A university is a community of scholars and artists, a place where faculty and students communicate with each other to enrich human understanding. Universities have played an essential role in societies for hundreds of years, promoting learning and culture, generating new knowledge, and training professionals in specialized calling. The University of Washington is one of the finest universities in the world.

It is also an exciting place to be, with a lively interplay of teaching, research, and public service. Its contributions to the state, the nation, and the world will continue to grow as we face the challenges of the twenty-first century.

Role and Mission of the University

Founded 4 November 1861, the University of Washington is one of the oldest state-supported institutions of higher education on the Pacific coast. The University is comprised of three campuses: the Seattle campus is made up of seventeen schools and colleges whose faculty offer educational opportunities to students ranging from first-year undergraduates through doctoral-level candidates; the Bothell and Tacoma campuses, each developing a distinctive identity and undergoing rapid growth, offer diverse programs to upper-division undergraduates and to graduate students.

The primary mission of the University of Washington is the preservation, advancement, and dissemination of knowledge. The University preserves knowledge through its libraries and collections, its courses, and the scholarship of its faculty. It advances new knowledge through many forms of research, inquiry and discussion; and disseminates it through the classroom and the laboratory, scholarly exchanges, creative practice, international education, and public service. As one of the nation’s outstanding teaching and research institutions, the University is committed to maintaining an environment for objectivity and imaginative inquiry and for the original scholarship and research that ensure the production of new knowledge in the free exchange of facts, theories, and ideas.

To promote their capacity to make humane and informed decisions, the University fosters an environment in which its students can develop mature and independent judgment and an appreciation of the range and diversity of human achievement. The University cultivates in its students both critical thinking and the effective articulation of that thinking.

As an integral part of a large and diverse community, the University seeks broad representation of and encourages sustained participation in that community by its students, its faculty, and its staff. It serves both non-traditional and traditional students. Through its three-campus system and through educational outreach, evening degree, and distance learning, it extends educational opportunities to many who would not otherwise have access to them.

The academic core of the University of Washington is its College of Arts and Sciences; the teaching and research of the University’s many professional schools provide essential complements to these programs in the arts, humanities, social sciences, and natural and mathematical sciences. Programs in law, medicine, forest resources, oceanography and fisheries, library science, and aeronautics are offered exclusively (in accord with state law) by the University of Washington. In addition, the University of Washington has assumed primary responsibility for the health science fields of dentistry and public health, and offers education and training in medicine for a multi-state region of the Pacific Northwest and Alaska. The schools and colleges of architecture and urban planning, business administration, education, engineering, nursing, pharmacy, public affairs, and social work have a long tradition of educating students for service to the region and the nation. These schools and colleges make indispensable contributions to the state and, with the rest of the University, share a long tradition of educating undergraduate and graduate students toward achieving an excellence that well serves the state, the region, and the nation.

Non-Discrimination policy

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran. This policy applies to all programs and facilities including, but not limited to, admissions, educational programs, employment, and patient and hospital services.

Any discriminatory action can be a cause for disciplinary action. Discrimination is prohibited by Presidential Executive Order 11246 as amended; Washington State Gubernatorial Executive Orders 89-01 and 93-07; Titles VI and VII of the Civil Rights Act of 1964; Washington State Law Against Discrimination RCW 49.60; Title IX of the Education Amendments of 1972; State of Washington Gender Equity in Higher Education Act of 1989; Sections 503 and 504 of the Rehabilitation Act of 1973; Americans with Disabilities Act of 1990; Age Discrimination in Employment Act of 1967 as amended; Age Discrimination Act of 1975; Vietnam Era Veterans’ Readjustment Act of 1972 as amended; other federal and state statutes, regulations; and University policy. Coordination of the compliance efforts of the University of Washington with respect to all of these laws and regulations is under the direction of the Assistant Provost for Equal Opportunity, Dr. Helen Remick, University of Washington, Equal Opportunity Office, Box 354560, 4045 Brooklyn Avenue Northeast, Seattle, WA 98195; 206-685-3263/V or 543-6452/TTY.

Additional information concerning the equal opportunity and affirmative action policies and procedures, including complaint procedures, is in the Operations Manual, D46.1, D46.2, D46.3, and D46.4, and the UW Handbook, Vol. IV, p. 44.

Information on reasonable accommodation for students with disabilities is available from the following offices: for classroom and academic-related accommodation, call Disabled Student Services, 206-543-8924/V, 206-543-8925/TTY, or email at uwdss@u.washington.edu; for other non-academic related information and accommodation, call Disability Services Office, 206-543-6450/V, 206-543-6452/TTY, or email at access@u.washington.edu.

Accreditation

The University of Washington is accredited by the Northwest Association of Schools and Colleges and is a member of the Association of American Universities. Individual schools and colleges are members of the various accrediting association in their respective fields. Currently enrolled or prospective students should contact the Office of the Registrar to review accreditation documents for the University and the respective departments to review programmatic accreditation documents.
Please Note:

Due to technical problems, pages 5 through 8 of this edition of the General Catalog are currently not available.
minimum number of total credits required for graduation.

ALTERNATIVE CREDIT OPTIONS
The UW does not award general credit for work or life experience. However, two avenues exist for obtaining credit under selected circumstances.

Once enrolled at the UW, students may explore the possibility of obtaining departmental approval for transfer of credit earned through course work taken at an unaccredited institution.

Students may arrange to challenge specific UW courses via credit by examination if the same knowledge has been gained through independent study outside a formal educational setting.

For information concerning course work taken at an unaccredited institution, contact the Office of Admissions. For credit by examination for independent study completed outside a formal educational setting, contact the Graduation and Academic Records Office at 206.543.1803 or ugradoff@u.washington.edu

TRANSFER CREDIT LIMIT
The University allows a maximum of 90 credits of lower-division transfer course work to be applied toward a UW degree. Of the 180 credits required for graduation from the University (some majors require more than 180), a maximum of 90 lower-division transfer credits are allowed. Once you are enrolled at the UW, if your lower-division credit exceeds 90, there will be a difference between the “total credits earned” and the “total credits allowed” under the Summary of Transfer Credit following the Detail of Transfer Credit. Additionally, a maximum of 135 total transfer credits are allowed toward the 180 credit total. The University-wide residence requirement states that 45 of the last 60 credits must be taken “in residence” while enrolled as a matriculated student. Therefore, a student transferring 135 or more credits must complete a minimum of 45 more credits in residence at the UW.

Despite these restrictions, all of your transferable credit is listed under the Detail of Transfer Credit and may, with your adviser’s approval, be used to satisfy individual requirements for graduation. It may be helpful to think of your transfer credits as a “bank account” of credits from which you may draw. All of your transferable credits remain in the bank, but no more than 90 lower division credits and no more than 135 total transfer credits may be “withdrawn” in order to be applied toward the 180 (or more) credits required for your degree.

EXTENSION CREDIT FROM OTHER SCHOOLS
Extension credit, including correspondence courses, earned at other schools may not exceed 45 credits. Military credit is included in this 45-credit limit.

FOREIGN LANGUAGE COURSES
Students who have completed two or more years of a high-school foreign language receive no college credit for an entry-level course (e.g., FRENCH 101) in the same language when that course is completed after matriculation at the University. Transfer students who complete such a course before matriculation at the UW are eligible to receive transfer credit.

MILITARY CREDIT
Credits earned in Armed Forces Training Schools (AFTS) and through USAFI and DANTES may not exceed 30 credits and are included in the 45-credit limit for extension credit. Official transcripts, DD-214, or DD-295 forms must be submitted, and credit will not be awarded until after the student has enrolled at the University. Scores received in such course work are not included in the transfer GPA. No credit is awarded for Military Occupational Specialty (MOS) programs.

NATIVE LANGUAGE
First-year (elementary) or second-year (intermediate) foreign-language credit is not granted either by examination or by course completion in a student’s native language. “Native language” is defined as the language spoken in the student’s home during the first six years of his or her life and in which he or she received instruction through the seventh grade.

OUT-OF-SEQUENCE COURSES
Credit is not awarded for prerequisite courses in mathematics or foreign languages completed after a more advanced course has been completed. For example, students will not be awarded credit for Spanish 102 if taken after Spanish 103.

OVERLAPPING CONTENT
If a department considers two of its courses to have overlapping content, credit will be awarded for only one. For example, credit is granted for either PHYS 114 or PHYS 121. Other departments in which such overlapping courses occur include Astronomy, Computer Science, Economics, Genetics, Geological Sciences, Linguistics, Psychology, and Statistics. Restrictions of this kind are noted in the Course Catalog.

PHYSICAL EDUCATION
No more than three quarter credits will be allowed for physical-education activity courses.

RESTRICTED TRANSFER CREDIT
Transfer credit will not generally be awarded for vocational or technical courses. However, a maximum of 15 quarter credits will be awarded in transfer for college-level vocational-technical courses when they have been allowed as electives within the 90 credits comprising an academic associate degree from a Washington community college. Courses in this category are those that ordinarily provide specialized training for an occupation (e.g., allied health, bookkeeping, electronics, or physical therapy assistant). When allowed, these credits will apply only toward the elective credit component of a baccalaureate degree at the UW. Such courses are not included in the transfer GPA.

ROTC CREDIT
Credits earned in first- and second-year military training courses may not be counted in the basic 180 credits that are required for graduation. Some third- and fourth-year courses may count, depending on the institution the student attended previously.

SENIOR RESIDENCY REQUIREMENT
To be recommended for a first or subsequent baccalaureate degree, a student must complete 45 of his or her final 60 credits as a matriculated student in residence at the University of Washington campus where the degree is to be earned.
Grading System

Standard Grading System

The UW uses a numerical grading system, with certain exceptions in the schools of Dentistry, Law, and Medicine. Instructors may report grades from 4.0 to 0.7 in 0.1 increments and the grade 0.0. The number 0.0 is assigned for failing work or if a student does not officially withdraw. Grades in the range 0.6 to 0.1 may not be assigned. Grades reported in this range are converted by the Office of the Registrar to 0.0. Numerical grades may be considered equivalent to letter grades as follows:

| Letter Grade | Numerical Grade |
|--------------|-----------------
| A            | 4.0-3.9         |
| A-           | 3.8-3.5         |
| B+           | 3.4-3.2         |
| B            | 3.1-2.9         |
| B-           | 2.8-2.5         |
| C+           | 2.4-2.2         |
| C            | 2.1-1.9         |
| C-           | 1.8-1.5         |
| D+           | 1.4-1.2         |
| D            | 1.1-0.9         |
| D-           | 0.8-0.7         |
| E            | 0.0             |

The lowest passing grade is 0.8. Lowest passing grade. No credit earned.

Additional information on grades and scholarship rules may be obtained from the Graduation and Academic Records Office, 264 Schmitz.

The following letter grades also may be used:

N Indicates that the student is making satisfactory progress and a final grade will be given at the end of the quarter the work is completed. Used only for thesis, research, and hyphenated courses (courses not completed in one quarter) and courses numbered 600, 601, 700, 750, and 800. An “N” grade carries with it no credit or grade until a regular grade is assigned.

I Incomplete. An Incomplete is given only when the student has been in attendance and has done satisfactory work until within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student’s control. A written statement of the reason for the giving of the Incomplete, listing the work which the student will need to do to remove it, must be filed by the instructor with the head of the department or the dean of the college in which the course is given.

To obtain credit for the course, an undergraduate student must convert an Incomplete into a passing grade no later than the last day of the next quarter. For Spring Quarter, the following quarter is considered to be Fall Quarter. The student should never reregister for a course in which the Incomplete was given. All other provisions and deadlines of subsections a. through d. shall also apply.

In no case can an Incomplete received by an undergraduate be converted to a passing grade after a lapse of one year.

In no case shall an Incomplete on the record at the time a degree is granted be subsequently changed to any other grade.

An Incomplete grade does not count for registered hours nor in computation of grade-point averages.

For DL-suffix courses that do not follow the quarter schedule, an Incomplete shall be given only when the student has done satisfactory work to within two weeks of the maximum term for completion of the course, as specified at the time of registration. In order to obtain credit for the course, a student must convert an Incomplete into a passing grade by the end of the quarter following the one in which the Incomplete was given. All other provisions and deadlines of subsections a. through d. shall also apply.

S Satisfactory grade for courses taken on a satisfactory/not-satisfactory basis. An S grade is automatically converted from a numerical grade of 2.0 or above for undergraduates. The grade S may not be assigned directly by the instructor, but is a grade conversion by the Office of the Registrar. Courses so graded can only be used as free electives and cannot be used to satisfy a University, college, or department course requirement. S is not computed in GPA calculations.

NS Not-satisfactory grade for courses taken on a satisfactory/not-satisfactory basis. A grade less than 2.0 for undergraduates is converted to NS. NS is not included in GPA calculations. No credit is awarded for courses in which an NS grade is received.

CR Credit awarded in a course offered on a credit/no-credit basis only or in courses numbered 600, 601, 700, 750, and 800. The minimum performance level required for a CR grade is determined, and the grade is awarded directly, by the instructor. CR is not computed in GPA calculations.

NC Credit not awarded in a course offered on a credit/no-credit basis only or in courses numbered 600, 601, 700, 750, and 800. The grade is awarded directly by the instructor and is not included in GPA calculations.

W Official withdrawal or drop from a course after the fourteenth calendar day of the quarter through the seventh week, to be followed by a number representing the week in which the course was dropped. An official withdrawal is not computed in GPA calculations. Students who do not officially drop a course(s) will receive a grade of 0.0. For DL-suffix courses that do not follow the quarter schedule, the grade W shall be assigned to any course dropped after the fourteenth calendar day after the start of the course and more than two weeks before the end of the maximum term for completion of the course, as specified at the time of registration. The date of withdrawal shall be noted on the transcript.

HW Grade assigned when a student is allowed a hardship withdrawal from a course after the fourteenth calendar day of the quarter. HW grades are not computed in GPA calculations.

Nontraditional Grading Options

Credit/No Credit–Only as a Course Option

With appropriate departmental review and approval, a course may be offered on a credit/no credit-only basis. The standard for granting credit in credit/no credit-only courses under this option is the demonstration of competence in the material of the course to the instructor’s satisfaction.

Satisfactory/Not-Satisfactory Grading Option

You may elect to take certain courses on a satisfactory/not satisfactory (S/NS) basis.
Computation of GPA

The GPA for graduation is computed by dividing the total cumulative grade points by the total graded credits attempted for courses taken in residence at the University. Grade points are calculated by multiplying the number of credits by the numeric value of the grade for each course. The sum of the grade points is then divided by the total graded credits attempted. Courses elected on an S/NS basis are counted as follows: Satisfactory grades (2.0 or greater) are included in the grade-point average, and grades of 2.7 or above are recorded as NS. The grades for credit by examination. These latter grades do not affect the University cumulative GPA.

GPA = 19.6 ÷ 13 = 1.51

Change of Grade

Except in case of error, no instructor may change a grade that he or she has turned in to the Registrar. Grades cannot be changed after a degree has been granted.

Grade Appeal Procedure

A student who believes he or she has been improperly graded must first discuss the matter with the instructor. If the student is not satisfied with the instructor’s explanation, the student, no later than ten days after his or her discussion with the instructor, may submit a written appeal to the chair of the department, or in a nondepartmental college, to the dean, with a copy of the appeal also sent to the instructor. Within ten calendar days, the chair or dean consults with the instructor to ensure that the evaluation of the student’s performance has not been arbitrary or capricious. Should the chair believe the instructor’s conduct to be arbitrary or capricious and the instructor declines to revise the grade, the chair (or the dean in a nondepartmental school or college), with the approval of the voting members of his or her faculty, shall appoint an appropriate member, or members, of the faculty of that department to evaluate the performance of the student and assign a grade. The dean and Provost should be informed of this action.
Once a student submits a written appeal, this document and all subsequent actions on this appeal are recorded in written form for deposit in a department or college file.

**Grade Reports**

Grades are not mailed. You may display and print a grade report through MyUW.

**Student Life and Student Services**

**Office of the Vice President for Student Affairs**

The Division of Student Affairs assists the University in fulfilling its academic mission by providing a broad range of services and programs designed to further the educational and personal development of students. The Division consists of ten units: Admissions and Records, Center for Career Services, Student Counseling Center, Disabled Student Services, Housing and Food Services, Recreational Sports Programs, Student Financial Aid, Student Publications, and Student Activities and Union Facilities.

Students are encouraged to contact the Office of the Vice President for Student Affairs, (206) 543-4972, 476 Schmitz, for information concerning various aspects of extra-class life at the University.

**Center for Career Services**

The University’s Center for Career Services, which includes a Minority Job Placement Program, offers career information and services to assist undergraduates, graduate students, and alumni (1) to make a viable connection between their academic backgrounds and their career or long-range employment objectives, (2) to develop effective job-seeking strategies, and (3) to find suitable employment upon leaving the University or to change employment thereafter.

A variety of programs are offered and include individual and group career counseling, career options and job-search seminars, employer and alumni career panels, mock interviews a résumé database, career-related internships and career fairs, credential files, online job listings, campus interviews, employee information, and student employment listings (including on-campus jobs). Students may also send questions to cccsrflr@u.washington.edu.

Students are encouraged to begin using the services of the Center early in their academic careers. This is best accomplished by visiting the Center at 134 Mary Gates Hall or calling (206) 543-0535 to make an appointment with a career counselor. The Center also maintains a Web site at depts.washington.edu/careers/.

**Childcare Program**

The Childcare Program provides eligible student-parents with direct financial assistance to purchase services at licensed childcare facilities in the Seattle-King County area. To apply, students must submit the Free Application for Federal Student Aid (FAFSA) to the designated processor by the end of February each year and a Childcare Request Application to the Childcare Office, 482 Schmitz, before the end of May each year. Brochures describing the program are available at the Childcare Office, (206) 543-1041.

**Student Counseling Center**

All currently enrolled, matriculated students at the University may make use of the services of the Student Counseling Center and its staff of psychologists and counselors to discuss educational progress, personal concerns, or career goals. Individual, couples, and group counseling is provided for a variety of issues including academic, career, personal, and social issues. Because of the number of students seeking help, the Center offers only short-term therapy. Psycho-logical tests, when necessary, are provided as part of the Center’s counseling service. Workshops on special topics such as test anxiety, time management, test taking, note taking, and stress management are available.

There is a $15 fee for the first assessment appointment, which is provided to determine if the Student Counseling Center’s services are appropriate. Individual appointments after the first visit currently cost $30 each. For students financially unable to pay the fee, an extended-payment plan is offered. The Center is located on the fourth floor of Schmitz Hall, (206) 543-1240. Additional information may be found at the Center’s Web site.

**Disabled Student Services**

The University is committed to ensuring facility and program access to students with either permanent or temporary physical, sensory, or psychological disabilities through a variety of services and equipment. The Disabled Student Services (DSS) Office coordinates academic accommodations for enrolled students with documented disabilities. Accommodations are determined on a case-by-case basis and may include classroom relocation, sign language interpreters, recorded course materials, note taking, and priority registration. DSS also provides needs assessment, mediation, referrals, and advocacy as necessary and appropriate. Requests for accommodations or services must be arranged in advance and require documentation of the disability, verifying the need for such accommodation or service.

Technical and adaptive equipment is available through both DSS and Computing and Communications. Information about adaptive-technology computer software and equipment and their locations on campus may be obtained from DSS. Publications include Access Guide for Persons with Disabilities, (showing classroom access, elevator locations, ramps, parking, and restrooms), and the Campus Mobility Route Map, as well as other publications.

To the maximum extent possible, students with disabilities are integrated into the general student population and their problems are solved through the usual channels. Various other departments offer additional services: the Transportation Department provides free on-campus transportation with wheelchair lifts for students with mobility limitations through Dial-a-Ride, (206) 685-1511, and UW Night Ride, (206) 799-4151 after 6 p.m.

Additional information is available from Disabled Student Services, 448 Schmitz, Box 355839, (206) 543-8924 (Voice), (206) 543-8925 (TTY), uwdss@u.washington.edu.

**Freshman Convocation**

Freshman Convocation is an academic ceremony involving the President of the University, other administrators, student leaders, and members of the Board of Regents and the faculty, to welcome and honor new freshmen and their families. It is held annually on the Sunday preceding the first day of autumn quarter. The President presides over the ceremony, which features remarks by a distinguished member of the faculty. Neither tickets nor reservations are required for the Convocation. Formal invitations are mailed in mid-August. A no-host brunch, which requires tickets, is held in the Student Union Building (HUB) and precedes the Convocation.

**Student Health Insurance Program**

An accident and sickness insurance plan is available to matriculated University students (Seattle campus) and dependents on a voluntary basis. A student may enroll in the plan at the time of registration through the seventh calendar day of each quarter. The appropriate premium is paid by the quarterly tuition due date. Brochures describing the insurance eligibility, coverage, and costs are available at the Student Insurance Office, 469 Schmitz, (206) 543-6202; Hall Health Primary Care Center; and the HUB.
The University also sponsors a field-trip accident insurance plan. Application forms may be requested from the Risk Management Office, 22 Gerberding, Box 351276, (206) 543-3419.

Insurance for Foreign Students
All students from foreign countries are required to have a health-and-accident insurance policy in force while registered at the University. This may be achieved by purchasing either the student accident and sickness insurance offered through the University or other coverage, proof of which must be furnished to the International Services Office and for which an insurance waiver must be obtained. To avoid cancellation of registration, international students must pay tuition and either pay for the University-sponsored insurance or have a waiver on file by the tuition due date.

International Services Office
The International Services Office provides assistance to international students, scholars, and faculty in meeting United States Immigration and Naturalization Service regulations dealing with such matters as maintaining lawful status, extensions of stay, transfers of schools/programs, and working authorizations. The Office also provides a formal orientation to the campus and community for new international students and visiting faculty; advice and counsel for educational, financial, and personal problems; and dissemination of important and timely information through newsletters and workshops. The Office is located in 459 Schmitz, (206) 543-0841.

Office of Student Financial Aid
The Office of Student Financial Aid, 105 Schmitz, administers federal, state, and private financial aid programs designed to help students pay for their education. Assistance is offered in the form of grant aid, scholarships, long-term loans that must be repaid after leaving school, and work opportunities. Information describing the different programs, eligibility criteria, and application procedures may be viewed at www.washington.edu/students/osfa or may be obtained by calling (206) 685-9535.

To be eligible for financial aid, an individual must be a citizen or permanent resident of the United States and be admitted to the University as a matriculated, degree-seeking student. Priority consideration is given to students who apply before the University’s financial aid application deadline of February 28 (e.g., February 28, 2002, for the academic year beginning in September 2002).

The Office of Student Financial Aid also administers a short-term loan program for full-time students who find themselves in temporary financial difficulty. University students may take advantage of the short-term loan program without applying for financial aid.

Student Legal Services
Student Legal Services (SLS) provides legal advice, counseling, negotiating, and court representation in many civil and criminal matters. All currently enrolled undergraduate and graduate students at UW Seattle are eligible for a free initial consultation. If additional services are needed, there is an hourly charge of $15, plus a $10 office supply fee. Students are responsible for court costs, if any. The office is staffed by third-year law students supervised by licensed attorneys. To make an appointment or learn more about SLS, call (206) 543-6486 or visit the office, 31 Brooklyn Building, Box 354563, 4045 Brooklyn Avenue NE. No legal advice is given over the phone.

Student Publications
Student publications at the University include The Daily and the Student Directory. The Daily is published Monday-Friday throughout the academic year and is distributed in the mornings on campus without charge. During summer quarter, The Daily is published once a week. Any student with an interest in journalism may serve on The Daily staff.

Student Union Facilities
The Husky Union Building (Student Union Building) and the South Campus Center are the principal centers of student activities and programs on the campus.

Husky Union Building
The Husky Union Building (HUB), located in the center of campus, houses a variety of facilities and services for students, and faculty and staff members. These include lounges, a 478-seat auditorium, a multipurpose ballroom, a barber and hair-styling shop, a branch of the University Book Store, several retail food operations, a study/music lounge with email access, a lost-and-found office, a ticket sales office, a newsstand, a self-service post office, a limited-service bank, three cash machines, a number of student-organization offices, and a games area which includes a twelve-lane bowling center. Meeting rooms accommodating from 10 to 175 persons are available for registered student organizations.

South Campus Center
The South Campus Center, located on the shore of Portage Bay, serves as the central meeting place for students and faculty on the southern end of campus. Facilities and services similar to those in the HUB are available and include meeting and conference rooms, display cases, a hair-styling shop, amusement games, a cash machine, a branch of the University Book Store, a newsstand, and lounges with beautiful views of Portage Bay.

Student Activities and Organizations
Student Activities Office
The services provided by the Student Activities Office (SAO) include assisting student organizations in understanding University policies and procedures, providing technical help in the planning and conduct of student events, and furnishing information and assistance in order that they may represent themselves and their interests in an effective manner. Advisers are available to assist students involved in group activities with budget and program planning, advertising, orientation to campus resources, and leadership and organizational skill development. Underlying the SAO service functions is a desire to provide an environment in which students can learn from their experiences in extracurricular activities as a supplement to their classroom experiences. Additional information about the services is available from the Student Activities Office, 207 HUB, (206) 543-2380.

Student Organizations
Students at the University are encouraged to become active in at least one of the campus’s approximately 450 voluntary student organizations, which include honorary, professional, and social organizations; service clubs; activity groups; and religious and fraternal organizations. Voluntary student organizations that register with the University receive various benefits and services to assist their respective activities. Additional information is available from the Student Activities Office, 207 HUB, (206) 543-2380.
Associated Students of the University of Washington

The Associated Students of the University of Washington (ASUW) is a voluntary, nonprofit association of students designated by the University Board of Regents to carry out a variety of student activities and to represent student interests. In order to vote in ASUW elections, hold ASUW office, or be employed by the ASUW, a student must be a member of the ASUW. Membership is open to all students by providing an affirmative answer on the University registration form each quarter.

The ASUW has an annual budget of approximately $1 million, supported by the services and activities fee paid as part of tuition and from program revenue. The government of the ASUW is headed by an eleven-member board of directors elected by the student body each year, and one representative from the Graduate and Professional Student Senate. The ASUW maintains agencies and service groups to provide students with a varied program of activities during the school year and nominates students for service on a number of University committees. ASUW services include the Experimental College, a bicycle repair shop, and an ongoing film and entertainment series. Questions regarding the ASUW and its services should be directed to the ASUW Office, 204L HUB, (206) 543-1780, or the Student Activities Office, 207 HUB, (206) 543-2380.

Recreational Sports

The Department of Recreational Sports Programs provides a comprehensive program of more than seventy sports and fitness activities designed to meet the diverse needs and interests of students. To provide this service, the department manages recreation facilities that include the Intramural Activities Building (IMA), Golf Driving Range, Waterfront Activities Center (canoe rentals), outdoor facilities (Denny Field and tennis courts), Hutchinson Hall swimming pool and locker rooms, and the practice Climbing Rock. Programs and facilities are open to students with a valid student identification card (Husky card).

For additional information call the telephone numbers listed below, or visit the Recreational Sports Web site at depts.washington.edu/ima/.

Intramural Activities Building: The IMA is located north of Husky Stadium and south of parking lot E1. The IMA includes activity space for basketball, volleyball, badminton, swimming, squash, racquetball, handball, martial arts, aerobics, archery, and roller skating. The IMA has a fitness center with free weights, weight machines, and cardiovascular machines. Located near the IMA are 13 tennis courts (seven are night lit), and three multipurpose sports fields for flag football, softball, soccer, rugby, lacrosse, ultimate, and other outdoor activities. For more information, contact the IMA at (206) 543-4590 or ima@u.washington.edu.

The fitness center is equipped with 18 climbers, 24 treadmills, 12 recumbent cycles, 12 stationary cycles, 21 cross trainers, six ergometers, 62 single-station weight machines, 40 strength benches, a step mill, and Olympic weights, including barbells and dumbbells.

Sports Skills Instruction: Recreational Sports offers non-credit classes in Aikido, aerobics, step aerobics, hydro-aerobics, deep-water fitness, Abs, body composition, conditioning, first aid and CPR, golf, judo, karate, kung fu, racquetball, rock climbing, rowing, scuba diving, ski conditioning, snow skiing/snowboarding (indoor), squash, swim conditioning, swimming, tae kwon do, tai chi, tennis, weight training, and yoga. For more information, call Sports Skills Instruction at (206) 543-2571.

Club Sports: Recreational Sports offers club sports, including Aikido, archery, climbing, cycling, equestrian, fencing, ice hockey, judo, karate, kayaking, kendo, kung fu, lacrosse (men’s and women’s), rowing, rugby, sailing, scuba diving, snow skiing, soccer, tae kwon do, ultimate Frisbee (men’s and women’s), volleyball (men’s and women’s), and water polo (men’s and women’s). For more information, contact Club Sports at (206) 543-9499.

Intramural Sports are offered for men, women, and men and women combined in a variety of activities, including basketball, bowling, crew, flag football, inner-tube basketball, soccer, softball, swimming, tennis, track and field, ultimate Frisbee, and volleyball, as well as special events. For more information, call Intramural Sports at (206) 543-8558.

The Golf Driving Range is located at the foot of the 45th Street viaduct and is the center for all golf activities on campus. The facilities include 43 hitting tees, and practice putting and chipping greens, and are open seven days a week. Group lessons are available for beginning players. For more information, contact the Golf Driving Range at (206) 543-8759 or seagren@u.washington.edu.

Waterfront Activities Center (WAC): The campus center for water sports (e.g., canoe rentals, sailing, kayaking, rowing) is located at the WAC southeast of Husky Stadium. The WAC offers locker rooms with saunas, private boat storage for non-motorized craft, and group rental of the lounge and meeting rooms. The facility is open from 10 a.m. to dusk, seven days a week. For more information, contact the WAC at (206) 543-9433 or h2o@u.washington.edu.

Student Rights and Responsibilities

Student Conduct Code

The University Board of Regents has adopted a Student Conduct Code, which applies to both the academic and nonacademic conduct of students while they are attending the University. The Code specifies standards of conduct, jurisdiction for hearing disciplinary matters, and due-process procedures. Students may obtain copies of the code through either their advisers or the Office of the Vice President for Student Affairs, 476 Schmitz.

Computer Use Policy

All faculty, staff, and students who use any computer at the University are responsible for using computer resources in an ethical and legal manner. For example, it is not appropriate to share computer accounts or use them for commercial purposes, to send unwanted email, or to distribute copyrighted software, music, or images. Those who do not follow the rules could lose their UW computing privileges. For detailed information see the Web, or contact Computing and Communications Information at (206) 543-5970.

University Policy on Student Education Records

A copy of the University’s policy on a student’s right to inspect his or her education records and the University’s responsibility to maintain the confidentiality of such records is located at each departmental reference station. The policy is filed under the Washington Administrative Code 478-140-010. Copies of the policy are available at the Registration Office, 225 Schmitz.

