis (4) 
Monte Carlo methods. Data analysis with business 
examples. Data summaries, multivariate data, time se-
ries, multiway tables. Techniques include graphical 
display, transformation, outlier identification, cluster 
analysis, smoothing, regression, robustness. Depart-
mental credit allowed for only one of 403 and 503. 
Prerequisites: B A 500 or QMETH 500 or equivalent 
or permission of instructor. Offered: jointly with QMETH 
503.

STAT 509 Applied Probability Models (4) Overview 
of probability models, random variables, indepen-
dence and conditional probability, Markov chains, sta-
estionary time series. Prerequisites: some advanced 
calculus and linear algebra, familiarity with elementary 
discrete probability models. Offered: jointly with 
AMATH 509; Sp.

STAT 512, 513 Statistical Inference (4,4) General 
theory of statistical inference; estimation and hypoth-
esis testing; multivariate theory; regression, correla-
tion, and analysis of variance. Prerequisites: 395 and 
421, 423, or BIOST 512 (concurrent registration permitted 
for these three) for 512; 512 for 513. Offered: A,W.

STAT 516-517 Stochastic Modeling of Scientific 
Data (4-4) Markovian and semi-Markovian models, 
point processes, processes with stationary and 
estationary increments, birth-death processes, queuing 
models, likelihood methods, estimating equations. Prerequisites: 
511 or 396 for 516; 516 for -517. Offered: A-W.

STAT 519 Time Series Analysis (3) Descriptive 
texts. Stationary and nonstationary processes, 
including ARIMA processes. Estimation of process 
mean and autocovariance function. Fitting ARIMA 
models to data. Statistical tests for white noise. For-
casting. State space models and the Kalman filter. 
Robust time series analysis. Regression analysis with 
correlated errors. Statistical properties of long memory 
processes. Prerequisite: 513. Offered: A.

STAT 520 Spectral Analysis of Time Series (4) 
Estimation of spectral densities for single and multiple 
time series. Nonparametric estimation of spectral den-
sity, cross-spectral density, and coherency for station-
yary time series, real and complex spectral tech-
Aliasing, prewhitening. Choice of lag windows and 
data windows. Use of the fast Fourier transform. 
The parametric autoregressive spectral density estimate 
for single and multiple stationary time series. Spectral 
analysis of nonstationary random processes and for 
randomly sampled processes. Techniques of robust 
spectral analysis. Prerequisites: one of 342, 390, 401, 
or permission of instructor. Offered: jointly with E E 520; 
W.

STAT 521, 522, 523 Advanced Probability (3,3,3) 
Measure theory and integration, independence, laws 
of large numbers. Fourier analysis of distributions, cen-
tral limit problem and infinitely divisible laws, condi-
tional distributions, martingales. Prerequisite: MATH 

STAT 524 Design of Medical Studies (3) Emphasis 
on randomized controlled clinical trials. Bias elimina-
tion, controls, treatment assignment and randomiza-
tion, precision, replication, power and sample size cal-
culations, stratification, and ethics. Suitable for stu-
dents in biostatistics and other scientific fields. Prer-e-
quisites: BIOST 511 or equivalent, and one of 421, 423, 
BIOST 513 or EPI 512; or permission of instructor. 
Offered: jointly with BIOST 524; even years.

STAT 529 Sample Survey Techniques (3) Design 
and implementation of selection and estimation proce-
dures. Emphasis on human populations. Simple, strat-
ified, and cluster sampling; variance estimation; joint 
and two-phase procedures; optimal allocation of resources; estima-
tion theory; replicated designs; variance estimation; 
national samples and census materials. Prerequisites: 
421, 423, QMETH 500 or BIOST 511 or equivalent; or 
permission of instructor. Offered: jointly with BIOST 
529.

STAT 533 Classical Theory of Linear Models (3) 
Introduction to one-, two-, way analysis of variance; 
randomized blocks; fixed, random effects, multiple 
comparisons. Statistical distribution theory for quad-
dratic forms of normal variables. Fitting of the general 
linear model by least squares. Prerequisites: 421 or 
423; and 513, BIOST 513, and a course in matrix algebra. 
Offered: jointly with BIOST 533; Sp.

STAT 534 Statistical Computing I (3) Computa-
tional methods in statistics: sorting, searching and 
classification; random number generation and approx-
ation, numerical methods for least squares and 
principal components, computational geometry, cal-
culation of probabilities, data structures, and data-
based management. Offered: jointly with BIOST 534; 
aternate years; 1995,W.

STAT 535 Statistical Computing II (3) Computa-
tional methods in statistics; generation of pseudo ran-
dom numbers, Monte Carlo quadrature, variance re-
duction techniques, design of Monte Carlo studies, 
nonlinear optimization, nonlinear least squares, se-
lected special topics. Offered: jointly with BIOST 535; 
aternate years; 1995; Sp.

STAT 536 Log-Linear Modeling and Logistic Re-
solution for the Social Sciences (3) Log-linear 
modeling of multidimensional contingency tables. Lo-
gistic regression. Applications to social mobility, edu-
cation, and some special topics. Some computer 
use included. Prerequisite: 570 or permission of in-
structor. Offered: jointly with BIOST 574; alternate 
years; 1996; W.

STAT 537 Statistical Methods for Survival Data (3) 
Statistical methods for censored survival data. Covers 
parametric and nonparametric methods, Kaplan-Meier 
survival function, life table, comparison of survival 
curves, log-rank test, regression models including the 
Cox proportional hazards model, competing risks. Prer-
erequisites: 581 and either 423, BIOST 513, or Q SCI 
483, or equivalent. Offered: jointly with BIOST 576; 
alternate years.

STAT 539 Advanced Analysis and Design of Ex-
periments (3) Concepts important in experimental 
design: randomization, blocking, confounding. ApPLi-
cation and analysis of data from randomized blocks 
designs, Latin and Greco-Latin squares, incomplete 
blocks designs, split-plot and repeated measures, fac-
torial and fractional replicates, response surface ex-
periments. Prerequisite: 570 or 421 (minimum grade 3.0), 
or permission of instructor. Offered: jointly with BIOST 
579.

STAT 571 Analysis of Exact and Mathematical 
Methods for Data Analysis (4) Mathematical methods 
in statistics: generation of pseudo random numbers, 
Monte Carlo quadrature, variance reduction techniques, 
design of Monte Carlo studies, nonlinear optimization, nonlinear 
least squares, selected special topics. Offered: jointly with BIOST 
534; alternate years; 1995,W.

STAT 576 Statistical Methods for Survival Data (3) 
Statistical methods for censored survival data. Covers 
parametric and nonparametric methods, Kaplan-Meier 
survival function, life table, comparison of survival 
curves, log-rank test, regression models including the 
Cox proportional hazards model, competing risks. Prer-
erequisites: 581 and either 423, BIOST 513, or Q SCI 
483, or equivalent. Offered: jointly with BIOST 576; 
alternate years.

STAT 577 Special Topics in Biostatistics offered by 
regular and visiting faculty members. Prere-
requisite: permission of instructor. Offered: jointly 
with BIOST 578.

STAT 579 Advanced Data Analysis (4) Resampling 
methods; jackknife, bootstrap, cross-
validation. Smoothing techniques; local averages; pro-
jections and recursive regression; robust regression. 
Selected aspects of linear regression. Rob-
ust-resistant methods. Density estimation. Clustering 
techniques. The EM-algorithm. Graphical exploratory 
data analysis. Offered: jointly with BIOST 579; 
Prereq.: 513; one of 571, 421, 423; or permission of instructor. 
Offered: jointly with BIOST 579.
Women Studies

B110 Padelford

Women Studies is an interdisciplinary department that offers students the opportunity for intensive, cross-cultural and theoretical study of women. Students select a variety of courses offering breadth in women studies scholarship while pursuing concentrated study in a particular track, such as women and the arts; gender, race, and ethnicity; and women and public policy.

Undergraduate Program

Bachelor of Arts Degree

Major Requirements: WOMEN 200 or equivalent; 5 additional lower-division credits in women studies (excluding 290); one course dealing with race and ethnicity (from women studies or another discipline); 300; 400; 493; 497; 15 additional upper-division credits in women studies (excluding 495, 497, 499), which may include a maximum of 5 credits of 490. Also required: 25 additional upper-division credits which may be satisfied by one of two core option sequences: (1) 25 credits in a women studies track (one of several approved series of interdisciplinary courses); (2) 25 credits in an individual course of study arranged between the student and a women studies advisor, with approval by the director.

Minor

Minor Requirements: 30 credits to include WOMEN 200 or equivalent; 5 additional lower-division credits in women studies (excluding 290); one course dealing with race and ethnicity (from women studies or another discipline); 15 additional upper-division credits in women studies (excluding 495, 497, 499).

Faculty

Chairperson
Susan E. Jeffords

Professors
Bereano, Philip L. * 1975, (Adjunct); JD, 1965, Columbia University; technology, assessment, alternative technology, public policy and social values regarding technology.
Blake, Kathleen * 1971, (Adjunct); PhD, 1971, University of California (San Diego); Victorian literature, children's literature, women's studies.
Boersma, P. Dee * 1974, (Adjunct); PhD, 1974, Ohio State University; population, ecology.
Butler, Johnnella E. * 1987, (Adjunct); EdD, 1979, University of Massachusetts. Gerstenberger, Donna * 1960, (Adjunct); PhD, 1956, University of Oklahoma; twentieth-century literature, Anglo-Irish literature, feminist criticism.
Goldsmith, Lynne * 1983, (Adjunct); MFA, 1979, Cranbrook Academy of Art; fiber arts and related historical and contemporary textile structures and processes.
Graham, Katherine Y. * 1988, (Adjunct); PhD, 1978, University of Washington; family adaptation, quality of life in wellness and illness, professional commitment.
Jeffords, Susan E. * 1985, (Adjunct); PhD, 1981, University of Pennsylvania; feminist theory, American popular culture, and the representation of Vietnam.
Kaplan, Sydney J. * 1971, (Adjunct); PhD, 1971, University of California (Los Angeles); twentieth-century literature, women writers, feminist criticism.
McElroy, Colleen W. * 1972, (Adjunct); PhD, 1973, University of Washington; Black literature, women writers, poetry writing.
Pollak, Vivian R. * 1985, (Adjunct); PhD, 1969, Brandeis University; nineteenth-century American literature, American women writers, biography.
Richey, Cheryl A. * 1973, (Adjunct); DSW, 1974, University of California (Berkeley); cultural and gender issues, intervention design and research.
Schwartz, Pepper J. * 1972, (Adjunct); PhD, 1974, Yale University; family, gender, human sexuality, field methods.
Woods, Nancy * 1978, (Adjunct); PhD, 1978, University of North Carolina; women's health.

Associate Professors

Allen, Carolyn * 1972, (Adjunct); PhD, 1972, University of Minnesota; twelfth-century literature, women writers, contemporary critical theory.
Allen, David G. * 1988, (Adjunct); PhD, 1975, University of Iowa; philosophy of science, critical and feminist theory, psychoanalytic theory.
Aunse, Ana Mari * 1966, (Adjunct); PhD, 1984, Yale University; social support and networks, attitudes and beliefs, community psychology, minority populations.
Clatterbaugh, Kenneth C. * 1966, (Adjunct); PhD, 1966, Indiana University; philosophy of science, modern philosophy, social philosophy.
Cummings, Katherine * 1985, (Adjunct); PhD, 1985, University of Wisconsin; feminist, psychoanalytical, and literary theory, modern and contemporary literature.

Di Stefano, Christine * 1985, (Adjunct); PhD, 1984, University of Massachusetts; political theory (modern and contemporary), feminist theory, political culture.
Dubrow, Gail Lee * 1989, (Adjunct); MA, 1979, University of Oregon.
Hartsock, Nancy C. M. * 1984, (Adjunct); PhD, 1972, University of Chicago; feminist theory, Marxism, contemporary political theory.
Howard, Judith A. * 1982, (Adjunct); PhD, 1982, University of Wisconsin; social psychology, gender roles.
Jacobs, Sue-Ellen * 1974; PhD, 1970, University of Colorado (Boulder); anthropological studies of women, sociocultural approaches, applied anthropology, ethnohistory, North America.
Kanney, Nancy J. * 1976; PhD, 1975, University of Virginia; neural and endocrine controls of food and fluid intake, physiological basis of motivation.
Lawson, Victoria A. * 1986; (Adjunct); PhD, 1986, Ohio State University; Latin American political economy of development, feminist theory in development.
Magary, Diane L. * 1981, (Adjunct); PhD, 1981, University of Washington; family centered health care of children at risk, disabled or handicapped.
Oshansky, Ellen F. * 1985, (Adjunct); DNS, 1985, University of California (San Francisco); psychosocial implications of infertility related to the family, qualitative research.
Palomo, Dolores J. * 1971, (Adjunct); PhD, 1972, State University of New York (Buffalo); Renaissance literature, women writers.
Rhodes, Lorna A. * 1983, (Adjunct); PhD, 1973, Cornell University; medical anthropology, symbolic anthropology, South Asia, religion, psychiatry.
Roberts, Jean Valerie * 1991, (Adjunct); PhD, 1982, University of Pittsburgh; ancient Greek philosophy; history of ethics and political theory; feminist philosophy.
Salas, Elizabeth 1987, (Adjunct); PhD, 1987, University of California (Los Angeles); United States women's history, Chicana history.
Shannon, Margaret A. * 1992, (Adjunct); PhD, 1989, University of California (Berkeley); natural resources, sociology and policy.
Silberstein, Sandra V. * 1982, (Adjunct); PhD, 1982, University of Michigan; TESL, critical theory, discourse analysis, sociolinguistics, language and culture.
Sokoloff, Naomi B. * 1985, (Adjunct); PhD, 1980, Princeton University; Hebrew language and literature.
Steels, Cynthia * 1986, (Adjunct); PhD, 1980, University of California (San Diego); Latin American literature and society, narrative and feminist theory.
Treat, John W. * 1983, (Adjunct); PhD, 1982, Yale University; Japanese language and literature.
Ward, Deborah * 1987, (Adjunct); PhD, 1987, Boston University; health policy and politics, women's paid and unpaid caregiving work.

Assistant Professors

Anagnost, Ann S. * 1990, (Adjunct); PhD, 1985, University of Michigan; ethnography of the state, ideology and popular culture, peasant society, China.
Bryant-Bertall, Sarah * 1990, (Adjunct); PhD, 1986, University of Minnesota; dramatic criticism, semiotics, feminist theatre.
Domanský, Elisabeth * 1991, (Adjunct); PhD, 1981, Ruhr University (Germany); social and cultural history of Germany, 1761 to the present.
DuBois, Thomas A. * 1990, (Adjunct); PhD, 1990, University of Pennsylvania; Nordic and North American
politics; of Kansas; nineteenth-century American, African-American making.

Prerequisite: 200 or a Methods In Women Studies page

AmerIcan menopause; sexuality; pregnancy, its relation to racial stereotyping in American education. looking at how gender, race, class, and sexu­

ality create similarities, differences, and connection across women's experiences. Topics include women's histories and identities, family, sexual choices, work, violence against women, creativity, empowerment, and social change. Offered: AWS.

Moody, Joceyn K. 1991; (Adjunct); PhD, 1992, University of Kansas; nineteenth-century American, African­

American, and women's literature, autobiogaphy, po­etry.

Seers, Laurie J. • 1989; PhD, 1986, University of Wis­consin; Southeast Asian social and cultural history.

Stacey, Robin C. • 1988; (Adjunct); PhD, 1986, Yale University; early and high medieval history, tribal law, Celtic/Anglo-Saxon literature, heresy.

Stygali, Gail • 1990, (Adjunct); PhD, 1989, Indiana University; rhetoric and composition, English language linguistics, law and literature.

Suneyido, Sarawasi • 1993, PhD, 1993, University of Wisconsin; political sociology, sociology of economic change, sociology of gender.

Wenddace Twine, Francine 1994; PhD, 1994, Univer­

sity of California (Berkeley); race and ethnicity, gender and racial identity, feminism and popular culture.

Course Descriptions

See page 55 for explanation of course numbers, sym­bols, and abbreviations.

WOMEN 200 Introduction to Women Studies (5) I&S Suneyido Feminist study of women, society, and culture, looking at how gender, race, class, and sexu­

ality create similarities, differences, and connection across women's experiences. Topics include women's histories and identities, family, sexual choices, work, violence against women, creativity, empowerment, and social change. Offered: AWS.

WOMEN 206 Philosophy of Feminism (5) I&S Philosophical analysis of the concepts and assump­tions central to feminism. Theoretical positions within the feminist movement: view of the ideal society, goals and strategies of the movement, its relation to racial liberation, and ethical issues. Offered: jointly with PHIL 206/POL S 212; Sp.

WOMEN 250 Gender, War, and Peace (5) I&S Jeffords Examines extent to which issues of war and peace can be understood through gender. Discussion of long-accepted traditions that men go to war and women do not, that women are more inclined toward peace, that women need to be protected, that men are naturally aggressive or combative.

WOMEN 257 Psychology of Sex Differences (5) I&S Kenney Major psychological theories of sex-role development; biological and environmental influences that determine and maintain sex differences in behav­ior; sex roles in children, sex differences in aggression, cognitive abilities, achievement motivation, affiliation, sexuality. Not open for credit to students who have taken GSI 244. Recommended: PSYCH 101 or 102. Offered: jointly with PSYCH 257; A.

WOMEN 283 Introduction to Women's History (5) I&S Yee Includes units on American, European, and Third World women that examine centers of women's activities, women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technolog­y, colonization). Offered: jointly with HST 283; A.

WOMEN 290 Special Topics in Women Studies (2­5, max. 15) I&S Offered occasionally by visitors or resident faculty.

WOMEN 300 Research Methods in Women Studies (5) I&S Yee Selected methods in women studies research. Use of historical documents, literary texts, interviews, and computerized data sets in research on human roles. Offered in treatment of research methods in women studies research. Includes drafting proposal for senior thesis project. Prerequisites: 200, 206, or permission of instructor. Offered: A.

WOMEN 310 Women and the Law (5) I&S Focus on the status of women and the law; the legal status of single and married women, the rationale of protective legislation, and the effect of the legal changes such as the Civil Rights Act of 1964 and Equal Rights Amendment. Current cases on abortion, child care, tax laws, Social Security benefits, lesbianism, prostitution. Not offered for credit to students who have taken GIS 355. Offered: A.

WOMEN 313 Women in Politics (5) I&S DiStefano Political theory, historical and contemporary, including writings of the women's liberation movement on the political role of women in society. Empirical studies of the "apolitical woman" process of political activiza­tion in various cultural contexts; women's participation in political decision making. Prerequisites: 200 or a political science course. Offered: jointly with POL S 313.

WOMEN 321 History of Afro-American Women and the Feminist Movement (5) I&S "Feminist Move­ment" from early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and re­sults of resistance to oppression. Examines recent and contemporary attempts at cooperation. Offered: jointly with AFRM 321.

WOMEN 322 Race and Gender: Historical Per­spectives (5) I&S Suneyido. Yee The intersection of race and gender in the lives of women of color in the United States from historical and contemporary per­spectives. Examines real and symbolic racism, sexism, sexuality, and inter-racial dynamics between women of color groups. Offered: jointly with AES 322; A.

WOMEN 323 African-American Women's History (5) I&S Yee Survey of African-American women's exper­ence in United States, 1600 to present. Includes: social, political, economic status of Afro-American women in slavery, freedom, education, activism, Civil Rights, women's rights, other social movements. Ex­plores individual and collective interactions with Afri­can-American man, white man and women, other people of color. Offered: jointly with AFRM 323.

WOMEN 339 Women Writers in English Transla­tion (5) I&S VLPA Feminist analysis of selected contem­porary texts in English or English translation by Chicanal/ Latina writers in the United States; or by Spanish-American, Luso-Brazilian and/or Spanish­

women writers, in their specific socio-historical con­text. Offered: jointly with SPAN 339.

WOMEN 353 Anthropological Studies of Women (5) I&S Jacobs Cross-cultural and comparative survey of the varieties of women's cultural experiences, statuses, and roles in cultural context and the anthro­pological theories used to account for them. Topics include: kinship, language, family, women's position in the gathering, work in preindustrial and industrial societ­ies, matrarchies and matrilineal kinship, childbirth, and women's roles in economic development. Prerequi­sites: 200 or permission of instructor. Offered: jointly with ANTH 353; W.

WOMEN 354 Lesbian Lives and Culture (5) I&S An exploration and overview of lesbianism in historical, social, cultural, and interpersonal contexts. Prerequi­sites: 200 or 206 or permission of instructor.

WOMEN 355 Gender and Masculinity (5) I&S Clatterbaugh Social development of masculinity in American society. Definition of masculinity at different times in history; how men are socialized today; differ­ences in the social development of masculinity for Black men, gay men, physically disabled Individual and collaborative efforts at altering masculinity (e.g., criti­cally examines the "men's movement"). Offered: Sp.

WOMEN 357 Psychobiology of Women (5) NW Kenney Physiological and psychological aspects of women's lives: determinants of biological sex; physi­ological and psychological events of puberty, men­struation, and menopause; sexuality; fertility, pregnancy, childbirth; the role of culture in determining the psychologi­cal response to the physiological events. Prerequi­sites: 200 or 257 or PSYCH 101 or 102 or 257. Offered: jointly with PSYCH 357; W.

WOMEN 364 Women in the Social Structure (5) I&S Suneyido Gender and social institutions: family, politics, education, medicine, law, the labor force. Intersection of gender with other majority status such as race, age, socioeconomic status, and social orientation. Structural, ideological, and histor­i­cal determinants of gender relations. Offered: jointly with SOC 364; A.

WOMEN 374 Methods In Life History Research (5) I&S Jacobs Techniques and procedures for con­structing life histories: use of diaries, letters, photogra­phy, and personal interviews. Technical instruction in use of tape recorder, cataloging, and writing summaries of tapes; use of cameras for copying docu­ments and photography. Each student completes one life history per quarter. Prerequisite: 200. Offered: Sp.

WOMEN 383 Social History of African American Women (5) I&S Yee Multi-racial, multi-cultural study of United States as well as by Spanish-American, Luso-Brazilian and/or Spanish­

women writers, in their specific socio-historical con­text. Offered: jointly with AES 383; A.

WOMEN 400 Senior Seminar in Women Studies (3) I&S Jeffords Part of the senior thesis requirement in Women Studies. For Women Studies majors only. Prerequisite: senior standing. Consultation, directed study.

WOMEN 415 Gender Equity In Education (3) I&S Implications of sex-role stereotyping in American edu­cation, kindergarten through grade 12, and develop­ment of insights into experiences as students, educa­tors, and parents. Includes image of women and girls in curriculum materials, standardized and career coun­seling, teacher behavior, effects of Title IX and affirma­tive action on present school policy, and practical alternatives and skills useful for changing attitudes about sex roles. Prerequisite: 200 or 15 credits in education or Women Studies.

WOMEN 416 Sexist Language and Education (3) I&S How language reflects or determines sexist atti­tudes, particularly in current educational institutions. Includes male and female language use, systematic lexical syntactic distinctions based on sex, derogatory language use, teacher behavior. Effects of Title IX and affirma­tive action on present school policy, and practical alternatives and skills useful for changing attitudes about sex roles. Prerequisite: 200 or 15 credits in education or Women Studies.

WOMEN 439 Women Writers (5) I&S VLPA Feminist analysis of selected texts by Chicana/Latina writers in the United States as well as by Spanish-American, Luso-Brazilian and/or Spanish­

women writers in their
specific socio-historical contexts. Prerequisites: SPAN 303, SPAN 320, and one additional 300-level course beyond 303. Offered: jointly with SPAN 493.

WOMEN 446 Theories and Tactics of the Women's Movement (5) I&S History of the women's movement and its current philosophies and tactics used to achieve change in women's status. Recommended: background in status of women and philosophies of women movements. Prerequisites: 200 or SCC 110, and junior or senior standing. Offered: jointly with SCC 446.

WOMEN 453 Women In Evolutionary Perspective (5) I&S/NW Jacobs Critical appraisal of major theories accounting for sex and gender roles and status differences; cross-cultural tasting of socio-biological, biocultural, cultural racial, and social, and symbolic explanations for "female power and male dominance." Prerequisite: 353 or permission of instructor. Offered: jointly with ANTH 483.

WOMEN 454 Women, Words, Music, and Change (5) VLPA/I&S Jacobs Comparative analysis of use of myths, tales, music, and other forms of expressive culture to account for, reinforce, and change women's status and roles; cross-cultural analysis of planned change and development. Prerequisite: 353 or permission of instructor. Offered: jointly with ANTH 454.

WOMEN 455 Contemporary Feminist Theory (5) I&S Recent work on study of women, focusing on social science research that has challenged our fundamental suppositions about organization of family, nature of moral development, definition of political behavior, conceptualization of time in history, and division of labor in market place. Recommended: 200, 206, or course in social science.

WOMEN 456 Feminism, Racism, and Anti-Racism (5) I&S Builds on examination of the historically shifting meanings of race and racism. Asks how all United States women's daily lives and consciousness are shaped by racial oppression or race privilege. Examines steps being taken towards specifically feminist anti-racist theories and practices. Prerequisites: 200 and 206 or permission of instructor.

WOMEN 464 Chicana Expressive Culture (5) VLPA/I&S Expressive culture of Mexican women in United States. Cultural and artistic practices in home, film, literature (print and oral), and performance. Focuses on ways Chicanas use visual artists re-creation of Chicana culture. Prerequisites: SPAN 303, 322, one additional 300-level course beyond 303 or permission of instructor. Offered: jointly with CHSTUSPAN 464.

WOMEN 467 Spanish Women (5) VLPA/I&S Women's culture in Spain, focusing on women's experience during Civil War; persecution and censorship of women activists, artists, intellectuals during Franco years; changes in women's culture brought about by reproduction of democracy; major issues addressed by contemporary Spanish feminists. Prerequisites: SPAN 303, SPAN 321, and one additional 300-level course beyond 303. Offered: jointly with SPAN 467.

WOMEN 468 Latin American Women (5) VLPA/I&S Issues in women's culture from various Latin American countries, social classes, ethnic groups. Includes female creativity, relationship between female artists and the male tradition, women's exploitation of women, relationship of middle-class to popular feminism, connections between feminism and social change. Prerequisites: SPAN 303, SPAN 321, and one additional 300-level course beyond 303. Offered: jointly with SPAN 468.

CHEM 237, 238, 239; two courses from either PHYS 114, 115, 116 or PHYS 121/131, 122/132, 123/133; MATH 115, 125 or Q SCI 291, 292, and SCI 482, 483. Students who choose calculus for their mathematics requirement are encouraged to take a statistics course such as STAT 311 or SCI 381. Laboratory courses in the biological sciences are recommended, but not required. (The Department of Physics, however, requires concurrent enrollment in laboratory courses associated with PHYS 121, 122, 123.) (2) Introductory Biology (15 credits): BIOL SCI 101, 102, 203, or Ecol 102. Students must achieve a minimum grade of 52 on the BIOL 101/102 test. (5) 39 upper-division biological science credits to include: (a) Zoology Core: a minimum of 25 credits including at least two lecture courses from each of three groups and at least one course with a laboratory component from two groups: Group I. Cell Biology, Development, and Gene Action; Group II. Morphology, Physiology; Group III. Ecology, Natural History, Evolution, Organisms. Consult zoology adviser for a list of approved courses. (b) Zoology Electives: 14 elective credits in the biological sciences. Consult zoology adviser for a list of approved courses. (c) Zoology Core: a minimum of 20 credits including at least one lecture course from each of three groups and at least one course with a laboratory component: Group I. Cell Biology, Development, Gene Action; Group II. Morphology, Physiology; Group III. Ecology, Natural History, Evolution, Organisms. Consult zoology adviser for a list of approved courses. (d) Zoology Electives: elective credits to complete 50 total credits in the biological sciences. Consult zoology adviser for a list of approved courses. A minimum of 20 credits must be "courses in zoology and biology." A minimum of 15 upper-division credits (300- and 400-level) in zoology and biology must be taken at the UW. A minimum GPA of 2.00 is required, to include all courses required for the major.

Bachelor of Arts Degree

Major Requirements: A minimum of 75 credits distributed as follows: (1) Supporting course work (minimum of 29 credits): CHEM 140, 150, 160; CHEM 223, 224 or CHEM 237, 238, 239; MATH 124, 125 or SCI 291, 292, and SCI 381. Laboratory courses in the biological sciences are recommended, but not required. (The Department of Physics, however, requires concurrent enrollment in laboratory courses associated with PHYS 121, 122, 123.) (2) Introductory Biology (15 credits): BIOL SCI 101, 102, 203, or Ecol 102. Students must achieve a minimum grade of 52 on the BIOL 101/102 test. (5) 39 upper-division biological science credits to include: (a) Zoology Core: a minimum of 25 credits including at least two lecture courses from each of three groups and at least one course with a laboratory component from two groups: Group I. Cell Biology, Development, and Gene Action; Group II. Morphology, Physiology; Group III. Ecology, Natural History, Evolution, Organisms. Consult zoology adviser for a list of approved courses. (b) Zoology Electives: 14 elective credits in the biological sciences. Consult zoology adviser for a list of approved courses. (c) Zoology Core: a minimum of 20 credits including at least one lecture course from each of three groups and at least one course with a laboratory component: Group I. Cell Biology, Development, Gene Action; Group II. Morphology, Physiology; Group III. Ecology, Natural History, Evolution, Organisms. Consult zoology adviser for a list of approved courses. (d) Zoology Electives: elective credits to complete 50 total credits in the biological sciences. Consult zoology adviser for a list of approved courses. A minimum of 20 credits must be "courses in zoology and biology." A minimum of 15 upper-division credits (300- and 400-level) in zoology and biology must be taken at the UW. A minimum GPA of 2.00 is required, to include all courses required for the major.

Graduate Program

Programs of study leading to the degree of Doctor of Philosophy are available in the areas of cell biology, developmental biology, developmental genetics, ecology, evolution, behavior, invertebrate and vertebrate morphology, ethology, neurobiology, and neurobiology, as well as medical approaches to the above topics. Interdisciplinary programs are offered in developmental biology, cell and molecular biology, and neurobiology.

Research Facilities

Modern instruments and special facilities needed for advanced instructional and research purposes are available in the main Biology-Laboratory building and in advanced, networked computer system. Extensive natural history collections are housed at the Burke Museum. The facilities of the Friday Harbor Laboratories on San Juan Island are available for research. Departmental graduate students may carry on an extensive part of their research there or at other field stations.
Special Requirements
Entering students should have preparation in several of the areas listed above, organic chemistry, physical chemistry (in some cases, two quarters of college physics, and mathematics through calculus. All students are required to acquire at least three quarters of teaching experience regardless of their source of support.

Financial Aid
Normally all prospective candidates for M.S. and Ph.D. degrees are supported by teaching or research assistantships or by fellowships or traineeships from national or private agencies. Summer appointments are available both on the Seattle campus and at the Friday Harbor Laboratories on San Juan Island.

Application Date
Completed applications for entry in the autumn quarter must be received by January 15.

Professors
Beecher, Michael D. * 1978, (Adjunct); PhD, 1970, Boston University; animal communication, animal behaviors and communication, sensory processes.
Boersma, P. Dee *1974; PhD, 1974, Ohio State University; population, ecology.
Cloney, Richard A. * 1961; PhD, 1969, University of Washington; invertebrate embryology, histology, morphogenetic movements, metamorphosis, biology of ascidians.
Deyrup-Olsen, Ingrid J. * 1964. (Emeritus); PhD, 1944, Columbia University; general physiology, cell-membrane phenomena.
Edmondson, W. Thomas * 1949, (Emeritus); PhD, 1942, Yale University; ecology, rotifers, limnology with emphasis on productivity of lakes.
Edward, John S. * 1967; PhD, 1960, Cambridge University (UK); arthropod neurobiology, insect physiology and development, tundra and alpine biology.
Felsenstein, Joseph * 1966, (Adjunct); PhD, 1968, University of Chicago; evolution and population genetics.
Gobman, Aubrey * 1963, (Emeritus); PhD, 1940, University of California (Berkeley); endocrinology and neuroendocrinology.
Hauschka, Stephen D. * 1972, (Adjunct); PhD, 1966, Johns Hopkins University; muscle differentiation.
Herring, Susan W. * 1990, (Adjunct); PhD, 1971, University of Chicago; vertebrate functional morphology, relations between muscular function and skull growth.
Huyer, Raymond B. * 1977; PhD, 1975, Harvard University; evolutionary and physiological ecology, herpetology, behavior.
Ilg, Paul L. * 1952, (Emeritus); PhD, 1952, George Washington University; invertebrate zoology and systems, copepods, symbiosis of crustaceans.
Kareiva, Peter M. * 1983; PhD, 1981, Cornell University; theoretical ecology, conservation biology, agricultural ecology, plant-insect interaction.
Karr, James * 1991; PhD, 1970, University of Illinois; ecology and conservation biology, water resources, environmental sciences, natural resources.
Kenagy, G. James * 1976; PhD, 1972, University of California (Los Angeles); ecophysiology and behavior, reproduction and life history, population biology, evolution, mammalogy.
Kingsolver, Joel * 1986; PhD, 1981, Stanford University; physiological ecology and evolutionary morphology of insects.
Kohn, Alan J. * 1961; PhD, 1957, Yale University; invertebrate ecology, ecology and functional morphology of marine invertebrates.
Kozloff, Eugenie N. * 1966. (Emeritus); PhD, 1950, University of California (Berkeley); biology of lower invertebrates, ciliates, orthocneids, turbellarians and kinorhynchs.
Lafral, Charles D. * 1971; PhD, 1966, Stanford University; cell and developmental biology, human genetics.
Martin, Arthur W. 1957, (Emeritus); PhD, 1936, Stanford University; comparative invertebrate physiology.
Moody, William J. * 1982; PhD, 1977, Stanford University; single cell electrophysiology, development of electrical properties in embryos.
Murray, James D. * 1988; (Adjunct); PhD, 1956, Oxford University (UK); mathematical biology, biological pattern formation, wound healing, spread of epidemics.
Odell, Garrett M. * 1985; PhD, 1972, Johns Hopkins University; mathematical biology, ecology, models in cell and developmental biology.
Okubo, Akira 1992, (Affiliate); PhD, 1963, Johns Hopkins University; mathematical modeling, ecology.
Orians, Gordon H. * 1960; PhD, 1960, University of California (Berkeley); ecology and ethology, vertebrate social systems, community structure, plant-herbivore interactions.
Paine, Robert T. * 1982; PhD, 1961, University of Michigan; experimental ecology, organization and structure of marine communities.
Pak, John M. * 1969; PhD, 1965, University of California (Los Angeles); neurophysiology, sensory physiology, developmental neurobiology.
Piatsch, Theodore W. * 1978, (Adjunct); PhD, 1973, University of Southern California; ichthyology.
Pinter, Robert B. * 1967; (Adjunct); PhD, 1964, Northwestern University; cybernetics, robotics, biophysics.
Reade, Ronald H. * 1981, (Affiliate); PhD, 1965, Massachusetts Institute of Technology; regulation of ribosomal RNA transcription by RNA polymerase I.
Riddiford, Lynn M. * 1973; PhD, 1961, Cornell University; insect development and physiology, invertebrate endocrinology.
Rohwer, Sievert A. * 1973; PhD, 1971, University of Kansas; ecology and evolution of social behavior, avian biology and systematics.
Schubiger, Gerald A. * 1972; PhD, 1968, University of Zurich (Switzerland); developmental genetic control of Drosophila embryos, pattern formation in imaginal disks.
Snyder, Richard C. * 1949, (Emeritus); PhD, 1948, Cornell University; comparative and functional vertebrate anatomy, vertebrate biology.
Steiner, Robert A. * 1977, (Adjunct); PhD, 1975, University of Oregon; neuroendocrinology.
Swihla, Arthur 1938, (Emeritus); PhD, 1931, University of Michigan; zoology.
Truman, James W. * 1973; PhD, 1970, Harvard University; hormones and invertebrate behavior, insect physiology, circadian rhythms.
Ward, Peter D. * 1984, (Adjunct); PhD, 1976, McMaster University (Canada); invertebrate paleoecology, paleobiology.
Whiteley, Arthur H. * 1947, (Emeritus); PhD, 1945, Princeton University; comparative developmental physiology of invertebrates, gene action, fertilization.
Willows, A. O. Dennis * 1965, PhD, 1967, University of Oregon; invertebrate neuroendocrinology, neural mechanisms underlying behavior.
Wingfield, John C. * 1985; PhD, 1973, University College of North Wales (UK); environmental and hormonal control of avian reproductive cycles.
Yao, Mng Chao * 1986, (Affiliate); PhD, 1975, University of Rochester; regulation of gene amplification and chromosome rearrangements in Tetrahymena.

Associate Professors
Bakken, Ainmee * 1973; PhD, 1970, University of Iowa; gene regulation during oogenesis and embryogenesis, developmental, cellular and molecular biology.
Brenowitz, Elliot A. * 1987; PhD, 1982, Cornell University; animal behavior, neuroethology, neuroendocrinology, animal communication.
Graubard, Katherine * 1979, (Research); PhD, 1973, University of Washington; cellular neurophysiology, neural basis of behavior.
Grifiths, W. Mary 1961, (Emeritus); PhD, 1953, University of California (Berkeley); zoology.
Hille, Merrill B. * 1976; PhD, 1965, Rockefeller University; developmental biology, gasulation in sea urchin embryos, translational regulation during meiosis.
Osterud, Kenneth L. * 1949, (Emeritus); PhD, 1941, New York University; zoology.
Wasikimo, Barbara T. * 1984; PhD, 1981, Indiana University; developmental genetics, gene expression and chromosome organization in eukaryotes.

Assistant Professors
Cooper, Mark S. * 1990; PhD, 1985, University of California (Berkeley); cellular physiology and cell motility in developing tissues.
Kot, Mark * 1989; (Adjunct); PhD, 1987, University of Arizona; mathematical ecology, nonlinear dynamics, and population biology.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
ZOOL 114 Evolution (2) NW Kingsolver Evolutionary biology for nonmajors: Evolutionary history of the earth and various theories of evolution.
ZOOL 118 Survey of Physiology (5) NW Human physiology, for nonmajors and health science students. Offered: AWSpS.
ZOOL 119 Elementary Physiology Laboratory (1) NW Prerequisite: concurrent or previous enrollment in 118. Offered: AWSpS.
ZOOL 220 Diversity in Animals (5) NW Huey Mor, phylogenetic, functional, and ecological diversity within the major phyra of animals. Prerequisite: high school biology or permission of instructor.
ZOOL 301 Introductory Physiology (4) NW Fundamentals of physiology: biochemistry of cell constituents, environment of the cell, bioenergetics, membranes, control mechanisms. Laboratory project required. Prerequisites: chemistry through organic, one year of college physics, 10 credits in biological sciences.

ZOOL 330 Natural History of Marine Invertebrates (6) NW Kohn. Field and laboratory course emphasizing the habits, habitats, adaptations, and interrelationships of marine animals. Students may be required to share a portion of the transportation costs of field trips.

ZOOL 362 Natural History of Vertebrates (5) NW Field and laboratory course on the classification, ecology, adaptations, and natural history of fishes, amphibians, reptiles, birds, and mammals. Students may be required to share a portion of the transportation costs of field trips. Prerequisite: permission of instructor.

ZOOL 403 Comparative Vertebrate Histology (5) NW Cloney. Microscopic and submicroscopic anatomy of vertebrates. Emphasis on mammals. Light microscopy and interpretation of ultrastructure. Functions of basic tissue types and organs as related to structure. Prerequisite: BIOL 202.

ZOOL 408 Mechanisms of Animal Behavior (4) NW Beecher, Brenowitz. Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisites: PSYCH 200 or BIOL 101 and 102 or permission of instructor. Offered: jointly with PSYCH 408.

ZOOL 409 Sociobiology (4) NW Rohwer. Biological bases of social behavior, emphasizing evolution as a paradigm. Topics are: individual versus group selection, kin selection, altruism, group versus individual living, mating systems, parental care of offspring, and competitive strategies. Prerequisites: BIOL 202 or 203 or PSYCH 200, or equivalent. Offered: jointly with PSYCH 409.

ZOOL 410 Ethology and Ecology Laboratory (4) NW Boersma. Field projects on foraging and social behavior, species interactions and structure of terrestrial and marine environments, including special student research problems. Students may be required to share a portion of the transportation costs of field trips. Prerequisite: permission of instructor. Offered: Sp.

ZOOL 434 Marine Zoology (5) NW Strathmann. Survey of groups of invertebrate animals represented in marine environments; natural history, ecology, distribution, behavior, and adaptations. Laboratories include field trips. Offered: at Friday Harbor Laboratories. Offered at Friday Harbor Laboratories: Sp.

ZOOL 433 Marine Invertebrate Zoology (5) NW Compares morphology and biology of marine invertebrates. Laboratory study covers the structure and interrelationships among marine invertebrate animals. Representatives of all major and most minor phyla are collected, observed alive, and studied in some detail. Not open for credit to students who have taken 433 or 434. Prerequisites: BIOL 202 or equivalent and permission of instructor. Offered: at Friday Harbor Laboratories. Offered at Friday Harbor Laboratories: Sp.

ZOOL 433, 434 Invertebrate Zoology (5) NW Kohn. Comparative biology of invertebrates. Laboratories emphasize structures and functions. Not open to students who have taken 432. Prerequisites: BIOL 202; 433 for 434. Offered: A,W.

ZOOL 435 Parasitology (5) NW General course covering the principles of parasitism and the major groups of animal parasites. Prerequisite: 20 credits in biological sciences or permission of instructor.

ZOOL 438 Comparative Endocrinology (3) NW Wingfield. Hormonal integration of living processes at all levels in animals: molecules, cells, organs, organisms, populations. Prerequisite: one year of biology. Recommended: a 400-level course in physiology, biochemistry, or history.

ZOOL 439 Comparative Endocrinology Laboratory (2) NW Wingfield. A broad introduction to endocrine techniques with appropriate experiments to accompany and enlarge on material presented in 438. Prerequisites: 438 and permission of instructor.

ZOOL 440 Biomechanics (4) NW Daniel. Physical biology emphasizing a mechanical approach to ecological, evolutionary, and physiological questions. Basic principles underlying fluid and solid mechanics to explore responses of animals to flows, loads, and motions. Recommended: some familiarity with calculus and introductory physics.

ZOOL 444 Entomology (3) NW Edwards. Biology of terrestrial arthropods, with emphasis on Insects. Structure, classification, physiology, and ecology of insects. Interrelationships of insects and man. Prerequisite: 15 credits in biological sciences or permission of instructor. Offered: Sp.

ZOOL 445 Entomology Laboratory (2) NW Edwards. Structure and function of arthropods, with emphasis on insects. Field studies and taxonomy of important insect groups. Students may be required to share a portion of the transportation costs of field trips. Prerequisite: 15 credits in biological sciences or permission of instructor. Offered: Sp.

ZOOL 448 Concepts of Nervous System Function (3) NW Falke. Broad examination of integrative mechanisms in central nervous system function, with emphasis on sensory processing, plasticity, and control of behavior. Examples are taken from a variety of animal groups.

ZOOL 449 Concepts of Nervous System Function Laboratory (3) NW Falke. Experiments to accompany material presented in 448. Prerequisites: 406, 448, or other courses with a strong neuroscience component.

ZOOL 451 Vertebrate Zoology (5) NW Kenagy. Integrated exploration of the biology of vertebrate animals, emphasizing their diversity, adaptations, life styles, and evolution. History; introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips, films, and writing workshop. Prerequisites: BIOL 201, 202, 203. Offered: A.

ZOOL 455 Developmental Biology of Animals (3) NW Schubiger. Embryology and subsequent development of vertebrate and invertebrate animals, including frogs, mammals, chicks, insects, echinoderms. Morphological changes in developing animals; experimental analysis of developing systems; underlying genetic and biochemical regulation of development. Prerequisites: BIOL 201, 202, 203, or permission of instructor. Recommended: some genetics, cell biology, or biochemistry.

ZOOL 456 Developmental Biology of Animals Laboratory (3) NW Shellenberger. Normal development of living embryos (frog, chick, insect, echinoderm), preparation and interpretation of slides. Comparisons between vertebrate and invertebrate animals. Prerequisites: 455 or equivalent; permission of instructor.

ZOOL 457 Methods and Problems in Development (3) NW Bakken, Schubiger, Wiskom. Special topics. Integrating classical and current approaches. Developmental genetics, experimental embryology, molecular mechanisms of developmental regulation, and gene function in cell determination and cell differentiation in animal systems. Prerequisites: 455 or equivalent and permission of instructor.

ZOOL 464 Natural History of Birds (5) NW Rohwer, Wingfield. Field lecture, and laboratory study of birds framed in biological theory rather than taxonomy. Breeding systems, brood parasitism, appearance, molt, migration, orientation, social behavior, song, and flight are emphasized. Includes Saturday and weekend field trips for which students are required to share a portion of transportation costs. Prerequisites: BIOL 201, 202, 203 or equivalent, and permission of instructor. Offered: Sp.

ZOOL 465 Natural History of Mammals (5) NW Kenagy. Field, lecture, and laboratory course introducing mammals in a general biological context, emphasizing ecology, evolution, behavior, morphology, and adaptation to the environment. Fieldwork focuses on rodent populations and their habitats in Washington State. Students are required to share a portion of the transportation costs. Prerequisites: BIOL 201, 202, 203, and permission of instructor. Recommended: 453 and BIOL 472.

ZOOL 467 Comparative Animal Reproduction (3) NW Ramenofsky, Wingfield. Reproductive mechanisms, environmental influences on reproductive endocrinology, physiology, behavior, ecology of vertebrates. Discussions extend from organismal to cellular level, and focus on diversity of reproductive patterns among vertebrates. Prerequisite: one year of college-level biology. Recommended: biochemistry and physiology.

ZOOL 468 Comparative Animal Reproduction Laboratory (2) NW Ramenofsky, Wingfield. Laboratory and field studies on animal reproduction involving endocrinology, anatomy, behavior, and ecology. Accompanying supplements and materials presented in 467. Prerequisites: 467 or 469, may be taken concurrently, and permission of instructor.

ZOOL 470 Techniques for Mathematical Biology (3) NW Odell. Equips students to use, rather than prove, many applied mathematics techniques essential in mathematical biology. Includes instruction to use software (e.g., Matlab, Maple, and Mma). Students may be required to attend literature, analyze tissue samples. Preparation and analysis of tissues for light and electron microscopy. Students consult appropriate literature, analyze tissue samples, prepare microscopy, and present oral reports. Prerequisites: 403 or 433, 434 with permission of instructor.

ZOOL 484, 485 Animal Physiology (3,3) NW Huey, Riddiford, Truman. Physiology at levels of organisms.
and behavior, organ systems, and cells—an evolutionary and integrative perspective. 484 Organismal physiology: metabolism, temperature, locomotion, osmoregulation, circulation, digestion. 485 Integrative physiology: neurons, muscles, and hormones. Prerequisites: introductory biology, chemistry, and physics.

Zool 486, 487 Animal Physiology Lab (2,2) NW Huey, Riddiford, Truman Experimental design and techniques, data analysis, written reports. 486: project labs in organismal-level physiology. 487: experiments in integrative physiology. Prerequisites: concurrent or previous enrollment in 484 for 486, 485 for 487.

Zool 490 Undergraduate Seminar (3, max. 6) NW Supervised reading and group discussion on selected concepts of zoology. Prerequisites: 20 credits in zoology and permission of instructor.

Zool 491 Topics in Zoological Research (1, max. 3) NW Undergraduate seminar on research problems currently under investigation by department faculty members. Includes discussions and laboratory demonstrations of goals, techniques, and results of zoological research. Prerequisite: permission of instructor. Prerequisites: upper-division standing and permission of instructor.

Zool 498 Special Problems in Zoology (1-5, max. 15) Prerequisite: permission of instructor. Offered: AWSpS.

Courses for Graduates Only

Zool 506 Topics In Developmental Biology (1-2, max. 15) Seminars and discussions of aspects of growth and development of current interest. Prerequisite: permission of instructor.

Zool 509 Topics in Vertebrate Biology (1-3, max. 15) Orionis, Rohwer Detailed consideration of topics in behavioral integration, communication, and social organization. Prerequisite: 409 or PSYCH 409 or equivalent.

Zool 517 Analytical Development Physiology (9) Modern analysis of oogenesis, fertilization, embryonic organization and differentiation from an experimental and comparative point of view, and other advanced topics. Laboratory emphasizes experimental study of metabolic, biochemical, and biophysical properties, structural and mechanical features, subcellular localization, and microscopic organization of gametes and embryos of various marine invertebrates. Prerequisite: permission of instructor.

Zool 520, 521, 522 Seminar (1,1,1) Credit/no credit only. Offered: A,W.Sp.

Zool 525 Seminar In Mathematical Biology (2, max. 12) Daniel, Odell Examines mathematical models in a broad range of topics in biology, from cellular and subcellular to organismal and population phenomena. Participants present research topics supplemented with selected readings from the primary literature, showing how mathematical methods and experimental or field biology are merged to predict observable phenomena. Credit/no credit only. Offered: WSp.

Zool 528 Advanced Topics In Physiology (1-3, max. 15) Recent developments. Prerequisite: one 400-level course in physiology.

Zool 529 Advanced Topics In Physiology (1-3, max. 15) Recent developments. Credit/no credit only. Prerequisite: one 400-level course in physiology.

Zool 533 Advanced Invertebrate Zoology (9) Invertebrate fauna of the San Juan Archipelago. Topic changes from year to year. Individual research projects are emphasized. Prerequisites: 10 credits in invertebrate zoology or equivalent and permission of Director of Friday Harbor Laboratories. Offered: at Friday Harbor Laboratories; Sp.S.

Zool 538 Comparative Invertebrate Embryology (9) Morphological and experimental studies of development of selected types of marine invertebrates. Prerequisites: 433, 434, 456, and permission of Director of Friday Harbor Laboratories. Offered: at Friday Harbor Laboratories; Sp.S.

Zool 538 Advanced Invertebrate Physiology (9) General and comparative aspects of nerve and muscle physiology with particular emphasis upon neuronal control of behavior, neuronal interactions, and other advanced topics determined by visiting faculty. Extensive laboratory experience, including intracellular and extracellular stimulating and recording techniques. Recommended: background in cellular physiology and invertebrate morphology. Offered: at Friday Harbor Laboratories; Sp.

Zool 540 Topics in Cellular Developmental Biology (1, max. 16) Bakken, Cooper, Hille, Moody Seminar on current topics dealing with cellular aspects of developmental biology. Variable topics on both vertebrate and invertebrate development. Credit/no credit only.

Zool 556 Insect Development (3) Edwards, Riddiford, Schubiger Characterizes advanced processes and their adaptations in diverse insect groups. Emphasizes hormonal control mechanisms in metamorphosis, polymorphism and diapause, regeneration and genetic analysis of development. Prerequisites: 456 or equivalent, BIOL 202 or equivalent, or permission of instructor.

Zool 558 Chemical Integration (2, max. 6) Wingfield Graduate seminar dealing with current problems in endocrinology and neuroendocrinology. Credit/no credit only. Prerequisite: permission of instructor.

Zool 570 Evolutionary Physiological Ecology (2, max. 16) Huey, Kingsolver Assigned reading, discussion, and student presentations on issues in physiological and ecological aspects of evolution. Topics variable. Credit/no credit only. Prerequisites: 488 and BIOL 454 and 472 or equivalent.

Zool 571 Current Topics In Evolution (1, max. 16) Huey, Kingsolver Assigned reading and discussion of current topics in evolution. Topics variable. Credit/no credit only. Prerequisite: BIOL 454 or equivalent.

Zool 572 Topics In Ecology (1-3, max. 15) Kareiva, Kingsolver, Kohn, Orionis, Paine Graduate seminar on modern problems in ecology. Prerequisites: BIOL 472 or equivalent, and permission of instructor.

Zool 573 Physiological Ecology (1-3, max. 15) Huey, Kenagy, Kingsolver Perspectives and principles of research in the physiology and behavior of animals in an ecological and evolutionary context, emphasizing whole animals and integration with diverse levels of biological organization. Prerequisite: permission of instructor.

Zool 574 Ecology of Marine Communities (3) Paine Lecture course emphasizing the ecological structure and functioning of marine communities. Topics include population interactions and dynamics, distributional patterns, bioenergetics, stability, and species diversity. Prerequisites: BIOL 472 or equivalent, and permission of instructor.

Zool 575 Topics In Historical Ecology (2, max. 14) Paine Assigned reading and discussion of the history of conceptual issues or significant individuals. Topics variable. Credit/no credit only. Prerequisite: BIOL 472 or equivalent.

Zool 577 Marine Invertebrate Biology (1, max. 8) Kohn Seminar on current topics in biology or marine invertebrates at all levels of biological organization. Topics variable. Credit/no credit only. Prerequisites: 433 and 434 or equivalent.

Zool 578 Advanced Ecology (5) Kareiva Strategies of reproduction, habitat selection, foraging and spacing; theory of competition and predator-prey interactions; niche theory and community structure. Prerequisites: BIOL 472 or equivalent, and permission of instructor.

Zool 579 Criticism In Evolutionary Ecology and Behavior (2, max. 16) Rohwer Critical analysis of manuscripts under preparation that treat evolutionary ecology, morphology, and behavior. Topics variable. Credit/no credit only. Prerequisite: 409 or equivalent introduction to evolutionary thinking.

Zool 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSpS.

Zool 700 Master's Thesis (*) Credit/no credit only. Offered: AWSpS.

Zool 800 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSpS.
School of Business Administration

Acting Dean
Gerhard G. Mueller
114 Mackenzie

Men and women embarking on business careers will have the opportunity to influence many of the social, political, and economic forces in today's world. The School of Business Administration prepares students for professional careers in management and related disciplines in both the private and public sectors.

The School of Business Administration offers an undergraduate program leading to the degree of Bachelor of Arts in Business Administration and graduate programs leading to the degrees of Master of Business Administration, Master of Professional Accounting, and Doctor of Philosophy.

Business Administration became an independent unit within the University system in 1917. It has been accredited by the American Assembly of Collegiate Schools of Business since 1921.

Facilities and Services

Most business administration classes and activities are in two buildings. Balmer Hall, named for Thomas Balmer, former president of the University Board of Regents, contains classrooms, the business administration library, and the business administration computer user center. Mackenzie Hall, named in memory of Prof. Donald Mackenzie, Chairperson of the Department of Accounting from 1949 to 1955, contains the Dean's office, the Office of Graduate Programs, the Office of Undergraduate Programs, faculty offices, and other business administration program offices.

To serve the continuing education needs of business persons, the School of Business Administration offers a number of short programs, either University-initiated or cosponsored with various community and industry organizations. The eight-month management program for middle- to upper-level managers strengthens understanding and skills in all areas of management and provides an opportunity for successful managers to learn from each other. Short courses and workshops are offered throughout the year in all areas of management, including marketing strategy, sales management, managing change, finance, and accounting for non-financial executives, marketing research, tax clinic for small business, and the entrepreneurship symposium. In addition, the School develops and runs in-house training programs under contract with individual companies. Information on continuing education programs may be obtained from the Office of Executive Programs, 543-8560.

International Business Programs

International business programs are coordinated and developed by the School's Center for International Business Education and Research (CIBER). These activities include special graduate and undergraduate certificate programs, seminars, special guest speaker programs, and graduate foreign exchange programs. Each of the five academic departments within the School maintains faculty with special international teaching and research expertise. Internationally-oriented courses are offered by each department.

At the undergraduate level, the School offers the Certificate of International Studies in Business (CIS) Program. Students in the program complete the same demanding business curriculum as other students and enhance this training with foreign language study, area studies, and an international experience. The program requires that students have a solid foundation in one of six language tracks: Chinese, French, German, Japanese, Russian, and Spanish; a seventh custom track for other languages is also an option.

The M.B.A.-level International Management Fellows Program (IMFP) gives qualified students a rigorous curriculum that integrates their graduate course work with advanced foreign language and area studies, an overseas business internship, a foreign study program, and international business course work. As fellows in this intensive program, students may spend a total of nine months outside the United States and may specialize in one of four language tracks: Mandarin Chinese, German, Japanese, or Spanish.

Questions regarding these programs may be directed to the Associate Director, CIBER, 303 Lewis, (206) 685-3432; FAX: (206) 685-9392.

Business Career Center

202 Lewis

Business Career Center

Director
JoAnne Starr

Associate Director
Janelle LaFond

The Business Career Center serves as a resource for business students. Among the services provided to all business students are the A.S.K. (Alumni Sharing Knowledge) mentoring program and a job listing service for career, internship, and part-time positions. Undergraduate business career counseling and on-campus recruitment is provided by the UW Center for Career Services in 301 Low.

All M.B.A. and M.P.Acc. career services are coordinated through the Business Career Center, including career counseling and career management workshops, the administration of special career events such as firm nights, company presentations, and on-campus M.B.A. and M.P.Acc. recruitment. Questions regarding these programs and services may be directed to the Director, 665-2410.

Honor Societies

Beta Gamma Sigma is the national scholastic honor society in the field of business. Election to membership is available to both undergraduate and graduate students in business. Selection is based upon outstanding scholastic achievement.

Beta Alpha Psi is the accounting honor society. Membership is based primarily on scholastic achievement, but some community service is also required. Beta Alpha Psi provides a mechanism for students, professionals, and educators to meet on both formal and informal bases.

Student Organizations

Chapters of Alpha Kappa Psi, Association of Black Business Students, Hispanic Business Association, International Association of Students in Economics and Business Management, American Marketing Association, the Accounting Society, National Honor Relations Management Association, Business Information Technology Alliance, and CIBER are among the many student groups that meet on a regular basis.

Student Organizations

The goals and interests of graduate students are served by the M.B.A. Association, the Center for Entrepreneurship, the Center for Charitable Giving, Graduate Consulting Club, Graduate Finance Club, Graduate International Business Association, Business Diagnostic Center, Graduate Accounting Club, Environmental Business Alliance, Graduate Marketing Club, Toastmasters, and the Doctoral Association.

Undergraduate Program

Undergraduate Office
137 Mackenzie

Associate Dean
Philip Kienast

Director
Patsy Wosepka

Associate Director
Elaine G. Miller

The School of Business Administration admits only for autumn quarter, offering application for early admission to those attending the UW and prepared to declare a business major during their freshman year, and application for upper-division admission to all other students. Admitted students may elect to take classes in the summer quarter prior to autumn quarter admission.

Undergraduate Business Educational Opportunity Program

137 Mackenzie

Director
Jeffrey Hedgepeth

Special admissions assistance, advising, and support services are available for minority students underrepresented at the University, and students from educationally and economically disadvantaged backgrounds. Any student who qualifies for the UW Educational Opportunity Program is eligible. Special scholarships are also available for underrepresented minority students. Academic advisers in 137 Mackenzie have information on the Business Educational Opportunity Program.

Academic Advisers

Holly Bauman
Nancy Clarke

Academic advisers are available to help with selecting classes, adding and dropping classes, long-range planning, applying for graduation, making referrals to other campus resources and programs, and providing any needed general assistance. The Undergraduate Office publishes a weekly newsletter that provides information to majors and premajors.

Bachelor of Arts in Business Administration Degree

Specific School Admission Requirements

Early Admission Group (EAG): Open to students who began their studies at the UW as freshmen, have been enrolled no more than three quarters, and have completed 30 graded credits at the UW to include the following (or equivalents): ECON 200, Microeconomics; MATH 112 or 124, Calculus—most students need precalculus before taking college calculus; an approved English composition course, and pre-college test scores (ACT or SAT). Students must be currently enrolled UW students who have completed autumn and winter quarters in residence.

Upper-Division Admission Group (UAG): Students must present a minimum of 60 academic credits at the time of application including the following graded credits: ECON 200, Microeconomics; MATH 112 or 124, Calculus—most students need precalculus before taking college calculus; an approved English composition course; ACCTG 210, Introduction to Accounting; O E 200, Introduction to Law. In addition, the following course must be completed prior to the quarter of admission, autumn quarter: ECON 201, Macroeconomics; ACCTG 220, Fundamentals of Financial Accounting and ACCTG 230, Fundamentals of Managerial Accounting; QMETH 201, Introduction to Statistical Methods. Students admitted to the UW as freshmen...
are expected to take the accounting, organization and environment, and quantitative methods courses in residence.

Qualified applicants who meet the University and School of Business Administration requirements at the time they transfer are eligible to be placed directly in the school; those with at least 45 credits and a minimum 2.85 GPA who meet the University entrance requirements, but not the business administration requirements, are eligible to be placed in the College of Arts and Sciences as pre-business majors.

For admission to the School of Business Administration, a School of Business application, together with all supporting materials, must be on file by April 10. Records of all course work completed by the deadline must be submitted at the time of application. Since eligible applicants exceed the space available, acceptance is competitive. Admission will be based on evaluation of five factors: (1) pre-college test scores (for Early Admission Group); (2) overall scholastic record; (3) grades in pre-business courses; (4) written communications skills; and (5) evidence of leadership skills, community activities, and the promise of achievement in a business or professional career. In addition, the School of Business is committed to the University's affirmative action policy. Consideration will therefore be given in the admissions process to creating ethnic diversity. No student will be admitted with a cumulative GPA less than 2.50 for all college credits or less than 2.50 for all required business administration courses. A student who has previously attended the UW also must have GPAs of at least 2.50, both UW cumulative and in UW business administration courses (including approved substitutes and required economics courses). The GPA for admission will usually be higher.

Accounting Concentration: The notation "Accounting" will be part of the permanent record, or transcript, of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes a cumulative GPA of at least 2.00 the following courses: ACCTG 301, 302, 303, 311, 330, 411, 421, and 6 elective credits in 400-level accounting courses except 401 and 499. Students who have completed ACCTG 605 may not apply to the accounting concentration. Students who have completed ACCTG 301 may not receive credit for ACCTG 375.

Specific School Graduation Requirements

General Education Requirements: The following must be selected from the University Areas-of-Knowledge courses: (1) 10 credits of English composition; (2) 20 credits in the Natural World, including 5 credits in calculus (MATH 112 or 124)—most students need precalculus before taking college calculus (some precalculus courses qualify for the Natural World requirement); 5 credits in English composition. Students must complete six of the ten upper-division core courses, including Business Policy, and 35 of the 54 required upper-division business credits at the UW. Students who have taken more than four of the upper-division core business courses at another school will not usually be admitted to the School of Business Administration.

- Double Baccalaureate Degrees and Second Baccalaureate Degree

Students who wish to earn more than one baccalaureate degree should consult an academic adviser in the business administration undergraduate office, either during or before the junior year. Persons seeking a second baccalaureate degree should apply at the University's Office of Undergraduate Admissions. To be considered, applicants must complete by quarter of entry the same prerequisites for admission as applicants for the first baccalaureate degree. Since the number of eligible applicants exceeds that for which space is available, acceptance will be competitive, based on the criteria listed above for selection of first baccalaureate degree applicants. The School of Business will use the GPA for the last 90 credits earned.

Graduate Program

Graduate Office
110 Mackenzie
Gary L. Sundern, Associate Dean
Peter A. Frost, Director, Ph.D. Program,
Graduate Program Coordinator
Leighanne Harris, Director, M.B.A. Program,
Alternate Graduate Program Coordinator
Nina Sanders, Director, E.M.B.A. Program

Admission

Qualified students who are graduates of the University of Washington or of other accredited colleges or universities may be admitted to the graduate degree program of interest. University of Washington students who have previously attended the UW also must have GPAs of at least 2.50, both UW cumulative and in UW business administration courses (including approved substitutes and required economics courses). The GPA for admission will usually be higher.

Application Procedure

Applications to graduate programs are considered in the winter and spring of each year for entry in the autumn quarter. The formal deadlines for application are: February 1 for the Ph.D. program; February 1 for international applicants, March 1 for domestic applicants for the M.B.A. and M.P.Acc. programs; and April 15 for the Executive M.B.A. Program.

The Graduate School of Business Administration offers programs of study leading to the advanced degrees of Master of Business Administration, Master of Professional Accounting, and Doctor of Philosophy.

Master of Business Administration Degree

The Master of Business Administration degree program has been designed for students with varied academic backgrounds (e.g., arts and sciences, engineering, business administration) who are preparing for a professional career in management. A period of two academic years, or 96 academic credits, is required for most students to complete the M.B.A. program. The program consists of 48 credits of required first-year courses and 48 elective credits. The student may take no more than 18 credits in any one elective area.

Since the autumn of 1983, the Executive M.B.A. Program has provided an additional pathway to the Master of Business Administration degree. The E.M.B.A. Program promotes an intensive executive development experience to a select group of mid-career managers who continue to work full-time while pursuing the M.B.A. degree. Candidates for this two-year program should have seven or more years of increasingly successful work experience and currently hold mid- or top-level management positions. They are typically sponsored by their organizations and have been identified as being employed in high-level managerial or executive as general managers. Students are selected to ensure diversity of industry, functional areas and organizational size. Classes meet all year on alternate Fridays and Saturdays during the academic year. In addition, students attend spring and fall residence sessions each year. While the curriculum scope is comparable to that of the regular M.B.A. program, the pace is more intense and the perspective is that of a general manager. There are twenty-one required courses and no electives. Applications are accepted throughout the year; with an application deadline of April 15 for the class beginning each autumn. Late applications are handled on a space available basis.

Master of Professional Accounting Degree

The Master of Professional Accounting degree program prepares individuals for high-level careers in the specialized fields of professional accounting and taxation. The M.P.Acc. degree provides an opportunity for graduate study in the typical upper-division business credits at the UW. Students who have previously attended the UW also must have GPAs of at least 2.50, both UW cumulative and in UW business administration courses (including approved substitutes and required economics courses). The GPA for the last 90 credits earned.

Application Procedure

Applications to graduate programs are considered in the winter and spring of each year for entry in the autumn quarter. The formal deadlines for application are: February 1 for the Ph.D. program; February 1 for international applicants, March 1 for domestic applicants for the M.B.A. and M.P.Acc. programs; and April 15 for the Executive M.B.A. Program.

The Graduate School of Business Administration offers programs of study leading to the advanced degrees of Master of Professional Accounting, and Doctor of Philosophy.

Doctor of Philosophy Degree

The Doctor of Philosophy degree in Business Administration is designed primarily for students who wish to pursue academic careers, although the training is also useful for the business career oriented student seeking research positions in business or other institutions. Students must select a major area of concentration and two or three minor supporting areas. Major areas of concentration include accounting, finance, human resource management and organizational behavior, information systems, marketing, operations management, operations research, and strategic management. All students must take research methods as a minor area. The other minor areas can be chosen from either international business, the above list of major areas, or from other areas in the University outside the School of Business Administration, such as economics, psychology, statistics, mathematics, and computer science. The minor areas should support and complement the major area.

Graduation Requirements: Each Ph.D. student must successfully complete course work in the major and minor areas, pass area examinations, successfully defend the thesis proposal in the General Examination, and finally, defend the completed dissertation in the Final Examination.

Doctoral students with strong backgrounds can complete the doctoral program in three years, but most students take four to five years. The School's goal is to make financial aid available, in the form of research and teaching assistantships, to all of its doctoral students. In addition to teaching and research assistantships, fellowships, internships, and other sources of income are available on a competitive basis to support students engaged in their dissertation research during the final part of their programs.
SCHOOL OF BUSINESS ADMINISTRATION / GRADUATE PROGRAM 243

Special Requirements
Applicants to graduate business programs are required to submit scores on the Graduate Management Admission Test. Those admitted to the M.B.A. program must demonstrate understanding of the fundamental concepts of calculus and proficiency in the use of computers.

Accounting
Accounting involves development and communication of financial and operational information for business and nonprofit economic entities. The curriculum covers includes understanding accounting information systems, using accounting information in managerial decision-making, preparing and auditing financial statements under generally accepted accounting and auditing standards, and understanding the fundamental aspects of personal and corporate taxation. Elective courses provide in-depth instruction in managerial and financial accounting, not-for-profit accounting, and taxation. Courses provide a foundation for careers in accounting (public, industrial, private, governmental, or institutional), for a general business career, or for other professions such as law.

Faculty
Chairperson
James Jiambalvo

Professors
Aikire, Durwood L. * 1972, (Emeritus); BA, 1935, University of Washington; taxation.
Berg, Kenneth B. * 1950, (Emeritus); PhD, 1952, University of Illinois; financial and managerial accounting.
Biddle, Gary Clark * 1984; PhD, 1980, University of Chicago; financial and managerial accounting.
Bowen, Robert M. * 1978; PhD, 1978, Stanford University; financial and managerial accounting.
Dukes, Roland E. * 1979; PhD, 1974, Stanford University; financial and managerial accounting.
Heath, Loyd C. * 1968; PhD, 1965, University of California (Berkeley); financial accounting.
Jiambalvo, James * 1977; PhD, 1977, Ohio State University; managerial accounting, auditing.
Mueller, Fred J. * 1953, (Emeritus); PhD, 1956, Ohio State University; auditing, not-for-profit, tax accounting.
Mueller, Gerhard G. * 1960; PhD, 1961, University of California (Berkeley); financial accounting and reporting, international accounting.
Noreen, Eric W. * 1976; PhD, 1976, Stanford University; managerial accounting.
Ramenathan, Kavasere V. * 1972; PhD, 1969, Northwestern University; managerial accounting.
Sundrum, Gary L. * 1971; PhD, 1971, Stanford University; information systems, managerial accounting, information economics.
Walker, Lauren M. 1946, (Emeritus); MBA, 1943, University of Washington; financial and international accounting.

Associate Professors
Burgstahler, David C. * 1980; PhD, 1975, University of Alabama; financial accounting, interface between corporate management and accounting standards.
Kelly, Lauren * 1982; PhD, 1975, University of California (Los Angeles); investments, business finance, econometrics, monetary theory.

Assistant Professors
Boussu, Philip J. * 1957, (Emeritus); PhD, 1956, University of Pennsylvania; business economics.
D'Ambrosio, Charles A. * 1960, (Emeritus); PhD, 1962, University of Illinois; finance.
Penson, Wayne E. 1992; PhD, 1982, Stanford University; financial economics and investments.
Pringle, C. * 1978; PhD, 1972, New York University; tax accounting.
Rice, Steven J. 1985; PhD, 1974, University of Texas (Austin); tax accounting.

Finance and Business Economics
Finance and business economics address the financial and economic aspects of decision making. The finance curriculum focuses on financial management and the financial markets within which firms and individual investors operate. Business economics courses concern the economic behavior of firms, including factors that determine costs and prices, and the real and monetary forces (such as government policies) that affect the national and international economic environment.

Chairperson
Lawrence D. Schall

Professors
Alberts, William * 1967; PhD, 1961, University of Chicago; capital investment planning, business strategy, economics of industrial organization.
Bourne, Philip J. * 1957, (Emeritus); PhD, 1956, University of Pennsylvania; business economics.
D'Ambrosio, Charles A. * 1960, (Emeritus); PhD, 1962, University of Illinois; finance.
Penson, Wayne E. 1992; PhD, 1982, Stanford University; financial economics and investments.
Frost, Peter A. * 1969; PhD, 1966, University of California (Los Angeles); investments, business finance, econometrics, monetary theory.

Associate Professors
Kamara, Avraham * 1984; PhD, 1986, Columbia University; financial economics, investment, futures and options.
Malatesta, Paul H. * 1980; PhD, 1981, University of Rochester; corporate finance, security and capital markets, corporate mergers, and empirical methods in finance.
Pigott, William 1954; (Emeritus); PhD, 1957, University of Washington; finance and business economics.
Rice, Edward M. * 1979; PhD, 1978, University of California (Los Angeles); corporate finance, microeconomics, industrial organization.

Assistant Professors
Borner-Neal, Catherine A. * 1987; PhD, 1988, University of Chicago; economic theory, monetary economics, applied econometrics.
Dawenter, Kathlyn L. 1992; PhD, 1993, University of Chicago; international finance, macroeconomics.
Neal, Robert S. 1987; PhD, 1987, University of Chicago; finance, securities markets, investments.
Novoa, Walter 1993; PhD, 1993, Massachusetts Institute of Technology; corporate finance, contract theory, industrial organization.
Pontiff, Jeffrey E. 1992; PhD, 1993, University of Rochester; corporate finance, capital market theory, closed-end mutual funds, investments.

Senior Lecturer
Hadjimichalakis, Karma G. 1982; PhD, 1974, University of Rochester; monetary policy and domestic financial markets, macroeconomics.

Lecturer
Tarhouni, Ali A. 1985; PhD, 1983, Michigan State University; economics, theory finance, international trade and finance, financial markets.
Management and Organization

Management and organization provides an understanding of the processes and structures of organizations through three distinct programs. The human resource management and organizational behavior courses address personnel and industrial relations topics such as selection, performance appraisal, compensation, and negotiations, as well as behavioral topics such as leadership, motivation, and group dynamics. They prepare students for managing an organization's human resources effectively. The organization and environment courses examine organization theory, organization design, and management of technology and innovation, as well as the social, political, legal, and ethical environments in which organizations operate. They give students the knowledge, perspective, and analytical tools to deal effectively with organization-environment interactions. The business policy courses focus on organizational effectiveness from the viewpoint of top management. Emphasis is placed on an integrated view through strategic management and control, planning, decision making, and entrepreneurship.

Professors
Brown, Edward G. * 1948, (Emeritus); MBA, 1932, Harvard University; business policy.

Fenn, Margaret P. * 1950, (Emeritus); DBA, 1963, University of Washington; organizational behavior and administrative theory.

French, Wendell L. * 1958, (Emeritus); EdD, 1965, Harvard University; organizational behavior, human resources management, organization development.

Henning, Dale A. * 1955, (Emeritus); PhD, 1954, University of Illinois; administrative theory and organizational behavior.

Hill, Charles William L. * 1968; PhD, 1983, University of Manchester (UK); business policy, corporate strategy, multinational enterprise.

Johnson, Richard A. * 1955, (Emeritus); DBA, 1956, University of Washington; business policy.

Jones, Thomas M. * 1977; PhD, 1977, University of California (Berkeley); ethics, business, government and society.

Kast, Fremont E. * 1952, (Emeritus); DBA, 1966, University of Washington; administrative theory and organizational behavior.

Knudson, Harry R. * 1961; DBA, 1958, Harvard University; business policy.

Le Breton, Preston P * 1960, (Emeritus); PhD, 1953, University of Illinois; business policy and administrative theory.

Mitchell, Terence R. * 1969; PhD, 1969, University of Illinois; organizational behavior.

Newell, William T. * 1963; PhD, 1962, University of Texas (Austin); operations management and business policy.

Peterson, Richard D. * 1971; PhD, 1966, University of Wisconsin; human resources management.

Rosenzweig, Jim E. * 1956, (Emeritus); PhD, 1956, University of Illinois; administrative theory and organizational behavior.

Saxberg, Borje O. * 1957; PhD, 1958, University of Illinois; administrative theory and organizational behavior.

Schrieber, Albert N. * 1948, (Emeritus); MBA, 1947, Harvard University; business policy.

Scott, William George * 1966; DBA, 1957, Indiana University; administrative theory and organizational behavior.

Sutermeister, Robert A. 1949, (Emeritus); MA, 1942, University of Washington; personnel and organizational behavior.

Vesper, Karl H. * 1969; PhD, 1969, Stanford University; business policy, mechanical engineering, marine studies.

Wheelbar, Bayard O. 1946, (Emeritus); PhD, 1942, University of California (Berkeley); urban economics.

Associate Professors
Beard, Donald W. * 1975; PhD, 1975, University of Nebraska; business policy.

Bell, Cecil H. Jr. * 1969; PhD, 1970, Boston University; organizational behavior and administrative theory.

Buck, Vernon E. * 1966; PhD, 1963, Cornell University; organizational behavior and administrative theory.

Butler, John E. * 1985; PhD, 1985, New York University; entrepreneurship, technology and innovation, strategic management.

Gist, Marilyn Elaine * 1987; PhD, 1985, University of Maryland; cognitive processes involved in motivation training and work task performance.

Hansen, Gary S. * 1984; PhD, 1987, University of Michigan; business and corporate strategy, innovation and entrepreneurship.

Huber, Vandra Lee * 1987; DBA, 1982, Indiana University; human resource decision making, compensation, and performance appraisal.

Kianast, Philip K. * 1970; PhD, 1972, Michigan State University; human resources management.

Lee, Thomas W. * 1983; PhD, 1984, University of Oregon; administrative theory and organizational behavior; human resources management.

Strong, Dennis Fulton * 1967, (Emeritus); PhD, 1959, University of Washington; business history.

Wickman, James A. * 1955, (Emeritus); DBA, 1961, University of Washington; risk control and insurance.

Woodworth, Robert T. * 1966; PhD, 1963, Northwestern University; administrative theory and organizational behavior, human resources management.

Assistant Professors
Collins, Paul D. * 1990; PhD, 1986, Rutgers University; organizational theory, technological innovation, and organizational change.

Fuller, Sally R. 1992; PhD, 1993, University of Wisconsin; organizational behavior and organizational theory.

Linninl, Anne Y. 1991; PhD, 1991, University of North Carolina; strategic management and business policy.

Schulz, Martin 1993; PhD, 1993, Stanford University; organizations, qualitative and quantitative methods.

Thomas, Tom E. 1988; PhD, 1989, University of California (Berkeley); organization and environment, corporate political strategic management.

Wicks, Andrew C. 1992; PhD, 1992, University of Virginia; business ethics, corporate and social responsibility.

Lecturers
Berger, Robert H. 1985; JD, 1967, University of California (Berkeley); law.

Management Science

The Department of Management Science consists of three subareas: information systems (IS), operations management (OPMGT), and quantitative methods (QMETH). The information systems area focuses on the integration of information management and computer-based systems. Topics in this area include application programming, systems analysis and design, telecommunications and networks, expert systems, database management, and decision support systems, among others. The operations management area refers to the functional area of an organization which is concerned with the production of goods and services. Topics covered in operations management include operations strategy, inventory management, project management, queuing line management, logistics, and quality management, among others. The quantitative methods area focuses on the theory and application of mathematical and statistical tools in the modeling and analysis of business problems. The quantitative methods curriculum includes courses in statistics and data analysis as well as courses in operations research such as linear programming, networks, and simulation, among others.

Prater, George I. * 1965; PhD, 1963, Stanford University; information systems.

Schmitt, Thomas G. * 1979; DBA, 1979, Indiana University; management of service and manufacturing operations.

Assistant Professors
De Croix, Gregory A. 1991; PhD, 1991, Stanford University; qualitative methods.

Hillier, Mark S. 1993; PhD, 1994, Stanford University; operations management.

Koushik, Murlidhar V. 1986; PhD, 1987, University of Iowa; information systems.

Langford, Joseph D. * 1988; PhD, 1989, University of Rochester; modeling of stochastic phenomena in information systems.
Marketing and International Business
Marketing provides knowledge of concepts and relationships in the areas of consumer behavior, channels of distribution, measurement and analysis of markets, pricing, physical movement of goods, product development, promotion, and sales administration. Marketing careers may involve specialization in product or brand management, advertising, selling, sales management, marketing research, retailing, wholesaling, and international marketing for a wide spectrum of firms and industries. International business includes trade, payments, and multinational corporate systems and activities. The area prepares students for international responsibilities in domestic business firms, governmental agencies, and overseas business. Courses in business communications stress writing in organizations to accomplish goals, oral reporting, business plan presentation, and the use of computer graphics in communication.

Spratlen, Thaddeus H. * 1972; PhD, 1962, Ohio State University; retailing, marketing management.
Sullivan, Jeremiah J. * 1975; PhD, 1970, New York University; international business, Japanese management.
Wheatley, John J. * 1960; PhD, 1959, State University of New York (Buffalo); marketing management, marketing research.
Yelch, Richard F. * 1971; PhD, 1974, Northwestern University; advertising and consumer behavior.
Yamamura, Kozo * 1972, (Adjunct); PhD, 1964, Northwestern University; economic development and economic history of Japan, comparative economic history.

Accounting

Courses for Undergraduates

ACCTG 199 Accounting Problem Solving (2, max. 6) Supplementary lectures, discussion, and problem solving sessions in introductory accounting. Enrollment restricted to EOP students and others by permission of instructor. Credit may not be applied to fulfill specific course requirements or to 180 credits required for graduation. Credit/no credit only. Prerequisite: prior departmental approval.

ACCTG 210 Introduction to Accounting (3) Nature and social setting of accounting; uses of accounting information; introduction of basic accounting concepts and some basic accounting procedures. Prerequisite: sophomore standing.

ACCTG 230 Fundamentals of Managerial Accounting (3) Analysis and evaluation of accounting information as part of the managerial processes of planning, decision making, and control. Concentrates on types of economic decision making in enterprises and on accounting information useful to enterprise managers. Prerequisite: 220.

ACCTG 311 Cost Accounting (3) Introduction to the theory of cost accounting; job order, process, and standard cost systems; overhead accounting; problems of accumulation and allocation; decision making with cost data. Prerequisite: 301.

ACCTG 330 Introduction to Accounting Information Systems (3) Concepts of accounting information systems in organizations. Processes of analyzing and designing accounting information systems, with emphasis on those using computer facilities. Internal controls and auditing considerations. Prerequisites: 302 and IS 300.

ACCTG 371 Auditing or Industrial Internship (2) One quarter's internship with a certified public accounting firm, industrial organization, or government agency. Credit/no credit only. Prerequisite: prior departmental approval.

ACCTG 375 Topics in Financial Reporting (4) Critical examination of the uses and limitations of general purpose financial statements that have been prepared in accordance with generally accepted accounting principles. Not open for credit to accounting majors or to students who have completed 301. Prerequisite: 230.

ACCTG 401 Federal Income Tax Factors in Business Decisions (3) Service course in taxation recommended for the junior year for non-accounting majors. May also be taken by MBA students for graduate credit. Not open to accounting majors. Prerequisite: 230.

ACCTG 411 Auditing Standards and Principles (3) Intensive introduction to the attest function in society today. The environment, the process, and the report of the public auditor are analyzed. Potential extensions of the attest function are examined. Prerequisites: 303, 311, 330.

ACCTG 421 Tax Effects of Business Decisions (3) Issues in taxation, including tax considerations in business decision making, tax effects of business transactions, taxation of compensation, fringe benefits, capital gains, fixed asset transactions, disposition of business distribution from corporations. Prerequisite: 303 or permission of undergraduate office.

ACCTG 450 Business Taxation (3) Issues of taxation for entities other than individuals, including corporations, partnerships, and estates. Includes corporate distributions, liquidations, and reorganizations. Prerequisite: 421.

ACCTG 451 Individual Income Taxation (3) Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual income tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees. Prerequisite: 421.

ACCTG 460 Advanced Cost Accounting (3) Advanced analysis of cost and management accounting problems; special applications of cost accounting techniques for management planning and control; current developments in cost accounting. Prerequisite: 311.

ACCTG 470 Case Studies in Auditing (3) Application of the theory, standards, and principles to a simulated audit engagement. Guest lecturers discuss the broad-ranging audit involvement. Prerequisite: 411.

ACCTG 471 Internal Auditing (3) Independent appraisal function established within an organization.
Role and nature of internal auditing; intensive review of internal control; management effectiveness audits; and financial audits from the point of view of the internal auditor. Prerequisite: 411.

ACCTG 480 Accounting for Non-Profit Organizations (3) Fund and budgetary accounting as applied to public sector organizations, such as governments, foundations, hospitals, and colleges. Prerequisite: 303.

ACCTG 490 Special Topics in Accounting (1-6) Special topics of current concern to faculty and students. Offered only when faculty is available and student interest is sufficient. Class is announced in advance of scheduled offerings.

ACCTG 495 Advanced Accounting Theory (3) Theory of accounting related to income measurement, assets, and equities. Prerequisites: 303 and senior standing.

ACCTG 499 Undergraduate Research (1-6) Arranged and supervised by individual members of the faculty. Prerequisite: permission of undergraduate office.

Courses for Graduates Only Approval of graduate business program office required. Entry code required for nonmajors.

ACCTG 503 Introduction to Accounting for Managers (4) Noreen, Sundem Provides potential managers with a basic knowledge of financial and managerial accounting. Focuses on the use, not the preparation, of accounting information. Examples presented for a variety of for-profit and nonprofit organizations.

ACCTG 505 Intensive Analysis of Accounting Principles and Practices (15) Covers the required core for undergraduate accounting majors: intermediate accounting, advanced accounting, cost accounting, auditing, and tax accounting. Credits will not count toward MBA degree. Prerequisites: 210, 220, 230 or equivalent, or permission of instructor.

ACCTG 510 Problems in Financial Reporting (4) Extension of 500 emphasizing financial reporting from a user's perspective. Alternative approaches to recognition, valuation, and measurement of assets, equities, and income considered. Choice of accounting methods and effects on the firm of accounting policy regulations also examined. Prerequisites: B A 502 or permission of instructor.

ACCTG 511 Problems in Managerial and Cost Accounting (4) Discussion and analysis of costing techniques, use of accounting data in planning and evaluating managerial performance, and use of accounting data in short-run and long-run decisions. Special attention directed to issues in human behavior involved in cost allocation, budgeting, and performance evaluation. Prerequisites: B A 502 or permission of instructor.

ACCTG 513 Tax Effects of Business Decisions (4) Importance of tax considerations in making business decisions. Relationship of taxable income to accounting and economic concepts of income, and the economic, legal, and social background of important tax provisions. Prerequisite: B A 502 or permission of instructor.

ACCTG 520 Seminar in Financial Statement Analysis (4) Emphasizes use of published financial reports by decision makers external to the firm (e.g., investors, creditors). Alternates in each decision the traditional models and recent empirical research in accounting and finance are discussed. Project required as an application of course subject matter. Prerequisites: B A 502 or permission of instructor.

ACCTG 524 Seminar in International Accounting (4) Introduction to the conceptual, managerial, professional, and institutional issues involved in international accounting. International studies receive special attention. Current interest topics (e.g., standard setting and transnational financial reporting) are explored. A research paper required. Prerequisites: B A 502 or permission of instructor.

ACCTG 530 Tax Issues in Property Ownership (4) Analysis of gain and loss realization, recognition, and characterization of such. Detailed exploration of statutory and case law regarding acquisition, ownership, and disposition of assets. Treatment of capital and ordinary gains and losses. Timing issues regarding deferral transactions and installment reporting are analyzed. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 534 Fundamentals of Corporate Taxation (4) Detailed analysis of contribution of assets to corporate entities. Calculation of recognized gains and basic effects of asset contributions. Treatment of income and deduction items of corporate operations. Analysis of distribution of assets to shareholders with respect to their stock. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 535 Advanced Issues in Corporate Taxation (4) A continuation of 534. Fundamentals of moving assets out of and within corporate solution. Basics of corporate reconstructions: acquisition and divisive. The details of the election to obtain (or avoid) the Section 338 election are explored in detail. Prerequisites: Undergraduate accounting concentration or equivalent; 534 or permission of instructor.

ACCTG 536 Advanced Issues in Corporate Taxation (4) Continuation of 534 and 535. Study of complex issues in corporate taxation planning. Substantial portion of course involves resolving complex cases to improve analytic skills and to interface disparate corporate planning opportunities. Corporate reconstructions are analyzed in detail. Prerequisite: Undergraduate accounting concentration or equivalent; 534 or permission of instructor.

ACCTG 538 Income Taxation of Conduits II (4) Prerequisite: 537. Study of complex issues in partnership and S corporation taxation. Substantial portion involves resolving case studies to improve analytic skills and interface partnership and S corporation planning issues. Sections 751(b) and 736 examined in detail. Prerequisite: Undergraduate accounting concentration or equivalent; 537 or permission of instructor.

ACCTG 543 Income Taxation of Trusts and Estates (4) Development of fundamental skills regarding income taxation of trusts and estates. Calculation of distributable net income and the distribution deduction for the fiduciary entity. Basic analysis of the throwback rules. Case studies. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 547 Estate and Gift Taxation (4) Development of fundamental knowledge of the unified transfer tax on the transfer of property from one person to another. Calculation of gross estate, adjusted gross estate, and taxable estate. Calculation of gift and estate taxes owed. Developing planning concepts. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 550 Communication in Professional Accounting (4) Introduction to the communications forms and practices of professional accountants and accounting managers. Development of effective written and oral skills employed in accounting presentations, such as audit reports and consultants' reports. Study of results of organizational communications research applicable to accounting firms and/or units within firms. Prerequisite: Undergraduate accounting concentration or permission of instructor.

ACCTG 551 Management Information Systems (4) Develops the professional accountant's responsibilities in designing and operating management information systems with an emphasis on accounting systems. Data organization and management, effects on accounting functions, responsibilities for controls and security, and planning and acquisition of system sources. Prerequisites: 330, IS 320 and B A 501 or equivalent.

ACCTG 555 Statistical Methods in Professional Auditing (4) Comparative analysis of the methods of statistical inference used in auditing and incorporation of these methods in the auditor's decision processes. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 557 Tax Consulting, Planning, and Research (4) Decision-making processes in relation to problems of taxation. Tools of tax analysis and research and the communication of conclusions flowing from professional tax work. Role of the professional accountant in client business transactions and in negotiations with taxing authorities is highlighted and simulated on the basis of actual case histories. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 558 Current Financial Accounting and Reporting Issues (4) Develops professional-level ability to understand, analyze, and report upon selected political, economic, social, and legal dimensions of current financial accounting and reporting issues. Issues vary each year. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 559 Advanced Auditing Problems and Cases (4) Analysis of current developments in auditing and comprehensive case studies. Designed to extend knowledge of audit decision making and advanced techniques. Topics covered vary depending upon current issues facing professional auditors. Prerequisite: Undergraduate accounting concentration or equivalent.

ACCTG 560 Special Topics in Professional Accounting (4) Lectures, discussion, and case analyses dealing with special current topics relevant to professional accounting. Satisfies the professional accounting elective requirement for the M.P.Acc. degree program. Prerequisite: permission of instructor.

ACCTG 579 Special Topics in Accounting (4, max. 12) Accounting topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of offering. Prerequisite: permission of instructor.

ACCTG 580 Introduction to Accounting Research (4) Examination of research problems and techniques in accounting. Interdisciplinary nature of accounting research emphasized. Work in finance, economics, and psychology used to develop current trends in accounting research. Prerequisite: doctoral student status.

ACCTG 581 Seminar in Managerial Accounting (4) Critical examination of conceptual and practical issues
of cost and managerial accounting. Specific topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: 511 or permission of instructor.

ACCTG 596 Seminar In Financial Accounting Research (4) Review and critical analysis of research strategies and methods applied to problems in financial reporting practice and financial accounting standard setting. Prerequisite: doctoral student status and 580 or equivalent or permission of graduate office.

ACCTG 597 Seminar In Managerial Accounting Research (4) Review and critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and 581 or equivalent or permission of graduate office.

ACCTG 599 Doctoral Seminar In Accounting (1, max. 12) Study and research in advanced topics of Accounting. The seminar is generally concerned with unpublished areas of research as well as research methodology and philosophy. It is conducted by departmental faculty and occasional distinguished visiting faculty. Prerequisite: doctoral student status.

ACCTG 600 Independent Study or Research (1, max. 9)

Administration

Course for Graduates Only

Approval of graduate business program office required. Entry code required.

ADMIN 510 Integrative Administration (15) LeBreton includes material basic to the study and analysis of administration in organizations; organization theory and administrative behavior; human resource management; resource allocation, accounting, and financial control, systems operation and analysis; marketing; governmental-societal framework; policy formulation and strategic planning. Faculty team-teaching approach. Not open to business administration majors. Credit/no credit only. Prerequisite: permission of Graduate School of Business Administration.

Business Administration

Courses for Undergraduates

B A 300 Foreign Study-Business Administration (3-5, max. 16) For participants in approved foreign-study programs where equivalent UW business administration courses are not available. Prerequisite: permission of undergraduate adviser.

B A 371 Cooperative Education In Business (2, max. 8) Business practice: one or two quarter internship with approved business or governmental agency. Open only to students who meet requirements of internship program. Internship credit may not be applied to fulfill specific course requirements or to 180 credits required for graduation. Credit/no credit only.

Courses for Graduates Only

Approval of the graduate business program office required. Entry code required.

B A 541 Environmental Management I (4) Survey of environmental ethics, environmental laws and regulation, the economics of environmental decisions, and the relationship of business to public policy and the environment. Must be taken concurrently with B A 544. Prerequisites: permission of instructor.

B A 542 Environmental Management II (4) Applications of the functional areas of business to environmental concerns. Major federal legislation affecting these concerns applied to business problems in the areas of accounting, finance, marketing, management information systems, and organizational behavior. Must be taken concurrently with 544. Prerequisites: 541 or permission of instructor.

B A 543 Environmental Management III (4) Case studies that integrate the fundamentals of business and environmental management to address such issues as plant siting, regulatory compliance, production line changes, and innovative, proactive responses to environmental issues. Case studies include results of student consulting projects. Must be taken concurrently with 544. Prerequisites: 542 or permission of instructor.

B A 544 Environmental Management Seminar (1, max. 3) Guest lecturers from academia, business, government, and advocacy groups discuss environmental science, ethics, law, regulation, economics, finance, accounting, and policy issues. Some topics supplement course material in 541, 542, 543 which are to be taken concurrently.

B A 571-572 Research Reports (4-4) Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA nonthesis students. Prerequisites: instructor's approval of preliminary research topic outline for 571; 571 for 572.

B A 700 Masters Thesis (*)

B A 800 Doctoral Dissertation (*, max. 9)

Business Administration Research Methods

Approval of the graduate business program office required. Entry code required for nonmajors.

Courses for Graduates Only

BA RM 580 Applied Econometrics I (4) Emphasizes the application of econometric methods rather than the mathematical proofs of statistical procedures. Introduction to the linear regression model, interpretation of summary statistics, bias and precision of regression estimates, analysis of the residuals. Prerequisites: STAT 342, or 395, or 461, or permission of instructor.

BA RM 581 Applied Econometrics II (4) Continuation of 580. Hypothesis testing, distributed lags, serial correlation models, simultaneous equation models. Prerequisite: 580.

BA RM 591 Behavioral Research Methods—Approaches and Applications (4) Considers alternative research approaches, such as laboratory and field experimentation, simulation, and surveys, with data-gathering techniques appropriate for each approach. It is primarily concerned with developing alternative approaches to research problems and with discussing specific applications. It builds upon a background of specific statistical tools and techniques and an understanding of theory development and research design. Prerequisites: STAT 361, 362, or permission of instructor.

Business Communications

Courses for Undergraduates

B CMU 301 Basic Written Business Communications (4) Broad analytical approach to written communications as a management tool. Analysis of the psychology, semantics, planning, and principles of effective business writing. Practical application through messages that inform and persuade, grant and refuse; plus short business reports and applications for positions. Prerequisite: junior standing.

B CMU 410 Business Reports and Other Specialized Communications (5) Covers both internal and external communications that businesswomen write on the job. Emphasis is on various types of internal reports, ranging from short informal memos to the more complex formal reports. Also covered are specialized external types of communications directed to customers. Prerequisite: junior standing.

Courses for Graduates Only

B CMU 510 Business Communications for Managers (4) Seeks to develop understanding of communications and related theories, to describe strategies for planning managerial communications, and to build skills in oral and written reporting and persuading. Prerequisite: approval of graduate business office. Entry code required for nonmajors.

Business Economics

Courses for Undergraduates

B E CN 300 Managerial Economics (3) Analysis of economic factors affecting decisions made by business firms. Demand and cost analysis, and alternative policies from the firm's point of view. Prerequisites: ECON 200, admission to business administration or permission of undergraduate office.

B E CN 301 Intermediate Macroeconomics (4) Analysis of economy including business cycle, output of goods and services (GDP), inflation, unemployment, and government's fiscal and monetary policies. How the economy affects individuals and firms and how to deal effectively with economic environment. Prerequisites: ECON 200 and 201 and admission to business administration or permission of undergraduate office.

B E CN 420 Financial Markets (4) Analysis of the structure and functions of the money and capital markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of Federal Reserve and Treasury in money market developments. Prerequisite: 301.

B E CN 427 International Finance (4) Asset choice and institutional operations in international finance; foreign-exchange problems; the impact of international financial problems and operations on business; short- and long-term international financing. Prerequisite: 301.

B E CN 439 Business Forecasting (4) Analysis of basic variations affecting general business conditions as a background for business and investment decisions; appraisal of proposals for controlling cycles and forecasting techniques. Prerequisites: 301, QMETH 201.

B E CN 490 Special Topics In Business Economics (1-5) Study and research on topics of current concern
to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

B Ecn 499 Undergraduate Research (1-6) Research in selected areas of business economics. Prerequisites: 300, 301, permission of undergraduate office.

Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

B Ecn 520 Financial Markets (4) Analysis of the functions and structure of money markets; the saving-investment process; comparative functioning of intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of the Federal Reserve and Treasury in the money markets. Prerequisite: B A 501.

B Ecn 527 International Finance and Investments (4) Study of selected problems in financing, international trade, investment, and foreign business operations; international aspects of money markets; problems of evaluation of foreign investments. Prerequisite: B A 502.

B Ecn 528 International Financial Management (4) Analysis of financial problems facing businesses engaged in international activities: financing foreign investments, international aspects of money markets, foreign capital market, working capital management including foreign-exchange positions using cases and readings.

B Ecn 579 Special Topics in Business Economics (4, max. 12) Business economics topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Prerequisite: permission of instructor. *

B Ecn 600 Independent Study or Research (*, max. 9)

Business Policy

Courses for Undergraduates

B Pol 470 Business Policy (4) Policy making and administration from a general management point of view. Emphasis is on problem analysis, the decision-making process, administration and control, and continuous reappraisal of policies and objectives. This course integrates and builds upon the work of the core curriculum. Prerequisites: admission to business administration, senior standing, and FIN 350, MKTG 301, OPMGT 301, and HRM 400, or permission of undergraduate office.

B Pol 471 Small Business Management (4) Policy formulation and implementation in smaller firms from the top manager's point of view. Integrates and builds upon the work of the core curriculum. Includes analysis of cases and field projects related to small firms. Prerequisites: admission to business administration, senior standing, and FIN 350, MKTG 301, OPMGT 301, and HRM 400, or permission of undergraduate office.

B Pol 480 Business Simulation (5) Critical analysis of integrated business policy formulation in a complex and dynamic industrial environment by means of simulation (business gaming). Prerequisites: admission to business administration, senior standing, and FIN 350, MKTG 301, OPMGT 301, and HRM 400, or permission of undergraduate office.

B Pol 499 Undergraduate Research (1-6) Prerequisite: permission of undergraduate office.

Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

B Pol 530 Entrepreneurship (4) Entrepreneurship, both in the form of (1) establishment of new independent businesses owned largely by those who manage them and (2) initiation of new enterprises having exceptional autonomy within larger organizations that finance and own them. Basic knowledge in accounting, marketing, and finance is assumed.

B Pol 555 Entrepreneurial Marketing and Management (4) Focuses on role of managers in fostering profitable growth and entrepreneurial actions within ongoing organizations. Class sessions utilize current analytical and conceptual methods, case and field studies, management development exercises, and Foodcorp, Inc. which allows students to simulate management of multinational corporations. Prerequisite: B A 502. Offered: jointly with MKTG 555.

B Pol 570 Strategic Planning Systems (4) Formal institutional procedures for involving the entire organization in strategic planning and quantitative methods for doing such planning. These are applied to analyzing strategy and firm performance, predicting long-range industry and national environments, formulating corporate-level and business-level strategies, and integrating planning models into the planning process. Prerequisites: B A 502 or permission of graduate office.

B Pol 575 Strategic Decision Making (4) Focuses on (1) role of strategic leadership in the success of organizations, (2) conceptual-logical methods for doing strategic planning, (3) organization-wide experience methods for formulating policies, and (4) decision methods for use within the strategic coalition. Prerequisites: B A 502 or permission of graduate office.

B Pol 579 Special Topics in Business Policy (4, max. 12) Study and research in topics of current concern to faculty and students. Offered only when faculty availability and sufficient student interest are allowed by faculty availability and sufficient student interest. Seminar content announced in advance of scheduled offering.

B Pol 590 Classics of Strategic Management Thought (4) Examines the main currents in strategic management through a study of classic works in the field. Explores the evolution of professional management, the origins of strategic management in military science, and the evolution of strategic management as a discipline of organizational science.

B Pol 591 Theories of the Firm and Strategic Management: Economic Models (4) Reviews the economic theories that support strategies pursued by firms and the links between market processes, firm strategy, and firm performance.

B Pol 592 Theories of the Firm and Strategic Management: Sociological Models (4) Explores the sociology of organizations from multiple perspectives while introducing fundamental sociological questions and preparing students for conducting research in organizations. Emphasis on structural contingencies, institutions, resource dependence, population ecology, and power and politics, networks, and inter-organizational relations.

B Pol 593 Contemporary Strategic Management Research (4) Facilitates understanding of strategic foundations of theory development and testing in contemporary strategic management research. Focuses on evaluation of ways in which the empirical tradition has evolved in the strategic management area.

B Pol 594 The Social and Political Environment of the Firm (4) Focuses on the social and political factors that help shape corporate strategy using stakeholder management as an integrating concept. Topics include corporate governance, corporate political activity, regulatory environment and the firm, comparative political economy, and normative aspects of strategic management, including ethics and corporate social responsibility.

B Pol 599 Doctoral Seminar in Business Policy (1, max. 12)

B Pol 600 Independent Study or Research (*, max. 9)

Finance

Courses for Undergraduates

Fin 350 Business Finance (4) Sources, uses, cost, and control of funds in business enterprises. Internal management of working capital and income sources and cost of long-term funds; capital budgeting; financial, investment, and financing policies of corporations; government regulation of the financial process. Prerequisites: B Ecn 300 and admission to business administration or permission of undergraduate office.

Fin 423 Banking and the Financial System (4) Role of banks and nonbank financial institutions in the financial system; assets and liabilities of banks and nonbank financial institutions; role of the management of financial institutions with emphasis on commercial banks. Prerequisites: 350, B Ecn 420.

Fin 450 Problems in Corporation Finance (4) Case problems in corporate financial management. Includes cases on management of current assets, obtaining short-term loans, raising long-term capital, capital budgeting, and dividend policy. The management point of view is stressed. Prerequisites: 350, ACCTG 375.

Fin 453 Financial Theory and Analysis (4) Determination of liquidity needs subject to firm constraints and longer-term capital budgeting problems involving cost of capital and capital rationing considerations; analytical approach. Prerequisites: 350, QMETH 201.

Fin 460 Investments (4) Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the rate and risk of return aspects of particular securities portfolios, and total wealth. Prerequisites: 350, senior standing.

Fin 461 Financial Futures and Options Markets (4) Introduction to financial futures and options markets, instrumenational aspects and social functions of these markets, pricing of options and futures, and risk shifting by hedging. Prerequisite: 460.

Fin 490 Special Topics in Finance (1-6) Study and research topics of current concern to faculty and students. Only offered when faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

Fin 499 Undergraduate Research (1-6) Research in selected areas of business finance, money and banking, or investments. Prerequisites: 350, permission of undergraduate office.

Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

Fin 530 Financial Management of Banks (4) Analysis of problems in the financial management of commercial banks and other financial institutions. Loan and investment policies, liability management, capital policies, and other selected issues are discussed. Prerequisite: B Ecn 520 or permission of graduate office.

Fin 530 Financial Management of Banks (4) Analysis of problems in the financial management of commercial banks and other financial institutions. Loan and investment policies, liability management, capital policies, and other selected issues are discussed. Prerequisite: B Ecn 520 or permission of graduate office.

FIN 551 Problems in Business Finance (4) The application of financial principles and techniques to problems in financial management. Topics include cash management, credit management, problems in short- and long-term financing, and capital budgeting. Prerequisite: B A 502.

FIN 552 Corporate Planning and Financing (4) Addresses management of working capital flows and financial operations. Topics include financial statement analysis, pro forma forecasting, case budgeting, sources of financing including bank, venture capital, private placements, and leases, and determinants of company financing policy. Cannot be taken for credit in combination with FIN 551. Prerequisite: B A 502.

FIN 560 Investments (4) Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate of return aspects of particular securities, securities portfolios, and total wealth. Prerequisite: B A 502 or permission of graduate office.

FIN 561 Financial Futures and Options Market (4) The pricing of options and futures contracts are analyzed and available empirical evidence is examined. Particular attention is given to the ways these instruments can be used to reduce an investor's or a firm's exposure to risk. Prerequisite: 560.

FIN 579 Special Topics in Finance (4, max. 12) Finance topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offerings. Prerequisite: permission of instructor.

FIN 580 Doctoral Seminar in Financial Economics (4) Study of the financing of the corporation, including recent theoretical and institutional developments. Extensive reading and discussion in design of financial strategies for covering problems relating to financial management and to the social and economic implications of the financial process. Prerequisite: B A 500 or permission of instructor.

FIN 590 Doctoral Seminar in Capital Market Theory (4) Decision making under uncertainty, information and capital market efficiency, portfolio theory, capital asset pricing model, arbitrage pricing model, and options pricing model. Prerequisite: B A 500 or permission of instructor.

FIN 591 Doctoral Seminar in Corporate Finance (4) Principles of intertemporal choice, alternative valuation models, theory of investment under uncertainty, impact of dividend and financing decisions on firm valuation in perfect and imperfect markets, and theory of firm organization and agency costs. Prerequisites: 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 592 Doctoral Seminar in Financial Research (4) Empirical research in finance with emphasis on methodology and scientific method. Empirical research in market efficiency, capital asset pricing model, options pricing model, and impact of firm's dividend and financing decisions on firm value. Prerequisites: 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 599 Doctoral Seminar in Finance (1, max. 12) Study and research in advanced topics of finance. Generally concerned with unannounced areas of research, conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

FIN 600 Independent Study or Research (*, max. 9)

Human Resources Management and Organizational Behavior

Courses for Undergraduates

HRMOB 301 Personnel Systems and Industrial Relations (3) The personnel/industrial relations function from a management perspective. Selection, compensation, performance appraisal, and training and development. Special emphasis on union-management relations and relevant behavior science research. Prerequisite: junior standing.

HRMOB 400 The Management of Organizational Behavior (4) Behavioral aspects of management in organizations, with emphasis on leadership, motivation, communication, conflict resolution, group dynamics, and organization development. Prerequisite: admission to business administration or permission of undergraduate office.

HRMOB 410 Staffing (4) Affirmative action, recruitment, testing, interviewing, placement, promotion, and overall human resource planning. Prerequisite: junior standing.

HRMOB 415 Performance Appraisal and Compensation (4) The various kinds of systems used by organizations to evaluate and reward employee performance. Job analysis, job evaluation, setting performance standards, giving appraisal feedback, designing incentive systems, administering a salary plan. Prerequisite: junior standing.

HRMOB 420 Collective Bargaining and Arbitration (4) Labor-management relations. The legal context, union organizing, grievance administration, collective bargaining, individual and group simulations used. Prerequisite: junior standing.

HRMOB 450 Leadership and Decision Making (4) The manager as leader and decision maker. Various leadership theories, styles, and behaviors. Decision-making models and techniques. Prerequisite: junior standing.

HRMOB 460 Negotiations (4) The art and science of negotiations with the goal of making students more effective negotiators in a variety of business situations, such as budget negotiations, buying and selling, contracts, and merger negotiations. Concept and skill development. Prerequisite: junior standing.

HRMOB 470 Motivation and Performance (4) Various strategies for influencing employee motivation and performance. Reward systems, goal-setting procedures, and various techniques to enhance and enrich one's job. Effects of these formal and informal strategies on job attitudes. Prerequisite: junior standing.

HRMOB 475 Organization Development and Change (4) Provides a conceptual understanding of organization development theory, practice, and research. Organization development is an umbrella term for a collection of behavioral science techniques for increasing individual, group, and organizational effectiveness. Prerequisite: junior standing.

HRMOB 480 Special Topics in Human Resources Management and Organizational Behavior (1-6) Topics of current interest to faculty and students. Offered when allowed by faculty availability and sufficient student interest. Content announced in advance of scheduled offerings. Prerequisite: junior standing.

HRMOB 499 Undergraduate Research (1-6)
processes such as learning, motivation, and decision-making as well as an understanding of personal attitudes and personality traits.

HRM 581 Groups, Teams, and Organizations (4) Focuses on the importance of group processes for organizational effectiveness. Covers concepts of group dynamics including interpersonal interaction, role and norm development, and group decision making as well as organizational processes such as team development and organizational climate and culture.

HRM 582 Power, Influence, and Citizenship Behavior (4) Focuses on ways in which the individual and the group can influence decision making with others. Includes leadership, social influence, and the use and abuse of power, with attention given to positive organizational activities such as citizenship behavior and extra role activities.

HRM 590 Organizational Entry, Training, and Exit (4) Focuses on the systems, processes, and experiences that newcomers to organizations undergo. Covers employee selection, training, socialization, and attachment.

HRM 591 Employee Appraisals and Rewards (4) Focuses on the organization's employee performance appraisal and compensation systems.

HRM 592 Employee Rights, Protection, and Justice (4) Focuses on the systems and procedures that safeguard an individual's employment and benefits, including industrial and labor relations, whistle-blowing, procedural justice, and dispute resolution.

HRM 599 Doctoral Seminar in Human Resource Management and Organizational Behavior (1, max. 12) Advanced topics in the fields of human resource management and organizational behavior. May be used by visiting faculty members to present topics of interest to students. Prerequisite: doctoral student status.

HRM 600 Independent Study or Research (*, max. 8)

Information Systems Courses for Undergraduates

IS 300 Introduction to Information Systems (4) Fundamentals of information systems, what they are, how they affect organizations. Technical and organizational foundations of information systems, building information systems, managing information system resources. Laboratory emphasizes using computer to analyze, coordinate, solve organizational decision-making problems. Prerequisite: admission to School of Business Administration or permission of undergraduate office.

IS 320 Fundamentals of Application Programming (4) Fundamental programming concepts including data types, control structures, modularization, and structured programming. Developing solutions for problems in interactive business applications. Introduction to data and file structures. Extensive use of an event-driven programming language. Prerequisites: 300 and junior standing.

IS 422 Applications Programming for Information Systems (4) Advanced computer-aided communications. COBOL and program development tools. Structured design based on system documentation and specifications. Use of COBOL for transaction processing and complex file management activities. Prerequisite: 320.

IS 423 Object-Oriented Systems (4) Covers the design and programming of object-oriented application software. Includes introduction to object-oriented principles, representing objects in software, object management, object analysis and design, construction of object-oriented applications, and use of object-oriented language to program working applications. Prerequisite: 320.

IS 460 Systems Analysis and Design I (4) First course in analysis and design of business information systems. Concentrates on analysis phase of systems development, systems development life cycle, the feasibility study, analysis of user requirements, and the development of a logical model for the system under study. Prerequisites: 320 and junior standing.

IS 461 Systems Analysis and Design II (4) Second course in analysis and design of business information systems. Concentrates on design and implementation phase of systems development. Translation of logical system model into physical model, design of modules, file design, testing, implementation. Includes a project using third- and fourth-generation software development tools. Prerequisites: 409, 460, and junior standing.

IS 470 Business Data Communications (4) Technology and applications of business data communications including characteristics of data, fundamentals of transmission, communications hardware and software, common-carrier services, network configurations (LAN, MAN, WAN), design, management, and security of systems in use of information, data distribution systems, file transfer, and internet resources. Prerequisites: 320 and junior standing.

IS 480 Data-Base Management (4) Concepts of physical and logical data-base organization. Physical file structures used in data management. Logical data models, including hierarchical, network, relational. Data-base design, data dictionaries, data manipulation languages. Exercises in design, implementation, and use of data-base systems. Survey of commercial data-base management systems. Prerequisites: 320 and junior standing.

IS 490 Selected Topics in Information Systems (1-6) Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: B A 501.

IS 585 Advanced Database Research (4) Mannino Introduces topics of interest in database research including heterogeneous database, derived data management, expert database systems, logical and physical database design, formal languages for data manipulation, and temporal databases. Prerequisites: doctoral student and previous course work and experience with database management system or permission of instructor.

IS 586 Data Structures and Algorithms in Information Systems (4) Langford Design of computer algorithms in information systems. Methods for analyzing algorithms in terms of time and space. Data structures and design techniques used in the solution of frequently encountered problems. Prerequisites: doctoral student and working knowledge of a programming language or permission of instructor.

IS 588 Advanced Expert Systems (4) Study of methodological, behavioral, and economic considerations of uncertainty handling in expert systems. Topics include the Certainty Factor model, the Depster-Shafer theory, and probabilistic belief networks. Prerequisites: doctoral student and introductory knowledge of a programming language and basic probability theory or permission of instructor.

IS 599 Doctoral Seminar (1, max. 12) Advanced topics of information systems. Generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

IS 600 Independent Study or Research (*, max. 9)

International Business Courses for Undergraduates

BUS 300 The International Environment of Business (5) Prepares students to understand the most important aspects of the global political economy. Emphasis on the important relationships among nations and business and economic institutions that influence students' performances as managers, consumers, and citizens. Language: ECON 200, 201, junior standing, permission of business administration or permission of undergraduate office. Offered: AWSPS.

BUS 330 Business Environment in Developing Nations (4) The international environment for transnational trade, investment, and operations in the less-developed countries and the economics of underdevelopment; analysis of foreign economic, cultural, and political environments and their impact on international business; foreign investment in the development process; case studies. Prerequisites: 300 or equivalent and junior standing.

MKTG 540 Advertising and Promotion Management (4) Management of advertising and promotional activities and their integration with other elements of the marketing mix. Topics include: the communication process, analyzing markets, working with suppliers, establishing objectives, determining budget, developing creative, measuring effectiveness, using publicity and promotions. Legal, social, and economic consequences are considered. Prerequisite: B A 502.

MKTG 550 Consumer Behavior (4) Analysis of current research in consumer behavior. Topics include consumer decision making processes, models of buyer behavior, and contributions from the behavioral sciences. Prerequisite: B A 502.

MKTG 555 Entrepreneurial Marketing and Management (4) Focus on role of managers in fostering profitable growth and entrepreneurial actions within ongoing organizations. Class sessions utilize current analytical and conceptual methods, case and field studies, management development exercises, and Foodcorp, Inc, which allows students to simulate management of multinational corporations. Prerequisite: B A 502. Offered: jointly with B POL 555.

MKTG 560 Research for Marketing Decisions (4) Methods and applications of marketing research incorporating analytical procedures and relevant concepts from behavioral and quantitative sciences. Deals with various aspects of research: problem definition, research design, questionnaire construction, sampling, and data analysis. Introduces promising new developments: multivariate techniques of data analysis, laboratory and field experimentation, and demand analysis in both business and public environments. Prerequisite: B A 502.

MKTG 565 Analysis of Multivariate Marketing Data (4) Methods for analyzing multivariate data in such marketing research problems as market segmentation and product positioning. The analytical procedures include factor, cluster, and discriminant analysis, multivariate scaling, and conjoint measurement. Prerequisite: B A 502.

MKTG 570 International Marketing (4) Analysis of the marketing strategies and tactics of multinational corporations. Choice of entry strategies for foreign markets, analysis of international competition at home and abroad, and developing global marketing strategies. Prerequisite: B A 502. Recommended: one I BUS course.

MKTG 575 Strategic Market Management (4) The marketing dimensions of strategic planning with emphasis on identifying market opportunities and implementing appropriate competitive-advantage strategies. Includes strategies to stimulate brand demand; defend one's market position; manage the behavior of competitors; manage the behavior of suppliers; and increase the market orientation of one's business. Prerequisite: B A 502.

MKTG 579 Special Topics in Marketing (4, max. 12) Marketing topics of current concern to faculty and students. Offered only when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings. Prerequisite: B A 502.

MKTG 581 Doctoral Seminar in Consumer Behavior (4) Survey of the field of consumer behavior introduces fundamental topics in consumer behavior including cognitive processes, emotion, and consumer satisfaction. Provides exposure to a variety of research methods including experiments, surveys, and phenomenological research.

MKTG 582 Doctoral Seminar in Multivariate Analysis for Marketing Research (4) MacLachlan, Moineau, Survey of methods useful for empirical evaluation of multivariate marketing phenomena and relationships. Includes an overview of measurement theory and practice; multidimensional scaling; conjoint analysis; cluster, factor, and discriminant analyses; multivariate analysis of variance; structural equation modeling; and other methods commonly encountered in academic marketing research.

MKTG 584 Doctoral Seminar in Marketing Systems (4) Gaultsch, Ingene Examines fundamental and systemic dynamics within marketing systems. Addresses market intermediation, including conditions under which institutions survive, flourish, or retreat and relevant forces on marketing systems including public policy, technology, information and communications systems, business cycles, levels of economic development, international trade. Prerequisite: B A 500 or permission of instructor.

MKTG 591 Doctoral Seminar in Social Influences and Marketing (4) Louie, Ruth Investigates topics in social cognition as related to the field of marketing. Examination of ways in which individuals think, feel, and act in social cognition influence consumers' individual responses to marketing-related activities and ways in which the field of marketing, in turn, influences one's understanding of the macro-social environment.

MKTG 592 Doctoral Seminar in Information Processing Theories of Consumer Behavior (4) Ruth, Yalch Considers the processes used by consumers to acquire and evaluate market information including advertising, publicity, word of mouth, packaging, product description, price, and retail outlets.

MKTG 593 Doctoral Seminar in Marketing Models (4) Erickson, Ingene Focuses on modeling research efforts in various areas of marketing. Discussion of how the principles and techniques of social cognition influence individual responses to marketing-related activities and ways in which the field of marketing, in turn, influences one's understanding of the macro-social environment.

MKTG 594 Doctoral Seminar in Pricing and Distribution Channels Models (4) Erickson, Ingene Provides current coverage of the marketing science literature on pricing and channels of distribution. Discussions focus on the conceptual and theoretical evaluation of mathematical modeling research as it applies to these two intertwined areas of marketing as well as on ways in which to contribute to that literature. Prerequisite: 593.

MKTG 599 Doctoral Seminar in Marketing (1, max. 12) Study and research in advanced topics of marketing. The seminar is generally concerned with unexplored areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

MKTG 600 Independent Study or Research ( , max. 9) Operations Management Courses for Undergraduates

OPMGT 301 Principles of Operations Management (4) Examines problems encountered in planning, operating, and controlling production of goods and services. Topics include: warehousing, quality assurance, production systems, project management, and workforce management. Concepts and quantitative models used in formulating management problems. Prerequisites: QMTH 201 and admission to School of Business Administration or permission of graduate office.

OPMGT 402 Introduction to Logistics (4) Logistics study of the efficient delivery of goods and services. A total-cost approach recognizes this involves not only the obvious vehicle-routing issues but also shipment size and mix, warehouse location, product design, and customer services. Includes study of real companies' logistics problems. Prerequisites: 301, QMTH 201.

OPMGT 443 Inventory and Materials Management (4) Production and inventory management decisions for manufacturing and distribution firms. Techniques for forecasting demand for finished products; role of inventories and aggregate planning in production process. Integrated materials requirements planning (MRP) and capacity planning. Prerequisite: 301 or equivalent.

OPMGT 450 Introduction to Project Management (4) Focuses on the management of complex projects and the tools and techniques which have been developed in the past 25 years to assist managers with such projects. The course covers all elements of project planning, scheduling, and control as well as implementation and organizational issues. Prerequisite: 301.

OPMGT 480 Special Topics in Operations Management (1-6) Operations management topics of current concern to faculty and students. Potential topics are: logistics management, project scheduling, manufacturing strategy, site and location analysis, management of service operations. Prerequisite: 301.

OPMGT 489 Undergraduate Research (1-6) Prerequisite: permission of undergraduate office.

Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

OPMGT 535 Logistics and Physical Distribution Management (4) Pitcher Deals with management of the distribution process including all activities involved in physically moving raw materials and finished goods from points of origin to points of consumption. Topics include warehousing, locations, purchasing, and strategic planning in physical distribution organizations. Prerequisites: 502 or B A 502 or equivalent and permission of graduate office.

OPMGT 545 Strategic Management of Quality (4) Newell Study of strategic role of quality of products and services. Managerial concepts for implementing quality strategy and improving quality including Total Quality Management (TQM), Statistical Process Control (SPC), economics of quality, and approaches suggested by Deming, Juran, and others. Prerequisites: 502 or B A 502 or equivalent.

OPMGT 550 Project Management (4) Management of complex projects, and tools and techniques (e.g., CPM and PERT) developed to aid the planning, scheduling, and control of projects. Includes work breakdown structures, precedence networks, Gantt charts, resource leveling, and allocation, and the use of microcomputer programs. Prerequisite: B A 502.

OPMGT 570 Operations Strategy (4) Develops a general framework for creating and analyzing a strategy for domestic and international manufacturing-based companies and industries. Identifying and integrating those categories of manufacturing decisions that have a strategic work-force management, capacity planning, and organization of the manufacturing function. Course based substantially on case studies. Prerequisite: B A 502.
SCHOOL OF BUSINESS ADMINISTRATION / COURSE DESCRIPTIONS 253

OPMGT 575 Manufacturing Planning and Control (4) Moinzadeh, Schmitt Focuses on planning decisions for manufacturing firms with emphasis on Material Requirements Planning (MRP) systems. Topics include inventory management, capacity planning, operations scheduling, assembly line balancing, cellular manufacturing, and Just-in-Time (JIT) techniques. Prerequisites: 502 or B A 502.

OPMGT 577 System Dynamics (4) Newell Presents applied systems thinking, strategic modeling, and learning organizations. Analysis of feedback system structure including cause and effect relations within feedback loops and dynamics of behavior and managerial, social, and economic systems. Construction of continuous-flow computer simulation models using specialized languages such as IT/HINK, STELLA, and DYNAMO. Prerequisite: 502 or B A 502.

OPMGT 579 Special Topics in Operations Management (4, max. 12) Major topics in operations management and systems analysis. Emphasis on research and, where appropriate, application of quantitative analysis and computers. Topics vary, including workforce planning, project management, research and development management, quality assurance, technology planning and forecasting, systems analysis of complex organizations, and urban systems analysis. Prerequisite: B A 502.

OPMGT 580 Facility Layout and Location (4) Klaasterin Focuses on quantitative models used to analyze problems in the layout and location of economic facilities in both the public and the private sectors with emphasis on current research. Prerequisites: QMETH 580 or equivalent and doctoral student or permission of instructor.

OPMGT 587 Advanced Topics in Inventory Management (4) Survey of literature in inventory/production control with emphasis on current research. Topics include single-echelon deterministic and probabilistic models and multi-echelon stochastic models. Prerequisite: QMETH 572. Special emphasis in probability theory and in stochastic processes.

OPMGT 589 Theory of Scheduling (4) Schmitt Considers scheduling problems in different production environments including assembly lines and flow shops as well as closed and open job shops. Discussion of optimization and heuristic techniques for sequencing, due-date assignment, release time determination, labor assignment, and lot sizing. Prerequisite: doctoral student or permission of instructor.

OPMGT 599 Doctoral Seminar in Operations Management (1, max. 12) Study and research in advanced topics of operations management. The seminar is generally concerned with unpublished areas of research and is conducted by visiting professors and departmental faculty. Credit/no credit only.

OPMGT 600 Independent Study or Research (1, max. 10)

Organization and Environment

Courses for Undergraduates

O E 200 Introduction to Law (5) Legal institutions and processes; law as a system of social thought and behavior and as a frame of order within which rival claims are resolved and compromised; legal reasoning; law as a process of protecting and facilitating voluntary arrangements in a business society. Prerequisite: sophomore standing.

O E 302 Organization and Environment (4) Political, social, and legal environment of business. Critical managerial issues from historical, theoretical, and ethical perspectives; their impact on organization. Corporate political power, boards of directors, capitalism, industrial policy, business ethics and social responsibility, alternative corporate roles in society. Prerequisite: admission to business administration or permission of undergraduate office.

O E 310 Political and Regulatory Environment of Business (5) Managerial implications of restrictions imposed by government on corporations from legal, political, and social points of view. Constitutional law impacting business managers; antitrust, administrative, and regulatory issues; environmental law, product liability law, and securities law. Not a business or commercial law course. Prerequisite: junior standing.

O E 314 Historical Development of the Business-Government Relationship (3) Business-government relationships in American history, with an aim of defining and explaining patterns in attitudes and behavior rather than detailing events. Discussions organized in terms of policy areas (e.g., national banking, transportation, agriculture, energy, industry in wartime, trade, and research). Prerequisite: junior standing.

O E 316 Business Ethics and Corporate Social Responsibility (3) Philosophical and pragmatic perspectives, including values and social/ethical premises in organizational decision making. Several issues covered in depth; investments abroad, hazardous products, bribery, industry practices, and others. Prerequisite: junior standing.

O E 403 Commercial Law (5) Principles of the law of contracts, agency, property, sales, negotiable instruments, and security transactions. Prerequisites: 200, junior standing.

O E 440 Organization Structure (3) Concepts of formal organization structures, power, authority, and influence; delegation and decentralization, strategic planning, decision making; philosophy and values in management, the organization in the context of the environment and its impact on the organization's subsystems. Prerequisites: HRMBO 400 and admission to business administration or permission of undergraduate office.

O E 441 Advanced Organization Theory (3) Current research, measuring of organizational effectiveness, planning for alternate structural relationships, developments in related disciplines, and current issues. Prerequisite: 440.

O E 490 Special Topics and Issues in Organization and Environment (1-6) Topics and issues of business organization and a changing environment. Content reflects interests of faculty members and students not otherwise covered in the curriculum. Prerequisite: junior standing.

O E 499 Undergraduate Research (1-6) Selected problem areas or issues in consultation among faculty members and students. Prerequisite: permission of the undergraduate office.

Courses for Graduates Only

Approval of the graduate business program office required. Entry code required for nonmajors.

O E 510 Organization and Environment (4) Business organization's political, social and legal environments. Critical managerial issues from historical, theoretical, and social/ethical perspectives. Corporate political power, corporate boards of directors, industrial power, social responsibility, business ethics, roles of the corporation in society, themes of change. Prerequisite: B A 510.

O E 511 Legal and Regulatory Constraints on Business (4) Managerial implications of restrictions imposed by government on corporations from legal point of view. Employment law, environmental law, product liability law, bankruptcy law, campaign finance law. Not a business or commercial law course.

O E 513 Business Ethics and Corporate Social Responsibility (4) Business ethics and corporate social responsibility from philosophical, theoretical, and pragmatic perspectives. Ethical theories and the role of values in business. Ethics and social responsibility put into a framework useful for practicing managers.

O E 514 Commercial Law (4) Principles of the law of property sales, negotiable instruments, and security transactions.

O E 550 Organization and Management (4) Integrates management as practice, theory, and research. Concepts and values, alternative theories, organizational rationality, cooperative and coordinated systems, bureaucracy and classical organization theory, executive function, accountability and legitimacy; manager's role in matching environment, culture goals, strategy, structure, conflict, technology, and control systems.

O E 560 Seminar in Organization Design (4) Top managers can choose among alternative organizational forms. Each is dependent on the current stage in the organization's life cycle, the organization's strategy, and internal organization practices. Conditions that lead to effective organization design.

O E 570 Seminar in Management of Technology and Innovation (4) Critical issues relating to the management of technology and innovation, how to design innovative organizations in terms of strategy, structure, and process. The innovation process, creativity, management of professionals, technical and strategic leadership, entrepreneurship, intrapreneurship, and matrix management.

O E 575 Seminar in Advanced Organization Theory (4) Major issues and problems in the design and conduct of organization theory research. Organizational philosophy, structural congruence with environment, goals and effectiveness, culture and values, power and politics, information and control, and structure and bureaucracy.

O E 579 Special Topics in Organization and Environment (4, max. 12) Topics to be determined by faculty members and students. Offered only when faculty members are available and there is sufficient student interest.

O E 600 Independent Study or Research (*)

Quantitative Methods

Courses for Undergraduates

Statistics

QMETH 201 Introduction to Statistical Methods (4) NVY ORSR Survey of principles of data analysis and their applications for management problems. Elements of probability and data analysis, and statistical techniques of classification, summarization, and visual display of data. Applications of probability models for inference and decision making are illustrated through examples. Prerequisites: MATH 157 or equivalent, and sophomore standing.

QMETH 502 Statistical Methods for Quality Management (4) Tamura Philosophical and statistical methods for quality management with applications to both manufacturing and service sectors. Topics include definition and measures of quality, seven QC tools, process capability, design of control charts, design of experiments, and multiple regression. Prerequisite: 201 and junior standing.

QMETH 503 Quantitative Analysis for Business (4) Introduction to mathematical tools utilized for analysis of business problems; appreciation of the use of these tools in business situations; calculus; linear algebra. Prerequisites: MATH 157 and junior standing.

QMETH 450 Spreadsheet Models for Managerial Decision Making (4) DeCroix Formulation and solution of business problems using operations research...
techniques in a spreadsheet environment. Techniques of linear and integer programming, dynamic programming, network optimization, queuing, and simulation. Applications from marketing, finance, and operations. Prerequisites: 300 or equivalent and junior standing.

QMETH 490 Special Problems in Quantitative Analysis (1-6) Specialized quantitative techniques useful for solving business problems. Topics from operations research, statistics, computer methods. Emphasis on application. Prerequisites: 401, 450, depending on topic, and junior standing.

QMETH 499 Undergraduate Research (1-6) Research in selected problems in business statistics, operations research, decision theory, and computer applications. Prerequisite: permission of undergraduate office.

Courses for Graduates Only
Approval of the graduate business program office required. Entry code required for nonmajors.

QMETH 520 Managerial Applications of Regression Models (4) Tamura Data exploration and inference using regression models for business forecasting and management. Models include simple, multiple, logistic, and nonlinear regression, use of dummy variables, transformations, variable selection, and diagnostics. Prerequisite: 500 or B A 500.

QMETH 528 Survey Sampling Applications (4) Morita Introduction to design and implementation of sample surveys with emphasis on business applications. Simple random, stratified, cluster, multistage sample methods. Probability sampling, optimal allocation of sampling units. Mail, telephone, interview methods. Estimation methods, Questionnaire design. Non-response. Prerequisite: 500 or B A 500 or equivalent or permission of instructor.

QMETH 530 Forecasting Models in Business (4) DeCroix, Faaland Introduction to time series analysis and forecasting. Topics include seasonal adjustment, decomposition, exponential smoothing, moving average, and autoregression as well as model identification, estimation, diagnostics, and adaptive forecasting. Illustrations using real data. Prerequisite: 500 or B A 500.

QMETH 551 Linear and Integer Programming (4) DeCroix, Faaland Advanced survey of mathematical programming with applications to business problems. Includes linear, integer, stochastic, nonlinear, and dynamic programming and network optimization. Treatment includes formulation, optimality conditions, duality theory, solution algorithms. Applications to production, scheduling, marketing, finance, and equipment replacement. Prerequisites: B A 501 or equivalent and doctoral student or permission of instructor.

QMETH 579 Special Topics in Quantitative Methods (4, max. 12) Presentation of topics of current concern to students and faculty in operations research and applied business statistics. Potential topics include applications and extensions of mathematical programming, stochastic processes, discrete programming, networks models, and application of statistical techniques.

QMETH 590 Mathematical Programming (4) DeCroix, Faaland Advanced survey of mathematical programming with applications to business problems. Includes linear, integer, stochastic, nonlinear, and dynamic programming and network optimization. Treatment includes formulation, optimality conditions, duality theory, solution algorithms. Applications to production, scheduling, marketing, finance, and equipment replacement. Prerequisites: B A 501 or equivalent and doctoral student or permission of instructor.

QMETH 592 Stochastic Models: Queuing and Simulation (4) Monzadeh Application of stochastic processes to business problems. Focuses on development and application of queueing theory and discrete event simulation. Prerequisites: stochastic processes, knowledge of high level programming language, and doctoral student or permission of instructor.

QMETH 599 Doctoral Seminar in Operations Research (1, max. 12) Study and research in advanced topics of operations research. Seminar is generally concerned with unpublished areas of research and is conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

QMETH 600 Independent Study or Research (*)
School of Dentistry

Dean
Paul B. Robertson
D322 Health Sciences

"The School of Dentistry shares the University's overall mission to generate, disseminate, and preserve knowledge and degrees. The School is an integral part of the Health Sciences Center and is an oral health care center of excellence serving the people of the state of Washington and the Pacific Northwest. Through its exemplary educational, research, and service programs, the School strives to prepare students of all races, ethnic backgrounds and socioeconomic circumstances to be competent and effective practitioners of dentistry. Its research programs make significant contributions to understanding basic biologic processes as well as behavioral, biomedical, and clinical aspects of oral health. The School fosters an environment of mutual respect where objective, imaginative inquiry, and the free exchange of ideas can flourish, facilitating personal development, professionalism, and a strong sense of self-worth." (School of Dentistry Mission Statement, October 1993.)

Undergraduate Program

Bachelor of Science Degree

The School of Dentistry offers a Dental Hygiene Degree Completion Program for graduates of associate degree or certificate/diploma programs in dental hygiene. The basic goal of associate degree and certificate/diploma programs in dental hygiene is to prepare competent clinicians capable of providing dental hygiene clinical services. The scope of the Dental Hygiene Degree and the requirements are beyond this clinical focus and provides educational opportunities to prepare its graduates to function professionally as dental hygienists who can broadly understand oral health issues affecting society, dental hygiene, and dentistry. To qualify for the Bachelor of Science degree in the School of Dentistry, students must complete the general education and proficiency requirements of the University, three sequenced dental hygiene core courses, and one dental hygiene pathway. The program of study includes theory, methods, and applications from which students obtain critical thinking, problem solving, and pragmatic experiences. University and affiliated sites provide the settings for projects. Majors may be eligible to participate in study abroad programs, that focus on oral health issues, following the completion of prerequisite courses.

Completion of the required major and University requirements takes one to two years. Students planning to graduate in the fall from an associate degree must have a bachelor approved plan of study within the first quarter of enrollment. Students planning a two-year program must have a bachelor approved plan of study within the first two quarters of enrollment. All students must meet with a program advisor yearly and are encouraged to maintain a minimum of 2.5 credits in technical education (MEDED 520), 3 in educational internship (MEDED 521), and 2 in educational internship (MEDED 522). The completion of courses that fulfill graduation requirements is the responsibility of the student.

Major Requirements

Core Requirement

Students must complete three courses (9 credits) which form the core of this program. These courses are designed to improve the student's skills in computer access to scientific information, English language usage, and scientific investigative methods. The core courses must be taken in sequence beginning autumn quarter: D HYG 465, D HYG 492, and D HYG 493.

Path Requirement

Students must select one of four pathways to fulfill the path requirement. The options are:

1. Educator/Clindinian with Emphasis on Dental Health Care in Special Populations: This path prepares dental hygienists as entry-level teachers who have knowledge of fundamental principles of education and who have experience in dental hygiene management of special populations. Major requirements for this path include a minimum of 12 credits beyond the core: at least 6 in hygiene, of which 2 must be in dental hygiene (D HYG 494 or MEDED 520), 2 in evaluation of learning (MEDED 521), and 2 in educational internship (D HYG 595); and 6 in care of special populations, of which 2 must be in ORALM 460 and the remaining either D HYG 404, D HYG 466, DPHS 449, ORALM 460, or an approved substitute.

2. Oral Health Promotion in Public Health: This path prepares dental hygienists to function as oral health promoters in public health settings and focuses on national and international health goals and on oral health promotional strategies. Major requirements for this path include a minimum of 10 credits beyond the core. 2 in educational methods (D HYG 494 or MEDED 520), 3 in health care goals and delivery systems (D HYG 402 or an approved substitute), 3 in health promotion strategies (D HYG 403 or an approved substitute), and 2 in community health services (D HYG 404 or GT 350).

Oral Health Services Administration: This path is for dental hygienists who want to increase their knowledge of how effective administrators function in complex organizations, or who want to advance their career in marketing, business or management. Students study organizational theory and administrative behavior, human resource management, resource allocation, systems operations and analysis, marketing, policy formulation, and strategic planning. Major requirements for this path require a minimum of 17 credits beyond the core: 15 in ADMIN 510, and a minimum of 2 in an oral health services related internship (D HYG 595 or GT 350).

Academic Standards

The School of Dentistry requires that a minimum numerical grade of 2.5 be earned in dental hygiene courses which are to be counted toward satisfaction of graduation requirements with a dental hygiene major. Graduation with a dental hygiene major also requires a minimum cumulative GPA of 2.50. A student whose cumulative GPA falls below 2.50 in any quarter will be placed on academic probation. The status of academic probation shall be removed when the cumulative GPA is 2.50 or above. While on probation, the student must attain at least a 2.50 GPA for each succeeding quarter's work until the cumulative GPA is raised to 2.50.

Admission Requirements

U.S. or Canadian Applicants. The student must meet the admission requirements and standards of the University. In addition, the student must possess an associate degree or certificate/diploma in dental hygiene from a program accredited by the Commission on Dental Accreditation of the American Dental Association and a license to practice dental hygiene in at least one state or province.

Foreign Applicants. The student must meet the admission requirements and standards of the University. The student must possess a certificate or diploma in dental hygiene granted by an officially recognized educational institution. In addition, the student must submit verification that the practice of dental hygiene is authorized by the government of the home country. Students whose native language is not English must submit a score of 580 or higher on the Test of English as a Foreign Language (TOEFL).

Admissions Schedule. Students are admitted into the program summer and autumn quarters. The deadline for submitting an application to the program and to the University for U.S. and Canadian applicants is May 15 for summer quarter and July 1 for autumn quarter. The deadline for submitting an international application to the program and to the University for summer quarter or autumn quarter is March 1.

Application Information. For information on admission criteria and application process, contact the Dental Hygiene Program, Department of Dental Public Health Sciences, SM-35, School of Dentistry, University of Washington, Seattle, Washington 98195 USA. Telephone: (206) 543-5820. FAX: (206) 864-4258.
Professional Programs

Doctor of Dental Surgery

The Doctor of Dental Surgery (D.D.S.) curriculum provides opportunities to learn the fundamental principles and acquire the skills of dental knowledge. Students are expected to learn fundamentals of basic health sciences, to attain proficiency in clinical skills, to develop an understanding of professional and ethical principles, and to become reasoning and critical decision-making skills that will enable implementation of the dental knowledge base. The first year is divided among lecture, laboratory and preclinical activities in basic sciences, dental anatomy and dental materials. In the second year students develop further preclinical skills, learn how basic science principles are applied to the clinical setting and begin clinical treatment. In the third and fourth years students concentrate on providing clinical treatment at two levels: those with consideration of technical and diagnostic skills, and participate in electives. Each student is required to take one elective in each of his/her junior and senior year. Electives are chosen not only from courses offered by all departments, including opportunities in independent study, research, seminars on various topics, and specialty clinical topics.

The curriculum extends for forty-two months or four-and-one-half years, including two summer quarters. If needed, students may be allowed additional time to complete required course work.

Admission

To be considered for admission to the School, a student will need to have completed the required courses listed below, have taken the Dental Admission Test, and have attended personal interviews. Required courses are: organic chemistry—2 quarters or 1 semester; biochemistry—2 quarters or 1 semester, physics—1 year; introductory biology or zoology—1 year. Equally important are courses in the social sciences and the humanities. The Admissions Committee does not select or give preference to a particular undergraduate major field; in fact the Committee encourages diversity in majors. The School is committed to diversity within the dental school student body and the dental community. A program for ethnically underrepresented or economically disadvantaged persons is described below. (See the Dental Readiness Program.) Equal gender representation also adds to the diversity of the School, and the Admissions Committee encourages women to apply.

Transfer Applicants: Transfer students from U.S. and Canadian dental schools will be considered for advanced standing at the end of the regular admissions cycle and accepted on a space available basis. The applicant's current standing and courses completed at the dental school will be considered at determination when placing within the curriculum. All recent accepted transfer students have been placed in the first or second year curriculum. The application and supplemental materials must be received by the School by March 1 of the year prior to requested entry.

Foreign Applicants: The School does not provide a special program for foreign trained dentists, but does consider foreign trained dentists for advanced standing (see transfer information above). In addition, all foreign applicants must submit a written statement from a bank indicating financial support is available to complete the program.

Dental Readiness Program: The School is committed to diversity within the student body and the profession of dentistry, and to the development of reasoning and critical decision-making skills that will enable implementation of the dental knowledge base. The first year is divided among lecture, laboratory and preclinical activities in basic sciences, dental anatomy and dental materials. In the second year students develop further preclinical skills, learn how basic science principles are applied to the clinical setting and begin clinical treatment. In the third and fourth years students concentrate on providing clinical treatment at two levels: those with consideration of technical and diagnostic skills, and participate in electives. Each student is required to take one elective in each of his/her junior and senior year. Electives are chosen not only from courses offered by all departments, including opportunities in independent study, research, seminars on various topics, and specialty clinical topics.

The curriculum extends for forty-two months or four-and-one-half years, including two summer quarters. If needed, students may be allowed additional time to complete required course work.

Admission

To be considered for admission to the School, a student will need to have completed the required courses listed below, have taken the Dental Admission Test, and have attended personal interviews. Required courses are: organic chemistry—2 quarters or 1 semester; biochemistry—2 quarters or 1 semester, physics—1 year; introductory biology or zoology—1 year. Equally important are courses in the social sciences and the humanities. The Admissions Committee does not select or give preference to a particular undergraduate major field; in fact the Committee encourages diversity in majors. The School is committed to diversity within the dental school student body and the dental community. A program for ethnically underrepresented or economically disadvantaged persons is described below. (See the Dental Readiness Program.) Equal gender representation also adds to the diversity of the School, and the Admissions Committee encourages women to apply.

Transfer Applicants: Transfer students from U.S. and Canadian dental schools will be considered for advanced standing at the end of the regular admissions cycle and accepted on a space available basis. The applicant's current standing and courses completed at the dental school will be considered at determination when placing within the curriculum. All recent accepted transfer students have been placed in the first or second year curriculum. The application and supplemental materials must be received by the School by March 1 of the year prior to requested entry.

Foreign Applicants: The School does not provide a special program for foreign trained dentists, but does consider foreign trained dentists for advanced standing (see transfer information above). In addition, all foreign applicants must submit a written statement from a bank indicating financial support is available to complete the program.

The school will be considered complete once the interview has been completed and all materials noted above are returned. Upon completion of the application, the Admissions Committee, which is composed of faculty, students, and alumni, will make a decision concerning the applicant's admission status. In the Admissions Committee deliberations, the following seven areas are considered, with the first two areas receiving the most weight in assessing the applicant's merits as a candidate:

1. Grades: Overall grade point average (GPA); GPA of the last two years of study and GPA of predental required science courses are reviewed. College grades are important in dental school selection, performance and success. The Committee members review these grades for a strong, consistent GPA with very few withdrawals, incompletes, repeated courses or non-graded options.

2. DAT (Dental Admission Test): The test, sponsored by the American Dental Association, covers several areas: quantitative reasoning, survey of natural sciences (including biology, general and organic chemistry), and perceptual ability (including form development, apertures, angles, cubes, and orthographic projections). At the University of Washington the scores are reviewed for an applicant's area of strength. The test must be taken no later than October one year prior to admission.

3. Level of Preprofessional Education: A majority of our applicants will have a baccalaureate degree by the time of entry, but admission may be offered to applicants without a baccalaureate degree.

4. Dental Knowledge: Knowledge of the field of dentistry through experience in a dental setting (dentist's office, clinic, etc.); introductory dentistry through experience in a dental setting (dentist's office, clinic, etc.); introductory dental coursework; and exploration of the dental literature is considered as admissions factors. A qualified applicant will have a clear understanding of the profession and a demonstrated interest in the field.

5. Unique Life Experiences: Research and teaching efforts, travel, and work experience are some of the life experiences that are considered important. Such experiences demonstrate the breadth and level of maturity of a candidate.

6. Personal Attributes: In addition to motivation, the applicant's poise and communication skills are examined by the Admissions Committee. Personal attributes such as integrity, responsibility, leadership, initiative, community service, perseverance, and diversity of interests are important.

7. Ethically Underrepresented or Disadvantaged Status: Special admissions consideration may be given to applicants who are members of ethnically underrepresented groups or are economically disadvantaged or differently abled. (See Dental Readiness Program.)

Information regarding the AADSAS application, supplementary application materials, selection criteria, and resources is available from the University of Washington, School of Dentistry, Office of Student Services, SC-62, D323 Health Sciences Center, Seattle, WA 98195-8950 or the Predental Advising Office, 008 Communications, DS-60. Information on the Dental Admission Test is available from both of the above and the American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611-2678.
Effective autumn quarter 1994 quarterly tuition for full-time dental students is $2,486 for residents and $6,311 for nonresidents. Additional costs for dental students include textbooks, materials, supplies, and equipment for use in laboratory and preclinical courses (see below). A rental fee (see table below) is charged for instruments used during the four years and returned. Nonrental instruments belong to the student, so they should be considered a long-term investment and not part of the expendable educational costs.

Information on loans and scholarships may be obtained from the Office of Student Services, D323 Health Sciences, SC-B2. Also available in this office is information relating to student life, including the Student Dress Code, Academic Regulations Manual, and Professional Ethics Code.

### Graduate Programs

Through their respective departments, the graduate faculty members of the school offer programs leading to the degree of Master of Science in Dentistry, Master of Science, and Doctor of Philosophy, as well as postgraduate certificate programs.

#### Master of Science in Dentistry Degree/Postgraduate Certificate

Fields of study for the M.S.D. programs are endodontics, oral biology (oral pathology), oral medicine, orthodontics, periodontics, and prosthodontics. The programs are planned to prepare students to think independently, to evaluate their own services and the literature of the profession, and to develop the clinical, operative skills to a level to permit the successful practice of their chosen specialty. Emphasis is placed on the basic principles of diagnosis and treatment that compose one of the clinician’s most valuable assets.

The purpose of the programs is not only to train students in the art of their respective specialties but also to encourage possible preparation for academic careers or for research. Research may be undertaken in basic or applied science. Opportunities for collaborative research are available with the cooperation of other colleges, schools, or departments of the University.

Applicants for admission to the M.S.D. and certificate programs must be graduates of a school of dentistry approved by the Commission on Dental Accreditation of the American Dental Association or a university dental school located outside the North American continent whose curriculum and admission requirements are similar to those of the UW School of Dentistry. Applications must be submitted to the appropriate department, on or before November 1 for consideration for entrance in the following autumn quarter (October 1 for oral medicine and orthodontics for consideration for entrance in the following summer quarter). A concurrent Application for Admission to the Graduate School must also be filed. International students must submit financial statements before the application deadlines and must demonstrate competency in the English language, for which TOEFL scores are required. Applicants who have not received dental degrees from an institution within the United States will be required to supply Graduated Record Examination scores for admission to the University of Washington Graduate School (graduates of U.S. institutions are not required to submit GRE scores). Requests for information or application forms may be forwarded to the department of the specialty field, School of Dentistry, University of Washington, Seattle, Washington 98195.

A minimum of eight consecutive full-time quarters of residence is required except in the periodontics and prosthodontics programs. Certificate training in periodontics requires a minimum of twelve consecutive full-time quarters of enrollment and may be pursued concurrently with other advanced degrees which may extend the program length. The graduate prosthodontic program includes two years of didactic and clinical work followed by a third year of clinical care and research.

Although a student may enroll in a postgraduate certificate program only, students enrolled in the M.S.D. program also will be awarded a postgraduate certificate in the specialty. Postgraduate certificate programs are not administered by the Graduate School, and no thesis is required. The course content may vary somewhat from the M.S.D. program, although the same academic standards are applied in both programs. Tuition and fees are assessed at the graduate level for both programs.

#### Master of Science, Doctor of Philosophy Degrees

Curtinums for the M.S. and Ph.D. programs are offered through the Department of Oral Biology.

Oral biology is concerned with the nature of the oral and parotid tissues and with the applicability of basic scientific knowledge to oral tissues in health and disease. The courses and research programs in the department deal with the origin, growth and development, structure, and function of oral tissues, as well as with the etiology and pathogenesis of oral diseases and their prevention. By its nature, oral biology overlaps the basic medical sciences and clinical dental sciences.

The department contains well-equipped laboratories actively engaged in various aspects of research involving the basic approaches: biochemical, including studies on protein synthesis and secretion and the structure of salivary macromolecules, as well as studies on the structural proteins of the cytoskeleton of oral epithelial and epidermal cells; pharmacological, including molecular mechanisms in the regulation of secretion; physiological, including ion fluxes and their control in secretory tissues; microbiological, including the molecular basis of bacterial colonization of oral surfaces, and the identification, taxonomy and pathogenicity of oral pathogens; pathological, including the growth and metastasis of oral tumors; tissue culture, including studies on factors regulating the growth and development of oral epithelial cells; and morphological, including studies on oral tissues at the light and electron microscopic levels.

Several programs are available through the Department of Oral Biology to accommodate students with different educational objectives.

A program of study and research leading to the Doctor of Philosophy degree is available for those students desiring extensive research training as well as in-depth course work in oral biology. In addition to the courses offered by this department, students hold the Ph.D. program held the Ph.D. program.

A separate program of study and research leading to the Master of Science degree is available for those students who want less training than the Ph.D. program affords.

A nonthesis option exists in the Master of Science program for the purpose of training dental hygiene educators to instruct in certain basic and applied sciences as well as in the clinic.

For the more clinically oriented students, the school also offers a program leading to the Master of Science in Dentistry with specialization in oral pathology. Students enrolled in this program receive training that includes experience in the school’s extensive biopsy service, participation in the teaching of oral pathology to dental students, participation in a residency program, and enrollment in a series of advanced courses in general and oral pathology.

Clinical specialty training (e.g., oral pathology, oral medicine, periodontics) can also be obtained in conjunction with either the M.S. or Ph.D. programs.

Applicants for all programs must have either a baccalaureate or professional degree from a dental or medical school. Acceptance into the programs requires approval of both the Department of Oral Biology and the Graduate School. For information or application materials, contact the Graduate Program Adviser, Department of Oral Biology, B224 Health Sciences, SB-22, University of Washington, Seattle, Washington 98195.

United States Public Health Service traineeships may be available to students who are United States citizens or permanent residents. These begin at $18,600 at the postdoctoral level. An allowance for tuition and fees is normally included. Applicants may also seek support via the National Institutes of Health, which provides up to five years of stipend support for dental graduates seeking a combined clinical specialty-Ph.D. degree course of study. The M.S. and Ph.D. programs, in conjunction with the nonthesis M.S. for dental hygienists, are identified as WICHE Regional Graduate Programs, making students from WICHE-participating states eligible to receive support while pursuing these degree programs.

### Residency Training

Residency training programs are available in oral and maxillofacial surgery and the general practice of dentistry. Both programs provide for rotation through several of the University-affiliated hospitals. Each is a fully accredited program which grants a certificate upon successful completion of the training. Stipends are provided.

The Oral and Maxillofacial Surgery Program is at least four years in duration and provides broad exposure to all aspects of the practice of oral and maxillofacial surgery. Application, selection, and admission to this training program is provided through the Department of Oral and Maxillofacial Surgery. Further information can be obtained by contacting Dr. O. Ross Belin, Department of Oral and Maxillofacial Surgery.
SB-24, School of Dentistry, University of Washington, Seattle, Washington, 98195.

The General Practice Residency is a one-year training program that emphasizes the general dentist's role in a hospital and the management of medically, physically, and mentally compromised patients. Application, selection, and administration of the General Practice Residency is provided through the Division of Hospital Dentistry. Further information can be obtained by contacting Dr. Barton S. Johnson, Division of Hospital Dentistry, SC-62, School of Dentistry, University of Washington, Seattle, Washington, 98195.

Postdoctoral Fellowships
Postdoctoral fellowship training is available in periodontics and behavioral or public health research in dentistry. Programs vary in duration and many accommodate degree-seeking or research fellows pursuing an academic career. NIH-sponsored full tuition and a stipend for up to three years are provided for U.S. citizens, noncitizen nationals, and those foreign nationals with permanent residency status in the United States. Members of ethnic minorities and women are especially invited to apply. Application, selection, and administration of the program are provided through the Department of Dental Public Health Sciences.

Graduate Training in Dental Public Health
Opportunities exist for pursuing graduate degrees in public health which emphasize applications to research in dentistry. Master of Public Health (M.P.H.) programs in the Departments of Epidemiology and Health Services, the School of Public Health and Community Medicine, and the University of Washington School of Dentistry can be pursued in conjunction with postdoctoral training in the School of Dentistry's Department of Dental Public Health Sciences. Didactic course work is taken in the School of Public Health and Community Medicine, augmented with independent study and thesis research on selected topics in the School of Dentistry. Similar opportunities exist for pursuing the Ph.D. in epidemiology and with an emphasis on research in dentistry. Further information may be obtained from the Department of Dental Public Health Sciences, SM-35, School of Dentistry, University of Washington, Seattle, Washington 98195.

Dental Hygiene

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

D HYG 402 Global Perspectives in Oral Health (3)
Disease patterns and their impact on oral health care delivery systems. Cultural, demographic, economic, and political factors affecting the efficacy of various systems.

D HYG 403 Oral Health Educational Strategies (3)
Planning, preparing, and evaluating educational strategies to improve oral health promotion. Assessment of needs, development of objectives, creation of communication messages, review of behavioral and educational theories, mechanisms of evaluation.

D HYG 404 Field Experience in Delivery of Oral Health Care (2, max. 12)
Field observations of oral health services. Students spend three hours per week at an approved health care agency. Accompanying seminars and written assignments focus on professional need of service, consumer needs and demands, societal obligations, and availability of services.

D HYG 485 Theoretical and Scientific Basis for Dental Hygiene Practice (3)
Lecture-discussion on the scientific proof for theories, procedures, and techniques used in clinical dental hygiene practice. Includes field experience at selected practice sites. Students use the University of Washington reference library and catalog system to search and retrieve information essential to making oral and written reports. Prerequisite: 465.

D HYG 486 Local Anesthesia for Dental Hygienists (2)
Techniques of local anesthesia and initial management of emergencies in the dental office.

D HYG 491 Issues in Professional Education (3)
Seminar and discussions on topics influencing dental education. Academic freedom, accreditation, interdisciplinary relationships, legislation, licensure, tenure.

D HYG 492 Principles of Scientific Investigation for Oral Health Professionals (3) Introduction to principles of scientific investigation, biostatistics and their application to relevant literature.

D HYG 493 Review of Literature for Oral Health Professionals (3) Application of modern methods of library search and critical analysis of relevant literature. Includes technical writing and oral reporting as a means of integrating knowledge and skills acquired in 465 and 492. Prerequisites: 465 and 492 or permission of instructor.

D HYG 494 Principles of Teaching for Oral Health Professionals (3) Application of principles of learning to teaching methods and techniques used in education, with opportunity for course planning, demonstration, and practice teaching.

D HYG 497 Directed Studies for Oral Health Professionals (*, max. 14) Based on student interest in special areas. Independent study and student-faculty relationships. Credit/no credit only. Prerequisite: permission of instructor.

D HYG 565 Theoretical and Scientific Basis for Dental Hygiene Practice (3) Lecture-discussion on the scientific proof for theories, procedures, and techniques used in clinical dental hygiene practice. Includes field experience at selected practice sites. Students use the University of Washington reference library and catalog system to search and retrieve information essential to making oral and written reports. Prerequisite: 465 or 594.

D HYG 594 Principles of Teaching for Oral Health Professionals (3) Application of principles of learning to teaching methods and techniques used in education, with opportunity for course planning, demonstration, and practice teaching. Prerequisite: graduate program admission.

D HYG 595 Educational Internship (*, max. 12) Clinical and didactic teaching experience or program administration. Teaching and administration responsibilities assigned according to student's previous experience, education needs, and interest. Seminar required. Prerequisites: 494 or 594 and permission of instructor.

Dental Public Health Sciences

Faculty
Chairperson
Timothy De Rouen

Professors
Chapko, Michael K. * 1978, (Adjunct Research); PhD, 1972, City University of New York; diffusion of health technologies, cost-effectiveness in health care.

Drongsholt, Mark T. 1985, (Acting); DDS, 1984, University of Washington; dental medicine/dentistry, dental behavioral science.

Fales, Martha H. * 1959, (Emeritus); PhD, 1978, University of Michigan; dental hygiene.

Grembowski, David * 1980; PhD, 1982, University of Washington; dental care demand, fluoridation, dental health services research.

Grembowski, David * 1980; PhD, 1982, University of Washington; epidemiology in dental health, chronic disease as affected by infectious disease.

Lerox, Brian * 1991, (Research); PhD, 1989, University of British Columbia (Canada); random effect models, stochastic processes, dental research, toxicology.

Pappas, Gerald C. 1985; PhD, 1988, University of Pennsylvania; behavioral medicine/dentistry, physiological psychology, orthodontics, pediatric dentistry.

Profs

Instructor
Drangsholt, Mark T. 1985, (Acting); DDS, 1984, University of Washington.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

DPHS 201 Planning a Career in Dentistry for the Future (2) Future-oriented overview of important concepts in dental science, contemporary modes of patient treatment, and dental-care delivery systems. Provides firsthand exposure to practice of dentistry and prerequisite materials in oral anatomy, epidemiology, and other basic science subjects. Open to first-, second-, and third-year undergraduate students throughout the University.

DPHS 448P Directed Studies in Dental Public Health Sciences (*) Students and faculty with common academic interests pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Prerequisite: permission of instructor.
DENT 500P Clinical Practice Management 1 (1) Designed to provide the student with the knowledge required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, authorized treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 500P Clinical Practice Management 2 (1, 1, 1, 1, 1) Designed to provide the student with the knowledge required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, authorized treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 550P Special Studies in Dentistry (1) Designed to provide the student with the knowledge required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, authorized treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 560P Directed Studies In Dental Public Health Sciences (*, max. 6) Students and faculty members who have common academic interests can pursue them together within the curriculum by means of independent study and a tutor/teacher-student-faculty relationship. Credit/no credit only.

DENT 569P Directed Studies In Dentistry (3) An introduction to epidemiological methods as they relate to dental research. Topics covered include the estimation of dental disease occurrence at patient level and site level and the design and analysis of clinical trials with special emphasis on designs unique to dentistry, such as split-mouth designs. Credit/no credit only.

DENT 575P Behavioral Dental Research (1) Survey of behavioral science research and methodology in dentistry and related fields. Emphasis in various quarters varies: literature review, research design, instrumentation, data analysis. Designed for advanced students who plan a research career. Credit/no credit only. Prerequisite: doctoral degree or permission of instructor.

DENT 640P Professional Issues: Clinical Management of the Fearful and Phobic (1) Introduction to assessment processes and treatment strategies for successful management of anxious, fearful, or phobic patient, combined with clinical observation of diagnostic and treatment appointments of active patients.

DENT 650P Extramural Clinics In Geriatric Dentistry (2) Extramural geriatric clinical experience, including choice of hospital, nursing home, community clinic, and brief didactic component.

DENT 655P Hospital Rotation (2) Clinical experience that puts into practice the material presented in 537P. The student is involved in hospital procedures and protocol and in dental care of the hospital patient.

DENT 659P Comprehensive Clinic (1-10) Clinical comprehensive care for patients. Offered: S.

DENT 660P Temporomandibular Joint Diagnosis and Treatment (2, max. 6) Seminar and clinic sequence for comprehensive examination. diagnosis, and treatment of patients with temporomandibular joint problems. Includes management of dysfunction and morphologic alterations in associated muscles and occlusion. Prerequisite: permission of instructor.

DENT 700P Senior Thesis (1)
Diagnosis and treatment of acute symptoms of dental origin, surgical endodontic therapy, traumatic dental injuries, and the relationship between periodontal and pulpal pathology, including differential diagnosis and appropriate treatment planning, are discussed. Offered: Sp.

ENDO 563 Radiographic Interpretation (2) Various aspects of radiographic interpretation of particular relevance to endodontics, including interpretation of normal structures, acquired and developmental abnormalities, infections, fistulas, dysplasias, and cysts. Offered: A.

ENDO 566 Advanced Radiographic Interpretation (2) Various aspects of radiographic interpretation of particular relevance to endodontics, including malignant lesions, benign tumors, various diseases other than tumors, soft-tissue classifications, and radiographic technique. Offered: W.

ENDO 568, 581, 582, 583, 584, 585, 586, 587 Endodontic Seminar (2,2,2,2,2,2,2) Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 590 Treatment Planning Seminar (2, max. 18) Weekly seminar to discuss controversial treatment problems and difficult diagnostic cases.

ENDO 593 Clinical Practice Teaching (1, max. 3) Closely supervised experience in teaching clinical endodontics to the undergraduate dental student.

ENDO 597, 598 Endodontics Teaching Seminar (2,2) Weekly seminars devoted to examination of general problems of teaching and learning and specific problems of endodontics teaching.

ENDO 600 Independent Study or Research (1) Prerequisite: permission of graduate program adviser.

ENDO 630P Clinical Endodontics (1, max. 7) Student is required to complete endodontic treatment of anterior, premolar, and molar teeth. In addition to conservative treatment of several endodontic cases, the student assists in a perialtal surgery. Student must complete at least six quarters of 630P and all course requirements before any grade is awarded.

ENDO 659P Endodontics Extended Learning (1, max. 4) Supplemental work in endodontics to correct an area of student deficiency. Credit/No credit only.

ENDO 661 Clinical Endodontics (4, max. 32) Clinical diagnosis and treatment of pulpal pathosis and related sequelae.

Eye, David R. * 1985, (Adjunct); PhD, 1969, University of Leeds (UK); connective tissue biology, collagen chemistry, bone and cartilage metabolism.

Herring, Susan W. * 1990, (Adjunct); PhD, 1971, University of Chicago; vertebrate functional morphology; relations between muscular function and skull growth.

Itoju, Kenneth * 1971; PhD, 1970, University of Washington; salivary gland physiology and pathophysiology.

Keller, Patricia J. * 1955, (Emeritus); PhD, 1953, Washington University; protein structure and function.

Robinovitch, Murray * 1966; DDS, 1961, University of Minnesota; salivary biochemistry and saliva-bacterial interactions.

Tamarin, Arnold * 1961, (Emeritus); DDS, 1951, University of Illinois; oral embryology and histology, electron microscopy.

Verduco, Pedro * 1974, (Adjunct); MD, 1965, State University of New York at Stony Brook; oral and maxillofacial surgery; oral and maxillofacial radiology.

Cook, William * 1960; PhD, 1958, University of Chicago; vertebrate functional morphology; relations between muscular function and skull growth.

D'Silva, Nisha J. 1990, (Acting); MD, 1988, Harvard University; pathology and pathophysiology of oral tissues.

Holbrook, William D. * 1973; PhD, 1969, University of California; oral pathology; oral medicine.

Lee, Minako Y. * 1977, (Adjunct); MD, 1973, Tokyo Women's Medical College (Japan); growth and differentiation of hematopoietic and lymphopoietic cells.

Morton, Thomas H. * 1975; PhD, 1972, Creighton University; oral pathology, oral medicine.

Oda, Dolphine * 1985; MSC, 1981, University of Minnesota; saliva, salivary gland physiology, metabolic and hormonal regulation of secretion.

Ott, Eric A. * 1961; PhD, 1958, University of Chicago; vertebrate functional morphology; relations between muscular function and skull growth.

Ozanne, Ewen D. * 1965; MD, 1963, University of Edinburgh (UK); oral embryology and histology, electron microscopy.

Powers, William J. * 1960; DDS, 1958, University of Washington; oral anatomy, oral physiology, and oral pathology.

Sawczuk, Andrea 1984, (Acting); DDS, 1985, University of Washington; neurological aspects of craniofacial and oral functions.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

ORALB 449 Undergraduate Research Topics in Oral Biology (1) Individual research on topics selected in collaboration with a faculty member. Credit/No credit only. Prerequisite: permission of instructor.

ORALB 520P Molecular Microbiology and Oral Diseases (3) Applies students' background knowledge in basic sciences to an understanding of the molecular bases of the interactions between microorganisms and oral tissues that lead to plaque formation and dental diseases. Principles of clinical aspepsis and diagnosis of caries and periodontal diseases also covered. Offered: A.

ORALB 521P, 522P Oral Pathology (3,2) Survey of the diseases of the oral-facial region in lecture and laboratory sessions. Among the conditions discussed are diseases of teeth and their supporting structures and diseases of the soft tissues and bones. Correlations between clinical findings, etiologic factors, and histopathologic features are stressed. Attendance in the laboratory is required.

ORALB 540P CPC: Oral Biology (2) Seminar stressing basic science aspects and clinical findings of various oral lesions through exploration of etiology, pathogenesis, histopathology, and treatment modalities for oral pathology cases drawn from files of the Division of Oral Pathology.

ORALB 550P Directed Studies in Oral Biology (*), max. 12) Selected readings and seminars on a topic chosen by individual arrangement in collaboration with a faculty member. Credit/No credit only. Prerequisite: permission of instructor.

ORALB 560 Dental Plaque and Oral Disease (3) Series of lectures and review of current literature pertaining to the formation and microbiological and biochemical characteristics of dental plaque, and the relationship, etiologically, of dental plaque to dental caries, periodontal disease, and the sequelae of these conditions.

ORALB 561 Oral Tissue Development, Structure, and Function (4-3) Embryonic development of head, neck; emphasis on morphodifferentiation of face and oral structures. Development and microscopic anatomy of enamel, dentin, dental pulp, cementum, periodontal membrane, alveolar bone, oral mucous, membrane, maxillary sinus, temporomandibular articulation, other oral and paracol structures. Correlation of physiological-structural form with function. Prerequisite: permission of instructor.

ORALB 562 Supervised Teaching in Oral Biology (1-5, max. 10) Directed and guided experience in selected topics in teaching techniques, teaching philosophy, and course design of courses given by the Department of Oral Biology. Students are required to participate in lecture and laboratory teaching under the supervision of the course director. Prerequisite: permission of instructor.

ORALB 565 Clinical Oral Pathology (1-3, max. 19) Presentation of interesting oral lesions from the dental school and the University of Washington Medical Center and the correlation of the clinical findings with the underlying morphologic and biochemical changes in the tissues. The relation of these oral lesions to systemic disease is stressed. Primarily designed for students with D.D.S., M.D., or D.V.M. degrees. Prerequisite: permission of instructor.

ORALB 566 Surgical Oral Pathology (2-4, max. 16) Students are trained to interpret microscopic slides of lesions from the oral cavity and related areas, and to correlate those with clinical findings. Each student is responsible for the grossing of specimens and the preparation of histology reports. Primarily designed for students with D.D.S., M.D., or D.V.M. degrees. Prerequisite: permission of instructor.

ORALB 568 Biomineralization (3) Ontogeny, microscopic and submicroscopic structure, organization and chemistry of bones and teeth in mammals. Mineral metabolism, crystallographic structure, mechanical properties, and experimental models of biomineralization. For graduate students and advanced students in dentistry and medicine; senior undergraduates with permission of instructor.

ORALB 569 Periodontal Diseases (2) Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial flora of acute and chronic
gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: jointly with PERIO 574.

ORAL 570 Seminar in Oral Pathology (1-3, max. 6) Consists of in-depth studies of specific oral diseases through use of seminar and discussion. Students are required to present literature reviews and to act as discussion leaders. Primarily designed for students with D.D.S., M.D., or D.V.M. degrees. Prerequisite: permission of instructor.

ORAL 572 Oral Pathology (5) Survey of the diseases of the oral facial regions in lecture and laboratory sessions. Diseases of teeth and their supporting structures and diseases of the oral and paranasal soft tissues and bones. Correlations between clinical findings and histopathologic features. Attendance in the laboratory is required.