Sexual Harassment Complaint Procedure

Students, staff, faculty, and other users of University services who have a concern or complaint regarding sexual harassment may contact either the Ombudsman for Sexual Harassment, (206) 543-0283, or the University Complaint Investigation and Resolution Office, (206) 616-2028. Personnel in these offices provide assistance in resolving concerns and complaints. Also, University staff may contact their human resources representative about sexual
harassment concerns.

Office of Minority Affairs

Fostering diversity is the ongoing work of the entire University, but it is a special responsibility of the Office of Minority Affairs (OMA). To this end, OMA provides a variety of services to undergraduates from underrepresented and economically and educationally disadvantaged backgrounds. These services include a statewide Recruitment and Outreach Office whose staff provides assistance with the admissions and financial aid process in high schools and community colleges throughout Washington state. Through its Counseling Center, OMA offers academic advising, financial aid advocacy, housing assistance, and other services related to life on campus. OMA’s services are available mainly to students who, following admission, are invited to become members of the Educational Opportunity Program (EOP). Participation in EOP is limited to students who are U.S. citizens or permanent residents, with priority given to Washington state residents. OMA’s other services, described below, are open to EOP participants and other students as resources permit.

OMA’s Instructional Center (IC) offers wide-ranging academic assistance to students in the Educational Opportunity Program and to others as staffing, time, and space permit. The IC maintains drop-in centers for mathematics, writing, reading and study skills, physics, engineering, chemistry, biology, the natural sciences, and foreign languages. Students are assisted in a variety of settings, such as group instructional workshops, review sessions, adjunct courses, credit and non-credit classes, and one-on-one tutorials.

Student Support Services (SSS) is a counseling and instructional-assistance program for selected UW undergraduates who meet the program’s economic and educational eligibility requirements. SSS helps students adjust to campus, as well as encourages and assists them in discovering and taking advantage of the UW’s many academic and personal opportunities. SSS also provides tutorial and academic-support workshops to help students move successfully to upper-division courses or into the Early Identification Program’s graduate-school preparation services.

The Early Identification Program (EIP) is a graduate- and professional-school preparation program for qualified students interested in earning advanced degrees. The McNair Achievement Program is a federally funded scholarship program designed to encourage and prepare low-income and first-generation college students and underrepresented students in graduate education, for the Ph.D. degree. Through their advising and academic-enrichment services, EIP and McNair encourage students to aim for doctoral degrees and faculty careers. These services include an introduction to the research process, research opportunities in collaboration with faculty mentors, scholarships and internships, access to special seminars and workshops, as well as advice and assistance with the graduate school admissions and financial aid process.

The Ethnic Cultural Center (ECC) is a facility for student-organized events and activities. Twenty-two of the University’s student organizations use the ECC as their center of activity. The staff of the Center offers students opportunities for the development of organization and leadership skills through the planning and implementation of cultural, social, and student-government programs. The Ethnic Cultural Center complex also maintains an outstanding theatre which provides opportunities for students interested in participating in or creating on-stage productions and other events.

Outreach to Middle and High Schools. The Office of Minority Affairs collaborates widely with other UW pre-college partnership programs to strengthen the University’s diversity “pipeline” from the K-12 schools. OMA itself maintains several middle- and high-school outreach programs whose aim is to increase the number of students who are taking college-prep classes by the ninth grade, improve the academic performance and the college-going rates of underrepresented and disadvantaged students. These services offer UW students a variety of volunteer, UW-credit, or paid opportunities. **Upward Bound** provides strong academic and other college-readiness services for selected Seattle high school students from Seattle’s Nathan Hale, Cleveland, and Franklin High Schools who are from low-income or first-generation college families. The Office of Minority Affairs is a partner with middle schools and community organizations in the Yakima Valley and Seattle in the management of college-readiness **Gear Up** programs. The **Early Scholars Outreach Program** helps students begin preparation for college while they are still in middle school. **Educational Talent Search** offers counseling and encouragement to middle- and high-school students in targeted western and eastern Washington schools. It focuses particularly on the transition from high school to postsecondary education. OMA, working with UW students and several Seattle high schools, provides inner-city students with tutoring, mentoring, and classroom assistance through the **OMA High School Tutor/Mentor Program**. OMA in partnership with the Seattle School District offers a **Middle College High School Program** experience on campus to a selected group of non-traditional high school students.

The office of the Vice President for Minority Affairs and many of OMA’s services are located on the third floor of Schmitz Hall. For information about OMA’s program locations and services, call (206) 685-0774.

Registration Policies

**Full-time Requirements**

You should register for 12 or more credits to be considered full-time if you are an undergraduate or professional student. If you are a graduate student, you should register for 10 or more credits. It is important to note that differing criteria and standards for full-time enrollment exist for eligibility in certain programs. Consult the Financial Aid Office for its requirements on satisfactory student progress. The tuition schedule does not reflect full-time credit requirements for loan deferments, teaching assistantships or other programs.

**Class Attendance**

If you do not attend regularly scheduled class meetings during the first week of the quarter, you are subject to being dropped at the discretion of the teaching department to allow enrollment space for other students. Affected courses should be identified in the Time Schedule and/or posted in departmental offices. Do not assume that departments will automatically drop you from the course if you do not attend. If you are not going to go to class, you should drop the course through the registration system. Students who are registered for a course section but do not attend will be assigned a failing grade by the instructor. You may not attend a University course in which you have not been officially registered after the first two weeks of the quarter.

An instructor may allow you to attend his or her class only if your name appears on the official class list from Office of the Registrar. A faculty member may attend informally with the approval of the instructor.

**Satisfactory Progress**

If you are pursuing a baccalaureate degree, you are expected to make satisfactory progress toward the attainment of that degree and are expected to enter a major and graduate after completion of a reasonable number of credits.
The 105-credit rule
Undergraduates must declare a major by the time they have earned 105 credits or a hold will be placed on their registration until they either declare a major, or meet with an adviser and receive a pre-major extension. The hold is placed on the student record when 105 or more credits have been completed. Transfer students who are admitted to the University with 105 or more credits are expected to declare a major before their second quarter at the UW, or obtain an extension from an adviser.

You will be granted a pre-major extension if your adviser decides that you are pursuing a reasonable goal, and have a good chance of gaining admission to your intended major. The extension will be granted for the number of quarters it should take you to complete the admission requirements of your major.

If your adviser feels that your choice of major is unrealistic, he or she will deny your request for an extension. You will not be allowed to register for subsequent quarters until you can present a reasonable degree plan. Since the intent of the rule is not to drop you from the University but to encourage you to meet with an adviser and plan for an attainable goal, if you need time to consider your options you will usually be given one or two quarters to do so, and then may be allowed additional time if necessary to meet the admission requirements of your new major.

You will receive a warning letter from the University as you approach 105 credits, if you have not yet declared a major. If you complete 105 credits and are still a pre-major, the registration system will not let you register for the next quarter. To avoid registration delays, meet with the appropriate adviser at least one quarter before you complete 105 credits.

The 210-credit rule
The University’s satisfactory progress policy requires students to complete their undergraduate degree programs within 30 credits beyond the minimum required for the degree. Because most degrees require 180 credits, students generally must complete their programs by the time they earn 210 credits. Undergraduates who have completed over 210 credits will be notified by email the third week of the quarter that a hold is being placed on their registration due to lack of satisfactory progress. Students ineligible to graduate will be permitted to register for succeeding quarters only if they receive approval from their department and college after filing a graduation plan. Approval to enroll beyond 210 credits may not extend beyond two additional quarters.

Students receiving satisfactory progress registration holds should immediately contact their departmental academic adviser to file a graduation application or to initiate a satisfactory progress appeal. Postbaccalaureate students
Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree, or working toward a certificate. If you are admitted as "postbaccalaureate undeclared," you must declare a major by the time you have earned 30 credits beyond your last degree. Once a degree objective has been declared, you must make progress toward that degree as evidenced by courses satisfactorily completed. College advisers may grant extensions beyond the 30-credit limit.

Excessive course repeats and/or drops
The Committee on Admissions and Academic Standards may terminate your enrollment if you have demonstrated lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. You may be reinstated with the approval of your college and the Committee. EOP students may be reinstated in consultation with the Office of Minority Affairs.

Residence Halls
Students like the convenience of living in the residence halls (being close to classes and having access to a variety of dining options), but that's just the beginning. Those who live on campus are part of a community that offers opportunities for fun, friendships, personal development and academic success.

Who lives in the residence halls? People just like you live here. But perhaps best of all are the people who live here who have ideas, attitudes and experiences different from yours.

Special Interest Houses
The UW residence halls offer several special interest houses-designated floors in certain halls where residents with common interests live. Residents are encouraged to plan and participate in activities for these houses. If you'd like to live in one of the special interest houses, indicate your preference on your housing application.

Special Interest Houses:
Outdoor House
Outdoor House offers residents the opportunity to plan, participate in and learn outdoor activities such as hiking, biking, skiing, snowshoeing, camping and canoeing. Residents of Outdoor House also share an interest in environmental issues.

International House
International House provides a rewarding environment for those who seek opportunities to share cultural experiences with American and international students, in daily life and through participation in a variety of social and cultural activities.

SAFE House
(Substance and Alcohol Free Environment)
SAFE House offers residents the opportunity to live in a residential community where alcohol and tobacco products are not permitted by its members (regardless of a student's age). The community also features programming and activities that are specific to promoting a substance-free lifestyle. Residents work with Resident Advisers and Resident Directors to create a community that exemplifies an awareness of substance and alcohol abuse issues.

In the other residence hall communities, alcohol use is limited to those of legal age (21) and then only within the confines of a resident's room. The use of illegal substances is strictly prohibited in all residence halls. All halls are 100 percent smoke-free.

Residential FIG
(Freshman Interest Group)
Residential FIG is a specialized program for freshmen which combines academics and life outside class. Students enrolled in a Residential FIG take classes together autumn quarter and live together in the same residence hall for the academic year. New freshmen who have received confirmation for a space in the residence halls are eligible to register. If you are interested in a Residential FIG, visit the FIG website or contact the First Year Programs Office at 206-543-4905.

First Year Experience
First Year Experience offers an environment specifically designed to provide opportunities to assist first-year students in their adjustment to college, often through educational and social programs and floor activities.
Honors House

Honors House is an option for University of Washington Honors Program students who wish to expand their intellectual lives beyond the classroom. Students who choose Honors House have the best of both worlds: close contact with other Honors students and the diversity of the residence halls.

Safety and Security

The University of Washington is a relatively safe place; however, it can be subject to the same problems as the surrounding urban community. The following information describes programs and policies established to protect your safety and well-being.

Residence Hall Patrol

Plainclothes University Police patrol the halls each night from 7 p.m. to 5 a.m. Officers are fully commissioned and have the same authority as other law enforcement officers. RDs and RAs are on duty to handle security issues from 5 p.m. to 8 a.m. and RDs are on duty 24 hours a day on weekends and holidays.

Locked Halls

Residence halls are locked 24 hours a day, except those with food service operations, which remain open from 7 a.m. until 7 p.m. The residence hall desks are staffed from 8 a.m. to 7 p.m. Monday - Friday, 8 a.m. - 5 p.m. on Saturday and 10 a.m. to 5 p.m. on Sunday.

Fire Safety

The fire alarms for all residence halls comply with City of Seattle high-rise fire codes. The systems consist of area-sensitive and building heat and smoke detectors. Each student room contains a smoke/heat detector. Sprinkler systems exist in Terry, Lander, McCarty, McMahon, Haggett and Hansee Halls. Sprinkler systems will be added to Mercer Hall by autumn 2004. All heating and ventilating fans within a facility are interlocked with the fire alarm system for that facility. The system is hardwired directly into the University Police Department, which notifies the City of Seattle Fire Department if problems arise. The University of Washington's Environmental Health and Safety (EHS) department conducts a comprehensive annual inspection of all physical fire safety attributes. In addition, HFS is subject to random inspection by the City of Seattle Fire Department, and semiannual fire drills are conducted in every hall.

Other Safety Measures

- All residence hall rooms have peepholes.
- Women's restrooms are locked.
- Residence hall keys are high-security keys; duplicate keys can only be made using factory equipment.
- Throughout the year residents receive information about safety issues, and Resident Advisers offer programs on personal safety, property protection, emergency procedures and related topics.

Frequently Asked Questions

How do I apply for the residence halls?
The housing application is available online.

Can I apply for housing even if I haven't decided if I will attend the UW?
You are encouraged to apply for housing even if you have not yet decided to attend the University of Washington, because your assignment will be based on the date we receive your Residence Hall Application, signed contract, and deposit. See the Residence Hall System Contract for specific details.

If you apply for a space in the residence halls and then decide not to attend the University, you will receive a full refund of your deposit if you cancel your application by the appropriate deadline. You are subject to a cancellation fee if you cancel your housing application but still attend the University. See the Residence Hall System Contract for details.

Is housing guaranteed?
We anticipate having enough space for all students who apply for autumn 2005, but cannot guarantee preference.

Who has priority for residence hall space?
The priority system for autumn 2005 is:
1. Students who live in the residence halls as of April 1, 2005, and who complete the housing application by April 15, 2005, based on quarters-in-residence.
2. New undergraduate students who apply by September 1, 2005, in order of application date.
3. Continuing undergraduate students, including returning residents and new undergraduates who apply after their respective deadlines, in order of application date.
4. Graduate and professional students, followed by non-matriculated students, in order of application date and on a space-available basis.

*If a Priority 2 waiting list is established, preference may be given to students who live outside commuting distance.

Is there a deadline to apply for housing?
Current residents have until April 15 to apply as a Priority 1. If they miss this deadline, they may still apply as a priority 3. New students may apply at any time.

To what type of room will I most likely be assigned?
New residents will typically be assigned to double or triple rooms, depending on the date their applications are received. A limited number of single rooms may be available to new residents.

Can I get a single room?
Most single rooms are currently filled by returning residents. However, a limited number of single rooms may be available to new residents.

Is my $300 deposit refundable?
The one-time $300 deposit is refundable when you permanently move out of the residence halls, and after deductions have been made for any room and board payments due, damage or loss to the room (or cluster in McMahon), and necessary cleaning charges.

What if I decide to cancel my housing application?
If you need to cancel your housing application you may do so in one of three ways:
1. Online via the housing application, https://ucharm.hfs.washington.edu/ucharm, or
2. Email hfsinfo@u.washington.edu from your UW email account, or
3. In writing: University of Washington HFS Student Services Office 301 Schmitz Hall Box 355842 Seattle, WA 98195-5842

Please be sure to include your full name and student number in your correspondence.

If you will be attending the University of Washington but no longer need UW housing, you are subject to the cancellation fee schedule in the Residence Hall System Contract.
If you will not be attending the University of Washington and you cancel in writing or email before September 19, 2005, your deposit will be refunded and you will not be charged a cancellation fee.

What should I bring?
- Your residence hall room will be supplied with:
  - one satellite TV connection
  - one telephone jack
  - blinds or draperies
  - beds
  - desks
  - bookcases
  - chairs
  - dressers
  - closets
  - wastebaskets
  - Ethernet connection

You should bring:
- Bedsheets
- pillows and pillowcases
- blankets/comforter
- towels
- touch-tone telephone (one per room)
- alarm clock

What appliances can I bring?
- The following appliances are allowed:
  - Refrigerators under 4.1 cubic feet.
  - Blenders and mixers.
  - Hot air popcorn poppers.
  - Hot pots and coffee pots, which must be placed on non-combustible surfaces such as ceramic tile.
  - One microwave oven per room - 700-watt maximum, and no other appliance may be used at the same time.

The following appliances are prohibited:
- Halogen torchieres.
- Space heaters.
- All open-flame appliances (e.g. fondue pots).
- Open-coil appliances (e.g. toasters and toaster ovens).
- Full-size appliances, or multiple appliances that exceed the usage limits of your room.

Should I bring a refrigerator?
You may rent a small refrigerator for your room. The cost for a refrigerator will be $45 for the academic year ($30 if the lease is signed winter quarter, $15 if it is signed spring quarter).

How large are the beds in the residence halls?
The beds in Terry, Lander, McCarty, Haggett, and Hansee Halls, 2104 House and Stevens Court are 36” x 78”. The beds in Mercer and McMahon Halls are 33” x 78”.

How do I get a parking permit?
You will receive information about parking with your checking-in materials. Please note, however, that parking is very limited and very expensive. A quarterly parking permit for the 2005-06 school year costs $232.86. Your parking assignment may be in an area that is not close to your hall or you may be placed on a waiting list (most new students are placed on the waiting list). If you don’t absolutely need a car, leave it at home. The University has a transportation program called U-PASS which, for $41 per quarter, offers unlimited rides on buses throughout King and Snohomish counties, as well as other transportation benefits.

Do you have any graduate student housing?
There are a number of housing options available for graduate students:
- Stevens Court single student apartments for students who are 19 and older.
- Stevens Court Addition single and married student apartments for students who are 20 and older.
- Family Housing communities.
- Private property communities for UW students:
  - Commodore-Duchess
  - Radford Court
  - Nordheim Court

I will be a student in the English Language Program (a.k.a. English as a Second Language Program). Can I live in the residence halls?
Priority for assignment in the residence halls goes first to matriculated University of Washington students. When space permits, we can offer housing to non-matriculated students, such as students in the Extension Program and students in the English Language Program (ELP).
**Procedures and Fees**

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University’s expectation that all students follow University regulations and procedures as they are stated in the General Catalog. Appeals may be filed with the student’s dean or with the Vice President for Student Affairs in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

**Registration**

www.washington.edu/students/reg/regelig.html

Instructions for registration are available on MyUW (myuw.washington.edu) in the Student Personal Services menu by selecting Registration. Notification is emailed to each student quarterly with information about registration for the next quarter.

**Registration Period I**

www.washington.edu/students/reg/addpolicy.html

Designed to accommodate currently registered matriculated students and students eligible to register under the Quarter Off Eligibility Policy, Registration Period I occurs during the latter half of the quarter preceding the quarter for which the student is registering. However, currently enrolled students registering for autumn quarter do so in spring quarter.

**Registration Period II**

Registration occurs after Registration Period I closes and is intended primarily to accommodate new and returning students. Continuing students who fail to register during Registration Period I may register during this period. Students who have not completed their initial registration by the end of this period (update and selection of address information, insurance/optional charges, and ASUW membership) are charged a Late Registration Fee.

**Registration Period III**

All students may register or make course changes during this period. Dropped courses do not appear on the transcript. Students are charged a Change of Registration service fee for registration changes made after Period III. One fee is charged for all changes occurring during the same day. A tuition forfeiture is charged for total credit reductions after Period III if applicable. See Fee Forfeiture section.

**Late Add Period**

All students may register or make registration changes during this period. All added courses require an entry code or faculty number. A Change of Registration service fee is charged.

**Unrestricted Drop Period**

www.washington.edu/students/reg/wdpolicy.html

Courses dropped during this period will not appear on the transcript. A Change of Registration fee is charged.

**Late Course Drop Period (Annual Drop)**

Students may drop one course each academic year (autumn through summer quarters) after the fourteenth calendar day of the quarter through the seventh week of the quarter. A course drop will be recorded on the transcript with a W followed by the number of the week of the drop (W3-W7). A Change of Registration service fee is charged.

**Credits Required for Full- or Half-Time Status Requirements**

www.washington.edu/students/reg/regpol.html

Some agencies require that a student have full-time status to receive maximum benefits. To be classified as a full-time student by the University, a professional student must register for and complete at least 12 credits per quarter and a graduate student must register for and complete at least 10 credits per quarter. To be classified as a half-time student by the University, a professional student must register for at least 6 credits per quarter and a graduate student must enroll for at least 5 credits per quarter.

**Restrictions on Attending Classes**

www.washington.edu/students/reg/regpol.html

No person, other than a faculty member attending informally with the approval of the instructor, may attend a University course in which that person has not been registered.

An instructor may allow a student to attend his or her class only if the student’s name is on the official class list from the Office of the Registrar. An unregistered student may attend through the fourteenth calendar day of the quarter if the student is on an official wait list for the course.

**Adding Courses/Permission Guidelines**

www.washington.edu/students/reg/regopt.html

For reasons of public safety and instructional quality, it is important to limit course enrollment to the approved classroom capacity. The Office of the Registrar monitors course enrollment and accepts student registration in fully enrolled courses according to the following guidelines:

1. Through the second week of the quarter, departments may choose to overload courses up to 115% of the room capacity to offset anticipated student course drops and withdrawals as demonstrated by past registration activity.

2. Students must secure entry codes from instructors or departments to add closed courses. However, if enrollment is at 115% of room capacity, registration requests are denied. Students should be informed when receiving entry codes to overload courses that registration is not guaranteed if enrollment exceeds 115% of room capacity.

3. If centralized room-capacity records do not correctly reflect the actual seating capacity, notification should be made to the Room Assignments/Time Schedule Office in the Office of the Registrar.

4. Students may add courses during the Late Add Period or through the twenty-first calendar day of the quarter. Adds after the seventh calendar day of the quarter require an entry code or faculty number. Departments may also add students to departmental courses during this period through departmental registration screens. To add courses after this period, students must submit a faculty-approved Late Add Petition form to the Registration Office.

5. A course may not be changed to or from an audit registration after the first two weeks of the quarter. See below for transcript entry.

**Dropping a Course**

www.washington.edu/students/reg/wdpolicy.html

Students dropping a course during the first two weeks of a quarter shall have no entry on their permanent academic transcript. If all courses are dropped, then a complete withdrawal date is recorded on the transcript.

A course drop made during the third through the seventh weeks of the quarter is recorded on a student’s transcript with a W grade and a number designating the week of the quarter in which the course drop was transacted. Only one drop after the fourteenth day of a quarter is permitted each academic year (autumn through summer quarter).

A student who does not officially drop a course through the registration system or the offering department is given a grade of W3-W7.

Students receiving or applying for financial aid should check with the Office of Student Financial Aid, 105 Schmitz, 206-543-6101,
before dropping a class because it may affect their eligibility.

Students receiving veterans’ benefits should contact the Office of Special Services, 460 Schmitz, when dropping courses.

**Complete Withdrawal from the University for a Registered Quarter**

www.washington.edu/students/reg/woffleave.html

Once registered, a student must officially withdraw if he or she later chooses not to attend the University for the registered quarter. Official withdrawal must be made by the fifth day of the quarter for the student to avoid further financial obligation (see Tuition, Fees, and Special Charges for refund information on withdrawals).

1. To withdraw from a quarter, students may complete a Withdrawal Card and submit it in person to the Registration Office, 225 Schmitz, or write to the Registration Office, Box 355850, Seattle, WA 98195-5850. Withdrawal forms are available at advising offices and the Registration Office. An official withdrawal is effective the day it is received in the Registration Office, or if submitted by mail, the date of the postmark.

2. Students who drop the last course on their schedules will be considered withdrawn for the quarter. Students who drop courses beginning the eighth calendar day of the quarter are charged a Change of Registration service fee per day for any course drops.

3. Submission of a graduate On-Leave application does not constitute official withdrawal from the University.

4. Refer to the grading section in the Graduate School: Graduate Study section.

5. Students receiving veterans’ benefits should immediately notify the Office of Special Services of withdrawal.

6. Students with a scholarship or loan awarded through the University should notify Student Fiscal Services.

7. Students who withdraw due to conscription into the armed forces or who are called to active duty military service may be entitled to either a full refund of tuition and fees or academic credit, depending upon when in the quarter official withdrawal occurs. Students should contact the Registration Office for complete information.

**Additional Information**

**Address Change**

www.washington.edu/students/reg/address.html

Residents are responsible for notifying the Office of the Registrar when their address changes. Individual addresses may be viewed and updated through MyUW. (Select Change of Address under the Student Personal Services menu.) A confirmation message will be sent to the student’s email address. The mailing of notices to the last address on record constitutes official notification.

**Residence Classification Requirements**

www.washington.edu/students/reg/residency.html

Residence classification information is available from the Graduate and Academic Records Office, 264 Schmitz.

**Student Identification Cards**

www.washington.edu/students/reg/id.html

All new students should go to the Student ID Card Center, 225 Schmitz, to be issued a permanent student identification card. Photo identification (such as a driver’s license, state ID card, or passport) is required to obtain a student ID card. Returning students who have not retained a previous ID card should obtain a new one. A quarterly validation sticker is mailed with the registration confirmation to each registered student. The student ID card with attached validation sticker is used for a variety of campus services. It is the student’s means of identifying his or her status as a student at the University.

Registered students whose ID cards have been lost or stolen can have them replaced at the Student ID Card Center. Students who request such replacement are charged a nonrefundable fee. Replacement of cards made invalid by changes in a student’s name or rendered unusable by normal wear and tear is provided without charge upon return of the original card to the Student ID Card Center. Two pieces of identification (one with a photo) are required to obtain a replacement card.

Cards that have been tampered with or misused may be confiscated by the University agency or department involved, and the incident may be referred to the Office of the Vice President for Student Affairs for appropriate University action.

**Transcripts**

www.washington.edu/students/reg/transcripts.html

Official copies of student academic records at the UW must bear the official seal of the University, the signature of the Associate Registrar, and the date of issue.

**Transcript Fee**

A charge of $4, paid to the Transcript Office in advance, is required for each transcript.

**Transcripts from Other Schools**

A transcript covering a student’s previous secondary and college education that has been submitted to the University as a requirement for admission becomes part of the official file and is not returned to the student. Any student who desires transcripts of his or her course work undertaken elsewhere must order official transcripts from the institution. The University does not issue or certify copies of transcripts from other institutions.

**Veterans and Children of Totally Disabled Veterans and Personnel in the Armed Forces**

Information on educational benefits and tuition reduction programs for veterans and their dependents is available from the Office of Special Services, 460 Schmitz.

Veterans and members of the armed forces who apply for admission to the University are subject to the same minimum requirements as regular students and are expected to enroll in accordance with University requirements.

The University’s academic programs of study are approved by the Washington State Higher Education Coordinating Board’s State Approving Agency (HECB/SAA) for enrollment of persons eligible to receive educational benefits under Title 38 and Title 10 USC.

**Tuition, Fees, and Special Charges**

**Estimated Expenses**

The cost of a student’s education at the University varies, the amount depending on his or her classification, status as resident or nonresident, and field of study. In computing college costs, a student should consider such additional expenses as insurance coverage, books, and laboratory supplies. Personal expenses (e.g., clothing, laundry, recreation, and transportation), which vary with each individual, as well as between-quarter expenses, should not be overlooked.

**Definitions**

**Lives Away from Home** - All single undergraduate students without dependents (spouse or children) who are living away from parents’ home; undergraduate married students without children, whose spouses are also students.

**Non-Traditional** - Undergraduates who have children; married students whose spouses are not also enrolled students.

**Tuition and Fees** - Figures presented here are for full-time enrollment, i.e., 10-18 credits per quarter; however, for purposes of financial aid eligibility, full-time is defined as 12 or more credits.
Tuition is due quarterly by Friday of the third week of the quarter.

The following figures are prepared and updated each year by the Office of Student Financial Aid and reflect modest, but adequate, probable costs for students attending the University during the nine-month academic year. They should be used only as a guide in determining the year’s expenses.

<table>
<thead>
<tr>
<th>2005-2006 Student Budget Nine-Month Living Expenses</th>
</tr>
</thead>
<tbody>
<tr>
<td>Items</td>
</tr>
<tr>

<tr>
<td>Books</td>
</tr>
<tr>
<td>Room/Board</td>
</tr>
<tr>
<td>Personal</td>
</tr>
<tr>
<td>Transportation</td>
</tr>
<tr>
<td>TOTALS</td>
</tr>
</tbody>
</table>

Room and Board - The Office of Student Financial Aid uses a figure of $7,017 in determining students’ financial need. This figure includes food, utilities, and housing. It is higher than the figure of $6,663 charged by Housing & Food Services (for double-room occupancy and preferred dining allowance) because it includes the cost of meals not covered in the campus dining plan.

For students living on campus, room and board is paid quarterly. The first payment, approximately $2,200, is due on September 1 for autumn quarter, except for financial aid recipients, who pay after aid is dispersed.

New Undergraduates - New Student Enrollment and Orientation Fee

As a new undergraduate, you must return the Enrollment Confirmation Form and the $250 nonrefundable New Student Enrollment and Orientation Fee (NSEOF) to confirm your intention to enroll at the University of Washington.

If you have applied for financial aid and you and your family cannot afford the $250 NSEOF, you may apply for a fee deferral. Write to the Office of Admissions; include your name, Student Number, phone number, and reason for the deferral. Send your letter, along with the Enrollment Confirmation Form. Any deferral will be conditional on the verification of your financial aid status.

Returning Undergraduates, Graduates and Professional Students - $100 Enrollment Confirmation Deposit

Returning undergraduates, new graduate students, and new students in a professional program are required to confirm his or her intention to enroll by paying a nonrefundable $100 Enrollment Confirmation Deposit (not required of students admitted summer quarter). The $100 is applied toward tuition and fees assessed for the quarter for which admission has been granted. A written verification from the appropriate academic adviser must be included.

2. A new or returning student who applies by the prescribed deadline for financial aid administered by the University’s Office of Student Financial Aid, and who cannot be awarded financial aid adequate to his or her needs as determined by that office, and who is therefore unable to attend the University. This petition and a copy of the Notice of Award and Acceptance must be submitted no later than two weeks after receipt of notice of the financial aid award.

3. A new or returning student who is unable to attend the University because of pregnancy, disability, or death, or because of being called involuntarily into the military service of the United States or into civil duty. Documentation is required.

Fee Payment

www.washington.edu/students/sfs/sao/ttnrates.html

An obligation to pay tuition and fees in U.S. dollars is incurred when a student registers. A fee statement is mailed to the student’s address on file with the Office of the Registrar.

Payment of this obligation is due by Friday of the third week of the quarter. Nonpayment of tuition and fees by the due date results in a charge of $120 for late payment. For balances under $150, the late fee is $50. There is no late fee for balances under $50. One-half of tuition is assessed when registration is canceled for nonpayment of tuition and fees. The Summer Quarter Bulletin and Time Schedule should be consulted for fees and fee payment schedule applicable to summer quarter only.

When the payment is not in conformance with the tuition and fee billing, specific instructions on how the payment is to be applied must accompany the payment. In the absence of instructions, the University makes a reasoned interpretation of the student’s intent and accounts for the funds accordingly. The student number must be specified on all payments.

Fees listed above do not apply to students registered through UW Extension. See the UW Extension Bulletin for their fee structure.

Special Course and Laboratory Fees

The amounts listed above cover normal University charges for course registration. Some courses, however, have extraordinary expenses associated with them, and in such cases the University may charge additional fees in amounts that approximate the added instructional or laboratory costs.

Other Fees

Auditors: There is no reduction in fees for auditors.

Admission Application Fees: Graduate, $45(online); Medicine, Dentistry, $35; Law, $50. Former students returning in the same classification, $38.

On-Leave Registration Fee: This fee of $35, charged to graduate students only, provides for a maximum on-leave period of four successive academic quarters or any part thereof and is not refundable.

Late Registration/Reregistration Fees: A late registration service charge of $25 is assessed when a student registers after the last scheduled day of Period II registration and through the fourteenth
day of the quarter. Students registering after the fourteenth day pay a $75 Late Registration Fee. Waiver or refund of the Late Registration Fee may be petitioned in the Registration Office. Waiver or refund of the $75 reregistration fee may be petitioned in the Student Fiscal Services Office.