ORAL 574 Clinical Stomatopathy (3) Diseases of the oral cavity and jaw are presented as the practitioner encounters them in detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis.

ORAL 575 Oral Biology Seminar (1-3, max. 10) Presentation and discussion of current research problems by members of the staff, investigators from other departments in the University, visiting scientists, and trainees. Prerequisite: permission of instructor.

ORAL 577 Molecular Aspects of Epithelial Biology (2) In-depth discussion of cytoskeleton, cell junctions, influence of growth factors, retinoids, and other exogenous agents on differentiation and function of normal stratified epithelia. Prerequisite: BIO C 440 (or equivalent) or permission of instructor. Offered: alternate years.

ORAL 578 Research Techniques in Oral Biology (2-4, max. 15) Introduction to biochemical, analytical, or morphological techniques employed in biochemical cytology or molecular pathology as well as in vitro techniques of tissue and organ culture. Prerequisite: permission of instructor.

ORAL 581-582-583 Secretary Process in Exocrine Glands (1-3) An instructive, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters.

ORAL 600 Independent Study or Research (*) Prerequisite: permission of instructor.

ORAL 700 Master's Thesis (*)

ORAL 800 Doctoral Dissertation (*)

Oral and Maxillofacial Surgery

Faculty

Chairperson
Philip Worthington

Professors
Belina, Owen Ross 1985; PhD, 1976, University of California (San Francisco); oral and maxillofacial surgery.

Gehrig, John D. * 1954, Emertius; DDS, 1946, University of Minnesota; oral and maxillofacial surgery, biological structure.

Kyak, H. Asuman * 1972; PhD, 1977, Wayne State University, health psychology, gerontology, geriatrics, environmental psychology.

Myall, Robert W. * 1977; MD, 1976, University of British Columbia (Canada); oral and maxillofacial surgery and biological structure.

Worthington, Philip 1976; MD, 1956, University of Liverpool (UK); oral and maxillofacial surgery.

Associate Professor
Bloomquist, Dale S. * 1972; DDS, 1969, University of Washington; oral and maxillofacial surgery.

Assistant Professors
Egbert, Mark A. 1986; DDS, 1981, University of Washington; oral and maxillofacial surgery.

Evans, John R. 1972; DDS, 1975, University of Washington; oral and maxillofacial surgery.

Instructors
Dawson, Kenneth 1993, (Acting); MDS, 1993, University of Melbourne (Australia); oral and maxillofacial surgery.

Reubens, Brian C. 1990, (Acting); DDS, 1980, University of Washington; oral and maxillofacial surgery.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

O S 520P Local Anesthesia and Emergencies (2) Techniques of local anesthesia, introduction to diagnosis, and initial management of emergencies in the dental office.

O S 522P Sedation and Pain Control (2) Techniques of sedation (oral, inhalational, intravenous) and pain control.

O S 530- Oral Surgery: Didactic (*, max. 3) Theory of major and minor oral surgery, using a medicated autotutorial approach covering extraction of teeth, impaction surgery, preprosthetic surgery, medications, surgical complications and postoperative care, biopsy, infections and principles of incision and drainage, bone cysts, maxillary sinus, salivary glands, treatment of facial trauma and deformities.

O S 560 Dental Sedation (2) For graduates of the various dental specialties on the theory, application, and techniques of dental sedation. All forms of sedation, including oral, intramuscular, intravenous, and inhalation, are covered. Clinical experience is provided in the second half of the quarter.

O S 630- Oral Surgery Clinic (2-6) Clinical application of 530P.

O S 651P Harborview Clerkship (2-10) Six-week rotation at Harborview Medical Center, including intensive instruction in oral surgery procedures and observing and assisting oral and maxillofacial surgery in the operating room. Credit/no credit only. Prerequisite: permission of department Chairperson.

O S 652P Smith Hospital, Texas, Rotation (2-12) Six-week rotation at John Peter Smith Hospital in Fort Worth, Texas, including intensive instruction in oral surgery procedures and observing and assisting oral and maxillofacial surgery in the operating room. Credit/no credit only. Prerequisite: permission of department Chairperson.

ORAL 404 Considerations in Care of the Patient With a Disability (*, max. 6) Stiefel Role of auxiliaries in dental treatment of the special patient, including psychological issues, communication techniques, wheelchair transfers; dental prevention, medical and dental management of specific disabilities; drug therapy, sedation, and anesthesia. Prerequisite: permission of instructor.

ORAL 460 Clinical Management of Patients With Disabilities (*, max. 10) Stiefel Participation in chairside dental treatment of a broad range of disabled populations, including homebound and institutionalized patients. Prerequisites: 404, permission of Instructor.

ORAL 525 Detection and Management of Human Disease (1-5, max. 17) Reviewing, interviewing, history taking, physical diagnostic techniques, use of medications, physical therapy, and clinical nonsurgical management and treatment of patients in dental set-

**ORALM 531P, 532P, 533P Special Clinical Topics: Acute and Chronic Pain (1, 1.2) Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, behavioral factors.

**ORALM 540P Clinical Pathological Conference: Oral Medicine Clinical Conference (2) Clinical conference devoted to case presentations of patients with dental treatment needs and complicating medical problems.

**ORALM 545- Clinical Pathologic Conference (1-4, max. 2) Clinical pathologic conference utilizing interdisciplinary approach to patient care and emphasizing basic science application.

**ORALM 547, 548, 549 Dental Practice Administration (2,2,2) Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: A,W,S,Sp.

**ORALM 550P Directed Studies in Oral Diagnosis (*, max. 12) See DPHS 449 for course description and prerequisite.

**ORALM 560 Advanced Diagnostic Techniques (2) Advanced diagnostic procedures used to identify oral and peroral diseases. Included are in-depth discussions of history analysis, methods for psychologic evaluation, soft and hard tissue diagnostic procedures, neurologic, salivary gland, and other tissue analyses requiring special procedures.

**ORALM 564 Dental Care of the Disabled I (*, max. 10) Advanced topics in rehabilitation dentistry including psychosocial issues; characteristics and needs of patients with specific disabilities; patient management and use of portable equipment; drug therapy, sedation and anesthesia; dental prevention, and emergency procedures. Seminars and self-directed study.

**ORALM 565 Oral Medicine Clinical Conference (*, max. 16) Clinical conference in which diagnostic data concerning patients seen in the oral medicine clinic are presented for evaluation. When possible, the patient is present with laboratory findings, radiographs, and the results of special tests.

**ORALM 567 Behavioral Management of Acute and Chronic Orofacial Pain (2) Overview of psychosomatic concepts, as related to acute and chronic pain. Behavioral management strategies for acute and chronic pain integrated into clinical care provided by primary dentist. Review biofeedbacks, relaxation, hypnosis, placebos, and related psychophysiological approaches. Open to graduate students, postdoctoral fellows, residents in dentistry, medicine, psychology.

**ORALM 567- Oral Medicine and Therapy (2, max. 6) Lecture directed toward the presentation and discussion of oral diseases and oral manifestations of systemic disease. Primarily the clinical manifestations' relationship to generalized disease processes and patient management in in-depth discussions of therapy.

**ORALM 576 Oral Medicine Literature Review (1) Seminar analyzes the recent literature concerning the area of oral medicine, diagnosis, and therapy for oral disease.

**ORALM 580 Current Concepts In Oral Radiology (2) Lecture/seminar covering current concepts in oral radiology including technical factors, radiation risks, observer characteristics and variation, radiographic localization, interpretation, and overview of current extraloral techniques.

**ORALM 584 Dental Care of the Disabled III (*, max. 10) Field practice in community outreach to facilities and agencies serving disabled populations. Includes observation, dental screenings, patient education and in-service training of direct care staff. Prerequisite: 404 or 664.

**ORALM 600 Independent Study or Research (*) Credit/no credit only.

**ORALM 620P Introduction to Clinical Diagnosis and Oral Medicine (1) Clinical patient diagnosis and treatment planning, including emergency care, physical diagnosis, case planning, and use of special radiographic procedures, nonsurgical diagnostic and therapeutic protocols.

**ORALM 630P Clinical Diagnosis and Oral Medicine (1-2, max. 3) Opportunity for examining, performing x-ray survey, and planning treatment for less-involved patients. Students also participate in rendering diagnosis and emergency treatment.

**ORALM 640- Advanced Clinical Diagnosis and Oral Medicine (1-2, max. 3) Advanced instruction in diagnosis and in the examination and handling of patients. Students are in block assignment and perform radiographic surveys, oral diagnosis, and treatment plans for prospective patients.

**ORALM 650P Oral Medicine Clinical Elective (1-6) Opportunities for students to work in various clinical activities at local hospitals or other sites outside the school. Credit/no credit only. Prerequisite: permission of instructor.

**ORALM 660 Rotations in Medical Disciplines (1-4, max. 24) Clinics, oriented to the hospital practice of oral medicine, deals with examination and nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no credit only.

**ORALM 663 Introduction to Educational Methods In Dentistry (2) Principles of teaching and learning, their applications in dental education. Basic principles include learning theory and cognitive processing, identifying prerequisites of learners, determining objectives of outcomes of learning, selecting appropriate methods and materials, using evaluation procedures. Increases understanding of instruction process to provide a sound foundation for teaching.

**ORALM 664 Dental Care of the Disabled II (*, max. 10) Practice in in-clinic delivery of dental care to different disabled populations. Includes rotations to institutions, long-term care facilities, and homebound service, using mobile equipment. Prerequisites: 564 and permission of instructor.

**ORALM 665 Clinical Oral Medicine (*, max. 33) Clinic involving the diagnostic evaluation of patients with difficult and unusual oral diseases. The student diagnoses and treats the patient. Types of therapy include medications and chemical agents, functional physical therapy, and counseling.

**ORALM 670 Clinical Oral Medicine Teaching (1-4, max. 10) Clinic designed to give the student experience and instruction in the teaching of clinical oral diagnosis. Treatment of emergency dental problems as well as routine and special diagnostic procedures is emphasized.

**Orthodontics**

**Faculty**

Chairperson
Peter A. Shapiro

**Professors**

Hering, Susan W. * 1990; PhD, 1971, University of Chicago; vertebrate functional morphology; relations between muscular function and growth. 

Kokich, Vincent G. * 1974; DDS, 1971, University of Washington; orthodontics: craniofacial growth and development, suture morphogenesis, premature sutural fusion.

Little, Robert M. * 1974; DDS, 1966, Northwestern University; orthodontics.

Moffett, Benjamin C. * 1964, (Emeritus); PhD, 1952, New York University; anatomy.

Moore, Alton W. 1948, (Emeritus); DDS, 1941, University of California (San Francisco); orthodontics.

Newell, Laura L. * 1957, (Adjunct); PhD, 1967, University of Washington; primatology growth and development, human biology, evolutionary aspects of dentomorphology.

Rideal, Richard A. * 1949, (Emeritus); DDS, 1945, Marquette University; orthodontics.

**Associate Professors**

Artun, Jon 1988; DDS, 1969, University of Oslo (Norway); orthodontics.

Joondeph, Donald R. * 1971; DDS, 1967, Northwestern University; orthodontics.

**Assistant Professors**

Bollen, Anne-Marie 1990; PhD, 1990, University of Michigan; orthodontic surgery.

---

**Course Descriptions**

See page 55 for explanation of course numbers, symbols, and abbreviations.

**ORTHO 449 Directed Studies in Orthodontics (*)** See DPHS 449 for course description and prerequisite. Credit/no credit only.

**ORTHO 520P Craniofacial Growth and Development in Orthodontic Diagnosis and Treatment (B) Basic principles of pre- and postnatal growth and craniofacial development integrated with the recognition, analysis, and treatment planning of problems encountered in dental and skeletal malocclusions.

**ORTHO 522P Beginning Adjunctive Orthodontics (2) Lecture/laboratory instruction in indications for, and techniques of, simple orthodontic tipping, rotational and extrusive movements often necessary in preparation for restorative and periodontal therapy. Prerequisite: 520P.

**ORTHO 550P Directed Studies in Orthodontics (*)**, max. 6) See DPHS 449 for course description and prerequisite.

**ORTHO 551 Review of Selected Literature in Orthodontics (1) Students select a topic for review, review appropriate literature, and prepare written critique.

**ORTHO 552 Journal Club (1) Predoctoral students join graduate students in review of current orthodontic literature.

**ORTHO 560 Orthodontics Seminar (1-5, max. 25) Methods of diagnosis, analysis, and treatment planning, appliance construction; analysis of methods and theoretical principles used in the treatment of malocclusion. The student presents a detailed case analysis and plan of treatment for each clinical patient supervised.
ORTHO 582, 583, 584, 585, 586, 587 Orthodontic Theory (2,2,2,2,2) Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth.

ORTHO 570 Roentgenographic Cephalometry (2) Basic principles, history, and techniques of roentgenographic cephalometry.

ORTHO 575 Post-Retention Seminar (1, max. 2) Each student is required to locate one or more former orthodontic patient(s) with at least ten years postretention. Complete orthodontic records must be obtained, analyzed, and discussed in the seminar. The instructor critiques the presentation and offers similar or contrasting cases for comparison.

ORTHO 580 Orofacial Biology (1, max. 8) Comprehensive evaluation seminar of the literature relative to the growth and development of the craniofacial complex. Anthropology, embryology, morphogenesis, genetics, and anatomy are integrated to give the student an appreciation of facial development. Outside reading assignments by the student are discussed and critiqued during the seminar discussion.

ORTHO 582 Adult Orthodontics Seminar (2) Seminar for orthodontic, periodontic, and restorative dentistry graduate students in comprehensive, integrated diagnosis and treatment planning of the dental problems of the adult patient.

ORTHO 585 Surgical Orthodontic Diagnosis and Treatment Planning (3) Seminar and clinic for orthodontic graduate students and oral surgery residents in comprehensive, integrated diagnosis, and treatment planning for patients with major facial deformities.

ORTHO 584 Clinical Management of Cleft Lip and Palate and Craniofacial Anomalies (2) Management of these complex patients involves members of a dedicated, highly specialized multidisciplinary team. Insight gained into specific evaluation and treatment modalities of each discipline through lectures, seminars, assigned readings. Integrated approach to management is illustrated by attendance at craniofacial staff and clinics. Prerequisite: graduate students in orthodontics.

ORTHO 589 Applied Psychology in Orthodontics and Pediatric Dentistry (1) Application of psychological theories, research, and intervention strategies to orthodontics and pediatric dentistry. Topics include the principles of behavior change, patient compliance with therapeutic regimens, and motivations for orthodontic treatment. Prerequisite: graduate standing in dentistry or permission of instructor.

ORTHO 590 Scientific Methodology in Dental Research (2) Review of the scientific method: Evaluation of dental literature. Discussion of proposed master's degree research projects. Procedure in scientific writing, formulation and discussion of hypothetical research projects related to orthodontics.

ORTHO 597, 598, 599 Preclinical Technique (1; max. 5; max. 3; max. 3) Techniques of construction and manipulation of the edgewise arch mechanism.

ORTHO 600 Independent Study or Research (*) Prerequisite: permission of instructor.

ORTHO 630P Orthodontic Clinic (1, max. 6) Direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative and/or periodontal therapy. Prerequisite: 522P.

ORTHO 660P Clinical Orthodontics (1-6, max. 24) Clinical application of the techniques in the treatment of malocclusion.

ORTHO 662 Adult Orthodontics Clinic (1) Artun, Ivo, Moore Clinic for orthodontic graduate students in the treatment of the dental problems of the adult patient.

Pediatric Dentistry

Faculty

Chairperson
Peter K. Domoto

Professors
Lewis, Thompson M. * 1955, (Emeritus); DDS, 1950, Northwestern University; pediatric dentistry.

Weinstein, Philip * 1972, (Adjunct); PhD, 1971, University of Kentucky; dental behavioral science, treatment and prevention of fear and pain, clinical assessment.

Associate Professors
Davis, John M. * 1967; DDS, 1961, University of Washington; pediatric dentistry.

Domoto, Peter K. 1973; DDS, 1964, University of California (San Francisco); pediatric dentistry, dental behavioral science.

Leggott, Penelope J. 1993; BDeS, 1969, University of Bristol (UK); pediatric dentistry.

Peterson, Devereaux * 1982; PhD, 1980, University of Pittsburgh; pedodontics, educational administration, and dental treatment for medically compromised patients.

Assistant Professor

Lecturer
Williams, Bryan J. 1991; DDS, 1974, Western Ontario University (Canada).

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

PEDO 520P Pediatric Dentistry (4) Introduction to clinical pediatric dentistry, including behavior management, oral diagnosis, preventive dentistry, dental anomalies, radiography, anesthesia, restorative procedures, pulp therapy, interceptive orthodontics, and traumatic dental injuries of the child patient.

PEDO 522P Professional Issues: Communication Skills I (1) Introductory communication skills with emphasis on interviewing, presented in seminar format. Credit/no credit only.

PEDO 524P Professional Issues: Communication Skills II (1) Continuation of basic communication skills. Credit/no credit only.

PEDO 529P Professional Issues: Management of Pediatric Patient Behavior (1) Introduction to selected theories of child development and application in dental setting; pediatric cognitive, affective, and social development and introduction to problematic child behavior; use of social systems approach to overview child psychosocial development for the dentist. Credit/no credit only.

PEDO 560P Directed Studies in Pediatric Dentistry (*, max. 6) See DPHS 449 for course description and prerequisite.

PEDO 600 Independent Study or Research (*) Prerequisite: permission of instructor.

PEDO 630P Clinical Pediatric Dentistry (1, max. 7) Educational experiences in comprehensive clinical pediatric dentistry. Students register third and fourth years for 24 sessions in the pediatric dentistry clinic, a 3-day rotation at a community clinic, computer-assisted clinical simulations, behavioral change projects, and a written analysis of videotaped patient/student clinic encounters.

PEDO 650P Pediatric Dentistry Extramurals (1-4) Clinical extramurals in the field of children's dentistry. Prerequisite: permission of instructor.

Periodontics

Faculty

Chairperson
Gosta Rutger Persson

Professors
Ammons, William F. * 1970; DDS, 1959, University of Texas (Houston); periodontics.

Dale, Beverly A. * 1972; PhD, 1968, University of Michigan; keratin biochemistry.

Engel, L. David * 1974; DDS, 1967, University of Minnesota; cellular immunology, regulation of three lymphocyte responses.

Johnson, Robert H. * 1981; DDS, 1962, McGill University (Canada); periodontics.

Page, Roy C. * 1967; DDS, 1957, University of Maryland; connective-tissue pathology, chronic inflammation, immunopathology, periodontal disease.

Persson, Gosta Rutger * 1985; DDS, 1967, University of Lund (Sweden); diagnosis of periodontal diseases and the consecutive process of clinical decision making.

Robertson, Paul B. * 1992; MS, 1972, University of Alabama; host-bacterial interactions in the etiology and pathogenesis of the periodontal diseases.

Robinson, Murray * 1966, (Adjunct); DDS, 1961, University of Minnesota; salivary biochemistry and salivary-bacterial interactions.

Yuodelis, Ralph A. * 1983, (Adjunct); DDS, 1955; University of Alberta (Canada); restorative dentistry, prosthodontics, periodontics.

Associate Professors
Baal, David A. * 1980; DDS, 1970, Ohio State University; gingival blood flow measured by laser Doppler flowmetry and preventive periodontics.

Bordin, Sandra * 1981, (Research); PhD, 1966, University of Ferrara (Italy); regulation of connective tissue repair by immune-inflammatory complement components.

Selipsky, Herbert * 1972; MSD, 1973, University of Washington; periodontics.

Assistant Professors

Weinberg, Aaron * 1991; PhD, 1990, Hebrew University (Israel); molecular pathogenesis of gram-negative anaerobic bacteria involved in periodontal disease.

Lecturer
Spector, Michael D. 1979; DDS, 1975, University of Illinois; periodontal diseases, treatment of recurrent and refractory disease.
**PERIO 525P-S526P Prevention/Periodontics (2-2) Overview of preventive dentistry, introduction to periodontal therapy.**

**PERIO 627P Introduction to Periodontics (1) Epidemiology, natural history, etiology, and histopathology of various periodontal diseases.**

**PERIO 530P-531P Periodontics (2-2) Principles of examination, consultation, instrumentation, occlusal therapy, and treatment planning of the periodontal patient.**

**PERIO 541P Professional Issues: Ethics in Dentistry (1) Designed to improve ethical reasoning, sensitivity skills; to convey ethical standards and values of the profession through small-group discussions. Standard cases of moral reasoning; ethical sensitivity given at the beginning and end of course. Credit/no credit only. (Formerly DENT 541P.)**

**PERIO 550P Directed Studies in Periodontics (*, max. 6) See DPHS 449 for course description and prerequisite.**

**PERIO 561 Periodontal Case Management (2-, max. 8) Didactic presentation of clinical periodontics to provide a comprehensive view of the field and a grasp of modern therapeutics.**

**PERIO 565 Periodontal Surgical Anatomy (2) Lecture and dissection course in intraoral anatomy (maxilla and mandible only) from a periodontal surgical approach. Prerequisite: graduate standing in periodontics.**

**PERIO 566 Practice Management (1) Aspects of setting up and administering a private periodontal practice. Financing, insurance, office design, equipment, employees, professional forms, marketing strategies, and patient management. Prerequisite: 561.**

**PERIO 574 Periodontal Microbiology (2) Viral, bacterial classification; physiology; toxic mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial flora of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: jointly with ORALS 569.**

**PERIO 575 Immunologic Aspects of Oral Diseases (2) Lecture course designed to acquaint students with basic concepts of immunology and immunopathology. Topics include cellular immunology, antibody structure and function, complement system, immunopathologic mechanisms, tumor immunology and immunologic manifestations in mucocutaneous oral lesions as well as immunology of caries and periodontal disease.**

**PERIO 576 The Molecular and Cellular Biology of the Periodontium (2) Nucleic acid, protein, and carbohydrate biochemistry reviewed. Roles of collagen and proteoglycans in gingival tissues and the organization of oral epithelia discussed. Structures of human and animal periodontal lesions compared. Cellular biology of inflammatory and immunologic mechanisms in periodontal disease discussed. History, classification, and epidemiology of periodontal diseases described.**

**PERIO 577 Review of Literature (2, max. 16) Concise review of the scientific periodontal literature with specific focus on studies of periodontal diagnosis, wound healing, periodontal regeneration, microbiology, and implant procedures.**

**PERIO 582 Periodontic Treatment Planning Seminar (1, max. 12) Weekly seminar involved with the presentation, discussion, and tentative solution of moderate to complex problems in diagnosis and treatment. Credit/no credit only.**

**PERIO 585 Periodontal Therapy Seminar (1-, max. 8) Weekly seminar utilizing the case review method and dealing with the treatment of moderate to advanced periodontal disease.**

**PERIO 586 Longitudinal Evaluation of Periodontal Therapy (1-, max. 8) Close examination of case progress from initial therapy to most recent maintenance visits to determine efficacy of method, demands upon patient, and temporal effect of therapy and survival. Preparation and delivery of a lecture on a therapeutic modality. Credit/no credit.**

**PERIO 587 Periodontal Diseases Research Seminar (1, max. 12) Weekly seminar devoted to advances in periodontal research. Topics include research design, methodology, and data derived from recent and/or ongoing periodontal research. Credit/no credit only.**

**PERIO 592 Prescription Surgery (1-1-1) Clinical course in periodontal surgery in which surgical procedures are performed on prescription basis for patients undergoing therapy in the undergraduate dental clinic. Exposes student to a wider spectrum of patients and to stimulate an environment in which the student can encounter the problems in communication and patient management that occur in the private sector.**

**PERIO 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser.**

**PERIO 620P Introduction to Clinical Periodontics (1) Clinical periodontics, with emphasis on examination and assessment.**

**PERIO 630P-631P-632P Clinical Periodontics (1-1-1) Clinical experience in examination, preventive periodontics, instrumentation, and treatment planning of periodontal therapy in patients with mild to moderate periodontal disease.**

**PERIO 640P-641P Advanced Clinical Periodontics (1-1-2) Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: A.W.Sp.**

**PERIO 659P Periodontics Extended Learning (*, max. 4) Supplemental work in periodontics to correct an area of student deficiency. Credit/no credit only.**

**PERIO 660 Clinical Periodontics (2-6, max. 60) Clinical experience in diagnosis and treatment of periodontal disease.**

**PERIO 663 Pro-Protodontics Clinical Periodontics (*) Clinical diagnosis and treatment of periodontal disease for nonperiodontics student. Prerequisite: permission of department chairperson.**

**PERIO 665 Clinical Practice Teaching (*) Supervised visit in teaching clinical periodontics to undergraduate dental students.**

**PERIO 685 Hospital Periodontics (1) Preparation in periodontics to practice in hospital situations, including experience in operation of nitrous oxide analgesia, general anesthesia, intravenous premedication, treating of out- and inpatients.**

**PERIO 566 Practice Management (1) Aspects of setting up and administering a private periodontal practice. Financing, insurance, office design, equipment, employees, professional forms, marketing strategies, and patient management. Prerequisite: 561.**

**PERIO 574 Periodontal Microbiology (2) Viral, bacterial classification; physiology; toxic mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial flora of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: jointly with ORALS 569.**

**PERIO 575 Immunologic Aspects of Oral Diseases (2) Lecture course designed to acquaint students with basic concepts of immunology and immunopathology. Topics include cellular immunology, antibody structure and function, complement system, immunopathologic mechanisms, tumor immunology and immunologic manifestations in mucocutaneous oral lesions as well as immunology of caries and periodontal disease.**

**PERIO 576 The Molecular and Cellular Biology of the Periodontium (2) Nucleic acid, protein, and carbohydrate biochemistry reviewed. Roles of collagen and proteoglycans in gingival tissues and the organization of oral epithelia discussed. Structures of human and animal periodontal lesions compared. Cellular biology of inflammatory and immunologic mechanisms in periodontal disease discussed. History, classification, and epidemiology of periodontal diseases described.**

**PERIO 577 Review of Literature (2, max. 16) Concise review of the scientific periodontal literature with specific focus on studies of periodontal diagnosis, wound healing, periodontal regeneration, microbiology, and implant procedures.**

**PERIO 582 Periodontic Treatment Planning Seminar (1, max. 12) Weekly seminar involved with the presentation, discussion, and tentative solution of moderate to complex problems in diagnosis and treatment. Credit/no credit only.**

**PERIO 585 Periodontal Therapy Seminar (1-, max. 8) Weekly seminar utilizing the case review method and dealing with the treatment of moderate to advanced periodontal disease.**

**PERIO 586 Longitudinal Evaluation of Periodontal Therapy (1-, max. 8) Close examination of case progress from initial therapy to most recent maintenance visits to determine efficacy of method, demands upon patient, and temporal effect of therapy and survival. Preparation and delivery of a lecture on a therapeutic modality. Credit/no credit.**

**PERIO 587 Periodontal Diseases Research Seminar (1, max. 12) Weekly seminar devoted to advances in periodontal research. Topics include research design, methodology, and data derived from recent and/or ongoing periodontal research. Credit/no credit only.**

**PERIO 592 Prescription Surgery (1-1-1) Clinical course in periodontal surgery in which surgical procedures are performed on prescription basis for patients undergoing therapy in the undergraduate dental clinic. Exposes student to a wider spectrum of patients and to stimulate an environment in which the student can encounter the problems in communication and patient management that occur in the private sector.**

**PERIO 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser.**

**PERIO 620P Introduction to Clinical Periodontics (1) Clinical periodontics, with emphasis on examination and assessment.**

**PERIO 630P-631P-632P Clinical Periodontics (1-1-1) Clinical experience in examination, preventive periodontics, instrumentation, and treatment planning of periodontal therapy in patients with mild to moderate periodontal disease.**

**PERIO 640P-641P Advanced Clinical Periodontics (1-1-2) Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: A.W.Sp.**

**PERIO 659P Periodontics Extended Learning (*, max. 4) Supplemental work in periodontics to correct an area of student deficiency. Credit/no credit only.**

**PERIO 660 Clinical Periodontics (2-6, max. 60) Clinical experience in diagnosis and treatment of periodontal disease.**

**PERIO 663 Pro-Protodontics Clinical Periodontics (*) Clinical diagnosis and treatment of periodontal disease for nonperiodontics student. Prerequisite: permission of department chairperson.**

**PERIO 665 Clinical Practice Teaching (*) Supervised visit in teaching clinical periodontics to undergraduate dental students.**

**PERIO 685 Hospital Periodontics (1) Preparation in periodontics to practice in hospital situations, including experience in operation of nitrous oxide analgesia, general anesthesia, intravenous premedication, treating of out- and inpatients.**

**PROS 510P Introduction to Dental Nutrition (3) Basic principles of normal human nutrition, including nutrient requirements at various ages, assessment of nutritional status, nutritive values of foods, with special emphasis on the role of diet in development and maintenance of oral tissues.**

**PROS 520P Introduction to Complete Dentures (3) Didactic course in the treatment of completely edentulous patients. Instruction is provided in diagnostic procedures, complete denture construction, and maintenance care.**

**PROS 521P Management of Immediate Denture Patients (1) Lecture course describing and illustrating the clinical management of immediate denture patients (typical and overdenture). (Formerly 530P.)**

**PROS 523P Removable Partial Denture Design (2) Lectures in the basic principles of removable partial denture design; more advanced designs are discussed in seminars; certain technical aspects of design procedures are done in the classroom.**

**PROS 525P Removable Partial Denture Clinical Preparatory Course (4) Lecture-laboratory course dealing with those procedures the dentist must perform in order to fabricate a physiologically acceptable removable partial denture. The student gains experience via clinically simulated laboratory exercises prior to beginning prosthodontic treatment of a partially edentulous patient.**

**PROS 532P Special Topics in Prosthodontics (1) Lecture describing and illustrating the following topics: relining procedure, management of difficult patients, etc.**

**Course Descriptions**

See page 55 for explanation of course numbers, symbols, and abbreviations.
maxillofacial prosthesis, and quality-control problems in private practice.

PROS 542P Special Topics in Prosthodontics (1) Lecture describing and illustrating the following topics: retinum procedure, management of difficult patients, maxillofacial prosthesis, and quality-control problems in private practice.

PROS 550P Directed Studies in Prosthodontics (*, max. 6) See DPHS 449 for course description and prerequisite.

PROS 550P Complete Dentures (2) Lecture/seminar devoted to the diagnosis and treatment of the completely edentulous patient, with emphasis on management of patients with difficulties in treatment.

PROS 562P Removable Partial Dentures (2) Lecture/seminar concentrating on factors peculiar to fabrication of immediate dentures, with emphasis on management of combined fixed and removable therapy.

PROS 563P Maxillofacial Prosthetics I (1) Introductory lecture/seminar with emphasis on pertinent literature, case reports, and the reliance of maxillofacial prosthetics on sound prosthodontic principles.

PROS 564P Maxillofacial Prosthetics II (1) Lecture/seminar augments 563. Diagnosis and detailed treatment planning, procedures for patients with anatomic or neurologic deficits of head and neck.

PROS 571P Review of Literature Seminar (1, max. 12) Continuous weekly seminar devoted to the review of prosthodontic and related literature.

PROS 572P Special Topics Related to Prosthodontics (1) Lecture/seminar dealing with subjects having a bearing on comprehensive treatment of the maxillofacial and regular prosthodontic patient. Topics include surgery, speech, orthodontics, psychology, gerontology, and sociology.

PROS 600P Independent Study or Research (*) Prerequisite: permission of graduate program advisor.

PROS 620P Clinical Complete Dentures (3-3) Clinical course dealing with the basic principles of complete denture fabrication as well as the diagnosis and treatment of a completely edentulous patient.

PROS 621P Complete Denture Prosthodontics (1) Clinical course using the didactic material presented in 620P. The student manages a second complete-denture patient during Winter Quarter with less supervision than in 620P, and also provides follow-up care to the 620P and 621P patients during Winter and Spring Quarter.

PROS 630P Clinical Prosthodontics (1, max. 4) Clinical course involving the diagnosis and management of completely and partially edentulous patients. Removable partial dentures and immediate dentures are fabricated. Follow-up care provided for patients previously treated.

PROS 640P Clinical Prosthodontic Maintenance (1, max. 4) Clinical course involving management of patients requiring an intra-oral prosthesis, plus the maintenance of previously treated patients. Involves recall, adjustments, relines, and completion of treatment begun in 630P.

PROS 650P Extramural in Prosthodontics (*, max. 12) Elective clinical experiences, including Foss Nursing Home or clinical practice teaching. Credit/no credit only. Prerequisite: permission of instructor.

PROS 689P Prosthodontics Extended Learning (*, max. 4) Supplemental work in prosthodontics to correct an area of student deficiency. Credit/no credit only.

PROS 690P Clinical Prosthodontics (2, max. 6) Practical application of material covered in 560 and 562.

PROS 695P Clinical Maxillofacial Prosthetics I (1-1) Clinical/laboratory providing exposure to treatment of maxillofacial prosthetic patients.

PROS 696P Clinical Maxillofacial Prosthetics II (1-1) Clinical/laboratory expanding upon 695P, including extensive patient treatment.

PROS 695- Clinical Practice Teaching (1, max. 4) Supervised experience in teaching clinical prosthodontics to the undergraduate dental student.

PROS 670P Advanced Clinical Prosthodontics (4, max. 16) Continuation of 660. Patients who present more difficult clinical problems are assigned.

### Restorative Dentistry

#### Faculty

**Chairperson**

Bruce R. Rothwell

**Professors**

Canfield, Robert C. * 1967, (Emeritus); DDS, 1951, University of Washington; restorative dentistry.

Hamiton, A. I. an 1968, (Emeritus); DDS, 1936, University of Toronto (Canada); restorative dentistry.

Hodson, Jean Turnbaugh * 1952, (Emeritus); MS, 1958, University of Washington; restorative dentistry.

Johnson, Glen H. * 1980; DDS, 1972, University of Washington; Instruction, clinical trials and laboratory research with dental biomaterials.

Morrison, Kenneth N. * 1948, (Emeritus); DDS, 1943, University of Toronto (Canada); restorative dentistry.

Nicholls, Jack L. * 1965; PhD, 1966, Purdue University; dental materials.

Warnick, Myron E. * 1956; DDS, 1955, University of Alberta (Canada); restorative dentistry.

Yuodelis, Ralph A. * 1983; DDS, 1955, University of Alberta (Canada); restorative dentistry, prosthodontics, periodontics.

**Associate Professors**

Bales, David J. 1983; DDS, 1957, University of Washington; restorative dentistry.

Chastain, Joseph E. 1989; (Adjunct); DDS, 1967, University of Michigan.

Ostlund, Lyle E. 1972, (Emeritus); DMD, 1947, University of Oregon; restorative dentistry.

Powell, Lauri Virginia 1986; DMD, 1982, University of Mississippi; restorative dentistry.

**Assistant Professors**

Johnson, Barton S. 1991; DDS, 1985, University of California (Los Angeles); hospital-based dentistry, molecular biology cancer research.

Lepe, Xavier 1993; DDS, 1980, University of Guadalajara (Mexico); restorative dentistry, dental materials.

**Instructor**

Hage, Abbie D. 1990; (Acting); DDS, 1993, University of Washington; hospital-based dentistry.

**Senior Lecturers**

Gordon, Glenn E. 1985; DDS, 1962, University of Michigan; general dentistry, restorative dentistry.

**Lecturers**

Townsend, John D. 1977; DDS, 1967, McGill University (Canada); restorative dentistry, fixed prosthodontics, periodontics.

### Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

RES D 410 Dental Anatomy (3) Lecture and laboratory exercises on the morphology and nomenclature of individual human adult and primary teeth. Introduction to function, internal tooth morphology, and the influence of tooth anatomy on selected clinical procedures. For dental hygiene students; others by permission of associate dean.

RES D 449 Directed Studies in Restorative Dentistry (*) See DPHS 449 for course description and prerequisite.

RES D 510P Introduction to Dental Materials (2) Physical and chemical properties of dental materials.

RES D 515P Dental Anatomy (3) Lecture and laboratory on the morphology and nomenclature of individual teeth of the adult human dentition. Introduction to tooth histology and function and the influence of tooth anatomy on clinical dental procedures.

RES D 516P Introduction to Occlusion (3) Lecture/laboratory in the functional determinants of occlusal morphology. Preparation and waxing techniques for developing opposing quadrants by the additive waxing technique.

RES D 517P Functional Analysis of Occlusion (3) Clinical and laboratory experiences in examination and charting of patient's occlusion, record-taking for analysis of occlusion on a dental articulator, and preclinical diagnostic correction of problems of occlusion on articulated clinical casts. Provides basic background or technical information relative to laboratory and clinical experiences.

RES D 520P, 521P, 522P, 523P Introduction to Operative Dentistry Technique (3,3,3) Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthet-
ics. Emphasis on basic principles of cavity preparation, preparation and restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care.

RES D 525P, 526P, 527P Fixed Prosthodontics (3,3,3) Serve as introduction to area of restorative dentistry dealing with indirect restorations. Preclinical experience provided in tooth preparation and restoration, fabrication for various crown designs, singly and in conjunction with various pontic types to serve as fixed partial denture prostheses. Projects emphasize single-tooth preparation/restoration, multiple-tooth preparation/restoration, and esthetic veneer restorations.

RES D 530P, 531P, 532P Restorative Dentistry (2,2,2) Lecture series related to 630P presenting restorative dentistry principles, including supportive material on clinical procedures.

RES D 542P New Developments in Dental Materials (1) Dental materials recently introduced to dental profession reviewed, compared to current materials, and clinically demonstrated.

RES D 550P Directed Studies In Restorative Dentistry (*, max. 6) See DPHS 449 for course description and prerequisite.

RES D 560 Independent Study or Research (') Prerequisite: permission of graduate program adviser.

RES D 570 Review of Literature Seminar (1, max. 6) Continuous weekly seminar devoted to a review of restorative and related literature, and discussion of teaching methods, philosophy of teaching and treatment.

RES D 580 Restorative Treatment Planning Seminar (1-, max. 8) Continuous weekly seminar to discuss controversial treatment problems and difficult diagnostic cases selected for graduate students.

RES D 581 Comprehensive Treatment Planning (2-, max. 4) Seminar devoted to the diagnosis and treatment of comprehensive dental cases with special emphasis given to the relationship of periodontics to restorative dentistry.

RES D 588 Masticatory Functional Analysis and Occlusal Adjustment (2) Lecture/seminar and clinical sessions in the study of the physiology of occlusion. Pertinent literature reviewed and discussed from the multidisciplinary viewpoint. The clinical sessions include training in masticatory functional analysis and treatment of occlusally related diseases.

RES D 589 Review of Literature in Occlusion (2) Seminar to review pertinent literature in occlusion.

RES D 590 Fundamentals of Fixed Prosthodontics (2-, max. 4) Lecture/laboratory/clinical sessions in the study of gnathological principles and procedures as they pertain to the treatment of comprehensive cases assigned to the students. Use and application of several fully adjustable articulators.

RES D 600 Oral Rehabilitation (2-6, max. 32) Clinical course to provide experience in diagnosis and treatment of patients requiring restorative procedures from single restorations to complex oral rehabilitative methods. Special emphasis is directed toward the integration of periodontics and occlusion as they relate to restorative dentistry.

RES D 605 Clinical Practice Teaching (1, max. 4) Supervised experience in teaching clinical fixed prosthodontics to undergraduate dental students.
College of Education

Dean
Allen D. Glenn
222 Miller

Associate Deans
Sheila Lowenbraun
Richard S. Neel

The mission of the College of Education is reflected in the following goals: (1) to conduct systematic study and research on problems, concerns, and policies of education; (2) to conduct programs that will attract and prepare those who will provide leadership for the schools; (3) to experiment, innovate, and develop models for improved training of school personnel; (4) to generate new ideas for the improvement of education; (5) to become intimately involved in cooperative and coordinated research and service activities with the educational enterprise; and (6) to develop systematic procedures for ensuring adequate attention to education for minority groups.

Programs

In order to achieve its mission, the College of Education has two clusters of programs: (1) professional studies and (2) graduate studies. Each cluster is administered by an associate dean. The professional studies programs lead to a Bachelor of Arts degree or to any of a number of professional certificates in the field of education. The various graduate programs lead to the Master of Education, Doctor of Education, or Doctor of Philosophy degrees.

Special Facilities and Services

The College of Education maintains a number of special facilities to assist in the fulfillment of its goals. Among these are the Office of Teacher Education Advising and Certification, the Office of Graduate Studies and Research, and the Experimental Education Unit. In addition, the College of Education maintains formal relationships with a number of school districts in the area to provide research and field experience opportunities for the students in the various programs. Individuals interested in teacher certification should contact the Office of Teacher Education Advising and Certification.

Professional Certification Programs

Sheila Lowenbraun
Associate Dean
201 Miller, DO-12

Teacher Education Advising and Certification
211 Miller, DO-12

The College of Education is authorized by the State Board of Education to offer professional certificate programs in education for administrators, educational staff associates, and teachers. Academic counselors are available in the Office of Teacher Education Advising and Certification to help with pre-program counseling, applications, long-range planning, continuing certification needs, referrals to other campus resources, general program advising, and registration.

Administrative Certificates

Administrative certificate preparation programs for superintendents, principals, and program administrators are offered in the College of Education. Information concerning admission and requirements for these programs is available from the Area of Educational Leadership and Policy Studies, M204 Miller.

Educational Staff Associate Certificates

Educational staff associate certificate preparation programs are offered for the communication disorders specialist, occupational therapist, school counselor, school psychologist, and social worker. These programs are offered in various departments of the University, in the College of Education. Information concerning requirements and admission may be obtained as follows: communication disorders specialist - Department of Speech and Hearing Sciences, 203 Eagleson, JG-15, University of Washington, Seattle, Washington 98195; occupational therapist - Department of Rehabilitation Medicine, CC-902 University of Washington Medical Center, RJ-30, Seattle, Washington 98195; school counselor - School of Education, University of Washington, 98195; school psychologist - School of Social Work, JH-30, University of Washington, Seattle, Washington 98195.

Teaching Certificates

The College of Education is authorized by the State Board of Education to prepare and recommend individuals for Initial and Continuing Teaching Certificates. The Teacher Education Program is accredited by the National Council for the Accreditation of Teacher Education and by the National Association of State Directors of Teacher Education and Certification. Graduates are qualified for certification in all states party to the Interstate Certification Compact and in other states as well.

Initial Teaching Certification Program

The initial certification program at the University of Washington is in the midst of a total revision. To receive the most current information on the certification program, prerequisites, specific admission criteria, applications, and deadlines, contact the Office of Teacher Education Advising and Certification.

Continuing Teaching Certificates

Teachers may obtain an initial renewal or a continuing certificate either through a state-approved teaching institution or directly through the Office of the Superintendent of Public Instruction (OSPI). For information on the OSPI guidelines, contact any Educational Service District or the Office of Professional Licensing and Certification, OSPI, FG-11, Old Capitol Building, Olympia, Washington 98504.

Teachers who wish to be recommended for the Continuing Teaching Certificate through the University of Washington, whether as postbaccalaureate or graduate students, should consult an adviser in the Office of Teacher Education Advising and Certification regarding certificate requirements.

Endorsements on Teaching Certificates

Teachers holding an initial or continuing teaching certificate under the 1988 guidelines may add endorsements to their certificates which will qualify them to teach subjects and at grade levels in addition to those in which they were originally endorsed. For information on state requirements and on endorsement course work through the University of Washington, contact the Office of Teacher Education Advising and Certification, 211 Miller, or UW Extension, GH-21, Seattle, Washington 98195. Teachers may also obtain applications and information and apply for endorsements directly through OSPI or an Educational Service District.

Graduate Degree Programs

Richard S. Neel, Associate Dean for Graduate Studies and Research, Graduate Program Coordinator

The College of Education offers three advanced degrees: Master of Education, Doctor of Education, and Doctor of Philosophy. Graduate students may specialize in their degree studies in curriculum and instruction; educational psychology; educational leadership and policy studies; or special education. Questions regarding graduate study in education should be directed to the Office of Graduate Studies and Research, 206 Miller, DO-12, College of Education, University of Washington, Seattle, Washington 98195.

Master of Education Degree

The Master of Education degree requires a minimum of 45 credits, including at least 15 credits in a specialized area of study in education; 9 credits related to but outside of the specialization, some course work outside education; 9 thesis credits or, for the nonthesis option, 9 credits in a field study or other approved project; and a final examination.

Doctor of Education Degree

The Doctor of Education degree is designed to prepare professionals whose primary interest is to deal directly with problems of educational practice. The program of study leading to the Doctor of Education degree, as a professional degree, focuses on the utilization of research knowledge and practitioners' knowledge, rather than on the production of research knowledge.

This professional degree requires at least two years of resident study, a program of specialized study with credit in education and related fields, sufficient preparation in research methodology to interpret research findings for use in practice, an internship and leadership training, a General Examination, a dissertation on a problem of educational practice, and a Final Examination.

Doctor of Philosophy Degree

The Doctor of Philosophy degree in education is specifically a research degree. While the typical recipient of the Doctor of Philosophy degree becomes an educational practitioner in the schools or other educational agencies, the holder of the Doctor of Philosophy degree is prepared for a career of research on issues fundamental to the conduct of education issues that range from fairly narrow questions about human learning to macroquestions regarding the form of societies' educational institutions. The scope of the Ph.D. degree in education is broad. It is possible to pursue a Ph.D. degree organized around traditional study areas such as educational psychology, curriculum and instruction, special education, or educational leadership. A student may develop a course of study that integrates various elements of more than one study area (e.g., multilingual education, literacy).

Degree requirements include minimally two years of resident study, a program of specialized study with credits both in education and in other academic units, preparation in research methodology adequate to design and assess research in the field of specialization, sufficient study in cognate fields inside and outside of education to ensure that the candidate can place the specialized research in a broader context, a General Examination, a research dissertation, and a Final Examination.
Accreditation
The College of Education has the following formal accreditation: the American Psychological Association (APA) for the Ph.D. program in school psychology; National Council for the Accreditation of Teacher Education (NCATE) for all certification programs in teaching and administration.

Admission Requirements
Admission to graduate degree programs in education is competitive, with space limited by faculty size and facilities. To be considered in the competition for admission to the Master of Education degree programs, the applicant should have earned a baccalaureate degree from an accredited institution and present a 3.00 GPA on the last 90 graded quarter hours, or 60 semester hours, of course work taken, must have submitted a score on the Graduate Record Examination general test, and must have satisfied any additional prerequisites specified by the area of specialization.

Consideration for admission to either doctoral program requires a master's degree or equivalent preparation in a field appropriate to the area of specialization, usually at least a 3.00 GPA in the master's program, satisfaction of special prerequisites specified by the area of specialization, and completion of the application steps outlined in the appropriate doctoral program document (available in the Office of Graduate Studies and Research, 206 Miller, DQ-12).

Financial Aid
Research and teaching assistantships in the College of Education are available on a competitive basis. To be considered for an appointment, the graduate student must show exceptional academic promise. Doctoral applicants are given priority.

Specific information on the various types of remunera-
tive appointments for graduate students in education, amounts of stipends, application procedures, and deadlines may be obtained from the University of Washington College of Education, Office of Graduate Studies and Research, 206 Miller, DQ-12, Seattle, Washington 98195.

Special Research Facilities
Within the College of Education are opportunities for students to gain research experience through four organizations, The Clinical Training Laboratory, operating under the auspices of Educational Psychology, offers research facilities ranging from observation rooms equipped with videorecorders to central computer terminals, microcomputers, and a library. The world-renowned Experimental Education Unit offers an interdisciplinary approach to research, training, and service provision for handicapped children and their families. The Institute for the Study of Educational Policy, which promotes interdisciplinary research that bears on education policy, provides a point of contact between the University and the educational policy researchers and analysts throughout the state. The Teacher Education Research Center assists faculty members and graduate students in conducting research and evaluation on teacher education.

Faculty
Professors
Abbott, Robert D. * 1975; PhD, 1970, University of Washington; measurement, statistics and research design.
Affleck, James O. * 1967; EdD, 1968, Columbia University; special education/inclusion.
Anderson, Robert A. * 1965, (Emeritus); PhD, 1964, University of Minnesota; educational administration.
Banks, James A. * 1968; PhD, 1969, Michigan State University; social studies, multilingual education.
Berninger, Virginia Wise * 1966; PhD, 1981, Johns Hopkins University; educational psychology.
Bitingisley, Felix F. * 1977; PhD, 1974, University of Washington; special education (severely handicapped).
Bolton, Dale Leroy * 1965, (Emeritus); PhD, 1956, University of Wisconsin; educational administration.
Boroughs, Homer Jr. 1946, (Emeritus); PhD, 1949, University of Washington; history and philosophy of education.
Brammer, Lawrence M. * 1963, (Emeritus); PhD, 1950, Stanford University; counseling, adult development.
Briggs, Robert 1947, (Emeritus); EdD, 1954, University of Washington; business education.
Brown, Frances A. 1953, (Emeritus); MA, 1950, Columbia University; business education.
Burgess, Charles O. * 1964, (Emeritus); PhD, 1962, University of Wisconsin; history of education.
Buttfield, Earl C. * 1981; PhD, 1963, George Peabody College; cognitive development, metacognition.
Dohner, Charles W. * 1967, PhD, 1968, Ohio State University; program evaluation, administration, faculty development.
Doi, James I. * 1979, (Emeritus); PhD, 1952, University of Chicago; finance and management of colleges and universities.
Driscoll, John P. * 1967, (Emeritus); PhD, 1957, Pennsylvania State University; educational communications.
Edgar, Eugene Bayard * 1972; PhD, 1972, George Peabody College; special education.
Evans, Ellis D. * 1984; EdD, 1964, Indiana University; human development and cognition.
Fea, Henry R. 1954, (Emeritus); PhD, 1950, University of California (Berkeley). Forster, Gerald R. * 1966; PhD, 1966, University of Minnesota; counseling.
Freehill, Maurice F. * 1962, (Emeritus); EdD, 1948, Stanford University; school psychology/human development and cognition.
Gay, Genev * 1989; PhD, 1972, University of Texas (Austin); general curriculum theory, multicultural education, and educating African American students.
Gehrke, Nathalie J. * 1979; PhD, 1976, Arizona State University; curriculum.
Glenn, Alan D. * 1989; PhD, 1970, University of Michigan; teacher education, social studies education, and instructional computing.
Haring, Norris Grover * 1965, (Emeritus); EdD, 1956, Syracuse University; special education (early childhood).
Huntkins, Francis Peter * 1966; PhD, 1966, Kent State University; curriculum.
Irby, David M. * 1972, (Adjunct); PhD, 1977, University of Washington; the evaluation and improvement of clinical teaching in medicine.
Jarolimek, John * 1962, (Emeritus); PhD, 1955, University of Minnesota; social studies.
Jenkins, Joseph R. * 1978; PhD, 1967, University of Minnesota; special education (mildly handicapped).
Kaltsounis, Theodore * 1967; PhD, 1961, University of Illinois; social studies.
Kerr, Donna H. * 1973; PhD, 1973, Columbia University; philosophy and education.
Kerr, Stephen T. * 1985; PhD, 1975, University of Washington; information technology and telecommunications.
Klockars, Alan J. * 1963; PhD, 1967, University of Washington; measurement; statistics and research design.
Lovitt, Thomas C. * 1968; EdD, 1966, University of Kansas; special education (mildly handicapped).
Lowenbraun, Sheila * 1968; PhD, 1969, Columbia University; special education (hearing impaired).
Madsen, David L. * 1982, (Emeritus); PhD, 1961, University of Chicago; history of education.
McCartin, Rosemarie E. * 1989, (Emeritus); PhD, 1964, University of Southern California; school psychology/human development and cognition.
Meacham, Merle L. * 1964, (Emeritus); MS, 1956, University of Washington; school psychology.
Mizokawa, Donald T. * 1973; PhD, 1974, Indiana University; human development and cognition.
Morishima, James K. * 1960; PhD, 1967, University of Washington; human development and cognition.
Morris, Arval 1955, (Adjunct); LLM, 1958, Yale University; constitutional law, jurisprudence, education law.
Nee, Richard S. * 1972; PhD, 1972, University of Southern California; special education (severely handicapped).
Nelson, Thomas O. * 1971; (Adjunct); PhD, 1970, University of Illinois; human memory, metacognition, research methodology, philosophy of science.
Odegaard, Charles E. 1979, (Emeritus); PhD, 1937, Harvard University; history of medical education.
Olstad, Roger G. * 1964; PhD, 1963, University of Minnesota; science education, teacher education.
Oswang, Steven G. * 1975; PhD, 1977, University of Washington; higher education administration and policy, law, faculty government, collective bargaining.
Peckham, Percy D. * 1966; (Emeritus); PhD, 1968, University of Colorado (Denver); measurement, statistics and research design.
Reltan, Henry M. 1967, (Emeritus); PhD, 1950, University of North Dakota.
Robinson, Nancy M. * 1969, (Adjunct); PhD, 1958, Stanford University; psychology.
Ryckman, David B. * 1969; EdD, 1966, University of Illinois; special education (mildly handicapped).
Sax, Gilbert A. 1965; PhD, 1958, University of Southern California; measurement, statistics and research design.
Sebesta, Sam L. * 1963; EdD, 1963, Stanford University; reading/language arts.
Sirotnik, Kenneth A. * 1965; PhD, 1969, University of California (Los Angeles); measurement, statistics, research design and evaluation, educational change and school renewal.
Standal, Timothy P. * 1976; PhD, 1976, University of Minnesota; reading/language arts.
Stowitschek, Joseph James· 1986, (Research); EdD, 1979, Arizona State University; science education; teacher education.
Strayer, George D. 1949, (Emeritus); PhD, 1934, Columbia University.
Thompson, Marie D. * 1979; PhD, 1970, University of Washington; special education (hearing impaired).
Torkelson, Gerald M. * 1965; (Emeritus); EdD, 1953, Pennsylvania State University; educational media.
Tostberg, Robert E. * 1962, (Emeritus); PhD, 1960, University of Wisconsin; philosophy of education.
White, Owen R. * 1973; PhD, 1971, University of Oregon; special education (severely handicapped).
Williams, Donald T. * 1969; PhD, 1963, Stanford University; higher education.

Williams, Richard C. * 1990; PhD, 1966, University of Minnesota; career socialization of school principals; the process of school reform.

Winn, William David * 1985; PhD, 1972, Indiana University; educational technology, instructional theory, instructional design, visual information processing.

Associate Professors

Beal, Jack L. * 1973; PhD, 1972, University of Nebraska; secondary mathematics education.

Brown, Robert Lewis * 1965; EdD, 1961, University of Arkansas; school psychology.

Fassett, William E. 1980, (Adjunct); PhD, 1992, University of Washington; pharmacy administration, professional education.

Freichs, Alberta J. 1965, (Emeritus); MED, 1951, University of Nebraska; business education.

Gray, Carol A. * 1971; PhD, 1971, University of Washington; school psychology/human development and cognition.

Grossman, Pamela M. * 1987; PhD, 1988, Stanford University; research on teaching and teacher education, teacher knowledge, and qualitative research methods.

Hansen-Krening, Nancy M. 1974; PhD, 1974, University of Oregon; reading/language arts.

Keating, Pamela J. * 1982, (Research); PhD, 1981, University of Washington; educational policy studies; law; equity—finance, gender, access to knowledge; comparative analysis.

Kelly, Samuel E. 1970, (Emeritus); PhD, 1971, University of Washington.

Knapp, Michael S. * 1990; PhD, 1981, Stanford University; public policy in education; policy research; sociology of education.

Malen, Betty L. * 1990; PhD, 1983, University of Minnesota; educational policy; organizational relationships.

McCutchen, Deborah Elaine * 1986; PhD, 1985, University of Pittsburgh; cognitive processes underlying reading and writing skills.

Nelson, George D. * 1989, (Adjunct); PhD, 1978, University of Washington; stellar atmospheres, radiative transfer, hydrodynamics.

Nolen, Patricia A. * 1970, (Emeritus); PhD, 1970, University of Washington; school psychology/human development and cognition.

Ostrand, Kenneth H. * 1968; EdD, 1968, Tennessee State University; educational administration.

Parker, Walter C. * 1965; PhD, 1962, University of Washington.

Smith, John P. * 1969; EdD, 1969, Stanford University; science education.

Sulzbacher, Stephen 1972, (Adjunct); PhD, 1971, University of Washington; psychology and behavioral sciences.

Thalberg, Stanton P. * 1965, (Emeritus); PhD, 1964, University of Iowa; school psychology.

Valencia, Sheila Denise W. * 1987; PhD, 1978, University of Colorado (Boulder); reading remediation, comprehension, instruction and assessment.

Vasquez, James A. * 1975; PhD, 1973, University of California (Los Angeles); learning (minority youth)/bilingual education.

Wineburg, Samuel S. * 1989; PhD, 1990, Stanford University; educational psychology, cognitive psychology of school subjects, historical cognition.

Zumeta, William M. * 1985, (Adjunct); PhD, 1978, University of California (Berkeley); public management, policy analysis, education and workforce policy.

Assistant Professors

Bamburg, Jerry D. * 1985, (Research); EdD, 1989, University of Washington; educational reform, organizational change.

Bashy, Husein Ismail 1966; PhD, 1975, University of Oregon; counseling.

Beadle, Nancy Elizabeth * 1993; PhD, 1989, Syracuse University; history of education.

Kerdeman, Deborah * 1990; Other, 1991, Stanford University; philosophy of education, philosophy of social inquiry, and hermeneutics.

Mulhupadyath, Swapna 1991; PhD, 1989, Syracuse University; curriculum and instruction.

Nelson, Mary Lee * 1990; PhD, 1989, University of Oregon; counseling, interpersonal theory, process research, supervision, gender issues.

Nolen, Susan B. * 1990; PhD, 1986, Purdue University; development of students' achievement motivation and learning strategies.

Pletki, Margaret L. 1994; PhD, 1991, University of California (Berkeley); economics of education.

Schwartz, Irena Sharon * 1991; PhD, 1989, University of Kansas; early childhood, classroom-based interventions, and applied behavior analysis.

Semrud-Clikeman, Margaret * 1991; PhD, 1990, University of Georgia; school psychology, childhood psychopathology; neuropsychology.

Taylor, Catherine S. 1991; PhD, 1986, University of Kansas; educational psychology.

Senior Lecturer

Juenes, Ralph 1987; JD, 1980, University of Puget Sound; school law.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Education Curriculum and Instruction

EDC&I 324 Physical Education and Health in the Schools (2) Techniques and procedures for teaching physical education and health in elementary and secondary schools. Prerequisite: admission to Teacher Certification Program.

EDC&I 329 Teaching Foreign Language in the Schools (4) Basic course in the methods of teaching foreign languages in the K-12 school, including practical.

EDC&I 341 The Teaching of Art in the Secondary School (3) For majors in secondary art education planning to teach on the junior or senior high school level.

EDC&I 335 Teaching in the Elementary School (3) Emphasizes selected teaching modes; lesson planning; classroom management procedures; group teaching; behavior management; evaluation of teaching. Attention also given to school culture. Prerequisite: admission to Teacher Certification Program.

EDC&I 354 Teaching in the Secondary School (3) Development of basic skills in instructional methods, lesson planning, classroom management procedures, evaluation of teaching. Attention also given to school culture. Prerequisite: admission to Teacher Certification Program.

EDC&I 355 Language Arts in the Elementary School (3) Hansen-Krening, Valencia Basic course in planning and teaching elementary language arts: listening and speaking, written composition, handwriting, spelling, creative and practical writing. Prerequisites: admission to Teacher Certification Program.

EDC&I 356 The Teaching of English (3) Combines theoretical understanding of teaching with specific techniques and materials for literature, language, composition, and mass media at the secondary level, coordinated with concurrent experience in schools. Prerequisites: admission to Teacher Certification Program.

EDC&I 357 The Teaching of Speech (3) Stanton Special methods course in the teaching of speech communication at the elementary and secondary levels. Prerequisites for majors in speech communication: at least 20 credits in speech communication; for nonmajors: permission of instructor.

EDC&I 360 Reading in the Elementary School (3) Basic course in methods, techniques, and materials used the teaching reading through decoding, comprehension, strategies, and literature in primary and intermediate grades. Prerequisites: admission to Teacher Certification Program.

EDC&I 365 Social Studies in the Elementary School (3) Banks, Kaltsounis, Parker Basic course in the planning and teaching of social studies in the elementary school. Prerequisites: GEG 100 and admission to Teacher Certification Program.

EDC&I 366 The Teaching of Social Studies in Secondary Schools (3) Kaltsounis, Parker Application of educational principles and methods to the teaching of social studies on the junior and senior high school levels.

EDC&I 370 Science in the Elementary School (3) Kubota, Smith Basic course in the teaching of science in the elementary school with special emphasis on the nature of science as a process of inquiry. Prerequisites: 5 credits in an approved laboratory natural science course (biology, chemistry, or physics), and admission to Teacher Certification Program.

EDC&I 371 Teaching Science in the Secondary School (3) Ostlad Basic course in the teaching of science in the secondary school with special emphasis on the nature of science as a process of inquiry. Prerequisites: admission to Teacher Certification Program.

EDC&I 372 The Teaching of Biology (3) Prerequisites: 371 and 25 credits in biology.

EDC&I 373 The Teaching of Chemistry (3) Prerequisites: 371 and at least 20 credits in college chemistry.

EDC&I 375 Mathematics in the Elementary School (3) Beal, Mukhopadyath Examination of the learning and teaching of elementary mathematics, in light of recent theoretical and pedagogical developments. Prerequisites: MATH 170, and admission to Teacher Certification Program.

EDC&I 378 Teaching Mathematics in the Secondary School (3) Beal, Mukhopadyath Basic course in the teaching of mathematics in the secondary school for preservice teachers. Prerequisites: admission to Teacher Certification Program.

EDC&I 424 Multilingual Curriculum and Instruction (3) Banks Primarily for preservice and in-service teachers who have little or no previous exposure to issues related to ethnicity and schooling. Designed to help teachers better understand the school's role in the ethnic education of students and acquire the insights, understandings, and skills needed to design and implement curricular and instructional strategies that reflect ethnic diversity. Prerequisite: admission to Teacher Education Program, teaching experience, or permission of instructor.

EDC&I 425 Instructional Strategies for Minority Students (3) Designed to equip educators with appropriate skills in effective teaching of culturally and linguistically diverse students. Prerequisites: admission to Teacher Certification Program.

Socioeconomically different students. Attention is directed to understanding how these students differ from mainstream youth and what the implications are for instructional strategies in the classroom. No credit given for students who have completed EDPs 513/536.
EDC&I 495 Seminar in Reading of Literature in the Elementary Emphasis (3) Hansen-Krening. Sebasta Reading of literature and its effect on reading skills, language development, social values, and literary judgment of children and adolescents. Emphasis on analysis of research in those areas and on the development of action research designed to study response to literature. Prerequisite: one 400- or 500-level education curriculum and instruction course in reading or language arts or one graduate course in literature for children or young adults.

EDC&I 534 Seminar in Reading of Literature (3) Hansen-Krening, Sebasta Reading of literature and its effect on reading skills, language development, social values, and literary judgment of children and adolescents. Emphasis on analysis of research in those areas and on the development of action research designed to study response to literature. Prerequisite: one 400- or 500-level education curriculum and instruction course in reading or language arts or one graduate course in literature for children or young adults.

EDC&I 535 Seminar: Conducting Research in Response to Literature (3, max. 6) Hansen-Krening, Sebasta Students design, conduct, and interpret original research studies in the field of reading literature within the context of the school curriculum. Emphasis on the analysis of literary content and structure and the relationship of those qualities to the literacy experience. Prerequisite: 534.

EDC&I 541 Seminar in Bilingual Education: Organization and Structure (4) Study of the structure and organization of bilingual programs. Study of the developmental and organizational factors affecting bilingual education. Assistants graduate students in reviewing the historical antecedents in bilingual education and in developing a personal philosophy about bilingual education. Prerequisite: 455.

EDC&I 542 Seminar in Bilingual Education: Instructional Foundations and Issues (4) Vasquez Study of the theoretical foundations and instructional implications of psychology and linguistics as they apply to bilingual education. Assistants graduate students in exploring learning styles of bilingual children and in becoming familiar with the crucial issues in bilingual education.

EDC&I 543 Seminar in Bilingual Education: Instructional Strategies (4) Vasquez Study of instructional factors affecting bilingual education. Particular emphasis is given to research related to the variables involved in teaching in a bilingual environment. Assistants graduate students in exploring instructional methodologies and formats as they apply to bilingual education and in becoming familiar with the current issues in bilingual education.

EDC&I 550 Educational Technology Research (3) Karr, Winn Analysis, critique, and practical experience with research studies of all types (experimental, ethnographic, evaluation) concerning questions of interest to educational technologists. Prerequisite: 480, a research methods course, or permission of instructor.

EDC&I 551 Design of Computer-Based Training (3) Winn Examination of the issues surrounding the design of computer-based instruction used in business and industry. Exploration of the implications of these issues by means of the development and testing of CBT units. Prerequisites: 436, 481.

EDC&I 555 Educational Futures (3) Hunkins Consideration of alternative futures stressing manageability of the future. Attention is given to current and future equipment, technology, and instructional design. Prerequisites: prior graduate course work or experience in education.

EDC&I 556 Elementary School Curriculum (3) Hunkins Study of elementary school curriculum, its design, rationale, and delivery. Current trends and issues affecting elementary school curriculum analyzed.

EDC&I 558 Secondary School Curriculum (3) Gay, Gehrke Systematic analysis of current curriculum practices, with particular emphasis on the social and historical forces affecting secondary-school curriculum.

EDC&I 559 Principles and Procedures of Curriculum Development (3) Hansen-Krening Study of the theoretical foundations of curriculum development. Emphasis on the application of principles and procedures in the development of curriculum. Participants have opportunities to apply such procedures in class activities. Special attention given to curriculum foundations.

EDC&I 561 Seminar in Language Arts (3) Hansen-Krening Study of language with special attention to the social and cultural context in the classroom. Course work includes group and individual analysis of language arts studies with attention to research design and measurement. Prerequisite: 455.

EDC&I 562 Seminar in Reading and Language Arts: Secondary Emphasis (3) Standal Study of recent research in listening, oral language, reading, and written language, emphasizing psychological and interrelated aspects. Prerequisite: permission of instructor.

EDC&I 563 Current Issues in Language Arts Education (1-3, max. 6) Hansen-Krening Discussion of problems and issues of current interest and importance in language arts education. Prerequisite: 551.

EDC&I 565 Seminar in Social Studies Education: Elementary Emphasis (3) Banks, Kaltsounis, Parker Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: 465 or equivalent.

EDC&I 566 Seminar in Social Studies Education: Secondary Emphasis (3) Banks, Kaltsounis, Parker Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: 465 or equivalent.

EDC&I 567 Current Issues in Social Studies Education (1-3, max. 6) Kaltsounis, Parker Discussion of problems and issues of current interest and importance in social studies education.

EDC&I 568 Seminar on Instruction and Curriculum for Minority Youth (3) Vasquez Examines research related to curriculum and instruction for minority youth for the purpose of preparing teachers, administrators, and other educators working with students who differ from mainstream students in value and motivational systems, learning styles, and socialization practices. Prerequisite: 591, or permission of instructor.

EDC&I 569 Educating Ethnic Minority Youth (4) Banks Intensive analysis and review of the research and curricular programs related to the social, psychological, and political factors that influence the school experiences of ethnic minority youths. Special attention given to instructional and curricular programs for African American, American Indian, Mexican-American, Puerto Rican-American, and Asian-American students. Prerequisite: graduate standing or permission of instructor.

EDC&I 570 Seminar in Science Education: Elementary Emphasis (3) Oslated, Smith Investigation of curriculum and instruction in science at elementary-school levels, with particular emphasis on current literature and research. Prerequisite: 470 or equivalent.

EDC&I 571 Seminar in Science Education: Secondary Emphasis (3) Oslated, Smith Investigation of curriculum and instruction in science at secondary-school levels, with particular emphasis on current literature and research. Prerequisite: 471 or equivalent.

EDC&I 572 Current Issues in Science Education (1, max. 6) Oslated, Smith Discussion of topics and problems of current interest and importance in science education. Prerequisite: graduate standing.
EDCA 574 Race, Gender, and Knowledge Construction: Curriculum Considerations (3) Banks
Using historical and contemporary perspectives, considers ways in which knowledge related to race and gender has been constructed and the implications of ways in which knowledge is constructed for curriculum reform and teaching. Prerequisite: one course in ethnic studies, multicultural education, or women studies or permission of instructor.

EDCA 575 Seminar in Mathematics Education: Elementary Emphasis (3) Beal, Mukhopadhyay
Investigation of curriculum and instruction in mathematics at the elementary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

EDCA 576 Seminar in Mathematics Education: Secondary Emphasis (3) Beal, Mukhopadhyay
Investigation of curriculum and instruction in mathematics at the secondary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

EDCA 577 Current Issues in Mathematics Education (1, max. 6) Beal, Mukhopadhyay
Discussion of problems and issues of current interest and importance in mathematics education. Prerequisite: graduate standing.

EDCA 578-579 Qualitative Methods of Educational Research (3-3) Grossman, Wineburg
Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisites: second year doctoral standing and one course in statistics. Students must enroll for both quarters. Offered: jointly with EDPSY 586-587.

EDCA 580 Seminar in Educational Communication and Technology (3) History, basic assumptions, and content controversies of the field. Discussion of appropriate research, theory, and practice for educational technologists. Prerequisite: 480 or permission of instructor.

EDCA 581 Management of Educational Technology Programs (3) Factors contributing to effective management of programs incorporating educational technology and microcomputers. Manager's role as agent of instructional change and processes leading to successful adoption and long-term implementation of a new instructional system. Prerequisite: 480 or permission of instructor.

EDCA 582 Seminar on Instructional Systems Development (3) Critical analysis of processes involved in the development of instructional systems. Prerequisites: 481 or permission of instructor.

EDCA 583 Message Design (3) Research and theory on design of instructional messages in various modalities (visual, auditory), and in various formats (pictorial, verbal, graphic). Prerequisite: 480 or permission of instructor.

EDCA 584 Instructional Graphics for Microcomputers (3) Winn
Study of current research on instructional uses of computer graphics. Development, selection, and application of design principles for graphically-based instructional and training programs. Prerequisites: 438, 481.

EDCA 585 Technology and the Culture of Education (3) Social impact of technology on education in the United States: sociopolitical, and cultural factors affecting educational communication and technology; roles and relationships among instructors and learners; appropriate technology in developing countries; technology's long-term influence on thought and values. Prerequisite: 480 or permission of instructor.

EDCA 586 Current Issues for Computers in the Classroom (1, max. 6)
Addresses many of the current topics in computer-related education. Issues and research related to computer uses in curriculum, instruction, and evaluation theory and models, and selected curricular evaluation issues. Examples are drawn from the several disciplines commonly offered in the elementary and secondary schools. Students are expected to identify an evaluation problem and to develop an evaluation design that can be implemented as a practical solution to the problem. Prerequisites: 559 and permission of instructor.

EDCA 587 Design of Interactive Instructional Systems (3) Theoretical and empirical questions involved in design of interactive instructional systems using microcomputers and CAI. Special problems inherent in design of complex learning environments: control, branching, structure and sequence of material, way-finding, help systems. Prerequisites: 401 or 562, and 436; or permission of instructor.

EDCA 588 Seminar in Computing in Education (3)
Provides opportunity for graduate students to analyze, discuss, and design research in areas of computers in education. Includes historical development of research in this area as well as a platform for the development of research proposals and refinement of ongoing research. Prerequisite: 434 or 436.

EDCA 589 Current Issues in Educational Communications (1, max. 9)
Discussion of problems and issues of current interest and importance in the field of educational communications. Serves also as a forum for discussion of doctoral research. Designed for master's and doctoral candidates in educational communications. Credit/no credit only. Prerequisite: graduate standing.

EDCA 590 Seminar in Elementary Education (3) Hunkins
Exploration of the philosophy, history, purposes, curriculum, methods, and school organization of elementary education. Prerequisites: elementary-school teaching experience, 556.

EDCA 591 Seminar in Curriculum Research (3) Gehlke, Hunkins
Analysis of past and current empirical, historical, ethnographic research, and philosophical analysis of the curriculum field. Studies considered include research in curriculum development, the curriculum plan, contextual characteristics, and factors related to curriculum implementation. Group and individual analyses focus on theory generation and practical applications of research. Prerequisite: 559 or permission of instructor.

EDCA 592 Seminar in Secondary Education (3) Gehlke
Research and study of secondary education. Primary focus on factors involving change in secondary-school curriculum and organization. Prerequisite: 558.

EDCA 593 Seminar in Curriculum: Theory and Practice (3) Hunkins
Investigation of curriculum theory and practice. Consideration is given to theoretical models that explain and/or describe the relationships between various curricular variables. These theoretical and practical approaches are applied to current curricular practices and innovations. Prerequisite: 559.

EDCA 594 Seminar in Curriculum: Issues, Systems, Models (3) Hunkins
Emphasis, from a systems and futuristic view, on the current approaches to curriculum, curriculum innovation, and major educational issues as they affect curriculum activity. Prerequisite: 559.

EDCA 595 Seminar in Analysis of Teaching (3) Gehlke, Grossman, Hunkins
Investigation of the ways in which classroom teaching has been analyzed from a variety of disciplinary perspectives. Focus on methods, findings, and implications of research on teaching. Prerequisite: teaching experience.

EDCA 596 Seminar in Strategies of Instruction (3) Grossman, Hunkins
In-depth examination of instructional models applicable to all levels of schooling. Theoretical and philosophical bases for these instructional models are considered.

EDCA 597 Curriculum Evaluation Seminar (3, max. 6) Smith
Focuses on the evaluators' roles, evaluation theory and models, and selected curricular evaluation issues. Examples are drawn from the several disciplines commonly offered in the elementary and secondary levels. Students are expected to identify an evaluation problem and to develop an evaluation design that can be implemented as a practical solution to the problem. Prerequisites: 559 and permission of instructor.

EDCA 598 Independent Studies in Education (*)
Independent studies or readings of specialized aspects of education. Prerequisite: permission of instructor.

EDCA 600 Independent Study or Research (*)
Prerequisite: permission of instructor.

EDCA 601 Internship (3-9, max. 9)
Credit/no credit only. Prerequisites: graduate standing and permission based on approval of proposal submitted during quarter preceding the internship.

Leadership and Policy Studies

EDLP 444 Constitution and American Public Education (3-6, max. 6)
Emphasis on the principles, processes, and content of constitutional law in an effort to provide new insights and new tools with which school administrators and teachers may examine questions involving political and civil rights in the United States, especially as these affect the conduct of education. Specific topics on constitutional freedom include the obligation to go to school; legal controls over curriculum, teachers, and students; and racial integration and equal financing of public schools. Open to law students and to nonlaw students enrolled as graduate students or as upper-division undergraduates. Satisfactory/unsatisfactory option available to nonlaw students only. Offered: jointly with LAW 444.

EDLP 458 History of American Education to 1865 (3-6) & S

EDLP 459 History of American Education Since 1865 (3-6) & S

EDLP 479 Crucial Issues in Education (3)
Selected educational issues, policies, and contexts. Evolution of the American education enterprise, legal issues, professionalism, finance, and other vital educational concerns. Prerequisite: admission to Teacher Certification Program or permission of instructor.

EDLP 496 Workshop: Education Programs and Problems (1-6, max. 12)
Study of such topics as planning, development, supervision, organization, operation, or evaluation of current or emerging programs or problems in education.

EDLP 498 Undergraduate Research (*)
Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Prerequisite: permission of instructor.

EDLP 501 Introduction: Leadership Beyond the Classroom (3-6, max. 6)
First course in principal certification program; explores Washington State laws, legal principles, context of public schools, multicultural issues, changing population. Essential skills of leadership: communication, human relations, strategies for shared decision making, and dealing with conflict. (Open only to students admitted to EDLP Prin­

idal/Program Administrator Preparation Program.)

EDLP 502-503-504 Leadership Core (3-6-3-6-3-6-6)
Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington
State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 505 Transition to Leadership (3-6, max. 6) Development and administration of systems for selection, evaluation and clinical supervision of certified and classified personnel. Focuses on leadership models and transition to a leadership role, including opening a school and being a teaching student/school crisis. (Only for students admitted to the EDLPS Principal/Program Administrator Preparation Program.)

EDLPS 507 Reflective Seminar (1-6, max. 6) Integration of theory and internship experience; group process laboratory and peer feedback and review of written work, oral presentations, and journals. Reading and discussion of crucial issues. (Only for students admitted to the EDLPS Principal/Program Administrator Preparation Program.) Credit/no credit only.

EDLPS 509 Planning, Organizing, and Decision Making (3) Application of principles utilized in planning, organizing, and decision making in districts and schools. Formation of policy and procedures; formal and informal rules; authority; reponsibility; utilization of people, time, and space.

EDLPS 510 School Finance (3) Financial practices and problems in districts and schools considered, including state and federal support plans, school plant planning, school business management, resource allocation, and budgeting and educational accountability.

EDLPS 511 School Community Relations (3) Examines the dynamics of the interface between the public schools and the community. Special attention is given to the findings of research in relation to school-community power, types, and organizational influences.

EDLPS 512 Seminar in Personnel Administration and Development (3) Major emphasis on the analysis of factors to be considered in the selection and evaluation of teachers and administrators and considerations in staff development.

EDLPS 513 Seminar in Instructional Development and Supervision (3) Theory of the process of supervising instructionally effective school personnel, including an analysis of the techniques of supervision, theory of leadership and group process, interpersonal relations, and evaluation of teacher effectiveness.

EDLPS 514 Washington School Law (3) Overview of Washington State specific legal provisions affecting the operations and management of public schools, including school organization and operations, school finance, separation of church and State, school employment, student conduct, discipline and rights, equity, intergovernmental agreements, and student health and safety. Prerequisite: 562 or equivalent.

EDLPS 515 Management of Labor Relations in Education (3) Examination of procedures and techniques pertinent to the management of organizational conflict. Among the areas covered are collective bargaining, grievance procedures, mediation, fact finding, and arbitration.

EDLPS 516 Special Education and the Law (3) Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive conformity with existing state laws.

EDLPS 517 Seminar in Administration: Faculties (3) Contemporary issues, problems, and techniques of educational facility administration. Emphasis placed on such factors as planning, financing, development, design, construction, operation, liabilities, property management, state regulation.

EDLPS 518 Reflective seminar: The Superintendency (1-6, max. 6) Integration of theory and internship experience. Readings and discussion of crucial issues, presentations by local school superintendents: district budgeting processes, personnel, staff relations and collective bargaining, superintendent-board relations, bond issues, facilities planning, superintendent as instructional leader. Credit/no credit only.

EDLPS 519 Special Topics in Educational Leadership (1-3, max. 6) Readings, lectures and discussions pertaining to significant topics of special interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Problems vary; check Time Schedule for topic(s) to be covered.

EDLPS 520 Education as a Moral Endeavor (3) An exploration of fundamental questions that have faced educational leaders in the past and most likely will continue to face them in the future. Foundational studies in history, philosophy, and sociology provide the basis for discussion and writing about these fundamental questions. Credit/no credit only.

EDLPS 521 Philosophy of Education (3) Philosophy of education considered as a study of the conceptual and practical implications of ideas about the nature of education. Emphasis is on relationships between enduring educational problems and fundamental philosophical issues; concepts that feature centrally in educational discourse; and conceptual analysis as a means for clarifying decisions regarding educational policy and practice.

EDLPS 522 Contemporary Philosopher of Education (3) Intensive study of the writings of selected contemporary philosophers of education.

EDLPS 523 Analysis of Educational Concepts (3) Selected concepts central to conduct and understanding of education.

EDLPS 524 Seminar in Philosophy of Education (3, max. 6) Philosophical examinations of views in which education might be studied. Uses and limits of conventional scientific approaches in education inquiry. Consideration of alternatives.

EDLPS 525, 526 Educational Inquiry (3,3) General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those approaches as they are being used in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

EDLPS 530 History of Educational Thought (3) An overview of the influence of cultural context on educational theory and practice from classical times to the present.

EDLPS 531 History of American Higher Education (3) Examination of the historical development of the American higher education enterprise, including pre-colonial origins. Includes attention to the colonial colleges, the rise of new institutions in the nineteenth century, and the further development of American colleges and universities in the twentieth century. Leaders in these developments are identified.

EDLPS 532 Seminar: American Education in the Twentieth Century (3, max. 6) Selected problems in American education over the last century, with special emphasis on educational problems in the current period.

EDLPS 533 Seminar in Educational Classics (3) Analysis in depth and in the context of the relevant history of several major works in educational thought from Plato to Dewey.

EDLPS 534 History of the Modern University (3) Growth of the modern university with attention to intellectual trends as well as organizational and curricular changes. Special attention is given to nine American universities in the twentieth century.

EDLPS 535 Seminar: Research in History of Education (3, max. 6) Research procedures in the history of education to include the employment of bibliographic resources, the use of the computer, the elements of a research proposal, the review of research literature, and the role of theory.

EDLPS 540 Sociology of Education (3) Examination of education and educational institutions by using the major conceptual tools of sociology. Emphasis on sociological thought and findings that have particular bearing on the understandings and judgments of educators.

EDLPS 541 Comparative Education (3) International efforts in education, including the role of the United States in overseas programs. Analysis of the relation of education and society in foreign areas, stressing social change and conflict. Regions of the world considered in the course vary from one offering to another.

EDLPS 542 Seminar in Educational Sociology (3) Application of sociological principles to school problems: individual problems and investigations. For teachers, administrators, and those using educational sociology as a field for advanced degrees.

EDLPS 543 Seminar: Research in Educational Sociology (3) Theory, concept, and method of sociological inquiry as applied to problems in education.

EDLPS 544 Special Topics in Educational Studies (1-3, max. 9) Readings, lectures, and discussions pertaining to significant topics of special interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Problems vary; check Time Schedule for topic(s) to be covered.

EDLPS 550 The Dynamics of Educational Organizations (3) Exploration of the literature in organizational theory and leadership, the assumptions that underlie the development of various approaches to organizational theory and how these approaches are applied, and the acquisition and discussion of conceptual frameworks that can be used to determine how to improve and change organizations. Credit/no credit only.

EDLPS 551 Foundational Studies in Complex Organizations (3) Examination of conceptual and theoretical bases for complex organizations, characterized by problematic goals, knotty decision-making processes, and fluid participation. Impact of information, power, beliefs, resources, organizational structure, and environment. Although issues discussed are generic, examples focus on educational organizations.

EDLPS 552 Organizational Change in Education (3) Change and innovation in educational organizations. Theoretical approaches include sociopsychological, rational planning, political perspectives, and those associated with notion of organized anarchies. Specific topics related to change and innovation (e.g., roles of beliefs, symbols and norms, diffusion of innovations, and research issues).

EDLPS 553 Human Resources in Educational Organizations (3) Analysis of factors involved in human resource problems related to operation of educational organizations. Motivation, perception, communication, role analysis, and dynamics of groups are studied through use of cases and seminal literature.

EDLPS 559 Perspectives on Policy & Policy Making in Education (3) This course introduces a variety of theoretical perspectives that can be used to analyze policy content, processes and outcomes. Includes a consideration of the power and limits of policy and a discussion of the many ways people in different posi-
EDLPS 561 Education Policies in Political Context (3) Systematic consideration of the structure and function of educational policies and problems of research in political context.

EDLPS 562 American School Law (3) Examination of persistent legal issues, including an analysis of how these issues are manifest in public policy debates.

EDLPS 563 Education, The Workplace, and Public Policy (3, max. 6) Two (noncumulative) courses on policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work; underutilized workers; race and gender discrimination issues; and the role of education/training in economic development. Offered jointly with PB AF 571, 572.

EDLPS 564 Seminar in Economics of Education (3) Current problems in school finance, including costs, ability to support schools, and financial implications of educational principles. The economics of public education. Problems of federal, state, and local school support. Financing capital outlay, research, and public relations.

EDLPS 565 Power and Politics in Organizational Decisionmaking (3) Focuses on conceptual frameworks that can be used to analyze power-influence processes in complex organizations and research methods that are well-suited to the study of these processes. Opportunities to design studies of power relations and political processes are provided.

EDLPS 566 Education Policy Serving Disenfranchised Groups (3) This seminar examines programs and policies aimed at ameliorating conditions that face disenfranchised groups in contemporary K-12 schooling. Seminars critically analyze the assumptions, design, and likely impact of these programs and policies on institutions and individuals. Designed for advanced doctoral students. Others admitted with permission of instructor.

EDLPS 578 Special Topics in Organizational & Policy Analysis (1-3, max. 5) Readings, lectures and discussions pertaining to significant topics of specialization and current interest to educators. Focus is on issues related to the analysis of educational organizations, policies, and policy making. Problems vary; check Time Schedule for topic(s) to be covered.

EDLPS 580 The American College and University (3) Introduction to contemporary United States higher education, with special emphasis on emerging trends roles of the several kinds of institutions, the composition and character of student bodies and faculty, and the state coordination of colleges and universities.

EDLPS 581 Principles and Practices of Adult and Continuing Education (3) History and development of adult and continuing education in the United States; component parts of the field; issues, theory, and research; program planning for adults; professionalization of the field.

EDLPS 582 Seminar in the History and the Organization of Higher Education (3) Advanced seminar in the history and the organization of higher education.

EDLPS 583 Higher Education and the Law (3) Legal implications of university operations and an exploration of constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 584 Academic Governance and Collective Bargaining in Higher Education (3) Explores the concept and operation of collective bargaining in higher education: its origins; the reasons for its growing popularity as a governance mechanism; the legal framework within which it operates; the rights, powers, and duties subserved under its operation; and its relationship to the traditional form of faculty governance mechanisms.

EDLPS 585 Resources Allocation in Higher Education (3) After attention to the basic tools of economic analysis, focus is on application of those tools to specific topics in higher education (e.g., access, budgeting, finance and policies, and funding alternatives).

EDLPS 586 Seminar in the Administration of Colleges and Universities (3) Study of the internal administration and organization of four-year colleges toward the practice of sound administration. Instruction largely by the case or problem method.

EDLPS 587 Seminar in Teaching and Learning in Higher Education (3, max. 9) Theory and practice of instruction and learning in higher education.

EDLPS 588 Seminar in Administration of Community Colleges (3) For students preparing for administrative positions in community colleges. Principles and practices in organization and administration of community colleges.

EDLPS 589 The Community College (3) Intensive study of the community college: its history and present and future status. Curriculum, instruction, financial, and governance issues are also discussed.

EDLPS 590 Special Topics in Higher Education (1-3, max. 9) Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to education in community colleges, four-year colleges and universities. Problems vary; check for topic(s) to be covered.

EDLPS 600 Independent Study or Research (*) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and which with permission of the instructor, must be filed with the Office of Leadership & Policy Studies in the College of Education. Prerequisite: permission of instructor.

EDLPS 601 Internship (1-6, max. 9) Name of faculty member responsible for supervising the student should be indicated on program of study. Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

EDP 408 Stress Management for Teachers and Administrators (3) Principles and methods of stress management for school personnel and students. Designed to help teachers handle the stress associated with teaching. The principles also apply to management of students' stress.

EDP 425 Reading Disability: Remedial Techniques (3) Evaluation of methods for diagnosing and minimizing reading retardation. Descriptions of in-class and clinical procedures. Prerequisite: EDCI 360 or equivalent.

EDP 449 Laboratory in Educational Psychology (3) Special studies for counselors, teachers, administrators, and others concerned with student personnel and psychological services in schools and colleges. The course focuses on special topics that have either local or contemporary significance.

EDP 471 Neuropsychology of School Learning and Behavioral Problems (3) The microstructure, macrostructure, and structural and functional development of the brain are reviewed with a focus on the educational relevance of developmental neuropsychology. We read and critique articles in four areas: Hemispheric differences and integration; neurological soft signs, attention deficit, and hyperactivity; language, reading, and learning disabilities; and medical syndromes.

EDP 490 Basic Educational Statistics (3) Measures of central tendency and variability, point and interval estimation, linear correlation, hypothesis testing.

EDP 499 Undergraduate Research (*) Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Entry code required.

EDP 500 Field Study (*) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisites: approved plan of study and permission of the instructor must be filed in the Office of Educational Psychology in the College of Education. Entry code required.

EDP 501 Human Learning and Educational Practice (3) Systematic examination of current research about human learning and instructional psychology, including the study of motivation, human abilities, and learning, the learning process, and performance assessment. Prerequisite: permission of instructor.

EDP 502 Developmental Foundation of Early Learning (3) Perceptual-motor, language, and overall cognitive development in children from birth through primary-school age. Emphasis on basic learning processes and guidelines for assessment of developmental status and their implications for parents and professionals. Field-based course projects may be required. Prerequisites: background in child development and 501 or equivalent.

EDP 503 Theories of Intelligence (3) Reading and discussion of theoretical and research papers from the extensive literature on psychometric theory, information processing, and interpretations of intelligence. An historical approach to the topic is followed by analysis of current writings on intelligence and its measurement. Prerequisites: 501 and graduate status in education or psychology.

EDP 506 Instructional Theory (3) Sources, current state, and utility of prescriptive instructional theories with emphasis upon theories having a potential for guiding the design of instruction. Prerequisite: 501 or equivalent.

EDP 507 Reading, Writing, and Arithmetic: Educational Assessment and Consultation (6) Students administer and interpret tests of reading, writing, arithmetic, and related developmental skills; integrate test, observational, interview, and portfolio information in staffings and written reports; and consult with teachers regarding educational interventions. Prerequisites: graduate standing in the school psychology specialization and permission of instructor. Entry code required.

EDP 508 Clinical Supervision-Practicum (2-6, max. 12) Practicum in supervising counseling, group counseling, diagnostic activities, and remedial academic therapy. Prerequisites: advanced graduate standing. Entry code required.

EDP 509 Educational Issues in Human Development (3) Human development theories. Educational implications of theory, methodology, and application. Current research complements the historical antecedents of current practice. Age range covered varies as function of current issues in professional literature. Prerequisites: 15 credits in educational psychology or psychology.

EDP 510 Educational Issues in Human Learning (3) Contemporary issues and trends in human learning from the perspective of major psychological theories of learning. Both classic and emerging viewpoints on issues about learning theory for educational
practice, including counseling and special programs. Prerequisite: 501 or equivalent.

EDPSY 511 Seminar in Applied Educational Psychology (1, max. 6) Designed to enhance learning in educational psychology. Applications of theoretical constructs to particular problems encountered in school counseling, practice. Entry code required.

EDPSY 519 Communication and Language in Young Exceptional Children (3) Review and discussion of theories of language acquisition as they relate to current research in education. Prerequisite: 501 or equivalent.

EDPSY 520 Psychology of Reading (3) Reading and perception, word recognition, concept development and meaning in reading, psychology of reading interests and skills. Prerequisite: 501 or equivalent. Entry code required.

EDPSY 521 Psychology of Writing (3) Examines writing as a cognitive process and reviews current empirical research on writing, emphasizing primarily studies from a cognitive linguistic perspective. Explores both developmental differences and individual differences in writing skills, together with instructional implications. Prerequisite: 501 or equivalent. Entry code required.

EDPSY 522 Reading Disability Clinic (3-5) Supervised practicum in diagnosis and remediation of reading disabilities. Prerequisites: 425, or equivalent; 507 and EDC&L 360 and 460; and permission of instructor. Entry code required.

EDPSY 524 Problem Solving and Critical Thinking in Education (3) Study of the classic and contemporary research literature concerned with human problem solving and critical thinking with emphasis upon applications to educational practice and further research. Prerequisite: 501 or equivalent.

EDPSY 525 Creativity and Education (3) Study of the classic and contemporary research literature about creativity with emphasis upon applications to educational practice, evaluation of strategies to promote creativity in the schools, and further research. Prerequisite: 501 or equivalent.

EDPSY 526 Seminar on Metacognition (3) Students read and discuss theoretical and research papers from the extensive literature on metacognition. Focuses on defining the concept of metacognition, establishing its range of applicability to educational matters, and becoming familiar with excellent examples of metacognitive research. Prerequisites: graduate status in education or psychology and permission of instructor.

EDPSY 527 Transfer ofTeaching (3) Students read and discuss a representative sample of theoretical and research papers from extensive literature on teaching to promote transfer of what students learn to non-teaching environments. Historical approach to the topic is followed by analysis of current writings on transfer. Prerequisites: 501 and graduate status in education or psychology.

EDPSY 531 Socialization of School-Age Children (3) Study of personal social development and behavior from preschool age through preadolescence. Socialization theory and research are reviewed to include such topics as aggression, achievement, motivation, moral development, social cognition, and applicable socialization influences.

EDPSY 532 Adolescence and Youth (3) Includes middle school, senior high, and early college years, with implications for helping professions. Developmental processes and patterns examined with major theoretical and current research themes from behavioral sciences. Educational issues, social problems associated with adolescence in Western culture. Prerequisite: 501 or equivalent.

EDPSY 533 Current Research in Adolescence (3) Contemporary trends and patterns of adolescent research are examined with emphasis upon theoretical foundations, contrasting methodologies, and implications for further research. Exemplary studies and integrative reviews of research on adolescence are featured. Prerequisites: 532 and 591 or equivalents.

EDPSY 534 School Problems of Adolescence (3) Study of the classic and contemporary educational problems of secondary school age youth with emphasis upon problem solving strategies for educators and associated youth service personnel. Includes problems of academic achievement, interpersonal relations, and social deviance in the schools. Prerequisite: 532 or equivalent.

EDPSY 535 Education and the Highly Capable Learner (3) Examination of major issues and problems in study and nurturance of highly capable children and youth in the educational setting. Emphasis placed on contributions of theory and research to educational problem solving for multiple aspects of advanced human capacity. Prerequisite: 501 or equivalent.

EDPSY 536 Learning Variables of Minority Children: Instructional Implications (3) Provides students with data base regarding (1) four variables (language/dialect, cognitive style, locus of control, and motivation systems) that affect learning among minority students, and (2) teaching strategies appropriate for these cultural socioeconomic variables. No credit given for students who have completed EDC&L 495.

EDPSY 540 School Psychological Assessment (5) Study of assessment of human intelligence with supervised training in the administration, scoring, and interpretation of individual intelligence tests with emphasis on Stanford-Binet and Wechsler scales. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Entry code required.

EDPSY 541 Group Tests in Counseling (5) Emphasis on the utilization of objective measures in counseling. Prerequisite: 490 or equivalent. Entry code required.

EDPSY 542 Career Development (3) Emphasis on vocational development theory and research. Psychological, educational, and economic determinants of vocational development and choice are examined as a basis for vocational counseling. Prerequisite: graduate standing or permission of instructor.

EDPSY 543 Facilitating Career Development (3) Theory and practice in exploring, clarifying, and articulating individual goals and career plans. Entry code required.

EDPSY 544 Counseling (5) Emphasis on the theory and practice of counseling. Prerequisite: 545 or equivalent course in counseling.

EDPSY 545 Practicum (3) Competency-based skills training for beginning counseling and school psychology students. Attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: enrolled in school counseling or school psychology or permission of instructor.

EDPSY 546 Counseling Practicum (3) Supervised practice in counseling. Prerequisite: 544. Entry code required.

EDPSY 548 Educational Implications of Personality Theory (5) Study of personality development and personality theories with continuous attention to the meaning of these in educational practice, testing, and counseling. Prerequisites: 15 credits of psychology and educational psychology.

EDPSY 549 Seminar in Consultation Methods (3) Theory and practice of process consultation in educational settings. Field practice in teams with clients. Entry code required.

EDPSY 550 Family Counseling (3) Introduction to family counseling theory and practice, emphasizing family dynamics and communication analysis. Prerequisite: 544 or permission of instructor.

EDPSY 555 Seminar in Counseling Specialty (1-2, max. 6) Oriented toward the role of a counselor as a professional worker. Entry code required.

EDPSY 561 Group Process Laboratory (3) Experience in small-group process. Current discussions of process and independent study. Entry code required.

EDPSY 562 Group Counseling in Schools (3) Provides students with the opportunity to co-facilitate groups in elementary, middle, and secondary schools, supplemented by weekly didactic presentations of counseling and guidance models. Prerequisite: 561 or permission of instructor.

EDPSY 564 Practicum in School Psychology (1-6, max. 6) Practicum in appraisal and counseling, emphasizing assessment and counseling with behavior and learning disabilities, and focusing on techniques acquired in 540, 545, and 566. Entry code required.

EDPSY 565 Personality Appraisal (5) Study of personality evaluation with a supervised laboratory emphasizing work with children and their families. Prerequisites: 540, 545. Entry code required.

EDPSY 566 Case Study Seminar (1, max. 4) Integrating theoretical concepts with practice/service issues. Content selected for discussion represents a wide range of problems and agency settings, including school and child problems. Entry code required.

EDPSY 568 Seminar in Professional Issues and Ethics (2) Professional ethics codes and cases, history of counseling or school psychology, legal problems, credentialing issues, conditions of practice, continuing education, publishing, and presenting research papers.

EDPSY 569 Seminar in Counseling Psychology Research (2) Methodological and professional issues related to research in counseling and psychological services. Counseling psychology research literature with focus on content and methods. Prerequisite: 591 or equivalent.

EDPSY 570 Seminar in School and Community Psychology (2, max. 4) Current issues in professional psychology practice and research. Limited to graduate students in school psychology. Entry code required.

EDPSY 571 Educational Applications of Neuropsychology: Assessment and Intervention (3) Students observe and administer neuropsychological tests and plan and carry out educational interventions for children with neuropsychological disorders. Content focuses on various neuropsychological disorders, which school psychologists can provide assessment and consultation. Prerequisites: 540 or equivalent course in individual testing, and 471 or permission of the instructor.

EDPSY 573 Psychological Assessment of Preschool Children (3) Students learn to give and interpret five tests of intellectual development to assess language, play, and social/emotional functioning, and to write psychological assessment reports for infants, toddlers, and preschoolers. Prerequisites: graduate standing in the school psychology specialization and permission of instructor. Entry code required.

EDPSY 575 Structural Equation Modeling (3) Theory and data analysis using linear structural equation models. Application to data in educational research. Prerequisite: 594 or equivalent.
EDPSY 576 Hierarchical Linear Models (3) Theory and data analysis for research models where random factors are nested, such as multi-level data, growth curve analysis, and meta-analysis. Prerequisite: 593 or equivalent.

EDPSY 580 Seminar: The Emergence of Educational Psychology (3) Examination of documents by selected contributors to the field of educational psychology. Special focus on period from mid-nineteenth century to early twentieth century. Prerequisite: Graduate standing.

EDPSY 581 Seminar in Educational Psychology (1-3, max. 15) Seminar on advanced topics in educational psychology. A critical appraisal of current research. Prerequisite: Advanced degree work in educational psychology. (Check quarterly Time Schedule for subject listings, which vary from quarter to quarter.)

EDPSY 582 Seminar in Development and Socialization (3, max. 15) Advanced seminar on selected topics concerned with human development and socialization processes. Emphasis placed upon empirical research and its theoretical underpinnings in such areas as cognitive development, moral development and education, self-concept development, and related concerns. Entry code required.

EDPSY 583 Seminar in Learning and Thinking (3, max. 15) Seminar in the psychology of learning language and language learning. Each seminar is offered with pre-registered emphasis in one of the following topics: linguistics, phonology, pragmatics, psycholinguistics, semantics. Entry code required.

EDPSY 584 Seminar in Quantitative Methods (3, max. 15) Seminar on such topics as measurement techniques, research design, psychometrics, and statistics. Entry code required.

EDPSY 585-587 Qualitative Methods of Educational Research (3-3) Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisites: Second-year doctoral standing and one course in statistics. Offered: Jointly with EDC&1597, 578-579.

EDPSY 588 Survey Research Methodology and Theory (3) Survey research, research theory, and methodology. Probability theory, sampling, human subjects considerations, instrumentation, and analysis techniques. Review and critique by students of theoretical issues in survey research and development of a survey instrument. Prerequisite: 490 or equivalent.

EDPSY 590 Computer Utilization in Educational Research (3) Computer utilization in solution of research problems, data reduction to forms amenable to computer solution, appropriate framing of problems for solution by computer. Using an interactive system, editors, and program packages. Prerequisite: 490.

EDPSY 591 Methods of Educational Research (3) Introduction to educational research. Primary focus on hypothesis development, experimental design, use of controls, data analysis and interpretation. Prerequisite: 490. Entry code required.

EDPSY 592 Advanced Educational Measurements (3) Theory of measurement; an examination of classical test theory, error of measurement, factors affecting reliability and validity, and item analysis. Prerequisite: 490. Offered: Jointly with PSYCH 516.

EDPSY 593 Experimental Design and Analysis (6) Experimental design with emphasis on the analysis of variance. Prerequisites: 490 or equivalent, and 591 or permission of instructor.

EDPSY 594 Advanced Correlational Techniques (5) Multivariate analysis, including regression and multiple correlation; matrix algebra; factor analysis. Prerequisite: 490 or equivalent.

EDPSY 595 Measurement and Evaluation in Human Development and Education (3) Measurement strategies and evaluation research in developmental psychology and education. Overview of major childhood intervention studies and procedures established and experimental measurement techniques, and problems of measurement and evaluation. Skill in evaluating measurement and evaluation design. Prerequisite: 490 or permission of instructor.

EDPSY 596 Program Evaluation (3) Advanced course in evaluation research emphasizing nontraditional designs, especially those that impose severe ecological constraints on the evaluator. Prerequisites: 593, 594, EDC&1597, or permission of instructor.

EDPSY 597 Test Development (3) Principles of test construction, including criterion and norm-referenced tests, item writing and sampling, test administration, preparation, scoring, and item evaluation techniques; problems of scaling and norming of cognitive and affective measures. Prerequisites: 592 and 594, or permission of instructor.

EDPSY 599 Independent Studies in Education (*) Independent studies or research of specialized aspects of education. Entry code required.

EDPSY 600 Independent Study or Research (*) Prerequisite: permission of instructor. Entry code required.

EDPSY 601 Internship (3-9, max. 9) Entry code required.

Special Education

EDSE 404 Exceptional Children (3) Atypical children studied from the point of view of the classroom teacher.

EDSE 414 Introduction to Early Childhood Special Education (3) Provides students with a comprehensive overview of major aspects of the field of early childhood special education. Theoretical foundations and program development and implementation are presented in an approach that integrates theory, research, and practice.

EDSE 418 Interventions for Families of Children with Disabilities (3) Upper-division course for professionals and paraprofessionals working with families of children with disabilities enrolled in special education or integrated programs.

EDSE 420 Classroom Management of the Physical Problems of Individuals With Severe or Profound Disabilities (3) Overview of physical management of pupils with severe or profound disabilities in educational settings. Principles of normal motor development, positioning, and handling are applied to the development of classroom strategies. Effects of abnormal motor development on educational programming.

EDSE 496 Workshop in Special Education (1-9, max. 15) Demonstration, observation, and/or participation with groups of disabled children in laboratory or controlled classroom settings. Prerequisite: permission of instructor. Entry code required.

EDSE 499 Undergraduate Research (2-5, max. 5) Students developing studies under this rubric should advise a report or a paper at the end of their work and discuss the results of their investigations should be regarded as a basic part of the program. Prerequisite: permission of instructor. Entry code required.

EDSE 500 Field Study (1-6, max. 6) Individual study of an educational problem in the field under the direction of a faculty member. Prerequisites: approved plan of study and permission of the Instructor. Entry code required.

EDPSY 504 Special Education and the Law (3) Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis on procedural and substantive rights of children with disabilities. Offered: Jointly with EDPSY 516.

EDPSY 505 Curriculum Development of Students with Moderate to Severe Disabilities (3) Addresses issues and practices in the development of appropriate curricula for students with moderate to severe or profound disabilities. Includes curriculum models, methods for the selection of appropriate skills for inclusion in Individualized Education Plans, and establishing priorities for instruction.

EDPSY 507 Instructional Methods for Students with Moderate to Severe Disabilities (3) Details a systematic instructional process for the education of students with moderate to severe or profound disabilities. Includes instructional methods and materials designed to promote the development of functional skills and reduce challenging behaviors.

EDPSY 508 Administration of Special Education (3) Research and trends in administrative organization, programs, personnel assignments, and instructional groupings for the education of exceptional students as these relate to the total school program, pupil personnel services, community agency services, and state and federal legislation.

EDPSY 509 Seminar in Mental Retardation (3, max. 9) Research, theory, and/or contemporary practice in the education and habilitation of mentally retarded individuals. The synthesis of findings and their application to the educational environment. Prerequisites: 505, 507, 542.

EDPSY 510 Behavioral Measurement and Management in the Classroom (3) Response measurement in the classroom; use of data analysis for instructional decisions and behavior management; instructional programming for children with disabilities.

EDPSY 511 Methods of Applied Behavior Analysis (3) Characteristics of applied behavior analysis are presented: direct, daily measurement, and the systematic investigation of important variables. Representative studies from various applied situations are discussed in terms of dependent and independent variables, research design, reliability, validity, and data analysis. Prerequisite: 510 or equivalent preparation.

EDPSY 513 Clinical Appraisal of Exceptional Children (3) Diagnostic instruments used in the clinical appraisal of exceptional children. Theoretical and measurement considerations are used to buttress practical experiences in appraisal related to intervention.

EDPSY 514 Fundamentals of Reading for Children with Disabilities (3) Emphasis on basic prereading and reading skills, such as phonics and structural analysis, specifically for the disabled child. Acquisition of comprehension skills by the disabled. Diagnosis of reading problems, published materials appropriate for children with disabilities, material modification.

EDPSY 515 Problems and Issues in Special Education (3, max. 9) Intensive examination of the issues pertinent to special education, such as legislation, research, assessment and testing, policy implementation, the role of special education in general education and placement practices.

EDPSY 517 Practicum in Research Design and Analysis in Special Education (1-3, max. 9) Critical analysis of current research in special education and related fields serves as background for designing applied research projects. Projects are examined, evaluated, and revised in seminar discussion. Prerequisites: EDPSY 490 and 591 or equivalent and permission of instructor.
EDSPE 518 Seminar in Special Education Research (1-3, max. 9) Designed for doctoral students in special education during their first year of residency. Each candidate selects a dissertation problem and submits a proposal. Topics such as the procurement of subjects, the reporting and communication of research findings, and the evaluation of research are stressed. The seminar leads to the evolution of viable dissertation proposal. Credit/no credit only.

EDSPE 520 Seminar in Applied Special Education (1-12, max. 12) Designed for graduate students in special education. Focus on contemporary topics relating to the application of the theoretical constructs to special education.

EDSPE 521 Communication and Language in Young Exceptional Children (3) Review and discussion of theories of language acquisition as they relate to communication and language in young exceptional children. Review of research of language environments that relate to early literacy and education and how to use this information to modify environments for special needs children. Offered: jointly with EDPsy 519.

EDSPE 522 Seminar on the Education of Students with Severe Disabilities (3) Advanced graduate seminar arranged to study and discuss the essential components of providing a comprehensive approach to the identification and education of infants, children, adolescents, and young adults with severe disabilities.

EDSPE 525 Educating Students with Autism or Severe Behavior Disorders (3) Consideration of the identification, etiology, education, and progress of individuals with autism or other severe behavior disorders.

EDSPE 541 Education of Children with Behavior Disorders (3) Introductory course covering characteristics of children with behavior disorders; introduction to the various theoretical approaches to education practices.

EDSPE 542 Introduction to Mental Retardation (3) Introductory course on intellectual disabilities and the challenges they present to individuals with such disabilities, the community, the schools, and society.

EDSPE 543 Learning Disabilities (3) Analysis of major theoretical approaches to the study of children with learning disabilities. Adaptation of various approaches to educational settings.

EDSPE 545 Instructional Modifications for the Education of the Mildly Disabled (3) In-depth analysis and application of several modifications of instructional techniques necessary for the education of students with mild disabilities.

EDSPE 546 Seminar in Educating the Socially and Emotionally Disturbed (3, max. 9) Advanced-level seminars focus on contemporary research topics relating to the effective education of children with serious behavior disorders. Students analyze and review research pertinent to the chosen topics and prepare a scholarly manuscript for dissemination.

EDSPE 548 Special Topics in the Education of the Learning Disabled (3, max. 12) In-depth analysis of empirical findings in the specialty of learning disabilities with focus on the synthesis of research findings and their application to the educational environment. A paper suitable for publication required. Prerequisite: course in learning theory, introductory course in learning disabilities, or equivalent preparation.

EDSPE 551 Grant Proposal Writing - Special Education (3) Doctoral level seminar focusing on the preparation of research grant proposals in Special Education and related fields. Students utilize computer data bases to locate funding sources and prepare competitive applications. Peer and instructor feedback based on application criteria provided weekly. Prerequisite: doctoral standing in EDSPE or permission of instructor.

EDSPE 561 Educational Assessment of Preschool Special Needs Children (3) Special standardized and educational measurement and evaluation procedures for use with young children with a variety of disabling conditions. Administration, evaluation, and programming strategies are discussed in combination with practical application of the skills within an educational framework.

EDSPE 562 Curricula for Preschool Children with Disabilities (3) Basic theoretical models and approaches to curricula for preschoolers with disabilities. Promote specific preschool curricula and develop skills to assist students in critiquing and evaluating curricula. How to adapt materials for specific populations and to plan a program for exceptional preschoolers.

EDSPE 563 Issues In Working with Families of Young Special Needs Children (3) Adjustment of parents to the birth of an infant with disabilities. Transitions that occur between parents and their infants, procedures that facilitate the infant's development through these interactions. How to assist families in interacting with professionals in the assessment, IFSP process.

EDSPE 565 Seminar: Early Childhood Education for Children with Disabilities (3, max. 6) Advanced seminar on early childhood education for the disabled. Historical and current research from appropriate specialties in special education reviewed, research from related fields is reviewed in terms of its application to the education of young children with disabilities.

EDSPE 566 Current Research In Early Childhood Special Education (2, max. 6) Introduces students to theory and current research related to early intervention with infants and toddlers and how to evaluate research articles. Selected topics cover typical and atypical development in the areas of cognitive, social, communication, and social development, as well as issues in assessment, curricula, and intervention strategies.

EDSPE 599 Independent Studies in Education (*) Independent studies or readings of specialized aspects of education. Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Entry code required.

EDSPE 600 Independent Study or Research (*) Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Entry code required.

EDSPE 601 Internship (3-9, max. 9) Prerequisites: graduate standing and permission based on prearrangement of internship placement and approval by adviser. Entry code required.

Independent Study, Research, and Field Experiences

EDUC 301 Introductory Practicum in Community Service Activity (3) Observation and participation in a variety of activities in a K-12 classroom, placement made according to participant interests and needs. Sixty hours of scheduled participation plus scheduled seminars are required. Prerequisites: application during quarter prior to participation, permission of instructor, and junior standing.

EDUC 401 Practicum in Community Service Activity (3-18) Tutoring and teaching experiences in a school or community service organization, placement made according to participant interests and needs. Approximately twenty hours of participation on a pre-determined schedule plus scheduled seminars are required for each credit earned. Prerequisites: application during quarter prior to participation and permission of instructor.

EDUC 402 Practicum in Classroom Teaching and Management: Early Childhood, Kindergarten, Primary: Through Grade 3 (3-36) Student teaching practicum in an assigned school. Approximately twenty hours of participation on a predetermined schedule plus scheduled seminars are required for each credit earned. Placement is made by the Office of Teacher Education. Prerequisites: 302 and permission of instructor.

EDUC 403 Practicum in Classroom Teaching and Management: Intermediate Grades, Middle School: Grades 4-8 (3-36) Student teaching practicum in an assigned school. Approximately twenty hours of participation on a predetermined schedule plus scheduled seminars are required for each credit earned. Placement is made by the Office of Teacher Education. Prerequisites: 302 and permission of instructor.

EDUC 404 Practicum in Classroom Teaching and Management: Secondary School: Grades 6-12 (3-36) Student teaching practicum in an assigned school. Approximately twenty hours of participation on a predetermined schedule plus scheduled seminars are required for each credit earned. Placement is made by the Office of Teacher Education. Prerequisites: 302 and permission of instructor.

EDUC 501 Advanced Practicum in Community Service Activity (3-18) Selective, in-depth participation and teaching experiences for postbaccalaureate students in a community service organization. Approximately twenty hours of participation plus scheduled seminars are required for each credit earned. Participants wishing to use advanced community service experience to satisfy, in part, graduate program requirements should make such arrangements prior to enrollment with their faculty adviser and the Director of Certification. Prerequisites: application during quarter prior to participation and permission of instructor.

EDUC 502 Advanced Practicum in Classroom Teaching and Management (3-18) Designed to provide postbaccalaureate students with student teaching and certificated teachers with selective, in-depth classroom participation experiences. Participants wishing to use the advanced teaching practicum to satisfy, in part, graduate program requirements should make such arrangements prior to enrollment with their faculty adviser and the Director of Certification. Prerequisites: application during quarter prior to participation and permission of instructor.

EDUC 700 Master's Thesis (*) Prerequisites: permission of supervisory committee chairperson and graduate program coordinator.

EDUC 800 Doctoral Dissertation (*) Prerequisites: permission of Supervisory Committee chairperson and graduate program coordinator.
College of Engineering

Dean
J. Ray Bowen
371 Loew

Associate Deans
Mark J. Damborg
Ashley F. Emery
Keith A. Holsapple

Engineering is an increasingly critical societal enterprise. More than ever before, the engineer is challenged both to design products whose value is high by social and economic measures and to provide for efficient manufacture of such products within the constraints of environmental protection and diminishing raw material resources. Requirements imposed on the transportation system and other elements of society's physical infrastructure pose analogous challenges. At the same time, reductions in computer costs and increases in sophistication are dramatically impacting both the products and processes designed by the engineer and the actual practice of engineering.

An engineer with the baccalaureate degree is adequately prepared for many, challenging technical assignments in government and industry. Students who plan to engage in research or college teaching, however, should undertake graduate study leading to either a master's or doctoral degree.

At the undergraduate level, the College of Engineering offers a flexible curriculum that accommodates varied student needs, both in established departmental programs and interdisciplinary studies. The College also offers active educational and research programs, both departmental and interdisciplinary, at the graduate levels. (See Interdisciplinary Engineering Studies Program for interdisciplinary undergraduate and graduate programs.)

The College of Engineering has been a major unit of the University since 1899; the first engineering degrees were awarded in mining engineering and mechanical engineering in 1898. Degrees were added for civil engineering (1901), electrical engineering (1902), mechanical engineering (1906), chemical engineering (1907), civil engineering (1908), industrial engineering (1929), industrial engineering (1986), computer engineering (1987), computer science (1978), and technical communication (1981). In 1993, 1,640 upper-division undergraduate majors and 1,248 graduate students were enrolled in engineering programs taught by a faculty of 209 members.

College Facilities
Teaching and research activities of the College are conducted in thirteen major campus buildings (and portions of others), which contain the College's offices, classrooms, and research and teaching laboratories. The Engineering Library, a branch of the University Library, contains outstanding collections of books, periodicals, technical reports, and patents of interest to engineers. Computers and terminals are available in all departments and at the University's Academic Computer Center.

Student Organizations and Activities
All of the major professional engineering societies have student chapters on campus, and all engineering students are encouraged to join the chapter that represents his or her field of interest. The College also has student chapters of the Society of Women Engineers, American Indian Science and Engineering Society, National Society of Black Engineers, and the Society of Hispanic Professional Engineers. The Pre-Engineering Student Association (PESA) is the major College-wide organization for all students enrolled in a pre-engineering course of study but not yet admitted to a department. The Engineering Student Council, comprising student representatives from all departments and professional societies, is the major College-wide student organization and participates actively in College affairs. Honors work for engineering students is Tau Beta Pi and Sigma Xi.

Students serve with faculty members on engineering policy committees which make recommendations concerning teacher evaluation, curriculum revisions, advising, grading systems, and other matters of interest to students and faculty.

Financial Aid
The College offers financial assistance to undergraduates through industrial scholarships and loan funds. Scholarship information is available at the College Admissions Office, 371 Loew, at the Office of Student Financial Aid, 105 Schmitz. Most scholarships are given after a year or more in residence by the student.

Honors Program
356 Loew
Coordinator, Dianne Cline

The College of Engineering Honors Program offers students of outstanding performance and achievement a course of study designed to provide intellectual challenge in a stimulating learning atmosphere which draws on the resources of a large diversified university. Students entering the Honors Program become candidates for the degree "With College Honors" or "With Distinction." The College Honors Degree Students who complete this program receive a degree "With College Honors." The College Honors degree requires that students participate in the University Honors Program while they take engineering prerequisites in the College of Arts and Sciences. When these students are admitted to engineering departments, they may be nominated to enroll in the Engineering Honors Program. Completion of the College Honors degree involves both an honors general education component and advanced honors work completed after students have been admitted to the College of Engineering.

Admission Requirements:
3.30 cumulative GPA, minimum departmental GPA, and participation in the University Honors Program as a pre-engineer.

Graduation Requirements: The College Honors curriculum consists of two parts; a general education component and a component in the student's major department. The general education component is completed while the student is in the College of Arts and Sciences prior to application to the College of Engineering. Students select three sequences, each three quarters long, from Honors A&S courses, the General Education Curriculum, and Mathematics (selecting at least one from each). The second component begins when a student is admitted to an engineering department. Students then select a minimum of 9 credits of honors courses from either College or departmental 498H and 499H course work.

The Departmental Honors Degree

Students who complete this program receive a degree "With Distinction." 

Admission Requirements: 3.30 cumulative GPA, minimum departmental GPA.

Undergraduate Program

The College of Engineering provides curriculum that offer a variety of educational experiences to its students. The curricula also facilitate transfer from community colleges and from other four-year colleges and universities.

Students planning to major in engineering begin as pre-engineering majors in the College of Arts and Sciences. As a pre-engineering major, a student will take the mathematics, chemistry, physics, English composition, and engineering fundamentals courses prerequisite for admission to the desired engineering department program. In addition, courses in the Visual, Performing Arts, and Individuals & Societies will be taken.

Students who indicate an interest in engineering on their University admission application are assigned pre-engineering status. Students without pre-engineering status who wish to pursue an engineering degree may have their coding changed to pre-engineering upon request at the Undergraduate Advising Center.

Admission

After completion of the prerequisite courses for an engineering department program and at least 64 credits applicable to the degree program, students must apply for admission to an engineering department. In general, the prerequisite courses include one year of calculus, differential equations, one or two quarters of inorganic chemistry, two to three quarters of physics, English composition, and two to four courses in engineering fundamentals (e.g., programming, statics, thermodynamics, etc.). The Engineering Advising Center or the individual department may be consulted for a listing of specific entrance requirements.

All engineering departments have enrollment quotas, and admission is on a competitive basis. The criteria by which applicants are judged vary from department to department.

Admissions for the Disadvantaged

While the sole purpose of the admission requirement is to limit enrollment to a number that can be taught well with the resources available, the College recognizes that this may eliminate some disadvantaged students.
whose potential is high but who, through extenuating background circumstances, have been limited access to early education that provides adequate experience in abstract reasoning. For purposes of special consideration for admission, a disadvantaged student is defined as one who is economically disadvantaged as shown by eligibility for a Basic Need Grant on the National Financial Aid Program, or (2) is educationally disadvantaged, having attended a school without a full and available curriculum of college preparatory work, or (3) has been a member of a group showing historic underrepresentation in the field of engineering. These students are encouraged to apply for admission to depart­ments and to attach to their application a letter from the admissions committees that provides information on the applicant that is relevant to the admission decision.

Recommended High School Preparation

Substantial high school preparation in mathematics, physical science, and communication is essential for entrance to engineering studies. Required and recommended courses may be determined from the Engineering Advising Center.

Engineering Advising Center

353 Loew

The Engineering Advising Center assists any student interested in planning the initial portion of an engineering degree program. Information about prerequisites for application for admission to one of the departments in the College. A student who is interested in engineering and in the intended major while still in the College of Arts and Sciences and to seek advice in the Engineering Advising Center.

Students are urged to contact the Engineering Advising Center for program, course, or career information and discussion. A first-year, career-planning course (ENGR 110) is available for students who wish for more information on career alternatives.

Types of Programs

The College offers three basic programs leading to Bachelor of Science degrees:

Departmental Major. This program leads to a Bachelor of Science degree in a designated field of engineering (e.g., Bachelor of Science in Civil Engineering). It is designed for students who intend to practice as professional engineers in a standard branch of engineering or who plan to undertake graduate study in that field. The curricula for these degrees are accredited by the Accreditation Board for Engineering and Technology, (ABET), the principal engineering accrediting agency in the United States. Accreditation requirements stipulate certain course distribution requirements for the undergraduate degree. A description of how each of the accredited baccalaureate programs meets the ABET requirements is available from the department office and from the Engineering Advising Center. Accredited four-year curricula leading to baccalaureate degrees are offered in aeronautics and astronautics and in ceramic, chemical, civil, computer, electrical, industrial, mechanical, and metallurgical engineering, as well as in technical communication.

Application to a department program at the upper-division level is made at the time that lower-division requirements are satisfied. Currently, enrollment limits imposed by faculty size and laboratory/classroom space available are such that entry into a specific department may be highly competitive. In general, a student applicant must demonstrate scholastic aptitude, as evidenced by the attainment of grades whose average is 2.5 or above (depending upon the program) in Mathematics, Natural Sciences, English Writing, and Engineering Fundamentals. The student is urged to plan ahead by learning the intended department's requirements and particularly by noting which required courses must be fulfilled by the time the application is made. The larger departments permit entry for autumn or spring quarters. Others permit only autumn quarter entry.

Nondepartmental Professional Program. This program leads to a Bachelor of Science in Engineering degree and is designed for students who have well-defined, special educational objectives that departmental programs do not satisfy. Graduates can practice as professional engineers in newly developing fields, or they may embark on graduate study in these or allied fields (see Engineering Interdepartmental Curricular Program).

Nonprofessional Program. Leading to a Bachelor of Science degree, this program is intended for students who wish to have significant exposure to science and engineering courses, but who do not plan to engage in professional engineering practice (see Engineering Interdepartmental Curricular Program).

General Requirements for Graduation. To graduate, students must meet or exceed the requirements of the University, the College, and their particular program or department. College requirements are listed in this section, and program or departmental requirements are given in the specific section that describes that program or department.

All departments of the College have continuation policies that specify a minimum rate of progress as well as minimum academic performance levels. These policies may be more restrictive than those generally applied by this university and may change in time. Information on current policy is available at the departmental offices.

Selecting courses that fulfill graduation requirements is the responsibility of each individual. Students are urged to check carefully the course and credit requirements of the program in which they are enrolled.

The College requires a minimum number of credits within certain areas of study and some specific courses within certain areas. All programs require:

General Education Requirements: 91 Credits

Areas of Knowledge: 55 Credits

Visual, Literary, & Performing Arts and Individuals & Societies: 10 credits minimum. Visual, Literary, & Performing Arts (VAPA) includes courses in literature, art, music, drama, etc., which stress the essential qualities of individual forms of expression. First- and second-quarter language courses may not be counted toward the VAPA requirement. Individuals & Societies includes courses in history, economics, psychology, sociology, etc., which stress the social nature of mankind and the development and analysis of societies and/or social institutions. Courses that count toward these requirements are listed as VAPA or I&S in the General Catalog and in the quarterly Time Schedule. A minimum of 10 credits is required in each area. Also required is one in-depth sequence consisting of two or more related courses.

Natural World: 25 credits. Specifically required are chemistry (10 credits): CHEM 140, 141, 150, 151; and physics (15 credits): PHYS 121/131, 122/132, 123/133.

Mathematics: 24 Credits

Specifically required are MATH 124, 125, 126, 307 and 308. The remaining 3 credits are specified or recommended by the department.

Written and Oral Communication: 12 Credits

One 5-credit English composition course from the approved University list. ENGR 231 Introduction to Technical Writing (3 credits) and ENGR 333 Advanced Technical Writing and Oral Presentations (4 credits, or department approved alternative).

Engineering Fundamentals: 24 Credits

CSE/ENGR 142 Computer Programming for Engineers (4 credits), is required. The remaining credits are to be selected from the following areas of study: engineering science, graphics, numerical and computational techniques, engineering economics, and systems engineering.

Each department specifies part or all of the Engineering Fundamentals course work (see individual departmental requirements). Such courses are intended to provide the student with a strong background for the chosen major field of study.

At least 16 of the required 24 credits in Engineering Fundamentals must be completed within the first 144 credits earned, unless a waiver has been granted.

Engineering Departmental Course of Study: 77 Credits

Major departments or specific programs will require at least 77 credits in their curricula. At least 24 credits must have a design component.

Special Programs

Cooperative Education and Minority Internship Program

Cooperative Education and Minority Internship Program (CEMI) offers students the opportunity for pre-engineering courses, and all departmental students to combine practical, full-time, on-the-job engineering experience with alternate periods of full-time academic study. Advantages of participation in this program include assistance for the student in deciding which branch of engineering to follow; additional income to help defray college expenses; relevance and motivation for study based on real engineering work; and work experience and employment contacts that may result in a higher starting salary after graduation.

Information may be obtained from the Director of Cooperative Education, College of Engineering, FH-10.

Continuing Education Programs

Engineering noncredit short courses, conferences, televised instructional programs, and late-afternoon credit classes are offered to the professional community. These offerings range from refresher courses, which assist engineers who are planning for professional registration, to credit courses leading to a graduate degree. In general, the offering of noncredit and credit continuing education programs is based on need or demand. Courses are announced in Spectrum, by special announcements, professional society newsletters, and news media.

Special Facilities

OFFICE OF ENGINEERING RESEARCH

Coordinator, Mary Heusner
372 Loew

The Office of Engineering Research promotes, stimulates, and coordinates research in all fields of engineering. Its primary role is to maintain records of grant and contract proposals and awards. It also allocates limited resources to College units to increase the number and quality of research grants and contracts in the College of Engineering.
AEROSPACE AND ENERGETICS RESEARCH PROGRAM
Director, Abraham Hertzberg
120 Aerospace Research and Engineering Laboratory

The Aerospace and Energetics Research Program is directed toward high-technology engineering research and teaching through research. The program has the task of anticipating, and even trying to outpace, the critical technology needs of our nation. The research and teaching programs of this laboratory, therefore, emphasize those engineering skills that both match the requirements of the present and future and develop in students a broad understanding of the impact of technology on society. Suitable programs are designed to develop in the student, through his or her particular research program, the imagination and, more importantly, the willingness to respond to the complex and rapidly changing future of engineering. This ideal directs the faculty's efforts and creates within the principal investigators, research faculty, and students the concept of engineering as an adventure.

The program is marked by a Catholic approach to research, with programs covering many fields, usually centered on energy or aerospace. Active research programs are available in plasma engineering related to fusion power, space and terrestrial solar energy systems, laser bioengineering experiments, studies of the basic technology of high-power laser systems, advanced gas dynamics research involving new propulsion concepts, and the use of shock waves to process chemicals, which represent some of the interests of the principal investigators working together in the Aerospace and Energetics Research Program.

Interdisciplinary Engineering Studies Program
356 Loew

The College of Engineering directly administers non-departmental undergraduate and graduate degree programs, all of the College's lower-level courses, and upper-level courses not encompassed by regular departmental offerings. These courses are designated ENGR (Engineering) courses and are supervised and taught by regular departmental faculty members.

Undergraduate Programs
358 Loew

Coordinator, Dianne E. Cline

The Interdisciplinary Engineering Studies (IES) Program is intended for students whose desired course of study does not fall within one of the traditional engineering departments. An interdisciplinary program combines in-depth course work from two or more departments. Although course work may involve departments outside the College of Engineering, the major thrust must be in engineering.

The IES Program offers a nonprofessional degree program leading to the Bachelor of Science (B.S.) and a professional degree program for the Bachelor of Science in Engineering (B.S.E.).

Due to the uniqueness of each interdisciplinary student's program of studies, the B.S. and B.S.E. degrees are not accredited by the American Board of Engineering and Technology (ABET). The experience required to obtain a professional engineering license is two years longer for a B.S.E. graduate, except in surveying, than for a graduate of an accredited program. A B.S. graduate is not eligible for a professional engineering license.

Interdisciplinary students develop personal programs of study approved by a faculty adviser with similar interests. Programs are reviewed and approved by the Interdisciplinary Committee which oversees all interdisciplinary study programs. Contact the Office of Academic Affairs at 543-6590 for information on established procedures and applications for entry into the B.S.E. and B.S. programs. Entrance requirements and the continuation policy for participation in these programs are consistent with those of other departments in the College.

Bachelor of Science in Engineering Degree

A typical B.S.E. program could: combine course work from civil and mechanical engineering and oceanography for a program in ocean engineering; course work from civil and chemical engineering to form a program in environmental engineering; or course work from one or more of the engineering programs and from physics for a program in engineering physics. Admission into this program (usually after completion of 90 credits) is competitive with a GPA of at least 2.80 in technical courses required for entry. A minimum of 75 credits must be completed after entering the program before a B.S.E. degree is awarded.

Bachelor of Science Degree

The nonprofessional Bachelor of Science degree provides greater flexibility than does the Bachelor of Science in Engineering degree. It can be an excellent base for subsequent professional studies in law, medicine, or business. It may also be the primary educational objective in such fields as technical writing, engineering sales, or environmental studies. Detailed requirements are available from the coordinator in the Office of Academic Affairs.

Graduate Programs

The College also offers graduate programs leading to the Master of Science in Engineering, Master of Engineering, and Master of Science degrees, without designation of a specific major.

Approved programs lead to the M.S.E. degree in civil, mechanical, electrical, chemical, and interengineering areas and to the M.S. degree in aeronautics and astronautics, and approved programs lead to the M.S. degree in civil engineering, interengineering, and materials science and engineering. Admission requires a B.S. degree in engineering, mathematics, or physical science and evidence of aptitude for graduate study. Submission of scores on the Graduate Record Examination is required.

Master of Science in Engineering Degree

The Interengineering Master of Science in Engineering (M.S.E.) and Master of Science (M.S.) program is intended for students whose desired course of study includes two or more engineering departments and may also include study in departments outside the College of Engineering. Applications and files of students entering the M.S./M.S.E. option are handled in the office of the Associate Dean for Academic Affairs. Admission to the Interengineering option requires a statement describing the applicant's objectives. This statement should state why students want to enter the M.S./M.S.E. program rather than one of the traditional engineering graduate programs. Applicants to the M.S./M.S.E. program must have well-defined educational objectives which cannot be satisfied by established engineering programs. Graduation and entrance requirements, which differ for the various programs, may be obtained from the Office of the Dean for Academic Affairs, College of Engineering, 543-6590.

Program in Engineering and Manufacturing Management—PEMM Follows

For students interested in a career in manufacturing management, PEMM offers a two-year (24-month) joint degree program leading to both M.B.A. (Master of Business Administration) and M.S.E. (Master of Science in Engineering) degrees. Applicants must apply to the M.B.A. Program, the M.S.E. interengineering Program, and the PEMM Program. Prospective students must take both the GRE and GMAT examinations before applying. For more information contact Miriam Rich, Program Coordinator, 13 Engineering Library, (206) 685-1109.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

ENGR 100 Introduction to Design Engineering (4) I & S Introduction to design and communication principles through engineering project approach, stressing teamwork, design process, specifications and tools of engineering, creative and analytical thinking, professionalism and ethics, social, economic and political context, open-ended problems. Grading based on quality of engineering projects and presentation of design through written, oral, and graphical communication. Offered: AWSp.

ENGR 110 Career Planning I (1) Presentations by various faculty and staff members, students, and recent graduates offer an introduction to the College of Engineering, curricular options, fields of engineering, interdisciplinary programs, and information of general interest. Credit/no credit only. Limited to freshmen, sophomores, or transfer juniors. Offered: AW.

ENGR 111 Engineering Problems (5) Introduction to solving problems in statics and dynamics. Applications of vectors and calculus to rectilinear motion, statics, momentum, work and energy, and rotational motion. Designed to develop the ability to analyze and solve engineering problems. Prerequisites: MATH 124 and permission of instructor. Offered: Sp.

ENGR 123 Introduction to Engineering Graphics (4) NW Freehand sketching, lettering, scales, use of instruments, layout drawings, orthogonal projection,
ENGR 120 Engineering Statics (4) Principles of the statics, basic concepts, parallelogram law, Newton's law, resultants, force equations, equilibrium, vector algebra, and friction. Offered: AWSpS.

ENGR 122 Engineering Dynamics (4) Principles of the dynamics, basic concepts, application of Newton's second law of motion, and equilibrium. Offered: AWSpS.

ENGR 220 Introduction to Mechanics of Materials (3) Introduction to the concepts of stress, deformation, and strain in solid materials. Development of basic relationships between loads on structural and machine elements such as rods, shafts, and beams, and the stresses, deflections, and load-carrying capacity of these elements. Offered: AWSpS.

ENGR 230 Kinematics and Dynamics of Structures (4) Statics of particles, systems of particles, and rigid bodies; moving reference frames; kinetics of particles, systems of particles, and rigid bodies; equilibrium, energy, linear momentum, angular momentum, Euler equations, and special problems (e.g., central force motion, vibration). Prerequisite: 210. Offered: AWSpS.

ENGR 231 Introduction to Technical Writing (3) Principles of organizing, developing, and writing technical information. Report forms and rhetorical patterns common to scientific and technical disciplines. Technical writing conventions such as headings, illustrations, style, and tone. Numerous written assignments required. Required for all engineering majors. Prerequisite: all required ESL courses and one 5 credit composition course. Offered: AWSpS.

ENGR 232 Engineering Cooperative Education (2, max. 16) Engineering practicum: integration of classroom theory with on-the-job training. Periods of time work concurrent with study. Open only to students who have been admitted to the Engineering Cooperative Education Program. Requires subsequent completion of ENGR 322 to obtain credit. Credit/no credit only. Offered: AWSpS.

ENGR 233 Advanced Technical Writing and Oral Presentation (4) Emphasis on the presentation of technical information to various audiences. Style of writing required for proposals, reports, and journal articles. Oral presentation principles, including use of visuals, as well as organizing and presenting an effective talk. Prerequisite: 231. Offered: AWSpS.

ENGR 341 Energy: Consumption Patterns, Fossil Fuels, and Conservation (3) NW Woodfords Survey of energy use, especially in the United States. Fossil fuels with emphasis on resource availability and on greenhouse effects and other environmental consequences. Methods for reducing consumption through conservation. Offered: jointly with ENV SFPSYS 341; A.

ENGR 342 Energy: Nuclear and Solar Power (3) NW Woodfords Technology of nuclear power, especially fission power, and of the major forms of solar power, including hydroelectric power, wind power, and biomass. Consideration given to the factors limiting the utilization of these sources. Offered: jointly with ENV SFPSYS 342; W.

ENGR 351 Inventions and Patents (1) Law and procedures for patenting inventions, employer-employee relationship, and trademarks. Primarily for engineering students. Prerequisite: junior standing. Offered: Sp.

ENGR 352 Energy Policy and Legislation (3) NW An introduction to the many aspects of energy policy and legislation, with emphasis on energy resources, energy policy, and the environmental consequences of energy use. Prerequisite: MATH 213. Offered: Sp.

ENGR 353 Environmental Policy and Legislation (3) NW An introduction to major environmental laws, regulations, and court cases, and their relationship to energy policy and legislation. Prerequisites: MATH 213 or permission of instructor. Offered: jointly with ENVS SFPSYS 353; Sp.

ENGR 354 Energy: Consumption Patterns, Fossil Fuels, and Conservation (3) NW Woodfords Survey of energy use, especially in the United States. Fossil fuels with emphasis on resource availability and on greenhouse effects and other environmental consequences. Methods for reducing consumption through conservation. Offered: jointly with ENV SFPSYS 341; A.

ENGR 360 Introductory Acoustics (3) NW Introduction to propagation of acoustical waves; emphasis on propagation of sound waves in air, but material is applicable to propagation of sound waves in liquids, including underwater acoustics, and to propagation of stress waves in solids. Includes a historical development of the subject and sound waves in continua. Prerequisite: PHYS 121. Offered: Sp.

ENGR 370 Engineering Management (3) NW Emphasis on the role of managers in technical, creative, and administrative aspects of engineering, with an emphasis on the responsibilities of managers to their employees, to the public, and to society. Prerequisites: MATH 112, PHYS 121, or permission of instructor. Offered: jointly with AMATH 370; W.

ENGR 371 Probability and Statistics for Engineers (3) NW Application of probability theory and statistics to engineering problems, including inference, decision theory, and quality control. Prerequisites: MATH 205; MATH 329 or A A 370; and AMATH 351 or MATH 307 or permission of instructor. Offered: jointly with AMATH 401; A.

ENGR 372 Probability and Statistics for Scientists (3) NW Application of probability theory and statistics to problems in science and engineering. Prerequisites: MATH 205; MATH 329 or A A 370; and AMATH 351 or MATH 307 or permission of instructor. Offered: jointly with AMATH 402; W.

ENGR 373 Engineering Management (3) NW See 370. Offerings of this course are not intended to be counted as first and second year courses; power series and Fourier series solutions. Laplace transforms; systems of differential equations, eigenvalues. Prerequisites: MATH 205, MATH 329 or A A 370, and AMATH 351 or MATH 307 or permission of instructor. Offered: jointly with AMATH 403; Sp.

ENGR 374 Methods in Applied Mathematics I (4) NW Emphasis on the role of managers in technical, creative, and administrative aspects of engineering, with an emphasis on the responsibilities of managers to their employees, to the public, and to society. Prerequisites: MATH 205; MATH 329 or A A 370; and AMATH 351 or MATH 307 or permission of instructor. Offered: jointly with AMATH 403; Sp.

ENGR 450 Gas Discharges for Plasma Processing and Other Applications (3) NW Techniques of plasma processing and other applications, including gas discharges for sputtering, plasma etching, and other plasma processing applications. Prerequisites: MATH 307, PHYS 122.

ENGR 490 Reliability and Risk Analysis (3) NW See 490. Application of partial differential equations; linear and quasilinear first order equations, characteristics; classification of second order equations; basic solution techniques for parabolic, elliptic, and hyperbolic equations; Green's functions and integral transform methods. Prerequisites: 402 or permission of instructor. Offered: jointly with AMATH 403; Sp.
Aeronautics and Astronautics

206 Guggenheim

Aeronautics and Astronautics deals with atmospheric and space flight and a broad spectrum of related engineering science. Established in 1930, the department offers a full complement of degree programs and is unique in the Pacific Northwest.

Undergraduate Program

David A. Russell, Faculty Adviser
Reiner Decher, Undergraduate Program Coordinator

The department offers the Bachelor of Science in Aeronautical and Astronautical Engineering degree, based on a program of study in engineering science with emphasis on the design and development of vehicles operating within the atmosphere or space. The program is accredited by the Accreditation Board for Engineering and Technology, and all graduates must meet certain specific distribution requirements.

Admission

Entrance into the department requires the equivalent of at least 75 applicable credits and a 2.50 GPA in specified courses. These are minimum requirements; admission is competitive. Details of the entrance requirements, application deadlines, application forms, and advice literature may be obtained from the department office.

Technical Preparation

The department requires the General Education and Engineering Fundamentals requirements of the College of Engineering listed above and, in addition, has the following recommendations and requirements for technical preparation. In the Natural World, PHYS 225 is required. In engineering science, ENGR 210, 230, and 250 are required prior to admission to the department. In addition, ENGR 215 is recommended and is required to be taken prior to entering the department.

Professional Courses

The department program begins in the autumn quarter of the junior year. Exceptions are very unusual and must be coordinated with the undergraduate advisor. Required junior courses: A A 300, 301, 302, 310, 311, 312, 321, 322, 330, 331, 332, 370. Required senior courses: A A 410-411 or 420-421, 460, 498 and 21 credits of senior technical electives, with at least 18 chosen from department offerings.

Additional free electives may be needed to meet the 192 credits required for graduation. Appropriate technical electives include electronics, automatic control, mathematics, applied mathematics, computer science, physics, and astronomy. Senior programs should be planned with the assistance of the faculty advisor.

Graduate Program

Mitsuru Kurosaka, Graduate Program Adviser

The Department of Aeronautics and Astronautics offers programs that provide a foundation in the engineering sciences and study in various engineering applications. These lead to the degrees of Master of Science in Aeronautics and Astronautics, Master of Engineering, or Doctor of Philosophy.

Master of Science in Aeronautics and Astronautics Degree

The program of study is tailored to the needs and interests of the student. Each program must be approved by the department graduate committee and must provide breadth through a variety of subjects, depth through extensive study of a specialized field, and analytical strength. Minimum programs consist of either 39 credits of course work, or 30 credits of course work and a 9-credit thesis.

Master of Engineering Degree

The Master of Engineering program is intended to provide course work and research beyond that for the degree of Master of Science in Aeronautics and Astronautics. The student must complete an approved program of study and research, which usually consists of a prior Master of Science degree, followed by a minimum of 30 credits of course work beyond that required for the Master of Science in Aeronautics and Astronautics, and is expected to be in continuous full-time residence for a minimum of one academic year after advancement to Candidate standing.

Research Activities

Research facilities include the Kirsten 8x12-foot low-speed wind tunnel, a water tunnel, a blow-down tunnel, shock tunnels and Ludweg tubes, a projectile accelerator, material and structural test machines, a dynamic fracture laboratory, a composite material laboratory, and various fusion-research and engineering physics laboratories. A variety of computer facilities are available, including a computational fluid dynamics laboratory and a new controls laboratory. The Aerospace and Energetics Research Building, which is also part of the Department of Aeronautics and Astronautics.

Externally funded research is carried out by faculty members and students on such topics as buoyant flows, separation control, combustor mixing, shear layers, computational fluid dynamics, internal flows, reacting flows, ram accelerators, space energy systems, space system design, control system design and engineering, robust and optimal control, rotorcraft control, wing optimization, impact mechanics, cylinder failure, composite material structure and fracture, plasma science, and fusion research.

Admission

Students who have earned a baccalaureate degree in an accredited program of aeronautics and astronautics or closely related field are eligible for the Master of Science program. Backgrounds in related fields require review on a case-by-case basis, and preparatory courses may be required, depending on the student's previous studies and educational objectives. Admission is competitive, with the equivalent of a 3.00 GPA in previous technical study a minimum standard. Submission of verbal, quantitative, and analytical scores on the Graduate Record Examination is required.

Admission to the Doctor of Philosophy program is based on satisfactory performance on a departmental qualifying examination. Admission to that examination is based on evidence of superior academic ability.

Additional Information

Students who intend to work toward advanced degrees must apply for admission to the Graduate School. Most students are financially supported by their employers or by the department as teaching or research assistants. For further information on this or other aspects of department programs, contact the Graduate Program Coordinator, 206 Guggenheim, FS-10.

Faculty

Chairperson

Walter H. Christiansen

Professors

Bolland, R. John • 1961; PhD, 1954, Purdue University; mechanics of materials, structural mechanics, aerelasticity, design and crashworthiness of aircraft.

Bruckner, Adam • 1972; PhD, 1972, Princeton University; space propulsion, power, and systems design; supersonic, hypervelocity accelerators; lasers.

Christiansen, Walter H. • 1967; PhD, 1961, California Institute of Technology; gas dynamics and gas physics, high-power gas lasers and their application, energy conversion.

Clark, Robert N. • 1957; PhD, 1969, Stanford University; automatic control systems, fault detection in dynamic systems.

Decher, Reiner • 1973; PhD, 1968, Massachusetts Institute of Technology; aircraft propulsion, fluid mechanics, energy conversion.

Eastman, Fred 1927, (Emeritus); MS, 1929, Massachusetts Institute of Technology; aeronautics and astronautics.

Fyle, Ian M • 1958; PhD, 1958, Stanford University; dynamics, fracture mechanics.

Hertzberg, Abraham • 1966, (Emeritus); MASE, 1949, Cornell University; high-power lasers, fusion research, solar energy, space systems, energy systems, heat transfer.

Hoffman, Alan Lowell • 1989, (Research); PhD, 1967, California Institute of Technology; plasma physics and magnetic confinement fusion.

Holsapple, Keith A. • 1965; PhD, 1965, University of Washington; solid mechanics, continuum mechanics, structure waves, finite element methods.

Jarboe, Thomas R. • 1989; PhD, 1974, University of California (Berkeley); plasma physics and controlled fusion, magnetic reconnection and relaxation.

Joppa, Robert G. • 1947, (Emeritus); PhD, 1972, Princeton University; aircraft flight mechanics, stability and control.

Kevorkian, Jirair • 1964; PhD, 1961, California Institute of Technology; partial differential equations, perturbation theory.

Kurosaka, Mitsuru • 1987; PhD, 1968, California Institute of Technology; propulsion, turbo machinery, thermo-fluid mechanics, heat transfer and acoustics.

Lin, Kuen-Yuan • 1984; PhD, 1977, Massachusetts Institute of Technology; composite materials, structural mechanics, finite element methods.

Pamenter, R. Reid • 1963; PhD, 1963, California Institute of Technology; structures, solid mechanics, fracture mechanics.
Pearson, Carl E. * 1967, Emeritus; PhD, 1949, Brown University; wave propagation, fluid dynamics, numerical analysis, optimization.

Russell, David A. * 1967; PhD, 1961, California Institute of Technology; fluid mechanics and gas physics, aerodynamics, shock processes and laser fluid dynamics.

Street, Robert E. 1948, Emeritus; PhD, 1939, Harvard University; aerodynamics and aeronautics.

Vagners, Juris 1967; PhD, 1967, Stanford University; dynamics, controls and optimization.

Associate Professors

Breidenthal, Robert E. * 1980; PhD, 1979, California Institute of Technology; computational fluid dynamics, numerical analysis.

Eberhardt, David Scott * 1986; PhD, 1985, Stanford University; robust control, parameter optimization, model reduction, digital control, design integration.

Mattice, Arthur T. * 1975; PhD, 1975, Massachusetts Institute of Technology; gas physics, gas lasers, energy conversion.

Assistant Professor

Livne, Eli * 1990; PhD, 1990, University of California (Los Angeles); aerelasticity, aeroacoustic, optimization, structural dynamics.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

A A 321, 322 Junior Laboratory II, III (2,2) Breidenthal, Clark, Fythe, Vagners The design and conduct of experimental inquiry with consequent introduction to experimental equipment and techniques. Results to be presented in the general field of mechanical engineering in the applied fields of aeronautics and astronautics. A majors only. Offered: W.Sp.

A A 400 Gas Dynamics (3) Christiansen, Eberhardt, Russell Introduction to kinetic theory and gasdynamics. One-dimensional compressible flow, turbulent flows, one-dimensional gas dynamics: one-dimensional wave motion, waves in supersonic flow, flow in ducts and wind tunnels. Prerequisite: ENGR 260 or permission of instructor. Offered: A.

A A 401 Fluid Mechanics (3) Eberhardt, Keller, Kurosaka, Russell Inviscid equations of motion, compressible fluid flows, vortex flows, small perturbations. Fluids, bodies of revolution, similarity laws. Method of characteristics. Prerequisites: 302 and ENGR 260, or permission of instructor. Offered: W.

A A 410 Aircraft Design I (4) Preliminary design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Prerequisite: 302; recommended: 440. Offered: W.

A A 419 Aerospace Heat Transfer (3) Bruckner, Jarboe, Mattice Concentrates on conductive and radiative heat transfer, with application to thermal management in space systems. Prerequisite: senior standing in aeronautics and astronautics. Offered: A.

A A 420 Spacecraft and Space Systems Design I (3) Bruckner Design of space systems and spacecraft for advanced near-Earth and interplanetary missions. Astrodynamics, space environment, space systems engineering. Mission design and analysis, space vehicle in the general field of mechanical engineering. A majors only. Offered: W.

A A 425 Spacecraft and Space Systems Design II (3) A A programs senior or permission of instructor.

A A 430 Finite Element Structural Analysis (3) Holsapple, Lin, Parmerter Introduction to the finite element method and application. One- and two-dimensional problems including trusses, beams, box beams, plate loads, and plate elements. Computer software. Use of finite element software. Prerequisite: 332 or equivalent. Offered: A.

A A 432 Composite Materials for Aerospace Structures (3) Lin Introduction to analysis and design of aerospace structures utilizing filamentary composite materials. Basic elastic properties and constitutive relations of composite laminates. Failure criteria, buckling analysis, durability, and damage tolerance of composite structures. Aerospace structure design philosophy and practices. Prerequisite: 332 or permission of instructor. Offered: Sp.

A A 440, 441 Flight Mechanics I, II (3,3) Clark, Livne, Ly. Calculation of aerodynamic characteristics for various aircraft; computer simulation of aerodynamic charac­
teristics. Relation to wind tunnel and flight data. Vehicle equations of motion within the atmosphere, characteristics of propulsion systems and components including propulsion fans, rocket engines, ramjets, and hybrid engines. Prerequisites: 302 for 440; 440 for 441. Offered: A.Sp.

A A 449 Control Systems Sensors and Actuators (3) Study of components and formulation of their mathematical models. Amplifiers, servomotors, syn­
chrons, gyroscopes. Accelerometers, reaction mass actuators, potentiometers, shaft encoders and resolvers, proximity sensors, force and torque transducers. Experimental determination of component models and model parameters. Three-hour laboratories per week. Prerequisite: senior standing. Offered: jointly with E E 446; W.

A A 449 Design of Automatic Control Systems (4) Design problems in electromechanical feedback systems for aeronautics and hydrospace vehicles, systems with unstable plants, lightly damped modes, nonminimum phase plants, nonlinear plants. Computer-aided simulation and design emphasized. Team effort and group project. Design reviews, oral presentations required. Prerequisite: 450 or E E 446 or M E 471 or equivalent. Offered: jointly with E E 449; Sp.

tics of gas-turbine engine components. Prerequisites: 302, ENGR 260 for 460; 460 for 461. Offered: A,W.

A A 462 Rocket Propulsion (3) Decher, Jarboe Physical and performance characteristics of rocket propulsion devices. Mission requirements, chemical rockets, arcjets, electrostatic and electromagnetic thrusters. Prerequisite: A A program senior or permission of instructor. Offered: Sp.
**Courses for Graduates Only**

**A A 480** Systems Dynamics (3) Bollard, Fyfe, Parmertar. Equations of motion and solutions for selected cases; exact and mode shapes; response of simple systems to applied loads. Prerequisite: senior standing. Offered: W.

**A A 489** Special Topics in Aeronautics and Astronautics (0-1) Lectures and discussions on topics of current interest in aeronautics and space engineering. Three quarters required for credit. Offered: AWSp.

**A A 498** Special Projects (2-5, max. 10) Investigation on a special project by the student under the supervision of a faculty member. A maximum of 6 credits may be applied toward senior technical elective prerequisites. Prerequisite: senior standing. Offered: AWSp.

**Courses for Graduates Only**

**A A 501** Physical Gasodynamics I (3) Christiansen, Mattick. Equilibrium kinetic theory; chemical thermodynamics; thermodynamic properties of quantum statistical mechanics; reacting gas mixtures, applications to real gas flows and gas dynamics. Offered: odd years; A.

**A A 502** Physical Gasodynamics II (3) Christiansen, Jarboe. Boltzmann and collisionless Boltzmann (Vislov) equations. Instabilities in homogeneous and inhomogeneous plasma, quasi-linear diffusion, wave-particle interaction, collisional (Fokker-Planck) equation. Introduction to radiative non-equilibrium, scattering and absorption processes. Integration of radiative transfer. Prerequisites: 501 or permission of instructor. Offered: even years; W.

**A A 503** Kinetic Theory/Radiative Transfer (3) Christiansen, Jarboe, Boltzmann and collisionless Boltzmann (Vislov) equations. Instabilities in homogeneous and inhomogeneous plasma, quasi-linear diffusion, wave-particle interaction, collisional (Fokker-Planck) equation. Introduction to radiative non-equilibrium, scattering and absorption processes. Integration of radiative transfer. Prerequisites: 501 or permission of instructor. Offered: even years; W.

**A A 505** Fluid Mechanics of Inviscid Flow I (3) Christiansen, Decher, Kurosaka. Ideal compressible flow; potential and stream functions. Airfoil theory and lifting line theory. Introduction to non-steady flow; wave theories; surface waves and wave solutions; special topics. Offered: even years; W.

**A A 506** Fluid Mechanics of Inviscid Flow II (3) Christiansen, Decher, Keller, Kurosaka, Russell Ideal compressible flow; supersonic airfoils; shock waves; slender-body theory; lifting surface theory; approximate methods. Transonic flow; similarity; special topics. Prerequisite: 505. Offered: even years; Sp.

**A A 507** Aerodynamics of Viscous Flows I (3) Kurosaka, Russell. Introduction to viscous flow; exact solutions of the laminar equations of motion; approximate equations. Exact solutions for laminar boundary-layer equations. Approximate methods for compressible laminar boundary layers. Offered: odd years; W.

**A A 508** Aerodynamics of Viscous Fluids II (3) Breidenthal, Keller, Kurosaka, Russell. The phenomena of turbulence; transition prediction; Reynolds stresses; turbulent boundary-layer equations. Approximate methods for turbulent boundary layers. Prerequisite: 507 or permission of instructor. Offered: odd years; Sp.

**A A 510** Computational Fluid Dynamics II (3) Eberhardt. Numerical approximation of equations of compressible viscous flow. Mesh requirements for resolving viscous effects in high Reynolds number flows. Analysis of numerical accuracy, stability, and efficiency. Use of explicit and implicit methods, boundary condition procedures. Applications to solution of the Navier-Stokes equations. Prerequisite: 509 or permission of instructor. Offered: odd years; Sp.

**A A 517** Stability and Control of Flight Vehicles II (3) Clark, Ly. Vagners. Specification of flight vehicle performance objectives. Control system components, sensor characteristics, choice of system models. Compensator design, frequency domain design of stability augmentation systems, single/multiple loop autopilot design and evaluation. Use of computer-aided control design packages. Prerequisite: 516. Offered: W.

**A A 520-521-522** Seminar (0-0-1) Topics of current interest in aerospace engineering. Offered: A-W-Sp.

**A A 523** Special Topics in Fluid Physics (3) Offered: AWSp.

**A A 525** Aerothermodynamics of Aircraft Engines Components (3) Decher, Kurosaka. Estimation of component performances, instability, description, design, analysis, design of turbines and compressors. Radial equilibrium theory, through-flow theory. Offered: even years; W.

**A A 526** Aerothermodynamics of Aircraft Engines Systems (3) Decher, Kurosaka. Aircraft gas turbine engine, cycle analysis, component performance measurements, preliminary design of engines, including component losses. Off-design performance, variable geometry engines. Offered: even years; Sp.

**A A 528** Energy Conversion II (3) Decher. Heat exchangers, energy storage. Direct conversion to heat to electricity. Electrochemical processes. Recommended: 527. Offered: odd years; W.

**A A 529** Space Propulsion (3) Bollard, Fyfe, Parmerter. Theory of plasticity, yield surfaces, flow rules, limit theorems. Concepts of failure and fatigue in aerospace structures, residual strength, machinery failure, and case histories. Prerequisite: 530 or equivalent or permission of instructor. Offered: odd years; W.

**A A 531** Structural Reliability and Damage (3) Bollard, Fyfe, Parmerter. Theory of plasticity, yield surfaces, flow rules, limit theorems. Concepts of failure and fatigue in aerospace structures, residual strength, machinery failure, and case histories. Prerequisite: 530 or equivalent or permission of instructor. Offered: odd years; W.

**A A 535** Analysis of Shells (3) Parmerter. General development of the geometrically non-linear theory of thin elastic shells. Topics include an introduction to tensor analysis with applications to curved two-dimensional spaces, theory of surfaces, Kirchhoff approximations, membrane theory and non-linear shallow shells. Offered: even years; Sp.

**A A 540** Finite Element Analysis I (3) Fyfe, Holsapple. Lin. Formulation of the finite element method using variational and weighted residual methods. Element types and interpolating functions. Analysis of power systems, elasticity problems, thermal conduction, and other problems of engineering and physics. Offered: W.

**A A 546** Mathematical Foundations of Systems Theory (4) Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with CE 562 and ME 510; A.

**A A 548** Linear Multivariable Control (3) Ly, Fyfe. Single loop feedback control theory; poles, zeros, Nyquist stability, performance, robustness of multivariable systems; multivariable control system. Linear-Quadratic-Gaussian methods, loop transfer recovery. Youla parameterization, H-infinity techniques, parameter optimization design. Prerequisite: EE 564 or ME 575; EE 446 or A A 448 or ME 471 or equivalent. Offered: jointly with EE 548, W.

---

284 COLLEGE OF ENGINEERING / AERONAUTICS AND ASTRONAUTICS
A A 549 Estimation and System Identification (3) Vagners Review of system models, model structure, model parameterization; review of stochastic processes; state estimation: observers, the Kalman-Bucy filter, numerical issues in filter design and implementation; system identification: linear and regression, least squares, maximum likelihood, instrumental variable techniques. Prerequisites: E E 505 or AMATH 506 or STAT 506; recommended: 548 or E E 548. Offered: jointly with E E 549; Sp.

A A 550 Nonlinear Optimal Control (3) Vagners Calculus of variations for dynamical systems, definition of the dynamics and optimal control problem, control Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisite: graduate standing; recommended: A A 548 or E E 548. Offered: jointly with E E 550; A.

A A 553 Vibrations of Aerospace Systems (3) Bollard, Flye, Livne Continuous and discrete systems, natural frequencies, and mode analysis; forced vibrations and motion-dependent forces. Structural damping; control augmented structures. Measurements for structural dynamic testing. Prerequisite: 571 or equivalent. Offered: odd years; Sp.

A A 554 Aeroelasticity (3) Livne Static and dynamic aeroelasticity, unsteady aerodynamics, aeroservoelastic modeling, and active control. Offered: even years; Sp.

A A 556 Plasma Theory I (4) Hoffman, Jarboe Review of electromagnetic theory and statistical mechanics, unmagnetized plasma, dynamics of charged particles in a magnetic field, radiation from a plasma, fluid equation for single species, simple waves in a magnetized and unmagnetized plasma, and magnetohydrodynamics (MHD). Offered: A.

A A 557 Plasma Theory II (3) Hoffman, Jarboe Equilibrium, stability, and confinement. Classical transport, collisionless and resistive skin depths. Ideal MHD equations formally derived and properties of plasmas in the ideal limit are studied. Straight and toroidal equilibrium. Linear stability analysis with examples. Taylor minimum energy principle. Prerequisite: 556. Offered: odd years; W.

A A 565 Fusion Reactor Fundamentals (3) Jarboe Introduction to basic engineering features of fusion power plants. Brief description of basic fusion physics and discussion of power plants for leading thermal nuclear concepts. Engineering problems: blanket, shield neutronics; materials, thermal hydraulics; tritium, superconducting systems. Prerequisite: completion of or concurrent enrollment in 556 or permission of instructor. Offered: even years; W.

A A 567 Analysis in Engineering and Science I (3) Complex variable and associated topics. Branch cuts, series and product expansions, Contour integration, numerical implementations, Harmonic functions. Complex potential (and singularities) in physical problems. Conformal mapping; applications and examples. Fourier and Laplace transforms and applications. Recommended: AMATH 401 or equivalent. Offered: jointly with AMATH 567; A.

A A 568 Analysis in Engineering and Science II (3) Survey of practical solution techniques for ordinary differential equations. Applications in production, biomaterials, biomechanics, controlled drug-release systems, imaging, microsensors, bioelectromagnetics, molecular bioengineering, microcirculation, cellular bioengineering, muscle, and simulation of biosystems. There are options for study leading to master's and doctoral degrees with different levels of specialization. Detailed information on Bioengineering, its faculty and courses appears in the Interschool or Intercollege Programs section of this catalog.

Bioengineering

309 Harris Hydraulics Laboratory

The Center for Bioengineering provides a multidisciplinary program of collaborative research and training designed to accelerate the application of new engineering technologies to clinical practice and research. Major areas of current bioengineering research include biomaterials, tissue engineering, biomolecular biology, controlled drug-release systems, imaging, microsensors, bioelectromagnetics, molecular bioengineering, microcirculation, cellular bioengineering, muscle, and simulation of biosystems. There are options for study leading to master's and doctoral degrees with different levels of specialization. Detailed information on Bioengineering, its faculty and courses appears in the Interschool or Intercollege Programs section of this catalog.
tion course. In addition, it is strongly recommended that students complete PHYS 123/133 and CHEM 224 (or 238). Students with a GPA lower than 2.50 for these specified courses or an overall GPA lower than 2.50 for all courses applicable to the B.S.Ch.E. degree seldom succeed in the department. Historically, a minimum GPA of 2.80 in these categories is required for admission to and success in the department. Admission is on a space-available or competitive basis. Students who wish to be admitted but who have not yet completed 12 credits at the UW should consult an advisor in the department.

Factors included in the admissions decision include the course record as indicated above and qualitative considerations such as difficulty of completed courses, frequency of incomplete or withdrawal grades, number of repeated courses, applicable work experience and maturity of attitude, record of honors, and a demonstrated ability to take at least 12 credits per quarter.

**Application Procedure and Timing**

Application is made by filling out an application form available in the department office. Students may apply for admission as soon as they meet the admission requirements, and are invited to consult with the departmental advisor.

**Admission for the Disadvantaged**

While the sole purpose of the admission requirement is to limit enrollment to a number that can be taught well with the resources available, the department recognizes that this may eliminate some disadvantaged students whose potential is high but who, through extenuating circumstances of their background, have had limited access to early education that provides adequate experience in abstract reasoning. For purposes of special consideration for admission, a disadvantaged student is here defined as one who (1) is economically disadvantaged as shown by eligibility for a Basic Need Grant on the National Financial Aid Program, or (2) is educationally disadvantaged, having attended a school without a full and available complement of college preparatory courses, or (3) has ethnic minority status with a group showing historic underrepresentation in the field of engineering. These students are encouraged to apply for admission and to attach to their application a letter to the admissions committee that provides information on the applicant that is relevant to the admission decision.

**Entrance to Chemical Engineering Courses**

Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering, pulp and paper technology, and the B.S.E. program. Other students who wish to take departmental courses must meet the admission requirements of the department, have the course prerequisites, and fill out a chemical engineering course request form.

**Continuation Policy**

The department policy on continuation is consistent with the continuation policy of the College. Details may be obtained from the department.

**Graduate Program**

The department offers studies leading to the degrees of Doctor of Philosophy, Master of Science in Chemical Engineering, and Master of Science in Engineering. The doctoral degree is centered on the dissertation with a foundation in course work; it is generally completed in four to five years beyond the baccalaureate degree.

In the master's program primary emphasis is placed on course work, and the degree generally requires between 18 and 24 months of study. Thesis and nonthesis options are available, with the former requiring both course work and research.

The program of study normally includes basic subjects of importance to all chemical engineers, such as thermodynamics, transport phenomena, kinetics, and applied mathematics. In addition, students are invited to take more specialized courses in chemical engineering or in other departments. Students usually take four courses during their first quarter. Subsequently, less time is spent on course work and more on research.

The department has about seventy full-time graduate students, roughly one-fourth of whom are working toward the M.S. degree and three-fourths toward the doctorate. The students study and collaborate with members of the faculty in an atmosphere that is informal, friendly, and intellectually vigorous. The range of interests among the faculty members is quite broad, so students in courses and in research work have access to a variety of fields while receiving individual attention and guidance.

**Research Facilities**

The department is fortunate in having outstanding facilities. The chemical engineering building, Benson Hall, is supplied with much new research equipment. The building contains classrooms, offices, stockrooms, a well-staffed machine shop, laboratories, and a variety of specialized research equipment, including VAXstations (model 3200), as well as seven Apollo work stations and many microcomputers. Each graduate student is provided desk space in a small laboratory or office as well as access to larger laboratories in the building. Students also may use the services of the Academic Computing Center, the glassblowing shop, and the Chemistry-Chemical Engineering Library.

**Admission Requirements**

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for admission as graduate students have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

The Graduate Record Examination (GRE), not including the advanced test, is generally required of all applicants. In addition, applicants who do not have a baccalaureate degree in chemical engineering from an accredited university in the United States must take the advanced test in chemistry or engineering.

**Financial Aid**

The department has various sources of support for qualified graduate students. Prospective students interested in applying for admission and support should request application forms from the department. The completed forms and reference letters should be received in the department office by January 31, if possible, and by March 15 at the latest. Offers of admission with financial support are usually made in February and March.

Bruce A. Finlayson

**Professors**

Allan, G. Graham * 1966; PhD, 1956, University of Glasgow (UK); fiber and polymer science, creativity and innovation.

Babb, Albert L. * 1956, Emeritus; PhD, 1951, University of Illinois; reactor engineering, bioengineering.

Berg, John C. * 1964; PhD, 1964, University of California (Berkeley); interfacial phenomena, surface and colloid science.

Bowen, J. Ray * 1981; PhD, 1963, University of California (Berkeley); combustion.

David, Morton 1953, Emeritus; DEng, 1950, Yale University; chemical engineering.

Davis, E. James * 1983; PhD, 1960, University of Washington; transport in porous media, microparticle physics and chemistry, surface and colloid science.

Finlayson, Bruce A. * 1967; PhD, 1965, University of Minnesota; modeling of chemical reactors, polymer flow, flow through porous media.

Garlid, Kermit L. * 1960; PhD, 1961, University of Minnesota; nuclear fuel cycles, radioactive waste management.

Heisegger, William J. * 1967; PhD, 1959, Princeton University; biomedical transport phenomena.

Hoffman, Allan S. * 1970; DSc, 1957, Massachusetts Institute of Technology; polymer materials science and engineering.

Horbett, Thomas A. * 1973; PhD, 1970, University of Washington; interfacial proteins, cell interactions, insulin delivery systems.

Johnson, Lennart N. * 1951, Emeritus; PhD, 1948, University of Wisconsin; chemical engineering.

McCarthy, Joseph L. * 1941, Emeritus; PhD, 1938, McGill University (Canada); thermodynamics, lignin and cellulose, chemistry, pulp and paper science, biochemical engineering.

McKean, William T. * 1979; PhD, 1968, University of Washington; pulp and paper science, chemical engineering.

Mouton, Ralph W. 1941, Emeritus; PhD, 1938, Washington University; chemical engineering.

Pilat, Michael J. * 1967, Adjunct; PhD, 1967, University of Washington; air resources engineering (design of air-pollution-control equipment).

Rainer, Buddy D. * 1972; PhD, 1972, Polytechnic Institute of Brooklyn; synthesis and characterization of polymeric biomaterials.

Ricker, Neil L. * 1978; PhD, 1978, University of California (Berkeley); chemical process design, simulation, and control.

Safarlis, James C. * 1977; PhD, 1977, University of Delaware; polymer science and engineering, polymeric composites.

Steicher, Charles A. * 1960, Emeritus; PhD, 1955, University of Michigan; fluid mechanics, heat transfer.

Woodruff, Gene L. * 1956; PhD, 1956, Massachusetts Institute of Technology; reactor physics, fusion engineering, neutron spectroscopy, energy studies.

**Associate Professors**

Gustafson, Richard Roy * 1966, Adjunct; PhD, 1962, University of Washington; process simulation and dynamics, development of high tensile carbon fibers.

Hodgson, Kevin T. * 1991, Adjunct; PhD, 1986, University of Washington; surface and colloid science, chemistry, fiber-water interactions, papermaking.

Holt, Bradley R. * 1984, PhD, 1984, University of Wisconsin; process control, process design.

Krieger-Brockett, Barbara * 1975; PhD, 1975, Wayne State University; reaction engineering, chemical kinetics and catalysis simulation.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

CH E 309 Creativity and Innovation (2) VLPA Allen
Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation. Techniques of creative thinking. Design and development of creative games. Computer-aided creative thinking. Creation, protection, and exploitation of a useful idea, including bargaining and negotiations. Prerequisite: junior standing or permission of instructor. Offered: jointly with PSE 309; Sp.