Change of Registration Service Fee: A charge of $20 is made for any number of add, drop, or change transactions processed during a given day beginning the eighth calendar day of the quarter.

Transcript Fees: A charge of $4, paid to the Transcript Office in advance, is required for each transcript.

Thesis and Dissertation Fees: Publication binding fee, $25; dissertation microfilming fee, $60*; Microfilming for either the entire dissertation, or the abstract only; $35 Optional copyright fee *(Not available to those microfilming only the abstract.)*

* Part of the obligation of research is publication. In the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to any previous or planned publication of any or all the dissertation. Microfilming allows worldwide distribution of your work. More information about microfilming is provided in the Step 4 section of this manual.

Replacement Fees: Duplicate diploma, $20; student identification card, $10.

U-PASS Fee: A U-PASS validation sticker is mailed quarterly with a student’s registration confirmation. The U-PASS is valid on all Metro and Community Transit routes at all times and provides parking privileges to carpoolers, riding privileges to vanpool and Night Ride passengers, and merchant discounts. The quarterly fee of $41 (subject to change) is included on the tuition bill. Students who do not wish to participate in the U-PASS program must return the validation sticker to the University by the tuition payment deadline. The sticker can be returned by mail in the return envelope provided, mailed with the tuition payment, or returned in person to Student Fiscal Services.

All fees are subject to change without notice.

Cancellation of Tuition

Registered students must pay full tuition and fees. Tuition may be canceled or reduced if a student makes an official withdrawal or drops a course during the period specified by state statute. Refunds are given when a cancellation or reduction results in an overpayment.

Continuing Students

1. A student who withdraws on or before the seventh calendar day of the quarter does not pay tuition.
2. A student who withdraws after the seventh calendar day through the thirteenth calendar day of the quarter must pay one-half tuition.
3. A student who withdraws after the thirteenth calendar day must pay full tuition.

New and Returning Students

1. A student who withdraws on or before the seventh calendar day forfeits the $250 New Student Enrollment and Orientation fee or the $100 Enrollment Confirmation Deposit but does not pay the regular tuition.
2. A student who withdraws after the seventh calendar day through the thirteenth calendar day of the quarter must pay one-half tuition. The $100 Enrollment Confirmation Deposit is applied toward payment of tuition.
3. A student who withdraws after the thirteenth calendar day of the quarter must pay full tuition. The $100 Enrollment Confirmation Deposit is applied toward payment of tuition.

Fee Forfeiture

A student who does not completely withdraw but drops one or more courses may be eligible for lower tuition, depending on the total number of credits remaining after the course drop and on the time period when the drop was made. Tuition for students making a course drop on or before the seventh calendar day of the quarter is determined by the total credits remaining. Tuition for students making a course drop after the seventh calendar day through the thirtieth calendar day of the quarter is computed on the total credits remaining plus one-half the difference between the old tuition and the new tuition. There is no cancellation or reduction in tuition for courses dropped after the thirtieth calendar day of the quarter.

Fee Refund

When a fee payment is made by check, a waiting period is required before a refund can be authorized. An application for refund may be refused, unless it is made during the quarter in which the fees apply. A student who withdraws for disciplinary reasons forfeits all rights to refund or cancellation of any portion of his or her fees.

Financial Obligations

The Comptroller is authorized to place a hold (administrative) on the records of any student who fails to pay amounts due the University.

Until this hold is cleared, the University (1) does not release the student’s record or any information based upon the record, (2) does not prepare transcripts or certified statements, and (3) denies registration.

In cases of serious financial delinquency, the Comptroller, with the consent of the Associate Registrar, may order that a student’s registration be canceled and that privileges of attendance be withdrawn.

An administrative hold or cancellation also may occur when a student has not complied with other University rules, procedures, or obligations. The hold may be placed on the student’s record by the authorized University office responsible for enforcement of the rule, procedure, or obligation involved. The student is not permitted to register for any subsequent quarter or to obtain a transcript of his or her record or a certified statement except on the written release of the office that placed the hold.

Tuition Exemptions and Reductions

www.washington.edu/students/reg/tuition_exempt.html

Faculty/Staff, Washington State Employee, and Washington National Guard Member Tuition Exemption Programs

Eligible faculty, staff, state employees, and Washington National Guard members admitted to the University may request an exemption for a maximum of 6 credits each quarter under these tuition exemption programs. Applicable tuition will be charged for credits that exceed the 6-credit limit. Because such students are registered on a space-available basis, they must register after other students. The quarterly Time Schedule lists registration dates when students enrolling under these exemption programs may register. Eligibility information may be obtained from either the Staff Training and Development Office, or the Registration Office.

“Access” Program for Older Adults

www.washington.edu/students/reg/access.html

The UW allows Washington residents who are 60 years of age or older to audit certain courses on a space-available basis. Students who attend the University under the Access Program are limited to two courses per quarter. There is a nominal registration fee. As auditors, students do not receive credit, participate in discussions, complete laboratory work, or take examinations.
## Tuition Reductions

The following categories of students may be eligible for reduced tuition and fees. Students in these categories may contact the offices shown for information or to obtain an application. The reductions are established by legislative mandate and may be revoked by the legislature at any time.

UNDERGRADUATE STUDY

Office of Undergraduate Education

www.washington.edu/oue/
The University of Washington established the Office of Undergraduate Education (OUE) in 1992 in order to make undergraduate education more visible and central part of the University’s work and purpose. OUE offers opportunities and resources for students and their families, faculty members, and academic departments and programs. OUE’s unique mission of ensuring excellence in undergraduate teaching and learning is critical to the University’s commitment to providing students a rich academic experience.

Intercollege Programs

The following programs, described in detail in other sections of the catalog, are administered by the Office of Undergraduate Education.

General Studies

www.washington.edu/students/gencat/academic/gen_studies.html
General Studies provides students an opportunity to obtain an individually designed interdisciplinary degree through the College of Arts and Sciences. Students may also pursue a major in one of several existing interdisciplinary programs. Requirements for the Bachelor of Arts or Bachelor of Science degree are shown in the Arts and Sciences section of this catalog.

Center for Quantitative Science

dep.ts.washington.edu/cqs/
The Center for Quantitative Science in Forestry, Fisheries, and Wildlife is an intercollege academic unit sponsored by the Office of Undergraduate Education, the College of Ocean and Fishery Sciences, and the College of Forest Resources. The Center offers courses in mathematics and statistical methods as applied to problems in biology, ecology, the environment, and renewable-resource management for undergraduate students. The faculty of the Center includes members of the College of Forest Resources and the School of Aquatic and Fishery Sciences, as well as other units. The quantitative science minor is designed to give undergraduates majoring in biology, ecology, the environment, and renewable-resource management programs a thorough grounding in relevant statistical and mathematical modeling methodology.

Program on Africa

dep.ts.washington.edu/poa/
The Program on Africa (PoA) develops, co-ordinates, and disseminates information about inter-disciplinary, cross-college, Africa-related courses and activities at the UW. It aims to foster an interest in the African continent and its Diaspora, with the ultimate goal of involving knowledgeable, well-trained, and committed students and graduates in Africa’s political, cultural, medical, technological, and economic future. PoA offers undergraduate students a minor in African Studies with courses drawn from disciplines as varied as fisheries, anthropology, social work, history, public health, art, and music.

Program on the Environment

dep.ts.washington.edu/poeweb/
The Program on the Environment (PoE) fosters and promotes interdisciplinary environmental education at the UW by linking scholars active in environmental fields from across the University to build a trans-disciplinary network of educators, students, and researchers. PoE offers an undergraduate degree in Environmental Studies, a minor in Environmental Studies, and three graduate certificate programs. The program provides students knowledge in four domains of inquiry: natural sciences; social sciences; law, policy, and management; and ethics, values, and culture. PoE merges these fields through rigorous coursework and hands-on learning to provide a unique opportunity for students and faculty to explore complex environmental issues from multiple perspectives.

Undergraduate Majors

www.washington.edu/students/ugrad/advising/majmenu.html
To graduate from the UW, students must complete one of the majors listed below. In many cases, the student need not make a final choice until the beginning of the junior year, although programs with considerable mathematics and science (e.g., engineering and premedicine) include lock-step requirements that must be started early on if the student expects to finish in four years.

Students can enter some majors directly (e.g., those in Ocean and Fishery Sciences, most in Forest Resources, and some in Arts and Sciences), but most students start out as premajors. As premajors, they take courses to fulfill general requirements and admission requirements for the major. Many majors require one or two years of pre-admission course work, although a few require more. Admission to many majors is competitive, which means students may not be accepted even if they complete all the prerequisite course work, depending on their grades and other factors.

The General Catalog shows requirements for all majors, but students should see an adviser to ask about changes, course sequences, or new options.

Satisfactory Progress

www.washington.edu/students/reg/satprog.html
Students admitted to the University to pursue baccalaureate degrees are expected to make satisfactory progress toward the attainment of the degree and are expected to enter a major and to graduate after completion of a reasonable number of credits.

By the time undergraduate students have completed 105 credits, they must either be accepted in their major or have their premajor status extended temporarily by an adviser. Extensions are normally granted only to students who are in the final phases of completing admission requirements for a major to which they have a reasonable chance of acceptance.

Students who do not either declare a major or have their premajor status extended by the time they have earned 105 credits will have a “hold” placed against registration for the following quarter.

Students must normally graduate with their first baccalaureate degree by the time they have completed 30 credits beyond the credits required for the first degree or concurrent degrees. Departmental advisers may grant extensions beyond the 30-credit limit.

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree. Students admitted as “postbaccalaureate undeclared” must declare a major by the time they have earned 30 credits beyond their last degree, and once a degree objective has been declared, must make progress toward that degree as evidenced by the courses they have completed satisfactorily. Advisers may grant extensions beyond the 30-credit limit.

The Faculty Council on Academic Standards may terminate a student’s enrollment if the student demonstrates lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. The student may be reinstated with the approval of the student’s college and the council. EOP students may be reinstated in consultation with the Office of Minority Affairs.

Undergraduate Minors

Undergraduate students have the option of completing a minor. Minors require the completion of at least 25 credits, 15 of which must be taken in residence at the UW. There are no departmental admission requirements for minors. Students may declare an approved minor when they have earned 90 credits or more. A
cumulative GPA of 2.00 is required for courses within the minor. Some departments do not offer minors. Requirements for minors established as of spring 2002 are shown in the academic programs section of this catalog. A list of currently offered minors is available at the Undergraduate Gateway Center, 171 Mary Gates Hall.

Undergraduate Degrees

The UW grants the following degrees upon satisfactory completion of appropriate programs of study in the departments, schools, and colleges:

- Bachelor of Arts ................................................................. B.A.
- Bachelor of Arts in Business Administration ......................... B.A.B.A.
- Bachelor of Business Administration .................................... B.B.A.
- Bachelor of Fine Arts ......................................................... B.F.A.
- Bachelor of Landscape Architecture ..................................... B.LArch.
- Bachelor of Music .................................................................... B.Mus.
- Bachelor of Science .............................................................. B.S.
- Bachelor of Science in Aeronautical and Astronautical Engineering ......................................................... B.S.A&A.A.
- Bachelor of Science in Aquatic and Fishery Sciences .............. B.S.AFS.
- Bachelor of Science in Bioengineering ................................. B.S.Bio.E.
- Bachelor of Science in Chemical Engineering ....................... B.S.Ch.E.
- Bachelor of Science in Civil Engineering ............................. B.S.C.E.
- Bachelor of Science in Computer Engineering .................... B.S.Comp.E.
- Bachelor of Science in Construction Management ................ B.S.C.M.
- Bachelor of Science in Electrical Engineering ....................... B.S.E.E.
- Bachelor of Science in Engineering ....................................... B.S.E.
- Bachelor of Science in Forest Resources ................................ B.S.F.
- Bachelor of Science in Health Information Administration ................................................................. B.S.H.I.A.
- Bachelor of Science in Industrial Engineering ....................... B.S.I.E.
- Bachelor of Science in Informatics ........................................ B.S.Info.
- Bachelor of Science in Materials Science and Engineering B.S.M.S.E.
- Bachelor of Science in Mechanical Engineering .................... B.S.M.E.
- Bachelor of Science in Medical Technology ........................ B.S.Med.Tech.
- Bachelor of Science in Nursing ............................................ B.S.Nurs.
- Bachelor of Science in Technical Communication ................ B.S.T.C.

THE GRADUATE SCHOOL: GRADUATE STUDY

www.grad.washington.edu

The University of Washington awarded its first graduate degree, a Master of Arts in classical languages, in 1885 and its first Doctor of Philosophy degree, in chemistry, in 1914. Since those beginnings, the University has conferred more than 65,000 master’s degrees and 14,000 doctoral degrees, exclusive of medical, dental, and first legal doctorates.

Through its graduate programs, the University fulfills several functions vital to a healthy society: the advancement of human knowledge is facilitated through the development and conduct of scientific research; the education of scholars, teachers and a multitude of professionals in areas that cut across the academic spectrum insure that knowledge and information are communicated to the general public for the use and benefit of all. These functions ensure that some of the problems and needs confronting society are resolved.

To manage its developing graduate programs, the Graduate School was created as a temporary entity in 1899 and was permanently established in 1910. The purpose of the Graduate School is to define and support excellence in graduate education and the research and scholarly activities associated with it. Graduate study is guided by the Dean of the Graduate School and an ever-changing graduate faculty of more than 3,000 members who are selected for their interest in and concern for graduate education at the University of Washington. There are now more than 8,000 graduate students working toward master’s or doctoral degrees in 100 separate University programs. A growing number of interdisciplinary graduate degree and graduate certificate programs that have been established through the efforts of interested faculty members.

Graduate School policy is enacted through an elected council of ten graduate-faculty members who are chosen from among the graduate-faculty population and who advise the Dean on matters of policy and procedure. Complementary to that input, each degree-offering unit within the University appoints a graduate program coordinator who serves as an important link between the unit and the Graduate School, advising students on questions concerning Graduate School and departmental degree requirements.

The Graduate School also has a number of responsibilities that relate to its primary ones, such as graduate program review, Graduate Opportunities and Minority Achievement Program, the administration of the Graduate School Fund and certain fellowship programs, as well as such central facilities as the University of Washington Press, and the Walker-Ames and the Jessie and John Danz distinguished visiting professorships.

As part of its commitment to excellence, the University is committed to providing opportunities for students to learn and grow through experiences rich in cultural, ethnic, and racial diversity. Within the Graduate School, the Graduate Opportunities and Minority Achievement Program (GO-MAP) works with the University to provide an innovative and inclusive graduate student community and experience. GO-MAP takes a leadership role in the recruitment and retention of ethnic and racial minority and underrepresented students, building community on and off campus, improving campus climate, and enhancing scholarship and research.

In addition, GO-MAP administers several scholarships and assistantships aimed at increasing diversity in the University’s graduate programs.

Graduate Degree Programs

The Office of Academic Programs in the Graduate School contributes to the University’s educational and research mission by conducting quality assessment of proposed and continuing education programs at the graduate and undergraduate level as well as research institutes and centers. Through program review, it ensures academic program quality, including all aspects of an academic unit, and promotes communication among academic units throughout the three-campus system. The principle mechanism by which this is achieved is through a process of peer review. Reviews of degree programs are conducted on a ten-year cycle, or at predetermined shorter intervals. For further information, see Graduate School Memorandum No. 7: Periodic Review of Existing Degree Programs at www.grad.washington.edu and the schedule of program reviews at www.grad.washington.edu/Acad/Academicprograms.htm, or contact the Office of Academic Programs in the Graduate School at 206-685-3519.

Science .......................... M.S., M.P.H., Ph.D.
Epidemiology ............................ M.S., M.P.H., Ph.D.
Health Services ......................... M.S., M.P.H., Ph.D.
Pathobiology ............................... M.S., Ph.D.

School of Social Work ..................... M.S.W., Ph.D.
Because the following professional doctoral degrees offered by the University are not considered to be graduate degrees, they are not administered through the Graduate School:

- Dentistry .......................................................... D.D.S.
- School of Law ..................................................... J.D.
- School of Medicine .............................................. M.D.
- School of Pharmacy ............................................. Pharm.D.

**Graduate Admissions**

Additional program information is available on the World Wide Web at [www.grad.washington.edu](http://www.grad.washington.edu).

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam-era veteran in accordance with University policy and applicable federal and state statutes and regulations.

Application to the UW through the Office of Graduate Admissions is available for three types of students. It is important to understand the distinctions between the categories.

A **graduate student** is a person working toward a master’s or doctoral degree or earning a school administrator’s credential. Students must be admitted to this status in order to earn a degree. Information about the Application for Admission to the Graduate School is obtained from the program to which you wish to apply.

A **visiting graduate student** is a person who plans to transfer a limited number of graduate credits earned at the UW to another institution where he or she is actively pursuing a graduate degree. Admission is based in part on availability of resources. Visiting graduate applicants must have been admitted to another recognized graduate school, be currently pursuing a graduate degree there, and be in good standing. A Certificate of Status signed by the home institution is required. The Application and Certificate are available online at [https://www.grad.washington.edu/application/](https://www.grad.washington.edu/application/). Individual departments may require additional materials, such as transcripts, GRE/GMAT scores, a statement of purpose, or a list of desired course work.

Some graduate programs have chosen to offer admission to **graduate nonmatriculated students**. These students are not presently seeking a graduate degree but may apply a maximum of 12 credits earned in this category to degree requirements should they later be accepted into a graduate program. Applicants should meet minimum Graduate School admission requirements but admission as a graduate nonmatriculated student does not imply admission to a graduate degree program. The Application to Graduate Nonmatriculated Status must be obtained from the program to which you wish to apply. Official sealed transcripts from all collegiate institutions previously attended must be sent to the Graduate Nonmatriculated Office, Box 84808, University of Washington, Seattle, WA 98124-6108. (Refer to Graduate School Memorandum No. 37 for further information.)

Admission to the UW is necessarily a selective process. The prospective student must hold a baccalaureate degree from an accredited college or university in this country or an equivalent degree from a foreign institution. The student’s record should be a strong one with an average grade of “B” or a 3.00 grade-point, or better. The primary criterion and the priority for admission of new applicants into a graduate program is the applicant’s ability, as decided by the appropriate faculty, to complete the graduate program expeditiously with a high level of achievement. One aspect of meeting this criterion is the matching of interests between applicants and faculty. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School.

Weights given these and other factors vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

1. Priority for admission of applicants into a graduate degree program based upon the applicant’s apparent ability, as determined by the University, to complete the program with a high level of achievement.

2. No practice may discriminate against an individual because of race, color, creed, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran.

3. Sustained efforts shall be made to recruit qualified applicants who are members of groups that are underrepresented in certain disciplines.

4. All applicants to a degree-offering unit shall be processed through the same set of procedures to assure that all applicants are evaluated on their individual merits.

5. Tests and criteria for admission should relate to the actual requirements of the graduate program. Reasonable accommodation for testing conditions may be made to compensate for relevant disabilities.

6. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors may vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

   a. Grades earned, especially for subjects in or closely related to the field of the applicant’s proposed graduate work.

   b. Scores on the Graduate Record Examination (GRE) Verbal, Quantitative, and Analytical Tests, on the GRE Advanced Test, on other tests related to the applicant’s field, and on other aptitude tests which may be required.

   c. Personal interviews of the applicant by the department admissions committee.

   d. The career objectives of the applicant and the extent to which the graduate degree program may be expected to prepare the applicant for those objectives.

   e. Written and oral recommendations from persons who are qualified to evaluate the applicant’s academic record and promise.

   f. The applicant’s degree objective (i.e., master’s degree, doctoral degree, or a master’s followed by a doctoral degree).

   g. Activities or accomplishments; educational goals; prior employment experience; living experiences, such as growing up in a disadvantaged or unusual environment; special talents.

   h. Academic accomplishments in light of the applicant’s life experiences and special circumstances. These experiences and circumstances may include, but are not limited to disabilities, low family income, first generation to attend college, need to work during college, disadvantaged social or educational environment, difficult personal and family situation or circumstances, and refugee status or veteran status.

Importance given to these factors will vary among degree programs.

Most Graduate School admissions are for summer or autumn.
quarters. Admissions for winter and spring quarters may be severely restricted due to considerations of space.

Each academic program at the UW has a graduate program coordinator who is responsible for providing advice, guidance, and assistance to applicants as well as to students working toward graduate degrees. Prospective graduate students are urged to contact the graduate program coordinator in their program of interest for information about any aspect of graduate study, including research, curriculum, faculty, and financial support in the form of teaching and research assistantships, grants, and scholarships. Information about graduate programs is available at www.grad.washington.edu.

Admission Process
Information about the application process for both graduate and graduate nonmatriculated status must be obtained directly from the department. Visiting graduate applicants should go to https://www.grad.washington.edu/application/ for application information. It is very important to submit all application documents in time to meet departmental deadlines as these will supersede graduate admissions deadlines.

Registration
After successful applicants have been offered admission, the Registration Office sends a request for a $100 Enrollment Confirmation Deposit to indicate the intent to register. This nonrefundable deposit will apply toward the first quarter’s tuition.

Once admitted, graduate students are expected to maintain registered or on-leave status until the degree is conferred. (See section on Continuous Enrollment.)

Financial Aid for Graduate Students
Students applying for fellowships, traineeships, and assistantships or associateships must make certain that complete transcripts and other credentials are on file by February 15 (earlier submission of applications and supporting documents is urged by all departments and required by some). Awards and appointments are usually made about April 1. Application forms may be obtained by writing to the graduate program coordinator of the appropriate department.

Fellowships, Traineeships, and Scholarships
A limited number of fellowships, traineeships, and scholarships is available through individual departments to outstanding students in fields of study leading to advanced degrees. Application forms may be obtained from the graduate program coordinators in the departments.

The Graduate School and the University of Washington Libraries have collaborated to provide the Grants and Funding Information Services (GFIS) for University of Washington graduate students (and faculty) who are seeking any type of general research funding for use at the University of Washington. GFIS promotes awareness of external funding information resources by providing drop-in educational consultations, maintaining a print collection for grant seekers, and offering quarterly seminars highlighting Web-based grant-seeking tools. GFIS works with students and faculty to devise a search strategy, helping to focus efforts and locate available resources. GFIS also will demonstrate searching on several online databases and how to use its print collection of funding resource books so that students can perform future searches based on changing funding needs. GFIS also maintains resources to assist in the proposal-writing process, including grant-writing handbooks and links to online resources.

To set up a consultation, email gfis@u.washington.edu, call 206-616-3084, or submit a research profile using GFIS’s online form. For funding seminar schedules, check the Web at www.lib.washington.edu/gfis/events.html.

Work Study Graduate Assistantships
Graduate students who are eligible for the need-based college work-study program may qualify for work-study graduate assistantships in teaching or research. Students must submit financial aid applications to the Office of Student Financial Aid by the February 28 deadline to be considered for these positions. Information is available from the Office of Student Financial Aid.

Employment Opportunities
The campus offers other job opportunities for graduate students. Students may apply directly to the chair of the department in which they hope to work or to the Student Employment Office. Students seeking part-time employment must be enrolled and on campus before they may obtain jobs.

Advisory positions in University residence halls paying room and board are available for single graduate students, both men and women. Additional information may be obtained from the Director of Residence Halls Programs, 301 Schmitz.

Spouses of students also may apply for regular full- and part-time University employment. These positions cover a wide range of occupations and offer pay comparable to the prevailing salaries in the community. Some carry such fringe benefits as vacations, sick leave, and opportunities to enroll in University courses. Inquiries may be directed to the Staff Employment Office, 1320 Northeast Campus Parkway.

Loans
Long-term educational loans are available to graduate students through the Federal Perkins Student Loan, the Federal Direct Stafford Loan, and the Federal Direct Unsubsidized Stafford Loan programs. An application form for these programs (the Free Application for Federal Student Aid, or FAFSA) is available in the office of Student Financial Aid, Box 355880, 105 Schmitz Hall, 206-685-1282. The Graduate School also has a short-term emergency loan available. For more information, call 206-685-1282. The Office of Student Financial Aid may also be reached by email (osfa@u.washington.edu) or on the Web at www.washington.edu/students/osfa/. The application deadline is February 28 for the following summer quarter.

Students should meet the application deadline even if they have not yet been admitted to the Graduate School.

The Federal Perkins Student Loan and the subsidized Federal Direct Stafford Loan are awarded to students who demonstrate financial need. Students who do not qualify for need-based assistance may qualify for Federal Direct Unsubsidized Stafford Loans. For more detailed information on these loan programs, visit the Office of Student Financial Aid Web site at www.washington.edu/students/osfa/. The Federal Perkins Student Loan and the unsubsidized Federal Direct Stafford Loan are awarded to students who demonstrate financial need. Students who do not qualify for need-based assistance may qualify for Federal Direct Unsubsidized Stafford Loans. For more detailed information on these loan programs, visit the Office of Student Financial Aid Web site at www.washington.edu/students/osfa/.

Short-term emergency loan funds also are available through the Office of Student Financial Aid. Several different types of short-term loans are possible. More information is available from the Office of Student Financial Aid, Short-Term Loans, 172 Schmitz, 206-685-1282. The Graduate School also has a short-term emergency loan available. For more information, call 206-543-5900.

Graduate Opportunities and Minority Achievement Program
The Graduate Opportunities and Minority Achievement Program (GOMAP) works to develop and maintain a diverse and welcoming climate from which all students may benefit. As part of its duties, GOMAP oversees the Graduate School Fund for Excellence and Innovation (see Special Programs and Facilities) and assists University of Washington graduate programs in developing and maintaining efforts designed to increase the enrollment of students from ethnic minority groups that have been historically underrepresented in graduate programs.
Recognizing that financial aid in the form of scholarships, grants, and fellowships is important in achieving and maintaining diversity, the GOMAP administers a variety of need- and merit-based fellowships. Merit-based awards are generally made through the nomination and support of the department in which the student is enrolled. Need-based awards are based upon an evaluation of the student’s need as established by the Free Application for Federal Student Aid (FAFSA) and the Office of Student Financial Aid. Students who have varied cultural experiences or educationally or economically disadvantaged backgrounds and who will therefore contribute to the intellectual and social enrichment of the University, are encouraged to apply. Students must be U.S. citizens or permanent residents to be eligible.

Financial assistance from individual departments may also be available. Students should apply directly to the chair of their department. Students are also encouraged to make use of the University’s Grants and Funding Information Service located in Suzzallo Library.

Further information on fellowships administered by GOMAP may be obtained by writing to the University of Washington, Graduate School, Graduate Opportunities and Minority Achievement Program, Box 351240, Seattle WA 98195-1240, or emailing gomap@u.washington.edu.

All awards are contingent upon the student’s admission to the UW Graduate School.

**Graduate Degree Policies**

Usually focused on a specific field of knowledge, graduate study is conducted through a variety of means, including lectures, seminars, independent advanced study, special reading courses, internships, and participation in research. Graduate programs leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees emphasize the development of the student’s ability for independent scholarly work and the creation of new knowledge through research. Practice-oriented programs, which ordinarily lead to the degree of master or doctor in a particular professional field, emphasize preparation of the student for professional practice at the frontiers of existing knowledge.

Many master’s and all doctoral programs culminate in the presentation of a thesis or dissertation conveying the results of the independent study and research carried out by the student. A master’s thesis contributes to knowledge, reviews or critiques the state of knowledge in a field, creates a new design or composition, or represents some other appropriate kind of independent contribution. A doctoral dissertation must set forth a significant contribution to knowledge or understanding in the student’s field, be presented in scholarly form, and demonstrate that the student is competent to engage independently in the pursuit of solutions to important problems. The student must defend the doctoral dissertation in a Final Examination conducted by a faculty committee and open to all other graduate-faculty members. A member of the graduate faculty from some other discipline participates as an official representative of the Graduate School, including various major evaluations such as the General Examination and Final Examination.

**Graduate Program Coordinator**

The graduate student’s initial work at the University is guided by the graduate program coordinator in his or her field. The coordinator must be a senior tenured member of the graduate faculty and is the official representative of the academic unit that offers the graduate degree program. The graduate program coordinator maintains familiarity with policies and procedures of the Graduate School and provides overall coordination of graduate activities within the unit.

**Graduate Courses**

Graduate courses are intended for, and ordinarily restricted to, either students enrolled in the Graduate School or graduate nonmatriculated students, and are given numbers from 500 through 800. Some courses at the 300 and 400 levels are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the supervisory committee, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only. Courses at the 300 level are not included in the calculation of grade-point average (GPA) and will not apply toward the minimum Graduate School requirement of 18 graded credits for the master’s or doctoral degree. Approved 400-level courses are accepted as part of the major as well as minor or supporting fields. Courses numbered 498 and entitled Special Topics or Special Projects normally are not applicable to a graduate degree program if addressed primarily to introductory content and undergraduate students. Undergraduate research (499) is not accepted as part of the graduate program. Graduate School Memorandum No. 36 offers additional information on graduate courses. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of any combination of courses numbered 600, 700, or 800.

**Repeating Courses**

Graduate students may repeat any course. Both the first and second grades will be included in the cumulative GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once.

**Grading System for Graduate Students**

In reporting grades for graduate students, units that offer graduate degrees use the system described herein. Grades are entered as numbers, the possible values beginning at 4.0 and decreasing by one-tenth increments until 1.7 is reached. Grades below 1.7 are recorded as 0.0 by the Registrar. A minimum grade of 2.7 is required in each course that is counted toward a graduate degree. A minimum GPA of 3.0 is required for graduation.

Correspondence between number grades and letter grades is as follows:

<table>
<thead>
<tr>
<th>Numeric grade-point equivalent</th>
<th>Letter grade</th>
<th>Numeric grade-point equivalent</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.0</td>
<td>A</td>
<td>2.8</td>

<tr>
<td>2.8</td>
<td>E</td>
<td>1.6</td>
</tr>
</tbody>
</table>

The following letter grades also may be used:

- **I** Incomplete. An incomplete may be given only when the student has been in attendance and has done satisfactory work to within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student’s control.

To obtain credit for the course, a student must successfully complete the work and the instructor must submit a grade. In no case may an
incomplete be converted into a passing grade after a lapse of two years or more. An incomplete received by a graduate student does not automatically convert to a grade of 0.0 but will remain a permanent part of the student’s record.

N   No grade. Used only for hyphenated courses and courses numbered 600 (Independent Study or Research), 601 (Internship), 700 (Master’s Thesis), 750 (Internship), or 800 (Doctoral Dissertation). An N grade indicates that satisfactory progress is being made, but evaluation depends on completion of the research, thesis, internship, or dissertation, at which time the instructor or supervisory committee chair should change the N grade(s) to one reflecting the final evaluation.

S/NS Satisfactory/not satisfactory. A graduate student, with the approval of the graduate program coordinator or supervisory committee chair, may elect to be graded S/NS in any numerically graded course for which he or she is eligible. If a student does not so elect, then the student is graded on a numerical basis. If approval is granted, the student must elect the S/NS option either when registering or no later than the end of the seventh week of the quarter.

CR/NC Credit/no credit. With the approval of the faculty in the academic unit, any course may be designated for grading on the credit/no-credit basis by notice in the appropriate Time Schedule. For such courses, the instructor submits a grade of CR or NC to be recorded by the Registrar’s Office for each student in the course at the end of the quarter. All courses numbered 600, 601, 700, 750, and 800 may be graded with a decimal grade, CR/NC, or N at the instructor’s option.

W   Course Withdrawal.

HW Hardship Withdrawal. Refer to the University of Washington Time Schedule for procedures and dates, or visit the Web at www.washington.edu/students/reg/wdoffleave.html#Q3.

Of the minimum number of credits required for a graduate degree, a graduate student must show numerical grades in at least 18 quarter hours of course work taken at the UW. These numerical grades may be earned in approved 400-level courses and 500-level courses.

The student may petition the Dean of the Graduate School to modify the procedures described above. The petition should be accompanied by comments and recommendations from the graduate program coordinator.

Scholarship
A cumulative GPA of 3.00 or above is required to receive a degree from the Graduate School. A graduate student’s GPA is calculated entirely on the basis of numeric grades in 400- and 500-level courses. The grades of S, NS, CR, NC, and N are excluded, as are all grades in courses numbered 600, 601, 700, 750, and 800, and in courses at the 100, 200, and 300 levels.

Failure to maintain a 3.00 GPA, either cumulative or for a given quarter, constitutes low scholarship and may lead to a change-in-status action by the Graduate School. Failure to maintain satisfactory performance and progress toward a degree may also result in a change-in-status action by the Graduate School.

(See Graduate School Memorandum No. 16 for additional information.)

Withdrawal Policy
Refer to the University of Washington Time Schedule for procedures and dates, or look on the Web at www.washington.edu/students/reg/wdoffleave.html

Language Competency Requirements and Examinations
Competence in one or more languages in addition to English is desirable for all fields of advanced study and is often required, especially in the scholarly and research-oriented programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy.

Requirements for foreign-language competence are established by the graduate faculty in the unit offering the graduate program. Language competence in certain languages other than English (i.e., languages that may have special significance to the field) may be specified as helpful or desirable or may be required. Students should consult the graduate program coordinator for information and advice about desirable or required competence in foreign languages.

When appropriate, students are urged to establish foreign-language competence as undergraduates before entering the Graduate School or as early as possible in their graduate careers. The University’s language-competence requirements in French, German, and Spanish may be satisfied by successful completion of the standardized examinations given by the Educational Assessment Office. Other foreign language examinations are also given at the UW.

It is assumed that citizens of certain English-speaking countries who are admitted to the Graduate School are competent in the English language; citizens of non-English-speaking countries must demonstrate a satisfactory command of English, both for admission and for appointment as teaching assistants.

Refer to Graduate School Memorandum No. 8, English Language Competence for Admission to the Graduate School (www.grad.washington.edu/Acad/gsmemos/gsmemo08.htm) for more information.

Enrollment Requirement
The enrollment requirement for the master’s degree is 30 credits at the University of Washington

For the doctoral degree, the enrollment requirement is 90 credits, 60 of which must be taken at the University of Washington. With the approval of the degree-granting unit, an appropriate master’s degree from an accredited institution may substitute for 30 credits of enrollment. Doctoral study requires an immersion in an academic field and its intellectual community. Degree-granting units may require a period of full-time or on-site study.

Only courses at the 400-, 500-, 600-, 700-, and 800-levels can be applied to enrollment or course credit in the major field for advanced degrees (please see Graduate Courses earlier in this section regarding courses numbered 498 and 499). Courses at the 300-level are not applicable to enrollment or course credit toward advanced degrees except when applied by permission of the graduate program coordinator or supervisory committee toward the graduate minor or supporting courses. Courses numbered below 300 are not applicable to enrollment or course credit for advanced degrees.

Final Quarter Registration
A student must maintain registration as a full- or part-time graduate student at the University for the quarter the master’s degree, the Candidate certificate, or the doctoral degree is conferred.

A student who does not complete all degree requirements by the last day of exam week must be registered for the following quarter.

Continuous Enrollment and Official On-Leave Requirement

Policy
To maintain graduate status, a student must be enrolled on a full-time, part-time, or On-Leave basis from the time of first enrollment in the Graduate School until completion of all requirements
for the graduate degree. The student must be registered when applying for the master’s degree, the passing of the master’s final examination, or doctoral General or Final Examinations, the filing of the thesis or dissertation, and the receiving of the degree. Summer quarter On-Leave enrollment is automatic for all graduate students who were either registered or on-leave the prior spring quarter. Failure to maintain continuous enrollment constitutes evidence that the student has resigned from the Graduate School.

A student’s petition for On-Leave status must be approved by the departmental graduate program coordinator or alternate and submitted to the Registration Office no later than the fifth day of the quarter. To be eligible for On-Leave status, the student must have registered for, and completed, at least one quarter at the UW and have officially On-Leave (except summer quarter). An On-Leave student is entitled to use the University Libraries and to sit for foreign-language competence examinations, but is not entitled to any of the other University privileges of a regularly enrolled and registered full- or part-time student. The student pays a nonrefundable fee to obtain On-Leave student status covering four successive academic quarters or any part thereof. An On-Leave student returning to the University on or before the termination of the period of the leave must file a Returning Student Reenrollment Application (available at 225 Schmitz) by the deadline stated on the form and register in the usual way as a full- or part-time student (see Graduate School Memorandum No. 9 for procedures). A student who returns before the termination of the On-Leave period and maintains registration for any part of a quarter cancels On-Leave status. Please note: Periods spent On-Leave are included as part of the maximum time periods allowed for completion of a graduate degree.

**Readmission**

A student previously registered in the Graduate School who has failed to maintain graduate student status but who wishes to resume studies must file an application in person or by mail for readmission to the Graduate School by the regularly published closing dates. If the student is readmitted, registration will occur during the usual registration period. If the student has attended any other institution during the period when not registered at the UW, official transcripts in duplicate of the student’s work must be submitted. An application for readmission carries no preference and is treated in the same manner as an application for initial admission, including the requirement of payment of the application fee.

The Graduate School normally allows six years to complete requirements for a master’s degree and ten years for a doctoral degree. Periods spent On-Leave or out of status are included.

**Concurrent Degree Programs**

**Informal Concurrent Degree Programs**

Students in these programs pursue two degrees from different departments simultaneously. These programs have not been approved as formal concurrent programs, but students complete the same requirements as in the formal concurrent programs.

Students choosing this option must complete an Informal Concurrent Degree Application, which may be obtained from the Graduate Student Services Office, 229 Gerberding.

Graduate School Memorandum No. 35: Concurrent Degree Programs contains additional information and is available from the Academic Programs office in the Graduate School or may be found through the Graduate School homepage at www.grad.washington.edu.

**Master’s Degree**

**Summary of Requirements**

It is the responsibility of each master’s candidate to meet the following Graduate School minimum requirements:

1. Under a thesis program, a minimum of 36 or more quarter credits (27 course credits and a minimum of 9 credits of thesis) must be earned. Under a non-thesis program, a minimum of 36 or more quarter credits of course work must be earned.

2. At least 18 of the minimum 36 quarter credits for the master’s degree must be for work numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be for 700, Master’s Thesis.)

3. Numerical grades must be received in at least 18 quarter credits of course work taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.

4. A minimum of 30 credits must be earned at the University of Washington.

5. In a thesis degree program, a thesis, approved by the supervisory committee, must be submitted to the Graduate School. A student must register for a minimum of 9 credits of thesis (700). With the exception of summer, students are limited to a maximum of 10 credits per quarter of thesis (700).

6. A final master’s examination, either oral or written, as determined by the student’s supervisory committee, must be passed, if it is a departmental requirement.

7. Any additional requirements imposed by the graduate program coordinator in the student’s major department or by the student’s supervisory committee must be satisfied. A master’s degree student usually takes some work outside the major department. The graduate program coordinator in the major department or the student’s supervisory committee determines the requirements for the minor or supporting courses.

8. Students may now apply for the master’s degree on the Web at www.grad.washington.edu/stsv/mastapp.htm. The online application period commences Monday, the third week of each quarter and closes Friday (midnight Pacific Time), the second week of the subsequent quarter (the quarter the student intends to graduate). For
example, if competing in winter quarter, the earliest an online request can be submitted is the third week of autumn quarter and the latest is Friday of the second week of winter quarter. If degree requirements are not met in the requested quarter, students must complete another degree request for the quarter in which they expect to complete requirements. Students will receive an email confirming receipt of their Master’s Degree Request.

9. The graduate student must maintain registration as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).

10. All work for the master’s degree must be completed within six years. This includes quarters spent On-Leave or out of status and applicable work transferred from other institutions (see detailed information under Transfer Credit).

11. A student must satisfy the requirements for the degree that are in force at the time the degree is to be awarded.

Second Master’s Degree Requirement

A second master’s degree may be earned at the UW by completing an additional separate set of requirements. Please refer to Concurrent Degree Programs earlier in this section and to Graduate School Memorandum No. 35 for more specific information.

Transfer Credit

A student working toward the master’s degree may petition the Dean of the Graduate School for permission to transfer to the UW the equivalent of a maximum of 6 quarter credits of graduate level course work taken at another recognized graduate school. These credits may not have been used to satisfy requirements for another degree. The petition must include a written recommendation from the graduate program coordinator and an official transcript indicating completion of the course work. Transfer credits are not entered on the UW transcript.

Approved transfer credits are applied toward the total credit count for the master’s degree only. (Transfer credits are not applicable toward a doctoral degree.) The 18 quarter credits of numerically graded course work, and the 18 quarter credits of 500-level and above course work may not be reduced by transfer credit.

UW students who are within 6 credits of completing their undergraduate degree and who have met the requirements for admission to the Graduate School may register the quarter immediately preceding admission to Graduate School for up to 6 credits in 500-level courses in addition to the last 6 credits they require of undergraduate work. The graduate program which has admitted the student must approve registration for the courses. The student, after admission to the Graduate School, must file a petition with the Dean of the Graduate School to transfer the 6 credits.

The student must also provide a letter from the Office of Graduations and Academic Records stating that these credits have not been applied toward his or her undergraduate degree.

Credit taken as a nonmatriculated student or postbaccalaureate student at the UW may not be transferred into a graduate program. Credit by either independent study through correspondence or advanced credit examinations is not transferable.

Thesis Program

The master’s thesis should be evidence of the graduate student’s ability to carry out independent investigation and to present the results in clear and systematic form. Two copies of the thesis, normally written in the English language, along with the appropriate forms signed by the members of the supervisory committee from the student’s graduate program, must be submitted to the Graduate School by the last day of the quarter (last day of exam week) in which degree requirements are completed. The faculty in the graduate program may require that the student present an additional copy for its own use. The Graduate School publishes a booklet, Style and Policy Manual for Theses and Dissertations, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly before the student begins writing the thesis. The thesis must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School for consultation during the thesis preparation process.

A $25 binding fee is payable at 129 Schmitz before the thesis is submitted to the Graduate School.

Non-thesis Programs

The faculty in some graduate programs have arranged programs of study for the master’s degree that do not require the preparation of a thesis. These non-thesis programs normally include a more comprehensive plan of course work for more extensive examinations than are required in thesis programs, or they may include some approved research activity in lieu of a thesis.

Final Examination for Master’s Degree

As soon as is appropriate, the graduate faculty in the student’s graduate program appoints a supervisory committee, consisting of two to four members. The chair and at least one-half of the total membership must be members of the graduate faculty (see Graduate School Memorandum No. 13). The committee chair arranges the time and place of the final examination, the results of which must be reported to the Graduate School by the last day of the quarter (last day of exam week) in which degree requirements are met. At least two graduate-faculty members of the committee, including the chair, must sign the Master’s Application (warrant). If the exam is not satisfactory, the committee may recommend to the Dean of the Graduate School that the student be allowed to take another examination after a further period of study.

Application for Master’s Degree

Students may now apply for the master’s degree on the Web at www.grad.washington.edu/stsv/mastapp.htm. The online application period commences Monday, the third week of each quarter and closes Friday (midnight Pacific Time), the second week of the subsequent quarter (the quarter the student intends to graduate). For example, if competing in winter quarter, the earliest an online request can be submitted is the third week of autumn quarter and the latest is Friday of the second week of winter quarter. If degree requirements are not met in the requested quarter, students must complete another degree request for the quarter in which they expect to complete requirements. Students will receive an email confirming receipt of their Master’s Degree Request. The filing of the application is the responsibility solely of the student. When the application is received, the student’s record is reviewed in the Graduate School. All requirements for the degree must be met by the end of the current quarter if the application is to be approved. If this is not possible, the applicant is notified of deficiencies by the Graduate School. Once approved, the application is forwarded to the appropriate graduate program. Registration must be maintained for the entire quarter in which application for the degree is made. If a student should withdraw during the quarter, the application becomes void and a new one must be submitted at the appropriate time.

Upon completion of departmental requirements, the master’s degree application is signed by the supervisory committee and returned to the Graduate School. It must be received by the last day of the quarter (last day of exam week) if the degree is to be conferred that quarter. If all requirements are completed after this deadline, registration for the following quarter is required.

The student and the graduate program coordinator should be thoroughly acquainted with the requirements for the particular degree.
Master of Arts for Teachers

Master’s degree programs for experienced teachers, which focus upon the fields of knowledge normally taught in the common school and the community college, have been established at the University. These programs provide alternatives to the research-oriented Master of Arts and Master of Science degree programs, which emphasize particular fields of knowledge. Programs leading to the M.A.T. degree are offered in Biology Teaching and English.

Doctoral Degree

The doctoral degree is by nature and tradition the highest certificate of membership in the academic community. As such, it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctoral degree are devices whereby the student may demonstrate present capacities and future promise for scholarly work.

Summary of Requirements

In order to qualify for the doctoral degree, it is the responsibility of the student to meet the following Graduate School minimum requirements:

1. Completion of a program of study and research as planned by the graduate program coordinator in the student’s major department or college and the Supervisory Committee. Half of the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the General Examination.

2. Presentation of 90 credits, 60 of which must be taken at the University of Washington.

3. Numerical grades must be received in at least 18 quarter credits of course work taken at the UW prior to scheduling the General Examination. The Graduate School accepts numerical grades in approved 400-level courses accepted as part of the major, and in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.

4. Creditable passage of the General Examination. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

5. Preparation of and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. The Candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the General Examination. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of dissertation (800).

6. Creditable passage of a Final Examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The General and Final Examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the exam is taken and the degree is conferred.

7. Completion of all work for the doctoral degree within ten years. This includes quarters spent On-Leave or out of status as well as applicable work from the master’s degree from the UW or a master’s degree from another institution, if applied toward one year of resident study.

8. Registration maintained as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).

9. A student must satisfy the requirements that are in force at the time the degree is to be awarded.

Appointment of Doctoral Supervisory Committee

A Supervisory Committee is appointed by the Dean of the Graduate School to guide and assist a graduate student working toward an advanced degree and is expected to evaluate the student’s performance throughout the program. The supervisory committee should be appointed no later than four months prior to the General Examination. Appointment of the supervisory committee indicates that the graduate faculty in the student’s field finds the student’s background and achievement sufficient for admission into a program of doctoral study and research. “Preliminary” examinations, if required, should be completed prior to the request for appointment of the supervisory committee (see Graduate School Memorandum No. 13: Supervisory Committees for Graduate Students).

Admission to Candidacy for Doctoral Degree

At the end of two years of graduate study, the chair of the supervisory committee may present to the Dean of the Graduate School, for approval, a Request for General Examination (signed by all supervisory committee members including the Graduate School Representative) permitting the student to take the General Examination for admission to candidacy for the doctoral degree. This means that, in the opinion of the committee, the student’s background of study and preparation is sufficient to justify the undertaking of the examination. A warrant is issued to the department if the Graduate School requirements have been met. The Request for General Examination must be received at least three weeks prior to the proposed examination date. Written and other examinations prior to the oral are the responsibility of the graduate program and do not need Graduate School approval. At least four members of the committee (including the chair, GSR, and one additional graduate faculty member) must be present at both the General and Final Examinations. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

If the student’s performance is judged by the supervisory committee to be satisfactory, the signed warrant certifying successful completion of the General Examination is filed in the Graduate School. If the General Examination is unsatisfactory, the supervisory committee may recommend that the Dean of the Graduate School permit up to a maximum of two additional re-examinations, after a further period of study. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School.

Thereafter, the student is identified and designated as a Candidate for the appropriate doctoral degree and is awarded the Candidate’s certificate. After achieving Candidate status, the student ordinarily devotes his or her time primarily to the completion of research, writing of the dissertation, and preparation for the Final Examination.

The Candidate’s certificate and the doctoral degree may not be awarded in the same quarter.

Candidate’s Certificate

The Candidate’s certificate gives formal recognition of the successful completion of a very significant step toward the doctoral degrees awarded through the Graduate School: Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts. Students who have passed the Graduate School General Examination and who have completed all requirements for the degree except the dissertation and the Final Examination are awarded the Candidate certificate.

Dissertation and Final Examination

The Candidate must present a dissertation demonstrating original and independent investigation and achievement. The dissertation should reflect not only mastery of research techniques but also ability to select an important problem for investigation and to deal
with it competently. Normally the dissertation is written in the English language. However, if there are circumstances that warrant the dissertation be written in a foreign language, approval must be received from the Dean of the Graduate School. The Graduate School publishes a booklet, Style and Policy Manual for Theses and Dissertations, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly before the student begins writing the dissertation. The dissertation must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School, and students are encouraged to consult with them throughout the dissertation preparation process.

When the supervisory committee agrees that the doctoral Candidate is prepared to take the Final Examination, the Dean of the Graduate School should be informed of the decision and asked to designate a reading committee consisting of at least three voting members of the supervisory committee.

Once the reading committee is established officially with the Graduate School, a Request for Final Examination (signed by all members of the supervisory committee including the Graduate School Representative) is presented to the Graduate School three weeks prior to the Final Examination date, and if the Candidate has met all other requirements, a warrant authorizing the Final Examination is issued by the Graduate School. At least four members of the committee (including the chair, GSR, and one additional graduate faculty member) must be present at both the General and Final Examinations.

If the Final Examination is satisfactory, the supervisory committee signs the warrant and returns it to the Graduate School by the last day of the quarter in which the degree requirements are completed. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School. If the examination is unsatisfactory, the supervisory committee may recommend that the Dean of the Graduate School permit a second examination after a period of additional study.

After the Final Examination, the doctoral Candidate has 60 days in which to submit the dissertation to the Graduate School. Registration as a graduate student is required the quarter the dissertation is submitted and the degree is conferred.

Publication of Doctoral Dissertations

Part of the obligation of research is publication of the results, and in the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to any previous or planned publication of any or all of the dissertation and provides worldwide distribution of the work. The Candidate submits the publication agreement when the dissertation is presented to the Graduate School. Publication in microfilm does not preclude other forms of publication.

The following fees for microfilming the doctoral dissertation are paid at the Cashier’s Office, 129 Schmitz (all fees are subject to change): microfilming the entire dissertation, $60; optional copyright fee (applicable only when the entire dissertation is microfilmed), $45; or microfilming of only the abstract, $60. These fees are in addition to the $25 binding fee.

Individual Ph.D. Program

The Graduate School maintains the Individual Ph.D. (IPh.D.) Program for exceptionally able students whose objectives for study are of an interdisciplinary nature that cannot be met within one of the University units authorized to grant the Ph.D. degree. The program is intended for dissertation topics that require supervision from two or more of the disciplines in which the University offers the Ph.D. degree. It is not intended as a mechanism for offering the Ph.D. degree within units that do not have their own authorized Ph.D. programs.

A graduate student may apply to the IPh.D. Program when he or she has completed the master’s degree, or has been admitted to the Graduate School and has completed at least three quarters of full-time work at the UW, and has carefully planned an appropriate program of studies.

Proposals, including GRE scores, are due by December 15 of each year, and decisions on admission are made by May 31 of the following year. Information and application materials for the Individual Ph.D. Program are available at www.grad.washington.edu/inter/iphd.htm.

ACADEMIC PROGRAMS AND COURSES

College of Architecture and Urban Planning

224 Gould

Dean
Robert Mugerauer

Associate Deans
Katrina Deines
Steven Goldblatt

The College of Architecture and Urban Planning (CAUP) comprises four departments that are directly concerned with the design and development of the physical environment: Architecture, Construction Management, Landscape Architecture, and Urban Design and Planning.

The College offers a variety of programs and degrees focusing on the environmental design disciplines within a liberal arts education. The undergraduate programs of the departments of Construction Management and Landscape Architecture lead to professional degrees that serve as the educational credentials for careers in their respective fields. The pre-professional undergraduate degree in architectural studies prepares students for professional programs as well as related roles in society. Master’s degrees are also offered in the College: Master of Architecture, Master of Science in Architectural Studies, Master of Science in Construction Management (evening degree), Master of Urban Planning, and Master of Landscape Architecture. Master’s students may elect to work toward the Certificate in Urban Design or the Certificate in Preservation Planning and Design. A new Ph.D. program in built environment is offered as well as an interdisciplinary Ph.D. in urban design and planning that is available through the Graduate School. All curricula encompass an appropriate level of design and technical understanding and include broader social, economic, and cultural issues fundamental to understanding, preserving, and enriching our built and natural environments.

As part of a major university and metropolis in the Pacific Northwest, the College is able to reinforce its program by using its setting as a laboratory for study. It works closely with its various professional communities to build curricula and a faculty attuned to the understanding and creation of an appropriate physical environment.

Research centers include:

- Runstad Center for Real Estate and Community Development
- Center for Environment, Education, and Design Studies
- Institute for Hazard Mitigation Planning and Research
- Urban Ecology Research Laboratory
• Institute for Collaborative Building
• Northwest Center for Livable Communities

Educational programs include:
• Certificate programs
• Urban design
• Preservation planning and design
• Continuing education/extension programs
• Architecture
• Facilities management
• Real estate

**Institute for Hazard Mitigation Planning and Research**

Robert Freitag, Director

The Institute for Hazard Mitigation Planning and Research was established in 1999 as a vehicle for research, teaching, and public service that address the mitigation of natural and man-made hazards through planning and design, and through the integration of mitigation principles into a wide range of disaster and risk-management opportunities. The institute’s approach is interdisciplinary, with close links to other academic research units in the University and to risk management organizations in government and industry.

The research agenda is aimed at developing practical mitigation solutions that can be incorporated into local government land-use planning, development regulation, infrastructure, and emergency management; state and federal response to disasters; planning for business continuity; and planning for post-disaster recovery and reconstruction.

The institute is also pursuing curriculum development to incorporate mitigation principles and methods into existing and new courses in the College’s degree programs.

**Urban Design Certificate Program**

410 Gould

Jeffrey Ochsner, Director

Neile Graham, Program Coordinator

The College of Architecture and Urban Planning administers a special graduate-level program that leads to the Certificate of Achievement in Urban Design. Since 1968, this interdisciplinary program has provided a collective framework that allows students to specialize in the study and design of the urban environment as part of their professional education.

The 14-member faculty offers backgrounds in urban design as well as in architecture, landscape architecture, and urban planning. In addition, the communities of the Puget Sound region provide a unique learning laboratory for students to experience the issues and professional activities of urban design. A core curriculum and mandatory course work in four substantive areas provide the student with a firm grounding in theory, methods, and practical skills. The program is normally seven quarters in length, concurrent with the master’s program.

Students accepted for graduate work by the departments of Architecture, Landscape Architecture, or Urban Design and Planning are eligible for the program if they possess the necessary design abilities prior to enrollment in advanced studios.

**International Programs**

224 Gould

The departments of the College offer many opportunities for foreign study in which participants earn academic credit while studying abroad. Programs in Rome and Mexico are sponsored on a regular basis. In addition, various study and exchange opportunities exist in such locations as Germany, the Scandinavian countries, Colombia, Mexico, India, and Japan. Faculty exchanges with foreign institutions occur regularly.

**University of Washington Rome Center**

95 Piazza del Biscione, Rome, Italy

Katrina Deines, Director

The College maintains a permanent year-round facility in Rome. Studio and classroom spaces, a library, administrative offices, and housing accommodations for faculty are located in the Palazzo Pio on the Campo de Fiori. The Rome Center is used by UW programs in classics, Romance languages, art, art history, English, creative writing, and comparative history of ideas, as well as by the departments of the College of Architecture and Urban Planning. The Rome Center fosters interaction among students from the University and other institutions, together with practicing professionals residing in or visiting Rome. Several major universities regularly share studio critics and lecturers.

**Remote Sensing Applications Laboratory**

12 Gould

Frank Westerlund, Director

The Remote Sensing Applications Laboratory (RSAL) is a facility for teaching, research, and public service applications of remote sensing and geographic information technologies in environmental planning and design. Remote sensing includes aerial photography and satellite systems that record earth-surface data in image or digital form for subsequent interpretation by visual or computer techniques and incorporation into geographic information systems. Research applications have included land-use mapping, urban form analyses, growth-management studies, development siting, natural-resource inventories, and environmental analysis. RSAL houses an extensive collection of air photo, satellite data, map, and documentationary resources. In addition to optical photo interpretation equipment, the laboratory utilizes UNIX and NT workstation-based software systems such as ERDAS image processing and ArcInfo GIS.

**Facilities**

**Computing**

Mark Baratta, Director

The CAUP Office of Computing provides a wide variety of specialized computing resources and support services for the College’s students, faculty, and staff. These resources include the following:

- several networked Windows and Macintosh computing labs with a wealth of software, including CAD, GIS, multimedia, 2D/3D graphics, rendering, animation, scheduling, estimating, bid analysis, project management, modeling, design, spreadsheet, and document preparation packages;
- slide and document scanning facilities;
- printing and large-format color plotting;
- digital still and video cameras and processing software;
- Student Computing Loaner Program, which provides checkout of laptop computers, digital still and video cameras, and video/computer projectors to CAUP students;
- consulting office for in-person support, along with support via phone and email.

Additionally, students receive UWNetID computing accounts from the University’s central computing organization, Computing and Communications. The UWNetID allows attachment to the campus network (either locally or via dial-up) and access to email, disk space for file storage and Web pages, and many computing, course scheduling, bibliographic, and library resources.
Lighting Applications Laboratory
The Lighting Applications Laboratory includes a variety of facilities for use by students and faculty members in conjunction with lighting classes, design-studio courses, and research work. Equipment in the lighting workshop includes lamps and lighting fixtures, sample models and model-building materials, a mirror-box artificial sky, a direct-beam sunlight simulator, assorted light meters and data loggers, cameras, and demonstration displays.

The Department of Architecture is a co-sponsor of the Lighting Design Lab. This lab, a 10,000-square-foot, half-million-dollar facility, was designed to demonstrate the energy conservation potential of state-of-the-art architectural lighting technology. It is operated by Seattle City Light in downtown Seattle. Students can take various positions in the lab as interns. It is also available to assist in their lighting design and testing, as it does with regional architectural offices.

Photography Laboratory
A large photography laboratory is provided with studio and darkroom facilities for use by photography classes, design-studio classes, special instruction, and independent activity.

Shop
A fully staffed and equipped wood-, plastic-, and metal-working shop provides students an opportunity to design and build selected projects. The shop is used as an instructional facility in conjunction with studio, structures, and materials classes. Thesis and other individual activity also can be accommodated.

Library
The Architecture-Urban Planning Library, 334 Gould, is the primary location for materials on architecture, landscape architecture, construction management, and urban design and planning. The collection contains 42,500 volumes, 7,500 microforms, and 300 currently received serial subscriptions. Access to its collection is provided through the UW Libraries Information Gateway, a single World Wide Web location which encompasses all the library’s print and electronic resources as well as tools, services, and the ability to search the library’s catalog and a wide range of Internet resources. The Gateway is available in all UW libraries and on the Web at www.lib.washington.edu.

Slide Collection
Heather Seneff, Director

The slide collection consists of approximately 100,000 images covering architectural, landscape, design and planning, and construction subject matter, supporting the curricular and research needs of the College. New materials for lectures and projects are continually added.

Student Organizations
Chapters of American Institute of Architects Students, American Society of Landscape Architects, Associated General Contractors, Planning Students Association, and the Historic Preservation Association provide opportunities for undergraduate and graduate students to meet informally and to participate in a variety of projects and events.

College Bachelor of Arts Programs
Bachelor of Arts in Architectural Studies, see Architecture.
Bachelor of Arts in Community and Environmental Planning, see below.

Community and Environmental Planning
208Q Gould

Community and Environmental Planning (CEP) is an award-winning, interdisciplinary Bachelor of Arts degree program offered through the College as one of the University’s interdisciplinary undergraduate programs. CEP has gained distinction as a model for a highly personalized, active, and relevant educational experience within a large research institution. Housed in the Department of Urban Design and Planning, CEP students draw liberally upon the entire range of courses, faculty, and programs at the UW.

Undergraduate Program
Adviser
410 Gould, Box 355740
206-543-4191

The Community and Environmental Planning program offers the following programs of study:

- The Bachelor of Arts degree with a major in community and environmental planning

Bachelor of Arts

Suggested First- and Second-Year College Courses: See adviser.

Department Admission Requirements
See adviser.

Major Requirements
Students design two-year-long individual study plans with faculty. Each builds a unique, strong degree experience with intellectual integrity, combining the quarterly CEP core seminars with a self-selected set of rigorous courses — including 25 credits of methods — and outside experiences.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The problems we face in this world are simply too great to be met without active engagement from all perspectives and knowledge. To this end, a CEP education is founded on the following: start where you are; articulate and embrace a vision of how you intend to make a difference in the world; construct a plan, with guidance from faculty and peers, of CEP seminars, cross-disciplinary courses, and field experiences; move deliberately with it in the final two years of undergraduate education; through first-hand experience and in the context of the CEP community of learners, become acquainted with effective ways for working constructively together to anticipate and address critical issues facing the complex communities and world we inhabit.

A CEP education is fully lived, not passively taken. CEP students actively make their education in community with others. Students learn from learning groups of seventeen. Each group comprises a community of mutual learning that requires commitment, personal investment, and strong teamwork strategies for two years. Through six interconnected, quarterly seminars students engage the core content of the major: community, environment, and planning. These contemporary academic fields and areas of research include the study of community as subject and practice, exploration of the ecological context of all societal life, and an investigation of the potentials of planning for developing strategies for positive change. CEP students have gone on to careers in a variety of interdisciplinary fields such as community planning and organization, urban development, communications, work in the for-profit and nonprofit sectors, public administration, education, community and environmental activism, ecology, and government/community relations.

- Instructional and Research Facilities: See above.
- Honors Options Available: None offered.
- Research, Internships, and Service Learning: See above.
- Department Scholarships: None offered.
- Student Organizations/Associations: None offered.
Course Descriptions

CEP 200 Introduction to Community and Environmental Planning (5) I&S Purcell
Introduction to central themes of major. Opportunities to engage in community action and planning process, while developing ecological literacy. Lectures, discussions, and critical writing exercises combine to increase knowledge and interest in these fields. Emphasis on developing community of learners in and out of classroom setting. Offered: A5Sp.