CH E 326 Chemical Engineering Thermodynamics (4) Phase equilibria and chemical equilibria in multicomponent systems; theories of solution; chemical reaction analysis. Prerequisites: 310, CHEM 456 or ENGR 260. Offered: AW.

CH E 330 Transport Processes I (5) Diffusive transport of momentum, heat and mass; general aspects of fluid flow; the Navier-Stokes equations; one-dimensional flow with engineering applications. Prerequisites: 310 and MATH 307. Offered: AW.

CH E 400 Methods of Engineering Analysis (3) NW Applications of mathematics to problems in chemical engineering: vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Prerequisites: MATH 205, MATH 307, and MATH 326, or permission of instructor. Offered: jointly with AMATH 400; A.

CH E 435 Transport Processes IV (Mass) Transfer processes, basic principles, and applications to equipment design. Physical separation processes. Prerequisites: 326, 340. Offered: A.

CH E 436 Chemical Engineering Laboratory I (3) Lectures on experimental design, instrumentation, laboratory safety, and report writing; laboratory experiments on fluid mechanics and heat transfer. Emphasis on experimental planning, procedures, and report writing. Prerequisites: 326, 340, and ENGR 231. Offered: AWSp.

CH E 437 Chemical Engineering Laboratory II (3) Continuation of 436. Laboratory investigation of chemical engineering principles applied to equipment design with emphasis on mass transfer operations and chemical reactors. Prerequisites: 435, 436, 465. Offered: AW.

CH E 450 Solid State Materials and Chemical Processes (3) Sefers Fundamentals of solid state including process analysis, mechanical properties, heterogeneous; anisotropy; liquid/liquid transformations; rate processes; thermal analysis; viscoelasticity; microscopy; molecular characterization techniques. Application of fundamentals in examining polymers, metals, and as used in the electronics, aerospace, and automotive industries. Prerequisites: 330, 340, and 465, or permission of instructor. Offered: W.

CH E 455 Surface and Colloid Science Laboratory (3) Berg Laboratory techniques, equipment, and underlying fundamentals in surface and colloid science. Experiments in the measurement of surface tension, adsorption, wetting and spreading, colloids, and proteins, emulsion preparation and stability, electrohydrodynamics, and interfacial hydrodynamics. Prerequisites: 326, 330, CHEM 461. Offered: Sp.

CH E 456 Physical Chemistry (3) NW Chemical thermodynamics. Laws of thermodynamics presented with applications to phase equilibria, chemical equilibria, and solutions. Honors section available Autumn Quarter. May be taken without CHEM 455. Prerequisites: CHEM 150 or 155, MATH 126, and college physics. Recommended: MATH 308. Offered: jointly with CHEM 456; W.

CH E 458 Surface Analysis (3) Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopy (ESCA, Auger); ion scattering, low-energy spectroscopy, and thermodynamic methods. Offered: jointly with BIOEN 492; W.

CH E 461 Electrochemical Engineering (3) Schwartz Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic, rate processes, ion transport, nucleation and growth theories. Application to chemical sensors, batteries, corrosion, thin film deposition. In-class demonstrations to illustrate concepts. Prerequisite: permission of instructor. Offered: W.

CH E 462 Application of Chemical Engineering Principles to Environmental Problems (3) Environmental problems in chemical engineering. Team taught; topics vary from year to year. Includes: geo-media, flow and dispersion through porous media, water-rock interactions, in situ site cleanup, ex situ site cleanup, colloid and surface science. Prerequisite: 330. Offered: Sp.

CH E 465 Reactor Design (4) Application of principles of chemical kinetics to the design of commercial-scale chemical reactors; characterization of batch and plug flow reactors in homogeneous and heterogeneous systems. Prerequisites: 326, 340. Offered: A.

CH E 467 Biomedical Engineering (3) Baneyx Application of basic chemical engineering principles to biomedical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisites: 340, organic chemistry, recommended: 465. Offered: jointly with BIOEN 467; W.

CH E 468 Air-Pollution Control Equipment Design (3) Design to control air pollutants from stationary sources, including calculations and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate matter. Prerequisites: senior standing or permission of instructor. Offered: jointly with CIVE 494/M E 468; W.

CH E 470 Chemistry of Wood (3) Chemical and physical properties of cellulose, lignin, hemicellulose, and extractives; wood as a raw material for the chemical industry. Prerequisite: CHEM 102 or 238 or permission of instructor. Offered: A.

CH E 471 Pulping and Bleaching Processes (3) Conversion of wood to mechanical and chemical pulps. Kraft, sulfate, and semichemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: jointly with PSE 476; W.

CH E 473 Pulp and Paper Laboratory (2) Laboratory experiments in chemical and semichemical pulping of wood. Bleaching of chemical and high-yield pulps. Physical and chemical characteristics of pulp fibers. Prerequisite: PSE 476. Offered: jointly with PSE 478; Sp.

CH E 475 Computer Analysis in Chemical Engineering (3) Model building/simulation of chemical engineering processes: reactor design, fiber spinning, electrochemistry, biotech processes. Numerical methods including integration of ordinary differential equations as initial and boundary-value problems; finite difference, collocation, Galerkin methods. For each model the appropriate tool is developed. Offered: A.

CH E 480 Process Dynamics and Control (4) Analysis of the dynamics of simple chemical process units and systems; applications to stability, control, and optimization. Actual case studies. Weekly two-hour laboratory included. Prerequisites: 435, 465. Offered: AW.

CH E 481 Process Optimization (3) Concepts and techniques of optimizing chemical engineering processes and systems, including classical and direct methods. Linear and nonlinear programming, dynamic programming, statistical experimental design, and evolutionary operation. Prerequisite: 485. Offered: Sp.

CH E 482 Advanced Topics in Process Control (3) Holf, Ricker Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, predictive control, model-based control, and nonlinear control. Prerequisite: 480.

CH E 485 Process Design I (3) Applied economics in chemical engineering design and operations; market analysis, plant location, design and analysis, and economic feasibility studies, utilization of market survey and plant
Preparation of solids for use in contact with body fluids. Prerequisite: organic chemistry or MSE 423 or permission of instructor. Offered: jointly with BIOEN 511; WSp.

CH E 565 Kinetics and Catalysis (3) Finlayson, Krieger, Stueve Homogeneous and heterogeneous systems with emphasis on chemical engineering principles applied to industrial reactor design. Prerequisite: 525. Offered: W.

CH E 566 Control of Gaseous Air Pollutants (3) Pitot Physical and chemical processes used to control gaseous air pollutants. Absorption into liquids, aqueous spray dryer scrubbers. Adsorption beds. Control of sulfur oxide and nitrogen oxide. Case studies of particulate control. Prerequisite: 450 or permission of instructor. Offered jointly with CEWA 566; every year; Sp.

CH E 567 Control of Particulate Air Pollutants (3) Pitot Processes used to control emissions of particulate air pollutants. Use of settling chambers, cyclones, fabric filters, wet scrubbers, and electrostatic precipitators to control aerosol particles. Case studies of particulate air-pollutant control systems. Prerequisite: 468 or permission of instructor. Offered: jointly with CEWA 567; odd years; A.

CH E 570 Chemistry of High Polymers (3, max. 6) Allen Fundamentals of high polymer chemistry, including kinetics of addition and condensation polymerization, the determination of average molecular weights and chain length distributions, solution properties and the relationship between molecular structure and plastic film and fiber properties of various polymers. Prerequisite: an undergraduate sequence in organic chemistry. Offered: W.

CH E 571 Polymer Physics and Engineering (3) Saleris Description and analysis of methods for processing polymeric materials. Introduction to solid polymer physics with emphasis on the coupling of structure morphology and properties. Development of structure-property models for quantitative description and control of properties in synthetic and natural polymers and composite materials. Offered: A.

CH E 572 Advanced Polymeric Composites (3) Saleris Design, manufacture, and properties of organic and inorganic particle- and fiber-reinforced polymers. Advanced techniques for characterization of processing and properties, including anisotropic elasticity/viscoelasticity theory, polymerization and network formation of matrices, theory of reinforcement, environmental and chemical effects. Prerequisite: 571 or MSE 423 or permission of instructor. Offered: Sp.

CH E 575 Nonlinear Analysis in Chemical Engineering (3) Ricker Comparison of numerical techniques: similarity, perturbation, finite difference, Galerkin, orthogonal collocation methods as applied to nonlinear chemical engineering problems. Offered: odd years.

CH E 580 Topics in Chemical Engineering Design (3, max. 9) Lectures and seminars on current design methods in chemical engineering, including technical and economic feasibility of processes, design and optimization of process equipment, and environmental and social constraints. Prerequisite: undergraduate chemical engineering course and admission to chemical engineering nonthesis master's program, or permission of instructor.

CH E 582 Advanced Topics in Process Control (3) Hilt, Ricker Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern control techniques, model-based control, discrete controller design, adaptive control, model-based control, an nonlinear control. Prerequisites: undergraduate control class and graduate standing.

CH E 590 Advanced Topics in Biomaterials (3) Major, controversial issues in application of synthetic materials, artificial organs, materials used in contact with body fluids, protein adsorption, coagulation, biodegradation, biocompatibility. Offered: odd years; Sp.
Civil Engineering

201 More

Civil engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities include all transportation modes: highways, aerospace, rivers, and harbors; water resources, hydraulics, and coastal engineering; structures, mechanics, and geotechnical engineering; surveying, mapping, and photogrammetry; urban planning and development; water supply, wastewater treatment, and water-quality management; solid- and hazardous-waste disposal; and quality control and management of the air resource.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and systems analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints.

To accommodate these wide interests, the department is organized into three academic programs: Structural and Geotechnical Engineering and Mechanics; Transportation, Surveying, and Construction Engineering; Environmental Engineering and Science.

Graduate Program

S. Kramer
Graduate Program Coordinator

The Department of Civil Engineering offers courses leading to the degrees of Master of Science in Civil Engineering and Doctor of Philosophy. The department also provides authorized options leading to the College-wide Master of Science and Master of Science in Engineering degrees.

The three master's programs are intended to accommodate the needs of three categories of students: M.S.C.E. for those who have completed an undergraduate degree in civil engineering and plan to continue with their professional training; the College-wide M.S.E. for other engineering graduates who wish to do graduate work in civil engineering; and the College-wide M.S. for whose Bachelor of Science degrees are not in engineering, but who desire to apply their training in science to the solution of problems in some specific sector related to civil engineering. The nonengineering may take additional course work to obtain an M.S.E. degree.

Graduate work is offered in most fields of civil engineering. To accommodate these wide areas of interest, the department is organized into three academic programs: Structural and Geotechnical Engineering and Mechanics; Transportation, Surveying, and Construction Engineering; and Environmental Engineering and Science.

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance; usually, at least a B, or 3.00 GPA in the junior and senior years is required. Consideration is also given to the Graduate Record Examination scores and other information.

Degree Requirements

The requirement for the master's degree is a minimum of 30 credits, of which 30 must be in formal course work and 9 in thesis. A nonthesis program is available, requiring a minimum of 45 credits, of which at least 3 credits will be an individual study with the advisory committee chairperson. The Environmental Engineering and Science Program requires 45 credits for both the thesis and nonthesis degree. For all master's degrees, at least 3 credits must be from outside the major field of study.

Students working for the Ph.D. degree must complete an approved program of studies and research normally requiring an additional two to three years beyond the master's degree.

Financial Aid

Research and teaching assistantships are available on a competitive basis. The number of positions depends upon the current level of funding. Additionally, there are a limited number of fellowships, scholarships, and traineeships.

Research Facilities

More Hall and Wilcox Hall have structural, concrete, and bituminous materials, soil mechanics, surveying and photogrammetry, composite structural materials, solid-wastes, and air-quality laboratories as well as an air-monitoring station and equipment for fieldwork in the construction, water, air, and solid-waste programs. Facilities for experimental studies in hydraulics and civil engineering in flume mechanics are located in the Harris Hydraulics Laboratory.

Bogan, Richard H. * 1954; DSc, 1954, Massachusetts Institute of Technology; water and air resources, environmental engineering.

Brown, Colin B. * 1969; PhD, 1962, University of Minnesota; structural engineering and systems.

Burges, Stephen J. * 1970; PhD, 1970, Stanford University; surface and ground water hydrology, water resource systems analysis and design.

Carlson, Dale A. * 1955, (Emeritus); PhD, 1960, University of Wisconsin; water resources and solid-waste management.

Charlson, Robert J. * 1962, (Adjunct); PhD, 1964, University of Washington; atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction.

Clanton, Jack R. 1947, (Emeritus); MS, 1939, University of Pittsburgh; structural engineering.

Clough, G. Wayne 1993; PhD, 1969, University of California (Berkeley).

' Colcord, J. E. * 1949, (Emeritus); MSCE, 1949, University of Minnesota; surveying engineering.

Dunn, Walter L. 1954, (Emeritus); MPH, 1953, University of California (Berkeley); transportation planning.

Elia, Ziad * 1969, DSc, 1963, Massachusetts Institute of Technology; engineering mechanics.

Evans, Roger U. * 1966, (Emeritus); PhD, 1965, University of California (Berkeley); engineering mechanics, structural engineering.

Ferguson, John F. * 1974; PhD, 1970, Stanford University; chemical and biological processes in water and waste treatment and in natural water systems.

Hammer, Vernon B. 1947, (Emeritus); MS, 1941, Harvard University; solid-waste management.

Hartz, Billy J. * 1955, (Emeritus); PhD, 1955, University of California (Berkeley); engineering mechanics, structural mechanics.

Undergraduate Program

Admission to the department is usually at the junior level. Enrollment in the department is limited; students who desire entrance must formally apply, and be accepted by the departmental admissions committee. The primary admission criterion is degree of qualification for probable success in the engineering degree program as evidenced by academic performance, work experience, and other factors. Specific courses required are: MATH 124, 125, 126, 308; CHEM 140; PHYS 121/311, 122/312, 5 credits of English composition; and CSE/ENGR 142, ENGR 210, 220, 230. Prospective students should obtain a copy of the departmental undergraduate and departmental application form, both of which are available in 201A More.

Bachelor of Science in Civil Engineering Degree

The minimum number of credits required for graduation with the Bachelor of Science in Civil Engineering degree is 120, of which 115 credits are the College of Engineering General Education and Engineering Fundamentals requirements as specified above. Upper-division requirements in civil engineering include a common core of specified courses taken in the junior year.

Graduate Program

S. Kramer
Graduate Program Coordinator

The Department of Civil Engineering offers courses leading to the degrees of Master of Science in Civil Engineering and Doctor of Philosophy. The department also provides authorized options leading to the College-wide Master of Science and Master of Science in Engineering degrees.

The three master's programs are intended to accommodate the needs of three categories of students: the M.S.C.E. for those who have completed an undergraduate degree in civil engineering and plan to continue with their professional training; the College-wide M.S.E. for other engineering graduates who wish to do graduate work in civil engineering; and the College-wide M.S. for whose Bachelor of Science degrees are not in engineering, but who desire to apply their training in science to the solution of problems in some specific sector related to civil engineering. The nonengineering may take additional course work to obtain an M.S.E. degree.

Graduate work is offered in most fields of civil engineering. To accommodate these wide areas of interest, the department is organized into three academic programs: Structural and Geotechnical Engineering and Mechanics; Transportation, Surveying, and Construction Engineering; and Environmental Engineering and Science.

Civil Engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities include all transportation modes: highways, aerospace, rivers, and harbors; water resources, hydraulics, and coastal engineering; structures, mechanics, and geotechnical engineering; surveying, mapping, and photogrammetry; urban planning and development; water supply, wastewater treatment, and water-quality management; solid- and hazardous-waste disposal; and quality control and management of the air resource.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and systems analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints.

To accommodate these wide interests, the department is organized into three academic programs: Structural and Geotechnical Engineering and Mechanics; Transportation, Surveying, and Construction Engineering; Environmental Engineering and Science.
Associate Professors
Bentil, Kwaku K. * 1991; (Adjunct); PhD, 1990, University of Florida; project management, construction safety, construction practice, estimating.
Chenoweth, Harry H. 1946, (Emeritus); MSCE, 1957, University of Washington; engineering mechanics and hydraulic engineering.
Covert, David S. * 1975; (Adjunct Research); PhD, 1974, University of Washington; atmospheric chemistry, aerosol physics and instrumentation.
Cundy, Terrace W. * 1983; (Adjunct); PhD, 1983, Utah State University; hillside hydrology and watershed management.
Goebbl, Steven M. 1982; (Adjunct); JD, 1977, Golden Gate University; construction accounting, labor relations, and construction law.
Harrison, Halstead * 1971; (Adjunct); PhD, 1960, Stanford University; atmospheric chemistry.
Homer, Richard R. * 1981; (Research); PhD, 1978, University of Washington; wetlands, contamination, and storm water management.
Janssen, Donald J. * 1965; PhD, 1965, University of Illinois; construction materials, pavements.
Kent, Joseph C. * 1952; (Emeritus); PhD, 1952, University of California (Berkeley); hydraulic engineering.
Kramer, Steven 1984; PhD, 1984, University of California (Berkeley); soil mechanics, foundation engineering, geotechnical earthquake engineering.
Massmann, Joel W. 1991; PhD, 1987, University of British Columbia (Canada); groundwater hydrology, subsurface contaminant transport, site remediation, applied decision analysis.
Miller, Gregory * 1983; PhD, 1984, Northwestern University; structural materials, solid mechanics, nonlinear dynamics.
Miller, William * 1951; (Emeritus); MSCE, 1952, University of Washington; materials.
Morgan, Michael S. * 1974; (Adjunct); DSc, 1972, Massachusetts Institute of Technology; applied respiratory, physiological and inhalation toxicology.
Oengerth, Jerry E. * 1984; (Adjunct); PhD, 1973, University of Michigan; public water supply, solid waste and water quality management; wastewater pathogens.
Reed, Dorothy * 1983; PhD, 1980, Princeton University; structural and wind engineering, and expert systems.
Rutherford, G. Scott * 1981; PhD, 1974, Northwestern University; transportation planning and engineering.
Spyridakis, Dimitris * 1970; PhD, 1965, University of Wisconsin; soils and water chemistry.
Strand, Stuart E. * 1982; (Adjunct Research); PhD, 1982, Pennsylvania State University; forest biotechnology, environmental pollution control.
Staussler, Howard * 1955; (Emeritus); MSEng, 1950, Johns Hopkins University; hydraulic engineering.
Taylor, Teresa * 1992; PhD, 1988, Washington State University; geotechnical/geologicaengineering, physical modeling, centrifuge modeling.
Turkyilch, George * 1991; PhD, 1990, Carnegie-Mellon University; computer-aided engineering; finite element modeling.

Senior Lecturer
Bucknam, Ronald E. 1985; PhD, 1964, University of Illinois.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
Core Courses
CIVE 250 Environmental Pollution: Assessing Problems and Solutions (5) NW, GSR Welch Problems in air, water, land environment caused by increasing demands on resources; their definition, control or prospects for control from engineering viewpoint. Ecological cycles, quality/quantity of wastes, biological effects of pollutants, energy, legislation and policy. Offered: jointly with ENV S 250; Sp.

CIVE 305 Construction Engineering I (3) Hinze Introduction to construction engineering, planning, scheduling, methods, contracts, and specifications. Production estimates; equipment selection; ownership and operating costs; role of the engineer in construction and cost estimating. Prerequisite: Civil Engineering student or permission of instructor or advisor. Offered: WSp.

CIVE 316 Surveying Engineering (4) Veress Application of geodesy to engineering surveys. Modern measurement and mapping techniques. Computer adjustment of measurements and analysis of error. Plane coordinate systems and transformation, horizontal and vertical curve computations and layout. Leveling and datum considerations. Introduction to photogrammetry, cadastral surveys, and construction surveys. Prerequisites: Civil Engineering student or permission of instructor or advisor, CSSE/ENGR 142, and linear algebra. Recommended: statistics. Offered: ASp.

CIVE 320 Transportation Engineering I (3) Manering Review of operating characteristics of vehicles and methods used to predict traffic demand and capacity supply. Study of basic geometric fundamentals and their relationship to design with emphasis on highways, and management of transportation systems. Prerequisite: Civil Engineering student or permission of instructor or advisor, CSSE/ENGR 316 which may be taken concurrently. Offered: AW.

CIVE 345 Hydraulic Engineering (4) Massmann, Nece, Yeh Extension and application of fluid mechanics principles to hydraulic engineering problems. Open channel flow, pipeline systems, turbomachinery, unsteady flow in pipes, diffusion and mixing processes, groundwater, surface water hydraulics. Prerequisites: Civil Engineering student or permission of instructor or advisor. Offered: Amplified.

CIVE 350 Environmental Engineering-Water and Air Quality (4) Benjamin, Ferguson, Spyridakis Description of water and air resources and parameters that characterize their quality, how their use alters their properties. Emphasis on effects of civil engineering projects; significance to engineer/scientist and society. Laboratory sessions subject-quality analysis techniques and significance. Prerequisite: Civil Engineering student or permission of instructor or advisor. Offered: AW.
CIVE 351 Water Supply and Waste Management
(3) Banjari, Stensel Fundamentals of water supply: surface- and ground-water sources, design, and system design. Municipal sewerage systems: wastewater quantity and quality, and fundamentals of engineering design for collection, treatment, and disposal. Solid wastes: collection, management, and disposal. Prerequisites: Civil Engineering student or permission of instructor or adviser. 345 which may be taken concurrently, and 350. Offered: WSp.

CIVE 363 Constructural Materials (4) Mahoney, Miller General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, concrete, wood. Laboratory testing, instrumentation, and investigation into macrobehavior. Correlation with microstructure and various aspects of materials science. Prerequisites: Civil Engineering student or permission of instructor or adviser and ENGR 220. Offered: Asp.

CIVE 366 Basic Soil Mechanics (4) Banerjee, Holtz Introduction to basic soil properties, soil classification, volumetric relationships, compaction, consolidation, soil rheology, shear strength, bearing capacity, and retaining structures. Prerequisites: Civil Engineering student or permission of instructor or adviser and ENGR 220. Offered: WSp.

CIVE 379 Elementary Structures I (3) Elias Review of engineering theory of beams, combined stresses, beam deflections, indeterminate beams, principle of virtual work, application to beams, unrestrained bending, shear center, torsion of open and thin-walled sections, composite beams, inelastic bending of beams, elastic stability, beam-columns, column design formulas. Prerequisites: Civil Engineering student or permission of instructor or adviser and ENGR 220. Offered: Asp.

CIVE 380 Elementary Structures II (3) Elias Classification and idealization of structures. Theorem of virtual work. Unit load method for beams, frames, and trusses. Matrix formulation of theorem of virtual work. Force method for statically determinate and indeterminate method. Moment distribution for beams and frames including sway analysis. Prerequisites: Civil Engineering student or permission of instructor or adviser and 379. Offered: AW.

CIVE 390 Civil Engineering Systems (3) Mar, Nihan, Palmer Introduction to civil engineering system processes. Decision methods, economic considerations, and optimization. Examples illustrating quantitative and subjective aspects of civil engineering practice. Prerequisite: Civil Engineering student or permission of instructor or adviser. 390. Offered: WSp.

CIVE 400 Computer-Aided Design (3) Schneider Review and evaluation of computer-aided design hardware, software, and applications in civil engineering. Use of interactive graphic software to solve complex, multiojective problems. Prerequisite: CIVE 220. Recommended: ENGR 123 or equivalent. Offered: A.

CIVE 405 Construction Planning and Scheduling (3) Hinze Principles of construction planning and scheduling, including network analysis of construction activities, examination of arrow and precedence diagrams, time-cost tradeoffs, resource leveling, resource allocation, PERT, integrated cost/schedule systems, computer applications, and a CPM project. Offered: W.

CIVE 406 Construction Engineering II (3) Hinze Heavy construction equipment. Equipment economy, contractor equipment policies, equipment specification, selection and performance of equipment, estimating productivity of construction equipment, and engineering support for construction operating. Prerequisite: 390 or permission of instructor. Offered: A.

CIVE 407 Contracts and Specifications (3) Hinze Construction practice, forms of organizations, real property, and bidding procedures and contract negotiation. Basic elements of contracts, types of specifications, general conditions of standard construction contracts, legal disputes related to construction contract provisions, surety bonds and insurance. Prerequisite: 306 or permission of instructor. Offered: Asp.

CIVE 410 Traffic Engineering Fundamentals and Surveys (3) Nihan General review of the fundamentals of traffic engineering, including their relationship to transportation operations management and planning, with special emphasis on traffic engineering field surveys and data analysis. Prerequisite: 350 or permission of instructor. Offered: W.

CIVE 411 Highway and Traffic Engineering-Geometric Design (3-5) Manning Factors and elements in geometric design of arterials, intersections, freeways, interchanges, including problem solution. Prerequisites: senior standing in Civil Engineering and 320. Offered: W.

CIVE 412 Traffic Flow Theory (3) Manning Introduction to traffic flow theory, characteristics. Measurement, statistical representation of traffic characteristics. Speed-flow-concentration models and relationship to level of service, highway capacity. Application of queuing theory to traffic events; introduction to traffic flow simulation. Prerequisites: senior standing in Civil Engineering and 320. Offered: W.

CIVE 413 Transportation Technologies and Systems (3) Schneider Review and evaluation of conventional and innovative vehicle systems, fuel types, command and control systems, and information systems. Technology forecasting and assessment techniques. Alternative futures for the role of transportation system in society. Prerequisite: 320 or permission of instructor.

CIVE 416 Urban Transportation Planning and Design (3) Nihan, Rutherford Brief review of major issues in urban transportation planning. Planning process discussed and transportation models introduced. City planning techniques and development of urban structures. Prerequisites: senior standing and 320 or graduate standing and permission of instructor. Offered: A.

CIVE 417 Urban Transportation Demand Forecasting (3) Nihan, Rutherford The urban transportation planning process and its traditional travel demand modeling components, including trip generation, trip distribution, mode choice, and route assignment techniques. Quick response method, sketch planning, and other alternatives to the conventional modeling process. Prerequisites: senior standing and 390.

CIVE 418 Computer-Aided Planning of Urban Systems (3) Schneider Survey of on-line planning applications, use of various on-line systems to solve urban systems design problems: investigations of hardware/software tradeoffs, human factors in man-computer systems design theory as it relates to problem-solving activity. Prerequisite: 390 or permission of instructor. Offered: jointly with URBDP 425; W.

CIVE 421 Pavement Design (3) Janssen, Mahoney Current and developing procedures for the structural design of pavements, design of base and subbase materials and concrete pavements for highways, airports, and special heavy loading. Elastic layered systems, slab theory. Performance evaluation for maintenance and overlay design. Prerequisite: senior or graduate standing in Civil Engineering. Offered: Asp.

CIVE 422 Construction Materials II (4) Janssen Types, sources, uses, performance behavior from construction point of view of aggregates, asphalt products and other bituminous materials. Portland cement and other hydraulic materials. Prerequisites: 306 or permission of instructor. Offered: W.

CIVE 423 Heritage of Civil Engineering (3-4) Colcord Contribution of civil engineering legislation based on the lives and projects of prominent engineers and cultures. Incidents and individuals from prehistory to the twentieth century give the student an awareness of the profession and its influence on society. Industrial archaeology and historic sites are considered. An additional 1 credit may be earned by participating in a special project. Emphasis on the control of elements and the methodology, planning, objectives, and decisions for the project. May be used as social science distribution. Prerequisite: junior standing. Offered: W.

CIVE 425 Photogrammetry and Remote Sensing (3-4) Veress Geometrical characteristics of images and imaging systems. Image acquisition, stereoscopic theory and image measurement. Control design and photographic instrumentation, the role of stereo imaging, the potential for photogrammetry and remote sensing applications. Image analysis and target signatures and abstractions for visual, thermal, and radar systems. Photogrammetry and RS applications in engineering site analysis and evaluation. Prerequisite: 316 or permission of instructor. Offered: A.

CIVE 426 Boundary Surveys and Plat Design (3) Veress System of public lands. Boundary and riparian law and case discussion. Survey record research, recordation, surveying and cost considerations. Site and subdivision planning and design. GIS and multipurpose cadastre ownership and infrastructure inputs. Prerequisite: 316 or permission of instructor.

CIVE 427 Construction Survey Control (3) Jahan Surveying specifications, instrumentation and calibration, infrastructure design and layout considerations; curves, sewer, building and slope staking. Project control and monitoring, As built surveys. Prerequisites: 306 and 316 or equivalent or permission of instructor. Offered: Sp.

CIVE 430 Issues in Professional Engineering Practice (3) & Bucknam Professional practice issues encountered in engineering firms and agencies, including professionalism, marketing services, proposal and design contract preparation, effective team communications, basics of total quality management, applied engineering ethics with case histories, loss prevention, limitation of liability, alternate dispute resolution methods. Prerequisite: senior or graduate standing or permission of instructor. Offered: ASp.

CIVE 431 Geologic and Earthquake Engineering (3) NW Reed, Roeder, Stanton Presents an overview of earthquake processes and details of the characteristics of destructive ground motion; illustrates the effects of such motion on engineering structures; reviews current practices in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: MATH 307 or permission of instructor. Offered: jointly with GPHYS 431; W.

CIVE 437 Engineering Geology (3) Taylor General overview of engineering geology and its importance to civil engineers. Topics include geologic pro-
cesses, hazards, and classification of geologic materials, data synthesis, and natural construction materials. Prerequisite: GEOL 205 or equivalent. Offered: A.

CIVE 441 Advanced Structures I (3) Elass, Reed, Roeder. The displacement, analysis, and simulation of structures. Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, and beams. Recommended: 442 and 443. Offered: A.

CIVE 442 Advanced Structures II (3) Miller, Roeder, Stanton. Introduction to instability, including a consideration of elastic and inelastic buckling with application to design of columns and plates. Introduction to plastic analysis. Prerequisite: 379. Offered: W.

CIVE 451 Design of Metal Structures (3) Miller, Roeder, Stanton. Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, frames, connections, and tension members. Prerequisite: 381. Recommended: 441 and 442. Offered: A.

CIVE 452 Design of Reinforced Concrete Structures (3) Eberhard, Mattoc, Stanton. Fundamentals of design and analysis of reinforced concrete in accordance with current codes and practices. Prerequisite: 381. Offered: A.

CIVE 453 Prestressed Concrete Design (3) Mattoc, Stanton. Analysis, design, and construction of prestressed concrete structures. Prerequisite: 452 or graduate standing. Offered: W.

CIVE 454 Design of Timber Structures (3) Eberhard, Miller. The design and construction of timber structures, using elements made of sawn wood, glued-laminated wood, and plywood. Prerequisite: 381. Offered: W.

CIVE 455 Structural Unit Masonry (3) Eberhard, Miller. Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: 381 or permission of instructor. Offered: jointly with ARCH 428. Sp.

CIVE 456 Design Project (3) Offered: jointly with ARCH 428. W.

CIVE 461 Biological Problems in Water Pollution (3/Sr) NE. Ecological risk assessment of toxic chemicals and problems associated with electrical power production. Consider safety and toxicity and effects on individuals, populations, and communities. Laboratory covers simulation models of chemical exposure and community effects. Prerequisite: senior or graduate standing in Fisheries, Engineering, or related field. Offered: jointly with FISH 430. W.

CIVE 465 Design of Subsurface Remediation Activities (3) Massmann Technologies for cleaning sites with subsurface contamination are presented. These techniques involve groundwater extraction, vapor extraction, groundwater containment, and in-situ treatment. Analytical tools and methods for designing use of instructors. Prerequisite: 464 or permission of instructor. Offered: M.

CIVE 472 Introduction to Hydraulic Design for Water Resources (3) Massmann Physics of water movements in natural freshwaters, streams, lakes, and surface waters. Prerequisite: senior or graduate standing and permission of instructor. Offered: M.

CIVE 473 Coastal Engineering I (3) Pearson Linear theory of water waves, wave transformations and boundary conditions, sediment motion, sample theory. Applications illustrated by laboratory experiments and selected case histories. Prerequisite: 342. Offered: A.

CIVE 474 Computational Hydraulic (3) Pearson Introduction to unsteady hydraulic problems in open channels and pressure conduits; their solutions by numerical techniques. Existing models used to analyze problems in hydraulic flood routing, tidal river hydraulic, and sediment transport in river and coastal phenomena. Practical applications emphasized. Prerequisite: senior standing in Civil Engineering, 345, and MATH 307. Offered: W.

CIVE 475 Analytical Techniques for Groundwater Flow (3) Nece Development of appropriate equations to describe saturated groundwater flow, and application of numerical methods for solving groundwater flow problems and flow in wells. Participants required to develop solutions to problems using numerical techniques developed during the course. Prerequisite: 342 or equivalent. Offered: W.

CIVE 476 Physical Hydrology (3) Burton Global water picture, data sources and data homogeneity, precipitation, evapotranspiration, hydrographs, hydrologic data frequency analysis. Hydrologic design: flood mitigation, drainage, introduction to deterministic and stochastic models. Prerequisite: senior standing in Civil Engineering or permission of instructor. Offered: A.

CIVE 478 Water Resources and Hydraulic Engineering Design (3) Nece, Yeh Opportunity to effect design solutions for projects or major project components in areas of water resources engineering or hydraulic and coastal engineering. Problems include programming, multiple- or single-purpose reservoirs, hydraulic structures, and coastal facilities. Prerequisite: senior standing in Civil Engineering or permission of instructor. Offered: A.

CIVE 480 Air-Quality Modeling (3) Larson Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Topics include meteorological dispersion models and various "receptor" models based on chemical "fingerprinting" of emissions. Emphasizes current problems. Prerequisite: 490 or ATM S/ENV S/CHEM 458 or permission of instructor. Offered: jointly with ATM S 480. Sp.

CIVE 481 Environmental Engineering Design (3) Nece, Yeh Introduction to the theory and the practice of planning and design of urban water supply, sewerage, solid wastes, and drainage collection systems. Evaluation of service areas and service requirements and their relationship to urban and regional planning activities. Introduction to computer programs for designing basic system elements. Prerequisite: 351. Offered: AW.

CIVE 482 Water and Wastewater Treatment (3) Nece, Yeh Objectives of water and wastewater treatment; associated physical, chemical, and biological phenomena; design of common treatment systems. Prerequisite: 351 or permission of instructor. Offered: W.

CIVE 483 Environmental Engineering Design Studies (3) Nece, Yeh Individual and group design studies involving environmental engineering and water and wastewater treatment facilities. Topics include proposal preparation, engineering reports, alternative evaluations, process equipment design, and environmental engineering projects. Presentation of engineering reports on selected design problems. Prerequisites: 351 and 345. Offered: Sp.

CIVE 484 On-Site Wastewater Disposal (3) Smith, Pilkington Latest information on design, construction, operation, maintenance of individual and small community wastewater disposal systems. Conventional wastewater carriage septic tank soil absorption systems considered with new alternatives, such as mounds, evaporation ponds, anaerobic filters, pressure drainfields, and filters. Nonwater carriage methods studied. Pressure and vacuum sewers. Prerequisite: senior standing. Offered: Sp.

CIVE 485 Aquatic Chemistry (3) Benjamin, Ferguson, Spirydakos Principles of chemical equilibrium relevant to natural water systems; the nature and effect of chemical interactions of domestic and industrial waste effluents on natural water systems; chemical principles involved in the treatment of water and wastewater. Prerequisite: one year of general chemistry or equivalent. Offered: A.

CIVE 486 Water-Quality Analysis (3) Spirydakos Laboratory evaluation of chemical quality of natural and wastewater. Theory and application of instrumentation used in water-quality measurement. Prerequisite: senior or graduate standing. Offered: W.

CIVE 487 Solid-Waste Disposal (3) Nece, Yeh Describes sources and handling of municipal and industrial solid wastes; with examination of collection, processing, recycling and recovery, and disposal alternatives, including incineration, carbon accumulation, and landfill design and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: 351 or permission of instructor. Offered: A.

CIVE 488 Hazardous Wastes Engineering (3) Sin Martini, Larson, Pilat Classification of hazardous wastes; resource conservation, recovery and regulations; characteristics and behavior of toxic organics; superfund; groundwater contamination, solutions. Hazardous waste site remedial action; case histories; sampling; landfill design. Stabilization and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: 351 or permission of instructor. Offered: A.

CIVE 489 Water and Air Quality Sampling (3) Larson, Spirydakos, Welch Samples collected from lakes, streams, precipitation, and air and resulting sampling and data reduction. Prerequisite: 488 and statistical inference design for water and air quality monitoring programs. Prerequisite: 482 or permission of instructor. Offered: A.

CIVE 490 Air-Pollution Control (3) Larson, Pilat Fundamental concepts of air pollution. Emission sources, atmospheric dispersion, ambient concentration, and effects of emissions, air quality standards, air-quality standards, processes and equipment for controlling emissions. Prerequisite: senior standing. Offered: jointly with ENFH 491; A.
CIVE 491 Deterministic Systems (3) Mar, Palmer
Development of quantitative methods for mathematical problem solving with emphasis on computer applications. Linear programming, mathematics of the simplex algorithm, sensitivity analysis, dynamic programming, systems simulation, and goal programming. Class project required. Prerequisite: 390 or equivalent or permission of instructor. Offered: A.

CIVE 492 Stochastic Systems (3) Mar, Palmer
Introduction to probability distributions and statistics useful in systems analysis, conditional distributions, queuing theory and applications, Monte Carlo simulation, chance-constrained mathematical programming, and stochastic dynamic programming. Emphasis on application of the techniques to civil engineering systems problems, including transportation, water resources, and structures. Prerequisite: 491 or permission of instructor. Offered: W.

CIVE 493 Air-Pollution Source Testing and Equipment Evaluation (3) Larson, Pilat
Engineering evaluation of air pollutant sources and air control equipment. Air-pollutant source testing and stack sampling. Analysis of equif ormance and source emissions in the field and in the laboratory. Prerequisite: senior standing or permission of instructor. Offered: Sp.

CIVE 494 Air-Pollution Control Equipment Design (3) Pilat
Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Prerequisite: senior standing or permission of instructor. Offered: jointly with CH E&M 486; W.

CIVE 498 Special Topics (1-5)
Special topics in civil engineering offered as course with lecture and/or laboratory. Maximum of 6 credits in combination of 498 and 499 may be attempted toward an undergraduate degree. Prerequisites: senior standing in Civil Engineering and permission of instructor. Offered: AWSpS.

CIVE 499 Special Projects (1-5)
Individual undergraduate research projects. Maximum of 6 credits in combination of 498 and 499 may be attempted toward an undergraduate degree. Prerequisites: any 400-level course, which may be taken concurrently, and permission of instructor. Offered: AWSpS.

Courses for Graduates Only
CIVE 700 Master's Thesis (*) Prerequisite: permission of adviser. Offered: AWSpS.

CIVE 800 Doctoral Dissertation (*) Prerequisite: permission of adviser. Offered: AWSpS.

Transportation, Surveying, and Construction Engineering
CETS 505 Construction Labor Relations: Law and Policy (3) Goldblatt
In-depth study of construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Examines importance of labor relations in construction firms, whether in a union setting or an open shop environment. Offered: W.

CETS 506 Design of Temporary Structures in Construction (3) Hinze
Fundamental criteria to be considered in the design of various temporary structures in construction. Temporary structures include rock crushing and screening systems, concrete forms, cellular fill cofferdams, braced cofferdams, and computer-aided design approaches. Prerequisites: 406 which may be taken concurrently. CIVE 390 or equivalent, or permission of instructor. Offered: W.

CETS 508 Construction Administration (3) Hinze
Conceptual estimating and detailed estimating. Estimating as it applies to labor, materials, equipment, and overhead cost control for construction operations. Quality control. Accounting and taxation in construction. Managing project security, subcontractors, submittals, change orders, correspondence, testing, and start-up. Offered: A.

CETS 509 Construction Productivity (3) Hinze
Work improvement techniques applied to construction operations. Review of major contributions in behavioral science that may be applied to the construction industry. Case studies. Innovative productivity program development, design of construction projects. Safety on construction projects, especially as influenced by managerial practices. Offered: A.

CETS 511 Traffic Systems Operations (3) Nihan
Operational planning, management of arterial and freeway traffic systems. Review of transportation system management strategies to achieve more efficient use of existing infrastructure, including improved and innovative traffic control systems and demand management policies, measures of effectiveness, impact assessment, traveler response. Introduction to use of relevant computer models and packages. Offered: Sp.

CETS 513 Survey Adjustment and Analysis (4) Veress
Concepts and practical situations. Least square analysis and inversion of observations. Applications of digital surveying to survey design systems. Survey equipment and computer applications in construction. Prerequisite: permission of instructor. Offered: A.

CETS 514 Engineering and Industrial Photogrammetry (4) Veress
Metric and nonmetric cameras. Mathematical analysis of close range photogrammetry. Applications of deformation monitoring, industrial quality control. Analytical instruments and measurements. Aerial photograhic model geometry. Design of photogrammetric projects for engineering applications such as highways, dams, and environmental site mapping. Prerequisite: 425. Offered: W.

CETS 518 Photo Geodesy and Digital Mapping (4) Veress

CETS 520 Seminar (1, max. 6) Prerequisite: permission of thesis supervisor. Offered: AW.

CETS 526 Portland Cement Concrete Laboratory (4) Jansen
Examination of the strength, stiffness, and durability properties of conventional and high-performance concretes. Characteristics of aircraft, air traffic control, and results of analysis. How to use computer-aided design techniques for structural design of projects. Offered: jointly with GEOG/URBDP 529.

CETS 530 Urban Region Geocoding and Land-Based Information Systems (3) Multipurpose street network and land-based information systems. The United States Census geocoding system, automated map overlay systems, and cadastral file information use. Applications to land surveying, urban and transportation planning, and geographic analysis. Offered: jointly with GEOQ/URBDP 529.

CETS 532 Satellite Geodesy (4) Reference frames. Keplerian and Cartesian orbital elements. Satellite orbit dynamics. Long-arc and short-arc orbit determination. Use of satellite systems for geocoding, location of positions and of the earth's gravity field. Applications of the NAVSTAR GPS and TRANSIT satellite systems in surveying and navigation. Prerequisite: graduate standing or permission of instructor.

CETS 541 Transit Systems Planning (3) Rutherford
Planning, operational methods for urban public transportation. Review of technological, operating characteristics of vehicles and systems; financing, management, institutional aspects. Paratransit. Short-range planning, operational strategies, revenue-fare structures. Service monitoring. Mode choice, transit demand forecasting. Demand-responsive services. Computer-aided techniques for planning, design of transit systems. Prerequisite: graduate standing or permission of instructor. Offered: W.

CETS 543 Airport Engineering (3) Mahoney Definitions and terminology relating to airport engineering. Characteristics of aircraft, air traffic control, and results of analysis. How to use computer-aided design techniques for structural design of projects. Safety on construction projects, especially as influenced by managerial practices. Offered: A.

CETS 564 Soil and Site Improvement (3) Development, improvement, and utilization of marginal natural earth materials through compaction and stabilization using chemicals, Portland cement, lime, asphalt, salt, and others. Includes discussion, design, and evaluation of materials for pavement subgrades, slope protection, dust palliation, and general site improvement. Prerequisite: 422 or permission of instructor. Recommended: 421.

CETS 570 Land Use/Transportation Models (3) Schneider
Review of theoretical basis of several existing models used to forecast urban growth patterns and the associated land use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with URBDP 530; A.

CETS 571 Analytical Methods in Transportation (3) Nihan
Application of analytical and statistical methods to transportation planning problems. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

CETS 572 Transportation Data Collection and Analysis (3) Manning
Data collection methods, survey design and execution, sample design, and analysis of transportation data. Application of analytical and statistical methods to transportation planning and engineering. Preliminary planning, sampling methods, sources of errors, sample size, survey instruments, survey administration, data processing, Analysis of variance, experimental design. Illustrative examples drawn from various branches of transportation planning and engineering. Prerequisite: graduate standing or permission of instructor. Offered: W.

CETS 573 Transportation Systems Evaluation (3) Nihan
Application of analytical and statistical methods to transportation systems evaluation. Estimation of capital, operating/direct user costs, benefit/cost concepts, impact identification, forecasting, assessment of feasibility, and profitability. Methods for improving decision-making process. Prerequisites: graduate standing or permission of instructor.

CETS 574 Advanced Travel Demand Theory and Applications (3) Rutherford
New methods for estimating and forecasting travel demand. Individual as economic, psychological decision-making unit. Theoretical background to model mobility, model specification, attitudinal measurement, empirical estimation, market segmentation, aggregation issues, model transferability, parameter updating. Practical applications and directions of present and future research. Prerequisite: graduate standing or permission of instructor. Offered: A.

CETS 599 Special Topics: Transportation, Construction, and Geometronics (2.5, max. 15) Prerequisite: permission of instructor. Offered: AWSpS.
CETS 600 Independent Study or Research (*) Prerequisite: permission of adviser. Offered: ASpS.

Structural and Geotechnical Engineering and Mechanics

CSEM 504 Finite Element Methods in Structural Mechanics (3) Elias Extension of the matrix methods of structural analysis to the solution of elasticity, plate, and shell problems by use of finite element approximations. Discussion of convergence and bounding and extension to investigation of stability and finite deformations. Prerequisite: 501 or permission of instructor. Offered: W.

CSEM 511 Advanced Reinforced Concrete Design (3) Eberhard, Mattock, Stanton Behavior and design of reinforced concrete members and structures. Members subject to torsion and torsion combined with flexure and shear; members with small shear span-depth ratios, slabs. Offered: A.

CSEM 512 Advanced Prestressed Concrete Design (3) Eberhard, Mattock, Stanton Prestress loss. Design of statically determinate prestressed concrete beams, frames, and slab structures (cast in place or assembled from precast units). Prerequisite: 453 or equivalent. Offered: Sp.

CSEM 513 Advanced Steel Design (3) Roeder Factors influencing strength and serviceability of steel structures; LRFD limit state design procedures. Use of theories of plasticity and stability in development of design methods and specifications, bolted and welded connections, temperature effects, and effect of different fabrication methods on behavior of structure. Prerequisites: 501, 503. Offered: W.

CSEM 514 Design for Earthquakes I (3) Roeder, Stanton Linear elastic analysis for prediction of structural behavior in earthquakes. Ground-shaking and earthquake mechanism. Factors affecting severity and frequency of shaking. Ductility and multilevel design approach. Response spectra and design codes such as UBC and ATC; and evaluation of rationale for these specifications. Design problem. Prerequisites: 501, 502. Offered: Sp.

CSEM 520 Seminar (1, max. 6) Required for doctoral students. Prerequisite: permission of thesis supervisor. Offered: AWSp.

CSEM 522 Continuum Mechanics II (3) Elias, Miller Development of classical and nonclassical constitutive theories relating to real materials. Applications in metals, concrete, ice, wood, rock, soils, and composites. Prerequisite: 521.

CSEM 523 Reliability and Design (3) Brown, Reed Introduction to theory of structural reliability and its application to design procedures in civil engineering, including probability theory; assessment of uncertainties; construction criteria; system propagation; collapse probabilities; and probabilities of damage.

CSEM 531 Special Structures (3, max. 6) Special topics such as shells; inflated structures, suspended structures, or other specialized forms of civil engineering structures.

CSEM 561 Seepage and Consolidation (3) Banerjee, Holtz, Kramer, Taylor. Seepage and consolidation equations; soil mechanics; piping and filtration; slope stability analysis of natural and man-made slopes. Prerequisite: CIVE 366 or equivalent. Offered: A.

CSEM 562 Shear Strength and Slope Stability (3) Banerjee, Holtz, Kramer, Taylor. Shear strength of cohesive and noncohesive soils; slope stability analysis of natural and man-made slopes. Prerequisite: 561. Offered: A.

CSEM 565 Soil Dynamics (3) Kramer Dynamics of discrete systems; dynamics of continuous systems, wave propagation; dynamic soil properties; linear, nonlinear, and equivalent linear analysis; vibrations of tunnels; construction vibrations; vibration isolation. Offered: W.

CSEM 566 Geotechnical Earthquake Engineering (3) Kramer Plate tectonics and elastic rebound theory of earthquakes and faults; characterization of ground motions; seismicity; seismic risk analysis; effect of local site conditions on ground response; development of design ground motions; liquefaction; dynamic lateral earth pressures; seismic slope stability. Prerequisite: 565 or permission of instructor. Offered: Sp.

CSEM 567 Advanced Geotechnical Laboratory (4) Holtz, Kramer, Taylor Soil and site investigation, classification and engineering properties of soils and rock as determined by standard and advanced test procedures and equipment. Evaluation of test data. Report writing. Prerequisite: CIVE 366 or equivalent. Offered: A.

CSEM 569 Foundation Soil Improvement (3) Holtz Analysis and design of physical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structure. Prerequisite: 563. Offered: every year; Sp.

CSEM 570 Engineering Geology II (3) Taylor Application of engineering geology fundamentals to location, design and maintenance of engineered structures; risk assessment related to local geological hazards. Case histories, governmental policy discussions, interpretation of geological maps for engineering purposes. Prerequisite: graduate standing and CIVE 306 or permission of instructor.

CSEM 599 Special Topics: Structures and Mechanics (0-5, max. 15) Prerequisites: permission of instructor. Offered: A/WSp.

CSEM 600 Independent Study or Research (*) Prerequisite: permission of adviser. Offered: A/WSp.

Environmental Engineering and Science

CEWA 518 Microbial Degradation of Toxic Contaminants (3) Herwig, Staley, Stensel, Strand Detailed survey of current understanding of microbiology and degradative pathways of industrial organic compounds, pesticides, polychlorinated biphenyls, and metals. Microbial requirements for bioremediation. Methods of scientific investigation of microbial transformations. Requires basic understanding of microbiology and organic chemistry. Prerequisite: biological science course. Offered: jointly with ESC/MICRO 518; Sp.

CEWA 520 Seminar (1, max. 6) Required of all graduate students in Environmental and Engineering Science each quarter. Credit/no credit only. Offered: AWSp.

CEWA 525 Seminar-Topics in Atmospheric Chemistry (1-3, max. 6) Charleson, Harrison Seminar for atmospheric scientists, chemists, engineers in problems associated with chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Faculty lectures, student participation. Prerequisite: ATM 301 or permission of instructor. Offered: jointly with ATM S 525.

CEWA 540 Hydrodynamics (4) Nece, Yeh Application of the equations of motion to the flow of ideal and real fluids. Fundamentals of fluid potential motion. Viscous flows; Navier-Stokes equations and some exact solutions. Boundary-layer theory. Introduction to turbulence. Two- and three-dimensional examples, including free surface flows. Applications of field equations to problems of engineering significance. Prerequisite: CIVE 342 or equivalent. Offered: A.

CEWA 541 Hydrodynamics in Water Quality (3) Nece Theoretical, field study, and laboratory model applications to dilute-flow problems of concern to water resources engineers. Prerequisite: CIVE 342 or permission of instructor. Offered: W.

beaches. Recommended: graduate-level course in fluid mechanics. Offered: jointly with AMATH 544; Sp.

CWEA 545 Advanced Computational Hydraulics (4) Yeh Review of hydrodynamic and transport equations for hydraulic engineering application; numerical solution methods; implementation and practice with existing computer programs and numerical models; numerical model calibration and verification techniques; case studies. Theoretical and civil engineering decision makers aspects. Prerequisites: 474, 540, 541 or permission of instructor. Offered: W.

CWEA 547 Advanced Hydrology (3) Burgess Detailed treatment of statistical methods used in hydrologic analysis. Stochastic hydrology, detailed examination and use of a deterministic watershed model (e.g., Stanford Watershed Model). Prerequisite: graduate standing in civil engineering or permission of instructor. Offered: W.

CWEA 548 Groundwater Transport Modeling (3) Massmann Review of equations for flow and transport in porous media; techniques for simulating transport as boundary value problems; analytical and numerical solution techniques; finite element models; field-scale applications and case histories. Offered: Sp.

CWEA 550 Microbiological Process Fundamentals (3) Ferguson, Stensel Fundamental concepts for microbial processes in wastewater treatment and non-aqueous chemical systems. Basic concepts in microbial structure, nomenclature, and environmental properties. Principles of microbial metabolism, study of specific types of bacteria important to environmental engineering and their metabolism and development of microbial kinetic equations including substrate utilization, energetics, and stoichiometry. Prerequisite: permission of instructor. Offered: A.

CWEA 551 Biological Treatment Systems (3) Stensel Basic reactions, design principles, models, and operational considerations for biological treatment systems in environmental engineering. Applications include activated sludge, bulking sludge control, fixed film reactors, nitrification, nitrogen removal, phosphorus removal, anaerobic treatment, and toxic organics removal. Prerequisite: 550. Offered: W.

CWEA 552 Physical-Chemical Treatment Processes (4) Benjamin Principles and design of major physical-chemical unit processes used in water, wastewater, and hazardous waste treatment. Processes include chemical and reactor kinetics, filtration, chemical coagulation, ion exchange, adsorption, and gas transfer. Development of mathematical models, laboratory demonstrations, and evaluation of current design practice. Prerequisite: 485 or permission of instructor. Offered: W.

CWEA 553 Topics in Ecological Effects of Wastewater (3) Welch Application of ecological concepts for analysis and interpretation of bioenvironmental problems and data (eutrophication, acid rain, and toxicity). Students participate in presentation and discussion of current research. Prerequisite: 462 or BIOL 473 or permission of instructor. Offered: Sp.

CWEA 554 Advanced Topics in Environmental Engineering, Chemistry, and Biology (3) Benjamin, Ferguson Special topics of current importance in environmental engineering. Application of fundamental chemical and biological principles to the study of such phenomena as the behavior of aqueous colloids, corrosion processes in lead bearing situations, complex chemically complex solutions, and acid precipitation. May be taken more than once for credit. Prerequisites: 550, 551. Offered: W.

CWEA 555 Lake Management (2) Welch Application of recognized techniques/approaches to restore and manage eutrophic lakes. Includes critiques of restoration practices. Credit/No Credit. Prerequisites: CIVE 462/FSH 434, BIOL 473, or permission of instructor. Offered: jointly with ENV S 555; A.

CWEA 556 Industrial Waste Treatment (3) Benjamin, Ferguson, Stensel Survey of laws and regulations governing industrial waste discharge. Sources, amounts, and characteristics of wastes from various industries. Specialized treatment processes, case studies, and site visits. Prerequisite: 550 or 551 or permission of instructor.

CWEA 557 Water Resources Management (3) Mar, Palmer Engineering, social, and economic factors involved in water resource development and management; water policy and administration; use relationships and conflicts; considerations for regional water resource systems. Offered: W.

CWEA 558 Water-Quality Management (3) Mar, Palmer Application of biological, ecological, and chemical processes to modeling of water quality and use of such models in appropriate management of water resource systems. Includes units on the modeling of temperature, BOD, nutrient, phytoplankton, zooplankton, and other processes in lakes, streams, and estuaries. Recommended: 476, 485, CIVE 462/FSH 434, and CIVE 491. Offered: Sp.

CWEA 559 Water Resources System Management (3) Burgess, Mar, Palmer A readings course in recent literature related to the management and treatment of water resources. Topics include drought management, expansion of existing water supplies, hydro-power production, streamflow forecasting, water demand forecasting, regional water planning, climate change, and other topical issues. Recommended: 557, 558. Offered: A.

CWEA 560 Topics in Environmental Health (3) Larson Introduction to human biology, including physiology, epidemiology, and toxicology. Study of contemporary environmental health problems and practices as they relate to radiological health, solid-waste disposal, occupational health, biometeorology, and bioengineering.

CWEA 563 Air Resources Management (3) Larson, Pilat Technical, administrative, and legal aspects of air pollution problems. Environmental engineering systems, air pollution control systems. Prerequisites: permission of instructor. Offered: jointly with CH E 566; every even year.

CWEA 566 Control of Gaseous Air Pollutants (3) Larson, Pilat Physical and chemical processes used to control gaseous air pollutants. Absorption into liquids. Aqueous sprays, dry adsorption, and adsorption beds. Control of sulfur oxides and nitrogen oxides. Case studies of control systems. Prerequisite: 468 or CHE 435 or permission of instructor. Offered: jointly with CH E 566; every even year.

CWEA 567 Control of Particulate Air Pollutants (3) Larson, Pilat Physical Processes used to control emissions of particulate air pollutants. Use of settling chambers, cyclones, fabric filters, wet scrubbers, and electrostatic precipitators to control aerosol particles. Case studies of control systems. Prerequisite: 468 or permission of instructor. Offered: jointly with CH E 567; odd years; A.

CWEA 577 Risk Assessment for Environmental Health Hazards (3) Faustman, Oomen Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Conceptual and philosophical underpinnings to risk characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with ENV/ENVSIPB AF 577; A.

CWEA 599 Special Topics: Water and Air Resources (2-5, max. 15) Prerequisite: permission of instructor. Offered: AWSPs.

CWEA 600 Independent Study or Research (*) Prerequisite: permission of adviser. Offered: AWSPs.

**Computer Science and Engineering**

114 Sieg

A Bachelor of Science in Computer Engineering degree is offered by the Department of Computer Science and Engineering, and is administered through the College of Engineering. The Department of Computer Science and Engineering also offers a Bachelor of Science degree in computer science administered through the College of Arts and Sciences. More information concerning the B.S. degree in computer science can be found under Computer Science in the College of Arts and Sciences section of this catalog.

Computer science is the study of information and algorithms within the context of real and abstract computing devices. Computer scientists are interested in such topics as the representation and storage of information, algorithms to access, display, edit, and transform information, programming languages to express algorithms, and hardware and software processors to execute algorithms. These concerns lead to practical developments in computer systems software and in application areas such as artificial intelligence, computer graphics, and database systems. Theoretical investigations of computers, algorithms, and data.

Computer engineering is a closely related field that concerns itself with the design and practical application of computer hardware and software systems to the solution of technological, economic, and societal problems. The computer engineer analyzes a problem and selects from a variety of tools those most appropriate for its solution. A computer engineer can expect to be involved in hardware design, software creation and systems integration. The program provides an in-depth education in computer engineering while retaining strong foundations in traditional electrical engineering and computer science. The computer engineering program involves digital hardware, software, and architecture. Mathematics, computer science, and engineering work, and communication skills development are emphasized. A course including a project must be completed during the senior year.

The computer science major is more appropriate for students who want to have a double major with another College of Arts and Sciences program (for example, mathematics or economics), who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who want more theory of computation. The computer engineering major is more appropriate for students who are interested in building systems that include both custom hardware and software components, who have strong interests in electrical engineering, or who specifically want an engineering degree.

**Instructional and Special Research Facilities**

The Computer Science Laboratory provides powerful, state-of-the-art facilities for undergraduate, graduate, and faculty use. The laboratory houses two primary laboratories for undergraduate instructional computing, containing approximately four dozen X-terminals, backed by three DECstation 5000 systems running UNIX. To support our hardware courses, the department operates a design laboratory consisting of sixteen Macintosh IIs and Tektronix logic analyzers, and other test equipment. General-purpose research computing is provided by roughly 100 DECstation, SPARCstation, and Alpha workstations, which are lo-

---

**Notes:**

- *AWSPs:* Available without space priority.
- *Students participate in presentation and discussion of current research.*
- *Current studies involve computer models, laboratory demonstrations, and evaluation of current design practice.*
- *Prerequisite: 485 or permission of instructor.* Offered: W.
Undergraduate Programs

Bachelor of Science Degree

See Computer Science in the College of Arts and Sciences section of this catalog.

Bachelor of Science in Computer Engineering Degree

114 Sieg

Because resources are limited, students must apply for admission to the computer engineering program. Application forms and a comprehensive booklet, The Computer Engineering Handbook for Undergraduates, can be obtained from the Undergraduate Advisor in 114 Sieg. To be considered for admission to the program the student must have completed 64 credits applicable to the degree, including MATH 124, 125, 126, 307; PHYS 121/131, 122/132, 123/133; CHEM 140, 141; CSE/ENGR 142; and at least 5 credits of English composition.

Graduation Requirements (in addition to the General Education requirements of the College of Engineering as specified above): (1) Engineering Fundamentals (24 credits) to include CSE 142. (2) Core Component (54 credits): CSE 321, 326, 341, 370, 378, 451, 471; E 233, 331, 332. (3) Computer Engineering Elective Component (22 credits): Selected from the approved list of computer engineering electives in the undergraduate handbook. To graduate, a student must earn a total of 192 credits with a grade of at least 2.0 in all required or elective computer engineering courses taken. The engineering design credits must total at least 26, while the engineering science credits must total at least 50. For a complete description of the current requirements, please consult the undergraduate handbook.

Graduate Program

Alan Shaw, Graduate Program Coordinator

The Department of Computer Science and Engineering offers programs of study leading to the degrees of Master of Science and Doctor of Philosophy. Individual programs can be designed to provide considerable breadth of knowledge, as well as depth in an area of specialization. An M.S. degree can usually be completed in one to two years, and a Ph.D. degree can be completed in four to five years. It is not necessary to complete an M.S. program before entering the Ph.D. program. Degree requirements are outlined in The Computer Science and Engineering Graduate Program Brochure, available from the department.

The department has thirty-two faculty members with appointments in Computer Science and Engineering and twenty-three adjunct, affiliate, and emeritus faculty members. Research opportunities exist for graduate students in the following ongoing projects and in other areas: VLSI, computer-aided design, computer architecture, operating systems, networks, programming environments, parallel and distributed computing, programming languages, compilers, performance analysis, artificial intelligence, image analysis, computer graphics, computer vision, computational complexity, analysis of algorithms, and biomedical computing.

Application Requirements

Most entering graduate students are expected to have a solid background in computer science, including programming, machine organization, data structures, discrete mathematics, automata theory, and programming systems (e.g., the equivalent of 376, 326, 351, 322, and either 401 or 451). Some exceptions to these requirements are made for otherwise-promising students. Graduate Record Examination scores are required; GRE subject test score (not necessarily in computer science) is recommended. Scores should be earned within the preceding five years. The Computer Science and Engineering Graduate Program Brochure gives full details of application procedures.

Complete applications must be received by January 10 for autumn quarter admission.

Assistantships

Some research assistantships are available in the Computer Science Laboratory and through research grants. Teaching assistantships are also available. In general, this support is allocated on the basis of scholastic excellence and potential. Students who are applying for assistantships to start in autumn quarter should have all applications to the Graduate School and the department completed by January 10.

The application packet contains all the necessary forms for applying to the Graduate School and to the Graduate Program in Computer Science and Engineering and for consideration for assistantships.

Faculty

Chairperson

Edward D. Lazowska

Professors

Baer, Jean-Loup • 1969; PhD, 1969, University of California (Los Angeles); parallel processing, computer system architecture, data structures.

Borning, Alan H. • 1983; PhD, 1979, Stanford University; programming languages and environments, user interfaces, computers and society.

Goldfrab, Helmut • 1959; Emeritus; PhD, 1959, Stanford University; programming languages, programming systems, compilers.

Haralick, Robert M. • 1986, (Adjunct); PhD, 1989, University of Kansas; computer vision, artificial intelligence, pattern recognition, image processing.

Holden, Alistair D. • 1968; PhD, 1964, University of Washington; computer engineering, speech recognition, computer-aided design, artificial intelligence.

Hunt, Earl B. • 1966, (Adjunct); PhD, 1960, Yale University; human and artificial intelligence, computer applications in teaching.

Kalnins, Gretchen • 1990, (Adjunct); PhD, 1982, Massachusetts Institute of Technology; crystallographic and chemical sciences.

Kephart, Theodore • 1963; PhD, 1961, University of Wisconsin; computer application in physiology.

Kim, Yongmin • 1982, (Adjunct); PhD, 1982, University of Wisconsin; computer architecture, imaging systems, computer graphics, multimedia, modeling and instrumentation.

Klee, Victor • 1953, (Adjunct); PhD, 1949, University of Washington; convex sets, functional analysis, analysis of algorithms, optimization, combinatorics.

Ladner, Richard E. • 1971; PhD, 1971, University of California (Berkeley); distributed and parallel computing theory, computational complexity, computers to aid the disabled.

Lazowska, Edward D. • 1977; PhD, 1977, University of Toronto (Canada); computer systems: modeling and analysis, design and implementation, distributed and parallel systems.

Leveson, Nancy G. • 1992; PhD, 1980, University of California (Los Angeles); software engineering, software and system safety, software reliability and fault tolerance.

MacKay, Pierre A. • 1966, (Adjunct); PhD, 1964, University of California (Berkeley); Greek literature, post-classical and Byzantine Greek literature, numismatics.

Noe, Jerre D. • 1968, (Emeritus); PhD, 1948, Stanford University; operating systems, computer measurement and evaluation, distributed computer networks, simulation.

Ruzzo, Walter L. • 1977; PhD, 1978, University of California (Berkeley); computational complexity, parallel computation.

Shapiro, Linda B. • 1986; PhD, 1974, University of Iowa; computer vision, artificial intelligence, pattern recognition, robotics, database systems.

Shaw, Alan Cary • 1971; PhD, 1968, Stanford University; operating systems, software specifications, real-time systems.

Snyder, Lawrence • 1983; PhD, 1973, Carnegie-Mellon University; theory of computation, parallel computation, VLSI.

Stuetzle, Werner • 1984, (Adjunct); PhD, 1977, Swiss Federal Institute of Technology; nonparametric methods in multivariate analysis, statistical applications of computer graphics.

Tanimoto, Steven L. • 1977; PhD, 1975, Princeton University; image analysis, artificial intelligence, computer graphics.

Tomp, Martin • 1986; PhD, 1978, University of Toronto (Canada); theory computation, particularly computational complexity.

Young, Paul R. • 1983; PhD, 1963, Massachusetts Institute of Technology; computational complexity, theory of computation, connections with mathematical logic.

Zahorjan, John • 1980; PhD, 1980, University of Toronto (Canada); design and performance of parallel and distributed computer systems.

Zick, Gregory L. • 1974, (Adjunct); PhD, 1974, University of Michigan; image and multimedia databases, medical imaging.

Associate Professors

Adams, Loyce M. • 1985, (Adjunct); PhD, 1983, University of Victoria; numerical algorithms for parallel computers.

Anderson, Richard J. • 1988; PhD, 1986, Stanford University; theory, parallel computation, analysis of algorithms, combinatorial optimization.

Beame, Paul W. • 1997; PhD, 1986, University of Toronto (Canada); computational complexity, cryptography, theoretical aspects of parallel and distributed computing.

Borriello, Gastano • 1988; PhD, 1988, University of California (Berkeley); computer aided design and synthesis of digital circuits, VLSI design and architecture systems.
Courses for Undergraduates

CSE 142 Computer Programming for Engineers and Scientists I (4) NW, QSR
Computer programming in high-level language. Algorithms (variables, expressions, statements); abstraction (data types, subprograms, packages, generics); analysis (correctness, efficiency, numerics). Program design and analysis: specification, coding, documentation, testing, debugging, evaluation. Using software tools. Not available for credit to students who have completed CSE 210 or ENGR 141. Offered: jointly with ENGR 142; AWSp.

CSE 143 Computer Programming for Engineers and Scientists II (5) NW, QSR
Topics include analyzing algorithms; using writing standard software components (queues, stacks, tables) implemented by private types, generic packages, and dynamic data structures (lists and trees); recursive data- and control structures. Last two weeks survey computer science topics. Not available for credit to students who have completed CSE 211. Prerequisite: CSE/ENGR 142. Offered: AWSp.

CSE 370 Introduction to Digital Design (4)
Introductory course in digital logic and its specification, synthesis, and testing. Boolean algebra, combinational and sequential digital circuits including arithmetic circuits and programmable logic devices. Laboratory sessions, three hours per week, to design, simulate, construct, and debug circuits based on concepts presented in lectures. Prerequisite: 321 or permission of instructor. Offered: AWSp.

CSE 421 Introduction to Algorithms (3)
Concepts and implementation strategies for ALGOL-class languages, including Pascal, Modula, ALGOL 60, Ada. Compilers for ALGOL-class languages. Languages with late binding times, including Lisp, APL, Smalltalk. Not open for credit to students who have completed 341 or 401. Prerequisite: 373 or permission of instructor. Offered: A.

CSE 422 Introduction to Formal Models in Computer Science (3) Finite automata and regular expressions; context-free grammars and pushdown automata; nondeterminism; Turing machines and the halting problem. Emphasis on understanding models and their applications and on rigorous use of basic techniques: induction proofs, simulation, diagonalization, and reduction arguments. Prerequisite: 322. Offered: AW.

CSE 341 Programming Languages (5) Designed to make the student reasonably fluent in several radically different languages, such as LISP, PROLOG, and Smalltalk. Not open for credit to students who have completed 413. Prerequisite: 142. Offered: AWSp.

CSE 370 Introduction to Digital Design (4)
Introductory course in digital logic and its specification, synthesis, and testing. Boolean algebra, combinational and sequential digital circuits including arithmetic circuits and programmable logic devices. Laboratory sessions, three hours per week, to design, simulate, construct, and debug circuits based on concepts presented in lectures. Prerequisite: 321 or permission of instructor. Offered: AWSp.

CSE 401 Introduction to Compiler Construction (3) Fundamentals of compilers and interpreters for symbol tables; lexical analysis, syntactic analysis, code generation, and optimizations for general purpose programming languages. Prerequisites: 326, 341, and 378. Offered: A.

CSE 403 Software Engineering (4)
Fundamentals of software engineering using a group project as the basic vehicle. Topics covered include the software crisis, managing complexity, requirements specification, architectural and detailed design, testing and analysis, software process, and tools and environments. Recommended: 401 or 451. Prerequisite: CSE 321, 334, and 378. Offered: WSp.

CSE 421 Introduction to Algorithms (3) Techniques for design and analysis of efficient algorithms. Methods for showing lower bounds on computational complexity. Techniques for analyzing algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching. Prerequisites: 322, 326. Offered: W.

CSE 431 Introduction to Theory of Computation (3) Models of computation, computable and non-computable functions, space and time complexity, tractable and intractable functions. Prerequisite: 322. Offered: Sp.

CSE 444 Introduction to Data-base Systems (3) Fundamental concepts, system organization, and implementation of data-base systems. Relational, hierarchical, and network data models; file organizations and data structures; query languages; query optimization; database design; concurrency control; security; issues involving distributed data-base systems. Prerequisite: 326. Offered: A.

CSE 451 Introduction to Operating Systems (4) Principles of operating systems. Process management, memory management, auxiliary storage management, resource allocation. Not open for credit to...
Courses for Graduates Only

All graduate courses are primarily for computer science graduate students. Others must petition for entry codes.

CSE 461 Introduction to Computer-Communication Networks (3) Computer network architectures, protocol layers. Transmission media, encoding systems, multiplexing, switching, network interconnection, and traffic control. Network security, privacy. Applications including electronic mail, virtual terminals, and distributed operating systems. Prerequisite: senior standing. Offered: jointly with E E 461; A.

CSE 471 Computer Design and Organization (4) CPU instruction set and addressing modes, CPU structure and functions, computer arithmetic and logic unit, register transfer level design, hardware and microprogram control, memory hierarchy design and organization, I/O, design of memory components. Laboratory project involves design and simulation of an instruction set processor. Prerequisites: 370 and 378. Offered: A.

CSE 472 Introduction to Computational Linguistics (3) Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation and natural language generation. Prerequisite:LING 471 or permission of instructor. Offered: jointly with LING 472.

CSE 473 Introduction to Artificial Intelligence (3) Principal ideas and developments in artificial intelligence: theorem proving, problem-solving methods, expert systems, neural networks, natural language analysis and synthesis, programming languages for artificial intelligence. Not open for credit to students who have completed 415. Prerequisite: CSE 326; recommended: 341. Offered: Winter, Summer.

CSE 477 Digital System Design (5) Student uses laboratory to design, simulate, construct, and debug a self-contained project. Emphasis is on the issues in composing large digital systems ranging from memory subsystems and interface logic to computer protocols and controllers. Prerequisites: 370 and assembly language programming. Offered: Winter, Spring.

CSE 490 Special Topics in Computer Science and Engineering (1-9) Lectures, discussions, and possibly labs on topics of current interest in computer science and engineering not covered by other CSE undergraduate courses. Prerequisite: senior standing in Computer Science or Computer Engineering. Offered: Any term.

CSE 498 Senior Project (1-6) A report (and perhaps demonstration) describing a development, survey, or small research project in a computer science or an application to another field. Objectives are: (1) integrating material from several courses, (2) introducing the professional literature, (3) gaining experience in writing a technical document, and (4) showing evidence of independent work. Work normally extends over more than one quarter, for a maximum of 6 credits for 498-6 credits are required for 498H. Prerequisite: senior standing and permission of instructor. Offered: Any term.

CSE 499 Reading and Research (1-24) Available in special situations for advanced computer science majors to do reading and research in subject to approval of undergraduate adviser and CSE faculty member. If the course is for credit, does not replace core course or computer science elective for major requirements. Prerequisites: senior standing and permission of instructor. Credit/no credit only. Offered: Any term.

CSE 500 Computers and Society (2) Study of impact of computer technology on present and future society, including political, economic, cultural, social, and moral issues. Includes guest lecturers and discussion leaders. Each student is required to complete a term project. Prerequisite: graduate standing in computer science or permission of instructor. Credit/no credit only. Offered: alternate years.

CSE 503 Software Engineering (3) Specification, implementation, and testing of large, multiperson, software systems. Topics include abstraction, information hiding, software development environments, and formal specifications. Prerequisites: CSE major and 322, 326, and 378 or equivalents.

CSE 505 Concepts of Programming Languages (3) Data structures, types, control structures. Languages in the ALGOL family, functional, object-oriented, and logic programming languages. Prerequisites: CSE major, 401 and a working knowledge of Pascal and LISP.

CSE 506 Advanced Topics in Programming Languages (3) May include functional, object-oriented, parallel, and logic programming languages; semantics for languages of these kinds; type declaration, inference, and checking (including polymorphic types); implementation issues, such as compilation, lazy evaluation, combinators, parallelism, various optimization techniques. Implementation project required. Prerequisites: CSE major, 501 which may be taken concurrently, and 505. Offered: alternate years.

CSE 510 Computer Science Research Seminar (1, max. 9) Weekly presentations on topics of current interest to visiting computer scientists. Credit/no credit only. Offered: Autumn, Winter, Spring, Summer.

CSE 520 Computer Science Colloquium (1, max. 9) Weekly public presentations on topics of current interest by visiting computer scientists. Credit/no credit only. Offered: Any term.

CSE 521 Design and Analysis of Algorithms I (3) Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, data structure selection. Correctness and analysis of algorithms. Examples drawn from problems in sorting, searching, set manipulation, pattern matching, graphs, matrices, polynomials, and integers. Prerequisite: CSE major and 326 or equivalent.

CSE 522 Design and Analysis of Algorithms II (3) Analysis of algorithms more sophisticated than those treated in 521. Course material may include such topics as algebraic algorithms, combinatorial algorithms, techniques for proving lower bounds on complexity, and algorithms for special computing devices such as networks or formulas. Prerequisite: CSE major and 521.

CSE 523 Computational Geometry (3) Algorithms for classical geometric problems: range searching, convex hulls, Voronoi diagrams, intersection. Application areas include VLSI design and computer graphics. Prerequisites: CSE major and 521. Recommended: 457 or equivalent. Offered: alternate years.

CSE 524 Parallel Algorithms (3) Design and analysis of parallel algorithms: fundamental parallel algorithms for sorting, arithmetic, matrix and graph problems and additional selected topics. Emphasis on general techniques and approaches used for developing fast and efficient parallel algorithms and on limitations to their efficacy. Prerequisite: CSE major and 521 or 548. Offered: alternate years.

CSE 525 Automata, Computability, and Complexity (3) Computational models including finite automata, regular expressions, context-free grammars, pushdown automata, Turing machines, and techniques for analyzing them. Basic computability theory and undecidability. Fundamentals of computational complexity theory and NP-completeness. Prerequisite: CSE majors only.

CSE 532 Complexity Theory (3) Deterministic, nondeterministic, alternating, and probabilistic Turing machines. Time and space complexity, complexity classes, complexity hierarchies, and provably intractable problems. Prerequisite: CSE major and 531.

CSE 533 Advanced Topics in Complexity Theory (3) Topics in computational complexity more sophisticated than those treated in 532. Topics are expected to vary from year to year, but might typically focus on such areas as parallel complexity, probabilistic complexity, circuit- or automaton-based complexity, or cryptography. Prerequisite: CSE major. Offered: alternate years.

CSE 536 Theory of Distributed Computing (3) Formal approaches to distributed computing problems. Topics vary, but typically include models of distributed computing, agreement problems, impossibility results, decentralized failure detection protocols, reading white papers on distributed computing, writing proofs, reading protocols, knowledge analysis of protocols, and distributed algorithms. Prerequisite: CSE major. Offered: alternate years.

CSE 549 High-Performance Computer Architectures (3) Algorithm design, software techniques, computer architecture for high-performance systems. Selected topics from: VLSI complexity for parallel algorithms, compiling techniques for parallel and vector machines, large MIMD machines, interconnection network, computer architecture of parallel systems, memory hierarchies in multiprocessors, dynamically reconfigurable processors, data flow architectures. Prerequisite: CSE major and 548 or permission of instructor. Offered: alternate years.

CSE 551 Operating Systems (3) Operating systems design and construction techniques. Concurrent processes, operating system kernels, correctness, deadlock, protection, transaction processing, design
methodologies, comparative structure of different kinds of operating systems, and other topics. Prerequisite: 451; CSE major.

CSE 552 Distributed and Parallel Systems (3) Principles, techniques, and examples related to the design, implementation, and analysis of distributed and parallel computer systems. Prerequisite: CSE major and 551.

CSE 556 Special Topics in Computer Graphics (3) Advanced topics in computer graphics not treated in CSE 554. Topics vary from year to year but typically include computer vision systems, microsensors, electrophysiology, and related topics. Prerequisite: CSE major and knowledge of computer vision systems, microsensors, electrophysiology, and related topics.

CSE 560 Artificial Intelligence I (3) Introduction to computational models of thought and construction of intelligent information systems. Topics include search algorithms, data dependencies, and truth maintenance systems; approaches to knowledge representation, automated deduction, reasoning under uncertainty, and machine learning. Prerequisites: 421 or equivalent; exposure to logic, LISP programming experience, CSE major.

CSE 561 Artificial Intelligence II (3) Advanced topics in artificial intelligence. Subjects include planning, natural language understanding, qualitative physics, machine learning, and formal models of time and action. Students are required to do projects. Prerequisite: 573; CSE major.

CSE 567 Principles of Digital Systems Design (3) Principles of logic design, combinational and sequential circuits, minimization techniques, structured design, methods, CMOS technology, complementary and raised gate delay estimation and performance analysis, arithmetic circuits, memories, clocking methods, synthesis and simulation tools, VLSI processor architecture. Prerequisites: CSE major and basic knowledge of logic design.

CSE 568 Advanced VLSI Laboratory (3) Advanced topics on MOS technology and CAD software; students design a large chip (more than 10K transistors) to be fabricated at end of term; laboratory activities include circuit design and logic design, graphic layout of a chip, extraction, checking, and simulation. Prerequisite: CSE major and 567 or permission of instructor.

CSE 573 Image Understanding (3) Overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, preattentive image processing, boundary and region representations, and case studies of vision architectures. Prerequisites: 573 or E E 562 or permission of instructor. Offered: jointly with E E 577.

CSE 577 Mathematical Morphology (3) Theory of mathematical morphology and its application in various commercial, industrial, medical, and research applications. Contents include binary and grayscale morphological dilation, erosion, opening and closing, morphological sampling theorem, structuring element decomposition, thinning, skeletonizing, and relational shape description. Group project. Prerequisites: 567 or E E 568 or permission of instructor. Offered: jointly with E E 577; alternate years.

CSE 581 Parallel Computation in Image Processing (3) Parallel algorithms, algorithms, and languages for image processing. Cellular array, pipelined and pyramid machines, instruction sets, and design issues. Parallel implementations of filtering, edge detection, segmentation, shape, stereo, motion, relaxation algorithms, multiresolution methods, and iconic-to-symbolic transforms. Students write and debug programs for parallel computers. Prerequisite: permission of instructor. Offered: alternate years.

CSE 590 Special Topics in Computer Science (*) Several offerings each quarter, on topics of current interest. Prerequisite: permission of instructor. Offered: AWSp.

CSE 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSp.

CSE 700 Master's Thesis (*) Credit/no credit only. Offered: AWSp.

CSE 800 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSp.

Electrical Engineering

211 Electrical Engineering

Electrical engineering is concerned with the understanding and utilization of electricity, including the electrical system and the role it provides society with useful, efficient, and economic products and services. The scope of activity is wide-ranging and diversified, covering such topics as planning, design, implementation, and maintenance of large-scale systems for worldwide communication and regional power generation and distribution; and design and use of microelectronic and photonic devices: signal and image processing, computer systems and their applications; instrumentation and control systems. In electrical engineering, rapid technological innovation is the rule rather than the exception. Preparation for a professional career in the field builds on a solid foundation in mathematics and the physical sciences, plus practice in the application of these basic principles to practical problems. In addition to technical education, the practice of engineering in contemporary society requires significant emphasis in the humanities and social sciences.

The department's undergraduate program provides the intellectual tools, analytical and laboratory skills, and humanistic-social values for professional work in the field. The program also forms a basis for further professional development, in graduate school or through continuing education programs and independent study. A separate application is required for admission to the undergraduate program in electrical engineering. Deadlines for submitting applications are the same as the closing dates that are given in the Academic Calendar at the front of this catalog for all new and former student applications. Students may only enter the degree program of the department autumn or spring quarters. To be eligible for consideration for admission, a student must satisfy the following conditions: (1) have applied and been admitted to the UW or already be a student in good standing; (2) have completed a minimum of 45 credits (i.e., sophomore standing) with a cumulative GPA of 2.50 or higher; (3) have successfully completed a year of college calculus (MATH 124, 125, 126), a quarter of differential equations (MATH 307), three quarters of physics using calculus (PHYS 121/131, 122/132, 123/133), a quarter of college chemistry (CHEM 40-141), a quarter of computer programming (CSE/ENGR 142) and electrical engineering fundamentals (ENGR 215), and 5 credits of English composition. The cumulative GPA in these courses must be 2.50 or higher.

Copies of the Undergraduate Handbook, which contains detailed curriculum requirements and suggestions for the design of an effective sequence of elective courses, are available in 215 Electrical Engineering (Advising Office) or in the Engineering Advising Center.

In addition to the College of Engineering requirements in General Education and Engineering Fundamentals listed above, the following courses are required for the electrical engineering program: a core of 35 credits of specified electrical engineering courses normally taken in the junior year and 32 credits of electrical engineering electives. To graduate, a student must earn a total of 192 credits with a minimum cumulative GPA of 2.00 in all electrical engineering courses, with no grade below 1.0 in any of these courses. In addition, it is required that each student’s program of study conform with the Accreditation Board for Engineering and Technology (ABET) requirement of at least 48 credits in electrical engineering science and 24 credits in engineering design.

The departmental policy on continuation is consistent with the continuation policy of the College but also includes supplementary requirements specific to the department. Details may be obtained from the department advising office.

Many scholarships specifically for electrical engineering majors, based on merit and financial need, are awarded each year. Students interested in applying for these and other College of Engineering scholarships may obtain information from the Department of Electrical Engineering Scholarship Award Committee chairperson.

Graduate Program

The Department of Electrical Engineering offers graduate programs leading to the degrees of Master of Science in Electrical Engineering and Doctor of Philosophy. Graduate courses and research programs are offered in electromagnetics, radio science, optics, acoustics, microsensors, electronic materials and devices, microelectronics, VLSI design, computers and information systems, digital systems, computer architecture, computer networks and distributed systems, software engineering, operating systems, micropro-
cessors, energy systems, power electronics and electrical drives, control systems, robotics, circuits and network theory, neural networks, telecommunications, signal processing, image and speech processing, machine vision, and biosystems. Opportunities also exist for participation in research on medical instrumentation in the Bioengineering program and in marine acoustics and instrumentation systems at the Applied Physics Laboratory.

A minimum of 45 credits is required for graduation with the M.S.E.E. degree. Students selecting the thesis option must register for 9-12 thesis credits. Students selecting the nonthesis option can either complete their degree by total course work or by a research project of 4-6 credits. Course work for any of the above-mentioned options must be selected with each student’s supervisory committee approval to prepare the student in an area of specialization. If more flexibility is desired than allowed by the M.S.E.E. requirements, the Interdisciplinary Master of Science in Engineering degree is available.

The M.S.E.E. degree is also offered to part-time students employed in local industries through the Televised Instruction in Engineering (TIE) program. Regular graduate courses are offered over cable television or by videostate to enable working engineers to participate in the program without traveling to campus.

To graduate with the Ph.D. degree, a student must pass the general qualifying examination, pass an advanced General Examination, pursue an original research problem, and report the results of that research in a dissertation that must be a contribution to knowledge. At least one year of course work beyond completion of the M.S.E.E. degree is usually desirable.

Research Facilities

Facilities in the Electrical Engineering Department include laboratories for study of solid-state materials and devices, computer technology, microsensors, optics, electromagnetics, computer systems, machine vision, analog and digital electronics, energy systems, power electronics and electric drives, bioelectronics, biorobotics, control systems, and statistical data analysis. Also available are extensive computer, integrated circuit and sensor fabrication, and characterization facilities.

Admissions Qualifications

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required of all students. Official test scores must be submitted, along with a formal application and a minimum of two reference letters. Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following some additional preparation.

Financial Aid

Research assistantships, teaching assistantships, scholarships, and graduate fellowships are available to qualified graduate students in all areas of electrical engineering. Most awards include a monthly stipend plus payment of tuition and fees.

Correspondence and Information

Faculty

Chairperson
Gregory L. Zick

Professors

Afromowitz, Martin A. * 1975; PhD, 1969, Columbia University; microtechnology, solid-state and fiber-optics sensors, biomedical instrumentation.

Albrecht, Robert W. * 1961; PhD, 1961, University of Michigan; robotics, stochastic analysis, nuclear reactor theory.

Alexandro, Frank J. * 1964; DSE, 1964, New York University; control systems, stochastic estimation methods.

Andersen, Jonny M. * 1967; PhD, 1965, Massachusetts Institute of Technology; circuit design, modeling, CAD/CAM and computer graphics.

Baer, Jean-Loup M. * 1969; PhD, 1968, University of California (Los Angeles); parallel processing, computer system architecture, data structures.

Bergslet, F. Robert * 1947, (Emeritus); MSE, 1938, Massachusetts Institute of Technology; electric power systems.

Bjorkstam, John L. M. * 1950, (Emeritus); PhD, 1958, University of Washington; electromagnetic properties of materials, magnetic resonance spectroscopy.

Clark, Robert N. * 1957, PhD, 1959, Stanford University; automatic control systems; fault detection in dynamic systems.

Crum, Lawrence A. * 1992, (Research); PhD, 1967, Ohio University.

Damborg, Mark J. * 1969, PhD, 1969, University of Michigan; control systems theory, power system dynamics, expert systems and database applications.

Dow, Daniel G. * 1968, PhD, 1958, Stanford University; microwaves, physical electronics, semiconductor devices, sensors.

Ehrenberg, John E. M. * 1970, (Affiliate); PhD, 1973, University of Washington; communications, signal processing, underwater acoustics.

El-Sharkawi, Mohamed A. * 1980; PhD, 1980, University of British Columbia (Canada); analysis and control of power electronics, systems, and electric drives; artificial neural networks.

Ewert, Terry E. * 1956, (Adjunct); PhD, 1965, University of Washington; physics, ocean microstructure, diffusion, acoustic transmission.

Furness, Thomas A. M. * 1989, (Adjunct); PhD, 1981, University of Southampton (UK); display systems engineering, human factors, computer graphics.

Gillford, Edward C. * 1959, (Emeritus); PhD, 1959, University of California (Berkeley); electronics, computers.

Harlick, Robert M. * 1988; PhD, 1969, University of Kansas; computer vision, artificial intelligence, pattern recognition, image processing.

Holden, Alistair D. * 1958, PhD, 1964, University of Washington; computer engineering, speech recognition, computer-aided design, artificial intelligence.

Hsu, Chin-Chi * 1958, (Emeritus); PhD, 1951, Ohio State University; control systems and cybernetics.

Ishimaru, Akira * 1963; PhD, 1958, University of Washington; electromagnetics, optics, acoustics, applied mathematics, scattering theory.

Jackson, Darrell R. * 1976, (Research); PhD, 1977, California Institute of Technology; signal processing, underwater acoustics, wave scattering.

Johnson, David L. * 1955, (Emeritus); PhD, 1955, Purdue University; digital design, artificial intelligence, models of learning systems.

Kim, Yongmin * 1982; PhD, 1982, University of Wisconsin; computer architecture, imaging systems, computer graphics, multimedia, modeling and instrumentation.

Lauritzen, Peter O. * 1980; PhD, 1981, Stanford University; photonics, electronic devices, instrumentation.

Lewellen, Thomas M. * 1967, (Adjunct); PhD, 1972, University of Washington; bioengineering, electrical engineering.

Lewis, Laurel J. * 1946, (Emeritus); PhD, 1947, Stanford University; circuits and systems.

Liu, Chen-Ching * 1983; PhD, 1983, University of California (Berkeley); planning and operation of power systems, systems and control, power electronics.

Lytle, Dean W. * 1958; PhD, 1957, Stanford University; communication and stochastic systems analysis, marine acoustics.

Marks, Robert M. * 1977; PhD, 1977, Texas Technological University; optical processing, signal analysis, neural networks.

Meditch, James S. * 1977; PhD, 1961, Purdue University; computer-communications networks.

Mortiz, William E. * 1973; PhD, 1969, Stanford University; microcomputer applications, bioinstrumentation, human-powered transportation.

Noges, Endrik * 1958; (Emeritus); PhD, 1959, Northwestern University; automatic control systems, nonlinear and discontinuous control.

Pearsall, Thomas P. * 1989; PhD, 1973, Cornell University; physics of semiconductors and the technology of semiconductor devices.

Peden, Irene Carswell * 1961; PhD, 1962, Stanford University; subsurface remote sensing and applied electromagnetics.

Pinter, Robert B. * 1967; PhD, 1964, Northwestern University; computer vision, robotics, biophysics.

Porter, Robert P. * 1985; PhD, 1970, Northeastern University; acoustics, electromagnetics, signal processing.

Selig, Thomas A. * 1990; PhD, 1965, Pennsylvania State University; electromagnetics, wave propagation, remote sensing and applications to atmosphere and geosciences.

Shapiro, Linda G. * 1966; PhD, 1974, University of Iowa; computer vision, artificial intelligence, pattern recognition, robotics, database systems.

Sigelmann, Rubens A. * 1959, (Emeritus); PhD, 1963, University of Washington; bioengineering, ultrasonics, propulsion, acoustics.

Smith, George S. * 1968, (Emeritus); MSE, 1924, University of Washington; instrumentation, high voltage technique.

Soma, Mani * 1982; PhD, 1980, Stanford University; computer-aided design, device modeling, IC technology and design, bioengineering.

Spelman, Francis A. * 1961, (Adjunct); PhD, 1975, University of Washington; biophysics of implanted chiea; bioinstrumentation for primate research.

Spindel, Robert C. * 1967; PhD, 1971, Yale University; ocean acoustics, signal processing, acoustic navigation systems, acoustic tomography.

Szablya, John F. * 1984, (Affiliate); PhD, 1948, Josef Nador University (Hungary).

Tanimoto, Steven L. * 1977; PhD, 1975, Princeton University; image analysis, artificial intelligence, computer graphics.

Tsang, Leung * 1983; PhD, 1976, Massachusetts Institute of Technology; wave propagation and scattering, remote sensing and optics.
Venkata, Subrahmanyan S.* 1979; PhD, 1971, University of South Carolina; computer applications to power systems, AI applications, transmission and distribution.

Yee, Sinclair S.* 1970; PhD, 1965, University of California (Berkeley); physical electronics, semiconductor devices, microsensors.

Young, James A. * 1982, (Affiliate); PhD, 1953, University of Washington; telecommunications, electronic systems, and signal processing.

Zick, Gregory L.* 1974; PhD, 1974, University of Michigan; image and multimedia databases, medical imaging.

Associate Professors

Chen, Chi H.* 1989; PhD, 1987, University of Illinois; computational electromagnetics, microwave ICs, scattering and antennas, bioengineering.

Darling, Robert B.* 1986; PhD, 1985, Georgia Institute of Technology; semiconductor devices, solid state, optoelectronics, microelectronics.

Giri, Jay * 1990, (Affiliate); PhD, 1977, Clarkson University.

Hannaford, Blake * 1989; PhD, 1985, University of California (Berkeley); human and robotic movement control, bioengineering, controls, human-machine interaction.

Helms, Ward J.* 1964; PhD, 1966, University of Washington; VLSI analog and digital circuit design, integrated circuits, acoustics and audio, silicon compilers.

Katz, Philip L.* 1980, (Research); PhD, 1970, University of Michigan.

Kuga, Yasuo * 1991; PhD, 1983, University of Washington; microwave and millimeter-wave remote sensing, optics, and electromagnetics.

Kuhn, Kefin J.* 1987; PhD, 1985, Stanford University; molecular beam epitaxy growth of strained-layer InGaAs/GaAs quantum wells and superlattices.

Morin, Thomas Harvey II * 1986, (Affiliate); BSEE, 1965, Massachusetts Institute of Technology; simulation and test of mixed analog-digital VLSI electronics.

Redeker, Charles C. 1963, (Emeritus); MS, 1964, University of Washington.

Ricey, James A.* 1985; PhD, 1985, University of California (San Diego); detection, estimation and signal processing.

Sachen, Carl M. * 1992; PhD, 1987, University of California (Berkeley); computer-aided design of analog and digital integrated circuits.

Sharma, Tilak Chand * 1990, (Affiliate); PhD, 1972, University of Alberta (Canada); reliability methodology for very highly reliable fault-tolerant systems.

Somari, Ann Kumar * 1985; PhD, 1985, McGill University (Canada); computer architecture, fault-tolerant computing, interconnection networks.

Thorson, Eric L.* 1990, (Research); PhD, 1972, Massachusetts Institute of Technology; rough surface scattering; numerical simulation and theory; underwater acoustics.

Assistant Professors

Belcher, Edward O.* 1982, (Research); MSEEE, 1973, Purdue University; signal processing, artificial intelligence, underwater acoustics.

Carey, W. Patrick * 1990, (Research); PhD, 1987, University of Washington; chemical sensors and arrays. integrated sensor systems and multivariable calibration.

Choi, Jai Joon * 1988, (Affiliate); PhD, 1990, University of Washington; adaptive signal processing, neural networks, and fuzzy logic.

Dalley, Daniel J.* 1982, (Research); PhD, 1988, University of Washington; time series modeling of physical phenomena, optimization, distributed computing, networking.

Hwang, Jen-Nong * 1989; PhD, 1988, University of Southern California; parallel architectures, signal and image processing, neural networks.

Kishan, Ramasamy * 1989, (Affiliate); PhD, 1985, University of Windsor (Canada); DSP algorithms, DSP VLSI architecture for ASICs, computer architecture, CMOS computational cells.

Luby, James C.* 1979, (Research); PhD, 1984, University of Washington; signal processing, underwater acoustics, computer simulation, adaptive array processing, tracking.

Meldrum, Deirdre R.* 1992; PhD, 1992, Stanford University; modeling, control, identification, and design of dynamic systems; robots, flexible structures.

Nelson, Brian A.* 1987, (Research); PhD, 1987, University of Wisconsin; fusion plasma physics, plasma processing of materials, data acquisition software.

Oh, Soho * 1987, (Affiliate); PhD, 1989, University of Washington; neural networks and fuzzy systems.

Phillips, Insin Tsai-Yun * 1988, (Affiliate); PhD, 1984, University of Maryland; computer vision, document image understanding, image database, software engineering.

Ramam, Ceon * 1989, (Adjunct Research); PhD, 1973, University of Utah; biomagnetic imaging and its application to detect cardiac dysrhythmia problems.

Riskin, Eve A.* 1990; PhD, 1990, Stanford University; image compression and processing, signal processing, medical imaging, and pattern recognition.

Sahr, John D.* 1991; PhD, 1990, Cornell University; radar remote sensing of the Earth's upper atmosphere.

Sumic, Zarka* 1988, (Affiliate); PhD, 1990, University of Washington.

Winebrenner, Dale P.* 1988, (Research); PhD, 1985, University of Washington; wave propagation and scattering and remote sensing of planetary surfaces.

Yang, Andrew T.* 1989; PhD, 1989, University of Illinois; VLSI CAD, modeling and simulation of GaAs/III Devices.

**Course Descriptions**

See page 55 for explanation of course numbers, symbols, and abbreviations.

**Courses for Undergraduates**

E E 239: Special Topics in Electrical Engineering (1-5) New and experimental approaches to basic electrical engineering. May include design and construction projects. Prerequisite: permission of department Chairperson. Offered: A/WSP.

E E 351: Devices and Circuits I (5) Fundamentals of electronic devices and circuits in semiconductors: physical processes of drift, diffusion, recombination; structure, characteristics of pn-junction diodes; use and analysis of junction diodes in nonlinear circuit applications; structure, characteristics of field-effect transistors; use and analysis of field-effect transistors in nonlinear circuit applications. Weekly laboratory. Prerequisite: ENGR 233. Offered: A/WSP.

E E 332: Devices and Circuits II (5) Analysis of pn junctions, and small signal models of bipolar transistors, single and two transistor amplifiers, transistor arrays, sources and sinks, output stages, bipolar operational amplifiers, and frequency response of analog integrated circuits. Prerequisites: 331. Offered: A/WSP.

E E 351: Energy Systems (5) Introduction to theory and methods of analysis in the use of typical apparatus to generate, transmit, utilize energy in electrical form. Includes conventions of circuit description, balanced and unbalanced polars, circuit analysis, power, theoretical, and practical aspects of high-voltage transmission. Former. fundamentals of electromechanical energy conversion, practical synchronous induction and commutator machines, an introduction to power electronics circuits. Prerequisite: 233. Offered: A/WSP.

E E 361: Applied Electromagnetics (5) Introduces electromagnetic field theory and Maxwell's equations in integral and differential forms; uniform plane waves in linear medium; boundary conditions and reflection and transmission of waves; guided waves; transmission lines and Smith chart; electrostatics. Prerequisites: 233, MATH 324. Offered: A/WSP.

E E 371: Digital Circuits and Systems (5) Introduces circuit design in digital logic. Boolean algebra, combinatorial and sequential circuits, combinational and sequential logic design, programmable logic devices, and design and operation of digital computers, including ALU and memory. Four-hour laboratories every other week. Prerequisites: ENGR 142 and ENGR 275 or CSE 143. Offered: A/WSP.

E E 399: Special Topics in Electrical Engineering (1-5) New and experimental approaches to current electrical engineering problems. May include design and construction projects. Prerequisite: permission of department. Offered: A/WSP.

E E 400: Advanced Topics in Electrical Engineering (1-4, max. 8) Contemporary subjects at the advanced undergraduate level. Faculty presents advanced elective topics not included in the established curriculum. Prerequisite: permission of instructor. Offered: A/WSP.

E E 411: Introductory Network Synthesis (3) Network representations in the complex frequency domain, realizability criteria for driving-point and transfer functions, canonical forms, and realization of the digital computer in synthesis procedures. Prerequisites: 233 and senior standing. Offered: A.

E E 415: Computer-Aided System Analysis and Design (3) Concepts, principles, and techniques concerned with the design, testing, and application of

E E 421 Electroacoustics (4) Fundamentals of acoustics and the electroacoustical aspects of electrical-mechanical systems. Characteristics of transducers. Design of acoustic devices. Includes laboratory to be arranged. Prerequisite: 361 or permission of department. Offered: A.

E E 433 Analog Circuit Design (5) Design of analog circuits and systems applying modern integrated circuit technology; operational amplifiers, differential amplifiers, and other analog circuits and signal processing applications involving feedback and regularities. Prerequisite: 332. Offered: AW.

E E 436 Medical Instrumentation (4) Speelman Introductory course in the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound, safety, electrical safety, and the design of clinical electronic equipment. Prerequisite: 301 or consent of instructor. Offered: Fall division and first-year graduate students who are preparing for careers in bioengineering-both research and industrial. Prerequisite: 433 or permission of department. Offered: jointly with BIOE 436; Sp.

E E 440 Linear Systems Analysis II (4) Development of the mathematical tools and techniques for the analysis of linear systems. Applications to engineering problems. Analog and digital filters; applications of discrete Fourier transform, including aliasing, short data sets, average transforms, system identification; orthogonal functions for boundary-value problems, two-dimensional Fourier transforms with application to image processing and aperture antennas. Prerequisite: 341. Offered: A.

E E 445 Nonlinear Systems Analysis (4) Dynamic analysis of nonlinear circuits, neural networks and other simple systems. Exact methods, graphical methods, approximate methods, including linearization and numerical and analog computer solutions. Stability. Forced oscillations. Prerequisite: 233 or permission of department. Offered: A.

E E 448 Control Systems Sensors and Actuators (3) Study of components and formulation of their mathematical models. Amplifiers, servomotors, synchros, gyroscopes, accelerometers, reaction mass actuators, position sensors, and functions, proximity sensors, force and torque transducers. Experimental determination of component models and model parameters. Two 3-hour laboratories per week. Prerequisite: senior standing. Offered: jointly with A A 448; W.

E E 449 Design of Automatic Control Systems (4) Design problems in electromechanical feedback systems, aerospace and hydrospace vehicles, systems with unstable plants, lightly damped modes, nonminimum phase plants, nonlinear plants. Computer-aided simulation and design emphasized. Team project encouraged. Design reviews, oral presentations required. Prerequisite: 446 or A A 450 or M E 471 or equivalent. Offered: jointly with A A 449; Sp.

E E 452 Power Electronics Design (5) Electronic conversion and control of electrical power. Includes semiconductor switching devices, power converter circuits, diodes, magnetics, and control of power converters. Also ac/dc, dc/ac, and dc/dc power converters; circuit simulation; extensive laboratory work a four-week power converter design project. Prerequisites: 332, 351. Offered: A.

E E 453 Electric Drives (5) Elements of drive systems, speed-torque characteristics of electric motors including dc motors, brushless convertor, and control of power converters. Also ac, electric, and dc/dc power converters; circuit simulation; extensive laboratory work a four-week power converter design project. Prerequisites: 332, 351. Offered: A.

E E 454 Power System Analysis I (4) Introduction to methods of analyzing power systems. Includes symmetrical components, calculation of line parameters, representation of transmission lines and power components, and power flow control. Prerequisite: 351 or permission of instructor. Offered: W.

E E 455 Power System Analysis II (4) Analysis of symmetrical and unsymmetrical power systems' networks, fault analysis, and stability studies. Prerequisite: 351 or permission of department. Offered: W.

E E 456 Computer-Aided Design In Power Systems (4) Design-oriented course in power system engineering. Students are assigned a project concerning system operation and planning, steady-state and dynamic behaviors of power systems, or distribution systems. Each involves formulation of design criteria, development of approach, application of existing software. Prerequisite: 454 or 455 or 457, or permission of instructor. Offered: Sp.

E E 457 Electric Energy Distribution Systems (4) Introduction to electric utility distribution systems. Power electronics, distribution networks and analysis and design, distribution substation problems, distribution transformers, capacitor application, overcurrent and overvoltage protection. System planning and reliability. Prerequisite: 456 or permission of instructor. Offered: Sp.

E E 458 Electric Energy Distribution Systems (4) Electric distribution systems. Analysis and design of electric power distribution systems. Prerequisite: 456 or permission of instructor. Offered: Sp.

E E 471 Computer Design and Organization (5) Introduction to computer architecture, algorithms, hardware design for various computer subsystems, CPU control unit design, hardwired and microprogrammed control, memory organization, cache design, virtual memory, I/O organization, and I/O hardware design. Prerequisites: 370 and permission of instructor. Offered: AW.

E E 472 Microcomputer Systems (5) Concepts of multi-level machines and computer system organization. Utilizing microprocessor digital computer studied at assembly- and high-language levels with emphasis on concepts of central processor architecture, memory organization, I/O devices, and computer system organization. Assembly language programming concepts applied to solution of various laboratory problems including I/O programming. Prerequisite: 471. Offered: AW.

E E 476 Digital Integrated Circuit Design (5)  
Fletcher and Powell; method of conjugate gradients; elements of quadratic and geometric programming; applications to engineering systems. Prerequisite: 510 or permission of instructor. Offered: W.

E E 518 Digital Signal Processing (4) Atlas Digital representation of analog signals. Frequency domain and time domain of design of digital systems; IIR and FIR filter design techniques, fast Fourier transform algorithms. Sources of error in digital systems. Analysis of noise in digital systems. Prerequisites: knowledge of Fourier analysis techniques and graduate standing, or permission of instructor. Offered: A.

E E 519 Stochastic Analysis of Data From Physical Systems (4) Albrecht Computer systems for acquisition and processing of stochastic signals. Calculation of typical descriptors of such random processes as correlation functions, spectral densities, probability densities, statistical test measurements made on a variety of physical systems (e.g., electrical, mechanical, acoustic, nuclear). Lecture plus laboratory. Prerequisite: 505 or equivalent. Offered: W.

E E 521 Multidimensional Signal Processing (3) Marks Multidimensional (MD) signals and systems, MD sampling theorem, sample dependence in higher dimensions, MD FIR filter design using windows and the McClellan transform, MD IIR filter stability and design. Current topics in MD signals and systems. Prerequisite: 442 or 518 or equivalent. Offered: odd years; A.

E E 522 Shannon Sampling and Interpolation Theory (4) Historical overview of Shannon sampling theorem; fundamentals of the cardinal series; generalizations including those of Papoulis, Kramer, and Lagrange; effects of jitter, truncation and data noise on interpolation; continuous sampling restoration using prolates spherical wave functions and the Papoulis-Gerchberg algorithm. Prerequisite: 506. Offered: odd years; Sp.

E E 523 Computational Neural Networks (3) Fundamentals of computational neural networks from perspectives of system theory and electrical engineering applications: historical review, adaptive parameter estimation, nonlinear optimization, combinational optimization, learning rules, neural network models, data clustering and regression, pattern classification, speech recognition, image modeling, nonlinear control and component analysis, probability density function estimation. Prerequisite: permission of instructor. Offered: Sp.

E E 524 Waves in Random Media II (4) Continuation of 575, treating recent developments and advanced topics in wave scattering by discrete random media, random rough surfaces, oceanography and their engineering applications. Emphasis on multiple scattering field theory, polarimetry, transport theory, Monte-Carlo simulations and media characterization. Prerequisites: 572 and 575 (or equivalent). Offered: W.

E E 525 Acoustics in Engineering I (3) Partial Acoustic wave transmission, reflection, refraction,
diffraction in solids, liquids, and gases. Includes review of continuum mechanics and examples from electromechanical systems. Prerequisite: graduate standing in electrical or mechanical engineering or permission of instructor. Offered: jointly with M E 525; W.

E E 526 Acoustics in Engineering II (3) Porter Continuation of E E 525. Material differs each year, covering such topics as scattering, moving media, ultrasonics, acoustical holography, optoacoustics, transducer propagation in anisotropic medium. Prerequisite: 525 or permission of instructor. Offered: jointly with M E 526; S.

E E 527 Solid-State Laboratory Techniques (4) Darling, Kuhn, Pearson; Principles and laboratory techniques used in solid-state electronics research. Basic familiarity with practices and equipment used on campus. Laboratory safety; materials handling, storage and disposal, electrical equipment, photolithography, metrology; mounting, bonding, and probing; wet chemical etching; vacuum evaporation; patterning of metal films using photore sist. Extensive laboratory with limited enrollment. Prerequisites: graduate standing and permission of instructor. Offered: Sp.

E E 528 Advanced Semiconductor Fundamentals (4) Al-Mahmoud, Yee. Limited exposure to classical physics, Schrodinger's equation, eigenvalues of simple systems; postulates of quantum mechanics, matrix methods, Dirac notation, operator methods; band structure; crystallography, real and reciprocal lattices, Brillouin zones, photoluminescence, E(k) diagrams, band structure calculations in solids; effective mass equation, spin-orbit splitting; application to quantum wells, superlattices, tunneling devices. Offered: Sp.

E E 529 Semiconductor Optics and Optical Devices (4) Afronomowitz, Kuhn, Pearsall; Yee. Perturbations of energy states in semiconductors: direct and indirect transitions; absorption processes; optical constants; absorption spectroscopy; radiative and nonradiative transitions; processes occurring at p-n junctions; junction devices; LEDs and lasers, photovoltaics; self-electro-optic effect device; modern laser structures. Prerequisites: 528 or permission of instructor. Offered: A.

E E 530 Quantum Electronics (4) Bjorksten, Darling, Kuhn, Tsang; Yee. Application of quantum mechanics principles and mathematical techniques to interaction of electronic, atomic, and photon Energy state transitions, selection rules; radiative and nonradiative transitions; processes occurring at p-n junctions; junction devices; LEDs and lasers, photovoltaics; self-electro-optic effect device; modern laser structures. Prerequisites: 528 or permission of instructor. Offered: A.

E E 531 Transport Properties of Semiconductors (4) Darling, Kuhn, Pearsall; Yee. The theory of electron transport in crystalline solids. Includes the kinetic theory of the electron gas and solutions to Boltzmann's equation in the relaxation time approximation, electron motion in k-space, electron scattering processes, low and high field transport, cyclotron resonance, and magnetoresistance. Prerequisites: 528 or permission of instructor. Offered: Sp.

E E 532 Power Semiconductor Devices (4) Lauritzen Device principles needed for modeling and circuit simulation of semiconductor devices used in power electronic applications. Includes diode, BJT, FET, SCR, GTO, IGBT, Thyristor, power IC devices, design and simulation of device drive circuits. Failure modes, thermal simulation also included. Prerequisites: graduate standing; recommended: 465 and 467. Offered: alternate years; W.

E E 533 Advanced Semiconductor Devices (4) Lauritzen Device principles needed for modeling and circuit simulation of semiconductor devices used in power electronic applications. Includes diode, BJT, FET, SCR, GTO, IGBT, Thyristor, power IC devices, design and simulation of device drive circuits. Failure modes, thermal simulation also included. Prerequisites: graduate standing; recommended: 465 and 467. Offered: alternate years; W.

E E 534 Power Electronics (4) Lauritzen. Detailed study of DC-to-AC inverters, pulse-width modulated and resonant DC-to-DC converter topologies; drive and protection circuits for efficient switching of semiconductor devices. Includes extensive computer-aided circuit simulation and power supply control. Prerequisite: graduate standing. Offered: W.

E E 535 Design of Digital Integrated Circuits and Systems (4) Helms, Soma. Design of digital VLSI system specifications, architectures, synthesis, simulation, and layout. Covering CMOS technologies with minor emphasis on ECL, GaAs. Prerequisites: graduate standing in electrical or computer engineering and 331 or equivalent or permission of instructor. Offered: W.

E E 536 Design of Analog Integrated Circuits and Systems (4) Helms, Soma. Design of analog VLSI specifications, design, simulation, layout. Covering CMOS and BiCMOS technologies. Prerequisites: 433 or equivalent and graduate standing in electrical or computer engineering, or permission of instructor. Offered: Sp.

E E 537 Computation Methods for Circuit Analysis and Simulation (3) Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Theoretical and practical analyses: large-signal nonlinear DC, small-signal AC, nonlinear, and large-signal steady-state. Simulation concepts applied to the modeling and characterization of various electronic devices. Offered: W.

E E 538 Topics in Electronic Circuit Design (1-5) Ali-Talab, Guiford, Helm, Lauritzen. Soma. Topics of current interest in electronic circuit and system design. Course content varies from year to year, based on current professional interests of the faculty member in charge. Prerequisite: permission of instructor. Offered: AW.

E E 539 Advanced Topics in Solid-State Electronics (1-5) Bjorksten, Yee. Lectures or discussions of topics of current interest in the field of solid-state electronics for advanced graduate students having adequate preparation in solid-state theory. Subject matter may vary according to the interests of students and faculty. Prerequisite: permission of instructor. Offered: A.

E E 540 VLSI Testing (3) Some VLSI testing and design-for-test techniques. Reliability predictions and parameterizations for integrated circuits and systems. Circuits fabricated in 536 are tested as laboratory work. Prerequisites: 536, 537. Offered: A.

E E 543 Models of Robot Manipulation (3) Mathematical models of arbitrary articulated robotic (or biological) arms and their application to realistic arm and tasks, including the homogeneous coordinate model of positioning tasks, the forward and inverse kinematic models, the Jacobian Matrix, and the recursive Newton-Euler dynamic model. Prerequisite: linear algebra and graduate standing or permission of instructor. Offered: W.

E E 544 Advanced Robot Manipulation (4) Continuation of the analysis of robot manipulation, considering kinematic redundancy, control of robot manipulators in contact with the environment, teleoperation, and grasping of multi-fingered hands. Students will perform a project and critique a research paper in the area of the project. Prerequisite: 543. Offered: Sp.

E E 546 Advanced Topics in Control System Theory (1-5) Topics of current interest in control system theory for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor. Offered: when adequate enrollment develops prior to close of advance registration. Offered: AWSp.

E E 547 Neural Communication and Control in Biological Systems (3) Neural processing of the visual image and communication between levels of the central nervous system. Feedback and its role in movement by organisms. Description and analysis of the means by which electrochemical events generate, modulate, and demodulate neuronal signals, and the parallel interaction between these signals in transduction of images and other information. Prerequisite: advanced graduate standing or permission of instructor. Offered: W.

E E 548 Linear Multivariable Control (3) Single loop feedback control theory; poles, zeros, Nyquist stability, performance, robustness of multivariable systems; multivariable control synthesis: Linear-Quadratic-Gaussian methods, loop transfer recovery, Youla parameterization, H-infinity techniques, parameter optimization design. Prerequisites: 584 or M E 575; 446 or A A 451 or M E 471 or equivalent. Offered: jointly with A A 548; W.

E E 549 Estimation and System Identification (3) Review of system models, model structure, model parameterization; review of stochastic processes; state estimation. Kalman-Bucy filter, numerical issues in filter design and implementation; system identification: linear regression, least squares, maximum likelihood, instrumental variable techniques. Prerequisites: 505 or equivalent; 506: recommended; 548 or A A 548. Offered: jointly with A A 549; Sp.

E E 550 Nonlinear Optimal Control (3) Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisites: graduate standing; recommended: A A 548 or E E 548. Offered: jointly with A A 550; A.

E E 551 Power System Protection (4) The protection of electric power systems from overcurrents and overvoltages. Analysis and design of overcurrents resulting from faults, lightning induced or otherwise, or from excessive loads or power swings. Analysis and design of overvoltages resulting from switching transients or lightning. Principal concern is with relays and lightning arresters as protection means. Prerequisite: 455 or equivalent. Offered: alternate years; Sp.

E E 552 Power Systems Dynamics and Control (4) El-Sharkawi Advanced computer modeling and analysis of power systems. Application of modern control and power systems. Prerequisites: 445 and 455 or permission of instructor. Offered: alternate years; Sp.

E E 554 Large Electric Energy Systems Analysis (4) Venkata Deals with problems whose solution depends upon the inversion of sparse matrices that occur in the planning and operational studies of large interconnected energy systems. Application studies include system model development, state estimation, and load flow. Prerequisite: 456 or permission of instructor. Offered: every year; A.

E E 555 Spacial Topics in Electrical Energy Systems (1-5) Damborg, El-Sharkawi, Liu, Venkata Topics of current interest in electrical power and energy devices and systems. Content varies from year to year, based on current professional interests of faculty member in charge. Prerequisite: permission of instructor. Offered: AWSp.

E E 562 Artificial Intelligence for Engineers (3) Holden, Shapiro Covers main areas of artificial intellig ence (AI) with particular emphasis on AI applications. Programming languages for AI; problem solving; representations; control strategies; searching strategies; predicate calculus; rule-based deduction; goal-directed planning; knowledge-based systems. Prerequisites: 371 and CSE 374 or equivalents. Offered: W.
E E 563 Fault-Tolerant Computing (3) Faults and their manifestation, issues, theory, and techniques of reliable systems design, testing, design for testability, self-checking and fail-safe circuits, coding techniques, system-level fault-tolerant computation, reliability, error-correcting codes, fault-tolerant communication, reliable software design, and evaluation criteria. Prerequisite: basic knowledge of digital systems design or permission of instructor. Offered: jointly with CSE 563; Sp.

E E 564 Parallel Computer Systems (3) Hwang, Kim, Somani Pipelined and vector processors; interconnection network for parallel processing, array and associative processors; multiprocessors; data-flow machines; systolic arrays and impact of the VLSI technology on parallel processors and processing. Prerequisites: 471, permission of instructor. Offered: W.

E E 585 Computer-Communication Networks I (2) Meditch Network architectures and protocols, Broadband-ISDN and Asynchronous Transfer Mode (ATM); design, performance modeling and analysis of packet-switched networks, digital switching systems. Prerequisite: 505 or equivalent. Offered: W.

E E 566 Computer-Communication Networks II (3) Meditch Local area, metropolitan area, satellite, and packet radio. Algorithms for local area networks; optional design of packet-switched networks; congestion and flow control; fast packet switching; gigabit networks. Prerequisite: 565 or permission of instructor. Offered: Sp.

E E 568 Image Processing Computer Systems (4) Haralick, Kim All components of digital image-processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image processing operations. Selected advanced image-processing topics. Individual student project. Prerequisite: permission of instructor. Offered: jointly with BIOMN 568; W.

E E 570 Antenna Engineering (2) Peden Theory of radiation; impedance characteristics and radiation patterns of thin line antenna elements; antenna arrays; pattern synthesis; aperture antennas. Prerequisite: graduate standing or permission of instructor. Offered: A.

E E 571 Applications of Finite Difference and Finite Element Methods in Fields and Waves (4) General principles of finite difference and finite element methods; finite difference and finite element discretization schemes; finite-difference time-domain method; Galerkin's method and functional discretization; construction of FEM matrices for electromagnetic problems; absorbing boundary conditions; sparse matrix solvers. Prerequisite: 572 or permission of instructor. Offered: W.

E E 572 Electromagnetic Theory and Applications I (4) Chan, Ishimaru, Kuga, Tsang Electromagnetic waves in layered media; complex waves, leaky and slow waves, waves in periodic structures, optical fibers, ionosphere and other guiding structures; transients and dispersive medium; waveguides and cavities; beam waves; eigenfunctions and eigenvalues. Prerequisite: graduate standing or permission of instructor. Offered: W.

E E 573 Electromagnetic Theory and Applications II (4) Chan, Ishimaru, Kuga, Tsang Scattering and absorption of electromagnetic waves, Rayleigh scattering, Born approximations, Green's functions, integral equations, anisotropic media, chiral media, T-matrix, high- and low-frequency approximations, saddle-point method, and variational principle. Prerequisite: 572 or permission of instructor. Offered: W.

E E 574 Electromagnetic Theory and Applications III (4) Chan, Ishimaru, Kuga, Tsang Geometric theory of diffraction, wave fluctuations, antenna noise temperature, radar plummetry, remote-sensing techniques and tomography applications, diffraction and inverse scattering, random transmission. Prerequisite: 573 or permission of instructor. Offered: Sp.

E E 575 Waves in Random Media (4) Ishimaru, Kuga, Tsang Propagation and scattering of electromagnetic, optical, and acoustic waves in turbulence and random media, scattering from rough surfaces and randomly distributed particles. Atmospheric turbulence, fog, rain, snow, clear-air turbulence detection, remote sensing, terrain scattering, scattering from blood cells and tissues, scattering by ocean waves. Applications to atmospheric sciences, bioengineering, geoscience, ocean engineering. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

E E 576 Image Understanding (3) Haralick, Shapiro, Slocin, Tanimoto Overview of computer vision, emphasizing middle ground between image processing and artificial intelligence. Image formation, preprocessing, segmenting, grouping, and region representation, matching, cases of vision systems. Prerequisites: 562 or CSE 573 and CSE 557, or equivalent, or permission of instructor. Offered: jointly with CSE 576; Sp.

E E 577 Mathematical Morphology (3) Haralick Theory of mathematical morphology and its application in various commercial, industrial, medical, and research applications. Contents include binary and grayscale morphologic dilation, erosion, opening, and closing, morphological sampling theorem, structuring element decomposition, thinning, skeletonizing, and relational shape description. Group project. Prerequisites: 568 or CSE 573 and CSE 557, or equivalent, or permission of instructor. Offered: jointly with CSE 577; alternate years: A.

E E 578 Tomographic and Holographic Imaging In Acoustics and Electromagnetics (3) Porter Imaging problems including holographic shape determination, inverse source problems, diffraction tomography, and tomographic imaging as a general imaging method for weak scatterer. Applications in ultrasonography, geophysics, oceanography, optics, medicine. Methods that simplify experimental techniques and computer reconstructions. Prerequisite: graduate standing. Offered: A.

E E 579 Advanced Topics in Electromagnetics, Optics, and Acoustics (1-5) Topics of current interest in electromagnetics, optics, and acoustics. Content varies from year to year, based on current professional interests of faculty member in charge. Prerequisite: permission of instructor. Offered: AWSpS.

E E 583 Nonlinear Control Systems (4) Noges Dynamic analysis of nonlinear control systems. Analytical, graphical, numerical, and simulation techniques for solving continuous and discontinuous nonlinear control system problems. Phase space. Describing functions, Popov and Lyapunov and contraction mapping methods are employed for stability evaluation of dynamic systems. Prerequisite: 584 or permission of instructor. Offered: odd years: Sp.

E E 584 Continuous and Discrete State Variable Methods (3) Alexandru, Clark, Hsu Dynamic analysis of automatic control systems using state variable methods. Vector space concepts, modeling of physical systems in state space format, canonical forms for continuous and discrete time systems, controllability and observability, full-state feedback, state estimators, eigenstructure design. Prerequisite: graduate standing or permission of instructor. Offered: AW.

E E 586 Advanced Computer Applications I (3) Kuga Conceptual models related to machine communication by voice and vision. State-of-the-art review of speech understanding systems. Each student does a self-chosen project. Prerequisite: graduate standing or permission of instructor. Offered: W.

E E 589 Advanced Computer Applications II (3-4) Kuga Conceptual models related to machine communication by voice and vision. State-of-the-art review of speech understanding systems. Each student does a self-chosen project. Prerequisite: graduate standing or permission of instructor. Offered: W.

E E 591 Control Systems Seminar (B01/1-3) E E 591 Seminar on current topics in control systems analysis and design, presented by invited and on-campus speakers. Emphasis on control systems problems representative of all disciplines. Credit/no credit only. Offered: jointly with A ACH E M E 591.

E E 595 Advanced Topics in Communication Theory (1-9) Lytle Extension of 507, 508, 518, 519, 520. Material differs each year, covering such topics as: detection theory, decision theory, game theory, adaptive communication systems, nonlinear random processes. Prerequisite: permission of instructor. Offered: A WSpS.

E E 599 Selected Topics in Electrical Engineering (1-6) Prerequisite: permission of instructor. Offered: A WSpS.

E E 600 Independent Study or Research (*) Offered: AWSpS.

E E 700 Master's Theses (*) Offered: A WSpS.

E E 800 Doctoral Dissertation (*) Offered: A WSpS.

Industrial Engineering

G6-B Mechanical Engineering

Industrial engineering focuses on the science and technology of the industrial environment and on the analysis and design of systems that efficiently produce goods and services. The curriculum pays particular attention to the physical process involved in manufacturing, and the decision-making components of industry. Industrial engineering provides a basic engineering foundation for understanding the interaction between technology and management.

Undergraduate Program
program as evidenced by academic performance, work experience, and other factors. Specific courses required for application are: MATH 124, 125, 126, 307; CHEM 140, 141; PHYS 121/131, 122/132; ENGR 210; 5 credits of English composition.

The Industrial Engineering Undergraduate Advising Guide contains a typical pre-industrial engineering program.

The professional program consists of course listed in the Industrial Engineering Undergraduate Advising Guide. Typical courses are statistics, research, engineering economy, human factors, workplace and work design, manufacturing processes, planning and scheduling, reliability, simulation quality control, industrial management, and computer-integrated production.

A total of 192 applicable credits is required for graduation, with a GPA of at least 2.0 maintained in all engineering courses in the program. Courses counting toward the 30.0 I.D.E. degree may not be taken on a satisfactory/unsatisfactory basis. Courses required for graduation include the College of Engineering General Education and Engineering Fundamentals requirements as specified above, 65 credits of industrial engineering core courses, and 12 credits of technical electives.

Correspondence and Information
All inquiries concerning the industrial engineering program should be addressed to the Industrial Engineering Undergraduate Adviser, G-B B Mechanical Engineering, FU-20.

Graduate Program
Faculty members in the industrial engineering program participate in offering the authorized interengineering degree option within the College-wide Master of Science in Engineering degree program. Students may earn a Ph.D. by enrolling in the mechanical engineering doctoral program and specializing in industrial engineering. Areas of faculty expertise include manufacturing, operations research, large-scale systems, exponential statistics, production planning and quality, reliability engineering, computer-integrated manufacturing, robotics, human factors, and community health.

A proposal to offer the specific degrees of Master of Science in Industrial Engineering and Doctor of Philosophy in Industrial Engineering is now under review.

Correspondence and Information
Graduate Adviser
Industrial Engineering, FU-20

Faculty
Director
Kailash C. Kapur

Professor
Furness, Thomas A. * 1999; PhD, 1981, University of Southampton (UK); displays systems engineering, human factors, computer graphics.
Jorgensen, Jens E. * 1973, (Adjunct); DSc, 1969, Massachusetts Institute of Technology; systems analysis, manufacturing, automation and controls, forest engineering.
Kapur, Kailash C. * 1992; PhD, 1969, University of California (Berkeley); quality and reliability engineering, system design and optimization, total quality management.

Associate Professors
Barfield, Woodrow * 1987; PhD, 1986, Purdue University; interactive computer graphics, human factors in computer systems.
Douthwaite, Geoffrey K 1954, (Emeritus); MS, 1963, University of Washington; rigid body mechanics, software design for engineering economics.
Dru, Albert B. * 1959, (Emeritus); MS, 1957, Washington University; industrial engineering, human factors.
Iverson, Scott Christian * 1983; PhD, 1974, University of Colorado (Boulder).
Roberts, Norman H. * 1953, (Emeritus); PhD, 1958, University of Washington; reliability and probability theory.
Storch, Richard L. * 1975; PhD, 1978, University of Washington; vessel stability, vessel safety.
Wiker, Steven F. * 1993, (Adjunct); PhD, 1986, University of Michigan; ergonomics and human factors engineering.
Zabinsky, Zelka * 1985; PhD, 1985, University of Michigan; operations research, applications in industrial engineering, optimization with stochastic elements.

Assistant Professors
Heim, Joseph A. 1993; PhD, 1990, Purdue University; computer simulations, manufacturing systems and manufacturing engineering.
Smith, Robert P. 1993; PhD, 1992, Massachusetts Institute of Technology, design methodology, manufacturing systems, concurrent engineering.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
IND E 316 Regression Analysis and Design of Experiments (3) NW Barfield Introduction to the analysis of data from planned experiments. Analysis of variance and regression analysis with applications in engineering. Prerequisite: ENGR 315. Offered: jointly with STAT 316.
IND E 324 Engineering Applications of Linear Programming (3) Iverson, Zabinsky Optimization of linear systems, mathematical model design, simplex methods, primal-dual algorithms, parametric programming, network theory, integer, and goal programming. Design aspects of models with applications involving transportation, allocation, and total industrial systems. Prerequisites: MATH 308, ENGR 141.
IND E 325 Nonlinear Programming and Stochastic Models (3) Iverson, Zabinsky Optimization of nonlinear and stochastic systems analysis to industrial engineering problems. Linear approximation methods, geometric and risk programming, inventory, queuing, game and decision theories, simulation, and Markov chains. Prerequisites: 315, 324.
IND E 326 Methodology of Operations Research (3) Iverson Fundamental concepts of mathematical systems theory. Application of general systems approach for specification of requirements, analysis, design, implementation of industrial engineering, and information systems. Generalized techniques and applications common to industrial, mechanical engineers, and management scientists. Class project concerning analysis of large-scale systems problem utilizing operational research. Prerequisite: 325.

IND E 351 Human Factors in Design (3) Barfield Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations. Studies with local industry used as laboratory exercises. Prerequisite: 315.

IND E 419 Plant Layout and Material Handling (4) Storch Design of new or expanding industrial facilities. Consideration of work organization and layout. Study of basic design of plant systems, including plumbing, electrical, lighting, illumination, acoustics, and waste handling. In depth coverage of material handling system design and equipment choices.

IND E 420 System Safety and Reliability Engineering (3) Kapur Applications of statistical and algebraic techniques to system reliability. Derivation and discussion of failure distributions; quality control; analysis of reliability test data; maintenance policies and Monte Carlo simulation techniques. Prerequisite: 315.

IND E 424 Simulation (4) Hein Discrete-event simulation methodology emphasizing model formulation and construction, statistical base for simulation modeling, and computer languages. Applications to industrial and manufacturing problems in conjunction with lab. Prerequisite: 315 or equivalent. Offered: A.

IND E 430 Manufacturing Scheduling and Inventory (4) Hein, Storch Manufacturing scheduling and inventory control for different work organizations. Coverage of workforce scheduling, job shop scheduling, assembly line balancing, MRP, just-in-time, OPT, and large project scheduling. Prerequisites: 325, ENGR 315.

IND E 455 User Interface Design (3) Barfield Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Prerequisites: ENGR 315 and 316 or equivalent, or permission of instructor. Offered: jointly with TC 455.

IND E 485 System Engineering Project (3) A system engineering project course that develops requirements and specifications and management systems for system development. Integration of simulation optimization, control and decision theory methods to the system engineering of large complex projects. Prerequisite: senior standing, permission of instructor.

IND E 493 Computer Integrated Manufacturing (4) Design and control of computer-based production systems. Focus on selection and integration of flexible manufacturing technology, computer hardware, application and operating system software, data communication networks, data management systems. Laboratory assignments concentrate on programming and integrating system components. Current literature and recommended texts used as reference sources. Prerequisite: 317.

IND E 494 Design In the Manufacturing System (4) Smith Engineering design in manufacturing firms is presented. Topics include design methodology, concurrent engineering, and project management. Focus on the relationship between product design and manufacturing (design for production and assembly). Prerequisites: 493, M E 304 and 343.
IND E 495 Industrial Engineering Design (3) Smith Design seminar laboratory involving identification and synthesis of engineering factors to plan and achieve specific project goals. Current literature and recommended texts are used as reference sources. Lecture and/or laboratory. Prerequisite: 494.

IND E 498 Special Topics In Industrial Engineering (3) Lecture and/or laboratory. Maximum of 9 credits may be applied toward an undergraduate degree. Prerequisite: permission of instructor.

IND E 499 Special Projects (2-5, max. 9) Prerequisite: permission of department Chairperson.

Courses for Graduates Only

IND E 510 Applications of Optimization In Engineering Design (3) Zabinisky Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering optimal design. Prerequisites: AMATH/MATH IND E 515 and MATH 328 or permission of instructor. Offered: jointly with AMATH 510.

IND E 511 Management Decision Models (3) Iverson Queueing systems, using decision models. Topics include elements of a decision, theory of optimal decisions, resource allocation, simulated decision making, decisions under uncertainty, risk and pressure, utility theory, and game theory. Projects in manufacturing, community health, construction, and urban development. Prerequisites: ENGR 250 and ENGR 315 or permission of instructor.

IND E 513 Linear Optimization Models In Engineering (3) Zabinisky Advanced formulation techniques to expand applications of linear programming to large-scale models. Appreciation of role of optimization models in engineering applications through introduction of techniques such as decomposition. Individual engineering projects. Prerequisites: 324 and MATH 306 or permission of instructor.

IND E 521 Quality Control In Manufacturing (3) Storch Design of quality control systems in manufacturing. Use of advanced statistical process controls, sampling inspection techniques, process capability, and other statistical tools. Also included are vendor sourcing and control tools, methods for establishing specifications and tolerances, quality function deployment, and other quality control techniques. Prerequisite: 451 or equivalent.

IND E 535 Engineering Simulation (3) Engineering applications of computer simulation. Topics include discrete and continuous simulation concepts, general and specialized simulation languages, suitability of a problem for simulation analysis, data collection and preparation, output analysis, and simulation project planning and justification. Prerequisite: 424 or equivalent.

IND E 538 Large Assembly Manufacturing Systems (3) Storch Presents principles of group technology, design for manufacture, product-oriented work breakdown structure. Application to shipbuilding, aircraft, rail-car, and truck manufacture. Techniques of production planning, scheduling and control, organization, and plant layout, as well as the role of the computer, are studied in detail. Prerequisite: graduate standing.

IND E 541 Human Factors Engineering (3) Storch Human performance models, human-computer interface design, interactive graphics, information processing, virtual environments. Three-dimensional spatialized sound, stereoscopic displays, human-computer interaction. Hardware for producing stereoscopic images and computer synthesized spatialized sound. Auditory and visual modalities as related to interface design. Prerequisites: 351 or PSYCH 335 and one course in design of experiments.

IND E 542 Haptic Interface Design (3) Barfield Research oriented seminar focusing on tactile and kinesthetic modalties of haptic interface design, including tactile displays, the kinesthetic sense, input devices, and virtual environments. Hardware for producing haptic interfaces and psychological literature relating to the kinesthetic sense as related to interface design. Prerequisite: 541 or permission of instructor.

IND E 543 Virtual Interface Technology (1/3) Furness Explores advanced concepts and technologies for interfacing humans to complex machines, with focus on virtual interfaces. Interface design principles reviewed from psychological and technological perspectives. Hardware, software, and mindware aspects of virtual interfaces investigated. Applications postulated and designed. Prerequisite: graduate standing in College of Engineering or permission of instructor.

IND E 544 Virtual World Development (3) Furness Software development: implementation, physiological modeling, and more. Constraints, and the modeling and philosophy of inclusion. Development of software tools, editing and interaction techniques, disposition of virtual world entities, nature of space, situated knowledge, dexterous models, multiple experimental mathematics, cyber space. Cultural, legal, moral, ethical issues. Prerequisite: 543 or permission of instructor.

IND E 554 Decision Modelling (3) Iverson Current environmental issues concerning industrial engineers and the decision modelling techniques appropriate to conflict resolution, simulation, and assessment of impacts. Modelling techniques applied to topics ranging from stress management and quality improvement in the workplace to the principles of sustainable resource management. Prerequisite: 511 or permission of instructor.

IND E 555 Health Systems Engineering (3) Iverson Applications of industrial engineering techniques, processes, and methodologies to the operations and management decisions of hospitals and to policy analysis in health care systems, including quality improvement, decision analysis, system dynamics modelling, and simulation. Prerequisite: 511 or permission of instructor.

IND E 591-, 592-, 593- Seminar (0-,0-,1-) Credit/no credit only. Prerequisite: graduate standing in Industrial Engineering or permission of instructor.

IND E 599 Special Topics In Industrial Engineering (1-5, max. 9) Written report required. Prerequisite: permission of supervisor.

Materials Science and Engineering

302 Roberts

Materials science and engineering is an interdisciplinary field that addresses the scientific fundamentals of materials, their processing, and their engineering design. Courses in this field provide technical applications of principles of chemistry and physics are applied to provide an understanding of the structure of materials and the manner in which the structure determines the properties. Scientific problems in either the pure or applied sciences are necessary, which then can be integrated with, and designed to accommodate, the needs of modern technology.

Ceramic materials are high-temperature resistant, chemically durable, strong, and rigid. The ceramic engineering program provides students with an understanding of the chemical, electrical, optical, mechanical, and thermal properties of ceramics; of processing methods and their effects on the structure and properties; and of the feasibility and economics of manufacturing for specific applications. The study of electronic and optical materials is also available in the program.

Metallurgical engineering is concerned with the processing, fabrication, and utilization of metals, alloys, and other engineering materials. Extractive metallurgy relates to the processing and refining of metals and their compounds. Physical metallurgy is concerned with the structure and properties of materials, the development of new materials with improved properties, and the application and performance of materials in modern engineering systems and design. The study of electronic and optical materials is also available in the program.

Undergraduate Program

Bachelor of Science In Ceramic Engineering Degree

Entrance to the program requires the equivalent of at least 64 credits earned at the UW, or their transfer equivalent, with a 2.00 GPA and attainment of 2.0 in specified courses. Due to competitive admissions, attaining the minimum GPA does not ensure admission; in recent years a 2.50 GPA has been required. Entrance requirement details may be obtained from the department or the University's Office of Admissions. Application forms and additional information are available from the department office. Completion in the program is subject to the policy defined by the College of Engineering.

Graduation Requirements: Students must complete the College of Engineering General Education requirements and select the following courses from the Engineering Fundamentals category: ENGR 123, 170, 210, 215, 220, 250. The upper-division professional program consists of 77 credits of required courses including courses in materials structure and properties, analysis techniques, and thermodynamics, plus a 4-credit senior project or design alternate. Courses in ceramic processing and properties are designed to develop technical expertise applicable to modern ceramic engineering practice. Additional courses must be completed for a total of 192 credits for the B.S.Cer.E. degree.

A variety of financial aid is available to students in ceramic engineering. In addition to need-based aid provided through the University's Office of Financial Aid, companies and individuals with interest in developing ceramic engineering students have provided scholarships for students at all levels who have been admitted to the program. Specific information and application forms are available in the department office, 302 Roberts.

COLLEGE OF ENGINEERING / MATERIALS SCIENCE AND ENGINEERING 307
Bachelor of Science in Metallurgical Engineering Degree

Entrance to the program requires the equivalent of at least 64 credits earned at the UO, or their transfer equivalent, with a 2.00 GPA and attainment of 2.0 in specified courses. Due to competitive admissions, obtaining the minimum GPA does not ensure admission; in recent years a 2.50 GPA has been required. Entrance requirement details may be obtained from the department or the University's Office of Admissions. Application forms to enter the program are available from the department office. Continuation in the program is subject to the policy defined by the College of Engineering.

Graduation Requirements: Students must complete the College of Engineering General Education requirements and select the following courses from Engin­neering Fundamentals category: ENGR 170, 210, 215, 220, 250. Remaining lower-division courses are selected from among those recommended. Metallurgy majors must complete a 6-credit, upper-level science course requirement, and other with the adviser's approval. Recommended courses to fulfill this requirement include CHEM 223, 224: 350, 351; 455, 456; or PHYS 224, 225. 14 credits of technical electives are required, of which 3 credits must be at the upper level. The design and technical elective courses must meet standards specified in the advising guide. A 4-credit senior problem or design alternate is required. In addition to the College and departmental requirements specified above, additional courses may be completed in addition to the normal graduation course requirements.

Master of Science in Materials Science and Engineering and Master of Science Degrees

For these master's degrees, a minimum of 30 credits of course work and the satisfactory completion of an M.S. thesis research problem are required. Fifteen of the course credits are specified to include courses on chemical kinetics, diffusion, crystal structure and imperfections, microstructure, and phase transformations, and graduate seminar. Other courses may be required for specific program options. The residence and graduation requirements follow those of the Graduate School.

Doctor of Philosophy Degree

Students who have completed one year of graduate work must take the Ph.D. qualifying examination the next time it is offered to determine whether the faculty will advise continued study proceeding to the General Examination for the degree of Doctor of Philosophy. A critical examination of the applicant's complete academic record, recommendations, and proposed course of study will be a part of this decision. In addition to course work, each student is required to pass the General Examination, which is sufficiently comprehensive to demonstrate the student's ability to deal with broad aspects of materials science, as well as with advanced specialization. Proficiency in basic research is of paramount importance. Each prospective candidate is required to present a written dissertation that makes an original and independent contribution to knowledge of the student's field of specialization.

Research Facilities

The research laboratories in the Department of Materials Science and Engineering are well equipped for research. Facilities include equipment for electron and optical microscopy, x-ray diffraction, high-temperature heat treatment and mechanical testing, specialized processing equipment, including hot and cold isostatic presses, nitrogen reaction furnaces, and automated TGA, DTA analysis systems. Equipment for analyses of particle size, surface area, and pore size is also available. Students have liberal access to the large University mainframe computers, as well as local mini and microcomputers.

Financial Aid

A limited number of teaching assistant and research assistant appointments are available. Early application and direct correspondence or interviews with faculty members who may have open positions on research projects are encouraged. Requests for application forms and financial aid should be directed to the graduate program coordinator.

Correspondence and Information

Graduate Program Coordinator

Graduate Program

The Department of Materials Science and Engineering offers programs of study leading to the degree of Master of Science in Materials Science and Engineering, with defined options in ceramic engineering, metal­lurgical engineering, and materials science. The Doctor of Philosophy program is offered with defined pathways in ceramic engineering, metallurgical engineering, and materials science.

The materials science option or pathway is a course of study that combines the basic elements of understanding ceramics, metals, polymers, composites and electronic materials. Many specialized courses, including engineering fracture mechanics, semiconductor devices, and surface chemistry, may be taken in other departments to provide a broad, yet basic, materials study program.

Ceramic engineering graduate programs are designed to develop a fundamental understanding of the physical, chemical, and structural relationships that influence the properties and applications of ceramic materials. Processing, the development of microstruc­ture, and the relationships of microstructure to properties are considered from a basic viewpoint that is applicable to a broad range of materials.

Graduate programs in metallurgical engineering encompass a variety of courses and research programs that are related to the physical and chemical aspects of metals, alloys, and related engineering materials. Programs in the physical metallurgy and materials science areas include the structure and properties of alloys, phase transformations, biomaterials, lattice defects, the optical properties of nonmetallic solids, failure analysis, x-ray diffraction, and the mechanical behavior of materials. Programs in the area of extractive metallurgy and minerals processing include metallur­gical thermodynamics, rate phenomena, extractive process design, and carbonization reduction processes.

In addition, the department is authorized to supervise an option in materials science and engineering that leads to the College of Engineering Master of Science degree. This degree program is intended to accommodate students who have a strong science background but lack an undergraduate engineering degree. The required courses are the same for all of the above degrees. Students with deficiencies in their intended area of engineering specialization may be required to take more courses in addition to the normal graduate course requirements.

Faculty

Chairperson

Professors

Andersson, Donald F. * 1947, (Emeritus); BS, 1941, Univer­sity of Illinois; mining and exploration.

Archbold, Thomas F. * 1961; PhD, 1961, Purdue Uni­versity; physical metallurgy corrosion, diffusion, oxida­tion, metal failures.

Fischbach, David B. * 1969, (Emeritus); PhD, 1955, Yale University; structure and properties of carbons, graphite, other non-oxide ceramics, and composite materials.

Ghose, Subrata * 1972, (Adjunct); PhD, 1959, Univer­sity of Chicago; lattice dynamics, structural and mag­netic phase transitions, thermal expansion.

Inoue, Kanny * 1993, (Research); PhD, 1977, Osaka City University (Japan); mechanical and physical prop­erties; phase transformations, material characterization by x-ray plus EM.

Kaloni, Gretchen * 1990; PhD, 1982, Massachusetts Institute of Technology; crystalline defects, computer simulation, rapid solidification of ceramics.

Pearssil, Thomas P. * 1989; PhD, 1973, Cornell Univer­sity; physics of semiconductors and the technology of semiconductor devices.

Polonis, Douglas H. * 1955; PhD, 1955, University of British Columbia (Canada); physical metallurgy, phase transformations, mechanical properties of materials.

Rao, Y. Krishna * 1976; PhD, 1965, University of Penn­sylvania; chemical and extractive metallurgy, ore dressing.

Scott, William D. * 1965; PhD, 1961, University of California (Berkeley); mechanical properties of ceramics, composites, twinning in alumina, optical microscopy.

Slobee, Thomas Gaines * 1986; PhD, 1985, Stanford University; physics of solids, optical properties, ther­moluminescence, compound semiconductors.

Taya, Minoru * 1986, (Adjunct); PhD, 1977, Northwest­ern University; composite materials, elasticity and plasticity, impact physics, fracture theory.

Whittemore, Osgood J. * 1964, (Emeritus); Car.E.(Professional), 1950, Iowa State; ceramic process­ing, refractories, industrial minerals.

Associate Professors

Bordia, Rajendra Kumar * 1991; PhD, 1986, Cornell University; densification and microstructural develop­ment in ceramics and ceramic compounds.

Kuhn, Kelin J. * 1987, (Adjunct); PhD, 1985, Stanford University; molecular beam epitaxy growth of strained-layer InGaAs/GaAs quantum wells and superlattices.

Miller, Alan D. * 1967; PhD, 1967, University of Wash­ington; instrumental analysis, high-temp equilibria pro­cessing, electronic ceramics, cooperative education.

Oruchi, Fumiyo * 1992; PhD, 1981, University of Florida; nucleation and growth of thin film materials, surface science, glass, device applications.

Rogers, James W. Jr. * 1990, (Adjunct); PhD, 1979, University of Texas (Austin); surface chemistry and engineering, applications to thin film deposition.

Sarikaya, Mehmet * 1984; PhD, 1982, University of California (Berkeley); noncopical (TEM), imaging, diffraction and spectroscopy, phase transformations, biocrystallization.

Stang, Robert George * 1973; PhD, 1972, Stanford University; elastic and plastic deformation of materials, high-temperature creep in metals and ceramics.
College of Engineering / Materials Science and Engineering 309

Vinay, Christopher * 1987, (Adjunct); PhD, 1983, Cambridge University (UK): phase transformations and microstructure/property relationships in polymers and liquid crystals.

Assistant Professors

Brush, Lucien N. * 1990, PhD, 1988, Carnegie-Mellon University; computational modeling of solidification, modeling studies of materials processing.

Haji, Sossina M. * 1993, PhD, 1992, Massachusetts Institute of Technology; ion transport in solids, crystal growth, x-ray diffraction.

Yan, Hong * 1991, (Research); PhD, 1991, University of Michigan; magnetic properties, computer modeling of materials surfaces and interfaces.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Ceramic Engineering

CER E 330 Ceramic Engineering Excursion (1) - Inspection trip. Credit/no credit only. Offered: A.

CER E 401 Equipment and Plant Design (3) - The design process and its application in ceramic-engineering design projects. Prerequisite: CER 330. Offered: Sp.

CER E 411 Vitreous State (4) - Chemistry and physics of glass, glazes, and porcelain enamels; structure, properties, and processing of vitreous materials. Prerequisite: MSE 316 or permission of instructor. Offered: Sp.

CER E 413 Physical Ceramics: Mechanical Properties (3) - Mechanical properties, elasticity, strength, thermal shock, and high temperature effects relative to structural design. Fracture mechanics and notch sensitivity of brittle materials. Environmental effects, plastic flow, and high temperature deformation. Prerequisite: ENGR 220. Offered: A.

CER E 414 Electrical Properties of Ceramics (3) - Ionic and electronic conduction in crystalline and non-crystalline inorganic solids. Dielectric and ferroelectric behavior, magnetic properties of ferrimagnetic materials, optical properties of dielectrics. Undergraduate ceramic engineering majors must take 415 concurrently. Prerequisite: E E 306. Offered: W.

CER E 415 Electrical Properties of Ceramics/Laboratory (1) - Ionic and electronic conduction in crystalline and noncrystalline inorganic solids. Dielectric and ferroelectric behavior, magnetic properties of ferrimagnetic materials, optical properties of dielectrics. Prerequisite: concurrent enrollment in 414. Offered: W.

CER E 416 Mechanical Properties Laboratory (1) - Measurements of the mechanical properties of ceramics: strength, fracture, toughness, thermal shock damage. Use of Weibull statistics to characterize strength and failure. Prerequisites: 413 which may be taken concurrently, ENGR 220. Offered: A.

CER E 420 Colloidal Ceramics (3) - Properties and surface chemistry of ceramic colloids. Topics include adsorption, swelling, gels and their contributions to cementsitious bonding, ion exchange, rheological properties, and analytical techniques applicable to these studies.

CER E 421 Ceramic Processing (4) - Technology of ceramic fabrication processes. Material characterization at processing stages for control. Laboratory study of all operations in the manufacture of selected ceramic products. Offered: A.

CER E 470 Refractories (3) - Chemical and mineralogical composition; processing methods; thermal, physical, and chemical properties and tests; application in high-temperature processes. Offered: W.

Materials Science and Engineering

MSE 300 Introduction to Materials Science and Engineering (5) - Introduces the materials field to new department majors. Examples are drawn from ceramics, metals, polymers, electronic materials and composites. Structure/properties/manufacturing/design relationships are emphasized. Offered: A.

MSE 305 Phase Equilibria (4) - Phase equilibria in ceramic and metal systems of one, two, and three components. Use and determination of phase equilibrium diagrams. Prerequisites: 322 or ENGR 260. Offered: W.

MSE 315 Kinetic Processes and Transformations in Materials (4) - Applications of thermodynamic and kinetic principles to the study of transformations and reactions in engineering materials. Thermal activation and rate equations; solid state diffusion; nucleation and growth; phase transformations; examples of important reactions including crystal growth, recrystallization, precipitation in solids, sintering, and devitrification. Prerequisites: 314, ENGR 170. Offered: W.

MSE 317 Physical Materials Laboratory (2) - Experimental topics in x-ray diffraction and optical microscopy. To accompany 314. Offered: A.

MSE 322 Thermodynamics in Materials Systems (4) - Quantitative applications of thermodynamics to systems of interest to metallurgical and ceramic engineers. Detailed review of thermodynamic quantities and equations of state. Offered: A.

MSE 330 Processing of Inorganic Materials (4) - Fundamental and technological aspects of processing of metals, ceramics and semiconductor materials, transport processes relevant to materials processing; low and high temperature routes for refining materials; liquid state and vapor phase processing inorganic materials. Offered: Sp.

MSE 399 Introduction to Research and Design (1) - Research planning and design in materials science and engineering introduced by the faculty to facilitate student selection of senior project topic. Offered: Sp.

MSE 421 Thermodynamics of Solids (3) - Applications of thermodynamics to the solid state. Statistical Interpretation of entropy. Heterogeneous equilibrium. Thermodynamics of surfaces and of defects in solids. Prerequisite: 322 or equivalent. Offered: W.

MSE 423 Fiber Composite Materials (3) - Introduction to the materials science of composites composed of strong fibers in polymer, metal, or ceramic matrices. Properties of the individual phases and of the fiber/matrix interface; micromechanics of load transfer from matrix to fiber; fabrication, and elastic and failure properties of the composites. Prerequisite: ENGR 170 or permission of instructor. Offered: A.

MSE 433 Polymeric Materials (3) - Offered: A.

MSE 442 Seminar in Ethics and Safety (1) - Deals with issues of engineering ethics and industrial safety within the context of materials science and engineering. Credit/no credit only. Prerequisite: senior standing. Offered: W.

MSE 466 Physical Properties of Materials (4) - Introduction to elementary solid-state concepts in materials. Atom bonding, statistical mechanics, free electron and band theories; thermal properties. Application of principles to conduction in metals, insulators, semiconductors, and to magnetic and optical processes in solids. Offered: W.

MSE 467 Electronic Materials Processing (3) - Materials and processes used in the manufacture of electronic components: Basic principles of crystal growth, deposition, doping, component delineation, and packaging as they apply to hybrid and integrated circuits and devices. Offered: Sp.

MSE 498 Special Topics (1-5, max. 8) - Special topics in materials science and engineering offered as a course with lectures, conferences, or laboratory. Prerequisite: senior standing or above and permission of faculty member. Offered: AWSPs.

MSE 499- Special Project (1-5, max. 5) - Materials science and engineering field or laboratory investigations in group or individual setting. Prerequisite: 399. Offered: AWSPs.

Metallurgical Engineering

MET E 421 Metallurgical Processing (4) - Principles and applications of techniques used to process metals and alloys including solidification and casting, heat treating, forming, joining and machining and their effects on microstructure and properties. Prerequisite: ENGR 170. Offered: A.

MET E 432 Corrosion of Engineering Materials (3) - Applications of physical chemical principles to the reaction of materials with their environments. Prevention and control of corrosion and oxidation processes. Corrosion problems in materials applications. Offered: W.

MET E 435 Corrosion (1) - Archbold Laboratory experiences in application of physical chemical principles to the reaction of materials with their environments. To accompany 432. Offered: W.

MET E 461 Engineering Physical Metallurgy (4) - Phase transformations and strengthening mechanisms in ferrous and nonferrous alloys; heat treatment and microstructure control; physical metallurgy of carbon and alloy steels, aluminum and titanium alloys; microstructure-property relationships and alloy design. Offered: A.

MET E 462 Mechanical Behavior of Metals (3) - Theories of elastic and plastic deformation in materials. Application of these theories in design, stress and strain, tensile and compression loading, yielding and plastic deformation, fracture, introduction to fracture mechanics, creep and fatigue. Offered: W.

MET E 463 Reliability and Design in Metallurgical Systems (4) - Metallurgical design problems and failure analysis. Properties of commercially important engineering alloys. Prerequisite: MSE 316 or equivalent. Offered: Sp.

MET E 464 Extractive Process Analysis (3) - Extractive processes analyzed by the methods of material and energy balances, computerized thermodynamics, process kinetics and reactor theory. Introduction to process optimization. Prerequisite: MSE 322 or equivalent. Offered: Sp.

MET E 465 Mechanical Behavior Laboratory (1) - Laboratory experiences in mechanical behavior of metals. To accompany 462. Offered: W.
Courses for Graduates Only

Materials Science and Engineering

MSE 510 Bonding, Symmetry, and Crystallography (3) Atomic bonding, coordination; structures, stability of organic and inorganic compounds in the solid-state. Reciprocal lattice concept, its vectorial basis. Crystallography of solids, emphasis on point and space group symmetries. Structures of complex organic, inorganic compounds. Introduction to physical properties described by tensors: elasticity, optical magnetic, electrical, thermal properties. Offered: A.

MSE 512 Experimental Transmission Electron Microscopy (3) Fundamentals of electron optics as applied to microscopy; applications of contrast theories and electron diffraction with emphasis on defects and multiphase structures in crystalline solids. Prerequisite: 510. Offered: W.

MSE 513 Transmission Electron Microscopy Laboratory (2) One-four-hour laboratory and one two-hour discussion/demonstration per week; metallic, ceramic, semiconducting, biological, and organic materials. Emphasis on convergent beam electron diffraction; quantitative elemental compositional and chemical analysis with energy dispersive x-ray spectroscopy and electron energy loss spectroscopy; high voltage electron microscopy. Prerequisite: 512 and 513. Offered: even years Sp.

MSE 518 Advanced Metallurgy (3) Principles of image formation in crystalline and amorphous materials at the atomic resolution level; with emphasis on conventional electron preparation techniques; diffraction, imaging, and spectroscopy techniques in electron microscopy. Prerequisite: MSE 512 which may be taken concurrently. Offered: W.

MSE 519 Advanced Transmission Electron Microscopy (3) Principles of image formation in crystalline and amorphous materials at the atomic resolution level; with emphasis on conventional electron preparation techniques; diffraction, imaging, and spectroscopy techniques in electron microscopy. Prerequisite: MSE 512 which may be taken concurrently. Offered: W.

MSE 520 Seminar (1, max. 6) Review of research problems in recent literature. Registration required for all graduate students. Credit/no credit only.

MSE 521 Mechanical Behavior of Ceramics (3) Dislocation structures in ceramics; influence of dislocations on the deformation and fracture of single crystals and polycrystalline ceramics; brittle fracture and theoretical strength. Prerequisite: 511 or permission of instructor.

MSE 523 Advanced Extractive Metallurgy (3) Physical chemistry of solutions, mattes, fused salts, and slags. Discussion of papers from current literature. Prerequisite: basic course in thermodynamics or physical chemistry or permission of instructor.

MSE 524 Applied Rate Phenomena (3) Introduction to rate theory and transport processes. The principal thrust is on applications in ceramics and metallurgy. Prerequisite: basic course in transport phenomena or permission of instructor. Offered: W.

MSE 525 Thermodynamic Topics in Materials Science (3) Description in application of classical and statistical thermodynamics to systems of current interest. Offered:

MSE 526 Dynamic Behavior of Metallurgical Systems (3) Interpretation of the behavior of systems by application of the methods of process analysis and control theory; modeling of systems, exploration of instability and periodic response, and review of current industrial control processes. Prerequisite: graduate standing in engineering or permission of instructor.

MSE 541 Theoretical Structural Metallurgy (3) Detailed study of the general properties and effects of point, line, and surface defects in crystalline solids. Prerequisite: MET E 462.

MSE 551 Diffusion in Solids (3) Theories and principles of diffusivity; transfer phenomena; atomic concepts; equilibrium defects; impurity, chemical potential gradient, grain boundary and dislocation effects in metals and nonmetals.

MSE 553 Vacuum Science and Technology (3) Fundamental theory and gas kinetics and treatment of gas flow, working principles of vacuum pumps and gauges, characteristics required of the vacuum components, material selection, fundamentals essential to vacuum system design. Covers both fundamental and practical aspects of modern vacuum science and technology. Offered: W.

MSE 561 Phase Transformations in Material Systems (3) Thermodynamics and kinetics of solid state reactions; phase diagrams, theories of nucleation and spinodal decomposition, growth models, phase morphology and microstructure development, precipitation from solid solutions, examples of specific transformation types. Offered: Sp.

MSE 562 High Temperature Composites (3) Thermo-mechanical behavior and environmental degradation of high temperature composites (metal, ceramic, and intermetallic matrix composites) and carbon/carbon composites addressed. Covers related topics such as processing (primary and secondary). Recommended: 423 or M E 450. Offered: jointly with M E 562; odd years.

MSE 565 Electron Theory of Materials (3) Solid-state concepts of materials. Atomic bonding, statistical mechanics, Brillouin zone theory. Applications to conduction, optical, and magnetic properties of metals, semiconductors, and insulators. Prerequisite: 466. Offered: A

MSE 566 Superconductors and Magnetic Materials (3) Theories of magnetic phenomena: diamagnetic, paramagnetic, ferromagnetic, superconducting. Physical properties of superconducting materials. Prerequisite: MSE 452 or equivalent. Offered: W.

MSE 571 Polymeric Materials (3) Relationships between configuration, conformation, molecular order, microstructure, properties of polymeric materials. Concepts relevant to tailoring polymer molecules and microstructures for specific applications. Interactions between polymers and their in-service environment. Characterization and processing techniques relevant to polymeric materials. Prerequisite: one semester or two quarters of organic chemistry. Offered: jointly with BIOEN 571; A.

MSE 572 Liquid Crystals (3) Properties of the liquid crystalline state are discussed in fundamental chemical and physical terms. Engineering and biological uses of liquid crystals are described in detail. Appropriate microstructural and nanostructural characterization techniques are emphasized throughout. Prerequisite: Molecular Bioengineering Fundamentals. Offered: jointly with BIOEN 572; Sp.

MSE 569 Special Topics in Materials Science (1-5, max. 5) Studies of special advanced topics in materials science. Prerequisite: permission of instructor. Offered: AWSPs.

MSE 600 Independent Study or Research (*) Offered: AWSPs.

MSE 700 Master's Thesis (*) Offered: AWSPs.

MSE 800 Doctoral Dissertation (*) AWSPs.

Mechanical Engineering

143 Mechanical Engineering

The Department of Mechanical Engineering focuses on increased productivity through modern design methods, automated manufacturing, and introduction of new materials. It also continues its strong history of involvement with conversion and management of energy. The department offers instruction and research in three principal areas: materials and manufacturing, systems and design, and energy and fluids.

The department offers undergraduate and graduate degree programs, with courses in design, analysis, and fabrication of mechanical devices; analysis of vibrations and failure; automated manufacturing; combustion and energy systems; fluid mechanics; computer-aided design; robotics; and applications of mechanical engineering to interdisciplinary fields.

Undergraduate Program

The undergraduate program in mechanical engineering provides the sound educational basis in the mathematical, chemical, and physical sciences, and in computational, graphical, and written communication skills that is needed for professional work in the field.

Prospective students should obtain a copy of the Mechanical Engineering Admission Guide that contains more details regarding admission, and the Mechanical Engineering Undergraduate Advising Guide that contains a curriculum flow chart and information on scholarships, scheduling, and the continuation policy.

Admission to the department is usually by the end of the sophomore year. Prospective students are encouraged to apply for autumn or spring admission as soon as they are eligible because enrollment in the department is limited and is controlled in large part by the number of students who have recently graduated. Only students who desire enrollment must formally apply to, and be accepted by, the department admissions committee. The primary admission criterion is the student's probable success in the program as evidenced by academic performance, work experience, and other factors.

The minimum entrance requirements are 64 credits in courses applicable to the degree, a GPA of 2.50, and a minimum grade of 2.0 in each of the following courses, which are required for admission: MATH 124, 125, 126, and 307; CHEM 140, 141, and 150, 151; PHYS 121/131 and 122/132; CSE/ENGR 142, ENGR 210, 220, and 230; one 5-credit English composition course; and ENGR 231.

Bachelor of Science in Mechanical Engineering Degree

Graduation Requirements: the student must satisfactorily complete a minimum of 192 credits, with 115 credits in General Education and Engineering Fundamentals as specified above by the College of Engineering, as well as 61 credits of department-required
courses and 12 credits of mechanical engineering option courses (400-level). A cumulative GPA of 2.00 or better, including a minimum GPA of 2.00 in all professional courses, is required.

Typical department-required courses include machine design analysis, behavior of engineering materials, manufacturing processes, mechanics of solids, system dynamics, thermodynamics, heat transfer, fluid mechanics, and mechanical engineering design.

Correspondence and Information

All inquiries concerning the mechanical engineering program should be addressed to the Department of Mechanical Engineering, Undergraduate Advising Office, 143 MEBS, FU-10. If possible, prior to applying for admission, prospective students are urged to make an appointment in the office by calling (208) 885-0908.

Graduate Program

The Department of Mechanical Engineering offers graduate programs leading to the degrees of Master of Science in Mechanical Engineering and Doctor of Philosophy. The department also provides an authorized option leading to the College-wide Master of Science in Engineering degree. These provide a balanced combination of formal instruction and independent research or design experience. Individual projects may be drawn from a wide spectrum of topics, which include mechanical and energy conservation systems, heat transfer, combustion, fluid mechanics, applied mechanics, including computational mechanics, computer-aided design and manufacturing, production systems, materials behavior, robotics, and applications of mechanical engineering science to a variety of such interdisciplinary fields as bioengineering, ocean engineering, and acoustics. Flexible requirements for course work provide opportunities both for a broad scientific and professional background and for specialty training.

Research Facilities

The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for constructing specialized research equipment. These include experimental stress analysis; materials testing; synthesis and simulation of electromechanical control systems; fabrication, welding, and other metal fabrication operations; computer-aided facilities for CAD/CAM research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat transfer analysis, and a bioengineering flow facility.

Financial Aid

Financial aid is offered to full-time graduate students so far as funds permit. This aid may be in the form of a research assistantship for sponsored programs, a fellowship provided by the University or industry, or a teaching assistantship.

Correspondence and Information

Graduate Program Coordinator
143 Mechanical Engineering, FU-10

Faculty

Chairperson
Richard Corlett

Professors

Alexander, Daniel 1960, (Emeritus); PhD, 1977, Washington State University; engineering design.

Balise, Peter 1950, (Emeritus); MS, 1950, Massachusetts Institute of Technology; systems analysis and control.

Chalupnik, James 1964, PhD, 1964, University of Texas (Austin); sound and vibration, wave propagation.

Childs, Morris 1954, (Emeritus); PhD, 1956, University of Illinois; fluid mechanics, gas dynamics, turbulent boundary layers.

Corlett, Richard 1964; PhD, 1963, Harvard University; energy systems and combustion.

Daly, Colin H. 1967; PhD, 1966, University of Strathclyde (UK); bioengineering, materials.

Day, Emmett E. 1947; (Emeritus); PhD, 1962, University of California (Berkeley); materials, experimental stress analysis.

Depew, Creighton A. 1960; PhD, 1960, University of California (Berkeley); heat transfer, fluid mechanics.

Emery, Ashley F. 1961; PhD, 1961, University of California (Berkeley); bioengineering, energy conservation in buildings and conditioning.

Frey, Joseph C. 1983, (Emeritus); MSME, 1941, University of Wisconsin; combustion, lubrication.

Galle, Kurt R. 1960, (Emeritus); PhD, 1951, Purdue University; instrumentation, controls, bioengineering.

Garbini, Joseph 1979; PhD, 1977, University of Washington; systems and controls analysis, instrumentation, manufacturing automation.

Gessner, Frederick B. 1967; PhD, 1964, Purdue University; fluid mechanics, turbulence.

Hyman, Barry 1975; PhD, 1965, Virginia Polytechnic Institute & State University; energy policy, technology and public policy; quantitative methods.

Jorgensen, Jens E. 1973; DSc, 1969, Massachusetts Institute of Technology; systems analysis, manufacturing, automation and controls, forest engineering.

Kapur, Kailash C. 1992, (Adjunct); PhD, 1989, University of California (Berkeley); quality and reliability engineering, system design, total quality management.

Kippenhan, Charles J. 1963, (Emeritus); PhD, 1948, University of Iowa.

Kobayashi, Albert S. 1958; PhD, 1958, Illinois Institute of Technology; fracture mechanics, bioengineering.

Kosko, George 1980; PhD, 1974, Eotvos Lorand University (Hungary); applications of stochastic processes, reacting turbulent flows, reactor dynamics, two-phase flow.

Love, William J. 1970, (Emeritus); PhD, 1952, University of Illinois; design, mechanics, power systems.

Malte, Philip C. 1979; PhD, 1971, University of Michigan; combustion, thermodynamics, fluid mechanics.

McCormick, Norman J. 1966; PhD, 1965, University of Michigan; reliability and risk analysis, reactor physics, neutron and photon transport.

McFeron, Dean E. 1958, (Emeritus); PhD, 1956, University of Illinois; heat transfer and thermal power processes.

Mills, Blake D. Jr. 1946, (Emeritus); MEng, 1947, University of Washington.

Morrison, James B. 1946, (Emeritus); MS, 1954, University of Washington; design, dynamics.

Murphy, Stanley R. 1952, (Emeritus); PhD, 1959, University of Washington.

Patt, David T. 1981; PhD, 1968, University of California (Berkeley); turbulent combustion, computer simulation.

Riley, James J. 1983; PhD, 1971, Johns Hopkins University; fluid mechanics, especially turbulent flows.

Taggart, Raymond 1959, (Emeritus); PhD, 1956, Queen's University (UK); mechanical metallurgy.

Taya, Minoru 1966; PhD, 1977, Northwestern University; composite materials, elasticity and plasticity, impact physics, fracture theory.

Vesper, Karl H. 1969; PhD, 1969, Stanford University; business policy, mechanical engineering, marine studies.

Wolsak, Jan 1965, (Emeritus); PhD, 1965, University of California (Berkeley); mechanics of materials, manufacturing processes.

Associate Professors

Adams, Bruce H. 1970; PhD, 1972, University of California (Berkeley); vessel safety and stability, floating structures, waves, ship resistance, model testing.

Berg, Martin C. 1986; PhD, 1986, Stanford University; control system design, computer-aided digital control system design, dynamics.

Bodio, John R. 1964, (Emeritus); PhD, 1969, Carnegie-Mellon University; fluid mechanics, heat transfer, solar energy.

Calkins, Dale 1979; DEng, 1976, University of California (Berkeley); ship hydrodynamics and motions, naval architecture, computer-aided design and engineering.

Chaik, William 1957, (Emeritus); MSME, 1951, University of Washington; design graphics.

Ford, Paul W. 1957, (Emeritus); MEng, 1959, University of Washington; manufacturing processes, metal casting.

Forster, Fred 1977; PhD, 1972, Stanford University; physiological fluid dynamics, medical ultrasound applications, Doppler experimental fluid mechanics.

Garner, Mark 1988; PhD, 1985, University of Wisconsin; solid modeling, computer graphics, kinematics and automated manufacturing.

Holt, Richard 1947, (Emeritus); MSME, 1957, University of Washington; manufacturing processes, welding.

Kieling, William C. 1966, (Emeritus); MSME, 1965, University of Washington; design, dynamics, and kinematics.

Kramlich, John C. 1991; PhD, 1980, Washington State University; heterogeneous combustion, pollutant formation and control from thermal systems, waste incineration.

Messer, Rowland E. 1946, (Emeritus); MSME, 1935, University of Washington; graphics.

Ramulu, Mambala 1978; PhD, 1982, University of Washington; manufacturing processes, production engineering, applied mechanics, fatigue and fracture mechanics.

Reinhart, Per G. 1982; PhD, 1982, California Institute of Technology; nonlinear dynamics, vibrations.

Sandwich, Colin J. 1966, (Research); PhD, 1966, Oregon State University; corrosion, material science, design, manufacturing.

Sherrert, Robert E. 1960, (Emeritus); PhD, 1958, University of Wisconsin; solid mechanics.

Storti, Duane W. 1983; PhD, 1983, Cornell University; nonlinear dynamics and vibrations, dynamical systems, perturbations and bifurcations.

Tencer, Allan Fred 1988, (Adjunct); PhD, 1981, McGill University (Canada).

Tuttle, Mark E. 1985; PhD, 1984, Virginia Polytechnic Institute & State University; experimental stress analysis, composite materials, adhesive mechanics.

Zabinsky, Zelda 1985, (Adjunct); PhD, 1985, University of Michigan; operations research, applications in industrial engineering, optimization with stochastic elements.
**Course Descriptions**

See page 55 for explanation of course numbers, symbols, and abbreviations.

**Courses for Undergraduates**

M E 304 Manufacturing Processes (3) Ramulu Study of manufacturing processes, including interrelations of the properties of the material, the manufacturing process, and the design of component parts. Prerequisite: 343. Offered: AWSPs.

M E 323 Thermodynamics (4) Depew Applications of thermodynamic principles: properties of pure substances from an advanced point of view, nonreactive gas mixtures, energy analysis of reactive mixtures, chemical equilibria, combustion, power, and refrigeration cycle analysis. Prerequisite: ENGR 260. Offered: AWSP.

M E 331 Introduction to Heat Transfer (4) Corliss Study of heat transfer by conduction, radiation, and convection; elementary heat-exchanger design. Prerequisites: ENGR 260 and 333 or CIVE 342. Offered: AWSP.

M E 343 Behavior of Engineering Materials (4) Daly Study of the nature, properties, and behavior of engineering materials, involving strength, deformation, fracture, impact, creep, fatigue, and corrosion. Lecture and laboratory. Prerequisite: ENGR 220 or permission of instructor; recommended: ENGR 170. Offered: AWSP.

M E 352 Mechanics of Solids (3) Kumar Development of relationships among loads, stresses, and deformations in the elastic behavior of machine or structural elements in tension, compression, bending, and torsion. Prerequisite: ENGR 220. Offered: AWSP.

M E 353 Machine Design Analysis (4) Nevirineau Analysis, design, and selection of mechanical subsystems and elements, such as gears, linkages, cams, and bearings. Lecture and laboratory. Prerequisites: 343, 352. Offered: AWSPs.

M E 373 Introduction to System Dynamics (4) Jorgensen Mathematical modeling, analysis, and design of physical dynamic systems involving energy storage and transfer by lumped-parameter linear elements. Time-domain response via analytical methods and numerical simulation. Prerequisites: MATH 307 and 308 and ENGR 215 and 230. Offered: AW.

M E 374 System Dynamics Analysis and Design (4) Jorgensen Extension of 373. Frequency response analysis, generalized impedance concepts and applications, Fourier series analysis and Laplace transform techniques. Modeling and analysis of electromechanical actuators and rotating machinery, Laboratory experiments and design projects. Prerequisite: 373. Offered: WSP.

M E 395 Introduction to Mechanical Design (4) Calkins Design process and methodology; decision making; optimization techniques; project planning; engineering economics; probabilistic and statistical aspects of mechanical design; ethical and legal issues. Lecture and laboratory. Prerequisites: 352, 373, ENGR 123, 260, ENGR 315. Offered: AWSPs.

M E 403 Material-Removal Processes (3) Ramulu Cutting and noncutting processes for material removal in the shaping of manufactured products. Study of forces and of power consumption and relative costs in the various processes. Prerequisites: 343 or permission of instructor. Offered: A.

M E 406 Corrosion and Surface Treatment of Materials (3) (Sandwich) Corrosion fundamentals and forms (galvanic, crevice, pitting, stress corrosion, erosion, hydrogen and leaching). Principles of design, materials selection, cathodic protection and surface treatments (coatings, carbides, nitriding and plating) applied to reduce corrosion. Failure analysis applied to case studies. Offered: W.

M E 409 Introduction to Numerical Control and Computer-Aided Manufacturing (3) Ramulu Control system fundamentals, numerical control (NC) machine control systems, and the design aspect of NC machine tools. Programming methods of NC machines, computer-aided manufacturing, CNC, DNC, and process optimization. Prerequisites: 304, 374, or permission of instructor. Offered: A.

M E 424 Combustion Systems (4) Corlett, Malte, Pratt Flame and combustion theory, including chemical kinetics, mixing and heat transfer. Fossil Combustion chamber theory, design concepts, and performance. Pollutant control by combustion modification and flame additives. Lectures and laboratory demonstrations. Prerequisite: 323 or permission of instructor. Offered: even years. Sp.

M E 426 Solar Energy Engineering (4) Bocko Fundamental principles of heat transfer, thermodynamics, and fluid mechanics are directed toward the analysis of devices for the collection and storage of solar energy, and of the syntheses of such devices into energy delivery systems. Prerequisite: 331 or permission of instructor. Offered: odd years. Sp.

M E 428 Noise Control (3) Chalupnik Introduction to design for noise control. Includes summary of acoustical phenomena as they pertain to noise control and measurement. Noise rating schemes, particularly in relation to machine noise in the work environment. Prerequisite: junior standing in engineering. Offered: W.

M E 431 Advanced Fluid Mechanics (4) Forster, Riley Advanced topics in fluid mechanics, including kinematics, potential theory and vortex dynamics, viscous flow, turbulence, experimental and numerical methods, and design. Prerequisite: 333. Offered: A.

M E 433 Turbomachinery (4) Pratt Thermodynamics, gas dynamics, and fluid mechanics of axial and centrifugal compressors, pumps, and turbines. Design and selection of components for engineering applications. Offered: W.

M E 434 Advanced Mechanical Engineering Laboratory (3) Depew Introduction to engineering measurement problems and techniques including interpretation of experimental data based upon the theories of probability and statistics. Experiments in all areas of mechanical engineering using single-component and multicomponent systems. Prerequisites: 323, 331, 333, 347, and ENGR 315. Offered: AWSPs.

M E 436 Friction and Lubrication (3) Kumar Fundamental principles of friction and lubrication with applications to rolling and hydrodynamic bearing design. Prerequisites: 333, 353, or permission of instructor. Offered: Sp.

M E 445 Introduction to Fracture Mechanics (3) Tuttle Mechanics of deformable bodies; transformation of stress and strain; yield criteria; equations of compatibility; elastic constants of crystalline and polycrystalline solids. Application to design and manufacturing. Prerequisite: 343 or permission of instructor. Offered: W.

M E 449 Introduction to Composite Materials and Design (3) Tata, Tuttle Stress and strain analysis of composite fiber-reinforced composites. Orthotropic elasticity, laminate theory, failure criteria, design philosophy, and joining techniques, as applied to composites. Prerequisite: 352. Offered: A.

M E 450 Introduction to Composite Materials and Design (3) Garver Synthesis of linkage-type mechanisms using graphical and computer methods. Prerequisite: senior standing in engineering or permission of instructor. Offered: AW.

M E 468 Air-Pollution Control Equipment Design (3) Pilat Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate emission control equipment. Techniques for the abatement and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Prerequisite: senior standing or permission of instructor. Offered: jointly with CHE 468 and CIVE 494; W.

M E 469 Applications of Dynamics in Engineering (3) Granger Stirling Application of the principles of dynamics to selected mechanical engineering problems, such as suspension systems, gyroscopes, electromechanical devices. Includes introduction to energy methods, Hamilton's principle and Lagrange equations, and the design of dynamic systems. Prerequisite: 374, ENGR 230 or permission of instructor. Offered: ASPS.

Matrix techniques for multi-degree-of-freedom linear systems. Applications in vibration isolation, transmission, and absorption of noise and instrumentation. Prerequisite: 373 or permission of instructor. Offered: Sp.

M E 471 Automatic Control (4) Berg, Garbin, Jorgensen Dynamic system modeling; control system stability and performance analysis; compensator design by Bode and root-locus methods. Prerequisite: 374 or permission of instructor. Offered: Asp.

M E 473 Instrumentation (3) Garbin Principles and practice in measuring and measurement. Dynamic instrument response; theory of transducers for temperature, pressure, flow, and other measurements. Lecture and laboratory. Prerequisite: 374 or permission of instructor. Offered: W.

M E 474 Systems Modeling and Simulation (3) Murray Unified approach to modeling of systems, and computer simulation of systems behavior. Selecting system variables; writing state, loop, and node equations; modal response and state transition response; system functions and convolution; analogs. Applications to control, vibrations, and other problems. Prerequisite: 374. Offered: W.

M E 477 Microcomputers in Mechanical Systems (4) Garbin Analysis of electromechanical systems employing microcomputers for control or data acquisition. Microcomputer architecture, memory organization, assembly language programming, interfaces, and communications. Particular emphasis on design of hardware and software interfaces for real-time interaction with mechanical systems. Weekly laboratory. Prerequisites: 373, 374, E E 306, or permission of instructor. Offered: Wsp.

M E 478 Finite Element Analysis (4) Reinhall Development of theory and concepts of finite element analysis. Applications in all areas of mechanical engineering, including mechanics of solids, heat transfer, and design of dynamical systems. Weekly computer exercises. Prerequisites: 352, 374, MATH 205 or 302. Offered: Asp.

M E 480 Introduction to Computer-Aided Technology (4) Collins Principles of computer-aided technology. Computer-aided design, engineering, drafting, and manufacturing; computer-aided design systems, geometry, computer graphics, hardware, computer-aided design system design synthesis. System demonstrations, laboratory and instructor visits. Prerequisites: ENGR 123, 141. Offered: Asp.

M E 481 Internal Combustion Engines (5) Malet Spark ignition and diesel engines. Thermodynamic cycles, fuels, carburetion and injection, ignition, combustion, friction, turbocharging, and performance of engines. Lecture and laboratory. Prerequisite: 323 or permission of instructor. Offered: A.

M E 490 Naval Architecture (3) Adee Theory of naval architecture; ship's lines, hydrostatic curves, intact and damaged stability, launching. Prerequisite: junior standing in engineering or permission of instructor. Offered: A.

M E 491 Naval Architecture (3) Adee Theory of naval architecture; strength, ABS rules, water waves, ship and platform motions. Prerequisite: junior standing in engineering or permission of instructor. Offered: W.

M E 492 Naval Architecture (3) Adee Theory of naval architecture; design, analysis, resistance, model testing, propellers, steering. Prerequisite: junior standing in engineering or permission of instructor. Offered: W.

M E 495 Mechanical Engineering Design (4) Hynan Design laboratory verifying the identification and synthesis of engineering factors to plan and achieve specific project goals. Current literature and prerequisite texts are used as reference sources. Lecture and laboratory. Prerequisites: 331, 353, 374, 395. Offered: AWsp.

M E 498 Special Topics in Mechanical Engineering (1-3, max. 6) Lecture and/or laboratory. Maximum of 6 credits may be applied toward an undergraduate degree. Prerequisite: permission of instructor.

M E 499 Special Project (2-5, max. 9) Written report required. Prerequisite: permission of department Chairperson. Offered: AWsp.

Courses for Graduates Only

M E 506 Friction and Wear (3) Kumar Nature of the processes of friction and wear. Temperature rise at contact surfaces during sliding. Boundary friction. Tribological properties of materials. Prerequisite: graduate standing in engineering or permission of instructor. Offered: Sp.

M E 510 Mathematical Foundations of Systems Theory (4) Damborg Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions; inverse functions; metric spaces; infinite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with A A 548/CH E E 510, A.

M E 518-519-520 Seminar (0-0-1, max. 6) Credit no credit only. Offered: A-W-Asp.

M E 521 Thermodynamics (3) Depew, Emery, Malet, Pratt Fundamental concepts of temperature, thermodynamic properties, and systems. The first, second, and combined laws. Development of the relations of classical thermodynamics. Introduction to statistical thermodynamics. Prerequisites: 323 and graduate standing in mechanical engineering or permission of instructor. Offered: odd years; A.

M E 522 Thermodynamics (3) Corlett, Emery, Malet Topics from statistical thermodynamics, including the Boltzmann Bose-Einstein, and Fermi Dirac statistics. Solutions of the Schrodingr wave equation and evaluation of the partition function for translation, rotation, and vibration. Prerequisite: 521 or permission of instructor. Offered: by request only; even years; W.

M E 523 Combustion Seminar (1) Kramlich, Malet, Pratt Seminar on combustion and energy systems, including discussions on current topics in combustion technology and technology presentations by experts in the field. Credit/no credit only.

M E 524 Combustion (3) Corlett, Malet, Pratt Chemical and physical processes of combustion with applications to design of combustors, fuel selection, and consideration of environmental effects. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: odd years; Sp.

M E 525 Acoustics In Engineering I (3) Chalupnik, Forster Acoustic wave transmission, reflection, refraction, and diffraction. Review of continuum mechanics and examples from electromechanical systems. Prerequisite: graduate standing in mechanical or electrical engineering or permission of instructor. Offered: jointly with E E 525; W.

M E 526 Acoustics In Engineering II (3) Chalupnik, Forster Continuation of 525. Material offered each year, covering such topics as scattering, moving media, acoustics, holography, optoacoustics, transducer design, propagation in anisotropic media, and communication. Prerequisite: 525 or permission of instructor. Offered: jointly with E E 526; Sp.

M E 530 Radiative Heat Transfer (3) Corlett, Depew, Emery, Malet Fundamentals of thermal radiation for black, gray, nongray, diffuse, and specular surfaces. Gaseous radiation and special applications of thermal radiation. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: W.

M E 531 Conductive Heat Transfer (3) Corlett, Depew, Emery Analysis of steady-state and transient heat conduction in single- and multidimensional systems. Prerequisite: graduate standing or permission of instructor. Offered: odd years; A.

M E 532 Convective Heat Transfer (3) Corlett, Depew, Emery Introduction to fluid flow and boundary-layer flow as they apply to forced- and natural-convection heat transfer. Conduction and boiling heat transfer. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

M E 533, 534 Fluid Mechanics (3,3) Corlett, Gessner, Kosky, Riley Basic conservation laws and kinematics of fluid flow, two-dimensional inviscid flow, wave motion and shock waves in inviscid compressible flow, exact solutions and boundary layer analyses of laminar and turbulent viscous flow, analysis of non-Newtonian flow, applications. Prerequisite: 533 or permission of instructor for 534. Offered: W,Sp.

M E 535 Computational Techniques In Heat Transfer (3) Emery, Pratt Advanced heat transfer studies of interest to mechanical engineers. Subject coverage varies from year to year. Prerequisite: permission of instructor. Offered: A.

M E 537 Topics In Fluid Mechanics (3) Corlett, Emery, Gessner, Pratt, Riley Selected fluid mechanics research topics relevant to current advances in mechanical engineering practice. Topics selected vary with faculty and student interest, but are drawn predominantly from the general areas of energy conversion, energy management, and manufacturing processes. Offered: even years; A.

M E 538 Turbulent Boundary Layer Theory (3) Gessner, Riley Characteristic features of turbulent boundary layers; development of the turbulent boundary layer equations; equilibrium boundary layers; integral methods of solution based on power law and wall-wake velocity profiles; methods of solution based on higher order constitutive equations; application to diffuser flows and free shear flows; new developments and physical models. Offered: odd years; A.

M E 543, 544 Fluid Turbulence (3,3) Gessner, Riley Methods of characterizing fluid turbulence; spatial, temporal velocity correlations; energy spectra; probability concepts; isotropic, nonisotropic turbulence; hot-wire measurement techniques; phenomenological turbulence models; higher-order closure models; local equilibrium concepts; recent advances in modeling techniques. Prerequisite: 6 credits of graduate fluid mechanics or permission of instructor. Offered: jointly with C+ E 543 and 544; even years; W,Sp.

Technical Communication

Technical communicators use their language, visual, and analytical skills, as well as training and research in electronic and other media, to create and enhance communication in scientific and technical environments. The Department of Technical Communication prepares students to design, write, edit, and evaluate technical and scientific materials. The department also provides course work in the development of online support systems and in electronic information presentation. Other major interests of the department are the human-computer interface, hypermedia, communications technology, the rhetoric of technical discourse, publications and communications management, policy analyses of technological systems, and research and testing.

Undergraduate Program

Technical communication offers a Bachelor of Science in Technical Communication (B.S.T.C.). Entrance to the program requires at least 60 college credits, 30 of which must be distributed as follows: 10 approved mathematics or statistics credits, 15 approved Natural World credits, and 13 approved written and oral communications credits (including ENGR 231, which is 3 credits). The applicant must have an overall GPA of 3.00 in the 13 required written and oral communications credits.

The technical communication graduation requirements differ slightly from the general College of Engineering requirements in that the student must complete 180 credits, distributed according to the following minimum: 25 credits in mathematics and the Natural World (with a minimum of 15 credits in mathematics and/or statistics and 20 credits in the Natural World), 13 credits of written and oral communications (including ENGR 231), 24 credits of engineering fundamentals, 35 credits of VLPA and I&S (with one in-depth sequence), 26 credits of required TC courses, 20 credits of approved electives that demonstrate a coherent and relevant area of specialization, and 12 credits of free electives.

Admissions Schedule

Students are admitted into the department only in autumn and spring quarters. July 1 is the deadline for application for autumn quarter, and February 1 is the deadline for application for spring quarter.

Students should apply for admission to the program in the last quarter of their sophomore year or the first quarter of their junior year. Those applying for admission in their senior year will be expected to spend a minimum of four quarters in the degree program, which allows students time to grow, to develop the necessary skills, and to integrate the knowledge necessary to enter the profession.

For more information, contact the Undergraduate Advisor, 14 Leo.
mation Design (3); TC 520, Technical Communication Management (3); and TC 521, Seminar: Current Issues in Technical Communication (1); plus one of the following: TC 515, Designing Natural Language Interfaces (3), TC 516, Research Methods in Technical Communication (3), or TC 517, Usability Testing (3); 12-15 credits of technical courses; and 4-7 credits of free electives.

In addition to meeting the requirements of the Graduate School, students admitted to the technical communication M.S. program must hold a baccalaureate degree in some branch of engineering or related science or in some other way present evidence of adequate preparation for graduate study in technical communication. Students with baccalaureate degrees in fields other than engineering or science may be admitted into the program if they have a minimum of three years of professional technical communication experience and undergraduate training relevant and applicable to the solution of problems in the field of technical communication. A limited number of prerequisite undergraduate courses may be required.

Research Facilities

Technical communication students enjoy access to a variety of computer systems and work directly with a state-of-the-art publications facility. They have the opportunity to participate in the development of new document formats, new insights into human information processing, and new publication production and technologies. Technical communication also currently supports the following specialized laboratories: the Hypermedia Lab, Laboratory for Usability Testing and Evaluation (LUTE), and the Technical Japanese Lab.

For more information, contact the Graduate Adviser, 14 Loew.

Financial Aid

A limited number of teaching and research assistantships and scholarships are available for the financial support of graduate students in technical communication. More information and application forms can be obtained by contacting the department.

Correspondence and Information

Department of Technical Communication

Faculty

Chairperson
Mark P. Haselkorn

Professors

Bereano, Philip L. * 1975; JD, 1965, Columbia University; technology assessment, alternative technology, public policy and social values regarding technology.

Butterfield, Earl C. * 1981, (Adjunct); PhD, 1963, George Peabody College; cognitive development, metacognition.

Haselkorn, Mark P. * 1985; PhD, 1977, University of Michigan; real-time information systems, man/machine interface, the computer in technical communication.

Mar, Brian W. * 1967, (Adjunct); PhD, 1958, University of Washington; system engineering, environmental management, interdisciplinary management.

Skeels, Dell R. 1949, (Emeritus); PhD, 1949, University of Washington; folklore, myth, and folklore.

White, Myron 1943, (Emeritus); PhD, 1958, University of Washington; technical editing and publications management.

Win, William David * 1985, (Adjunct); PhD, 1972, Indiana University; educational technology, instructional theory, instructional design, visual information processing.

Associate Professors

Barfield, Woodrow * 1987, (Adjunct); PhD, 1986, Purdue University; interactive computer graphics, human factors in computer systems.

Coney, Mary B. * 1976; PhD, 1973, University of Washington; writing and theories of technical discourse.

Farkas, David K. * 1983; PhD, 1976, University of Minnesota; document design, information systems and design, hypermedia, auxiliary interface of computer system.

Ramey, Judith A. * 1983; PhD, 1983, University of Texas (Austin); computer documentation, online document, user interface design and usability testing.

Spyridakis, Jon A. * 1982; PhD, 1986, University of Washington; comprehension and usability, research methods, document design.

Tsutsui, Michio * 1990; PhD, 1984, University of Illinois; JSL, technical Japanese, computer assisted language learning, linguistics.

Assistant Professors

Dailey, Daniel J. * 1982, (Adjunct Research); PhD, 1988, University of Washington; time series modeling of physical phenomena, optimization, distributed computing, networking.

Williams, Thomas R. 1976; PhD, 1988, University of Washington; cognitive science, visual media, document design.

Lecturers

Kato, Masashi 1986; MA, 1980, University of Washington; social research methods, Japanese curriculum design, JSL, computer-assisted language learning.

Mizuno, Sandra S. 1994; BS, 1987, University of Washington; Japanese curriculum design, Japanese as a second language.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

TC 300 Practice in Technical Reporting (1-2, max. 2)

Application of the fundamentals of technical reporting to the specific reporting activity of students who are enrolled in a jointly designated engineering, scientific, or technical course. Offered: A.

TC 310 The Computer in Technical Communication (4)

Functions of, and relationships among, computer applications, systems software, and computer hardware in technical publications and communications. Required of technical communication majors. Prerequisite: TC major or permission of instructor. Offered: A.

TC 400 Scientific and Technical Communication (3)

Coney, Spyridakis Principles and practices of writing to communicate scientific and technical information to a variety of readers, including the expert, general scientific and technical reader, manager, and general public. Required of technical communication majors. Prerequisite: junior standing or permission of instructor. Offered: ASP.

TC 401 Style in Scientific and Technical Writing (3)

Coney, Spyridakis Grammatical structures and stylistic strategies within specific professional contexts. Achieving clarity and conciseness through word choice and placement, using a variety of sentence structures for appropriate emphasis, handling details, establishing effective tone. Required of technical communication majors. Prerequisite: junior standing or permission of instructor. Offered: ASP.

TC 402 Scientific and Technical Editing (3)

Williams, Editorial responsibilities and practices in the communication of scientific and technical information; the editor's role both as editor and as supervisor of publication groups. Required of technical communication majors. Prerequisite: 401 or permission of instructor. Offered: W.

TC 403 Publication Project Management (3)

Plumb Responsibilities and practice in managing publication projects in scientific and technical organizations. Project design, coordination, production, and evaluation, including planning, organizing, staffing, and directing. Required of technical communication majors. Prerequisite: TC major or permission of instructor; recommended: 415. Offered: W.

TC 406 Understanding Research in Technical Communication (3)

Spyridakis Provides a basis for integrating knowledge acquired in other technical communication courses. Students examine the research literature of various disciplines that impact technical writing. Structured around theoretical and empirical literature as it relates to different textual issues in technical writing. Offered: Sp.

TC 407 Computer Documentation (3)

Ramey Writing documentation for computer hardware, software, and integrated systems. Examines kinds of documentation needed for computer products; introduces use of the computer in its own documentation resulting innovations in the field. Prerequisites: 310 or equivalent, upper-division standing. Offered: ASP.

TC 408 Public Documents: Proposals, EIS's, Assessments (3)

Bereano Analyzing special documents of public character: proposals, EISs, questionnaires, technology assessments. Understanding socio-political milieu in which they are planned, organized, written; the specialized audiences (e.g., agencies with their missions, guidelines, constituencies; citizen groups; commercial interests) they serve. Documents, the decision-making process. Prerequisite: upper-division standing or permission of instructor. Offered: W.

TC 409 Writing for Publication (3)

Coney Writing for professional and trade periodicals in science, engineering, and technology; examination of the publication process, including the roles of author, editor, and reviewer; selecting the appropriate periodical, organizing and writing the article. Prerequisite: 400 and 401 or permission of instructor. Offered: W.

TC 411 Visual Media in Technical Communication (3)

Williams Use of visuals in print and electronic communication of technical matter. Topics include the human visual system, theories of perception and attention, effects of visuals on learning from text, competing theories of memory for visuals, use of visuals in conjunction with prose, and the impact of new visual display media. Offered: W.

TC 415 Production Editing (5)

Ramey, Williams The editorial role in the preparation of text and visual materials for production. The editor's responsibilities and prerogatives as they relate to those of other professionals in the production phase of the publications field. Prerequisite: TC major or permission of the instructor. Offered: Sp.

TC 420 Introduction to Technology as a Social and Political Phenomenon (3/5)

Bereano Introduces students to the social and political aspects of technological development; theoretical, political, economic, and environmental impacts of new technologies; options for channeling these developments; and relevant decision-making institutions and processes. Offered: W.
TC 438 Design and Authoring of CAI (3) Winn Introduction to the design of computer-assisted-instructional programs. Types of learning, characteristics of effective instruction. Students design and produce CAI programs using authoring systems for computers. Offered: jointly with EDCI 436; A.

TC 454 Alternative Technology (3) Baraano Exploration of the evolution of technological forms that are small-scaled, decentralized, emphasizing the public policy aspects of these developments. Topics include the relationship between alternative technologies and worker-controlled enterprises, community planning, the politics of technological change, the Third World, and decentralized development. Background in engineering or technical design is not required. Offered: A.

TC 455 User Interface Design (3) Barfield Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Prerequisites: ENGR 315 and 316 or equivalent, or permission of instructor. Offered: jointly with IND E 455; A.

TC 495 Professional Practice (3-5, max. 10) Williams Supervised internship in a publications organization approved by the faculty advisor. A minimum of one semester is required of students majoring in technical communication. Credit/no credit only. Prerequisites: TC major or permission of instructor. Offered: AWS/Sp.

TC 498 Special Topics (1-5, max. 10) Special topics in technical communication to be offered occasionally by permanent or visiting faculty members.

TC 499 Special Projects (2-5, max. 10) Individual undergraduate projects in technical communication. Prerequisite: permission of instructor. Offered: AWS/Sp.

Courses for Graduates Only

TC 501 Theoretical Dimension of Technical Communication (3) Coney Theories and research drawn from a variety of fields that inform such topics as the historical and social context of technical communication, the aims of technical discourse, readability, invention and audience, audience analysis, technical style, and graphics. Prerequisite: admission to an engineering master's program or permission of instructor. Offered: A.

TC 502 Empirical Traditions in Technical Communication (3) Williams, Spyridakis Introduction to the empirical traditions that inform research and practice in the field of technical communication. Topics include modes of empirical research, communications implications of differences between iconographic and orthographic media, and text and graphic factors affecting comprehension, retention, and performance. Prerequisite: graduate standing or permission of instructor. Offered: odd years; W.

TC 505 Computer-Assisted Communication (4) Ramey Introduction to the concepts of information theory; information management in the larger context of computerized publishing (both procedures and technologies internal to the publishing unit and electronic media for external dissemination of information). Prerequisite: graduate standing or permission of instructor. Offered: A.

TC 510 Information Design (3) Farkas Examination of the design principles and procedures underlying the creation of both print and electronic information presentations. Topics include: print vs. electronic media, designing for the page and screen, information topologies, and hypermedia. Seminar includes a design project. Prerequisite: 501 or permission of instructor.

TC 515 Designing Natural Language Interfaces (3) Hayes Relationship between formal and natural languages. Application of this relationship to designing interface languages that allow users to access machine functionality using natural language. Prerequisite: upper-level course in logic, semantics, computer languages or permission of instructor.

TC 516 Research Methods in Technical Communication (3) Spyridakis Introduction to research methods in technical communication. Students examine the relationship between theory and research, hypothesis testing, experimental designs, modes of observation, sampling, validity, and data analysis and interpretation. Prerequisite: introductory statistics course. Offered: W.

TC 517 Usability Testing (3) Ramey Discusses the human-computer interface (HCI) as the communicative aspect of a computer system. Analyzes usability issues in HCI design, explores design-phase methods of predictability, and introduces evaluative methods of usability testing. Prerequisite: substantial experience with computers and graduate standing, or permission of instructor. Offered: W.

TC 520 Technical Communication Management (3) Emphasizes the role and function of communication as a key to understanding organizational frameworks and managerial practices. Traditional and innovative approaches to viewing and managing technical communication. Roles, responsibilities, impact of technology. Offered: Sp.

TC 521 Seminar: Current Issues In Technical Communication (1-2, max. 3) Presentations on current issues in technical communication. Credit/no credit only. Prerequisite: TC graduate student status or permission of instructor. Offered: Asp.

TC 525 Assessing Communications Technologies (3) Baraano Analysis of development, deployment of new communication technologies; emphasis on public policy issues they present (e.g., videotelephone, mobile telephony, hypermedia, electronic message transfer, virtual reality). Impacts explored include: access, privacy, civil liberties; power of elites; changes in social organization. Prerequisite: 425 or other background in policy analysis, technology, and society. Offered: even years; Sp.

TC 530 Technical Japanese 1 (4) Kato, Tsutsui Focus on oral communication and reading. Students review and strengthen their basic knowledge of grammar and kanji and apply this to practical communication situations and technical reading. Lab work required for kanji building, grammar review, and oral drills. Japanese word-processing introduced. Prerequisite: JAPAN 213 or equivalent. Offered: A.

TC 531 Technical Japanese 2 (4) Kato, Tsutsui Focus on oral communication and reading. Additional vocabulary and kanji necessary for practical communication and technical reading are introduced. Lab work required for kanji building, grammar review, and oral drills. Prerequisite: 530. Offered: W.

TC 532 Technical Japanese 3 (4) Kato, Tsutsui Focus on oral communication and reading. Additional vocabulary and kanji necessary for practical communication and technical reading are introduced. The course also prepares students for internships in Japan. Lab work required for kanji building, grammar review, and oral drills. Prerequisite: 531. Offered: Sp.

TC 537 Advanced Technical Japanese 2 (4) Kato, Tsutsui Further development of advanced reading skills, technical vocabulary in the student's specialty, and skills for technical presentation, discussion, and presentation comprehension. Training in technical translation from Japanese to English. Lab work is required. Prerequisite: 536. Offered: W.

TC 598 Special Topics (1-5, max. 6) Prerequisite: permission of instructor.

TC 599 Special Projects (1-5) Written report required. Prerequisite: permission of graduate adviser or committee chair. Offered: AWS/Sp.

TC 600 Independent Study or Research (*) Written report required. Prerequisite: permission of committee chair. Offered: AWS/Sp.

TC 601 Internship (3-9, max. 9) Written report required. Prerequisite: permission of committee chair. Offered: AWS/Sp.

College of Forest Resources

Dean

David B. Thorud
102A Anderson

Associate Dean

Dale W. Cole
107B Anderson

Founded 1907, when professional forestry education was in its infancy, the College holds a position of national and international leadership in both instruction and research. Its location in one of the world’s largest forest regions provides unique opportunities for field classes and research, actual management of forested lands, exposure to wood-based industries, and awareness of resource-use issues. Enrolled in the College are over two hundred undergraduate and approximately two hundred graduate students, taught by more than fifty faculty members. Thus, students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large university.

College Facilities

The College occupies three buildings: Alfred H. Anderson Hall, the Heywood Wickenheiser Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture occupies a building complex at Union Bay. Thus, the College has excellent areas and equipment for scientific laboratories, classrooms, seminar rooms, special collections, and administrative offices.

The Forest Resources Library, a branch of the University’s Suzzallo Library, houses more than twenty-six thousand bound volumes and thirty-three thousand pamphlets, reports, and monographs. It also has an excellent collection of approximately twenty-five hundred periodicals and many indexes to current literature in forestry and supporting sciences. Under the nationwide Farmington Plan, sponsored by the Special Library Association, the Forest Resources Library has assumed responsibility for collecting foreign material published in the fields of forestry and pulp and paper technology, providing an unusual opportunity for academic research. The Center for Urban Horticulture also maintains a library. Its herbarium supplements forest resources students’ fieldwork in dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Fruit specimens and a complete cone collection of American conifers are maintained apart from the mounted collection. Another herbarium, complete in range plants and maintained by the Department of Botany, is available for use by forest resources students.

The laboratory facilities of the College represent an extensive array of modern equipment for research. The many available research tools include optical equipment, electronic instrumentation for a wide variety of uses, gas chromatographs, spectrophotometers, and physical test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, meteorology, tree physiology, genetics, wood and extraneous matter, western fibrous composites, applied mechanics, wood process technology, pathology, entomology, recreation, horticultural physiology, and horticultural plant materials. The College computing facilities include a remote input-output connection with the main University computer, microcomputer systems dedicated to a specific research area, and a microcomputer student laboratory.

Office of Student Services

Assistant Dean for Student Services
Cherie Renfrow-Starry
116 Anderson

The Office of Student Services assists both undergraduate and graduate students in the College of Forest Resources in all aspects of student enrollment, including interpretation of College and University requirements and assistance in course registration to meet graduation requirements. Faculty advisers are available to assist students in choosing elective courses which will help them build an appropriate academic background for their chosen professional specialty. A Mentor Program is also administered by the Office of Student Services and assists undergraduate students in establishing mentoring relationships with faculty, graduate students, alumni, and industry or agency representatives.

The Office of Student Services also operates a Professional Opportunities Program which assists students in obtaining summer employment while in school or permanent employment upon graduation. Summer work may be available through federal and state agencies and in the numerous private companies in woodworking industries of the region. Although field experience is not required for graduation, students are strongly urged to seek summer employment relevant to their major and career goals. As in any applied technical field, practical experience is as important as academic preparation for a professional career.

The College Scholarship and Financial Assistance Program is also housed within the Office of Student Services. Through the generous donations of alumni and friends, the College has established scholarships and loan programs to assist students in paying for their tuition. Scholarships, which typically pay the cost of in-state tuition only, are awarded on the basis of academic merit. Students seeking information about financial aid offered outside the College should contact the Office of Student Financial Aid, 108 Schmitz. The Washington Pulp and Paper Foundation, Inc. provides scholarships for students enrolled in the pulp and paper science curriculum, with awards based on professional promise and scholastic achievement. The scholarship is supported by companies of the pulp and paper industry and by supplier companies. Information about pulp and paper scholarships may be obtained from Professor William McKean, 344 Bloedel.

Institute of Forest Resources

Director
David B. Thorud
102A Anderson

Associate Director
Dale W. Cole
107B Anderson

The overall research program of the College is administered by the Institute of Forest Resources. Because of the size and complexity of this program, the Institute has increased its role as a broad source of capability and provides vital support to the College administration, faculty, staff, and students: Major functions include administering all research projects funded by federal, state, and private agencies, analyzing information from all research programs, ensuring College compliance with federal reporting requirements, and producing College publications and special reports.

Institute staff coordinate and facilitate the submission of research proposals for the faculty with the University administration and numerous funding agencies. Students earn research and thesis credit toward advanced degrees by working on major forest resources problems supported by grants or contracts. Graduate and undergraduate employment related to research is arranged by the institute office.

Areas of current and future research include a broad array of topics including forest policy analysis, stand management, streamside and riparian zone management, forest ecosystem analysis, international trade in forest products, forest products marketing, forest bioconversion technologies, wildlife science, forest horticulture, forest engineering and hydrology, and pulp and paper science. Topics of study are selected not only to foster the interests of individuals and groups in the region, but also to assist students in choosing elective courses which will help them build an appropriate academic background for their chosen professional specialty. A Mentor Program is also administered by the Office of Student Services and assists undergraduate students in establishing mentoring relationships with faculty, graduate students, alumni, and industry or agency representatives.

The Office of Student Services also operates a Professional Opportunities Program which assists students in obtaining summer employment while in school or permanent employment upon graduation. Summer work may be available through federal and state agencies and in the numerous private companies in woodworking industries of the region. Although field experience is not required for graduation, students are strongly urged to seek summer employment relevant to their major and career goals. As in any applied technical field, practical experience is as important as academic preparation for a professional career.

The College Scholarship and Financial Assistance Program is also housed within the Office of Student Services. Through the generous donations of alumni and friends, the College has established scholarships and loan programs to assist students in paying for their tuition. Scholarships, which typically pay the cost of in-state tuition only, are awarded on the basis of academic merit. Students seeking information about financial aid offered outside the College should contact the Office of Student Financial Aid, 108 Schmitz. The Washington Pulp and Paper Foundation, Inc. provides scholarships for students enrolled in the pulp and paper science curriculum, with awards based on professional promise and scholastic achievement. The scholarship is supported by companies of the pulp and paper industry and by supplier companies. Information about pulp and paper scholarships may be obtained from Professor William McKean, 344 Bloedel.

Field Research Areas and Facilities

The College field facilities include two major forested areas covering more than four thousand acres, an arboretum, a reserve, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a general natural science laboratory for the many disciplines in the College specifically related to, or concerned with, the research and teaching of natural resources behavioral patterns and management.

The Charles Lathrop Pack Demonstration Forest of forty-five hundred acres, forty-five miles south of the University, near Eatonville. This forested property is the focal point for on-the-ground academic work in forest management, resource science, and forest engineering, both at the undergraduate and graduate levels. Broad forest areas of high soil diversity has led to extensive biological, management, and engineering research, much of which may be characterized as a "pioneering effort." A full-time resident staff manages this facility, harmonizing its demonstration objectives with academic and research objectives. Rustic, but comfortable, facilities which provide housing and support to academic and research personnel are available for visitors or conferences on the campus or nearby.

The Lee Memorial Forest, of approximately one hundred sixty-five acres, is located about twenty-two miles northeast of the University near Malott. This forested property provides valuable academic research and recreational opportunities near the campus. Characterized by forest types and soils common to western Washington lowlands, Lee Forest is used extensively for part-duty trips and for research and demonstration projects especially useful in a land base where long-term study commitments are difficult to achieve.

The Allan H. Thompson Research Center and the Joe E. Monahan Finkley Lake Reserve and Research Area in the Rattlesnake River watershed in the Cowichan Lake in cooperation with the water department of Seattle for studies in forest hydrology and mineral cycling in the forest ecosystem.
The Washington Park Arboretum, a two-hundred-acre collection of trees and shrubs growing in a naturalistic setting, is located on a former golf course. Managed and operated by the Center for Urban Horticulture, under an agreement with the City of Seattle Department of Parks and Recreation, the Arboretum contains some fifty-two hundred different kinds of woody plants that are available for research and academic study. The Arboretum was established in 1934 and many of its original specimens are now approaching maturity. Classes in botany, dendrology, horticulture, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and various research projects, including many independent student projects. The Arboretum also serves as an important public service area to the University, offering various formal and informal classes for the general public and, in addition, serving the community as a public park and as open space.

The Union Bay facility, a fifty-five-acre tract adjacent to Lake Washington and the main campus, is devoted to research and teaching in the Center for Urban Horticulture. It includes a research nursery area, education collections, and a forty-acre naturalized shoreline and upland area.

Forest Management and Engineering Division
Chairperson
Gerard F. Schreuder
206 Bloedel

Courses for which the Forest Management and Engineering Division is responsible deal with the management of forest resources and its many multiple uses, including timber, water, wildlife, and recreation. Forest land uses range from bioreserves, wilderness, and national parks to watersheds and tree farms. Courses in the forest engineering curriculum emphasize the scientific and engineering design principles that will enable graduates to find technical solutions to problems facing forest resources, forestry-related enterprises, and rural communities. Course subjects include silviculture, forest protection, economics, business, sociology, computer applications, forest policy, hydrology, measurements, and engineering.

The Division of Forest Management and Engineering offers two undergraduate curricula leading to the Bachelor of Science in Forest Resources: forest resources management and forest engineering, which is offered jointly with the College of Engineering. Forest resources management emphasizes the management and multiple-use of forest resources and forest land. The forest engineering curriculum focuses on engineering design for facilitating forest and forested watersheds management, protection, harvest, and transportation to meet the needs and constraints of society. It is dedicated to the advancement of engineering, applicable to forest resources, forestry-related enterprises, and rural communities.

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees include silviculture, forest protection, economics, business, sociology, computer applications, forest policy, hydrology, measurements, and engineering.

Ecosystem Science and Conservation Division
Chairperson
Robert L. Edmonds
264 Bloedel

Coursed included in the Ecosystem Science and Conservation Division cover basic and applied subject matters in forest biology. Subjects covered include forest plant and animal ecology, wildlife biology and conservation, dendrology, and soils and forest ecosystem analysis.

The Division of Ecosystem Science and Conservation offers two undergraduate curricula leading to the Bachelor of Science in Forest Resources: wildlife science and conservation of wildland resources. Wildlife science focuses on the application of ecological knowledge to wildlife biology and management, with the intent of preparing students for graduate education in wildlife science. The conservation of wildland resources curriculum provides a broad education in forest-related natural resources. It emphasizes vegetation and animal components of forest ecosystems and how they interact with environmental and social components.

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees include ecosystem analysis (ecology, soils and mineral cycling, tree physiology and genetics) and wildlife science. A practice-oriented Master of Forest Resources in natural ecosystems management is also available.

Paper Science and Engineering Division
Chairperson
Bjorn F. Hrutford
322 Bloedel

Courses for which the Paper Science and Engineering Division is responsible include those in pulp and paper processing, pulping chemistry, wood and fiber utilization, and their properties, and wood chemistry.

The Division of Paper Science and Engineering administers an undergraduate curriculum in the area of pulp and paper science as well as a graduate curriculum leading to the Master of Science and Doctor of Philosophy in the area of pulp and paper science and engineering.

Urban Horticulture Division
Chairperson
Clement W. Hamilton
119 Merrill

The Urban Horticulture Division is concerned with the selection, management, and role of plants and of ecosystems in urban environments. Faculty members participate in research, education, and public service programs and teach students in the undergraduate urban forestry curriculum as well as in the graduate programs in urban horticulture.

The faculty offers expertise in horticultural taxonomy and plant materials, landscape plant science and management, urban ecology and restoration biology, continuing education, and public garden curation and management. Research facilities of the Center for Urban Horticulture include greenhouses, laboratories, an outdoor growing area and research arboretum at Union Bay, and the two-hundred-acre Washington Park Arboretum, a world-famous collection of mature woody plants.

Undergraduate Program

In addition to the University's general admission requirements, students who plan to enter the College of Forest Resources should have completed Algebra I (Intermediate), trigonometry, and at least one unit each of biological and physical science.

The College of Forest Resources offers six undergraduate curricula leading to a Bachelor of Science in Forest Resources degree: forest resources management, wildlife science, conservation of wildland resources, forest engineering, pulp and paper science, and urban forestry.

The first two years of study emphasize general preparation, followed by an upper-division professional program. Each curriculum contains a number of elective credits selected at the student's discretion. Students are encouraged to take a number of these credits outside the College to broaden their preparation.

In addition to University regulations concerning requirements and grading, College regulations state that no required course may be taken on a satisfactory/not satisfactory basis. Some classes include field trips, laboratory supplies, or material duplication at extra expense to the students.

Students interested in forest resources management should note that senior-level course work may be taken only after completion of the required field camp at Pack Forest.

Students planning to enter the College from community colleges or from other universities should check with their advisers to ensure their prior programs of study include the proper prerequisites.

Student advising is the joint responsibility of the College's Office of Student Services, 116 Anderson, and the divisions. Student files are centrally located in the Office of Student Services.

Pack Forest Residential Field Classes

Students enrolled in the forest resources management and forest engineering curricula must attend the Pack Forest program. This program is typically completed during the spring of the junior year for forest resources management students and during the spring of the senior year for forest engineering students. Courses are conducted as part of the field residential program at the Charles Lathrop Pack Demonstration Forest near La Grande, sixty-five miles from Seattle.

Students taking course work at Pack Forest must live at the field residential station, paying room-and-board charges in addition to regular tuition. Information is available from the Office of Student Services, 116 Anderson.

Accreditation

The curricula in forest resources management and forest engineering are accredited by the Society of American Foresters (SAF). SAF is the specialized accrediting body recognized by the Council on Postsecondary Education and the U.S. Department of Education as the accrediting agency for forestry in the United States. Other curricula include electives that may be used toward qualifications for SAF and the Forester rating for the United States Civil Service. Students should consult with advisers in planning their sched-
Bachelor of Science in Forest Resources Degree

For information concerning the general education, lower division, and upper division (major) requirements, see a College adviser in the Forest Resources Student Services Office, 116 Anderson.

Conservation of Wildland Resources Undergraduate Curriculum

General Education Requirements: English Composition—5 credits from the University list (ENG 131 Composition: Exposition is preferred); writing intensive courses—7 credits minimum to include ESC 495 Senior Project (5 credits) and 2 credits of additional writing-intensive course work; Visual, Literary, & Performing Arts—10 credits to include SPCH 220 Introduction to Public Speaking (5) or other College-approved course from University VLPA list and 5 additional credits from University VLPA list; Individuals & Societies—18 credits to include ECON 200 Introduction to Microeconomics (5 credits) or other College-approved course from University VLPA list and 5 additional credits from University VLPA list.

Lower-Division Requirements: CCR 101 Forests and Society (5 credits); Q SCI 291, 292 Calculus with Analytical Geometry (4, 4) or MATH 124, 125 (5, 5); Q SCI 340 Application of Computers to Natural Resources Problems (2); Q SCI 381 Introduction to Probability and Statistics (3); CHEM 120 Introduction to General Chemistry (5); CHEM 220 Introduction to Organic and Biochemistry (5); GEOL 101 Introduction to Geological Sciences (5); BIOL 101 General Biology (5); BIOL 102 General Biology (5); Free Electives (25).

Upper-Division (Major) Requirements: ESC 202 Global Changes and Forest Biology (5 credits); ESC 210 Introduction to Soil Science (4); ESC 221 Introduction to Dendrology and Paleoecology (6); ESC 322 Forest Ecosystems (3); ESC 350 Wildlife Biology and Conservation (4); Restricted/Directed Electives (48).

Minor

Minor Requirements: Minimum 35 credits to include CCR 101 Forests and Society (5 credits); ESC 200 Trees in Our Environment (5); ESC 202 Global Changes and Forest Biology (5); ESC 210 Introduction to Soil Science (4); ESC 320 Natural Resource Issues: Old Growth and Forest Management (3); ESC 322 Forest Ecosystems (5); FRM 324 Forest Protection (4); FRM 328 Forestry-Fisheries Interactions (4); ESC 350 Wildlife Biology and Conservation. Recommended, optional courses include ESC 221 Dendrology and Paleoecology (6); ESC 411 Forest Soil Microbiology (4); ESC 421 Dendrochronology (4); ESC 441 Landscape Ecology (3).

Forest Engineering Undergraduate Curriculum

General Education Requirements: English Composition—5 credits from the University list (ENG 131 Composition: Exposition is preferred); writing intensive courses—7 credits minimum to include ENG 323 Introduction to Technical Writing (3 credits) and ENGR 333 Advanced Technical Writing (4) or other writing courses as approved by the College of Engineering and the College of Forest Resources; 35 credits total from Visual, Literary, & Performing Arts list and from Individuals & Societies list with a minimum of 10 credits from each of these two areas of knowledge.

Lower-Division Requirements: CHEM 140, 141 General Chemistry and Laboratory (4 credits, 1 credit); CHEM 150, 151 General Chemistry and Laboratory (4, 1); MATH 124, 125, 126 Calculus with Analytic Geometry (5, 5, 5); MATH 307 Differential Equations (3); MATH 308 Linear Algebra (3); PHYS 121/131 Mechanics (4, 4); PHYS 122/132 Electromagnetism and Oscillatory Motion (4); PHYS 123/133 Waves (4, 4); CSE/ENGR 142 Computer Programming (4); ENGR 123 Engineering Graphics (4); ENGR 210 Engineering Statics (4); ENGR 220 Dynamics of Materials (4); ENGR 230 Kinematics and Dynamics (4); ENGR 250 Engineering Economics (4); ENGR 315 Probability and Statistics (3).

Upper-Division (Major) Requirements: F E 330 Forest Engineering in Society (4 credits); F E 332 Ecological Basis of Forest Engineering (4); F E 341 Timber Harvesting and Transportation (6); ESC 345 Design of Low Volume Roads (5); F E 388 Forest Engineering Measurement (4); F E 425 Wildland Hydrology (4); F E 444 Introduction to Forest Engineering Design (4); F E 450 Advanced Forest Engineering Design (15); F E 470 Processing Wood (3); F E 480 Silvicultural Engineering Systems (3); CIVE 342 Fluid Mechanics (4); CIVE 366 Soil Mechanics (4); Restricted/Directed Forest Engineering Electives (14).

Forest Resources Management Undergraduate Curriculum

General Education Requirements: English Composition—5 credits from the University list (ENG 131 Composition: Exposition is preferred); writing intensive courses—7 credits minimum; Visual, Literary, & Performing Arts—10 credits from University VLPA list; Individuals & Societies—10 credits to include ECON 200 Introduction to Microeconomics (5 credits) or other College-approved course from University VLPA list and 5 additional credits from University VLPA list.

Lower-Division Requirements: CHEM 140, 141 General Chemistry and Laboratory (4, 1 credit); CHEM 150, 151 General Chemistry and Laboratory (4); CHEM 160, 161 General Chemistry and Laboratory (4, 1); CHEM 237 Organic Chemistry (4); CHEM 238 Organic Chemistry (4); MATH 124, 125, 126 Calculus with Analytic Geometry (5, 5, 5); MATH 207 Differential Equations (3); Q SCI 381 Introduction to Probability and Statistics (5); PHYS 121/131 Mechanics (4, 4); PHYS 122/132 Electromagnetism and Oscillatory Motion (4); PHYS 123/133 Waves (4); CSE/ENGR 142 Computer Programming (4); ENGR 260 Thermodynamics (4); PSE 302 Introduction to Pulping and Paper Technology (4); PSE 306 Pulp and Paper Processes Analysis (3).

Upper-Division (Major) Requirements: CHEM 350 Elementary Physical Chemistry (3 credits); CHEM 351 Elementary Physical Chemistry (3); CHEM 360 Environmental Chemistry (4); CHEM 381 Organic Chemistry I (3); CHEM 382 Organic Chemistry II (3); CHEM 391, 392 Physical Chemistry I (4, 4); CHEM 393 Physical Chemistry II (4); CHEM 485 Chemical Engineering Laboratory I (3); PSE 400 Wood and Fiber Structure (5); PSE 402 Paper Properties and Additives (3) or PSE 403 Fibrous Structure and Rheology (3); PSE 406 Wood Chemistry I (3); PSE 407 Wood Chemistry II (3); PSE 476 Pulping and Bleaching Processes (3); PSE 477 Papermaking Processes (3); PSE 478 Pulping and Paper Laboratory I (2); PSE 485 Pulping and Paper Laboratory II (2); CHEM 480 Pulp and Paper Process Control (3); CHEM 481 Pulp and Paper Unit Operations (3); PSE 482 Pulping and Paper Process Design and Economics (3); PSE 485 Undergraduate Research—taken three times—(1-1-1); PSE 483 Forest Planning and Developing (3) or PSE 488 Polymer Chemistry (3); PSE 497 Pulping and Paper Internship I (1). Restricted/Directed Electives (11).

Minor

See department for requirements.

Urban Forestry Undergraduate Curriculum

General Education Requirements: English Composition—5 credits from the University list (ENG 131 Composition: Exposition is preferred); writing intensive courses—7 credits minimum; Visual, Literary, & Performing Arts—10 credits to include SPCH 220 Introduction to Public Speaking (5) or other College-approved course from University VLPA list and 5 additional credits from University VLPA list; Individuals & Societies—10 credits to include ECON 200 Introduction to Microeconomics (5 credits) or other College-approved course from University VLPA list and 5 additional credits from University VLPA list.

Lower-Division Requirements: Q SCI 291, 292 Calculus with Analytical Geometry (4, 4 credits) and MATH 124, 125, 126 Calculus with Analytical Geometry (5, 5, 5); Q SCI 340 Application of Computers to
Graduate Programs

Dale W. Cole, Graduate Program Coordinator

Graduate programs in forest resources are designed to accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of sciences basic to forest resources.

Graduate programs offered in forest resources lead to degrees of Master of Forest Resources, Master of Science, and Doctor of Philosophy. Graduate students may engage in research in one of the special fields of study within the College divisions.

Masters of Forest Resources Degree

The Master of Forest Resources degree is a professional degree offered for the student who desires to acquire a greater competence in a specific subject area of forest resources. This is a nonthesis option open to professionals who are returning to study and obtain expertise in areas such as: natural ecosystems analysis, silviculture, and urban horticulture. Interested persons should contact the graduate program coordinator to determine eligibility for this degree program.

Masters of Science Degree

The Master of Science degree is a learned degree, often precursory to the Doctor of Philosophy degree. Some program areas allow nonthesis work while most programs of study require the completion of a thesis. The nonthesis program requires at least 6 credits of research and the thesis program requires a minimum of 9 credits of research. A foreign language is not required. Students must complete a set of core courses prescribed for the major area of study.

Doctor of Philosophy Degree

The Doctor of Philosophy degree may be preceded by education in either forest resources or another discipline. The program comprises an appropriate selection of core courses in forest resources and in the related sciences. The program requires passage of the General Examination in forest resources, the necessary research, and completion of the dissertation. A minimum of two years of residence at the UW also is required. The time necessary to complete the degree requirements depends upon the thoroughness and applicability of prior course work. Reading proficiency in one foreign language may be required by the Supervisory Committee when the language is essential to the student's program of study.

Mid-Career Education

The College has established a certificate program in silviculture to provide mid-career education for forestry professionals. Participants in the mid-career program take courses to prepare themselves for new or broader responsibilities in their current career. In this certificate program, courses can be taught in a more flexible time arrangement to meet the specific career and scheduling needs of participants. Interested persons should contact the College of Forest Resources Continuing Education Office.

Graduate Areas

Graduate education is offered through the academic divisions of Forest Management and Engineering, Ecosystem Science and Conservation, Paper and Pulp Science and Engineering, and Urban Horticulture. Program areas of study and emphasis areas include: pulp and paper science, pulp and paper engineering, wood chemistry, polymer and fiber science; forest engineering; forest products and marketing; forest economics; forest ecosystem analysis (forest ecosystems, forest ecology, forest genetics, forest sustain/riparian management, tree physiology); quantitative resource management (biometry, quantitative management, aerial photogrammetry/remote sensing; silviculture and forest protection (silviculture, forest entomology, fire management, forest pathology); social sciences (forest land use planning, forest policy and law, environmental interpretation and outdoor recreation, forest sociology and leisure studies); wildlife science; urban horticulture (environmental horticulture, horticultural taxonomy, horticultural physiology, wetlands management, urban forestry).

In all areas of study, the College maintains a close working relationship with faculties of other colleges and schools throughout the University, including service on graduate committees. Faculty advisers assist graduate students in determining those courses in other departments on campus which will lend to students' intended areas of expertise.

Admission Qualifications, Background

A student who intends to work toward an advanced degree must apply for admission to the Graduate School and must meet the requirements set forth by the Graduate School and by the College of Forest Resources.

Basic requirements for admission to the Graduate School are a baccalaureate degree from an institution of recognized standing, a minimum GPA of 3.00 in the junior and senior years of college work, approval of the Dean of the Graduate School, and approval of the College.

In addition to requesting admission forms from the Graduate Admissions Office, an applicant should obtain supplemental admission and reference forms from the College of Forest Resources. The Graduate Record Examination general test is required, and test scores must be submitted to the College by the applicant.

Upon enrollment, the student is assigned a graduate program committee that is responsible for guidance in the early stages of the graduate program, to be followed by more formal committees as the student's program develops.

Applicants for the College are considered quarterly within the enrollment limitations for the College and the available faculty and workload limitations within the specific program area selected. Students with both undergraduate forestry degrees and other related fields are considered, although a prior forestry degree is normally expected of applicants for the professional Master of Forest Resources degree.

Financial Aid

The College has available a limited number of appointments as research assistants. Teaching and research responsibilities allow time to pursue a full academic load. Fellowships and scholarships without teaching or research obligations are also available. Requests for financial aid should be submitted by February 1 for priority consideration for the following academic year.

Correspondence and Information

Office of Student Services
116 Anderson, AR-10

Research Centers

Center for Quantitative Science in Forestry, Fisheries, and Wildlife

Interim Director
John R. Skalski

The Center for Quantitative Science in Forestry, Fisheries, and Wildlife (CQS) is an intercollege academic unit
sponsored by the College of Forest Resources and the School of Fisheries of the College of Ocean and Fishery Sciences. The center offers a comprehensive program of study in mathematics and statistical methods as applied to problems in ecology and natural resource management. The faculty of the center includes members of the College of Forest Resources and the School of Fisheries, and many are also adjunct members of the departments of Biostatistics and Statistics.

**Center for International Trade in Forest Products**

**Director**
Bruce R. Lippke

The Center for International Trade in Forest Products (CINTRAFORE) was established in 1984 to respond to opportunities and problems relating to the export and import of wood products. Through programs of research, education, and outreach, CINTRAFORE works to improve knowledge of export trade and to train professionals competent in the analysis and interpretation of trade problems, issues, and policies. The center serves as a focal point for dissemination of information on world trade in forest products by means of seminars, conferences, workshops, and publications.

CINTRAFORE activities involve the cooperative effort of the forest products industry, state and federal organizations, and other organizations at the university such as the School of Business Administration and the Northwest Policy Center. The research undertaken by CINTRAFORE includes country market analyses, global competitive models, new product and market opportunities, the linkages between global forest products trade and environmental impacts and socioeconomic stability, and policy impact analyses.

Students interested in participating in specific research activities sponsored by CINTRAFORE may enroll for study in graduate programs in one of the College's four academic divisions or in programs offered by other academic divisions on campus.

**Center for Streamside Studies**

**Director**
Robert J. Naiman

The Center for Streamside Studies (CSS) was established in 1987 as a joint effort of the College of Forest Resources, the College of Ocean and Fishery Sciences, and the Center for Quantitative Science in Forestry, Fisheries, and Wildlife. CSS provides information for the resolution of management issues related to the production and protection of forest, fish, wildlife, and water resources associated with the streams and rivers in the Pacific Northwest.

The center conducts research activities related to the understanding of ecological and physical processes and their relation to governmental regulations. Projects are solution-oriented, centering around biological, physical, and social aspects of management issues. Cooperative projects are undertaken with state and federal agencies, tribes, private industry, and national and international research institutions, and involve faculty and students of the College of Forest Resources, the College of Ocean and Fishery Sciences, and the Center for Quantitative Science in Forestry, Fisheries, and Wildlife.

To provide interdisciplinary training necessary to deal with the management of interacting resources, CSS conducts symposia, workshops, conferences, and seminar series as forums for resource conflict discussion and resolution. Students interested in participating in specific research activities sponsored by CSS may enroll for study in graduate programs in one of the College of Forest Resources' four academic divisions or in programs offered by other academic divisions on campus.

**Olympic Natural Resources Center**

**Interim Director**
Dale W. Cole

The mission of the Olympic Natural Resources Center (ONRC) is to conduct research and education on natural resource management practices which integrate the production of commodities with the preservation and enhancement of ecological values. Created by the Washington State Legislature in 1989, the center conducts biological, physical, economic, and social science research in both terrestrial and coastal/marine systems. The center's programs span a spectrum from developing new knowledge through basic and applied research to education and outreach.

Much of the center's work is conducted cooperatively with other research institutions, federal and state agencies, resource owners, and interest groups. The center is developing facilities at Forks, Washington on the Olympic Peninsula, and the natural resources of the area will be a major focus of the work of the center. The center is jointly administered by the College of Forest Resources and the College of Ocean and Fishery Sciences.

**Faculty**

**Dean**
David B. Thordur

**Associate Dean**
Dale W. Cole

**Professors**

- Adams, Darius M. *1964, (Affiliate): PhD, 1973, University of California (Berkeley); modeling of trade patterns, international forest products, marketing.
- Agee, James K. *1982, PhD, 1973, University of California (Berkeley); management of natural systems, forest ecology, fire ecology.
- Allan, G. Graham *1966; PhD, 1956, University of Glasgow (UK): fiber and polymer science, creativity and innovation.
- Ammirati, Joseph F. *1979, (Adjunct); PhD, 1972, University of Michigan; mycology, taxonomy and ecology of fungi.
- Bare, B. Bruce *1969; PhD, 1969, Purdue University; harvest scheduling, biometry, forest land management, taxation, finance, management science.
- Bethel, James S. *1962, (Emeritus); PhD, 1947, Duke University; wood science, wood energy, international forestry.
- Bledsoe, Caroline S. *1973, (Affiliate); PhD, 1970, Colorado State University; forest tree nutrition, physiological and ecological significance of mycorrhizal tree roots, nitrogen cycling in forest ecosystems.
- Bradley, Gordon A. *1972; PhD, 1986, University of Michigan; forest land use planning, recreation site planning and design.
- Briggs, David G. *1973; PhD, 1980, University of Washington; operations research in forest products industries.
- Brubaker, Linda B. *1973; PhD, 1973, University of Michigan; dendrochronology, forest ecology, quaternary paleoecology.

Bryant, Benjamin S. *1949, (Emeritus); DF, 1951, Yale University; wood utilization technology, wood gluing, plywood and board technology.

Cole, Dale W. *1958; PhD, 1963, University of Washington; mineral cycling in forest ecosystems, forest soils.

Dowdle, Barney *1962; PhD, 1962, Yale University; markets for timber and forest products, public forest land management.

Edmonds, Robert L. *1973; PhD, 1971, University of Washington; forest soil microbiology, biology of forest diseases, aerobiology.

Edwards, John S. *1967, (Adjunct); PhD, 1960, Cambridge University (UK); arthropod microbiology, insect physiology and development, tundra and alpine biology.

Erickson, Harvey D. *1947, (Emeritus); PhD, 1937, University of Minnesota; wood science and technology.

Ford, E. David *1985; PhD, 1968, University College, London (UK); special processes in ecology, forest productivity, and plants' response to environmental change.

Franklin, Jerry F. *1986; PhD, 1966, Washington State University; structure and function of forest ecosystems.

Fritschen, Leo J. *1966, (Emeritus); PhD, 1960, Iowa State University; biometricology, micrometeorology, measurement and instrumentation of the environment.

Gallici, Vincent *1976, (Adjunct); PhD, 1971, North Carolina State University; biomathematics and population dynamics.

Gara, Robert L. *1968; PhD, 1964, Oregon State University; bark beetle ecology, forest insect behavior, international forestry.

Gessell, Stanley Paul *1983, (Emeritus); PhD, 1950, University of California (Berkeley); forest soil, forest fertility, international forestry.

Gereuilch, Francis E. *1977; PhD, 1976, University of California (Berkeley); forest engineering, statistics, operations research.

Harr, R. Dennis *1988, (Affiliate); PhD, 1967, Colorado State University; forest hydrology, forest geomorphology, watershed management.

Hatheway, William H. *1969, (Emeritus); PhD, 1956, Harvard University; quantitative ecology, physiological ecology, tropical forestry.

Hinckley, Thomas M. *1980; PhD, 1971, University of Washington; forest tree physiology and autecology, subalpine ecosystems, water stress problems.

Hufford, Bjorn F. *1959; PhD, 1959, University of North Carolina; wood extractive chemicals, air and water quality in forest products industries.

Johnson, Jay A. *1983; PhD, 1973, University of Washington; mechanical and physical properties of wood and wood composite materials, wood quality.

Jorgensen, Jens E. *1973, (Adjunct); DSc, 1969, Massachusetts Institute of Technology; systems analysis, manufacturing, automation and controls, forest engineering.

Lee, Robert G. *1978; PhD, 1973, University of California (Berkeley); natural resource sociology, human communities, development and change of forestry institutions.

Lenev, Lawrence *1960, (Emeritus); PhD, 1960, New York State College of Forestry (Syracuse); wood anatomy, microtechniques, machining wood, photomicrography, seasoning and preservation of wood.

Leopold, Estella B. *1976, (Adjunct); PhD, 1965, Yale University; paleoecology, pollen and seed analysis, late Cenozoic environment.

Lettenmaier, Dennis P. *1973, (Adjunct); PhD, 1975, University of Washington; systems analysis and water resources planning.
Lipke, Bruce R. * 1990; MSIE, 1966, University of California (Berkeley); international trade and environmental linkages, investment analysis, economics of forest industry.

Manuel, David * 1972; PhD, 1962, University of California (Los Angeles); avian ecology, effects of forest management on birds.

McCarthy, Joseph L. * 1941, (Emeritus); PhD, 1938, McGill University (Canada); thermodynamics, lignin and cellulose, chemistry, pulp and paper science, biochemical engineering.

McKean, William T. * 1979; PhD, 1968, University of Washington; pulp and paper science, chemical engineering.

Naiman, Robert J. * 1988; PhD, 1974, Arizona State University; forest stream ecosystems, aquatic landscape dynamics.

Oliver, Chadwick D. * 1975; PhD, 1975, Yale University; silviculture and forest ecology, culture of single- and mixed-species forest stands.

Peterson, David L. * 1989; PhD, 1980, University of Illinois; environmental stress on tree growth and forest ecosystems, subalpine forests, global climate change.

Pickford, Stewart G. * 1976; PhD, 1972, University of Washington; forest fire science, wildland fire management.

Richey, Jeffrey E. * 1973; PhD, 1973, University of California (Davis); quantitative problems of aquatic ecosystems, primary Amazon River, limnology.

Ricker, Neil L. * 1978, (Adjunct); PhD, 1978, University of California (Berkeley); chemical process design, simulation, and control.

Robertson, James C. H. 1945, (Emeritus); DfF, 1947, Duke University; forest resources.

Schaeffer, Walter H. 1952, (Emeritus); PhD, 1952, University of Washington; forestry.

Schies, Peter * 1975; PhD, 1975, University of Washington; forest engineering, small-log harvesting, biomass production.

Schreuder, Gerard Frits * 1946, (Emeritus); PhD, 1942, University of Washington; forest soils, forest ecology.

Sharpe, Grant William * 1973; PhD, 1973, University of California (Berkeley); chemical process design, simulation, and control.

Sprigge, Douglas George * 1994; PhD, 1974, Yale University; forest ecology, tree ecophysiology, subalpine systems.

Stenzel, George 1949, (Emeritus); MF, 1939, Yale University; forest resources.

Sattler, Reinhard F. * 1963, PhD, 1963, University of California (Berkeley); genetics of forest tree populations, biotechnology, biomass production.

Tabor, Richard D. * 1968, (Emeritus); PhD, 1961, University of California (Berkeley); wildlife science.

Thord, David B. * 1981; PhD, 1964, University of Minnesota; watershed management, international forest policy and development.

Tukey, Harold B. * 1980; PhD, 1958, Michigan State University; urban horticulture, horticultural physiology.

Wagar, John Alan * 1967, (Research); PhD, 1961, University of Michigan; urban forestry, urban forest inventory and cost-effective management.

Waggener, Thomas R. * 1969; PhD, 1966, University of Washington; policy and economics, regional impact analysis, marketing and international trade in forest products.

Wissmar, Robert C. * 1972; PhD, 1972, University of Idaho; ecology.

Wott, John A. * 1981; PhD, 1968, Cornell University; urban horticulture, public programs in horticulture, public gardens, arboretum.

Associate Professors

Chappell, Henry N. * 1985, (Research); PhD, 1979, North Carolina State University; silviculture, forest soils, tree nutrition.

Conquest, Loveday L. * 1976, (Adjunct); PhD, 1975, University of Washington; biological applications and statistics.

Cundy, Terrance W. * 1983, (Affiliate); PhD, 1983, Utah State University; hillside hydrology and watershed management.

Fridley, James * 1988; PhD, 1984, University of Washington; engineering design, mechanical engineering, computer graphics and graphical simulation.

Furman, Mark * 1966, (Adjunct); PhD, 1985, University of Wisconsin; solid modeling, computer graphics, kinematics and automated manufacturing.

Ganter, Christian E. * 1989, (Adjunct); PhD, 1977, Texas A&M University; wildlife toxicology, wildlife and fisheries science.

Hamilton, Clement Wilson * 1985; PhD, 1985, Washington University; landscape plant selection, taxonomy of horticultural and tropical plants.

Hanley, Donald P. * 1983, PhD, 1981, University of Idaho; extension forestry, small-forest management, forestry continuing education.

Harrison, Robert B. * 1987; PhD, 1985, Auburn University; forest soil chemistry, soil amendments, organic waste utilization.

Hodgson, Kevin T. * 1991; PhD, 1986, University of Washington; surface and colloid science, papermaking chemistry, fiber-water interactions.

McNee, Joseph * 1992, PhD, 1984, Virginia Polytechnic Institute & State University; forest operations and the effect of their interactions with the forest ecosystem.

Raeke, Kenneth J. * 1979, (Research); PhD, 1979, University of Washington; wildlife biology and conservation.

Robertson, Linn M. * 1982, (Adjunct); MLA, 1975, University of Pennsylvania; designing with plants, planning and design of botanical gardens/arboretum.

Rustagi, Krishna P. * 1973; PhD, 1973, Yale University; operations research and statistical applications in forest management.

Shannon, Margaret A. * 1992; PhD, 1989, University of California (Berkeley); natural resources, sociology and policy.

Sirard, Stuart E. * 1982, (Research); PhD, 1982, Pennsylvania State University; forest biotechnology, environmental pollution control.

Van Braklovic, Glenn R. * 1993, (Adjunct); PhD, 1978, University of California (San Diego); aquatic wildlife, ecology of marine communities, wildlife-fisheries interactions.

West, Stephen D. * 1979; PhD, 1979, University of California (Berkeley); vertebrate ecology, conservation and management.

Assistant Professors

Botkin, Susan M. * 1992; PhD, 1991, New Mexico State University; hydrology, watershed management.

Eadin, Ivan * 1987; PhD, 1992, University of Washington; marketing strategies and international trade of forest products.

Ewing, Kern * 1990; PhD, 1982, University of Washington; wetland plant ecology, urban ecology, ecosystem management.

Gonzalez, Rico A. * 1993; PhD, 1993, Ohio State University; landscape plant science and management, woody plant response to water stress.

Halpern, Charles * 1991, (Research); PhD, 1987, Oregon State University; plant community ecology, plant succession, montane/subalpine meadow ecology.

Henry, Charles L. * 1982, (Research); PhD, 1989, University of Washington; recycling organic wastes as soil amendments.

Pau, Dorothy Ann 1993; PhD, 1993, University of Oregon; marketing of forest products, international marketing.

Salazar, Debra J. * 1980, (Affiliate); PhD, 1985, University of Washington; political economy, natural resource and environmental politics, forest policy.

Vande Castee, John * 1989, (Research); PhD, 1995, University of Wisconsin; aquatic-terrestrial ecosystem interfaces, remote sensing and geographic information systems.

Zabowski, Darlene * 1992; PhD, 1988, University of Washington; forest soils and their productivity, soil genesis, biogeochemical cycling of soils.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Students taking undergraduate and graduate courses, structured or unstructured, that require field trips, special laboratory supplies, or special material duplications are required to pay appropriate amounts to cover such expenses. If a student fails to pay, the transcript may be withheld and the degree may not be conferred.

Courses for Undergraduates

CFR 101 Forests and Society (5) NW Edmonds. Gara Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and non-majors. Offered: AWSpS.

CFR 250 Introduction to Remote Sensing in Forest Resources with Geographic Information Systems Applications (5) Pickford Introduction to remote sensing data as an information source in forest management, remote sensing platforms, sensors and products, radiometric characteristics of photos and imaging systems, digital imaging processing, georeferencing, map projections, spatial data and map analysis, and tabulated data output. Prerequisite: ability to work with MS-DOS. Offered: A.

Courses for Graduates Only

CGR 500 Graduate Orientation Seminar (1) Introduction to graduate study. Presentations on College resources and services and current research in each College Division. Division Chairs will share teaching responsibilities. Credit/no credit only. Offered: A.

CGR 550 Graduate Studies (1-5) Subject in fields for which there is not sufficient demand to warrant the organization of regular courses. Offered: AWSpS.

CGR 600 Independent Study or Research (*) Offered: AWSpS.

CGR 700 Master's Thesis (*) Offered: AWSpS.

CGR 800 Doctoral Dissertation (*) Offered: AWSpS.

student demand. Prerequisite: junior standing or above

ESC 490, 491, 492 Undergraduate Studies (1-5, 1-5, 1-5) Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS, AWSpS, AWSpS.

ESC 494 Wildlife Senior Project Proposal (3) Selection of research topic, literature review, and preparation of a formal research proposal. Students select a faculty advisor or a faculty committee to assist them in the proposal writing process. Prerequisite: senior standing in wildlife science. Offered: AWSpS.

ESC 495 Senior Project (6) Individual study of an ecosystem science and conservation problem under direction of a faculty member. Generally taken in last quarter of residence. Prerequisites: approved plan of study and permission of major advisor. Offered: AWSpS.

ESC 496 Wildlife Senior Thesis (5) Manuwal, Radeke, West Stattin, Hinckley, Stettler, Johnson, and others use research and discussion of results of the senior research project. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Prerequisite: 494. Offered: AWSpS.

Courses for Graduates Only

ESC 501 Forest Ecosystems-Community Ecology (5) Brubaker Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition and disturbance in determining community composition, structure and stability. Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.

ESC 502 Structure and Function of Forest Ecosystems (5) Franklin Behavior of forest ecosystems: carbon, nutrient, and hydrologic cycling; factors controlling path and flow rates of materials; contrasts in ecosystem structure and function among forest types. Offered: Sp.

ESC 506 Graduate Ecosystems Seminar (1) Harpman Formal seminar presentations by graduate students in ecosystems and related programs. Information is given on how to give effective seminar presentations and prepare slides. Credit/no credit only. Offered: Sp.

ESC 507 Soils and Land Use Problems (4) Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites. Offered: W.

ESC 509 Review of Forest Autecology (4) Hinckley, Stettler Review of concepts of soil formation, soil fertility, microclimate, hydrology, tree acclimation of research, and discussion of results of the senior research project. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Prerequisite: given on how to give effective seminar presentations and prepare slides. Credit/no credit only. Offered: Sp.

ESC 511 Advanced Forest Soil Microbiology (6) Edmonds Detailed examination of microbial processes in forest ecosystems; types of organisms, bio- mass, decomposition and nutrient cycling, microbial transformations of N, impacts of management-clear-cutting, fertilization, pesticide addition. Graduate project required. Prerequisites: general biology, basic soils or permission of instructor. Offered: even years; A.

ESC 513 Advanced Soil Genesis and Classification (5) Zielinski Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two-weekend class field trip project. Prerequisites: 210 or permission of instructor. Offered: Sp.

ESC 515 Advanced Soil and Plant Analysis (3) Harrison Plants and animals must acquire nutrient elements from their environment. Quantifying the composition of samples is the first step in understanding the processes in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisites: one botany or plant science course, instrumental analysis, soils. Offered: Sp.

ESC 516 Advanced Forest Soil Fertility and Chemistry (4) Harrison Chemical properties of soil, nutrient and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem modes such as GEOCHEM, MAGIC, TRICLE-DOWN, and ILWAS in developing a quantitative understanding of the chemical function of forest ecosystems. Prerequisites: general chemistry and geology of soils. Offered: Sp.

ESC 517 Biotransformations of Hazardous Compounds (1) Strand Presentation and discussion of the current literature and biological degradation of organic and inorganic compounds, particularly in the microbial environment. Credit/no credit only. Offered: A.

ESC 518 Microbial Degradation of Toxic Contaminants (5) Herwig, Staley, Stender, Strand Detailed survey of current understanding of microbiology and degradation of industrial organic compounds, pesticides, plastics, oil, and metals. Microbial requirements for bioremediation. Methods of scientific investigation of microbial transformations. Requires basic knowledge of metabolism and organic chemistry. Prerequisite: biological science course. Offered: jointly with CEWA/MICRO 518; Sp.

ESC 520 Graduate Studies In Ecosystem Science (1-5) Offered: AWSpS.

ESC 521 Current Topics In Ecosystem Science (2, max. 6) Consideration of current literature and topics in forest ecosystems and tree physiology. Offered: AWSpS.

ESC 524 Tree Physiology I: Growth and Development (3) Hinckley Review of major developmental processes in trees, concentrating on regulatory mechanisms. Role of genetic, hormonal, mechanical, environmental, and ecological mechanisms in regulation of shoot, diameter, root, and reproductive development examined in lecture-discussion format. Seniors in forestry, botany, or related fields may enroll. Offered: every even years; W.

ESC 525 Tree Physiology II: Stress (4) Hinckley Review of principles and examples of stress physiology, concentrating on processes impacted and mechanisms of resistance. Stress and stress resistance defined and following examples examined: high, low temperature, radiation, aridity, and pollutants. Prerequisite: 524. Offered: Sp.

ESC 527 Advanced Forest Genetics (3) Stettler Discussion course relating concepts of quantitative and population genetics to forest-tree populations, both natural and artificial. Credit/no credit only. Prerequisite: 427 or equivalent. Offered: every even years; W.

ESC 529 Ecosystems Seminar (1) Discussion by invited speakers on current research related to ecosystems. Credit/no credit only. Offered: A.

ESC 533 Fire Ecology (3) Agee Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in western United States with emphasis on Pacific Northwest. One weekend field trip. Prerequisite: permission of instructor. Offered: A.

ESC 538 Graduate Studies In Forest Pathology (1-5) Edmonds Offered: AWSpS.

ESC 539 Forestry-Fisheries Interactions: Case Studies (3) Naiman Case studies of streamside management situation at the watershed and basin level. Topics include resource conflict resolution, current and future management alternatives, landscape dynamics, and use of distance and policy options. Prerequisite: graduate standing in forestry, fisheries, or related field; undergraduates by permission of instructor. Offered: jointly with FISH 539; odd years; A.

ESC 545 Special Topics In Streamside Studies (2, max. 6) Naiman Contemporary problems and issues in forestry, fisheries, and wildlife management in watersheds. Topics vary, yet focus on interactions of land and water resources in the forests of the Pacific Northwest. Offered: jointly with FISH 545; AWSpS.

ESC 554 Wildlife Seminar (1-2, max. 10) Manuwal, West Discussion of current research and application in wildlife biology and conservation. Prerequisite: permission of instructor. Offered: AW.

ESC 555 Graduate Studies In Wildlife Science (1-5) Manuwal, Radeke, West Offered: AWSpS.

ESC 557 Topics In Wildlife Science (2, max. 6) West Graduate seminar on applied and basic topics in wildlife ecology and conservation. Different topics selected each offering. Offered: AWSpS.

ESC 591 Graduate Teaching Practicum (1-5) Prinzhorn Principles of teaching and learning applied to undergraduates in ecosystems science and conservation. Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for ESC students only. Credit/no credit only. Prerequisite: permission of instructor. Entry code required. Offered: AWSpS.

ESC 601 Internship (3-9) Prerequisite: permission of graduate program advisor. Credit/no credit only. Offered: AWSpS.

Forest Management and Engineering

Forest Engineering

Courses for Undergraduates

F E 210 Stutious (4) NW Greulich Principles of statics with application in forestry. Basic concepts, parallelogram law, Newton's laws, equilibrium diagram and analysis. Treatment of structural systems and systems with friction. Prerequisite: MATH 125 or Q SCI 292, which may be taken concurrently. Offered: A.

F E 220 Mechanics of Solids (4) NW Greulich Introduction to the concepts of stress, deformation, and strain in solid materials, including the unique properties of wood. Development of those equations that relate these variables in structures. Laboratory session emphasizes theory. Prerequisites: ENGR 210 and permission of instructor. Offered: W.

F E 300 Timber Harvesting Management (3) Dowdle Timber harvesting methods and planning procedures. Logging costs and production. Safety and environmental considerations. For forest managers and other non-engineering majors. Offered: Sp.
FE 330 Forest Engineering in Society (4) L&S Lee Forest engineering as a profession in a social, political, and regulatory context including: who engineers work for and what they do; professional ethics and leadership responsibilities, psychological issues in engineering work, state and federal regulatory environment affecting engineering practices; relationships to employees, special interest groups, and attentive publics. Offered: WS.

FE 352 Ecological Basis of Forest Engineering (4) NW Pickford The recognition of characteristics of forest and wild land organisms in plant and animal kingdoms; their structure, function, development, site requirements, and role within the forest and wild land communities in which they are found. Ecological and biological basis for environmental regulations affecting forest engineering projects and tasks. Offered: A.

FE 360 Plans Surveying (4) Pickford Surveying theory and practice with emphasis on plans surveying. Proper use of survey instruments including engineer's tape, theodolite, level, and rods to measure and establish angles and distances. Appropriate technique for data recording, reduction and written form presentation, drafting using CADD and COGO packages, and incorporation into GIS. Offered: Asp.

FE 341 Timber Harvesting (5) Greulich Timber harvesting methods and planning procedures. Logging cost and production control. Environmental and safety considerations; planning and design of logging and road construction. Prerequisite: 342.

FE 342 Fluid Mechanics (4) NW Greulich Fundamentals of fluid mechanics, open- and closed-conduit flow and hydrologic prediction. Analysis and design of drainage ditches and culverts for logging roads. Prerequisites: 10 credits in physics, 8 credits in mathematics. Prerequisite: permission of instructor. Offered: Sp.

FE 343 Forest Surveying and Transportation (5) NW Schiess Concepts of timber harvesting requirements, road-access planning, and forest land surveying. Basic road design principles, processes, and practical application of field road location. Basic road drainage design review, overview of road construction techniques and maintenance. A concentrated field experience at Pack Forest for non-forest engineering majors. Offered: Sp.

FE 346 Design of Low Volume Roads (5) NW Schiess Theory combined with strong emphasis on field practice. Engineering activities from pre-reconnaissance through construction and discussion of the context of class project involving location, field survey, and design of a forest road. Engineering design theory covered includes horizontal and vertical curves (including spirals), earthwork, minor drainage structures. Prerequisite: 340. Offered: W.

FE 369 Introductory Soil Mechanics (4) NW Soil mechanics background necessary for the design of logging roads and structures. Soil properties and classification, soil hydraulics, soil strength and failure, soil behavior in structural design, soil modification techniques, and soil compaction. Application of basic laboratory and field testing procedures. Prerequisites: permission of instructor. Offered: W.

FE 368 Forest Engineering Measurements (4) NW Friddy Introduction to principles of measurement and various types of electrical transducers and recording devices used to make measurements. Laboratories include application of surveying; soil mechanical and physical properties; size, weight, and volume of trees; environmental variables, stream flows. Offered: W.

FE 423 Watershed Analysis (4) Inventory and historical analysis of the interactions between natural resources, climate, and forest management. Development of management design and decision of forest management activities based on inventory and analysis. Includes the use of modeling and simulation in predicting the influence of forest management activities on other resources. Prerequisite: 425. Offered: W.

FE 425 Wildland Hydrology (4) Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.

FE 426 Snow Hydrology (4) Snow from formation to melt as it relates to the hydrologic response of water resources. Snowpack properties, energy and mass balances, effects of vegetation manipulation on accumulation and melt, role of snowmelt in hydrologic modeling. Prerequisites: one course in hydrology and one course in meteorology. Offered: odd years; Sp.

FE 427 Hillslope Stability and Land Use (4) Effects of land management, especially forest land management, on slope stability. Forest harvesting, road construction, and species conversion. Slope stability analyzed on both large (landscape) and small (hillside) spatial scales. Prerequisites: 425 or equivalent. Offered: Sp.

FE 428 Hillslope Hydrology (4) Runoff processes from hilltops and small drainage basins. Processes of infiltration, overland flow, and subsurface flow described mathematically. Solutions to resulting differential equations. Prerequisite: 425, MATH 307 or equivalent. Offered: Even years; Sp.

FE 430 Aerial Photo/Remote Sensing Natural Resources (3) Schroeder Principles of photogrammetry, interpretation, and remote sensing; and their application to management of natural resources and wildlands. Uses for watersheds, forest resources, wildlife, point and nonpoint pollution, land-use planning, and outdoor recreation. Offered: Sp.

FE 441 Introduction to Forest Engineering Design (4) Friddy, Schiess Design process and methodology: decision making creatively; project planning and management; engineering economics; probabilistic and statistical aspects of forest engineering design; ethical and legal issues; presentation of design project results; Lecture, laboratory, and design projects.

FE 445 Management Science in Forest Engineering (6) Greulich Management science methods used in data collection, analysis, and decision making examined within a systems framework. Statistical methods of point and interval estimation and regression analysis applied to logging and construction time studies and work sampling. Linear, non-linear, and dynamic programming optimization techniques are applied to forest engineering problems. Offered: W.

FE 450 Advanced Forest Engineering Design (15) Schiess The capstone course for forest engineering majors. Emphasizes the application of forest engineering concepts and principles, and technology are used to craft an implementable natural resources development plan. Enrollment is restricted to forest engineering majors who have completed all other upper-division courses. Offered: Sp.

FE 470 Processing Wood as an Industrial Foodstock (3) Friddy Study of the principles and processes related to forest products. Includes logging, transportation, and use and quality of wildland forest products. Offered: W.

FE 480 Silvicultural Engineering Systems (3) Oliver, Friddy Engineering design of systems for establishing, nurturing, and cultivating trees for eventual harvest and use as industrial feedstock. Lecture/discussion. Prerequisites: 368 and ENGR 142, 220, 230, 250. Offered: A.

FE 490, 491, 492 Undergraduate Studies (1-5) NW Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS, AWSpS, AWSpS.

Courses for Graduates Only

FE 515 Graduate Studies in Forest Influences (1-5) Offered: AWSpS.

FE 523 Advanced Watershed Design (4) Inventory and historical analysis of interactions between natural resources and the land management objectives and design forest management activities based on inventory and analysis. Use of modeling and simulation for predicting influence of forest management activities on other resources. Site-specific mitigation design and remediation projects. Prerequisite: 425. Offered: W.

FE 524 Watershed Design (4) Fridley, Schiess Study of the principles and processes related to forest engineering design of watershed scale systems. Prerequisites: 523 and graduate standing or permission of instructor. Offered: Sp.

FE 525 Advanced Wildland Hydrology (4) Advanced study of forest watershed hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.

FE 526 Advanced Snow Hydrology (4) Advanced treatment of snow from formation to melt as it relates to the hydrologic response of watersheds. Measurement of snowpack properties, energy and mass balances, effects of vegetation manipulation on accumulation and melt. Graduate focus on modeling aspects of snow accumulation and/or melt. Offered: odd years; Sp.

FE 528 Advanced Hillslope Hydrology (4) Advanced treatment of runoff processes from hillslopes and channels. Processes of infiltration, overland flow, and subsurface flow described mathematically. Focus on linking soil water and runoff processes in a computer model. Offered: even years; Sp.

FE 529 Current Topics in Wildland Hydrology (1) Students present detailed analysis of research papers on selected topics in wildland hydrology. Topics cover measurement techniques, experimental data, and theoretical models of hydrologic processes. Credit/no credit only. Prerequisites: senior or graduate standing and permission of instructor. Offered: AWSpS.

FE 540 Graduate Studies in Forest Engineering (1-5) Fridley, Greulich, Schiess Offered: AWSpS.

FE 541 Advanced Forest Engineering (5) Fridley, Greulich, Schiess Logging organization and management; logging cost analysis and budgeting. Offered: W.

FE 542 Advanced Logging Engineering (3) Greulich Detailed consideration of problems of logging planning and truck road engineering, including the preparation and field layout of logging plans; location, design, and construction of forest roads. Offered: Sp.

FE 591 Graduate Teaching Practicum (*, max 5) Principles of teaching and learning applied to undergraduate instruction in forest products and engineering. Development, delivery, and evaluation of actual lectures and homework assignments in the student's
area of expertise are required. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

Forest Resources Management

Courses for Undergraduates

FRM 100 Introduction to Forest Resources Management (3) I&S Gara Survey of human use of forest resources and the impact of social and cultural institutions on resources management. History and the development of forest conservation and forest utilization practices and policies in the United States. Changing patterns of resource use and methods of resolving conflicts among management alternatives. Offered: A.

FRM 270 Forest Land Use Planning (3) I&S Bradley Basic concepts of production theory, of forest resources and the impact of social and cultural institutions on resources management. History and the development of forest conservation and forest utilization practices and policies in the United States. Changing patterns of resource use and methods of resolving conflicts among management alternatives. Offered: A.

FRM 370 Social Functions of Forest Ecosystems (3) I&S Lee Introduction to structure and function of forest ecosystems; resources as social functions; role of social institutions in modifying ecosystem structure and processes; multi-resource case studies and field trips. Offered: A.

FRM 377 Environmental Impact Assessment and Regulation In Forest Resource Management (3) I&S Bradley Current environmental, forest resources, and land-use legislation affecting resource management; origin and evolution of federal, state, and local legislation and their relationship to forest resource planning and management; environmental impact assessment and its relationship to forest resource practices. Selected case studies of prepared forest land use plans and environmental impact statements. Offered: W.

FRM 400 Forestry in Washington (5) Wagar Examines the components of contemporary forestry practices and issues and their importance to the economy and quality of life in Washington state. For discussion majors, selected laboratory sessions provide hands-on experience for classrooms K-12 using the Project Learning Tree activity guides. One all-day field trip. Prerequisite: senior or graduate standing. Offered: S.

FRM 415 Economics of Forest Products Industries (3) Market structure and economic organization of major forest-related industries. Global supply and demand of commercial forest products. Economic factors affecting production, distribution and marketing of forest products, including international, inter-regional, and inter-income factors. Prerequisites: ECON 200, 201, or MKTG 300. Offered: W.

FRM 421 Fundamentals of Business from a Forest Product Perspective (3) I&S Paun Introduction to major business disciplines of marketing, finance, human resource management, and management information systems, using examples from the forest products industry. Examination of other business dimensions including international business, social responsibility, and business ethics. Offered: A.

FRM 422 Marketing of Forest Products (3) Eastin Introduction to forest products marketing in North America. Examines products marketing, industry structure, and strategic management issues utilizing marketing concepts. Topics include product marketing, distribution channels, strategic industry analysis, and marketing research techniques. Case studies used to understand forest products industry decision making. Offered: W.

FRM 423 International Marketing of Forest Products (3) Eastin Introduction to international marketing as related to forest products. Analysis of forest products trade patterns, resource base changes, policy, industrial policies, and environmental concerns. Discussion of market distorting practices and tradeoff/policy considerations, stand growth, adaptive management, and systems organization and management. Case study emphasizes integration. Prerequisites: 323 or permission of instructor.

FRM 424 Forest Stand Dynamics (3) Oliver Forest stand development and manipulation response. Forest stand dynamics and stand structure in pure and mixed species forests, response to mixed and major disturbances, interactive changes with time, and patterns and response to manipulation. Prerequisite: previous course work in ecology. Offered: A.

FRM 425 Ecosystem Management (3) Oliver Advanced concepts and practices in ecosystem management, integrating landscape management principles, inventory, planning, silviculture, objectives/standof policy considerations, stand growth, adaptive management, and systems organization and management. Case study emphasizes integration. Prerequisites: 323 or permission of instructor.

FRM 429 Intermediate Operations In Silviculture (3) Oliver For advanced undergraduate and graduate students in silviculture. Includes those operations dealing with conversion of forest into the desired form, such as cleaning, weeding, thinning, irrigating, and fertilizing; all-day field trips required. Prerequisite: 322 or equivalent.

FRM 430 Forest Chemicals (3) NW Gara Covers all aspects of the use of forest chemicals in forestry; laws, safety, application techniques, and biological effects. Specific chemicals are discussed as to formulations, toxicity, timing, application rates, carriers, and unique safety problems. Prerequisite: junior standing in forest resources curriculum or permission of instructor. Offered: W.

FRM 435 Forest Entomology (3) NW Gara Introduction to general entomology, characteristics, life histories, ecological relations, prevention, and control of forest insects. Offered: A.

FRM 436 Laboratory In Forest Entomology (2) NW Gara Introduction to the insect orders; identification of forest insects and their damage. One field trip to study insect problems required. Prerequisite: 435, which may be taken concurrently. Offered: A.

FRM 461 Forest Management and Economics II (4) Bare Basic concepts of timber harvest scheduling, sustained-yield models, contemporary analytical techniques, timber supply, and forest product markets. Prerequisites: 360 or equivalent. Offered: A.

FRM 464 Economics of Forest Use (3) Dowdle Application of economic concepts to use of forestlands and the allocation of lands to alternate forest uses, including outdoor recreation and other non-consumption uses. Consideration of institutional factors as determinants of land allocation in public and private sector. Trends in forest land use and impact of decisions on growth and development of resources based economic sections. Prerequisites: 360 or ECON 200. Offered: Sp.

FRM 465 Forest Finance and Accounting (3) Dowdle Basic concepts of finance and accounting used in forestry. Introduction to principles of bookkeeping and measurement of income. Essentials of cost accounting and taxation. Treatment of property and income taxes and accounting for fixed assets. Use of ratio analysis and financial statements in decision making. Prerequisite: 360. Offered: W.

FRM 466 Economics of Timber Production (3) Dowdle Application of basic economic concepts to the production of timber as a commercial land use. Analysis of timber investments, alternative management programs, and regulation models. Prerequisite: 360. Offered: Sp.

FRM 468 Forest Measurements (4) Rustagi Measurement of trees and forest stands; sampling methods for timber, recreation, wildlife and ecological attributes; stand development and measurement; use of aerial-photo measurement and interpretation; use of log-sight photos in estimation of timber volumes. Prerequisites: Q SCI 381 and Q SCI 340 or equivalent. (Formerly 361.) Offered: A.

FRM 470 Forest Policy and Law (5) I&S Shannon Analysis of forest policy processes and stages. Stages of policy making/problem solving: law and public policy; natural resource politics; public ownership and management; public policy and private forest land; forest product policies; regulation of forest law and regulations. Includes one hour of writing instruction per week. Offered: A.

FRM 471 Forest Planning and Project Management (4) Bradley Basic concepts of resource planning and project management applied to forest land management. Related processes in formation of resource programs; planning process as a systematic method for problem solving and plan implementation. Emphasis on selected public and private sector forest resource planning cases and development of project management schedules. Offered: W.

FRM 481 Management of Wildland Recreation and Amenities (3) NW The wildland recreation movement in America. Agency history and objectives. Integrating recreation with other land uses. Water, forestry, wildlife, and wilderness recreation or management. Role of private enterprise. Topics of current interest.

FRM 482 Sociology of Leisure and Wildland Recreation (3) I&S Lee Focuses upon an understanding
Paper Science and Engineering

Courses for Undergraduates

PSE 302 Pulp and Paper Technology (4)
Hartford Sources of pulpwood. Mechanical and chemical pulping, processes. Conversion of pulp to paper. Laboratory study of raw material, mechanical pulping and paper making. Offered: A.

PSE 305 Pulp and Paper Processes Analysis (3)
NW Analysis of mechanical and chemical pulping processes. Mechanical and chemical pulping processes. Chemical pulping of wood. Bleaching of chemical pulp. Chemical pulping of wood. Bleaching of chemical and mechanical pulping processes. Chemical recovery systems. Laboratory emphasizes visits to representative manufacturers. Prerequisite: odd years; W.

PSE 400 Wood and Fiber Structure (5)

PSE 401 Wood Physics (4)
Allan Equilibrium physical properties of solid wood and wood products. Density calculations and variations, equilibrium moisture content, shrinkage and swelling, flow mechanisms and thermal, electrical and nuclear properties. Offered: odd years; W.

PSE 402 Paper Properties and Additives (4)
Johnson, McKean Material science of paper and paperboard. Measurement and characterization of structural, chemical, and optical properties of paper. Standard testing methods, paper colorants, effect of additives on paper properties, and relationship of fundamental paper properties to end use requirements. Offered: A.

PSE 403 Fibers Structure and Rheology I (3)
Allan Review of the synthetic and natural fibers and their chemical, physical, microscopic, and submicroscopic properties. The bonding behavior of fibers in networks. Analysis of the structure of fiber networks with reference to nonwovens and paper. Offered: A.

PSE 404 Fibrous Structure and Rheology II (3)
Allan Behavior of fibers in fluid suspensions and properties of webs formed therefrom. Physics and chemistry of fiber interactions and chemical mechanisms. Fiber modification by physical and chemical processes and theory and design of fiber composite materials. Prerequisite: 403. Offered: Sp.

PSE 406 Wood Chemistry I (3)
Hartford Chemical and physical properties of cellulosic, lignin, hemicellulose, and extractives. Wood as a raw material for the chemical industry. Offered: A.

PSE 407 Wood Chemistry I Laboratory (2)
Hartford Laboratory to supplement 406. Offered: W.

PSE 409 Wood Extractives Chemistry (3)

PSE 410 Specifications and Manufacturing of Solid Wood Products: I (4)
Briggs Unit operations of harvesting, lumber manufacturing, and plywood manufacturing industries. Measurement and grading systems for raw materials and finished products. Hardwood and softwood industries in the Pacific Northwest. Laboratory emphasizes visits to representative manufacturers. Offered: odd years; W.

PSE 411 Specifications and Manufacturing of Solid Wood Products: II (4)
Johnson Unit operations of composite products industries based on chips or fibers as raw materials. Important secondary manufacturing industries, such as prefabricated housing, furniture, laminated beams, pallets. Measurement and grading systems for raw materials and finished products. Laboratory includes visits to representative manufacturers. Prerequisite: 410 or permission of instructor. Offered: odd years; Sp.

PSE 472 Wood Manufacturing Operations I (4)
Johnson Machining, combustion, and energy generation. Analysis of cutting process: orthogonal cutting; peripheral milling, sawing, veneer cutting, chipping, flaking, combustion and energy section covers wood combustion mechanisms, use of energy in the forest products industry, physical and chemical properties, firing methods, material and energy balances. Offered: odd years.

PSE 473 Wood Manufacturing Operations II (4)
Johnson Wood drying and degrading processes. Analysis of moisture-related degradation mechanisms for wood products and preventive techniques. Fundamentals of moisture removal techniques for lumber, veneer and particles, drying techniques, industrial procedures, and economic considerations. Prerequisite: 472 or permission of instructor. Offered: even years.

PSE 474 Wood Manufacturing Operations III (4)
Johnson Gluing, coating, and preservation of wood. Nature of adhesion; factors influencing wood adhesion, types of wood adhesives and binders. Principles of finishing; types of coatings for wood products. Preservation, fire retardants and their effectiveness. Prerequisite: 473 or permission of instructor. Offered: even years; Sp.

PSE 475 Structural Wood Design (4)
Johnson Principles of design for wood; allowable stresses for structural wood and wood-based components; analysis of beams, columns, panels, trusses, I-beams, and laminated beams; behavior of fasteners and connectors; reliability concepts. Prerequisite: ENGR 220 or permission of instructor. Offered: even years; Sp.

PSE 476 Pulping and Bleaching Processes (3)
Gustafson Conversion of wood to mechanical and chemical products. Chemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: jointly with CH E 471; W.

PSE 477 Papermaking Processes (3)

PSE 480 Pulping and Paper Process Control (3)
Boyle Control of pulp and paper processes. Sensors, actuators, interface equipment, and computer control strategies common to this industry. Prerequisites: 406, 477, or permission of instructor. Offered: W.

PSE 481 Pulping and Paper Unit Operation (3)
Gustafson Unit operations of interest in the pulping and paper industry in addition to those covered in CH E 330 and 340. Prerequisite: CH E 340. Offered: W.

PSE 482 Pulping and Paper, Process Design and Economics (4)
McKean Analysis of industrial pulping, bleaching, papermaking, recovery, and steam and power operations, using systems analysis approach. Material and energy balances, process economics, process control, and design calculations. Prerequisites: 406, 476, 477, 481, or permission of instructor. Offered: Sp.

PSE 488 Polymer Chemistry (3)

PSE 490, 491, 492 Undergraduate Studies (1-5, 1-10)NW Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: A.W.

PSE 497 Paper and Pulp Internship I (1, max. 2)
Gustafson Technical and economic analysis of commercial pulp and paper installations. Structured visits to industrial operations to observe technical aspects of pulp and paper curriculum in practice. Preparation of visitation reports and analysis in seminar setting. Prerequisites: 406, 476, 477, 481, or permission of instructor. Offered: A.W.

Courses for Graduates Only

PSE 503 Pulp and Paper Technology and Industry Analysis (5)Hartford Characteristics, sources and suppliers of raw material, chemical and mechanical pulping processes. Paper producing manufacturers and grades. Pulps and paper industry organization, including key firms, strategies, and issues. Includes international perspectives and case study analysis. Offered: A.

PSE 514 Pulp and Paper Process Simulation (3) Gustafson Presentation of process simulation techniques currently used in the pulp and paper industry. Large-scale simulations of pulp and paper unit operations developed and analyzed. Use of simulations for control, process optimization, and statistical quality control purposes. Offered: even years A.

PSE 570 Graduate Studies in Forest Products (1-5) Offered: AWSpS.

PSE 572 Wood Chemistry and Analysis (3-5) Hrutford Application of instrumental methods of analysis to wood, wood products, and forest products processing effluents. Emphasis on separation systems, including gas and liquid chromatography, and on spectral analysis. Offered: odd years; W.

PSE 577 Wood and Paper Science Seminar (1, max. 3) Discussion of current topics in the science of wood and its utilization in the forest products industry. Offered: A.

PSE 579 Specifications for Forest Products in World Trade (3) Johnson Compares forest product specifications, standards, testing, and quality procedures between countries and evaluates their role as trade barriers. Examines cultural and trading partners to minimize their impact on trade. Offered: odd years; W.

PSE 580 World Woods and Their Utilization (3) Briggs Principal species, forms, and end-uses of wood in world trade. Evaluation of future demands to identify changes in end-use requirements. Examination of technical utilization issues related to plantations, underutilized species, and tropical forests in meeting these uses. Solid wood, panel, fiber, and wood fuel products. Offered: even years; W.

PSE 589 Wood Biosynthesis (3) Hrutford Biosynthesis of carbohydrates, phenolic and terpenoid compounds in forest trees, and biochemistry of wood degradation. Prerequisite: 405. Offered: even years Sp.

PSE 591 Graduate Teaching Practicum (*, max. 5) Principles of teaching and learning applied to graduate instruction in paper science and engineering. Development, delivery, and evaluation of actual lectures and homework assignments. Graduate teaching experience for PSE students only. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

Urban Horticulture

Courses for Undergraduates

UHF 201 Ecology of Urban Environments (3) &/S NW Hamilton Biological, chemical, and physical processes and components of urban environments, and plant species growing in the urban environment. Emphasis on pest and disease recognition, control, and integrated pest management. Prerequisites: CHEM 101, 102; BIOL 101, 102 or equivalents. Offered: Sp.

UHF 451 Urban Plant Protection (4) NW Gara Working knowledge on insects and diseases of plants growing in the urban environment. Emphasis placed on pest and damage recognition, control, and integrated pest management. Prerequisites: BIOL 101, 102 or equivalents. Offered: Sp.

UHF 461 Public Outreach in Urban Horticulture (3) Wott Aspects of establishing and implementing programs of public urban horticulture outreach (extension) education in university, public institutions, and private contexts. Includes qualitative audience assessment, organization, objective building, lecture and class management, publications, interpretation for diverse audiences, funding, volunteers, and evaluation techniques. Recommended: three credits in urban horticulture. Offered: W.

UHF 471 Ecological Concepts and Urban Ecosystems (3) NW Ewing Ecological concepts into an urban context with emphasis on autecological relationships of plant in an urban environment. General framework for development of urban ecological concepts followed by case studies and exploring applications on a broader scale. Prerequisites: BOT 371; BOT 354 or BIOL 472; or permission of instructor. Offered: A.

UHF 475 Wetland Ecology (5) NW Ewing, Hamilton Wetland types and functions, global and North American distribution, wetland plant types, soil chemistry. The influence of stresses on wetland composition and form. Autecology of wetland plants; response to and detection of stresses. Impacts of urbanization: management techniques. Prerequisites: BOT 371; BOT 354 or BIOL 472; or permission of instructor. Offered: A.

UHF 490, 491, 492 Undergraduate Studies (1-5, 1-5, 1-5) NW Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS, AWSpS, AWSpS.

UHF 495 Senior Project in Urban Forestry (5) Brandtson Independent investigation of an urban forestry problem under direction of a faculty member. Prerequisites: approved plan of study and permission of major advisor. Offered: AWSpS.

Courses for Graduates Only

UHF 501 Urban Horticulture Profession (2) Tukey Describes the emerging profession of urban horticulture and forestry, its history and significance, and the professional, aesthetic, and sociocultural importance in urban ecosystem management. Ecological, sociopolitical, and economic forces in the profession. Guest lecturers and student participation discuss and evaluate opportunities. Prerequisites: MFR-UH students and others by permission of instructor. Offered: A.

UHF 502 Data Collection, Analysis, and Presentation (3) Ewing Design of scientific experiments, collection of data, and use of computers to store, analyze and present data. Limited by equipment availability to 8 students; UH students have priority. Offered: Sp.

UHF 531 Seminar in Horticultural Taxonomy and Landscape Plant Selection (1-3, max. 12) Hamilton Special topics in horticultural taxonomy (nomenclature and systematic classification of cultivated plants, identification of diverse genera and families, methods of analysis) and landscape plant selection (natural ecology and biogeography of landscape plants, plant exploration, introduction and testing). Recommended: 351 and 431.

UHF 549 Urban Horticulture Seminar (1, max. 6) Hamilton Discussion by invited speakers on current topics in urban horticulture. Credit/no credit only. Offered: A.

UHF 561 Public Presentation in Urban Horticulture (2) Wott Students learn to make public presentations in scientific, professional and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisuals and graphics discussed. Offered: W.

UHF 572 Urban Ecosystem Management Seminar (1-3, max. 9) Ewing, Gustafson Graduate seminar in urban ecosystem management. Special topics of current importance in urban ecosystem management. Ecological aspects of ecosystem conservation, restoration, and management. Students participate in presentation and discussion of current work. Prerequisites: 471, 475. Offered: W.

UHF 601 Internship (1-9) Prerequisite: permission of graduate program adviser. Credit/no credit only.
Interdisciplinary Graduate Degree Programs

These programs are administered by interdisciplinary groups of the Graduate School. Certain courses carrying the particular program prefix appear below; other courses with the same prefix appear elsewhere as indicated. Other courses included in these programs are selected from many disciplines throughout the University and carry the prefix of the respective discipline.

Behavioral Neuroscience

Albert F. Fuchs, Director

This interdisciplinary Doctor of Philosophy degree program administered by the Behavioral Neuroscience Interdisciplinary Group of the Graduate School provides intensive training in behavioral neuroscience. The program accepts two to three students a year. In the first two years, students take didactic course work, as well as three laboratory rotations. During this time students are supported by a University research assistantship. By the third year, students select a research laboratory and are supported by a variety of funding resources until the completion of the Ph.D. program, usually after two to four additional years. Graduates of the program are employed in University departments of Psychology, Physiology, Neurobiology, and Zoology, and in various School of Medicine departments.

Because physiological psychology and modern neurobiology are strongly developed at the University, graduate students can find the latest concepts, research techniques, and instrumentation in both fields. In addition to the research facilities of the participating departments, students may work at a multitude of other neuroscience facilities, including the Regional Primate Research Center (on campus), the W. M. Keck Imaging Center (Los Angeles); behavioral neuroscientists carry out studies for the study of marine and invertebrate biology (on San Juan Island).

Professors

Anderson, Marjorie E. *1971; PhD, 1969, University of Washington; physiology of basal ganglia and cerebellum.
Beecher, Michael D. *1978; PhD, 1970, Boston University; animal communication, animal behaviors and communication, sensory processes.
Bernstein, Ilene L. *1974; PhD, 1972, University of California (Los Angeles); behavioral neurosciences, mechanisms affecting appetite and taste preference.
Diaz, Jaime *1978; PhD, 1975, University of California (Los Angeles); brain development, developmental psychopharmacology.
Dorsa, Daniel M. *1979, PhD, 1977, University of California (Davis); neuropharmacology, neurochemistry.
Edwards, John S. *1967; PhD, 1960, Cambridge University (UK); arthropod neurobiology, insect physiology, animal behavior and development, tundra and alpine biology.
Fetz, Eberhard *1975; PhD, 1966, Massachusetts Institute of Technology; cortical regulation of movement.
Fuchs, Albert F. *1969; PhD, 1966, Johns Hopkins University; oculomotor physiology.
Kuhl, Patricia K. *1976, PhD, 1973, University of Minnesota; speech perception.
Palka, John M. *1969; PhD, 1965, University of California (Los Angeles); neurophysiology, sensory physiology, developmental neurobiology.
Rubel, Edwin W. *1986; PhD, 1969, Michigan State University; developmental neurobiology, with special emphasis on vertebrate auditory system development.
Schwartzkroin, Philip A. *1978; PhD, 1972, Stanford University; mechanisms of cortical excitability.
Smith, Orville A. *1958; PhD, 1953, Michigan State University; central regulation of cardiovascular function.
Steiner, Robert A. *1977; PhD, 1975, University of Oregon; neuroendocrinology.
Teller, Davida Y. *1965; PhD, 1965, University of California (Berkeley); vision, psychophysics, development of vision.
Truman, James W. *1973; PhD, 1970, Harvard University; amphibians and vertebrate behavior, insect physiology, circadian rhythms.
Wingfield, John C. *1985; PhD, 1973, University College of North Wales (UK); environmental and hormonal control of avian reproductive cycles.
Woods, Stephen C. *1972; PhD, 1970, University of Washington; physiological and conditioned drug effects, neural control of endocrine systems.

Associate Professors

Brenowitz, Elliot A. *1987; PhD, 1982, Cornell University; animal behavior, neuroethology, neuroendocrinology, animal communications.
Shark, Helen *1982; PhD, 1978, Massachusetts Institute of Technology; neuroanatomy.
Tempel, Bruce L. *1988; PhD, 1983, Princeton University; molecular neurobiology/neurogenetics, especially potassium channel gene structure and function.

Assistant Professors

Miller, Margaret A. *1990; PhD, 1984, University of Washington.
Olavarria, Jaime F. *1990; PhD, 1984, University of California (Berkeley); visual system: anatomy and physiology, comparative and developmental studies.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

B NEU 553 Issues in Behavioral Neuroscience (3)
Provides faculty-guided readings and discussions of original papers in behavioral neuroscience.

B NEU 600 Doctoral Dissertation (*, max. 9)
Offered: AWSpS.

Biological Teaching

John S. Edwards, Graduate Program Coordinator

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Arts for Teachers in the field of biological science. Designed specifically for biology teachers in secondary schools and community colleges, the program emphasizes broadening the student's understanding of the various fields of biological science, with improvement of the student's effectiveness as a teacher as the primary goal. The program offers opportunities for course work within the departments of the University in biological science and science education. Each student is asked to perform an in-depth study of a biological problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments at the University.

Special Requirements

Prospective candidates for the degree must have an initial or continuing certificate for teaching biology at the secondary level.

Assistantships and fellowships are not provided under the aegis of this program.

Health Services Administration

Mary Richardson, Graduate Program Coordinator

The Health Services Administration Group offers a two-year program of studies leading to the degree of Master of Health Administration. It provides preparation for careers in management, planning, and policy analysis in ambulatory-care organizations, hospitals, long-term care facilities, mental-health-care organizations, government agencies, planning agencies, and other organizational settings in the health field. The curriculum is designed to be interdisciplinary, with a faculty drawn not only from the School of Public Health and Community Medicine, but also from the graduate schools of Business Administration and Public Affairs. A student's program of studies may vary according to his or her concentration of study and career objectives. In addition to academic work, students are required to participate in an internship experience in a health facility or agency under the preceptorship of the administrator or director of that organization. Also, a two-quarter analytical project under the supervision of a faculty adviser is required in the second year.

The program has developed a unique opportunity for concentration in health policy and managed care. A concurrent degree program combining the M.H.A. and M.B.A. degrees also is offered. This curriculum requires three years of intensive academic study and culminates in a joint M.H.A.-M.B.A. degree.

Course listings may be found under the School of Public Health and Community Medicine, Department of Health Sciences.

Special Requirements

Applicants must submit, in addition to Graduate School admission requirements, at least three letters of recommendation and scores from the Graduate Record Examination. A narrative statement of objectives is also required, and interviews by members of the program faculty may be required. Relevant health field experience is preferred. In general, applicants are accepted only for autumn quarter of each year. The application deadline is February 15.

Financial Aid

A limited number of fellowships, assistantships, scholarships, and loans are available each year. The M.H.A. Alumni Association sponsors a fund-raising phonathon from which some of the proceeds go toward the two M.H.A. and M.B.A. fellowships. The Foster G. McGaw Scholarship, administered by the Association of University Programs in Health Administration, may be awarded. A scholarship sponsored by the American Hospital Association is available for students concentrating in ambulatory care management. Group Health Cooperative of Puget Sound sponsors a Graduate Research Assistantship, which offers an under-represented minority student (particularly Black, Hispanic, or Native American) Health Education Assistance Loans (HEAL) monies are also available to graduate students in health services. However, students admitted should be prepared to utilize their own resources to finance their graduate education.

Research Facilities

In addition to utilizing University facilities, the program makes extensive use of community health facilities and agencies for research and training.

Professors
Klastorin, Theodore * 1974; PhD, 1973, University of Texas (Austin); operations management, facility location, project management, quality, inventory, health services.
Madden, Carolyn Watts * 1975; PhD, 1976, Johns Hopkins University; health information services, research methodology.
Perrin, Edward * 1975; PhD, 1961, Stanford University; health information services, research methodology.

Associate Professors

Gremowski, David * 1980; PhD, 1982, University of Washington; dental care demand, fluoridation, dental health services research.
Martin, Diane P. 1978; PhD, 1979, University of Washington; health services use and cost, alternative delivery systems and insurance.
Richardson, Mary L. * 1977; PhD, 1984, University of Washington; organization, management and analysis of policy relevant to health services.
Wickizer, Thomas M. 1986; PhD, 1989, University of Michigan; health promotion evaluation.

Senior Lecturer
Altamore, Rita A. * 1981; MD, 1977, Boston University; information systems in health services, quality of health care.

Near and Middle Eastern Studies

The interdisciplinary Ph.D. program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik); Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely: Islamic law, history, institutions, theology, and mysticism; comparative religion: Judaism, Christianity, and Islam; and interdisciplinary investigations of modern topics using the social sciences. The program is administered by an interdisciplinary Graduate School faculty group. The program of study includes courses offered in the Department of Near Eastern Languages and Civilization, JSIS, and other departments on campus. Students in the program must take courses in both the humanities and social sciences.

Degree Requirements and Satisfactory Progress

Specific course work and areas of concentration will be determined by the student's interests within the frame-work of the degree and satisfactory progress requirements listed below.

1. Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization, Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East or comparative religion either through previous degree work or through examination administered by the program.

2. Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which must be in the Department of History. These courses are in addition to work the student may have done at the B.A. and M.A. level.

3. Within three years of admission, completion of a graduate seminar, or two if none was taken at the M.A. level.

4. A student will be expected to have studied four languages, two of which must be regional languages and one of which must be a Western European language other than English, such as French, German, Italian, Russian, or Spanish. Within three years of admission, a student must acquire a reading knowledge of a pertinent research language different from the two languages offered at the time of admission. Before the oral examination may be taken, the student must complete the second-year level in a regional language different from the two languages offered at the time of admission.

Annual Review

A subcommittee of the Near and Middle Eastern Studies Program faculty will conduct an annual review of the progress of all students in the Ph.D. program. Either the chair of the student's committee, the program's graduate adviser, or the program's director will inform students of the results of this annual review.

Ph.D. Examinations and Dissertation

Students will be required to take written examinations, one of which will involve the primary regional language offered by the student. The specific fields will be set by the student's Ph.D. committee in consultation with the student.

Students must meet the general University requirements concerning admission to candidacy for the doctoral degree, the dissertation, and final examinations, including an oral examination.

Students must have a major adviser from among the Near and Middle Eastern Program faculty. Major changes in a student's program must be approved by a three-person faculty committee, which must include the student's major adviser as well as the graduate adviser for the program. At least one member and no more than two members of a student's committee must be in NELC.

Students will write a dissertation as the final requirement for the Ph.D. degree. The topic of the dissertation will be set in consultation with the Ph.D. candidate's supervisory committee.

Admission Deadline

The application deadline for autumn quarter admission is February 15. Applications which are completed and postmarked on or before this date will be reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

Slay, Kemal * 1993; PhD, 1993, Indiana University; Turkish language and literature.
Zysow, Aron * 1988; PhD, 1984, Harvard University; Arabic language and literature, Islamic law, Islamic theology.

Nutritional Sciences
Elaine R. Monsen, Graduate Program Coordinator
The Nutritional Sciences Program offers an interdiscipli­nary graduate program of study leading to a Master of Science or a Doctor of Philosophy degree. Training is provided in advanced nutrition and its application to the field of clinical dietetics through both didactic and clinical experiences. Four types of students are best served by this program: (1) the individual with a strong science background who wishes to pursue advanced training in nutritional sciences; (2) the individual who wishes to complete academic requirements (ADA-approved didactic plan) for becoming a registered dietitian; (3) the individual with an undergraduate back­ground in nutrition, dietetics and foods who wishes to pursue additional education in nutritional sciences while obtaining the supervised clinical experience required for registered dietitian status (ADA-approved AP-4); and (4) the individual who is a registered dietitian and wishes to pursue an advanced degree in nutritional sciences.

Principal areas of study include clinical nutrition, com­munity nutrition, maternal and child nutrition, and nutri­tional biochemistry. The faculty is composed of a core group in nutrition plus a larger affiliated group representing relevant fields within the schools of Public Health, Medicine, and Nursing, the Division of Food Science in the College of Ocean and Fisheries Sciences, and the College of Arts and Sciences.

Each individual program of study is designed by the student in consultation with, and with the approval of, a supervisory committee. Not only will appropriate coursework be carefully defined, but collaboration between student and faculty in appropriate thesis research will begin as early in the graduate experience as possible. Those students receiving supervised clinical experience will work closely with the coordinator of clinical activities, so the program of experiences meets ADA requirements.

Research Facilities
Support facilities are available in the form of libraries, laboratories, a nutrient data base, computer facilities, a human metabolic unit, and a vivarium. Additional support is available through the Clinical Research Center, the Clinical Nutrition Research Unit, the Northwest Lipid Research Center, and the Nutrition Metabolism Division of the Department of Laboratory Medicine in the School of Medicine. Clinical facilities available for supervised clinical experience include University of Washington Medical Center, Harborview Medical Center, Fred Hutchinson Cancer Research Center, North­west Kidney Center, Children's Hospital and Medical Center, Pacific Medical Center, and the Child Development and Mental Retardation Center.

Admission Requirements
Students may enter the graduate degree program after completing a bachelor's and/or master's degree in the biological sciences; background in human physiology and biochemistry is especially desirable. Those students who wish to pursue registration status with the Commission on Dietetic Registration must complete ADA-approved Plan 4 or Plan 5 academic requirements prior to applying for the supervised clinical experience program (AP-4). Students who wish to pursue the Ph.D. degree should correspond with the Director of the Nutritional Sciences Group for detailed admission requirements.

NUTR 520 Protein and Carbohydrate Nutrition (4) Monsen, Rosenfeld Metabolic and physiologic concepts related to protein and carbohydrate nutrition. Areas addressed include composition of foods, requirement through the life cycle, quality of protein, vegetarianism, protein deficiency, low carbohydrate diets, glycemic response to foods, carbohydrates and dental caries, and contaminants in carbohydrate and protein metabolism. Prerequisite: block 1A. Offered: A.

NUTR 521 Lipid Nutrition (4) Monsen, Rosenfeld Normal lipids and components of animal fluids and tissues, with review of their metabolism and physiologic functions. Emphasis on diet and the normal development during the life span of these lipid metabolism. Changes of lipids with various types of disease states and means of nutritional modification of these changes. Prerequisite: biochemistry. Offered: W.

NUTR 522 Vitamin and Mineral Nutrition (4) Monsen, Rosenfeld Advanced study of biologically essential minerals and vitamins. To include absorption, transport, function, storage, excretion; imbalance, deficiency and toxicity; dietary sources; role of these nutrients in preventing diseases directly or indirectly (such as cancer, dental caries); role of modern food technology in availability of these nutrients in our food supply. Prerequisite: biochemistry. Offered: Sp.

NUTR 527 Nutrition: Childhood Through Adulthood (3) Rees, Trahms, Worthington-Roberts Influence of nourishment on growth, development, and behavior of children, toddlers through adolescents. Critical evaluation of normative data, special problems, and intervention strategies for individuals as well as public health programs. Prerequisites: human nutrition and human physiology. Offered: W.

NUTR 528 Nutrition in Aging (3) Karkeck Physiological, psychological, social, cultural, and economic factors affecting nutrition in the middle and later years. Prerequisites: human nutrition and human physiology. Offered: 1995: Sp.

NUTR 532 Fieldwork in Public Health Nutrition (2-12, max. 12) Observation and participation in community agency nutrition programs.

NUTR 535 Laboratory Methods in Nutrition (3) LeBouef, Rosenfeld Techniques used in nutrition research. Spectroscopy, isotope techniques, reductive amination, chromatography; vitamin, lipid, and mineral analysis; methods for animal and human research. Prerequisites: laboratory experience in chemistry, biochemistry. Offered: Sp.
NUTR 538 Nutrition Education Principles and Practice (3) Integrated course designed to prepare students for the practical application of nutrition education theories and principles in diverse behavioral change settings for a variety of learner-population groups. Prerequisite: permission of instructor. Offered: 1996, Sp.

NUTR 537 Laboratory Rotation (1-4, max. 9) LeBour, Rosenfeld Exposure to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to on-going research for preparation of dissertation topics. Prerequisites: 535, permission of graduate adviser. Offered: AWSPs.

NUTR 538 Nutritional Epidemiology (3) Beresford, Kestin Application of epidemiology methods to current studies of nutrition and disease. Special methodological problems of importance in nutritional epidemiological studies. Enables students to plan studies in nutritional epidemiology. Prerequisite: EPI 511 or 512 and BIOST 511 or permission of instructors. Offered: jointly with EPI 538; W.

NUTR 539 Seminar In Nutrition (1-3, max. 9) Library seminar and research on selected topics in recent developments in the field of nutrition. Prerequisite: advanced nutrition.

NUTR 540 Recent Developments in Foods (3) Development of new technology in food production and product development. Design of modified food products. A review of government regulations concerning new development in foods, including food contamination and food additives. Prerequisites: basic foods and nutrition.

NUTR 560 Practicum in Dietetic Education (1-5) Karleck Supervised instructional experiences for dietetic education in both classroom and clinical situations. Individually arranged. Offered: AWSps.

NUTR 561 Advanced Clinical Nutrition Fieldwork (1-3, max. 9) Participation in a health-care team assessing nutrition status and needs, designing care plans to optimize nutritional support of patients, and establishing appropriate criteria for the evaluation of the nutrition care provided. Supervised clinical experience provided in a variety of local health-care institutions. Prerequisite: permission of instructor. Offered: AWSps.

NUTR 562 Advanced Clinical Nutrition I (4) Karleck Epidemiology and pathophysiology of acute and chronic disease related to nutrition (e.g., cardiovascular, endocrinologic, and hematologic diseases). Nutritional interventions and their relationship to medical, surgical, and pharmacologic treatment. Prerequisite: diet therapy. Offered: A.

NUTR 563 Advanced Clinical Nutrition II (4) Karleck Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, acute and neoplastic disease; determination of the appropriate amounts and sources of nutrients applied through enteral and/or parenteral routes. Prerequisite: diet therapy. Offered: W.

NUTR 564 Management of Nutrition Services (3) Karleck Administrative processes affecting health care, specific focus on management of nutritional support systems. Includes productivity and cost effectiveness of nutrition care, establishing and achieving quality of health-care professionals and varying health-care systems. For clinical nutritionists working in standard health-care systems. Offered: Sp.

NUTR 565 Seminar in Clinical Nutrition Practice (1-3) Selected topics and learning experiences in nutritional care delivery. Prepares students for practical application of nutritional concepts in diverse clinical settings. Prerequisites: concurrent registration in 561 and permission of instructor. Offered: AWSps.

NUTR 600 Independent Study or Research (*) Offered: AWSps.

NUTR 700 Master's Thesis (*) Offered: AWSps.

NUTR 800 Doctoral Dissertation (*) Credit/no credit only. Prerequisite: permission of program adviser. Offered: AWSps.

Quantitative Ecology and Resource Management

John R. Skalski, Graduate Program Coordinator (1994-95)

The graduate program offered by the Quantitative Ecology and Resource Management (QERM) interdisciplinary group provides a unique opportunity for students to study the application of statistical, mathematical, and decision sciences to a broad array of terrestrial and marine ecology, natural resource management, biometrical, and mathematical biology problems. The QERM program of study leads to Master of Science and Doctor of Philosophy degrees, and is designed to attract mathematically trained students interested in working on contemporary ecological or resource management problems from a quantitative perspective.

Faculty associated with this interdisciplinary program come from fourteen campus units, including statistics, applied mathematics, forest resources, fisheries, zoology, engineering, biostatistics, and marine affairs. This pool of faculty talent is available to enrich the academic experience of all QERM students.

Degree Requirements

Students entering the QERM program are expected to have either a strong mathematical or biological (ecological) background. Master of Science course work requirements include two courses in statistical theory, one course in optimization; one applied statistical methods course; two courses in either applied quantitative ecology or quantitative resource management; a seminar in quantitative ecology; plus approved electives. All master's degree holders must pass a first-year qualifying examination, prepare and defend a thesis, take a total of at least 45 graded quarter credits, and satisfy all Graduate School requirements.

Students passing the first-year qualifying examination at the Ph.D. level are eligible to enter the doctoral phase of study. Course requirements equivalent to the master's program also must be completed. Doctor of Philosophy degree requirements include a minimum of 36 credits of graded course work beyond the master's; a minimum of 27 credits of dissertation research; and satisfaction of all Graduate School requirements. The 36 credits of course work must be taken from an approved list of courses and varies by one of the following three options: (a) systems analysis in earth systems. For clinical nutritionists working in standard health-care systems.

Admission Requirements

Students entering this graduate program are expected to perform well on the quantitative and analytical sections of the Graduate Record Examination. Background in a biological or ecological field is also highly desirable. To enter the Ph.D. program, students must pass the first-year qualifying examination at the Ph.D. level. In addition, all course requirements equivalent to the master's program must be completed. At least three letters of recommendation and a brief narrative statement of objectives must accompany each application for admission. Applications are accepted only for autumn quarter. The application deadline is February 1.

Financial Aid

Fellowships, teaching assistantships, and research assistantships are available each year. These come from either the Graduate School or one of the campus units contributing faculty to the QERM program. They generally cover the nine-month academic year, although provisions can be made for summer support. Tuition is normally included as part of the financial package. Funding decisions are made yearly, but attempts are made to continue support for students making satisfactory progress.

Research Facilities

The major space allocation in support of the QERM program is located in the Center for Quantitative Science in Forestry, Fisheries, and Wildlife. This intercollege unit offers student desk space, a small library, and modern UNIX-based workstations for conducting quantitative research. Additional field support is available from supporting colleges, schools, and departments such as fisheries, forest resources, and zoology. Existing research is conducted in concert with several federal, state, and local agencies spread throughout the state.

Correspondence and Information

Professors

Bare, B. Bruce * 1969, PhD, 1969, Purdue University; harvest scheduling, biometry, forest land management, taxation, finance, management science.

Bassingthwaighte, James * 1975, MD, 1955, University of Toronto (Canada); computer analysis of transport mechanisms in blood and tissues.

Bell, Earl J. * 1966, PhD, 1965, University of California (Berkeley).

Briggs, David G. * 1973; PhD, 1980, University of Washington; operations research in forest products industries.

Brown, Gardner * 1965; PhD, 1964, University of California (Berkeley); resource economics.

Dowdle, Barney * 1962; PhD, 1962, Yale University; markets for timber and forest products, public forest land management.

Faaland, Bruce H. * 1971; PhD, 1971, Stanford University; manufacturing, scheduling, inventory, operations research, mathematical programming, forestry.

Felsenstein, Joseph * 1968; PhD, 1968, University of Chicago; evolution and population genetics.

Ford, E. David * 1985, PhD, 1968, University College, London (UK); spatial processes in ecology, forest productivity, and plants' response to environmental change.

Francis, Robert C. * 1983, PhD, 1970, University of Washington; biological production of commercially important marine fishes, fisheries management.

Gallucci, Vincent * 1976; PhD, 1971, North Carolina State University; biometrics and population dynamics.

Greulich, Francis E. * 1977; PhD, 1976, University of California (Berkeley); forest engineering, statistics, operations research.
INTERDISCIPLINARY GRADUATE DEGREE PROGRAMS / URBAN DESIGN AND PLANNING

**Course Descriptions**

See page 55 for explanation of course numbers, symbols, and abbreviations.

**QERM 600 Independent Study or Research (*)**

**QERM 700 Master's Thesis (*)**

**QERM 800 Doctoral Dissertation (*)**

**Urban Design and Planning**

Richard Morrill, Graduate Program Coordinator

The Interdisciplinary Group for Urban Design and Planning offers the Doctor of Philosophy degree. The program offers a course of study for those seeking to pursue academic or research careers in the public or private sector. The program is concerned with research in urban design and planning and focuses on four areas of concentration: history of urban development, planning, and design; urban form analysis and design; land use planning; and environmental planning. Please write for a more detailed description of these areas of concentration.

The research focus of the program is aimed at achieving a better understanding of cities, of urban regions, city planning and urban design as manifestations of society and culture, and at developing better tools to plan for future physical development. It includes the development of new methods and the application of methods from other disciplines to expand knowledge of urbanization processes. The program stresses the link which exists between urban planning, its legislative context, and the resulting built environment. Objectives of the program are to help students and researchers to master general knowledge, to train them to be scholars and researchers in a particular subject area, and to guide them in the development of original research. The program of study is divided into three phases.

Phase one provides advanced knowledge in major aspects of planning and design. Included are three doctoral seminars, as well as elective courses from a structured list. Each student must prepare and present a research paper.

Phase two prepares the student in the interdisciplinary content of the field and involves the development of two areas of concentration. These areas must be matched with the interests and experience of faculty on the student's Supervisory Committee. The Supervisory Committee members, most of whom will be from the interdisciplinary group, have primary responsibility for student progress and evaluation. Students are expected to develop knowledge in at least one area outside urban design and planning. Completion of phase two is marked by passage of the General Examination.

Phase three focuses on original work which is presented as a dissertation.

**Admission Criteria**

Applicants must possess a Master of Urban Planning degree or its equivalent in urban design and practice. Students may be asked to complete appropriate background work. Admission into the program is very limited and is based on evidence of promise for high scholarly achievement. The applicant's statement of purpose, prior course work, GRE examination scores, letters of recommendation, and examples of past written work are all considered. Students may begin the program autumn quarter only.

**Financial Aid**

A very limited number of fellowships and assistantships are available each year. Tuition is normally included as part of the financial package.

Bell, Earl J. * 1966; PhD, 1965, University of California (Berkeley).

Beyers, William B. * 1967; PhD, 1967, University of Washington; economic geography, regional analysis, regional development.

Bradley, Gordon A. * 1972; PhD, 1986, University of Michigan; forest land use planning, recreation site planning and design.

Gordon, Margaret T. * 1988; PhD, 1972, Northwestern University; news media and public policy, violence against women.

Guest, Avery * 1972; PhD, 1970, University of Wisconsin; demography, ecology, stratification.

Hancock, John L. * 1969; PhD, 1964, University of Pennsylvania.

Hershman, Marc * 1976; JD, 1967, Temple University; coastal zone management law.

Hirschman, Charles * 1987; PhD, 1972, University of Wisconsin; demography, race and ethnic relations, social stratification, Southeast Asia.

Hodge, David C. * 1975; PhD, 1975, Pennsylvania State University; urban geography, urban transportation geography, equity, gender.

Karr, James * 1991; PhD, 1970, University of Illinois; ecology and conservation biology, water resources, environmental sciences, natural resources.

Krumme, Günter * 1970; PhD, 1966, University of Washington; economic, organizational and marketing geography, location theory, regional development.

Lee, Robert G. * 1978; PhD, 1973, University of California (Berkeley); natural resource sociology, human communities, development and change of forestry institutions.

Lyden, Fremont J. * 1962; Emeritus; PhD, 1960, University of Washington; organizational and systems theory, personnel management, program design and budgeting.
Mar, Brian W. * 1967; PhD, 1958, University of Washington; system engineering, environmental management, interdisciplinary management.

May, Peter J. * 1979; PhD, 1979, University of California (Berkeley); policy analysis, quantitative methods, federal disaster policy.

Miller, Donald H. * 1970; PhD, 1972, University of California (Berkeley).

Morrill, Richard L. * 1955; PhD, 1959, University of Washington; spatial organization, migration, population diffusion, regional planning and development, inequality.

Olson, David J. * 1974; PhD, 1971, University of Wisconsin; American government and politics.

Schneider, Jerry * 1967; PhD, 1966, University of Pennsylvania; metropolitan area and regional planning, transportation and other urban models.

Spain, David H. * 1968; PhD, 1969, Northwestern University; psychocultural anthropology, African studies, research methods.

Streatfield, David C. * 1974; MLA, 1965, University of Pennsylvania; regional landscape planning; landscape, architectural, and environmental history.

Untermann, Richard K. * 1971; MLA, 1967, Harvard University; urban design and site planning, housing, recreation, nonmotorized circulation.

Vernez Moudon, Anne * 1980; DSc, 1987, Ecole Polytechnique Federale de Lausanne (Switzerland); urban design, city form and neighborhood studies, design research.

White, Richard * 1990; PhD, 1975, University of Washington; American West, American Indian, environmental history.

Zerbe, Richard O. * 1975; PhD, 1969, Duke University; law and economics, cost-benefit analysis, economic history, environmental regulation.

Associate Professors

Chrisman, Nicholas R. * 1987; PhD, 1982, University of Bristol (UK); geographic information systems, spatial error analysis.

Dubrow, Gail Lee * 1989; MA, 1979, University of Oregon.

Findlay, John M. * 1987; PhD, 1982, University of California (Berkeley); history of the American West.

Horner, Richard R. * 1981, (Research); PhD, 1978, University of Washington; wetlands, conservation and storm water management.

Nyerges, Timothy L. * 1985; PhD, 1980, Ohio State University; GIS, spatial decision support, urban, transportation, environment.

Pivo, Gary E. * 1987; PhD, 1987, University of California (Berkeley); land use and physical planning, environmental planning; growth management.

Rutherford, G. Scott * 1981; PhD, 1974, Northwestern University; transportation planning and engineering.

Sommers, Paul E. * 1985, (Research); PhD, 1978, Yale University; economic development policy, regional economics.
Interschool or Intercollege Programs

Bioengineering

309 Harris Hydraulics Laboratory

The Center for Bioengineering provides a comprehensive, multidisciplinary program of education and research. The concepts and techniques of engineering are applied to the challenges in biology and medicine. Major areas of current bioengineering research include bioinstrumentation, biomaterials, biomechanics, controlled drug-release systems, imaging, microsensors, bioelectromagnetics, molecular bioengineering, microcirculation, cell mechanics, muscle, and simulation of biosystems.

Undergraduate Program

The undergraduate bioengineering program at the University of Washington is an honors program tailored for students bound for an M.D.-Ph.D. degree with a Ph.D. component in bioengineering. It is designed to bridge the gap in emphasis and curriculum that has traditionally alienated students in biology and in engineering. The curriculum leads to a B.S.E., and consists of a blend of engineering and biological sciences that provides students with unusual opportunities and qualifications for a future biomedical-bioengineering research career. This program is administered by the Center for Bioengineering via the Interdisciplinary Engineering Studies Program of the College of Engineering. Admission is restricted to a small number of highly motivated individuals with an outstanding track record of academic performance. Applicants must have completed at least one year of pre-engineering course work with a minimum GPA of 3.50.

Graduate Program

The Center for Bioengineering offers programs of study which lead to the Master of Science (M.S.), Master of Science in Engineering (M.S.E.), and Doctor of Philosophy (Ph.D.) degrees.

Master of Science Degree

The Master of Science degree program provides essential training in the engineering sciences, which aids students with strong backgrounds in the biological sciences to prepare for careers in research and development in either basic medical sciences or clinical investigations. A thesis is required.

Master of Science in Engineering Degree

The Master of Science in Engineering degree program provides essential training in the biological sciences that assists students with sound engineering backgrounds to prepare for careers in academic, industrial, or hospital environments. A thesis is required.

Doctor of Philosophy Degree

The objective of the Ph.D. program is to train individuals for careers in bioengineering research and teaching. The training has three major components: (1) acquisition of a breadth of knowledge about engineering, biology, and medicine and the interdisciplinary interface between these quite disparate fields; (2) development of a depth of knowledge and expertise in a particular scientific specialty; (3) development of a potential for independent research that can be demonstrated. The objectives are fulfilled through use of a combination of research and teaching experiences. The program is designed to be rigorous while maintaining sufficient flexibility regarding specific requirements to accommodate qualified students with diverse backgrounds. Entrance to the Ph.D. program may be made directly after the B.S. or following completion of the M.S. or M.S.E.

Medical Scientist Program

A Medical Scientist Program exists for the support of individuals interested in coordinated graduate school-medical school study leading to both the M.D. and Ph.D. degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry regarding this program is urged since admission to the Graduate School and to the School of Medicine must be secured independently.

Research Facilities

Offices and laboratories are located in the College of Engineering and the School of Medicine. Students have access to the University of Washington Medical Center, laboratories, prime center, computer center, and libraries, as well as to all engineering and health sciences departments and facilities. A wide range of technologies and virtually all aspects of biomedical sciences are available. Cellular and molecular bioengineering are strong components of the research programs of the center. State-of-the-art facilities are available to support both research and instructional activities. Computer resources are especially abundant, and their use is an integral part of most laboratory and course work.

Admission Requirements

Applicants for the M.S. degree should have a baccalaureate degree in a science. Applicants for the M.S.E. degree should have a baccalaureate degree in engineering or the equivalent. Preparation for both programs must include, at a minimum, one year each of calculus, physics, and chemistry. Applicants to the Ph.D. program should have strong academic credentials, a bachelor's degree in science or engineering, and demonstrated potential for advanced study. Admission to the program is highly selective.

In addition to completing the application requirements for the Graduate School, an applicant should also forward the following items to the Graduate Program Coordinator, Center for Bioengineering, WD-12, University of Washington, Seattle, WA 98195:

1) A one- or two-page written statement outlining academic and professional goals;
2) Official copies of Graduate Record Examination scores for the general tests;
3) Three letters of recommendation from persons acquainted with the applicant's background (no specific form required).

Financial Aid

Financial aid is available to qualified graduate students in the form of traineeships, fellowships, and assistantships. Funding is derived from federal research and training programs, the Graduate School Research Fund, and programs sponsored by private agencies. Information concerning these fellowships is available from the Center for Bioengineering.

Professors

Afromowitz, Martin * 1975, (Adjunct); PhD, 1969, Columbia University; microtechnology, solid-state and fiber-optics sensors, biomedical instrumentation.

Auth, David C. * 1969, (Affiliate); PhD, 1969, Georgetown University; lasers and electro-optical system design, electrophysics, medical instrumentation.

Bashin, Gerard * 1974, (Adjunct); MD, 1974, University of New Mexico.

Bassingthwaighte, James * 1975; MD, 1955, University of Toronto (Canada); computer analysis of transport mechanisms in blood and tissues.

Beach, Kirk Watson * 1976, (Adjunct Research); MD, 1976, University of Washington; arterial disease in diabetes, blood flow studies with ultrasonic Doppler.

Bruckner, Adam * 1972, (Adjunct); PhD, 1972, Princeton University; space propulsion, power, and systems design; hypersonic, hypervelocity accelerators; lasers.

Caldwell, James H. * 1983, (Adjunct); MD, 1970, University of Missouri; cardiology.

Callis, James B. * 1975, (Adjunct); PhD, 1970, University of Washington; instrumentation development, process analytical chemistry, non-invasive clinical chemistry.

Crump, Lawrence A. * 1992, (Research); PhD, 1967, Ohio University.

Daly, Colin H. * 1967, (Adjunct); PhD, 1966, University of Strathclyde (UK); bioengineering, materials.

Daly, Colin H. * 1967, (Adjunct); PhD, 1966, University of Strathclyde (UK); bioengineering, materials.

Daly, Colin H. * 1967, (Adjunct); PhD, 1966, University of Strathclyde (UK); bioengineering, materials.

Foster, David M. * 1960, (Research); PhD, 1969, University of British Columbia (Canada).

Graham, Michael M. * 1980, (Adjunct); MD, 1976, University of California (San Francisco); mathematical modeling of radionuclide kinetics particularly involving positron emission tomography.

Guy, Arthur W. * 1955, (Emeritus); PhD, 1968, University of Washington; biological and medical applications of electromagnetic fields.

Harlick, Robert M. * 1986, (Adjunct); PhD, 1969, University of Kansas; computer vision, artificial intelligence, pattern recognition, image processing.

Hastala, Michael P. * 1970, (Adjunct); PhD, 1969, State University of New York (Buffalo); respiratory physiology, inert gas analysis of respiratory function.

Hoffman, Allan S. * 1970; DSc, 1957, Massachusetts Institute of Technology; polymer materials science and engineering.

Hood, Leroy E. * 1992; PhD, 1968, California Institute of Technology; molecular immunology, large scale DNA mapping and sequencing, molecular evolution.

Horbett, Thomas A. * 1973; PhD, 1970, University of Washington; interfacial proteins, cell interactions, insulin delivery systems.

Huntsman, Lee L. * 1968; PhD, 1968, University of Pennsylvania; mechanics of heart and heart muscle, cardiovascular system assessment, new measurement techniques.

Johnson, Dale E. * 1976; PhD, 1971, University of Chicago; elemental microanalysis of biological systems, electron energy loss spectrometry.

Kim, Yongmin * 1982, (Adjunct); PhD, 1982, University of Wisconsin; computer architecture, imaging systems, computer graphics, multimedia, modeling and instrumentation.

Kushmerick, Martin J. * 1988, (Adjunct); MD, 1963, University of Pennsylvania; muscle contraction, mag-
namic resonance, metabolic imaging NMR spectroscopy.
Lewellen, Thomas * 1967, (Adjunct); PhD, 1972, University of Washington; bioengineering, electrical engineering.
Martin, Roy W. * 1971, (Research); PhD, 1975, University of Washington; biotechnology, ultrasonic Doppler, echo, tissue characterization, signal processing.
Matsen, Frederick A. * 1973, (Adjunct); MD, 1968, Baylor University; orthopedics, bone and joint research, robotics.
Moritz, William E. * 1973, (Adjunct); PhD, 1969, Stanford University; microcomputer applications, bioinstrumentation, human-powered transportation.
Nelson, James A. * 1986, (Adjunct); MD, 1965, Harvard University; diagnostic radiology with basic research in related sciences.
Pollack, Gerald H. * 1968; PhD, 1968, University of Pennsylvania; muscular contraction.
Ratner, Buddy D. * 1972; PhD, 1972, Polytechnic Institute of Brooklyn; synthesis and characterization of polymeric biomaterials.
Ruscher, Robert F. * 1947, (Emeritus); MD, 1939, University of Chicago; health care delivery systems, telemedicine.
Schwartz, Stephen Mark * 1974, (Adjunct); MD, 1967, Boston University; vascular biology, atherosclerosis, molecular basis of lineage, developmental biology, cell kinetics.
Soma, Mani * 1982, (Adjunct); PhD, 1980, Stanford University; computer-aided design, device modeling, IC technology and design, bioengineering.
Spelman, Francis A. * 1961; PhD, 1975, University of Washington; biophysics of implanted cochlea; biostatistics for primate research.
Verdugo, Pedro * 1974; MD, 1965, State University of Chile; microtechnology, biomaterials, polymer gel physics, laser spectroscopy, cell biology.

Associate Professors
Dager, Stephen R. 1983, (Adjunct); MD, 1978, University of Nebraska.
Hartbert, Sheridan 1973, (Affiliate); PhD, 1972, University of Washington; reproductive biology/physiology.
Hannaford, Blake * 1989, (Adjunct); PhD, 1985, University of California (Berkeley); human and robotic movement control, bioengineering, controls, human-machine interaction.
Kael, Ira J. * 1980, (Adjunct); PhD, 1968, Princeton University; computer simulation of radiation therapy, artificial intelligence, computer graphics.
Lunken, David T. 1993, (Adjunct); MD, 1976, Stanford University; cardiology.
Nelson, Alan C. * 1986, (Affiliate); PhD, 1980, University of California (Berkeley); biomedical imaging using image analysis for tissue and tumor studies.
Richards, Todd L. * 1985, (Adjunct); PhD, 1984, University of California (Berkeley); nuclear magnetic resonance imaging, spectroscopy of the brain in demyelinating diseases.
Tencer, Allan Fred 1988, (Adjunct); PhD, 1981, McGill University (Canada).
Viney, Christopher * 1987; PhD, 1983, Cambridge University (UK); phase transformations and microstructure/property relationships in polymers and liquid crystals.
Yager, Paul * 1987; PhD, 1980, University of Oregon; physical chemistry and applications of biomembranes.

Assistant Professors
Banexy, Francois 1992, (Adjunct); PhD, 1991, University of Texas (Austin); biotechnology, protein technology, biochemical engineering.
Cantino, Marie E. * 1981, (Affiliate); PhD, 1981, University of Washington; muscle ultrastructure and regulation, electron microscopy, x-ray microanalyzer, image analysis.
Krol, Keith * 1987, (Research); PhD, 1983, University of Washington; regulation of energy balance in the heart.
Kunzelman, Karyn S. * 1991, (Adjunct Research); PhD, 1991, University of Texas (Dallas); biomedical engineering—cardiac; anatomy and physiology.
Lybrand, Terry Paul * 1990; PhD, 1984, University of California (San Francisco); molecular modeling.
Nickerson, Deborah A. * 1992, (Adjunct); PhD, 1978, University of Tennessee; automating the identification and typing of human DNA variations, genetic mapping, DNA diagnostics.
Pagliaro, Leonard J. * 1990; PhD, 1986, Wesleyan University; in vivo enzymology, cytoplasmic organization, light microscopy, image processing, photo-beaching.
Ramon, Caron * 1989; (Research); PhD, 1973, University of Utah; biochemical imaging and its application to detect cardiac dysrhythmia problems.
Raskin, Eve A. * 1990, (Adjunct); PhD, 1990, Stanford University; image compression and processing, signal processing, medical imaging, and pattern recognition.
Sanders, Joan Elizabeth 1985; PhD, 1991, University of Washington; soft tissue biomechanics and tissue adaption to mechanical stress.
Stayton, Patrick S. * 1992; PhD, 1989, University of Illinois; engineering proteins for biotechnology, biomaterials, and biomedical therapies/diagnostics.
Vogel, Viola 1990; PhD, 1987, Johann Wolfgang Goethe University (Germany); molecular assemblies and Langmuir-Blodgett films.
Yates, John R. III * 1992, (Adjunct); PhD, 1987, University of Virginia; biological and ion trap mass spectrometry, protein sequencing, oligonucleotide analysis.

Lecturer

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
BIOPEN 299 Introduction to Bioengineering (1) Verdugo Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no credit only. Offered: A&S.
BIOPEN 401 Engineering Analysis of Cell Function (3) Verdugo For engineers with no previous experience in the biological sciences, this course introduces the fundamentals of cell biology in an engineering-oriented framework. Includes structure, energetics, information processing, transduction, and biological energy production.
BIOPEN 433 Medical Instrumentation (4) Speilman Introduction to the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical ultrasound equipment. Laboratory included. For juniors, seniors, and first-year graduate students who are preparing for careers in bioengineering, both research and industrial. Prerequisite: some knowledge of human physiology and electronics or instrumentation or permission of instructor. Recommended: 534, 535, E E 433. Offered: jointly with E E 436; Sp.
BIOPEN 467 Biochemical Engineering (3) Banexy Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery systems. Prerequisite: CHE 340, organic chemistry. Recommended: CHE E 465. Offered: jointly with CHE E 467; W.
BIOPEN 490 Engineering Materials for Biomedical Applications (3) Hoffman Combined application of the principles of physical chemistry, biochemistry, materials engineering, mass transfer, and fluid mechanics to biomedical problems. Case studies include considerations of the selection of materials, design, and the operation of instruments, components of, or entire, artificial organs (heart, kidney, lung) and artificial structural elements (bone, teeth, skin), all for use in contact with body fluids. Prerequisite: organic chemistry or permission of instructor. Offered: jointly with CHE E 490; even years; W.
BIOPEN 491 Controlled-Release Systems: Principles and Applications (3) Hoffman Mechanisms for controlled release of active agents and the development of useful systems for this purpose. Release mechanisms include diffusive, convective, or erosive driving forces. Applications to the biomedical, agricultural, forestry, and oceanography fields. Some special case studies covered in detail. Prerequisite: permission of instructor. Offered: jointly with CHE E 491; odd years; W.
BIOPEN 492 Surface Analysis (3) Rainer Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger): ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHE E 458; W.
BIOPEN 499 Special Projects (2-6, max. 6) Individual undergraduate bioengineering projects under the supervision of an instructor. In addition, classes on selected topics of current interests as announced. Prerequisite: permission of instructor. Entry Code required. Offered: A&WSPs.

Courses for Graduates Only
BIOPEN 508 Physical Aspects of Medical Imaging (4) Stewart Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound and Doppler ultrasound. Offered: jointly with RADGY 508; Sp.
BIOPEN 510- Bioengineering Seminars (1-2), max. 3 Topics of current bioengineering interests presented by resident and visiting faculty members and students: Graduate students actively involved in bioengineering research are eligible to enroll for credit and can be expected to attend regularly, participate in discussions, and make presentations. Credit/no credit only. Offered: AW.
BIOPEN 511 Biomaterials Seminar (1) Hoffman, Horbett, Rainer Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with CHE E 511; A&Wsp.
BIOPEN 512 Biomechanics Seminar (1) Sanders Designed to expose students to current research topics in the area of biomechanics and permit them the opportunity to present their work for discussion. Subjects include presentations of ongoing laboratory research, as well as related topics, journal article review,
and summaries of national meetings. Credit/no credit only.

BIOEN 515 Introduction to Clinical Medicine for Engineers (3) Napier: introduction to concepts and methods used for solving problems related to human health and disease. Focuses on the biological, physical, and chemical aspects of human health and disease. Prerequisite: permission of instructor. Offered: odd years; W.

BIOEN 516 Measurement and Confirmation: An Introduction to Philosophical and Ethical Issues for Scientists (2) Pagliaro: Graduate level introduction to philosophical foundations of science and engineering. Methods used to test and confirm phenomena in research examined, and principles of hypothesis, prediction, testing, experimental design, data acquisition, data recording, data analysis, data presentation, statistics in research, and interpretation of results discussed. Prerequisite: permission of instructor. Offered: W.

BIOEN 520 Orthopedic Biomechanics (4) Tenney: Mechanical engineering applied to musculoskeletal system with emphasis on techniques in orthopedic surgery. Measurement of mechanical properties of tissues, mechanics of bone, soft tissue, and muscle, mechanics of upper extremity, spine, and foot. Emphasis on the clinical application of biomechanical principles involving injury, surgery, engineering in surgery, gait analysis, joint replacement, fracture fixation. Prerequisite: M E 556 and 557 or permission of instructor. Offered: odd years; W.

BIOEN 534 Introduction to Biomedical Instrumentation: Analog (4) Spelman: Techniques of biological systems analysis using Fourier and Laplace transforms. Electronic circuit analysis techniques applied to biological problems. Operational amplifiers as interfaces to transducers and as signal processors. Computer-aided design used in both homework and weekly laboratory. Prerequisites: MATH 307, PHYS 121-122, or equivalents. Offered: A.

BIOEN 535 Introduction to Biomedical Instrumentation: Digital (4) Technical instrumentation systems (power supplies, transducers, amplifiers, recording and display devices); techniques of signal/noise enhancement (grounding, shielding, averaging); digital logic and instrumentation overview; use of laboratory computers and laboratory experience in these areas. Biomedical applications. Prerequisite: permission of instructor. Offered: W.

BIOEN 537 Case Studies in Biomedical Instrumentation (3) Spelman: Current applications of medical instrumentation to neural prosthetics, microcopy, and the interaction of electromagnetic fields with biological tissues. Prerequisites: 436, 534, and 535 or permission of instructor. Offered: W.

BIOEN 540 Problem Solving in Biomechanics (3) Foster: Introduction to techniques of mathematical modeling. How to use computer methods to solve selected biomechanics problems in data analysis and modeling, and to use models to test hypotheses. Hands-on computer experience. Prerequisite: permission of instructor. Offered: even years; A.

BIOEN 542 Computer Simulation in Biology (3) Krot, Bassingthwaighte, Graham: Introduction to mathematical modeling of biological phenomena. Tutorial text explains how to derive equations for simple models and apply them to generate simulation data. Application topics include kinetics of biomolecular reactions and enzyme saturation, membrane transport, organismal predation, competition and growth, compartmental and spatially distributed models, physiological control systems, probabilistic models. Prerequisite: P B IO 405 and 406 or equivalent or permission of instructor. Offered: W.

BIOEN 545 Fractals in Biology and Medicine (3) Bassingthwaighte: Introduction to fractal and chaos. Conceptual approaches to using fractals for characterizing structures and growth processes, describing heterogeneities, and evaluating properties of tissues. The behavior of non-linear systems, often chaotic, describes physiological homeodynamics, regulation without set points in feedback control. Offered: A.

BIOEN 550 Mass Transport and Exchange in Biological Systems (3) Bassingthwaighte: Review of basic mechanisms of transport; transport through vascular system and blood-tissue exchange processes in organs; implications of nervous system dynamics and applications to physiological regulation, medical imaging, and pharmacokinetics. Prerequisites: calculus, introduction to differential equations, cardiovascular physiology. E E 428 recommended for systems analysis, chemical engineering transport. Offered: W.

BIOEN 555 Introduction to Biomechanics (3) Polack: Mechanical properties of biological tissues, with emphasis on the underlying histological bases. Bones, joints, cartilage, blood vessels, connective tissue, muscle, heart. Many laboratory sessions. Offered: odd years; Sp.

BIOEN 556 Ultrasonics in Biomedical Engineering (4) Martin: Fundamentals of ultrasonic generation, formation, reception, and treatment of absorption, scattering, and transmission. Conventional and new methodology. (A, B, T-M mode, imaging, Doppler, tissue characterization, etc.) Prerequisite: M E 525 or E E 525 for nonbioengineering students or permission of instructor. Offered: odd years; A.

BIOEN 562 Bioelectromagnetics (4) Ramon: Interaction of radio-frequency electromagnetic fields with biological systems: history, quantities and units, theoretical analysis, instrumentation and measurements, biological effects, medical applications, including cancer detection and therapy, major energy sources, public controversies, public and occupational health protection, international and national safety standards. Prerequisite: E E 381, or permission of instructor. Offered: odd years; A.

BIOEN 564 Biomedical Light Microscopy and Imaging (4) Pagliaro, Viney: Introduction to light microscopy for biomedical applications, presented at the graduate level for students with some background in optics, physics, and biology. Topics include the principles of image formation, contrast, magnification and resolution, practical aspects of microscopy, introduction to microscope imaging, and three-dimensional microscopy. Prerequisite: 534 or permission of instructor. Offered: odd years; Sp.

BIOEN 565 Nuclear Magnetic Resonance in Biology (2) Hayes, Kushmerick, Richards, Yuan: Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with RADGY 550; odd years; W.

BIOEN 568 Image-Processing Computer Systems (4) Haralick, K. Components of digital processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image-processing operations. Selected advanced image-processing topics introduced. Individual student project. Prerequisite: permission of instructor. Offered: jointly with E E 568; W.

BIOEN 571 Polymers in Biology and Medicine (3) Bassingthwaighte: Introduction to fractal and chaos. Conceptual approaches to using fractals for characterizing structures and growth processes, describing heterogeneities, and evaluating properties of tissues. The behavior of non-linear systems, often chaotic, describes physiological homeodynamics, regulation without set points in feedback control. Offered: A.

BIOEN 572 Liquid Crystals (3) Viney: Properties of the liquid crystalline state are discussed in fundamental chemical, physical, and biological aspects. Theoretical and computational approaches to liquid crystalline states are examined. Prerequisite: permission of instructor. Offered: jointly with M SE 572; even years; Sp.

BIOEN 573 Biosensors and Biomedical Sensing (3) Yager: In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing. Prerequisite: 436 or 534 and 535 or permission of instructor. Offered: even years; A.

BIOEN 575 Molecular Modeling Methods (3) Lybrand: Introduction to theory and practice of computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Discussion of background theory, implementation details, capabilities and practical limitations of these methods. Laboratory sessions, hands-on tutorials, projects. Prerequisite: previous coursework in biochemistry and physical chemistry and/or permission of instructor. Offered: W.

BIOEN 576 Laboratory Techniques in Protein Engineering (4) Stayton: Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or consent of instructor. Offered: W.

BIOEN 590 Advanced Topics in Biomaterials (3) Ratner, Hoffman, Horbett, Yager: Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: 490 or CH E 490. Offered: jointly with CH E 590; even years; Sp.

BIOEN 592 Surface Analyses (3) Ratner: Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CH E 558; W.

BIOEN 599 Special Topics in Bioengineering (1-6, max. 16): Offered at a graduate level periodically by faculty members within the Center for Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisites: undergraduate or graduate courses (or equivalent) determined individually for each special topic. Offered: AWSSpS.

BIOEN 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSSpS.

BIOEN 700 Master's Thesis (*) Credit/no credit only. Offered: AWSSpS.

BIOEN 800 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSSpS.
Molecular and Cellular Biology

Graduate Program

The University of Washington offers a program in molecular and cellular biology leading to a Ph.D. degree. Over 100 faculty members are drawn from the departments of Biochemistry, Biological Structure, Botany, Environmental Health, Genetics, Immunology, Microbiology, Pathobiology, Pathology, Physiology and Bio-physics, Pharmacology, Zoology, the Center for Bioengineering, and the Fred Hutchinson Cancer Research Center.

The goals of the program are to provide students with a sound background in molecular and cellular biology and broad access to research expertise of faculty members and laboratories involved in research in this area. The program includes a three-quarter core course, a three-quarter literature review course, three or more quarter-long laboratory rotations, advanced courses in molecular and cellular biology (elect), and a series of informal workshops and seminars. Critical evaluation of pertinent literature, exposure to current research methods, and creative thinking through independent research are stressed. Students are expected to begin active research in their first year, through their laboratory rotations.

The faculty members who participate in the program are leaders in developing and using molecular and cellular biological approaches to the understanding of basic biological processes. A brochure of participating faculty members and their specific research interests is mailed to students who inquire about the program. In general, the faculty's research interests encompass both prokaryotic and eukaryotic (animal and plant) organisms and include such areas as cell structure; cell-cell interactions; cell signaling and cellular messengers; cell-matrix interactions; cell, tissue, and organ development and differentiation; membrane biogenesis and cytoskeletal structure and function; chromosome structure and function; protein synthesis and compartmentalization; gene structure and regulation; and the mechanisms by which normal processes are altered in disease states. Such techniques as recombinant DNA analysis, gene transfer, monoclonal antibody production and use, peptide and oligonucleotide synthesis, and microinjection are used in conjunction with the classical methods of biochemistry, microbiology, genetics, cell culture, and light and electron microscopy. A wide variety of research facilities is available to program participants.

Financial Aid

Students with satisfactory academic progress can anticipate a stipend plus tuition for the duration of their programs.

Application Process

Students who have emphasized the biological or physical sciences in their undergraduate careers are encouraged to apply. Required application materials include official copies of all college and college transcripts, GRE scores (general and advanced), a statement of purpose, and three letters of recommendation. Students are strongly advised to request letters from individuals who can knowledgeably assess their potential for a research career. The application deadline is January 2, and students enter the program in autumn quarter.

Correspondence and Information

Program Director

Molecular and Cellular Biology Program, HR-21

Faculty

Professors

Bassingthwaighte, James A. * 1975; MD, 1955, University of Toronto (Canada); computer analysis of transport mechanisms in blood and tissues.

Beavo, Joseph A. * 1977; PhD, 1970, Vanderbilt University; nucleotide phosphodiesterase regulation of cell function.

Bendich, Arnold J. * 1970; PhD, 1969, University of Washington; mitochondrial and chloroplast genome structure, genome mapping.

Bennett, Earl P. * 1957; (Emeritus); MD, 1941, Harvard University; arteriosclerosis, diabetes mellitus, amyloidosis.

Berger, Albert J. * 1978; PhD, 1976, University of California (San Francisco); neural and chemical control of respiration.

Bevan, Michael J. * 1990; PhD, 1972, National Institute For Medical Research (UK); T lymphocyte development and specificity.

Bothwell, Mark A. * 1985; PhD, 1975, University of California (Berkeley); molecular and cellular physiology of growth factors.

Bowen-Pope, Daniel R. * 1982; PhD, 1979, University of California (Berkeley); gene regulation, growth factors and receptors.

Byers, Breck E. * 1970; PhD, 1967, Harvard University; cell biology: mitosis and meiosis, mechanisms of nuclear division and crossing-over in yeast.

Byers, Peter H. * 1976; MD, 1969, Case Western Reserve University; extracellular matrix synthesis, genetic disorders of collagen metabolism, secretion.

Carter, William G. * 1981; PhD, 1977, University of British Columbia; molecular genetics in biochemistry of membrane transport systems.

Catterall, William A. * 1977; PhD, 1972, Johns Hopkins University; molecular biology of ion channels, molecular pharmacology and neurobiology.

Cattolico, Rose A. * 1975; PhD, 1973, State University of New York (Stony Brook); plasmod replication, nucleic acid biochemistry in synchronized unicellular algae.

Champoux, James J. * 1972; PhD, 1970, Stanford University; DNA replication, tumor virology.

Clark, Edward A. * 1979; PhD, 1977, University of California (Los Angeles); lymphocyte surface molecules, lymphocyte activation and cell communication.

Clark, John I. * 1982; PhD, 1974, University of Washington; structural and developmental basis of lens-cell transparency.

Cleland, Robert E. * 1984; PhD, 1957, California Institute of Technology; physiology, plant hormones, cell wall.

Cloney, Richard A. * 1961; PhD, 1959, University of Washington; invertebrate embryology, histology, morphogenetic movements, metamorphosis, biology of ascidians.

Costa, Lucio Guido * 1983; PhD, 1977, University of Milan (Italy); neurotoxicology; developmental and molecular mechanisms/biological markers of neurotoxicity.

Dale, Beverly A. * 1972; PhD, 1966, University of Michigan; keratin biochemistry.

Detwiler, Peter B. * 1977; PhD, 1970, Georgetown University; physiology of photoreceptors.

Disteche, Christine M. * 1980; PhD, 1976, University of Liège (Belgium); molecular genetics of sex chromosomes, X inactivation, human and mouse cytogenetics.

Dorsa, Daniel M. * 1979; PhD, 1977, University of California (Davis); neurophysiology, neurochemistry.

Eaton, David L. * 1979; PhD, 1978, University of Kansas; biochemical and environmental toxicology, aflatoxin carcinogenesis, metabolism of toxic chemicals.

Edwards, John S. * 1967; PhD, 1960, Cambridge University (UK); arthropod neurobiology, insect physiology and development, tundra and alpine biology.

Eisen, Harvey * 1986; (Affiliate); PhD, 1967, University of Toronto (Canada); host-parasite interactions, generation of genetic diversity.

Eisenman, Robert M. * 1976; (Affiliate); PhD, 1971, University of Chicago; viral oncology, oncogenes, retrovirus multiplication.

Eyre, David R. * 1985; PhD, 1963, University of Leeds (UK); connective tissue biology, collagen chemistry, bone and cartilage metabolism.

Fangman, Walton L. * 1967; PhD, 1965, Purdue University; molecular genetics: control of replication of yeast chromosomes, plasmid and mitochondrial DNA.

Faustman, Elaine M. * 1981; PhD, 1981, Michigan State University; developmental toxicology, risk assessment methodologies, toxicology of N-nitroso compounds.

Foss, Heinz G. * 1987; PhD, 1961, Technical University of Munich (Germany); bioorganic and natural products chemistry.

Fournier, Keith 1994; (Affiliate); PhD, 1974, Princeton University; regulation of tissue-specific gene expression, somatic cell and molecular genetics.

Furlong, Clement E. * 1977; (Research); PhD, 1976, City University of New York; viral pathogenesis and neoplasia.

Glimst, John A. * 1960; MD, 1960, University of Upsala (Sweden); membrane structure and function.

Gordon, Albert M. * 1964; PhD, 1961, Cornell University; skeletal muscle physiology.

Gordon, Milton * 1959; PhD, 1953, University of Illinois; molecular basis of plant tumors, control of gene expression in plants.

Greenberg, Philip D. * 1978; MD, 1971, State University of New York (Downstate); molecular, cellular, viral, and tumor immunology.

Groudev, Mark * 1982; MD, 1975, University of Pennsylvania; chromatin structure and gene activity in development and transformation.

Hakomori, Sen-Itiroh * 1985; MD, 1956, University of Tokyo (Japan); biochemistry and immunochemistry of carbohydrate antigens on malignant and normal cells.

Haller, Benjamin D. * 1963; PhD, 1959, Harvard University; molecular genetics of yeast and higher plants.

Hartwell, Leland H. * 1968; PhD, 1964, Massachusetts Institute of Technology; genetic analysis of chromosome transmission and of the control of division by hormones in yeast.

Hauschka, Stephen D. * 1972; PhD, 1966, Johns Hopkins University; muscle differentiation.
Hille, Beril * 1966; PhD, 1967, Rockefeller University; ion channels of excitable membranes.

Hoffman, Altair S. * 1970; DSc, 1957, Massachusetts Institute of Technology; polymer material science and engineering.

Hol, Wilhelms G. J. * 1992; PhD, 1971, University of Groningen (Netherlands); protein crystallography, drug design, vaccine development, and protein engineering.

Hood, Leroy E. * 1992; PhD, 1968, California Institute of Technology; molecular immunology, large scale DNA mapping and sequencing, molecular evolution.

Horbertt, Thomas A. * 1973; PhD, 1970, University of Washington; interfacial proteins, cell interactions, insulin delivery systems.