CEP 220 Field Studies in Community and Environmental Planning (5) I&S/VLPA Ryan
Field studies building on theories and practices introduced in CEP 120. Emphasis on collaborative practice of research and design in public realm with complex and often conflicting objectives, positions, and meanings. Regional inquiry of cultural landscape and design. Tools for understanding place and shaping future change. Offered: A.

CEP 301 The Idea of Community (5) I&S
Theories of community and communal rights and responsibilities. Experience building a learning community within major. Explores struggles for community in every sector of life. Witness essentials of community through service and field experiences, students construct individual curriculum and learning plans for major, selecting cross-disciplinary work. Credit/no credit only. Offered: A.

CEP 302 Environmental Response (5) I&S/NW
Explores issues of environmental crisis and societal responses. Readings and reflective analysis from broad selection of authoritative sources to develop grounded perspective in ecological literacy and consciousness. Concurrently, experiential education in challenges and practical responses to building sustainable society through participation in community-based environmental effort. Credit/no credit only. Offered: W.

CEP 303 Social Structures and Processes (5) I&S
Investigates use of formal and informal social structures and processes within context of community and environment. Looks culturally at patterns and institutions of social organization and relationships among different sectors. Issues of interrelatedness, citizenship, knowledge, and communication. Participation in local community service organization. Credit/no credit only. Offered: W.

CEP 446 Internship (5, max. 10)
Connects core and individual courses with field work. Group and individual readings develop understanding of how students’ internships and field placements constitute particular element of community and environmental planning. Explores how what we do for a living is part of our lives as citizens and public service. Credit/no credit only. Offered: AWSp.

CEP 460 Planning in Context (5) I&S
Examines theory against backdrop of practice for broad, historical understanding of social, political, environmental planning. Critique from viewpoints, e.g., planning history, ethics, ecofeminism, environmental justice, class and capitalism, planning and global economy. Develop personalized history reflecting individual experience, professional experience, and philosophical heritage of planning profession. Credit/no credit only. Offered: A.

CEP 461 Ethics and Identity (5) I&S
Examination of personal, societal, vocational, environmental, planning ethics. Readings and discourse on ethical foundations for public life. Individual and group readings on values, human potential. Develops understanding of ecological context, moral responsibility, self-awareness. Constructs positive, diverse view of humanity, environment regardless of race, gender, ethnicity, beliefs. Credit/no credit only. Offered: W.

CEP 462 Community and Environment (5) I&S
Capstone quarter merges core seminars, disciplinary courses in major, community field experiences for mastery of personal knowledge and skills. Reflection and synthesis of themes in major; engagement with contemporary issues. Compares theoretical definitions of community and environment with individual philosophies and knowledge within thoughtful, applied context. Credit/no credit only. Offered: Sp.

CEP 479 Planning and Development in the Puget Sound Region (3-12, max. 12) I&S Coffey, Dierwechter, Ryan
A field-based course focusing on the Seattle-Tacoma urban region. Examines the problems and prospects associated with rapid growth through site visits and discussions with public officials, planners, and developers. Topics/sites vary and include such issues as growth management, sprawl, transportation, sustainable development, land use, and environmental protection. Offered: jointly with T URB 479;AWSPS.

CEP 498 Special Topics (1-9, max. 15) I&S
Systematic study of specialized subject matter.

CEP 499 Undergraduate Independent Study or Research (1-5, max. 10)
Individual reading, research, fieldwork, other special project approved and supervised by faculty adviser most appropriate for the project proposed. Report on the purposes, procedures, and results of study is required. Credit/no credit only. Offered: AWSpS.

Strategic Planning for Critical Infrastructure

Course Descriptions

SPCI 500 Strategic Planning and Systems Analysis (4)
Introduction to two major planning and analytic processes, strategic planning and systems analysis, as applied to the public sector. Includes study of the various elements and types of systems as well as the strategic planning process for public organizations.

SPCI 501 Introduction to Comprehensive Emergency Management (3)
Introduction to emergency management and risk reduction concepts and principles. Includes emergency management tools, techniques, and resources as well as governmental programs, relationships, and the broader social context.

SPCI 502 Constitutional Issues in Homeland Security (3)
Explores the balance between individual liberties and national security. Examines the moral concepts underlying American civil rights and acts of terrorism against the United States. Discusses application of the U.S. Constitution to Homeland Security laws and other governmental actions to protect the nation at home and abroad. Credit/no credit only.

SPCI 504 Applied Geo Spatial Analysis (4)
Provides the theoretical and practical skills needed to use a Geographic Information System (GIS) for analyzing spatial phenomena on the urban and regional scale. Focuses on principles and methods of spatial analysis and their application to strategic planning, risk management, and hazard mitigation.

SPCI 505 Epidemiology of Biological and Chemical Hazards Mitigation I: Principles (3)
Introduction to epidemiology: surveillance for detection of outbreaks, outbreak investigation, and control for infectious agents, toxins, and chemicals. Case studies are drawn from actual outbreaks illustrating these essential epidemiological methods. Examines problem-solving techniques. Credit/no credit only.

SPCI 506 Strategic Planning Practicum I (3)
Uses case-based and problem-based approaches to teach the
techniques of planning, decision-making, and analysis common to critical infrastructures.

SPCI 507 Epidemiology of Biological and Chemical Hazards Mitigation II: Application (3)

The second of a two-course sequence, focusing on the applications of the principles of epidemiology covered in Epidemiology of Biological and Chemical Hazards I: Principles. Study cases drawn from actual outbreaks: compare and contrast types, apply knowledge to solve, propose interventions for control, and formulate strategies for preventing outbreaks. Credit/no credit only.

SPCI 598 Special Topics (1-4, max. 12)

Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter.

SPCI 599 Special Projects (1-4, max. 12)

Independent/tutorial study for graduate students in the Masters in Strategic Planning for Critical Infrastructures Program. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty advisor most appropriate for the project proposed.

Architecture

208 Gould

The study of architecture includes the study of the various aspects of architecture: design, graphics, computing, structural engineering, building sciences, history, theory, ecology, sociology, psychology, cultural studies, law, and professional practice.

Undergraduate Program

Adviser

208 Gould Hall, Box 355720
206-543-3043
bainfo@u.washington.edu

The Department of Architecture offers the following programs of study:

- The Bachelor of Arts degree with a major in architectural studies

The B.A. in architectural studies is a pre-professional degree that prepares candidates for admission to professional architectural programs with advanced standing, as well as for other roles in society in related fields — research, government, development, management, planning, etc. While many of these occupations do not require a professional license, they do require an understanding of and exposure to a professional education. Students may also choose a dual major in both Architecture and Construction Management and can receive both the B.A. with a major in Architectural Studies and the B.S. in Construction Management. Five years of study is usually the minimum necessary to complete the requirements for both degree programs.

Bachelor of Arts

Suggested First- and Second-Year College Courses: See Department Admission Requirements below.

Department Admission Requirements

90 credits to include the following:

- Preparatory Architectural Course Work, 17 credits:
  - ARCH 350, ARCH 351, ARCH 352 (9 credits);
  - ARCH 210, ARCH 211 (8 credits). Note: These courses can be taken through UW Extension on a nonmatriculated basis, prior to admission to the UW, or they can be taken in the sophomore year on campus.

- General Education Requirements (73 credits):
  - English Composition (5 credits); Visual, Literary and Performing Arts (20 credits);
  - Individuals and Societies (20 credits); Natural World (20 credits, including MATH 112, MATH 124, MATH 127, or MATH 145);
  - additional Areas of Knowledge (8 credits).

While the cumulative GPA is an important factor in the admissions evaluation, the committee places emphasis on the evaluation of performance in the preparatory architectural course work the student has completed. It is to the student’s advantage to take as many of these courses as possible before applying.

Application deadline: May 15 for autumn quarter only.

Prerequisite courses must be completed by the time the student enters the program in autumn quarter.

Major Requirements

90 credits as follows:

- 66 credits of pre-professional course work
- 24 credits of approved upper-division electives

The final 45 credits must be completed as a matriculated student in residence at the UW.

Minimum 2.50 cumulative GPA for all work done in residence.

Minor

Minor Requirements: 25 credits to include a minimum of 20 credits in ARCH courses (at least 9 credits at the upper-division level) and 5 additional upper-division credits from courses in the College.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The architectural studies program emphasizes a broad liberal arts foundation followed by a focus on entry-level courses in architectural design, theory, the technology of building, and materials. Specific goals for student learning include an understanding of the organization of three-dimensional space in response to specific human needs; the sequences and history of human building activities; various architectural theories and current thought about the aesthetics of design; construction materials and their properties; building systems and their integration for human comfort; structural principles, relationships of buildings to their sites; social, political, legal, and economic influences of design and construction. Specific goals in the area of personal development include an ability to visualize three dimensions and think spatially; graphic, verbal, and written communication skills for design development and presentation; an ability to think critically and exercise self-criticism.

- Instructional and Research Facilities: Departmental and College facilities include the following:
  - Design Machine Group, a collaborative design and computing research lab and studio aimed at fostering and developing ideas that will shape the future of design and information technology.
  - UW Rome Center, housed in the Palazzo Pio on the Campo dei Fiori of Rome, provides studio and classroom spaces for students participating in Italian studies programs.
  - The Lighting Applications Laboratory is operated by the department for use by students and faculty in conjunction with lighting classes, design studio, courses, and research work.
  - Photography Laboratory: A large and well-equipped laboratory for black-and-white photography operated by the department for the College provides studio and darkroom facilities for use by photography classes, design studio classes, special instruction, and independent activity.
  - Wood and Metal Shop: Large and well-equipped
wood and metal working shops are available for student and class projects.

- **Honors Options Available**: None offered
- **Research, Internships, and Service Learning**: Internships are available and vary according to individual interests within the program. See adviser for details.
- **Department Scholarships**: A limited number of department scholarships are available to eligible students entering their final year of the major.
- **Student Organizations/Associations**: AIAS (American Institute of Architectural Students)

**Of Special Note:**

Most states require that an individual intending to become an architect hold an accredited degree. Two types of degrees are accredited by the National Architectural Accrediting Board (NAAB): (1) the Bachelor of Architecture, which requires a minimum of five years of architectural study (this degree is not offered at the University of Washington), and (2) the Master of Architecture, which requires a minimum of three years of study following an unrelated bachelor’s degree or two years following a related pre-professional bachelor’s degree. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects.

The UW’s four-year, pre-professional degree is not accredited by NAAB. The pre-professional degree is useful to those desiring a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment options in fields related to architecture.

Architectural education at the University of Washington requires a minimum of six years of higher education to attain the first professional degree, the Master of Architecture. The curriculum is divided into three two-year segments of course work with a pre-professional Bachelor of Arts degree (with a major in Architectural Studies) awarded at the completion of the second two-year segment. The professional degree, Master of Architecture, is awarded only upon completion of the third segment. (Students with bachelor’s degrees in unrelated fields take an additional year of course work.)

**Graduate Program**

Graduate Program Coordinator
208 Gould, Box 355720
206-543-4180
archinfo@u.washington.edu

**Master of Architecture**

The Master of Architecture degree is the only professional degree offered by the Department of Architecture. Completion of the requirements of this nationally accredited degree program satisfies the educational requirement for licensing (registration) as an architect. The accredited M.Arch. program accommodates two groups of undergraduate degree holders: (1) persons holding a pre-professional four-year degree, such as a Bachelor of Arts in Architecture (or equivalent), who normally will require seven or eight quarters of study; (2) persons with an undergraduate degree in an unrelated field, who normally will require ten or eleven quarters, over a period of at least three years, to complete the requirements for the degree. This three-year program may vary somewhat in duration and specific course work required, depending on selection of concentration/study areas and prior academic and professional experience.

Candidates with a pre-professional four-year degree, such as Bachelor of Arts (in architecture) or the equivalent, usually undertake six full-time quarters of study including completion of a thesis for the M.Arch. degree. This program typically requires 91 credits of course work, including 30 credits of design studio, 30 credits of approved core courses, 9 credits of thesis, and 15 credits of electives. Special interests and certificate programs often can be accommodated within the 15 credits of electives and design-studio options.

Persons holding degrees in other fields normally take three quarters of preparatory course work to develop knowledge and skills equivalent to those of students who enter the program from undergraduate architecture programs. Upon completion of preparatory course work, the students merge with students in the two-year program described above.

The department offers an advanced M.Arch. degree program for persons holding an accredited professional five-year Bachelor of Architecture degree (and those already holding an accredited Master of Architecture degree). For these candidates the program represents a specialization or in-depth study of a specific area or interest in the field. Each student’s program is developed on an individual basis in consultation with faculty advisers. The approved program of study becomes the student’s curriculum, which must be completed for award of the degree. Typically this program involves a minimum of 45 credits of required course work, including a thesis, and can be completed in four or five quarters. Those seeking advanced study of design computing should apply to the Master of Science (M.S.) in Architecture degree program, not the post-professional M.Arch.

The Master of Science (M.S.) in Architecture program offers an advanced and specialized graduate degree in architecture. The M.S. in Architecture is currently offered with a single area of specialization, design computing. Applicants should hold a degree in architecture or an allied design discipline. Candidates from a wide range of disciplinary backgrounds who are interested in pursuing education in research and applications of design computing that include design methods, cognition and computation, design collaborations, human/computer interface in design, visual architecture, physical computing, and related areas are encouraged to apply.

The M.S. in Architecture program with a focus in design computing involves a minimum of 45 credits of required coursework, including a thesis, and may be completed in four or five quarters.

The M.S. in Architecture program is not accredited by the National Architectural Accrediting Board (NAAB). Candidates seeking to pursue careers in the professional practice of architecture who do not already hold a professionally accredited degree in architecture should apply to the accredited program (the M.Arch.).

The M.S. in Architecture program with a focus in design computing makes intensive use of department, College, and University computing capabilities and equipment. All enrolled students pay a special program fee in addition to tuition.

**Admissions**

Students are admitted in autumn quarter only. All application materials should be received by the department no later than the preceding January 15. Notices of admission are mailed by April 15. Admission to the Master of Architecture program is a competitive process, with priority given to those students whose apparent abilities, as determined by the Department of Architecture Admissions Committee, will enable them to complete the program expeditiously and with a high level of achievement. In evaluating applicants, the Admissions Committee considers the following: a portfolio of work in visual arts and/or design, a Statement of Purpose, Graduate Record Examination general test scores, transcripts of previous degree programs and of additional academic study (with a 3.00 GPA requirement), three letters of recommendation, and the applicant’s background and experience in architecture and/or related fields. Incomplete applications and those received after January 15 are not considered by the Admissions Committee. Master of Science (M.S.) in Architecture students are normally admitted in autumn quarter. Application deadlines are similar to the Master of Architecture. the M.S. in Architecture admissions committee considers materials similar to those for the Master of Architecture, but with a greater emphasis on demonstrated skills, aptitude, and interest in computing.
Certificate Programs
Graduate students may elect to participate in the College-wide certificate programs in urban design and preservation planning and design. (See program descriptions in the preceding College section.) The department also offers a certificate program in lighting design.

International Studies
The department offers the Architecture in Rome program at the University of Washington Rome Center, and the Design/Build Mexico program in Cuernavaca, Mexico. Other programs have included summer study of the Italian Hill Towns and in Portugal and Scandinavia, and numerous exchanges including Scandinavia, England, Germany, Hong Kong, Colombia, Japan, and Australia.

Financial Aid
Each spring quarter the department awards scholarships and assistantships for the following academic year. These are more typically available to students already enrolled in the architecture program at the time of the awarding, although some financial aid is offered to newly entering students. Other financial aid and assistantship possibilities may be found through the Graduate School Fellowship Division and the Office of Student Financial Aid in Schmitz Hall.

Course Descriptions
ARCH 100 Introduction to Architecture Study (8) VLPA
Introduces design studio instruction to students contemplating architecture as a field of study of career. Studio projects, informed by workshops, lectures, readings, field trips, and in-studio critiques introduce the history, theory and practice of architecture. Includes instruction in basic design drawing and model making. Offered: S.

ARCH 150 Appreciation of Architecture I (2/3) VLPA
Historical survey of the architecture of Western civilization. For nonmajors.

ARCH 151 Appreciation of Architecture II (2/3) VLPA
Historical survey of the architecture of Western civilization. For nonmajors.

ARCH 200 Introduction to Environmental Design and Planning (3) I&S/VLPA
Lectures, demonstrations introducing basic curricular elements. Development of basic skills in methods and graphic expression of design and planning process-analysis, synthesis, evaluation in building technology; simulation, modeling; person-environment relations; history; theory; policy; professional roles.

ARCH 210 Design Drawing I (4) VLPA Ching
Projects, lectures, demonstrations, and exercises to develop skill in freehand drawing and an understanding of drawing as a vital means to see, analyze, and represent essential aspects of the visual environment.

ARCH 211 Design Drawing II (4) VLPA Ching
Projects, lectures, demonstrations, and exercises to introduce the language of architectural drawing, with emphasis on freehand drawing as the primary means to imagine, explore, and develop design ideas. Prerequisite: ARCH 210.

ARCH 220 Introduction to Architectural Structures (2) Onouye
Introduces basic structural behavior and concepts of structural systems. Uses lectures, demonstrations, and testing of student-built projects to examine structural concepts of systems, subsystems, and components in a non-numerical manner. Prerequisite: ARCH 210.

ARCH 251 World Architecture: Non-Western Cultures (3) I&S/VLPA Prakash
Introduction to historical and contemporary built environments of non-Judeo-Christian civilizations, primarily Hindu, Buddhist, Islamic, and Meso-American, as manifestations of cultural history and as responses to environmental determinants. Offered: Sp.

ARCH 300 Introduction to Architectural Design I (6)
Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form.

ARCH 301 Introduction to Architectural Design II (6)
Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 300.

ARCH 302 Introduction to Architectural Design III (6)
Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 301.

ARCH 303 Introduction to Design Studio I (6)
Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of

ARCH 200 Introduction to Environmental Design and Planning (3) I&S/VLPA
Lectures, demonstrations introducing basic curricular elements. Development of basic skills in methods and graphic expression of design and planning process-analysis, synthesis, evaluation in building technology; simulation, modeling; person-environment relations; history; theory; policy; professional roles.

ARCH 210 Design Drawing I (4) VLPA Ching
Projects, lectures, demonstrations, and exercises to develop skill in freehand drawing and an understanding of drawing as a vital means to see, analyze, and represent essential aspects of the visual environment.

ARCH 211 Design Drawing II (4) VLPA Ching
Projects, lectures, demonstrations, and exercises to introduce the language of architectural drawing, with emphasis on freehand drawing as the primary means to imagine, explore, and develop design ideas. Prerequisite: ARCH 210.

ARCH 220 Introduction to Architectural Structures (2) Onouye
Introduces basic structural behavior and concepts of structural systems. Uses lectures, demonstrations, and testing of student-built projects to examine structural concepts of systems, subsystems, and components in a non-numerical manner. Prerequisite: ARCH 210.

ARCH 251 World Architecture: Non-Western Cultures (3) I&S/VLPA Prakash
Introduction to historical and contemporary built environments of non-Judeo-Christian civilizations, primarily Hindu, Buddhist, Islamic, and Meso-American, as manifestations of cultural history and as responses to environmental determinants. Offered: Sp.

ARCH 300 Introduction to Architectural Design I (6)
Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form.

ARCH 301 Introduction to Architectural Design II (6)
Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 300.

ARCH 302 Introduction to Architectural Design III (6)
Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 301.

ARCH 303 Introduction to Design Studio I (6)
Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of
architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

ARCH 304 Introduction to Design Studio II (6)
Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

ARCH 305 Introduction to Design Studio III (6)
Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

ARCH 310 Architectural Design Drawing I (3)
Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 303 studio to integrate drawing in all phases of the design process.

ARCH 311 Architectural Design Drawing II (3)
Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 304 studio to integrate drawing in all phases of the design process.

ARCH 312 Architectural Design Drawing III (3)
Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 305 studio to integrate drawing in all phases of the design process.

ARCH 314 Introduction to Architectural Drawing (2)
Skill development in conceptualization of forms and their relationships through observation and recording in freehand, graphic manner. Proportion, scales, light effect, value, texture, and various perspective techniques.

ARCH 315 Design Drawing III (2)
Projects, lectures, demonstrations, and exercises coordinated with studio projects to integrate drawing in all phases of the design process. Lessons in diagramming of design concepts and planning and presenting design solutions. Prerequisite: ARCH 211; corequisite: ARCH 300.

ARCH 316 Design Drawing IV (3) Zuberbuhler
Lectures, demonstrations, and exercises to develop drawing skills and techniques applicable to architectural design problems. Topics include advanced perspective construction, shade and shadow calculations, descriptive geometry, topographical manipulation, and additional appropriate topics at the request of the class. Prerequisite: ARCH 315.

ARCH 320 Introduction to Structures I (3)
Statics - Force analysis; the study of external forces and force systems and their analytical solutions as applied to bodies at rest (equilibrium). Topic areas include beams, trusses, determinate frames, and load tracing.

ARCH 321 Introduction to Structures II (3)
Strength of Materials; the study of the properties of materials and cross-sectional shapes of structural elements with respect to their effectiveness in resisting stresses. Topic areas include stress and strain, section properties, analysis and design of beams and columns. Prerequisite: ARCH 320.

ARCH 322 Introduction to Structures III (3)
Elementary Structural Design; synthesis of the previous structures coursework with applications to design of determinate timber and steel structures. Examination of forces on buildings; snow, live loads, wind, and earthquake. An introduction to concept of continuity. Prerequisite: ARCH 321.

ARCH 331 Environmental Control Systems (3) NW Heerwagen, Loveland
Description of thermal comfort needs and the means by which buildings can be designed to satisfy those needs. Consideration of how climate determines building forms, site analysis and planning vis-a-vis the local climate, basic heat transfer mechanisms, and design strategies for overcoming heat loss through the building envelope.

ARCH 332 Construction Materials and Assemblies I (3)
Lectures and readings pertaining to a survey of residential and light-commercial construction materials, assemblies, and techniques of assembly.

ARCH 350 Architecture of the Ancient World (3) VLPA
Architectural history in the Western world from beginnings to AD 550.

ARCH 351 Romanesque, Gothic, and Renaissance Architecture (3) VLPA Hildebrand
Architectural history in the Western world from AD 550 to 1750. Recommended: ARCH 350.

ARCH 352 History of Modern Architecture (3) VLPA Ochsner
Architectural history in the Western world from 1750 to the present. Recommended: ARCH 351.

ARCH 360 Introduction to Architectural Theory (3) I&S/ VLPA
Function of architectural theory in comprehending and ordering various human purposes in architecture, types of architectural purpose, and types of theories. Current concerns.

ARCH 380 Computers in Architecture (3)
Laboratories, lecture, and demonstrations to introduce computing in environmental design and planning. Offered: ASp.

ARCH 400 Architectural Design IV (6)
Offers studio problems in non-residential building design to advance student’s understanding of the ideas and technologies of architecture. Prerequisite: ARCH 302.

ARCH 401 Architectural Design V (6)
Offers studio problems in non-residential building design to advance student’s understanding of the ideas and technologies of architecture. Prerequisite: ARCH 400.

ARCH 402 Design/Build Studio (6)
Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program requirements specified in case studies. Offered: jointly with CM 402; W.

ARCH 403 Architectural Problems (6)
ARCH 410 Introduction to Architectural Photography (3/5) VLPA Stamets
Basic elements and processes of architectural photography to include camera controls, exposure technique, photo processing, and
fundamental principles of photographing architecture. Student must provide own 35 mm (or larger) camera with manual operating controls. Offered: AWS.

ARCH 412 Architectural Illustration and Presentation (3)
Issues, conventions, and techniques used in architectural renderings, including line drawings, shaded drawings, use of color, composition, organization, advanced perspective, scale figures, entourage, reflections, and media. Prerequisite: ARCH 315.

ARCH 413 Architectural Photography Projects (3)
Students develop in-depth photo essays relating to architecture, the urban movement, or landscape design following the principles introduced in ARCH 313. Lectures, seminar, and discussion. Prerequisite: ARCH 313.

ARCH 415 Architectural Sketching (3)
Exercises in freehand representational drawing using charcoal, graphite, and conte crayon with emphasis on line, proportion, values, and composition. Studies progress from geometric to nonegometric forms. Recommended: either ARCH 210 or ART 104.

ARCH 416 Freehand Drawing and the Digital Realm (3) VLPA Stevens
Explores the potential role of freehand drawing in digital media. Students use stylus and tablet to draw in print and photo-imaging programs, combining the flexibility of digital tools with the rich traditions of freehand drawing. Focus alternates between Internet as context for image making and printed output. Offered: AW.

ARCH 417 Advanced Topics in Digital Drawing (3) VLPA Stevens
Provides a context for developing an individual project exploring drawing or painting in digital media. Explores advanced issues in digital image creation and production through a book, film, or Web project. Each student completes and publishes a project during the quarter. Prerequisite: ARCH 416. Offered: Sp.

ARCH 418 Watercolor Drawing (3)
Introduction to the principles and practice of using transparent watercolor for the naturalistic representation of objects, people, and interior and exterior space. Recommended: either ARCH 210 or ART 104.

ARCH 420 Structural Design I (4) NW
Reinforced concrete fundamentals; establishes basics of reinforced concrete behavior and introduces methods of design used in current engineering practice. Basic mechanics of structural concrete introduced in examining bending, shear, and axial forces. Topic areas include beams, slabs systems, columns, foundations, retaining walls, and an introduction to prestressed concrete. Prerequisite: ARCH 322.

ARCH 421 Structural Design II (4)
Design of steel structures.

ARCH 422 Structural Design III (4)
Design of reinforced concrete structures.

ARCH 426 Structural Unit Masonry (3) Lebert
Structural behavior and design of reinforced brick, tile, and unit masonry structures. Prerequisite: CEE 381. Offered: jointly with CEE 455.

ARCH 430 Materials and Processes (3) Vanags
Lectures, field trips, and laboratory sessions directed toward the nature, potentials, and limitations of a variety of materials (wood, metal, plastics, inorganic cementing materials, minerals, rocks, and clay) and the processes involved with their production, fabrication, and system compatibility.

ARCH 431 Environmental Control Principles (3) Heerwagen
Daylighting of buildings, reducing noise and enhancing sound for communication, and regulating heat transfer for occupant thermal comfort; description of passive means for environmental control, including presentation of scientific explanations and design guidelines for utilizing these means; design guidelines are intended for use in the preliminary schematic design phase. Offered: AW.

ARCH 432 Construction Materials and Assemblies II (3)
Lectures and readings pertaining to a survey of materials, assemblies, and techniques of assembly of concrete and steel frame, commercial exterior envelope, and interior partitioning building constructions systems. Prerequisite: either ARCH 400 or CM 313.

ARCH 433 Active Control Systems for Building Operation (3) NW Heerwagen
Electrical, mechanical (HVAC), plumbing, and fire safety systems for buildings. Descriptions of what these systems do, where they are used, how they are integrated into the overall building design; rules of thumb, design strategies, and short cuts for anticipating system design and use. Prerequisite: either ARCH 331 or ARCH 431.

ARCH 434 Color and Light (3) Millet
Lectures, demonstrations, exercises, and projects focusing on the use of color applied to the three-dimensional architectural context. Color theory is explored with the multiple effects of changing light.

ARCH 435 Principles and Practices of Environmental Lighting (3) Millet
Perception-based approach to principles of natural and artificial lighting. Practical considerations of lighting involving environmental evaluations, calculations and the use of lamps and fixtures. Sketch and model studies for applications. Impact of lighting design on energy conservation. Relation of lighting design process to architectural design concepts. Prerequisite: either ARCH 331 or ARCH 431.

ARCH 436 Building Acoustics (3) NW Heerwagen
Description of principles and practices for manipulating and enhancing sound in buildings. Information about sound behavior and the organization of architectural elements (deployment of design features, including various geometries and materials) for the control of sound in enclosed spaces and between adjacent spaces.

ARCH 437 Passive Thermal Controls (3) NW Heerwagen
Devices for achieving energy-efficient buildings, analytic methods for evaluating likely thermal performances of buildings and building envelopes, resistance and capacitance of building materials, air flow through and around buildings, energy codes and industry standards, and strategies for integrating analytic techniques and guidelines into the architectural design process. Prerequisite: either ARCH 331 or ARCH 431.

ARCH 439 Light Frame Building Assemblies (3) Vanags
Fundamentals of light-frame construction from soils examination, foundation systems to framing systems, and the integration of electrical, plumbing, and heating/cooling into the structure. Prerequisite: either ARCH 332 or CM 313.

ARCH 442 Africa and Middle East Seminar (3) VLPA McLaren
Advanced introduction to colonial and postcolonial architecture in Africa and the Middle East, beginning with the initial European colonization in the mid-19th century. Provides a historical understanding of the formation of distinctive regional and/or national identities in the architecture of these regions. Offered: Sp.

ARCH 443 Iberoamerican Architecture I: Meso-America (3) VLPA Palleroni
Advanced introduction to precolombian, colonial, and postcolonial architecture and urbanism of Mexico and Meso-America. Using methodologies drawn from culture studies, covers approximately
four distinct periods spanning from Teotihuacan to the late twentieth century.

ARCH 444 Iberoamerican Architecture II (3) VLPA Palleroni
Advanced introduction to postcolonial and modern architecture and urbanism of the Iberian peninsula and Latin America. Using methodologies drawn from culture studies, covers the cultures of Spain, Portugal, and Latin America after the period of colonization and the nature of their continued relationship.

ARCH 445 South Asian Architecture I (3) VLPA Prakash
Advanced introduction to precolonial architecture and urbanism of South Asia. Using methodologies of culture studies, examines select Hindu, Buddhist, and Islamic case studies on a comparative genealogy.

ARCH 446 South Asian Architecture II (3) VLPA Prakash
Advanced introduction to colonial and postcolonial architecture and urbanism of South Asia. Using methodologies of culture studies, covers 1800 to present, emphasizing the past 50 years since India’s independence in 1947.

ARCH 447 Universal Design (3) I&S Kiyak
Addresses implications of recent social trends and legislation (e.g., American with Disabilities Act, extended lifespan, elimination of mandatory retirement, changing workforce) on design; emphasizes importance of integrating accessibility design concepts, including related laws and codes, into diverse design projects, in order to make environment usable by broad cross-section of people. Offered: A.

ARCH 450 Modern Architecture and the Decorative Arts (3)
VLPA Anderson
History/theory seminar investigates parallel and interactive developments in European architecture and the decorative arts from 1870 to 1930. Examines the production of designers as well as the economic, political, and cultural circumstances that affected their work.

ARCH 451 Traditional Chinese Architecture and Gardens (3)
I&S/VLPA
Introduction to Chinese architecture (palaces, homes, temples, tombs), urban planning, and gardens; each area examined in terms of techniques of production, visual styles, historical development, and relationship to traditional Chinese cultural values. Recommended: some background in Chinese art, history, language, or literature.