Kenny, George E. * 1961; PhD, 1961, University of Minnesota; antigenic analysis of mycoplasmas, bacteria, and other organisms.

Kuo, Cho-Chou * 1969; PhD, 1970, University of Washington; antigenic analysis, immunology and pathogenesis of chlamydiae.

Kushmerick, Martin J. * 1988; MD, 1963, University of Pennsylvania; muscle contraction, magnetic resonance, metabolic imaging NMR spectroscopy.

Laird, Charles D. * 1971; PhD, 1966, Stanford University; cell and developmental biology, human genetics.

Linial, Maxine L. * 1982; (Affiliate); PhD, 1970, Tufts University; retrovirology, molecular basis of cancer.

Loeb, Lawrence A. * 1978; MD, 1961, New York University; DNA replication, cancer and AIDS.

Martin, George * 1957; MD, 1953, University of Washington; somatic cell genetics, pathobiology of aging, Alzheimer’s disease.

McDougall, James K. * 1979; (Research); PhD, 1971, University of Birmingham (UK); cell cycle, genetic instability and neoplasia.

McKnight, G. Stanley * 1979; PhD, 1976, Stanford University; phosphorylation; gene expression and neuroendocrine physiology in mice using genetic approaches.

Miller, Arthur D. * 1987; (Affiliate); PhD, 1982, Stanford University; retrovirus biology, gene transfer, gene therapy.

Moody, William J. * 1982; PhD, 1977, Stanford University; single cell electrophysiology, development of electrical properties in embryos.

Morris, David R. * 1966; PhD, 1964, University of Illinois; regulatory genes.

Motulsky, Arno G. * 1953; MD, 1947, University of Illinois; medical genetics.

Narayan, A. Sampath * 1975; (Research); PhD, 1967, University of Madras (India); connective tissue, periodontal disease.

Nathanson, Neil M. * 1979; PhD, 1975, Brandeis University; molecular analysis of neural signal transduction by muscarinic neurokin receptor.

Neiman, Paul E. * 1971; MD, 1964, University of Washington; oncology.

Nester, Eugene W. * 1962; PhD, 1959, Case Western Reserve University; genetics and biochemistry of bacterial-plant cell interactions, tumorigenesis.

Norwood, Thomas H. * 1973; MD, 1968, University of Maryland; somatic cell genetics, pathobiology of aging, mitotic cell cycle regulation.

Odell, Garrett M. * 1985; PhD, 1972, Johns Hopkins University; mathematical biology, ecology, models in cell and developmental biology.

Palmiter, Richard D. * 1982; PhD, 1968, Stanford University; regulation of gene expression in transgenic mice.

Parson, William W. * 1971; PhD, 1965, Case Western Reserve University; bioenergetics, with particular emphasis on photosynthesis, picosecond spectroscopy.

Perlmutter, Roger M. * 1984; MD, 1979, Washington University; molecular immunology and the molecular biology of neoplasia.

Petra, Philip H. * 1966; PhD, 1968, Tulane University; reproductive biochemistry.

Plous, Donald A. * 1964; MD, 1956, University of Pennsylvania; antigen processing, function of nonclassical MHC genes, MHC gene regulation.

Pollack, Gerald H. * 1968; PhD, 1968, University of Pennsylvania; muscular contraction.

Rabinovich, Peter S. * 1981; MD, 1979, University of Washington; signal transduction in cellular aging, neoplastic progression flow cytometry.

Ratner, Buddy D. * 1972; PhD, 1972, Polytechnic Institute of Brooklyn; synthesis and characterization of polymeric biomaterials.

Reeder, Michael A. * 1992; PhD, 1976, Cambridge University (UK); attherosclerosis, smooth muscle cell replication and migration, growth factors and receptors.

Riddiford, Lynn M. * 1973; PhD, 1969, Cornell University; insect development and physiology, invertebrate endocrinology.

Righi, Michael C. * 1990; PhD, 1974, University of Pennsylvania; biophysical chemistry.

Reid, Brian A. * 1980; PhD, 1976, Cambridge University (UK); biosynthesis and characterization of extracellular matrix molecules.

Ross, Russell * 1962; PhD, 1965, University of Washington; attherosclerosis, growth factors, inflammation, vascular biology.

Saba, John C. * 1970; PhD, 1972, University of Washington; retinal biochemistry.

Sage, E. Helene * 1980; PhD, 1977, University of Utah; cell biology.

Sandell, Linda J. * 1987; PhD, 1980, Northwestern University; biochemistry and molecular biology of connective tissue, extracellular matrix molecules.

Schubiger, Gerold A. * 1972; PhD, 1968, University of Zurich (Switzerland); developmental genetic control of Drosophila embryos, pattern formation in imaginal disks.

Schwartz, Stephen Mark * 1974; MD, 1967, Boston University; vascular biology, atherosclerosis, molecular basis of lineage, developmental biology, cell kinetica.

Sibley, Carol Hopkins * 1976; PhD, 1974, University of California (San Francisco); mammalian cell genetics and molecular parasitology.

Smith, Gerald R. * 1983; (Affiliate); PhD, 1970, Massachusetts Institute of Technology; molecular biology of genetic recombination and regulation and gene expression.

Stahl, William L. * 1967; PhD, 1963, University of Pittsburgh; neurochemistry of brain ATPase systems.

Staley, James T. * 1971; PhD, 1967, University of California (Davis); freshwater bacteriology, microbial ecology, general microbiology.

Stamatoyannopoulos, George * 1965; MD, 1958, University of Athens (Greece); medical genetics.

Steiner, Robert A. * 1977; PhD, 1975, University of Oregon; neuroendocrinology.

Storm, Daniel R. * 1978; PhD, 1971, University of California (Berkeley); molecular basis of neuroplasticity; CAM and Ca2+ signal transduction systems in the CNS.

Stuart, Kenneth Daniel * 1985; PhD, 1969, University of Iowa; molecular biology of parasitology.

Teller, David C. * 1965; PhD, 1964, University of California (Berkeley); physical chemistry of macromolecules, association reactions of proteins.

Truman, James W. * 1973; PhD, 1970, Harvard University; hormones and invertebrate behavior, insect physiology, circadian rhythms.

Verduo, Pedro * 1974; MD, 1965, State University of Chile; microbiology, biomechanics, polymer gel physics, laser spectroscopy, cell biology.

Vincenzi, Frank F. * 1967; PhD, 1965, University of Washington; ion transport and intracellular calcium, free radicals and disease, computers in education research.

Waltz, Kenneth A. * 1959; PhD, 1959, University of Toronto; structure and functions of proteins, phosphatases, mass spectrometry.

Watson, Eileen L. * 1972; PhD, 1970, University of Utah; salivary gland pharmacology and regulation.

Weintrob, Harold M. 1982; (Affiliate); MD, 1973, University of Pennsylvania; developmental biology, control of gene expression.

Wight, Thomas * 1978; PhD, 1972, University of New Hampshire; connective tissue biology, pathology, proteoglycan metabolism.

Willows, A. O. Dennis * 1969; PhD, 1967, University of California Los Angeles; regulation of cytokine production in T cells and macrophages.

Wingfield, John C. * 1985; PhD, 1973, University College of North Wales (UK); environmental and hormonal control of avian reproductive cycles.

Wolf, Norman S. * 1966; DVM, 1953, Kansas State University; hematopoietic stem cell dynamics and transplantation, aging at the cellular level.

Woods, John A. * 1982; (Research); PhD, 1970, University of Washington; biochemical toxicology of trace metals; biological markers of metal exposure.

Yao, Meng Chao * 1986; (Affiliate); PhD, 1975, University of Rochester; regulation of gene amplification and chromosome rearrangements in Tetrahymena.

Young, Elton * 1969; PhD, 1967, California Institute of Technology; regulation of gene activity in the yeast Saccharomyces cerevisiae.

Zakian, Virginia A. * 1982; (Affiliate); PhD, 1975, Yale University; initiation of DNA replication, eukaryotic chromosome structure.

Associate Professors

Bekken, Aimée * 1973; PhD, 1970, University of Iowa; gene regulation during oogenesis and embryogenesis, developmental, cellular and molecular biology.

Breeden, Linda L. * 1994; (Affiliate); PhD, 1981, University of Colorado (Boulder); events that control the G1/S transition in Saccharomyces cerevisiae.

Campbell, Lee Ann * 1985; PhD, 1982, Pennsylvania State University; molecular biology and pathogenic mechanisms of chlamydiae.
Molecular regulation of viral gene expression at the University of Chicago. Chavkin, Charles 1984; PhD, 1982, Stanford University; cell and molecular mechanisms of psychoactive opiate drugs to understand normal and pathophysiology.

Comai, Luca 1989; PhD, 1980, University of California (Davis); chromatin and gene regulation, genome mapping, axil development.

Cooper, Jonathan A. 1987; (Affiliate); PhD, 1976, Warwick University (UK); regulation of cellular metabolism and proliferation by protein phosphorylation.

Davis, Trisha Neil 1987; PhD, 1963, Yale University; the function of calcium-binding proteins in cell growth.

Eneman, Michael 1994; (Affiliate); PhD, 1986, University of Wisconsin; function of HIV genes, tropism of HIV.

Farr, Andrew G. 1982; PhD, 1975, University of Chicago; cell interactions governing lymphocyte production and function.

Gelb, Michael H. 1985; PhD, 1982, Yale University; mechanistic enzymology, bioorganic and medicinal chemistry.

Hahn, Steven M. 1994; (Affiliate); PhD, 1984, Brandeis University; molecular and biochemical analysis of RNA polymerase II transcription initiation.

Hille, Merrill B. 1978; PhD, 1965, Rockefeller University; developmental biology, gastrulation in sea urchin embryos, translational regulation during meiosis.

Henikoff, Steven 1982, (Affiliate); PhD, 1977, Harvard University; gene and chromosome organization in Drosophila.

Hirnichen, Robert D. 1994; (Affiliate); PhD, 1982, Indiana University; genetic and biochemical analysis of ion channels in Paramaecium, behavioral genetics.

Howard, Jonathan 1989; PhD, 1983, Australian National University; biophysics of molecular motors.

Hurlay, James Bryant 1985; PhD, 1979, University of Illinois; molecular basis of vision.

Kahn, Michael 1992; PhD, 1982, Yale University; molecular recognition, protein structure-function relationships, peptidomimetics.

Katze, Michael Gerald 1987; PhD, 1980, Hahnemann Medical College; regulation of viral gene expression at the transcriptional level.

Klevit, Rachel E. 1983; DPhil, 1981, Oxford University (UK); molecular recognition, protein NMR.

Lee, Minako I. 1977; (Research); MD, 1963, Tokyo Women's Medical College (Japan); growth and differentiation of hematopoietic and lymphopoietic cells.

Leigh, John A. 1985; PhD, 1983, University of Illinois; bacterial physiology, biochemistry, genetics, bacteria-plant interactions.

Levis, Robert W. 1994, (Affiliate); PhD, 1978, Massachusetts Institute of Technology; structure and function of tautomers in Drosophila, transposable genetic elements, and development.

Lewis, David B. 1989; MD, 1981, University of California (San Francisco); T lymphocyte cytotoxic biology; infectious diseases.

Lory, Stephen 1984; PhD, 1980, University of California (Los Angeles); biochemistry, genetics of microbial virulence factors.

Luchtel, Daniel L. 1972; PhD, 1969, University of Washington; electron microscopy and cell biology, lung anatomy/pathophysiology, fiber toxicology.

Manoil, Colin C. 1986; PhD, 1979, Stanford University; molecular genetics, protein localization in bacteria.

Monnai, Raymond J. 1982; MD, 1976, University of Chicago; somatic mutation, somatic cell and molecular genetics.

Moon, Randall T. 1985; PhD, 1982, University of Washington; embryonic development, signal transduction.

Moseley, Stephen L. 1985; PhD, 1981, University of Washington; molecular basis of pathogenesis in E. coli diarrhea.

Myersor, David 1985; PhD, 1979, Albert Einstein College of Medicine; the pathology of viral disease in humans.

Overbaugh, Julie Maureen 1988; PhD, 1983, University of Colorado (Boulder); molecular mechanisms of retroviral pathogenesis/antiviral gene expression/AIDS.

Parsons, Marilyn 1986; (Research); PhD, 1979, Stanford University; signal transduction and organelle biogenesis in African trypanosomes.

Pries, James R. 1993; (Affiliate); PhD, 1983, University of Colorado; reliability models, fault trees.

Prothero, John W. 1965; PhD, 1960, Western Ontario University (Canada); model building, morphogenesis, cell kinetics, scaling.

Reh, Thomas A. 1989; PhD, 1981, University of Wisconsin; regeneration and development of central nervous system.

Reuveni, Zipora 1982; (Research); PhD, 1979, University of Windsor (Canada); myogenesis during growth development and regeneration of skeletal muscle.

Roberts, Marilyn C. 1991; PhD, 1978, University of Washington; mycobacterial, antibiotic resistance genes, plasmds and sexually transmitted diseases.

Rosenfeld, Michael E. 1992; PhD, 1981, University of Wisconsin; mechanisms of oteogenesis and macrophage gene expression.

Roth, Mark B. 1994; (Affiliate); PhD, 1984, University of Colorado (Boulder); chromosome structure, analysis of proteins associated with transcription units.

Soriano, Philippe 1994; (Affiliate); PhD, 1978, University of Paris; mammalian developmental genetics.

Stenkamp, Ronald E. 1978; PhD, 1975, University of Washington; crystallography.

Tempel, Bruce L. 1988; PhD, 1983, Princeton University; molecular neurobiology/neuromodulation, especially potassium channel gene structure and function.

Thomas, James H. 1988; PhD, 1985, Massachusetts Institute of Technology; genetics of development and the nervous system in nematodes.

Thouless, Margaret E. 1980; PhD, 1974, University of Birmingham (UK); antigenic variability of enteric viruses and simian retroviruses.

Van Volkenburgh, Elizabeth 1982; PhD, 1980, University of Washington; leaf growth and development, cellular and biochemical levels of control.

Wakimoto, Barbara T. 1984; PhD, 1981, Indiana University; developmental genetics, gene expression and chromosome organization in eukaryotes.

Wong, Timothy Chee-Hing 1983; PhD, 1979, University of Texas (Dallas); viral gene expression in chronic infections and oncogenesis.

Yamamoto, Fumiohiro 1988; (Research); PhD, 1983, Osaka City University (Japan); molecular biology of histocompatibility antigen retrieval.

Yoshimura, Fayth K. 1980; (Research); PhD, 1972, Yale University; retroviral transformation of hemopoietic cells.

Assistant Professors

Bendik, Brad K. 1988; (Research); PhD, 1983, Cambridge University (UK); biosynthesis of glycogen protein carbohydrate structures.

Berg, Celeste A. 1990; PhD, 1986, Yala University; Drosophila developmental genetics, cell communication and cell migration during oogenesis.

Bradley, D. Thomas; 1991, (Research); PhD, 1983, University of Colorado (Denver).

Braun, Robert Elmer 1986; PhD, 1985, Tufts University; mouse molecular genetics and male germ cell development.

Cooper, Mark S. 1990; PhD, 1985, University of California (Berkeley); cellular physiology and cell motility in developing tissues.

Edgar, Bruce A. 1994, (Affiliate); PhD, 1987, University of Washington; genetic control of cell division patterns in the Drosophila embryo.

Fink, Pamela J. 1990, PhD, 1981, Massachusetts Institute of Technology; T cell differentiation, tolerance induction, molecular and cellular immunology.

Foose, Jefferson 1994, (Affiliate); PhD, 1985, University of California (Berkeley); physical chemistry of antibodies.

Glinsky, Edward 1994, (Affiliate); PhD, 1986, Harvard University; mechanisms of axon guidance and synapse formation in Drosophila.

Hughes, Kelly T. 1989; PhD, 1984, University of Utah; genetics, gene regulation, microbial physiology, and metabolism.

Kavanagh, Terrance J. 1985, (Research); PhD, 1985, Michigan State University; biochemical toxicology and free radical damage.

Kimelman, David 1988, PhD, 1985, Harvard University; molecular biology of early development in the frog, Xenopus laevis.

Lybrand, Terry Paul 1990; PhD, 1984, University of California (San Francisco); molecular modeling.

Mandel, Dina F. 1987, (Research); PhD, 1983, Stanford University.

Martin, David 1990; MD, 1981, Virginia College of Osteopathic Medicine; genetics of development and the nervous system in nematodes.

Mazurek, Nachman 1990, (Research); PhD, 1984, Flinberg Graduate School (Israel).

Osterland, Elaine A. 1994, (Affiliate); PhD, 1987, Oregon Health Sciences University; study of mammalian behavioral genes.

Pagliaro, Leonard J. 1990; PhD, 1986, Wesleyan University; in vivo enzymology, cytoplasmic organization, light microscopy, image processing, photoactivation.

Parkhurst, Susan M. 1994, (Affiliate); PhD, 1985, Johns Hopkins University; developmental, genetic and molecular analysis of Drosophila embryogenesis.

Pullen, Ann M. 1991; PhD, 1987, Cambridge University (UK); superantigens and their effects on T-cells.

Reynolds, Ann E. 1986, (Research); PhD, 1983, Tufts University.

Riley, Donald E. 1982; (Research); PhD, 1987, University of Washington; pathogenic research and diagnostics involving DNA sequences.

Roberts, James Michael 1989, (Affiliate); PhD, 1984, Columbia University; cell cycle regulation and control of DNA replication.
Neurobiology

202 Hitchcock

Graduate Program

The departments of Physiology and Biophysics, Pharmacology, Biochemistry, and Biological Structure of the School of Medicine, the Behavioral Neuroscience Interdisciplinary Group, and the Department of Zoology of the College of Arts and Sciences offer an interdisciplinary training program in neurobiology. The program leading to a Ph.D. degree provides a broad background in basic neurobiology. In-depth experience in one of the participating academic disciplines, and extensive training in the application of modern experimental methods to fundamental problems in neurobiology. Upon admission to the program, students perform three to four laboratory rotations in two or more of the departments participating in the program. Students must fulfill basic core course requirements for the graduate program in neurobiology along with their designated departmental requirements for neurobiology students in order to receive the Ph.D. degree. At the end of the first year, students choose a dissertation mentor and are usually then affiliated with the mentor's department. Exceptional students whose objectives are not met within the departmental pathways in neurobiology may develop an individual Ph.D. program with the guidance of the program's faculty.

A broad series of courses that spans the various disciplines of neurobiology is offered as part of the interdisciplinary program. Critical evaluation of the original literature and exposure to current experimental methods are stressed. Students are expected to begin active research during their first year. Research opportunities for students encompass many areas of neurobiology. Participating in the program are more than forty faculty members, who are active in the areas of vertebrate and invertebrate neurophysiology, membrane biophysics, neuropharmacology, molecular neurobiology, neuroanatomy, neurochemistry, and developmental neurobiology.

Application Process

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record; GRE scores, including, if possible, scores on the subject test in chemistry, physics, molecular and cellular biology, or biology; and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications are considered and students are accepted until March 1. Applications received after March 1 are considered only in unusual circumstances.

Research Facilities

Sponsoring departments are located in the Health Sciences Center and in the College of Arts and Sciences. Because the program is interdisciplinary, extensive research facilities in all areas of neurobiology are available to the student. The member departments maintain electronic shops, machine shops, instrumentation for synthesis and sequence determination of proteins and nucleic acids, and computer facilities, and equipment for ultrastructural studies is readily available. Students also may employ the resources of the Regional Primate Research Center and the Friday Harbor Laboratories.

Financial Aid

The program offers full stipend and tuition support to students through traineeships derived from NIH training grants and private foundation support and through research assistantships supported by the University or research grant monies. Students with satisfactory academic progress can anticipate that funding will continue for the duration of their program.

Truman, James W. * 1973; PhD, 1970, Harvard University; hormones and invertebrate behavior, insect physiology, circadian rhythms.
## Quantitative Science

The Center for Quantitative Science in Forestry, Fisheries, and Wildlife is an intercollege academic unit sponsored by the College of Forest Resources and the School of Fisheries of the College of Ocean and Fishery Sciences. The center offers a comprehensive program of study in mathematics and statistical methods as applied to problems in ecology and natural resource management. The faculty of the center includes members of the College of Forest Resources and the School of Fisheries, and many are also adjunct members of the Departments of Biostatistics and Statistics.

### Course Descriptions

See page 55 for explanation of course symbols, abbreviations, and credit units.

#### Courses for Undergraduates

- **Q SCI 291, 292** Analysis \( \int \) integrals
  - Analysis of Biological Systems \( \int \) integrals
  - Analysis of Biological Systems

#### Quantitative Ecology

- **Q SCI 381** Introduction to Probability and Statistics
- **Q SCI 392** Techniques of Applied Mathematics
- **Q SCI 393** Techniques of Applied Mathematics
- **Q SCI 482** Fisheries Management

#### Fisheries Management

- **Q SCI 393** Techniques of Applied Mathematics
- **Q SCI 393** Techniques of Applied Mathematics
- **Q SCI 482** Fisheries Management

#### Quantitative Wildlife Assessment

- **Q SCI 456** Fundamentals of Fish Population Dynamics
- **Q SCI 457** Methods of Abundance Estimation
- **Q SCI 458** Fisheries Stock Assessment
- **Q SCI 477** Quantitative Wildlife Assessment
Q SCI 480 Sampling Theory for Biologists (3) NW Gallucci, Rustagi Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations; describing distribution patterns, estimation of parameters and statistical treatment of data. Prerequisites: 482, 483, or permission of instructor. Offered: jointly with STAT 480; even years.

Q SCI 482, 483 Statistical Inference in Applied Research (5,5) NW Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisites: 482 or permission of instructor for 482, 483 or 482 or equivalent for 483. Offered: AW,WSp.

Q SCI 486 Experimental Design (3) NW Topics in analysis of variance and experimental designs: choice of designs, comparison of efficiency, power, sample size, pseudoreplication, factor structure. Prerequisites: 482 or equivalent, and matrix algebra. Offered: jointly with STAT 486.

Q SCI 489 Undergraduate Research (1-5, max. 12) NW Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/no credit only. Prerequisite: permission of instructor.

Courses for Graduates Only

Q SCI 502 Statistical Consulting for the Life Sciences (1-4) Conquest, Rustagi Consulting experience in data analysis, applied statistics, experimental design, parameter estimation, and sampling. For graduate students in Quantitative Ecology and Resource Management. Student provides consultation services to students and faculty. Students spend one classroom hour per week under faculty supervision discussing problems encountered. Prerequisites: 482, 483, STAT 421, 423, or BIOST 514, 515, or equivalents, and permission of instructor. Entry code required.

Q SCI 514 Analysis of Ecological and Environmental Data I (3) Conquest, Skalski Factors affecting optimal growth of individuals in their habitat: Estimation of growth and mortality parameters. Response of organisms to changing environment (ecology, environment monitoring). Stochastic viewpoint emphasized. Research design issues for ecological or environmental studies. Analysis of unwieldy data sets. Prerequisites: STAT 514 or STAT 541, 342; and knowledge of calculus.

Q SCI 515 Analysis of Ecological and Environmental Data II (3) Conquest Complex models for population growth and parameter estimation. Habitat preferences of organisms; study design and data analysis. Nonparametric methods for ecological studies and environmental monitoring. Complications including nonlinear response, redundant ecological information, censored data, sample size limitations. Multiple lines of inquiry; well-defined experiments versus ecological realism. Prerequisite: 514.

Q SCI 521 Scientific Method in Resource Management (4) Ford, Hilborn Process of scientific discovery and strategies used for problems in ecology and natural resources management. Relationships between growth and use of objective knowledge in natural resources management is explored through case studies. The 4-credit option is for development of a written research proposal.

Q SCI 551 Modeling Organism Dynamics (3) Anderson Application of techniques of stochastic differential equations, time series analysis, simulating dynamic processes to plant and animal growth.

Q SCI 552 Spatial Processes in Ecology (3) Ford Spatial distribution of organisms, the mechanisms that produce different distributions, and how they may be described mathematically and modeled. Spatial distribution of communities, how this arises, and what its consequences are. Prerequisites: 482, 483, 550.

Q SCI 556 Mathematical Analysis in Fisheries Stock Assessment (5) Gallucci Analytic approaches to stock assessment and population management, analysis of catch stock and population data, and the application of catch-stock relationships. Prerequisites: 292, 456, 483, or permission of instructor. Offered: jointly with FISH 556.

Q SCI 557 Estimation of Population Parameters (4) Skalski Statistical analysis of population data; design analysis and construction of mark-recapture experiments on natural populations; laboratory work on computer. Prerequisites: 292, 483, and probability theory. Offered: jointly with FISH 557.

Q SCI 558 Advanced Analysis In Fisheries Stock Assessment (3) Hilborn Deterministic and stochastic representations of age-dependent and size-dependent models for stock assessment; analysis of multispecies models; life history in fisheries management strategies, analysis of population data on computer. Prerequisites: 392, 556, or permission of instructor. Recommended: 557. Offered: jointly with FISH 558.

Q SCI 565 Quantitative Resource Management (3) Bare, Mathews Formulation, solution, and interpretation of fisheries, forestry, and other natural resource problems, using mathematically based models. Principles of resource management from a quantitative perspective.

Q SCI 598 Special Topics In Quantitative Resource Management (1-3, max. 12) Population and community ecology, systems ecology, and physical processes in ecosystems. Prerequisites: permission of instructor. Entry code required.

Q SCI 599 Research In Quantitative Resource Management (1, max. 12) Topics can be theoretical in nature or combined theory and experiment. Research might be a prerequisite to thesis or dissertation research. Credit/no credit only. Entry code required.

Quaternary Research Center

19 Johnson

Quaternary research focuses on the processes that presently shape the natural environment and have operated over approximately the past two million years (Quaternary Period). A knowledge of past events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has as goals: (1) to understand environments and climate changes of the past two million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events; (2) to serve as an effective catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology, anthropology, botany, engineering, fisheries, forestry, geography, geophysics, oceanography, pedology, and zoology; (3) to provide a scientific perspective on the scale of modern and man-made environmental changes, including those of climate, in the context of recent earth history; (4) to conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies; and (5) to seek applications of Quaternary studies to modern environmental problems that will help predict consequences of policy decisions.

Graduate Program

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.

Research Facilities

The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems:

Quaternary Isotope Laboratory. The work emphasizes use of carbon and oxygen isotopes to study various aspects of the carbon and hydrological cycles. Major interests include radiocarbon dating, as applied to time-scale calibration and the study of climate change, and studies of polar ice cores.

Periglacial Laboratory. The laboratory contains cold rooms equipped for manipulating and studying the freezing and thawing of soils, rocks, and building materials. A large, unique tilt table permits the study of soils under controlled conditions of slope, temperature, and moisture. Research stress is placed on frost action in arctic and alpine environments.

Quaternary Paleontology and Paleoecology Laboratories. These facilities foster studies of the biotic environment through time and of the uses of plant and animal fossils in Quaternary environmental and ecological re-construction. Studies of vegetational changes are supported by an extensive modern pollen and plant reference collection from Asia and western North America.

QRC Library. This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection.

Correspondence and Information

Director
Quaternary Research Center, AK-60

Faculty

Director
Stephen C. Porter

Professors

Brubaker, Linda B. * 1973; PhD, 1973, University of Michigan; dendrochronology, forest ecology, quaternary paleoecology.
QUAT 417 Quaternary Glacial Ages (3) Porter
Physical, biological evidence of climatic change dur-
ing Quaternary Period, emphasis on glaciation and
geology; paleoclimatology, paleoenvironments, biolog-
ic and biological science. Prerequisites: GLOB 147.

QUAT 501 Seminar/Conference in Quaternary En-
environments (1, max. 6) Interdisciplinary seminar or
conference in the changing natural environments of the
Quaternary Period, emphasis on climatic changes
and their effects. Speakers from the University and
 elsewhere present lectures on their specialties,
followed by discussion. Credit/no credit only.

QUAT 502 Interdisciplinary Quaternary Investiga-
tions (2, max. 6) Research course for interdisciplinary
investigation of Quaternary problems. Students attend
sessions of QUAT 501 and pursue a problem-oriented
plan under the supervision of the faculty director.
Required paper on case study. Credit/no credit only.
Prerequisite: graduate standing.

QUAT 504 Special Topics in Quaternary Sciences
(1-3) Environments and climate changes of past two
million years (Quaternary Period) in context of modern
surface processes, including historical changes,
prehistoric environment of the postglacial period, and
L.C. Age events. Provides scientific perspective on
scale of modern and man-made environmental
changes, including those of climate, in context of re-
cent earth history. Credit/no credit only. Prerequisites:
background courses in earth sciences and ecology.

University Conjoint Courses

See page 55 for explanation of course numbers, sym-
 bols, and abbreviations.

Each of the following courses is administered by two or
more schools or colleges within the University. No
degree program is offered.

Courses for Undergraduates

UCNJ 100 Introduction to Health Professions (1)
Strandor: Opportunities in health professions. Infor-
mation on educational requirements, professional/par-
ais interprofessional roles, licensing, registra-
tion for practice in profession, salaries, and career
opportunities.

UCNJ 411 Psychology of Aging (3) Kiyak: Fo-
cuses on developing the skills necessary for critically
evaluating current psychological theories of aging,
research findings in this area, and the implications of
findings for clinical practice. Special consideration
given to the effects of socioeconomic, sex, and ethnic
differences in the psychology of aging. Open to upper-
division undergraduates and beginning graduate stu-
dents interested in the field of gerontology.

UCNJ 420 Biocultural Practices (1) Kenny: Gen-
eral introduction to appropriate laboratory proce-
sures used for handling potentially hazardous biologi-
cal agents. Particular focus on laboratory safety and
appropriate protocols that should be employed by
those engaged in infectious disease and recombinant
DNA work, emphasis on hands-on, practical training
only.

UCNJ 422 Genetically Transmitted Diseases: An
Overview (2) Elmer, Holmes: Clinically oriented
course designed to provide a knowledge base for
upper division health science students to participate
effectively in community outreach programs for the
prevention of sexually-transmitted diseases. Offered
cooperatively by the departments of Medicinal Chem-
istry, and Medicine. Credit/no credit only.

UCNJ 440 Biological Aspects of Aging (3) Intro-
ductive course on aspects of the biology of human
aging and on functional changes associated with nor-
mal aging and with those illnesses that may be present
in the elderly. Focus on the relationship between
changes in physical function, environment, and quality
of life. Includes theoretical grounding and variation of
relationships among age-linked attitudes and cultural
values related to aging; the social and economic fac-
tors that influence the elderly in contemporary society;
the effects of ethnic and sex differences in social/cul-
tural aging. Open to upper-division undergraduates
and beginning graduate students interested in geron-
tology. Entry code required.

UCNJ 443 Interdisciplinary Seminar on Aging
(1-6, max. 15) Borgatta: Interdisciplinary examination
of the contemporary theoretical literature on geron-
tology. Involves on-campus and out-of-campus
undergraduate and graduate students with an interest in
aging. Quarterly offerings available from the Institute on
Aging. Prerequisites: 411, 440, 442, or permission of
instructor.

UCNJ 490 Social Sensitivity in Health Care (3)
Multidisciplinary course for health professions stu-
dents. Heritage and health care: dealing with socio-
cultural, and physical barriers to health care of
low-income groups and ethnic people of color. Per-
sonal involvement through field experiences and fac-
ulty-directed from affected communities as well as health
professions, social work schools. Credit/no credit only.
Prerequisite: permission of instructor.

UCNJ 497 Health Care in a Rural Community (3)
Critical analysis built upon concepts relative to interdis-
ciplinary health-care delivery in a rural community.
Students develop an organizational model for rural
health care and study innovative ways of mobilizing
community resources and support for a comprehen-
sive rural health-care system. Pharmacy students,
nurses, and other health professionals study applica-
tion of theory in an appropriate clinical setting within
the conceptual framework of each student's profes-
sional field.

Courses for Graduates Only

UCNJ 500 Seminar in Interprofessional Col-
laboration (1-5, max. 8) Emphasizes experien-
tial learning, involving a collaborative project with students
from Social Work, Nursing, Public Health, Education,
and Public Affairs. Seminars focus on interprofessional
collaborative practice, intrapersonal understanding,
interpersonal group process skills, organizational abil-
ity, community awareness, and sociocultural sensitiv-
ity. Students encouraged to participate concurrently in
disciplinary field placements. Credit/no credit. Offered:
A-W-Sp.

UCNJ 501, 502, 503 International Health (1,1,1)
Weekly seminar introduces students to issues and
opportunities of participating in health care systems in
other countries. Guest speakers bring many perspec-
tives of international health care experiences. Class
discussions help prepare students for international
placements. Credit/no credit only.

UCNJ 510 Seminar in Neurobiology (0.5) Bi-
neurology. Recommended for students in the Graduate
Program in Neurobiology and required for students
enrolled in the Graduate Neuroscience Program Training
Grant. Prerequisites: Physiology and Biophysics respon-
sible.

UCNJ 511 Issues in Home Health Care Delivery
(3) Service delivery issues relevant to provision of
health care services across the life span in the home
setting. Home health care as an important component in health care system. Individual and multidisciplinary practice of health care disciplines. Emphasis on research literature. Prerequisite: graduate student standing, upper division with permission of instructor.

UCONJ 513 Dynamics of Patient Management: Diabetes Mellitus (2) Analysis of advanced knowledge related to interdisciplinary management of diabetes. Commonalities and differences in provider approaches, recent research and its effect on management practices, collaborative communication, knowledge application. Brief interactive presentations, decision-making opportunities, discussion. Credit/no credit only. Prerequisites: graduate standing in pharmacy, dietetics, nursing; third- or fourth-year medical student; or permission of instructor.

UCONJ 514, 515 Molecular and Cellular Biology Literature Review (2,2) Emphasizes critical evaluation of the original literature orally and in writing. Subject matter coordinated with 504 and 505. Open only to first-year students in the Interdisciplinary Molecular and Cellular Biology Program.

UCONJ 517 Topics in Molecular and Cellular Biology (1-3) Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty involved in research in this area and lectures by invited speakers. A basic knowledge of principles of molecular and cellular biology assumed. Credit/no credit only. Prerequisites: 504, 505, 506, or equivalent.

UCONJ 520 Molecular Biophysics Research Seminar (1) Drobny, Herriott, Reid A series of research seminars for faculty and students involved with the molecular biophysics program. Credit/no credit only.

UCONJ 524 Developmental Neurobiology (3) Reh, Rubel Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and neurochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology.

UCONJ 525 Overview of Faculty Research in Neurobiology (1) Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Credit/no credit only. Prerequisite: first-year graduate student in neurobiology.

UCONJ 526 Introduction to Laboratory Research in Neurobiology (4) Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Credit/no credit only. Prerequisite: first-year graduate students in neurobiology.

UCONJ 527 Current Topics in Neurobiology (1) Presentation and discussion of current research in neurobiology in order to provide students with exposure to and understanding of the diverse areas of neurobiology research. Credit/no credit only. Prerequisite: graduate student in the Program in Neurobiology or permission of the instructors.

UCONJ 530 Issues in Indian Health (3) Survey of historical and contemporary issues in Indian Health. Covers Indian contributions to health, traditional Indian Medicine, current disease epidemiology, development of Federal Indian Health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian Health. Prerequisite: current health science student or permission of instructor.

UCONJ 535 Principles of STD/HIV Research (1-3) Provides MD and PhD fellows and graduate students with a comprehensive overview of the current state of knowledge in specific areas of STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no credit only.

UCONJ 540 Plant Tumors (1, max. 9) Gordon Discussion of the literature of plant tumors and current research work being carried on in this area at the University. Offered cooperatively by the departments of Biochemistry, Botany, and Microbiology and Immunology. Credit/no credit only. Prerequisite: offered only to persons actively pursuing work in this area.

UCONJ 599 Introduction to Research In Molecular and Cellular Biology (1-20) Morris The student rotates through one research laboratory involved in the Interdisciplinary Molecular and Cellular Biology Program per quarter. Open only to first-year students in the IMCBP. Credit/no credit only.
School of Law

Dean

724 Condon

Assistant Deans
Sandra E. Madrid
338 Condon
John Michalik
306 Condon

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association’s list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current School of Law catalog.

Facilities and Services
The School of Law is housed in Condon Hall, adjacent to the University’s main campus. It is equipped with classroom, library, lounge, and office facilities.

The Marian Gould Gallagher Law Library is one of the finest law libraries in the country. Its collection, among the largest university law collections on the West Coast, currently numbers more than 435,000 volumes. In addition to the extensive main collection, it houses important materials that support the Asian and marine law graduate programs and serves as a federal depository for selected United States government documents. An experienced audiovisual staff directs the use of video equipment in the trial advocacy and moot court programs. The library is equipped with the latest in microreaders and printers in order to make full use of the microfilm collection. The library is a subscriber to LEXIS, WESTLAW, and the Western Library Network, and other research databases.

Juris Doctor Program

Juris Doctor Degree
The Juris Doctor degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As in most law schools of the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills. Except for a required course in professional responsibility and an analytical writing requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. Beginning with the class of 1997, J.D. candidates will be required to perform 60 hours of public service legal work during the second and/or third year.

Admission
New students may enter the School of Law only in the autumn quarter. Instruction begins for first-year students a few days earlier than the time set for upper-class students. Beginning students must have received a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Admission Services, Box 2000, Newtown, Pennsylvania 18940. No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in the Prelaw Handbook—Official Guide to U.S. Law Schools. Applications for admission to the next entering class must be received by January 15. To be assured of consideration for admission, an applicant must complete his or her application file by August 1.

Applications are considered only if vacancies exist. Selection of the applicants is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.

Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the University policy on the registration of nonmatriculated students.

Inquiries
A more detailed statement on admission policy and application procedure is available from the School of Law.

Financial Aid
Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all of these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December in most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Pe-10, University of Washington, Seattle, Washington 98195, (206) 543-6101. Applicants for admission should not wait until they have been admitted before applying for financial aid.

School of Law grants are awarded primarily on the basis of financial need, although scholarship, minority status, or other factors may be considered with regard to certain awards. Inquiries concerning School of Law aid should be addressed to: Kathleen Hallisy, Financial Aid Coordinator, School of Law, Condon Hall, JB-20, University of Washington, Seattle, Washington 98195.

Graduate Program

Graduate Program Coordinator
Roland L. Hjorth

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LL.M.) in law and marine affairs, Asian and comparative law, international environmental law, and law of sustainable international development. The School of Law offers a Doctor of Philosophy (Ph.D.) degree in Asian and comparative law only. The requirements for each program are as follows:

Asian Law Program. The Master of Laws degree program in Asian and comparative law is designed for students with career and research interests in one or more of the legal systems of East Asia, with particular emphasis on that of Japan, as well as for lawyers from East Asia seeking advanced comparative study of American law. The Asian law program is structured around extensive coursework involving comparative study of basic areas of United States and East Asian law and tutorials in areas of special interest to each student.

Admission to the LL.M. degree program in Asian and comparative law is limited to language-qualified applicants who have received the first degree in law and who have a record of superior academic achievement. Graduates of American law schools must have a degree from an ABA-accredited institution. The applicant must be competent in an East Asian language (or, in the case of foreign students, in English). Students also must be admitted to the program, but must successfully complete an approved program of intensive study of an East Asian language before beginning their studies. The program contemplates one year in residence, at least 36 credits, and an acceptable major research undertaking.

Students who have acquired a first degree in law can become prospective candidates for the LL.M. degree in law and marine affairs. Graduates of American law schools must have a degree from an ABA-accredited school. Particular emphasis is placed on interdisciplinary aspects of marine affairs and coastal zone management. Admission to the LL.M. degree with specialization in law and marine affairs requires satisfactory completion of 40 credits of course and research work, at least 15 of which must be in the School of Law. In the School of Law, courses include Law of the Coastal Zone, International Law of the Sea, Marine Policy and Resources, United States Law and the Marine Environment, and Admiralty. Pertinent courses are also offered in the schools of Fisheries, Marine Affairs, and Oceangraphy, the College of Engineering, and the departments of Economics and Geography.
International Environmental Law Emphasis. Students may earn an LL.M. degree in international environmental law. This LL.M. degree option is open to students with a first degree in law. Graduates of American law schools must have a degree from an ABA-accredited school. Emphasis is placed on the interdisciplinary study of environmental problems, and students may earn more than half of their credits in courses outside of the School of Law, including courses offered by the schools of Fisheries and Marine Affairs, the Institute for Environmental Studies, the Graduate School of Public Affairs, the colleges of Engineering and Forest Resources, and the departments of Atmospheric Sciences, Economics, Environmental Health, and Geography. Courses offered in the School of Law include Environmental Law: Pollution Control, Natural Resources: Energy, U.S. Law and the Marine Environment, International Environmental Law, and Land Use Planning. To earn the LL.M. degree, students must satisfactorily complete 40 credits of course and research work, at least 15 of which must be in the School of Law. Students must take LAW A 527, Environmental Law: Pollution Control and LAW A 574, The International Legal Process unless they have had equivalent courses; and one course on international environmental law. As part of their course work or an independent study project, students must write one substantial paper.

Law of Sustainable International Development Emphasis. Students may earn an LL.M. degree in the law of sustainable international development. This LL.M. degree option is open to students with a first degree in law. Graduates of American law schools must have a degree from an ABA-accredited school. Emphasis is placed on the interdisciplinary study of sustainable international development, and students may earn more than half their credits in courses outside the School of Law, including courses offered by the schools of International Studies and Public Health, the Institute for Environmental Studies, and the departments of Economics, Political Science, and Sociology. In the School of Law, courses offered include Legal Problems of Economic Development (required), International Environmental Law (required), Public Law, International Commercial Law, and Land, American Culture, and the Law. Attainment of the LL.M. degree with specialization in the law of sustainable international development requires satisfactory completion of 40 credits of course and research work, at least 15 of which must be in the School of Law, and the taking of courses in at least three other departments other than law. As part of their work, students must write one substantial paper.

Inquiries
Requests for applications and program brochures for all School of Law LL.M. programs, as well as information regarding application procedures should be addressed to Jacqueline Fisher, Law School Graduate Admissions, Condon Hall, JB-20, University of Washington, Seattle, Washington 98195, U.S.A.

Financial Aid
Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, Condon Hall, JB-20, University of Washington, Seattle, Washington 98195, U.S.A.

Faculty

Professors
Andersen, William * 1964; LL.M. 1958, Yale University; administrative law, regulated industries, urban government.
Aronson, Robert H. * 1975; JD, 1973, University of Pennsylvania; evidence, criminal law, professional responsibility, law and literature.
Bodansky, Daniel * 1988; JD, 1984, Yale University; international law, international environmental and human rights law, civil procedure.
Burke, William T. * 1966; JSD, 1959, Yale University; marine law.
Chisum, Donald S. * 1968; LL.B., 1968, Stanford University; corporations, civil procedure, intellectual property.
Clarke, Donald C. * 1988; JD, 1987, Harvard University; modern Chinese law, American property law.
Corker, Charles E. * 1965; Emeritus; LL.B., 1948, Harvard University; contracts, constitutional law.
Cosway, Richard * 1968, Emeritus; JD, 1942, University of Cincinnati; commercial transactions, contracts.
Cross, Harry M. * 1943, Emeritus; JD, 1940, University of Washington; property.
Ellis, Jane W. * 1983, Yale University; juvenile justice and domestic relations, interviewing and counseling.
Fitzpatrick, Joan M. * 1983; JD, 1975, Harvard University; International human rights and civil rights, federal courts, immigration.
Fletcher, Robert L. * 1956, Emeritus; LL.B., 1947, Stanford University; property.
Foote, Daniel * 1988; JD, 1981, Harvard University; comparative law with a focus on Japan and Asia, labor and employment law.
Haley, John O. * 1974; LL.M., 1971, University of Washington; comparative law (Japan).
Hardesty, James * 1970; LL.B., 1966, Harvard University; criminal law, psychiatry and law, juvenile courts, torts.
Haselton, Penelope A. * 1985; M.L.L., 1976, University of Washington; law librarianship, legal bibliography, computer-assisted legal research, law, Indian law.
Henderson, Dan F. * 1962, Emeritus; PhD, 1955, University of California (Berkeley); U.S./Japanese business transactions, corporate relations, admiralty.
Hersham, Marc * 1976; Adjunct; JD, 1967, Temple University; coastal zone management law.
Hicks, Gregory A. * 1984; JD, 1978, University of Texas (Austin); torts, securities regulation.
Hjorth, Roland L. * 1964; LL.B., 1951, New York University; transnational law, Common Market, federal taxation.
Hume, Linda S. * 1972; JD, 1970, University of California (Los Angeles); commercial transactions, property, equal rights.
Jay, Stewart M. * 1960; JD, 1976, Harvard University; civil procedure, theories of justice, federal courts, constitutional law.
Johnson, Ralph W. * 1955; LL.B., 1949, University of Oregon; natural resources, legislation, Indian law.
Junger, John M. * 1964; JD, 1962, University of Chicago; criminal law and procedure.
Kummert, Richard O. * 1964; LL.B., 1961, Stanford University; business planning, corporations, federal tax.
Lofus, Elizabeth F. * 1973, Adjunct; PhD, 1970, Stanford University; cognition, long-term memory, eye-witness testimony, psychology and law.
Loh, Wallace * 1974; PhD, 1971, University of Michigan; contracts, criminal procedure, social science and the courts.
Morris, Arvai * 1955; LL.M., 1958, Yale University; constitutional law, jurisprudence, education law.
Peck, Cornelius J. * 1954, Emeritus; LL.B., 1949, Harvard University; administrative law, labor law, torts.
Prosterman, Roy L. * 1965; LL.B., 1958, Harvard University; international law.
Rieke, Luvern V. * 1949, Emeritus; LL.M., 1953, University of Chicago; contracts, domestic relations.
Roddis, Richard S. L. * 1968; JD, 1954, University of California (Berkeley); insurance, torts.
Rombauer, Marjorie D. * 1960, Emeritus; JD, 1960, University of Washington; creditor and debtor, personal property.
Schnapper, Eric 1994; LL.B., 1968, Yale University; constitutional law, civil rights, civil procedure.
Shattuck, Warren L. * 1935, Emeritus; JSD, 1936, Yale University; commercial law.
Smith, Charles Z. * 1973, Emeritus; JD, 1956, University of Washington; evidence, judicial administration.
T raun, Philip A. * 1956; JD, 1954, University of Washington; conflict of laws, procedure.
Vaughn, Lea B. * 1984; JD, 1978, University of Michigan; labor law, alternate dispute resolution, civil procedure.
Walcher, Louis E. * 1986; JD, 1973, Harvard University; contracts, criminal legal studies, federal courts, remedies and restitution, admiralty.

Assistant Professors

Allen, Mary E. * 1993; JD, 1986, University of Michigan; bankruptcy, contracts, commercial law.
Jecker, Nancy A. S. * 1990; PhD, 1986, University of Washington; geriatric medical ethics, allocation of medical resources, ethical theory.
Kirtley, Alan 1984; JD, 1972, Indiana University; clinical legal education, affordable housing development, alternative dispute resolution.
Kusszer, Patricia C. * 1994; JD, 1991, Yale University; health law, insurance.
Levins, Anmarine 1992; JD, 1983, University of Maine; trial advocacy, professional responsibility, criminal law.
Townsend, Michael F. * 1992; JD, 1989, Yale University; intellectual property, contracts.

Senior Lecturers

Maranville, Deborah 1989; JD, 1975, Harvard University; Civil Clinic.
McMurtrie, Jacqueline 1989; JD, 1983, University of Michigan; Criminal Clinic.
O'Neill, Kathleen M. * 1993; JD, 1980, Columbia University; legal research and writing.

Lecturers

Jones-Garting, Michele 1993; JD, 1987, Gonzaga University; Family Law Clinic.
Stearns, Janet E. 1993; JD, 1988, Yale University; Affordable Housing Clinic, real estate.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

LAW 442 Land Law and the Urban Environment (3) I&S Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Credit/no credit only. Open to law and nonlaw students.

LAW 443 The Legal Process I (3-5) I&S Open only to nonlaw students. The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Credit/no credit only.

LAW 444 Constitution and American Public Education (3-4) I&S Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Offered: jointly with EDLPS 444.

LAW 445 Major Issues in American Constitutional Law (3) I&S Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court's recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and Presidential powers. Open to law and nonlaw students.

LAW 446 Race, Age, and Sex Discrimination in Employment (3) I&S What constitutes race, age, and sex discrimination in employment, and related prohibited practices that limit employment opportunities. Methods of proving such discrimination and establishing that a practice should be prohibited. Remedies for violations considered. Open to law and nonlaw students.

LAW 447 Copyright Law for the Lay Person (3) I&S Introductory survey of federal copyright law. Protection of original works, fair use, required formalities, and related issues. Open to law and nonlaw students.

LAW 457 American Law and the American Indian (3) I&S Relationship between Indians and the United States from 1789 to the present. Significant constitutional, legislative, and judicial actions. Legal events explored within their political, military, social, and cultural contexts. Comparisons with other minority-group experiences. Offered: jointly with HSTAA 416.

LAW 465 Introduction to Law: A Social Science Perspective (4) I&S Policy-oriented, interdisciplinary study of uses and limits of social science in the law-making process on appeal and fact-finding process at trial. Critical perspectives on roles of social science, especially social psychology, in adjudication. Open to upper-division undergraduates and graduate students only. Offered: jointly with PSYCH 495.

First-Year Courses

The courses below are intended for law students; other students are admitted only rarely with special permission of the Dean. Only the course titles are given. For complete course descriptions, see the School of Law Bulletin.

LAW A 501- Contracts (2-6), max. 8
LAW A 502- Civil Procedure I (2-6), max. 6
LAW A 503- Property I (2-6), max. 8
LAW A 504- Torts (2-6), max. 8
LAW A 505- Criminal Law (2-6), max. 5
LAW A 506- Basic Legal Skills (1-6), max. 6
LAW A 507- Constitutional Law I: Constitutional Structures of Government (4)
LAW A 508- Payment Systems (3)
LAW A 509- Administrative Law (4)
LAW A 510- Sales: A Comparative Perspective (4)
LAW A 511- Transmission of Wealth (5)
LAW A 512- Secured Transactions III (3)
LAW A 513- Creditor-Debtor Law (2-3), max. 5
LAW A 514- Corporations (3/4)
LAW A 515- Business Organizations (5)
LAW A 516- Legal Accounting (4)
LAW A 517- Securities Regulations (4)
LAW A 518- Restitution (3)
LAW A 520- Property II (2-5), max. 8
LAW A 521- Community Property (3)
LAW A 522- Copyright (3)
LAW A 523- Real Property Security (3/4)
LAW A 524- Private Land Development (3)
LAW A 525- Water Law (3)
LAW A 526- Copyrights and Trademarks (4)
LAW A 527- Environmental Law: Pollution Control (3)
LAW A 528- Natural Resources: Energy (3)
LAW A 529- Public Land Law (3)
LAW A 530- Basic Income Tax (2-6), max. 6
LAW A 531- Death and Gift Taxation (2-5)
LAW A 532- Corporate Taxation (5)
LAW A 533- Partnership Taxation (3)
LAW A 535- Trademarks and Unfair Competition (2)
LAW A 536- Deferred Compensation (3)
LAW A 537- Business Planning (2-6), max. 6
LAW A 538- Estate Planning Workshop (4)
LAW A 540- Land Use Planning (3)
LAW A 541- Transnational Tax (5)
LAW A 542- Oil and Gas Law (3)
LAW A 543- Business Reorganization Under the Bankruptcy Code (5)
LAW A 544- Advanced Commercial Law (3)
LAW A 545- Legal Protection for Technology: Patent and Trade Secret Law (2-4), max. 4
LAW A 547- Critical Legal Studies (2)
LAW A 548- Civil Rights (2-6), max. 6
LAW A 549- Advanced Legal Research (4)
LAW A 550- Constitutional Law (2-6), max. 8
LAW A 551- Constitution and American Public Education (3-6, max. 6) No credit given if LAW/EDLPS 444 taken previously.
LAW A 552- Antitrust (2-6), max. 5
LAW A 553- Feminist Legal Theory (4)
LAW A 554- Labor Relations and the Law (1-5), max. 5
LAW A 555- Labor Relations in the Public Sector (3)
LAW A 556- Employment Discrimination (2-4), max. 4
LAW A 558- Jurisprudence and Legal Philosophy (2-4), max. 4
LAW A 559- Legal Method (3)
LAW A 560- Income Maintenance Legislation (3)
LAW A 561- Law and Economics (3) Offered: jointly with PB AF 532.
LAW A 562- Employment Law (3/4)
LAW A 563- Urban Government (4)
LAW A 564- Legal History (3)
LAW A 565- American Indian Law (3)
LAW A 566- Theories of Justice (2-4), max. 4
LAW A 567- Disabled and the Law (2)
LAW A 568- Collective Bargaining and Labor Arbitration (4)
LAW A 569- Law and Social Science (3/4)
LAW A 571- International Organizations (3)
LAW A 572- International Legal Order (3)
LAW A 573- Arms Control and Disarmament: The Legal Perspective (3)
LAW A 574- The International Legal Process (2-4, max. 4)
LAW A 575- United States Legal History (3)
LAW A 576- International Economic Relations and Comparative Trade Policy (3/4)
LAW A 577- Immigration Law (4)
LAW A 578- International Commercial Law (1-4), max. 4
LAW A 579- Advanced Family Law (3)
LAW A 580- Family Law (4)
LAW A 583- Insurance Law (4)
LAW A 585- Admiralty (3)
LAW A 586- Secured Transactions IV (4)
LAW A 587- Computer Law (3)
LAW A 590- Constitutional Law: Equal Protection, Fundamental Rights, and Due Process of Law (4)
LAW A 591- Constitutional Law: Freedom of Expression (3)
LAW A 592- Constitutional Law II: The Fourteenth and First Amendments—Equal Protection, Fundamental Rights, Due Process of Law, Freedom of Expression and Religion (2-4, max. 8)
LAW A 593- Constitutional Law: The Constitution and the Economy (3)
LAW A 598- Legal Bibliography (3) Offered: jointly with LIB 544.
LAW A 599- Advanced Legal Bibliography (4) Offered: jointly with LIB 557.
LAW B 500- Civil Procedure II (3)

The Graduate School of Library and Information Science brochure gives full details of application procedures.

Financial Aid
The School has funding available each year for one staff assistantship. In addition, fellowship/scholarships from the Cobb, Finley Multiethnic, Henry, Koon, McAlpin, and Page endowment funds are awarded each year. The amount of assistance and number of awards varies from year to year. All awards have financial need as one criterion, which is based on the figures the applicant provides on the Free Application for Federal Student Aid (FAFSA). This form is available from the Office of Student Financial Aid in mid-December and must be submitted by February 20 each year. The School is unable to offer financial assistance to international students. Other fellowships are described in Financial Assistance for Library Education, available from the American Library Association, 50 East Huron Street, Chicago, Illinois 60611.

Correspondence and Information
Director
Graduate School of Library and Information Science, FM-30

Faculty

Professors
Ahlers, Eleanor E. * 1966, (Emeritus); MA, 1957, University of Washington; librarianship.
Benne, Mae M. * 1971, (Emeritus); MS, 1955, University of Illinois; children's literature, public library services for children.
Bevis, L. Dorothy 1947, (Emeritus); MA, 1951, University of Washington; librarianship.
Chisholm, Margaret E. * 1975, (Emeritus); PhD, 1966, University of Washington; organization and administration, library education.
Hiatt, Peter * 1974; PhD, 1963, Rutgers University; adult services, special populations, library education, staff development, continuing education.
Liebermann, Irving 1956, (Emeritus); EdD, 1955, Columbia University; librarianship.
Shaw, Spencer G. * 1970, (Emeritus); BLS, 1941, University of Wisconsin; librarianship.
Van Orden, Phyllis J. * 1993; EdD, 1970, Wayne State University; library services to youth, including children's literature, and to teachers.

Associate Professors
Brooks, Terrence A. * 1986; PhD, 1981, University of Texas (Austin); information storage and retrieval, database design, bibliometrics, statistical methodology.
Dool, Carol A. * 1986; PhD, 1980, University of Illinois; library materials for and services to children and young adults.
Fidel, Raya * 1982; PhD, 1982, University of Maryland; information systems, systems analysis, database design, classification research.
Mignon, Edmond * 1970; PhD, 1976, University of California (Berkeley); information retrieval, bibliographic organization, information policy, government statistics.
Skelley, Grant T. * 1969; PhD, 1968, University of California (Berkeley); bibliography and reference, subject literature, history of the book, preservation.

Assistant Professors
Nelson, Jerold A. * 1971; PhD, 1971, University of California (Berkeley); interpersonal relations in libraries, intellectual freedom.
Soper, Mary E. * 1972; PhD, 1972, University of Illinois; technical services, organization of library materials, cataloging, subject analysis.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

LIBR 450 Survey of Children's Literature (3) Designed for educators, librarians, and others interested in the selection and utilization of children's books for family, school, and library environments. Not open to Library and Information Science majors. Prerequisite: junior or higher standing.

LIBR 451 Young Adult Materials: Evaluation and Use (3) Reading and appraisal of literature appropriate to the needs, interests, and abilities of young adults. For the general student as well as the teacher. Not open to Library and Information Science majors. Prerequisite: junior or higher standing.

LIBR 470 History of the Book (3) Survey of the development of the book from hieroglyphics and clay tablets to the present, with emphasis on the printed book in the Western world since Gutenberg. The book as a physical object and the processes and materials of its creation, viewed in the context of changing technologies and various cultural, aesthetic, economic, and trade influences. Includes aspects of book collecting. Credit/no credit only. Prerequisite: junior or higher standing.

LIBR 471 Storytelling: Art and Techniques (3) Storytelling, past and present, noting its development as an art form. Reading and analyzing storytelling materials (folk literature and literary forms) used by storytellers throughout historical periods. Learning essential techniques necessary to maintain this artistic skill in a professional field. Planning storytelling programs for various age and interest groups and situations, utilizing folk, classic, and contemporary literature. Not open to Library and Information Science majors. Prerequisite: junior or higher standing.

LIBR 479 Learning Resources Endorsement Topics (3, max. 6) School library media center subject matter presented in seminar, workshops, or other appropriate formats. Topics meet the Learning Resources Endorsement areas of study required for the learning resources endorsement. Not open to Library and Information Science majors. Prerequisite: junior or higher standing.

LIBR 488 Special Topics (1-5, max. 15) Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit. Credit/no credit only. Prerequisite: junior or higher standing.

LIBR 500 Society, Users, and Libraries (4) Technological, societal changes as it relates to information. Society's information processes, ways individuals use information in their environments. Skills basic to other courses developed, including awareness of resources for study of library and information science. Intellectual context of librarianship as service profession. Prerequisite: major standing.

LIBR 501 Bibliographic Control (4) Survey of the major types of instruments for the bibliographic control of the various kinds of library materials and of the conventions used in describing them. Basic concepts, historical background, and theoretical and practical aspects of bibliographic control; evaluation and methodology. Prerequisite: major standing.

LIBR 503 Introduction to Information Science (3) The understanding of the analysis of design and operation of information retrieval systems. Systems analysis applied to the process of information transfer. Consideration of user needs assessment, performance evaluation, and control of terminology.
LIBR 503 Bibliographic Data Bases (3) Concepts and conventions of bibliographic record structure, file organization, and search protocols. Elementary techniques in the use of bibliographic utilities and on-line search services. Prerequisite: major standing.

LIBR 510 Management for Librarianship (3) Management concepts critical to provision of library services. The planning process applied to library problems and opportunities. Emphasis on techniques awareness and skills in the professional environment. Organizational concerns, including personnel, budgeting, control techniques, theories of management, and evaluation of effectiveness.

LIBR 511 Library Administration Skills (3) Provides practice in the administrative skills related to personnel selection, supervision, and management, and to planning and budgeting processes in the library setting. Topics include work specification, performance evaluation, personnel policy formulation, budget types, and budget preparation and control.

LIBR 512 Community Analysis and Library Change (3) Review of the concepts, strategies, and tools for study of the community, response to community change, and promotion of desired library change. Includes experiential exercises, analysis of case studies, and investigation of different fields. Prerequisite: 500 or permission of instructor.

LIBR 513 Management of Automated Systems in Libraries (3) Developing criteria for selection and design of computer systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges such as vendor relations, financing options, personnel requirements, and design of auxiliary activities. Credit/no credit only. Prerequisites: 501, 503, or permission of instructor.

LIBR 520 Organization of Library Materials: Introduction (3) Principles and techniques of standard methods of organizing library materials for use. Includes fundamentals of descriptive cataloging, primary systems of subject analysis, and developments in technical services. Prerequisites: 501, 503, or permission of instructor; recommended: 500.

LIBR 522 Descriptive Cataloging (3) Continuation of 520, with emphasis on rules of descriptive cataloging for monographic print materials of all types in both nonbook media. Includes applications of automation to bibliographic control of library materials. Prerequisite: 520 or permission of instructor.

LIBR 523 Subject Analysis of Library Materials (3) Continuation of 520, with emphasis on subject analysis of library materials. Includes work with Library of Congress and Dewey decimal classifications, Sears and Library of Congress subject headings, and other systems used in libraries today. Prerequisite: 520 or permission of instructor.

LIBR 525 Organization and Use of Serials (3) Management of serials, including acquisition and replacement, control, subject access, preservation, and use of all types in all kinds of libraries. Emphasis on new technology and international developments as they affect serials. Credit/no credit only. Prerequisite: 520 or permission of instructor. Recommended: 522.

LIBR 526 Indexing and Abstracting (3) Techniques of vocabulary control and thesaurus construction as applied to indexing and abstracting processes. Design, selection, and maintenance of indexing systems. Computerized methods for free text, full text, and controlled vocabulary procedures. Application of methods to information retrieval systems. Prerequisites: 501, 502, or permission of instructor. Recommended: 503.

LIBR 527 Construction of Index Languages (3) Explanations of design options, features of index languages or thesauri, and criteria to use in their selection. After completing the thesaurus construction project, students are prepared to design index languages, plan and implement a design project, and evaluate index languages. Credit/no credit only. Prerequisites: 501, 502, 503, or permission of instructor.

LIBR 528 Literature Searching (3) Concepts and techniques of professional literature searches, using a variety of standard search languages on representative types of bibliographic data bases and on-line reference resources. Introduction and analysis of data bases. Prerequisite: 503 or permission of instructor; recommended: 501.

LIBR 531 Conceptual Database Design (3) Preliminary design of data bases for decision support systems. Introduces methods of collecting user requirements, requirement analysis, data dictionary, the entity-relationship model, methods for data-base integration, preparation for data collection, and evaluation. Credit/no credit only. Prerequisites: 501, 503, or permission of instructor.

LIBR 533 Bibliographic Knowledge Bases (3) Practical application of appropriate software for design of bibliographic databases and knowledge bases. Emphasis on creation of real working systems. Focus on bibliographic data structures, creation of indices and user interfaces. Considers approaches to artificial intelligence and expert systems with bibliographic data. Prerequisite: 503 or permission of instructor.

LIBR 540 Materials for General Information Needs (3) Consideration of the individual in the generalized community change. Attention given to criteria for the selection of library materials. Forms of materials for non-specialized information retrieval and referral. Development of skills in question negotiation and search strategy. Prerequisite: 501, or permission of instructor; recommended: 500, 503.

LIBR 541 Information Access in the Humanities (3) Description and analysis of information problems and information sources in the humanities. Fields considered are philosophy, religion, visual arts, performing arts, language, and literature. Prerequisite: 501 or permission of instructor; recommended: 500, 503.

LIBR 542 Information Access in the Social Sciences (3) Description and analysis of information problems and information sources in the social sciences. Fields considered are anthropology, business economics, education, geography, history, political science, psychology, and sociology. Prerequisites: 501, 503, or permission of instructor.

LIBR 543 Information Access in Science and Technology (3) Covers the following topics as they apply in the literature of the natural sciences and technology: information transfer; characteristics and organization of bibliographic and reference sources; information retrieval from manual and computer on-line sources; search strategy; practice with specific data bases and manual sources. Prerequisites: 501, 503, or permission of instructor; recommended: 528.

LIBR 544 Legal Bibliography (3) Introduction to legal bibliography and law librarianship. Basic primary and secondary legal bibliographic tools, integration of manual and computer resources for effective legal research. Prerequisite: law librarianship major or 501 and 503 for non-law librarianship major. Offered: jointly with LAW A 599.

LIBR 545 Government Publications (3) Government publications of the United States and foreign countries; their acquisition, organization, and use. Credit/no credit only. Prerequisites: 501, 503, or permission of instructor; recommended: 500.

LIBR 546 Business Information Resources (3) Survey of the extent and nature of business information and its sources, and of business information producers and consumers. Study and use of both print and on-line sources. Prerequisites: 501, 503, or permission of instructor.

LIBR 547 Evaluation and Selection of Audiovisual Materials (3) Develops competency in applying criteria to the evaluation, selection, and use of audiovisual materials and their accompanying technologies. Focuses on reviewing the full range of audiovisual formats found in all types of libraries.

LIBR 548 Children's Materials: Evaluation and Use (3) Study of library materials for children with emphasis on literature in its various forms. Attention also given to criteria used in evaluation, issues in selection, and use of materials with children.

LIBR 550 Youth Materials: Bibliography and Resources (3) Sources of information about youth materials. Includes reviewing journals, selection aids, general and subject bibliographies, books of readings and criticism, textbooks, and biographical tools. Emphasis on the critical evaluation of these sources. Includes brief history of children's literature and the function of special collections. Prerequisite: 503.

LIBR 551 Young Adult Materials: Evaluation and Use (3) Reading, evaluation, and sharing of literature appropriate to the interests, ages, and abilities of young adults, ages twelve through twenty. Application of criteria to the assessment of young adult reading materials and consideration of the uses of these materials with young people.

LIBR 553 Information Access in Health Sciences (3) Characteristics of users of biomedical literature. Information resources in medical, hospital, health, and consumer health care planning. Use of information retrieval systems, emphasizing services of National Library of Medicine. Organization of medical, hospital libraries. Problems of information policy, professional standards, certification. Credit/no credit only. Prerequisite: 528 or permission of instructor; recommended: 543.

LIBR 555 Socioeconomic Data Resources (3) Utilization of public data bases of economic and demographic statistics for information retrieval, with special attention to services of Bureau of the Census. Application of on-line data files to library reference services. Credit/no credit only. Prerequisites: 528 and 599 or knowledge of inferential statistics, or permission of instructor.

LIBR 557 Advanced Legal Bibliography (4) Legal bibliographic tools that answer more complex legal research problems, such as federal legislative histories, rules and regulations of administrative agencies (e.g., tax, securities). Builds on skill, techniques utilized in 544. Extensive work with computer-assisted legal retrieval. Prerequisite: major standing in law librarianship, 544, or permission of instructor. Offered: jointly with LAW A 599.

LIBR 558 Selection and Processing of Law Library Materials (3) Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, cataloging, and serials. Credit/no credit only. Prerequisite: 544 or permission of instructor.

LIBR 560 User Education: Issues and Practices (3, max. 8) User education as professional activity in libraries. Teaching methods, instructional design, special populations, learning styles, impact of technology, critical thinking skills. Practical teaching experience through University of Washington Libraries' user education program. Material covered over two consecutive quarters. Credit/no credit only. Prerequisites: 501 and 503. Recommended: one reference course.

LIBR 561 Serving Individual Information Needs (3) Training in awareness and skills for perceiving and responding to the information requests of users. Evaluation of information needs and sources learned through use of simulations, role playing, experiential exercises, discussion, and practice. Credit/no credit only. Prerequisite: 500 or permission of instructor.
LIBR 562 Planning for Library and Information Services (3) Principles underlying library and information services, and the selection and design of services to meet user needs in all types of libraries and information centers. Emphasis on adult clientele in academic, public, and special libraries, but attention given to school library media centers and all age levels. Prerequisite: 500 or permission of instructor; recommended: 501.

LIBR 563 Services for Special Groups (3) Needs analysis and design of library services for the blind and visually handicapped, deaf and hearing impaired, institutionalized, mentally and physically handicapped, functionally illiterate, minorities, and aging. Skills, insights, and knowledge to work with these groups. Current research, practice, and experimental programs. Prerequisite: 500 or permission of instructor; recommended: 562.

LIBR 566 Special Librarianship (3) Seminar in the practice of special librarianship in business and industrial firms, government agencies, and the free-lance sector. User services and information resources. Credit/no credit only. Prerequisites: 24 credits in Master of Librarianship program.

LIBR 567 Public Library Services for Youth (3) Administration of youth departments in public libraries; planning and promoting programs and services; evaluation of library collections; community and professional roles of the youth librarian. Prerequisite: 500 or permission of instructor.

LIBR 568 Administration of the School Library Media Program (3) Develops competency in administering materials, equipment, and services of the library media program as an integral part of the educational process of the school. Focuses on developing skills in acquiring, organizing, and managing the full range of learning resources for access and use, and communicating the program to users. Required for school library media specialists.

LIBR 571 Storytelling: Art and Techniques (3) Storytelling, past and present, noting its development as an art form. Reading and analyzing storytelling materials (folk literature and literary forms) used by storytellers throughout historical periods. Learning essential techniques necessary to maintain this artistic skill in a professional field. Planning storytelling programs for various age and interest groups and situations, utilizing folk, classic, and contemporary literature.

LIBR 572 Archival and Manuscript Services (3) Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions' collections. Lecture, demonstration, and laboratory. Prerequisite: 501, or permission of instructor.

LIBR 577 Law Library Administration (4) Administration of law libraries, including organization, personnel, and management issues (e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Credit/no credit only. Prerequisite: 544 or permission of instructor.

LIBR 581 Intellectual Freedom in Libraries (3) Analysis of issues related to intellectual freedom, with particular attention to implications for libraries and librarians. Includes consideration of the current legal climate, conformity versus freedom in the modern world, the librarian as censor, social responsibility and individual freedom, the intellectual freedom of children, prospects for the future. Credit/no credit only. Prerequisite: 500 or permission of instructor.

LIBR 583 Cooperative Information Systems (3) Analysis of cooperative information systems found among all types of libraries and information centers. Emphasis on developments in the United States and also treatment of foreign and multinational systems, with assessment of their contributions. Prerequisite: 500 or permission of instructor; recommended: 501.

LIBR 584 Information Policy (3) Review of efforts to develop national information policy and assessment of where we are in process. Consideration of legislation and Issues pertinent to national information policy (e.g., freedom of information, privacy, copyright, management of government information, telecommunication, transborder data flow, and satellite technology). Prerequisites: 500, 553, or permission of instructor; recommended: 501, 545.

LIBR 585 Information in the Public Policymaking Process (3) Demystifying information base for policymaking in a democracy. Review of theoretical needs and opportunities for input of information associated with three branches of government and each phase of policymaking. Focus on actors who bring information to policymakers. Federal, state, and local comparison. Credit/no credit only. Prerequisite: 500 or permission of instructor; recommended: 501, 503.

LIBR 590- Directed Fieldwork (4-) Library and information science majors only. A minimum of 200 hours of professional, supervised fieldwork in a library or professional information agency may be taken in one quarter or as many as three consecutive quarters. Credit/no credit only. Prerequisite: 33 credits in Master of Librarianship program.

LIBR 592 Aspects of Publishing (3) Examination of selected topics in book and periodical publishing from Renaissance through present. Focus on publishing practices, processes, and strategies in given economic, cultural, and social contexts. Covers the combination of activities, entrepreneurial or otherwise, that constitute publishing but not the technical means involved in producing the published product.

LIBR 593 Preservation and Conservation of Library Materials (3) Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.

LIBR 594 Collection Development (3) Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, principles, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial, difficult materials. Major issues, research, trends. Prerequisites: 500, 501, 503, or permission of instructor; recommended: course in 540 sequence.

LIBR 598 Special Topics in Librarianship (3) Seminar dealing with various topics in librarianship. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. May be repeated for credit. Credit/no credit only. Prerequisite is determined by specific course.

LIBR 600 Independent Study or Research (*) Credit/no credit only.

LIBR 700 Master's Thesis (*) Credit/no credit only.

Michael J. Dimino, University of Alaska
Stephen J. Guggenheim, Montana State University
Michael B. Laskowki, University of Idaho and Washington State University

WAMI Program
Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Alaska, Montana, and Idaho. Located in the Warren G. Magnuson Health Sciences Building, the School operates a decentralized program of medical education (WAMI) via a network of teaching affiliates throughout the Pacific Northwest.

The School's basic science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Children's Hospital and Medical Center, and the Seattle Veterans Affairs Medical Center, as well as at other clinical affiliates in Seattle and throughout the WAMI states.

The School admits 166 medical students to its first-year class and has a total enrollment of about seven hundred students pursuing the Doctor of Medicine degree. The full-time faculty numbers more than one thousand members. The affiliated University residency training network enrolls approximately six hundred house officers. Enrollment in the graduate programs in the basic sciences exceeds three hundred students, and approximately six hundred postdoctoral fellows are enrolled in various advanced training programs. The School has baccalaureate and graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. It participates in training a broad spectrum of other allied health professionals.

Academic Programs

Doctor of Medicine Degree

Upon completion of the curriculum of the School of Medicine, the M.D. degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

Bachelor of Science Degree

Programs leading to a baccalaureate degree with a major in microbiology are offered through the College of Arts and Sciences. Those programs are described in the College of Arts and Sciences section of this catalog.

Bachelor of Science in Medical Technology Degree

A curriculum in medical technology is offered by the Department of Laboratory Medicine. This program provides study in the basic sciences plus clinical laboratory training designed to prepare competent laboratory scientists for varied employment opportunities. Information concerning admission to the medical technology program appears under Laboratory Medicine in this catalog.

Bachelor of Science in Occupational Therapy Degree

A curriculum in occupational therapy leading to a Bachelor of Science is offered by the Department of Rehabilitation Medicine. It provides professional training in the basic sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupation refers to daily living skills that include self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under Rehabilitation Medicine in this catalog.

Bachelor of Science in Physical Therapy Degree

A curriculum in physical therapy is offered by the Department of Rehabilitation Medicine. It provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to physical therapy appears under Rehabilitation Medicine in this catalog.

Bachelor of Science in Prosthetics and Orthotics Degree

A curriculum in prosthetics and orthotics leading to the degree of Bachelor of Science is offered by the Department of Rehabilitation Medicine. It provides professional training in the basic sciences, the clinical application, design, and fabrication of prostheses and orthoses, information concerning admission to the curriculum in prosthetics and orthotics may be found under Rehabilitation Medicine in this catalog.

Master of Science and Doctor of Philosophy Degrees

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of Biochemistry, Biomedical Engineering, Biological Structure, Immunology, Microbiology, Pathology, Pharmacology, and Physiology and Biophysics. Master's degree programs are offered by the departments of Laboratory Medicine, Medical History and Ethics, and Rehabilitation Medicine.

Students may work toward these degrees concurrently with the M.D. degree, taking additional years beyond the typical four-year medical curriculum. To expedite the training of physicians who wish to specialize in public health and community medicine, the School has adopted a simultaneous graduate and professional program leading to the degrees of Doctor of Medicine and Master of Public Health. The program usually requires the addition of a fifth year to the medical education process. The quarters of the fifth year may be taken sequentially or interspersed with medical training in a variable pattern, subject to appropriate academic approval. Students may elect concentration in any of four departments of the School of Public Health and Community Medicine: Biostatistics, Environmental Health, Epidemiology, or Health Services.

SCHOOL OF MEDICINE / ADMISSIONS

Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in education and engineering, as well as in the basic sciences of medicine and the School of Public Health and Community Medicine. A student who intends to work toward a graduate degree should confer with the Chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School: Graduate Study section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

Admissions

These procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine Admissions Office.

Selection Factors

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of and exposure to the needs of individuals and society and an awareness of health care delivery systems are desired. Extenuating circumstances in an applicant's background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This exam must be taken no later than the autumn of the year before possible matriculation. Scores will not be accepted from exams that were taken prior to 1992. MCAT registration blanks are available through premedicadvisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admission process, however, if accepted, the applicant will be required to take the MCAT prior to matriculation.

The premedical course requirements must be completed before matriculation but preferably should be completed by the time of application. They are:

- A total of 32 semester hours or 48 quarter hours of undergraduate science courses divided into:
  - a) Chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic, organic, biochemistry or molecular biology courses.
  - b) Physics, 4 semester/6 quarter hours
  - c) Biology, 8 semester/12 quarter hours
  - d) Other ("open") science subjects, 8 semester/12 quarter hours which can be satisfied by taking courses in any of the three categories above.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required science courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies. It is strongly recommended that an understanding of the concepts underlying biophysics, general chemistry, and molecular biology be acquired prior to entering medical school. Those offered positions for the fall of 1993 had a mean GPA of 3.57 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.2; and Biological Science, 10.4.
Completion of three years of course work at an accredited college or university is the minimum required before possible matriculation; however, 99 to 100 percent of entrants in recent years have earned bachelor's degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1. After receiving the application from AMCAS, the School of Medicine will ask qualified individuals to submit a $35 application fee and supplemental application materials. Every attempt will be made to notify applicants of the final action by the end of March.

Preference is given to legal residents of Washington, Alaska, Montana, and Idaho. Out-of-region African Americans, American Indians/Alaskan Natives, Mexican Americans, and mainland Puerto Ricans are encouraged to apply and to contact the Minority Affairs Program for additional information regarding student support services. Medical Scientist Training Program applicants will also be considered. Non-U.S. citizens; in addition to the above, must also have a permanent resident's visa. Applications from persons who have failed to meet minimum standards in another medical or dental school will not be considered.

The deadline for submitting the additional application materials is January 15. These supplemental materials include:

1. a supplemental application form. This will be sent to qualified applicants after the School of Medicine has received the AMCAS application.
2. a 300-word autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician, the reasons for desiring to attend the University of Washington School of Medicine, and any other issues of importance to the candidate. The applicant may request that the personal statement of the AMCAS application be used to fulfill this requirement.
3. a premedical letter of recommendation or three letters from instructors from whom the candidate has taken courses. These letters should be critical evaluations of the candidate's academic ability, strengths and weaknesses, the difficulty of course work, and the candidate's motivation for medicine. Personal maturity, and special attributes and assets.
4. a $35 fee. This will automatically be waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Office of Admissions.

Candidates from Alaska, Montana, and Idaho will be required to submit residency certifications from their respective state certifying officers. Proof of legal residence and that the individual has paid the required fees. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application. Those who enter as residents of Alaska, Montana, and Idaho are expected to spend their first year at the university site in their particular state. Twenty Washington students begin their medical education by spending the first year at Washington State University. Offers of acceptance, therefore, are conditional upon agreement to participate in the WAMI Program.

Minority Affairs Program

The Minority Affairs Program assists students from minority and/or disadvantaged backgrounds who are pursuing M.D. or M.D.-Ph.D. degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment; education, admission, retention, and professional development.

The School actively recruits underrepresented ethnic minority applicants and encourages students to contact the Minority Affairs Program for assistance during the admissions and application process. In addition, the program offers counseling and advocacy, referrals to University and community resources, tutoring, financial aid information, and numerous opportunities to interact with other minority health care professionals within the community.

U-DOC is a high school summer enrichment program offered by the Minority Affairs Program. It is a six-week program for students who have completed their junior year in high school. U-DOC's goal is to foster, affirm, and encourage high school student's interest in the medical profession by allowing them to explore medical careers and to obtain a valuable introduction to college life.

The Western Consortium Minority Medical Education Program (MMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academic enrichment program that includes science, mathematics, writing, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.

A six-week Prematriculation Program for entering minority and disadvantaged medical students is offered during the summer. The program is designed to facilitate students' entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.

During the regular school year, the Minority Affairs Program serves as a general information resource for both the academic and nonacademic needs of students and facilitates students' access to the multiple resources in the School of Medicine, the WAMI region, and the University. Events include a Pre-Admission Workshop and a Cross-Cultural Medicine Workshop. A program of early acceptance called PATHWAYS has been established for outstanding minority and disadvantaged students from the WAMI region. PATHWAYS acceptance enables students to be accepted to the UW School of Medicine as early as their sophomore year in college.

The Native American Center of Excellence was established in 1992 as part of the Minority Affairs Program to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.

Inquiries and requests for additional information may be obtained by contacting the Minority Affairs Program, SM-22, School of Medicine, University of Washington, Seattle, Washington 98195; telephone (206) 686-2469.

Medical Scientist Training (M.D.-Ph.D.) Program

A limited number of highly qualified candidates who wish to pursue both the M.D. and Ph.D. degrees are considered annually. Medical Scientist trainees must submit the AMCAS application for the M.D. degree and the School of Medicine, University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1. After receiving the application from AMCAS, the School of Medicine will ask qualified individuals to submit a $35 application fee and supplemental application materials. Every attempt will be made to notify applicants of the final action by the end of March.

Preference is given to legal residents of Washington, Alaska, Montana, and Idaho. Out-of-region African Americans, American Indians/Alaskan Natives, Mexican Americans, and mainland Puerto Ricans are encouraged to apply and to contact the Minority Affairs Program for additional information regarding student support services. Medical Scientist Training Program applicants will also be considered. Non-U.S. citizens; in addition to the above, must also have a permanent resident's visa. Applications from persons who have failed to meet minimum standards in another medical or dental school will not be considered.

The deadline for submitting the additional application materials is January 15. These supplemental materials include:

1. a supplemental application form. This will be sent to qualified applicants after the School of Medicine has received the AMCAS application.
2. a 300-word autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician, the reasons for desiring to attend the University of Washington School of Medicine, and any other issues of importance to the candidate. The applicant may request that the personal statement of the AMCAS application be used to fulfill this requirement.
3. a premedical letter of recommendation or three letters from instructors from whom the candidate has taken courses. These letters should be critical evaluations of the candidate's academic ability, strengths and weaknesses, the difficulty of course work, and the candidate's motivation for medicine. Personal maturity, and special attributes and assets.
4. a $35 fee. This will automatically be waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Office of Admissions.

Candidates from Alaska, Montana, and Idaho will be required to submit residency certifications from their respective state certifying officers. Proof of legal residence and that the individual has paid the required fees. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application. Those who enter as residents of Alaska, Montana, and Idaho are expected to spend their first year at the university site in their particular state. Twenty Washington students begin their medical education by spending the first year at Washington State University. Offers of acceptance, therefore, are conditional upon agreement to participate in the WAMI Program.

Financial Information

Fees and Other Charges

All fees and extra service charges are payable in United States dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Regular tuition for 1994-95 is $2,486 per quarter; nonresident tuition is $6,311 per quarter.

Financial Assistance

All financial aid is based on the demonstrated need of the student. All applicants for aid from the school must submit data for an analysis of need using the Free Application for Federal Student Aid. This requires full disclosure of resources available to the student from individual and family sources. The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Federal Plus Loan are the primary sources of aid. Loans are also available from the School of Medicine provided students meet the need requirement that is based on both the student's and parent's financial information.

Partial scholarships are available through the School of Medicine scholarship fund. These awards are limited to students with exceptional financial need and require financial information from the student and the student's parents.

Financial aid information is distributed to all accepted applicants. Application forms for financial aid may be obtained from the UW Office of Student Financial Aid or the Office of Student Financial Aid at the School of Medicine. Each year a deadline is set for receipt of the application by the processor, generally January 28. Applicants must meet this deadline to be considered for all available aid sources. More information on financial aid is available by contacting the Office of Student Financial Aid. In case of emergency or special need, an application for financial assistance may be made at any time.
Medical Curriculum

Basic Curriculum (122 Credits)

The first two years (six quarters) of the medical student curriculum is identified as the Basic Curriculum. It consists of three phases, or groups, of courses in the human biology series: pre-organ system courses in the sciences basic to medicine, organ systems taught by basic and clinical disciplines, and introduction to clinical medicine and health care. The first phase is designed to provide the background in basic disciplines required for the organ system courses. In the second phase, the student is concerned with learning the normal and pathophysiologic properties of the several human organ systems. Emphasis is placed upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the introduction to Clinical Medicine course throughout all six quarters, learning to interview patients, obtain a medical history, and perform physical examinations. In the course Medicine, health, and Society, they also study the health care system and problems of providing medical care to populations.

Students are expected to pursue the Basic Curriculum during their first six quarters in the School of Medicine. The academic demands of the Basic Curriculum are scaled so that most students also will be able to take elective courses. Electives are used to broaden the student's background.

FIRST QUARTER (AUTUMN)
HUBIO 510P Microscopic Anatomy (Histology)
HUBIO 511P Gross Anatomy and Embryology
HUBIO 512P Mechanisms in Cell Physiology
HUBIO 513P Introduction to Clinical Medicine
HUBIO 514P Biochemistry I-A
HUBIO 516P Systems of Human Behavior I-A

SECOND QUARTER (WINTER)
HUBIO 520P Cell and Tissue Response to Injury
HUBIO 521P Natural History of Infectious Disease and Chemotherapy I-A
HUBIO 522P Introduction to Clinical Medicine
HUBIO 523P Introduction to Immunology
HUBIO 524P Biochemistry I-B
HUBIO 526P Systems of Human Behavior I-B

THIRD QUARTER (SPRING)
HUBIO 530P Epidemiology
HUBIO 531P Head, Neck, Ear, Nose, and Throat
HUBIO 532P Nervous System
HUBIO 534P Natural History of Infectious Disease and Chemotherapy I-B
HUBIO 535P Introduction to Clinical Medicine

FOURTH QUARTER (AUTUMN)
HUBIO 540P Cardiovascular System
HUBIO 541P Respiratory System
HUBIO 542P Introduction to Clinical Medicine
HUBIO 543P Principles of Pharmacology I
HUBIO 544P Endocrine System
HUBIO 546P Systemic Pathology
HUBIO 554P Genetics
HUBIO 567P Skin System

FIFTH QUARTER (WINTER)
HUBIO 550P Introduction to Clinical Medicine
HUBIO 551P Gastrointestinal System
HUBIO 552P Hematology
HUBIO 553P Musculoskeletal System
HUBIO 555P Medicine, Health, and Society

Sixth Quarter (SPRING)
HUBIO 560P Introduction to Clinical Medicine
HUBIO 562P Urinary System
HUBIO 563P Systems of Human Behavior II
HUBIO 564P Principles of Pharmacology II
HUBIO 565P Reproduction

Clinical Curriculum (144 Credits)

The clinical curriculum is pursued predominantly in the third and fourth years of medical school. It includes three elements: prescribed clerkships to be completed by all students (72 credits or thirty-six weeks in medicine, obstetrics and gynecology, pediatrics, psychiatry, surgery); a clinical selective series requiring a minimum number of credits (24) in three clinical areas (family medicine, rehabilitation medicine/chronic care, and emergency care/trauma); and a minimum of 48 credits of clinical clerkships elected by the student.

Education in the clinical curriculum utilizes the case-study method. Students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of a medical care team. Each such team is headed by a faculty clinician working in one of the medical school-affiliated hospital or practice units.

Independent Study in Medical Science

In addition to the basic and clinical curricula, each student must complete 10 credits in courses, independent study, and investigations that relate biological, behavioral, sociocultural, or epidemiological sciences basic to medicine. The purpose of this requirement is that the student gain an understanding of the philosophy and methods of science. Of the 10 credits, 6 are earned by the satisfactory completion of a project in Independent Study in Medical Science (ISMS) that includes a written paper. The remaining 4 may be satisfied by taking 500-level courses in a variety of subjects at any time during the student's enrollment in the M.D. program.

WAMI Program

The WAMI Program was initiated in 1971 as an experiment in decentralized medical education to provide a broader range of educational opportunities for students, and to address the need for primary-care physicians oriented toward rural practice. It is an integral part of the philosophy and methods of science. Of the 10 credits, 6 are earned by the satisfactory completion of a project in Independent Study in Medical Science (ISMS) that includes a written paper. The remaining 4 may be satisfied by taking 500-level courses in a variety of subjects at any time during the student's enrollment in the M.D. program.

Enrichment Opportunities

Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research projects or clinical investigations, or participating in an international exchange program with a developing country. Brief descriptions of three of the more formal programs follow; information on other opportunities may be obtained from the Academic Affairs Office.

Rural/Underserved Opportunities Program (RUDP)

This program exposes students to rural medicine and utilizes clerkships in family medicine that occur one month during the summer between the first and second year, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported largely by a special fund from the School of Medicine. The program is expected to be twelve weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time.

Medical Thesis Program

The medical thesis program of the School of Medicine is voluntary, and participation is initiated by the student. Often a student will develop a special interest in

SCHOOL OF MEDICINE / ENRICHMENT OPPORTUNITIES 357
some particular field in medicine. This interest will create a desire to learn more about the field or to do special work in it. The thesis program is a means of fulfilling that desire. Prizes are awarded for the best theses submitted each year, and certain departments offer the best thesis award under that department’s supervision. The preparation of a satisfactory thesis may carry with it honors at graduation. Additional information concerning the thesis program can be obtained from the chairperson of the Medical Thesis Committee or from the School of Medicine Aca­demic Affairs Office.

Student Evaluation and Promotion

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and non-cognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the oath that all students take at the time of graduation. As such, student evaluation is based upon the faculty’s observation of the student’s behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, at all University of Washington examinations, and complete an approved Independent Study in Medical Science project before receiving the Doctor of Medicine degree. Periodic review of student performance is conducted by the School’s Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic directives provided by the School’s committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine. The Faculty Council on Academic Affairs reviews the Student Progress Committee’s actions, and the Dean of the School of Medicine has final approval of the committee’s and council’s recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, readmission requires the approval of the Faculty Council on Academic Affairs. Readmission is considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one readmission petition through the Faculty Council on Academic Affairs is allowed. Subsequent requests for admission must be directed through the standard admissions procedures.

Grading System

The grades awarded in each course in the M.D. curriculum are Honors, Satisfactory, or Not-Satisfactory. The School’s goal is to provide a curriculum that defines the competencies to be achieved by the student at each level. Therefore, grading usually signifies satisfactory or not satisfactory accomplishment of these competencies at the end of each course. However, a pattern of documented evaluative concerns about a student’s performance may indicate not satisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system produces a rank order of the student in classes standing by a grade-point average.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

Honors

A charter as Alpha of Washington was granted to the School of Medicine in 1950 by Alpha Omega Alpha, the honorary medical society. Members are elected by the membership of Alpha Omega Alpha on the basis of high scholarship and good moral character.

Graduation With Honors

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the dean, approved by the faculty each year and are selected on the basis of an Honors and Awards Committee review of academic records.

Postgraduate Medical Education

Internships and Residencies

Postgraduate clinical training programs are available at University-affiliated hospitals: University of Washington Medical Center, Harborview Medical Center, Seattle Veterans Affairs Medical Center, Pacific Medical Center, Children’s Hospital and Medical Center, Providence Medical Center, Swedish Medical Center, Group Health Cooperative of Puget Sound, and Boise Veterans Affairs Medical Center. All clinical departments cooperate with one or more of these institutions. A University network of affiliated family practice residencies includes training programs based in Seattle, Tacoma, Renton, Olympia, Yakima, Spokane, and Boise, Idaho, and in military programs at Madigan Army Medical Center and Bremerton Naval Hospital. Training programs are available in anesthesiology, family medicine, general surgery, internal medicine, laboratory medicine, neurological surgery, neurology, nuclear medicine, obstetrics and gynecology, ophthalmology, orthopedics, otolaryngology, pathology, pediatrics, psychiatry, radiation therapy, radiology, rehabilitation medicine, and urology. Residency programs vary in duration from three to five years and provide additional training through research periods. The preparation of a satisfactory thesis may carry with it honors at graduation. Prizes are awarded for the best thesis written under that department’s supervision. The preparation of a satisfactory thesis may carry with it honors at graduation. Additional information concerning the thesis program can be obtained from the chairperson of the Medical Thesis Committee or from the School of Medicine Academic Affairs Office.

Continuing Medical Education

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of programs for physicians and health care professionals in the Pacific Northwest and throughout the nation. While the vast majority of these programs are offered at the School of Medicine, a number are offered at off-site locations throughout the region.

Programs include short courses of one to three days, conferences, one-to-two-week board review courses, workshops, visiting professorships, preceptorships, and mini-residencies. Programs in the community include lecture series, video tape presentations, self-directed instructional materials, and other educational activities for members of the medical community throughout the region.

All physicians are invited to participate in continuing medical education programs, which also include clinical department grand rounds and regular conference series. These activities also occur in our affiliated hospitals.:

1. The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor Continuing Medical Education for physicians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for category I credit of the Physician’s Recognition Award of the American Medical Association’s Prescribed credit for the American Academy-of-Family Physicians is requested for all applicable programs. Other forms of accreditation are included in the program offerings where appropriate.

Descriptive brochures and calendars for courses and conferences are published during the academic year. Specific information in the way of a brochure or program announcement is made available to physicians who desire specialty training in anesthesiology, in addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management). Opportunity for collaborative research are available to undergraduate programs in anesthesia and respiratory physiology. The clinical clerkship program provides a career in anesthesia and respiratory physiology. The clinical clerkship program provides basic and advanced training in inpatient and outpatient care of the unconscious patient. A four-year residency program, including an internship year, is available for physicians who desire specialty training in anesthesia. In addition, advanced clinical and research training is available, depending on the department’s needs.

Anesthesiology

BB1459 Health Sciences

The Department of Anesthesiology maintains an active program in research, in addition, advanced clinical and research training is available to physicians who desire specialty training in anesthesiology, in addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding clinical clerkships may be directed to the Director of Anesthesiology.

Shroff, Ashok B. 1992, (Acting); MBBS, 1976, Armed Forces Medical College (India).

Stenzel, Matthew J. 1989, (Acting); MBChB, 1989, National University of Ireland.

Twist, David L. 1994, (Acting); MD, 1986, University of Saskatchewan (Canada).

Uezono, Shoichi 1991, (Acting); MD, 1988, Tokyo University (Japan).

Senior Lecturer

Syroy, George A. 1989; MD, 1955, Charles University (Czechoslovakia).

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

ANEST 489 Undergraduate Thesis (*) Gelduschek By special arrangement. Time and credit to be arranged.

ANEST 499 Undergraduate Research (*) Gelduschek Specific research projects relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. (Six weeks, full-time. Limit: two students.)

ANEST 501P Preceptorship in Anesthesiology (1) Gelduschek An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in their offices. Prerequisite: permission of instructor.

ANEST 680P Basic Anesthesia Clerkship (4) Gelduschek Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals.

ANEST 681P Advanced Clerkship in Anesthesiology (3) Gelduschek Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: 680P or permission of instructor. (Four weeks, full-time. Limit: two students per period.) Affiliated hospitals.

ANEST 687P Anesthesiology Special Electives ( , max. 24) Gelduschek Special clerkships, externships, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain a special assignment form from the Dean's office at least one month before advance regis-
Biochemistry

J405 Health Sciences
James Hurley, Graduate Program Coordinator

Modern biochemistry involves the study of biological processes at a molecular level. Specific research projects may entail study in such diverse fields as molecular biology, molecular biophysics, genetics, microbiology, immunology, developmental biology, organic chemistry, pharmacology, and physiology. Graduate students enrolled in the Department of Biochemistry engage in studies and research that prepare them for the challenging opportunities open to the professional biochemist in colleges and universities, research institutes, medical schools and hospitals, government laboratories, and the laboratories of chemical, biotechnology, and pharmaceutical industries.

The course of advanced study is designed to give each student a firm foundation upon which to base further professional progress. In the first year of academic work, students attend courses in biochemistry and molecular biology, and in related fields such as chemistry, biophysics, genetics, cell biology, and microbiology. In the second and succeeding years, an increasing amount of time is devoted to research and independent study. For the Ph.D. degree, each student is required to gain teaching experience, usually during the second year of the graduate program.

The basic requirements for admission for graduate study in biochemistry are one year of biochemistry, one year of physical chemistry, and mathematics through integral calculus. Applicants must also meet the general admission requirements of the Graduate School.

Normally, all graduate students admitted to the Department of Biochemistry are provided with financial assistance.

Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately fifty-two thousand square feet of excellent research space, conference rooms, and a departmental library. In addition, approximately eleven thousand square feet of research space and conjoint facilities are shared with the Department of Genetics. The laboratories are equipped with the latest in research equipment and are supported externally by a number of government, external, and centralized facilities, which include a modern computer center, the Marine Biology Laboratory at Friday Harbor, and the Health Sciences Library. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine. Close collaboration exists with investigators in other related departments, including biological structure, chemistry, pharmacology, genetics, and microbiology.

Byers, Breck E. * 1970, (Adjunct); PhD, 1967, Harvard University; cell biology; mitosis and meiosis, mechanisms of nuclear division and crossing-over in yeast.
Dale, Beverly A. * 1972, (Adjunct); PhD, 1968, University of Michigan; keratin biochemistry.
Davie, Earl Warren * 1962; PhD, 1954, University of Washington; protein synthesis, mechanism of blood clotting, cloning of plasma proteins.
Eisenman, Robert M. * 1976, (Affiliate); PhD, 1971, University of Chicago; viral oncology, oncogenes, retrovirus multiplication.
Eyre, David R. * 1985, (Adjunct); PhD, 1969, University of Leeds (UK); connective tissue biology, collagen chemistry, bone and cartilage metabolism.
Fischer, Edmund H. * 1953, (Emeritus); PhD, 1947, University of Geneva (Switzerland); regulation by phosphorylation.
Floss, Heinz G. * 1987, (Adjunct); PhD, 1961, Technical University of Munich (Germany); biogemc and natural products chemistry.
Glomsset, John A. * 1960; MD, 1960, University of Uppsala (Sweden); membrane structure and function.
Gordon, Milton * 1959; PhD, 1953, University of Illinois; molecular basis of plant tumors, control of gene expression in plants.
Hauschka, Stephen D. * 1972; PhD, 1966, Johns Hopkins University; muscle differentiation.
Hol, Wilhelmus G. J. * 1992; PhD, 1971, University of Groningen (Netherlands); protein crystallography, drug design, vaccine development, and protein engineering.
Jansen, Lyle H. * 1949, (Emeritus); PhD, 1943, University of Washington; molecular structure, x-ray diffraction.
Krebs, Edwin G. * 1977, (Emeritus); MD, 1943, Washington University; intracellular signaling mechanisms involving protein phosphorylation.
Loeb, Lawrence A. * 1978, (Adjunct); MD, 1961, New York University; DNA replication, cancer and AIDS.
Muller, Eric D. * 1988, (Research); PhD, 1981, Yale University; the regulation of metabolism by the protein thioredoxin.
Neurath, Hans * 1980, (Emeritus); PhD, 1933, University of Vienna (Austria); structure and functions of proteolytic enzymes,zymogen activation, evolution of proteins.
Palminter, Richard D. * 1982; PhD, 1968, Stanford University; regulation of gene expression in transgenic mice.
Parson, William W. * 1971; PhD, 1965, Case Western Reserve University; bioenergetics, with particular emphasis on photosynthesis, picosecond spectroscopy.
Perlmutter, Roger M. * 1984; MD, 1979, Washington University; molecular immunology and the molecular biology of neoplasia.
Petra, Philip H. * 1966; PhD, 1966, Tulane University; reproductive biochemistry.
Reid, Brian R. * 1980, PhD, 1965, University of California (Berkeley); biophysical chemistry.
Ross, Russell * 1962, (Adjunct); DDS, 1955, Columbia University; atherosclerosis, growth factors, inflammation, vascular biology.
Saari, John C. * 1974; PhD, 1970, University of Washington; retinal biochemistry.
Sandell, Linda J. * 1987, (Adjunct); PhD, 1980, Northwestern University; biochemistry and molecular biology of connective tissue, extracellular matrix molecules.
Shapiro, Bennett M. * 1970, (Affiliate); MD, 1964, Jefferson Medical College; molecular basis of reproduction.
Teller, David C. * 1965; PhD, 1964, University of California (Berkeley); physical chemistry of macromolecules, association reactions of proteins.
Wale, Kenneth A. * 1958; PhD, 1959, University of Toronto (Canada); structure and functions of proteins; phosphatases, mass spectrometry.
Young, Elton * 1969; PhD, 1967, California Institute of Technology; regulation of gene activity in yeasts Saccharomyces cerevisiae.

Associate Professors
Davis, Trisha Neil * 1987; PhD, 1983, Yale University; function of calcium-binding proteins in cell growth.
Gelb, Michael H. * 1985, (Adjunct); PhD, 1982, Yale University; mechanistic enzymology, bioorganic and medicinal chemistry.
Herrington, Jon R. * 1976; PhD, 1967, Johns Hopkins University; x-ray crystallography of macromolecules, protein structure and function.
Hurley, James Bryant * 1985; PhD, 1979, University of Illinois; molecular basis of vision.
Kawai, Rachel E. * 1983; DPhil, 1981, Oxford University (UK); molecular recognition, protein NMR.
Muller, David R. * 1988, (Research); PhD, 1981, Yale University; the regulation of metabolism by the protein thioredoxin.
Renkamp, Ronald E. * 1978, (Adjunct); PhD, 1975, University of Washington; crystallography.

Assistant Professors
Baker, David * 1993; PhD, 1989, University of California (Berkeley); protein folding.
Kimelman, David * 1989; PhD, 1985, Harvard University; molecular biology of early development in the frog, Xenopus laevis.
Ruohola-Baker, Hannele * 1993; PhD, 1989, Helsinki University (Finland); oogenesis, developmental genetics.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

BIOC 405, 406 Introduction to Biochemistry (3,3) NW Petra, Saari, Sandell, Teller Basic principles of biochemistry, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Does not fulfill advanced biochemistry prerequisites (see 440, 441, 442). Prerequisites: general biology and organic chemistry or permission of instructor for 405; 406 or permission of instructor for 406. Offered: AW.

BIOC 426 Basic Techniques in Biochemistry (3) NW Davis Introduction to basic biochemistry experiments. Acquaints students with basic biochemical laboratory techniques and serves as a preparation for advanced biochemistry laboratory courses. Prerequisites: 405 and 406 or 440 and 441 or equivalent. Offered: AS.

BIOC 440, 441, 442 Biochemistry (4,4,4) NW Interdisciplinary course in general biochemistry and molecular biology for undergraduate students in molecular and cellular biology and graduate students in other science departments. (One-hour quiz per week re-
Bioengineering

309 Harris Hydraulics Laboratory

The Center for Bioengineering provides a multidisciplinary program of collaborative research and training designed to accelerate the application of new engineering technologies to clinical practice and research. Major areas of current bioengineering research include bioinstrumentation, biomaterials, biomechanics, controlled drug-release systems, imaging, microsensors, bioelectromagnetics, molecular bioengineering, microcirculation, cellular bioengineering, muscle, and simulation of biosystems. There are options for study leading to master's and doctoral degrees with different levels of specialization. Detailed information on Bioengineering, its faculty and courses appears in the Interschool or Intercollege Programs section of this catalog.

Biological Structure

Ronald Stenkamp, Graduate Program Coordinator
GS14 Health Sciences

The Department of Biological Structure offers graduate programs of study leading to the Master of Science and Doctor of Philosophy degrees. The department promotes an understanding of biological processes through the study and analysis of structure-function-relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, and quantitative biology with an emphasis on computer graphic representations of biological structures. This diversity creates a lively atmosphere in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.

The department's graduate program is directed toward the education of doctoral students who anticipate academic careers that will involve teaching and research in the biomedical sciences. Graduates from the program are expected to have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with major emphasis on the cellular level.

Graduate students select research and teaching pathways in their program. The research pathways are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, reproductive biology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. The purpose of the teaching pathways is to prepare the student to teach in one of the anatomical subdivisions: human anatomy, neuroanatomy, neurobiology, histology, embryology, developmental biology, cell biology, and macromolecular structure.

Special Requirements

Applicants should have completed an undergraduate major in any appropriate field, such as anthropology, biochemistry, biology, chemistry, physics, psychology, or zoology.

Financial Aid

The department offers financial support through teaching assistantships and training grant positions and from research funds.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical or dental student enrollment only.

B STR 301 General Anatomy (4) NW Bolender Survey of systemic human anatomy, including human skeletal system, muscles, joints, neuroanatomy, circulatory system, digestive system, urinary system, and reproductive system. For second, third, and fourth year undergraduates. Offered: Sp.

CONJ 340-341-342 Human Anatomy and Physiology (4-4-4) Peterman See Conjoint Courses. Offered: AWSp.

B STR 431 Introduction to Neuropathology (4) NW Gehrig, Harris, Prothero, Sundsten, Westrum General survey of the structure of the central nervous system, including an analysis of sensory and motor systems and higher integrative functions and clinical correlation. Required for OT and PT students. Entry code required. Prerequisite: 301 or permission of instructor. Offered: W.

B STR 498 Undergraduate Thesis (*) Individual research projects under the supervision of an instructor. For senior medical students. Entry code required. Prerequisite: permission of instructor. Offered: AWSp.

B STR 499 Undergraduate Research (*) Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Entry code required. Prerequisite: permission of instructor. Offered: AWSp.

B STR 501 Gross Anatomy (1-10, max. 10) Rosse Lecture and laboratory dissection course in regional anatomy: thorax, abdomen, pelvis, perineum. Prerequisite: permission of instructor. Offered: A.

B STR 502 Gross Anatomy (1-5) Graney Lecture and laboratory dissection course in regional anatomy: upper and lower extremities. Prerequisite: permission of instructor. Offered: W.

B STR 503 Gross Anatomy (1-5) Graney Lecture and laboratory dissection course in regional human anatomy; head and neck. Prerequisite: permission of instructor. Offered: Sp.

B STR 505 Histology in Biomedical Research (3) Baskin Selected topics in histology, with emphasis on analysis of research literature, methods, and laboratory exposure. Prerequisite: permission of instructor. Offered: even years; W.

CONJ 508 EM Methods and Interpretation (3-5) Wight See Conjoint Courses.

B STR 510 Seminar in Anatomy (1) Graney, Rosse Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions is reviewed. Prerequisite: permission of instructor. Offered: AWSp.

CONJ 511 Functional Neuroanatomy (4) Hendrickson, Smith See Conjoint Courses. Offered: A.

B STR 512 Human Microanatomy (4) Nemerof Lectures and laboratory treating the specialized tissues and organs of the body from the microscopic and ultramicroscopic points of view. Prerequisite: permission of instructor. Offered: A.

B STR 514 Methods in Quantitative Morphology (3) Bolender Lecture/laboratory course covering major techniques in areas of organ, tissue, cellular, and...
molecular biology. Emphasis on understanding the use of modern experimental methods for detecting and interpreting structural changes in biology. Prerequisite: familiarity with microcomputers and permission of instructor. Offered: even years. Sp.

B STR 515 Biological X-ray Structure Analysis (3) Stenkamp Theory of X-ray diffraction, with emphasis on applications to biological systems. Prerequisite: permission of instructor. Offered: W.

B STR 517 Embryology/Developmental Biology Seminar (1) Nameroff Embryology of a region or organ. Topics vary. Emphasis on original literature and developmental principles. Prerequisite: permission of instructor. Offered: A.

B STR 519 Current Problems In Macromolecular Structure (2, max. 10) Stenkamp A discussion of macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: odd years. Sp.

CON 520 Anatomy and Autopsy (1,2) Mottet, Rosse See Conjoint Courses. Offered: A/W.

UCONJ 524 Developmental Neurobiology (3) Reh See University Conjoint Courses. Offered: W.

B STR 525 Brain Dissection (2) Sundsten Detailed consideration of the macroscopic anatomy of the human brain (individual study). Entry code required. Prerequisite: permission of instructor. Offered: Sp.

B STR 530P Gross Anatomy and Embryology for Dental Students (7) Broderson, Gehrig, Myall. Normal gross structures of thorax, abdomen, pelvis, perineum, upper extremity, and neck are discussed, then dissected on human cadavers. The development of each organ system is presented and related to the definitive normal adult structure. Developmental anomalies and diagnostic anatomy are also discussed. Prerequisite: admission to School of Dentistry or permission of instructor. Offered: A.

B STR 535 Dental Musculoskeletal System (1) The gross anatomy, embryology and clinical topics relating to the musculoskeletal system are presented in lecture and reinforced through human dissection. Restricted to first year dental students. Prerequisite: 530. Offered: Sp.

B STR 540 Special Projects In Anatomy (1-6, max. 6) Special projects in anatomy under supervision of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: A/W.

B STR 541P Microscopic Anatomy for Dental Students (4) Koehler Lecture and laboratory work in microscopic anatomy. For dental students taking HU/BIO 510; others by permission of instructor. Offered: A.

B STR 550P Head and Embryology for Dental Students (4) Broderson Normal structure of head is discussed and dissected on human cadavers. The development of the head is presented to appreciate the definitive normal as well as anomalous structures. Fundamentals of diagnostic anatomy are also discussed. First year dental students only. Offered: Sp.

B STR 555 Laboratory Rotation in Biological Structure (*, max. 5) Introduction to experimental design, research and scientific thought in laboratories of faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. Prerequisite: permission of instructor. Offered: A/W.

B STR 556 Topics in Developmental and Systemic Cell Biology (1-3) Recent advances in molecular and developmental aspects of cell biology. Emphasis on specific organ systems. Differentiation of lymphocytes, germ cells, muscle, epidermis; cell biology of lens, vessel wall, visual cortex; computer modeling; cell-cell and cell-matrix interactions. Prerequisites: under- graduate biochemistry and/or molecular biology, general cell biology, or permission of instructor. Offered: A/W.

B STR 557 Biomolecular Structure Seminar (1) Hol Literature review of key research in Biomolecular Structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Credit/no credit only. Prerequisite: graduate standing in biological structure or biochemistry and permission of instructor. Offered: A/W.

B STR 559 Developing Research Proposals (2) Developing research proposals in cellular, molecular, and developmental biology; neurobiology; morphometrics and computer modeling; experimental immunology and hemopoesis; reproductive biology; molecular structure. Weekly seminars by faculty and written proposals by students to include background and significance of project's specific hypotheses and aims, methodology, analyses of possible outcomes. Prerequisite: permission of instructor. Offered: even years. Sp.

B STR 580P Anatomy Teaching Practicum (*, max. 8) Graney, Koehler, Rosse, Sherk. Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, depending on student interest, experience. Credit based on course credit in which student is assisting. Prerequisite: permission of course chairperson.

B STR 581P Anatomy: Intratracheal Dissection of Maxilla and Mandible (1) Baab, Gehrig Lecture and dissection course in intratracheal anatomy (maxilla and mandible only) from a periodontal surgical approach. Prerequisite: graduate standing in periodontics. Offered: Sp.

CON 585 Surgical Anatomy (1-3, max. 12) Graney See Conjoint Courses. Offered: A/W.

B STR 591 X-ray and NMR Analysis of Macromolecular Structure (1, max. 30) Adman, Stenkamp Weekly discussion of current topics in research on molecular structure, usually emphasizing techniques of X-ray crystallography. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/W.

B STR 592 Current Methods In Molecular and Cellular Biology (3) Yoshimura Lecture/laboratory demonstration course covering 6-7 current techniques in the areas of molecular and cellular biology. Emphasis on the types of scientific questions and problems that can be addressed by various methods that are in current use. Offered: Sp.

B STR 594 Seminar In Myogenesis (1, max. 5) Nameroff Discussion of recent work on the differentiation of skeletal muscle and related cell types. Emphasis on the cell-biological aspects of differentiation both in vivo and in vitro. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/W.

B STR 595 Skin Biology Seminar (1, max. 5) Smith Presentation, discussion of ongoing multidisciplinary research in basic and clinical problems of adult and fetal skin biology. Genetic diseases of epidermis and dermis, percutaneous absorption in adult and fetal skin, immune and inflammatory mechanisms of health and disease, and developmental and prenatal diagnosis of inherited disorders. Pigment cell biology. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/W.

B STR 597 Topics In Neurobiology (1, max. 5) Harris Presentations by participants of topics in neuroanatomy, neurophysiology, neurochemistry, and other areas related to the nervous system. Problems of current research interest. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/W.

B STR 598 Reading In Biological Structure (2) Critical evaluation of research in biological structure, including current problems, methods and future directions by reading and discussing research and review papers. Credit/no credit only. Prerequisite: permission of instructor. Offered: A/W.

B STR 600 Independent Study or Research (*) Offered: A/W.

B STR 700 Master's Thesis (*) Offered: A/W.

B STR 800 Doctoral Dissertation (*) Offered: A/W.

Comparative Medicine

T142 Health Sciences

The Department of Comparative Medicine provides advanced training opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (CMED 407) for biomedical graduate students; zoontic diseases; and training in laboratory animal medicine for veterinary medical students and veterinarians combined with a Master of Science degree program in comparative medicine. Areas of current research interests include immunotoxicology, bacterial and viral diseases of laboratory animals, parasitic diseases, and animal models of human disease conditions.

Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of course work, clinical residency rotations, and research over a three year period leading to a Master of Science degree in comparative medicine or a doctoral degree in one of the basic sciences. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Stipend support is normally provided.

Master of Science Degree

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department's Postdoctoral Training Program. The degree option involves additional elective courses, the completion of a more involved research project, and a thesis.

Predoctoral Program

This program is designed to acquaint veterinary medical students with laboratory animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.

Correspondence and Information

Academic Program Coordinator T142 Health Sciences, SB-42
of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenic mechanisms that underlie them. Prerequisites: PATH 500 or equivalent and permission of instructor. Offered: AWSpS.

C MED 516 Current Literature in Laboratory Animal Medicine (1, max. 12) Dennis, Van Hooser Critical evaluation of recent articles on laboratory animal medicine and science. Emphasis on literature dealing with spontaneous diseases of laboratory animals, biology and husbandry, zoonotic diseases, and animal models of human disease. Experimental design, use of animals in research, and methods of reviewing manuscripts. Prerequisite: permission of instructor. Offered: AWSpS.

C MED 518 Clinical Conference Seminar (1, max. 12) Dennis, Van Hooser Clinical reports of cases of spontaneous and induced diseases, animal models of human disease, and zoonotic diseases discussed. Disease prevalence and preventive medicine measures. Diagnostic exercises. Prerequisite: permission of instructor. Offered: AWSpS.

C MED 520, 521 Biology of Laboratory Animals (2,2) Van Hooser Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including man. Husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: S.

C MED 526 Zoonotic Diseases (3) Di Giacomo, Rausch Explores the public health aspects of zoonotic diseases, their epidemiology and current approaches to control. Focuses on the major viral, rickettsial, bacterial, protozoal, helminthic, and fungal diseases transmitted from wild and domesticated animals to humans in North America. Prerequisites: EPI 520 or permission of instructor. Offered: jointly with EPI 526.

C MED 530, 531 Diseases of Laboratory Animals (3,3) Van Hooser Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lago­morphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: S.

C MED 540 Animal Models (1) Dennis Naturally occurring and experimentally induced analogs of human diseases in animals with emphasis on diseases in search of animal models, and approaches to identifying new models. Animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology) discussed. Prerequisite: permission of instructor. Offered: S.

C MED 590 Selected Topics in Animal Medicine (2) Dennis, Van Hooser Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on the expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: S.

C MED 600 Independent Study or Research (*) Offered: AWSpS.

C MED 601 Internship Rotation - Laboratory Animal Medicine (1) Prerequisite: DVM degree. Offered: AWSpS.

C MED 700 Masters Thesis (*) Offered: AWSpS.
CONJ 520 Anatomy and Autopsy (1/2) Students attend autopsies at UWMC affiliated hospitals. Objectives: (1) demonstration of normal anatomic relationships and features of unfixed cadavers; (2) demonstration of gross anatomical relationships in various pathological states; (3) follow-up of histological findings. Offered as elective concurrent with HUBIO 520P. Prerequisites: HUBIO 510P or equivalent, permission of instructor.

CONJ 550P Clinical Infectious Diseases (3) Miller Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no credit only. Prerequisites: HUBIO 521P or permission of coordinator, Department of Medicine.

CONJ 553P Nutrition for Physicians (2) Lipkin Basic nutritional concepts directed at second-year medical students. Controversial issues relating to diet and disease, with emphasis on application of scientific reasoning and evaluation of the available evidence. Focuses on providing practical information relevant to the practice of a physician. Prerequisites: HUBIO 514P, 524P, or equivalent.

CONJ 555P Human Oncology for Fourth-Year Medical Students (2) Berger Recapitulates the principles and practice of human oncology prior to the senior medical student starting residency. Includes cancer epidemiology, screening and prevention, practical tumor biology, including oncogenes, tumor suppressor genes, and molecular carcinogenesis, geriatric and pediatric cancer, and individual organ system involvement in terms of diagnosis and management.

CONJ 560 Clinical Correlations of Neuroanatomy (2) Harris, Koerker, Swanson The relation between clinical neurological problems and the underlying neuroanatomy, studied by presenting case studies with extensive tests such as CT, MRI, angiograms. Prerequisites: 511 or equivalent, HUBIO 532.

CONJ 585P Surgical Anatomy (1-3, max. 12) Graney Guided dissection of selected regions, supplemented by conferences. Offered conjointly by the departments of Biological Structure and Surgery. Prerequisite: permission of department. Coordinator: Department of Biological Structure.

CONJ 577P Clinical Allergy and Immunology (1-3, max. 12) Van Arsdel (University of Washington Medical Center) Clinic and office experience in the diagnosis and management of allergic disease. Clinical conferences, hospital rounds on clinical immunology and allergy. Student may elect a flexible program, emphasizing adult or pediatric allergy. Prerequisites: MED 665P or basic clerkships in Departments of Family Medicine or Pediatrics. (Four weeks, full-time.)

CONJ 578P Pain Clinic Clerkship (8) Egan, Looser Full-time, four-week clerkship emphasizing comprehensive care of patients with chronic pain from benign diseases and cancer. Faculty members from multiple departments provide student with didactic and bedside experiences; student member of treatment team, involves both inpatient and outpatient activities. Prerequisites: completion of human biology series, MED 665P.

CONJ 680P Detoxification and Rehabilitation Program for Alcoholism and Drug Abuse (1-3, max. 16) Walker Supervised introduction to alcohol detoxification and rehabilitation and drug abuse. Supervised clinical experience in a variety of alcoholism and drug abuse treatment programs; accompanied by a core series of lectures and discussions. For medical students only.

CONJ 697P International Exchange Clerkship (12) Hunt Participation in health care delivery systems in developing countries; observation of relationships of host country's traditional medicine with Western medicine. Students live in cross-cultural setting to better understand their own assumptions about health care and life styles.

CONJ 689P Foreign Medical Student Clerkship (*, max. 24) A limited number of students from foreign medical schools are accepted for individually designed clinical clerkships at available sites after all UW students are accommodated. Prerequisites: permission of Associate Dean for Academic Affairs, School of Medicine.

CONJ 699P Clinical Clerkships (*, max. 32)

Family Medicine

C408 Health Sciences

Family medicine is the discipline concerned with the continuing and comprehensive care of individuals and their families. The prime instructional goal of the department is the training of physicians who will apply the knowledge and skills of this and other medical disciplines in family practice. Implicit in this goal is the necessity for continual development of new knowledge and its application in the clinical activities of the department.

The Department of Family Medicine was founded in 1971 and is involved with instruction of medical students in several ways. These include presentations in the basic curriculum of the first two years, clinical clerkships as part of the clinical core curriculum, and other elective courses open to all medical students. The graduate residency program in family practice provides training consistent with the standards of the American Board of Family Practice, the American Academy of Family Physicians, and the Council on Medical Education of the American Medical Association. Active teaching affiliations are maintained throughout the WAMI region at both undergraduate and graduate levels.

Family medicine fellowship training programs are available to develop teaching and research skills for future academic faculty.

Faculty

Chairperson
Ronald Schneeweiss

Professors

Berg, Alfred 0. 1979; MD, 1974, Washington University; family medicine.

Christman, Noel J. 1973, (Adjunct); PhD, 1966, University of California (Berkeley); health beliefs and practices, social networks and social support.

Coombs, John B. 1983; MD, 1972, Cornell University; rural health policy, nutrition and medicine.

Geyman, John P. 1976 (Emeritus); MD, 1960, University of California (San Francisco); family medicine.

Gordon, Michael J. * 1973; PhD, 1973, Michigan State University.

Katon, Wayne J. 1979, (Adjunct); MD, 1976, University of Oregon.

Mayer, Jonathan D. * 1977, (Adjunct); PhD, 1977, University of Michigan; medical geography, clinical applications, philosophy.

Rosenblatt, Roger A. * 1977; MD, 1971, Harvard University; research into the organization and delivery of health services.

Schneeweiss, Ronald 1977; MBCHB, 1964, University of Capetown (South Africa); family medicine.

Associate Professors

Eegberts, Sam C. 1982; MD, 1976, University of Washington; family medicine.

Elser, Kathleen E. 1982; MD, 1977, Johns Hopkins University; family medicine.

Elwesworth, Allan J. 1981, (Adjunct); PharmD, 1977, Philadelphia College of Pharmacy & Science; clinical pharmacy.

Greer, H. Thomas 1977; MD, 1974, University of Mississipp; family medicine.

Losh, David Paul 1992; MD, 1974, University of Kansas.

Neighbor, William E. Jr. 1983; MD, 1979, University of Washington; family medicine and preventive cardiology.

Norris, Thomas E. 1989; MD, 1973, University of Texas (Galveston); rural health policy, primary care policy, geriatrics.

Stevens, Nancy G. * 1982; MD, 1979, University of Washington; family medicine.

Taplin, Stephen H. 1983; MD, 1978, University of California (Davis); family medicine.

Taylor, Thomas R. 1979; MBCHB, 1957, University of Glasgow (UK); family medicine.

Assistant Professors

Baldwin, Laura M. 1984; MD, 1980, University of Southern California; family medicine.

Church, Lila L. 1992, (Acting); MD, 1985, University of Iowa; family medicine.

Dobie, Sharon A. 1987; MD, 1979, University of California (San Francisco); family medicine.

Gloyd, Stephen S. * 1986, (Adjunct); MD, 1973, University of Chicago; political economy, epidemiology, and primary health care in developing countries.

Goldbaum, Gary M. * 1989, (Adjunct); MD, 1978, University of Colorado; the epidemiology of human behaviors that increase risk for disease.

Oliver, Lynn M. 1988; MD, 1983, University of Washington; family medicine.

West, Peter A. 1991, (Acting); MD, 1969, University of California (Irvine); family medicine.

Instructors

Osbom, Justin 1994; MD, 1989, University of Virginia; family medicine.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

FAMED 499 Undergraduate Research (*) Research activities arranged with University-based or community physicians in diversified areas relating to family medicine. Various research philosophies and investigative methods are introduced. Prerequisite: permission of course coordinator. Offered: AWSP.

FAMED 501P Introduction to Family Medicine: Preceptorship (2.5) Students spend one morning per week for one quarter working with a practicing community family physician. Prerequisites: first- and second-
year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 505P Rural/Urban Preceptorship (2, max. 12) Opportunity to work in a variety of medical settings in rural and urban areas of Washington, Alaska, Idaho, and Montana. Prerequisite: permission of instructor. Offered: AWSpS.

FAMED 540P Clinical Clerkship in Family Medicine-Bolso (12) Stresses ambulatory primary care with emphasis on comprehensive, integrated care to patients of both sexes and all ages. Student functions in clerkship capacities, using office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 641P Clinical Clerkship in Family Medicine-Spokane (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 642P Clinical Clerkship in Family Medicine-Madigan (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 643P Clinical Clerkship in Family Medicine-Tacoma (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 644P Clinical Clerkship in Family Medicine-Univeristy of Washington Medical Center (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 645P Clinical Clerkship in Family Medicine-Group Health (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 646P Clinical Clerkship in Family Medicine-Swedish (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 647P Clinical Clerkship in Family Medicine-Providence (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 648P Clinical Clerkship in Family Medicine- Spokane Valley (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 650P Clinical Clerkship in Family Medicine-Anacortes (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 651P Clinical Clerkship in Family Medicine-Omak (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 652P Clinical Clerkship in Family Medicine-Spokane Valley (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 653P Clinical Clerkship in Family Medicine-Anchorage (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 654P Clinical Clerkship in Family Medicine-Ketchikan (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 656P Clinical Clerkship in Family Medicine-Whitefish (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 657P Clinical Clerkship in Family Medicine-Pocatello (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 658P Clinical Clerkship in Family Medicine-Sea Mar Clinic (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 659P Clinical Clerkship in Family Medicine-Country Doctor (12) For description and prerequisite, see 640P. Offered: AWSpS.

FAMED 670P Advanced Preceptorship in WAMI Area (2, max. 24) Students gain experience, knowledge, and skills needed to care for rural, Native American Indians and other ethnic or underrepresented populations in Washington, Alaska, Montana, and Idaho. Prerequisites: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 671P Advanced Preceptorship in United States (2, max. 24) Supplemental experience in rural/urban practice, or an ambulatory medicine department in a setting not already established through the family medicine curriculum. Prerequisites: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 672P Advanced Preceptorship International (2, max. 24) For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on health care delivery. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 688P Clinical Clerkship in Family Medicine, Away (24) For description and prerequisites, see 643P. Offered: AWSpS.

---

Human Biology

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only. This sequence is required for all medical students. Other students may enroll by permission of the Assistant Dean for Curriculum, School of Medicine.

HUBIO 500P Medical Practice Preceptorship at WAMI Sites (1, max. 3) Personal experience with and insight into medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student’s preference of discipline at the WAMI sites. Registration limited to first-year medical students at WAMI sites.

HUBIO 501P Human Biology Special Projects (*) Hunt: Designers of medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum.

HUBIO 505P WAMI Preceptorship (1) Opportunity for first-year medical students at WAMI sites to gain personal experience with medical practice situations by being assigned to selected clinical faculty members in their offices.

HUBIO 510P Microscopic Anatomy: Histology (3) Nameroff: Lectures and laboratories in microscopic anatomy designed to provide the principles and concepts of histology, to define the morphological characteristics of the cells, tissues, and organs of the human body, and to relate this information to functional processes studied in concurrent and subsequent courses. Offered: A.

HUBIO 511P Gross Anatomy and Embryology (7) Rosse: Structural organization of human body at the macroscopic level to provide a foundation for physical examination and functional assessment of the human organism. Integrates embryological development with study of the cadaver and examination of the normal living body. Concentrates on exploration of the body cavities and the visceras they contain. Offered: A.

---

HUBIO 512P Mechanisms in Cell Physiology (5) Critl: Physiology of the cell membrane, including ionic and electrical potential gradients; active transport, excitability, and secretion; biochemistry; basic concepts of sensory receptor; neuromuscular transmission; muscle energetics and contractility; spinal reflexes and central synaptic transmission; autonomic nervous system; energy metabolism and temperature regulation; epithelial transport; gastrointestinal motility and secretions. Offered: A.

HUBIO 513P Introduction to Clinical Medicine (1) Ellsbury: Instruction in communication skills and interview techniques to form the basis for the doctor-patient relationship and for the skills of communicating with patients. The patient profile is developed. Attention to developing comfort in the physician role. Offered: A.

HUBIO 514 Biochemistry I-A (4) Walsh: First portion of a coordinated course covering classical molecular and cellular biochemistry, cellular physiology and molecular genetics. Metabolic interrelationships as they occur in the individual stressed and related to disturbances in disease states. Offered: A.

HUBIO 521P Natural History of Infectious Disease and Chemotherapy I-A (4) Mosely: Pathogenesis and immunity of infectious diseases, natural barriers. Microbiology, epidemiology, clinical manifestations and control of representative bacterial, fungal, parasitic, and viral infectious diseases. Chemotherapeutics and principles of chemotherapy. Sterilization, principles of asepsis, nosocomial and iatrogenic infections and their prevention. Offered: W.

HUBIO 522P Introduction to Clinical Medicine (2) Ellsbury: Medical history is introduced and instruction in data collection is begun. Experience in conducting medical history and physical examination and with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.

HUBIO 523P Introduction to Immunology (2) Perlmutter: Basic concepts such as antigens; antibodies; complement; B- and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex; and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmune, blood transfusion, and transplantation). Offered: W.

HUBIO 524P Biochemistry I-B (3) Walsh: Second portion of a coordinated course covering classical molecular and cellular biochemistry, cellular physiology, and molecular genetics. Metabolic interrelationships as they occur in the individual are stressed and related to disturbances in disease states. Offered: W.

HUBIO 525P Systems of Human Behavior I-A (3) Walker: Sensation and the impact of such factors as emotional and physical development, cultural backgrounds, social roles, families, sexual identities, and belief systems upon their effectiveness as physicians. Teaching and analyzing behavior, defining behavioral objectives, and designing precise treatment strategies to obtain these objectives. Offered: A.

HUBIO 527P Introduction to Clinical Medicine (2) Ellsbury: Medical history is introduced and instruction in data collection is begun. Experience in conducting medical history and physical examination and with patients to obtain the medical history and patient profile. Special problems related to interviewing are addressed. Offered: W.

HUBIO 528P Introduction to Immunology (2) Perlmutter: Basic concepts such as antigens; antibodies; complement; B- and T-lymphocyte function, including interactions with each other and with accessory cells; immunological tolerance; major histocompatibility complex; and role of these basic concepts in immunopathology (immunodeficiencies, hypersensitivities, autoimmune, blood transfusion, and transplantation). Offered: W.
Immunology

H564 Health Sciences

The science of immunology began in the nineteenth century as an outgrowth of microbiology. During the past few decades, immunology has emerged as a truly separate discipline, with a specialized technical armamentarium and a conceptual base that has had profound general impact on research in molecular and cellular biology. Indeed, immunological questions provide some of the most exciting intellectual challenges in contemporary science. In recognition of these facts, the University of Washington established the Department of Immunology in 1969. The following information is provided as a guide to those students interested in a Ph.D. degree in this important new area.

Research facilities in the Department of Immunology include state-of-the-art equipment for gene manipulation and flow cytometry. A departmental library, extensive computer resources, and conference rooms are available for students. Members of the faculty hold joint appointments in the departments of Biochemistry, Bioengineering, Genetics, Medicine, Molecular Biological Technology, and Pediatrics, and the department participates in the Interdisciplinary Molecular and Cellular Biology Program. Close interaction therefore exists between the Department of Immunology and other research units in the health sciences.

Students are admitted for autumn quarter; the application deadline is February 1. The requirements for admission are flexible; however, most successful applicants will have completed survey courses in biology, chemistry, and physics, one year of organic chemistry, and mathematics through integral calculus. Prior exposure to immunology through formal course work or laboratory research is desirable. All immunology graduate students are assured of financial support for the term of their studies.

Correspondence and Information

Professors
Beyan, Michael J.* 1990; PhD, 1972, National Institute For Medical Research (UK); T lymphocyte development and specificity.
Clark, Edward A.* 1979, (Adjunct); PhD, 1977, University of California (Los Angeles); lymphocyte surface molecules, lymphocyte activation and cell communication.
Greenberg, Philip D.* 1978; MD, 1971, State University of New York (Downstate); molecular, cellular, viral, and tumor immunology.
Hood, Leroy E.* 1992; PhD, 1968, California Institute of Technology; molecular immunology, large scale DNA mapping and sequencing, molecular evolution.
Pious, Donald A.* 1964; MD, 1956, University of Pennsylvania; antigen processing, function of nonclassical MHC genes, MHC gene regulation.

SCHOOL OF MEDICINE / IMMUNOLOGY 357

and control; interpretation of research design, data analysis, bias source; and clinical epidemiology, including evaluation and application of diagnostic tests, natural history of disease, and quantitative aids for clinical decision making. Offered: Sp.

HUBIO 532P Nervous System (6) Reh Integrated approach to normal structure and function of the nervous system, including the eye. Neuropathological examples, as well as clinical manifestations of neurological disease are presented. Offered: Sp.

HUBIO 534P Natural History of Infectious Disease and Chemotherapy H (2) Offered: Sp.

HUBIO 535P Introduction to Clinical Medicine (4) Goldstein Adult screening physical examination is taught through the use of lecture, audiovisual aids, and small-group tutorial, where students in supervised setting practice the physical examination on one another. Further practice in the performance and recording of the patient profile and medical history. Offered: Sp.

HUBIO 540P Cardiovascular System (5.5) Brambell Interdisciplinary approach to cardiovascular medicine, including anatomy, physiology, radiology, pathology, medicine, and surgery. Function of the cardiovascular system in health and disease. Offered: A.

HUBIO 540P Respiratory System (4) Culver Interdisciplinary approach to the respiratory system, including anatomy of thorax and lungs, ventilation mechanics, blood-gas transport, gas exchange, acid-base balance, and the physiology and pathology of obstructive, restrictive, and pulmonary-vascular diseases. Offered: A.

HUBIO 542P Introduction to Clinical Medicine (2.5) McKArthu Advanced instruction in interview technique, history taking, and physical examination, with emphasis on detection of abnormalities. Offered: A.

HUBIO 543P Principles of Pharmacology I (4) Vincenz Includes general principles of pharmacology and the specific pharmacology of major drugs acting on the autonomic and cardiovascular systems. Offered: A.

HUBIO 544P Endocrine System (2.5) Brunzell Normal, gross, and microscopic anatomy and physiology of the endocrine system. Illustrations examining the clinical relevance of homeostasis, feedback, and other controlling mechanisms previously learned. Endocrine integration of metabolism. Clinically important endocrine pathophysiology. Offered: A.

HUBIO 546P Systemic Pathology (2) Schmidt Multidisciplinary approach to some diseases that affect more than one organ system (nervous, cardiovascular, respiratory) and that are caused by different mechanisms (metabolic, hormonal, traumatic, hematologic, neoplastic). Offered: A.

HUBIO 550P Introduction to Clinical Medicine (3.5) McKArthu Continuation of 542 with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.

HUBIO 551P Gastro-Intestinal System (4) Saunders Anatom of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.

HUBIO 552P Hematology (3) Broudy Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.

HUBIO 553P Musculoskeletal System (4.5) Teitz Gross, surface, applied, and x-ray anatomy of system, including entire spine but excluding head and neck. Histology of bone, cartilage, tendon-myotendinous junction in joints. Muscle-skeletal trauma and healing. Pathology and clinical manifestations of other degenerative, inflammatory, metabolic, nutritional, and congenital disorders. Physical examination. Offered: W.

HUBIO 554P Genetics (2.5) Stamatosyanopoulos Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, aminocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.

HUBIO 562P Urinary System (4) Sheeran Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

HUBIO 563P Systems of Human Behavior II (3) N. Ward Major psychiatric disorders are described and discussed, and a systematic approach to differential diagnosis is presented. Conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry are discussed. Offered: Sp.

HUBIO 564P Principles of Pharmacology II (3) Honda Lectures and conferences on drugs that act on the gastrointestinal system. Emphasis on physiology and biochemical mechanisms, with consideration of therapeutic and adverse effects. Offered: Sp.

HUBIO 565P Reproduction (3.5) Gaddum-Rosse Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of sex hormone production, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolatin and lactation, aging and infertility. Offered: Sp.

HUBIO 567P Skin System (2) Olenrub Gross and microscopic anatomy. Physiology, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination, biopsy, example of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

HUBIO 588P WAMI Non-Clinical Selectives (*) Courses offered at WAMI university sites designed to satisfy the non-clinical elective graduation requirement for medical students.

HUBIO 590P Independent Study In Medical Science (6) Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical elective graduation requirement. Offered: Sp.
Wilson, Christopher B. * 1979; MD, 1972, University of California (Los Angeles); regulation of cytokine production in T cells and macrophages.

Associate Professors
Farr, Andrew G. * 1982, (Adjunct); PhD, 1975, University of Chicago; cell interactions governing lymphocyte production and function.
Lewis, David B. * 1988, (Adjunct); MD, 1981, University of California (San Francisco); T lymphocyte cytokine biology, Infectious diseases.

Assistant Professors
Blum, Janice S. * 1992, (Affiliate); PhD, 1984, Duke University; protease functions in immune response, antigen processing, structure and function of HLA antigen.
Concannon, Patrick J. * 1989, (Affiliate); PhD, 1984, University of California (Los Angeles); development of the human T cell receptor repertoire, genetics of diabetes and ataxia-telangiectasia.
Fink, Pamela J. * 1990; PhD, 1981, Massachusetts Institute of Technology; T cell differentiation, tolerance induction, molecular and cellular immunology.
Goverman, Joan M. 1982, (Adjunct); PhD, 1981, University of California (Los Angeles); immune recognition and tolerance, autoimmunity, T cell development and activation, antibody diversity.
Milner, Eric C. B. * 1987, (Affiliate); PhD, 1980, University of Minnesota; autoantibodies, antibody repertoire, immunoglobulin polymorphism, autoimmune disease.
Pullen, Ann M. * 1991; PhD, 1987, Cambridge University (UK); superantigens and their effects on T-cells.
Rudensky, Alexander Y. * 1992; PhD, 1986, Gabrilovich Institute For Epidemiology & Microbiology; antigen processing and presentation, T-cell recognition.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

IMMUN 441 Introduction to Immunology (4) NW
General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisites: BIOL 203, organic chemistry, or permission of instructor, junior standing or above; recommended: biochemistry, cell biology and/or genetics. Offered: jointly with MICRO 441; A.

IMMUN 499 Undergraduate Research (*, max. 24)
Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor.

IMMUN 532 Advanced Immunology (3) Examines the molecular and cellular basis of immune function. Students must have completed a baccalaureate degree in a biological specialty, and be conversant with molecular genetics. Topics include antigen receptor structure, antigen presentation, and the biochemistry of lymphokines. Offered: W.

IMMUN 533 Developmental Immunology (3) Draws on background materials offered in S32, placing the molecular and cellular biology of immune function in an appropriate developmental context. Topics include hematopoiesis, lineage commitment in lymphocytes, and the development of immune responsiveness. Prerequisite: S32 or permission of instructor. Offered: Sp.

IMMUN 550 Selected Topics In Immunology (1) Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Credit/no credit only. Prerequisite: permission of instructor.

IMMUN 583 Central Topics In Immunology (2) Presentations by participants of topics relating to the broad study of immunology. Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: Sp.

IMMUN 573 Immunology Seminar Series (1) Weekly discussion in which original research results are presented. Emphasis is placed on reviewing and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Credit/no credit only. Prerequisite: firm background in immunology, permission of instructor.

IMMUN 599 Topics in Immunology (*, max. 6) Current problems in immunological research. Credit/no credit only. Prerequisite: permission of instructor.

IMMUN 800 Independent Study or Research (*)

IMMUN 800 Doctoral Dissertation (*)

Laboratory Medicine
NW120 University of Washington Medical Center

The Department of Laboratory Medicine includes divisions of clinical chemistry, hematology, microbiology, coagulation, immunology, genetics, virology, and medical informatics. In addition to courses for medical students, the department offers Bachelor of Science in Medical Technology and Master of Science degree programs. The department also provides residency training in clinical pathology for graduate physicians and postdoctoral training in several subspecialty areas of laboratory medicine.

Undergraduate Program

Bachelor of Science in Medical Technology Degree Medical technology is an interesting and rewarding, health science profession. Individuals who enjoy studying the biological, chemical, and physical sciences find personal satisfaction and intellectual reward in employing scientific methods for the diagnosis and evaluation of disease. Advances in medical science and interest in health maintenance have resulted in an exponential growth in the diversity and volume of laboratory procedures. The medical technologist/clinical laboratory scientist is a creative, knowledge-based professional who performs assays, analyzes problems, and helps to evaluate test results.

The medical technology program is a four-year college curriculum supervised by the College of Arts and Sciences in the freshman and sophomore years (preprofessional, 90 credits) and by the Department of Laboratory Medicine in the junior and senior years (professional). Detailed program requirements and application materials may be obtained from the Undergraduate Advising Center or the Department of Laboratory Medicine.

Admission Requirements
Completion of 90 quarter credits, or junior standing, is required for admission. Prerequisite requirements for admission include completion of the University writing, reasoning, and general education requirements. Writing and reasoning requirements include 5 credits English composition, plus a minimum 7 credits of additional writing-intensive courses, and 5 credits of quantitative reasoning. General education requirements include a minimum of 40 credits from three Areas of Knowledge: Visual, Literary, and Performing Arts; Individuals & Societies; the Natural World. A minimum of 10 credits must be earned in each of the three Areas of Knowledge. Students who began college before autumn 1985 complete a different set of requirements. See adviser for details.

Graduation Requirements: Detailed requirements may be obtained from the Medical Technology Program Program Director, Department of Laboratory Medicine, SB-10. A minimum of a C grade in all laboratory medicine courses and a GPA of 2.00, both cumulative and in required courses, is required for graduation.

The medical technology curriculum is accredited by the Committee on Allied Health Education and Accreditation. Graduates are eligible and are encouraged to take an appropriate examination to become certified medical technologists/clinical laboratory scientists. Examples of practice in medical technology include service in hospitals and clinics; and research in industrial, public health, and medical laboratories.

Graduate Program

The Department of Laboratory Medicine offers a graduate program leading to the Master of Science degree. Each student in the program selects one of the major areas of concentration (e.g., chemistry, coagulation, hematology, immunology, microbiology, virology). The chemistry concentration is approved by the Commission on Accreditation in Clinical Chemistry. The other pathways have no comparable accrediting agencies. A thesis based upon independent research in the student's selected area of concentration is required. Course requirements vary with the concentration selected. However, the program is flexible and permits each student (with the help of an adviser) to plan a course of study that meets individual needs. A full-time student normally completes the program in two years. The program prepares qualified candidates for supervisory positions in clinical laboratories and for careers in research or teaching in an area of clinical laboratory science.

Admission Requirements
Applicants must have a B.S. or B.A. degree in a field appropriate to the graduate study (medical technology, biochemistry, biology, chemistry, or microbiology) and meet the Graduate School's requirements for admission. The applicant must also be certified as a medical technologist/clinical laboratory scientist, or as a specialist in a particular area of laboratory medicine by one of the national accrediting agencies. In addition, applicants must take the Graduate Record Examination aptitude test.

Major Requirements
Students must meet the minimum requirements for a master's degree as stated in the Graduate School section of this catalog. In addition, a core of courses is required for all students in the program as well as additional specific course requirements for the various major areas of concentration.

Financial Aid
Research assistantships may be available for second year students. Opportunities for part-time employment in departmental laboratories may be available, and applications will be considered.

Research Facilities
Each division in the department is equipped with modern facilities for research in its specialty area.
Correspondence and Information
Graduate Program Coordinator
Department of Laboratory Medicine, SB-10

Residency Training Program
The department provides residency training in clinical pathology (laboratory medicine) for graduate physicians in cooperation with the Department of Pathology. Persons who complete the program are eligible for certification by the American Board of Pathology.

Professors
Benjamin, Denis R. * 1982; MBCHB, 1968, University of Witwatersrand (South Africa); pediatric pathology, hematopathology nutrition, circadian rhythms.
Chatman, Gian E. 1959, (Emeritus); MD, 1951, University of Naples (Italy); electroencephalography and clinical neurophysiology.
Coyle, Marie B. * 1973; PhD, 1965, Kansas State University; DNA probes and GLC for rapid identification of mycobacteria and corynebacteria.
Detter, James C. * 1970; MD, 1962, University of Kansas; laboratory diagnosis of genetic disorders, red-cell disorders and laboratory instrumentation.
Gilliland, Bruce C. * 1970; MD, 1960, Northwestern University; rheumatology/immunology.
Kaplan, Alex 1960, (Emeritus); PhD, 1936, University of California (Berkeley); clinical chemistry.
Kenny, Margaret * 1970; PhD, 1968, University of Illinois; clinical chemistry, new technologies for in vivo clinical biochemical analysis.
Labbe, Robert F. * 1957, (Emeritus); PhD, 1951, Oregon State University; porphyrin disorders, nutritional biochemistry.
Pordre, James J. * 1982; MD, 1959, University of Minnesota; infectious diseases, antibiotic-resistant nosocomial infections.
Raisys, Vidhantas A. * 1971; PhD, 1969, State University of New York (Buffalo); clinical toxicology, therapeutics drug monitoring.
Schmer, Gottfried * 1970; MD, 1956, University of Vienna (Austria); synthesis of artificial organs, molecular engineering of antitumor enzymes.
Schoenknecht, Fritz D. * 1967; MD, 1957, Freie University of Berlin (Germany); clinical microbiology, nosocomial infections, in vivo antibiotic action.
Strandjord, Paul E. * 1963, (Emeritus); MD, 1959, Stanford University; clinical chemistry, leadership and management.

Associate Professors
Ashley, Rhoda L. * 1981; PhD, 1977, University of California (Davis); pathogenesis of viral infections, immune response to herpes, rapid diagnosis.
Bauer, Larry * 1980, (Adjunct); PharmD, 1980, University of Kentucky; clinical pharmacokinetics: drug absorption, distribution, excretion and metabolism in humans.
Chandler, Wayne L. * 1984; MD, 1982, St Louis University; clinical chemistry, clinical coagulation hematology.
Clayson, Kathleen J. * 1969, (Emeritus); MS, 1968, University of Minnesota; enzymology in clinical chemistry.
Delaney, Collene J. * 1975; PhD, 1972, University of Illinois; clinical chemistry, the study of diabetes and alcoholism.
Fine, James S. * 1977; MD, 1972, University of Minnesota; enzymology, medical computer applications.
Fligner, Corinne L. 1984, (Adjunct); MD, 1976, University of New Mexico; autopsy and forensic pathology, fetal and perinatal pathology, forensic toxicology.
Kidd, Pamela G. * 1978; MD, 1971, Baylor University; immunologic and molecular diagnosis of leukemia and lymphoma, AIDS.
Opheim, Kent E. * 1977; PhD, 1973, Cornell University; therapeutic drug monitoring, drug assay development, pediatric clinical chemistry.
Rutledge, Joe C. * 1989; MD, 1976, Vanderbilt University; genetic disease pathology, human embryology, mouse mutagenesis, pediatric cardiology.
Schilling, Harvey S. * 1982; MD, 1966, Washington University; clinical chemistry, hematology, interpretation of laboratory data.

Assistant Professors
Behrens, Joyce A. 1971; MS, 1971, University of Minnesota; clinical hematology and clinical coagulation methodologies.
Cone, Richard W. 1987; MD, 1983, University of Cincinnati; viral nucleic detection for diagnosis, viral tumor genesis.
Coombes, Robert W. * 1988; MD, 1981, Dalhousie University (Canada); diagnosis and pathogenesis of HIV infection.
Greath, David R. 1993; PhD, 1990, University of Iowa; research and diagnostics related to viral hepatitis.
Le Cron, Carol N. * 1967; MS, 1966, Colorado State University; hematology, hemoglobinopathies.
Saba, Daniel E. * 1989; PhD, 1989, University of Pennsylvania; regulation of gene expression in hematopoietic cells.
Szabo, La Verne 1970, (Emeritus); MS, 1970, University of Washington; general clinical chemistry, heavy metals in clinical chemistry.
Toivola, Perti T. 1988, PhD, 1972, University of Washington; clinical chemistry, immunohematology, trace metals in clinical chemistry.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

LAB M 321 Medical Technology: Introductory Clinical Hematology (6) Behrens, LeCrone Lecture-laboratory coverage of the theoretical and practical concepts associated with cellular morphology, instrumentation, quality control, and selected hematological diagnostic studies. Prerequisite: permission of instructor.

LAB M 322 Medical Technology: Introductory Clinical Chemistry (5) Raisys Lecture and laboratory covering the theoretical and practical concepts associated with testing procedures performed in clinical chemistry. Prerequisite: permission of instructor.

LAB M 418 Topics in Clinical Chemistry (5) Raisys, Toivola Lecture and laboratory exercises covering fundamentals of instrumentation, methodology, and quality control in the clinical chemistry laboratory. Prerequisite: 322, or permission of instructor.

LAB M 419 Clinical Coagulation (3.5) Behrens Lecture and laboratory covering the theory and pathophysiology of coagulation with inclusion of selected diagnostic procedures. Prerequisite: 321 or permission of instructor.

LAB M 420 Clinical Microscopy (3.5) LeCrone Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Prerequisite: permission of instructor.

LAB M 421 Medical Microbiology (1/6) McGonagle Lecture and laboratory coverage of human infections and diagnostic procedures used to identify, identify, and test the antibiotic susceptibility of the microorganisms associated with disease. Prerequisite: permission of instructor.

LAB M 423 Clinical Chemistry (max. 24) Toivola Lecture Clinical testing related to protein and amino acid determinations, pancreatic function and intestinal absorption, amino acids, enzymes, electrolytes, blood gases, and acid-base balance, lipids, toxicity, and endocrinology. Prerequisite: permission of instructor.

LAB M 424 Clinical Microbiology (max. 24) McGonagle Clinical study of techniques used in the diagnostic microbiology laboratory, including specific evaluation, culture, identification, and antibiotic susceptibility testing of clinically significant organisms, and quality-control procedures. Prerequisite: permission of instructor.

LAB M 425 Clinical Hematology (max. 24) Behrens Study of procedures used in the clinical hematology and hemostasis laboratories, including cell counting, cellular morphology, tests useful in the diagnosis of red, white, and platelet cell disorders and routine hemostasis. Prerequisite: permission of instructor.

LAB M 426 Clinical Immunohematology (7) LeCrone Clinical study of immunohematology of the red cells and hemagglutination techniques. Prerequisite: permission of instructor.

LAB M 427 Selected Studies in Laboratory Medicine (max. 24) LeCrone, Raisys Lecture, selected study in either one of the major disciplines of laboratory medicine, in all major disciplines of this field, or pursuance of a clinical research problem. Prerequisite: permission of instructor.
LAB M 499 Undergraduate Research (*) Specific project in clinical laboratory investigation. Credit/no credit only.

LAB M 501 Clinical Laboratory Diagnosis (3) Fine Interpretation of diagnostic laboratory testing. Appropriate testing strategies, principles, problems, and limitations. Lectures-discussions and illustrative case presentations and demonstrations. For third- and fourth-year medical students and graduate students. Recommended: HUBIO 560P.

LAB M 502 Laboratory Medicine Grand Rounds (1, max. 6) Deter Grand rounds are concerned with current topics in the field of laboratory medicine. Credit/no credit only.

LAB M 510 Clinical Chemistry Research Conference (1, max. 6) Raisys Ongoing research and development projects in clinical chemistry, as well as reports of advances in clinical chemistry. Open to graduate students in laboratory medicine and other medical sciences. Credit/no credit only. Prerequisite: permission of instructor.

LAB M 520 Seminar in Organization and Management in Laboratory Medicine (3) Core course for the Master of Science degree in laboratory medicine. Prerequisite: graduate student standing in laboratory medicine or permission of instructor. Offered: odd years.

LAB M 521 Advanced Laboratory Hematology (1, max. 6) Deter Lectures on laboratory diagnosis in clinical hematology. Emphasis on clinicopathological correlation. For laboratory medicine graduate students with special interest in diagnostic clinical hematology. Credit/no credit only. Prerequisites: graduate standing and permission of instructor.

LAB M 522 Hematopathology Seminar (2) Kidd Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical and immunomarkers, Clinicopathological correlation. Offered: jointly with PATH 522; even years; W.

LAB M 590R Research Projects in Laboratory Medicine (*) Schnier Opportunity for laboratory experience on a research problem related to laboratory medicine. Students investigate new areas of potential clinical importance. Highly variable selection of project topics, consultation, histology, immunology, microbiology, virology, and computer applications. Research goals established by instructor in discussion with each student. Prerequisite: permission of instructor.

LAB M 596 Laboratory Medicine Seminar (2) Raisys Conferences on research and development in clinical chemistry. For postdoctoral students in clinical chemistry and graduate students. Prerequisite: permission of instructor.

LAB M 601 Internship (3-6, max. 9) Credit/no credit only. Prerequisite: graduate standing in laboratory medicine.

LAB M 680P Clinical Laboratory Testing: Methods and Interpretation (*) Deter Provides the third- and fourth-year medical student with the opportunity to evaluate clinical laboratory data in the clinical laboratory setting. One-on-one teaching using case material and actual clinical samples.

LAB M 700 Master's Thesis (*) Credit/no credit only.

Medical Education

The objectives of the Department of Medical Education are to discover, disseminate, and apply knowledge of educational theory and practice in medical education. Research seeks to increase the basic fund of knowledge in educational theory and practice in medical education. Through teaching, the educational knowledge base is transmitted to the faculty, fellows, residents, and students. Through scholarly research, teaching, and service, educational expertise is used to enhance the quality of academic programs in medicine and the health sciences.

Faculty

Chairperson
Charles W. Dohner

Professors
Dohner, Charles W. * 1967; PhD, 1966, Ohio State University; program evaluation, administration, faculty development.
Gordon, Michael J. * 1973; PhD, 1973, Michigan State University.
Irby, David M. * 1972; PhD, 1977, University of Washington; the evaluation and improvement of clinical teaching in medicine.

Associate Professors
Carline, Jan D. 1980; PhD, 1979, University of Washington; clinical evaluation, program evaluation.
Scott, Craig S. 1979; PhD, 1973, University of Iowa; faculty course evaluation, medical education outcomes, health promotion.

Assistant Professor
Cole, William G. 1990; PhD, 1980, University of Washington; experimental psychology.

Lecturers
MacLaren, Carol F. 1989; PhD, 1985, University of Pennsylvania; experimental research.
Schaed, Douglas C. 1981; PhD, 1986, University of Washington; computer science, measurement, evaluation.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

MEDED 499 Undergraduate Research (*, max. 12) Scott Investigative research or readings in medical education; topics include clinical reasoning, curriculum development, evaluation, use of computers in medical education, and educational research in medical settings. Credit/no credit only. Prerequisite: permission of instructor.

MEDED 510 Topics in Medical Education Research (2-3) Selected research topics in medical education. Development of skills in critical analysis and production of original research. Optional: 1 additional credit for seminar focusing on application of issues in education practice. Credit/no credit only. Offered: A.

MEDED 520 Teaching Methods in Medical Education (2) Irby Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions; using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations. Offered: W.

MEDED 521 Evaluation of Learning in the Health Sciences (2) Scott Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essay, oral examinations, checklists, rating scales, simulations, and patient management problems. Recommended: 520. Offered: S.

MEDED 522 Research in Medical Education (2) Scott Basic overview of research methods and research design pertinent to educational research in medical education. Development and sequencing of research projects from conceptualization through literature review, proposal development, project implementation, data management, analysis, and write-up. Critical reading of related literature stressed. Offered: A.

MEDED 530 Medical Informatics (3) Cole Survey of the history and current status of computers as used to assist analysis, decision, and judgment in medical care and research. Topics include medical artificial intelligence, clinical data bases, computer aids for medical decision making, bibliographic searching and retrieval, and computers as mimics of the analog world (graphics, sounds).

MEDED 599 Independent Study or Research (*, max. 6) Credit/no credit only.

Medical History and Ethics

Nancy S. Jecker, Graduate Program Coordinator

The Department of Medical History and Ethics offers a program of study leading to the Master of Arts degree in either medical history or medical ethics. An interdisciplinary Ph.D. option in philosophy and medical ethics is offered through the Department of Philosophy in the College of Arts and Sciences.

An undergraduate degree is not offered. Students who desire an undergraduate curriculum emphasizing subject matter in medical history may choose the Program in History of Science, Technology and Medicine offered through the Department of History in the College of Arts and Sciences.

Special Requirements

Applicants for the Master of Arts program must meet requirements for admission to the Graduate School and present a background in either history or philosophy. Additional information concerning acceptable preparation may be obtained by contacting the Graduate Program Coordinator.

Aspirants to the Master of Arts degree are expected to possess proficiency in historical and/or philosophical methods and familiarity with the biomedical sciences. Departmental requirements include completion of a series of approved upper-division and graduate courses in supporting fields of study; demonstration of reading knowledge in one foreign language for medical history majors; satisfactory completion of a general examination (written and oral); and submission of an acceptable thesis with oral defense of the thesis. A minimum of three full-time quarters of residency is required, and it is expected that the entire program will be completed within four years. Current areas of specialization for master's program students include history of medicine; history of health, exercise and sports medicine; and medical ethics.

Admission to the interdisciplinary Ph.D. program option in philosophy and medical ethics is normally subsequent to completion of the Master of Arts degree in medical ethics or philosophy at the University of Washington.

Course Descriptions
See page 55 for explanation of course numbers, sym­
bols, and abbreviations.

MHE 201 Understanding American Medicine (2) I&S
Jonsen, Whorton Survey of the history, sociology and
ethics of modern American medicine. Through
analysis of its achievements and problems, the student
is prepared to make an informed, realistic choice of the
profession of medicine. Recommended for students
considering a premied curriculum.

MHE 401 Disease and Medicine in History (5) I&S
Whorton Examination of impact of epidemic disease on
European and American society from late Middle
Ages into twelfth century, the development of under­
standing of causes and mode of spread of infection,
and application of that understanding to prevention
and treatment of disease. Prerequisites: courses in
sciences and/or history.

MHE 402 Normative Ethical Theory (5) I&S Jecker
Development of moral thought from Hobbes through
Nietzsche, with particular emphasis on the ethical writ­
ings of David Hume, Immanuel Kant, and Jeremy
Bentham. Recommended: one course in ethics.

MHE 404 Metaphysical Theory (5) I&S Jecker
Study of major ethical writings in the twentieth century,
with principal emphasis on the Anglo-American tradition.
Recommended: one course in philosophy.

MHE 419 Science in Civilization: Antiquity to the
Scientific Revolution (5) I&S Benson From

preclassical antiquity to the end of the Middle Ages,
stressiing the growth of scientific ideas, the cultural
context in which they took shape, and their relationship
to other movements of thought in the history of civiliza­
tion. Prerequisite: graduate standing.

MHE 421 Science In Civilization: Science In Modern
Society (5) I&S Benson Growth of modern science from
the Renaissance to the nineteenth cen­
tury, emphasizing the scientific revolution of the seven­
teenth century. Development of methodology and the
emergence of new fields of interest and new modes of
thought. Prerequisite: graduate standing.

MHE 422 History of Evolution Theory (3) I&S
Benson Development of evolution theory from its early­
nineteenth-century roots through the work of Charles
Darwin. Impact of evolution theory on society and the
formulation of the theory in the twentieth century.

MHE 424 Modern Biology In Historical Perspec­
tive (5) I&S Benson Two diverse traditions of biology;
natural history, and physiology, in their nineteenth­
century development and, their subsequent merging
after Darwin's evolution theory. Emergence of specialty
areas in biology after the beginning of the twentieth
century. Prerequisite: upper-class standing or permis­
sion of instructor.

MHE 440 Philosophy of Medicine (5) I&S Jecker
Familiarizes students with central issues in the philo­
sophy of medicine. Focusses on the nature of medical
knowledge, the connection between theory and obser­
vation, the meaning of medical concepts, and the
relationship between theories and the world. Prerequi­
sites: some prior course work in philosophy, the history
of science, or the history of medicine. Offered: jointly
with PHIL 459.

MHE 474 Justice In Health Care (5) I&S Jecker
Examination of the ethical problem of allocating scarce
medical resources. Emphasis on fundamental prin­
ciples of justice that support alternative health policies.
Recommended: some previous background in phi­
osophy or medical ethics. Offered: jointly with PHIL
411.

MHE 481 The Pursuit of Health In American Soci­
ety (5) I&S Berryman, Whorton Examination of the
development of concern for personal health over the
past two centuries, and of the evolution of philosophies
and practices of health promotion, Emphasis on the
influence of both medicine and popular culture on
shaping of attitudes towards diet, exercise, dress, sex,
and other health behavior.

MHE 483 The Rise and Development of Sports
Medicine (3) I&S Berryman Evolution of medical thought
related to exercise for good health, training for
sport participation, and treatment of sport-related inju­
ries. Begins with ancient period, concludes with
present. Development of specialization in sports med­
cine, sport team physicians, preventive medicine, con­
cepts of fitness and wellness as related to exercise
prescription, and sports medicine clinics.

MHE 485 Concepts of the Body In Nineteenth-­
and Twentieth-Century America (3) I&S Berryman
Investigation of ideas relating to corporeal self in nine­
teenth- and twentieth-century America. Exploration of
physical ideas of maleness/femininity, how ideals re­
lated to surrounding culture, how different body activi­
ties developed to realize ideals. Athleticism, physiog­
omy, beauty contests, body building, body decorations, cosmetics, anthropology, artificial parts.

MHE 497 Medical History and Ethics Special Elec­
tives (*)

MHE 498 Undergraduate Thesis (*)

MHE 499 Undergraduate Research (*, max. 5)
Investigative work in history of the biomedical sciences.

MHE 500 Seminar in Research Methods (*, max. 5)
Emphasis is placed on bibliography and utilization of
bibliographic sources. Practice in techniques of orga­
nizing and writing history of medicine and ethics. Pre­
quisite: permission of instructor.

MHE 501 Alternative Approaches to Healing (1)
Whorton Philosophies and practices of the major
alternative approaches to healing. Historical charac­
terization of alternative medicine accompanied by
presentations by practitioners of chiropractic, natura­
pathic, homeopathic, and traditional Chinese medi­
cine. Recommended: enrollment in medical or other
health professional school.

MHE 503 The Historical Background of Modern
Medicine (1) Whorton Major elements of thought,
practice, and values that have directed the evolution
of medicine in Western civilization. Medical culture ex­
amined as both an expression and modifier of the culture
of its ambient society. Limited to: medical students and
others in health professional schools.

MHE 510 Topics In Medical History and Ethics (*,
max. 9) Detailed study of topics in medical history and
ethics through lectures, seminars, and discussion.
Open to majors and graduate students in medicine, the
arts and sciences, and others with appropriate back­
ground and interest. Prerequisite: permission of in­
tstructor.

MHE 511 Medical Ethics (2) Ethics course de­
signed especially for first- and second-year medical
students. Study of ethical problems arising in clinical
setting of medicine, introducing students to philo­
sophical analysis and argument in practical contexts.
Seminar-discussion format with readings from contempo­
ry authors.

MHE 512P The Human Face of Medicine (1)
McCormick Foundation of human values underlying
medical practice. Images of physician—motivations
for medicine; empathy versus detachment in doctor­
patient relationship; health for the health-profes­
sional clientele; and the doctor in the society of the
modern age. Prerequisite: consent of instructor.

MHE 513P Ethical Responsibilities of Medical
Practice (2) Provides intensive and practical guid­
an about management of principal ethical and legal
problems that arise in clinical practice: informed con­
sent, confidentiality, decisions regarding life-support,
advance directives and surrogate decision-makers,
duty to care for indigent and risky patients. Offered on
half days over two weeks.

MHE 520 Seminar In the History and Philosophy
of Medicine (5) Origins and philosophical foundations
of medical sciences. Critical analysis of processes of
evaluation and explanation in biomedical sciences.
Consideration of evolution and nature of modern bio­
medical investigation; concepts of life/death, health/
disease; philosophical dimensions of clinical medi­
cine. Open to majors, medical students, arts and sci­
cences graduate students, and others.

MHE 521 The Ethical Challenges of Modern Medi­
cine (3) McCormick Case-study approach to contem­
porary ethical issues in medicine, utilizing techniques
of ethical analysis and argument in examining actual
ethical problems arising in our pluralistic culture, where values are
often in conflict. Open to graduate and professional
students and others with appropriate background.

MHE 522 Ethical Problems Surrounding Death (3)
McCormick Issues arising in care and treatment of
dying patients and their families, including truthful dis­
closure of illness, advance directives, life-supports, and
cooperating with life-prolonging treatments; coping with
death and grief. Examination of patient and profes­
sional values related to care in terminal phase of ill­
ness. Open to graduate and professional students and
others with appropriate background.

MHE 523 Biomedical Ethics (3) McCormick Se­
lected topics in medical ethics emphasizing methods
of ethical reasoning about moral dilemmas and contri­
butions of philosophical theories and principles to
practical problems of medicine. Students provided
with opportunities to test their value assumptions and
analyze data. Open to graduate and professional
students and others with appropriate background.

MHE 525 Seminar in the History and Philosophy
of Biology (3) Taught to individual interests in certain
areas of the history and philosophy of biology. Open
to majors and graduate students in medicine, the arts
and sciences, and others with appropriate background
and interest.

MHE 530 Seminar in the History of American
Medicine (3) Selected topics in the development
of medicine and public health in the United States.
Open to majors and graduate students in medicine and
the arts and sciences and to others with appropriate back-
ground and interest.

MHE 535 Medical Ethics and Jurisprudence (3)
Jonsen Relationship between bioethics and law. Re-
view of basic concepts of both disciplines; their theo-
retical and practical connections. Analysis of principal
legal cases and statutes illustrating such issues as
informed consent to treatment, foregoing life support,
research with human subjects, confidentiality, alloca-
tion of health care resources. For graduate and profes-
sional students.

MHE 540 Seminar in the History of Health and
Physical Exercise (3) Selected topics in the develop-
ment of medical thought as it relates to exercise, sport,
and overall well-being. Open to majors and graduate
students in medicine, the arts and sciences, and others
with appropriate background and interest. Prerequi-
site: permission of instructor.

MHE 545 Seminar in Clinical Ethics (3) Jonsen
Review of various approaches to analyzing ethical
aspects of clinical decisions. Relationship between clini-
cal theories and practical problems. Analysis of
important current cases in medical ethics to demon-
strate a systematic method of clinical-ethical analysis.
Open only to graduate and professional students.

MHE 595- Clinical Ethics Practicum (4-) Students
spend one week on each of four clinical services at
University of Washington teaching hospitals. Under
direction of clinicians, observe patient care activities;
participate in case conferences, become familiar with
relevant medical and ethical literature. For majors only.

MHE 600 Independent Study or Research (*)

MHE 700 Master's Thesis (*)

Medicine

RSRS University of Washington Medical Center

Active programs in teaching, research, and patient
care are carried on at the University of Washington
Medical Center, Seattle Veterans Affairs Medical Cen-
ter, Harborview Medical Center, Pacific Medical Cen-
ter, the Puget Sound Blood Center, the Northwest
Kidney Center, and the Fred Hutchinson Cancer
Research Center. Major affiliations for clinical teaching
also exist with Providence Medical Center and Swed-
ish Hospital Medical Center. There are many additional
affiliations with community hospitals in Seattle, the
state of Washington, and the WAMI region. Medical
students, interns, medical residents, and postdoctoral
research fellows rotate through these various hospitals
and participate in the learning experiences offered at
each.

University of Michigan; keratin biochemistry.

David, David C. 1974; MD, 1966, Harvard University;
internal medicine.

Deeb, Samir S. * 1986, (Research); PhD, 1964,
University of Illinois; genetic factors predisposing to
hyperlipidemia and coronary artery disease.

University; health status measurement and evaluation of
common medical practices.

Dodge, Harold T. 1969, (Emeritus); MD, 1948, Harvard
University; cardiology.

Dorsa, Daniel M. * 1979, (Adjunct); PhD, 1977,
University of California (Davis); neuropharmacology,
nearochemistry.

Eisenberg, Mickey J. 1976; MD, 1971, Case Western
Reserve University; sudden cardiac arrest and acute
myocardial infarction.

Ellis, Leonard P. 1974, (Emeritus); MD, 1940, Harvard
University; metabolism and endocrinology.

Ensign, John W. * 1961; MDCM, 1956, McGill Uni-
versity (Canada); the role of GI hormones in fuel homeo-
thesis.

Farrell, Donald F. 1971; MD, 1965, George Washington
University; neurology.

Fever, Alexander 1986; MD, 1964, Stanford University;
oncology.

Flakow, Philip J. * 1965; MD, 1960, Tufts University;
medical genetics.

Filly, Melvin M. 1958, (Emeritus); MD, 1944, Harvard
University.

Finch, Minley A. 1949, (Emeritus); MD, 1941, Univer-
sity of Rochester; hematology.

Fujimoto, Wilfred Y. * 1969; MD, 1965, Johns Hopkins
University; metabolism, endocrinology, nutrition.

Furlong, Clement E. * 1977, (Research); PhD, 1968,
University of California (Davis); human biochemical
 genetics in biochemistry of membrane transport sys-
tems.

Gartner, Stanley M. * 1957, (Emeritus); PhD, 1952,
University of California (Berkeley); mammalian somatic
cell genetics with emphasis on the mechanism of x-
chromosome inactivation.

Gililand, Bruce C. * 1970; MD, 1960, Northwestern
University; rheumatology/immunology.

Glimson, John A. * 1960; MD, 1960, University of
Uppsala (Sweden); membrane structure and function.

Goodner, Charles J. * 1962, (Emeritus); MD, 1955,
University of Utah; metabolism and endocrinology.

Graham, Michael M. * 1980, (Adjunct); MD, 1976,
University of California (San Francisco); positron emis-
 sion tomography, nuclear medicine.

Greenberg, Philip D. * 1978; MD, 1971, State University
of New York (Downstate); molecular, cellular, viral, and
tumor immunology.

Greene, H. Leon 1979; MD, 1969, Johns Hopkins Un-
iversity; cardiology.

Haggitt, Rodger C. 1984, (Adjunct); MD, 1967, Univer-
sity of Tennessee; anatomic pathology.

Mills, Richard P. 1978, (Adjunct); MD, 1968, Yale University; glaucoma, neuro-ophthalmology.

Monsen, Elaine R. * 1969; (Adjunct); PhD, 1961, University of California (Berkeley); nutrition, dietetics.

Motulsky, Arno G. * 1953; MD, 1947, University of Illinois; medical genetics.

Neiman, Paul E. * 1971; MD, 1964, University of Washington; oncology.

Odland, George F. 1955, (Emeritus); MD, 1946, Harvard University; dermatology.

Olson, Maynard V. 1962; PhD, 1970, Stanford University; large-scale genome mapping and sequencing.

Ommen, Gilbert S. * 1981; MD, 1965, Harvard University; genetic predisposition to environmental and occupational hazards.

Pagon, Roberta A. 1979, (Adjunct); MD, 1972, Harvard University; ophthalmology, pediatrics.

Papayannopoulou, Thalia P. 1974; MD, 1961, University of Athens (Greece); hematology.

Paulson, C. Alvin 1959, (Emeritus); MD, 1952, University of Oregon; metabolism and endocrinology.

Pfaller, Roger M. * 1984; MD, 1979, Washington University; molecular immunology and the molecular biology of neoplasia.

Pitrove, James J. * 1982; MD, 1956, University of Minnesota; infectious diseases, antibiotic-resistant nosocomial infections.

Pope, Charles E. 1964, (Emeritus); MD, 1957, Case Western Reserve University; gastroenterology.

Porte, Daniel Jr. 1982; MD, 1957, University of Chicago; metabolism and endocrinology.

Ramsay, Paul G. 1980; MD, 1975, Harvard University; infectious diseases, internal medicine.

Ritchie, James L. 1974; MD, 1967, Case Western Reserve University; cardiology.

Rosen, Henry 1977; MD, 1972, University of Rochester; allergy and infectious diseases.

Rosenstock, Linda * 1980; MD, 1977, Johns Hopkins University; occupational/general internal medicine.

Roth, Gerald J. 1984; MD, 1967, Harvard University; hematology.

Rowell, Loring B. * 1962, (Adjunct); PhD, 1962, University of Minnesota; regulation of blood flow, exercise physiology.

Rubin, Cyrus E. 1954, (Emeritus); MD, 1945, Harvard University; gastroenterology.

Sarnat, Harvey B. 1992, (Adjunct); MD, 1966, University of Illinois; neuromuscular diseases, neurodevelopment.
Abkowitz, Janis L. 1983; MD, 1977, Harvard University; hematology.
Ahmad, Suhaill 1978; MBBS, 1968, University of Allahabad (India); nephrology.
Altkin, Moira L. 1985; MChB, 1978, University of Edinburgh (UK); respiratory disease.
Andress, Dennis 1984; MD, 1976, University of Oklahoma; nephrology.
Bardy, Gust H. 1983; MD, 1977, Northwestern University; cardiology.
Barnhart, Scott 1983; MD, 1979, George Washington University; occupational-related lung disease.
Beicher, Donald W. * 1976; MD, 1962, University of Pennsylvania; ambulatory medicine.
Benedetti, Jacqueline K. * 1980; (Adjunct); PhD, 1974, University of Washington; statistical methodology in infectious disease research, cancer clinical trials.
Bensinger, William I. 1979; MD, 1973, Northwestern University; oncology.
Bomsztyk, Karol 1983; MD, 1977, University of Rochester; nephrology.
Boudry, Virginia C. 1987; MD, 1980, University of California (San Francisco); hematology.
Buchner, David M. * 1982; (Adjunct); MD, 1977, University of Kansas; cellular and molecular biology.
Buchwald, Dedra S. 1987; MD, 1981, University of California (San Diego); internal medicine.
Burke, Wylie 1984; MD, 1978, University of Washington; internal medicine.
Cerqueira, Manuel 1983; (Adjunct); MD, 1976, New York University; cardiology.
Charan, Nirmal B. 1980; MBBS, 1968, Christian Medical College of Ludhiana (India); respiratory disease.
Childs, Marion T. * 1981; (Emeritus); PhD, 1950, University of California (Berkeley); nutrition.
Clark, Joan G. 1985; MD, 1974, Washington University; pulmonary and respiratory disease.
Crawford, Stephen W. 1984; MD, 1978, St Louis University; respiratory disease.
Culver, Bruce H. 1974; MD, 1969, University of Washington; respiratory diseases.
Cusack, Barry J. 1982; MD, 1980, University College of Dublin (Ireland); gerontology.
Davidson, Robert C. 1968; (Emeritus); MD, 1953, University of Washington; nephrology.
Dennis, Melvin B. * 1971; (Adjunct); DVM, 1961, Washington State University; comparative medicine, including animal models and experimental surgery.
Doney, Kristine 1976; MD, 1972, University of Michigan; hematology/oncology.
Dugowson, Carin E. 1979; MD, 1976, University of Illinois; rheumatology.
Farrow, James A. 1979; (Adjunct); MD, 1973, Baylor University; adolescent medicine.
Farwell, Jacqueline R. 1979; (Adjunct); MD, 1972, University of California (San Francisco); child neurology, especially epilepsy; neonatal neurology, brain tumors in children.
Fihn, Stephen * 1979; MD, 1977, St Louis University; internal medicine.
Fleet, Wendell P. 1972; MD, 1965, Creighton University; internal medicine.
Franklin, Gary M. * 1986; (Adjunct Research); MD, 1969, George Washington University; occupational injury, neurological epidemiology, public health nutrition.
Goldberg, Harold I. 1986; MD, 1977, Stanford University; internal medicine.
Griep, Robert J. 1967; MD, 1958, University of Texas (Galveston); internal medicine/radiology.
Hammond, William P. 1978; MD, 1972, Tufts University; hematology.
Hickstein, Dennis D. 1984; MD, 1978, University of Nebraska; hematology.
Hooton, Thomas M. 1982; MD, 1973, University of Texas (Dallas); internal medicine.
Johnson, Richard J. 1986; MD, 1979, University of Minnesota; nephrology.
Kaushansky, Kenneth 1986; MD, 1979, University of California (Los Angeles); hematology.
Kimbell, Ann Marie 1982; (Adjunct); MD, 1976, University of Washington; maternal and child health, HIV/AIDS, international health.
Kimmey, Michael 1982; MD, 1979, Washington University; gastroenterology/endoscopy.
Kudenchuk, Peter J. 1986; MD, 1979, University of Washington; cardiology.
Lehmann, Kathrin G. 1990; MD, 1979, University of California (San Diego); cardiology.
Levine, Douglas S. 1985; MD, 1979, University of Massachusetts; gastroenterology.
Lilly, Michael B. 1989; MD, 1975, Loma Linda University; oncology.
Lindner, Armando 1970; MD, 1964, University of Buenos Aires (Argentina); nephrology.
Linker, David T. 1993; MD, 1976, Stanford University; cardiology.
Lipkin, Edward W. * 1981; MD, 1978, Case Western Reserve University; mineral metabolism, nutrition support, non-human primate physiology.
Lipsky, Benjamin A. 1978; MD, 1973, Cornell University; internal medicine.
Martin, Gary V. 1986; MD, 1980, University of Arizona; cardiology.
Mathews, Meredith W. 1977; MD, 1972, University of Washington; internal medicine.
Matsumoto, Alvin M. 1982; MD, 1975, University of Cincinnati; internal medicine, emergency medicine.
Milstein, Jerrold M. 1980; (Adjunct); MD, 1964, University of Minnesota; pediatric neurology.
Nelson, Christopher P. 1983; MD, 1978, University of California (Los Angeles); gerontology and geriatric medicine.
Olderd, John E. * 1977; MD, 1971, University of Washington; dermatology.
Ott, Ralph Susan M. 1982; MD, 1974, University of Washington; cardiology.
Otto, Catherine M. 1984; MD, 1979, University of Washington; cardiology.
Pearlman, Robert A. * 1981; MD, 1975, Boston University; gerontology.
Pieplow, Michael W. 1991; MD, 1973, University of Minnesota; dermatology.
Press, Oliver W. * 1982; MD, 1979, University of Washington; treatment of hematologic malignancies with monoclonal antibody immunocojugates.
Pasty, Bruce M. * 1986; MD, 1981, Indiana University; cardiovascular disease, coronary heart disease, hypertension, and pharmacoepidemiology.
Ragh, Ganesh 1983; MD, 1974, University of Mysore (India); respiratory disease.
Ralph, David D. 1980; MD, 1972, Stanford University; respiratory diseases.
Raugi, Gregory J. 1980; MD, 1975, Duke University; dermatology.
Reid, Brian J. 1985; MD, 1980, University of Washington; gastroenterology.
Sayera, Merlin H. 1979; MChB, 1968, University of Witwatersrand (South Africa); hematology.
Schoene, Robert B. 1979; MD, 1972, Columbia University; respiratory diseases.
Schubach, William H. 1994; MD, 1974, Columbia University; cardiology.
Schwartz, Robert S. * 1982; MD, 1974, Ohio State University; internal medicine and geriatrics.
Shields, Anthony F. 1983; MD, 1979, Harvard University; oncology.
Sicovick, David S. * 1987; MD, 1976, University of Maryland; epidemiology.
Sparkman, Donal R. 1949, (Emeritus); MD, 1934, University of Pennsylvania.
Stadius, Michael L. 1993; MD, 1978, University of Oregon; cardiology.
Stewart, Patricia S. 1977; MD, 1969, University of West Virginia; oncology.
Surawicz, Christina M. 1978; MD, 1973, University of Kentucky; gastroenterology.
Swenson, Erik R. 1983; MD, 1979, University of California (San Diego); pulmonary medicine.
Tempel, Bruce L. * 1988; PhD, 1983, Princeton University; molecular neurobiology/neurogenetics, especially potassium channel gene structure and function.
Thompson, John A. 1985; MD, 1979, University of Alabama; oncology.
Van Voorhis, Wesley C. * 1966; MD, 1984, Cornell University; infectious diseases.
Wijshaus, Ellen M. * 1987; Research; PhD, 1981, University of Wisconsin; human quantitative and population genetics.
reference to assumptions and limitations. Data sets are analyzed with current computer programs. Prerequisites: completion of genetics or permission of instructor. Offered: jointly with BIOT 532.

MED 533P Clinical Endocrinology (2) Chait Emphasis on the most major and dependable symptoms, signs, laboratory tests, and therapy for clinical endocrinopathies. Patient illustrated. Limited to second-year medical students. Offered: W.

MED 536 Topics in Clinical Neurology (1) Bird, Longstreth, Swanson. Lectures are presented on common neurological syndromes, such as epilepsy, stroke, coma, drug overdose, dementia, pediatric neurology, neuro-ophthalmological emergencies, headaches, myelopathies, infectious diseases. Offered: S.

CONJ 550P Clinical Infectious Diseases (3) See Conjoint Courses. Offered: W.

CONJ 553P Nutrition for Physicians (2) See Conjoint Courses. Offered: A.

MED 599P Transfusion Medicine (3) Counts, Prieto, Sayers, Sticher Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell aeriology, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

MED 604P Clinical Preceptorship in Internal Medicine (6) Hart, (Student, Friday Harbor), Shima (Forks), Thorson (Longview) Working closely with primary-care physicians, the student is exposed to the private practice of internal medicine in a small community. Operating on a one-to-one basis with assigned student, the preceptor evaluates and manages inpatients and outpatients on a primary care basis, consultative, and emergency basis. Prerequisite: 665P. (Four weeks, full-time.) Offered: AWSPS.

MED 640P Dermatology Clinic (*, max. 5) Olerud Students attend dermatology clinic on Monday mornings and Thursday afternoons for twelve weeks. Two half-days per week. Prerequisite: 665P. Offered: AWSPS.

MED 641P Clinical Gastroenterology (8) Botoman (Virginia Mason Hospital) Combined inpatient-outpatient elective in clinical gastroenterology, which includes practical experience in GI endoscopy and liver biopsy. Directed tutorial work. Prerequisite: 665P. (Four weeks, full-time.) Offered: A.

MED 642P Clinical Oncology (8) Stewart (Fred Hutchinson Cancer Research Center) Students, functioning as primary physicians, are responsible for the workups and daily care of patients receiving marrow transplants, high-dose chemotherapy or immunotherapy on an intensive-care research ward. Emphasis is on the management and supportive care of patients with pancytopenia and immunosuppression, transplant biology, cancer chemotherapy, and infectious disease problems. Prerequisite: 665P. (Four weeks, full-time.) Offered: AWSPS.

MED 644P Management of Sexually Transmitted Diseases (2) Corey, Handsfield, Holmes, Stamm Instruction and clinical experience in diagnosis, treatment, and management of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of STDs. Prior to the elective, each student must review a packet of didactic materials. Prerequisites: 665P, SURG 665P and OB GY 665P. Offered: AWSPS.

MED 645P Clinical Geriatric Medicine (8) Matsuzaki Full-time spent caring for patients in a half-day outpatient clinic each week, work up and follow inpatients on the geriatric evaluation unit, actively participate in twice-weekly attending and multidisciplinary team rounds, attend weekly conferences of the Division of Gerontology. Prerequisite: 665P. (Limit: one student.) Offered: AWSPS.

MED 646P Clinical Electroencephalography (*, max. 12) Chattrain, Vosler, Wilkus For third- and fourth-year medical students who desire to acquire familiarity with the techniques, interpretive criteria, and clinical applications of electroencephalography, long-term EEG-video-audio monitoring, computer-averaged evoked potentials, and other clinical neurophysiological techniques. Prerequisites: completion of Human Biology series. Offered: AWSPS.

MED 650P Advanced Medical Genetics (*, max. 5) Stamaloyanopoulos Summer course intended for third-year students who would like to increase their background in specific areas of medical genetics. Involves seeing patients with the instructor, reviewing the literature, analyzing clinical information, and writing a report on a selected topic. Prerequisite: HUBIO 544P. Offered: S.

MED 656P Clinical Clerkship (*, max. 24) Pauw Third-year medical students assume increasing responsibilities in the inpatient-teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with less role for caregivers in supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSPS.

MED 666P Advanced Clinical Clerkship In Internal Medicine-WAMI (12) Pauw Advanced clinical clerkship in internal medicine in three small urban communities. Supervised, structured experience in dealing with situations commonly encountered by the practicing internist. Continuity of care and the relationship between care given in the ambulatory setting and in the hospital, as well as by other community health services, is emphasized. Prerequisite: 665P. (Six weeks, full time. Limit: six students.) Offered: AWSPS.

CONJ 677P Clinical Allergy and Immunology (*, max. 12) See Conjoint Courses. Offered: AWSPS.

MED 678P Clinical Gastroenterology (8) Saunders Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff at University and Veterans Administration hospitals, and at Pacific and Harborview medical centers, plus directed tutorial work. Prerequisite: 665P. (Four weeks, full-time.) Offered: AWSPS.

MED 680P Rheumatology (8) Mannik Full-time inpatient-outpatient clerkship in rheumatology. Clinical experience provided in diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospital-based ambulatory services at the University of Washington Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In addition to patient care, didactic and preceptorial sessions are the methods of instruction. Prerequisite: 665P. Offered: AWSPS.

MED 682P Clinical Cardiology and Electrocadiography (8) Greene (Harborview Medical Center), Eriksson (Boise Veterans Administration Medical Center), Doulick (University of Washington Medical Center), Clinical Electrophysiology (Veterans Administration Hospital) Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: 665P. (Four weeks.) Offered: AWSPS.

MED 683P Clinical Respiratory Disease and Critical Care Medicine (8) Pearson Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences and preceptorial sessions. Prerequisite: 665P. (Four weeks.) Offered: AWSPS.

MED 684P Clinical Hematology/Oncology (6) Ackowitz (University of Washington Medical Center), Harlan (Harborview Medical Center), Roth (Veterans Administration Hospital) Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. Prerequisite: 665P. (Four weeks.) Offered: AWSPS.

MED 685P Clinical Genetics (*, max. 24) Bird, Byers, Motulsky, Stamaloyanopoulos Full-time clinical clerkship in medical genetics. Provides extensive exposure to variety of genetic diseases and genetic counseling. Students work in three clinics (Monday, Tuesday, Thursday), response to in-house consultation requests, attend rounds at Children's Hospital and Medical Center and University of Washington Medical Center and seminars at University of Washington Medical Center (Wednesday, Friday). Prerequisite: 665P. Offered: AWSPS.

MED 686P Clinical Neurology (8) Swanson Inpatient and outpatient experience at University of Washington Medical Center, Veterans Administration Hospital, Pacific Medical Center, Harborview Medical Center, Veterans Administration Hospital, University of Washington Medical Center, Veterans Administration Hospital (Forks, Port Angeles), and at Harborview Medical Center, Veterans Administration Hospital, or Children's Hospital and Medical Center. Students attend clinical conferences and seminars with neurology staff and become familiar with diagnostic neurological procedures. Prerequisite: 665P. (Four weeks.) Offered: AWSPS.

MED 687P Ambulatory Medicine Elective (*, max. 12) Sjoberg (Harborview Medical Center), Pauw (University of Washington Medical Center) Students acquire knowledge and skill in dealing with ambulatory patients with problems commonly encountered in the office practice of internal medicine. Prerequisite: 665P. (Minimum: two quarters. Limit: five students at University of Washington Medical Center, four students at Harborview Medical Center.) Offered: AWSPS.

MED 688P Ward Medicine Subinternship (*, max. 24) Hammond (Providence), R. Jones (Madigan Hospital Medical Center), McMahon (Anchorage), Robert (Swedish Hospital Medical Center), Bremner (King County), Kay (Harborview Medical Center), and others (Veterans Administration Hospitals, University of Washington Medical Center). Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. (Four weeks.) Offered: AWSPS. (Continuation of previous clerkship experience as intern.) Offered: AWSPS.

MED 689P Clinical Infectious Diseases (8) Kirby (University of Washington Medical Center) Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. (Four weeks.) Offered: AWSPS. (Continuation of previous clerkship experience as intern.) Offered: AWSPS.

MED 691P Primary Care (12) Gardner, Pauw Six-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Medical Center, thereby acquiring a panel of patients in medicine, rheumatology, virology clinics, and spend one day a week at Harborview Medical Center in the acute illness clinic. Prerequisites: 665P and permission of instructor.
Microbiology

G315 Health Sciences

Microbiology is a natural science that deals with cellular and acellular forms of life including bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these entities and their effects on humans and the environment, and how they can be exploited to provide useful products.

Undergraduate Program

Bachelor of Science Degree

Admission Requirements: A minimum of 75 credits applicable to graduation, with an overall GPA of 2.25 in prerequisite chemistry and biology courses. Students should complete departmental requirements in biology and chemistry (inorganic and organic) before applying for admission.

Major Requirements: minimum 90 credits in the biological, physical, and mathematical sciences, to include: 10-15 credits in biology, botany, and/or zoology (Biol 201, 202, 203 preferred); 30-31 credits in microbiology courses (MICRO 102, 402, 410, 411, 412, 431, 441, 442, 443, 446, and 449 or 450); 3-13 credits in approved microbiology electives (MICRO 301, 302, 319, 331 cannot be used); 12 credits in inorganic chemistry (normally CHEM 140, 150, 160); 8-10 credits in organic chemistry (CHEM 223, 224; or 237, 238, 239; or 335, 336, 337); 12 credits in physics (PHYS 114, 115, 116; or 121/131, 122/132, 123/133); 5 credits in mathematics (MATH 112 or 124; or Q SCI 381; or STAT 311).

Minimum 2.25 cumulative GPA in required and elective microbiology courses used toward graduation requirement. Transfer students must complete at least 20 of the required and elective microbiology credits at the UW.

Graduate Program

The Department of Microbiology offers a graduate program leading to the Doctor of Philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

The choice of an adviser and research problem are matters of mutual consent between the student and a faculty member. The course work taken by a graduate student depends to a certain extent upon the student's background and chosen area of specialization, but, in general, courses are chosen from the fields of microbiology, immunology, biochemistry, genetics, and pathobiology. A master's degree program either with or without thesis is available on a very limited basis. An M.S. degree is not necessarily a prerequisite for the Ph.D. degree.

Applicants are evaluated by a committee that considers the student's grades, scores on the Graduate Record Examination, research experience, letters of recommendation, and any other data that might provide an indication of the student's capabilities for success in a career in science.

Students are normally admitted into the graduate program only in autumn quarter, and all application materials should be received by the department no later than the preceding December 31. Graduate Record Examination aptitude scores are required as part of the application, and the examination should be taken no later than October. Three letters of recommendation must also be sent directly to the department.

Students with a variety of academic backgrounds are accepted for graduate study in microbiology, but it is highly desirable that their undergraduate preparation include at least a year of general chemistry and a year of college physics, courses in organic chemistry and quantitative analysis, calculus, one year of biology, and courses in genetics, biochemistry and microbiology.

Students in the Ph.D. program are usually supported by funds from training grants, research grants, or teaching assistantships.

Correspondence and Information

Stephen Loy
Graduate Program Coordinator
Department of Microbiology, SC-42

Faculty

Chairperson
Eugene W. Nester

Professors
Champoux, James J. * 1972; PhD, 1970, Stanford University; DNA replication, tumor virology.
Clark, Edward A. * 1979; PhD, 1977, University of California (Los Angeles); lymphocyte surface molecules, lymphocyte activation and cell communication.
Coyne, Marie B. * 1973; PhD, 1965, Kansas State University; DNA probes and GCL for rapid identification of mycobacteria and corynebacteria.
Douglas, Howard C. 1941, (Emeritus); PhD, 1949, University of California (Berkeley).
Evans, Charles A. 1946, (Emeritus); PhD, 1942, University of Minnesota; microbial flora of human skin.
Floss, Heinz G. * 1987, (Adjunct); PhD, 1961, Technical University of Munich (Germany); bioorganic and natural products chemistry.
Gilliland, Bruce C. * 1970; Adjunct; MD, 1960, Northwestern University; rheumatology/immunology.
Gordon, Milton * 1959, (Adjunct); PhD, 1953, University of Illinois; molecular basis of plant tumors, control of gene expression in plants.
Greenberg, Philip D. * 1978; Adjunct; MD, 1971, State University of New York (Downstate); molecular, cellular, viral, and tumor immunology.
Gromann, Neal B. * 1950, (Emeritus); PhD, 1950, University of Chicago.
Hakomori, Sen-Itiroh * 1967; MD, 1951, Tohoku Imperial University (Japan); biochemistry and immunology of carbohydrate antigens on malignant and normal cells.
Holmes, King K. * 1967; Adjunct; MD, 1963, Cornell University; clinical epidemiology and pathogenesis of infectious diseases.
Kenny, George E. * 1961, (Adjunct); PhD, 1961, University of Minnesota; antigenic analysis of mycoplasmas, bacteria, and other organisms.
Klebanoff, Seymour * 1962, (Adjunct); PhD, 1970, Tufts University; retrovirology, molecular basis of cancer.
Mannik, Mart * 1966, (Adjunct); MD, 1959, Case Western Reserve University; virology.
Mullins, James 1994; PhD, 1978, University of Minnesota; cell biology and biochemistry.
Nester, Eugene W. * 1962; PhD, 1959, Case Western Reserve University; genetics and biochemistry of bacterial-plant cell interactions, tumorogenesis.
Plorde, James J. * 1982, (Adjunct); MD, 1959, University of Minnesota; infectious diseases, antibiotic-resistant nosocomial infections.
Schoenland, Fritz D. * 1967; MD, 1957, Freie University of Berlin (Germany); clinical microbiology, nosocomial infections, in vitro antibiotic action.
Sheriss, John C. * 1959, (Emeritus); MD, 1950, University of London (UK); medical microbiology, antibiotic action and resistance.
Smith, Arnold L. * 1978; Adjunct; MD, 1964, University of Missouri; infectious disease.
Staley, James T. * 1971; PhD, 1967, University of California (Davis); freshwater bacteriology, microbial ecology, general microbiology.
Stuart, Kenneth Daniel * 1985, (Adjunct); PhD, 1969, University of Iowa; molecular biology of parasites.
Weiser, Russell S. 1931, (Emeritus); PhD, 1934, Washington University; microbiology and immunology.

Associate Professors
Hu, Shiu-Lok 1988, (Research); PhD, 1978, University of Wisconsin; molecular virology, immunology and vaccine research.
Katze, Michael Gerald * 1987; PhD, 1980, Hannemann Medical College; regulation of viral gene expression at the translational level.
Lamont, Richard J. * 1988, (Adjunct); PhD, 1985, University of Aberdeen (UK); pathogenic mechanisms and taxonomy of oral bacteria.
Lar, Jimmige Cano * 1972; PhD, 1970, University of California (Riverside); microbial physiology and cryotol-
ogy, sporulation and gas vesicle synthesis and regulation.
Leigh, John A. * 1985; PhD, 1983, University of Illinois; bacteriological, physiology, biochemistry, genetics, bacterial-plant interactions.
Lory, Stephen * 1984; PhD, 1980, University of California (Los Angeles); biochemistry, genetics of microbial virulence factors.
Moseley, Stephen L. * 1985; PhD, 1981, University of Washington; molecular basis of pathogenesis in E. coli diarrhea.
Overbaugh, Julie Maureen * 1988; PhD, 1963, University of Colorado (Boulder); molecular mechanisms of retroviral pathogenesis/viral gene expression/AIDS.
Rubens, Craig E. * 1984, (Adjunct); MD, 1982, University of Washington; molecular pathogenesis of Group B streptococcal infections in newborn infants.
Vessella, Robert L. 1989, (Adjunct); PhD, 1974, University of Mississippi; tumor markers and immunology.
Wong, Timothy Chee-Hing * 1983; PhD, 1979, University of Texas (Dallas); viral gene expression in chronic infections and oncogenesis.
Asst Professors
Geballe, Adam 1886, (Affiliate); MD, 1978, Duke University; virology.
Hughes, Kelly T. * 1989; PhD, 1984, University of Utah; genetics, gene regulation, microbial physiology, and metabolism.
Tarr, Phillip I. 1983, (Adjunct); MD, 1980, Yale University; gastroenterology/infectious diseases.
Traxler, Beth A. * 1992; PhD, 1987, Carnegie-Mellon University; bacterial physiology, biochemistry, genetics, membrane protein biochemistry.
Lecturers
Anderson, Denise G. 1982; MS, 1985, University of Washington; microbiology laboratory teaching.
Barnes, Glover W. * 1969; PhD, 1961, State University of New York (Buffalo); tissue, organ immunity.
Bicknell, Mary 1975; MS, 1962, University of Washington; microbiology laboratory teaching.
Fulton, Janis R. 1983; MS, 1977, Montana State University; microbiology laboratory teaching.
Parkhurst, Dale J. 1959; BS, 1960, University of Washington; microbiology laboratory teaching.

Course Descriptions

Courses for Undergraduates
See page 55 for explanation of course numbers, symbols, and abbreviations.

MICRO 301 General Microbiology (3) NW Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: two quarters of chemistry; recommended: a course in biological science. Offered: AspS.

MICRO 302 General Microbiology Laboratory (2) NW Anderson, Bicknell, Fulton laboratory course primarily for students taking 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Prerequisite: concurrent or previous registration in 301 or permission of instructor. Offered: AspS.

MICRO 320 Media Preparation (2) NW Parkhurst Practical work in the preparation of culture media. Nutritional requirements of microorganisms and sterilization methods are considered. For students expecting to work with medical microbiology. Credit/no credit only. Prerequisites: 301 and 302, or equivalent, and permission of instructor. Offered: AspS.

MICRO 322 Applied Clinical Microbiology (5) NW Schoenknacht Practical experience in a clinical or public health laboratory, fifteen hours per week. For students majoring in medical microbiology. Three quarters advance sign-up in G315 Health Sciences required. Applicants are selected by interview. Prerequisites: 443 and permission of instructor. (Limit: three students.) Offered: AWsp.

MICRO 402 Fundamentals of General Microbiology Laboratory (3) NW Bicknell, Fulton Isolation of a broad range of nonpathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic and biochemical identification. Related exercises include genetics, quantitation, and growth kinetics. Prerequisite: 410, which may be taken concurrently, or permission of instructor. Offered: AspS.

MICRO 410 Fundamentals of General Microbiology I (3) NW Blanchard Survey of the microorganisms of the world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisites: BIOL 201, 202, 203, and two quarters of organic chemistry. Offered: A.

MICRO 411 Gene Action (5) NW Hughes, Mannon Molecular genetics and description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisites: CHEM 231 or CHEM 237. Offered: jointly with GENET 411; W.

MICRO 412 Fundamentals of General Microbiology III (3) NW Leigh Structure, biochemical properties, and genetics of the major groups of prokaryotes. Required for students majoring in microbiology, recommended for students majoring in biology. Prerequisite: 410 or permission of instructor. Offered: Sp.

MICRO 434 Prokaryotic Recombinant DNA Technology (5) NW Anderson Laboratory course emphasizing concepts and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include cloning, replication, transcription, translation, mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisites: 302 or 402 or permission of instructor. Offered: W.

MICRO 435 Microbial Ecology (3) NW Staley Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. Diverse microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisites: 412 or equivalent, or permission of instructor. Offered: 1984; Sp.

MICRO 440 Introductory Bacteriology for Medical Technologists (1) NW Limited introduction to basic microbiology, with focus on structure, metabolism, and genetics of medically important organisms. Prerequisite: medical technology student, or permission of instructor. Offered: A.

MICRO 441 Introduction to Immunology (4) NW Bevan: General properties of immune responses; cells and tissues of immune system, lymphocytes, T and B cells, specificity, effector mechanisms; immunity to microorganisms, immunodeficiency and AIDS, autoimmune diseases, transplantation. Prerequisites: BIOL 203, organic or general chemistry, and permission of instructor. Juniors or seniors standing or above; recommended: biochemistry, cell biology and/or genetics. Offered: jointly with IMMUN 441; A.

MICRO 444 Medical Mycology and Parasitology (4) NW Coyle, Fritsche Consideration of medically important fungi and parasites, with emphasis on their identification. Prerequisites: basic biology. Offered: W.

MICRO 445 Medical Virology (2) NW Thouless, Wong An introductory course emphasizing basic understanding of medical virology and viral pathogenesis. Prerequisites: basic biology or equivalent. Offered: W.

MICRO 500 Undergraduate Research (1-5) NW Lamar Specific problems in microbiology or immunology. Prerequisite: permission of advisor. Offered: AWsp.

MICRO 501 Physiology of Bacteria (3) NW Parkhurst Topics of current interest concerning the molecular biology and physiology of bacteria. Prerequisites: 410

Courses for Graduates Only

MICRO 563 Medical Bacteriology (3) NW Fritsche, Hillier, Schoenknacht Medical bacteriology for medical students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. Prerequisites: 441, 442 sequence taken concurrently or HUBIO 521P. Offered: AW.

MICRO 564 Medical Virology (2) NW Thouless, Wong An introductory course emphasizing basic understanding of medical virology and viral pathogenesis. Prerequisites: basic biology or equivalent. Offered: W.

MICRO 548 Microbiological Special Electives (*) NW Lamar Possible special problems in microbiology or immunology. Prerequisites: permission of advisor. Offered: AWsp.

MICRO 589 Undergraduate Laboratory Research (2) NW Lamar Introduction to library research and to the microbiological literature. Topics are assigned and supervised in consultation with the instructor. Credit/no credit only. Offered: A.

MICRO 599 Undergraduate Laboratory Research (*) NW Lamar Specific problems in microbiology or immunology. Prerequisites: permission of advisor; senior standing desirable. Credit/no credit only. Offered: AWsp.

MICRO 600 Introduction to Research (*) NW Lamar, Schoenknacht Introduction to research areas of the faculty and the techniques employed in their investigations. Credit/no credit only. Prerequisite: graduate standing in microbiology or permission of instructor. Offered: AWsp.

MICRO 601 Methods of Bacteriology (3) NW Parkhurst Topics of current interest concerning the molecular biology and physiology of bacteria. Prerequisites: 410

MICRO 610 Introduction to Rotenoid Bacteriology (3) NW Fritsche Introduction to the molecular biology and physiology of bacteria. Prerequisites: basic biology. Offered: W.

MICRO 615 Medical Virology (2) NW Thouless, Wong An introductory course emphasizing basic understanding of medical virology and viral pathogenesis. Prerequisites: basic biology or equivalent. Offered: W.

MICRO 620 Microbiological Special Electives (*) NW Lamar Special problems in microbiology or immunology. Prerequisite: permission of advisor. Offered: AWsp.
Microbial Degradation of Toxic Contaminants (3) Henwig, Stensel, Strand Detailed survey of current understanding of microbiology and degradative pathways of industrial organic compounds, pesticides, plastics, oils, and metals. Microbial requirements for bioremediation. Methods of scientific investigation of microbial transformations. Requires basic understanding of metabolism and organic chemistry. Prerequisite: biological science course. Offered: jointly with CEEAWFRM 518; Sp.

MICRO 520 Seminar (1) Credit/no credit only. Offered: AWSp.

MICRO 522 Current Research in Microbiology (1) Weekly student and faculty seminar presentations based on the current literature. Credit/no credit only. Prerequisite: graduate standing in microbiology. Offered: AWSp.

MICRO 525 Cell Surface Membrane in Cell Sociology and Immunology (2) Hakomori Structure and function of cell surface membranes in relation to various immunological and pathological phenomena, e.g., differentiation, organization, infection, cancer. Prerequisites: BIOC 440, 441, and 442, and permission of instructor. Offered: Sp.

MICRO 527 Genetic Approach to Complex Biological Processes (1) Hughes Current research as it applies to genetic approaches to complex biological processes in the area of microbiology.

MICRO 528 Salmonella Genetics (1) Hughes Review current literature in the area of gene regulation in Salmonella typhimurium and related studies in Escherichia coli. Prerequisite: graduate student standing; advanced undergraduates by permission of instructor. Offered: even years; A.

MICRO 532 Seminar in General Microbiology (1, max. 15) Leigh Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Credit/no credit only. Prerequisites: 402, 412 or equivalents; open to qualified undergraduates by permission of instructor. Offered: even years; A.

MICRO 536 Biology and Evolution of Prokaryotes (4) Leigh, Staley Selected eubacterial and archbacterial groups studied. Students enrich, isolate, and characterize their own cultures as part of the laboratory. Prerequisites: 402, 412 or equivalents; open to qualified undergraduates by permission of instructor. Offered: even years; A.

MICRO 540 Virology (3) Lecture-seminar course concerning host-viral interactions. Prerequisite: permission of instructor. Offered: alternate years; 1996; W.

MICRO 552 Pathogenic Microbiology (4) Katze, Lory Introduction to concepts and techniques of general microbiology, to major groups of infectious agents affecting the human body, and to mechanisms and models of pathogenesis. Prerequisites: BIOL 201, 202, 203, or equivalent and some basic immunology; for dental students, others by permission of instructor. Offered: Sp.

MICRO 553 Molecular Mechanisms of Bacterial Pathogenesis (3) Lory, Moseley Rubens Mechanisms of bacterial pathogenesis explored at the molecular, genetic, and cellular levels through selected models as presented in the current scientific literature. Prerequisite: 411 or equivalent. Offered: alternate years; 1995; A.

MICRO 554 Seminar in Molecular and Medical Microbiology (1, max. 15) Lory, Moseley Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

MICRO 555 Advanced Clinical Microbiology (2.5) Fritzsch, Schenk Much concentration on the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Credit/no credit only. Prerequisites: 443 and permission of instructor. Offered: AWSp.

MICRO 556 Clinical Microbiology Training and Research (*, max. 12) Training in clinical microbiology and applied research. Attendance at daily laboratory rounds in addition to bench-side training and research. For medical students and microbiology graduate students only. Credit/no credit only. Prerequisites: 443 and permission of instructor.

MICRO 560 Research and Journal Club In Retrovirology (1) Linial Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate or permission of instructor.

MICRO 562 Oncogene and Retrovirus Research Seminar (1) Linial, Overbaugh Weekly discussions of ongoing research related to retroviral replication, retroviral oncopathies and pathology. Prerequisite: graduate standing or permission of instructor.

MICRO 585 Research in Cell and Molecular Biology (1, max. 15) Champoux Weekly research seminar. Credit/no credit only. Prerequisite: permission of instructor. Offered: Sp.

MICRO 590 Topics in Virology (2) Current problems in microbiological or immunological research. Credit/no credit only. Prerequisite: permission of instructor.

MICRO 600 Independent Study or Research (*) Credit/no credit only.

MICRO 700 Master's Thesis (*) Credit/no credit only.

MICRO 800 Doctoral Dissertation (*) Credit/no credit only.

Molecular Biotechnology

The Department of Molecular Biotechnology encompasses a multidisciplinary program that is oriented toward the development of new tools for modern biology and medicine and their application to leading-edge problems in these areas. These tools include the development of new chemistries, instruments, and computer hardware or software for the analysis of DNA and proteins. The department brings together skills from applied mathematics, applied physics, biology, chemistry, computer science, and engineering. Particular areas of expertise include protein chemistry, nucleic acid chemistry, genomics, large-scale DNA mapping and sequencing, and informatics. Areas of particular interest include immune recognition and autoimmune disease, signal transduction, transcriptional control of early development, and human genetics. The department's proposal to offer a Ph.D. degree program is under review by the University. Until this program is established, graduate students interested in working with faculty in the Department of Molecular Biotechnology should apply to the Center for Bioengineering.

Profs:
Hood, Leroy E. * 1992; PhD, 1968, California Institute of Technology; molecular Immunology, large scale DNA mapping and sequencing, molecular evolution.
Olson, Maynard V. 1992; PhD, 1970, Stanford University; large-scale genome mapping and sequencing.
Trask, Barbara J. * 1992, (Research); PhD, 1985, University of Leiden (Netherlands); in situ hybridization, analytical cytogenetics, analysis of large-scale DNA polymorphisms.

Molec. Biol. and Immunol.:
van den Engh, Gerrit J. * 1992, (Research); PhD, 1976, University of Leiden (Netherlands); flow cytometry, quantitative cytogenetics, instrument design and development.

Associate Professors:
Aebi, Rudolf Hans 1993; PhD, 1983, University of Basel (Switzerland); development of technology for protein analysis, biochemistry of cell internal signaling pathways.
Green, Phil 1994; PhD, 1976, University of California (Berkeley); mathematical and computer methods for genome analysis.

Assistant Professors:
Bumgarner, Roger 1992, (Acting); PhD, 1988, University of Arizona; spectroscopy and instrumentation for biotechnology.
Delahunt, Claire 1992, (Acting); PhD, 1987, University of Virginia; DNA diagnostics and forensics.
Governor, Joan M. 1992; PhD, 1981, University of California (Los Angeles); Immune recognition and tolerance, autoimmune, T cell development and activation, antibody diversity.
Hunkapiller, Tim 1992, (Research); PhD, 1992, California Institute of Technology; biological computation.
Kaiser, Robert J. * 1992, (Research); PhD, 1984, California Institute of Technology; fluorescence labeling and detection of biopolymers; microscale DNA probe array technology.
Nickerson, Deborah A. * 1992; PhD, 1978, University of Tennessee; automating the identification and typing of human DNA variations, genetic mapping, DNA diagnostics.
Rowen, Lee 1992, (Acting); PhD, 1986, Vanderbilt University; molecular evolution, genomics, large scale mapping and sequencing technology, immunology.
Yates, John R. Ill * 1992; PhD, 1987, University of Virginia; biological and ion trap mass spectrometry, protein sequencing, oligonucleotide analysis.

Neurological Surgery

700 5th Avenue, Harborview Medical Center

The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department's medical student instruction includes participation in the human biology curriculum as well as in elective basic science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Medical Center, and Children's Hospital and Medical Center, including the Epilepsy Center at Harborview. The department also has several course offerings correlating research and clinical problems of the nervous system, including the neuroscience research seminar, and clinical and basic science correlates of the epilepsies.
Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Hall, at Veterans Affairs Medical Center, and at the Epilepsy Center at Harborview. Investigations are under way at these institutions in many areas of neurophysiology, in behavioral research, in light and electron microscopic examination of the anatomy of the nervous system, in cerebral vascular physiology and in hemo-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The seven-year program emphasizes preparation for a career in academic neurosurgery.

Faculty

Chairperson
H. Richard Winn

Professors

Alvord, Ellsworth C. * 1960; (Adjunct); MD, 1946, Cornell University; neuropathology, experimental allergic encephalomyelitis.

Chatrin, Gian E. 1959; (Emeritus); MD, 1951, University of Naples (Italy); electroencephalography and clinical neurophysiology.

Dikmen, Suresya S. * 1974; (Adjunct); PhD, 1973, University of Washington; neuropsychology.

Dodd, Carl B. 1973; PhD, 1970, Purdue University; human neurophysiology, epilepsy, EEG and performance, antiepileptic medications and performance.

Fraser, Robert T. * 1976; PhD, 1976, University of Wisconsin; psychology.

Gruss, Joseph S. 1991; (Adjunct); MBCHB, 1969, University of Witwatersrand (South Africa); plastic surgery.

Harris, A. Basil 1967; MD, 1954, University of Alabama; neurosurgery, neuroanatomy, microvascular, arteriovenous malformations, epilepsy mechanisms.

Jaffe, Kenneth M. * 1982; (Adjunct); MD, 1975, Harvard University; pediatric rehabilitation, brain injury, neuromuscular diseases, congenital defects, electromyography.

Kelly, William A. 1959; (Emeritus); MD, 1954, University of Cincinnati; neurosurgery, neuroendocrinology.

Lam, Arthur M. 1986; MD, 1974, Western Ontario University (Canada); neuroanesthesia.

Levy, René H. * 1970; PhD, 1970, University of California (San Francisco); pharmacokinetics.

Loeser, John D. 1968; MD, 1961, New York University; pain, neurophysiology.

Maravilla, Kenneth R. 1985; MD, 1970, State University of New York (Brooklyn); neuroradiology.

Mills, Richard P. 1978; (Adjunct); MD, 1968, Yale University; glaucoma, neuro-ophthalmology.

Ojemann, George A. 1966; MD, 1959, University of Iowa; neurophysiology, organization of higher functions in brain, language, memory.

Roberts, Theodore S. 1965; MD, 1955, University of Wisconsin; neurological surgery, stereotactic surgery, pituitary and cerebrovascular disease.

Rubel, Edwin W. * 1986; PhD, 1969, Michigan State University; developmental neurobiology, with special emphasis on vertebrate auditory system development.

Schwartzkroin, Philip A. * 1978; PhD, 1972, Stanford University; mechanisms of cortical excitability.

Shaw, Cheng-Mei * 1963; (Adjunct); MD, 1950, National Taiwan University; neurophysiology, immunopathology, neurotoxicology, congenital malformation.

Spence, Alexander M. 1974; (Adjunct); MD, 1965, University of Chicago; neurology.

Ward, Arthur A. 1948; (Emeritus); MD, 1942, Yale University; neurosurgery.

Associate Professors

Anderson, Gail 1981; (Adjunct); PhD, 1987, University of Washington.

Berger, Mitchel S. 1986; MD, 1979, University of Miami (Florida); neurooncology, pediatric neurosurgery.

Dalley, Robert W. 1987; MD, 1982, University of Utah; neuroradiology.

Domino, Karen B. 1986; (Adjunct); MD, 1978, University of Michigan; neuroanesthesia.

Esquivel, Joseph M. 1987; MD, 1981, University of Louisville; neuroradiology.

Farwell, Jacqueline R. 1979; MD, 1972, University of California (San Francisco); child neurology, especially epilepsy, neonatal neurology, brain tumors in children.

Goodkin, Robert 1987; MD, 1964, Chicago Medical School; neurological surgery.

Grady, M. Sean 1987; MD, 1981, Georgetown University; traumatic brain and spinal cord injury.

Newell, David W. 1982; MD, 1982, Case Western Reserve University; clinical neurosurgery and neurovascular mechanism of cerebral ischemia.

Ojiamo, Linda M. 1974; MD, 1960, University of Illinois; neurology, treatment of epilepsy.

Phillips, Mark H. 1991; PhD, 1982, University of Wisconsin; medical radiation physics.

Ternkin, Nancy R. * 1977; PhD, 1976, State University of New York (Buffalo); clinical trials, recovery models, statistical modeling of epileptic phenomena, survival analysis.

Tsuruda, Jay S. 1992; MD, 1981, University of California (San Diego); neuroendocrinology, research.

Wilenksy, Alan J. 1975; MD, 1967, Western Ontario University (Canada); neurology, treatment of epilepsy, testing and use of anticonvulsants.

Assistant Professors

Haynor, David R. 1979; (Adjunct); MD, 1979, Harvard University; neuroradiology.

Klott, Michel 1990; MD, 1984, Yale University; peripheral nerve injury and diseases, nerve injury/regeneration.

Malouf, Alfred Thomas 1986; PhD, 1983, Johns Hopkins University; neuroendocrinology.

Stelzer, Keith J. 1990; MD, 1989, University of California (Los Angeles); therapeutic radiology.

Instructors

Haglund, Michael M. 1994; (Acting); MD, 1987, University of Washington.

Rostomily, Robert C. 1994; (Acting); MD, 1987, Case Western Reserve University.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

NR 495 Community Rehabilitation of the Neurologically Impaired: Internship (*, max. 5) Fraser, Clemmons Supervised work with a neurologically disabled vocational rehabilitation population within a multidisciplinary vocational rehabilitation population within a multidisciplinary vocational rehabilitation unit. Weekly two-hour seminars on vocational rehabilitation issues. Weekly supervision. Prerequisite: three years experience in general or vocational rehabilitation within a private or public sector agency or equivalent. Offered: AWSPs.

NR 498 Undergraduate Thesis (*) Winn Prerequisite: permission of instructor. Offered: AWSPs.

NR 499 Undergraduate Research (*) Winn Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Offered: AWSPs.

NR 505P Preceptorship In Academic Neurosurgery (1) Winn Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Offered: AWSPs.

CONJ 555P Human Oncology for Fourth-Year Medical Students (2) See Conjoint Courses.

NR 680P Neurological Surgery Clerkship (*, max. 8) Grady, Mayberg Student serves clinical clerkship for selected postgraduate physicians. Special clerkship, externship, or selected projects available on request. Prerequisite: permission of instructor. Offered: AWSPs.

NR 681P Seizure Clinic Clerkship (2.5) A. Wilensky Initial evaluation and follow-up of patients with seizure disorders. Definition of medical and social problems and drug therapy are stressed. Alternate forms of therapy are considered. Linear follow-up of patients. Contact with inpatients. Specialized contact with specific neurologic problem and experience in prolonged follow-up and management planning for a chronic disease. Prerequisites: MED 665P and permission of instructor. Offered: AWSPs.

NR 697P Neurological Surgery Special Electives (1, max. 24) Winn By specific arrangement, for qualified students, special clerkship, externship, or research opportunities can be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSPs.

Obstetrics and Gynecology

BB607 Health Sciences

The Department of Obstetrics and Gynecology is involved with teaching, patient care, and research in the areas of normal and abnormal human reproduction; growth and development of the fetus, normal and com-
Assistants Professors

Battaglia, David 1980; PhD, 1985, University of Washington; gamete biology.
Krohn, Marjorie A. 1994; PhD, 1987, University of Washington; reproductive and perinatal epidemiology, vaginal flora and obstetric complications.
Shields, Laurene E. 1993; MD, 1987, University of Texas (San Antonio); perinatal medicine.

Instructor

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

OB GY 498 Undergraduate Thesis (*) Voronter by arrangement.
OB GY 499 Undergraduate Research (*) Voronter: permission of instructor.

OB GY 579P Obstetric and Gynecologic Investigation (*) Voronter: The investigation may cover any one of the following fields: toxemias of pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.

OB GY 665P Introduction to Obstetrics and Gynecology, UH-HMC (max. 12) Voronter: Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community health-care agencies for women. Rotation between UWMC and Harborview Medical Center. Prerequisite: HUBIO 656P. (Six weeks. Limit: six students.)

OB GY 681P Introduction to Obstetrics and Gynecology, Anchorage (max. 12) Voronter: Clerkship equivalent to 665P offered at Anchorage, Alaska (WAMI). Includes experience in several private physicians' offices as well as Providence Hospital and Elmendorf Air Force Base. Prerequisite: HUBIO 565P. (Six weeks. Limit: three students.)

OB GY 682P Antenatal High-Risk Obstetrics (max. 12) Voronter: The biochemistry of steroids, steroid metabolism as related to clinical problems. Diagnosis and treatment of endocrine disorders. Case studies with special emphasis on modern methods of investigation and assisted reproductive technology. (Limit: six students, at each four weeks.)

OB GY 684P Endocrinology of Reproduction (max. 12) Voronter: The biochemistry of steroids, steroid metabolism as related to clinical problems. Diagnosis and treatment of endocrine disorders. Case studies with special emphasis on modern methods of investigation and assisted reproductive technology. (Limit: six students, at each four weeks.)

OB GY 685P Obstetrics/Gynecology Preceptorship (max. 12) Voronter: Close working relationship with physician in private practice of obstetrics and gynecology, including: hospital rounds, surgery, deliveries, and office and business aspects of private practice as individually arranged. Forty hours minimum can be arranged to fit schedule not to exceed 8 credits. Prerequisites: 665P or equivalent and permission of instructor. (Limit: two students.)

OB GY 697P Obstetrics and Gynecology Special Electives (max. 24) Voronter: By arrangement, for qualified students, special clerkship or research opportunities can sometimes be made available at other institutions. Students wishing this course should obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of instructor.

OB GY 698P Introduction to Obstetrics and Gynecology, Away (max. 12) Voronter: Clerkship equivalent to 665P offered at sites outside the UW/WAMI system (currently includes Everett). By arrangement. A special assignment form must be obtained one month in advance of preregistration. Subject to Dean's Office approval. Department evaluates student performance. Prerequisites: HUBIO 565P; permission of instructor.
**Ophthalmology**

RR01 University of Washington Medical Center

The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and its adnexa as well as the visual system.

Medical student instruction is provided at all levels, including multiple electives in the clinical years. Graduate physicians are provided with three or four years of residency training at the affiliated hospitals. Post-residency fellowships are offered in the subspecialties of ophthalmology. Patient care is provided under the supervision of full- and part-time faculty physicians at University of Washington Medical Center, Harborview Medical Center, Pacific Medical Center, Veterans Affairs Medical Center, and Children's Hospital and Medical Center.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, and biochemistry of ocular tissues. Postdoctoral training is offered in all these disciplines.

**Faculty**

**Chairperson**
Robert E. Kalina

**Professors**
Clark, John I. * 1982; (Adjunct); PhD, 1974, University of Washington.
Hendrickson, Anita E. * 1969; PhD, 1964, University of Washington; neuroanatomy, morphology and development of primate visual system.
Kalina, Robert E. 1967; MD, 1960, University of Minnesota; vitreoretinal diseases.
Kinyoun, James L. 1978; MD, 1971, University of Nebraska; vitreoretinal diseases.
Mills, Ann H. 1974; PhD, 1967, University of Texas, Southwestern; electron microscopy, ophthalmic pathology, retinal pigmentosa, retinal cell biology.
Pagon, Roberta A. 1979; Adjunct; MD, 1972, Harvard University; ophthalmology, pediatrics.
Rodieck, Robert W. 1976; PhD, 1965, University of Sydney (Australia); neurophysiology and visual neurobiology.
Saari, John C. * 1974; PhD, 1970, University of Washington; retinal biochemistry.

**Associate Professors**
Chuang, Elaine L. 1993; MD, 1979, University of Texas (San Antonio); vitreoretinal diseases, ocular inflammation.
Lindquist, Thomas D. 1987; MD, 1981, University of Medicine & Dentistry of New Jersey; corneal and external disease.
Orcutt, James C. 1982; MD, 1977, University of Colorado (Denver); orbit, oculoplastics, neuro-ophthalmology.
Paśczewski, Krzysztof * 1992; PhD, 1986, Technical University of Wrocław (Poland); visual transduction.
Patton, Dorothy L. 1981; (Adjunct Research); PhD, 1981, University of Washington; infectious disease.
Weiss, Avery H. 1991; MD, 1974, Miami University (Ohio); pediatric ophthalmology, strabismus.

**Instructors**
Champer, Robert J. 1993, (Acting); PhD, 1987, Albert Einstein College of Medicine; vitreoretinal diseases.
Gariento, Ray F. 1992, (Acting); PhD, 1988, University of California (San Diego); vitreoretinal diseases.

**Course Descriptions**

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

**OPHTH 498 Undergraduate Thesis (*)**
Kinyoun (University of Washington Medical Center) Thesis-based research in vision and ophthalmology. Elective. Prerequisite: permission of instructor. (Limit: two students.)

**OPHTH 499 Undergraduate Research (*)**
Kinyoun (University of Washington Medical Center) Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Prerequisite: permission of instructor. (Limit: two students.)

**OPHTH 501P Ophthalmology Preceptorship (1)**
Kinyoun Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisites: first- and second-year medical student standing and permission of instructor.

**OPHTH 681P Ophthalmology Clerkship (4)**
Mills (Harborview Medical Center) Students gain experience in the diagnosis and treatment of common ophthalmic disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Students work with an eye pathologist in gross and microscopic examination of both normal and diseased eyes. Prerequisite: completion of human biology series. (Limit: one student.)

**OPHTH 682P Ophthalmology Clerkship (4)**
Kramer (Pacific Medical Center) Student works with a faculty member in the diagnosis and treatment of ocular diseases in both outpatient and inpatient populations. Experience in common ocular disorders is gained, and neurological and other consultations seen. Prerequisite: completion of human biology series. (Limit: one student.)

**OPHTH 683P Pediatric Ophthalmology Clerkship (4)**
Weiss (Children's Hospital and Medical Center) Student examines and observes treatment of children with ocular diseases and learns to differentiate disease from potentially blinding disorders. Programmed text in general ophthalmology furnished. Prerequisite: completion of human biology series. (Two weeks, full-time. Limit: one student.)

**OPHTH 685P Ophthalmology Clerkship (4)**
Orcutt (Veterans Administration Hospital) Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient examinations, inpatient surgery, and neuro-ophthalmic, retinal, and medical consultations. Basic techniques involved in tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. (Limit: one student.)

**OPHTH 686P Ophthalmology Clerkship (4)**
Gorman (Group Health Hospital) Diagnosis and treatment of ocular diseases in outpatients. Weekly assignment to Group Health ophthalmologist responsible for the care of walk-in and urgent patients, which may demonstrate findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. (Limit: one student.)

**OPHTH 687P Ophthalmology Clerkship (4)**
Kinyoun (University of Washington Medical Center) Inpatient and outpatient diagnosis and treatment of eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Student attends regularly scheduled conferences in ophthalmic basic and clinical science. Prerequisite: completion of human biology series. (Limit: one student.)

**OPHTH 688P Ophthalmology Clerkship (B)**
Kinyoun, Werner Four-week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisites: completion of human biology series, fourth-year medical student only.

**OPHTH 697P Ophthalmology Special Electives (*, max. 24)**
Kinyoun By specific arrangement, for qualified students, special clerkship, externship, or research opportunities can at times be made available at other institutions. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor.

**Orthopaedics**

BB1043 University of Washington Medical Center

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

**Faculty**

**Chairperson**
Frederick A. Matsen

**Preceptors**
Bigos, Stanley J. 1980; MD, 1975, University of Missouri; orthopaedics, spine.
Chernut, Charles * 1974, (Adjunct); MD, 1966, University of Florida; nuclear medicine.
Eyre, David R. * 1985; PhD, 1989, University of Leeds (UK); connective tissue biology, collagen chemistry, bone and cartilage metabolism.
Hansen, Sigvard T. 1968; MD, 1961, University of Washington; orthopaedics, foot, ankle and amputations.
Matsen, Frederick A. * 1973; MD, 1968, Baylor University; orthopaedics; bone and joint research; robotics.
Sandell, Linda J. * 1987; PhD, 1980, Northwestern University; biochemistry and molecular biology of connective tissue, extracellular matrix molecules.

Simkin, Peter A. 1969, (Adjunct); MD, 1961, University of Pennsylvania; rheumatology.

Smith, Nathan J. * 1965, (Emeritus); MD, 1945, University of Wisconsin; orthopaedics, pediatrics, sports medicine.

Staheli, Lynn T. 1968; MD, 1959, University of Utah; pediatric orthopaedics.

Szwintkowski, Marc F. 1988; MD, 1979, University of Southern California; orthopaedics, traumaology.

Associate Professors
Benirschke, Stephen K. 1985; MD, 1979, Case Western Reserve University; traumaontology.

Bruckner, James D. 1984; MD, 1984, Creighton University; orthopaedics, tumor and bone transplantation, limb salvage.

Clark, John M. Jr. 1982; MD, 1976, University of Chicago; orthopaedics, hip and knee arthritis.

Conrad, Ernest U. 1986; MD, 1979, University of Virginia; orthopaedics, tumors and bone transplantation.

Graney, Daniel O. * 1966, (Adjunct); PhD, 1965, University of California (San Francisco); gross anatomy, electron microscopy, intestinal absorption.

Greenlee, Theodore K. 1971; MD, 1959, Northwestern University; general orthopaedics.

Hanel, Douglas Paul 1992; MD, 1977, St Louis University; orthopaedics, hand/microvascular surgery.

Henley, Michael Bradford 1988; MD, 1979, University of Washington; orthopaedics, spine trauma and reconstruction.

Clerd, John E. 1977; MD, 1971, University of Washington; dermatology.

Ott, Ralph, Susan M. 1982, (Adjunct); MD, 1974, University of Washington; nephrology.

Richardson, Michael L. 1984, (Adjunct); MD, 1975, Baylor University; bone and joint radiology.

Sangeorzan, Bruce J. 1986; MD, 1981, Wayne State University; orthopaedics, foot, ankle and amputations.

Teltz, Carol Claire 1978; MD, 1974, Yale University; orthopaedics, arthroscopy, sports medicine and knee ligament reconstruction.

Tencer, Allan Fred * 1988; PhD, 1981, McGill University (Canada).

Trumblie, Thomas E. * 1989; MD, 1979, Yale University; orthopaedics, hand and microvascular surgery.

Assistant Professors
Chapman, Jens R. 1990; MD, 1983, Technical University of Munich (Germany); orthopaedics, spine trauma/reconstruction.

Gardner, Gregory C. 1989, (Adjunct); MD, 1984, Baylor University; rheumatology.

Harriman, Douglass D. 1986; MD, 1979, Virginia Commonwealth University; orthopaedics, shoulder and elbow.

Rout, Milton L. * 1988; MD, 1983, University of Texas (Galveston); orthopaedics, traumaology.

Smith, Douglas G. * 1988; MD, 1984, University of Chicago; orthopaedics, foot, ankle and amputations.

Vedder, Nicholas 1990; MD, 1981, Case Western Reserve University; case history, plastic and reconstructive surgery.

Lecturer

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

ORTH 435 Spinal Resource Clinic Elective (2) A four-week course examining musculoskeletal pathology of the spine. Introduction to physical and non-physical problems that can block patient's response to treatment. Prerequisite: permission of instructor.

ORTH 494 Athletic Health Care (*, max. 3) Marguard, Rice Prevention and management of athletic Injuries. Basic course for coaches, school nurses, medical students. Responsibilities/ability, preseass screening/prevention techniques, conditioning, equipment, nutrition, safety, preparedness, injury recognition, emergency procedures, common injuries, record keeping, communication, athletic health care organization. Laboratories, taping, stretching, athletic first aid, use of ice. Prerequisite: permission of instructor.

ORTH 495 Athletic Health Care Administration (3) Organizational management of athletic health-care aspects of operating organized athletic programs. For health professionals, school or community-based administrators/athletic directors/coaches, university-based health educators. Overview: generating awareness; needs assessment; educating coaches, student trainers; establishing goals; training; standardization of procedures; record keeping; evaluation. Prerequisite: 494 or permission of instructor.

ORTH 496 Advanced Athletic Health Care (3) Advanced sports medicine course on the prevention and management of athletic injuries. For coaches, school nurses, medical students. Problem-solving and hands-on approach emphasize wellness, condition- ing, skills of injury evaluation, steps to recovery through rehabilitation, taping techniques, emergency first aid procedures. Prerequisite: 494 or permission of instructor.

ORTH 498 Undergraduate Thesis (1) Eye Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Prerequisites: HUBIO 553P and permission of faculty mentor. (Twelve weeks.) Offered: AWPSP.

ORTH 499 Undergraduate Research (1) Eye Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Prerequisite: permission of faculty mentor. (Twelve weeks.) Offered: AWPSP.

ORTH 505P Preceptorship in Orthopaedic Surgery (1) Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice, as well as a longitudinal perspective. Prerequisite: permission of department. Offered: AWPSP.

ORTH 506P Sports Medicine (2) Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, some common sports injuries and complications, pulmonary, vascular, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Offered: W.

ORTH 675P Preceptorship in Orthopaedics (*, max. 4) Anderson Student spends full time with the preceptor during his or her workday in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. Prerequisites: SURG 665P or HUBIO 553P and permission of department. (Two weeks, full-time.) Offered: AWPSP.

ORTH 676P Pediatric Orthopaedics (*, max. 8) Staheli Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Children's Hospital and Medical Center. Prerequisite: preclinical years. Enrollment limited to four per course. (Ten weeks, full-time.) Offered: AWPSP.

ORTH 677P Musculoskeletal Trauma (*, max. 8) Anderson, Benirschke, Chapman, Hansen, Henley, Rout, Sangeorzan, Smith Harborview Medical Center. Emphasis on the care of acute trauma patients, including ward, operating room, and outpatient clinic patients. Instruction in general and special clinics, with emphasis on physical examination of the patient. Prerequisites: SURG 665P or HUBIO 553P. (Four weeks, full-time.) Offered: AWPSP.

ORTH 678P Musculoskeletal Oncology (8/12) Conrad In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Offered: AWPSP.

ORTH 680P General Orthopaedic Clerkship (*, max. 8) Greenlee Provides preclinical clerkship in orthopaedics for medical students to gain experience with clinical faculty members in the community. Prerequisites: completion of HUBIO 553P series; third- and fourth-year medical students. Offered: AWPSP.

ORTH 681P University of Washington Medical Center Orthopaedics (6) Bigos, Clark, Conrad, Harriman, Larson, Teltz, Turek Provides preclinical clerkship in orthopaedics for medical students to gain experience with clinical faculty members in the community. Prerequisites: completion of HUBIO 553P series; third- and fourth-year medical students. Offered: AWPSP.

ORTH 682P Outpatient Orthopaedics (8) Bigos Provides preclinical clerkship in orthopaedics for medical students to gain experience with clinical faculty members in the community. Prerequisites: completion of HUBIO 553P series; third- and fourth-year medical students. Offered: AWPSP.

ORTH 683P Spine Resource Clinic Elective (2) Bigos Provides preclinical clerkship in orthopaedics for med
ORTHOP 687P Orthopaedic External Elective (*, max. 12) Anderson Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisites: HUBIO 553P and permission of department. Offered: AWSpS.

Otolaryngology—Head and Neck Surgery

BB1165 University of Washington Medical Center

The Department of Otolaryngology—Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

Faculty

Chairperson
Ernest A. Weymuller, Jr.

Professors

Donaldson, James A. 1965, (Emeritus); MD, 1954, University of Minnesota; otology.
Duckert, Larry Gane 1978; MD, 1972, University of Minnesota; otology/neurotology.
Kuhl, Patricia K. * 1976, (Adjunct); PhD, 1973, University of Minnesota; speech perception.
Richardson, Mark A. 1980; MD, 1975, Medical University of South Carolina; pediatric otolaryngology/head and neck surgery.
Rubel, Edwin W. * 1986; PhD, 1969, Michigan State University; developmental neurobiology, with special emphasis on vertebrate auditory system development.
Snyder, Jack 1969, (Emeritus); PhD, 1971, University of Washington; audiology.
Spelman, Francis A. * 1961, (Adjunct); PhD, 1975, University of Washington; biophysics of implanted cochleas, bioinstrumentation for primate research.
Stanley, Robert B. 1993; MD, 1976, Duke University; otolaryngology/head and neck surgery, trauma, maxillofacial surgery.

Associate Professors

Coltrera, Marc Dante 1986; MD, 1981, Yale University; otolaryngology/head and neck surgery.
Glenn, Michael Gerard 1986; MD, 1981, University of California (San Francisco); otolaryngology/head and neck surgery, microvascular surgery.
Hild, Allen D. * 1983; MD, 1976, Stanford University; peripheral nerve physiology after injury, swallowing disorders in neuromuscular disease.
Inglis, Andrew F. Jr. 1997; MD, 1981, Medical College of Pennsylvania; pediatric otolaryngology/head and neck surgery.
Mayberg, Marc R. 1985, (Adjunct); MD, 1978, Mayo Medical School; cerebrovascular disease, vasospasms, ultrastructure of cerebral arteries.
Norton, Susan J. * 1991; PhD, 1982, University of Washington; normal and non-normal hearing, specifically cochlear mechanics, in humans and animals.
Orcutt, James C. 1982, (Adjunct); MD, 1977, University of Colorado (Denver); orbit, ocularplasticians, neuro-ophthalmology.
Rees, Thomas 1971; PhD, 1972, University of Washington; audiology.
Robinson, Lawrence R. * 1989, (Adjunct); MD, 1982, Baylor University; phystiatry.
Schubert, Mark M. * 1974, (Adjunct); DDS, 1974, University of Washington; oral medicine/oral oncology.
Werner, Lynnne A. * 1986, (Adjunct); PhD, 1980, Loyola University (Chicago); auditory development, infant psychoacoustics.

Assistant Professors

Pinczower, Eric F. 1991; MD, 1986, University of California (Irvine); otolaryngology/head and neck surgery, facial reconstructive surgery.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses numbered with a P suffix are not graduate courses and are restricted to medical student enrollment only.

OTOHN 498 Undergraduate Thesis (*) Rubel, Weymuller. Student works directly with department faculty in selecting a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Prerequisite: permission of instructor. Offered: AWSpS.

OTOHN 499 Undergraduate Research (*) Rubel, Weymuller. Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: AWSpS.

OTOHN 680P Introduction to Clinical Otolaryngology-Head and Neck Surgery (4/8, max. 24). Hillis, Mieklef, Richardson, Stanley, Weymuller. Introduction to surgical subspecialties of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have opportunity to go to operating room. Rotations at UWMC, VAH, HMC, CHMC, PMC/PRV. Prerequisite: human biology series. Recommended: MED 665 or SURG 665. Offered: AWSpS.

OTOHN 683P Otolaryngology-Head and Neck Surgery Electives (*, max. 8) (Madigan Army Medical Center) Individual externship training at outpatient clinic, where visits average twelve hundred per month, supplemented by inpatient assignments. Students may reside at the hospital during externship, using facilities of bachelor officer quarters and hospital mess. Prerequisite: completion of human biology series. (Two or four weeks, full-time.) Recommended: MED or SURG 665. Offered: AWSpS.

OTOHN 686P Otolaryngology-Head and Neck Surgery: Medical and Surgical Aspects (*, max. 12) Weymuller. Clinical in-depth study for the student whose interest lies in pathology of the head and neck. Reasonable flexibility to arrange course content that provides exposure to all areas of patient care. Prerequisite: permission of chairman. Recommended: MED or SURG 665. Offered: AWSpS.

OTOHN 687P Otolaryngology-Head and Neck Surgery Special Electives (*, max. 24) Weymuller. By specific arrangement. Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form not later than one month before preregistration. Prerequisite: permission of chairman. Offered: AWSpS.

Pathology

CS16 Health Sciences

Pathology is both a basic biological science and a specialty of medicine. As a basic science, it deals with the natural history and mechanisms of initiation and expression of disease processes. In its broadest sense, the study of disease encompasses the entire animal and plant kingdoms. The interests of the department focus on diseases of vertebrates, especially of man. The principal aim of the pathologist is to understand disease manifestations and processes in whatever terms are required. Therefore, the techniques of the pathologist range from those of the physicist and physical chemist through those of the physiologist to the realm of the epidemiologist. Present emphasis in the department is on cellular and molecular pathology, environmental pathology, and analysis of disease by methods of cell and molecular biology, recombinant DNA techniques, light and electron microscopy, histology and cytochemistry, analytical biochemistry, cell and organ culture, and immunology.

Graduate Program

Daniel Bowen-Pope, Graduate Program Coordinator

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in experimental pathology. The aim of the graduate program is to train individuals for a career in the scientific investigation of basic disease mechanisms. The program encompasses students and faculty members with diverse interests, which range from investigation of specific disease conditions to the molecular basis of alterations in cell function and of gene expression. Faculty members' interests include the normal and pathological aspects of cardiovascular biology, tumor biology, environmental effects on normal processes, biology of aging, neurobiology, immune response, inflammation and repair, immunopathology and biology of extracellular matrix, as well as fundamental processes that underlie disease, such as regulation of gene expression and protein synthesis, structure and function of oncogenes, viral and nonviral transformation, chromatin structure, mutagenesis and DNA repair, and genetic recombination. The department's graduate faculty comprises forty members, who are located at the Health Sciences Center, Veterans Affairs Medical Center, Children's Hospital and Medical Center, and Fred Hutchinson Cancer Research Center. More than thirty full-time students are pursuing the Ph.D. degree.

Students in the program are expected to fulfill course work requirements during the first two years. In line with the diversity of faculty members' interests within the...
department, course requirements are kept to a minimum to provide students with maximum flexibility.

Special Requirements
Prospective candidates are expected to have had undergraduate experience in biology, physics, chemistry, and mathematics and acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Those wishing to matriculate toward both the M.D. and Ph.D. degrees must gain admission to both the Graduate School and the School of Medicine.

Financial Aid
Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

Research Facilities
The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of diseases in mammalian species. Special facilities exist for training in electron microscopy, cell, tissue and organ culture, recombinant DNA techniques; histochecamy and cytchemistry; analytical biochemistry; immunology; and molecular and cell biology.

Correspondence and Information
Graduate Program Coordinator
department of Pathology, SM-30

Residency Training Program
The department supervises an internship and residency training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Persons who complete the residency program are eligible for certification by the American Board of Pathology. Lawrence D. True is the program director.

Correspondence and Information
Resident Program Director
department of Pathology, RC-72

Professors
Albers, John J. * 1971; (Adjunct Research); PhD, 1969, University of Illinois: lipoprotein metabolism and pathophysiology.
Alvord, Ellsworth C. * 1960; MD, 1946, Cornell University; neuropathology, experimental allergic encephalitis.
Benditt, Earl P. * 1967; (Emeritus); MD, 1941, Harvard University; atherosclerosis, diabetes mellitus, amyloidosis.
Benjamin, Denis R. * 1982; MSChB, 1968, University of Witwatersrand (South Africa); pediatric pathology, hematopathology nutrition, circadian rhythms.
Bowen-Pope, Daniel * 1982; PhD, 1979, University of California (Berkeley); gene regulation, growth factors and receptors.
Brawer, Michael K. 1989; (Adjunct); MD, 1980, University of California (Los Angeles); benign and malignant prostate proliferative disorders.
Byers, Peter H. * 1976; MD, 1969, Case Western Reserve University; extracellular matrix synthesis, genetic disorders of collagen metabolism, secretion.

Clowes, Alexander W. 1980, (Adjunct); MD, 1972, Harvard University; general and vascular surgery.
Cowan, Marie J. * 1977; (Adjunct); PhD, 1973, University of Michigan; immunology, sudden cardiac death, physiological nursing.
Disteche, Christine M. * 1980; PhD, 1976, University of Liege (Belgium); molecular genetics of sex chromosomes, X inactivation, human and mouse cytogenetics.
Eisen, Harvey * 1988; (Affiliate); PhD, 1967, University of Toronto (Canada); host-parasite interactions, generation of genetic diversity.
Fausto, Nelson 1994; MD, 1960, University of Sao Paulo (Brazil); liver regeneration, tumor biology, growth factors.
Galloway, Denise A. * 1982; (Research); PhD, 1976, City University of New York; viral pathogenesis and neoplasia.
Gown, Allen M. * 1979; MD, 1975, Albert Einstein College of Medicine; immunocytochemistry, cell differentiation markers in neoplasia, ovarian cancer, melanoma.
Gruenke, Mark * 1982; (Adjunct); MD, 1975, University of Pennsylvania; chromatin structure and gene activity in development and transformation.
Haggitt, Rodger C. 1984; MD, 1967, University of Tennessee; anatomic pathology.
Harlan, John M. 1978; (Adjunct); MD, 1973, University of Chicago; hematology, leukocyte-endothelial interaction.
Helleström, Inggerd * 1966; (Affiliate); DrMed, 1966, Karolinska Institutet (Sweden); tumor immunology.
Kivist, Nancy C. 1978; MD, 1975, University of Washington; pathology, epidemiology and interrelationships between HIV, HPV, other STDs and malignancy.
Landolt, Marsha L. * 1975; (Adjunct); PhD, 1976, George Washington University; fish and shellfish disease.
Leib, Lawrence A. * 1978; MD, 1971, New York University; DNA replication, cancer and AIDS.
Martin, George * 1957; MD, 1953, University of Washington; somatic cell genetics, pathology of aging, Alzheimer's disease.
McDougall, James K. * 1979, (Research); PhD, 1971, University of Birmingham (UK); cell cycle, genetic instability and neoplasia.
Mottet, N. Karle * 1959; MD, 1952, Yale University; effects of trace elements, especially molybdenum and arsenic, on growth and development.
Narayanan, A. Sempath * 1975; (Research); PhD, 1967, University of Madras (India); connective tissue, periodontal disease.
Nelam, Paul E. * 1971; (Adjunct); MD, 1964, University of Washington; oncology.
Norwood, Thomas H. * 1973; MD, 1968, University of Maryland; somatic cell genetics, pathology of aging, mitotic cell cycle regulation.
Page, Roy C. * 1967; DDS, 1957, University of Maryland; connective-tissue pathology, chronic inflammation, immunopathology, periodontal disease.
Rabinovitch, Peter S. * 1981; MD, 1979, University of Washington; signal transduction in cellular aging, neo-plastic progression, flow cytometry.
Raines, Elaine W. 1977; (Research); MS, 1975, University of California (San Francisco); growth regulatory molecules, vascular cell biology.
Reay, Donald T. 1975; MD, 1963, University of Utah; forensic medicine.
Reichenbach, Dennis D. * 1966; MD, 1958, University of Washington; cardiovascular pathology, myocardial cell injury.
Reidy, Michael A. * 1960; PhD, 1976, Cambridge University (UK); atherosclerosis, smooth muscle cell replication and migration, growth factors and receptors.
Ross, Russell * 1962; PhD, 1962, University of Washington; atherosclerosis, growth factors, inflammation, vascular biology.
Rubin, Cyrus E. 1964; (Emeritus); MD, 1945, Harvard University; gastroenterology.
Salem, George E. 1977; MD, 1968, Stanford University; immunopathology of bone marrow transplantation, graft-versus-host.
Sarnat, Harvey B. 1992; (Adjunct); MD, 1966, University of Illinois; neuromuscular diseases, neurodevelopment.
Schwartz, Stephen Mark * 1974; MD, 1967, Boston University; vascular biology, atherosclerosis, molecular basis of lineage, developmental biology, cell kinetics.
Shaw, Cheng-Mei * 1983; MD, 1950, National Taiwan University; neuropathology, immunopathology, neurotoxicology, congenital malformation.
Shulman, Howard M. 1982; MD, 1971, University of California (Los Angeles); graft-versus-host disease; venocclusive disease of the liver.
Spence, Alexander M. 1974; MD, 1965, University of Chicago; neurology.

Stamatoyannopoulos, George 1965; (Adjunct); MD, 1958, University of Athens (Greece); medical genetics.
Surii, Mark * 1968; MD, 1956, University of Toronto (Canada); neuropathology, neuromuscular disease, neurodegenerative diseases.
Todaro, George J. * 1983; (Adjunct); MD, 1963, New York University; growth regulation in normal and tumor cells.
Vracko, Rudolf * 1982; MD, 1950, University of Zagreb (Yugoslavia); endocrine pathology, role of basal lamina in tissue repair.
Wight, Thomas * 1978; PhD, 1972, University of New Hampshire; connective tissue biology and pathology, proteoglycans, metabolism.
Wolf, Norman S. * 1966; DVM, 1953, Kansas State University; hematopoietic stem cell dynamics and transplantation, aging at the cellular level.
Zakian, Virginia A. * 1962; (Affiliate); PhD, 1975, Yale University; initiation of DNA replication, eukaryotic chromosome structure.

Associate Professors
Alpers, Charles E. 1966; MD, 1978, University of Rochester; clinical and experimental glomerular disease; AIDS in man and experimental simian AIDS.
Chi, Emil Y. * 1972; (Research); PhD, 1973, University of California (San Francisco); lung structures and function; mast cell secretion and inflammation.
Eary, Janet F. 1980; (Adjunct); MD, 1980, Michigan State University; nuclear medicine.
Flegner, Corinne L. 1984; MD, 1978, University of New Mexico; autops and forensic pathology, fetal and perinatal pathology, forensic toxicology.
Hackett, Robert C. 1978; MD, 1971, Stanford University; infectious and pulmonary complications in immunocompromised patients.
Kidd, Pamela G. * 1978; (Adjunct); MD, 1971, Baylor University; immunologic and molecular diagnosis of leukemia and lymphoma, AIDS.

SCHOOL OF MEDICINE / PATHOLOGY 385
Swisshelm, Karen 1980; PhD, 1989, University of Washington; senescence, breast cancer, gene expression, DNA methylation, cytogenetics.

**Instructors**

Baratmez, Stephen H. 1988, (Acting); PhD, 1979, University of Glasgow (UK); hematopoietic stem cell biology.

Born, Donald E. 1987, (Acting); MD, 1987, University of Virginia; neutrophils in central nervous system development, brain trauma, epilepsy.

**Lectures**

Lee, Ming Jong 1972, MD, 1963, Gunma University (Japan); surgical pathology, anatomical pathology.

Seifert, Ronald A. 1981; PhD, 1983, University of Washington; growth factor/receptor structure and function.

### Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

**PATH 410 Introduction to Pathology (4)** Wolf Study of causes, processes, and effects of important diseases. Combines basic and systemic pathology. Required for students in medical technology, and physical therapy. Prerequisites for other students: MICHO 101 and equivalent courses in human anatomy, human physiology, and microscopy, and permission of instructor or adviser on individual or group basis.

**PATH 444 General Pathology (4)** Page Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, immunopathology, and repair. Correlates the gross, functional, and biochemical alterations. For second-year dental students and graduate students. Requires a reasonable grounding in biological and chemical sciences. Prerequisite for nondental and nonpharmacy students: permission of instructor.

**PATH 445 Systemic Pathology (3)** Survey of pathologic processes affecting organs and systems pertinent to the practice of dentistry. Lectures and demonstrations present a coherent picture of systemic disease. For first-year dental students, graduate students, and others with a reasonable background in biologic and chemical sciences. Prerequisites: 444 and permission of instructor for nondental students.

**PATH 498 Undergraduate Thesis (1-2)** Elective. Prerequisite: permission of instructor.

**PATH 499 Undergraduate Research (1)** Elective. Prerequisite: permission of instructor.

**PATH 500 Molecular Basis of Disease (5)** Wright Designed for first and second year graduate students to introduce the concepts of pathology and the modern approaches to the study of disease. Integrates general and experimental pathology with cellular and molecular biology.

**PATH 501 Cellular Response to Injury (3, max. 9)** Lecture-seminar. Considerations of current concepts of cellular and subcellular reactions to injury, including neoplasia, as studied by modern techniques of cell biology. Required of all pathology graduate students. Prerequisite: permission of instructor.

**PATH 502 Inflammation and Repair (2)** Lecture-seminar. A seminar course dealing with an in-depth examination of the processes involved in inflammation and repair. Credit/no credit only. Prerequisite: permission of instructor. Offered: even years.

**PATH 507 Cellular Pathology (2)** Emphasis on application of recent developments and techniques in biology to problems of pathology. Series of lectures by eminent visiting scientists with expertise in the area being discussed. Credit/no credit only. Prerequisite: permission of instructor.

**CONJ 508 EM Methods and Interpretation (3-5)** Holbrook, Wight See Conjunct Courses.

**PATH 510 Anatomical Analysis of Disease (3)** Study of recent developments in anatomic pathology. Prerequisites: admission to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: permission of instructor. Offered: odd years.

**PATH 520 Experimental Pathology Seminar (1)** Giachelli Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no credit only.

**CONJ 520 Anatomy and Autopsy (1/2)** See Conjunct Courses.

**PATH 522 Hematopathology Seminar (3)** Kidd Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical and immunological markers, and functional correlation. Offered: jointly with LAB M 522; even years.

**PATH 530 Human Cytogenetics (1)** See Comparative Medicine courses.

**C MED 514 Comparative Pathology Conference (1, max. 6)** See Comparative Medicine courses.

**PATH 530 Human Cytogenetics (1)** Disteche Sources and methods of preparation and identification of human chromosomes. Molecular structure and mapping of chromosomes. Human cytogenetic pathology: karyotype-phenotype interactions, and replication and repair. Credit/no credit only. Prerequisite: permission of instructor.

**PATH 535 Fundamentals of Human Disease (1)** Study of human disease through participation in the autopsy service under direct supervision of a faculty member. They analyze the histologic, cellular, and biochemical aspects of selected cases, and present their observations in weekly seminars. Prerequisites: 444 or 555 and permission of course director; graduate students only.

**PATH 551 Experimental and Molecular Pathology (2-5, max. 20)** Byers, Wight Introduction to experimental pathology. A tutorial course designed to introduce a graduate student (medical, dental, or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of the cellular and molecular levels in the study of disease is emphasized. Prerequisite: permission of instructor. Offered: even years.

**PATH 552 Contemporary Anatomic Pathology (2-5, max. 20)** Study of recent developments in anatomic pathology. Subject includes areas of basic science and review of systemic pathology. Recent developments and interpretation of these findings are stressed. For pathology residents, fellows, and trainees. Credit/no credit only. Prerequisite: permission of instructor.

**PATH 555 Environmental Pathology (3)** Monnat Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisites: 410 or
444 or HUBIO 520P. Recommended: ENVH/ENV 514 and 515. Offered: alternate years.

CONU 560, 561 Tumor Biology (3, 3) See Conjoint Courses.

PATH 560P Analysis of Human Disease (*, max. 10) Beginning with a human disease problem, the student individually develops a working hypothesis, discusses the problem with appropriate pathology faculty member, and jointly designs an experiment to test the hypothesis. A written report is required. Prerequisite: second-year medical student standing.

PATH 562P Cardiovascular Pathology Conference (*) Reichenbach Course consists of two parts: a laboratory review of gross and microscopic cardiovascular pathology of selected autopsy cases followed by a combined clinical (medical and/or surgical) and pathology conference discussing these cases. Prerequisites: HUBIO 540P and permission of instructor.

PATH 563 Neuropathology (*) Alvord, Shaw, Sumi Course consists of ten parts. Courses on gross neuropathology (brain cutting and clinicopathologic correlations) held at six hospitals. Weekly neurology or surgical neuropathology conferences, neuropathology slide show, and neuropathology laboratory case studies. Prerequisite: permission of instructor.

PATH 564 Neuropathology Brain Modeling (4) Alvord Designed along clinically important, functional, neuroanatomic lines, generally based first on the embryologic development of the most primitive segmental elements (sensory, motor, and association cells, and simple reflexes), followed by the more elaborate suprasegmental elements (cerebellum, colliculi, and forebrain).

PATH 571 Neuroanatomic Pathology (*) Alvord, Shaw, Sumi The particular diseases occurring in specific parts of the nervous system are considered in terms of the segmental, intersegmental, and suprasegmental components. Clinicopathologic correlations are emphasized. Prerequisite: permission of instructor; recommended as concurrent course: 563.

PATH 572 Neuropathologic Reactions (*) Alvord, Shaw, Sumi The reactions of the nervous system, considered in terms of congenital malformations, inflammations of vascular, traumatic, metabolic-toxic, degenerative, and neoplastic diseases peculiar to the nervous system as a whole. Clinicopathologic correlations are emphasized. Prerequisite: permission of instructor; recommended as concurrent course: 563.

PATH 576 Systemic Pathology II (3) Mottet Case examples of gastrointestinal, hematopoietic, lymphoreticular, musculoskeletal, urinary, skin systems, and forensic pathology discussed by students. Relevant laboratory interpretations. Student presentations. Prerequisites: HUBIO 520P or equivalent general pathology course, and permission of instructor.

PATH 584 Neuropathology Brain Modeling Laboratory (4) Alvord Clinically important, functional neuroanatomic study based on embryologic motor, sensory, and association cells and simple reflexes, followed by the more elaborate suprasegmental elements (cerebellum, colliculi, and forebrain). Three-dimensional neuroanatomic relationships, critical for understanding neuropathology, can best be obtained in constructing a brain model. Prerequisite: 564, which may be taken concurrently.

PATH 600 Independent Study or Research (*) Credit/no credit only.

PATH 665P Surgical Pathology (*) Study of fresh current gross surgical specimens and autopsy specimens and their correlation to a patient's clinical course through observation of pathologists working in a large hospital setting. Prerequisite: permission of instructor.

PATH 666P Renal Pathology Conference (1) Conference-seminar on the histopathologic aspects of renal disease. May be taken concurrently with MED 693P. For third- and fourth-year students. Prerequisite: permission of instructor.

PATH 667P Renal Pathology Laboratory (3, 6) Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-half session per week. May be taken concurrently with MED 693P. Prerequisite: permission of instructor.

PATH 668P Skin Pathology (*) Histopathological aspects of skin diseases are presented and discussed in a group-conference type of seminar. Current dermatologic cases are also discussed. Prerequisites: dermatology elective and permission of instructor.

PATH 673P Cardiovascular Pathology (*) Reichenbach Spectrum of cardiovascular pathology covered in depth by case studies and gross and microscopic material. Case analysis for presentation, including clinical and gross and microscopic material, prepared outside of class time. Clinicopathologic correlation is emphasized. Prerequisites: HUBIO 540P and permission of instructor and second-year medical student standing.

PATH 679P Pathology Summer Clerkship (*, max. 24) Discussion, writing, and literature review of autopsy and surgical pathology specimens by students. Emphasis on etiology and pathogenesis of disease as a biological process. Designed for students who have not completed organ systems as covered in Human Biology courses. Offered at University of Washington Medical Center, Harborview Medical Center, Veterans Administration Hospital, Madigan Army Medical Center, and Swedish Hospital. Prerequisites: HUBIO 520P and completion of first year of medical school.

PATH 680P Diagnostic Pathology University of Washington Medical Center (*, max. 24) Fignon, Bronne. Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year student standing.

PATH 681P Diagnostic Pathology Clerkship-Harborview Medical Center (*) Reay, Reichenbach For description and prerequisite, see 680P.

PATH 682P Diagnostic Pathology Clerkship-Veterans Administration Hospital (*) Wyack For description and prerequisite, see 693P.

PATH 683P Diagnostic Pathology Clerkship Medical Examiner's Office (*) Mullen For description and prerequisite, see 680P.

PATH 684P Diagnostic Pathology Clerkship-Laboratory Pathology of Seattle (*) LaZerte For description and prerequisite, see 680P.

PATH 685P Diagnostic Pathology Clerkship-Sacred Heart Hospital, Spokane (*) Haas For description and prerequisite, see 680P.

PATH 686P Diagnostic Pathology Clerkship-Otsego Medical Center (*) Coppin For description and prerequisite, see 680P.

PATH 687P Diagnostic Pathology Clerkship-Children's Hospital and Medical Center (*) For description and prerequisite, see 680P.

PATH 688P Diagnostic Pathology Clerkship-Madigan Army Medical Center (*) For description and prerequisite, see 680P.

PATH 689P Diagnostic Pathology Clerkship-Valley Medical Center (*) For description and prerequisite, see 680P.

PATH 690P Diagnostic Pathology Clerkship-Northwest Medical Center (*) For description and prerequisite, see 680P.

PATH 691P Diagnostic Pathology Clerkship-General Hospital of Everett (*) For description and prerequisite, see 680P.

PATH 692P Diagnostic Pathology Clerkship-Group Health Cooperative (*) For description and prerequisite, see 680P.

PATH 697P Pathology Special Electives (*) Offered: alternate years.

PATH 699P Pathology Special Electives (max. 24) By specific arrangement, students can have clerkships, externships, or research opportunities at institutions other than the University of Washington. Students who wish to elect this course should obtain Special Assignment forms from the Dean's office at least one month before advance registration. Prerequisite: permission of instructor.

PATH 700 Master's Thesis (*)

PATH 800 Doctoral Dissertation (*)

SCHOOL OF MEDICINE / PEDIATRICS 387

Pediatrics

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of man, in health and disease, from conception to maturity.

Institution is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer twenty-four electives, including the general pediatrics clerkship at multiple WAMI sites. A residency program is offered with a wide variety of electives in addition to traditional hospital inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals are Children's Hospital and Medical Center, University of Washington Medical Center, and Harborview Medical Center.

Faculty

Chairperson
Herbert T. Abelson

Professors
Awer, Ellis D. 1988; MD, 1975, University of Pennsylvania; pediatrics.
Benjamin, Denis R. 1982, (Adjunct); MBChB, 1968, University of Witwatersrand (South Africa); pediatric cardiology.
Bennett, Forrest C. 1977; MD, 1970, University of Minnesota; child development and handicapped children.
Bergman, Abraham 1964; MD, 1958, Case Western Reserve University; ambulatory pediatrics.
Chen, Shi-Han 1972, (Research); PhD, 1968, University of Texas (Austin); pediatric genetics.
Connell, Frederick A. 1978; (Adjunct); MD, 1972, New York University; maternal and child care, health services.
Coombs, John B. 1983; MD, 1972, Cornell University; rural health policy, nutrition and medicine.
Feurer, Laurie S. 1987; MD, 1979, University of Nebraska; nephrology.
Francis, Julie S. 1986; MD, 1984, University of Washington; dermatology.
Graham, Elinor A. 1986; (Acting); MD, 1970, University of Rochester; general pediatrics.
Grossman, David C. 1988; MD, 1982, University of California (Los Angeles); general pediatrics.
Hudgins, Louise 1993; MD, 1984, University of Kansas; pediatric genetics.
Kahn, Stuart J. 1985; MD, 1985, University of Washington; hematology/oncology.
Kahn, Louise 1993; MD, 1984, University of Minnesota; nephrology.
Lehman, Robert M. 1989; MD, 1978, Tufts University; adolescent medicine.
Marshall, Susan G. 1979; MD, 1980, University of California (Los Angeles); neonatal and respiratory diseases.
Martin, David 1990; MD, 1981, Virginia College of Medicine; hematology, oncology.
Matthews, Dana C. 1987, (Acting); MD, 1981, University of Washington; hematology/oncology.
McCloskey, John P. 1990, (Acting); MD, 1983, University of California (San Francisco); pediatric cardiology.
McDonald, Ruth A. 1993, (Acting); MD, 1987, University of Minnesota; nephrology.
Orellana, Stephanie A. 1992, (Research); PhD, 1992, University of Washington; pediatric nephrology.
Shugerman, Richard P. 1987; MD, 1984, University of Alabama; general pediatrics.
Strandjord, Thomas P. 1983; MD, 1983, Johns Hopkins University; neonatology and respiratory diseases.
Watts, Sandra L. 1981; MD, 1981, University of Texas (Houston); nephrology.
Wright, Jeffrey A. 1986; MD, 1978, University of Missouri; general pediatrics.

Instructors
Cunningham, Michael L. 1988, (Acting); MD, 1988, University of Vermont; congenital defects.
Graf, William D. 1991, (Acting); MD, 1983, Freie University of Berlin (Germany); congenital defects.
Melvin, Ann Jorns 1993, (Acting); MD, 1988, Tulane University; infectious diseases.

Lecturer
Rees, Jane 1973; MS, 1972, University of Washington; adolescent medicine, nutrition.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a S suffix are not graduate courses and are not restricted to medical student enrollment only.

PEDS 499 Undergraduate Research (*)
Robertson Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neurobiology, neuroembryology, dermatology, endocrinology, oncology, and metabolism, immunology, respiratory disease. Prerequisites: permission of instructor. Offered: AWSpS.

PEDS 500P Topics In Adolescent Medicine For Medical Professionals (1) Farrow Survey course on adolescent health-care topics, including psychological and sociological development, sexuality, gynecological problems, chronic illness and hospitalization, acne treatment, office approach. Prerequisites: 66SP, MED 66SP, and FSSC 66SP; postdoctoral medical trainees. Offered: AWSpS.

PEDS 505P Preceptorship In Pediatrics (*)
Robertson To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatrics by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Enrollment limited. Coordinator: Department of Pediatrics. Offered: AWSpS.

PEDS 512P Seminars In Human Embryology And Teratology (3) Lemire, Mirkes Presents in depth discussions of human embryonic-fetal development and malformations that arise, correlates with experimental studies and molecular embryology. Included. A laboratory experience is optional. Prerequisite: permission of instructor. Offered: AWSpS.

PEDS 533P Pioneer Square Adolescent Seminar (1)
Deisher Clinical-based setting for seminar and interview practice with Pioneer Square adolescents; students learn how to deal with special health problems and other related problems of street kids through interviews and observations. Credit/no credit only. Offered: W.

PEDS 551P Pediatric Electrocardiography (2) Guntheroth Brief review of the physiology and physics pertinent to clinical electrocardiography is followed by a presentation of terminology and methods in clinical use. Normal electrocardiograms are studied, followed by abnormal tracings, with emphasis on pediatric material, but including adult material such as myocardial infarction. Prerequisite: HUBIO 540P. Offered: W.

PEDS 611P Pioneer Square Night Clinic (*, max. 24) Deisher One night per week at free clinic in Pioneer Square accessible to young adult patients, generally poorly educated with low incomes and histories of inadequate health care. Seminars and interviews in conjunction with clinic focus on impact of nontraditional lifestyles and values on health status of individuals. (Limit: four students.) Offered: AWSpS.

PEDS 662P, 663P, 664P, 665P, 666P, 667P, 668P Pediatric General Clerkship (*, max. 24, *, max. 24, *, max. 24, *, max. 24, *, max. 24, *, max. 24, *, max. 24, *, max. 24, *) Robertson General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered; twelve-week clerkship is broader, permits more individual selection of site. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 66SP. (Six or twelve weeks, full-time. Limit: twenty-four per school.) Offered: AWSpS.

PEDS 665P Neonatal Pediatric Clerkship (*, max. 24) Hudson Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. Prerequisite: 66SP. (Limit: two students.) Offered: AWSpS.

PEDS 670P Pediatric Infectious Diseases (*, max. 24) A. Smith Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. Prerequisites: 66SP or permission; third- or fourth-year medical student standing. (Limit: one student.) Offered: AWSpS.

PEDS 673P Office Practice (*) (max. 12) Robertson Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. Prerequisite: 66SP. Offered: AWSpS.

PEDS 675P Pediatric Clerkship With The Mentally Handicapped (*) (max. 12) Ruvacasa (Rainier School, Singh (Fircrest School) Total care involve­ ment with mentally handicapped patients, incorporating general pediatric knowledge of mental retardation and neurology, plus other specialties related to mental deficiencies. Additional information may be obtained from Dr. W. O. Robertson, Children's Hospital and Medical Center. Prerequisite: 66SP. (Four or six weeks, full-time.) Offered: AWSpS.

CONJ 677P Clinical Allergy and Immunology (*, max. 12) See Conjoint Courses.

PEDS 679P Clinical Problems In Developmental Disabilities (*) (max. 12) Holm Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains medical history, clinical data, functional assessment, professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. Prerequisite: 66SP. (Limit: two students.) Offered: AWSpS.

PEDS 680P Pediatric Clinics (*) (max. 24) Robertson One to ten half-day sessions may be elected each week for twelve weeks in the following areas: general pediatrics, endocrinology, neurology, immunology, arthritis, cardiology, congenital defects and retardation, well-child, teratology, adolescent medicine, allergy, cystic fibrosis, hematology, premature, neonatology, and poison control. Enrollment limited. Coordinator: Department of Pediatrics. Prerequisite: 66SP.

PEDS 682P Congenital Defects-Clinical Experience (*) (max. 24) Clement Advanced course in pediatrics providing experience in the clinical diagnosis and management of structural and metabolic congenital defects. Prerequisite: permission of instructor. (Limit: one student.) Offered: AWSpS.

PEDS 683P Pediatric Nephrology (9) Avner Four-week elective clerkship at Children's Hospital and Medical Center. Students participate in nephrology ward rounds and transplant rounds, consult with renal fellows and attendings, and work up patients in renal clinics. Participation in seminars; special course in fluid balance. Prerequisites: third- or fourth-year medical student, 665, and MED 665 or equivalent. (Limit: two students.) Offered: AWSpS.

PEDS 684P Pediatric Pulmonary Medicine (8) Redding Respiratory disorders, diagnostic techniques and treatments unique to children in the inpatient, outpatient, and emergency care, and outpatient settings. Application of principles of pulmonary physiology to clinical problems. Students conduct consultations under the supervision of the attending and present a topic of choice. Inpatient rounds and clinic. Prerequisites: 66SP, fourth-year medical student standing. (Limit: one student.) Offered: AWSpS.

SCHOOL OF MEDICINE / PEDIATRICS 389
Pharmacology

E401 Health Sciences
Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program
The Department of Pharmacology offers programs leading to the Master of Science and Doctor of Philosophy degrees. The Master of Science degree is not required, although it may be elected by the student or requested by the department.

Master of Science and Doctor of Philosophy Degrees
Admission Requirement: A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, biology, medicine, physics, physiology, psychology, or zoology.

Graduation Requirements: Master of Science degree—completion of Graduate School requirements to include: PHCOL 511, 512, 513, and three additional 500-level pharmacology courses. Demonstration of competence in pharmacology and a related discipline, such as biochemistry or physiology, and a thesis. A foreign language is not required.

Graduation Requirements: Doctor of Philosophy degree—completion of Graduate School requirements to include: PHCOL 511, 512, 513, 519, and five additional 500-level pharmacology courses plus 9 credits of UCONJ 504, 505, 506, 3 non-seminar credits chosen from biochemistry, molecular biology, physiology, immunology, or cell biology for a total of 15 credits. All 15 credits must be at the approved 400 or 500 level. Students must pass a comprehensive General Examination covering general pharmacology and allied disciplines. A dissertation and Final Examination complete the program.

In the first year, students generally are expected to enroll in biochemistry, pharmacology, and physiology courses. For each of the academic quarters of the first year, a student may work with a different faculty member. The purpose of rotating among the faculty is to acquaint the student with various areas of pharmacology and research under investigation within the department. With this insight, the student should be better able to decide on a thesis or dissertation topic.

In the second year, while becoming more involved with research, the student continues attending courses in pharmacology and supporting disciplines. Immediately after spring quarter of the second year, the student will be given the written portion of the General Examination. Within three months after having taken the written portion, the student will be given the oral portion of the General Examination. The student's supervisory committee will then recommend that the student (1) continue to pursue the doctoral degree, (2) work for a master's degree, (3) undergo reexamination at a later date, or (4) terminate the program.

Continued work in the department for a Ph.D. or M.S. degree usually involves taking advanced biochemistry, pharmacology, and physiology courses and research.

Financial Aid
A limited number of teaching assistantships, research assistantships, and traineeships are available.

Correspondence and Information
Admissions Coordinator
Department of Pharmacology, SJ-30

Faculty
Chairperson
William A. Catterall

Professors
Aagaard, George N. * 1954, (Emeritus); MD, 1937, University of Minnesota; clinical pharmacology.

Beavo, Joseph A. * 1977; PhD, 1970, Vanderbilt University; roles and molecular mechanisms of cyclic nucleotide phosphodiesterase regulation of cGMP function.

Catterall, William A. * 1977; PhD, 1972, Johns Hopkins University; molecular biology of ion channels, molecular pharmacology and neuropharmacology of drugs affecting the autonomic and central nervous systems.

Dorsa, Daniel M. * 1979; PhD, 1977, University of California (Davis); neuropharmacology, neurochemistry.

Hol, Wilhelmus G. J. * 1922, (Adjunct); PhD, 1971, University of Groningen (Netherlands); protein crystallography, drug design, vaccine development, and protein engineering.

Horia, Akira * 1950, PhD, 1954, University of Washington; neuropsychopharmacology.

Juchau, Mont Rawlings * 1969; PhD, 1966, University of Iowa; developmental pharmacology, drug metabolism.

Krebs, Edgar G. * 1977, (Emeritus); MD, 1943, Washington University; intracellular signaling mechanisms involving protein phosphorylation.

McKnight, G. Stanley * 1979; PhD, 1976, Stanford University; phosphorylation; gene expression and neuroendocrine physiology in mice using genetic approaches.

Nathan, Neil M. * 1979; PhD, 1975, Brandeis University; molecular analysis of neural signal transduction by muscarinic neurokinine receptors.

Storm, Daniel R. * 1978; PhD, 1971, University of California (Berkeley); molecular basis of neuroplasticity, cAMP and Ca2+ signal transduction systems in the CNS.

Vestal, Robert E. * 1977, (Adjunct); MD, 1971, University of California (San Francisco); gerontology.

Vincenzi, Frank F. * 1967; PhD, 1965, University of Washington; ion transport and intracellular calcium, free radicals and disease, computers in education/research.

Watson, Eileen L. * 1972, (Adjunct); PhD, 1970, University of Utah; salivary gland pharmacology and regulation.

Associate Professors
Chavkin, Charles * 1984; PhD, 1982, Stanford University; cell and molecular mechanisms of psychoactive opiate drugs to understand normal and pathophysiology.

Halpern, Lawrence M. * 1965; PhD, 1961, Albert Einstein College of Medicine; neuropharmacology.

Moon, Randall T. * 1985; PhD, 1982, University of Washington; embryonic development; signal transduction.

Pelczewski, Krzysztof * 1992, (Adjunct); PhD, 1986, Technical University of Wrocław (Poland); visual transduction.

Temptel, Bruce L. * 1988; PhD, 1983, Princeton University; molecular neurobiology/neurogenetics, especially potassium channel gene structure and function.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

PHCOL 401 General Pharmacology I (3-4) Juchau. Storm Principles governing drug-receptor interactions, dose-effect relationships, drug absorption, distribution, metabolism, and excretion. Drug toxicity, tolerance, allergy, and drug-induced mutations and carcinogenesis. Drugs utilized as antimicrobial agents and cancer chemotherapeutic agents. Prerequisites: organic chemistry, introductory anatomy, physiology, and biochemistry. For pharmacy students and other undergraduates. Offered: A.

PHCOL 402 General Pharmacology II (3-4) Chavkin, Nathanson. General pharmacology of drugs affecting the autonomic and cardiovascular systems. For pharmacy students and other undergraduates. Prerequisite: 401 or permission of instructor. Offered: W.

PHCOL 403 General Pharmacology III (3-4) Beavo, McKnight. General pharmacology of drugs affecting the endocrine and cardiovascular systems. For pharmacy students and other undergraduates. Prerequisites: 401, 402, or permission of instructor. Offered: Sp.
PHCOL 434, 435 General Pharmacology (2,2) Halpen, Watson Lectures and demonstrations concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

PHCOL 485 Undergraduate Thesis (*) Prerequisite: permission of instructor. Offered: A.

PHCOL 489 Undergraduate Research (*) Participation in departmental research projects. Prerequisite: permission of instructor. Offered: A.

PHCOL 507 Pharmacology Seminar (1) Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Research progress reports, and reports on results of completed research. Registration limited to pharmacology students; lectures are open to the public. Offered: A.

PHCOL 511 General Pharmacology I (1-5) Juchau, Storn Consideration of principles governing drug-receptor interactions, dose-effect relationships, drug absorption, distribution, metabolism, and excretion. Introduction to drug toxicity, tolerance, allergy, and drug-induced mutagenesis and carcinogenesis. Drugs utilized as antimicrobial agents and cancer chemotherapeutic agents. Prerequisites: graduate standing, organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: A.

PHCOL 512 General Pharmacology II (1-5) Chavkin, Nathanson General pharmacology of drugs affecting the autonomic and central nervous systems. Emphasis on current research approaches to understanding the basic mechanisms of drug action. For graduate students. Prerequisite: 511 or permission of instructor. Offered: W.

PHCOL 513 General Pharmacology III (1-5) Beavo, McKnight General pharmacology of drugs affecting the endocrine and cardiovascular systems. Prerequisites: 511, 512, or permission of instructor. Offered: Sp.

PHCOL 514 Current Topics in Pharmacology (1) McKnight Current research related to the mechanisms of drug action presented in a seminar format. Presentations include recent back-ground material as well as detailed experimental results taken from current research articles. Open to medical and graduate students. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 515 General Pharmacology Laboratory (*, max. 6) Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

PHCOL 519 Introduction to Laboratory Research in Pharmacology (4) Krebs On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter they make formal presentations of their work. For first year graduate students in pharmacology. Offered: AWSp.

PHCOL 527 Drug Metabolism (3) Juchau, Nelson Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Open to medical and graduate students. Prerequisite: one year graduate, medical, or dental biochemistry, or permission of instructor. Offered: jointly with MEDCH 527; odd years; W.

PHCOL 528 Neuropsychopharmacology (2) Halpen, Horta Advanced review and discussion of recent literature on the biochemical and metabolic mechanisms underlying the central nervous system actions of psychoactive, anesthetic, sedative, and antiepileptic drugs. Prerequisites: 511, 512, 513, or permission of instructor. Offered: even years; A.

PHCOL 529 Membrane Pharmacology (2) Catterall, Nathanson, Tempel, Vincenzi Advanced consideration of the fundamental properties of biological membranes and the mechanisms of drug and hormone action on enzymes, drug and hormone receptors, and ion transport in the plasma membrane of cells. Prerequisites: 511, 512, 513, BIOG 440, 441, or 531 or permission of instructor. Offered: even years.

PHCOL 530 Pathways of Receptor Action (2) Beavo, Krebs, Storm Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Roles played by cyclic nucleotides and other second messengers. Adenylyl cyclase, phosphoinositide-mediated regulation, phosphodiesterases and protein kinases. Prerequisites: 511, 512, 513, or permission of instructor. Offered: odd years; A.

PHCOL 531 Control of Gene Expression (2) McKnight, Moon Advanced discussion of hormone-receptor interactions, structure of active genes, molecular events leading to altered gene expression, posttranscriptional and posttranslational mechanisms of regulating protein abundance and assembly into subcellular structures. Prerequisite: permission of instructor. Offered: odd years; Sp.

PHCOL 533 Molecular Toxicology (2) Omiecinski Advanced discussion of molecular mechanisms whereby chemical, physical, and biological agents produce their harmful effects on biological tissue. Prerequisites: 511, 512, 513; or ENVH 514, 515; or permission of instructor. Offered: jointly with ENVH 533; even years; W.

PHCOL 534 Regulation of Neurotransmission (2) Chavkin, Dorsa Advanced consideration of the effects of drugs on neurotransmission including current topics in receptor pharmacology, transmitter release and reuptake mechanisms, mechanisms of regulating protein abundance and assembly into subcellular structures. Prerequisites: 511, 512, or permission of instructor. Offered: even years; Sp.

PHCOL 550 An Overview of Faculty Research (1) Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Credit/no credit only. Prerequisite: first-year student standing in pharmacology. Offered: A.

PHCOL 600 Independent Study or Research (*) Pharmacology graduate students only. Offered: AWSp.

PHCOL 697P Pharmacology Special Electives (2) By specific arrangement, for qualified students, special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. The faculty can arrange opportunities. Students enrolling this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Offered: AWSp.

PHCOL 700 Master's Thesis (*) Pharmacology graduate students only. Offered: AWSp.

PHCOL 800 Doctoral Dissertation (*) Pharmacology graduate students only. Offered: AWSp.

**Physiology and Biophysics**

G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences—anatomy, molecular biology, immunology, biochemistry, pharmacology, and pathology—and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

**Graduate Program**

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a Ph.D. degree in physiology and biophysics may emphasize either molecular and cellular physiology, biophysics, neurobiology, cardiovascular-respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years. The first year is spent in acquiring a broad knowledge of physiology by means of a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent in pursuing the area in depth and completing an original research project.

The department participates in the interdepartmental neurobiology and molecular and cellular biology programs. For students wishing a program equally distributed between physiology and psychology, an interdisciplinary Ph.D. degree program in these subjects is administered by the Behavioral Neurosciences Group of the Graduate School (for Behavioral Neuroscience see the Interdisciplinary Graduate Degree Programs section of this catalog).

**Special Requirements**

Admission to the physiology program normally requires a baccalaureate degree in biology, molecular biology, genetics, biochemistry, physics, mathematics, psychology, engineering, or chemistry.

Graduate Record Examination scores are required as part of the application.

Students are normally admitted to the graduate program in the autumn quarter. Applications and all required materials must be submitted by February 1.

**Research Facilities**

The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, cardiovascular physiology, respiratory physiology, muscle biophysics, temperature regulation, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

Schwindt, Peter C. * 1974; PhD, 1972, University of Washington; properties of spinal and cortical neurons, mechanisms of repetitive firing, and convulsive activity.
Smith, Orville A. * 1958; PhD, 1953, Michigan State University; central regulation of cardiovascular function.
Stahl, William L. * 1967; PhD, 1963, University of Pittsburgh; neurochemistry of brain ATPase systems.
Steiner, Robert A. * 1977; PhD, 1975, University of Oregon; neuroendocrinology.
Stirling, Charles E. * 1968; PhD, 1966, State University of New York (Upstate); epithelial transport mechanisms.
Teller, David L. * 1965; PhD, 1965, University of California (Berkeley); vision, psychophysics, development of vision.
Towe, Arnold L. * 1953; PhD, 1953, University of Washington; cerebral cortical networks.
Van Citters, Robert L. * 1962; MD, 1953, University of Kansas; cardiovascular physiology.
Winn, H. Richard * 1963, (Adjunct); MD, 1958, University of Pennsylvania; physiology of cerebral blood flow regulation.
Winn, Robert K. 1984, (Research); PhD, 1974, University of Washington; pulmonary physiology, neutrophil migration using monoclonal antibody 603.

**Consortium 501, 502, 503: Molecular Basis of Cell Function (3, 3, 3)**
- Plasma membranes (501), including membranes, structure, ion channels, transmembrane signaling; nucleus (502), including chromatin structure, recombination, RNA processing and gene expression; and cytoplasm (503), including protein synthesis targeting, and secretion, organelles, extracellular matrix, higher-order cell functions. Prerequisites: introductory biochemistry or permission of instructors.

**P BIO 499 Undergraduate Research (*)** For medical students. Prerequisite: permission of instructor. Offered: AWSpS.

**P BIO 503 Physiological Instrumentation (4)** Feigt, Schnit: Introduction to linear systems and electronic circuits. Includes basic circuit theory; step and sinusoidal response of first- and second-order linear systems (RLC circuits, mechanical and hydraulic systems); bode plots; Fourier analysis; operational amplifier circuits. Associated laboratory exercises. Prerequisites: beginning calculus, permission of instructor. Offered: 1995; S.

**P BIO 505 Selected Topics in Cell Physiology (1)**
- Cell membranes, membrane proteins, ion channels, ion pumps. Bioelectricity, with emphasis on action potentials, intracellular signaling, and cardiac muscle. Signal transduction and intracellular signaling with emphasis on synaptic transmission, sensory receptors, and control of intracellular calcium. Cell motility with emphasis on muscle. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

**P BIO 566 Neurophysiology (3)**
- Properties of neurons, processing of synaptic inputs, analysis of sensory and motor systems, and higher functions of the vertebrate central nervous system. Offered: W.

**P BIO 507 Cardiovascular, Renal, Respiratory Physiology (3)**

**P BIO 508 Introduction to Laboratory Research in Physiology (2-3)** Students participate in the performance of ongoing projects in designated research laboratories. Emphasis on experimental design, methodology, and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AWSpS.

**P BIO 509 Neuroendocrinology (3)**
- Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including peptide gene expression, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms and neural oscillators. Prerequisites: BIOI 201, 202, 203, BIOC 440, 441, 442.

**P BIO 441 Functional Neuroanatomy (4)** See Conjoint Courses. Offered: W.

**P BIO 515 Neurophysiologic Proseminar (2)**
- Guided survey of the experimental neurobiology literature. Course conducted as seminar, with discussion of assigned papers. Prerequisite: permission of instructor. Offered: AWSpS.

**P BIO 516 Physiological Proseminar (7)**
- Guided survey of the experimental literature in cardiovascular and respiratory physiology. Course conducted as seminar, with discussion of assigned papers and topics. Prerequisite: permission of instructor.

**P BIO 518 Research Topics in Cardiovascular Physiology (1)** Feigt: Graduate students and faculty members present and discuss current literature and research. Prerequisite: permission of instructor.
P BIO 519 Membrane and Muscle Biophysics Seminar (1) Detailed discussion and study of current topics in cell membrane function and muscle contraction. Credit/no credit only. Prerequisite: permission of instructor.

P BIO 520 Physiology Seminar (*) Selected topics in physiology. Prerequisite: permission of instructor.

P BIO 521 Biophysics Seminar (*) Selected topics in biophysics. Prerequisite: permission of instructor.

P BIO 522 Selected Topics In Respiratory Physiology (1-3) Heldbrandt: Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Offered: A/W/S.

P BIO 523 Heat Transfer and Temperature Regulation (2-5) Brangemann: Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural integration and homeothermy. Prerequisite: permission of instructor.

P BIO 525, 526, 527 Readings In Advanced Physiology and Biophysics (**, **) Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A/W/S.

P BIO 539 Sensory Systems I (3) Reading and analysis of primary sources in sensory neurophysiology. Receptor mechanisms and the somatosensory system are covered. Prerequisites: 506 and CONU 511 or equivalent.

P BIO 541 Motor Systems I: Peripheral Mechanisms (3) Binder: Critical reading and discussion of research papers on the current physiology of the motor unit, afferent inputs and segmental interneurons that control motor units. Prerequisites: 506 and CONU 511 or equivalent and permission of instructor. Offered: 1996: W.

P BIO 542 Motor Systems II: Brainstem Mechanisms (3) Anderson, Fuchs: Critical discussion of research papers and resulting concepts regarding the roles of various brainstem systems in controlling somatic and ocular movements. Prerequisites: 506 and CONU 511 or equivalent and permission of instructor.

P BIO 543 Motor Systems III: Cerebral Cortex and Cerebellum (3) Fetz: Critical reading and discussion of classical and current papers on motor and premotor cortex, corticospinal system; cerebellar circuitry and function, and cerebrocerebellar relations. Prerequisites: 506 and CONU 511 or equivalent or permission of instructor. Offered: 1996: W.

P BIO 544 Properties of Neurons (3) Schwindt: Critical reading and discussion of papers on passive, active, and integrative properties of single vertebrate and mammalian neurons. Provides understanding of how a variety of cellular mechanisms contribute to neuronal discharge patterns. Prerequisites: 506, 515, and CONU 511 or equivalent or permission of instructor. Offered: even years: A.

P BIO 547 Readings In Cell Physiology (2/3, max. 15) Hille: Reading and discussion of research literature on excitable cells. Emphasis on membrane excitability, transport, contractility, growth factors, and extracellular matrix. Research paper may be written for additional credit. Prerequisites: 506 and CONU 511 or equivalent.

P BIO 549 Plasticity In the Vertebrate Nervous System (2) Schwartzkroin: Emphasis on mammalian CNS. Examples of anatomical, pharmacological plasticity chosen from literature. Structure changes during development and in adult (hippocampus, spinal cord, nerve-muscle) studied and as correlates of learning. Students responsible for leading class discussion of one topic. Credit/no credit only. Prerequisites: graduate-level courses in neurophysiology and neuroanatomy; understanding of basic neuronal mechanisms. Offered: even years; Sp.

P BIO 550 Cortical Potentials (4) Properties of continuous and evoked potentials and their interactions, including the biophysics of their cellular origin. Prerequisites: 516 and permission of instructor.

P BIO 559 Integrative Neurophysiology (3) Interpretation of neurophysiological phenomena from comparative, biophysical, and evolutionary standpoints. Prerequisite: permission of instructor.

P BIO 565 Muscle and Cell Motility ( ) Gordon: Selected topics in muscle contraction and cell motility. Reading of original papers. Presentations by students and faculty. Credit/no credit only. Prerequisite: permission of instructor.

P BIO 584 Neurological Study Unit (0.5) Faculty and student discussion of neurological topics illustrated with clinical cases or demonstrations including the following: neuroanatomy, neurochemistry, neurology, neuropsychiatry, neurosurgery, and psychiatry. Credit/no credit only. Prerequisite for medical students: HUBIO 532P.

P BIO 600 Independent Study or Research (*)

P BIO 700 Master's Thesis (*)

P BIO 800 Doctoral Dissertation (*)

**Psychiatry and Behavioral Sciences**

BB1664 Health Sciences

The department offers course work, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

### Undergraduate Program

**Contact:** Gary Tucker, Chairman, Undergraduate Education

**Ed Walker, Nicholas Ward, Pre-clinical Curriculum**

Rebecca Jones, Maryonda Scher, Clinical Clerkships

A variety of courses in the behavioral sciences and psychiatry are available to students during their undergraduate years. Included among these are psychosocial growth and development, including aging and adult development, preventive methods for mental health, cross-cultural mental health, clinical psychiatry, and behavioral medicine.

### Graduate Program

The medical school curriculum is divided into a core (basic) curriculum and an elective curriculum. Within the core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neurophysiology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

### Residency Training in Psychiatry

**Contact:** Johan Verhulst

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on various inpatient, outpatient, and consultation/liaison services are augmented by individual tutorials and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, and community psychiatry are available, as well as in substance abuse and various other specialty areas.

### Clinical Psychology Internship and Postdoctoral Training

**Contact:** Joseph Becker

A one-year internship in clinical psychology approved by the American Psychological Association is offered as an interdepartmental program. This internship is open to candidates for the doctorate in clinical psychology from graduate programs approved by the American Psychological Association. Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.

Gary J. Tucker

**Professors**

Becker, Joseph * 1965; PhD, 1958, Duke University; clinical personality psychopathology.

Bowden, Douglas M. 1969; MD, 1965, Stanford University; clinical psychology, cross-cultural psychopathology.

Carr, John E. * 1963; PhD, 1963, Syracuse University; clinical psychology, cross-cultural psychopathology.

Chapman, C. Richard * 1971; PhD, 1969, University of Denver; human pain measurement, psychophysics, sensation and perception, chronic pain.

Dilenen, Eurywa S. * 1974, Adjunct), PhD, 1973, University of Washington; neuropsychology.

Dodrill, Carl B. 1973; PhD, 1970, Purdue University; human neuropsychology, epilepsy, EEG and performance, antiepileptic medications and performance.

Doolen, Hans O. * 1967; PhD, 1965, Florida State University; psychophysiology of central and autonomic nervous systems, neuropsychology.

Beydoun, Marshall A. 1979; PhD, 1975, University of Michigan.

Biggerstaff, John 1984; PhD, 1980, University of Washington.

Blumberg, David 1986; MD, 1980, University of Washington.

Blumstein, Daniel 1983; MD, 1975, University of Washington.

Bonanno, Gary A. 1990; PhD, 1986, University of Washington.

Bracken, Robert B. 1975; MD, 1968, University of Washington.

Brandt-Zawadzki, Marlene 1986; MD, 1979, University of Washington.

Breault, Robert C. 1979; MD, 1972, University of Washington.

Breisch, Andrew 1984; MD, 1977, University of Washington.

Brereton, Peter 1983; MD, 1976, University of Washington.

Brent, Paul R. 1979; MD, 1972, University of Washington.

Brown, Roger 1982; MD, 1975, University of Washington.

Brock, Philip J. 1984; MD, 1977, University of Washington.

COURSE DESCRIPTIONS

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

PBSCI 451 Principles of Personality Development (2) Doerr Development of the personality from infancy through advanced age traced to its physiologic, experiential, and cultural sources with emphasis on psychodynamic concepts and behavior.

CONJ 475 Alcoholism: A Course for Medical Students in the Allied Health Sciences (2) See Conjoint Courses.

PBSCI 498 Undergraduate Thesis (*) Opportunity to complete work on psychiatric research projects or to pursue a specific psychiatric topic in depth, for instance, through library research. Prerequisite: permission of responsible faculty member. (Four or six weeks, full-time, or equivalent part-time.) Entry Code required.

PBSCI 499 Undergraduate Research (*) Opportunity available for participation in a wide variety of ongoing research in the behavioral sciences and clinical psychiatry, or for the development of an individual investigative project under the supervision of a faculty sponsor. Prerequisite: permission of faculty sponsor. (Two, four, six, or twelve weeks.) Entry Code required.

PBSCI 525P Forensic Issues in Mental Health (3) Goldberg Concentration on major issues in psychiatry and law. Outside speakers from legal, judicial, and psychiatric communities. Lectures on assessment in forensic settings, competence to stand trial, and criminal responsibility. Discussions on personality disorders and correctional environments. For residents and medical, psychiatry, psychosocial nursing, graduate psychology, social work, and law students.

PBSCI 530P Developmental Psychoanalytic Psychotherapy (2) Schimmelbusch Continuation of study of mental functioning from a developmental point of view. How failures of psychological development led to various psychopathological states and how psychoanalytic treatment reinstates normal development. Prerequisite: 535.

PBSCI 555 Modern Concepts of Psychoanalysis (2) Schimmelbusch Childhood developmental stages studied in light of infant and environmental determinates. Correlating developmental phases with all aspects of adult personality functioning. A hierarchy of different models of the mind used to explicate personality functioning on a clinical case discussion level. Prerequisite: medical or graduate student standing or permission of Instructor.

PBSCI 548P Aging and Adult Development (3) Aging in Western technologically advanced societies frequently involves losses (e.g., dwelling, family, and economic and social supports). Consideration given to losses among the aged. Students select projects in the area of aging and work at their own levels of expertise and sophistication. Seminar format with guided reading.

PBSCI 575P Community Psychiatry Seminar (2) Trupin Preparation for mental-health work in community agencies: cultural, social, and economic factors in mental illness and provision of services; history of community mental health; direct and indirect intervention; consultation and supervision; agency organization and leadership; psychiatric epidemiology; prevention; forensic psychiatry. Lectures, readings, case discussions.

PBSCI 591P Seminars and Conferences in Psychiatry: Seminar in Clinical Neuropsychology (*) Introduction to neuropsychological studies of brain-behavior relationships. Exposure to neuropsychological assessment procedures and manifestation of neurocognitive deficits in selected mental and medical disorders, e.g., epilepsy, AIDS, sleep disorders, trauma, toxic exposure, vascular disorders, psychiatric disorders. Develop knowledge of neuropsychological assessment procedures and applications to diverse medical conditions. Prerequisite: psychological assessment experience.

PBSCI 664P Basic Clerkship in Ambulatory Services, HCMHC, or Clinic II (12) Opportunity to experience outpatient psychiatric ambulatory services. Focus on improving interviewing skills and developing an interviewing style and content appropriate to patients with psychiatric dysfunction; gaining familiarity with psychopharmacology; exposure to problems seen in psychiatric emergency medicine. (Six weeks, full-time. Limit: two students.)

PBSCI 665P Basic Clinical Clerkship (6, max. 24) Dagadakis, Pascualy, Scher, Shores, Ward Inpatient clerkship in psychiatric wards for placement responsibility under the direction of attending psychiatrists and residents for diagnosis and care of patients at University of Washington Medical Center, Harborview Medical Center, or Veterans Administration Hospital. Emergency room, crisis intervention, consultation appropriate to patients with psychiatric dysfunction. Familiarity with psychopharmacology and short-term hospitalization are emphasized. (Six weeks, full-time.)

PBSCI 666P WAMI Psychiatry and Behavioral Sciences Clerkship (12) Rotation aims to increase student's knowledge of basic psychiatry, social psychiatry, transcultural psychiatry, and community psychiatry. Orientation is around the diagnosis, treatment, and clinical management of White, Afee, Indian, and Eskimos, and children and adults in outpatient, inpatient, and community settings. Third, fourth-year medical students. Prerequisites: HUBIO 563P. (Limit: three students.)

PBSCI 667P Basic Psychiatry Clerkship, Boise (12) Leone Basic psychiatry clerkship at Veterans Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in psychiatry.

PBSCI 670P Clerkship in Consultation/Liaison Psychiatry UWMC (*, max. 24) Katon Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. Prerequisites: HUBIO 566P, 665P, 666P, 667P, or 667P.

PBSCI 671P Clerkship in Consultation/Liaison Psychiatry WAMC (12) Blackburn, Leone, Marsh Assessment and treatment of patients with acute psychiatric problems in a primary care setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisites: 664P, 665P, 666P, or 667P. (Four to six weeks; UW students only.)

PBSCI 673P Outpatient Psychiatry Elective (*, max. 24) Brinkley Offered at Harborview Outpatient Center. Students function as subintens, conducting diagnostic interviews, initiating and managing psychopharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending Psychopharmacology Clinic. Prerequisites: 664P, 665P, 666P, or 667P. (Four to six weeks, full-time.)

PBSCI 676P Inpatient Clerkship in Psychiatry at American Lake VA (8/12) Martin, Taylor, Verhey For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. Prerequisites: 664P, 665P, 666P, or 667P. (Four to six weeks, full-time.)

PBSCI 677P Alcohol and Drug Treatment Clerkship at American Lake VA (8/12) Verhey, Zernmers Tow or six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington's, organic brain syndromes) is such that physical rehabilitation is not an emphasis. Prerequisites: HUBIO 563P, 664P, 665P, 666P, or 667P.
PBSCI 680P Clerkship in Emergency Psychiatry (*, max. 24) Dagadakis: Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. Prerequisite: either 664P, 665P, or 666P. (Four to six weeks, full-time.)

PBSCI 685P Geriatric Psychiatry Clerkship (*, max. 12) Lampe: Two- or six-week elective. Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding treatment of common behavioral problems in the elderly. Prerequisite: 664P, 665P, or 666P.

PBSCI 686P Subinternship in General Psychiatry (*, max. 16) Backus, Scher: Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. Prerequisites: 664P, 665P, 666P, or 667P. (Four or six weeks, full-time.)

PBSCI 690P Clerkship in Neuropsychiatry (*, max. 24) Neppoe: Assessment of patients with possible organic causes for behavioral/psychopathological problems. Includes evaluation/management of refractory psychoses; epilepsies with behavioral problems; metabolic/endoctrine problems presenting psychiatrically; psychopathology caused by lesions in cerebral cortex/limbic system; psychopharmacological manipulation of underlying neurotransmitter disease. Provides student intensive exposure to neuropsychiatry. Prerequisite: 664P, 665P, or 666P. (Four, six or eight weeks, full-time; preceptor approval required.)

PBSCI 696P Advanced Clerkship in Child Psychiatry (*, max. 24) Unis, Varley: Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. It is suggested that the student contact the instructor prior to enrollment. Prerequisite: 664P, 665P, or 666P. (Four, six or eight weeks, full-time.)

PBSCI 697P Psychiatry Special Electives (*, max. 24) Scher: By special arrangement, clerkships, externships, and research opportunities may be arranged at the University and other institutions. Students must obtain permission from Dr. Hunt before obtaining a special assignment form from the Dean's Office at least one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in psychiatry. Entry Code required.

Radiation Oncology

RN106 University of Washington Medical Center

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all of these divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations and normal and malignant tissues.

Faculty

Chairperson

Thomas W. Griffin

Professors

Graham, Michael M. * 1980, MD, 1976, University of California (San Francisco); position emission tomography, nuclear medicine.

Griffin, Thomas W. 1976, MD, 1970, University of Nebraska; therapeutic radiology.

Grounshine, Mark * 1982, MD, 1975, University of Pennsylvania; chromatin structure and gene activity in development and transformation.

Krohn, Kenneth A. 1981, PhD, 1971, University of California (Davis); chemistry, radiation oncology.

Laramore, George E. 1976, MD, 1976, University of Miami (Florida); therapeutic radiology.

Rasey, Janet S. 1972; PhD, 1970, University of Oregon; radiation biology.

Wootton, Peter 1959, BSc (Hon), 1944, University of Birmingham (UK); medical radiation physics.

Associate Professors

Austin-Seymour, Mary M. 1988, MD, 1978, University of Chicago; therapeutic radiology.

Kalet, Ira J. 1980, PhD, 1968, Princeton University; computer simulation of radiation therapy, artificial intelligence, computer graphics.

Koh, Wui-Jin 1984; MD, 1984, Loma Linda University; therapeutic radiology.

Phillips, Mark H. 1991; PhD, 1982, University of Wisconsin; medical radiation physics.

Russell, Kenneth J. 1985; MD, 1979, Harvard University; therapeutic radiology.

Wiltz, D. Scott 1986; PhD, 1978, University of California (Irvine); radiobiology.

Assistent Professors

Cho, Paul S. 1990; PhD, 1989, University of California (Los Angeles); medical radiation physics.

Lindsley, Karen L. 1993; MD, 1985, Vanderbilt University; therapeutic radiology.

Livesey, John C. 1985; PhD, 1982, University of Minnesota; radiation biology.

Steiter, Keith J. 1990, MD, 1989, University of California (Los Angeles); therapeutic radiology.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

R ONS 499 Undergraduate Research (*, max. 24) Austin-Seymour, Koh; Laramore, Russell, Steiter: Opportunities in clinical or laboratory investigation in radiation oncology. Participation of medical students in ongoing projects or new projects designed for the students. Credit/no credit only. Prerequisites: medical student standing and permission of Dr. Koh.

R ONS 505, 506 Radiological Physics I, II (3.3) Wootton: Introduction to physical concepts, methodology, and instrumentation in the study, production, and measurement of ionizing radiations and their interactions with biological materials. Prerequisite: permission of instructor.

R ONS 517 Radiation Dosimetry (3) Wootton: Examines the interactions of ionizing radiations with the physical and the biological principles involved in their measurement, with particular emphasis on radiation dosimetry. Assumes a sound background in physics. Prerequisite: permission of instructor.

R ONS 695P Clinical Cancer Management (*, max. 8) Participation in the clinical management of patients with cancer, emphasizing a multidisciplinary approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include implant brachytherapy and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: MED 665P or permission of instructor.

R ONS 697P Radiation Oncology Special Elective (*, max. 24) By special arrangement for qualified students, special clerkship, externship or research opportunities can be made available to students. Prerequisites: special permission of the Department of Radiation Oncology. Does not fulfill the requirement for a basic clerkship in radiation oncology. Entry Code required.

Radiology

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that uses imaging obtained from imaging modalities to detect and to characterize states of disease. Historically, X-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the field has grown to include ultrasound, computed tomography, magnetic resonance, and positron emission tomography. In nuclear medicine, one of radiology's major sub-specialties, radionuclides are employed for both diagnostic and therapeutic purposes. Another sub-specialty is interventional radiology, where radiologic techniques are utilized to treat a variety of diseases. The Department of Radiology consists of two clinical divisions, diagnostic radiology and nuclear medicine. Both divisions are staffed by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.

Kushnerick, Martin J. * 1986; MD, 1963, University of Pennsylvania; muscle contraction, magnetic resonance, metabolic imaging NMR spectroscopy.

Lewellen, Thomas * 1967; PhD, 1972, University of Washington; bioengineering, electrical engineering.

Maravilla, Kenneth R. 1986; MD, 1970, State University of New York (Brooklyn); neuroradiology.

Moss, Albert A. 1984; MD, 1967, State University of New York (Upstate); gastrointestinal radiology, computed tomography.

Nelp, Wil B. 1962; MD, 1955, Johns Hopkins University; nuclear medicine.

Nelson, James A. * 1986; MD, 1965, Harvard University; diagnostic radiology with basic research in related sciences.

Robertson, William D. 1959; MD, 1969, University of British Columbia (Canada); neuroradiology.

Rohmann, Charles A. 1975; MD, 1966, University of Washington; gastrointestinal radiology.

Talner, Lee B. 1993; MD, 1983, Yale University; neuroradiology.

Associate Professors

Brewer, David K. 1978; MD, 1972, Harvard University; pediatric radiology, angiography, computed tomography.

Cohen, Wendy A. 1982; MD, 1975, Harvard University; neuroradiology.

Coldwell, Douglas M. 1987; MD, 1960, University of Texas (Galveston); angiography/interventional radiology.

Dailey, Robert W. 1987; MD, 1982, University of Utah; neuroradiology.

Eary, Janet F. 1980; MD, 1980, Michigan State University; nuclear medicine.

Esbridge, Joseph M. 1987; MD, 1981, University of Louisville; neuroradiology.

Gillespy, Thurman 1990; MD, 1980, Thomas Jefferson University; musculoskeletal radiology.

Griep, Robert J. 1967; MD, 1958, University of Texas (Galveston); internal medicine/radiology.

Hayes, Cecil E. 1991; PhD, 1973, Harvard University; physics, MRI.

Kimmey, Michael 1982; (Adjunct); MD, 1973, Washington University; gastroenterology/endoscopy.

Mann, Frederick A. 1993; MD, 1975, Indiana University; emergency radiology.

Margln, Stephen I. 1980; MD, 1968, Yale University; chest and oncologic radiology.

Ott Ralph, Susan M. 1982; (Adjunct); MD, 1974, University of Washington; radiology.

Patten, Randall M. 1988, (Clinical); MD, 1981, University of California (San Diego); magnetic resonance imaging.

Phillips, Leon A. 1959, (Emeritus); MD, 1952, Yale University; general radiology, uroradiology.

Richards, Todd L. * 1985; PhD, 1984, University of California (Berkeley); nuclear magnetic resonance imaging, spectroscopy of the brain in demyelinating diseases.

Richardson, Michael L. 1984; MD, 1975, Baylor University; bone and joint radiology.

Shields, Anthony F. 1983; (Adjunct); MD, 1979, Harvard University; oncology.

Stewart, Brent K. 1993; PhD, 1988, University of California (Los Angeles); physics.

Tsuruda, Jay S. 1992; MD, 1981, University of California (San Diego); neuroradiology, research.

Weinberger, Edward 1979; MD, 1979, Harvard University; pediatric radiology.

Assistant Professors

Altheus, Sandra J. 1991; MD, 1984, University of Wisconsin; angiography, interventional radiology.

Drucker, Mariann J. 1993, (Acting); MD, 1986, University of Rochester; mammography.

Escobedo, Eva M. 1992, (Acting); MD, 1985, Stanford University; musculoskeletal radiology.

Frank, Mark S. 1990; MD, 1984, Washington University; body imaging, chest radiology, digital imaging, PAC.

Harrison, Scott D. 1992; MD, 1987, University of Washington; abdominal imaging.

Haynor, David R. 1979; MD, 1979, Harvard University; neuroradiology.

Johnson, Janet A. 1988; MD, 1985, University of Hawaii; musculoskeletal imaging, chest, GI, CT, ultrasound.

Lewis, David H. 1965; MD, 1985, Virginia Commonwealth University; nuclear medicine.

Ngheim, Hahn Vu 1992; MD, 1987, Wayne State University; abdominal imaging.

Patel, Nilesh 1993; MD, 1987, University of California (Los Angeles); nuclear medicine.

Schmieid, Udo P. 1989; MD, 1982, University of Heidelberg (Germany); abdominal imaging.

Schulte, Scott J. 1988; MD, 1979, University of Washington; gastrointestinal radiology.

Stem, Eric J. 1992; MD, 1986, University of Medicine & Dentistry of New Jersey; chest radiology.

Takahayashi, Julie E. 1986; MD, 1982, University of California (Los Angeles); pulmonary radiology.

Winter, Thomas C. 1990; MD, 1986, Duke University; ultrasound, computed tomography, MRI.

Winters, William D. 1989; MD, 1988, University of Utah; pediatric radiology.

Yuan, Chun 1991; PhD, 1988, University of Utah; medical biophysics, MRI.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

RADGY 488 Undergraduate Thesis (*) Nelson Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. The thesis will be submitted to Dr. James Nelson for suitable recognition.

RADGY 499 Undergraduate Research (*) Nelson Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic radiology and/or nuclear medicine. Written exposition of the results of this experience will be submitted to Dr. James Nelson.

RADGY 508 Physical Aspects of Medical Imaging (4) Stewart Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analyses are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound and Doppler ultrasound. Offered: jointly with BIOEN 508.

RADGY 550 Nuclear Magnetic Resonance in Biomedicine (2) Hayes, Kushnerick, Richards, Yuan Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisites: permission of instructor. Offered: jointly with BIOEN 550.

RADGY 580P Nuclear Medicine Technique, Physics, and Instrumentation (2.5) Lewellen Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. There are discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor.

RADGY 600 Independent Study or Research (*) Nelson Prerequisite: permission of Dr. Nelson and faculty sponsor.

RADGY 693P Introduction to Diagnostic Radiology (4) Schulte Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialties of diagnostic radiology and nuclear medicine. Emphasis is placed on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies.

RADGY 694P Advanced Clinical Clerkship (8) Schulte Full-time clerkship provides more in depth experience in diagnostic radiology and nuclear medicine. Required rotations in the subspecialties of radiology augment the basic lecture series and case discussions of Radiology 693. For those with a special interest in diagnostic radiology. Prerequisites: permission of instructor.

RADGY 698P Nuclear Medicine Clerkship (*) max. 12 Read Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching conferences of the division. Four- and six-week clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor.

RADGY 697P Radiology Special Electives (*) max. 24 Schulte Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct commu-
Rehabilitation Medicine

BB919 Health Sciences

The Department of Rehabilitation Medicine provides instruction for medical students, interns, and residents in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Bachelor of Science in Occupational Therapy, Master of Science (occupational therapy); Bachelor of Science in Physical Therapy, Master of Physical Therapy, Master of Science (physical therapy); Bachelor of Science in the field of prosthetics and orthotics, as well as a Master of Science (rehabilitation medicine) or Master of Rehabilitation Medicine degree for residents in physical medicine and rehabilitation who wish to enter the academic field.

Occupational Therapy

Head
Elizabeth M. Kanny

Occupational therapy is a health profession that provides services related to functional performance in everyday life, whether it be in self-care, work, or play/leisure activities. Occupational therapists work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventative strategies that promote well-being. They serve people in all age groups, from diverse cultural and ethnic groups and socio-economic levels.

Occupational therapy interventions include the use of self-care, work, and play activities to achieve independent function, enhance development, and to minimize or prevent disability. They may include adaptation of activities or the environment to achieve maximum independence and to enhance quality of life. Services may include: training in self-care activities; design, fabrication, and application of splints; sensorimotor activities; therapeutic group activities; selection and use of adaptive equipment; adaptation of physical environments in the home, school, work, or community; therapeutic activities to enhance functional performance in everyday life; and work evaluation, work hardening, and workplace adaptations; and leisure exploration and performance.

Today's occupational therapists work in clinical practice, administration, education, research, private practice, and home health. Work settings include: rehabilitation centers and hospitals; public and private schools; home health agencies; mental health centers and rehabilitation facilities; nursing homes; and other related settings; substance abuse centers; vocational rehabilitation centers and industrial clinics; wellness and prevention programs; and hospitals.

The program is designed to build on a preprofessional liberal arts foundation. Then in the professional program, theoretical and technical knowledge in occupational therapy is linked with professional values, attitudes, and skills. The education of each student is based on the philosophy that "occupational performance" (including self-care, work, leisure/play) is central and provides a purpose and meaning to one's life. Professional standards of practice, ethics, and continued professional growth are emphasized throughout the curriculum. The program is accredited by the Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association. It includes two years of professional course work and at least one clinical fieldwork training. Completion of all University and program requirements leads to the Bachelor of Science in Occupational Therapy degree awarded by the School of Medicine, Department of Rehabilitation Medicine. Graduates of the program are eligible to sit for the national certification examination for the occupational therapist administered by the American Occupational Therapy Certification Board (AOTCB). After successful completion of this exam, the individual will hold an Occupational Therapist, Registered (OTR). Most states, including Washington, require state licensure in order to practice; however, state licenses are usually based on the results of the AOTCB Certification Examination.

Admission Requirements: Students are admitted to the baccalaureate program at the junior level; however, some students may complete three or more years of college work or may hold a baccalaureate degree before applying to the program. The admission process occurs once a year for entry autumn quarter of each year; the application deadline is February 15.

Preprofessional requirements for entrance include completion of the College of Arts and Sciences language requirements, writing, reasoning, and general education requirements, as follows: 5 credits English composition; minimum 10 credits additional writing-intensive courses (identified as W courses in the quarterly Time Schedule); through the third quarter of a single foreign language; 5 credits quantitative and symbolic reasoning, Minimum grade for the English composition course and the third-quarter course in foreign language must be 2.0. The general education requirements include 20 credits minimum in each of the following three Areas of Knowledge: Visual, Literary, & Performing Arts; Individuals & Societies; the Natural World.

Specific prerequisite courses include the following:

Physical Sciences: CHEM 120, Introduction to General Chemistry (5 credits); or CHEM 140, General Chemistry (4); PHYS 114, General Physics (4); PHYS 117, General Physics Laboratory (1).

Biological Sciences: B STR 301, General Anatomy (4); ZOOL 118, Survey of Physiology (5).

Social Sciences: PSYCH 101, Psychology as a Social Science (5 credits); PSYCH 305, Deviant Personality (5); PSYCH 306, Developmental Psychology (5); SOC 110, Survey of Sociology (5).

Prerequisite courses simultaneously fulfill the following Areas-of-Knowledge requirements: all 20 credits of Individuals & Societies; and most of the credits of the Natural World.

To apply, students must have completed five of the prerequisite courses, with two courses in the physical and biological sciences. They must have earned a minimum GPA of 2.50 in the prerequisite courses with no single course graded less than 2.0; and have a cumulative GPA of 2.50 in order to be eligible to apply. Admission is competitive, based on demonstrated academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information may be obtained from the curriculum office.

Graduation Requirements: The following courses must be completed satisfactorily in the scheduled sequence, beginning autumn quarter only, at the UW: REHAB 320, 321, 322, 332, 380, 414, 417, 435, 442, 444, 446, 447, 448, 468, 470, 473, 481, 482, 483, 484, 485, 486, 487, 488, 489, 494, 9 STR 431, and HUBIO 563.

Student Evaluation: The University grade-point system is used in student evaluation. A student must maintain a cumulative GPA of 2.50 in all required professional course work to maintain satisfactory standing and to graduate. The student must attain a minimum grade of 2.0 in all required courses, with the exception of one course grade allowed between 1.7 and 1.9, or be required to repeat that course at the next offering.

At the end of any academic quarter in which a student's performance falls below the scholastic requirement, he/she is placed on academic probation and is allowed two additional consecutive quarters to raise the GPA to 2.50. A student who fails to meet the above scholastic requirements is dismissed from the program and advised to transfer to an alternative major or withdraw from the University.

The student must satisfactorily complete all academic course work before being promoted to Level II Fieldwork (REHAB 494). Two Level II Fieldwork placements are required. If a student should fail to pass a Level II Fieldwork placement he/she must petition the Occupational Therapy Advisory and Evaluation Committee for approval to repeat it. A Level II Fieldwork placement can be repeated only once.

Physical Therapy

Head
JoAnn McMillan

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal and/or neuromuscular problems.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is a rebuilding of self-confidence and the creation of a desire to return to a normal active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, and supervise evaluation and direct patient care in outpatient clinics, rehabilitation centers, home health agencies, health-surgical facilities, voluntary health agencies, industry, and private practices. The physical therapist may be found anywhere that quality health care is needed. Increasingly, physical therapists are becoming involved in basic and clinical research; in the academic community, either as full-time faculty members or as supervisors of clinical education; and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. To become licensed as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including a heavy dose of physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of motion, neurological, sensory, gait, pulmonary function, sensation and sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Some of the procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and training in the use of orthotic, prosthetic, and other
assistive devices, such as crutches, canes, and wheelchairs. As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formalized mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University baccalaureate program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education.

Admission Requirements: The following information is an overview. Applicants are urged to request more detailed program information (which is updated annually and available after October 1 each year) from the Physical Therapy Curriculum Office, PJ-30, University of Washington, Seattle, Washington 98195, (206)685-7408. Students are urged to request these materials early, since the deadline for receipt of applications is February 15. At the time of entrance to the program (autumn quarter), applicants must be legal residents of Washington, Idaho, Alaska, Montana, Oregon, Hawaii, Wyoming, or Nevada. Preference is given to Washington residents.

University general education, writing, and reasoning requirements must be completed prior to admission. General education courses must include at least 40 credits, with 10 credits minimum in each of the following three Areas of Knowledge: Visual, Literary, & Performing Arts; Individuals & Societies; the Natural World. Writing courses (minimum 12 credits) consist of 5 credits of English composition plus two additional writing-intensive courses. Reasoning courses must total no less than 5 credits devoted to reasoning skills. Students may satisfy these requirements (and the specific physical therapy prerequisite courses which follow) with courses completed for previous college-level degrees.

Applicants to the program must also complete specific physical therapy prerequisite courses as follows. These courses, as they apply, may also satisfy University general education requirements.

Chemistry: CHEM 140, 150, General Chemistry (4, 4 credits) or CHEM 120, Introduction to General Chemistry (5) and CHEM 220, Introduction to Organic and Biochemistry (5), or equivalents.

Psychology: PSYCH 101, 102, Psychology as a Social Science (5) or PSYCH 101, 102, Psychological Science (5) plus an additional psychology or psychobiology course.

The preceding courses in chemistry, physics, anatomy and physiology, and microbiology may all be used toward general education requirements in the Area of Knowledge entitled "the Natural World." Courses taken to satisfy the University physical therapy prerequisite requirements may be applied toward the Area of Knowledge entitled "Individuals & Societies." If they have a social science orientation, e.g., PSYCH 101, or toward "the Natural World," they may have a natural science orientation, e.g., PSYCH 102.

By the application deadline (the end of the preceding autumn quarter or semester), students must have completed at least 28 required physical therapy prerequisite credits. Courses in progress on February 15, the application deadline, are not counted toward this minimum. Students must also have earned a minimum 3.00 GPA, including 2.00 in all prerequisite courses completed. All applicants must have earned a minimum 2.70 cumulative GPA for all college-level work.

All specific physical therapy prerequisite credits must be completed prior to entrance into the program, with minimum GPAs and minimum individual grades mentioned below, and the prerequisite course completed. A student without an acceptable, based on demonstrated academic ability and apparent aptitude for physical therapy. Returning students who previously dropped out of the program must reapply and are subject to the same review process as that used for all other applicants.

While the professional phase of the entry-level professional program is designed to begin with the junior year of a four-year baccalaureate curriculum, the majority of applicants have completed three or more years of college work before being accepted into the program. Most students admitted hold a baccalaureate degree in their major discipline. To be competitive, applicants must arrange for a strong and general program of prerequisite course work that includes the specific courses listed above. Changes in the program requirements may occur as the University faces the need to accommodate professional initiatives. Applicants are encouraged to contact the Physical Therapy Curriculum Office (206)685-7408 for information updated yearly.

Graduation Requirements: The following courses must be completed satisfactorily in the scheduled sequence, beginning autumn quarter only, at the UW, REHAB 320-321, 322, 323, 404-405, 413, 414, 416, 442, 443, 444-445, 451-452, 463, 466-467, 471-472, 475, 476, 490, 495; PATH 410; B STR 431.

Student Evaluation

The University grade-point system is used. A student in the professional phase of the curriculum must maintain a cumulative GPA of 2.50 in all required courses for satisfactory standing and for graduation. At the end of any academic quarter in which a student's performance falls below that point, he or she is placed on academic probation. Once on academic probation, a student is allowed to arrange two additional consecutive quarters to bring his or her curriculum GPA to 2.50. A student not meeting the above standard is dropped from the curriculum and is not allowed to continue in the program.

Any grade of less than 2.0 in a professional curriculum course is the basis for probation. Once on academic probation, a student is allowed to bring his or her curriculum GPA to 2.50. A student not meeting the above standard is dropped from the program.

Graduate Program

The graduate programs in the Department of Rehabilitation Medicine lead to the following degrees: Master of Science (three pathways: occupational therapy, physical therapy, and rehabilitation medicine), Master of Physical Therapy, and Master of Rehabilitation Medicine.

Master of Science (Occupational Therapy Pathway) This degree program is designed to prepare occupational therapists to understand and apply occupational therapy theories and frames of reference to clinical practice; to design and conduct research; to provide instruction; and to administer occupational therapy services and/or provide a higher level of clinical services. Independent study options and electives offer flexibility, allowing the student to meet individual objectives. Completion of a data-based thesis is required. Full-time students generally complete the course work in four quarters. The additional time to complete the thesis requirement varies.

Admission Requirements: An applicant for admission to a graduate of an approved occupational therapy program and must be certified to practice by the American Occupational Therapy Certification Board. A minimum of one year of professional experience is desirable. Detailed information on the program and admission requirements is available from the Division of Occupational Therapy Curriculum Office, (206) 685-7411.

Graduation Requirements: All students must meet the minimum requirements for a master's degree as outlined in the Graduate Study section of this catalog. In addition, students must satisfactorily complete (1) core courses required by the occupational therapy program and the specialty track selected by the student, and (2) a data-based thesis contributing the knowledge base in occupational therapy.
Master of Science (Physical Therapy Pathway)

This degree program is designed to prepare physical therapists to assume a career in teaching and administration within the field. An emphasis of the curriculum is preparation for research and contribution to the professional literature; therefore, a thesis is a requirement of this plan. Opportunities are provided to enhance specialized knowledge and skill in selected content areas of physical therapy practice. Depending upon the student's educational goals and prior accomplishments, the program should require one to two calendar years for completion.

**Admission Requirements:** Selection for admission to the Master of Science degree program (physical therapy pathway) is based on an assessment of intellectual capacity, basic professional competence, promise for future contributions to the field, and availability of the program (due to funding limitations, the program is not offered every year). Students must have completed a baccalaureate degree and an accredited physical therapy program with a minimum cumulative GPA of 3.00, based on a 4-point scale, in all college work. Detailed information on program and admission requirements is available from the Division of Physical Therapy Curriculum Office (206/895-T406).

**Graduation Requirements:** All students must satisfactorily complete (1) a minimum of 36 credits, including specified core courses; (2) all Graduate School requirements for a master's degree; and (3) a data-based thesis contributing to the knowledge base in physical therapy.

**Master of Physical Therapy**

The purpose of this program is to provide opportunities to pursue in-depth study in an area of interest related to a clinical specialty and to strengthen general evaluation and management skills for practice as a healthcare practitioner. Preparation in statistics and research design and completion of a major project are requirements of this plan. The focus of this curriculum is on work related to future clinical practice in positions of responsibility and on participation in clinical teaching, research, and administration.

**Admission Requirements:** See requirements for the Master of Science (Physical Therapy Pathway).

**Graduation Requirements:** Requirements for this program are the same as for the Master of Science (Physical Therapy Pathway), except that students complete a project rather than a thesis.

**Master of Science (Rehabilitation Medicine Pathway)**

This degree program is designed to prepare physicians, specifically physiatrists, as academicians in the field of physical medicine and rehabilitation. In addition to core course work in relevant medical sciences, an emphasis is placed on developing skills toward the goal of conducting independent or collaborative research projects.

**Admission Requirements:** An applicant for admission must be a physician from an approved medical school, and must be concurrently enrolled, or have completed, an approved residency program in physical medicine and rehabilitation.

**Graduation Requirements:** All students must complete (1) a minimum of 36 credits, including specific core courses, (2) all Graduate School requirements for a master's degree, and (3) a data-based thesis contributing to the knowledge base in physical medicine and rehabilitation.

**Master of Rehabilitation Medicine Degree**

This degree program is designed to prepare physicians to evaluate, treat, critically, assess applicability, practicality, and validity. Courses in relevant medical sciences provide the foundation for in-depth study of the rehabilitation literature. A project must be completed and can be a literature review; preparation of a case study, including pertinent literature review; or a limited research project, emphasizing the review of pertinent research literature.

**Admission Requirements:** See requirements for the Master of Science (Rehabilitation Medicine Pathway).

**Graduation Requirements:** Requirements for this program are the same as for the Master of Science (Rehabilitation Medicine Pathway), except that students complete a project rather than a thesis.

**Faculty**

Kraft, George Howard *1969; MD, 1963, Ohio State University; physiatry.
Lehmann, Justus F. *1957, (Emeritus); DrMed, 1945, Johann Wolfgang Goethe University (Germany); physiatry.
Patrick, Donald L. *1987, (Adjunct); PhD, 1972, Columbia University; aging, disability, and health-related quality of life.
Stolov, Walter C. *1960; MD, 1956, University of Minnesota; physiatry.
Turner, Judith A. 1980; PhD, 1979, University of California (Los Angeles); physiatry.
Yorkston, Kathryn S. *1977; PhD, 1975, University of Oregon; neuromuscular medicine, pediatric rehabilitation in adults, electrodiagnosis, speech and hearing.

**Associate Professors**
Catanzaro, Marci-Lee *1982, (Adjunct Research); PhD, 1980, Union Graduate School-West; somatomed management and chronic illness.
Deltz, Jean L. *1979; PhD, 1976, University of Florida; occupational therapy.
Egan, Kelly J. 1980, (Adjunct); PhD, 1980, University of Washington; clinical psychology.
Hammond, Margaret C. *1979; MD, 1978, Medical College of Wisconsin; cardiovascular and urologic complications after spinal cord injury.

**Hifield, Allen D. *1983, (Adjunct); MD, 1976, Stanford University; peripheral nerve physiology after injury; swelling disorders in neuromuscular disease.
Jensen, Mark D. *1990; PhD, 1989, Arizona State University; assessment of chronic pain, coping with medical illness, treatment outcome.
Little, James Wendell *1984; MD, 1977, University of Chicago; physiatry.
McMillan, Jo Ann *1968; MA, 1969, University of Southern California; physical therapy.
Patterson, David R. *1984; PhD, 1982, Florida State University; treatment of acute pain, the psychology of burn patients and psychological outcome of physical trauma.
Slipp, Jeffrey C. *1979; PhD, 1978, University of Wisconsin; neurophysiology, cerebral spinal cord, clinical somatosensory evoked potentials.
Uomo, Jay M. *1987; PhD, 1986, Fuller Theological Seminary; neurological disorders; neuropsychology; traumatic brain injury; behavior management.

**Assistant Professors**
Chang, Michael Wei *1992; MD, 1988, University of Texas (Galveston); physiatry.
Czerniecki, Joseph M. *1986; MD, 1981, University of British Columbia (Canada); amputation rehabilitation, biomechanics and gait analysis.
Engel Knowles, Joyce M. *1993; PhD, 1988, University of Kansas; use of occupational therapy in pain management, especially with children.
Gardner, Gregory C. 1989, (Adjunct); MD, 1984, Baylor University; rheumatology.
Goldstein, Barry R. *1990; MD, 1986, University of California (Los Angeles); recovery following spinal cord injury, skin adaptation to mechanical stress.
Guthrie, Mark R. *1983; PhD, 1990, University of Washington; physical therapy, measurement.
Hasekorn, Jodie K. *1989; MD, 1985, Louisiana State University; health services for the disabled—cost, outcomes, quality of life.
Johnson, Kurt Lewis 1990; PhD, 1984, University of Wisconsin.
Margherita, Anthony J. 1989; MD, 1985, Georgetown University; physiatry.
Messaglia, Teresa L. *1988; MD, 1982, Yale University; medical and rehabilitation outcome after spinal cord injury in children.
Odderson, Irl B. *1989; MD, 1985, Vanderbilt University; physiatry.
Sanders, Joan Elizabeth *1985, (Adjunct); PhD, 1991, University of Washington; soft tissue biomechanics and tissue adaptation to mechanical stress.
Strand, Eddy A. *1990, (Adjunct); PhD, 1987, University of Wisconsin; neurogenic speech/language disorders.
Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

REHAB 320, 321 Medical Science (4,4) Lectures in fields related to: general surgery, obstetrics and gynecology, internal medicine, neurology, rehabilitation medicine, orthopaedics, psychiatry and behavioral sciences, rheumatology, and pediatrics. Required for occupational therapy, prosthetics and orthotics, and physical therapy students. Credit/no credit only.

REHAB 322 Medical Science Laboratory (1, max. 2) Greenberg, McMillan, Okumura To introduce students to the role of allied health professionals in the treatment of disabilities presented in 320, 321 lectures. Credit/no credit only. Prerequisite: 320, 321.

REHAB 332 Pathologic Physiology for Physical Therapists and Occupational Therapists (5) Anderson, Simp. Emphasis on normal and pathologic physiology of the circulatory, respiratory, central nervous, and musculoskeletal systems as basis for treatment in occupational therapy, physical therapy, and prosthetics-orthotics. Required for students in these fields. Others by permission. Prerequisites: B STR 301, ZOOL 118, and permission of Instructor.

REHAB 340 Spinal Orthotics (3) Yamane Lecture and laboratory instruction in, and experience with, the use of orthotic components and materials, patient evaluation, and fitting of orthoses for management of spinal pathology. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 341 Upper-Limb Prosthetics I (4) Okumura Instruction in, and experience with, the use of prosthetic components and materials, including prosthesis care, prosthetic components, principles of fabrication and harnessing, and techniques of checkout and prosthetic training for all amputation types. Required for prosthetics and orthotics majors; others by permission of Instructor.

REHAB 342 Upper-Limb Prosthetics II (4) Okumura Instruction and experience in use of prosthetic components and materials, including preprosthetic care, principles of fabrication and harnessing, and techniques of checkout and prosthetic training, review of anatomy, biomechanics, locomotion, and motor disability as they pertain to upper-limb prosthetics, as well as medical management and prescription considerations. Immediate postsurgical fitting techniques.

REHAB 343 Upper-Limb Orthotics (6) Okumura, Yamane Lecture and laboratory instruction in the use of orthotic components and materials, biomechanics, and clinical assessment. Required for prosthetics and orthotics majors; others by permission of Instructor.

REHAB 380 Occupational Therapy in the Health-Care System (2) Kanny Overview of the health services system and the role of occupational therapy. Covers history and trends, health service providers, reimbursement, regulation, and monitoring, ethical standards and decision making, and role definition of professionals. Prerequisite: occupational therapy major standing.

REHAB 404, 405 Physical Therapy Management of Musculoskeletal Disorders: I, II (5,5) Hertling Functional anatomy, biomechanics, clinical assessment and management as they relate to patients with common musculoskeletal disorders who have been referred to physical therapy services. Development of appropriate therapeutic strategies for management of extremity joints and spine. Prerequisite: physical therapy major standing.

REHAB 413 Special Studies in Physical Therapy (1-15, max. 24) Theory and practice in specialized areas of physical therapy. Credit/no credit only. Prerequisite: permission of Instructor.

REHAB 414 Psychological and Ethical Aspects of Rehabilitation (2) Uomoto Psychological processes underlying adjustment to disability; application of behavioral/analytic systems in patient therapy management; effects of intellectual and perceptual deficit on patient performance and treatment strategies. Integration of ethics and legal issues. Prerequisite: occupational therapy, prosthetics and orthotics, or physical therapy major standing. Credit/no credit only.

REHAB 416 Principles of Physical Therapy Administration (3) McMillan The nature of administration, economic trends, operational policy, aspects of supervision, ethical and legal influences applicable to a physical therapy department. Required for physical therapy students.

REHAB 417 Introduction to Research In Occupational Therapy (3) Deitz Statistics, group research design, tests and measurements, and single-subject research methods. Lectures, readings, and assignments related to occupational therapy and rehabilitation medicine research. Prerequisite: occupational therapy major or permission of Instructor.

REHAB 420 Lower-Limb Prosthetics I (6) Draile Instruction in fabrication, fitting, and alignment of the patellar-tendon-bearing prosthesis. Emphasis is placed on the biomechanics of below-knee fit and alignment, dynamic alignment, and the use of the below-knee adjustable leg and duplication devices, as well as methods of suspension. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 421 Lower-Limb Prosthetics II (11) Draile Instruction in above knee cast modification, socket fabrication, static and dynamic alignment, alignment duplication, and suspension system. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 423 Lower-Limb Orthotics (8) Draile, Yamane Instruction in, and experience with, the use of orthotic components and materials, including patient evaluation, measurements, fabrication, and fitting of lower-limb orthoses. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 427 Applied Prosthetics and Orthotics I (1, max. 3) Draile Further clinical experience in patient evaluation, planning, fabricating, and fitting of prosthetic and orthotic devices, and attendance at prosthetics and orthotics clinics at University of Washington Medical Center and University-affiliated Seattle hospitals. Experience in immediate postoperative prosthetics. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 428 Applied Prosthetics and Orthotics II (5) Supervised clinical practice under the preceptorship of a certified practitioner for a minimum of 250 hours in each discipline required for prosthetic-orthotic majors. Prerequisite: prosthetic-orthotic major standing.

REHAB 429 Immediate Post-Operative and Early Fitting (3) Draile, Okumura Lecture and laboratory designed to introduce the student to the principles of immediate postoperative prosthetic fitting, including patient management for both upper and lower extremities.

REHAB 430 Advanced Limb Prosthetics and Engineering Concepts (4) Yamane Exposure to principles underlying modern prosthetic/orthotic devices and principles for designing, constructing, and evaluating limb prosthetics, including hydraulic control, material behavior, force analysis.

REHAB 435 Professional and Therapeutic Communication in Occupational Therapy (2) Engel Provides knowledge and understanding of therapeutic use of self and communication skills with clients, their families and other professionals. Emphasis is placed on communication skills with individuals of diverse ages, educational levels, and cultural and ethnic backgrounds. Prerequisite: occupational therapy major standing.

REHAB 442 Kinesiology I (4) Czeimiecki, Guthrie Study of joint motion and muscle function in relation to both the normal and abnormal state. Specific technical applications in the field of kinesiology are analyzed. Required for Department of Rehabilitation Medicine students; others by permission.

REHAB 443 Introduction to Clinical Evaluation (5) Hertling, Yamane Lecture and laboratory format. Developing clinical competency in goniometric measurement of joint motion, manual muscle strength testing, postural analysis, and gait analysis of normal and pathological patterns. Prerequisite: physical therapy or prosthetics and orthotics majors only.

REHAB 444-445 Function of the Locomotor System (4-4) Guthrie Functions of musculoskeletal system as applied to patterns of motion. Anatomy of peripheral-vascular and peripheral-nervous system. Required for occupational therapy students, prosthetics and orthotics students, and physical therapy students; others by permission of instructor. Prerequisites: B STR 301, ZOOL 118.

REHAB 446, 447 Anatomy Laboratory for Occupational Therapists (1,1) Draberg Guided self-study of musculoskeletal, peripheral-vascular, and peripheral-nervous systems from prospected material. Prerequisite: occupational therapy major standing.

REHAB 448 Applied Kinesiology for Occupational Therapists (1) Anson Instruction and laboratory focus on practical experience and clinical problem solving related to muscle and joint motion testing procedures, sensory/perceptual testing, prosthetic and orthotic devices, and wheeled mobility devices utilized in occupational therapy treatment. Prerequisite: occupational therapy major standing.
SCHOOL OF MEDICINE/REHABILITATION MEDICINE 403

REHAB 510 Rehabilitation Psychology (2) Jensen  Processes and management methods for assimilation of disability, enabling patient participation in rehabilitation process, and for helping in maintenance of performance, behavioral management and case conference strategies, supervision of contingency management techniques. Required for residents; others by permission of instructor.

REHAB 513 Special Studies in Physical Therapy (1-5, max. 15) Brady Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/no credit only. Prerequisite: permission of instructor.

REHAB 516 Medical Information for Rehabilitation Counselors (4) Johnson Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor.

REHAB 518 Infants and Young Children: Current Research (3) Delitz, Swanson Introduces students to recent research relating to assessment and intervention with infants and young children who are "at risk" or who are disabled. Critical evaluation of the current research emphasis and the use of energy used for clinical experience or course work related to infants and young children with disabilities and permission of instructor.

REHAB 520 Seminar (1-5) Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents and postdoctoral fellows in rehabilitation medicine. Lectures, discussions, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.

REHAB 522 Neurophysiological Topics in Rehabilitation Medicine (2) Anderson Review of traditional neurophysiological concepts and an exposition of recent advances in neurophysiological research related to the practice of rehabilitation medicine. Prerequisite: permission of instructor.

REHAB 530 Medical Aspects of Vocational Counseling (2) Johnson Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine.

REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6) Johnson Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job stations; work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor.

REHAB 539 Communication Disorders in Rehabilitation Medicine (1) Yorkston Overview of communication disorders and their relationship to nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implications for rehabilitation. Prerequisite: graduate student status (postdoctoral fellow).

REHAB 540 Application of Measurement Systems (3) Delitz Introduction to reliability, validity, norms, the test development process, and statistical methods and tests and measurements, and ethical implications of testing. Review selected standardized tests used in occupational and physical therapy. Prerequisite: permission of instructor.

REHAB 542 Working with Culturally-Diverse and Multi-Risk Families (2) Analysis of current federal policy and issues in early childhood services examined within systems framework including family, interdisciplin ary team, interagency system. Special emphasis placed on major urban, multicultural populations necessary for providing culturally-sensitive, family-centered services with families who are at-risk for managing special needs of their young children.

REHAB 543 Early Childhood Therapy Interventions: Adaptations and Interactions (2) Provides students with current knowledge regarding research on early childhood disabilities. Content focuses on three major areas: best practices in early childhood therapy assessments; promoting positive caregiver-child interactions; and application of assistive technology in early childhood.

REHAB 544-545 Functional Anatomy for Physiatrists (2-3) Goldstein Lectures and demonstrations to illustrate functional anatomy as applied by physicians in the practice of clinical rehabilitation. Intended to enhance functional assessments and to improve neuromusculoskeletal diagnosis and treatment through greater understanding of the underlying anatomy. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 546 Teaching Practicum in Occupational and Physical Therapy (1-3) Integration of knowledge and skills in teaching through teaching in the classroom or presentation of a minicourse, workshop, or in-service. Prerequisite: permission of instructor. Credit/no credit only. Prerequisite: Mned 530 and permission of instructor.

REHAB 550 Neuropsychology in Rehabilitation (2) Diken Examination and management of patients with brain lesions, as well as an understanding of the consequences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

REHAB 555P Neuromuscular Electrodiagnosis (2.5) Kraft Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodiagnosis examinations. Develops awareness of the usefulness of knowing when such procedures are indicated for patients and interpret results rather than develop proficiency in performing these examinations. Prerequisites: HUBIO 560P and permission of instructor.

REHAB 565 Assistive Technology in Rehabilitation and School System Practice (3) Anson Introduction to the use of assistive technology in rehabilitation and special education. Content includes set up and use of alternative input systems on microcomputers and other adaptations for disabled persons. Prerequisite: resident standing in rehabilitation medicine.