ARCH 452 History of Architecture in Seattle and Environs (3) I&S Ochsner
Historical development of architectural in Seattle and surrounding areas from the nineteenth century to the present, also touching on issues of urban design and historic preservation.

ARCH 453 Japanese Architecture (3) VLPA
Survey of Japanese architecture from its origins to modern times. Although Shinto architecture, tea houses, gardens, and modern developments are discussed, the primary focus is on the development of Japanese Buddhist architecture. Offered: jointly with ART H 419.

ARCH 454 Greek Architecture (3) VLPA
Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ART H 446/CL AR 446.

ARCH 455 Special Studies in Gothic Art and Architecture (3)
VLPA Hildebrand
Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Offered: jointly with ART H 455.

ARCH 456 Nineteenth-Century Architecture (3) VLPA Clausen
From late eighteenth-century French rationalists, Neoclassicists, to fin de siecle Vienna and Paris. Includes theorists such as Ruskin, Viollet-le-Duc, and Semper; major movements, such as the Arts and Crafts, and the French Ecole des Beaux-Arts method of design. Offered: jointly with ART H 490.

ARCH 457 Twentieth-Century Architecture (3) VLPA Clausen
Architecture in the twentieth century, mainly in Europe and the United States. Traces roots of Modernism in Europe in the 1920s, its demise (largely in the United States) in the 1960s and recent trends such as Post-Modernism and Deconstructivism. Offered: jointly with ART H 491.

ARCH 459 Architecture Since 1945 (3)
VLPA Clausen
Theories and forms in architecture from the end of World War II to present. Includes new wave Japanese architects, recent Native-American developments, and non-Western as well as Western trends. Offered: jointly with ART H 493.

ARCH 460 Design Theory and Analysis (3) I&S/VLPA Dee, Seligmann
Problematical nature of philosophies of architecture; interaction of philosophical concepts and architectural form and expression. Fundamentals of architectural criticism.

ARCH 461 Recent Developments in Architectural Theory (3)
I&S/VLPA
Concentrates particularly on developments that spring from recent work in the epistemology of science and in philosophy.

ARCH 462 Spatial Composition in Architecture (3) Palleroni
Advanced introduction to compositional strategies in architecture. Drawing on a historical survey of the development of Western Architecture, the seminar investigates different compositional strategies and their relationship to cultural values and systems of meaning. Intended as complement to the design studio.

ARCH 463 Theories of Representation (3) Anderson
Seminar focusing on the development of representational techniques in western architecture from antiquity to the present which seeks to discover how these techniques have affected the realization and interpretation of architecture. Prerequisite: ARCH 350; ARCH 351; ARCH 352.

ARCH 475 Residential Architectural Practice (3)
Lectures and exercises focused on the operation of a professional architectural practice specializing in residential and smaller-scale projects. Topics include: clients and program development, design strategies and space planning, site considerations, regulatory constraints, consultants, contractors, specialized construction methodology, and issues, ethics, and liability specific to residential project delivery.

ARCH 476 Design and the Uniform Building Code (3)
Lectures, case studies, and exercises to provide a detailed review of non-structural sections of the Uniform Building Code (UBC) including designer responsibility, code background, purpose, and requirements based on occupancy, construction type, and building design features. Prerequisite: either ARCH 302 or CM 313.

ARCH 478 CAD and Working Drawings (4)
Intensive introduction to computer-aided design systems for developing construction documentation (working drawings). Lectures and exercises focus on learning the methodology for using CAD to efficiently prepare working drawings, as well as discussions regarding industry recognized standards and current technology used in the preparation of documentation. Prerequisite: ARCH 380; CM 313. Offered: ASpS.
ARCH 481 3D Modeling and Rendering (3) Johnson
Lectures and weekly exercises focus on understanding and applying the underlying principles of 3D computer graphics and rendering software. Topics include user-interface, data creation and modeling, lighting models, smoothing, texture mapping, ray tracing, radiosity, animation, and solid modeling. Prerequisite: ARCH 380. Offered: ASp.

ARCH 482 Web Weaving (3) Gross, B. Johnson
Examines the function, limitations, and uses of primary World Wide Web technologies and fundamental Web site design and implementation. Participants develop hands-on design/build expertise for Web site design, implementation, and maintenance using readily available tools and techniques. Looks beyond today and explores emerging Internet technologies. Offered: F.

ARCH 483 Design of Virtual Environments (3)
Explores through a blend of technical exercises constructing computational artifacts, readings, and discussions of relevant literature, the possibilities of online virtual environments. Incorporates a term project or paper based on exercises and readings. Offered: W.

ARCH 484 Design Computing Seminar (3) E. Do
Weekly colloquium and discussion forum. Discusses design computing research and report on ongoing project progress, with demonstrations and guest speakers. Explores design computing, design thinking and design process, and inventing new computer aided tools for design. Offered: W.

ARCH 485 Digital Craft Workshop: Advanced Projects in CAD (3)
Advanced topics for students who have completed one or more design computing courses and wish to develop a project further. Offered: W.

ARCH 486 Computer Graphics Programming for Design (3)
Do, Gross
Introduction to fundamental concepts of computer programming for design applications with an emphasis on interactive graphics. Basic control and data structures for interactive graphics programming; weekly exercises with term project. Significant lab time required. Offered: ASp.

ARCH 488 American Architecture (3) VLPA Clausen
American architecture from indigenous native American traditions to the present. Offered: jointly with ART H 488.

ARCH 493 Rome Preparation Seminar (2)
Seminar dealing with history, culture, topography, and customs of Rome, Italy. Required for students enrolling in ARCH 495, ARCH 496, or ARCH 497.

ARCH 495 Architectural Studies Abroad (9)
Urban history and development of the city of Rome through firsthand studies of its topography and morphology. City’s more recent quarters become subject of group research relative to problems and potentials of growth and future development. Students may be registered concurrently in an appropriate studio section. Prerequisite: ARCH 493.

ARCH 496 Architectural Studies Abroad (9)
Studio-oriented projects and application of experience gained during preceding program. Seminars held in collaboration with Italian students, professionals, and educators. Prerequisite: ARCH 495.

ARCH 497 Italian Hilltowns (9) I&S/VLPA Zarina
Introduction to origins and development of built forms prevalent in the hilltowns of central Italy, a comparative analysis of domestic architecture in the agricultural context of the confluence zone of Tuscany, Umbria, and Latium and a historical survey of fortresses, castles, palaces, villas, and gardens of upper Latium. Prerequisite: ARCH 493.

ARCH 498 Special Projects (1-12, max. 12)
Instructor-initiated and department-approved systematic study and offering of specialized subject matter. Topics vary and are announced in preceding quarter.

ARCH 499 Undergraduate Research (1-6, max. 6)
ARCH 500 Architectural Design Studio I (6)
Architectural design, with emphasis on development of professional skills in design synthesis; specifically the design of institutional buildings in response to a context that is significant for historical and urban characteristics. Analysis includes programming, typology, site and place, and influence of regulatory measures on building form. Concurrent with ARCH 590. Offered: A.

ARCH 501 Architectural Design Studio II (6)
Architectural design, with emphasis on development of professional skills in design synthesis, specifically, the unique qualities of materials, construction technology, and assembly details in the expression of architectural ideas. Analysis includes the influence of regulatory measures on building form. Concurrent with ARCH 570. Offered: W.

ARCH 502 Architectural Design Studio III (6)
Architectural design, with emphasis on development of professional skills in design synthesis, specifically the comprehensive integration of building systems within an ordered design concept. Analysis includes the planning and integration of structural systems, building service systems, and building envelope design as an appropriate architectural expression. Concurrent with ARCH 530. Offered: Sp.

ARCH 503 Architectural Design Studio Options (6)
Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

ARCH 504 Architectural Design Studio Options (6)
Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

ARCH 505 Architectural Design Studio Options (6)
Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

ARCH 506 Advanced Architectural Studies (6)
Advanced experimental studies dealing with significant architectural relationships that involve scholarly investigation, development, and presentation of results.

ARCH 520 Advanced Wood Structures Design (3) Albrecht
Design methods related to wood structures. Nature of wood as a building material, plywood, glued laminated wood structures, timber piles and pile foundations, pole buildings, and conventional wood building framing.

ARCH 529 Seminar in American Architecture (5) Clausen
Topics vary. Offered: jointly with ART H 592.

ARCH 530 Integrated Building Systems (3) Miller
Discusses strategies for ordering separate and discreet building systems into integrated architectural schemes. Focuses on systems that affect architectural expression and resolution in buildings including: structural, environmental control, materials, and assembly with an emphasis on sustainable building design. Concurrent with
ARCH 502. Offered: SP.

ARCH 535 Graduate Seminar: Study Topics in Environmental Lighting (3) Miller
Focus on individual student projects involving research and design for lighting.

ARCH 540 Evolution and Aesthetics (3) Hildebrand
Exploration of new views toward the theory and philosophy of architectural aesthetics in which responses are seen as driven, in part, by predilections contributive to biological survival and evolution.

ARCH 551 Scandinavian Architecture of the Nineteenth and Twentieth Centuries (3) Nyberg
Introduction to the contribution of Scandinavian architecture to early functionalism with emphasis on its relationship to neoclassicism and vernacular architecture.

ARCH 553 Special Studies in Architecture in the Ancient World (3) Bosworth
Study and critical analysis of a selected topic from classical or preclassical periods. Prerequisite: ARCH 350.

ARCH 554 Special Studies in Modern Architecture (3) Pundt
Study and critical analysis of a selected number of distinguished professionals (architects, planners, educators, critics) and their contributions to the evolution of modern and contemporary architectural practice and thought.

ARCH 556 The Arts & Crafts Movement and American Architecture (3) Ochsner
Historical development of the arts and crafts movement focusing primarily on its influence on American architecture from 1870 to the present.

ARCH 557 Neoclassicism and Romanticism in Europe and America (3) Pundt
Study and critical investigation of European and American architecture and urban design from 1750 to 1850.

ARCH 558 Seminar in Twentieth-Century Architecture (3/5) Clausen
Specific focus changes from quarter to quarter. Prerequisite: graduate standing with background in architecture, architectural history, or permission of instructor. Offered: jointly with ART H 591.

ARCH 559 American Utilitarian Architecture (3) Hildebrand
Significant American environmental design efforts arising from utilitarian needs, e.g., factories, bridges, skyscrapers, and associated technical building innovations.

ARCH 560 Graduate Seminar on Architectural Theories (3) Dee, Nyberg, Seligmann
Recent developments in architectural theory, urban design theory, criticism, and the methodology of criticism.

ARCH 561 Urban Design Theory (3)
Study of development of nineteenth- and twentieth-century urban design theories and parallel developments in architecture and urban planning. Theoretical premises are related to current practices of urban design in various sociopolitical contexts, European as well as American. Evolutionary nature of theory emphasized. Prerequisite: URBDP 479 or permission of instructor.

ARCH 562 Regionalism (3) Nyberg
Exploration of design ideas that address the cultivation of regional character by acknowledging the commonplace, including both the landscape and its buildings. The many disruptive forces that threaten the possibilities of local culture are also considered from a political, social, and economic point of view.

ARCH 563 Graduate Seminar in Architecture and Cultural Theory (3) Prakash
Study of contemporary cultural studies and postcolonial writings in terms of their impact on architectural theory and practice. Topical seminar based on reading and individual research. Offered: W.

ARCH 570 Design Development (3) Miller
Lectures and case studies emphasizing the design development phase of architectural practice.

ARCH 571 Project Feasibility (3)
Social, political, and economic factors affecting the location, design, financing, construction, and marketing of buildings.

ARCH 572 Specifications and Contracts (3) Brown
Detailed organization and composition of contracts, specifications, and related contract documents.

ARCH 573 Professional Practice (3) Rees
Operation of an architectural office and professional practice.

ARCH 574 Design and Construction Law (3)
Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington state law. Offered: jointly with CM 500.

ARCH 576 Community Leadership Practices (4) Sutton
Examines how to facilitate community design processes. Explores theories and methods of participation and applies them to creating community visioning tools. These tools are put to use during the spring charrette when city officials, neighborhood residents, K-12 students, and others create a shared vision for their community. Offered: W.

ARCH 577 Ethical Practice (3) Sutton
Helps students develop ethical reasoning skills. Examines the sociology of professional practice leading to and understanding of the dilemmas associated with serving a diverse society. Reviews exemplary case studies in ethical practice. Communication skills developed through writing and dialogue, and creation of an exhibit exploring an ethical issue. Offered: W.

ARCH 578 Case Studies in Contemporary Architectural Practice (3)
Presentations and discussions by local architectural firms examining the issues that influence building design and project delivery in contemporary architectural practice. Focuses on understanding the issues as opportunities rather than impediments to good design. Class visits a different architectural firm each week for an in-depth review of current projects.

ARCH 581 Historic Preservation of Architecture, USA (3) Pundt
American achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

ARCH 582 Technical Issues in Preservation Design (3) Sivinski
Issues, practices, and procedures involved in preservation and reuse of old and historic buildings. Technical and esthetic means by which practicing professionals approach the analysis, interpretation, and resolution of problems such work raises. Emphasis on recent and local projects and related experiences.

ARCH 583 History of Historic Preservation in Europe (3) Pundt
European achievements in historic preservation and restoration of
ARCH 587 Theory of Design Computing (3) Gross
Examines the relationship between theory of design and computational tools for practice. Explores how the emergence of computers as a mainstream tool in design has already changed architectural practice. Discusses how, as with other technologies that revolutionized the practice of architecture, information technologies carry hidden implications about design process and products. Offered: A.

ARCH 588 Research Practice (3)
Provides the opportunity for a guided preliminary exploration and refinement of a research topic, prior to thesis proposal. Weekly seminar meetings focus on student work with regular presentations and discussions. Offered: W.

ARCH 590 Urban and Preservation Issues in Design (3)
Introduction to recent theory and practice in the fields of urban design and historic preservation primarily in North American urban contexts, including examples of recent projects presented by practicing professionals.

ARCH 591 Architecture in the Landscape (3) Loveland
Advanced introduction to the relationships between buildings and places in the landscape with an emphasis on western concepts of nature. A taxonomy of place as nature is developed. Ways in which the architect can design places that landscape taxonomy are explored.

ARCH 593 Residential Design: Methods and Practices (3)
Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods, and practices. Offered: jointly with URBDP 574.

ARCH 595 Master’s Thesis Studio and Pre-Design (3)
Preparation of master’s design thesis pre-design document within a structured, faculty supervised setting. Student product covers programming; site analysis; land use, building, and accessibility code compliance; building systems selection (material, structural, and mechanical); cost implications; conceptual approach and schematic design exploration. Required for admission to the master’s thesis design studio. Offered: AW.

ARCH 596 Fieldwork in Professional Practice (*, max. 9)
On-location study under the supervision of a practicing professional involved in an aspect of environmental design.

ARCH 598 Special Topics for Graduate Students (1-6, max. 6)
Systematic study of specialized subject matter. Topics vary depending on current interest and needs, and are announced in the preceding quarter.

ARCH 599 Thesis Preparation (3) Do
Explores development of a proposal for thesis-level research. Participants identify a research area, find relevant literature and prepare an annotated bibliography, articulate a specific question within the research area, and write, present, and defend a proposal. Participants may use this course to develop a thesis proposal. Offered: Sp.

ARCH 600 Independent Study or Research (*)
Credit/no credit only.

ARCH 700 Master’s Thesis (*)
Credit/no credit only.

Built Environment

Course Descriptions

B E 550 Colloquium-Practicum on Research-Practice and Teaching-Learning (1, max. 6)
A synthetic and interdisciplinary forum for the presentation and peer critique of faculty and student research and practice projects, and a venue for pedagogical issues and skills for effective teaching and learning.

B E 551 The Contemporary Built Environment (3)
Covers major or landmark cases of complex built environment projects, emphasizing the multiple dimensions involved and their interconnections.

B E 552 Theories of Knowledge and the Built Environment (3)
Systematic examination of alternative epistemological frameworks applicable to studying the built environment; examinations of their differences and similarities and of the possibility of a comprehensive, pluralistic approach.

B E 553 Ethics in Practice, Research, and Teaching (3)
Preparation for ethical challenges facing professional practice, research, and teaching in the built environment. Coverage of general and professional ethics, and examination of principles and rules and application through case studies.

B E 598 Special Topics (1-6, max. 15)
Systematic study of specialized subject matter. Topics vary depending on current interest and needs, and are announced in the preceding quarter.

B E 800 Doctoral Dissertation (*, max. 30)
Credit/no credit only. Offered: AWSpS.

Construction Management

116 Architecture

Construction management is a diverse discipline focused on the delivery of projects that compose the world's built environment. Included are the determination of project requirements, management of design, procurement of materials, and management of the construction of the project within cost, time, and design parameters. In terms of dollar value output, the construction industry is the largest single production activity in the U. S. economy — accounting for almost 10 percent of the gross national product. The construction industry is heterogeneous and enormously complex. The major classifications of construction differ markedly from one another: residential, commercial, industrial, and infrastructure, as well as specialty such as electrical, mechanical, framing, excavation, and roofing. Construction Management is the study of how projects are conceived, designed and built; the types of materials and methods used; techniques for estimating the cost of construction; design and contract law; construction accounting; oral and written communications; safety requirements; project planning, and project management.

Undergraduate Program
Adviser
116 Architecture, Box 351610
206-543-6377
uwcm@u.washington.edu

The Department of Construction Management offers the following programs of study:

- The Bachelor of Science in Construction Management degree

Students complete the first two years of study as an undeclared major in the College of Arts and Sciences or a community college.
During these two years, students complete program prerequisite requirements. Upon admission to the major, students take a prescribed curriculum to meet degree requirements.

**Bachelor of Science**

**Suggested First-and Second-Year Courses**: M E 123; PHY 114, PHY 115, PHY 117, and PHY 118; CHEM 120; ECON 100; ENGL 131; ESS 101; MATH 112, MATH 124, or MATH 145; ACCTG 215 and ACCTG 225, CM 250, COM 220, ENGL 281, MGMT 200, QMETH 201.

**Department Admission Requirements**

Completion of a minimum of 90 credits in the following categories (courses must be completed by the beginning of autumn quarter to be eligible for admission that quarter):

- **Construction Science**: ME 123; ACCTG 215 and 225; MGMT 200.
- **Business and Management**: ACCTG 215 and 225; MGMT 200.
- **Individuals & Societies (I & S)**: ECON 100, 200, or 201; 10 additional I & S credits from UW Areas of Knowledge list (CM 250 recommended).
- **Natural World (NW)**: PHY 114, PHY 115, PHY 117, and PHY 118: MATH 112, MATH 124, or MATH 145 or Q SCI 291; ESS 101; QMETH 201; 10 additional NW credits from UW Areas of Knowledge list (CHEM 120 or ENV S recommended).
- **Language Skills**: 5 credits from English composition list; 5 credits from “W” courses or English composition list (ENGL 131 and ENGL 281 recommended).
- **Visual, Literary & Performing Arts (VLPA)**: COM 220; 5 additional VLPA credits (from UW Areas of Knowledge list).

Preference is given to applicants who have successfully completed lower-division prerequisite requirements. Admission decisions are based on an applicant’s academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation. Completion of prerequisite requirements does not guarantee admission.

Departmental application deadline: April 1, for the following autumn quarter. Selection for acceptance into the program, which begins autumn quarter, is made by early May, and all applicants are notified of the admission committee’s decision shortly thereafter. Because each application is valid only once, a student whose application for admission is denied must reapply if consideration is desired in any subsequent year.

**Major Requirements**

91 credits as follows:

- **Foundation Courses (69 credits)**: ARCH 320, ARCH 321, ARCH 322; CM 310, CM 312, CM 313, CM 321, CM 322, CM 323, CM 331, CM 332, CM 333, CM 334, CM 410, CM 411, CM 412, CM 421, CM 423, CM 432, and CM 433.
- **Construction/Construction Science Electives (6 credits)**: CM 415, CM 420, CM 425 or ARCH 420
- **Business Electives (12 credits)**: CM 413 or upper division real estate or business courses offered by College of Architecture and Urban Planning or the Business School.
- **Capstone Experience (4 credits)**: CM 431

**Additional Degree Requirement**: A minimum of 2.5 cumulative GPA in upper-division college courses.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes**: The study of construction management requires an interdisciplinary curriculum that contains a mix of technical, managerial, and business courses to provide graduates with the essential skills needed to be successful in the construction industry. Oral and written communication skills are strengthened through written requirements and oral presentations. Construction management skill sets include the ability to read and interpret construction contract documents; the ability to determine appropriate methods for project construction and the proper sequence for each associated construction task; the ability to estimate project costs and time requirements; the ability to evaluate project site safety hazards and take action to minimize the potential for accidents occurring; an understanding of the legal framework associated with contract construction; and the ability to manage the myriad activities associated with constructing a project. Graduates pursue careers with construction companies, design firms, public agencies, homebuilders, consulting firms, real estate developers, and construction material suppliers.

- **Instructional and Research Facilities**: The Architecture-Urban Planning Library (located on the third floor of Gould Hall) houses construction management books and periodicals. Additional materials are located in the Engineering Library and the Foster Library (Business School). College resources include a 30-work station computer laboratory on the second floor of Gould Hall. Departmental resources include a student lounge in Room 242, Gould Hall. The lounge contains four computers and space for student collaboration.

- **Honor Options Available**: None offered.

- **Research, Internships, and Service Learning**: An internship is required for completion of the degree program. Every student is encouraged to seek summer employment in the construction industry, to provide a taste of real-world experience and an opportunity to work for a construction firm. While the department seeks to identify opportunities for internship positions, the responsibility for securing a position rests with each student.

- **Department Scholarships**: None offered.

- **Student Organizations/Associations**: Sigma Lambda Chi is a national student honor society for recognition of outstanding students majoring in construction management. Membership is offered only to those students who are in the top twentieth percentile of their class. Each year the student chapter conducts community service activities.

- **Associated Students in Construction (ASIC)** is a national student organization for several student chapters of national organizations: Associated General Contractors of America, National Association of Home Builders, and Mechanical Contractors of America. Activities include professional guest lectures, field trips, attendance at professional meetings and seminars, and community service.

**Of Special Note**:

**Dual-Degree Program**: The Department of Construction Management, in conjunction with the Department of Architecture, offers a five-year dual-degree program to provide students education in both the design and construction disciplines. Students must consult an adviser and apply to the Department of Architecture upon completion of their Architecture program prerequisites. To be admitted to the Construction Management program, students apply at the beginning of the spring quarter of the first year in the Architecture program. The five-year curriculum is a blending of the Architecture and Construction Management programs. Graduates of the dual-degree program receive both a Bachelor of Science in Construction Management and a Bachelor of Arts in Architectural Studies. Students interested in the dual-degree program are encour-
aged to consult undergraduate advisers in both departments.

**Graduate Program**

Graduate Program Coordinator  
116 Architecture Hall, Box 351610  
206-685-4440

**Master of Science in Construction Management**

The evening Master of Science in Construction Management degree program makes high-quality graduate education accessible to working professionals. All graduate courses are offered during the evening to accommodate people who work during the day. The curriculum was developed with industry input to provide graduates with the skills desired by the construction industry. The graduate curriculum has been structured to build upon the educational foundation gained in an undergraduate building-construction or construction-management curriculum. Students with different educational backgrounds will need to take prerequisite courses, as discussed below. Admission is competitive and students are admitted in autumn, winter, and spring quarters. Applications must be submitted by July 1 for autumn quarter, November 1 for winter quarter, and February 1 for spring quarter.

**Department Admission Requirements**

Admission to the Graduate School is granted by the Dean of the Graduate School. Application for admission is made to the Office of Graduate Admissions. The prospective student must hold a baccalaureate degree from an accredited college or university in the United States or its equivalent from a foreign institution. The applicant must submit a completed UW graduate application form and official transcripts from all previously attended colleges, universities, and institutes. A prospective student must present recent scores (within the past five years) from the Graduate Record Examination (GRE) that indicate a potential for successful completion of a Master of Science in Construction Management degree. The applicant should have at least a 3.00 GPA in the last 90 graded quarter hours, or last 60 graded semester hours. International applicants should refer to the Graduate School section of this catalog for English language testing requirements. In addition, the Department of Construction Management requires a statement of personal goals and three letters of reference. All applications are reviewed by the department’s Graduate Admissions Committee who make a recommendation regarding each applicant to the Dean of the Graduate School.

**Prerequisite Requirements:** All students admitted to the program who do not possess an undergraduate degree in building construction or construction management must complete the following prerequisite courses prior to admission into the graduate program or during their graduate studies: CM 410, CM 411, CM 421. All these prerequisite courses are offered during the day on a space-available basis with undergraduate students, or during the evening in the Construction Management Certificate Program offered by UW Extension. All students who do not have undergraduate degrees in building construction, construction management, engineering, or architecture must take the following prerequisites in addition to those previously listed: CM 310, CM 313, CM 320, CM 323, CM 331. Most of these prerequisites must be completed prior to admission into the graduate program.

**Prerequisite courses may be validated if similar courses are reflected on the student's undergraduate transcript or if the student desires to take a validation examination. Students desiring to take a validation examination should contact the department’s graduate program coordinator.**

**Graduation Requirements:** The Master of Science in Construction Management degree program requires completion of a minimum of 45 credits of course work with at least a 3.00 cumulative GPA and satisfactory completion of either a thesis or professional project. A maximum of 6 credits may be earned for a professional project, and a maximum of 9 credits may be earned for a thesis.

**Course Descriptions**

**CM 250 Construction and Culture (3) I&S Rolfe**  
Study of the evolution of modern building construction with emphasis on the relationship between the projects that have been built over time and the people who built them. Focuses on the development of building technology, equipment, and materials used by Western civilizations. Offered: Sp.

**CM 310 Introduction to the Construction Industry (3) Schaufelberger**  
Introduction to the construction process, including general overview of organization, relationships, practices, terminology, project types, procurement methods, industry standards, contract documents, and career opportunities. Offered: A.

**CM 311 Construction Documents (2)**  
Introduction to construction plans and specifications with emphasis on reading and interpreting them. Focuses on architectural/engineering drawings and associated specifications used in building construction. Prerequisite: CM 310; CM 313, which may be taken concurrently. Offered: A.

**CM 312 Construction Accounting (3) Goldblatt**  
Introduction to accounting for the contractor, placing emphasis on the analysis and use of financial statements and a job cost accounting system. Open to nonmajors on space-available basis. Offered: A.

**CM 313 Construction Methods and Materials I (4)**  
Introduction to basic building materials, with emphasis on techniques for assembly and utilization in residential and light construction, including materials such as concrete, brick, and wood. Offered: AS.

**CM 320 Construction Contract Documents (3)**  
Introduction to working drawings, specifications, and other documents designed to enable the student to read and interpret complete set of contract documents for residential and light commercial projects. Emphasis on the organization and uses of architectural/engineering drawings and specifications in the construction process. Offered: WS.

**CM 321 Mechanical Systems in Buildings (3)**  
Introduction to building heating, cooling, plumbing, and fire protection systems including aspects of design, construction, estimating, and problem solving. Offered: W.

**CM 322 Electrical Systems in Buildings (3)**  
Introduction to electrical construction including electrical distribution from generation to consumption, terminology, equipment and applications, electrical contract documents and estimating, and
CM 323 Construction Methods and Materials II (5)
Analysis of building methods for structural, non-structural, and design and use of temporary structures including method selection, sequencing, and coordination of speciality trades in commercial and industrial construction. Offered: W.

CM 331 Construction Estimating I (4) Abdel-Aziz
Introduction to the principles and techniques of estimating construction costs, with emphasis on quantity take-off and pricing elements of work. Offered: W.

CM 332 Construction Equipment Management (3) Schaufelberger
Study of the basic principles, practices, and techniques used in the construction industry for selecting and managing construction equipment. Focuses on understanding the time value of money, estimating equipment ownership and operating costs, selecting the proper equipment for specific construction tasks, and estimating equipment production. Offered: Sp.

CM 333 Construction Safety (3)
Explanation of requirements of the Occupational Safety and Health Act and other related federal and state legislation as applied to the building construction industry. Standards for accident prevention, hazard identification, and responsibility for compliance emphasized. Offered: A.

CM 334 Construction Surveying (2) Jacobson
Introduction to construction surveying including layout of construction features, distance and elevation measurement, and use and care of surveying equipment. Offered: Sp.

CM 350 History of Building (3) Rolfe
Historical survey of building techniques and materials as conditioned by environment, technical, economic, and social influences. Open to nonmajors. Offered: Sp.

CM 402 Design/Build Studio (6)
Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program requirements specified in case studies. Offered: jointly with ARCH 402; W.

CM 410 Construction Estimating II (5) Rojas
Principles and techniques for estimating commercial construction projects including a mock bid day exercise on a commercial construction project. Offered: A.

CM 411 Project Planning and Control (3) Pace
Introduction to the basic principles, techniques, and practices used as tools by contractors to plan, schedule, and control costs on building construction projects. Offered: A.

CM 412 Construction Practice (3) Rojas
Introduction to challenges of managing a construction organization. Focuses on ethical behavior, organizational behavior, human resources management, marketing, financial management, and risk management. Offered: Sp.

CM 413 Competitive Business Presentations (1) Schaufelberger
Study and development of skills needed to develop and deliver professional construction management presentations. Includes a series of workshops and practical exercises in construction presentation skills, teamwork, and leadership. Offered: A.

CM 415 Heavy Construction Practices (3) Schaufelberger
Introduction to heavy construction with emphasis on highway and bridge construction. Topics include: contract analysis, work breakdown, equipment selection, unit-price cost estimating, site logistics planning, and project scheduling. Offered: W.

CM 420 Temporary Structures (3) Nemati
Study of temporary structures used to support construction operations such as concrete formwork, scaffolding systems, shoring systems, cofferdams, underpinning, slurry walls, and construction dewatering systems. Offered: Sp.

CM 421 Project Management I (3)
Introduction to the organization, management, and administrative functions on construction projects including a hands-on and extensive case study of a commercial construction project, cost control, and introduction to the concepts of Value Engineering, partnering, and Total Quality Management. Offered: W.

CM 422 Computer Applications in Construction (2)
Introduction to the use of automated programs for planning, scheduling, and controlling construction projects. Focuses on the use of Primavera Project Planner software. Offered: A.

CM 423 Construction Law (3) Goldblatt
Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Washington state law is emphasized. Entry code required. Open to nonmajors on space-available basis. Offered: Sp.

CM 425 Concrete Technology (3) Nemati
Introduction to the properties and behavior of concrete. Focuses on uses of concrete as a building material and new techniques for concrete construction. Offered: W.

CM 431 Project Management II (4)
Capstone project using case studies to apply skills, knowledge, techniques, and concepts developed in prior courses. Emphasis on the concept of integrated project management, including cost estimating and bidding, scheduling, cost control, safety, project organization, and documentation. Offered: Sp.