REHAB 566 Special Topics in Rehabilitation (1-9, max. 14) Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

REHAB 567 Practicum in Rehabilitation (1-12, max. 24) Specialized practicum experience in environment providing rehabilitation services. Practicum arrangements and permission by instructor.

REHAB 568 Biophysics as Applied to Physical Medicine (2) Esseman Propagation and absorption characteristics of physical agents used for treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 569 Electromyography and Clinical Neuropathology (4) Esseman Course covering electromyography and clinical neurophysiology. First part covers basic neurophysiology and second covers electromyography, nerve conduction studies, somatosensory-evoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: residency in rehabilitation medicine; others by permission of instructor.

REHAB 575-589 Electromyography and Electrodagnosis Laboratory (1-1-1) Kraft Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: residency in rehabilitation medicine; permission of instructor.

REHAB 600 Independent Study or Research (*) Credit/no credit only.

REHAB 654P Second-Year Clinical Elective in Physical Medicine and Rehabilitation (8) Hasselkorn, Hays Alternative to 655 to meet chronic-care requirement. Explores the same goals recognizing the limited skills of the first-year student. Structured contacts permit understanding of disability problems in patients with chronic disease. Treatment methods and psychosocial consequences explored. Prerequisite: completion of one year of medical school.

REHAB 655P Chronic Disease and Disability (4) Hays Meets chronic-care requirement for medical students. Explores selected clinical aspects of rehabilitation medicine services. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for removing disability. Hospitals are within University system, local area, WAMI area, and Hawaii. Prerequisite: third-year medical student standing.

REHAB 656P Rehabilitation Medicine Clerkship-Pediatrics (8) Hays, Jaffe, Massagli Meets chronic-care requirement for medical students. Incorporates material of 655 and expands into disabling chronic disease. Course planned around chronic illness of children. Community support services included. Six-week package permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatric specialty. Prerequisite: third-year medical student standing.

REHAB 657P Rehabilitation Medicine Clerkship-Medical (8) Hays Meets chronic-care requirement for medical students. Incorporates material of 655 and expands into disability problems associated with "nonsurgical" disease. Six-week package permits inpatient, outpatient, and consultation experience. Recommended for careers in family medicine, internal medicine, rheumatology, cardiology, neurology, and geriatrics. Prerequisite: third-year medical student standing.

REHAB 658P Spinal Cord Injury (8) Hammond Introduction to diagnosis, management, rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychiatrists, and subspecialists in urology, cardiology, and plastic surgery. Performance at subintern level expected. Veterans Administration Medical Center only. Prerequisite: MED 665P, SURG 665P.

REHAB 659P Rural Rehabilitation Medicine Clerkship (8) Hays Structured clinical experience in identification and treatment of disability problems in rural or remote (northern or urban) communities. Satisfies chronic care/rehabilitation medical graduation requirements. Prerequisites: completion of at least six months of clinical clerkships, permission of instructor.

REHAB 667P Rehabilitation Medicine Special Elective (*) max. 24) Equivalent to 665P, 667P, or 668P. Satisfies requirements in rehabilitation medicine/chronic care. Student arranges with another university.
using the "Special Assignment Form." Students can quality after review, similar experience at another university. Prerequisite: permission of instructor.

REHAB 700 Master's Thesis (*) Credit/no credit only.

Surgery
BB447 University of Washington Medical Center

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency room clerkship is a required part of the curriculum. The department also offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, including but not limited to cardiology surgery, plastic surgery, vascular surgery, and the management of burn patients.

Faculty
Chairperson
Carlos A. Pellegrini

Professors
Ashbaugh, David G. 1982, (Emeritus); MD, 1957, Ohio State University; thoracic surgery.
Beach, Kirk Watson 1976; (Research); MD, 1976, University of Washington; arterial disease in diabetes, blood flow studies with ultrasound Doppler.
Clowes, Alexander W. 1980; MD, 1972, Harvard University; general and vascular surgery.
Copass, Michael K. 1971; (Adjunct); MD, 1964, Northwestern University; neurology/medicine emergency medicine.
Dellinger, E. Patchen 1977; MD, 1970, Harvard University; general and gastrointestinal surgery.
Engrav, Loren H. 1977; MD, 1969, University of California (Los Angeles); plastic and reconstructive surgery.
Gruss, Joseph S. 1991; MBChB, 1969, University of Witwatersrand (South Africa); plastic surgery.
Heimbach, David M. 1974; MD, 1964, Cornell University; burn and general surgery.
Herman, Clifford M. 1977; (Emeritus); MD, 1959, University of Vermont; general surgery.
Jones, Robert F. 1974; (Emeritus); MD, 1952, University of Texas, Southwestern (Dallas); oncology and general surgery.
Marchioro, Thomas L. 1967; MD, 1955, StLouis University; thoracic surgery.
Menendez, K. Alvin 1948; (Emeritus); MD, 1940, Yale University; general surgery.
Moe, Roger E. 1967; MD, 1959, University of Washington; oncology and general surgery.
Pellegrini, Carlos A. 1993; MD, 1971, University of Roscito Medical School (Argentina); general and laparoscopic surgery.
Schilling, John A. 1974; (Emeritus); MD, 1941, Harvard University; general surgery.
Strong, D. Michael 1986; (Research); PhD, 1973, Medical College of Wisconsin.
Tapper, David 1983; MD, 1970, University of Maryland; pediatric surgery.
Verrier, Edward D. 1989; MD, 1974, Tufts University; cardiothoracic surgery.
Wifstrand, Robert K. 1984; (Research); PhD, 1974, University of Washington; pulmonology, physiology, neutrophil immigration using monoclonal antibody 60.63.
Winterscheid, Loren C. 1957; (Emeritus); MD, 1954, University of Pennsylvania; general and thoracic surgery.

Associate Professors
Allen, Margaret D. 1985; MD, 1974, University of California (San Diego); cardiothoracic surgery.
Langdale, Lorrie A. 1985; MD, 1979, University of Washington; general surgery.
Lupineti, Flavian M. 1993; MD, 1978, Johns Hopkins University; cardiothoracic surgery.
Perkins, James D. 1989; MD, 1979, University of Arkansas; transplant surgery.
Radke, Hubert M. 1977; MD, 1954, University of Texas (Galveston); general and thoracic surgery.
Zierler, R. Eugene 1984; MD, 1976, Johns Hopkins University; general and vascular surgery.

Assistant Professors
Anderson, Benjamin O. 1994; MD, 1985, Albert Einstein College of Medicine; oncology, general surgery.
Au, Tina Y. P. 1992, (Research); PhD, 1984, University of Wisconsin; molecular biology, heparin controls, collagenase expression.
Aziz, Salim 1990, MBBS, 1976, University of London (UK); cardiothoracic surgery.
Barr, Darlene 1991; (Acting); MD, 1985, University of Alabama; transplant surgery.
Byrd, David R. 1992; MD, 1982, Tulane University; general surgery and oncology.
Cochran, R. Pat 1990; MD, 1978, Emory University; cardiothoracic surgery.
Deter, Paul R. 1990; (Research); PhD, 1990, University of Washington; use of three-dimensional ultrasound imaging to define arterial wall thickness in vascular disease.
Eggert, Mark A. 1986; (Adjunct); DDS, 1981, University of Washington; oral and maxillofacial surgery.
Foy, Hugh M. 1978; MD, 1978, University of Nebraska; general surgery.
Hatsukami, Thomas 1988; MD, 1982, University of California (Los Angeles); vascular surgery.
Helton, William S. 1981; MD, 1981, University of California (Irvine); general surgery.
Hofer, Brad 1987; MD, 1980, Northwestern University; cardiothoracic surgery.
Kunzelman, Karyn S. 1991; (Research); PhD, 1991, University of Texas (Dallas); biomedical engineering—cardiac anatomy and physiology.
Mann, Roberta 1992; MD, 1985, University of Texas, Southwestern (Dallas); general and burn surgery.
Marsh, Christopher L. 1989; MD, 1980, Loma Linda University; transplant surgery.
Melnser, Mark H. 1990; MD, 1985, University of Colorado (Denver); general, vascular, and critical care surgery.
Nicholls, Stephen C. 1988; MBChB, 1975, University of Auckland (New Zealand).
Pano, Anthony 1993; MD, 1983, University of Toronto (Canada); general, cardiovascular, and thoracic surgery.
Sawin, Robert 1989; MD, 1982, University of Pittsburgh; pediatric surgery.
Sikkema, Wesley 1967; MD, 1957, University of Michigan; general surgery.
Sinanan, Mill N. 1980; MD, 1980, Johns Hopkins University; general and laparoscopic surgery.
Vedder, Nicholas 1990; MD, 1981, Case Western Reserve University; case history, plastic and reconstructive surgery.
Wallhausen, John H. 1993; (Acting); MD, 1986, Pennsylvania State University; pediatric surgery.

Instructors
Gibran, Nicole 1990; (Acting); MD, 1985, Boston University; general, burn, and trauma surgery.
Healy, Patrick J. 1993; (Acting); MD, 1987, Boston University; general and pediatric surgery.
Kraiss, Larry W. 1988; (Acting); MD, 1988, Baylor University; general and vascular surgery.
Lyng, Dana C. 1993; (Acting); MD, 1985, McGill University (Canada); general surgery.
Mock, Charles N. 1992; (Acting); MD, 1980, Brown University; trauma-critical care surgery.
Rhee, Peter M. 1993; (Acting); MD, 1987, Uniformed Services—University of Health Sciences; trauma and critical care surgery.

Lecturer
Clowes, Monika M. 1981; BA, 1954, University of Geneva (Switzerland); vascular wall biology, kinetics of smooth muscle proliferation, restoration of vessels of angiography.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

SURG 498 Undergraduate Thesis (*) Langdale

Offered to those students who have engaged in undergraduate research in general surgery. Please see "Research Opportunities in the Department of Surgery." (Full- or part-time.)

SURG 499 Undergraduate Research (*) Langdale

Provides an opportunity to participate in ongoing research projects in general surgery being carried out by Department of Surgery faculty or to carry out an independent research project under supervision. Practical experience in experimental design and execution is provided under direct supervision of selected faculty members. (Full- or part-time.)

SURG 505P Preceptorship in Surgery (*) Langdale

Opportunity for first- and second-year medical students to gain personal experience with clinical faculty members in the community. Students observe
general aspects of private practice, including clinical problems seen; practice limitation; doctor-doctor, doctor-patient, and doctor-nurse relationships in the office and hospital. Prerequisite: permission of department.

CONJ 565 Surgical Anatomy (1,3, max. 12) See Conjoint Courses.

SURG 600 Independent Study or Research (*) Langdale

SURG 665P Clinical Clerkship (*) (max. 24)
Langdale (Veterans Administration Hospital, Harborview Medical Center; University of Washington Medical Center) Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Prerequisite: HUBIO 565P. (Six weeks. Limit: twenty-five students.)

SURG 686P Peripheral Vascular Disease (4/8)
Strandness (Veterans Administration Hospital, University of Washington Medical Center) Peripheral arterial and venous problems, including methods of clinical evaluation; new diagnostic procedures; and the available methods of treatment. Patient workup, performance of diagnostic studies, and presentation of case material to the staff. Prerequisites: 665P, HUBIO 66SP. (Two or four weeks. Limit: two students.)

SURG 682P Clinical Burn Care (*) (max. 12)
Heimbach Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: 665P. (Four or six weeks. Limit: two students.)

SURG 683P Pediatric Surgery Clerkship (max. 12) Langdale Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies and outpatient follow-up of discharged patients. Students function at the internship level under close supervision of the staff and house staff. Prerequisite: 665P. (Four or six weeks. Limit: seven students.)

SURG 689P Community Surgery Clerkship (max. 12)
Langdale Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisites: 665 and permission of department. (Four weeks. Longview - one student; Coeur d'Alene - one student.)

SURG 690P Surgery Special Clerkship (max. 12)
Langdale Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering general practice. Prerequisites: 665 and permission of department. (Six weeks. Alaska Native Medical Center, Anchorage - one student.)

SURG 697P Surgery Special Electives (*) (max. 24)
Langdale Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisites: 665P and departmental permission. (Four, six, or twelve weeks.)

SURG 687P Transplantation Surgery Clerkship (8)
Perkins Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, on twice daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisites: 66SP and M66SP. (Four weeks. Limit: two students.)

SURG 688P Subinternship in General Surgery (*) (max. 12)
Langdale Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies and outpatient follow-up of discharged patients. Students function at the internship level under close supervision of the staff and house staff. Prerequisite: 665P. (Four or six weeks. Limit: seven students.)

Urology

BB1115 Health Sciences

Urology is the surgical discipline concerned with diseases of the urinary tract in male and female systems. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal pathology, reproductive biology, neuro-pathology, and transplantation.

Clinically, the field encompasses a large variety of technical skills including real time imaging and manipulation, endoscopy, and open surgery. The medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at 685-3245 for further information.

Faculty

Chairperson
Paul H. Lange

Professors
Ansell, Julian S. 1959, (Emeritus); MD, 1951, Tufts University; congenital defects and pediatric urology.
Barnes, Glover W. * 1969, PhD, 1961, State University of New York (Buffalo); tissue, organ immunology.
Brawer, Michael K. 1989; MD, 1980, University of California (Los Angeles); benign and malignant prostate proliferative disorders.
Chapman, Warren H. 1962, (Emeritus); MD, 1952, University of Chicago; oncology and microsurgery.
Mayo, Michael Edward 1975; MBBS, 1962, St Thomas' Hospital Medical School (UK); neuro-urology and reconstruction, urodynamics.
Mitchell, Michael E. 1989; MD, 1969, Harvard University; pediatric urology and reconstruction.

Associate Professor
Vessella, Robert L. 1989; PhD, 1974, University of Mississippi; tumor markers and immunology.

Assistant Professors
Bevendam, Tamara G. 1989; MD, 1981, University of Iowa; female urology and urodynamics.
Carr, Michael C. 1993; MD, 1985, University of Cincinnati; pediatric urology.
Chongkittawong, Ngamitch 1993, (Research); PhD, 1987, Washington State University; immunocytochemistry of prostatic disease.
DeFalco, Alfred J. 1989; MD, 1962, University of Rochester; urologic trauma, urodynamics and endourology.
Ellis, William J. 1991; MD, 1985, Johns Hopkins University; oncology, prostate disease.
Marsh, Christopher L. 1989; MD, 1980, Loma Linda University; transplant surgery.
Miller, Jane L. 1985; MD, 1985, University of Oklahoma; female urology and urodynamics.
Riley, Donald E. *1982, (Research); PhD, 1976, University of Washington; pathogenic research and diagnostics involving DNA sequences.
Yao, Yue (Lena) 1993, (Research); PhD, 1988, University of Washington; molecular biology.

Instructors
Bagli, Darius 1993, (Acting); MD, 1984, McGill University (Canada); pediatric urology.
Close, Claire E. 1994, (Acting); MD, 1988, University of Washington; pediatric urology.
Tokeayama, Thomas K. 1989, (Acting); MD, 1985, Tufts University; biochemistry of prostate specific antigen.
Yang, Claire C. 1993, (Acting); MD, 1988, Vanderbilt University; urodynamics, neuro-urology.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Course numbers with a P suffix are not graduate courses and are restricted to medical student enrollment only.

UROL 498 Undergraduate Thesis (*) Brawer Provides an opportunity for medical students to write in the area of urology. Prerequisite: permission of sponsor and department.
UROL 499 Undergraduate Research (*) Brawer
The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students. Prerequisite: permission of sponsor and department.

UROL 501P Urology Preceptorship (1) Brawer
Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care. Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisites: first- or second-year medical student standing; permission of instructor.

UROL 675P Urology Preceptorship (*, max. 8) Brawer
Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. Prerequisites: 680P, HUBIO 562P. (Two or four weeks.)

UROL 680P Urology Clerkship (*, max. 8) Bavendam, Berger, Ellis, Krieger, Mayo
Full activities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562P. (Two or four weeks.)

UROL 681P Female Urology (4) Bavendam, Miller
Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management and multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only exposure to urology for students considering urology as career choice. Prerequisites: third or fourth year standing and permission of instructor.

UROL 685P Urology Subinternship (*, max. 12) Bavendam, Berger, Ellis, Krieger, Mayo
Subintern is responsible for patient workups and for preoperative and postoperative care and participates in the operating room. Prerequisite: MED 665P or pediatrics basic clerkship, or permission of instructor.

UROL 690P Urology Specialties (*, max. 8) Brawer
For those who wish further exposure to a specific aspect of urology. Students can spend time with one attending at University of Washington, Harborview Medical Center, Children's Hospital and Medical Center, or Veterans Administration Hospital studying oncology, infections, infertility, stone disease, impotence, or other aspects of urology. Prerequisites: 680P and permission of instructor.

UROL 697P Urology Special Electives (*, max. 24) Brawer
Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean's office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. (Six or twelve weeks.)
School of Nursing

Associate Deans
Pamela H. Mitchell, Academic Programs
Marie J. Cowan, Research and Practice

Assistant Deans
Ruth F. Craven, Continuing Nursing Education
Anne Louslau

The School of Nursing offers programs leading to baccalaureate, master's, and doctoral degrees.

Gary Olson, Director, Academic Programs

Undergraduate Program

The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The six-quarter undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and acute care. Completion of the curriculum leads to a Bachelor of Science in Nursing degree and eligibility to take the licensure examination to become a registered nurse.

Students may be admitted to the University of Washington as prenursing majors. Courses required for admission to the nursing major include: written communication, problem solving (including statistics), life sciences (inorganic and organic chemistry, human anatomy and physiology, nutrition, and microbiology), humanities, social sciences (including growth and development), and electives to achieve a minimum of 90 credits. A minimum 2.00 cumulative GPA is required and a minimum grade of 2.0 must be obtained for each prerequisite course. As admission is competitive, the GPA for admission is usually significantly higher. Together with the application forms, candidates are asked to submit an essay demonstrating proficiency in writing and a record of their volunteer and health care experience.

A four-quarter modification of the basic curriculum is available for the registered nurse who is able to validate selected nursing courses through written examination and who intends to complete a master's degree program. This B.S.N. completion program is available at the UW Branch Campuses in Bothell and Tacoma.

Admission to the nursing major occurs once a year, in autumn quarter, with an application deadline of January 15. Selection is competitive. For information on admission criteria, specific prerequisites, and deadlines, as well as application forms, contact the Office of Academic Programs, School of Nursing. (206) 543-8735 or 1-800-759-NURSE.

Graduate Program

The School of Nursing offers graduate study leading to the degrees of Master of Nursing, Master of Science, and Doctor of Philosophy. At the master's level, programs are designed to provide opportunity for advanced study and research in nursing. The Master of Nursing program develops increased competence in selected areas of clinical specialization: community health care systems, parent and child nursing, physiological nursing, and psychosocial nursing. Research is an integral part of all programs. A thesis is required in the Master of Science program. The Master of Nursing program provides the option of a thesis or non-thesis project. Opportunities for functional preparation in teaching, care systems management, and clinical practice as a nurse practitioner are available. The School of Nursing offers a concurrent graduate degree program with the Department of Health Services in the School of Public Health and Community Medicine.

Part-time study is available in most programs. Course work may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM). GNM status allows the student to earn up to 12 graduate-level credits which may be applied to a graduate program if the student is later admitted. Time limits for acceptance of courses taken as a GNM student are six years for a master's degree and ten years for a doctoral degree.

The aim of the program at the doctoral level is to prepare scholars and researchers to expand the body of knowledge upon which the practice of nursing is based. The program provides for rigorous research training related to four fields of nursing science: (1) individual adaptations to health and illness; (2) family adaptations to health and illness; (3) environments: supporting and nonsupporting; and (4) clinical therapeutic. The Ph.D. in nursing science program is designed for individuals interested in careers in academia and for other types of leadership positions in health service agencies in which the ability to design, plan, and implement research in nursing is a critical requirement.

Special Requirements

In addition to the basic requirements for graduate status in the University, admission to premaster's status in the School of Nursing requires baccalaureate preparation with an upper-division major in nursing or equivalent, a basic course in statistics, Graduate Record Examination scores within the past five years, a statement of goals, three references, and at least one year of practice for most clinical programs. Admission is usually for autumn quarter. The application deadline for students' degree pathways is April 1. Early application is encouraged, although late applications may be accepted on a space-available basis. Additional information may be obtained from the School of Nursing Office of Academic Programs.

Admission requirements for the doctoral program, in addition to the above, include Graduate Record Examination scores within the past five years, five references, a statement of goals for doctoral study, a description of area of research interest, and evidence of scholarly work. The deadline for application to the doctoral program is February 1.

Financial Aid

A limited number of nurse traineeships are available for premaster's study. Other financial aid is available on a limited basis.

Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to predoctoral students.

Contact the Office of Academic Programs, School of Nursing, for current information.

Faculty

Chairpersons
Community Health Care Systems: Katherine J. Graham
Parent and Child Nursing: Marcia G. Killien
Physiological Nursing: Joan Shaver
Psychosocial Nursing: David G. Allen

Professors
Barnard, Kathryn E. * 1972; PhD, 1972, University of Washington; ecological factors of child development.
Bateny, Margoria V. * 1956; (Emeritus); PhD, 1965, University of Colorado; sociological factors in health-care systems.
Benoliel, Jeanne 1970, (Emeritus); DNS, 1969, University of California (San Francisco).
Blackburn, Susan T. * 1973; PhD, 1979, University of Washington; high-risk infants and their families, infant care-giving interactions and environments.
Booth, Cathryn L. * 1980, (Research); PhD, 1974, Ohio State University; mother-infant interaction, observational methodology, child birth experiences and attachment.
Brantz, Patricia * 1981; PhD, 1981, University of Washington; influence of family functioning on early child development.
Chrisman, Noel J. * 1973; PhD, 1966, University of California (Berkeley); health beliefs and practices, social networks and social support.
Cowan, Maria J. * 1977; PhD, 1979, University of Washington; estimation of infarct size by electrocardiography, sudden cardiac death, physiological nursing.
De Tornyay, Rheta * 1975; EdD, 1967, Stanford University; health services, nursing education.
Dimond, Margaret * 1968; PhD, 1978, University of Wisconsin; aging, bereavement, family caregiving, Alzheimer's disease, chronic illness, long-term care.
Disbrow, Mildred A. * 1982; (Emeritus); PhD, 1968, University of Washington; maternal-infant interaction, child abuse.
Eyes, Sandra J. * 1974; PhD, 1972, University of North Carolina; environmental resources promoting adaptation and health.
Gallucci, Betty J. * 1973; PhD, 1973, North Carolina State University; oncology, nutritional assessment, pathophysiology of stomatitis, and graft versus host disease.
Giblin, Elizabeth C. * 1959; (Emeritus); BS, 1943, University of Washington; nursing assessment and nursing therapies, interface, pathophysiological bases.
Graham, Katherine J. * 1988; PhD, 1978, University of Washington; family adaptation, quality of life in wellness and illness, professional commitment.
Heggyvary, Sue T. * 1986; PhD, 1974, Vanderbilt University; administration and productivity of health care and nursing services.
Heinemann, Edith * 1954; (Emeritus); MA, 1954, University of Washington; substance abuse, gerontology.
Heirkempfer, Margaret M. * 1981; PhD, 1981, University of Illinois; gastroenterology, enteral nutrition, gerontology.
Horn, Barbara J. * 1977; (Emeritus); PhD, 1971, University of Michigan; effective organization of nursing resources.
Killien, Marcia G. * 1973; PhD, 1982, University of Washington; women's health, reproductive decision making, evaluation research, perinatal nursing.
Kogan, Helen N. * 1968; PhD, 1968, University of California (Los Angeles); stress response: cognitive/physiological interface in chronic dysfunctions, self-management teaching.
Lewis, Frances M. * 1978; PhD, 1977, Stanford University; complex organizational analysis, evaluation research, psychosocial factors in chronic illness.
Little, Dolores E. 1957, (Emeritus); BS, 1946, University of Washington.
Mansfield, Louise W. 1951, (Emeritus); MA, 1951, Columbia University; physiological nursing.
Lewis, Linda L. * 1989; PhD, 1987, University of Illinois; reproductive neuroendocrinology mood changes related to the human menstrual cycle.

Lowenberg, June S. * 1990; PhD, 1985, University of California (San Diego); social construction of health and illness experiences, interpretive research.

Marrill, Louise K. * 1992; PhD, 1990, Oregon State University.

Petrucci, Kerry E. * 1992; PhD, 1990, University of Maryland.

Price, Martha J. * 1990; DNS, 1986, University of California (San Francisco); self-management in chronic illness, diabetes mellitus, qualitative research methodologies.

Selazar, Mary K. * 1984; MN, 1986, University of Washington; behavioral theory applied to health education, cancer control, occupational health.

Simpson, Terri A. * 1991; PhD, 1988, University of Washington; critical care patients' physiological and psychological responses to environmental stressors.

Thompson, Frances Elaine A. * 1984, (Research), PhD, 1990, University of Washington; attribution theory, adolescent drug use, suicide.

Tyler, Martha L. * 1973; MN, 1977, University of Washington; oxygenation during chest physiotherapy, suctioning, dyspnea, breathing patterns in disease.

Whitney, Joanne D. * 1991; MS, 1979, University of Michigan; wound healing.

Willie, Diana J. * 1990; PhD, 1990, University of California (San Francisco); cancer pain assessment and management, pain research.

Worthy, Elizabeth J. * 1966, (Emeritus); MN, 1964, University of Washington; mother-infant interactions, handicapped child.

Senior Lecturer

Comran, Barbara J. * 1979; PhD, 1988, University of Washington; sexual assault victims, kinetic family drawings, family having child with cancer.

Lecturers

Caman, Faith L. 1992; MN, 1988, Yale University; adolescent health.

Halverson, Susan G. 1993; MS, 1976, University of Rochester.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Nursing

Courses for Registered Nurses

NURS 201 Growth and Development Through the Life Span (5) Focuses on processes of human growth and development from prenatal life to old age. Emphasizes influence of growth and development on achievement of health, and how awareness of growth and development theory and research helps guide health promotion efforts directed towards persons of various ages and life styles. Open to non-majors.

NURS 301 The Nature of Health and Caring (3) Scientific principles of nursing care of health clients. Emphasis on understanding multidimensional aspects of health: personal, environmental factors that support healthy functioning patterns of individual clients; health promotion interventions. Underlying concepts: health, adaptation to life transitions, person-environment fit, client, caring, health promotion, health maintenance. Prerequisite: admission to nursing program.

NURS 302 Practicum: The Nature of Health and Caring (5) Emphasizes beginning nursing skills in communication, interviewing, and health assessment and maintenance. Predominant themes include: personal health beliefs, values clarification, basic communication skills, and beginning physical and psychosocial assessment of the individual across the age span. Prerequisite: concurrent registration in 301.

NURS 303 Introduction to Professional Nursing (4) Focuses on nature of nursing, development of identification of nursing students and professional practitioners. Students consider their choices to be nurses; nurses' experiences past, present, experience of illness, health-seeking; nursing issues in context of overall American health care system; perspectives on nursing education. Prerequisite: admission to nursing program.

NURS 304 Bases for Understanding Human Responses (2) This course and its companion, 308, are concerned with commonly occurring psychopathological responses to states of health and illness. They identify and describe the major concepts and principles necessary to understand; decision-making processes at the mind-body interface. Prerequisite: admission to nursing program.

NURS 305 Threats to Health (3) Challenges to health during transitions: birth and death, developmental and role changes in health, chronicity, and personal network. Assesses health patterns in terms of risk, vulnerability, and resilience. Examines personal and environmental demands, constraints, resources, and potential health risks, families, communities/populations undergoing transitions. Prerequisites: 301,302,304.

NURS 306 Practicum: Threats to Health (4) Beginning nursing skills in communication, interviewing, health assessment, identification of threats to health in selected community/cultural settings. Predominant themes, skills: risk, vulnerability; identification; communication; physical, psychosocial assessment of individuals across life span; nursing care planning, documentation; psychomotor skills development. Prerequisite: concurrent registration in 305 which may be taken concurrently.

NURS 307 Human Social Systems (2) Reviews system theory with emphasis on the nature and analysis of human social systems, including their growth, development, and transitions. The family is primary vehicle for examining how human social systems components; assessing self-care and utilizing health care; analyzing variables which affect social groups. Prerequisite: admission to nursing program.

NURS 308 Bases for Understanding Human Reactions (2) Continuation of 306. The two courses introduce and describe commonly occurring psychopathological and psychophysiological human responses to states of health and illness. They identify and describe the major concepts and principles necessary to understand decision-making processes at the mind-body interface. Prerequisite: 304.

NURS 309 Pharmacotherapeutics in Nursing Practice (3) Introduces professional nursing students to the principles of pharmacology and drug therapies, pharmacologic-therapeutic classes of drugs, and important drug information resources. Prerequisite: admission to nursing program.

NURS 340 Clinical Nursing Phenomena (3) Selected clinical phenomena examine from the perspective of physiologic, pathophysiologic, experiential, and behavioral responses to life events and alterations of states of health and illness. Relationships of nursing therapies to each perspective and influence of life span and sociocultural factors identified. Prerequisite: admission to RN-Masters program or permission of instructor.

NURS 350 Decision Making and Therapeutics in Nursing (3) Focuses on the basis of thinking, writing, geriatric knowledge and practices in nursing including self-assessment, understanding and producing written communication, abstract thinking, group dialogue, evaluating points of view, problem solving, clinical decision making. Provides opportunity for application in selected issues and family networks. Prerequisite: licensed Registered Nurse.

NURS 401 Care in Illness (5) Selected psychopathologic and pathophysiological health alterations and therapies across illness. Assesses human functioning, pathophysiology, pharmacology, psychotherapy, and family interventions in the context of illness. Evaluates person-environment relationships to select nursing strategies for acute and chronically ill individuals of all ages. Prerequisites: 301, 302, 303, 304, 305, 306, 308, 309.

NURS 404 Practicum: Care in Illness (4) Provides supervised nursing care to individuals and families with acute and chronic illness. Emphasis on increasing skill in systematic assessment, developing competence in selected nursing therapies, and developing role as care agent for persons of all ages. Credit/no credit only. Prerequisite: 401 which may be taken concurrently.

NURS 403 Introduction to Research in Nursing (3) Organization of the structure of nursing knowledge through research. Concepts and processes of research utilized as identified in the investigation of nursing science. Prerequisite: concurrent registration in 304.

NURS 404 Interpersonal Therapeutics (3) Nursing care within context of interpersonal relationships. Effect of current state of health on role of the nurse significant. Examination of impact on roles, interactions, and patients in selected psychosocial factors. Emphasis on development of conceptual models in interpersonal processes and skills between professionals and clients, other professionals, and groups. Prerequisite: concurrent registration in 404.

NURS 405 Care in Illness (5) Continuation of 401. Further examination of selected psychosocial and pathophysiological alterations in health of individuals in context of families across life span. Emphasis on assessing function in psychosocial, cultural, person-environment relationships, and health care resources to plan nursing strategies for acutely/chronically ill individuals of all ages. Prerequisite: 401.

NURS 406 Practicum: Care in Illness (4) Provides supervised nursing care to individuals and families with acute and chronic illness. Emphasis on increased skill in systematically applying theoretical competency in selected nursing therapies, and developing role as caring agent for persons of all ages. Credit/no credit only. Prerequisites: 402; 405 which may be taken concurrently.

NURS 407 Cultural Variation and Nursing Practice (3) Introduces knowledge and skills for culturally competent health care for all. Compares health-related values, beliefs, and customs among major cultural groups. Views family and social network as culturally variable health-seeking behavior contexts. Examines Western biomedicine and alternative healing methods within broader environment, including government, other social institutions.

NURS 408 Nursing Care with Families in the Community (3) Application of biopsychosocial and social environmental theories and assessments to diagnose alterations in health/illness of families, small groups in community groups. Emphasizes interpersonal and clinical theories; coordination of community resources, evaluating effectiveness of changes; choosing appropriate providers and health care in home visiting. Prerequisites: 307, 405, 406, 407.

NURS 409 Nursing Strategies for Community as Client (6) Analysis, application, and evaluation of nursing process at level of community. Formulation of community health diagnoses as basis for community-level interventions to maintain and promote biopsychosocial health, prevent disease, and enable self
NURS 410 Legal and Ethical Issues in Clinical Practice (3) Identification of ethical and legal issues and their relevance to the professional nurse and the nurse’s role as health professional and citizen. Selected problems and dilemmas affecting nurses, nursing, and the delivery of health care analyzed using specific moral-ethical perspectives. Prerequisite: upper-division standing or permission of instructor.

NURS 411 Transition to Professional Practice (12) Intensive field work in a nursing care specialty focusing on critical examination, synthesis, and evaluation of professional nursing care. Client populations include individuals and/or groups reflecting diverse settings, ages, ethnic communities. Emphasizes mastering theoretical concepts, applying research findings, improving skill competency, developing leadership capabilities. Prerequisites: 307, 405, 406, 407.

NURS 412 Nursing Care Systems (3) Introduction to analyzing current health care systems and their effectiveness in achieving desired health outcomes for selected client populations from a systems perspective. Emphasizes key features of interface between client and health care providers, and environment, including factors and organizational structures which influence the transaction. Prerequisite: senior standing in nursing.

NURS 430 Interpersonal Relationships in Nursing (3) Theory, current research, and practice in communication to develop and maintain interpersonal relationships with clients and health care colleagues. Lecture/discussion and laboratory learning opportunities include concepts of relationship development and disorder, interpersonal and group therapeutic communication processes, health care interview, and social support. Prerequisite: permission of RN-Masters program or permission of instructor.

NURS 450 Connected Learning I (1, max. 6) An opportunity and quarterly requirement for nursing students to participate in a learning community in small groups with a faculty member. Focus is on dialogue, understanding others perspectives, building community, and integration of concurrent learning in other courses. Prerequisite: admission to nursing program.

NURS 451 Connected Learning II (1, max. 3) An opportunity and quarterly requirement for nursing students to participate in a learning community in small groups with a faculty member. Focus is on dialogue, understanding others perspectives, building community, and integration of concurrent learning in other courses. Prerequisite: admission to nursing program.

NURS 499 Undergraduate Research (1-5, max. 12) Supervised individual scholarly inquiry on a specific nursing problem. Nursing students only. Permission of academic programs office.

Courses In Nursing Science

NURS 510 Theoretical Foundations of Primary Care: Management of Common Health Concerns (1-3, max. 8) Focuses on assessment, clinical decision making, and management of common health problems. Emphasizes individual and family responses to common health problems and selection of nursing strategies within the scope of primary health care practice. Content focus changes each quarter. Prerequisite: permission of instructor. Recommended: concurrent fieldwork for nurse practitioner students.

NURS 570 Family Concepts: Health and Illness (3) Emphasizes the family as unit of care across the life span. Predominant themes: factors influencing family health promotion, including resilience, vulnerability, risk reduction, socialization, continuity, change and transition; and promotion of family health during acute and chronic illness episodes.

NURS 571 Advanced Interpersonal Therapeutics with Families (3) Models and research on therapeutic relationships and interpersonal processes evaluated in group interactions among family members, among professionals, and between the family, professionals, and macrosystems. Partnership building emphasized. Individual and group characteristics examined across the life span in social, cultural, and health care contexts. Prerequisite: permission of instructor.

NURS 572 Family Nursing Therapeutics: Behavioral Models (3) Behavioral models of health-related behavior analyzed to develop therapeutic programs and services for families experiencing health-related concerns or disruptions. Seminars introduce didactic material and laboratory assignments facilitate development of therapeutic and programmatic content. Prerequisite: permission of instructor.

NURS 573 Advanced Field Study in Family Nursing (2-9) Advanced practice development in direct care, consultation, and/or care coordination with individual families or groups of families across the life span. Opportunities provided to strengthen interprofessional therapeutic process skills, family nursing approaches relevant to family health promotion, problem-solving family health priorities, and concurrent registration in 572, 574; recommended: 571.

NURS 574 Family Nursing Therapeutics: A Systems Perspective (3) Brandt, Commar, Schepp, Stetz Family models and research evaluated for relevance to advanced nursing practice and the family as a system. The interrelatedness of the individual, family, and social and health contexts examined. Experiential learning laboratories with family case analyses enhance knowledge and therapeutic skills. Prerequisite: permission of instructor.

NURS 575 Methodological Issues in Family Research (3) Emphasizes research with the family as a system. Family models and research evaluated for relevance to advanced nursing practice and the family as a system. The interrelatedness of the individual, family, and social and health contexts examined. Experiential learning laboratories with family case analyses enhance knowledge and therapeutic skills. Prerequisite: permission of instructor.

NURS 580 Theory and Practice in Nursing (3) Explores and analysis of nursing theory, types, techniques of construction, problems in evaluation and testing, and implications for nursing science. Prerequisite: permission of instructor.

NURS 581 Theory and Practice in Nursing (3) Continuation of 580 with emphasis on evaluation of existing nursing theories, student construction and presentation of a theory of nursing, and critiques of the students’ theories. Prerequisite: 580.

NURS 582 Environment, Supporting and Non-supporting (3) Analysis and study of environments as complex multidimensional systems that support or do not support human health. Emphasis on the influence of different conceptualizations of human-environmental interactions. Prerequisites: graduate standing, a minimum of 5 credits in basic nursing research methodology at graduate level, and permission of instructor.

NURS 584 Clinical Therapeutics: Physical (3) Analysis and study of current theories and knowledge regarding physical therapeutic measures and nursing interventions that promote, maintain, or restore health status of human beings. Prerequisites: graduate standing and a minimum of 5 credits in basic nursing research methodology at graduate level and permission of instructor.

NURS 585 Individual Adaptations to Wellness and Illness (3) Survey and analysis of current theory and research in health promotion, illness-seeking and -maintaining behaviors, and in coping responses to illness and disability. Prerequisites: graduate standing and a minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

NURS 586 Family Adaptations to Wellness and Illness (3) Current theory and research in family functioning in health and illness. Family developmental tasks, separation, divorce, major and minor disabling events, social and economic processes, and other events that strengthen or weaken the family. Prerequisites: graduate standing and a minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

NURS 587 Clinical Therapeutics: Interpersonal (3) Analysis of care/cure orientations in patient care and their impacts on nursing intervention programs. Dynamics of change, interpersonal aspects of planned change, and measurement of clinical outcomes. Prerequisites: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

NURS 588-589 Advanced Problems In Nursing Research (3-3) Examination of alternative methodological decisions for their direct and indirect consequences. Prerequisite: permission of instructor.

NURS 590 Special Topics In Nursing Research (2-3, max. 9) Examination of a specific research method, a specific research area, a specific research problem, a specific research opportunity and quarterly requirement for advanced study in nursing research. Prerequisites: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

NURS 591 Advanced Seminar In Nursing Science (3, max. 15) In-depth analysis and evaluation of literature in focused areas of research. Prerequisites: permission of instructor.

NURS 593 Directed Readings In Nursing Science (1-3, max. 15) In-depth analysis and evaluation of literature in focused areas of research. Prerequisites: permission of instructor.

NURS 599 Directed Readings In Clinical Practice (1-5, max. 15) Directed experience in selected teaching-learning research activities related to selected fields of nursing science. Prerequisites: permission of instructor.

NURS 600 Doctoral Dissertation (*) Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson or graduate program advisor.

Community Health Care Systems

Courses for Undergraduates

CHCS 458 Practice Teaching Community Health Nursing (3) Guided experience in selected teaching-learning research activities related to teaching-learning problems. A minimum of seven hours of guided experience weekly. Prerequisite: 450.

CHCS 492 Anthropology of Refugees (3) &S The refugee phenomenon, its emergence in postcolonial world, and structure of life history of refugees. Ethics change, involuntary devolution, and acculturation as they occur in refugee life histories. Prerequisite: ANTH 202 or permission of instructor. Offered: jointly with ANTH 492.

CHCS 495 Child Rearing, Culture, and Health (3) &S Cross-cultural study of the child-rearing practices, cultural norms, and health behavior of children and adolescents in different societies. Comparative approaches, diverse theoretical postures, and empirical findings. Prerequisite: permission of departmental advisor. Offered: jointly with ANTH 440.
Courses for Graduates Only

CHCS 501 Health Assessment for Advanced Practice (1-5, max. 5) Provides framework for systematic data collection, data recording, and accurate communication of health status data on individuals of all ages. Demonstrates of, and experiments with, the processes of symptom analysis and health screening with basically healthy individuals. Credit/no credit only. Prerequisites: graduate standing, permission of instructor.

CHCS 502 Dynamics of Community Health Practice (3/5) Examination of and experience with principles of clinical practice in community settings. Included are family as community constituent, populations at risk, community assessment, and community development. Prerequisites: graduate standing or permission.

CHCS 503 Advanced Fieldwork Community Health Nursing (2-6, max. 12) Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Application of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisites: graduate standing, permission of instructor.

CHCS 514 Seminar in Home Care for Chronic Illness (3) Home-care services as component of community health; planning, organization, and evaluation of nursing functions on care of chronically ill persons and their families. Selected field study experiences in community health settings. Prerequisites: 550, graduate standing, and permission of instructor.

CHCS 516 Communications in Complex Health-Care Systems (3) Forum for critically examining and conceptualizing various communication processes in complex health-care systems and their implications for practice. Analytic and theoretical perspectives for the study of communication within health care. Prerequisites: 571, permission of instructor.

CHCS 520 Methods of Research in Nursing (3) Research process as it applies to nursing. Use of the literature in building theoretical rationale. Selection of appropriate methods. Presentation of findings. Minimum of two laboratory hours weekly. Prerequisite: a course in statistics.

CHCS 521 Methods of Research in Nursing (2) Continuation of 520, with emphasis on methods of research applied to the solution of problems in all fields of nursing.

CHCS 524 Conceptual Foundations for Care Systems Management (3) Critical analysis of nature and theoretical bases of care systems management practice. Concepts of nursing and organization science foundations to person-provider transaction management and leadership in context of economic, political, and social environments and health outcomes. Prerequisite: 524 or permission of instructor.

CHCS 525 Managing Clinical Effectiveness Within Care Systems (3/4) Optimizing person-provider clinical therapeutic transactions at multiple levels of care systems complexity and population aggregation. Emphasis on designing, managing and evaluating clinical effectiveness and efficiency within care systems. Prerequisite: 524 or permission of instructor.

CHCS 526 Managing Organizational Effectiveness Within Care Systems (3/4) Application of management strategies for maintaining effective and efficient organizational structures and processes within health care systems. Prerequisite: 524 or permission of instructor.

CHCS 527 Managing Effective Access and Utilization Within Care Systems (2/4) A focus on the role of health care and resource allocation patterns among diverse populations, with emphasis on management strategies for establishing effective population system fit.

CHCS 528 Advanced Practice in Care Systems Management (4-9) Analysis of relationships between theory and practice in real-time conditions. Comparative analysis of structure and behavior of management approaches. Prerequisite: core courses in Care Systems Management.

CHCS 529 Seminar in Care Systems Management (3) Nursing science framework for analysis of the relationship between management and organizational change in care systems. Improving care through the use of leadership, quality improvement, and clinical and organizational effectiveness. For non-majors in care systems management.

CHCS 530 Advanced Community Health Nursing (3) Systematic inquiry into the nature and foundations of community health nursing. Analytic and theoretical perspectives on health risk assessment and nursing interventions in the community. Implications for community health nursing services. Prerequisites: permission of instructor and graduate standing.

CHCS 531 Theoretical Foundations of Primary Care (1-3) Presentation and interpretation of theoretical basis of advanced nursing practice in primary care. Provides students with conceptual foundation upon which to base their development as nurse practitioners. Prerequisites: graduate standing; permission of instructor.

CHCS 532 Health Promotion (2/3) Emphasis on health promotion, screening, and disease prevention in primary care. Examination of individual and family wellness, models of risk assessment and behavior change, health promotion strategies, and barriers to achieving health. Opportunity to explore age-related health risks. Prerequisites: graduate standing and permission of instructor; recommended: nurse practitioner students take fieldwork concurrently.

CHCS 533 Seminar in Primary Care I: Health Promotion (2) Weekly seminars with supervised field study weekly. emphasis on selected health promotion settings. Emphasis on health assessment and strategies related to improving health in people of all ages. Analysis of, and counseling on, life styles, nutrition, physical fitness, stress management, self-care, and prevention. Credit/no credit only. Prerequisites: graduate standing, permission of instructor.

CHCS 535 Seminar in Primary Care II and III: Management of Common Health Concerns (3-3) Focus on research questions, patient presentations, and group discussions drawn from field study. Supervised clinical field study within selected primary care health-care settings and weekly seminar discussions related to theory presented in NURS 510. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

CHCS 536 Seminar in Primary Care IV: Management of Common Health Concerns (3-3) Focus on research questions, patient presentations, and group discussions drawn from field study. Supervised clinical field study within selected primary care settings and weekly seminars. Discussions related to theory presented in NURS 510. Credit/no credit only. Prerequisite: permission of instructor; nurse practitioner students register for NURS 510 concurrently.

CHCS 539 Seminar in Primary Care V: Complex Clinical Decision Making (1-11, max. 11) Seminar with associated field study. Synthesis of advanced knowledge base and clinical family nurse practitioner skills with effective management of complex clinical problems. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

CHCS 561 Systems Analysis in Nursing Administra­ tion (3) Examines concepts and techniques in industrial engineering, system analysis, and operations research applicable to decision making, control and monitoring functions in nursing administration. Student demonstrates application and critical appraisal of concepts and techniques. Prerequisites: ADMIN 510, or equivalent, and permission of instructor.

CHCS 562 Clinically Applied Anthropology (3) Anthropology as it relates to interdisciplin ary delivery of culturally relevant health care. Cultural variation in the behavioral and cultural context of health practices, illness prevention, social support networks. Prerequisites: graduate standing, permission of instructor. Offered: jointly with ANTH 562.

CHCS 570 Occupational Stress and Stress Management (3) Relationships between occupational stressors and worker's health, well-being, productivity. Analyzes models of occupational stress; investigates similarities, differences between job-related stressors and stress responses in various occupations. Explores elements of work site stress management programs. Prerequisites: graduate standing in nursing or allied health discipline; advanced undergraduates with permission of instructor. Offered: jointly with PSN 570.

CHCS 571 Seminar in Nursing and the Social Order (3, max. 9) Changing patterns of nursing service and education in contemporary society. Implications of personal value systems. Prerequisite: permission of instructor.

CHCS 574 Selected Topics in Comparative Nursing Care Systems (2 or 3, max. 10) In-depth examination of the literature pertinent to major theoretical issues in cross-cultural nursing and health-care systems. Seminar with analysis and discussion of selected topics and readings. Implications for research and health care stressed.

CHCS 575 Death Inflation in Clinical Practice (2-4) Analysis and study of social, cultural, and psychological conditions that influence human death in modern society. Research findings, selected readings, and direct experience provide direction for examination of philosophic, theoretical, and pragmatic issues underlying choices and decisions in clinical practice. Open to graduate students with permission of instructor. (Limit: sixteen students.)

CHCS 578 Health, Care, and Community (3) Analysis of health care in community from nursing and health-care perspectives. Direct experience provides direction for examination of cultural influences on health beliefs and practices, natural-care units, and community life patterns analyzed. Community as both context and target of change explored in relation to nursing approaches in health promotion and maintenance. Prerequisite: graduate standing.

CHCS 580 Populations at Risk in the Community (3) Health needs and risks of selected populations in the community and theoretical and analytical perspectives on assessment and intervention strategies in community health nursing practice with groups and populations whose health is at risk. Prerequisites: graduate standing and permission of instructor.

CHCS 585 Seminar in Advanced Community Health Nursing (6) Construction and analysis of research questions, presentation of individual and group research design and methodology strategies in community health nursing. Individual and community assessment and nursing strategies related to health promotion and prevention of illness. Field study in community health setting. Prerequisites: graduate standing and permission of instructor.

CHCS 583 Transcultural Nursing Practice (3) Study of nursing practices in different cultures. Seminar is focused on theoretical formulations and comparative analysis of values, patterns, techniques, and prac-
COunseling

Nursing relation to the

Synthesis and evaluation of

situations.

PCN 501 Pediatric Health Assessment and Promotion (4) Gives experience in obtaining a health history and performing a physical assessment of infants, children, and adolescents. Interviewing techniques, problem-oriented charting, and a systems approach to the physical examination. Emphasis on screening principles, health promotion, and wellness care for children/families. Credit/no credit only. Prerequisite: permission of instructor.

PCN 504 Common Child Behavioral Problems, Part III (2-4, max. 4) Focuses on process of assessment, integration of research findings into clinical decision-making, and management of common pediatric behavioral and psychological problems. Includes concepts of prevention, self care, anticipatory guidance, and family involvement in formulation management strategies. Emphasizes relationships between the medical and psychological aspects of pediatric illness in families.

PCN 505 Seminar: Counseling and Educational Approaches in Child Health Care (1/3) Focuses on theory, practice, and issues involved in conducting health-related groups. Special emphasis on counseling process. Alternative approaches to educating communities about health-care issues. Clinical experiences designed to assist students in developing and conducting health-related groups in various settings in the community; permission of instructor.

PCN 508 Health Patterns Across the Lifespan (3) Conceptually oriented focus on health across the lifespan. Emphasizes issues central to the developing person; how transactions with environment influence personal growth. Patterns of health provide framework for integrating nursing concepts with selected theories of growth and development.

PCN 509 Women's Health: A Nursing Perspective (3) Critical analysis of contemporary and historical works relevant to nursing care for women across the life span. Synthesis of a holistic view of women's health to guide clinical care and research. Prerequisite: graduate and senior undergraduate students.

PCN 511 Seminar in Neonatal Nursing (3) Neonatal neurobehavioral and physiologic adaptation within context of physical and social environment. Neonatal responses to alterations in growth and illness. Assessment methodologies and therapeutic strategies used during the newborn period. Prerequisite: 529 or permission of instructor.

PCN 512 Advanced Practice in Parent and Child Nursing I (2-12, max. 25) Clinical seminar and practicum provide opportunities to develop advanced nursing practice competencies in the care of women, parents, children, and adolescents. Application of theory and principles to direct care, consultation, education, and/or care coordinator roles with individuals and/or groups.

PCN 514 Coping Strategies of Well and Sick Children (3) Gaining knowledge and skill in helping well and sick children adapt to supportive and nonsupportive environments. Fit between coping strategies and environment, adaptation to environment, adjustment of environment to child's needs. Prerequisite: course in growth and development or permission of instructor.

PCN 515 Wellness Care for Children and Their Families (1-5) Concepts and issues related to wellness, health maintenance, promotion and prevention of illness for well children and children with special needs. Models of wellness and intervention, appropri-

ate nursing diagnoses, assessment, and intervention approaches for various areas of wellness (physical, social, emotional, and spiritual) and the nurse's role. Prerequisite: permission of instructor.

PCN 516 Nursing Management of Acutely Ill Children and Their Environments (1-5) Nursing management of children with acute illnesses. Scientific principles, theories, and research used in planning, implementing, and evaluating nursing care of children at different levels of acuity and their families. Prerequisites: permission of instructor.

PCN 517 Advanced Clinical Seminar in the Nursing of Children (2-6) Synthesis and evaluation of scientific principles and research findings for care collaboration with other health professionals. Development of specialized roles. Social and environmental issues. Prerequisites: core courses, 516 or permission of instructor.

PCN 518 Pediatric Pulmonary Anatomy and Physiology: Clinical Applications (2) Lung development, anatomy, and physiology; clinical application when caring for children with acute and chronic lung disease. Prerequisite: permission of instructor.

PCN 519 Pediatric Pulmonary Nursing (2-5) Applies knowledge of pediatric anatomy and physiology to assessment and treatment of pulmonary pathophysiology in children. Nursing issues in caring for children and families with acute and chronic lung disease. Prerequisite: permission of instructor.

PCN 520 Methods of Research in Nursing (3) Research process as it applies to nursing. Use of the literature in building theoretical rationale. Selection of appropriate methods. Presentation of findings. Minimum of two laboratory hours weekly. Prerequisite: course in statistics.

PCN 521 Methods of Research in Nursing (2) Continuation of 520, with emphasis on methods of research applied to the solution of problems in all fields of nursing.

PCN 528 Implications of Human Embryology and Genetics for Clinical Practice (3) Normal development of the human embryo and fetus and principles of human genetics. Alterations in development leading to common abnormalities and implications for clinical practice. Prerequisite: graduate standing or permission of instructor.

PCN 529 Physiologic Adaptation in Women and Children (1-6) Analysis of developmental physiologic adaptations in four units: women/reproductive processes; newborn infant; healthy newborn infant and infancy through adolescence. Emphasis on implications for nursing practice. Examination of research basis for selected intervention strategies.

PCN 530 Conceptual Frameworks for Parent-Child Nursing (3) Designed to assist graduate students in exploration, criticism, and analysis of selected concepts, frameworks, and models relevant to parent-child nursing practice. Group seminar work focuses on the discussion of issues influencing the roles and practices of clinical specialists in parent-child nursing. Skills necessary for developing a conceptual framework for practice.

PCN 531 Nursing Process in Parent-Child Nursing (4) Includes lecture, seminar, and laboratory instruction designed to assist the student with knowledge and skill acquisition needed in nursing care of individuals and families with respect to childbearing and child-rearing. Prerequisite: 530.

PCN 532 Professional Issues in Advanced Parent and Child Nursing (2-5) History and current issues in advanced parent and child nursing practice and interpersonal relationships and community context. Credit/no credit only. Prerequisite: permission of instructor.

PCN 533 Children with Chronic Health Conditions (1-6) Theory and research analyses of physical problems, behavioral responses, and psychosocial hardships. Applications of interventions and case management strategies that prevent handicaps and maintain, promote or restore health of infants, children, adolescents with chronic health conditions, family, and community context. Required laboratory and optional clinical experiences. Prerequisite: permission of instructor.

PCN 536 Behavioral Change Strategies: Children and Their Families (3) Analysis of behavioral change paradigms that promote the child's and adolescent's growth and development. Selection of specialized roles, interventions, and goals within the context of the family, community, and physical environment. Treatment strategies based on the integration of behavioral, cognitive, affective, and social learning models. Prerequisite: permission of instructor.

PCN 537 Interpersonal Therapeutic Relationships and Processes: Children and Their Families (1-5) Analyze conceptual models and research on interpersonal relationships and processes for developing communication and partnerships among professionals and, families, professionals, and children/families. Individual and group therapeutic approaches that promote caring and enhance empowerment, interpersonal functioning, and health behaviors. Required helping skills laboratory, optional clinical experiences. Prerequisite: permission of instructor.

PCN 538 Family Adaptation During Childhood and Adolescence (3) Analysis of conceptual models and research in family support, stress, and functioning. Multidirectional influences and interactive patterns among the child, family, and community. Family assessment, diagnosis and therapeutic intervention that promote family adaptation and reduce the associated hardships that may be handicapping. Prerequisite: permission of instructor.

PCN 540 Physical Therapeutics: School Age Children and Adolescents (2-6) Theory and research analysis of physical problems, biobehavioral responses, and psychosocial hardships. Adaptive physical and technological interventions that prevent handicaps and maintain, promote, or restore health of school-age children and adolescents within a developmental, family, institutional, and community context. Optional laboratory and clinical experiences. Prerequisite: permission of instructor.

Theoretical Foundations of Advanced Practice Nursing

PCN 541 Care of Well Women (4) Examines components of the advanced nursing/midwifery care of well women. Emphasis on assessment, diagnosis, and management of common health issues and problems of women across the life span. Prerequisite: permission of instructor.

PCN 542 Care During Childbearing I (4) Advanced nursing/midwifery care and management of the low-risk childbearing woman and fetus through conception, prenatal, intrapartum, and postpartum periods. Prerequisite: 529.

PCN 543 Care During Childbearing II (4) Advanced nursing/midwifery care and management of the low-risk childbearing woman and fetus through conception, prenatal, intrapartum, and postpartum periods. Primary management, collaborative management, and referral of at-risk clients. Prerequisites: 529 and 542 or permission of instructor.

PCN 544 Psychosocial Adaptations of Individuals and Families during the Perinatal Period (3) Adaptation of individuals and families during the perinatal period, with emphasis on psychosocial adaptation, consumer education, transition to parenthood, parent-infant interaction and community based support. Prerequisite: permission of instructor.

PCN 545 Care of the Neonate and Infant (2) Adaptation of neonate to the extraterine environment and...
continuum of care to promote the health of infants within the context of family, community, and other environments. Prerequisites: 520, 529, or permission of instructor.

PCN 573 Selected Topics In Parent and Child Nursing (1-4, max. 12) In-depth examination of the literature pertinent to major theoretical issues in parent and child nursing. Seminar with analysis and discussion of selected topics and readings. Implications for research, prevention, and health care stressed. Prerequisite: permission of instructor.

PCN 600 Independent Study or Research (*) Credit/no credit only.

PCN 700 Masters Thesis (*) Credit/no credit only.

**Physiological Nursing**

Courses for Undergraduates

PN 445 Topics In Physiological Nursing (1-10, max. 10) Guided survey and discussion of current literature on major topics in physiological nursing. Seminar/lecture with analysis and discussion of selected topics and readings. May have clinical component. Implications for nursing practice and health care emphasized. Prerequisites: nursing majors, permission of instructor.

PN 488 Continuing Education In Nursing (3) Planning, developing, and evaluating continuing education programs in various institutions and agencies. Includes the application of adult learning principles to a variety of situations, such as workshops, in-service and staff development programs. Prerequisite: graduate standing.

Courses for Graduates Only

PN 502 Human Responses In Health and Illness I (3) Survey of selected human responses to environmental demands in health and illness as expressed at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as host defenses, ventilation, circulation, elimination, and nutrition are discussed. Prerequisite: graduate standing.

PN 503 Human Responses In Health and Illness II (3) Survey of selected human responses to environmental demands in health and illness at physiologic, pathophysiologic, and behavioral levels. Such concepts as immune response, stress response, circadian rhythms, pain, sleep, cognition, and consciousness. Prerequisite: graduate standing.

PN 504 Clinical Nursing Therapeutics (1-6, max. 6) Critical analysis of therapeutic modalities to assist patients with a variety of responses to health problems. Includes selected therapies such as suction/drainage, positioning, and addressing responses in critical, life-threatening, and chronic/continuing health states. Varying credits assigned for modules covering particular therapies. Prerequisites: 502, 503, or permission of instructor.

PN 509 Practice Teaching In Physiological Nursing (3) Guided experience in selected teaching-learning situations in nursing, in both classroom and clinical situations. Identification, analysis, and solution of teaching-learning problems in clinical nursing. Minimum of seven hours of guided experience weekly.

PN 510 Curriculum Development in Nursing Education (3) Theoretical rationale for curriculum development, study of curricular problems in nursing in relation to the elements of the curriculum as described in a curricular design. Prerequisite: graduate standing.

PN 511 Evaluation of Clinical Performance In Nursing (3) For graduate students preparing for faculty or staff development positions in nursing. Theory and principles of evaluation. Instruments to appraise clinical nursing performance developed as part of course requirements. Prerequisite: graduate standing or permission of instructor.

PN 520 Methods of Research In Nursing (3) Research process as it applies to critique and conduct of nursing science. Use of the literature in building theoretical rationale. Selection of appropriate methods. Presentation of findings. Minimum of two laboratory hours weekly. Prerequisite: course in statistics.

PN 521 Methods of Research In Nursing (2) Continuation of 520, with emphasis on methods of research applied to the solution of problems in all fields of nursing.

PN 541 Clinical Physiological Nursing Seminar I (1-10, max. 10) Guided experience in nursing practice with selected individuals in a specialized field of nursing. Synthesis and application of relevant principles and theories from biological, behavioral, and pathologic sciences; proficiency in comprehensive nursing assessments, interventions, and evaluations; effective collaborative functioning as a member of the health team.

PN 542 Seminar In Cardiovascular Nursing (3) Systematic inquiry into the influence of physical and emotional factors on pathophysiology underlying selected cardiovascular conditions; group study of current therapies with emphasis on prevention and rehabilitation—individual study of topic of interest.

PN 543 Seminar In Nursing In Gerontology (3) Gerontological research findings applied to complex nursing problems in maintenance of health and maximum functioning in the aged.

PN 544 Clinical Physiological Nursing Seminar II (1-10, max. 20) Continuation of 541. Guided experience in selected situations in area of clinical interest. Minimum of seven hours of guided experience weekly. Prerequisite: 541.

PN 545 Special Topics In Physiological Nursing (3-6, max. 8) Guided survey of the experimental literature of major physiological nursing, including cardiopulmonary, biology of aging, neuromuscular, cancer, and endocrine. Course conducted as a seminar with analysis and discussion of selected topics and readings. Implications for future research and health care are emphasized.

PN 546 Rehabilitation Nursing Seminar I (3) Analysis of selected theoretical components underlying rehabilitation and utilization of scientific rationale in clinical nursing studies, with emphasis on prevention and maintenance.

PN 548 Management of Adults With Respiratory Dysfunction (3) In-depth examination of problems such as abnormal respirations and shortness of breath associated with respiratory dysfunction due to pulmonary and other pathophysiological states.

PN 549 Seminar In Critical-Care Nursing (3, max. 9) Systematic inquiry into pathophysiology, initial nursing management, and systems of care for the critically ill adult or child.

PN 550 Seminar In Neuroscience Nursing (3) Guided survey of clinical and experimental literature regarding selected concepts of human functioning mediated by the nervous system: consciousness, mentation, movement, sensation, integrated regulation, coping with disability. Clinical and research measurement, current research and implications for further research, clinical applications.

PN 570 Seminar In Clinical Research In Nursing (3) Philosophy, problems of design; use of criterion measures in terms of patient care.

PN 600 Independent Study or Research (*) Credit/no credit only.

PN 700 Masters Thesis (*) Credit/no credit only.

**Psychosocial Nursing**

PSN 485 Effects of Alcohol and Its Relation to Health and Disease (3) Intensive inquiry into the effects of alcohol on the total person, emphasizing physiological effects, utilizing case studies, research reports, and audiovisual materials. Focus on methods used in the assessment of patients, in patient management, and in evaluation of therapeutic Intervention. Open to seniors in other disciplines. Prerequisite: permission of instructor.

PSN 489 Alcohol Problems In Family and Society (3) Analysis of family problems associated with alcohol. Emphasis on psychosocial, cultural, and social implications; examination of various counseling practices employed and theories of prevention. Open to upper-division and graduate students. Prerequisite: permission of instructor.

UCON 490. Social Sensitivity In Health Care (3) For course description, see Intercollegiate or Interschool Programs.

Courses for Graduates Only

PSN 500 Theories In Interpersonal Systems In Psychosocial Nursing (3) Empirical and theoretical literature on etiology and treatment of chronic mental illness in a sociocultural framework. Social networks and personality development, adaptation to stress, and chronic mental illness. Implications for research and implementation of nursing intervention strategies and mental health programs.

PSN 501 Foundations In Psychosocial Nursing (3) Introduces students to Psychosocial Nursing by study of classic published papers. Current status of the specialty analyzed by review of standards of practice, certification criteria, and discussion of ethical, clinical, and educational issues. Examines visions and projected needs for the future.

PSN 503 Seminar In Psychosocial Family Theory (4) Examination of theories relevant to psychosocial family intervention into problems of children, adults, and the aged. Analysis of appropriateness of theories for nursing theory development, practice, and research.

PSN 504 Theories Of Intervention And Process In Family And Child Treatment (3) Critical review of the family assessment and intervention process. Analysis of existing treatment methods regarding adaptation to psychosocial nursing practice. Prerequisite: 503.

PSN 505 Selected Topics In Psychosocial Nursing (2-10, max. 10) In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and health care.

PSN 507 Behavior And Adaptation: Elder Adults (3) Theory and research of behavior and adaptation in elder adults. Functional impairments within person-environment contexts. Intervention strategies based on psychodynamic, development, cognitive-behavioral, role theory, somatic, and self-help models. Prerequisite: permission of instructor.

PSN 509 Issues In Violence And Aggression For Health Professionals (3) Focuses on research and professional perspectives of victim, offender, family, community, society examined. Focus is recognition of violence against women. Course is designed to challenge students to clarify beliefs, values related to topics such as rape, homicide, domestic violence. Prerequisite: graduate nursing student or permission of instructor.

PSN 510 Group Work With High-Risk Youth (3-6) Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug use, increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.

PSN 511 Psychosocial Approaches To Assessment And Management Of Pain (3) Critically analyzes and integrates psychological and sociocultural models.
of acute and chronic pain. Commonly employed psychosocial, pain assessment, and treatment modalities reviewed and evaluated. Non-pharmacological and non-invasive therapies evaluated for efficacy in treating pain. Prerequisite: advanced undergraduate or graduate studies in nursing, psychology, dentistry, medicine, or allied health professions.

PSN 510 Seminar In Group Treatment (3) Seminar on the theoretical basis for working with various group treatment models. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

PSN 515 Memory Theory and Implications for Health Care (3) Presents comparative analysis of research, theories of memory and their physiological basis. Means of measuring memory are critically evaluated. Current clinical problems and the therapeutic and care interventions using memory theory and rehabilitation are evaluated. Prerequisite: graduate or advanced undergraduate standing, or GNM or NM standing with permission of instructor.

PSN 516 People of Color, Psychosocial Health, and the Culture of Oppression (3) Explores relationships among the psychosocial health of people of color, their American cultural patterns of interacting forms of oppression, including race, gender, and class, and the role of health professionals in defining, ameliorating, and/or aggravating psychosocial distress. Prerequisite: experience with mental health professionals and ethnic identities among various people of color.

PSN 520 Methods of Research in Nursing (3) Research process as it applies to nursing. Use of the literature building theoretical rationale. Selection of appropriate methods. Presentation of findings. Minimum of two laboratory hours weekly. Prerequisite: course in statistics.

PSN 521 Methods of Research In Nursing (2) Continuation of 520, with emphasis on methods of research applied to the solution of problems in all fields of nursing.

PSN 526 Program Planning and Program Evaluation in Health Service Delivery (3) Analysis of selected theories and methods of program planning and program evaluation in the design, organization, and development of health services for defined populations in the community. Prerequisite: graduate standing or permission of instructor.

PSN 528 Field Study in Evaluative Analysis for Health Care Programs (3, max. 6) Field study in evaluation. Experience includes preevaluation studies; consultation with community members and agency personnel to operationalize health-care program objectives in terms of goals; construction of evaluation protocols; and assessment of program functioning. Credit/no credit only. Prerequisite: 526.

PSN 529 Practicum In Group Treatment (2-6) Supervised experience working as primary therapist or co-therapist in a group. Opportunity is provided to practice selected therapeutic techniques in therapeutic groups, under the supervision of a nursing faculty member. Credit/no credit only. Prerequisites: 513 or equivalent, which may be taken concurrently, and permission of departmental adviser.

PSN 550 Interpersonal Aspects of Behavior (3) Selected theories in relation to psychosocial development and functioning across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

PSN 551 Biologic Aspects of Psychosocial Disabilities (3) Analysis of biological processes influencing psychosocial behavior in response to external and internal stimuli. Research and theory of neuroendocrine mechanisms in psychosocial disabilities. Analysis of nursing management and evaluation of bio-psychosocial modalities used in modification of behavior. Prerequisite: graduate standing in nursing or permission of instructor.

PSN 552 Socioecological Dimensions of Community Mental Health (3) Socioecological and sociocultural theories of mental health disabilities analyzed. Conceptual trends and intervention strategies evaluated with community and client-centered emphasis on mental health service delivery to high-risk and underserved populations, including the moderately and severely mentally disabled. Prerequisite: graduate standing in nursing or permission of instructor.

PSN 553 Assessment In Psychosocial Nursing (3) Concepts, methods, and clinical approaches to psychosocial nursing assessment. Basic principles of measurement as they apply to psychosocial nursing assessment and diagnosis and intervention. Knowledge synthesized from psychosocial nursing and allied disciplines tested. Clinical assessment laboratory included. Prerequisite: graduate standing in nursing or permission of instructor.

PSN 554 Psychosocial Interventions In Nursing (3) Conceptual foundations and interpersonal skills for interventions to promote personal change. Application made to nursing care of persons with psychosocial or physical health problems. Lecture-discussion and in-class practice. Prerequisites: graduate standing in nursing or permission of instructor.

PSN 555 Advanced Clinical Therapeutics Seminar (4) Opportunities to test and evaluate selected theories presented in 554. Faculty and preceptor supervision in clinical agencies guide students' therapeutic skills in working with individuals, groups, and families. Collaborative interactions with interdisciplinary team members. Prerequisite: concurrent registration in 554, or permission of instructor.

PSN 556 Theories of Substance Use Disorders: Psychosocial and Biological Aspects (3) Psychosocial and pathophysiologic aspects of substance use examined for their effects on individuals and families throughout life span. Teachers and empirical findings serve as basis for evaluating preventive and therapeutic nursing approaches to substance use disorders, including those related to target populations. Prerequisite: basic course in biological sciences.

PSN 557 Clinical Seminar In Substance Use Disorders I (3-6) Treatment of individuals and families with substance-use-related disorders. Students function as primary or co-therapists in application and evaluation of selected therapeutic interventions, including weekly seminars analyze student/therapist interactions. Credit/no credit only. Prerequisite: prior or concurrent registration in 556.

PSN 558 Advanced Clinical Seminar In Substance Use Disorders II (3-4) Practicum with opportunities for advancement of skills in therapeutic interventions and involvement in community-linked substance-use-disorder issues. Students engage in therapeutic interventions, coordinate community health-care resources, and design a prevention program for target populations within context of regional laws and policies. Credit/no credit only. Prerequisite: 557.

PSN 559 Theories of Psychiatric Disabilities (3) Theories from psychosocial nursing, psychiatry, and behavioral sciences provide basis for identifying psychosocial problems and developing nursing diagnoses. Structure and functions of mental health organizations and social work agencies are examined for professional effectiveness and management by nurses. Prerequisites: 500 and 551 or permission of instructor.

PSN 560 Advanced Clinical Seminar In Psychiatric Disabilities I: Community (3-6) Supervised psychosocial nursing experience with clients in psychiatric treatment programs. Treatment settings, such as community mental health centers, partial hospitalization, and concert facilities are viewed as social systems. Weekly seminars provide analysis of client/student interaction. Credit/no credit only. Prerequisite: prior or concurrent registration in 559, or permission of instructor.

PSN 561 Advanced Clinical Seminar In Psychiatric Disabilities II: Institutions (3-6) Mental hospital and psychiatric unit viewed as social systems. Clinical practice in institutional setting focuses on planning, evaluating psychosocial nursing care programs. Effects of organizational dynamics on client populations analyzed. Intervention theories tested. Analyzes client/student interaction. Credit/no credit only. Prerequisite: prior or concurrent registration in 559, or permission of instructor.

PSN 562 Theoretical Basis of Management of Stress Response (3) Theories of physiologic responses linked to theories of cognitive/affective and behavioral reactions. Conceptual basis of self-management techniques. Research findings relevant to these theories and techniques examined and analyzed. Prerequisites: course in human physiology or physiologic psychology, permission of instructor.

PSN 563 Clinical Seminar In Management of Stress Response I (3-6) Theory and application of self-management training for dysfunctional stress responses. Demonstration/training in relaxation, biofeedback instrumentation, and supervision of self-management program conducted by students. Credit/no credit only. Prerequisites: 562, human physiology course.

PSN 564 Advanced Clinical Seminar In Management of Stress Response II (3-6) Supervised field experience in self-management techniques for clients with dysfunctional stress responses such as headache and hypertension. Supervised clinical application of biofeedback and stress counseling for selected psychophysiological disorders. Prerequisite: 563 or permission of instructor.

PSN 565 Self-Management Strategies and Techniques In Patient Care (3) Theories underlying cognitive/behavioral self-management strategies and techniques in patient care. Evaluation of the appropriateness and utility for nursing. Application to such client problems as substance dependence, the recovering alcoholic, depression, and eating disorders. Prerequisite: graduate standing or permission of faculty.

PSN 566 Consultation In Human Service Systems (3) Exploration of theoretical perspectives and concepts relevant to consultation in human service systems. Models for intervention evaluated. Students design consultation projects, implementation determined through negotiation with faculty and agency representatives. Prerequisites: fourth-quarter placement or faculty permission; access to consultee system.

PSN 570 Occupational Stress and Stress Management (3) Relationships between occupational stresses and worker's health, well-being, productivity. Analyzes models of stress and burnout. Investigates similarities, differences between job-related stresses and stress responses in various occupations. Explores elements of wellness stress management programs. Prerequisites: graduate standing in nursing or allied health discipline; advanced undergraduates with permission of instructor. Offered: jointly with CHCS 570.

PSN 600 Independent Study or Research (*) Credit/no credit only.

PSN 700 Masters Thesis (*) Credit/no credit only.
College of Ocean and Fishery Sciences

Dean
G. Ross Heath
557 Henderson

Associate Dean
Loveday L. Conquest

The marine environment has been a dominant factor in the history of the Pacific Northwest from the time of the first Indian settlements to the modern day of container ships and waterfront condominiums. It is not surprising, therefore, that the University has a long tradition of commitment to teaching, research, and public service in the marine and freshwater area.

The College of Ocean and Fishery Sciences, the newest college at the University, comprises five major units in the marine and freshwater sciences. Established in September 1981, the College consists of the Applied Physics Laboratory, the School of Fisheries, Marine Affairs, and Oceanography. It also administers the Office of Marine Environmental and Resource Programs, which includes the Washington Sea Grant Program.

One of the major achievements in this area was the designation of the University in 1971 by the U.S. Secretary of Commerce as a Sea Grant College. Along with the University of Rhode Island, Texas A&M University, and Oregon State University, the University of Washington was one of the first four universities so designated in recognition of outstanding sustained programs in research, education, and advisory services in the marine area.

In 1983, the College had a total of 167 undergraduate and 93 graduate enrolled, a faculty of 159 members, and a total budget of $52 million, making it one of the largest institutions of its kind in the nation.

Office of Student Services

Through the Office of Student Services, the College of Ocean and Fishery Sciences offers learning experiences for students through internships, cooperative education work experience, and permanent employment. Students are encouraged to participate in field placements that provide valuable practical experience to bridge the transition from the classroom and the laboratory to employment after graduation.

Local and national job listings and a career information library are continually updated in the Career Center. Additional information may be obtained from Pat Caver, Director, Office of Student Services, 551 Henderson.

Fisheries

204 Fisheries Center

The School of Fisheries, which was established in 1919, offers courses and conducts research on the conservation, management, and effective use of fish and shellfish resources. Education and research in the School include studies of aquatic ecology; population dynamics; management of marine and shellfish resources; effects of human activities on aquatic/marine ecosystems. Faculty and students in the School draw upon the disciplines of zoology, biology, botany, statistics, chemistry, physics, and mathematics to conduct basic and applied research in the field of fishery science.

Joint Curriculum in Fishery Management:
The School of Fisheries and the School of Marine Affairs offer a joint curriculum in fishery management, consisting of parallel two-year master's programs. The curriculum is designed to provide professional fisheries managers with the skills needed to participate effectively in contemporary fishery management. These skills require a multidisciplinary education in biology, economics, quantitative methods, law, political science. Students may enter the fisheries management master's program through either the School of Fisheries or the School of Marine Affairs and must meet the thesis and other requirements of their School.

Research

The faculty, staff, and students of the School of Fisheries conduct basic and applied research on regional, national, and international fishery problems. Examples of research projects include the following:

In the field of fisheries management—development of strategies for enhancing inland recreational fishing, reduction of by-catch in the North Pacific through improvements in fishing gear design, influence of physical oceanographic factors on recruitment of larval fish and shellfish. In the field of aquaculture—identification of hormone receptors involved in reproduction and smoltification, development of DNA probes for rapid identification of pathogens, manipulation of chromosome complement to select for desirable traits in culture lines of salmon and shellfish. In the fields of evolutionary biology and ecology—application of polymerase chain reaction to the study of taxonomy, behavioral studies of homing and straying in Pacific salmon, analysis of endocrine interactions in Pacific Northwest salmon. In the field of habitat protection—contaminant transport through aquatic food chains, effects of forest practices on fish habitat, development of mitigation measures for restoring damaged wetlands. In the field of resource utilization—determination of fat content in edible fish tissue using non-invasive technology, development of tech-
niques for tracing sources of contamination in shellfish beds, techniques to enhance the nutritional value of seafood products.

Researchers in the School of Fisheries collaborate with scientists within the University and with investigators employed by other agencies. The School benefits from the presence in Seattle of laboratories of the National Marine Fisheries Service, the U.S. Fish and Wildlife Service, and the Washington State Department of Fish and Wildlife. The headquarters and research staff of the International Pacific Halibut Commission are located on the campus as well. In addition, researchers collaborate with the scientific staff of private companies located in the Puget Sound region. School of Fisheries researchers frequently participate in inter-institutional projects that involve scientists from other states and from other countries.

The research program is enhanced through the activities of several institutes and centers that are housed within the School of Fisheries.

The Fisheries Research Institute coordinates research throughout the School. Long-term projects include research on the origins, abundance, migratory patterns, and ocean distribution of Pacific salmon and steelhead trout; spawning distribution, growth, and abundance of sockeye salmon in Alaska's Bristol Bay; environmental (physical and biological) factors influencing salmonid productivity.

The Institute for Food Science and Technology conducts research on seafood composition, safety, processing, nutrition, and related food science topics.

The Washington Cooperative Fish and Wildlife Research Unit is supported by the U.S. Department of Interior through the National Biological Survey and the Wildlife Management Institute, and by the Washington State Department of Natural Resources, and Fish and Wildlife. The unit conducts research related to inland fisheries management and to wildlife conservation.

The Center for Streamside Studies is an interdisciplinary unit of the College of Forest Resources and the School of Fisheries. The center conducts research related to management issues that surround the production and protection of forest, fish, wildlife, and water resources associated with streams and rivers in the Pacific Northwest.

The Western Regional Aquaculture Consortium is one of five regional aquaculture centers supported by the U.S. Department of Agriculture. Participating scientists from twelve Western states conduct research that is directed toward enhancement of commercial aquaculture production.

Facilities and Services

The Fisheries Center, the Fisheries Teaching and Research Building, and the Marine Studies Building are located adjacent to the Lake Washington Ship Canal. The buildings contain classrooms, laboratories, and support facilities. The Fisheries-Oceanography Library, a branch library offering research materials in fisheries, food science, oceanography, and wildlife science, is located in the Oceanography Teaching Building nearby. The collections of fishes and invertebrates now total some 225,000 specimens, representing more than 3,200 species in 237 families.

An annual run of several thousand salmon has been developed and is maintained at the School by the release of thousands of fingerlings each spring. Returning adults utilize a fish ladder to enter the School's experimental fish hatchery. The run is the basis for both instructional and research work, including netting, purse seineing, and trawling. These vessels are used in regular courses or training cruises to introduce students to shipboard operations.

Fisheries field stations in Alaska and at Big Beel Creek on Hood Canal provide additional opportunities for field studies and research in stream and estuarine ecology.

Seafood research facilities, located in the Marine Studies Building, include well-equipped laboratories for microbiology, biochemistry, and analysis. The seafood-processing and -engineering laboratory pilot plant comprises several facilities containing equipment for teaching and experimental work in applied areas of unit operations and processing.

Fisheries Club

Students formed the Fisheries Club in 1922. Since its beginning, the club has been a center of extracurricular social and educational activities.

Food Science Club

This club promotes interest in food science and seafood technology. It works closely with the Puget Sound section of the Institute of Food Technologists.

Financial Aid

The School offers limited financial assistance to undergraduate and graduate students through scholarships. The Handbook of Scholarships, available from the Office of Student Financial Aid, 105 Schmitz, lists other available scholarships.

Employment

The College of Ocean and Fishery Sciences' Office of Student Services maintains a file of permanent and temporary job opportunities for its students. Both summer and part-time employment during the scholastic year are frequently available with the research organizations that are associated with the School of Fisheries on or near the campus and elsewhere in the Pacific Northwest. The Fisheries Research Institute normally hires a few students for summer work in the field and usually has several part-time positions available during the school year.

Students receiving degrees in fisheries find employment in varied fields. Some graduates pursue careers in resource management agencies such as the National Marine Fisheries Service, the U.S. Fish and Wildlife Service, the Northwest Indian Fish Commission, and state departments of fisheries or wildlife. Some work for enforcement agencies such as the U.S. Environmental Protection Agency, the U.S. Food and Drug Administration, or state or local departments of environmental quality. Many graduates find employment in the private sector, working for aquaculture companies, the seafood industry, the recreational fishing industry, and environmental consulting firms. Employment in international projects is available through organizations such as the Peace Corps, the United Nations Food and Agriculture Organization, the Agency for International Development, the World Bank, and private industry. Positions in academic institutions are open to students completing advanced degree programs.

Undergraduate Program

The School offers the Bachelor of Science in Fisheries degree.

High School Preparation

Students are urged to take four years of college preparatory mathematics (usually including precalculus or mathematical analysis), because these are prerequisites for the mathematics courses included in all School of Fisheries curricula. Taking high school courses in chemistry, physics, and biology and training in computer use will prove to be valuable to the fisheries student.

Admission as a Fisheries Major

Students who wish to major in fisheries must be students in good standing in the University and must declare a major following University-wide guidelines.

After notification of admission and before registration, new students should visit or write to the School of Fisheries for help in planning their course programs. Academic and other counseling of fisheries students is provided through the Office of Student Services.

Bachelor of Science in Fisheries

The baccalaureate degree requires completion of a core curriculum and no fewer than 40 credits in fisheries. The program includes the subjects listed below or their equivalents. Each student must meet the general University requirements for graduation.

Individuals & Societies and Visual, Literary, & Performing Arts: Minimum 10 credits in each area.

Writing Proficiency: (minimum of 12 credits) 5 credits of composition drawn from the University list, and at least 7 additional credits of writing-intensive courses.

Fishery Sciences: (30 credits required courses, plus a minimum of 15 credits in 400-level fisheries courses, and 3 credits in FISH 488, 499, or FSC 498; FISH 210 (5), 310 (5), 310 (5), 311 (5), 312 (5), 323 (3), 324 (4), 325 (4)).

Additional elective courses should be taken to bring the total to 180 credits. Assistance in selection of elective courses can be obtained from advisers in the School. Students wishing to specialize in aquaculture, environmental science, seafood science, or fishery management may obtain flyers listing recommended courses in 213 Fisheries Center.

Minors

Minor Requirements—Fisheries Science: Minimum of 27-28 credits to include FISH 310 (5 credits) or 311 (5); FISH 312 (4); FISH 323 (3) or 324 (4) or 324 (5); SCI 341 (5) or 482 (5); 10 additional credits of fisheries courses at the 400 level.

Minor Requirements—Food Science/Seafood Science: Minimum 31 credits to include FISH 324 (4 credits), 452 (4), 470 (5), 480 (5), 490 (5); ENV 441 (3); MICRO 301 (3), 302 (2).
Graduate Program

Thomas Quinn
Graduate Program Coordinator

The School offers programs leading to the Master of Science and Doctor of Philosophy degrees.

Admission Requirements

Basic requirements for admission to the graduate program in the School of Fisheries are a bachelor's degree from an institution of recognized standing, a GPA of 3.00 in the last two years of college work and approval of the School of Fisheries and the Graduate School. Students enter the School from varied disciplines at many universities. All have in common a strong background in the sciences and mathematics. Previous training in fisheries is not required.

Applicants for the graduate program must submit a completed application form and description of their interests and objectives. GRE scores (general portion only is required), transcripts of all previous college course work, three letters of recommendation, and a TOEFL score (only for applicants who are non-native English speakers). Applications must be submitted prior to December 31. Admissions are limited to autumn quarter. Final acceptance is contingent on matching each incoming student with a faculty member having compatible research interests. Applicants may contact the School of Fisheries Office of Student Services for complete application materials, including a list of faculty and their research interests.

Master of Science Degree

Any graduate student without a previous master's degree from a recognized school is expected to start at the master's degree level. At least one year of study, with completion of a thesis project, leads to the Master of Science degree. A minimum of 45 senior or graduate credits must be earned including 18 credits of thesis research. Students must take 15 credit hours of specified courses (the graduate core curriculum). A seminar on the results of the thesis research and an oral defense of the thesis are required for graduation. There is no foreign language requirement for the master's degree. Further details can be obtained from the School's Office of Student Services.

Doctor of Philosophy Degree

The student must complete at least three years of graduate study and complete a dissertation to earn the Ph.D. Certain credits earned in conjunction with a master's degree program may be applied toward the doctoral program. The same graduate core curriculum as required for the master's degree must be completed unless the student has already taken these courses at the School of Fisheries or their equivalent. One academic year of foreign language with passing grades or equivalent competency is required. Students must pass written and oral General Examinations during their second year of residency. Presentation and defense of a dissertation proposal is normally a part of the oral examination. Further details can be obtained from the School's Office of Student Services.

Financial Aid

General information on graduate student support is available from the Office of Student Financial Aid, 105 Schmitz. Scholarships, fellowships, and teaching and research assistantships are available from a wide variety of sources for qualified graduate students. Most student support comes from research grants and contracts under the direction of individual professors. Graduate applicants are, therefore, urged to discuss their financial needs with professors in their potential major fields and with the graduate program coordinator during the early stages of the graduate application process.

Correspondence and Information

A package of materials describing courses, listing more specific procedures for applying for graduate admission, and giving details of faculty research and activities is available from the Graduate Program Assistant, 213 Fisheries, WH-10; (206) 543-7457.

Director

Marsha L. Landolt

Professors

Armstrong, David A. * 1978; PhD, 1978, University of California (Davis); shellfish physiology.
Bare, B. Bruce * 1969, (Adjunct); PhD, 1969, Purdue University; harvest scheduling, biometry, forest land management, taxation, finance, management science.
Bell, Milo C. 1953, (Emeritus); BS, 1930, University of Washington; hydrology and fish guidance.
Bevan, Donald E. * 1947, (Emeritus); PhD, 1959, University of Washington; biometrics.
Brown, George W. * 1967, (Emeritus); PhD, 1955, University of California (Berkeley); fish biochemistry and biochemical ecology.
Burner, Robert L. * 1949, (Emeritus); PhD, 1958, University of Washington; salmon ecology and salmon biology.
Chapman, Douglas G. * 1949, (Emeritus); PhD, 1949, University of California (Berkeley); population dynamics and enumeration.
Chew, Kenneth K. * 1955; PhD, 1982, University of Washington; shellfish biology and aquaculture.
Dickhoff, Walton W. * 1977; PhD, 1976, University of California (Berkeley); fish physiology, endocrinology, aquaculture.
Donaldson, Lauren R. 1932, (Emeritus); PhD, 1939, University of Washington; freshwater fish biology.
Erickson, Albert W. * 1974, (Emeritus); PhD, 1964, Michigan State University; wildlife biology and marine mammals.
Francis, Robert C. * 1983; PhD, 1970, University of Washington; biological production of commercially important marine fishes, fisheries management.
Galucci, Vincent * 1976; PhD, 1971, North Carolina State University; biometrics and population dynamics.
Halver, John E. * 1949, (Emeritus); PhD, 1953, University of Washington; nutrition, biochemistry, toxicology.
Hershberger, William K. * 1978; PhD, 1968, Pennsylvania State University; fish genetics.
Hillborn, Reyn * 1987; PhD, 1974, University of British Columbia (Canada); population dynamics and resource policy.
Karr, James * 1991, (Adjunct); PhD, 1970, University of Illinois; ecology and conservation biology, water resources, environmental sciences, natural resources.
Kocan, Richard M. * 1978; PhD, 1967, Michigan State University; aquatic toxicology.
Landolt, Marsha L. * 1975; PhD, 1976, George Washington University; fish and shellfish disease.
Liston, John * 1957, (Emeritus); PhD, 1955, University of Aberdeen (UK); food science; marine microbiology.
Mathews, Stephen B. * 1972; PhD, 1967, University of Washington; quantitative fisheries management.
Miller, Bruce S. * 1971; PhD, 1969, University of Washington; life history and ecology of marine fishes.
Miller, Marc * 1979, (Adjunct); PhD, 1974, University of California (Irvine); marine fisheries, cognitive anthropology and social/cultural change.
Naiman, Robert J. * 1988; PhD, 1974, Arizona State University; forest stream ecosystems, aquatic landscape dynamics.
Nakatani, Roy E. * 1970, (Emeritus); PhD, 1960, University of Washington; water pollution, ecology.
Piatosh, Theodore W. * 1978; PhD, 1973, University of Southern California; ichthyology.
Pigott, George M. * 1965; PhD, 1963, University of Washington; food engineering.
Plisetskaya, Erika * 1980, (Research); PhD, 1956, Academy of Sciences (USSR).
Rogers, Donald E. * 1959, (Research); PhD, 1967, University of Washington; sockeye salmon research.
Royce, William F. 1983, (Emeritus); PhD, 1943, Cornell University; applications of fisheries science.
Smith, Lynwood S. * 1965, (Emeritus); PhD, 1962, University of Washington; radioecology.
Stimson, Robert R. * 1985; PhD, 1971, Florida State University.
Swartzman, Gordon Leni 1973, (Research); PhD, 1969, University of Michigan.
Taub, Frieda S. * 1959; PhD, 1959, Rutgers University; ecology.
Wisnur, Robert C. * 1972; PhD, 1972, University of Idaho; ecology.
Wooster, Warren S. * 1976, (Emeritus); PhD, 1963, University of California (San Diego); effects of climate change on marine ecosystems, use of scientific information in marine management.

Associate Professors

Anderson, James J. * 1969; PhD, 1977, University of Washington; fisheries and oceanography.
Conquest, Loveday L. * 1976; PhD, 1975, University of Washington; biological applications and statistics.
Dong, Faye L. * 1982; PhD, 1976, University of California (Davis); nutritional evaluation of foods, food irradiation, and nutrient bioavailability.
Grue, Christian E. * 1989; PhD, 1977, Texas A&M University; wildlife toxicology, wildlife and fisheries science.
Gunderson, Donald R. * 1978; PhD, 1976, University of Washington; marine fisheries and stock assessment.
Huppert, Daniel D. * 1987, (Adjunct); PhD, 1975, University of Washington; economics and management of natural resources, especially marine fisheries.
Leschinsky, Thomas M. * 1983, (Adjunct); PhD, 1976, University of Pittsburgh; marine pollution management, ocean policy studies.
Navissi, Ahmad * 1973, (Adjunct Research); PhD, 1973, University of Arkansas; radiochemistry.
Pauley, Gilbert B. * 1982; PhD, 1971, University of California (Irvine); fish immunology, recreational fisheries.
Pikitch, Ellen * 1987; PhD, 1983, Indiana University; marine fisheries, population dynamics, assessment and management.
Quinn, Thomas P. * 1986; PhD, 1981, University of Washington; fish behavior.
Reeco, Barbara A. * 1984; PhD, 1983, University of Massachusetts.
Sibley, Thomas H. * 1978; PhD, 1976, University of California (Davis); trace pollutants.
COLLEGE OF OCEAN AND FISHERY SCIENCES/FISHERIES

Skalski, John R. * 1987; PhD, 1985, Cornell University; environmental sampling and effects assessment on wild populations, parameter estimation.

Van Blaricom, Glenn R. * 1993; PhD, 1978, University of California (San Diego); aquatic wildlife, ecology of marine communities, wildlife-fisheries interactions.

Assistant Professors

Bentzen, Paul * 1993; PhD, 1989, McGill University (Canada); molecular population/evolution genetics of fishes and other aquatic organisms.

Foote, Christopher * 1991; PhD, 1988, University of British Columbia (Canada); behavioral ecology, population genetics and evolutionary biology of fishes.

Senior Lecturer

Johnson, Frederick G. 1987; PhD, 1979, University of Washington; marine biology, environmental impact.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

Fisheries

FISH 100 Introduction to Careers in the Marine Sciences (1) Presentations by various faculty and staff members, students and recent graduates offer an introduction to the College of Ocean and Fisheries Sciences, curricular options, and professional opportunities in the marine sciences. Credit/no credit only. Limited to freshmen, sophomores or transfer juniors. Offered: jointly with OCEAN 100.

FISH 101 Introduction to Fisheries Science (5) NW Identification, distribution, and life histories of selected fish and shellfish; commercial and recreational fishing; utilization of fisheries products; problems faced in fisheries conservation and management.

FISH 210 Fisheries Techniques (5) NW Theory and techniques of field research in fisheries; practical sampling design, collection, and interpretation of data from river, lake, and marine environments. Field trips and laboratory demonstrations. Offered: A.

FISH 310 Biology of Shellfish (5) NW Commercially important molluscs and crustacea highlighted with respect to systematics, anatomy, reproductive strategies, feeding, growth. Basic management and/or aquaculture efforts for key species; several major fisheries that highlight variability in recruitment and landings, management of species with complex life cycles. Laboratories, field trips. Prerequisite: 10 credits in biological sciences. Offered: A.

FISH 311 Biology of Fishes (5) NW Pletsch Lecture, laboratory, and field study of the morphological, physiological, behavioral, and ecological diversity of fishes of the world; designed to provide a basic foundation for advanced courses in all areas of fish biology. Prerequisite: 10 credits in biological sciences. Offered: W.

FISH 312 Fisheries Ecology (4) NW Quinn Ecological characteristics of fishes and shellfishes in the important freshwater and marine habitats of North America. Relationship between physical aspects of the habitats and aquatic community structure. Impacts of human activities on diversity and abundance. Prerequisites: 310, 311 and OCEAN 200. Offered: Sp.

FISH 323 Fisheries Management and Conservation (3) NW Gunderson Importance of aquatic living resources; current world fisheries and their future, biological principles of fisheries conservation and management; development and implementation of fisheries policy; case histories of successful and unsuccessful fishery management systems. Offered: A.

FISH 324 Utilization of Fishery Commodities (4) NW Dong, Rasco, Pigott Overview of factors affecting food quality of finfish and shellfish; chemical/physical properties of aquatic food products; microbiological/parasitological environmental forces affecting food safety; by-product utilization; effects of processing on quality; regulatory aspects; future of aquatic food products. Prerequisites: CHEM 102 or 223 and 224. Recommended: microbiology. Offered: W.

FISH 325 Introduction to Aquaculture (4) NW Stickney, Bowser Aquaculture of aquatic species involved in commercial and enhancement aquaculture. History of aquaculture and current world production levels are examined. Emphasis on design and operation of aquaculture facilities; water quality and management, nutrition and diseases of fish and shellfish, harvesting, marketing, economics. Visits to aquaculture and related facilities. Offered: Sp.

FISH 351 Current Topics in Nutrition and Food Utilization (3) NW Naiman Nutritional properties, chemistry, safety, regulatory issues, and sensory properties of food components.

FISH 357 Recreational Fisheries (4) NW Pauley History of recreational fishing; present trends in sport fishing and prediction of future trends; types and characteristics of recreational fisheries; value of recreational fisheries; harvest requirements; ecological and behavior that are important considerations in management; management philosophy and techniques. Recommended: for majors and nonmajors. Field trips. Laboratory fee may be required. Prerequisite: 10 credits in biological sciences.

FISH 378 Effects of Gear and Shipboard Handling (3) NW FISH 415 Fish and Shellfish Physiology (5) NW Dickhoff Early life history, including modes of reproduction, spawning, fecundity, egg and larva development, and sampling and tagging larvae; aging and tagging techniques; food habits, subpopulation identification, and migrations of marine fishes. Prerequisite: 311 or permission of instructor. Offered: main campus odd years, W; Friday Harbor Laboratories even years, Sp.

FISH 403 Biological Problems in Water Pollution (3) NW Welch Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication, acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. Prerequisite: senior or graduate standing in engineering or science. Offered: jointly with CIVE 462.

FISH 414 Ecological Effects of Waste Water (3) NW Welch Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication, acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. Prerequisite: senior or graduate standing in engineering or science. Offered: jointly with CIVE 462.

FISH 425 Life History of Marine Flakes (5) NW Miller Early life history, including modes of reproduction, spawning, fecundity, egg and larva development, and sampling and tagging larvae; aging and tagging techniques; food habits, subpopulation identification, and migrations of marine fishes. Prerequisite: 311 or permission of instructor. Offered: main campus odd years, W; Friday Harbor Laboratories even years, Sp.

FISH 426 Ecological Problems in Water Pollution (3) NW Welch Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication, acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. Prerequisite: senior or graduate standing in engineering or science. Offered: jointly with CIVE 462.

FISH 444 Fish and Shellfish Physiology (4) NW Hershberger Concepts in management and culture of aquatic species; reproduction and nutrition of chromatinomes, electrometric analysis, genetic analysis of natural and cultured populations, quantitative genetic analysis, and effects of selection and breeding programs. Laboratory experience with analytical techniques. Prerequisites: FISH 311 and GENET 371 or equivalent and permission of instructor.

FISH 450 Salmonid Behavior and Life History (4) NW Quinn Marine distribution, homing migration, and spawning behavior of adult salmon: incubation, emergence, migration, and residence of fry; fingering distribution and residence with reference to species interaction and population evolution. Prerequisites: 311 and 15 credits in biological sciences.

FISH 451 Reproduction and Early Development in Fish (4) NW Hershberger Reproductive development, sexual maturation, spawning and incubation in selected fish species; embryology and developmental traits of different salmonid and non-salmonid species; practical experience in artificial spawning techniques, egg handling and care, incubation techniques and the handling of newly-hatched alevins.

FISH 452 Nutrition and Health of Aquatic Animals (4) NW Dong, Landolt Basic nutritional requirements of fish and shellfish in nature and in artificial environments; principles governing the transmission and control of disease; importance of diet in prevention. Prerequisites: 311 and 10 credits in biological sciences. Offered: even years.

FISH 454 Aquatic Wildlife Ecology (3) NW VanBlaricom, West, Manuwal, Grue Conceptual examination of relationships of aquatic wildlife populations (mammals, birds, reptiles, amphibians) to one another and to the aquatic realm. Application of conceptual background to contemporary high-profile issues in aquatic wildlife ecology, conservation, and management. Included is exposure to primary literature in the field. Offered: jointly with ESC 454.

FISH 455 Fundamentals of Fish Population Dynamics and Management (4) NW Pletsch Conveys fundamental concepts of fish population dynamics and fishery management within context of real-world fisheries problems. Lectures discuss notation, terminology, mathematical models, and management principles and case studies. Laboratory time devoted to practical applications, problems. Prerequisites: Q SCI 291 and 292 or MATH 124 and 125 or equivalent. Offered: jointly with Q SCI 456.
**COLLEGE OF OCEAN AND FISHERY SCIENCES / FISHERIES**

**FISH 457 Methods of Abundance Estimation (4) NW Gunderson, Mathews** Methods of estimating fish abundance by direct sampling and indirectly from tagging, catch, and effort analysis. Confidence limits and bias adjustments. Design of marine fishery surveys using statistical sampling principles. Laboratory work with real fishery data and data collected during trawl sampling survey. Prerequisites: Q SCI 291, 292, 361, and 456 or equivalent. Offered: jointly with Q SCI 457.

**FISH 458 Fisheries Stock Assessment (4) NW Hilborn** Emphasizes quantitative analysis of fisheries data to determine how the fishery would respond to alternative management actions. Major topics include production models, stock and recruitment, catch at age analysis, and formulation of harvest strategies. Prerequisite: 456 or permission of instructor. Offered: jointly with Q SCI 458.

**FISH 470 Aquatic Food Engineering (5) NW Quantitative physics/chemistry of harvesting, processing, storing, packaging, and marketing aquatic foods. Solving problems of mass and energy transfer with regard to processes and to changes in important food components. Use of computer process control involving basic food engineering principles. Prerequisites: Q SCI 292 or MATH 125 or equivalent; PHYS 116, and CHEM 160 or permission.

**FISH 475 Marine Mammalogy (3) NW Van Blaricom Evolution, taxonomy, physiology, life history, and behavior of marine mammals; the techniques of studying and the management and conservation of them. Offered: Irregularly.

**FISH 476 Laboratory of Marine Mammalogy (2) NW Van Blaricom Evolution, taxonomy, physiology, life history, and behavior of marine mammals; the techniques of studying and the management and conservation of them. Laboratory fee may be required. Prerequisite: 15 credits in biological sciences. Recommended: vertebrate anatomy and physiology. Offered: irregularly.

**FISH 480 Chemical Analysis of Aquatic Products (5) NW Resco Chemical composition, structure, properties, and chemical changes of foods and food components. Principles of separation and identification of food components by chromatographic, spectrophotometric, and other methods. Prerequisites: 324 and CHEM 224.

**FISH 480 Aquatic Food Microbiology (5) NW Occurrence and activity of microorganisms in aquatic foods, their significance in spoilage, fermentation, deterioration, foodborne disease, and nutritional effects. Principles of control and destruction by environmental adjustment and processing, detection, and evaluation of significance. Prerequisites: 324, MICRO 301 and 302 or equivalent, and CHEM 224.

**FISH 488 Internship/Experiential Learning (1-9 NW Structured, practical training in the fishing industry, government agencies and other areas utilizing fisheries, food science, or quantitative science expertise. Experiences are supervised and evaluated. Written reports required. Prerequisite: permission of faculty adviser. Offered: AWSPS.

**FISH 499 Undergraduate Research (1-5, max. 9 NW Individual research within the School of Fisheries. Each project supervised by an individual faculty member. Written reports required. Prerequisite: permission of instructor. Offered: A WSPS.

**Food Science**

**FDS 300 Nutrition for Today (3) NW Dong Basic and applied nutrition and food science. Identification and physiological roles of nutrients, nutritional requirements, problems with over- and undernutrition, and nutritional and food-related diseases. Food additives, processing, safety, and their effects on overall nutrition. Current issues of public significance. Offered: jointly with NUTR 300.

**Courses for Graduates Only**

**Fishes**

**FISH 501 Internship/Experiential Learning (1-9 NW Structured, practical training in the fishing industry, government agencies and other areas utilizing fisher­
ies, food science, or quantitative science expertise. Experiences are supervised and evaluated. Written reports required. Prerequisite: permission of faculty adviser.

**FISH 502 Fundamentals of Fishery Science (5) Team-taught course designed to provide an advanced overview of all aspects of fishery science. Emphasis on critical concepts of fishery biology relevant to those requiring a basic understanding of major sub-disciplines of the field. Theoretical approach emphasized. Extensive use of classical and current literature. Prerequisite: graduate standing.

**FISH 503 Systematic Ichthyology (5) Pietsch Phylogenetic history of the major groups of fishes: a survey of extinct and living fishes of the world, phylogenetic methodology as applied to fishes, geographic distribution and historical zoogeography. Prerequisite: FISH 311 or equivalent. Offered: jointly with Zool 503.

**FISH 504 Infectious Pathology (5) Landolt, Paul Pathological examination of communicable diseases in invertebrates. The discussion is phylogenetic and comparative. Juniors and seniors may take the course, but must have course prerequisites. Prerequisite: 454 and invertebrate zoology or equivalent, or permission. Offered: every even year.

**FISH 505 Research Techniques in Shellfish Biology (5) Chew Study of research methods in field surveys of invertebrates and of research techniques involved with the studies of reproduction, growth, and mortality of oysters and clams. Prerequisite: permission of instructor. Offered: Irregularly.

**FISH 506 Pathology of Fishes (5) Landolt Infectious diseases of fish. Emphasis on bacterial and viral pathogens, diagnostic methods, and control. Recommended: upper division course work in microbiology or immunology.

**FISH 507 Special Problems in Fisheries (1-5, max. 15 Classroom, laboratory, or field studies on problems of current interest. A maximum of 6 credits of 507 is permitted to apply to a master's degree program. A. Guest lecture series. Offered on credit/no credit basis only. B. Special problems. C. Special course in fisheries. D. Special courses in fisheries. Prerequisite: permission of instructor.

**FISH 508 Physiological Ecology of Shilshil (3) Relationships between physical-chemical features of habitats, and physiological adaptations of shellfish. Ability to tolerate extreme environments and adverse conditions examined as causes of variable recruitment, productivity, energy allocation, in marginal habitats. How such changes impact fisheries. Prerequisites: CHEM 140, 150; Zool 301, 330 or equivalent or permission of instructor.

**FISH 515 Advanced Integrative Fish Physiology (3) Dickhoff, Smith Integration of physiological processes from molecular to organism system levels. Recent advances in control of reproduction, development, growth, metabolism, and osmoregulation. Prerequisite: 415 or equivalent; recommended: BIOC 405, 406 or BIOC 440, 441, 442; Zool 438.

**FISH 520 Graduate Seminar (1 Introduction to research in fisheries. Required of all first-year graduate students. Offered on credit/no credit basis only.

**FISH 522 Classical Literature of Fishery Science and Aquaculture (2) Discussion of the classic literature of fishery science and aquaculture. Both oral and written communication skills stressed. Credit/no credit only.

**FISH 525 Ecology and Behavior of Fishes (3) Miller, Quinn Basic principles of ecology and behavior of aquatic animals; adaptation to environmental changes in migrations and movements, reproductive patterns) as applied to fishes. Critical evaluation of current literature and fieldwork required. Prerequisites: 311 or equivalent, and permission of instructor.

**FISH 527 Aquatic Community Response to Pollution (3) Taub Aquatic ecotoxicology; bridging the gap between environmental toxicology and physiological and behavioral responses to toxic chemicals. Detecting effects against natural variability; altered species abundances and dominance, counter-intuitive responses. Case histories, controversies on data interpretation. Prerequisite: at least one course in ecology, limnology, oceanography or permission of instructor.

**FISH 535 Metabolic Effects of Chemical Pollutants (4) Brown Physiological and biochemical effects of industrial, urban, and agricultural chemicals on aquatic biota; specific metabolic effects of various industrial chemicals, with inhibition studies of the alteration of enzyme systems of aquatic organisms. Offered concurrently with 435. Prerequisites: upper-division or graduate standing, organic chemistry, general physiology, biochemistry, or cell physiology, or equivalent.

**FISH 539 Forestry-Fisheries Interactions: Case Studies (3) Naiman, Raedeke, Wissmar Case studies of specific management situations at the watershed and basin level. Topics include resource conflict resolution, current and future management alternatives, landscape dynamics, role of disturbance, and policy options. Prerequisites: graduate standing in forestry, fisheries, or related field; undergraduates by permission of instructor. Offered: jointly with ESC 539.

**FISH 544 Genetics In Fish Management and Production (3) Hershberger Possible changes in genetic characteristics and response of populations with the current types and levels of fishery resource manipulation. Includes genetic considerations in population models, quantitative genetics and breeding, and use of genetic markers for population analysis. Prerequisites: 444, 451, Q SCI 462, 483, and upper-division or graduate standing. Offered: odd years.

**FISH 545 Selection and Breeding in Aquaculture (3) Hershberger Genetic bases, analytical techniques and experimental approaches for study and utilization of quantitative genetic variation in aquatic species. Statistical determination of genetic and phenotypic parameters; design and assessment of selection and breeding programs; use of quantitative genetic data. Prerequisites: 444, GENET 360, Q SCI 486, or permission of instructor. Offered: even years.

**FISH 547 Stream and River Ecology (4) Cundy, Naiman Characterizations of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and dynamics of aquatic communities and the riparian zone. Resource conflicts, new technologies, field trips, and class projects. Recommended: general ecology, for­

tey-fisheries interactions. Offered: jointly with ESC 547.

**FISH 548 Special Topics In Streamside Studies (2, max. 6) Naiman, Quinn, Raedeke, Wissmar Contaminants and trade-offs in wildlife management in watersheds. Topics vary, yet focus on interactions of land and water resources in the forests of the Pacific Northwest. Prerequisite: permission of instructor. Offered: jointly with ESC 548.

**FISH 552 Fish Feed Technology (5) Halver, Hardy, Pijl, Stickney Fish feed classification, production, processing, nutrient profiles, Fish feed formulation techniques and practice. Least-cost computerized diets. Manufacture techniques for eight types of fish feeds: wet, semi-moist, frozen, extruded, expanded, rolled,
pelleted, and microencapsulated or microencapsulated diets. Design and operation of various types of feed mills. Prerequisite: 452.

FISH 552 Comparative Fish Nutrition (3) Halver, Hardy, Stickney: Quantitative nutrient requirements of salmonids, cyprinids, ictalurids, and test species of fishes for growth, development and reproduction. Vitamins, lipids, amino acid, carbohydrate, and minerals requirements plus metabolism of each examined and compared between species reared in various environments. Prerequisite: 452 or equivalent animal nutrition/biochemistry course.

FISH 556 Mathematical Analysis in Fisheries Stock Assessment (3) Gallucci Analytic approaches to stock assessment and population management applications of parent-progeny models and logistic models; biological and economic yields of natural populations; analysis of population data on computers. Prerequisites: Q SCI 292, Q SCI 392, Q SCI 456, Q SCI 483; or permission of instructor. Offered: jointly with Q SCI 556.

FISH 557 Estimation of Population Parameters (4) Skalski Statistics analysis of population data; design and analysis of capture experiments on natural populations; laboratory work on computers. Prerequisites: Q SCI 292, Q SCI 483, and probability theory. Offered: jointly with Q SCI 557.

FISH 558 Advanced Analysis in Fisheries Stock Assessment (3) Deterministic and stochastic representations of age-dependent and size-dependent models for stock assessment; analysis of multi-species models; risk analysis and uncertainty in fisheries management strategies; analysis of population data on computers. Prerequisites: Q SCI 393, 556 or permission of instructor; recommended: 557. Offered: jointly with Q SCI 558.

FISH 560 Methods of Acoustic Stock Assessment (3) Theory and implementation of processing of acoustic fish target signals. Application for estimation of fish stocks and the statistical properties of the estimation procedure. Offered: irregularly.

FISH 565 Marine Fish Biology (9) Taxonomy, ecology, and life history of the fishes of the San Juan Islands and northeast Pacific Ocean. Prerequisite: permission of instructor. Offered: Friday Harbor Laboratories alternate years, S.

FISH 580 Introduction to the Management of Fisheries (3) Francis, Miller. Introduction to fisheries and the multidisciplinary aspects of their management. Emphasis is on integration of biological, socio-economic, and institutional aspects of fisheries management. Offered: jointly with SMA 580.

FISH 581 Fishery Management: Case Studies (5) Francis, Huppert. Examination of historical case studies chosen to illustrate specific fishery management problems. Faculty presentations occupy first half of quarter, student presentations the second half. Prerequisite: 550. Offered: jointly with SMA 581.

FISH 582 Fishery Management: Contemporary Issues (5) Huppert. Focuses on multi-disciplinary, in-depth analysis of specific problems, including biological and economic assessments, evaluation of alternative management systems, and formulation of specific research, data collection, and management recommendations. Prerequisite: 581. Offered: jointly with SMA 582.

FISH 600 Independent Study or Research (*) Offered on credit/no credit basis only.

FISH 700 Master's Thesis (*) Offered on credit/no credit basis only.

FISH 800 Doctoral Dissertation (*) Offered on credit/no credit basis only.

Food Science

FD SC 521 Graduate Seminar in Food Science (1, max. 3) Lectures and discussions of current problems and current research in food science. Offered on credit/no credit basis only. Prerequisite: permission of instructor.

FD SC 522 Advanced Food Chemistry (3, max. 9) Rasco Lecture and/or laboratory dealing with special or current topics in food chemistry and food analysis. Laboratory fee may be required. Prerequisite: graduate standing in food science or permission of instructor.

FD SC 524 Microorganisms in Foods (3) Occurrence and activity of microorganisms important in foods as agents of spoilage, fermentation, and food-borne disease; relationship to food or food process; control and detection. Food science majors must take 534 concurrently with 524. Prerequisite: graduate standing in food science or permission of instructor.

FD SC 525 Advanced Unit Operations in Food Processing (3) Piggot Application of modern engineering principles to operations such as evaporation, drying, distillation, pumping, and heat transfer in the handling, processing, and packaging of foods. To be taken concurrently with 526. Prerequisite: FD SC 470 or permission of instructor.

FD SC 526 Advanced Unit Operations in Food Processing (3) Piggot Laboratory investigations concerned with the engineering of food processes and processing facilities. To be taken concurrently with 525. Laboratory fee may be required.

FD SC 534 Microorganisms in Foods Laboratory (1) Special projects or selected experiments designed to study microorganisms in foods. Food science majors must take 534 concurrently with 524. Laboratory fee may be required.

FD SC 600 Independent Study or Research (*)

FD SC 700 Master's Thesis

School of Marine Affairs

3707 Brooklyn Avenue Northeast

Graduate Program

The School of Marine Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses from the School of Marine Affairs, business administration, economics, engineering, fisheries, law, oceanography, political science, and public affairs. The School of Law has a related Master of Law degree program with specialization in marine affairs.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences. In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the M.M.A. program normally requires two academic years for students who have recently received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special concentration is developed in an area of concentration (e.g., coastal zone management and planning, international marine institutions, living resources and fisheries management, marine environmental policy, port and marine transportation management, and others) of which the student has had prior experience. Each concentration is presented under the guidance of a faculty supervisory committee. Individual courses of study may be adjusted to accommodate prior experience and academic background, and especially qualified students, such as those in mid-career, may be able to meet the degree requirements in eighteen months of study.

Joint Curriculum in Fisheries Management

The School of Fisheries (SOF) and the School of Marine Affairs (SMA) offer a joint curriculum in fishery management consisting of parallel two-year master's programs. The curriculum is designed to develop professional fisheries managers with skills needed to participate effectively in the wide range of activities characteristic of contemporary fishery management. These skills require a multi-disciplinary education in biology, the social sciences (e.g., economics, political science, anthropology, sociology), quantitative methods, law, and policy analysis. A major part of the curriculum is an one-week period at the Friday Harbor Laboratories which brings SOF and SMA students together in a problem-oriented focus. This core course has three components: (1) introduction to fisheries and their management, (2) retrospective case studies, and (3) contemporary issues. During the core sequence, students will develop progressively more extensive case studies on their own, leading to a master's thesis. Students may enter the fisheries management master's program through either the School of Fisheries or the School of Marine Affairs and must meet the thesis and other requirements of their department.

Admission Requirements

Admission to the School of Marine Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. In addition, applicants must make separate application to, and be accepted by, the Graduate School of this university. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

Financial Aid

The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.

Professors

ALVERSON, DAYTON L. "1982, (Affiliate); PhD, 1967, University of Washington; marine affairs.

BODANSKY, DANIEL "1989, (Adjunct); JD, 1984, Yale University; International law, international environmental and human rights law, civil procedure.

BURKE, WILLIAM T. "1968; JSD, 1959, Yale University; marine law.
Crutchfield, James A. 1960, (Emeritus); PhD, 1954, University of California (Berkeley); natural resources economics, policy and management, especially marine and environmental resources.

Daley, John R. 1977, (Adjunct); PhD, 1977, University of Arizona; geological oceanography, origin of oceanic crust, igneous petrology.

Francis, Robert C. 1983, (Adjunct); PhD, 1970, University of Washington; biological production of commercially important marine fishes, fisheries management.

Hershman, Marc 1976, JD, 1967, Temple University; coastal zone management law.

Miles, Edward L. 1974, PhD, 1965, University of Denver; international law and organization, science and international relations, marine policy.

Miller, Marc 1978, PhD, 1974, University of California (Irvine); maritime anthropology, cognitive anthropology and social/cultural change.

Olsen, David J. 1974, (Adjunct); PhD, 1971, University of Wisconsin; American government and politics.

Vesper, Karl H. 1966, PhD, 1969, Stanford University; business policy, mechanical engineering, marine studies.

Wooster, Warren S. 1976, (Emeritus); PhD, 1953, University of California (San Diego); effects of climate change on marine ecosystems, use of scientific information in marine management.

Duxbury, Alyn C. 1954, (Emeritus); PhD, 1963, Texas A&M University; estuarine processes and the management of human uses of these marine systems.

Fluharty, David L. 1983, (Research); PhD, 1977, University of Michigan; natural resource and environmental policy.

Huppert, Daniel D. 1987, PhD, 1975, University of Washington; economics and management of natural resources, especially marine fisheries.

Kaczynski, Wlodzimierz M. 1977, PhD, 1972, University of Gdańsk (Poland); fishery economics, international joint ventures in marine fisheries, international fisheries policy.

Leschine, Thomas M. 1983, PhD, 1975, University of Pittsburgh; marine pollution management, ocean policy studies.

Olson, Annette M. 1991; PhD, 1992, Oregon State University; use of ecological models in environmental decision making.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

SMA 455 Marine Business Environment in Russia and Eastern Europe (3) Kaczynski International marine business environment of Russia and the maritime nations of East Europe; their transition process from communist to free market economic systems. Covers aspects of doing business in marine-related fields such as shipping, fisheries, shipping ports, and land infrastructure, marine tourism, and water sports. Offered: jointly with SISRE 455.

SMA 499 Undergraduate Research (1-3, max. 6) Research on assigned topics under the supervision of faculty members. Prerequisite: permission of instructor.

SMA 500 Marine Affairs (5) Miller Surveys a wide range of academic disciplines and substantive problems pertinent to interaction of human beings and the world's oceans and coasts. Management of living/nonliving resources, shipping, scientific research, pollution, recreation, and others. Lecture and discussion by invited specialists.

SMA 505 Introduction to Administrative Law and Process (2) Hershman Constitutional and administrative law applied to selected coastal and marine statutes. How to research legislative and administrative materials. Reading and briefing selected judicial opinions. Control of administrative agencies by the executive, legislative, and judicial branches. Designed for non-law graduate students pursuing natural resources and environmental subjects. Prerequisite: permission of instructor.

SMA 506 International Law of the Sea (4) Burke Ways nations claim authority to regulate activities at sea. Fundamental policies and decisions regarding navigation for commercial and military purposes, fisheries, exploitation and conservation, continental shelf resources, scientific research, protection of environment, deep-sea mining, and other uses of the ocean. Offered: jointly with LAW B 561.

SMA 507 International Organizations and Ocean Management (3) Miller Survey of the manner in which international organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of processes that support or constrain these organizations and on the search for alternative policies and organizations. Prerequisite: 500 or permission of instructor. Offered: jointly with PB AF 507.

SMA 508 National Marine Policy Processes (3) Miles Comparative institutional dimensions of marine policy processes. Marine policy context at the national level and the dynamics that drive policy formation and policy implementation. Prerequisite: 500 or permission of instructor.

SMA 509 Principles of Coastal Zone Management (3) Hershman Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; legal and organizational problems associated with overlapping jurisdictions; legal, administrative, and technical planning and management experience in the United States and abroad. Prerequisite: 500 or permission of instructor. Offered: jointly with LAW B 566.

SMA 511 Coastal Environment Management (3) Olson Coastal zone planners and managers evaluate proposed and ongoing use activities that affect wetland, estuarine, and nearshore environments. Concepts and techniques for retrieving, analyzing, and using technical environmental information in planning and decision making. Washington State case examples and practical exercises. Prerequisite: OCEAN 580 or permission of instructor.

SMA 514 Marine Pollution Management Issues (3) Leschine Management aspects of marine pollution, emphasizing two-way interaction between environmental managers and environmental and policy scientists which ideally shapes policy. Recommended: familiarity with marine science or ocean policy or pollution control policy.

SMA 515 United States Law and the Marine Environment (3) Hershman Federal/state boundary problems, living resources management, offshore oil and gas production, vessel and tanker safety. Offered: jointly with LAW B 565.

SMA 516 Seaport Management (3) Denning Role of port authorities in management of marine uses: cargo loading and unloading, export, import, tourism and recreation, and fisheries. Management functions of planning, marketing, finance, engineering. Examples and guest speakers from the Port of Seattle and other Puget Sound ports. Prerequisite: 500 or permission of instructor.

SMA 517 Marine Uses: Transportation and Commerce (3) Denning Role of the oceans in the transportation and commerce of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: 500 or permission of instructor.

SMA 518 Port and Marine Transportation Systems (3) Activities associated with the water-borne movement of cargo. Types of cargo handling methodologies used in ocean transport, ship types involved in these cargo-handling methods, and seaport terminal facilities that are utilized by each cargo handling method. Prerequisite: permission of instructor.

SMA 519 Marine Policy Analysis (3) Leschine Goal is appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are explored in both quasi-realistic settings and in application to real world problems of marine policy.

SMA 533 Applied Microeconomics for Marine Affairs (3) Holcomb, Vesper, Kaczynski, Wlodzimierz M. Marine economics, policy, and management of marine living resources. Prerequisite: 500 or permission of instructor. Offered: jointly with ECON 537.

SMA 534 Economics of World Fisheries (3) Kaczynski Economic view of contemporary world problems in use, conservation, and management of marine living resources. Special focus on North-South relations, sustainable development strategies, and basic needs of Third World. How to approach and analyze international fisheries issues in students own research. Prerequisite: 500 or permission of instructor.

SMA 536 Marine Policy and Development of public policy in marine affairs. Prerequisite: 500 or permission of instructor. Offered: jointly with ECON 536.

SMA 544 Economics of World Fisheries (3) Kaczynski Economic view of contemporary world problems in use, conservation, and management of marine living resources. Special focus on North-South relations, sustainable development strategies, and basic needs of Third World. How to approach and analyze international fisheries issues in students own research. Prerequisite: 500 or permission of instructor.

SMA 555 Russian Ocean Policy (3) Kaczynski Russian ocean policy following Perestroika and disintegration of Soviet empire. Discusses Russian navy, fishery industry, merchant marine, ocean research fleet in light of international agreements and joint ventures and new political, economic, and social environments. Prerequisite: knowledge of Soviet/Russian socio-economic problems or permission of instructor. Offered: jointly with SISRE 555.

SMA 560 Methods Seminar (2) Preparation for thesis work. Draws on the philosophy of science from the natural and social, and purports to examine such topics as research design, data collection, analysis, write-up, and abstract/applied research.

SMA 562 Introduction to the Management of Fisheries (3) Miller Introduction to fisheries and the multidisciplinary aspects of their management. Emphasis on two-way interaction between environmental managers and environmental and policy scientists which ideally shapes policy. Recommended: familiarity with marine science or ocean policy or pollution control policy.

Most courses are offered on a rotating basis; consult the college catalog for the specific offering periods.
phases is on integration of biological, socioeconomic, and institutional aspects of fisheries management. Offered: jointly with FISH 580.

**SMA 581 Fishery Management: Case Studies (5)**
Huppert Examination of historical case studies chosen to illustrate specific fishery management problem areas. Faculty presentations occupy first half of quarter, student presentations the second half. Prerequisite: 580 or permission of instructor. Offered: jointly with FISH 582.

**SMA 582 Fishery Management: Contemporary Issues (5)**
Huppert Focuses on multi-disciplinary, in-depth analysis of specific problems, including biological, economic, and social aspects, analysis of alternative management systems, and formulation of specific research, data collection, and management recommendations. Prerequisite: 580, 581 or permission of instructor. Offered: jointly with FISH 582.

**SMA 600 Independent Study or Research (*)**

**SMA 700 Master's Thesis (*)**

---

**Oceanography**

108 Oceanography Teaching

The School of Oceanography, which had its beginnings in 1930, offers courses and conducts basic research in oceanography, the science that examines physical, geological, chemical, and biological processes in the ocean and interactions of the ocean with the earth, the biosphere, and the atmosphere. Education and research in the School include studies of seawater in motion: life in the sea; chemical composition and properties of seawater; interactions between the sea and the atmosphere, the sea and the land, and the sediments beneath the sea; and the geophysics of the ocean floor. Because the science of oceanography is interdisciplinary in nature, joint programs are maintained in the areas of geochemistry and geophysics, physical, chemical, and biological sciences, and with the other units in the College of Ocean and Fishery Sciences.

---

**Courses**

A full spectrum of basic and advanced courses is offered in each of the areas of specialization in oceanography. Major biological programs are carried out in Puget Sound, in the waters of the continental shelf off Washington and California, and in the North Pacific Ocean. These projects include investigations of the processes governing the communities or organisms in the water column, on the seabed, and in the surf zone. Chemical oceanography includes work on the distribution of organic material and trace metals in Puget Sound and the open sea, the geochemistry of the sediment-water interface, and study of chemical processes in environmental settings. Geophysical investigations include theoretical studies and field experiments on sediment motion and sedimentary processes. This work has ranged from the deep waters of the Scotian Rise in the Atlantic Ocean to Fruchhoe Bay to the Barents Sea, where a cooperative program with Norwegian scientists is under way.

The effect of organisms on sediment transport is a major new interdisciplinary program among geological, biological, and physical oceanographers. Geophysical research is concerned with the oceanic crust and upper mantle. Topics include seismic experiments on plate boundaries, crustal formation processes in the Juan de Fuca-Gorda Ridge System, and studies of the earth’s magnetic field. Physical oceanographic programs range from large-scale circulation studies of the North Pacific, the North Atlantic, the tropical oceans, and the arctic circumpolar current to coastal circulation studies and small-scale mixing programs. The theoretical and experimental programs include studies of air-sea interaction, surface and internal waves, oceanic fronts, and sea ice.

The School is particularly strong in arctic research, which encompasses a full range of oceanographic studies and multidisciplinary ecosystem studies of the processes and resources in the Bering Sea. Studies in local waters include sediment transport and mixing processes in fjords and inlets and the chemistry of Lake Washington.

**Facilities and Vessels**

Housed in four large and several smaller buildings on campus by Portage Bay, the School is equipped with extensive laboratories and teaching facilities, including controlled-environment rooms, a paleomagnetics laboratory, and a sea-ice laboratory. The School operates its own midsize interactive computer and highly specialized laboratory instruments, such as mass spectrometers, scanning electron microscopes, and seawater sediment transport flumes. Access to other more sophisticated facilities and instruments, as well as supercomputers, is available on campus. Docks provide mooring for the School’s two research vessels. Deep-ocean research programs are accommodated on the newly constructed 274-foot R/V Thomas G. Thompson. Graduate students are involved in all of the cruises, most often for their thesis research. The sixty-five-foot R/V Clifford A. Barnes undertakes short cruises into Lake Washington and Puget Sound for the instructional and research programs.

Friday Harbor Laboratories on San Juan Island offer unique opportunities for research and study. Specialized courses in new areas of oceanography are offered each summer. The facilities are utilized by faculty members throughout the year for oceanographic research.

**Funding**

The School is supported primarily by funds from the state of Washington and federal agencies. Major sources of federal funding include the National Science Foundation, National Oceanic and Atmospheric Administration, Office of Naval Research, and Department of Energy. Funds are also provided by various state and local government agencies and private organizations.

---

**Undergraduate Program**

**Degrees**

Students may earn a Bachelor of Science or a Bachelor of Arts degree, with specialization in biological, chemical, or physical oceanography, or marine geology and geophysics.

**Careers in Oceanography**

Oceanographers are employed predominantly in research, both pure and applied. They seek to produce a new understanding of ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. Oceanographers work at sea, on land, and in laboratories, often with computers.

In addition to the knowledge acquired through research, a degree in oceanography can serve as a background for a career in teaching, administration, marine affairs, environmental studies, production, inspection, computing, instrumentation development, and statistical analysis.

---

Most oceanographers are employed in educational and research institutions. Many others work for federal government agencies, such as the National Oceanic and Atmospheric Administration, U.S. Geological Survey, Office of Oceanic and Atmospheric Research, and National Oceanic and Atmospheric Administration. These organizations are staffed by both federal and contract employees, some of whom are engaged in research and development activities.

---

**Admission**

The School of Oceanography has no admission requirements. Students are admitted upon acceptance for admission to the University.

**Bachelor of Science Degree**

Students may specialize in biological, chemical, or physical oceanography, or marine geology and geophysics.

**Major Requirements:** (1) MATH 124, 125, 126; CHEM 140, 141, 150, 151; PHYS 121/131, 122/132, 123/133; GEO 105, 205, and BIOI 101-102 or 201, 202, 203; (2) OCEAN 200, 201, 202, 401, 402, 421, 433, 450, 640, 6485; (3) 20 credits of upper-division science, mathematics, or engineering to be selected in consultation with a faculty adviser; (4) 20 credits of Visual, Literary, & Performing Arts and 20 credits of Individuals & Societies from the University Areas-of-Knowledge lists; and (5) 5 credits of English composition. University-approved 200 courses (writing) are included within the curriculum.

**Bachelor of Arts Degree**

Major Requirements: Same as for Bachelor of Science degree except only 10 credits of upper-division science, mathematics, or engineering courses are required.
Graduate Program
Arthur R. M. Nowell, Director and Graduate Program Coordinator

The School of Oceanography provides excellent instruction and research opportunities at the graduate level in all areas of oceanography: biological oceanography, chemical oceanography, marine geology and geophysics, and physical oceanography. The program of study emphasizes independent research in conjunction with specialized courses. Interdisciplinary research opportunities and student engagement are encouraged to allow the opportunity to work across the usual scientific boundaries. Course work during the first two years is required in each option; specialized course work is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

Admission
Students enter the School from varied undergraduate disciplines at many universities. All have in common a strong background in the sciences and mathematics; most have never taken courses in oceanography. Evaluation of candidates is based on Graduate Record Examination scores, the undergraduate transcript (scholarship and depth), three letters of recommendation, and the applicant's statement of objectives and interests. Admission can be accommodated at the beginning of any academic quarter, although autumn entry is most common.

Master of Science Degree
The program of study includes course work in the student's area of interest and the other oceanography options, a comprehensive examination, and the completion of an approved research project and oral presentation of the results. Thesis and nonthesis programs are offered; most students select the nonthesis option.

Doctor of Philosophy Degree
The degree program places a strong emphasis on research following completion of course requirements and General Examination. Upon successful completion of the General Examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the Final Examination.

Financial Aid
Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.

Lewin, Joyce C. • 1965; (Emeritus); PhD, 1953, Yale University; biological oceanography, diatoms, plankton.
Lewis, Brian T. • 1970; PhD, 1970, University of Wisconsin; marine geophysics, marine seismology, gravity, magnetics, and computer modeling of those processes.
Lister, Clive Ronald • 1965; (Emeritus); PhD, 1963, Cambridge University (UK); marine geophysics, cooling processes in the outer layers of the earth, geodynamics.
Martin, Seeley • 1969; PhD, 1967, Johns Hopkins University; geophysical fluid dynamics, properties of sea ice.
McManus, Dean A. • 1959; PhD, 1959, University of Kansas; geological oceanography, continental shelf sediments.
Merrill, Ronald T. • 1967, (Adjunct); PhD, 1967, University of California (Berkeley); geomagnetism.
Murray, James W. • 1973; PhD, 1973, Massachusetts Institute of Technology; marine geochemistry, aquatic chemistry.
Nowell, Arthur R. M. • 1978; PhD, 1975, University of British Columbia (Canada); physical oceanography, turbulent boundary layer dynamics, sediment transport.
Rattray, Maurice Jr. • 1950, (Emeritus); PhD, 1951, California Institute of Technology; physical oceanography, hydrodynamics, ocean circulation modeling.
Rhines, Peter B. • 1984; PhD, 1967, Cambridge University (UK); the circulation of the oceans and evolution of climate.
Richey, Jeffrey E. • 1973; PhD, 1973, University of California (Davis); quantitative problems of aquatic ecosystems, primary Amazon River, limnology.
Sanford, Thomas B. • 1979; PhD, 1976, Massachusetts Institute of Technology; physical oceanography, dynamics of ocean currents, motional induction, instrumentation.
Sarachik, Edward • 1984, (Adjunct); PhD, 1966, Brandeis University; large scale ocean/atmosphere interaction, equatorial dynamics, climate change.
Spindel, Robert C. • 1987, (Adjunct); PhD, 1971, Yale University; ocean acoustics, signal processing, acoustic navigation systems, acoustic tomography.
Sternberg, Richard • 1965; PhD, 1965, University of Washington; geological oceanography, marine sedimentation processes.
Stuiver, Minze • 1969, (Adjunct); PhD, 1958, University of Groningen (Netherlands); geochronology, isotope geochemistry.
Taft, Bruce A. * 1973; (Affiliate); PhD, 1965, University of California (San Diego); physical oceanography and ocean circulation.

Wandel, Pierre * 1973, (Emeritus); PhD, 1954, University of Stockholm (Sweden); theory of general ocean circulation, large scale atmosphere-ocean interaction.

Associate Professors
Baross, John A. * 1984; PhD, 1973, University of Washington; microbial oceanography, bacterial ecology.

Deming, Jody W. * 1988; PhD, 1981, University of Maryland; evolution and ecology of marine bacteria in the pressurized ocean.

Dusbury, Alyn C. * 1954, (Emeritus); PhD, 1963, Texas A&M University; estuarine processes and the management of human uses of these marine systems.

Feeley, Richard A. * 1983, (Affiliate); PhD, 1974, Texas A&M University; chemical oceanography, oceanic sources and sinks for carbon dioxide.

Howe, Bruce M. 1988, (Research); PhD, 1986, University of California (San Diego); physical oceanography, acoustic tomography.

Kawase, Mitsuhiro * 1988; PhD, 1986, Princeton University; geophysical fluid dynamics; oceanic general circulation, tracer oceanography.

Kunze, Eric L. * 1987; PhD, 1985, University of Washington; mesoscale phenomena, wave/mean flow interaction, double diffusion and mixing.

Liley, Marvin D. * 1984; PhD, 1983, Oregon State University; chemical oceanography.

McDuff, Russell E. * 1981; PhD, 1978, University of California (San Diego); marine geochemistry.

McPhaden, Michael J. * 1982, (Affiliate); PhD, 1980, Scripps Oceanographic Institution; equatorial ocean dynamics, climate scale air-sea interaction.

Perry, Mary J. * 1976; PhD, 1974, University of California (San Diego); biological oceanography, phytoplankton physiology, nutrient cycling.

Quay, Paul D. * 1977; PhD, 1977, Columbia University; chemical oceanography, stable isotopes geochemistry, ocean tracers and mixing.

Riser, Stephen C. * 1981; PhD, 1981, University of Rhode Island; physical oceanography, mesoscale mixing, physics of mesoscale eddies, numerical modeling.

Rothrock, David A. * 1970; PhD, 1969, Cambridge University (UK); physical oceanography, polar oceanography, polar ice remote sensing and modeling.

Schultz, Adam * 1979, (Affiliate); PhD, 1985, University of Washington; geological oceanography, ocean bottom magnetics and magnetotellurics.

Sempere, Jean-Christophe * 1987; PhD, 1986, University of California (Santa Barbara); marine geophysics, magnetics, gravity, theoretical models, sea floor morphology.

Assistant Professors
Hautala, Susan L. 1994; PhD, 1992, University of Washington; physical oceanography, abyssal and paleoabyssal tracery.

Lessard, Evelyn J. * 1989, (Research); PhD, 1984, University of Rhode Island; microzooplankton ecology and physiology; physical/biological interactions at oceanic fronts.

Shen, Glen T. * 1988; PhD, 1986, Massachusetts Institute of Technology; chemical oceanography, trace element geochemistry, paleoceanography.

Thompson, Luanne * 1990; PhD, 1990, Massachusetts Institute of Technology; numerical modeling of mesoscale and general circulation of the oceans.

Warner, Mark J. * 1989, (Research); PhD, 1988, University of California (San Diego); physical oceanography, ocean ventilation and mixing processes.

Wilcock, William S. D. 1993; PhD, 1992, Massachusetts Institute of Technology; marine seismology, dynamics of mid-ocean ridges, geological fluid dynamics.

Lecturer
Emerick, Christine M. 1985; PhD, 1985, Oregon State University; marine geochemistry and tectonics.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

OCEAN 100 Introduction to Careers In the Marine Sciences (1-4) NW Presentations by various faculty and staff members, students and recent graduates offer an introduction to the College of Ocean and Fishery Sciences, curricular options, and professional opportunities in the marine sciences. Limited to freshmen, sophomores or transfer juniors. Offered: jointly with FISH 100; Sp.

OCEAN 101 Survey of Oceanography (5) NW Origin and evolution of the oceans; ocean basin boundaries; causes and effects of currents and tides; animal and plant life in the sea. Intended for nonmajors. Offered: AWSpS.

OCEAN 102 Environmental Oceanography (5) NW Designed to study in detail the benefits and the scientific problems created by human activities impinging on the oceanic environment.Prerequisite: 101 or permission of instructor. Offered: Sp.

OCEAN 200 Introduction to Oceanography (3) NW Description of the oceans. Emphasis on relations of biology, chemistry, geology, and physics in marine environments. Examination of relationships and interactions at the macro-, meso-, and microscales in the ocean. Intended for science majors. Offered: A.

OCEAN 201 Introduction to Field Oceanography (3) NW Methods of oceanographic field study. Instrumentation and sampling techniques. Writing assignment to teach report-writing skills. Prerequisite: oceanography major or permission of instructor. Offered: Sp.

OCEAN 202 Ocean Circulation (3) NW The large-scale circulation of the ocean. Topics include temperature-salinity analysis; water mass identification; water, salt, and heat budgets; chemical tracer distributions, advection and diffusion. Offered: W.

OCEAN 351-352 Quantitative Methods I, II (3,3) NW Applications of mathematical techniques to problems in the sciences and engineering. Emphasis on formulation, solution, and interpretation of results. 351: ordinary differential equations. 352: approximate methods; Fourier series; partial differential equations; boundary-value problems. Prerequisites: course in physics and MATH 126 for 351; MATH 307 for 352. Offered: jointly with AMATH/MATH 351, 352; A-W.

OCEAN 353 Quantitative Methods III (3) NW Development and application of numerical methods and algorithms to problems in the applied sciences and engineering. Linear algebra, curve fitting, root finding, algorithms, numerical integration, and ordinary differential equations. Prerequisite: MATH 126. Offered: jointly with AMATH 353; Sp.

OCEAN 401, 402 General Physical Oceanography I, II (3,3) NW Physical properties and processes; theories and methods describing ocean currents, waves, and tides. Prerequisites: one year each of chemistry and physics, 202 for 401, 401 for 402. Offered: A,W.

OCEAN 421 Chemical Oceanography (4) NW Physical and chemical properties of seawater and marine products; processes determining the chemical makeup of the oceans. Prerequisites: CHEM 140, 150. Offered: Sp.

OCEAN 433 General Biological Oceanography (4) NW Marine organisms, their quantitative distribution in time and space and their interactions with the ocean. Prerequisites: 401 and BIOL 101-102 or BIOL 201, 202, 203. Offered: W.

OCEAN 440 Instrumentation In Oceanography (3-6) NW Introduction to the general principles of instrument design and selection of electronic circuits, sensors, signal processing, telemetry, and recording from the point of view of the experimental scientist. Laboratory work for variable credit is offered in the form of projects, preferably practical ones resulting in the completion of a small hardware device.

OCEAN 450 Marine Geology and Geophysics (4) NW Sedimentological and petrological processes that determine the geologic record. Prerequisite: GEOG 205. Offered: A.

OCEAN 452 Principles of Sediment Transport by Turbulent Flow (3-6) NW Theoretical and experimental techniques used in studying erosion, transportation, and deposition of sediment. Initial motion of sediments, bed-load mobilization, suspension of sediment by turbulent flows, erosion and deposition of sediments, and applications of sediment transport theory to problems of geologic interest. Prerequisite: GEOG/PHYS 455. Offered: jointly with GEOG/PHYS 452.

OCEAN 460 Oceanic Data Interpretation (5) NW Collection and analysis of marine data. Laboratory analysis of samples, data handling, and modeling of marine problems. Prerequisites: 402, 421, 433. Offered: Sp.

OCEAN 488 Topics in Oceanography (1-4, max. 5) NW Specialized topics in oceanography. Various techniques in solving oceanographic problems. For students with senior standing. Prerequisite: permission of instructor. Offered: Sp.

OCEAN 499 Undergraduate Research (1-12, max. 24) NW Research on assigned topics that may involve laboratory, field, or literature surveys. Prerequisite: permission of instructor. Offered: AWSpS.

Courses for Graduates Only

OCEAN 500 Current Problems In Oceanography (1) NW Discussion of research topics that are currently being investigated within the school. Prerequisite: permission of instructor. Offered: A.

OCEAN 501 Marine Geological Processes (5) Overview of petrologic and sedimentologic processes that generate, modify, consume oceanic geologic record; plate-margin, midplate basalts genesis; hydrothermal metamorphism of oceanic crust; sediment sources, accumulation, postdepositional modification; passive margin sediment accumulation; trench subduction zones, basalts and andesites of oceanic island arcs; continental accretion. For first-year oceanography students. Prerequisite: permission of instructor. Offered: W.

OCEAN 502 Physics of Ocean Circulation (5) NW Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, straining in the ocean; simple waves; modern experimental methods in physical oceanography. Prerequisite: permission of instructor. Offered: A.

OCEAN 503 Ocean Circulation: Observations (3) Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss;
transports of heat and salt; climatic scale of variability; modern methods for determining circulation. Prerequisite: permission of instructor. Offered: W.

OCEAN 511 Seminar in Physical Oceanography (1, max. 9) Discussion of selected problems of current interest in physical oceanography. Prerequisites: 402 or 502 and permission of instructor. Offered: W.

OCEAN 512 Waves (3) Application of marine hydrodynamics principles to wave motion in oceans. Offered: W.

OCEAN 514 Seminar in Physical Oceanography (1) Thermodynamics of heat, water, and energy; study of budgets and of mechanisms of exchange. Prerequisite: ATM S 462.

OCEAN 520 Seminar (1) Introduction to current research topics for beginning graduate students. Offered: AWSp.

OCEAN 521 Seminar on Chemical Oceanography (*, max. 9) Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of instructor.

OCEAN 522 Radiochemical Tracers and Ocean Mixing (3) Distribution of natural and bomb-produced radioactive tracers in the ocean. Application of tracers used to derive information concerning time scales of (1) gas transfer at the water atmosphere interface; (2) whole ocean, thermocline, and deep-ocean water circulation; and (3) particulate settling in the marine environment. Knowledge of elementary differential equations suggested. Prerequisite: permission of instructor. Offered: 1995; W.

OCEAN 523 Isotope Biogeochemistry (3) The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, and water circulation. CaCO₃ dissolution, methanogenesis, nitrification/denitrification, and sulfate reduction. Prerequisite: permission of instructor.

OCEAN 524 Aquatic Chemistry (3) Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium, reactions, acid-base chemistry, the carbon cycle, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Prerequisite: 527 or permission of instructor. Offered: W.

OCEAN 525 Aquatic Kinetics (3) Reaction rates in the transport of matter. Theory of chemical kinetics; experimental results from: CO₂ hydration, Fe, Mn, and H₂O oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and O₂-rich interfaces. Prerequisites: CHEM 524 or equivalent and differential equations. Offered: alternate years.

OCEAN 526 Marine Organic Geochemistry (3) Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisites: CHEM 237 and 239 or permission of instructor.

OCEAN 527 Marine Chemistry (5) Processes controlling the chemical composition of the ocean, chemical distribution in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, tracers, metals, and biochemicals in the world's oceans. Offered: A.

OCEAN 528 Paleooceanography (3) History of environmental changes on earth over the past 100 million years as reconstructed from records in deep-sea sediments, ice sheets, and other ocean/terrestrial sub-surface deposits. Examination of isotopic, geochemical, biological, and paleontological data. Role of the ocean in climate change. Prerequisite: permission of instructor. Offered: 1994; A.

OCEAN 529 Biological Oceanography for Physical Scientists (5) Principles and practice of biological oceanography for students with strong background in physical sciences. Ecological processes; application of ecological principles to individual, population, and community levels; overview of discipline of biological oceanography; case studies of interdisciplinary problems shared with the physical sciences. Prerequisite: permission of instructor. Offered: W.

OCEAN 530 Biological Oceanography: Bacteria and Protozoa (3) Bacteria in the marine environment; fate of organic carbon in the ocean and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W.

OCEAN 531 Biological Oceanography: Phytoplankton (3) Phytoplankton in the marine environment: ecology, primary productivity, and physiology. Phytoplankton growth and photosynthetic patterns; spatial and temporal distributions of phytoplankton; methods for determining distributions and rates of production and growth. Prerequisite: permission of instructor. Offered: W.

OCEAN 532 Biological Oceanography: Zooplankton (3) Distribution and abundance of pelagic animals in space and time; analysis of their interactions. Small-scale distributions and behavior, population dynamics and energetics, trophic structure and dynamics, pelagic community structure, models of populations and food chains, secondary production and biogeography. Prerequisite: permission of instructor. Offered: Sp.

OCEAN 533 Biological Oceanography: Benthos (3) Analysis of marine benthic communities; new research questions and method; ecologically important physical processes of benthic boundary layer; theories, mechanisms, and observations of deposit feeding; succession as consequence of physical processes and biological interactions. Environments include deep-sea, estuarine, intertidal, and soft substrate. Prerequisite: permission of instructor. Offered: Sp.

OCEAN 536 Marine Microbial Interactions (3) Structure, function, and dynamics of natural mixed-populations of marine microorganisms; their interactions with higher organisms; mixed-species culture methods; eukaryotic field methods; species assemblages in specialized environments; mutualisms; sites and patterns of genetic exchange. Prerequisite: 530 or permission of instructor. Offered: alternate years.

OCEAN 537 Marine Primary Productivity (3) Patterns and mechanisms of marine phytoplankton primary production. Small-to-global-scale patterns of production; environmental regulation of production; absorption of electromagnetic radiation; fluorescence, carbon fixation, trophic interactions; remote sensing, and other optical methods."Prerequisite: 531 or permission of instructor. Offered: alternate years.

OCEAN 538 Zooplankton Ecology (3) Life history strategies, dynamics and production of populations, vertical migration, interspecific interactions and community structure, models of complex assemblages of zooplankton, sampling methods and analysis, spatial heterogeneity. Prerequisite: 532 or permission of instructor. Offered: 1994; A.

OCEAN 539 Benthic Biological Processes (3) Processes characteristic of soft-bottom benthic environments; areas and methods of rapid current progress; openocean studies; deep-sea feeding, passive larval recruitment; physical, chemical, geological, and biological feedbacks in ecological succession; scaling of laboratory systems. Prerequisite: 533 or permission of instructor. Offered: alternate years.

OCEAN 540 Seminar in Geostatistics (1-3) Lectures and discussions on selected topics in the application of geostatistics in earth science. Offered: alternate years.
OCEAN 541 Marine Reflection Seismology (3)
Principles of ocean reflection acoustics: effect of frequency on reflection coefficient and attenuation; bandwidth and resolution; sound sources; hydrophones, acoustic noise, tow noise; multichannel techniques; migration of reflectors; normal moveout and wave equation; physical basis and numerical methods. Prerequisite: permission of instructor.

OCEAN 543 Petrogenesis and Geochemical Evolution of Marine Igneous Rocks (3)
Petrologic processes involved in generation and metamorphism of igneous rocks in oceanic basins. Emphasizing genesis of special petrotectonic assemblages, including ridge and "hot spot" basalts, oceanic islands, midplate volcanics, igneous sequences associated with oceanic island arcs. Includes geochemical characterization of important rock types. Prerequisites: 501, 506, and GEOL 424 and 425 or equivalent and permission of instructor.

OCEAN 544 Statistical Models In Oceanography (3)
Multivariate analysis: regression, trend surface analysis, factor analysis, discriminant functions, and stochastic process models in oceanography. Prerequisite: Q SCI 483 or permission of instructor.

OCEAN 548 Topics In Physical Oceanography (1-4, max. 9)
Lecture series on topics of major importance in physical oceanography. Offered: AWSp.

OCEAN 550 Seminar on Geological Oceanography (*, max. 9)
Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor.

OCEAN 554 Techniques for Ocean Floor Research (3)
Planning field programs; selection of equipment and survey procedures; collection, analysis, compilation, and presentation of bathymetric and sediment data; evaluation of techniques and results. Prerequisite: permission of instructor.

OCEAN 556 Advanced Marine Geology and Geophysics (*, max. 9)
Contemporary problems in marine geology: concepts supporting or at variance with accepted hypotheses; discussion of recent advances. Prerequisite: permission of instructor.

OCEAN 570 Simulation Analysis of Marine Systems (3)
Introduction to the analytical methods of systems ecology. Simulation models are used in comparative analyses of the structure, nutrient and energy flow, and sensitivity of response in representative aquatic ecosystems. Prerequisites: BIOL 472, FORTRAN, MATH 126, Q SCI 482, or permission of instructor.

OCEAN 580 Marine Science In the Coastal Zone (4)
Major oceanic and nearshore processes, conditions, and their influence on human activities in coastal zone. Methods of understanding and accessing the accumulated knowledge on marine processes and its applications to decision-making process. Lectures and discussions of biological, chemical, geological, and physical oceanography. Generation and use of data bases as interpretative tools. Offered: A.

OCEAN 581 Geochemical Modeling (3)
Background to modeling concepts frequently encountered in chemical oceanography: box models, advection-diffusion problems, sediment diagenesis equations, and boundary layer (air-water and sediment-water interface) models. Problems requiring application of the models to chemical distributions in the ocean. Prerequisite: permission of instructor. Offered: alternate years.

OCEAN 582 River Basin Biogeochemistry (3)
The function of rivers and river basins in transporting materials to the oceans and their importance in biogeochemical cycles. Origin of water and water routing within drainage basins, sources and modification of dissolved and particulate materials in transport, ecological theory, and estuarine mixing zone transformations. Prerequisite: permission of instructor.

OCEAN 590 Advanced Topics In Biological Oceanography (*, max. 18)
Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories.

OCEAN 600 Independent Study or Research (*)
Offered: AWSpS.

OCEAN 700 Master's Thesis (*)
Offered: AWSpS.

OCEAN 800 Doctoral Dissertation (*)
Offered: AWSpS.
The School of Pharmacy prepares students for careers in a variety of settings, including ambulatory practice, institutional practice, long-term care, home care, industry, academia, and research. The entry level professional curriculum provides scientific and clinical applications in the following areas of training: the biological sciences (anatomy, physiology, genetics, immunology, microbiology, pathology, biochemistry), the pharmaceutical sciences (dosage formulation, pharmacaceutics and biopharmaceutics, medicinal chemistry, pharmacology), the clinical sciences (therapeutics, pharmacokinetics, drug literature evaluation, pharmacology, drug product selection and drug use review), administrative training (business administration, distribution system management, drug distribution and health care delivery systems), and the technical sciences (computerized data management, medication distribution systems and new technologies in drug administration). Teaching is directed at helping students develop the critical thinking and problem solving skills necessary to provide rational drug therapy, promote healthy lifestyles and disease prevention, enhance patient compliance, reduce medication related problems and improve health outcomes. In the final year of the program, students complete experiential training at community and institutional pharmacies located primarily in the Puget Sound area. Graduates meet the educational requirements for licensure in all fifty states, as the School is fully accredited by the American Council on Pharmaceutical Education.

The School of Pharmacy is organized into Departments of Medicinal Chemistry, Pharmaceutics, and Pharmacy. Information about the entry level professional program may be obtained from the Office of Academic and Student Programs located in H-362 Health Sciences. Graduate school information may be received from the individual departments offering the advanced degrees.

Consideration for admission to the professional program requires at least two years of preparation in the professional training. Sequences in biology, general chemistry and organic chemistry as well as courses in calculus, statistics, writing, microbiology, the visual, literary, and performing arts (formerly humanities) and individuals and societies (formerly social science) are required for admission. A student to take the licensure examination to become a registered pharmacist. If students choose to pursue additional coursework, they may apply to the Doctor of Pharmacy program, which requires additional years. The School is considering converting to a four year program awarding the Doctor of Pharmacy as its entry level degree. The likelihood of this conversion is contingent upon program readiness and funding approval. Pharmacy students, particularly those who are applying for autumn 1995 admission, are encouraged to contact the School regarding progress toward this proposed change.

Medicinal Chemistry

Chairperson
Wendel L. Nelson

Graduate Program
Wendel L. Nelson, Graduate Program Coordinator

The Department of Medicinal Chemistry offers graduate study leading to the degrees of Master of Science and Doctor of Philosophy. The primary areas of research training in the Department of Medicinal Chemistry are in chemical and molecular aspects of drug action and of drug metabolism including both laboratory experiments and theoretical work. Studies in the field include, for example, the relationship between chemical structure and biologic effect, function and toxicity; delineation of the metabolic spectrum of drugs or foreign substances in man and animals, and the factors (environmental, disease, etc.) that affect this spectrum of metabolites; the study of the nature and catalytic properties of the enzymes responsible for metabolic reactions and the molecular mechanisms by which such reactions occur. Theoretical studies on conformational aspects of important enzymes involved in these processes are under study.

Graduates from the program must possess the skills necessary to develop quantitative and qualitative methodologies to pursue studies at the whole animal, organ, microsomal, or purified enzyme level; to elucidate and evaluate the chemical transformations that occur when drugs are metabolized. Participation in a cumulative examination process and at least two quarters of teaching experience are additional requirements for the doctoral program. Successful completion of cumulative examination requirements is necessary to work for the Ph.D. degree.

Admission Requirements
Students who intend to work toward the Doctor of Philosophy degree must apply for admission to the Graduate School and meet the requirements outlined in the Graduate Study section of this catalog. Graduate students must satisfy the requirements for an advanced degree in force at the time the degree is to be awarded. Graduate study requires approval of the Graduate School and the Department of Medicinal Chemistry.

Special Requirements
Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in medicinal chemistry. Undergraduates who plan to pursue graduate study may expedite their programs by selection of pertinent electives. Although the choice of electives varies with the student's ultimate goals, graduate study in medicinal chemistry requires adequate preparation in mathematics and in the biological and physical sciences.

Master of Science Degree
A student in the master's degree program must present at least 27 credits of course work, exclusive of dissertation and nonthesis research. The student also must complete a research project, prepare an acceptable thesis, and pass a final examination.

Doctor of Philosophy Degree
A student in the doctoral program must present a minimum of 45 credits of course work, exclusive of dissertation and nonthesis research. Credits earned for the master's degree may be applied toward the doctoral degree. The student must pass a General Examination for admission to candidacy for the doctoral degree. Satisfactory completion of departmental cumulative examinations precedes scheduling of the General Examination. The student must complete a research project, prepare an acceptable dissertation and pass a final examination. Research for the doctoral degree must be done at this university.

Financial Aid
Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the graduate program coordinator for additional information.

Professors
Ballie, Thomas A. * 1981; PhD, 1973, University of Glasgow (UK); medicinal chemistry.
Fischer, Lubis 1926, (Emeritus); PhD, 1933, Washington University; medicinal chemistry.
Fogg, Heinz G. * 1987, (Adjunct); PhD, 1961, Technical University of Munich (Germany); biocatalysis and natural products chemistry.
Huitric, Alain C. 1955, (Emeritus); PhD, 1954, University of California (San Francisco); medicinal chemistry.
Krupski, Edward 1983, (Emeritus); PhD, 1949, University of Washington; medicinal chemistry.
McCarthy, Walter * 1949, (Emeritus); PhD, 1949, Indiana University; medicinal chemistry.
Nelson, Sidney D. * 1977; PhD, 1974, University of California (San Francisco); biochemistry.
Nelson, Wendel * 1965; PhD, 1965, University of Kansas; medicinal chemistry.
Trager, William F. * 1972; PhD, 1965, University of Washington; medicinal chemistry, bioanalytical chemistry, drug metabolism.

Associate Professors
Elmer, Gary W. * 1971; PhD, 1970, Rutgers University; pharmacognosy.
Kharasch, Evan D. * 1988; Adjunct; MD, 1984, Northwestern University; clinical pharmacology of anesthetic agents, drug metabolism, and drug interactions.

Assistant Professors

Atkins, William M. * 1991; PhD, 1988, University of Illinois; structure and function of oligomeric proteins.

Daggett, Valerie D. * 1993; PhD, 1990, University of California (San Francisco); molecular modeling studies of peptides and proteins.

Kunze, Kent L. 1990; Research; PhD, 1981, University of California (San Francisco); medicinal chemistry.

McFarland, Lynn 1991; Research; PhD, 1988, University of Washington; medicinal chemistry.

Rettie, Allan E. * 1984; PhD, 1983, University of Newcastle-On-Tyne (UK); in vitro drug metabolism in man.

Lecturer

Pharmaceutics

Chairperson
René H. Levy

Graduate Program
René H. Levy, Graduate Program Coordinator

The Department of Pharmaceutics offers programs of graduate study leading to the degrees of Master of Science and Doctor of Philosophy.

Program Description

This program will train research scholars in the fundamental aspects of drug disposition and action in animals and man. Drug disposition includes the phenomena of absorption, distribution, and elimination. Pharmacokinetics is the study of the time course of these processes and the time course of pharmacological effects. Graduates will possess expertise in quantitative analytical techniques and in the elaboration of mathematical models to describe the various processes of drug disposition and action. The scientists graduating from this program will be capable of investigating the relationship between drug and metabolite levels in various body compartments or tissues with the kinetics of pharmacological effects, both therapeutic and toxic. They will be able to probe the effects of alteration of physiological and biochemical processes which occur in disease states on drug disposition and pharmacological response.

Typically, these scientists will interact with clinicians, medicinal chemists, pharmacologists, analytical chemists, physiologists, and biochemists. This will be possible because their training is highly interdisciplinary at the didactic and research levels.

Admission Qualifications

Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in pharmaceutics. Undergraduates who plan to pursue graduate study may expedite their programs by selection of pertinent electives. This information can be obtained from the graduate program coordinator.

Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships, and outside fellowships such as those from the American Foundation for Pharmaceutical Education. Financial support is awarded annually as long as substantial progress toward the degree is being made.

Postgraduate Professional Pharmacy Programs

Doctor of Pharmacy Degree

The Department of Pharmacy offers a two-year Doctor of Pharmacy (Pharm.D.) program for persons who wish to practice pharmacy at an advanced level. Academic and clinical education is provided for individuals who have graduated from an accredited school or college of pharmacy and who are eligible for licensure in the state of Washington. The Pharm.D. curriculum offers two options: a joint Doctor of Pharmacy-general residency program and a Pharm.D.-only program. Because enrollment is limited, admission is competitive, based on academic achievement, letters of recommendation, and a personal interview. Students are admitted to the program July 1 of each year. Applicants should register for the American Society of Hospital Pharmacists residency matching program by mid-December and complete all application materials by January 31. Applicants are also required to take the GRE examination. Additional information is available from the Department of Pharmacy.

The Program in Pharmacoepidemiology and Drug Policy was established to provide a focus for academic activities concerning the relationship between medications, medical care, and health outcomes. In collaboration with the School of Public Health, the program offers graduate training in pharmacoepidemiology, the study of the use and effects of drugs in large, defined populations, pharmaco-economics, and in drug policy. The core faculty for the program is drawn from the disciplines of pharmacy, epidemiology, medicine, health services, and biostatistics. Strong linkages have been established with many public and private health care organizations in the Northwest. For further information and application material contact Dr. Andy Stergachis.

Andy Stergachis

Professors

Burkhart, Vincent D. 1982; MS, 1972, University of Maryland; institutional pharmacy practice.

Gibaldi, Milo * 1978; PhD, 1963, Columbia University; pharmacokinetics.

Hall, Nathan A. * 1951, (Emeritus); PhD, 1948, University of Washington; pharmacy practice.

Hasten, Philip D. 1989; PharmD, 1968, University of California (San Francisco); drug interactions.
SCHOOL OF PHARMACY / COURSE DESCRIPTIONS 429

Kradyan, Wayne A. * 1971; PharmD, 1970, University of California (San Francisco); adult clinical practice.

Orr, Jack E. 1956, Emeritus; PhD, 1943, University of Wisconsin; pharmacy history.

PLEIN, Elmer M. * 1938, Emeritus; PhD, 1936, University of Colorado (Boulder); pharmacy practice, geriatrics.

PLEIN, Joy B. * 1971; PharmD, 1956, University of Washington; clinical pharmacy, geriatrics.

STERCASIS, Andy * 1980; PhD, 1979, University of Minnesota; pharmaceutical outcomes research, reproductive epidemiology.

ASSOCIATE PROFESSORS

ANDERSON, Gail 1981; PhD, 1987, University of Washington.

BAUER, Larry * 1980; PharmD, 1980, University of Kentucky; clinical pharmacokinetics: drug absorption, distribution, excretion and metabolism in humans.

CHRISTENSEN, Dale B. * 1976; PhD, 1977, University of Minnesota; pharmacy administration.

ELLSWORTH, Allan J. 1981; PharmD, 1977, Philadelphia College of Pharmacy & Science; clinical pharmacy.

GARDNER, Jacqueline S. 1990, PhD, 1980, University of Washington; pharmacoepidemiology, drug policy.

HORN, John 1978; PharmD, 1977, University of Cincinnati; clinical pharmacy.

ASSISTANT PROFESSORS

HECKERT, Susan R. * 1990, Adjunct; MD, 1981, Case Western Reserve University; outcomes of drug therapy, susceptibility to cancers.

LESSLER, Daniel 1990, Adjunct; MD, 1986, Stanford University; physician management and decision-making, pharmacoeconomics.

ODEGARD, Peggy Soule 1988; PharmD, 1990, University of Washington; clinical practice, pediatrics.

OSBORN, Teresa McRorie 1987; PharmD, 1987, University of Utah; pediatric pharmacotherapy.

SULLIVAN, Sean 1992; PhD, 1992, University of California (Berkeley).

SCHOOL OF PHARMACY / COURSE DESCRIPTIONS 430

Senior Lecturers

Lecturers

O’SULLIVAN, Teresa 1990; PharmD, 1990, University of Minnesota; clinical pharmacy, cystic fibrosis.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

COURSES FOR UNDERGRADUATES

Medicinal Chemistry

MEDCH 400 Biophysical Medicinal Chemistry (3) Trager Principles of physical organic chemistry; chemical bonding, stereochemistry, acid-base properties and reaction mechanisms relevant to processes of drug distribution, binding, specificity, metabolism, and elimination. Prerequisites: CHEM 239. Offered: Sp.

MEDCH 413 Immunizing and Antimicrobial Agents (3) Eimer Chemical and biologic properties of agents used to prevent or treat infectious diseases, including diagnostic, prophylactic, and therapeutic uses of immunizing biologicals and spectrum, action

MEDCH 435 Diagnostic Medicinal Chemistry (3) S. Nelson Examination of clinical diagnostic tests with emphasis on the chemical rationale of the test; the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Prerequisite: BIOC 406. Offered: W.

MEDCH 490 Metabolism of Drugs (3) Balile, Trager Processes of drug metabolism, their mechanisms, and their implications in modern therapy. Bioactivation of prodrugs and biotransformations in the inactivation and elimination of drugs, and the relationship to drug toxicity and drug design. Prerequisite: CHEM 239 or equivalent. Offered: W.

MEDCH 499 Undergraduate Research (*, max. 6) Research projects in medicinal chemistry. Prerequisites: cumulative grade-point average of 2.50 and permission of instructor. Entry code required. Offered: AW,WS,Sp.

Pharmacetics

PCEUT 331 General and Physical Principles (4) Unruh, Hafferty Introduction to the basic principles of pharmacy, with emphasis on physical processes important in the manufacture, stability, and characteristics of various drug dosage forms. Prerequisites: CHEM 239 and pharmacy major. Offered: A.

PCEUT 405 Biopharmaceutics and Pharmacokinetics (3) Shen, Slattery Drug release from dosage forms, absorption from different routes of administration, the resulting concentration time curves in blood and urine, and the role of these factors in bioavailability and drug product selection. Prerequisites: PCEUT 331, CONJ 342 and pharmacy major or permission of instructor. Offered: A.

PCEUT 406 Clinical Pharmacokinetics (4) G. Anderson, Levy Basic principles of pharmacokinetics and their application to the clinical setting, including: single-dose intravenous and oral kinetics, multiple-dose oral pharmacokinetics, determination of patient-specific dosage regimes, role of disease in drug requirements for the major pharmacologic classes of drugs. Prerequisites: 405 and pharmacy major. Offered: W.

PCEUT 410 Pharmacokinetics of Drug Interactions (3) Shen The common pharmacokinetic mechanisms underlying clinically important interactions between drugs. Interactions involving gastrointestinal absorption, serum drug protein binding, excretory and metabolic clearance processes. Prerequisite: 406. Offered: Sp.

PCEUT 486 Pharmaceutical Biotechnology (3) Gibaldi, Ho Applications of biotechnology in designing therapeutic products, with emphasis on research and development of biopharmaceuticals. Molecular cloning, production, physical stability, stability of immunogenicity, toxicity of products of therapeutic protein in relation to pharmacokinetic and therapeutic responses. Prerequisite: concurrent registration in 405 and PHCO 401 or permission of instructor; BIOC 405/406. Offered: A.

PCEUT 499 Undergraduate Research (*, max. 6) Basic and clinical research projects in drug disposition and effect. Prerequisites: 2.5 GPA and permission of instructor. Offered: AW,WS,Sp.

Pharmacy

PHEM 304 Profession of Pharmacy (3) Kradyan Overview of the profession of pharmacy emphasizing practice opportunities and specialization. Introduction to clinical and ethics case evaluation techniques provided. Prerequisite: professional major or permission of instructor. Offered: A.

PHEM 305 Clinical Dispensing Pharmacy (3) Davis Preparation and dispensing of prescriptions at Rubenstein Memorial Pharmacy in Hall Health Center or University of Washington Medical Center outpatient pharmacy. For students with little or no experience in pharmacy wishing experience prior to internship, externship, or didactic course work. Under direct supervision of the Student Health Center pharmacists and University of Washington Medical Center pharmacists. Credit/no credit only. Prerequisites: pharmacy major and permission of instructor. Offered: AW,WS.

PHEM 309 Drug Information Sources (1) Murri Introduction to systematic methods for responding to drug information inquiries with emphasis on familiarizing students with content and use of important pharmacy, drug information resources. Emphasis on written, verbal communications and development of efficient strategies for retrieving and evaluating information related to specific drug information. Prerequisites: pharmacy majors. Offered: A.

PHEM 334 Dispensing Practice and Calculations Laboratory (1) Exercises in dispensing medications pursuant to order of prescriber. Intravenous admixtures, extemporaneous compounding, patient profile, patient counseling, use of computers for pharmacy and patient dispensing. Required pharmaceutical calculations proficiency taught through exercises, computer-aided instruction, and assigned practice problems. Prerequisites: PCEUT 331, concurrent registration in 440, and pharmacy major. Offered: W.

PHEM 409 Applied Pharmacokinetics (2) Anderson, Bauer Pharmacokinetics of specific drugs. Influence of age, weight, sex, and disease status on patient-specific dosage regimens. Advanced kinetic concepts. Prerequisites: PCEUT 406 or permission of instructor. Offered: Sp.

PHEM 411 Medical Devices for Home Health Care (3) Study of medical devices commonly provided by pharmacists to their patients, including their selection and adaptation for specific patient needs. Lectures include display and demonstration of actual devices. Enrollment limited. Prerequisite: 440. Offered: W.

PHEM 412 Nonprescription Drugs and Self-Care (3) Kradyan Overview of common classes of nonprescription medications with emphasis on case examples. Patient assessment, non-drug therapy, selection of nonprescription products if appropriate, and advice to patients. Oral presentation required. Prerequisite: 484 which may be taken concurrently. Offered: W.

PHEM 415 Primary Care Pharmaco-therapeutics (3) Explores clinical applications and therapeutic issues for selected drug categories commonly used in primary care settings and across age groups. Selected drug categories are defined by pharmacokinetics, indications for use, efficacy, therapeutic and adverse effects, monitoring parameters, dosing principles, common drug interactions. Patient education and socioeconomic and behavioral factors emphasized. Offered: Sp.

PHEM 437 Substance Abuse Awareness (3) Lippert The etiology and patterns of substance abuse, drugs of abuse, treatment options, competency and recovery, drug testing, legal and ethical considerations, and community resources are covered in a lecture-discussion format. Students also participate in community service lectures and/or special projects. Prerequisites: 440, 485, third-year students or permission of instructor. Offered: W.
PHARM 478 Gerontological Communication Skills Seminar (2) Dawson Addresses special communication needs of the elderly, ranging from individualized practices relating to patient advocacy through development and provision of pharmacy services. Communication techniques applicable to teaching, developing innovative services, supervising, motivating, counseling, and interdisciplinary interactions are explored in lecture and laboratory. Prerequisites: Geriatric Certificate Program or permission of instructor. Offered: W.

PHARM 440 Pharmaceutical Care Systems I (6) Dawson, Gardner Distribution and control systems for medications, influence of behavior and communication on use. Emphasis on interpreting orders, monitoring patient use, undertaking medication history interviews, and communicating with patients and health professionals using effective listening, writing, and interpersonal skills. Prerequisites: PCEUT 331, concurrent registration in 334, and pharmacy major. Offered: W.

PHARM 450 Pharmacy Laws (3) Study of the laws regulating the practice of pharmacy. Includes professional liability, warranties, and contracts. Prerequisites: 470 or 471 and 486, and pharmacy major. Offered: Sp.

PHARM 452 Contemporary Problems (1) Christiansen Discussed trends and issues affecting the role of pharmacy in health-care delivery. Credit/no credit only. Prerequisite: third-year standing. Offered: Sp.

PHARM 460 Principles of Professional Practice Management (3) Christiansen Topics include organization of time and objectives, management of financial resources, inventory, and computer simulations of management decision-making. Emphasis on developing specific skills, such as burden rate analysis, and financial ratio analysis. Primarily for students who are interested in managerial careers in community pharmacy practice. Prerequisite: pharmacy major. Offered: W.

PHARM 461 Pharmaceutical Marketing (3) Benfield Introduction to marketing concepts as applied to delivery of pharmaceutical products and services. Trends in pharmaceutical marketplace with focus on supervision of clinical practice. Conferences on selected topics supplement work experience. Credit/no credit only. Prerequisite: pharmacy major and permission of instructor. Offered: AWSpS.

PHARM 471 Institutional Distribution Practicum (4) O'Sullivan Closely supervised study-experience periods in community pharmacies. Students participate in active community pharmacy under the supervision of a clinical preceptor. Conferences on selected topics supplement work experience. Credit/no credit only. Prerequisite: pharmacy major and permission of instructor. Offered: AWSpS.

PHARM 481 Introduction to Therapeutics (3) Hansen Introduces the process of applying the basic pharmaceutical sciences and pharmacy to the individualization of drug therapy. Covers patient assessment and pathophysiology for specific disease states and the process of optimizing and monitoring drug therapy. Prerequisites: PHCOL 401 and 402 and pharmacy major. Offered: W.

PHARM 483 Institutional Pharmacy Practice (2) Burkart Presentation of topics regarding current content in institutions in practice. Discussion of new systems technology, home care programs, managed care, computer applications, budgeting, formulary systems, drug information services, intravenous admixture programs, quality assurance process, and patient-oriented services. Offered: W.

PHARM 484 Clinical Therapeutics I (4) Black, Kradjan Continuation of 483 with emphasis on disease states and their drug therapies. Assessment of drug therapy and application of basic pharmaceutical sciences to selection of drugs in patient care. Prerequisites: 483 and pharmacy major. Offered: Sp.

PHARM 485 Clinical Therapeutics II (3) McRorie Continuation of 484 with emphasis on disease states and their drug therapies. Lectures stress assessment of drug therapy and application of basic pharmaceutical sciences to selection of drugs in patient care. Prerequisites: 483 and pharmacy major. Offered: Sp.

PHARM 486 Clinical Institutional Practicum (4) O'Sullivan Supervised experience in the clinical roles of pharmacy practice. Students participate in daily rounds in institutional-care facilities and take drug histories of patients. Serve as in-service instructors, consult patients about medications, and provide consultation to other health-care professionals. Credit/no credit only. Prerequisites: 334, 483, and pharmacy major, or permission of instructor. Offered: AWSpS.

PHARM 487 Advanced Clinical Practicum (4) Rogers Supervised experience in the clinical roles of pharmacy practice. Students provide pharmaceutical care under the supervision of a preceptor in an affiliated health-care setting. Students may provide consultation to other health-care professionals in ambulatory or institutional patient-care facilities. Credit/no credit only. Prerequisite: 486. Offered: AWSpS.

PHARM 488 Elective Advanced Practicum (*, max. 16) O'Sullivan, Plein Advanced-level clinical pharmacy experience in institutional (hospital, nursing home, long-term-care facility) and ambulatory patient-care facilities, utilization of a clinical preceptor. Credit/no credit only. Prerequisites: 486 and permission of instructor. Offered: AWSpS.

PHARM 489 Drug Information (4-6) Muri Supervised experience in performing clinical pharmacy activities relating to retrieval and analysis of drug information from various resources; preparation of responses to consultation requests presented to Drug Information Service; techniques of preparing verbal and written drug information reports; participation in preparation of a pharmacy newsletter. Prerequisite: permission of instructor. Entry code required. Offered: AWSpS.

PHARM 491 Cancer Pharmacotherapeutics (2) Kwolek, McDonald A study of the pharmacotherapy of cancer, covering supportive care (corticosteroids, platelet aggregates, analgesics, nutrition) to the antineoplastic agents themselves. Specializes in each area as guest lecturers. Designed for pharmacists. Prerequisite: third-year professional standing in pharmacy. Offered: W.

PHARM 492 Pharmaceutical Services for Long-Term Care (2) Scope of pharmaceutical services for long-term care (LTC) and systems for services. Responsibilities of the pharmacist for distributive, administrative, and clinical pharmacy services for nursing homes and other long-term-care facilities. Economic considerations in provision of LTC pharmaceutical services. Role of the pharmacist for home-care health-care organizations. Pharmaceutical services for independently living elderly. Prerequisite: pharmacy major. Offered: W.

PHARM 493 Basic Literature Evaluation (2) Introduction to steps involved in the assessment of primary and secondary literature. Students required to read and critique medical literature. Classes conducted in journal club format. Prerequisite: 309. Offered: Sp.

PHARM 495 Special Studies in Pharmacy (*, max. 6) Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific areas of practice. Prerequisite: permission of instructor. Offered: A.

PHARM 498 Case Conference: Geriatrics (1) Plein Students taking geriatric pharmacy clerkships in various clinical settings meet together with faculty to present case studies of elderly patients requiring complex drug therapies. Required for the Certificate in Geriatric Pharmacy Practice. Prerequisites: 486 and 489 which may be taken concurrently, or permission of instructor. Offered: W.

PHARM 499 Undergraduate Research (*, max. 6) Applied pharmaceutical research projects. Credit/no credit only. Prerequisites: cumulative grade-point average of 2.50 and permission of instructor. Entry code required. Offered: AWSpS.

Courses for Graduates Only

Medicinal Chemistry

MEDCH 501, 502, 503 Advanced Medicinal Chemistry (4, 4, 4) Atkins, Bartle, Elmer, S. Nelson, W. Nelson, Rettie, Trager Advanced study of the various classes of medicinal compounds, with particular emphasis on the physical and pharmacokinetic properties of acetylsalicylic acid, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: permission of instructor. Offered: W.

MEDCH 520 Seminar (1, max. 5) Graduate students attend seminars and make one formal presentation per year while in residence; 1 credit per year is allowed. Credit/no credit only. Offered: AWSpS.

MEDCH 521 Advanced Medicinal Chemistry (3) Application of integrated data from the physical and biological sciences to problems of chemotherapy, including transport of drugs to site of action, biotransformation of drugs, interaction with enzyme systems, and recent advances in drug design. Prerequisites: CHEM 457, 531, and BIOC 442, or permission of instructor. Offered: Sp.

MEDCH 525 Laboratory Methods in Drug Metabolism (3) Atkins, Daggett, Kunze, Rettie, Thummel Examinations laboratory techniques for the isolation and characterization of subcellular fractions from human tissues. Includes the determination of product formation kinetics, in vivo-in vivo kinetic scaling, quantitation of chemical excretion in human urine, and computer-assisted prediction of metabolites of catalytically sensitive drugs. Offered: jointly with PCEUT 525; Sp.

MEDCH 527 Drug Metabolism (3) Rettie, S. Nelson Considerations of the biochemical mechanisms for the biotransformation of drug and foreign compounds. Includes reaction mechanisms, ultrastructural considerations, induction mechanisms, methodology, kinetics,
ics of inhibition and activation, steroid and amine metabolic. Offered: jointly with PHCOL 527; odd years; W.

MEDCH 528 Proteins In Therapy and Disease (3) Atkins, Daggett Examination of enzyme catalysis and of protein structure and dynamics. Principles applied to topics of therapeutic relevance including: peptides and proteins as drugs, structure-based drug design, drug metabolism, protein engineering, and role of mutant or incorrectly folded proteins in disease states. Prerequisite: comprehensive course in biochemistry or consent of instructor. Offered: W.

MEDCH 541 Mass Spectrometry In Life Sciences (3) Ballie, Howard Principles of modern mass spectrometry. Applications to the structural determination and quantitative measurement of biologically important substances. Prerequisite: permission of instructor. Offered: jointly with CHEM 541; even years; Sp.

MEDCH 582 Topics In Medicinal Chemistry (1, max. 10) Discussion of pertinent articles from current literature. Credit/no credit only. Offered: AWSpS.

MEDCH 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSpS.

MEDCH 700 Master's Thesis (*) Credit/no credit only. Offered: AWSpS.

MEDCH 800 Doctoral Dissertation (*) Credit/no credit only. Offered: AWSpS.

Pharmaceutics

PCEUT 506 Pharmacokinetic Principles (4) Shen Coverage of basic pharmacokinetic concepts in an interactive format. Prerequisites are given reading assignments prior to class as a point of entry into the material. Topics emphasize the physiologic basis for mathematical models of drug distribution, clearance, and pharmacokinetic effect. Offered: W.

PCEUT 507 Topics in Clinical Pharmacokinetics (1, max. 12) Gibaldi New and important findings and trends in pharmacokinetics, biopharmaceutics, drug metabolism, and drug toxicity, with particular emphasis on clinical significance and applicability. Credit/no credit only. Prerequisite: PCEUT 405 or equivalent. Offered: AWSpS.

PCEUT 510 Pharmacokinetics of Drug Interactions (3) Shen Common pharmacokinetic mechanisms underlying the clinically important interactions between drugs. Interactions involving gastrointestinal absorption, serum drug protein binding, excretion and metabolic clearance processes. Prerequisite: 405 or equivalent. Offered: Sp.

PCEUT 520 Seminar (1, max. 5) Graduate students attend seminars and make one formal presentation per year while in residence; 1 credit per year is allowed. Credit/no credit only. Offered: AWSpS.

PCEUT 525 Laboratory Methods In Drug Metabolism (5) Atkins, Daggett, Kimm, Ratté, Thummel Examine laboratory techniques for the isolation and characterization of subcellular fractions from human tissues. Includes the determination of product formation.
Graduate School of Public Affairs

Dean
Margaret T. Gordon
203A Parrington

The Graduate School of Public Affairs (GSPA) is a graduate professional school providing education and research for the public service. The School confers the Master of Public Administration (M.P.A.) degree. GSPA's program of study is designed to train highly-skilled managers and policy analysts for a wide range of careers in the public and not-for-profit sectors. The academic and professional orientation of the degree program gives GSPA students the knowledge and skills necessary to make significant contributions to national, regional, and international policy. Graduates hold leadership positions throughout the public sector as mayors and city managers; local and regional government administrators; foreign service officers; staff assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; and administrators of arts organizations. In addition, a number of alumni are employed in the private sector, usually in positions involving substantial contact with public agencies.

Graduate Program

Master of Public Administration Degree

The degree of Master of Public Administration is awarded upon satisfactory completion of 60 credits of course work, including a final degree project. Students without substantial prior experience in public service work also are expected to complete a paid administrative internship. The program normally requires two full academic years, and, for those requiring an internship, the intervening summer. Students may attend GSPA on a part-time basis. Foreign-language proficiency or a thesis are not required for the M.P.A. degree. Concurrent degree programs in International Studies (M.P.A.-M.A.) and Law (M.P.A.-J.D.) are available.

The GSPA curriculum ensures the integration of public policy analysis and management while giving students the flexibility to specialize in substantive policy fields. Courses emphasize the practical application of the theory, values, and techniques needed to succeed in public life. The academic program is divided into three major components: 1) the required core curriculum, which introduces students to public organization theory; policy analysis; budgeting; microeconomic analysis; and quantitative methods; 2) more concentrated study in policy analysis, management, and context and values; and 3) specialized study in one of five policy gateway areas: education and social policy; environmental policy; international affairs; urban and regional affairs; or individualized policy study. The policy gateway permits students to explore a wide range of academic disciplines and professional opportunities. Central to the gateways are courses offered by numerous other schools and departments at the University of Washington.

Admission Requirements

The Graduate School of Public Affairs admits students on an annual basis, for summer or autumn quarters only. The application deadline for either quarter is February 15.

The prospective student must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution. The student's academic record should be a strong one, with a minimum GPA of 3.00 on the last 90 (quarter) or 60 (semester) credits. Scores on the Graduate Record Examination (GRE) general test are also required for admission.

The primary criterion for admission to the School is the applicant's demonstrated ability to complete the graduate program while sustaining a high level of achievement. GSPA's Admissions Committee considers grades and test scores, and also gives considerable weight to professional experience, volunteer work, letters of recommendation, and the applicant's writing skills as demonstrated in personal essays.

Although the School has no formal undergraduate course requirement for admission, GSPA's core courses in economics and quantitative methods assume that entering students have been exposed to these subjects at the undergraduate level. Ideally, new students will possess academic or professional background in governmental process, excellent writing skills, and academic preparation in microeconomics and statistics. Students lacking sufficient preparation in these areas may be required to demonstrate aptitude prior to admission, or may be asked to take preparatory course work in addition to the basic M.P.A. degree requirements.

Financial Aid

The Graduate School of Public Affairs has limited departmental financial aid. The University of Washington Office of Student Financial Aid is the primary source of financial assistance for M.P.A. students. The most common forms of University aid are work-study awards and Stafford or Perkins Loans. Only full-time students are eligible for non-loan forms of University financial aid.

In order to receive priority consideration for UW financial aid, the Free Application for Federal Student Aid (FAFSA) must be received by the central processor (located in Iowa) by February 28 of the year of application to the school. Applicants should mail their completed FAFSA forms at least two weeks ahead of this deadline. FAFSA forms can be obtained from the UW Office of Student Financial Aid, PE-20, Seattle, Washington 98195, (206) 543-6101, or from the financial aid office of any college or university.

Each year the Graduate School of Public Affairs awards a limited number of departmental fellowships. In order to receive consideration for these awards, applicants must complete the GSPA financial aid application. These forms are included in the GSPA application packet. First-year students are also eligible to apply for some research assistantships. These appointments are generally made after the fall term begins. Teaching assistantships are reserved for second-year students. Paid internships with public agencies can also provide students with additional income during their tenure at GSPA.

Correspondence and Application Information

A program brochure and application may be obtained from the Director of Admissions, Graduate School of Public Affairs, DC-12, University of Washington, Seattle, Washington 98195, or by telephoning (206) 543-4900.

Research Facilities

Institute for Public Policy and Management

The culture of the Graduate School of Public Affairs promotes the integration of extensive applied research into the academic program. In addition to supporting the independent research of its faculty members, the School houses the Institute for Public Policy and Management (IPPM). The IPPM initiates and conducts major applied research projects for public managers and elected officials, drawing upon the skills and knowledge of University researchers, faculty members, graduate students, and practitioners from various public and private organizations. Through research, consultation, conferences, publications, and training, the IPPM enhances the ability of public sector officials and the general public to understand major public policy issues and to make sound public management decisions.

Northwest Policy Center

The Northwest Policy Center (NPC) was established in 1987 as a model regional program to develop and disseminate public strategies which promote economic vitality in the five-state Northwest region. NPC conducts policy research, designs and evaluates policy alternatives, and promotes the continuous exchange of information among regional policymakers.

Cascade Center for Public Service

The Cascade Center for Public Service was established in 1987 to enhance the quality of public management in the Northwest through the design and delivery of executive education programs. The center offers an extensive set of training programs tailored to senior and mid-level public managers and to elected officials in state and local government. In addition, the center's Curriculum Development Project is working to improve the availability of new teaching tools and techniques through the use of a computer distribution network to distribute new case studies, skill exercises, and teaching notes.

Human Services Policy Center

Founded in 1991, the Human Services Policy Center (HSPC) is an interdisciplinary research center focused upon issues relating to families and children. It was created to help professionals forge links among schools and service agencies to improve service delivery to children and families. HSPC's mission includes program evaluation and data analysis to help policymakers and the general public better understand these critical issues. The center is a collaborative endeavor involving faculty from several University of Washington professional schools: Public Affairs, Public Health and Community Medicine, Education, Social Work, Nursing, and Communications.

Faculty

Professors

Beyers, William B. * 1967, (Adjunct); PhD, 1967, University of Washington; economic geography, regional analysis, regional development.

Gordon, Andrew * 1988; PhD, 1970, Columbia University; information policy and organizational dynamics.

Gordon, Margaret T. * 1988; PhD, 1972, Northwestern University; news media and public policy; violence against women.

Hill, Paul T. 1993, (Research); PhD, 1972, Ohio State University; education policy and reform.

Hyman, Barry * 1975; PhD, 1965, Virginia Polytechnic Institute & State University; energy policy, technology and public policy, quantitative methods.

Locke, Hubert G. * 1976; MA, 1962, University of Michigan; criminal justice, urban policy, race and ethnic relations.

Lyden, Fremont J. * 1962, (Emeritus); PhD, 1956, University of Washington; organizational and systems theory, personnel management, program design and budgeting.

Madden, Carolyn Watts * 1975, (Adjunct); PhD, 1976, Johns Hopkins University; health economics and policy.
GRADUATE SCHOOL OF PUBLIC AFFAIRS/ COURSE DESCRIPTIONS

May, Peter J. * 1979, (Adjunct); PhD, 1979, University of California (Berkeley); policy analysis, quantitative methods, federal disaster policy.

Miles, Edward L. * 1974; PhD, 1965, University of Denver; international law and organization, science and international relations, marine policy.

Morrill, Richard L. * 1965, (Adjunct); PhD, 1959, University of Washington; spatial organization, migration, population diffusion, regional planning and development, inequality.

Plotnick, Robert D. * 1984; PhD, 1976, University of California (Berkeley); economics of poverty; labor and social welfare policy.

Williams, Walter * 1970; PhD, 1960, Indiana University; executive branch decision making, policy implementation.

Wolfe, Dael L. * 1982, (Emeritus); PhD, 1931, Ohio State University; science and public policy.

Zerbe, Richard O. * 1975; PhD, 1969, Duke University; law and economics, cost-benefit analysis, economic history, environmental regulation.

Assistant Professors

Brandon, Richard N. * 1989, (Research); PhD, 1975, University of Pennsylvania; human services: collaboration, data; US Congress, legislation and budget process.

Brook, Jonathan 1982; MBA, 1973, Harvard University; labor relations, negotiation and mediation, public management, managing people.

Dobel, J, Patrick * 1965; PhD, 1976, Princeton University; political theory, ethics and public policy, organizational theory.

Harrison, David S. 1991, (Research); MPA, 1979, Harvard University; regional economic development.

Miller, Ernest G. * 1965, (Emeritus); PhD, 1959, Princeton University; management and organizational development, organization theory, administrative behavior.

Narver, Betty Jane 1991, (Research); MA, 1973, University of Washington; state and local fiscal policy, social and health policy, education and workforce training.

Pivo, Gary E. * 1987, (Adjunct); PhD, 1987, University of California (Berkeley); land use and physical planning, environmental planning, growth management.

Sommers, Paul E. * 1985, (Research); PhD, 1978, Yale University; economic development policy, regional economics.

Ulberg, Cyrus G. * 1985, (Research); PhD, 1973, University of Michigan; transportation policy, forecasting, and pricing topics.

Zurneta, William M. * 1985; PhD, 1978, University of California (Berkeley); public management, policy analysis, education and workforce policy.

Assistant Professors

Ellison, Leslie Carol 1988, PhD, 1988, Stanford University; comparative politics; European public policy; comparative education and health care policy.

Palt, Victor B. 1993, (Acting); JD, 1988, Northwestern University; environmental policy, law and public policy.

Klawitter, Marieka * 1990, PhD, 1992, University of Wisconsin; family and employment policy; health economics; women studies.

McIntire, James L. 1991, (Research); PhD, 1993, University of Washington; housing policy, state tax policy, labor market policy.

Thomas, Tom E. 1988, (Adjunct); PhD, 1989, University of California (Berkeley); organization and environment, corporate political strategic management.

Weinberg, Lisa Ellen 1993; PhD, 1993, Virginia Polytechnic Institute & State University; organizational processes and dynamics; intergovernmental and government-non-profit agency relations.

Senior Lecturer

Cormick, Gerald W. 1975; PhD, 1971, University of Michigan; mediation and negotiation.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

PB AF 500 General Seminar (1, max. 9)

PB AF 502 The Administrator and the Policy Process (3) Context of public administration from the perspective of the administrator. Roles and functions of the administrator, particularly in relation to the process of implementing, making, and changing public policy. Offered: jointly with POL S 571.

PB AF 503 Administrative and Executive Leadership (3) Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its communities and organizations. Offered: jointly with POL S 572.

PB AF 504 Administrative Ethics (3) Moral dilemmas that confront public managers. Critical view of societal and political values that prescribe moral behavior. Organizational and professional ethics. Ethical problems of public organization managers. Systematic methods for understanding and coping with moral issues that appear in a career.

PB AF 505 The Law of Public Administration (3) Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personal, funds, and contracts; and judicial review of administrative activity.

PB AF 506 Ethics and Public Policy (3) Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.

PB AF 507 International Organizations and Ocean Management (3) Survey of the manner in which international organizations attempt to manage and regulate the uses of the ocean. Primary emphasis on the analysis of processes that support or constrain these organizations and on the search for alternative policies and organizations. Prerequisite: SMA 600 or permission of instructor. Offered: jointly with SMA 507.

PB AF 509 Public Organizational Theory (3) Approaches to the study of organizational behavior in a changing society, including consideration of formal and informal organization, personality needs, role playing, client relations, and the sociopolitical and technological environments.

PB AF 510 Management Analysis (3) Survey of the theory and current practice relating to governmental organizations and their program objectives.

PB AF 511 Management of Not-for-Profit Organizations (3) Focuses upon the roles played by not-for-profit organizations in meeting the public good. Examines internal management issues such as structure, budget, and operations; and external issues such as board functions, legal status, marketing, media relations, and fund-raising.

PB AF 512 Management of Public Enterprises (3) Examines issues in managing public enterprises. Provides comparative analysis of policies, development, and management approaches of such enterprises with regard to traditional government agencies, private sector business, and public enterprise of other countries. Special focus on "balancing" business and competitive requirements with public policy/ process and the political environment.

PB AF 513 Public Policy Analysis (3) Production and analysis of tools to support public policy decisions. Defining problems, devising alternative solutions, clarifying stakes in choices, predicting impacts of choices. Skills developed by working on specific policy problems. Assumes familiarity with statistics, microeconomic theory, and institutions and processes of American government. Prerequisite: 516 or permission of instructor.

PB AF 514 Policy Implementation (3) Presents set of analytic skills for anticipating and diagnosing implementation problems. Primarily for students who plan to become public-sector policy analysts or managers. Mastery of basic literature and its application to solving problems of public policy, including estimating feasibility of policy alternatives and identifying sources of implementation failure, is expected.

PB AF 516 Microeconomic Policy Analysis (3) Ways in which microeconomic analysis can contribute to the analysis of public sector issues. Supply and demand, consumer and firm behavior, competitive and monopoly markets, income distribution, market failure, government intervention. Policy applications of theory. Prerequisite: elementary economics.

PB AF 517 Economics of the Public Sector (3) Methods of analyzing effects of public expenditures and taxes on behavior of individuals and firms, on economic efficiency, and on equity and distribution of income. Theory and practice of intergovernmental fiscal relations. Application of theory to formulation of public policy. Prerequisite: 516.

PB AF 519 Policy Analysis Workshop (3) Techniques and methods required in social policy analysis, including the technical issues in data collection, interpreting research relevant for social policy and bureaucratic problems. Designed to aid future administrators and analysts in performing policy analysis, working with researchers to develop relevant studies and with the agency bureaucracy to integrate research and analysis. Prerequisite: permission of instructor.

PB AF 520 Intergovernmental Relations (3) Comparative study of the issues involved in implementing government programs across multiple jurisdictions. Issues of accountability, feasibility, politics, and constitutional limits are examined by focusing upon various methods used to implement programs across federal, state, regional, and international jurisdictions.

PB AF 521 Public Management: Program Planning and Design (3) Policy context of planning and programming, the institutionalization of purpose, the planning process, activity design, work scheduling and measurement, and program evaluation.

PB AF 522 Public Management: Budgeting (3) Budgeting as a management process. Study of formulation and administration of government budgets, including role of budgeting in policy processes, approaches to budget formulation and analysis, development of financial management aspects of budget administration, such as revenue estimating, allotment control, cost accounting. Prerequisite: 516 or permission of instructor.

PB AF 523 Public Management: Personnel (3) Study of line-staff decision making in acquisition and use of human resources in public organizations, including evaluation of job capabilities, establishment of compensation levels, collective bargaining, selection and placement, performance appraisal, incentive management, and training.

PB AF 524 Managing People In Public and Nonprofit Agencies (3) Emphasizes the role of the program manager rather than that of the personnel officer. Manages people within a variety of programmatic,
bureaucratic, and political settings. Case studies form basis of class discussion, assignments.

**PB AF 525 Organizational Development In Public Agencies (3)** Philosophies, theories, and practical administrative science interventions in organizational diagnosis and development (OD). In addition to a review of the basic literature dealing with OD approach, emphasis is placed on examination of case studies and class experience in OD applications, including organizational diagnosis, problem confrontation, and team building. Prerequisite: permission of instructor.

**PB AF 526 Program Evaluation (3)** Martin Theory, practice, and politics of evaluation, from simple feedback mechanisms to evaluation of large-scale ongoing programs and social experiments. Emphasis on application of basic research into the evaluation of social programs. Case studies drawn from health field illustrate various types of evaluation. Prerequisite: background in quantitative methods. Offered: jointly with HSERV 522.

**PB AF 527, 528 Quantitative Analysis; Quantitative Analysis for Public Managers (3,3)** Introduces quantitative methods in the context of public management and policy analysis. Covers descriptive statistics, hypothesis testing, linear models, and research design and modeling. Helps students become knowledgeable about practical evidence. Prerequisite: graduate status in School of Public Affairs or permission of instructor for 527, 527 for 528.

**PB AF 530 Financial Management In the Public Sector (3)** Exploration of the managerial uses of accounting and other processes of financial management in the public sector. Topics covered include financial planning and control, fund accounting, cost accounting, asset accounting, internal controls, auditing, financial analysis, and financial reporting. Prerequisite: permission of instructor.

**PB AF 534 International Affairs (3)** Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with POL/SIS 534.

**PB AF 537 Topics In International Affairs (3, max. 12)** Examines topics of interest and import in foreign policy and international affairs. Focuses on the in-depth analysis of issues and the integration of economic, institutional, and political dimensions.

**PB AF 538 Legislative Relations (3)** Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.

**PB AF 550 Public Arts Policy and Management (3)** Role of government in arts. Range of public support at federal, state, and local levels; reasons for its development and viability. Nature, evolution, functions of public arts agencies in implementing arts policy; relation of such agencies to their constituencies. Seattle, King County, and Washington State serve as case studies.

**PB AF 551 Comparative Administrative Systems (3)** Methodological problems of research in comparative administration. Theoretical and substantive aspects of administrative systems in urban-industrial and developing nations. Offered: jointly with SIS 551.

**PB AF 552 Administrative Problems of Development (3)** Examining central, regional, and local government administrative problems in nation-states and regions, including theoretical aspects of development administration, bureaucratic change, administrative-political interaction in policy making, organizational development, political impact of administering major programs. Prerequisite: permission of instructor.

**PB AF 553 Applied Cost-Benefit Analysis (3)** Familiarity developed through problems and applications. Techniques of use stressed. Prerequisite: 516 or permission of instructor.

**PB AF 554 Advanced Cost-Benefit Analysis (3)** Techniques of, and theoretical foundation for, cost-benefit analysis as applied to the public sector. Prerequisite: 553 or ECON 500, 501 or permission of instructor. Offered: jointly with ECON 554.

**PB AF 558 Mediation and Negotiation as Instruments of Development Policy-Making (3)** Possibilities offered by mediation and negotiation methods using a mixture of cases, readings, discussions, lectures, and guest speakers. Use of negotiation and mediation techniques to resolve disputes and disagreements over public-policy issues.

**PB AF 561-562 Policy Development and Administration: Urban Affairs (3-3)** Two (noncumulative) semester courses to examine the structure, function, and process of city government, with special emphasis on the origin, content, and implementation of public policies. Focus on the political process at the municipal level including the distribution of influence, the political actors, the decision-making machinery, and the policy output.

**PB AF 565 Topics In Urban and Regional Affairs (3, max. 12)** Examines various issues of public policy importance in urban and regional affairs by integrating managerial, political, policy, and economic dimensions of the issues.

**PB AF 566 Seminar In Law and Justice (3)** The current volatility in American law enforcement revolves around a number of policy issues that have emerged in the past decade and are considered crucial to the future role, organization, and function of urban policing. These issues are explored, with emphasis on their historic settings, the actors who shape their articulation, the parameters of the debate, effects of legal constraints and sociopolitical factors on the development of policy alternatives, and emerging patterns of resolution.

**PB AF 567 Race and Public Policy (3)** Analyzes the way in which the persistent problem of race is expressed in public decision and implementation of social and public policy.

**PB AF 570 Social Policy Analysis and Management (3)** Examines major institutions and programs in the human resources policy area: education, regulation of labor market, health care, income maintenance, social services. Focuses on alternative policy instruments, analytic perspectives, intergovernmental issues, and management issues arising across policy areas. Explores challenges of linking services and clients across separate agencies.

**PB AF 571, 572 Education, The Workforce, and Public Policy (3,3)** Two (noncumulative) courses on policy issues involving education, training, the economy, and the development of the nation's human resources. Relationship between education, training, and work; underutilized workers; race and gender discrimination issues; the role of education/training in economic development. Offered: jointly with ELDPS 563.

**PB AF 573 Topics In Education and Social Policy (3, max. 12)** Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of economic, administrative, and political dimensions of these issues.

**PB AF 575 Public Policy Processes (3)** Political science frameworks, approaches, and theories concerning development and implementation of public policies within American political systems. Governmental behaviors and processes, including rational, political, and bureaucratic models of governmental decision making; agenda-building processes; and normative perspectives concerning the role of governmental entities. Offered: jointly with POL S 575.

**PB AF 577 Risk Assessment for Environmental Health Hazards (3-4)** Context, methodologies, types of data, uncertainties and institutional arrangements for risk assessment. Both qualitative and quantitative approaches to the identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEWAENV SI ENVH 577.

**PB AF 580 United States Energy Policy (3)** Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental and equity considerations; government research and development programs.

**PB AF 581 Information Technology and the Policy-Making Process (3)** Demystifies information base for policy making in democracies. Examines theoretical and practical issues associated with information processing in the public sector. Considers role of new technologies in gathering, and disseminating information with special attention to the relationship between these technologies and effective government service, public participation, and organizational accountability.

**PB AF 582 News Media and Public Policy (3)** Explores impacts of news coverage on public policy. Examines journalists' approaches to coverage of public affairs, as well as to strategies used by leaders of public/non-profit agencies to attract favorable coverage and minimize damaging coverage. Students learn techniques for assessing impacts of new coverage.

**PB AF 583, 584 Seminar In Science and Public Policy (3,3)** Issues and problems relating to the interaction of science and scientists with the public policy-making process. Science versus the nature and values of political processes, and the continuing tension between the two. The evolving interaction between scientific and technical knowledge and political power; scientific versus ethical judgments. Role of science in the establishment of national goals. Plans and proposals for increasing governmental competence to deal with public policy issues involving science and technology.

**PB AF 585 Topics In Science, Technology, and Public Policy (3)** Examines relationship between advancement of technical knowledge and pace of technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedical, communications, energy, environmental, transportation, and weapons technologies.

**PB AF 586 International Science and Technology Policy (3)** Seminar is designed: first, to analyze the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries; second, to deal with the international implications of particular technologies as countries try to make policy that is both national and regionally organized. Examples of specific technologies are chosen from such fields as space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploitation.

**PB AF 590, 591 Midcareer Seminar (3,3)** Interdisciplinary seminar in public policy for midcareer professionals.

**PB AF 593 Environmental Policy Processes (3)** Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment.
PB AF 594 Environmental Policy Analysis: Risks and Values (3) Emphasizes institutions involved in environmental policy including the government, environmental organizations, and private business. Examines ways in which the nature of these institutions affects the substance and ultimate effect of the environmental policy implemented.

PB AF 595 Topics in Environmental Policy and Management (3, max. 12) Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 596 Administrative and Policy Skills Workshop (1-3) Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and non-profit sectors. The workshops emphasize hands-on problem resolution, simulations, and actual practice.

PB AF 598 Special Topics (2-6) Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty. Prerequisite: permission of instructor.

PB AF 600 Independent Study or Research (*)

PB AF 605 Degree Project (1-6)
School of Public Health and Community Medicine

Dean
Gilbert S. Omenn
F350 Health Sciences

Associate Dean
Patricia W. Wahl

The School of Public Health and Community Medicine offers graduate programs leading to the degrees of Master of Public Health, Master of Science, Master of Public Health, and Doctor of Public Health. The School also offers certificate programs and joint programs in collaboration with the School of Social Work, the Henry M. Jackson School of International Studies, and other Schools of the University.

Admission Requirements vary according to the field in which the student wishes to major and are given in the departmental descriptions that follow. Prior consultation with the departments is recommended. Applicants holding medical degrees have three options: one of the master's programs, research fellowship, or two-year residency in general preventive medicine/public health, or occupational medicine. For the medical student, a concurrent M.D.-M.P.H. program is offered.

Ph.D. programs are offered in biostatistics, epidemiology, pathology, and in environmental and occupational hygiene. Studies in health services in collaboration with other School and campus departments with Ph.D. programs are available.

Students may earn both Master of Public Health and Master of Arts degrees concurrently through a special program offered jointly by the School of Public Health and Community Medicine and the Henry M. Jackson School of International Studies (M.P.H.-M.A.). The interdisciplinary curriculum covers the complex relationship between public health problems of the developing world and the cultural, economic, and political environments in which they exist. Both Schools provide tools to gain insights into community-based problems and to implement change. Other concurrent degree programs are offered in M.P.H.-M.N. in community health care or parent and child nursing.

Other opportunities include the Master of Health Administration degree which is offered by the Health Services Administration Group. This program is described elsewhere in this catalog. The School also offers a nontraditional, part-time extended M.P.H. program in the Department of Health Services for midcareer health professionals who are unable to participate in the in-residence master's program.

In addition, the School offers two undergraduate degrees and two certificate programs. The Department of Environmental Health offers a Bachelor of Science degree providing a general education in the broad fields of environmental health. Also offered is a Bachelor of Clinical Health Services degree in the Department of Health Services. Candidates for both these degrees must be admitted to the University of Washington at the junior year level. The certificate programs are offered by the Department of Health Services in two areas: 1) the MEDEX Northwest Physician Assistant Program and 2) the Health Information Administration Program.

Biostatistics

F600 Health Sciences

The Department of Biostatistics offers Master of Science and Doctor of Philosophy degrees in quantitative methods applied to the medical and biological sciences. Biology and medicine are undergoing major changes in their development as quantitative sciences. As technological advances find expression in new research tools, new theoretical concepts are being employed in the analysis of quantitative data. The techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are rapidly being woven into the fabric of the life sciences, thereby providing exciting new opportunities in research and teaching.

Many universities have instituted programs relating mathematics or statistics to one particular biological field. The goal of the biostatistics graduate program is to equip students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine and biology.

Because of the faculty's involvement in a diversity of statistical applications, students receive an education of high quality. Students are recruited from undergraduate programs in mathematics, statistics, and biology and are selected on the basis of outstanding quantitative ability.

Admission Requirements

Students may enter the program from an undergraduate major in mathematics, statistics, or a biological field. An applicant must have completed or be in the process of completing two years of calculus (to include one year of advanced calculus), one course in linear algebra, and one course in probability theory.

In addition to fulfilling graduate admission requirements, an applicant must submit three letters of recommendation from persons competent to evaluate the applicant's abilities, a narrative statement concerning the applicant's purpose and interest in entering the program, and an official Graduate Record Examination score report. Recommendation for selection of candidates is made by a faculty admissions committee, with review of applicants beginning in February for admission autumn quarter. The application deadline is April 15.

Master of Science Degree

Students working for the Master of Science degree must complete required course work, demonstrate proficiency in a computer language, write a thesis, take a consulting class, and pass the first-year theory examination. This examination is offered at the conclusion of a student's first year, and, if a student does not pass, it can be retaken the next year. A Ph.D. student may receive a nonthesis Master of Science degree by successfully passing the first- and second-year qualifying examinations.

Doctor of Philosophy Degree

Students earning the Ph.D. degree develop statistical theory and applications particular to the health sciences.

Students in the Ph.D. program must complete 36 credits of Biost 800, write a dissertation, complete a consulting class, and demonstrate proficiency in a computer language. Students must also pass the Ph.D. statistical theory and applied theory qualifying examinations, a biology project, and pass the General and Final Examinations.

Correspondence and Information

Graduate Program Coordinator
Department of Biostatistics, SC-32

Faculty

Chairperson
Thomas R. Fleming

Professors

Blumenstein, Brent * 1981; (Affiliate); Ph.D., 1974, Emory University; clinical trials, categorical data analysis, risk analysis, data management.

Breslow, Norman * 1967; Ph.D., 1967, Stanford University; statistical methods in epidemiology, generalized linear models, childhood cancer.

Crowley, John Jr. * 1982; Ph.D., 1975, University of Washington; survival analysis, cancer clinical trials.

Davis, Kathryn A. B. * 1974; Ph.D., 1974, University of Washington; density estimation, cardiovascular data analysis, clinical trials.

De Rouen, Timothy * 1975; Ph.D., 1971, Virginia Polytechnic Institute & State University; applications of biostatistics to clinical epidemiology of oral and infectious diseases.

Diehr, Paula K. * 1970; Ph.D., 1970, University of California (Los Angeles); health services, application of statistics to small area analysis.

Feigl, Polly * 1965; Ph.D., 1961, University of Minnesota; application of statistics to cancer control and prevention research.

Fleming, Thomas Richard * 1984; Ph.D., 1976, University of Maryland; survival analysis, cancer clinical trials, AIDS research, sequential analysis.

Green, Stephanie J. * 1984, (Affiliate); Ph.D., 1979, University of Wisconsin; censored survival data analysis, clinical trials, cancer research.

Grizzle, James E. * 1987, (Research); Ph.D., 1969, North Carolina State University; clinical trials, cancer prevention studies.

Hallstrom, Alfred * 1975; Ph.D., 1968, Brown University; clinical trial methodologies in cardiovascular research and emergency medical services applications.

Kopecky, Kenneth J. * 1976, (Affiliate); Ph.D., 1977, Oregon State University; clinical trials design and survival data analysis, epidemiologic methodology, goodness of fit.

Kronmal, Richard A. * 1964; Ph.D., 1964, University of California (Los Angeles); nonparametric density estimation, computer algorithms, cardiovascular data analysis, clinical trials.

Martin, Donald C. * 1972; Ph.D., 1968, Florida State University; statistical computing, randomization tests, approximations for probability functions.

Moolgavkar, Suresh H. * 1984, (Adjunct); MBBS, 1966, Bombay University (India); cancer epidemiology, development of quantitative methodology.

Perrin, Edward * 1975, (Adjunct); Ph.D., 1961, Stanford University; health information services, research methodology.

Peterson, Arthur V. * 1975; Ph.D., 1978, Stanford University; survival data methodology, competing risks, design of disease prevention trials.

Prentice, Ross L. * 1974; Ph.D., 1970, University of Toronto (Canada); failure time analysis, disease prevention trials, epidemiologic methods, dietary factors and disease.
SCHOOL OF PUBLIC HEALTH AND COMMUNITY MEDICINE / BIOSTATISTICS 437

Self, Steven G. * 1984; PhD, 1981, University of Washington; longitudinal data analysis, survival time models, cancer prevention, HIV vaccine evaluation.

Thompson, Elizabeth A. * 1985; PhD, 1974, Cambridge University (UK); statistical analysis of human genetic data, statistics of conservation and computational biology.

van Belle, Gerald * 1974; PhD, 1967, University of Toronto (Canada); biostatistics, environmental risk factors for neurodegenerative diseases, risk communication.

Wahl, Patricia W. * 1971; PhD, 1971, University of Washington; multivariate statistical techniques, especially regression analysis applied to cardiovascular data.

Weinler, Jon A. * 1983; PhD, 1975, University of Washington; large-sample theory, asymptotic efficiency, empirical processes, semiparametric models.

Associate Professors

Barlow, William E. * 1989, (Research); PhD, 1966, University of Washington; survival analysis, residuals, and evaluation of screening programs.

Benedetti, Jacqueline K. * 1980; PhD, 1974, University of Washington; statistical methodology in infectious disease research, cancer clinical trials.

Conquest, Loveday L. * 1976, (Adjunct); PhD, 1975, University of Washington; biological applications and statistics.

Lin, Danyu * 1990; PhD, 1989, University of Michigan; analysis of failure time data, designs and analysis of clinical and epidemiologic studies.

McKnight, Barbara * 1981; PhD, 1981, University of Wisconsin; statistics in animal carcinogenicity testing, epidemiology and human genetics, survival analysis.

O'Sullivan, S. Finbar * 1987; PhD, 1983, University of Wisconsin; nonparametric curve estimation, inverse problems, radiology.

Pepe, Margaret * 1982, (Affiliate); PhD, 1986, University of Washington; survival analysis, surrogate and mismeasured data, correlated data methods, child health issues.

Polissar, Nayak Lincoln * 1980, (Affiliate); PhD, 1974, Princeton University; statistical consulting, community surveys, clinical trials, demography, epidemiology, environment.

Temkin, Nancy R. * 1977; PhD, 1976, State University of New York (Buffalo); clinical trials, recovery models, statistical modeling of epidemiologic phenomena, survival analysis.

Wijman, Ellen M. * 1987, (Research); PhD, 1981, University of Wisconsin; human quantitative and population genetics.

Assistant Professors

Anderson, Garnet 1989, (Affiliate); PhD, 1989, University of Washington; survival analysis, regression models, clinical trials, human physiology, correlated responses.

Brooks, Maria Mori * 1991, (Research); PhD, 1991, University of North Carolina; nonparametric curve estimation and clinical trials.

Hughes, James P. * 1993, (Research); PhD, 1993, University of Washington; longitudinal methods and Markov models.

Leroux, Brian G. * 1991, (Research); PhD, 1989, University of British Columbia (Canada); random effects models, stochastic processes, dental research, toxicology.

Sheppard, Elizabeth A. * 1989, (Research); PhD, 1992, University of Washington; aggregate data, survival analysis, biostatistical methods in environmental health.

Thornquist, Mark Daniel * 1985, (Affiliate); PhD, 1985, University of Wisconsin; ordinal/categorical response, repeated measures data, chemoprevention, group-randomized trials.

Wang, Ching-Yun 1993, (Affiliate); PhD, 1993, Texas A&M University; case control studies, generalized linear models, measurement error models.

Yanez, Norbert David III 1993; PhD, 1993, Arizona State University; overdispersed data, joint modeling of mean and dispersion parameters, quasi-likelihood models.

Zuo, Lue-Ping * 1993, (Affiliate); PhD, 1989, University of Washington; estimation equations, correlated data analysis, missing data and sampling.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

BIOST 111 Lectures in Applied Statistics (1)
Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Contact instructor for information on which fields of applications emphasized. Offered: jointly with STAT 111.

Courses for Graduates Only

BIOST 511 Medical Biometry I (4)
Presentation of the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples are drawn from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer program packages. (e.g., SPSS, BMDP, MINITAB). Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: AS.

BIOST 512 Medical Biometry II (4)
Multiple regression, analysis of covariance, and an introduction to one-way and two-way analyses of variance: including assumptions, transformations, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the biomedical literature with computer assignments using SPSS. Prerequisite: 511 or equivalent. Offered: Sp.

BIOST 513 Medical Biometry III (4)
Analysis of categorical data including two sample methods, sets of 2 x 2 tables, R x C tables, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: 512 or permission of instructor. Offered: Sp.

BIOST 514 Biostatistics I (4)
Mathematically sophistiications presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test (matrix algebra required). Examples drawn from biomedical literature; real data sets analyzed using statistical computer package. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

BIOST 515 Biostatistics II (4)
Mathematically sophisticated introduction to linear models; multiple regression, correlation; residual analysis; dummy variables; ANOVA; analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons (matrix algebra required). Real biomedical data sets analyzed. Prerequisite: 514, biostatistics major, or permission of instructor. Offered: W.

BIOST 521 Biostatistics for Experimentallists (4)
Statistical aspects of design, data analytic models appropriate to classes of experiments most commonly encountered in biomedical work. One- and two-way analyses of variance; factorial, crossed, nested, repeated measures designs. Clean, messy real-data sets analyzed using BMD or SAS computer programs. Prerequisites: 511, 512, or equivalent. Offered: alternate years.

BIOST 524 Design of Medical Studies (3)
Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and sample size for graduate students. Biostatistics and for research-oriented graduate students in other scientific fields. Prerequisites: 511 or equivalent, and one of 513, STAT 421, 423, 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524, alternate years.

BIOST 532 Statistical Methods in Medical Genetics (2)
Wijman, Theory and application of statistical techniques used in medical genetics. In-depth discussion of linkage and segregation analysis and ascertainment problems. Application stressed with reference to appropriate assumptions. Real data sets analyzed with current computer programs. Prerequisite: knowledge of genetics or permission of instructor. Offered: jointly with MED 532; Sp.

BIOST 533 Classical Theory of Linear Models (3)
Introduction to one-, two-way analysis of variance; randomized blocks; fixed, random effects, multiple comparisons. Statistical distribution theory for quadratic forms of normal variables. Fitting of the general linear model by least squares. Prerequisites: 513, STAT 421 or STAT 423; and STAT 513; and a course in matrix algebra. Offered: jointly with STAT 533; Sp.

BIOST 534 Statistical Computing I (3)
Computational methods in statistics: sorting, searching, and calculation of order statistics; data interpolation and approximation; numerical methods for least squares and principal components; computational geometry; calculation of probabilities; data structures and database management. Offered: jointly with STAT 534.

BIOST 535 Statistical Computing II (3)
Computational methods in statistics: generation of pseudo random numbers, Monte Carlo quadrature, variance reduction techniques, design of Monte Carlo studies, nonlinear optimization, nonlinear least squares, selected special topics. Prerequisite: 534 or equivalent. Offered: jointly with STAT 535.

BIOST 536 Categorical Data Analysis in Epidemiology (4)
Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic data using multiplicative models. Experience at interpretation; familiarity with available computer programs. Analysis of bina data, critiques of analyses appearing in literature. Prerequisites: 513 and EPI 514, or 515, or permission of instruc tor. Offered: jointly with EPI 536; A.

BIOST 537 Survival Data Analysis in Epidemiology (4)
Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic studies. Familiarity with interpretation and available computer programs required, by analysis of bina data sets of data and critiques of analyses appearing in the literature. Prerequisite: 536 or permission of instructor. Offered: jointly with EPI 537; W.

BIOST 570, 571, 572 Advanced Applied Statistics and Linear Models (3,3,3)
Generalized linear models, RELIABILITY of models for randomized trials, analysis of survival data, plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisites: STAT 512, 515; BIOST STAT 533 or STAT 421 and 423, and a course in matrix algebra for 570: 570 for 571; 571 for 572. Offered: jointly with STAT 570, 571, 572.
BIOST 573 Statistical Methods for Categorical Data (3) Exact and asymptotic methods of analysis for 2 x 2 contingency tables, maximum likelihood estimation of logistic regression models for binary response variables, and selected examples of the use of these models in epidemiologic and clinical research. Introduction to the theory and applications of log-linear models for discrete data. Selected special topics. Prerequisites: 571 and STAT 581, or permission of instructor. Offered: jointly with STAT 573, alternate years; Sp.

BIOST 574 Multivariate Statistical Methods (3) Use of multivariate normal sampling theory, linear transformations of random variables, one- and two-sample testing, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Prerequisite: 570 or permission of instructor. Offered: jointly with STAT 574, alternate years.

BIOST 576 Statistical Methods for Survival Data (3) Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisites: STAT 581 and either 513, STAT 473, or equivalent. Offered: jointly with STAT 576, alternate years.

BIOST 577 Advanced Design and Analysis of Experiments (3) Concepts important in experimental design: randomization, blocking, confounding. Application and analysis of data from randomized blocks designs, Latin and Graeco-Latin squares, incomplete block designs, split-plot and repeated measures, factorial and fractional replications, response surface experiments. Prerequisites: 570 or STAT 421 (minimum 3.0) or permission of instructor. Offered: jointly with STAT 577.

BIOST 578 Special Topics in Advanced Biostatistics (*, max. 3) Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSpS.

BIOST 580 Seminar In Biostatistics (*, max. 9) Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.

BIOST 590 Biostatistical Consulting (*) Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, initially under the close supervision of a faculty member, participate in discussions with investigators leading to the design and/or the analysis of a quantitative investigation of a problem. With experience, independent applications of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permission of instructor. Offered: AWSp.

BIOST 593 Cancer Prevention Laboratory (3) Laboratory experience for pre- and post-doctoral students working on prevention projects at the Fred Hutchinson Cancer Research Center. Offered: jointly with EPI 593; AWSp.

Environmental Health

Bachelor of Science Degree

F463 Health Sciences

Undergraduate Program

Graduate Program

The Department of Environmental Health offers four graduate degrees: Master of Science, Master of Science in Radiological Sciences, Master of Public Health, and Doctor of Philosophy. New students are being admitted to the Master of Science in Radiological Sciences degree program. However, students who are interested in the radiological sciences should inquire about the radiological health option in the industrial hygiene program. The areas of emphasis in the graduate programs are: industrial hygiene and safety, environmental health sciences, and occupational and preventive medicine (M.P.H.).

The industrial hygiene and safety program (M.S., Ph.D.) focuses on technical, psychological, and administrative aspects of the prevention or control of industrial disease and accidental injury. The industrial hygiene radiological health option (M.S.) includes emphasis on measurement and control of exposure to ionizing radiation. The toxicology program (M.S., Ph.D.) focuses on research and application of basic scientific principles toward a better understanding of the health effects of toxic substances in the workplace and general environment. Students who select the toxicology option participate in research on molecular and biochemical processes involved in chemically induced toxic responses such as soft-tissue (e.g., brain, lung, kidney and liver) damage, birth defects, cancer, and nervous system impairment.

The environmental health technology program (M.S.) focuses on community problems associated with toxic substances and their control, hazardous waste disposal, and traditional areas of environmental health, such as water and wastewater treatment. Students conduct research on the monitoring and control of hazardous substances and biological agents contaminating surface and ground waters, or on hazardous waste management. This may involve field and laboratory activities.

The M.P.H. program is for individuals with an earned doctorate. The goal of the program is to provide training in public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on the etiology and prevention of occupational disease. Physicians have the option of selecting an option for a residency in occupational or preventive medicine.

The Department of Environmental Health cooperates with the Department of Health Services in a three-year, part-time Extended Master of Public Health degree program designed for midcareer public and community health professionals. Students continue their employment sessions for three years, and must meet at the University for five weekends during the academic year. The curriculum is designed to provide advanced knowledge and skills for planning, organizing, and evaluating community and environmental health programs.

Admission Requirements

Prerequisites for admission to the M.S. graduate programs in industrial hygiene and safety, toxicology, and environmental health technology include a Bachelor of Science or equivalent degree in environmental health, a physical science, a biological science, or engineering, and submission of Graduate Record Examination scores.

Prerequisite for admission to the M.P.H. program is a doctoral degree.

Prerequisites for admission to the Ph.D. program in environmental and occupational health sciences include a Bachelor of Science degree in science or engineering with adequate preparation in physics, chemistry, mathematics, and biology. Selection of an applicant will also be based upon an honors-level GPA, a statement of personal goals consistent with the program, supportive letters of reference, and high scores on the Graduate Record Examination.

Graduation Requirements

The M.S. and M.P.H. graduate programs are designed for seven quarters of study, including field applications, and requiring completion of a minimum of 60 credits plus 9 credits of thesis, and submission of an acceptable thesis.

The Ph.D. program has a strong research focus, and requires completion of a minimum of 95 credits of which at least 68 are didactic courses in relevant fields of study. A dissertation of original research suitable for publication in an appropriately refereed journal is required. For an entering student with a Bachelor of Science or Engineering degree, the program of study can be expected to take approximately four to five years. A recent entering student with a Bachelor of Science degree in a relevant area may complete the degree in less time.

Financial Aid

Traineeships and tuition support are available for a limited number of students. Support comes from federal and private sources awarded to the department or school. A few research assistantships are available to second-year students.

Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental factors, toxicology, and radiological sciences. Field re-

Gerald van Belle

Professors
Checkoway, Harvey * 1987; PhD, 1978, University of North Carolina; occupational and environmental epidemiology.
Costa, Lucio Guido * 1983; PhD, 1977, University of Milan (Italy); neurotoxicology; developmental and molecular mechanisms/biological markers of neurotoxicity.
Eaton, David L. * 1979; PhD, 1978, University of Kansas; biochemical and environmental toxicology; aflatoxin carcinogenesis, metabolism of toxic chemicals.
Fanzig, Alan G. * 1973, (Adjunct Research); PhD, 1974, University of Washington; embryology, teratology.
Faustman, Elaine M. * 1981; PhD, 1981, Michigan State University; developmental toxicology, risk assessment methodologies, toxicity of N-nitroso compounds.
Koenig, Jane O. * 1974; PhD, 1963, University of Washington; respiratory physiology, health effects of air pollutants, lung response of susceptible groups.
Larson, Timothy * 1970, (Adjunct); PhD, 1976, University of Washington; airborne particles, air quality modeling, and instrument development.
Mottet, N. Karlo * 1959; MD, 1952, Yale University; effects of trace elements, especially methylmercury and arsenic, on growth and development.
Ommen, Gilbert S. * 1981; MD, 1965, Harvard University; genetic predisposition to environmental and occupational hazards.
Omiecinski, Curtis J. * 1983; PhD, 1980, University of Washington; molecular toxicology; genetic regulation; expression of drug/chemical metabolizing enzymes.
Robkin, Mauricio A. * 1967; PhD, 1961, Massachusetts Institute of Technology; radiation dosimetry, environmental radioactivity, radioactive waste management, health physics.
Rosenstock, Linda * 1980; MD, 1977, Johns Hopkins University; occupational/generall internal medicine.
van Belle, Gerald * 1974; PhD, 1967, University of Toronto (Canada); biostatistics, environmental risk factors for neurodegenerative diseases, risk communication.
Woods, James S. * 1982, (Research); PhD, 1970, University of Washington; biochemical toxicology of trace metals; biological markers of metal exposure.

Associate Professors
Barnhart, Scott * 1983, (Adjunct); MD, 1979, George Washington University; occupationally related lung disease.
Biggs, Stanley J. * 1960, (Adjunct); MD, 1975, University of Missouri; orthopaedics, spine.
Breyerse, Peter * 1957, (Emeritus); MPH, 1957, University of Pittsburgh; exposure of population to contaminants.
Burbeeher, Thomas M. * 1983, (Research); PhD, 1983, University of Washington; neurotoxicology, specializing in the behavioral effects of agents on the central nervous system.
Covert, David S. * 1975, (Adjunct Research); PhD, 1974, University of Washington; atmospheric chemistry, aerosol physics and instrumentation.
Fenska, Richard A. * 1990; PhD, 1984, University of California (Berkeley); human exposure and health risk assessment, pesticides exposure.
Franklin, Gary M. * 1986, (Research); MD, 1969, George Washington University; occupational injury, neurological epidemiology, public health nutrition.
Geraci, Joseph P. 1972; PhD, 1972, University of Washington; radiation biology, physiological mechanisms of radiation induced liver injury.
Gilbert, Steven G. * 1990, (Research); PhD, 1986, University of Rochester; primat neurobehavioral toxicology and teratology, developmental effects of heavy metals.
Hatten, Jack B. * 1952, (Emeritus); MS, 1958, University of Washington; environmental health program planning and management, environmental health manpower training.
Kalman, David A. * 1978; PhD, 1978, University of Washington; environmental chemistry, detection and fate of chemical hazards in natural and manmade environments.
Luchtel, Daniel L. * 1972; PhD, 1969, University of Washington; electron microscopy and cell biology, lung anatomy/pathophysiology, fiber toxicology.
Morgan, Michael S. * 1974; Dsc, 1972, Massachusetts Institute of Technology; applied respiratory, physiological and inhalation toxicology.
Navesi, Ahmad * 1973, (Research); PhD, 1973, University of Arkansas; radiochemistry.
Ongerth, Jerry E. * 1984; PhD, 1973, University of Michigan; public water supply, solid waste and water quality management; waterborne pathogens.
Wiker, Steven F. * 1993; PhD, 1986, University of Michigan; ergonomics and human factors engineering.

Assistant Professors
Brodkin, Carl * 1989; MD, 1983, University of Colorado (Denver); hepatic effects of occupational solvent exposure, ventilatory decline in asbestos-exposed workers.
Dannell, William E. * 1984; MD, 1979, Tufts University; health effects of occupational chemical exposures, multiple chemical sensitivity syndrome.
Grossmann, Angelika * 1985, (Adjunct Research); DVM, 1978, Freie University of Berlin (Germany); immunosuppression in humans and mice; immunotoxicology; transmembrane signaling in T-lymphocytes.
Guffey, Steven E. * 1987; PhD, 1987, University of North Carolina; industrial ventilation design, modeling of pressure and flow relationships, hood design research.
Kavanagh, Terrance J. * 1985, (Research); PhD, 1985, Michigan State University; biochemical toxicology and free radical damage.
Kissel, John A. * 1990; PhD, 1985, Stanford University; solid and hazardous waste management practice, human exposure assessment.
Leroux, Brian G. * 1991, (Adjunct Research); PhD, 1989, University of British Columbia (Canada); random effect models, stochastic processes, animal research, toxicology.
Seixas, Noah S. * 1992; PhD, 1990, University of Michigan; exposure assessment methods for occupational/epidemiologic studies; smoke and industrial plants.
Shepard, Elizabeth A. * 1989, (Research); PhD, 1992, University of Washington; aggregate data, survival analysis, biostatistical methods in environmental health.
Yost, Michael G. * 1993; PhD, 1989, University of California (Berkeley); worker exposures to physical agents, electromagnetic fields, noise and vibration.

Senior Lecturers
Montel, Lee E. 1954; MS, 1956, University of Washington; industrial hygiene, analytical and environmental chemistry.
Morris, Sharon L. 1982; BA, 1965, Reed College; occupational safety and health policy, continuing education.
Treser, Charles D. 1980; MPH, 1976, University of Michigan; policy analysis and decision making, program planning and evaluation, environmental education.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

ENVH 311 Introduction to Environmental Health
3 (3) Tracer Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of communicable diseases and hazards due to exposure to toxic chemical and physical materials in our environment. Offered: Asp.

ENVH 343 Environmental Radioactivity
3 (3) Wodrutf Sources of radioactivity in the environment, including both natural sources, especially radon, and manmade sources, especially nuclear power and nuclear reactions. Emphasis on methods for determining radiation doses from the significant sources. Offered: jointly with ENGR/ENVK SPHY 343; Sp.

ENVH 405 Toxic Chemicals In the Environment
3 (3) Eaton Basic principles governing the behavior and effects of toxic chemicals released into the environment; sources, distribution, and fate of toxic chemicals in the environment; chemicals and cancer; chemicals and birth defects; government regulation of chemical hazards. Prerequisite: BIOL 203, or BIOL 405, or equivalent. Offered: jointly with ENV S 455; Sp.

ENVH 415 Nuclear Instruments
3 (3) Principles, measurements, and detection of nuclear radiation encountered in nuclear energy systems. Use of Geiger, proportional, and scintillation detectors; ionization chambers; analog/digital data-logging equipment; multichannel analyzers. Prerequisite: junior standing. Offered: W.

ENVH 430 Methods in Environmental Sampling and Analysis
3 (3) Samadpour Field sampling methods are studied and selected laboratory analyses of food, drinking water, and waste waters are conducted. Official methods for characterizing physical and chemical quality of water and wastes are demonstrated. Microbiological criteria are emphasized for student participation, including: enumeration of subgroups in populations, selective inhibitor, characteristics of normal flora, and detection of indicator organisms. Prerequisites: junior standing, 440, MICRO 301 and 302, and permission of instructor. Offered: Sp.

ENVH 440 Water and Waste Sanitation
4 (4) Hatien Study of health problems associated with drinking water and wastewaters and minimization of problems. Focus on drinking water quality and quantity requirements; water supply, treatment, and distribution; wastewater quality and impact of contaminants on individual drinking water, onsite sewage facilities, related site selection criteria/regulations, regulatory agency activities. Field performance of environmental health specialist emphasized. Offered: A.
ENHV 441 Food Protection (3) Hatlen Study of identification and characteristics of chemicals and biological agents implicated in foodborne disease outbreaks, and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisite: MICRO 301 or permission of instructor. Offered: W.

ENHV 442 Vector Control and Housing (3) Hatlen Study of vectors and control of rodents and arthropod vectors of disease including control of toxoplasmosis. Economic, health, and environmental aspects are examined and control measures reviewed. Offered: Sp.

ENHV 445 Solid Waste Management (3) Ongertf Examination of the public health, environmental, economic, and materials conservation aspects of solid wastes management: amounts and sources of solid wastes, waste reduction and recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs. Prerequisite: environmental health major or permission of instructor. Offered: W.

ENHV 446 Hazardous Waste Management (3) KisseI Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Description of management options at pre-generation, pre-release, and post-release stages. Discussion of environmental health effects and significance. Supplemented with case studies. Prerequisite: environmental health major or permission of instructor. Offered: Sp.

ENHV 448 Environmental Health Problems (3) Hatlen Examination of specific environmental health problems. Prerequisites: environmental health major or permission of instructor. Offered: W.

ENHV 449 Environmental Health Internship (3-15) Tremor Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning and utilization of community resources. Prerequisite: environmental health major or permission of environmental advisory. Credit/no credit only. Offered: AWSpS.

ENHV 466 Methods and Applications of Genetic Research (3) Ongertf Independent research on a specific topic in environmental health. Prerequisite: environmental health major or permission of instructor. Offered: W.

ENHV 470 EH Practice: Administration and Management (2) Treser Explores selected aspects of the management of environmental health programs in the community. Organization theory and practice, budgeting, personnel management, program planning and evaluation, and community relations. Prerequisite: environmental health major or permission of instructor. Offered: A.

ENHV 471 Environmental Health Regulation (2) Treser Introduction to administrative regulation and process. Authority, jurisdiction, and structure of environmental control programs and agencies; the regulatory process; agency acquisition and retention of information; administrative actions; enforcement of environmental health laws; major statutes and case law. Prerequisites: environmental health major or permission of instructor. Offered: W.

ENHV 479 Environmental Research Design (1) Treser Designed to assist in the development of environmental health research projects. Common research designs, methodology, principles, and problems of emphasis on effective research problem definition, implementation, and data presentation. Offered: W.

ENHV 480 Environmental Health Problems (*, max. 6) Treser Individual projects involving library, laboratory, or field study of a specific environmental health problem. Prerequisite: environmental health major or permission of instructor. Offered: AWSpS.

ENHV 482 Environmental Health Internship (3-15) Tremor Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning and utilization of community resources. Prerequisite: environmental health major or permission of environmental advisory. Credit/no credit only. Offered: AWSpS.

ENHV 487 Environmental Health Special Electives (*) Offered: AWSpS.

ENHV 489 Undergraduate Research (*) Individual research on a specific topic in environmental health upon which specific conclusions, judgments, or evaluation can be made or upon which facts can be presented. Prerequisite: environmental health major or permission of instructor. Offered: AWSpS.

Courses for Graduates Only

ENHV 511 Environmental and Occupational Health (3) Effects of exposure to chemical, physical, and biological agents, using a problem-oriented approach embracing the community and workplace environments. Current issues, using specific cases from recent literature as basis for classroom discussion and written assignments. Offered: W.

ENHV 512 Hazardous Waste Disposal (3) Laws and regulations applicable to hazardous wastes; management and regulation practices. Representatives from regulatory agencies, industry, and environmental consulting firms. Consider technical, economic, and health and risk-related implications of hazardous wastes. Paper addressing specialized areas of disposal required. Recommended: 466. Offered: S.

ENHV 514, 515 Environmental and Occupational Toxicology I, II (3,3) Costa, Omiecinski Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisites: BIOL 212, BIOL 440, or permission of instructor. Offered: jointly with ENV S 514, 515; W.Sp.

ENHV 516 Methods and Applications of Genetic Epidemiology (3) Austin Research methods for evaluating genetic influences on disease, risk factors. Study designs, statistical methods include twin studies, family studies, population-based association studies, complex segregation analysis, path analysis, linkage analysis. Prerequisites: EPI 515, 513; BIOST 511, 512, 513; background in human genetics or equivalent basic genetics course. Offered: jointly with EPI 517; W.

ENHV 520 Biological Effects of Ionizing Radiation (3) Gareri Effects of ionizing radiation at the molecular, cellular, organ, and organism levels with emphasis on mammalian systems. Offered: S.

ENHV 521, 522 Laboratory in Radiation Biology (1,1) Laboratory study of effects of ionizing radiation.

ENHV 524 Radioactive and Chemical Wastes (3) Nevisis Fate and effects of mixed radioactive and chemical waste are discussed. Topics are: the generation, storage, disposal, environmental transport, pathways to humans, and evaluation of health effects of mixed wastes. Also includes: waste disposal at sea, and the current status and future trends in mixed waste disposal.

ENHV 525, 526 Physical Radiation Dosimetry I, II (3,3) Rogacki Introduction to the dosimetry of physical radiation. Includes consideration of radiation sources, interactions with inert matter and living tissue, internal and external radiation exposure, radiation detection and measuring instruments, biological effects, radiation protection standards, and the statistics of radiometry measurement.

ENHV 527 Radiation Hazard Analysis and Control (1) Emphasizes methods and procedures rather than facility or equipment design. Offered: Sp.

ENHV 528 Physical Aspects of Medical Imaging (4) Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and formation extraction, including the fundamentals of film radiography, X-ray CT, DSA, PET, B-mode ultrasound and Doppler ultrasound. Offered: jointly with RADGY/BIOEN 508.

ENHV 529 Environmental Impact of Radioactivity (3) Robkin Dispersion, fate, and environmental significance of radioactive released into environment. Assessment of environmental impact of radioactive re releases; impact of mixtures of radioactivity and chemicals. Laboratory setting permits evaluation of release and impact events with personal computer versions of state-of-the-art environmental assessment and radiological codes. World environmental contamination problems addressed. Offered: Sp.

ENHV 531 Neurotoxicology (3) Costa Advanced discussions of the principles and methodological approaches to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicity in aging, toxicology and public health. Prerequisite: ENV S 514, 515 or ENV R 405 or permission of instructor. Offered: every years; W.

ENHV 532 Reproductive and Developmental Toxicology (2) Faustman Investigates chemicals that can induce adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisites: 514 and 515 or 405 or permission of instructor. Offered: every years; S.

ENHV 533 Molecular Toxicology (2) Omiecinski Advanced discussion of molecular mechanisms whereby chemical, physical, and biological agents produce their harmful effects on biological tissues. Prerequisites: 515 or permission of instructor. Offered: jointly with PHCOL 533; even years; A.

ENHV 535 Inhalation Toxicology (2) Koening, Luchtel Advanced course on the toxicology of air pollutants and the response of the respiratory system to inhaled gaseous and particulate toxins. Issues and concepts covered include biology of the respiratory system, exposure technology, experimental design and methodology, toxicological issues, health effects of air pollutants, and regulatory aspects. Prerequisites: 514, 515, or ENV R 405 or permission of instructor. Offered: every years; Sp.

ENHV 545 Drinking Water and Health (3) Ongertf Principles, requirements of public water supply for protection of public health. Includes essential characteristics of water quality and sources, water treatment.
and distribution systems with associated health hazards; public health engineering, epidemiology, risk assessment; surveillance, regulatory needs to assure safe public water supplies. Prerequisite: CIVE 351 or permission of instructor. Offered: Sp.

ENVH 550 Methods of Microscopy (2) Luchtel Sample preparation methods for biological and nonbiological specimens, photographic and darkroom printing techniques, theory and practical use of light microscopy (bright-field, phase contrast, polarizing, and DIC), electron microscopy (field investigation, scanning, electron diffraction, and energy dispersive x-ray analysis), and image analysis. Opportunity for student research project. Prerequisite: permission of instructor. Offered: Sp.

ENVH 552 Environmental Chemistry of Pollution (3) Kalman, Kissel Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measurements. Prerequisite: admission to graduate program or permission of instructor. Offered: W.

ENVH 553 Instrumental Methods for Industrial Hygiene Measurement: Lecture (3) Morgan Methods, instrumentation, and theory of atmospheric sampling and analysis, emphasizing evaluation of potential occupational hazards and exposures. Prerequisite: 453 or permission of instructor. Offered: A.

ENVH 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3) Mockaitis Utilizes typical instrumental techniques and analytical methods for the evaluation of potential occupational hazards. Prerequisites: 453 and 553 or permission of instructor. Offered: W.

ENVH 556 Industrial Ventilation I (3) Guffey Principles of exhaust ventilation systems, design for contaminant control in industry. Prerequisite: 453 or permission of instructor. Offered: W.

ENVH 557 Industrial Ventilation II (3) Guffey Troubleshooting and redesign of existing exhaust ventilation systems for contaminant control. Includes measurement laboratories. Prerequisite: 557 or permission of instructor. Offered: Sp.

ENVH 559 Applied Industrial Hygiene (2, max. 4) Fenske Application of occupational safety and health principles through industry and classroom discussions. Teams conduct walk-through evaluations, sampling, exposure assessment, review of current health and safety programs, and development of control strategies to eliminate or reduce hazards at worksites. Extends over two quarters. Prerequisite: 453 or equivalent. Offered: AW.

ENVH 560 Organizing and Administering Industrial Safety and Health Programs (4) Freeman Explores industrial organization and methods of integrating safety and industrial hygiene programs with other company operations. Philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention are investigated. Contains numerous case problems and student involvement opportunities. Offered: W.

ENVH 582 Technical Aspects of Safety and Health (3) Wiker Explores specific hazards associated with major industries, as well as hazards common to all industries. Machine guarding, electrical safety, systems safety analysis, materials handling, and working at heights are emphasized. Prerequisite: permission of instructor. Offered: W.

ENVH 586 Health and Safety Problems in Industry (2) Freeman, Selvas Provides a wide spectrum of practical examples of industrial processes and occupational health and safety problems, as practiced in an industrial milieu; serves as a case-study sequence for the didactic course work in several programs. Provides opportunity to approach and analyze health and safety problems using a multidisciplinary approach.

ENVH 586 Introduction to Ergonomics (3) Wiker Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: Sp.

ENVH 587 Environmental Carcinogenesis (2) Eaton Biochemical and molecular basis of carcinogenesis induced by chemical and physical agents in the environment, including detailed discussion of multi-stage process of carcinogenesis, mechanisms of action of specific chemical and physical carcinogens; current approaches to identification of carcinogens, and chemoprevention strategies. Prerequisite: 514 and 515 or 405 or permission of instructor. Offered: W.

ENVH 589 Occupational Fitness (3) Wiker Interaction between physical requirements of occupational tasks and the individual's capacity to perform; jobs requiring manual material handling. Techniques of job analysis, validation ofльц new design or redesign, and employee screening. Prerequisite: 556 or permission of instructor. Offered: A.

ENVH 570 Occupational and Environmental Epidemiology (3) Checkoway Research in occupational and environmental determinants of disease. Defining exposure conditions, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, 513 or permission instructor. Offered: jointly with EPI 570; W.

ENVH 572 Clinical Occupational Medicine (3) Comprehensive overview of clinical occupational medicine. Introduction to principles of occupational disease, occupational history taking, and physician involvement in workers' compensation. Approaches to diagnosis and management of occupational diseases based on organ systems. Prerequisite: possession of an M.D. degree or health related background or permission of instructor. Offered: S.

ENVH 577 Risk Assessment for Environmental Health Hazards (3/4) Faustman, Omen Examiness methods in risk assessment: methodologies, data, uncertainties, and institutional arrangements. Quantitative and qualitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Prerequisite 515 and BIOD 511 or permission of instructor. Offered: jointly with CEWA/ENVH 578; Sp.

ENVH 580 Environmental Health Seminar (1, max. 6) Current environmental health research and environmental control programs. Credit/no credit only. Offered: A/W.

ENVH 581, 582, 583 Environmental Health Reading (1,1,1) Burkholder, Koenig, Luchtel Critical reading of selected basic and applied research publications and related environmental research reports. Must be taken in sequence. Offered: A,W,Sp.

ENVH 584 Occupational Health and Safety: Policy and Politics (3) Camp, Morris Designed to provide a better understanding of the historical, political, and policy issues in occupational health and safety through selected readings and discussion with experts in the field. Students prepare a written and oral analysis of a policy issue and make a policy proposal. Offered: Sp.

ENVH 590 Selected Topics (1-6) In-depth study of a current environmental health topic. For more information and permission, consult department program advisor. Offered: A/W.

ENVH 591 Current Topics in Toxicology (1, max. 6) Feustman, Gilbert Provides in-depth examination of current topics in environmental and occupational toxicology taken from recently published journal articles. Consists of presentations led by students, post-doctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of speakers and topics. Offered: A/W.

ENVH 592 Special Topics in Radiation Biology (2) Offered: E,Sp.

ENVH 595 Research Rotation (3, max. 9) Research laboratory rotation for predoctoral graduate students. Students commit at least ten hours per week to a laboratory research project aimed at introducing the student to current methods in laboratory research, and to familiarize the student with specific faculty research interests. Prerequisites: graduate standing and permission of program director. Offered: A/W.

ENVH 598 Field Practice in Radiological Health (*, max. 6)

ENVH 599 Field Studies (2-4) Assignment to an environmental research or service program for application of occupational hygiene techniques. Credit/no credit only. Offered: A/W.

ENVH 600 Independent Study or Research (*) Prerequisite: permission of departmental adviser. Offered: A/W.

ENVH 700 Master's Thesis (*) Prerequisite: permission of departmental adviser. Offered: A/W.

ENVH 800 Doctoral Dissertation (*) Prerequisite: permission of departmental adviser. Credit/no credit only. Offered: A/W.

Epidemiology

F263 Health Sciences

Graduate Program

The Department of Epidemiology offers three graduate degrees in the field of epidemiology for individuals intending to become academicians, highly qualified researchers, epidemiologists, or well-trained practitioners. The Master of Public Health degree requires course work in health services and environmental health in addition to epidemiology and thesis research. The Master of Science degree requires concentration on courses and research in epidemiology as preparation for technical specialization or as a prelude to the Doctor of Philosophy program. The Ph.D. course requirements differ from the M.S. program requirements primarily in the scope and complexity of research for the dissertation. Course work includes a basic series in epidemiology, one or more courses in biostatistics, and seminars. Electives are dictated by the student's special interest and experience. The department also offers postdoctoral research training and a two-year residency in general preventive medicine with emphasis on epidemiology for physicians.

Special Requirements

An applicant should have a degree in medicine, dentistry, or veterinary medicine or be a qualified holder of a master's or higher degree in a relevant field, such as nursing, microbiology, or biostatistics, or in an appropriate social science. Others who will be considered are students enrolled in medical school who are recommended for the M.D.-Ph.D. program and, occasionally, individuals with a baccalaureate degree whose prior work experience is appropriate.

Financial Aid

Research training stipends are available on a limited basis. Some opportunities for work on various research
projects or for aid in teaching may provide partial assistance.

Research Facilities

University facilities include well-equipped laboratories, an excellent library system, and access to computers. Various opportunities for field research are provided in Seattle and elsewhere in the state, including the Fred Hutchinson Cancer Research Center, Group Health Cooperative's Center for Health Studies, the Harborview-Injury Prevention and Research Center, the Seattle-King County Department of Public Health, and several other local hospitals and health institutions.

Faculty

Chairperson

Thomas D. Koepsell

Professors

Checkoway, Harvey * 1987; PhD, 1978, University of North Carolina; occupational and environmental epidemiology.

Con nell, Frederick A. * 1978; (Adjunct); MD, 1972, New York University; maternal and child health services.

Daling, Janet R. * 1979; Ph.D, 1977, University of Washington; maternal and child health and cancer research.

Eisenberg, Mickey * 1976; (Adjunct); MD, 1971, Case Western Reserve University; sudden cardiac arrest and acute myocardial infarction.

Emanuel, Irvin * 1966; MD, 1960, University of Rochester; child development and mental retardation.

Foy, Ildarisa * 1967; MD, 1953, Karolinska Institute (Sweden); epidemiology and control of infectious disease.

Gale, James L. * 1962; MD, 1951, Columbia University; epidemiology and control of infectious disease, international health.

Grayston, J. Thomas * 1960; MD, 1948, University of Chicago; epidemiology and control of infectious disease.

Handfield, Hunter 1979; (Adjunct); MD, 1988, Columbia University; infectious diseases.

Henderson, Maureen M. * 1975; MBBS, 1949, University of Durham (UK); epidemiology of chronic diseases.

Holmes, King K. * 1967; (Adjunct); MD, 1963, Cornell University; clinical epidemiology and pathways of infectious diseases.

Koepsell, Thomas D. * 1999; MD, 1972, Harvard University; chronic diseases, applying epidemiologic concepts to medical practice.

Lee, John A. H. * 1966; (Emeritus); MD, 1955, University of Edinburgh (UK); epidemiology of neoplastic disease.

Longstreth, William T. 1980; (Adjunct); MD, 1975, University of Pennsylvania; neurology.

Moolgavkar, Suresh H. * 1984; MBBS, 1966, Bombay University (India); cancer epidemiology, development of quantitative methodology.

Perine, Peter L. * 1981; MD, 1966, University of Kansas; international health, sexually transmitted diseases.

Rivera, Frederick P. * 1984; (Adjunct); MD, 1974, University of Pennsylvania; pediatric epidemiology and injury prevention and research.

Shy, Kirkwood K. * 1979; (Adjunct); MD, 1973, Wayne State University; epidemiologic applications to problems in obstetrics and gynecology.

Slaman, Walter E. * 1979; (Adjunct); MD, 1971, Harvard University; infectious disease.

Stergachis, Andy * 1980; PhD, 1979, University of Minnesota; pharmaceutical outcomes research, reproductive epidemiology.

Thomas, David B. * 1975; MD, 1963, University of Washington; cervix and breast carcinoma epidemiology.

Weiss, Noel S. * 1975; MD, 1967, Stanford University; chronic disease epidemiology.

Wortling-Roberts, Bonnie S. * 1973; PhD, 1971, University of Washington; maternal and child nutrition.

Associate Professors

Austin, Melissa A. * 1988; PhD, 1985, University of California (Berkeley); genetic epidemiology of lipoproteins, coronary heart disease and cancer.

Berestof, Shirley A. * 1987; PhD, 1981, University of London (UK); cancer prevention, especially dietary factors; diet and exercise in disease prevention.

Boyko, Edward J. * 1989; (Adjunct); MD, 1979, University of Pittsburgh; epidemiology of inflammatory bowel disease and non-insulin-dependent diabetes mellitus.

Chu, Joseph * 1982; MD, 1975, Georgetown University.

Di Giacomo, Ronald F. * 1974; (Adjunct); DVM, 1965, University of Pennsylvania; comparative epidemiology and zoosoon.

Dugwoon, Carin E. * 1979; (Adjunct); MD, 1976, University of Illinois; rheumatology.

Hickok, Durlin E. * 1974; (Clinical); MD, 1973, University of Michigan; perinatal epidemiology.

Hoover, J. Joanne * 1972; (Research); MD, 1960, University of Illinois; cardiovascular epidemiology.

Kukul, Walter A. * 1981; PhD, 1984, University of Washington; Alzheimer's disease, epidemiologic methods, chronic disease epidemiology.

LaCroix, Andrea Z. * 1989; PhD, 1984, University of Washington; nutrition and aging.

Martin, Diane P. 1978; (Adjunct); PhD, 1979, University of Washington; health services use and cost, alternative delivery systems and insurance.

Mooi, Donald E. * 1977; (Adjunct); MD, 1967, Case Western Reserve University; reproductive endocrinology.

Mueller, Beth A. * 1984; DPH, 1984, Tulane University; epidemiology of perinatal and reproductive diseases, cancer, and injury research.

Pendergrass, Thomas W. 1978; (Adjunct); MD, 1971, University of Tennessee; hematology, oncology.

Peaty, Bruce M. * 1986; MD, 1981, Indiana University; cardiovascular disease, coronary heart disease, hypertension, and pharmacological epidemiology.

Siscovick, David S. * 1987; MD, 1976, University of Maryland; epidemiology.

Stanford, Janet L. * 1986; PhD, 1986, Johns Hopkins University; chronic disease epidemiology including cancer and cardiovascular disorders, biochemical epidemiology.

Vaughan, Thomas L. * 1982; MD, 1978, University of Illinois; cancer, maternal and child health, environmental epidemiology.

White, J. Emily * 1982; PhD, 1982, University of Washington; cancer control research and prevention, epidemiologic methods, Alzheimer's disease.

Cocheret, Daniel M. * 1988; (Research); MD, 1981, University of Chicago; breast cancer epidemiology, epidemiologic methods, clinical epidemiology.

Ross, Susan J. * 1980; PhD, 1990, University of Washington; chronic childhood diseases.

Bell, Thomas A. * 1980; (Clinical); MD, 1971, Tufts University; general pediatrics.

Cheney, Carrie L. * 1989; PhD, 1989, University of Washington; role of nutrition in cancer prognosis and secondary prevention.

Crichtlow, Cathy W. 1979; MD, 1993, University of Washington; epidemiology in dental health, chronic disease as affected by infectious disease.

Goldbaum, Gary M. * 1989; MD, 1978, University of Colorado; the epidemiology of human behaviors that increase risk for disease.

Hekkert, Susan R. * 1990; MD, 1981, Case Western Reserve University; outcomes of drug therapy, susceptibility to cancers.

Holt, Victoria L. * 1989; PhD, 1990, University of Washington; reproductive health epidemiology, impact of prenatal care and perinatal technology.

Kastin, Mark * 1990; PhD, 1990, Flinders University (Australia); relationship between nutrition, cancer and cardiovascular disease.

Koutsyky, Laura A. * 1981; PhD, 1987, University of Washington; sexually transmitted diseases, including HIV/AIDS.

Krohn, Marjane A. * 1984; PhD, 1987, University of Washington; reproductive and perinatal epidemiology, vaginal flora and obstetric complications.

Nazer-Stewart, Valerie * 1996; PhD, 1991, University of Washington; cancer biomarkers, pediatric diseases.

Reiber, Gaye E. * 1991; PhD, 1989, University of Washington; epidemiology and health services research on preventing complications of diabetes.

Schwartz, Stephen M. * 1989; PhD, 1990, University of Washington; cancer epidemiology, neuropathology, reproductive epidemiology, epidemiologic methods.

Stevens, Nancy G. * 1982; (Adjunct); MD, 1979, University of Washington; family medicine.

Williams, Michelle A. * 1991; ScD, 1991, Harvard University; reproductive and perinatal epidemiology, cancer epidemiology.

Wolf, Marsha E. * 1983; PhD, 1988, University of Washington; injury epidemiology and older adults.

Instructor

Forti, Robert L. 1993; (Acting); MD, 1985, Vanderbilt University.

Course Descriptions

See page 53 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

EPI 420 Introduction to Epidemiology (3) Schwartz For the undergraduate student wishing to devote only one quarter to a course in epidemiologic
Methods. Description of ways in which variation in disease occurrence is documented and how that variation is studied to understand causes of disease.

**EPI 407 Epidemiology Special Electives**
- Off-campus course for medical students. Prerequisite: permission of advisor.

**EPI 499 Undergraduate Research**
- Prerequisite: permission of advisor.

**Courses for Graduates Only**

**EPI 501 Public Health Practice at the Local Level**
- History and development of local, state public health departments. Traditional vs. new roles and critical interactions with public, private agencies highlighted. Examples drawn from areas of current concern (e.g., sexually transmitted diseases; health promotion, disease prevention; environmental hazards; substance abuse; emergency medical services). Prerequisite: HSERV 511 or permission of instructor. Offered: jointly with HSERV 501.

**EPI 503 Public Health Surveillance: Epidemiology and Health Policy (2)**

**EPI 511 Introduction to Epidemiology (3-4)**
- Schwarz. For the graduate student wishing to devote only one quarter to a course in epidemiological methods. Description of ways in which variation in disease occurrence is documented, and how that variation is studied to understand causes of disease. Prerequisite: graduate standing.

**EPI 512 Epidemiologic Methods I (4)**
- Klopstell, Weiss. Principles and methods of epidemiology. Covers measures of disease frequency, measures of effect, causal inferences, descriptive epidemiology, study types, misclassification, and effect modification. Designed for students who want to take EPI 513. Prerequisite: prior or concurrent enrollment in BIOST 511 or equivalent.

**EPI 513 Epidemiologic Methods II (4)**
- Klopstell, Weiss. Continuation of 512. Considers how designs of epidemiological studies may be constructed to maximize etiologic inferences. Covers confounding, randomized trials, cohort studies, case-control studies, and selected topics. Prerequisite: EPI 512.

**EPI 514 Application of Epidemiologic Methods**
- Mueller, Schenck. Practical experience in analysis of data. Students analyze data sets currently on file using contemporary epidemiological methods as taught in 512 and 513. Prerequisites: EPI 512, 513 and epidemiology major.

**EPI 517 Methods and Applications of Genetic Epidemiology**
- Austin. Research methods for evaluating genetic influences on health. Study designs, statistical methods include twin studies, family studies, population-based association studies, complex segregation analysis, path analysis, linkage analysis. Prerequisites: EPI 512, 513; BIOST 511, 512, 513; background in human genetics or equivalent basic genetics course. Offered: jointly with ENVS 517.

**EPI 519 Epidemiology of Cardiovascular Disease**
- Psaty. Principles, methods, and issues in the epidemiology of cardiovascular disease. Focuses on coronary heart disease and its major risk factors; also covers other topics such as stroke and sudden death. The format includes informal lectures and discussions of the current literature. Prerequisite: EPI 511 or 512, 513.

**EPI 520 Infectious Diseases Epidemiology**
- Foy. Principles and practices of epidemiology, focusing on communicable diseases. Methods for epidemiological investigation of infections taught by reading classical descriptions of disease outbreaks and analyzing current papers. Term paper required, consisting of an investigation of an infectious disease outbreak or a protocol for a research study. Prerequisite: 511 or permission of instructor.

**EPI 521 Epidemiology of Maternal and Child Health Problems**
- Emerman, Hickok. Contributions of epidemiology to the understanding and prevention of various maternal and child health problems, including abnormal growth, morbidity and mortality, pregnancy complications, delivery, abortion, and abnormal newborn. Also includes medical, dental, or dental school standing and 511 or 512 or permission of instructor. Offered: jointly with HSERV 542.

**EPI 524 Epidemiologic Studies of Cancer Etiology and Prevention**
- Davis, Kristal. Current knowledge of the role that chemicals, radiation, viruses, familial factors, immunodeficiencies, and benign diseases play in the etiology of various cancers, as determined from studies in human populations; the epidemiological characteristics of major types of most cancers; application of epidemiological principles to planning and evaluating programs of primary, secondary, and tertiary cancer prevention. Prerequisite: EPI 511 or 512.

**EPI 525 Methods in Vaccine Preventive Medicine**
- Fay, Henderson. Examines scientific knowledge and state of the art of preventive medical interventions. Discusses and considers options for current practice. Prerequisite: MD, DO, or permission of instructor. Offered: jointly with HSERV 505.

**EPI 526 Zoonotic Diseases (3)**
- DiGiacomo, Reusch. Explores the public health aspects of zoonotic diseases, their epidemiology and approaches to control. Focuses on the major viral, rickettsial, bacterial, protozoal, helminthic, and fungal diseases transmitted from wild and domesticated animals to humans in the United States. Prerequisite: EPI 520 or permission of instructor. Offered: jointly with C MED 526.

**EPI 527 Practical Issues in the Conduct of Epidemiologic Studies**
- Klopstell, Weiss. Seminar format focusing on practical aspects of conducting epidemiologic studies. Topics include grant writing and the peer review process, issues in the study of human subjects, random digit dialing, interview techniques, disease registries, and studies in the industrial setting. Prerequisite: graduate standing or permission of instructor. Offered: credit/no credit; odd years.

**EPI 528 Exposure Measurement in Epidemiology**

**EPI 530 AIDS: A Multidisciplinary Approach**
- Koultsky, Kreiss. Comprehensive overview of the public health, clinical, and laboratory aspects of AIDS. Topics include the pathogenesis, natural history, and management of human immunodeficiency virus (HIV) infections. The impact of AIDS on community and global health care and prospects for prevention and control. Offered: jointly with MED 530.

**EPI 531 Problems In International Health**
- Gloyd. Survey of the relationship of the sociocultural, political, economic, and demographic characteristics of developing countries to disease occurrence and to the solution of health problems. Prerequisite: graduate or medical student standing. Offered: jointly with HSERV 531.

**EPI 532 Epidemiology of Infectious Diseases of Third-World Importance**
- Gale, Kreiss. A review of the major infectious diseases problems of the developing world, including AIDS, malaria, tuberculosis, measles, diarrea. Means of assessing the impact of infectious diseases on the health of communities through surveillance and appropriate survey techniques. Offered: odd years.

**EPI 533 Pharmacoepidemiology**

**EPI 535 Maternal and Child Health In Developing Countries**
- Shaub. Focuses on students with issues in maternal and child health of less developed countries. Topics: nutritional assessment; growth monitoring; infant feeding practices; epidemiologic risk assessment; use of technologies; role of politics, economics, cultural factors toward morbidity and mortality. Prerequisite: graduate student standing or permission of instructor. Offered: jointly with HSERV 535.

**EPI 536 Categorical Data Analysis in Epidemiology**
- (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic data using multiplicative models. Experience in interpretation; familiarity with available programs gained by analysis of bivariate data, critiques of analyses appearing in literature. Prerequisites: EPI 514 and BIOST 513; or BIOST 518; or permission of instructor. Offered: jointly with BIOST 536.

**EPI 537 Survival Data Analysis in Epidemiology**
- (4) Introduction to the multivariate analysis of survival data using multiplicative models. Application of epidemiologic studies. Familiarity with interpretation and available computer programs gained by analysis of bivariate and multivariate data and critiques of analyses appearing in literature. Prerequisite: EPI 536 or permission of instructor. Offered: jointly with BIOST 537.

**EPI 538 Nutritional Epidemiology**
- Bresciani. Explores the public health aspects of nutrition and disease. Special methodological problems of importance in nutritional epidemiology studies. Diet and heart disease, and diet and cancer relationships. Enables students to plan studies in nutritional epidemiology. Prerequisites: EPI 511 or 512 or permission of instructor. Offered: jointly with NUTR 538.

**EPI 539 Research Methods in Developing Countries**
- Knudson. Explores methodologies to obtain useful information regarding health status and health services in the developing countries. Students learn methods which require minimal resources to perform. Measurable indicators of health status and health services discussed. Students design and implement a community-based survey to apply methods learned. Offered: jointly with EPI 539.

**EPI 543 Clinical Epidemiology**
- Weiss. Principles and methods involved in studying outcome of illness. Prerequisite: EPI 511, 512 and 513.

**EPI 570 Occupational and Environmental Epidemiology**
- Checkoway. Research methods for studying occupational and environmental determinants of health or disease. Defined exposed populations, characterizing exposure levels, estimating disease risks related to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisites: EPI 511 or 512, 513 or permission of instructor. Offered: jointly with ENVS 570.

**EPI 589 Epidemiology Seminar (1, max. 3)**
- Presentation of current epidemiologic research and application of epidemiologic research in the practice of public health.

**EPI 599- Epidemiologic Research In Aging Populations**
- LaCroix. Emphasizes application of epidemiologic methods to the study of older populations. Topics include: compression of morbidity; successful aging; methodologic challenges in studying older populations; physical, cognitive and social function as
epidemiological endpoints; chronic conditions of the aging (heart disease, cancer, Alzheimer’s disease, dementia, osteoporosis, fractures); health promotion strategies. Prerequisites: 511 or 513. Offered: jointly with HSERV 589.

EPI 590 Selected Topics in Epidemiology or International Health (1-6) Tutorials are arranged for a small number of students for in-depth examination of an area of epidemiology or international health. Prerequisites: consent of department. Seminar format. Prerequisite: 511. Also a special summer format presenting introductory material. May be taken with ENVH 590 and/or HSERV 590. For more information and permission, consult the department program adviser.

EPI 591 Current Literature in Epidemiology (1) Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed and read by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read. Prerequisites: 513.

EPI 592 Program Seminars (1-6) Graduate seminars organized to address specific educational needs of students in various specializations programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor.

EPI 593 Cancer Prevention Laboratory (3) Provides laboratory experience for pre- and post-doctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Offered: jointly with BIOST 593.

EPI 600 Independent Study or Research (1) Prerequisite: permission of departmental adviser. Credit/no credit only.

EPI 700 Master’s Thesis (1) Prerequisite: permission of departmental adviser. Credit/no credit only.

EPI 800 Doctoral Dissertation (1) Prerequisite: permission of departmental adviser. Credit/no credit only.

Health Services
F346 Health Sciences

Undergraduate Program
Bachelor of Clinical Health Sciences
Candidates for the Bachelor of Clinical Health Sciences degree must be admitted to the University of Washington at the junior year level. They will pursue a seven-quarter sequence of prescribed studies in the MEDEX Northwest Physician Assistant program. Admission to the professional training program is via a competitive process administered by the MEDEX Northwest program within the Department of Health Services. Because of the program’s emphasis on prior medical experience, the great majority of applicants are working adults who have completed their pre-professional undergraduate course work at other colleges and universities throughout the Northwest.

Matriculation in the bachelor’s degree pathway is dependent upon both admission to the University and acceptance by the MEDEX Northwest program. Students who are accepted by the MEDEX Northwest program are enrolled as junior level students at the University of Washington. Those accepted into the MEDEX Northwest program are not admitted to the University of Washington unless a request is made by their MEDEX Northwest Program Director. Students who are not admitted to the University will be classified as non-matriculated students. They will earn official University credits and receive a certificate upon completion of the program.

MEDEX Northwest Certificate Program
MEDEX Northwest is a program designed to train physician assistants. It provides primary-care, mid-level practitioners by training medical personnel with prior clinical experience. A fully accredited physician assistant program conforming to standards developed and administered by the American Medical Association, MEDEX Northwest places thirty students annually in a variety of sites in Washington, Alaska, Oregon, Idaho, and Montana.

MEDEX Northwest is a twenty-one-month program. The first nine months consist of intensive clinical and didactic instruction at the University. The six subsequent months are spent in a variety of inpatient and outpatient clinical rotations. The final six-month preceptorship is an on-the-job experience tailored to the practice of individual primary-care preceptors and emphasizing diagnosis and treatment. At the completion of the program, students are eligible to sit for the national certifying examination for physician assistants. Besides the full-time program, MEDEX offers a part-time option which takes three years to complete.

Special Requirements
Applicants must have a minimum of two years recent, full-time, hands-on experience in the delivery of medical care to patients. Applicants must have completed two college-level English composition courses, and two college-level science courses, which must include at least 5 quarter credits in human anatomy and physiology, plus one other science course in a discipline relevant to medicine.

Correspondence and Information
MEDEX Northwest, Physician Assistant Program, HA-45

Health Information Administration
Postbaccalaureate Certificate Program
The program in Health Information Administration is designed to prepare individuals for a career in an administrative health care profession. Course work is enhanced by a field placement during one academic quarter. The program gives students the tools to become involved in a wide variety of health care arenas upon graduation, including health information management, health care quality improvement, research, health care financing, and consulting. Program requirements can be completed in three quarters (nine months) on a full-time basis, or over a longer period of time on a part-time basis.

The program is accredited by the Committee on Allied Health Education and Accreditation (CAEA), or its successor, in cooperation with the American Health Information Management Association’s (AHIMA) Council on Accreditation.

Special Requirements
Applicants need a baccalaureate degree from an accredited college or university with a GPA of 2.50 or higher. They must also have taken courses in or have the requisite, plus one other science course in the following: human anatomy and physiology (laboratory course); pathophysiology; introduction to basic computer applications such as spreadsheets, databases, or word processing programs including principles of management; statistics (any discipline); and medical terminology. Applicants who still need to complete any of these requirements may apply and submit a plan for completion of prerequisites.

Correspondence and Information
Health Information Administration Program, Director, JD-02

Graduate Program
The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health degree that maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). The department also offers a three-year extended degree program in community health management leading to the MPH degree for health care professionals working full-time and, in addition, participates in the training of doctoral students from other departments on campus by offering a specialization in health services under the Doctoral Studies Program.

Master of Public Health Degree Program
The M.P.H. program in health services gives priority to individuals who have completed their professional health training such as physicians, dentists, and nurses. Others who have had substantial experience in the health field are also considered. This program offers a general curriculum that includes introduction to health systems, epidemiology, current issues regarding health services administration, and methodology for research and evaluation. Examples of areas of concentration include studies of patient and provider behaviors; evaluation of local, state, and federal health programs; and the impact of technology on medical care costs and benefits. There are three special tracks: one in maternal and child health and one in international health, both offered jointly with the Department of Epidemiology, and one in social and behavioral sciences.

The maternal and child health track offers in-depth interdisciplinary training in reproductive and family health. Students also develop technical skills in one or more of the following areas: policy analysis, program evaluation, program management, analysis of large data sets, or research.

The academic track in international health is available to students enrolled in an M.P.H. degree program in the School of Public Health and Community Medicine. The program focuses on community health and primary health-care systems of the developing world. Students learn the basic principles of public health and identify social, cultural, and economic determinants of illness. They also learn about the planning, management, and evaluation of health-care systems. Requirements include the completion of core M.P.H. courses, a series of international health courses, and a thesis project on a topic relating to third-world health. Students are encouraged to carry out their thesis projects in an international setting. Previous developing country health-related experience is helpful for admission. Financial aid is generally not available. Contact the International Health Program Student Services Coordinator, SC-37, or 543-6714.

The social and behavioral sciences academic track is available to students enrolled in an M.P.H. degree program in the School of Public Health and Community Medicine. The program focuses on research and application of knowledge concerning the relationships among (1) social, cultural, and behavioral processes; (2) health and illness; and (3) what society does and can do to promote health and prevent illness. Students receive training in the general theories and methods of the social and behavioral sciences applied to public health interventions for well persons and people with disabilities. Students may choose to plan a course of study leading to a particular area of inquiry. Those areas supported within the department are (1) health promotion and disease prevention, (2) chronic illness and disability, and (3) public health ethics.
If deemed appropriate by their advisers, students may take courses in other departments of the University. Community agencies and resources are used extensively. Students with a background in medicine may qualify to receive credit for residency training in preventive medicine.

Admission Requirements
In addition to completing Graduate School admission requirements, applicants to the M.P.H. program must submit at least three letters of recommendation, Graduate Record Examination scores, and a goal statement. At least three years of medical or health-care experience are required. In general, applicants are accepted only for summer and autumn quarters of each year: The application deadline is March 1.

Doctoral Studies Program
Doctoral study in health services is available to qualified students on campus who are enrolled in the doctoral programs of other departments (e.g., anthropology, biostatistics, economics, epidemiology, geography, medicine, nursing, operations research, organizational theory, political science, psychology, social work, sociology, etc.). Students in the Doctoral Studies Program take four courses in health services and focus their dissertation on original research that relates the basic discipline to a specific health services issue (e.g., health behavior, health-care organizations, costs, quality and utilization of health-care services, etc.).

Students interested in pursuing a doctoral-level concentration in health services should contact the Director of the Doctoral Studies Committee regarding special requirements.

Financial Aid
Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies due to inadequate finances. A limited number of fellowships, assistantships, scholarships, and loans are available each year. However, students admitted should be prepared to utilize their own resources to finance their graduate education.

Research Facilities
In addition to utilizing University facilities, the program makes use of community health-care delivery systems and agencies for research and training.

Correspondence and Information

Doctoral Studies: Committee Director, Department of Health Services, SC-37.

International Health Program: Graduate Program Coordinator, Department of Health Services, SC-37.

Maternal and Child Health Program, SC-36.

M.H.A., Health Services Administration, Graduate Program Coordinator, Department of Health Services, SC-37.

Social and Behavioral Sciences Program, Department of Health Services, SC-37.

Extended M.P.H. Degree Program
The extended M.P.H. degree program is a three-year, part-time program delivered through a combination of Intensive four-week summer sessions on the University campus, directed independent study, and intensive weekend (Friday-Sunday) seminars during the academic year. Designed for mid-career public and community health professionals with three or more years of experience in the health-care field, the program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in epidemiology, biostatistics, and environmental health, the prescribed course work includes a broad exposure to the health-care system plus specific management training in accounting, finance, personnel management, economics, organization theory, and program planning and evaluation. Pathways are also available in maternal and child health and in health education.

Admission Requirements
In addition to Graduate School admission requirements, applicants must submit a program application, at least three letters of recommendation, Graduate Record Examination scores, and a goal statement. A minimum of three years' work experience in the health-care field is required. Applicants are accepted to begin in the program summer quarter. Deadline for priority consideration is December 1. Applications will be accepted through March 1 and considered on a space-available basis. Because the program is self-sustaining, the tuition rate differs from the usual on-campus programs.

Faculty

Chairperson
Edward Perrin

Professors
Bergman, Abraham 1964, (Adjunct); MD, 1958, Case Western Reserve University; ambulatory pediatrics.

Chapko, Michael K. 1978, (Research); PhD, 1972, City University of New York; diffusion of health technologies, cost-effectiveness in health care.

Connell, Frederick A. 1973, (Adjunct); PhD, 1968, University of Minnesota; health-status measurement.

Day, Robert W. 1968; PhD, 1956, University of Chicago; health-information systems.

Dein, Richard A. 1986; MD, 1975, Pennsylvania State University; health status measurement and evaluation of common medical practices.

Diehr, Paula K. 1970; PhD, 1970, University of California (Los Angeles); health services, application of statistics to small area analysis.

Gale, James L. 1969, (Adjunct); MD, 1961, Columbia University; epidemiology and control of infectious disease, international health.

Gilson, Betty S. 1969, (Emeritus); MD, 1943, University of Minnesota; health status measurement.

Gordon, Michael J. 1973, (Adjunct); PhD, 1973, Michigan State University.

Henderson, Maureen M. 1975, (Adjunct); MBBS, 1949, University of Durham (UK); epidemiology of chronic diseases.

Klaasen, Theodore 1974, (Adjunct); PhD, 1973, University of Texas (Austin); operations management, facility location, project management, quality, inventory, health services.

Koepsell, Thomas D. 1979; MD, 1972, Harvard University; chronic diseases, applying epidemiologic concepts to medical practice.

Larson, Eric B. 1977, (Adjunct); MD, 1973, Harvard University; internal medicine.

LoGrasso, James P. 1974; MD, 1968, University of Rochester; quality-of-care assessment.

Madden, Carolyn Watts 1975; PhD, 1976, Johns Hopkins University; health economics and policy.

Mayer, Jonathan D. 1977, (Adjunct); PhD, 1977, University of Michigan; medical geography, clinical applications, philosophy.

Milgram, Peter M. 1974, (Adjunct); DDS, 1972, University of California (San Francisco); management of fearful and phobic dental patients, quality of dental care.

Monsen, Elaine R. 1969; PhD, 1961, University of California (Berkeley); nutrition, dietetics.

Muecke, Marjorie A. 1979, (Adjunct); PhD, 1978, University of Washington; medical anthropology, women's health, refugee health, Southeast Asia.

Noreen, Eric W. 1976, (Adjunct); PhD, 1976, Stanford University; managerial accounting.

Novack, Alvin H. 1979, (Adjunct); MD, 1958, Temple University; ambulatory pediatrics.

Patrick, Donald L. 1987; PhD, 1972, Columbia University; aging, disablement, and health-related quality of life.

Perrin, Edward 1975; PhD, 1961, Stanford University; health information services, research methodology.

Rosenblatt, Roger A. 1977, (Adjunct); MD, 1971, Harvard University; research into the organization and delivery of health services.

Ross, Austin Jr. 1982; MPH, 1955, University of California (Berkeley); ambulatory care, health care delivery systems.

Wagner, Edward H. 1984; MD, 1965, State University of New York (Buffalo); clinical epidemiology and health services research, health promotion and disease prevention.

Wing, Kenneth 1950; JD, 1971, Harvard University; law, politics and policy; financing health care.

Associate Professors
Bolcher, Donald W. 1976, (Adjunct); MD, 1962, University of Pennsylvania; ambulatory medicine.

Bell, Michelle 1965; PhD, 1984, University of Washington; maternal and child health, and adolescent health.

Buchner, David M. 1982; MD, 1977, University of Kansas; geriatric health promotion.

Christensen, Dale B. 1976, (Adjunct); PhD, 1977, University of Minnesota; pharmacy administration.

Curry, Susan J. 1987; PhD, 1981, University of New Hampshire; health behavior change.

Durham, Mary L. 1980; MA, 1974, Oklahoma State University; long-term care.

Ehroth, Jennifer L. 1981; PhD, 1987, University of Washington; organizational evaluation, cost effectiveness, long-term care, managerial ethics.

Elsworth, Allan J. 1981, (Adjunct); PharmD, 1977, Philadelphia College of Pharmacy & Science; clinical pharmacy.

Ellen, Stephen 1979, (Adjunct); MD, 1977, St. Louis University; internal medicine.

Goldberg, Harold I. 1986, (Adjunct); MD, 1977, Stanford University; internal medicine.

Grembowsk, David 1980; PhD, 1982, University of Washington; dental care demand, fluoridation, dental health services research.

Hedrick, Susan 1983; MA, 1975, Michigan State University; long-term care, health services.

Hoover, J. Joanne 1972, (Adjunct Research); MD, 1960, University of Illinois; cardiovascular epidemiology.

Kempf, Kathi J. 1988, (Adjunct); MD, 1982, University of North Carolina; general pediatrics.

Kienast, Philip K. 1970, (Adjunct); PhD, 1972, Michigan State University; human resources management.

Kukul, Walter A. * 1981, (Adjunct); PhD, 1984, University of Washington; Alzheimer's disease, epidemiologic methods, chronic disease epidemiology.

LaCroix, Andrea Z. * 1988, (Adjunct); PhD, 1984, University of North Carolina; epidemiology of aging.

Martin, Diane P. 1978; PhD, 1979, University of Washington; health services use and cost, alternative delivery systems and insurance.

McCann, Barbara S. 1986, (Adjunct); PhD, 1984, Rutgers University; psychology.

Peelman, Robert A. * 1981, (Adjunct); MD, 1975, Boston University; gerontology.

Psey, Bruce M. * 1986, (Adjunct); MD, 1986, Indiana University; cardiovascular disease, coronary heart disease, hypertension, and pharmacoepidemiology.

Rhodes, Lorna A. * 1983, (Adjunct); PhD, 1973, Cornell University; medical anthropology, symbolic anthropology, South Asia, religion, psychiatry.

Richardson, Mary L. * 1977; PhD, 1984, University of Washington; organization, management and analysis of policy relevant to health services.

Spigler, Claren C. 1991; DrPH, 1987, University of California (Berkeley); cultural diversity and health services for disadvantaged populations.

Thompson, Engelberta 1988; PhD, 1981, Western Michigan University; smoking cessation.

Wickizer, Thomas M. 1988; PhD, 1989, University of Michigan; health promotion evaluation.

Wood, Robert W. 1977, (Adjunct); MD, 1970, University of Rochester; internal medicine.

Assistant Professors

Gloyd, Stephen S. * 1986; MD, 1973, University of Chicago; political economy, epidemiology, and primary health care in developing countries.

Goldbaum, Gary M. * 1989, (Adjunct); MD, 1976, University of Colorado; the epistemology of human behaviors that increase risk for disease.

Grossman, David C. 1993, (Acting); MD, 1982, University of California (Los Angeles); general pediatrics.

Kristal, Alan R. * 1988, (Adjunct); DPH, 1983, Columbia University; nutritional epidemiology, dietary behavior, nutrition intervention, and cancer control.

Lesser, Daniel 1990; MD, 1986, Stanford University; physician management and decision-making, pharmacoeconomics.

Melschke, Hendrika W. * 1991; PhD, 1992, University of Michigan; health communication—with an emphasis on mass media and health.

Reber, Gayle E. * 1991; PhD, 1989, University of Washington; epidemiology and health services research on preventing complications of diabetes.

Sullivan, Sean * 1992; PhD, 1992, University of California (Berkeley).

Senior Lecturers

Altamore, Rita A. * 1981; MD, 1977, Boston University; information systems in health services, quality of health care.

Glah, Oscar * 1989; MPH, 1970, University of Sussex; socio-economic dimensions of health and health services: third world development focus.

Henken, Mary A. 1991; PhD, 1989, University of Washington; health information systems.

Nickerson, Carl J. 1991; EdD, 1972, University of Oregon; health education.

Lecturers

Asplin, Norma J. 1992; MS, 1978, University of Colorado (Denver); physician assistant education.

Downer, Ann E. 1989; MS, 1984, University of Washington; AIDS education and training.

Harder, Ellen J. 1988; PA-C, 1986, University of Washington; outpatient clinical problems, orthopedics and administration.

Katz, Aaron 1988; CPH, 1975, University of Toronto (Canada); health policy analysis.

Kam, Kaye C. 1993; BS, 1977, University of California (Davis); physician assistant education.

Landel, Grace P. 1990; BA, 1978, University of California (Santa Cruz); physician assistant training.

Murphy, Gretchen C. 1992; MED, 1973, University of Washington; health information administration.

Rommel, William T. 1992; BS, 1974, University of Nebraska; physician assistant education.

Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates

MEDEX Northwest

HSERV 451 Anatomy and Physiology for the MEDEX Practitioner (6) Blomstrand: Anatomy and physiology of organ systems; HEENT, respiratory, cardiovascular, gastrointestinal, reproductive, renal, musculoskeletal, and neurologic. Required for entering students to the MEDEX program who have not satisfied program prerequisites in anatomy and physiology. Prerequisite: admission to the MEDEX program.

HSERV 452 Basic Clinical Pathology for the MEDEX Practitioner (6) Stoll: Basic pathological and pathophysiological concepts of diseases commonly encountered in primary-care practice. Pathophysiology studied per organ system. Prerequisite: admission to the MEDEX program.

HSERV 453 Basic Clinical Skills for the MEDEX Practitioner (6) Kvarn: Provides the student with mastery of the screening history and physical examination and thoroughness in data-collection skills. Branching examinations of major organ systems and medical record-keeping and verbal presentation skills by the problem-oriented method are taught. Prerequisite: admission to the MEDEX program.

HSERV 454 Adult Medicine I (7) Hummel, Stoll: Problem-oriented approach to the diagnosis and management of common primary care conditions. Introduction to relevant laboratory and radiological procedures. Organ system approach covers HEENT, respiratory, cardiovascular, gastrointestinal, and hematologic systems. Prerequisites: admission to the MEDEX program.

HSERV 455 Adult Medicine II (7) Continuation of 454: Introduction to relevant laboratory and radiological procedures. Organ system approach covers endocrine, renal, reproductive, dermatologic, musculoskeletal, and neurological systems. Prerequisite: admission to the MEDEX program.

HSERV 456 Maternal and Child Health for the MEDEX Practitioner (3) Asplin: Designed to acquaint students with principles of prenatal care and primary-care pediatrics. Prenatal care, labor and delivery, newborn exam, developmental screening, growth and development. Prerequisite: admission to the MEDEX program.

HSERV 457 Behavioral Science Skills for the MEDEX Practitioner I (3) Lurie: Process skills and interpersonal skills needed for primary-care practice, assessment skills needed for the diagnosis of emotional problems, and management skills used in primary-care practice to deal with these problems. Prerequisite: admission to the MEDEX program.

HSERV 458 Behavioral Science Skills for the MEDEX Practitioner II (3) Lurie: In-depth coverage of common emotional problems seen in primary care. Topics include crisis intervention, child abuse, death and dying, life planning, behavioral modification, human sexuality, alcohol and drugs, and family therapy techniques. Prerequisite: admission to the MEDEX program.

HSERV 459 Behavioral Science Skills for the MEDEX Practitioner III (3) Lurie: In-depth approaches to assessment and management of specific primary-care problems, including posttraumatic stress disorders, AIDS, violent patient, problems of malpractice issues to primary care, and emotional and sexual needs of disabled persons. Advanced interviewing skills with videotaped feedback included. Prerequisite: admission to the MEDEX program.

HSERV 460 Principles of Patient Management for the MEDEX Practitioner I (3) Reynolds: Systematic approach to patient management applicable to a primary-care setting. Majority of course is devoted to drug therapy and its administration. The other half includes health maintenance, risk factor identification, and nonpharmacological models of therapy. Prerequisite: admission to the MEDEX program.

HSERV 461 Principles of Patient Management for the MEDEX Practitioner II (3) Reynolds: Continuation of 460. Prerequisite: admission to the MEDEX program.

HSERV 462 Maternal and Child Health for the MEDEX Practitioner II (3) Asplin: Continuation of 456. Emphasis on pediatric history taking and physical exam, and diagnosis and treatment of common pediatric problems. Prerequisite: admission to the MEDEX program.

HSERV 463 Clinical Clerkships for the MEDEX Practitioner I (19) Harder: Full-time clinical clerkship spent in institution-based or specialty practice settings, such as occupational health, surgery, emergency medicine, psychiatry, or geriatrics. Prerequisite: admission to the MEDEX Northwest Physician Assistant program.

HSERV 465 Clinical Clerkships for the MEDEX Practitioner II (19) Ballweg: Harder: Continuation of clinical clerkships spent in institution-based or specialty practice settings, with emphasis on inpatient medicine. Prerequisite: admission to the MEDEX Northwest Physician Assistant program.

HSERV 466 Family Practice Clerkship for the MEDEX Practitioner I (19) Ballweg: Family practice under the supervision of physicians throughout the Pacific Northwest. Common primary-care problems. Students and preceptors are educated in the utilization and management of the physician assistant in practice. Students keep computerized records of patient encounters and complete a variety of written assign-
SCHOOL OF PUBLIC HEALTH AND COMMUNITY MEDICINE / HEALTH SERVICES

Course Descriptions

Courses for Graduate Study

Health Services 447

Public Health/Preventive Medicine

HSERV 501 Public Health Practice at the Local Level

Prerequisites: Admission to the MPH Program or equivalent or permission of instructor.

HSERV 502 The Public Health Approach to AIDS

Prerequisites: Admission to the MPH Program or equivalent or permission of instructor.

HSERV 503 Public Health Surveillance: Epidemiology and Health Policy

Prerequisites: Admission to the MPH Program or equivalent or permission of instructor.

Health Services 447

Methods Courses

HSERV 520 - Methods in Applied Community Research

Prerequisites: Admission to the MPH Program or equivalent or permission of instructor.

Health Services 447

Health Services Research Methods

Prerequisites: Admission to the MPH Program or equivalent or permission of instructor.

Additional courses and topics covered in other courses can be found in the Catalog of Courses for the School of Public Health and Community Medicine.
Health Care Organization and Provision
HSERV 541 - Topics in Maternal and Child Health I (3) Bell, Historie, legislative, structural, and economic basis for maternal and child health services in the United States. Seminar format, in which students critically review assigned readings and present questions for class discussion. Prerequisite: graduate standing or permission of instructor.

HSERV 542 - Epidemiology of Maternal and Child Health Problems (4) Emanuel, Hickok Contributions of epidemiology to the understanding and prevention of various maternal and child health problems, including abortion, birth defects, injury, and death. Prerequisites: graduate, medical, or dental school standing and 511 or 512 or permission of instructor. Offered: jointly with EPI 521; W.

HSERV 543 - Topics in Maternal and Child Health III (3) Connell Examines the major child and adolescent health problems in the United States. The epidemiologic and programmatic aspects of each problem are discussed in the light of their implications for health policy. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

HSERV 544 - Hospitals and Ambulatory Care (4) Richardson, Ross Concentration on the development of integrative health care delivery systems. While hospital and ambulatory care provide a focal point for the course, the objective is to examine system linkages with other providers, including public health, group practices, and community-based health care delivery programs. Prerequisite: 511 or permission of instructor. Offered: A.

HSERV 545 - Capstone Integrative Seminar (4) Ross, Scott Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive practices through the use of interactive case studies and team building exercises. Prerequisite: second year MHA students. Offered: Sp.

HSERV 546 - Long-Term Care (3) Hawley Learning experience for graduate students in health services administration, planning, other graduate students to increase their ability to identify and solve problems related to long-term care they confront in their employ­ment. Students are exposed to available knowledge in the field; effective problem-solving attitudes and techniques for organizing information and developing strategies, and agencies in the field. Prerequisite: 511 or permission of instructor. Offered: Sp.

HSERV 547 - Maternal and Child Health (4) Bell, Connell, Hickok Provides an understanding of factors affecting health, welfare of United States mothers and children. Includes effects of social policies and environmental factors, legislation and the health care system, levels of health services, social/political impact of public sector services, and effects of changing family structure/norms. Prerequisite: registration through Extended MPH Degree Program. Offered: A.

Health Policy and Politics
HSERV 551 - Health Law (3) Analysis of law, the legal system and current legal problems as they relate to the financing and delivery of health care services. Offered: Sp.

HSERV 552 - Health for All: the Community Responds (3) Gish Presentations by leaders of community organizations and local government officials concerned with the impact on health of socioeconomic developments, and the response of selected community groups to such developments. Sessions are organized around groups such as the workplace, Hispanic farm workers, environment, older Americans, homelessness, African-Americans, women.

HSERV 553 - Politics of Health Care (3) Hagens Provides understanding of health policy development in the context of American political system. Health policy examined in terms of historical analysis, legislative process, bureaucracy, budget process, use of information in the political system, role of interest groups. Meet major paradigm and health policy formation. Prerequisite: 511 or permission of instructor.

HSERV 554 - Health Legislation Seminar (1) Hagens Discussion of current state health policy topics with legislative staff and others involved with state health policy. In addition to session on campus, course meets 2-3 times during the quarter in Olympia. Offered: W.

HSERV 555 - Health Policy (5) Stroma Provides an opportunity to gain and apply tools of policy analysis. Alternative techniques of gathering, synthesizing, and analyzing available information in a timely fashion. Attention focused on written and oral presentation to a policy audience on a "real" health issue. Offered: Sp.

Health Services Management
HSERV 556 - Managing Health Care (3) Practical introduction to knowledge and skills required to effectively manage a variety of health services organizations. Theoretical material used to develop a diagnostic framework with which to analyze organizational dysfunctions and locate appropriate interventions. Students assess their skills at management through exercises, case analyses, and self-assessments. Prerequisite: graduate student.

HSERV 557 - Health Planning: The Management of Change (4) Erasions Designing realistic implementable strategies at beginning of planning process to optimize impact of planning on real problems. Discussion of ways in which change is brought about and decisions are made and implemented. Includes managing planning process, work plans, stakeholders, negotiation, and working with groups. Prerequisite: 511 or permission of instructor. Offered: A.

HSERV 558 - Health Services Management (4) Dowling Examination of decision making, change implementation, and control processes in health services delivery organizations. Emphasizes (1) behavioral, organizational, and situational factors affecting management role in health organizations, and (2) management strategies for analyzing problems and implementing changes to improve organizational performance. Seminar/case study format. Prerequisite: 511 or 545 or permission of instructor. Offered: W.

HSERV 559 - Personnel Management for Health Professionals (3) Altamore Focuses on intermediate level management principles. Emphasis on selection, orientation, and training of mid-career health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel problems—selection, promotion, performance appraisal, discipline, grievances. Prerequisite: registration in Extended M.P.H. Degree program or permission of instructor; non-business majors. Offered: Sp.

HSERV 560 - Techniques for Strategic Planning and Marketing in Health Services (4) Blackman, Haines Review of the essential elements of a market-based strategic planning process. Application of these elements through case study, in-class discussion, and panel discussions with area experts. Emphasis upon strategic thinking for inpatient/outpatient services management. Prerequisite: 511 or permission of instructor. Offered: Sp.

HSERV 561 - Decision Support Models for Health Services (3) Lehman Develops financial management skills through case studies in budgeting, pricing, and monitoring the total financial requirements for health-care institutions. Topics include budgeting principles, cost analysis, rate setting, reimbursement, profit planning, strategic planning, capital investment analysis, capital budgeting, working capital management, cost accounting, and financial feasibility analysis. Prerequisite: 511 or permission of instructor. Offered: Sp.

Social and Behavioral Sciences
HSERV 562 - Health Behavior and Preventive Medicine (3) Meischke Effective delivery of preventive services and need for an integrative and inseparably linked to voluntary health behavior. Clinical issues and psychosocial theory related to a broad spectrum of health behaviors. Emphasized: Identifying effective preventive strategies and strategies for changing beliefs and behaviors. Prerequisite: 511 or permission of instructor. Offered: Sp.
For more information and permission, consult department program adviser.

**HSERV 591  **Tutorials and Special Seminars (1-4)  
Special topics related to current issues in health services. Topics determined by expressed interest of students and faculty. Also includes participation of health professionals. Prerequisites: 511 or 513.

**HSERV 592  **Program Seminars (1-6)  
Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

**HSERV 595  **Practicum/Field Work in Community Medicine (1-12)  
Experience in variable time blocks in community health activities in agencies delivering and planning health service programs. Sites include neighborhood clinics, health planning offices, medical practice settings, public health agencies, special problem clinics, and facilities, environmental programs and services. Prerequisite: masters in health services and permission of instructor.

**HSERV 596-  **MHA Field Project (1-6, max. 9)  
Supervised research in a selected topic related to students' concentration in graduate study. Includes survey of literature, development of approach, and written paper on conclusions. Prerequisite: successful completion of first-year curriculum and internship in graduate program in health services administration and planning.

**HSERV 597  **International Health Projects (1-12)  
Field-based projects during which students learn how social, economic, and political conditions in a developing country affect the health status of populations while being involved in the design, implementation, and analysis of community health surveys. Prerequisite: permission of instructor.

**HSERV 598  **Extended Degree Program Project Option (*, max. 9)  
Supervised project work on a selected topic related to student's concentration in graduate study. Includes survey of literature, development of approach, and written paper on conclusions. Prerequisite: successful completion of first-year curriculum and internship in graduate program in health services administration and planning.

**HSERV 600  **Independent Study or Research (*)  
Prerequisite: permission of instructor.

**HSERV 700  **Master's Thesis (*)  
Prerequisite: permission of instructor.

### Pathobiology

**F143 Health Sciences**

**Graduate Program**

C. C. Kuo, Graduate Program Coordinator

The Department of Pathobiology offers a research training program leading to the degrees of Master of Science and Doctor of Philosophy. "As a discipline, pathobiology stands at an interface between fundamental biology and clinical medicine. The mission of the department is to apply the latest research technologies to the study of human disease and disease agents. Members of the department have diverse research interests including the molecular biology of cancer and infection; molecular investigation of pathogenesis; drug resistance and host responses; diagnosis of diseases; development of vaccines and therapeutics; and fundamental biology of infectious agents. Course work provides the foundation for interfacing molecular and cellular biology with public health issues.

**Admission Requirements**

Students with a variety of academic backgrounds are accepted for graduate school in pathobiology. It is highly desirable that applicants have completed course work in biology, organic chemistry, and biochemistry and/or molecular and cellular biology. Persons holding professional doctorates (medicine, dentistry, veterinary medicine) are also encouraged to enter the graduate program.

**Financial Aid**

Some financial aid may be available in the form of research assistantships funded primarily through federal research grants held by faculty members.

**Research Facilities**

In addition to the research facilities at the University of Washington, opportunities for training also exist at the Fred Hutchinson Cancer Research Center, the Biomedical Research Institute, and the Seattle Biomedical Research Institute.

**Correspondence and Information**

Graduate Program Coordinator  
Department of Pathobiology, SC-38

**Faculty**

Chairperson  
George J. Todaro

Professors  
Carter, William G. * 1981; PhD, 1974, University of California (Davis); elucidation of components in cell attachment and cell spreading in normal cells.

Grayston, J. Thomas * 1960, (Adjunct); MD, 1948, University of Chicago; epidemiology and control of infectious disease.

Hakomori, Sen-Iriro * 1987; MD, 1951, Tohoku Imperial University (Japan); biochemistry and immunology of carbohydrate antigens on malignant and normal cells.

Kenny, George E. * 1961; PhD, 1961, University of Minnesota; antigenic analysis of mycoplasmas, bacteria, and other organisms.

Kuo, Cho-Chou * 1966; PhD, 1970, University of Washington; antigenic analysis, immunology and pathogenesis of chlamydiae.

Perine, Peter L. * 1981, (Adjunct); MD, 1966, University of Kansas; international health, sexually transmitted diseases.

Rausch, Robert L. * 1978, (Emeritus); PhD, 1949, University of Wisconsin; parasitology, helminthic zoonoses.

Stuart, Kenneth Daniel * 1985; PhD, 1969, University of Iowa; molecular biology of parasites.

Wang, San-Pin * 1963, (Emeritus); MD, 1944, Keio University; classification, pathogenesis, and epidemiology of chlamydiae.

**Associate Professors**

Campbell, Lee Ann * 1985; PhD, 1982, Pennsylvania State University; molecular biology and pathogenic mechanisms of chlamydiae.

Kahn, Michael * 1992; PhD, 1982, Yale University; molecular recognition, protein structure-function relationships, peptidomimetics.
Parsons, Marilyn * 1986, (Research); PhD, 1978, Stanford University; signal transduction and organelle biogenesis in African trypanosomes.

Reed, Stephen G. * 1993; PhD, 1979, University of Montana; immune response to human pathogens.

Roberts, Marilyn C. * 1981; PhD, 1978, University of Washington; mycobacterium, antibiotic resistance genes, plasmids and sexually transmitted diseases.

Rosenfield, Michael E. * 1996; PhD, 1981, University of Wisconsin; mechanisms of atherogenesis and morphogenesis gene expression.

Thouless, Margaret E. * 1980; PhD, 1974, University of Birmingham (UK); antigenic variability of enteric viruses and simian retroviruses.

Van Voorhis, Wesley C. * 1986, (Adjunct); MD, 1984, Cornell University; infectious diseases.

Yamamoto, Fumichiro * 1988, (Research); PhD, 1983, Osaka City University (Japan); molecular biology of histocompatibility antigen.

Assistant Professors

Bendlak, Brad K. * 1988, (Research); PhD, 1983, Cambridge University (UK); biosynthesis of glycoprotein carbohydrate structures.

Blanton, Rebecca A. * 1992; PhD, 1982, Pennsylvania State University; growth differentiation, and morphogenesis of epithelial cells.

Bosch, Marlies L. * 1994; PhD, 1987, University of Leiden (Netherlands); molecular interactions between lentiviruses and the cell, for HIV-1, SIV, and FIV.

Feagin, Jean E. * 1993; PhD, 1982, Stanford University; molecular parasitology, emphasizing organellar gene organization and expression in protozoa.

Howard, Randall F. * 1993; PhD, 1978, University of Minnesota; molecular and cellular biology of malaria parasites; host immune responses.

Myler, Peter J. * 1993; PhD, 1982, University of Queensland (Australia); regulation of gene expression in protozoan parasites.

Riley, Donald E. * 1982, (Research); PhD, 1976, University of Washington; pathogenic research and diagnosis involving DNA sequences.

Rose, Tim M. * 1991; PhD, 1981, University of Geneva (Switzerland); molecular biology, cytokines, cellular growth and differentiation.

Symington, Baro E. * 1993; MD, 1982, University of Pennsylvania; growth control via adhesion receptors.

Symington, Frank W. * 1993; PhD, 1982, University of Pennsylvania; skin immunology, infection, cellular oligosaccharides.

### Course Descriptions

See page 55 for explanation of course numbers, symbols, and abbreviations.

### Courses for Undergraduates

- **UCONJ 420 Biological Safety Practices (1) Kenny**
- **PABIO 498 Undergraduate Thesis (*)**
- **PABIO 499 Undergraduate Research (*)**

### Courses for Graduates Only

- **PABIO 511 Pathobiological Frontiers (2) Kenny**
- **PABIO 521 Tissue Culture and Virology (3) Thouless**
- **PABIO 522 Antigenic Analysis of Microorganisms (3) Kenny**
- **PABIO 525 Cell Surface Membrane in Cell Sociology and Immunology (2) Carter, Hakomori**
- **PABIO 531 Applications of Molecular Biology to Public Health (2) Campbell**
- **PABIO 540 Antibiotic Resistance Mechanisms and Their Impact on Public Health (2) Roberts**

Microorganisms have on therapy and cancer treatment and their impact on public health. Prerequisite: permission of instructor.

### PABIO 550 Diseases of Public Health Importance and Strategies for their Control (3) Public Health perspective of major diseases of national and global importance. Discussion of origins, establishment, progression, and pathogenesis of diseases. Importance of immunological, intercellular and external factors, and strategies of disease prevention. Requires a grounding in cellular and molecular biology, microbiology, and immunology. Prerequisite: permission of instructor.

### PABIO 551 The Application of Basic Research to Diseases of Public Health Importance (3) Diseases of major national and international public health significance. Discussion of epidemiological aspects and clinical approaches. Analysis of relevant biological systems and their application to the pathobiology of disease. Requires familiarity with molecular and cellular biology. Prerequisite: permission of instructor.

### PABIO 580 Pathobiology Seminar (1, max. 15) Research from students, faculty members, and invited speakers is presented and discussed. Topics include immunology, viruses, membranes, infectious diseases, immune response and other related topics.

### PABIO 581 Current Literature in Pathobiology (1, max. 15) Critical evaluation of recent articles related to human disease and disease agents. Prerequisite: graduate student in pathobiology or permission of instructor.

### PABIO 583 Seminars on Frontier Research (1, max. 15) Research on newly defined diseases and disease agents. Prerequisite: permission of instructor.

### PABIO 589 Selected Topics (1-6) In-depth study of an issue relating to pathobiology. Seminar format. Small groups of students by arrangement with faculty member. Prerequisite: enrollment in pathobiology graduate degree program and permission of instructor. Credit/no credit only.

### PABIO 590 Didactic Pathobiology (1, max. 12) Supervised teaching experience in pathobiology courses for Ph.D. candidates. Prerequisite: permission of instructor.

### PABIO 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser. Credit/no credit only.

### PABIO 700 Master's Thesis (*) Prerequisite: permission of graduate program adviser. Credit/no credit only.

### PABIO 800 Doctoral Dissertation (*) Prerequisite: permission of graduate program adviser. Credit/no credit only.
Reserve Officers Training Corps Programs

Aerospace Studies

202 Clark

The Air Force Reserve Officer Training Corps program (AFROTC) is designed to motivate, educate, and commission highly qualified students for active duty as officers in the U.S. Air Force. The curriculum develops the professional knowledge, in both theory and application, that an Air Force officer needs to be an effective manager and leader in the aerospace environment.

General Program Requirements

The freshman- and sophomore-level general military courses are open to all students attending any two- or four-year college or university full time. Any qualified male or female student may enroll in these general military courses. The junior- and senior-level professional officer courses are open to qualified students who have received credit for the general military courses and have been competitively selected for entry.

Commissioning Requirements

Students who successfully complete the AFROTC program and receive an academic degree from the University are offered commissions as second lieutenants in the Air Force.

General Military Courses

The basic division courses consist of one classroom hour and one leadership laboratory hour per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn, winter, or spring quarters. Sophomore students may enter at the start of autumn or winter quarters and take the freshman-sophomore-level courses concurrently. A four-week field training course, taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students receive pay and travel costs for field training.

Except for sophomore cadets on AFROTC scholarship, students incur no active duty service commitment by taking general military courses, and students may drop the courses at any time.

Professional Officer Courses

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive tax-free monthly subsistence pay of $100. They are furnished texts and uniforms. Junior- and senior-level classes consist of three hours of academic classes and one hour of leadership laboratory per week.

Financial Assistance

The Air Force offers one-, two-, and three-year scholarships to qualified college students. The following is a partial list of areas where scholarships are available: engineering, science and technology, nursing, medicine, law, non-technical, and others. A special one-year scholarship is available for nursing and law majors. Nursing students are given special consideration in fulfilling their AFROTC courses to allow time to meet their clinical and core course requirements.

AFROTC scholarships pay tuition, certain fees, and full textbook reimbursement. In addition, scholarship winners receive a $100 subsistence allowance per month. To take advantage of these scholarships, students should apply directly to the AFROTC department.

Two-Year Program

To provide for those students unable to take the general military courses, a two-year professional officer course is available on a highly competitive basis. The two-year program is open to graduate students and other students who have two years remaining until graduation.

Students in this program are required to attend a six-week field training course at an Air Force base during the summer preceding program entry. The student is paid during the six-week period. Upon return to the campus, students enter the professional officer course. Uniform, texts, and $100 monthly subsistence are provided.

Two-year scholarships may be available for qualified students. Students interested in this program should contact the AFROTC department nine to twelve months prior to the autumn quarter they desire to enter.

Courses for Undergraduates

A S 101, 102, 103 Aerospace Studies 100 (1,1,1)
Crissey Focuses on the basic characteristics of air doctrine; U.S. Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officerhip/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory. Offered: A,W,Sp.

A S 211, 212, 213 Aerospace Studies 200 (1,1,1)
Evans Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory. Offered: A,W,Sp.

Military Science

104 Clark

The ROTC program is designed to aid the student in developing those habits and attitudes that will make him a better student and increase his/her chances of graduating with a better education and higher academic achievement.

The ROTC program provides the student an opportunity to learn and practice the art of leading people. Recognizing that there is a great difference in cognition and volition, the program is structured in such a way as to give the student actual practical experience in leading and managing resources—training designed to prepare the student to reach the pinnacle of his or her chosen profession.

The Army ROTC program enables the student to learn about the military profession and the role it plays in our democratic system of government. The courses enable such knowledge to be acquired on the campus without having to serve in the military forces.

The Army ROTC electives enrich the student's course of study. Taking these courses also opens up an additional career option to the student, enabling him or her to gain a commission and serve in the Army as an officer, or serve as an officer in the Reserves or National Guard while pursuing another chosen career.

Army ROTC provides the student membership in a close-knit fraternal organization where social acceptance is assured.

ROTC programs on college campuses are the nation's way of ensuring that all the influences of higher education are transported into the military services—a mandatory requirement in a democracy.

Traditional Four-Year Program

Open to freshman and sophomore men and women, this program may lead to a commission in either the Regular Army or the Reserve Components (Army Reserve or National Guard). Academic studies include courses in military history and tactics, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military hygiene. Extracurricular activities include such options as Ranger Company, air pistol and rifle teams, color guard, training exercises, field trips, and related activities. A student incurs no obligation of any kind during the first two years of the four-year ARROTC program. Basic course grades are included in the GPA.

Placement credit toward completion of a ROTC course may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROTC and may enter the advanced course directly. All military textbooks and uniform items
are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of $100 for a maximum of twenty months. In the advanced course, cadets are required to participate in the leadership development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a six-week summer camp during which they receive varied and challenging training and for which they are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course, students agree to complete the course, to accept a commission upon graduation, if offered, and to serve on active duty for four years after commissioning or three to six months’ active duty training if offered to serve in a position of service in the Army Reserve or National Guard.

Prior to commissioning, students must complete at least one undergraduate course from each of five fields of study: written communication, military history, human behavior, computer literacy, and mathematical reasoning. Alternative courses may be substituted for any of these requirements upon approval of the Professor of Military Science.

### Two-Year Program

This program is open to qualified undergraduate and graduate students with at least two years in school remaining and who have completed 45 credits. Students must apply directly for entrance into the advanced course under this program in either one of two ways.

First, they may participate as qualified veterans who receive placement credit for the first two years of AROTC. Veterans are also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserve and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.

The second alternative under this program requires attendance at a basic camp for six weeks at Fort Knox, Kentucky. Completion of this basic camp also qualifies students for direct entry into the advanced course under this program in either one of two ways.

While at camp, students receive pay plus travel expenses to and from the camp location, and they can compete for two-year scholarships. Academic subjects covered in the two-year program are the same as those covered in the four-year programs. Both programs have the same military obligation.

### Two- and Three-Year Scholarship Program

This program is open to qualified students on campus. Selections are made on a regional level based upon the recommendation of the Professor of Military Science. The scholarship provides financial assistance during the remaining years of the student’s enrollment. Each scholarship pays for tuition and a flat rate for books and lab expenses, and provides subsistence of $100 per month, tax free. All other advantages and obligations are the same as those of the four-year scholarship program.

### Four-Year Scholarship Program

Application for this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Regular Army or the Army Reserve. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus tax-free subsistence of $100 for a maximum of four years, are provided by the Army. The program requires four years of academic study on campus, as well as a six-week advanced course conducted between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract (with the consent of parents if under eighteen years of age) wherein he or she agrees to complete the program, to enlist in the Reserve, to accept a commission if offered, and to serve on active duty for four years after commissioning.

### Courses for Undergraduates

**M SCI 101, 102, 103 Military Science I: Basic (2,2,2)**
History, organization, and mission of the United States Army and the Reserve Officer Training Corps. Relationship to the citizen’s military and civilian obligations. Functions and organization of the United States defense establishment. Fundamentals of leadership and management. Leadership laboratories and two field training exercises during the year encompass training in field craft, survival, and small unit tactics. Offered: AWP, AWP, AWP.

**M SCI 201, 202, 203 Military Science II: Basic (2,2,2)**
Develops proficiency in oral and written communications. Presents a perspective on the world wide military threat; an evaluation of tactical methodologies of the hostile nations to include conventional weapon systems employment. Control, prevention, and treatment of combat or emergency medical situations. Fundamentals of military map reading, aerial photography, compass and field navigation, are taught and applied. Leadership laboratories and two field training exercises during the year. Offered: AWP, AWP, AWP.

**M SCI 301, 302, 303 Military Science III: Advanced (3,3,3)**
Small-unit tactics, emphasizing the importance of firepower, movement, and communications. Duties, responsibilities, and methods of employment of basic military units. Leader’s role in directing and coordinating individuals and military units from squad to company level. Students are introduced to the planning and conduct of individual and group physical conditioning activities to establish high standards of morale and esprit. Principles and techniques of command, control, military management, and leadership are taught and practiced throughout the academic year. Leadership laboratories and two field training exercises during the year. Prerequisites: completion of basic training; basic camp or 9 credits of 100- and 200-level courses. Offered: AWP, AWP, AWP.

### M SCI 305 Practicum-Techniques of Military Instructions (1-3)
Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of instruction from the Military Qualification Skills Manual. Prerequisites: admission to ROTC advanced course, permission of instructor, completion of 9 credits of 300- or 400-level courses.

### M SCI 401, 402, 403 Military Science IV: Advanced (2,3,4)
The Army officer’s position in contemporary world and impact on problems within the military service. Use of a developmental study to provide awareness of personal responsibilities and official relationships of an Army officer. Organization and functions of combat support and support of combat, role of strategic goods, procurement and support of the weapons system, logistics, and planning for military operations. Basic concepts of legislative and executive authority for the Uniform Code of Military Justice (to include a study of the officer’s authority and responsibility within the military justice system). Problem-solving techniques used by small-unit leaders, emphasizing coordination and planning by the junior officer. Leadership laboratories and two field training exercises during the year. Prerequisites: completion of basic training; basic camp or 9 credits of 100- and 200-level courses. Offered: AWP, AWP, AWP.

### Naval Science

305 Clark

The Department of Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) unit functions in conjunction with the Department of Naval Science. An NROTC student may select an academic major within certain limitations (i.e., some majors that normally lead to immediate graduate education, such as prelaw or premedicine, are not consistent with the mission of the NROTC program).

In addition to their University curricula, NROTC students attend naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership/management. In addition, each student must attend one drill session and one naval science laboratory session per week. During the summer, students may have a four-to-six-week training cruise to put into practice earlier classroom work. To be commissioned, students take the same naval science classes during the first two years. Students who elect to be commissioned in the Marine Corps take Marine Corps subjects during their third and fourth years.

Any University student may take any naval science course without enrolling in the NROTC Program. Two programs are offered.

### Navy-Marine Scholarship Program

Each year, men and women are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as an NROTC scholarship student.

Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, textbooks, and uniforms, plus $100 per month in subsistence pay.

For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful com-
pletion of NSI instruction qualifies these students for enrollment in the advanced courses in the NROTC program. All scholarship students are appointed as midshipmen, USNR, and upon graduation are commissioned as officers in the Navy or Marine Corps, after which they serve on active duty for a minimum of four years.

**Navy-Marine College Program**

Each year, men and women are accepted for four-, three-, and two-year non-scholarship college programs. For the three-year program, the Professor of Naval Science nominates qualified students throughout the freshman year. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program).

Those students selected for the two-year program attend a six-week course of instruction at NSI during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive monthly subsistence pay of $100 during their junior and senior years, including the intervening summer. The Navy furnishes all uniforms and textbooks used in naval science courses.

All college program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation within the midshipman battalion. The two-year college program students also may win a scholarship for superior performance at NSI. Upon graduation, college program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

**Courses for Undergraduates**

N SCI 111 The Naval Service (3) General introduction to the Navy, its organization, missions, roles, tasks, and operating methods. The relationship to the other services within the Department of Defense is emphasized. Offered: A.

N SCI 112, 113 Sea Power Practicum I, II (2,2) A comprehensive study of the role of sea power in the history of the United States, the current status of the various elements of the nation's sea power as they influence the development and implementation of national security policy, and the economic effects of the elements of sea power (the Navy, the merchant marine, port facilities, fisheries, and oceanographic capabilities). Offered: W,Sp.

N SCI 211 Naval Weapon Systems (3) Concept of naval weapons systems and the systems approach, the techniques of linear analysis of ballistics and weapons, the dynamics of basic components of weapons control systems. The tools are provided for understanding the basic principles that are involved in modern naval weapon systems, gas turbines, and auxiliary power systems. Offered: A.

N SCI 212, 213 Naval Ship Systems I, II (3,3) Study of the varied ship systems operational in the Navy today, including the principles of characteristic propulsion systems and auxiliary machinery and the elements of ship stability and damage control. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: W,Sp.

N SCI 311 Navigation (3) The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting methods. Computation of tides and currents and nautical rules of the road. Offered: A.

N SCI 312 Celestial Navigation (3) Theory and practice of celestial navigation. The student performs the complete "day's work" of the ship's navigator. Offered: W.

N SCI 313 Naval Operations (3) Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and orders, employment of detection equipment, and meteorology. Offered: Sp.

N SCI 411 Psychology of Leadership (3) Introduction of the theory and techniques of naval leadership based on those principles of behavioral science that are pertinent to understanding individual and group behavior of adults. It introduces the student to the management process and the relationship of management functions to leadership. Acceptance of a traditional deep sense of moral responsibility on the part of the aspiring leader is stressed. Offered: A.

N SCI 412, 413 Naval Organization and Management I, II (3,3) Study of organization, systems, and techniques employed in the Navy for management of its human, financial, and material resources. Some of the work relates to the administration of discipline in the Navy under the Uniform Code of Military Justice. Emphasis is placed on the leadership and management role of the junior officer in the fleet. Offered: W,Sp.

**Marine Corps Option Courses**

N SCI 321, 322, 323 Evolution of Warfare I, II, III (3,3,3) Introduction to the art of war, the evolution of warfare from the earliest recorded battles to the present day. Offered: A.W.

N SCI 421, 422 Amphibious Warfare I, II (3,3) Provide basic knowledge of evolution of amphibious warfare from premodern era to present. Strategic and tactical considerations in planning specific operations and amphibious landings. Offered: A.W.

N SCI 423 USMC Leadership and Administration of Justice (3) Concepts, objectives, characteristics, qualifications, and practical techniques of leadership as exercised by the Marine Corps officer are studied. Emphasis is placed on the leadership and management role of the junior officer in the Fleet Marine Forces. Offered: Sp.
School of Social Work

Dean
Nancy R. Hooyman
210 Social Work/Speech and Hearing Sciences

The School of Social Work offers three degree-granting programs, one undergraduate and two graduate. The undergraduate program prepares students to receive a Bachelor of Arts degree with a major in the field of social welfare, while the graduate programs offer the Master of Social Work degree and the Doctor of Philosophy degree in social welfare. All three programs are housed in the Social Work/Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast.

In addition, the School offers a concurrent degree program with the School of Public Health and Community Medicine leading to the M.S.W. and M.P.H. degrees.

Undergraduate Program
Moya M. Duplaga, Director

The undergraduate program consists primarily of upper-division courses in social welfare, with additional requirements in human biology, economics, psychology, and sociology. Students enter the major at the start of their junior year after completing the liberal arts requirements established by the College of Arts and Sciences. Social welfare courses during a student's junior and senior years impart a basic knowledge of the social welfare system, of human behavior and the social environment, of the social work profession, of social welfare research, and of the skills necessary to prepare for beginning social work practice. The program, leading to a bachelor's degree in social welfare, is accredited by the Council on Social Work Education.

The requirements and curriculum of the social welfare program may be summarized as follows:

Junior year—ECON 100, 200 or 201 (5); PSYCH 306 (5); SOC 352 (5), SOC W 419 (3), 300 (3), 320 (3), 390 (3), 310, 311 (3.3).

Senior year—SOC W 415 (12), 405 (6); social welfare electives (15).

Admission
Approximately fifty new juniors are admitted to the social welfare major each academic year, during autumn and winter quarters only. A selective admission procedure is used to determine entrance into the program. Applicants seeking admission should: be admitted or admitted to the University; be eligible, or nearly eligible, for junior class standing (i.e., 55 completed credits of undergraduate work) by the beginning of the entry quarter; have completed a human biology course; be in good academic standing (i.e., 2.0 minimum GPA); submit a completed application to the program; and provide copies of their college transcripts.

Application forms and a more detailed description of the social welfare major are available at the School's admissions office from February 1 to May 1 for entrance into the program starting the following autumn quarter, and from July 1 to November 1 for winter quarter entrance. The School's admissions office is located in 23B Social Work/Speech and Hearing Sciences. Application forms also may be mailed upon request, telephone 543-3876. A student who wishes to discuss the program in person may arrange an interview by telephoning the Director of Admissions. Such inquiries are welcome.

Students accepted to the major at the end of their sophomore year surrender their premajor status by transferring their files and change-of-college forms to the School's Student Services Office, SWS 23C. Afterwards, they are advised by the Director of Student Services, located in the Student Services Office, SWS 23E.

Graduate Program

The School of Social Work offers a two-year, full-time program leading to the Master of Social Work degree, as well as a concurrent degree program that students usually complete in three years.

The program prepares students for advanced professional practice. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation and opportunities for advanced content in specialized practice.

The professional foundation provides instruction in the basic knowledge and skills required for effective, accounts of social work practice as well as socialization to the profession, its value orientation, ethics, and history.

The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in one major area of the social work profession. These include four concentrations in health and mental health; children, youth and families; multi-ethnic practice; and social welfare administration.

Admission Qualifications
Admission to the M.S.W. program requires formal admission to the Graduate School as well as to the School of Social Work. Applicants are required to have either an undergraduate degree, a strong academic background, and some human services experience. Applicants must submit transcripts, references, applications, Graduate Record Examination scores, and an admission essay to be considered for autumn quarter entry. February 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant's submitted materials.

Financial Aid
A limited number of financial aid opportunities are available to students. Applicants to the M.S.W. program are urged to apply for assistance through the Office of Student Financial Aid (FAFSA) is requisite for consideration for any departmental funding. Departmental funding is limited to a few resident tuition scholarships which cover only one or two quarters of tuition. Inquiries may be directed to the Chairperson of the Scholarship Committee, School of Social Work.

Ph.D. Program in Social Welfare

Cheryl A. Richey, Director and Graduate Program Coordinator
Anthony H. Ishisaka, Alternate Program Coordinator

The Ph.D. Program in Social Welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work. The program builds on the premise that social welfare scholarship must be scientifically based, responsive to service and practice needs, and informed of developments in related fields and disciplines.

After the first year of required courses, each student's program of study is individually designed and focuses on well-defined substantive and interventional areas of research. In the field of social welfare, the core of required courses, which include teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.

During the first two years, students are expected to define and develop one specialized area that will be the focus of their General Examination and subsequent dissertation research. The selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare. Various specialized areas of study are possible within the program, including, but not limited to, child welfare, aging, mental health, services to women, racial-ethnic minorities, income-maintenance programs, and community empowerment.

The General Examination for advancement to candidacy normally occurs at the end of the second year. After advancement to candidacy, students devote full time to completion of their dissertation research. The last step before award of the degree is the Final Examination, which consists mainly of the defense of the dissertation. Students are encouraged to reside in residence at the University until the dissertation is accepted. The Ph.D. program takes approximately three years.

Admission
Applicants should have a master's degree in social work or comparable preparation in a closely related field. The applicants selected for admission are those whose scholarly achievements, previous experience, and aptitude for social welfare research and scholarship indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social work and social welfare as well as the affirmative action goals of the University. The deadline for receipt of admission material is February 1.

Financial Aid
A limited number of stipends, scholarships, teaching and research assistantships, and tuition waivers are available. While every effort is made to provide aid to each student who requires it, priority is given to first- and second-year Ph.D. students. However, it is unlikely that the financial assistance provided to any student...
would be adequate to cover all educational and living expenses. Financial aid forms required for financial assistance must be submitted by February 15.

Correspondence and Information
Graduate Program Coordinator
Ph.D. Program in Social Welfare, JH-30

Center for Social Welfare Policy and Research
In addition to its degree programs, the School maintains the Center for Social Welfare Policy and Research, which is the focal point of the school's policy and research activities. The center serves as a resource within the School of Social Work and the social welfare community, both regional and national, for the design, implementation, and evaluation of human services policies and practices. Areas of research include prevention, crime and delinquency, substance abuse, family violence, child welfare, AIDS, ethnic-minority issues, mental health, women's issues, and services to the elderly. This research is supported by the center, which was established in 1991. It also provides the center with the technical expertise necessary for systematic research and evaluation of the effectiveness of social welfare programs and policies.

Information about the Center for Social Welfare Policy and Research can be obtained from the School of Social Work, JH-30, Center for Social Welfare Policy and Research, telephone 543-4175.

Hammann, Carl F. * 1967; MA, 1961, Indiana University; aging, alcoholism, human services practice.

Herrick, James E. * 1966; DSW, 1966, University of Southern California; social policy, social work and the justice system, research methodology, social and cultural change.

Icard, Larry * 1993; DSW, 1992, Columbia University; AIDS prevention intervention design and research, administration, race/ethnic minority group issues.

Ishii-Kuntz, Anthony H. * 1971; DSW, 1971, University of California (Berkeley); social work practice, mental health services, services to minority communities, human development.

Kelley, Jerry Lee * 1961, (Emeritus); MA, 1949, University of Chicago; social workers in schools, interviewing and counseling in human services.

Kopp, Judy * 1983; PhD, 1982, Washington University; interviewing, qualitative clinical research, cross-cultural practice, Native Americans.

Kruzel, Joan * 1991; PhD, 1982, University of Washington; maternal depression and child abuse, organizational impacts on residents of long-term care agencies.

Leigh, James William * 1967, (Emeritus); MSW, 1954, Wayne State University; social work practice with families, multietnic and multicultural concerns, family life education.

Morrison, Diane M. * 1980, (Research); PhD, 1982, University of Washington; sexual decision-making, attitudes and behavior, teen pregnancy.

Mundy, Lorraine B. * 1965, (Emeritus); MSW, 1950, University of Washington; family treatment.

Nurius, Paula S. * 1984; PhD, 1984, University of Michigan; social cognition, violence against women, research/computer supports for practice, critical thinking.

Peconic, Peter * 1990; PhD, 1982, University of Washington; child welfare practice, foster care, family preservation services, personnel management.

Roffman, Roger Alan * 1972; DSW, 1983, University of California (Berkeley); alcoholism and drug abuse, AIDS prevention, domestic violence, research methodology.

Teather, Edward Charles * 1966; MSW, 1962, University of British Columbia (Canada); family-centered practice, group work, program development.

Assistant Professors
Allen, Allethia Lee * 1966, (Emeritus); PhD, 1966, Welden University; social welfare policy, multiculturalism, women's issues, social work practice.

Almgen, Gunnar R. * 1986; PhD, 1990, University of Washington; health care policy and practice.

Arthur, Michael * 1991, (Research); PhD, 1990, University of Virginia; Project Director—Community Youth Activity, Six State Prevention Needs Assessment.

Bending, Raymond L. * 1987; PhD, 1982, University of Washington; American Indian child welfare practice and policy, social work in American Indian communities.

Brown, Linda * 1991, (Adjunct Research); PhD, 1982, University of Colorado (Denver); mental health care delivery system evaluation, theories of psychiatric nursing, nursing intervention.

Fredriksen, Karen Ilene * 1993; PhD, 1993, University of California (Berkeley); gerontology, work and family, dependent care, non-traditional families, social policy.

Harachi, Tracy * 1992, (Research); PhD, 1991, University of Washington; Raising Healthy Children Project, prevention/health promotion for children and families.

Hoppe, Marilyn * 1990, (Research); PhD, 1982, University of Washington; Director—Children's Health Awareness Project, data management.

McGadney, Brenda * 1991, PhD, 1992, University of Chicago; long-term care, health promotion and self-care for elders, ethnicity and families, community research.

Peterson, Peggy * 1991, (Research); PhD, 1988, University of Illinois; prevention research; psychosocial models of drug abuse and AIDS risk behavior.

Ryan, Rosemary * 1991, (Research); PhD, 1987, University of Washington; Director—Women and AIDS Program, ARIES Project.

Remko, Janeane * 1993, (Research); PhD, 1991, University of Washington; Director—Hospital Diversion and Use of Psychiatric Hospitals Project; mental health research.

Sohn, Sue * 1990; PhD, 1989, University of Pittsburgh; action research and chronic mental illness, cross-cultural social work practice.

Uehara, Edwina * 1990; PhD, 1987, University of Chicago; qualitative/quantitative research methods, cross-cultural mental health, human services organization.

Senior Lecturer
Lecturers
Cahn, Katharine C. 1985; BA, 1976, Reed College; Director—Northwest Resource Center for Children, Youth, and Families.
Delong, James B. 1985; MSW, 1979, University of Washington; Extended Program Coordinator, Practicum Coordinator, aging, men's issues.
Hagerty, Kevin P. 1985; MSW, 1989, University of Washington; Project Director—Focus on Families, Raising Healthy Children.
Johnson, Paul W. 1989; MSW, 1979, Eastern Washington State University; permanency planning, child welfare, interagency collaboration.
Nicoll, Anne E. 1984; PhD, 1989, University of Washington; computer applications in social work curriculum, research methods, service delivery for women.
Richardson, Gloria * 1989; MA, 1973, University of Chicago; Training Coordinator—public child welfare supervision, cross-cultural diversity, ethnic practice models.
Roberts, Elizabeth A. 1982; MSW, 1975, University of Washington; Practicum Coordinator.
Spearman, Margaret L. 1992; MSW, 1975, Washington University; multiculturalism, social welfare management.
Wrenn, Rachel 1990; PhD, 1987, University of Washington; maternal and child health services and policy, trans-cultural social work practice, field education.

Course Descriptions
See page 55 for explanation of course numbers, symbols, and abbreviations.

Courses for Undergraduates
Social Welfare BASW
SOCWF 200 Introduction to Social Work Practice (5) I&S Introduction to the practice of social work including the theoretical concepts and institutional framework that guide practice and the conceptual organization of the discipline. Three weekly lectures and two hours per week in field observation sessions. Lectures supplemented by audiovisual aids and by special guest practitioners. Credit/no credit only. Offered: W.

SOCWF 201 Historical Approach to Social Welfare (3) I&S Duplais, Fredriksen Stresses the origins and development of social welfare policy and programs, starting with the Elizabethan Poor Law (1601) and ending with the Social Security Act of 1935. The issue of poverty and the development of publicly funded income maintenance programs are central concerns. Required of social welfare majors. Open to nonmajors. Offered: AW.

SOCWF 310, 311 Social Welfare Practice (3, 3) Allen, Whittaker Provides a conceptual framework for social work practice with individuals, families, small groups, and communities. An introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; and develops skills in problem assessment, intervention, termination, and evaluation. Prerequisite: social welfare junior. Offered: WSp.

SOCWF 302 Contemporary Approaches to Social Welfare (3) I&S Duplais, Fredriksen Focuses on the role of the social welfare worker in today's society. Emphasis is placed on current social welfare policy and program developments in the social welfare field since 1935. Typical topics include income maintenance proposals, the emergence of programs to treat specific social dysfunctions (mental health services) and the growth of a service-oriented society. Required of social welfare majors. Open to nonmajors. Prerequisite: 300. Offered: WSp.

SOCWF 390 Introduction to Social Welfare Research (3) Introduction to the logic of the scientific method as applied to research in social work and social welfare, to the interrelated steps in the process of conducting a research study, the development of skills in the critical consumption of social welfare research and the relationship of this research to social welfare practice. Required of social welfare majors. Open to nonmajors by permission of instructor. Offered: W.

SOCWF 405 Fieldwork Seminar (2/4, max. 8) Balassone, Gutierrez, Spearman Integrates social work practicum experiences with prior and concurrent course work in social sciences, social work, and research. Includes discussion of class presentations and simulations or practice situations that convey knowledge and skill utilization. Student logs provide a basis for individual goal identification and achievement. Required of social welfare seniors. To be taken concurrently with 415. Prerequisites: social welfare senior, 310 and 311. Offered: AWSp.

SOCWF 409 Readings In Social Welfare 1-5, max. 15 Prerequisite: permission of instructor.

SOCWF 415 Beginning Field Instruction (4-6, max. 12) Balassone, Spearman Emphasis on introduction to the student to the field of adult development. Interdisciplinary perspective stressing the interaction of psychological, social, and physiological factors affecting the aging process. Goals are to help student understand and accept self-aging, and to provide a framework of understanding for working with adult persons. Required of social welfare majors. Offered: Sp.

SOCWF 421 Methods of Child Care and Treatment (3) Whitaker Focused on an introduction to the continuum of child welfare services and presents practical approaches to working with children and adolescents in a wide variety of practice settings. Offered: alternate years; A.

SOCWF 430 Child Care Work Practice (3) Whitaker Specialized practice with emotionally disturbed and delinquent children in group-care settings with focus on providing child-care staff with specific tools for teaching and alternative behavior. Major topics include: etiology and diagnosis, observing and recording children's behavior, special problems of group living, life space interviewing, token economies, activity programing, group interventions, parental involvement, organizational requisites and community linkages. Prerequisite: 310 or permission of instructor. Offered: alternate years; A.

Courses for Graduates Only
Social Work
SOC W 501 Social Policy and Economic Security (3) Dear, Herrick, Weatherly, Study of United States welfare system with emphasis on income maintenance programs. Analytical and descriptive focus on major income maintenance and social insurance programs, their strengths and weaknesses, and their historical, philosophical, and cultural foundations. Examines poverty, income status of families, and homelcssness in context of emergent welfare state and related policies. Offered: A.

SOC W 502, 503 Human Behavior and Social Environment I, II (3, 3) Longes Human functioning in a social context across the life span. Includes human biological, psychological, social, and cultural functioning across the range of social systems in which individuals live, i.e., cultures, communities, institutions, organizations, groups, and families. Credit/no credit only. Offered: A.W.

SOC W 504 Cultural Diversity and Social Justice (3) Bending, Sohng, Spearmon History, culture, and status of disadvantaged and oppressed groups served in the social work profession. Credit/no credit only. Offered: AW.

SOC W 506 Social Work: A Profession for Change (3) Duplais, Gutierrez Introduction to the foundations, approaches, and skills necessary for social work practice with individuals and families, groups, organizations, and communities across the fields of social welfare. Credit/no credit only.

SOC W 510 Practice I: Introduction to Social Work Practice (3) Conte, DeLong, Kopp, Hoffman Foundation knowledge and skills for direct practice with individuals, families, and groups. Course assists students toward mastery in assessment, development of treatment plans based on theory and assessment information, goal setting skills, and selection of appropriate interventions. Offered: ASp.

SOC W 511 Practice II: Intermediate Direct Service Practice (3) Conte, DeLong, Kopp, Sohng, Wrenn Foundation knowledge and skills for direct practice with individuals, families, and groups. Course assists students toward mastery in assessment, development of treatment plans based on theory and assessment information, goal setting skills, and selection of appropriate interventions. Offered: AW.

SOC W 512 Practice III: Managing Agencies for Service Effectiveness (3) Fredriksen, Icard, Knuzich, Luehmann Focuses on exploration of management activities that contribute to service effectiveness for clients and quality of conditions for staff. Various managerial roles, functions, and skills examined. Impact of agency structure, culture, and mission on staff, clients, and organizational outcomes discussed with emphasis on ways social work managers influence change. Offered: W.

SOC W 513 Practice IV: Community Change Practice (3) Herrick, Icard Provides framework of reference and skills for community-based social work practice. Theories of social change are examined with examples drawn from community organizing and policy advocacy. Offered: Sp.

SOC W 515 Foundation Practicum 1-6, max. 12 DeLong, Hanneman, Roberts, Wrenn Agency-based practicum with emphasis on development of knowledge, perspectives, and skills needed for practice with individuals, families, organizations, and communities. Credit/no credit only. Prerequisite: social work major. Offered: AWSp.

SOC W 525 Advanced Practicum 3-10, max. 24 DeLong, Hanneman, Roberts, Wrenn Agency-based advanced practicum. Prerequisite: 515 and foundation courses. Credit/no credit only. Prerequisite: social work major. Offered: AWSp.

SOC W 526 Field Research Methods (3) Seminar for practicum related research projects.

SOC W 531 Child and Family Policy and Services (3) Pecora Examination of social welfare policies and services that address family problems, needs of specific client groups, and tools for evaluating various policies and programs in child and families area. Facilitates understanding of network of institutions that employ social workers. Offered: A.

SOC W 532 Children, Youth, and Family Practice I (3) Kopp, Teather Builds on foundation practice methods sequence to deepen individual, family, and community level assessment and intervention skills
SCHOOL OF SOCIAL WORK/COURSE DESCRIPTIONS 457

relevant for work with children, youth, and families. Offered: A.Sp.

SOC W 533 Children, Youth, and Family Practice II (3) Kopp, Teather Builds on 532 and focuses on the values, knowledge, and skills used in intensive case management and intensive family preservation services. Offered: A.

SOC W 535 Advanced Social Work Research: Children, Youth, and Families Practice (3) Nicoll Principles and procedures for evaluation of direct practice interventions, research methods involved in community-needs assessment, program evaluation, and management-information systems. For Children, Youth, and Families (CYF) concentration. Offered: W.

SOC W 536 Children, Youth, and Family Methods (3) Bending, Cook, Dear, Pecora, Roffman, Teather, Whittaker Focuses on child welfare services through different fields and intervention methods including juvenile justice, social work in the school, services for early intervention, prevention, and family support, child and adolescent mental health services, families of developmentally disabled, and intensive family preservation services. Offered: W.Sp.

SOC W 541 Policy Perspectives on Multi-Ethnic Practice (3) Bending Presentation of social welfare policies and their effects on social services for specific racial-ethnic minority groups. Attention is given to understanding of minority populations and the effective delivery of social work and social welfare services in minority communities. Offered: Sp.

SOC W 542 Introduction to Multi-Ethnic Practice (3) Bending, Long. Examination of selected social welfare problems as related to specific racial-ethnic minority groups. Offered: W.

SOC W 545 Advanced Social Work Research: Participatory Action Research for Multi-Ethnic Practice (3) Sohn Principles and procedures for the evaluation of direct practice interventions, research methods involved in community-needs assessment, program evaluation, and management-information systems. For Multi-Ethnic Practice (MEP) concentration. Offered: W.

SOC W 546 Multi-Ethnic Practice Methods (3, max. 9) Herrick, Leigh, Richardson Focus on specialized knowledge and skills necessary for effective social work with American Indian, African American, Asian American, and Latino or Hispanic individuals, groups, and communities and for work in a variety of settings and fields of practice. Offered: A.W.Sp.

SOC W 562 Leadership in Program Development (3) Krausch Introduces the practice skills and knowledge required for specialized practice in agency management. Offered: Sp.

SOC W 563 Social Work Supervision (3) Ezell, Pecora Presents critical skills for major phases of the personnel process including recruiting, supervising, and supporting employees. Offered: A.

SOC W 564 Financial Management in Human Services (3) Ezell Focus on key budgeting concepts and techniques common to human service agencies including budget development, resource allocation, fiscal control, fiscal record keeping, and cost analysis. Offered: W.

SOC W 565 Advanced Social Work Research: Health and Mental Health Practice (3) Ezell Prerequisite and procedures for the evaluation of direct practice interventions, research methods involved in community-needs assessment, program evaluation, and management-information systems. For Administration (ADM) concentration. Offered: W.

SOC W 566 Health and Mental Health Practice (3) Ezell Introduces the practice skills and knowledge necessary for work at the interface of these systems. Offered: W.

SOCWL 580 Introduction to Advanced Research Method and Design (3) Uehara Introduction to the broad scientific issues and the specific methodological strategies used in formulating and answering research questions within the field of social welfare. Required of all first-year students in the social welfare Ph.D. program. Open to others by permission of instructor. Offered: A.

SOCWL 581 Introduction to Advanced Research Method and Design (3) Uehara Continuation of 580. Required of all first-year students in the Social Welfare Ph.D. program. Open to others by permission of instructor. Offered: W.

SOCWL 582-583 Research Practicum ([1-3]-[1-3]) Development of specific methodological skills in social welfare research through participation in an ongoing research project. Credit/no credit only. Offered: AWSpS, AWSpS.

SOCWL 584 Teaching Practicum (3) Supervised teaching of a required course or teaching as a co-instructor or teaching assistant with a faculty member. Learning contract used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Offered: AWSpS.

SOCWL 587 Fundamentals of Social Work Statistics I (4) Gillmore Descriptive and inferential statistics. Underlying logic of statistical inference. Statistical issues of special relevance in social work, including measurement and research design. Prerequisite: concurrent registration in 580. Offered: A.

SOCWL 589-599 Research Problems and Priorities in Social Work and Social Welfare (3-3) Nurius, Weatherley Seminar assesses the current state of knowledge in selected major areas of social work and social welfare, examines analytic and methodological problems in conducting research in these areas, and identifies research priorities. Emphasis on peer learning centered on the identification of central research problems in the areas of social policy, program evaluation, and intervention with individuals, groups, families, and organizations. Prerequisite: admission to social welfare Ph.D. program or permission of instructor. Offered: A,W.

SOCWL 600 Independent Study or Research (*) Offered: AWSpS.

SOCWL 800 Doctoral Dissertation (*) Offered: AWSpS.