CM 432 Soils and Foundations (3) Daniali
Origin, classification, and physical properties of soil as used in engineering and construction applications, together with loads and stresses of soil on, and from, the more common types of engineering structures. Offered: AS.

CM 433 Construction Labor Relations (4) Goldblatt
Introduction to construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Offered: W.

CM 454 Real Estate Finance (4) Rolfe
Introduction to financing and appraisal of real estate projects, including a survey of capital markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Offered: W.

CM 455 Real Estate Development (5) Rolfe
Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Offered: A.

CM 456 Real Estate Investments (5) Rolfe
Analysis of private and public real estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in 453, 454, and 455. Prerequisite: either CM 454 or CM 455. Offered: Sp.

CM 481 Facility Life Cycle 1: Planning (3)
Introduction to facility management. First in sequence of three built
around the principle of the facility life cycle. Defines key terms. Examines topics such as ethics, business context, budgets, cost analysis, and strategic planning. Students work in online teams to develop a course-final project.

CM 482 Facility Life Cycle 2: Design and Construction (5)
Second in sequence of three built around the principle of the facility life cycle. Covers design basics, cost estimates, building materials, project management, and construction administration. Students establish a mentor relationship with a professional facility manager and interview three guest speakers, experts in their fields.

CM 483 Facility Life Cycle 3: Relocation and Operational Issues (4)
Final in sequence of three built around the principle of the facility life cycle. Provides an overview of issues related to facility operations and maintenance, including occupancy and start up, inventory and staff management, relocation, disaster planning, emergency preparedness, and security.

CM 485 Facility Management Studio (6)
Applies skills learned through the three facility life cycle courses to the completion of a project that demonstrates the ability to identify and resolve facility management issues. Students are matched with a client in their region.

CM 498 Special Topics (1-10, max. 20)
CM 499 Undergraduate Research (*, max. 12)
Individual or small-group studies in which students may select topics with approval of faculty sponsor and department.

CM 500 Design and Construction Law (3) Goldblatt
Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington state law. Offered: jointly with ARCH 574. Offered: Sp.

CM 505 Advanced Integrated Computer Applications (3) Rojas
Study of management information systems used in the construction industry. Emphasis on the utilization of current state-of-the-art integration of Computer Aided Design (CAD), scheduling (including advanced concepts such as resource leveling, schedule compression, and cash flow projections), and estimating programs. Offered: S.

CM 510 Advanced Construction Techniques (3) Nemati
Study of techniques and practices used in complex construction projects, including industrial and high-rise structures, building renovation, and tenant improvements. Offered: A.

CM 515 Innovative Project Management Concepts (3) Abdel-Aziz
Study of the process for delivery of public-private infrastructure projects and risk analysis techniques used in economic/financial project studies. Focuses on understanding public-private project delivery systems, feasibility studies, project financial and economic modeling, and quantitative risk analysis techniques. Offered: W.

CM 520 Construction Procurement Systems (3) Schaufelberger
Study of the different methods used in the procurement and delivery of projects in the construction industry including lump sum, unit price, cost-plus, design-build, and construction management contracts. Offered: A.

CM 525 Cost Analysis and Management (3) Pace
Study of cost management procedures applicable to the building process from the conceptual phase through owner operations, including conceptual estimating, project cost analysis and control, and value engineering and life-cycle costing. Offered: W.

CM 545 Real Estate Development (3) Leahy
A study of the technical issues involved in developing real-estate projects. Tracks project development from initial conception through closing of the sale. Emphasizes the steps and processes involved in pursuing, analyzing, and closing a real-estate purchase. Offered: A.

CM 550 Residential Project Development (3) Leahy
Study of the financial, technical, and management activities and environmental impact regulations and studies associated with the development of residential projects, including business and construction practices and marketing strategies for continued profitable operation of a residential construction firm. Offered: Sp.

CM 555 Construction Firm Management I (3) Schaufelberger
Management of construction company including organization, corporate structure, operation procedures, marketing, and human resources management. Emphasis on safety and loss prevention management, insurance and risk management, financing, accounting, marketing construction services, and bonding requirements for construction company. Other topics include individual and corporate planning and process of strategic planning. Offered: W.

CM 560 Construction Firm Management II (3) Huppert
Examination of the business practices, including market feasibility studies, related to use of Management Information Systems (MIS) in a construction company. Offered: Sp.

CM 565 Managing International Projects (3) Schaufelberger
Study of processes involved in the selection, acquisition, and management of international construction projects. Emphasis is placed on examining common problems associated with managing construction projects outside the United States, identifying risks involved, and discussing possible solutions. Offered: Sp.

CM 570 Facilities Management (3) Enam
Major issues involved in facilities management: facilities planning, financial planning, real estate management, interior space planning and management, facilities operation and maintenance, and emergency preparedness. Offered: A.

CM 580 Temporary Structures (3) Nemati
Study of materials, methods, and techniques associated with temporary structures used in various construction operations, such as concrete formwork, scaffolding, underpinning, cofferdams, slurry trenches, earth-retaining structures, and dewatering systems. Offered: W.

CM 582 Heavy Construction Estimating (3) Abdel-Aziz
Study of the principles used in developing cost estimates for heavy construction projects. Includes interpretation of contact documents, quantity take-off, pricing, and preparation of unit-price bid documents. Emphasizes developing cost estimates for highway projects. Offered: S.

CM 584 Marine Construction (3) Daniali
Study of the materials, methods and techniques associated with construction of projects in marine environments, including the impact of site conditions on the selection of appropriate construction techniques. Emphasizes equipment and crew selection, productivity and cost estimation, and construction sequencing. Offered: A.

CM 586 Utility Systems Construction (3) Schaufelberger
Study of the materials, methods, and techniques associated with construction of major utility systems, such as water, sewer, communications, electrical or natural gas. Includes construction of central utility plants as well as major distribution and collection.
systems. Offered: W.

CM 588 Construction Operations and Productivity (3) Rojas
Study of heavy construction operations with emphasis on productivity enhancement focusing on an integrated approach to planning, modeling, analysis, and design of construction operations, and the use of simulation models and other analytical tools. Offered: A.

CM 598 Special Topics (1-6, max. 6)
Systematic study and offering of specialized subject matter. Offered: AWSpS.

CM 600 Independent Study or Research (*, max. 6)
An in-depth independent investigation of some facet of construction management. Offered: AWSpS.

CM 700 Master’s Thesis (*, max. 10)
Offered: AWSpS.

Landscape Architecture

348 Gould

Undergraduate Program
Adviser
302 Gould, Box 355734
206-616-1876, 206-685-4006

The Department of Landscape Architecture offers the following programs of study:

- The Bachelor of Landscape Architecture (B.L.A) degree
- A minor in landscape architecture

The B.L.A. program provides a professional, accredited degree which enables graduates to practice successfully in design firms, nonprofit organizations, and public agencies.

Building from a liberal arts foundation, the B.L.A. program focuses on developing design knowledge, skills, and abilities through a series of nine environmental- and community-based design studios. The goals of the program are to provide students with a broad academic and professional exposure to landscape architecture and design so that their creative potential and professional growth are realized, and so that they may become leaders in the field. The education includes learning to conceptualize and design through practice on studio projects, fostering creativity, developing graphic and verbal communication skills, facilitating cognitive abilities, and developing applicable computer skills in the design process. Studios use individual, team-oriented, and interdisciplinary projects to develop strong interactive and evaluative skills.

Studio education applies knowledge gained in lecture courses which include historic and contemporary concepts in landscape architecture, design theory, site planning, construction, and communications, and elective courses in allied disciplines. The studio sequence addresses projects from detailed to regional scales, rural and urban contexts, and diverse cultures.

The five-year, 225-credit degree is structured around nine studios augmented by lecture courses. The program includes some opportunities for independent studies and work in professional settings.

Departmental courses are complemented by elective courses from other departments, including architecture, urban horticulture, soils, geology, urban design and planning, botany, and ecology. Landscape architecture studios are led by departmental faculty or members of the professional community. Several studios are taught jointly with faculty from other disciplines. Studios address specific areas of inquiry including basic design principles and processes, planting design, materials and craftsmanship, landscape planning for parks or natural areas, neighborhood and housing design, urban landscape design, ecological restoration, and design for ethnic cultures. A capstone pair of studios requires students to integrate their experience of design theory, practice, and construction in a resolved design and set of construction drawings.

Departmental lecture courses address the functioning of natural systems, site planning issues, computer applications, and cultural and sociological forces that influence the profession’s work. Students are encouraged to gain real-world experience through professional experience “practica” with professional firms, organizations, or agencies.

Students enter the three-year program in the department following completion of departmental prerequisites and two years of University requirements. In addition to required course work, the program encourages students to pursue personal interests through directed and independent study within and beyond the department.

Bachelor of Landscape Architecture

Department Admission Requirements

Completion of 90 credits to include the following:

- Departmental Pre-professional Requirements:
  - L ARCH 300* (usually offered autumn and summer quarters). One of the following courses (two recommended): L ARCH 352*, L ARCH 353*, L ARCH 450/L ARCH 451*. A drawing or painting course in art is also recommended. (*Transfer students: These courses are offered through UW Extension.)
  - General Education Requirements: Skills Requirements: English Composition, 5 credits.
  - Areas of Knowledge: Visual, Literary, and Performing Arts (20 credits); Individuals and Society (20 credits); Natural World (20 credits to include ESS 101 and BIOL 113); W courses (10 credits, may also count toward any other requirement except the 5-credit English composition requirement).
  - Electives to bring the total to 90 credits.

Undergraduate students currently enrolled at the UW may apply for admission to the department after completion of a minimum of 60 general education credits. Major status is normally granted upon completion of 90 credits and requires formal application and admission to the department.

Admission to the BLA program is competitive. Completion of the above requirements does not guarantee admission. Admission is based on academic record, a portfolio of creative work, three letters of recommendation, and other application materials. Contact the department for application materials and detailed information on admission, prerequisites, and required course work.

Application Deadline: February 15 for the following autumn quarter. Students are not admitted to the program at other times. Applications must include the BLA application forms. Students should apply during their second year with the expectation that they will have completed six quarters of General Education requirements by autumn quarter.

Major Requirements

Studio Classes:
- L ARCH 301, L ARCH 302, L ARCH 303, L ARCH 402, L ARCH 403, L ARCH 474, L ARCH 475, L ARCH 406, L ARCH 476
- History: L ARCH 352 and L ARCH 353; and one course of environmental history
- Theory: L ARCH 322, L ARCH 341, L ARCH 361, L ARCH 362, L ARCH 363
- Graphics: L ARCH 411, L ARCH 412
- Professional Practice: L ARCH 473
- Construction: L ARCH 331, L ARCH 332, L ARCH 433
- Directed Electives in computer, urban design and planning, ecology, environmental legislation, environmental geology, soils, environmental horticulture, forest resources, and plant identification

51
Minor

**Minor Requirements:** Minimum 25 credits, including 6 studio credits (L ARCH 300); 6 landscape architecture history credits, chosen from L ARCH 352, L ARCH 353, L ARCH 450, L ARCH 451, L ARCH 498; 3 credits in theory and practice, chosen from L ARCH 322, L ARCH 341, L ARCH 361, L ARCH 362, L ARCH 462; 5 credits in any L ARCH or EHUF prefixed courses, including all L ARCH summer offerings and up to 6 credits of L ARCH foreign study courses; 5 credits of courses with the prefix ARCH, CM, or URBDP. Minimum GPA of 2.00 in courses counted toward minor.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Program goals are to provide students with a strong design education, foster creativity, develop graphic and verbal communication skills, facilitate cognitive abilities, and encourage computer proficiency. The program prepares students for entry-level positions in public and private sector jobs and provides a professional education to develop successful long-term careers as landscape architects.
- **Instructional and Research Facilities:** None.
- **Honors Options Available:** None offered.
- **Research, Internships, and Service Learning:** None offered.
- **Department Scholarships:** None offered.
- **Student Organizations/Associations:** None.

**Graduate Program**

206-543-2564, 206-616-3582
caularc@u.washington.edu

**Master of Landscape Architecture**

The Master of Landscape Architecture program, accredited by the American Society of Landscape Architects, is a professional program that offers training in design and inquiry. The design studios form the core of this program, which is supported by rigorous independent investigation in seminars and in a thesis project. Students are expected to develop a specialty within the discipline, under the professional guidance of the faculty. The curriculum emphasizes the following:

**Urban Ecology:** The rapidly changing environment of the Pacific Northwest offers an excellent opportunity for courses and thesis projects to explore the connections between culture and nature and to test ideas for how social and spatial conflicts between development and conservation might be addressed. The faculty are particularly interested in the changing roles of familiar urban and suburban landscapes, as these areas are increasingly expected to function as part of an ecological infrastructure. At the same time, diverse human cultural communities have developed with differing perceptions of and values for these changing landscapes. This department offers students the opportunity to study the rich cultural resources of these human communities as they develop new relationships to their environments, and to participate in this overlap between natural and cultural processes. The department currently offers students exposure to the social, cultural, and natural environment of central Mexico as an international example of community development and design.

**Design Leadership:** The faculty is committed to training students to be leaders in design practice and education. This includes the education of both children and adults to understand the consequences of human transactions with the natural environment. Courses are offered and research is being conducted on designing outdoor educational environments. Graduate students are also encouraged to develop independent leadership skills which will provide them with self-confidence and adaptability in a rapidly changing professional world. The primary areas in which students are encouraged to develop leadership abilities are in the definition and practice of design as a basis for interdisciplinary work, environmental education and the application of ecological concepts to urban design, the use of communication technology to develop creative solutions to cultural and environmental conflicts, and international design-build projects in which students confront the global nature of contemporary development issues.

The graduate program considers applicants with and without previous design education, and encourages applications from persons with diverse academic and professional backgrounds. The faculty is experienced in teaching mature students and seeks to admit students with a range of ages, backgrounds, and interests. Students are encouraged to benefit from the location of the department within a broad and excellent research university by adding elective courses in other disciplines to their core curriculum. In addition, graduate students may elect to participate in College-wide certificate programs in Urban Design, and Preservation Planning and Design. See program descriptions in the preceding College section.

**Program Requirements**

Specific program requirements are arranged to fit each student's individual background. Seminar and field courses are selected to help students achieve their educational goals and develop a credible specialty area within landscape architecture. Students with a previous degree in landscape architecture begin course work with the Required Graduate Curriculum studios, while students from other educational backgrounds begin with the Basic Core design studios. The Required Graduate Curriculum sets the academic work required for the degree at 72 approved credits. In addition, a specialization must be developed in the area of a student's individual interests, which is worth 12 credits. This encourages students to deepen their knowledge in a particular area, while maintaining substantial flexibility for each individual.

A thesis is required of all master's degree program students. This is a creative, scholarly project which includes a rigorous written component. The thesis process allows students to develop greater intellectual maturity through independent inquiry, and to demonstrate mastery of a specialized subject area. Students select an appropriate methodology for the thesis in cooperation with their thesis advisor, and present the final product in either written and graphic form, or only in written form.

**Admission Requirements**

Candidates applying to the Master of Landscape Architecture program must apply both to the Graduate Admissions Office and to the Department of Landscape Architecture by January 15 to be considered for admission the following autumn quarter. Admission to the Graduate School requires (1) a baccalaureate degree from an accredited U.S. college or university, or its equivalent in a foreign institution; (2) a GPA of 3.00 or higher in the last 90 graded quarter hours or the last 60 graded semester hours; and (3) a Graduate Record Examination (GRE) score taken within the past three years.

Admission to the Master of Landscape Architecture program is a competitive process with priority given to applicants whose abilities, as determined by the department's admissions committee, will enable them to complete the program expeditiously and with a high level of achievement. Please contact the department for additional information.

**Faculty**

- **Roxanne Hamilton** Lecturer
- **Kristina Hill** Associate Professor
- **Richard Horner** Research Associate Professor
- **Jeff Hou** Assistant Professor
- **Julie Johnson** Associate Professor
Course Descriptions

L ARCH 200 Landscape Architecture Field Trips (2) I&S/VLPA
Five field trips introduce typical landscape architecture projects and demonstrate scope of the landscape architecture field. Visits to major projects in the Puget Sound region include city and county parks, river parks, harbors, downtown redevelopments, streetscapes, campus headquarters, and others. Open to nonmajors.

L ARCH 300 Introductory Landscape Architecture Design Studio (6) VLPA
Introduction to history and environmental influences in field while developing design and graphic skills. Site analyses and drawing to convey design concepts. Relationship of visual perception to drawing, role of values in design, verbal communication, and behavioral analysis of design process. Required for admission to Bachelor of Landscape Architecture program.

L ARCH 301 Design Foundation Studio (5)
Introduces site planning and design process, principles, and skills through experiential learning. Using design principles, studio develops vocabulary for site design. Activities foster skills in design process, form, language, creativity, communication, group dynamics, and organization. Methods include readings, discussion, design exercise and projects, critiques, precedent studies, site visits. Majors only.

L ARCH 302 Site Design in Urban Context (5)
Explores the application of design ideas and principles to urban sites. Theory and research informing the design of human environments and lessons from urban and ecological design precedents are implemented in the design of plazas, urban parks, waterfronts, streets, campuses, commercial areas, and historical sites.

L ARCH 303 Natural Processes Studio (5)
Project design studies related to natural systems. Emphasizes the innovative use of historical landscape forms to achieve more sustainable landscape performance, using both biophysical and social criteria to define sustainability. Introduces computer mapping applications.

L ARCH 310 Landscape Architecture Field Sketching (2)
Introductory level sketching of landscape subjects: natural and urban sites, plants, animals, architectural elements. Emphasis on perspective. Various media, including pencil, charcoal, markers, ink wash, water color.

L ARCH 311 Introduction to Design Graphics (2)
Introduction to communication techniques for various phases of the design process. Many techniques are introduced and their suitability and appropriateness for different purposes explored.

L ARCH 322 Introduction to Planting Design (3) VLPA
Traditional ways plants are used in landscape design. Composition and design characteristics of plant materials. Technical considerations for selection, climate, cultural suitability, availability, costs, and maintenance. Open to nonmajors.

L ARCH 331 Landscape Construction (4)
Basic course in site engineering, correlating the design and technical aspects of site development and suitability. Grading, drainage, circulation requirements and alignment, organization concepts relative to landscape resources, site evaluation, utilization and protection, and building and site program analysis and coordination.

L ARCH 332 Landscape Construction (4)

L ARCH 341 Site Planning (3)
Introduces urban ecological design issues for good site planning processes, principles, and methods. Linked with L ARCH 301. Addresses planning for people, natural systems in place-making, design for movement with carried land uses. Includes readings, discussions, presentations, campus walks, case studies, graphic and written assignments.

L ARCH 352 History of Landscape Architecture (3) I&S/VLPA
Survey of the development of landscape architecture as an art form from Mesopotamia to the present. Relationships to physical landscape, climate, culture, religion, and other arts. Open to nonmajors.

L ARCH 353 History of Modern Landscape Architecture (3) I&S/VLPA
Development of profession and art of landscape architecture in the United States, Europe, South America, and Japan in relation to prevailing social, economic, political, and cultural factors. Relationships with other professions, especially architecture and urban planning, and other arts, such as painting and sculpture. Open to nonmajors.

L ARCH 361 The Human Experience of Place (3) I&S/VLPA
Interdisciplinary approaches to exploring the reciprocal relationship between people and the landscapes of everyday life. Through readings, discussion, in-class activities and mini-projects, students study place attachment, relationships to nature, environmental attitudes and perception, personal space, territoriality, urban public space, diversity, participation, and the politics of space. Open to nonmajors.

L ARCH 362 Designing Urban Landscapes: Theory and Politics (3) VLPA
Introduction to the design of landscape in urban contexts. Overview of major urban design theories and examples of historic and contemporary work. Discussion of the contesting urban processes: visions of city, social and cultural factors, public and community process, and the discourses of nature, urban ecology, and ecological design.

L ARCH 363 Ecological Design and Planning (3) NW
Introduction to landscape ecological theory applied to urban environments. Comparison of different vocabularies used to describe landscape structure and function, from the fields of landscape design, urban design, and biology. Discussion of design theories that have sought to re-center landscape planning and design around the goal of achieving ecological sustainability.

L ARCH 401 Urban Recreation Design (1-6) I&S/VLPA
Special studies in metropolitan, urban, and neighborhood recreation areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARCH 402 Neighborhood Design Studio (1-6, max. 6)
Studio at neighborhood and site scales, mixed use. Incorporates urban design theory, precedents, neighborhood/project issues, and community clients. Skills in neighborhood and site analysis, programming, designs are developed in groups and individually. Methods include readings, research, critiques, field studies, and graphic, written and verbal presentations.
L ARCH 403 Cultural Landscape Studio (1-6, max. 6)  
Studies of the landscape at various scales and in diversified contexts. Offers better understanding of visual components of landscapes, designer’s capacity to evaluate and change these components, and resultant interaction with, and effect on, landscape user.

L ARCH 406 Individual Design Studio (6)  
Senior projects in landscape architecture; projects vary according to the student’s particular emphasis and needs.

L ARCH 411 Landscape Graphics (3)  
Introduces fundamental hand-drawn graphic conventions, drawing techniques, and media used in environmental design. Emphasizes building drawing and media skills that support design ability development. Includes lectures, demonstrations, display of examples, drawing from slides, and in-class workshops.

L ARCH 412 Landscape Communications (2)  
Development of advanced skills of visual representation to communicate students’ visions for urban ecological design. Discussion of professional portfolio requirements and portfolio design issues.

L ARCH 423 Planting Design Studio (3)  
Utilization of plants as design elements to manipulate space and modify the landscape for various activities and resolutions of site problems. Factors that determine the appropriate use and arrangement of plant materials in an urban context. Composition, plant selection, planting techniques, and maintenance requirements are major components of this class.

L ARCH 424 Advanced Planting Design Seminar (2)  
Analyzes the complex relationship between plants, man, and environment and affords opportunity to explore methods of utilizing these relationships to plant and to design more responsive landscapes.

L ARCH 425 Advanced Planting Design Studio (1-6, max. 6)  
Advanced seminar/studio in planting design. Provides opportunity to explore ecological, technical, and aesthetic principles for selecting plants to meet specific site conditions. Project types include historical sites, multifamily housing projects, plazas, landfills, and reclamation sites.

L ARCH 433 Large-Scale Site Construction (4)  
Includes studies of natural determinants and restraints on large-scale construction, development affected by service and utility systems, physiographic suitability of site, cost-benefit analysis, and critical path methodology for site construction projects.

L ARCH 440 Computers in Landscape Architecture (1-3, max. 3)  
Laboratory, lecture, and demonstration classes to introduce software applications specific to required landscape architecture courses. Credit/no credit only.

L ARCH 450 History of Environmental Design in the Pacific Northwest (3) VLPA  
Development of landscape architecture, architecture, and urban planning in the Pacific Northwest from nineteenth century to the present, with major emphasis on twentieth century. Open to nonmajors.

L ARCH 451 History of Environmental Design on the West Coast (3) VLPA  
Development of the environmental arts of landscape architecture, architecture, and urban planning from the eighteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.

L ARCH 463 Urban Recreational Design (3) I&S/VLPA  
Special recreational studies in metropolitan, urban, and neighborhood areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARCH 470 Landscape Architecture Tutorial (2, max. 6)  
Various aspects of project organization, programming, scheduling of work loads, graphic and verbal communication problems, data collection methods and interpretation, methodologies for landscape planting and design.

L ARCH 473 Professional Practice (3)  
Professional practice in private office, academic institutions, and public agencies. Evolution of landscape architecture as a profession, possible scenarios for future, variety of practice types and their relationships, ethical and legal/contractual responsibilities of a professional.

L ARCH 474 Project Design (1-6, max. 6)  
Detailed design studies of small-to-medium-scale projects. General focus on public landscape areas and social/psychological uses of site. Specific focus on design development and professional office presentation.

L ARCH 475 Advanced Project Design Studio (1-6, max. 6)  
L ARCH 476 Professional Operations (3-6, max. 6)  
Practicum course for landscape architecture majors for internship and exposure to the profession with working experiences at various levels of professional endeavor. Student apprenticeship in selected private offices and public agencies. Credit/no credit only.

L ARCH 477 Landscape Architecture Consultancy Studio (3-6, max. 6)  
Simulation of the professional relationship of the landscape architect as a consultant to University students in other design planning and management disciplines. Focus is on site analysis, master planning, schematic designs and detailed design, working drawings, and planting plans associated with student projects.

L ARCH 495 Landscape Architectural Studies Abroad (1-10, max. 30)  
Studies conducted under faculty supervision in various locations outside the United States.

L ARCH 498 Special Projects (1-10, max. 30)  
Special projects as arranged. Open to nonmajors.

L ARCH 499 Undergraduate Research (1-9, max. 9)  
Individual or small-group studies pertaining to special problems, theories, or issues of landscape architecture and environmental issues.

L ARCH 501 Landscape Design and Planning I (1-6)  
Enhances perceptual awareness and design sensitivity to natural and man-made landscapes. Basic skills necessary for more advanced course work required in the Master of Landscape Architecture degree program. Examination of landscape environment through problem-solving techniques that acknowledge holistic approach to the environment.

L ARCH 503 Landscape Design of Communities (1-6)  
Methods and techniques for developing physical design solutions and implementation strategies in neighborhoods and small communities. Social, economic, political, and individual forces affecting community development and growth. Comparison of several communities, identifying pertinent landscape issues, potential design solutions, and methods for achieving design goals through the political process.

L ARCH 504 Regional Landscape Planning (1-6)
Application of landscape ecological theory to the design of urban environments. Focuses on the strategic design of urban infrastructure, including underground drainage systems, roads, parks, transit systems, and on understanding the cumulative performance of urban sites.

L ARCH 505 Regional Landscape Design (1-6)
Theory/techniques of regional design to analyze, evaluate, plan, design, and manage the resources of the regional landscape continuum.

L ARCH 506 Landscape Visual Resources (1-6)
Survey of existing theory/techniques and the generation of new methods to analyze, evaluate, plan, design, and manage the visual resources of the landscape.

L ARCH 507 Landscape Art (1-6)
Public art placed in, or developed for, specific landscape settings. Various aspects and benefits of public art, including materials, technologies, philosophies of landscape imagery and meaning. General planning criteria for location for maximum public benefit and identification of objectives for a specific site and artwork.

L ARCH 511 Visual Learning (3)
Seminar/laboratory to develop visual learning processes and skills for applying these processes to landscape architecture. Related visualization concepts.

L ARCH 523 Landscape Technology (1-6)
Studio on rehabilitation of stressed urban landscapes. Focus varies but often deals with an analysis of the potentials in urban watershed and the study of alternative site designs for enhancing a range of landscape functions related to water quality. Taught by an interdisciplinary team.

L ARCH 550 History and Theory of Modern Landscape Architecture (3)
Lecture/seminar on history and theory of landscape architecture from the eighteenth century to the present. Relation to theory in related environmental design disciplines such as architecture and urban planning and other disciplines such as geography.

L ARCH 561 Regional Landscape Planning and Design (2)
Discussion of theories and case studies that provide a framework for defining sustainable urban design as both a cultural and biophysical phenomenon.

L ARCH 562 Landscape Art (2)
Process of developing and placing artwork in specific landscape settings. Types of artwork and landscape settings; ways for artist and site designer to interpret, alter, and incorporate factors of landscape; viewer’s perception and experience; examples of public and private support.

L ARCH 570 Scholarship and Inquiry (3)
The first of two required courses on the nature of scholarship and theory building in landscape architecture. Investigate scholarship related to the design process, design critique, research, and practice. Students begin to frame their own scholarship for their master’s thesis.

L ARCH 571 Seminar on Landscape Architecture Research (3)
Introduction and exploration of problems and opportunities of several basic research methods currently employed in landscape architecture research. Emphasis on how researchers identify research topics and develop appropriate research methods. Introduce analysis and interpretation of research results.

L ARCH 590 Seminar in Landscape Architecture (1-3, max. 12)
Advanced topics in landscape architecture with focus on unpublished areas of research.

L ARCH 598 Special Topics (1-6, max. 9)
Systematic study of specialized regional landscape subject matter, including history, technology, implementation, and other topics depending on current interest/needs. Topics vary and are announced in the preceding quarter.

L ARCH 600 Independent Study or Research (*)

L ARCH 601 Internship (3-9, max. 9)
Credit/no credit only.

L ARCH 700 Master’s Thesis (*)

Urban Design and Planning
410 Gould
Urban design and planning deals with critical issues of human settlement and urban development. It provides communities with an informed basis for coordinated public- and private-sector action. Urban design and planning constitutes a professional field of growing complexity, responding to the urban complexities of this century and the next. The Department of Urban Design and Planning fosters an integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built and natural environment; the financial, administrative, political, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas and regions, bringing analysis together with vision.

Departmental faculty are active participants in interdisciplinary research units of the College of Architecture and Urban Planning, including the Center for Community Development and Real Estate and the Institute for Hazard Mitigation Planning and Research. Faculty also participate in the Puget Sound Regional Synthesis Model (PRISM) University Initiative Fund program. The department also administers the Remote Sensing Applications Laboratory, concerned with applications in urban planning of remote sensing and geographic information systems (GIS) technology and the Urban Ecology Research Laboratory. In addition, the College has a wide array of facilities for computer-based instruction related to design, including CAD, GIS, and visualization technology, and runs a joint program in advanced computer technology and virtual reality with the Human Interface Technology Laboratory of the Washington Technology Center.

Undergraduate Program
The Department of Urban Design and Planning offers a minor.

Minor
Minor Requirements: 30 credits to include URBDP 300 (5 credits); 3 credits chosen from URBDP 460, URBDP 461, or URBDP 471; minimum 10 additional credits in URBDP-prefix courses; and 12 additional credits in planning-related courses with Urban Design and Planning adviser approval. A 2.0 minimum grade is required for each course counted toward the minor. See departmental adviser for recommended courses.

Graduate Program
Graduate Program Coordinator
410 Gould, Box 355740
206-543-4190
The department offers the Master of Urban Planning (M.U.P.) degree and its faculty participate in the interdisciplinary Doctor of Philosophy (Ph.D.) in Urban Design and Planning. The M.U.P. is
the professional degree, while the Ph.D. is primarily for students planning to enter research and teaching positions in urban planning and design.

The graduate program focuses on planning the physical environment and its socioeconomic and political determinants. Advanced students are encouraged to conduct research and studies in one of the following specializations:

- urban design dealing with physical form, character, and quality issues
- community development and real estate including public/private development processes
- preservation planning and design
- land-use planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects.

Graduate students may elect to participate in the College-wide Certificate Programs in Urban Design, and Preservation Planning and Design. See program descriptions in the preceding College section.

**Master of Urban Planning**

The Master of Urban Planning degree is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms. It is a two-year, or six-quarter, program requiring a minimum of 72 credits.

Requirements for graduate-level study include a satisfactory academic record and undergraduate training in one of a variety of disciplines, including urban planning and environmental design or in other appropriate fields, such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or architecture and landscape architecture. Students planning to enter the program should have completed at least one college-level course in each of the following areas: economics, mathematics, statistics, American government, environmental systems, and cultural diversity. Students without sufficient background must take these prerequisite courses concurrently with their graduate studies.

The primary objective is to educate professional planners with a broad range of competence in planning and design; a second objective is to provide opportunities for individual studies in selected professional areas. Core course requirements include 32 credits covering the history and theory of planning and urban design, urban form, communication methods, quantitative methods, processes and methods of land use planning, planning law, research methods, and a planning studio. Also required are 17 credits of restricted electives, including a course in advanced methods and a second studio; both may be in an area of specialization. In addition, a course in land-use planning, in urban development economics, and in history/theory of planning is required. A 9-credit thesis or professional project is required upon completion of all other degree course work. Of the 72 minimum credits required for the degree, 14 credits may be in open electives.

The core provides a foundation in urban design and planning for all students. An internship is encouraged for those without previous professional experience. A specialization in one area of planning is required. Six major specialized areas offered in the department include land-use planning and growth management, community development and real estate, urban design, preservation planning, environmental planning, and transportation planning.

Students are admitted to the M.U.P. program primarily in autumn quarter and all application material should be received by the department no later than the preceding February 1 (November 1 for international applicants). Graduate Record Examination general test scores, three letters of recommendation, transcripts of previous degree programs and any additional academic study, and a statement of purpose are required. TOEFL is required for international applicants.

**Doctor of Philosophy**

Some of the departmental faculty are part of an interdisciplinary faculty group which offers doctoral study in urban design and planning. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of the catalog.

**Course Descriptions**

**URBDP 300 Introduction to Urban Planning (5)** I&S Ludwig

Principles and theories of urban structure and institutions. Concepts and logic of planning as a community process and a professional activity. Evolution of planning ideas in response to changing social, economic, and environmental conditions within the American political framework. Complementary nature of public and private responsibilities. Major procedures used by planners.

**URBDP 301 Database Management Fundamentals (3)**

Introduces the tasks and roles that contribute to the management of the design and security of database systems in an organizational context. Students gain a basic understanding of database management systems and administrative practices, as well as hands-on database experience. Credit/no credit only.

**URBDP 370 Reading the City (5)** I&S/VLPA Ryan

Comprehending cities as reflection of individual reader and social/cultural context. Skills for analyzing everyday, visible evidence of the city. Topics include self-identity with place, city, image and perception, visual design analysis and place as representation of culture. Extensive writing, multiple texts, collaborative work in groups and field work.

**Faculty**

- Daniel Abramson, M.Arch., M.C.P., Ph.D.
  Assistant Professor
- Marina Alberti, Ph.D.
  Associate Professor
- Christine Bae, M.R.P., Ph.D.
  Assistant Professor
- William B. Beyers, Ph.D.
  Professor of Geography,
  Adjunct Professor of Urban Design and Planning
- Hilda Blanco, M.C.R.P., Ph.D.
  Professor, Chair
- Derek Booth, Ph.D.
  Research Associate Professor of Civil and Environmental Engineering, Adjunct Research Associate Professor of Urban Design and Planning, Forest Resources, Quaternary Research Center, Landscape Architecture, Geological Sciences
- Branden Born, Ph.D.
  Assistant Professor
- Gordon Bradley, M.I.A., Ph.D.
  Professor of Forest Resources, Adjunct Professor of Urban Design and Planning, Landscape Architecture
- Christopher Campbell, Ph.D.
  Assistant Professor of Urban Design and Planning
- Daniel Carlson, M.A.
  Senior Lecturer of Public Affairs, Adjunct Senior Lecturer
URBDP 407 Urban Planning Studio (5) I&S/VLPA

Synthesis of urban design and planning problems and methods in a laboratory section.

URBDP 420 Database Systems and Planning Analysis (3) I&S/VLPA

Applications of relational database management systems in urban design and planning. Emphasis on practical aspects of database design and use. Design, create, and modify databases and database applications, including spatial databases. Introduction to GIS. Use of personal computers linked to desktop mapping packages and relational database management systems.

URBDP 422 Urban and Regional Geospatial Analysis (5) I&S/VLPA

Alberti

Principles of GIS applied to problems in urban design and planning, landscape architecture, and environmental and resource studies. Practical problem-solving approaches using contemporary desktop mapping packages and vector and raster GIS systems. Siting, environmental evaluation and inventories, and modeling. Prerequisite: 3.0 in URBDP 420. Offered: W.

Bae

Survey of on-line planning applications; use of various on-line systems to solve urban systems design problems; investigation of hardware/software trade-offs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with CEE 418.

URBDP 443 Problem Analysis in Urban Ecology (5) I&S/NW

Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen

Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluated how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with CFR 474/GEOG 486/ENVIR 486; A.

Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen

Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: URBDP 443. Offered: jointly with CFR 475/GEOG 487/ENVIR 487; W.

URBDP 445 Research in Urban Ecology (5) I&S/NW

Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen

Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Students write and orally present revised objectives and methods sections of their interdisciplinary project and present a draft results section. Prerequisite: URBDP 444. Offered: jointly with CFR 476/GEOG 488/ENVIR 488; Sp.

URBDP 446 Practical Experience (4, max. 8) Rolfe

Rolfe

Off-campus internship under academic supervision in situations useful to the education of planners, such as public/private planning and design offices, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects.

URBDP 450 Introduction to Land Use, Growth Management, and Environmental Planning (3) Bae

Provides an understanding of contemporary land use issues (including sprawl, smart growth, new urbanism, transit-oriented development, and Washington’s Growth Management Act) and examines their environmental impact and social welfare implications. Analyzes best-practice techniques of growth management. Offered: A.

URBDP 451 Housing (3) I&S Ludwig

57
Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 3.0 in URBDP 300.

URBDP 452 Urban Development and Spatial Structure (3) I&S Miller
Physical and functional structure of urban areas, with major focus on locational decision making in households, firms, and other organizations, and space demands of these urban activities. Selected land-use models illustrating use of this theoretical understanding for forecasting competition, land-use conflicts, and the land-conversion process.

URBDP 453 Introduction to Urban Economics and Development (4) I&S Waddell
Introduction to urban economics and impacts on real estate development with emphasis on land allocation, location theory, rent/value theory, factors affecting growth and decline of cities, and the role of governmental regulation/policy/finance in controlling real estate development. Offered: jointly with CM 453.

URBDP 454 Introduction to Real Estate Finance (4) Rolfe
Introduction to the financing of real estate development projects, including a survey of capital markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Offered: jointly with CM 454.

URBDP 456 Real Estate Investment Seminar (4) Rolfe
Analysis of private and public real-estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in 453, 454, and 455. Prerequisite: CM 455/URBDP 455. Offered: jointly with CM 456; W.

URBDP 457 Housing in Developing Countries (3) Ludwig
Emphasis on role of the design and planning professional in housing delivery in developing countries. Exploration of issues of culture, political environment, social context, economic circumstances, and other factors which define and limit the manner in which the professional planner and designer can and should function.

URBDP 460 History of City Development (3) I&S/VLPA Dubrow
Analysis of city forms and designs, emphasizing their relation to the culture of each period.

URBDP 461 History of Urban Planning in the United States (3) I&S Hancock
Seminar in origins, development, and significance of the American planning movement and the profession that emerged from it, as defined by some of its seminal innovators, theories, practices, and achievements, and as evaluated by cultural realities thereby served.

URBDP 465 Land Use (3) I&S Westerlund
Land use as a substantive focus for urban and regional planning and growth management. Consideration of data collection, analysis, plan development, and implementation methods. Seminar and group project sections.

URBDP 466 Infrastructure and Community Facilities (4) Blanco
Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste and transportation. Covers their relationship to comprehensive plans, project permitting and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

URBDP 467 Urban Planning Uses of Remote Sensing (3) Westerlund
Using aerial photographs and satellite image data in urban planning. Urban change analysis, land-use and land cover classification, and environmental planning applications. Scale and resolution considerations. Development of proficiency through laboratory exercises and use of image-processing software.

URBDP 468 Land Use From Satellite Data (3) Westerlund
Digital data from Landsat and other sources used to determine land use and land-cover classification in urban and rural areas. Hands-on exercises on computer. Photo interpretation, statistics, land-use classification, and verification are incorporated.

URBDP 470 Introduction to Urban Design (3) I&S/VLPA Rolfe
Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning.

URBDP 471 History of Urban Design (3) I&S/VLPA Streatfield
Aspects of form, pattern, and space that mark efforts of individuals and groups to express their values and goals in the design of their cities. Special attention given to both historical and modern examples.

URBDP 472 Creativity and Culture in Design (3) Kasprisin
Exploration of creativity in design from a system theory perspective. Theoretical readings in physics, biology, and behavioral science balanced with practical approaches and case studies in urban design and architecture literature. Offered: A.

URBDP 474 Site Planning: Issues and Techniques (3) Abramson
Introduction to site planning; how it is regulated; why it is important to know; and how to carry out its key tasks, including residential subdivision and mixed-use development layout; basic topographical and hydrological analysis and manipulation; roadways, parking and hierarchies of circulation, and site design detail. Offered: Sp.

URBDP 479 The Urban Form (3) VLPA Moudon
Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

URBDP 481 Metropolitan Planning and Development in Developing Countries (3) I&S Ludwig
Examination of the nature and causes of urban planning and management problems in developing countries and exploration of alternative approaches to solve some of these problems.

URBDP 482 Politics and Planning (3) I&S
Explores the need to understand the crucial role of politics in the planned development of American communities, to think critically and constructively about the relationship of politics and development and ways to make it as democratic and equitable as possible, and to strengthen analytical and writing skills.

URBDP 494 Alaska Field Study (2-5, max. 10) Kasprisin, Westerlund
Travel to Alaskan communities for interpretation of natural systems, history, cultures, settlement patterns, and current issues of planning and economic development. Meetings with community leaders and planners. Students either select a topic for field and documentary research, or participate in intensive charrette-type projects or quarter-long projects in communities. Offered: Sp.

URBDP 498 Special Topics (1-9, max. 15)
Systematic study of specialized subject matter. Topics for each quarter vary, depending upon current interest and needs, and are announced in the preceding quarter.

URBDP 499 Special Projects (1-12, max. 12)
Independent/tutorial study for undergraduates. Individual reading,
URBDP 500 Survey of Urban Planning (3) Miller
Concepts and logic of planning as a professional activity. Evolution of guiding ideas in relation to changing social, economic, and environmental conditions within the American political framework. Major procedures used by planners. Critical appraisal. Open to graduate students in urban design and planning and to graduate students in architecture seeking the urban design certificate.

URBDP 501 Comprehensive Planning and Implementation (3) Born, Spangenberg, Tovar
Reviews the comprehensive planning process as a part of managing metropolitan growth. Examines federal/state statutes affecting local government comprehensive plans. Includes local government land use regulations and reviews development process. Concentrates on tools to shape land use and development patterns and their effectiveness in creating outcomes specified in comprehensive plans. Offered: W.

URBDP 503 Communication and Analysis (3) Kasprisin
Development of communication skills understanding within the planning and design process. Presentation of communications as a design process with mental, visual, oral, written, and kinesthetic cognitive actions combined to form communications thinking. Offered: W.

URBDP 506 Planning Studio Prep (2)
Introduces plan-making process, provides time for background research, issue identification, public involvement, and preliminary analysis.

URBDP 507 General Urban Planning Laboratory (4)
Studio/field project in applied professional planning of a comprehensive nature, utilizing a local study area to examine the realities of problem solving in situations of functional and normative conflict. Integration of analysis, programming, implementation, and presentation phases of the planning process.

URBDP 508 Specialized Planning Laboratory (5, max. 10) Blanco, Dubrow, Kasprisin, Moudon, Rolff, Westerlund
Studio/field project on a specialized planning problem. Several options are offered each year, such as regional-environmental planning, housing, metropolitan planning, and urban design. Prerequisite: ARCH 500 and ARCH 507. Additional prerequisite for some sections: urban planning seminar or lecture courses.

URBDP 509 Resources for Urban Planning (1)
Provides an opportunity for students to explore and discuss issues of professional practice with practicing planners in an informal context. Questions posed by the participants usually emphasize practical aspects of working as planners. Credit/no credit only.

URBDP 510 Theories and Methodologies of Planning I (4) Bae
Survey of the philosophy, methods, and analytical techniques used in planning public actions and policies, with emphasis on the logic and assumptions upon which these are based. Various planning surveys and methods. Open to graduate students in urban design and planning and to graduate students seeking the urban design certificate. Prerequisite: URBDP 500.

URBDP 511 Theories and Methodologies of Planning II (4) Blanco

URBDP 512 Research Seminar (3) Miller
Planning, designing, and undertaking applied research in an urban setting. Framing, critically assessing, managing, and presenting research used in urban planning and design. Conceptual modeling of causal relationships, choice among experimental and quasi-experimental designs, and ethical and political implications of research undertakings. Exercises leading to a complete research design. Offered: A.

URBDP 519 Qualitative Research Planning (3)
Qualitative research methods covering both the theoretical foundations and practical methodologies of traditional and innovative approaches, including cognitive mapping, open-ended interviews, ethnographic observation, hermeneutics, phenomenology, critical theory, communicative action, grass-roots empowerment, post-structuralism, and self organization.

URBDP 520 Quantitative Methods in Urban Design and Planning (4) Bae
Methods of statistical and mathematical analysis in design and planning. Emphasizes the use of computer packages for analyzing urban data. Regression, matrix methods, cohort-survival populations models with examples solved on microcomputers. Prerequisite: college mathematics and basic course in probability and statistics.

URBDP 525 Evaluation in Urban Planning (3) Miller
Methods and techniques for a priori assessment of physical improvement plans, program designs, public policies. Includes cost effectiveness and matrix or goal achievement, as well as more conventional cost-benefit and cost-revenue forms of analysis. Emphasis on understanding the reasoning and issues in evaluation, and gaining a working competence in at least one of the methods treated.

URBDP 530 Land-Use/Transportation Models (3) Waddell
Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land-use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with CEE 588.

URBDP 537 Open Space Land Uses (3) Westerlund
Exploration of public and private values of open space; its aesthetic, environmental, recreational, natural resource uses from development sites to metropolitan regions. Methods of open space inventory, analysis; legal and administrative tools for preserving and managing open space; development of multipurpose open space programs in local governments. Prerequisite: URBDP 500.

URBDP 543 Problem Analysis in Urban Ecology (5) Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with CFR 574; A.

Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objective and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: URBDG 543 or permission of instructor. Offered jointly with CFR 575; W.

URBDP 545 Research in Urban Ecology (5) Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present a draft results section. Prerequisite: URBDP 544.
URBDP 546 Practicum (4, max. 8) Rolfe
Off-campus experience under academic supervision in situations useful to the education of planners, such as planning offices, public bureaucracies, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects. Credit/no credit only. Prerequisite: permission of instructor.

URBDP 547 Professional Project (1-9, max. 9)
Independent development of client-oriented project involving application of professional planning/design methods and approaches. Professional-quality report relates project to larger professional context, addresses alternative approaches/methods and includes an evaluation of the project. Master of Urban Planning students only, taken in lieu of 700. Not recommended for those continuing into Ph.D. program. Credit/no credit only.

URBDP 548 Advanced Urban Ecology (5) Alberti, Bradley, Hill, Marzluff, Ryan, Zambrunnen
Discussion of current and important theoretical and empirical papers in urban ecology. Students continue to research interdisciplinary urban ecology projects while developing publishable manuscripts and oral presentations. Emphasizes research ethics, diverse views, and presentation skills. Prerequisite: URBDP 543, 544, 545. Offered: jointly with CFR 580/GEOG 588; AWSp.

URBDP 549 Hazard Mitigation Planning (3)
A survey of the field of planning for managing risks of natural hazards—earthquakes, floods, coastal/meteorological hazards, and human-caused technological hazards/terrorism. Covers pre-event mitigation through building and land-use controls; disaster preparedness; post-even response, recovery, and mitigation of future hazards. Emphasizes hazard mitigation as a long-term strategy for achieving sustainability of communities.

URBDP 552 Real Estate Process (4) De Listi
Introduction to the real estate process including concept generation, market research, design, construction, finance, and transactions. Offered: A.

URBDP 553 Real Estate Appraisal and Feasibility (4)
Introduction to real estate feasibility analysis, including an emphasis on individual property market analysis, permitting, investment, decision-making, and market behavior. Focuses on building basic research skills to determine economic viability and marketability of real estate projects. Prerequisite URBDP 552.

URBDP 555 Real Estate Development (4) Rolfe
Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Prerequisite: URBDP 522.

URBDP 560 Urban Affairs (3)
Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with PB AF 560.

URBDP 561 Urban Economics and Public Policy (3)
Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with PB AF 561.

URBDP 562 Introduction to Neighborhood Planning and Community Development (3)
Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle’s experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with PB AF 562.

URBDP 563 Seminar in Urban Planning and Policy (1)
Seminar for students in the MPA/MUP concurrent degree program. Explores topics that intersect urban planning and policy, through exchange with faculty and professionals working in this arena. Focuses on developing thesis topics that explore this intersection. Offered: jointly with PB AF 563.

URBDP 564 Planning history, theory and ethics (3)
Examines major historical landmarks since the Civil War (urban, suburban, and rural, physical and social-economic); theoretical alternatives (rationalism, pluralism-advocacy, critical theory, bio-regionalism, dissipative models); and ethical issues (such as distributive justice and principles of professional conduct).

URBDP 570 Urban Design Process (3) Rolfe
The study of concepts, methods, and processes basic to planning, design, and effectuation. Credit/no credit only. Prerequisite: specialization in urban design or permission of instructor.

URBDP 571 Research and Analytical Methods for Urban Design (3) Maudon
Conceptual framework for an epistemology of urban design and physical planning. Review of relevant research in related fields and disciplines. Prerequisite: specialization in urban design or permission of instructor.

URBDP 572 Case Studies in Urban Design and Development (3) Kasprisin
Wide range of urban design and development projects recently completed. Effective urban design implementation, including design process, decision making, administration, management. Tools and techniques such as design analysis, policy making, regulation, design review, taxation, financing. Prerequisite: URBDP 510 and URBDP 580 and/or permission of instructor.

URBDP 574 Residential Design: Methods and Practices (3) Dubrow
Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods and practices. Offered: jointly with ARCH 593.

URBDP 580 Legal and Administrative Framework for Planning (3) Blanco
Political, legal, and administrative institutions closely related to the planning process. Issues of devolution of authority and public representation and participation. Legal basis for planning and associated regulation.

URBDP 585 Introduction to Historic Preservation Planning (3) Dubrow
Theories, methods, and practices associated with historic preservation planning. Overview of preservation planning programs at federal, state, and local levels. Introduction to tools and methods needed to identify, document, evaluate, and plan for protection of historic properties. Provides opportunity to learn fundamentals of preservation planning through practical experience. Offered: Sp.

URBDP 586 Implementation in Preservation Planning (4)
Analysis of recent case studies in implementation of preservation planning and urban design in terms of planning and design products and related processes, decision making, administration, management. Tools and techniques include design analysis, policy-making, regulation, design review, taxation, financing, public participation. Prerequisite: introductory course in preservation or urban design.

**URBDP 587 Preservation and the Vernacular Environment (3) Dubrow**

Exploration of theoretical, methodological, and practical issues related to the preservation of vernacular architecture and cultural landscapes in the United States. Offered: W.

**URBDP 591 Doctoral Seminar I (4-)**

Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master’s degree or equivalent in a planning discipline.

**URBDP 592 Doctoral Seminar II (-4-)**

Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master’s degree or equivalent in a planning discipline.

**URBDP 593 Doctoral Seminar III (-4-)**

Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master’s degree or equivalent in a planning discipline.

**URBDP 597 Pacific Northwest Bioregion Forum (1) Kasprisin**

Exchange between universities of Pacific Northwest to share ideas and information on planning related ecological issues within the bioregion.

**URBDP 598 Special Topics (1-6, max. 15)**

Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

**URBDP 600 Independent Study or Research (*)**

**URBDP 700 Master’s Thesis (*)**

**URBDP 800 Doctoral Dissertation (*)**

### College of Arts and Sciences

Dean  
David C. Hodge  
50 Communications

Divisional Deans  
Gary D. Christian — Natural Sciences  
Michael R. Halleran — Arts and Humanities  
Susan Jeffords — Social Sciences  
Julie K. Stein — Computing, Facilities, and Research

The departments and schools of the College of Arts and Sciences offer nearly 100 curricula leading to the degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science, as well as graduate study leading to master’s and doctoral degrees.

---

### Undergraduate Study

#### Graduation Requirements

A liberal arts education entails mastery of certain basic skills, exposure to a broad range of academic disciplines, and concentration in a particular field of knowledge. To be awarded a baccalaureate degree a student in the College must fulfill requirements in the following areas: Language Skills, Reasoning and Writing in Context, Areas of Knowledge, and a Major (see table below). All required courses must be taken for a numerical grade. In addition, the student must present at least 90 credits outside the major department and must meet minimum GPA requirements as specified below. Detailed information on graduation requirements is provided in the Bachelor’s Degree Planbook, available from the Undergraduate Advising Center, 171 Mary Gates Hall.

#### Requirement* Credits

*Requirements of colleges other than Arts and Sciences are based on these, but may differ. Students who have not chosen a major are advised to follow the College of Arts and Sciences requirements.

---

### Language Skills

To receive a degree from the College of Arts and Sciences, students whose first enrollment in college (whether at the UW or elsewhere) was in autumn quarter 1985 or later are required to complete 5 credits of English composition with a minimum grade of 2.0. They must also complete course work through the end of the first-year college sequence in a foreign language, with at least a 2.0 in the third-quarter course, or demonstrate equivalent proficiency by passing an examination or by receiving a passing grade in a qualifying course beyond the first-year level. Credits used for these two requirements (including the entire first year of foreign language, if taken) cannot also be applied to the Areas of Knowledge requirements described below.

#### Reasoning and Writing in Context

Students who first entered college autumn quarter 1985 or later must complete a minimum of 5 credits in Quantitative or Symbolic Reasoning (Q/SR) and 10 credits of additional composition courses or courses that emphasize the development of writing skills in the context of an academic discipline (W courses). Q/SR and writing courses, if they apply, can also be counted toward Areas of Knowledge or major requirements. The writing requirement is in addition to the English composition requirement mentioned in the preceding paragraph.

#### Areas of Knowledge

The Areas of Knowledge requirement is the means by which the student develops a breadth of knowledge. Undergraduate courses are currently divided broadly into three categories: Visual, Literary, & Performing Arts; Individuals & Societies; and the Natural World. Each student must select at least 20 credits in courses from each of the three fields and an additional 15 credits from any courses in the
three fields. Of the 75 total credits required, 15 may be from courses in the student’s major department.

**Course Designators**

The following symbols, included in course descriptions in this catalog, indicate which, if any, of the above requirements are fulfilled by certain courses:

- **VLPA** — Visual, Literary, and Performing Arts (Area of Knowledge requirement)
- **I&S** — Individuals and Societies (Area of Knowledge requirement)
- **NW** — The Natural World (Area of Knowledge requirement)
- **QSR** — Quantitative and Symbolic Reasoning

Courses that meet the foreign-language requirement and the additional-writing requirement are not marked. The third-quarter (or second-semester) course in any language meets the language requirement, so long as the entire first-year sequence totals at least 12 credits (regardless of whether the student earned credit for the earlier parts of the sequence). Consult the quarterly Time Schedule for writing-intensive courses that meet the additional-writing requirement.

**Major**

In fulfilling the requirements for a major, the student engages in thorough study of a discipline or subject, aimed at developing knowledge in depth. This part of the student’s program is determined by the department, school, or faculty committee with which the major study is pursued. Measured in academic credits, the “major” required of each student consists of 50 or more prescribed credits in a department of the College or a closely related group of departments. Descriptions of major programs are printed below.

**Minor**

Completion of a minor, available through many departments, is optional. Requirements are shown under individual department undergraduate programs, below, or in a minors handout available in the Undergraduate Advising Center, 171 Mary Gates Hall. Minors granted by the College of Arts and Sciences are not necessarily or even usually the same as the minors approved by the College of Education for teaching at the secondary level.

**Credits Required Outside Major Department**

So that the student will not overspecialize, the College limits to 90 the number of credits from a single department that the student may elect to count in the 180 credits required for the baccalaureate degree. A department itself can require no more than 70 credits from courses within the department, and no more than 90 credits from within the department and related fields combined, as constituting its major program for the baccalaureate degree. Exceptions to these restrictions may be granted by the Dean.

**GPA Required for Graduation**

To be eligible to receive the baccalaureate degree, the student must achieve at least a 2.00 cumulative GPA in the major (some departments prescribe a higher minimum GPA for the major), as well as a 2.00 cumulative GPA for all work done in residence at the University.

**Applying for Graduation**

Students should apply for the baccalaureate degree no later than the first quarter of their final year. Seniors who apply by announced quarterly deadlines will receive Graduating Senior Registration Priority (GSP), allowing them to register first for the following quarter. GSP status is limited to two quarters.

All students may graduate under the College requirements published in this catalog. Students may use the department requirements in effect at the time they are admitted to the major, if they graduate within 10 years of that time. Otherwise, the department may insist on more recent major requirements. Students wishing to fulfill a previous set of requirements should see an adviser for details and options. All responsibility for fulfilling graduation requirements rests with the student concerned.

**Limits on Physical Education and ROTC Courses Allowed Toward Graduation**

A student graduating from the College of Arts and Sciences may count a maximum of three credits of 100-level physical-education activity courses taken at the University of Washington, or their equivalents at other collegiate institutions, as elective credits toward graduation. At present, physical-education courses are not offered at the University. Up to 18 credits in upper-division ROTC courses also may be counted as elective credits toward graduation, but no lower-division ROTC credits may be counted.

**Evening Degree Program**

Students may earn a degree in English, health information administration, humanities, or social sciences through the Evening Degree Program. Admission to the program requires the following: 75 college credits, normally to include Arts and Sciences language-skills requirements (English composition and one year of a single foreign language), the reasoning-in-context requirement (quantitative/symbolic reasoning), and a substantial portion of the writing-in-context and general education requirements. Students who have only a few remaining prerequisite courses to complete may, under certain circumstances, be admitted as premajors. Admission requirements for departmental majors in the Evening Degree Program — anthropology, business administration, communications (only the general communications option is offered), English, history, political science, psychology, sociology — are identical to requirements for the day programs, shown under departmental listings.

**Major Requirements**

The Humanities major and the Social Sciences major require a minimum 2.00 GPA for all courses taken in residence at the UW and a minimum 2.25 GPA for courses taken to satisfy the major requirements.

- **Humanities** — 60 credits, including at least 30 credits from one of the following three options: communication and critical thinking; literature and culture; ideas and beliefs in social history. A 5-credit senior seminar. Remaining credits from courses outside the principal option.
- **Social Sciences** — 60 credits, including 15 credits of social science survey courses (e.g., ANTH 202, SOC 271, POL S 202); 25 credits from one of the following four options: social and ethical theory; law, politics, and the state; culture and ethnicity; economy and ecology. 15 credits of program electives (selected from courses outside the principal option). A 5-credit senior seminar. Major requirements to include at least 40 credits in 300- and 400-level courses.

For course lists, consult the Evening Degree Program adviser (at Evening Degree Program, 103 Lewis Hall) or the Undergraduate Advising Center, 171 Mary Gates Hall.

- **Departmental Options** — Requirements are the same as for day-school majors and are shown in the undergraduate program section for each department.

**Graduate Study**

Students who intend to work toward advanced degrees must apply for admission to the Graduate School and must meet the general requirements outlined in the graduate and professional volume of the General Catalog, as well as the requirements established by the graduate faculty in the department or unit offering the degree program. Graduate students must satisfy the requirements for an advanced degree that are in force at the time the degree is to be awarded.
American Ethnic Studies

B510 Padelford

American Ethnic Studies exposes students to key content, methodologies, and theories in the comparative and interdisciplinary study of African Americans, Asian/Pacific Americans, and Chicanos in the United States.

Undergraduate Program

Adviser
B509 Padelford, Box 354380
206-543-5403

The Department of American Ethnic Studies offers the following undergraduate program:

- The Bachelor of Arts degree with a major in American ethnic studies

Bachelor of Arts

Suggested First- and Second-Year College Courses: United States history, literature, drama, arts, sociology, political science, ethnic studies.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

60 credits as follows:

Core courses (35 credits):
- 15 credits of AES 150, AES 151, AES 212
- 10 credits (two courses) from AFRAM 101, AIS 201 or AIS 203, AAS 101, CHSTU 101, to include one in the concentration and one outside the concentration; (for Comparative American Ethnic Studies concentration, choose any two)
- 10 credits (5 credits each) of AES 495 and AES 496

Concentration: 25 credits in one of the following: African American Studies, Asian/Pacific American Studies, Chicano Studies, Comparative Ethnic Studies. See department for list of concentration courses.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The American Ethnic Studies curriculum prepares undergraduate students to understand the breadth, key content, methodologies, and theories in the field of ethnic studies as well as comparative interdisciplinary knowledge of African American, Asian/Pacific American, and Chicano issues. The major is designed to help students acquire the skills to think and write critically about race, class, and ethnicity in social and historical contexts and multiple categories of social diversity.
- Instructional and Research Facilities: Writing Center
- Honors Options Available: None
- Research, Internships, and Service Learning: Students have the opportunity to become actively engaged in personalized research and discovery through independent study and research courses in each program concentration.
- Department Scholarships: None
- Student Organizations/Associations: Ethnic Studies Student Association

Faculty

Butler, Johannella E. * 1987; EdD, 1979, University of Massachusetts; Afro-American and multicultural studies, comparative American ethnic literature, African diaspora.

Cauce, Ana Mari * 1986; PhD, 1984, Yale University; community/developmental psychology, socialization of children/adolescents of color, ethnic identity.

Flores, Lauro H. * 1980, (Adjunct); PhD, 1980, University of California (San Diego); Chicano literature, contemporary Latin American literature (narrative).

Kashima, Tetsuden * 1976; PhD, 1975, University of California (San Diego); Japanese American incarceration and social organization, sociology of race and ethnic relations.

Peña, Devon G. Peña, Devon. 1999; PhD, 1983, University of Texas (Austin), environmental anthropology, agroecology, environmental history, political ecology, social movements (Mexico, U.S. Southwest, Taiwan).

Samida, Stephen H. 1998; PhD, 1982, University of Washington; Asian American studies, Asian/Pacific American literature, multicultural studies.

Walter, John C. * 1989; PhD, 1971, University of Maine; Afro-American studies; Afro-American, American, Caribbean immigrant, sport, and women’s history.

Associate Professors

Bonus, Enrique C. 1998; PhD, 1997, University of California (San Diego); Asian American and Filipino American studies, communication and cultural studies, race relations.

Fearn-Banks, Kathleen A. 1990, (Adjunct); MS, 1965, University of California (Los Angeles); crisis communications, history.

Gamboa, Erasmo * 1976; MA, 1973, PhD, 1984, University of Washington; history, Pacific Northwest, Chicano and Latino, social, labor and immigration.

Ginorio, Angela B. * 1981, (Adjunct); PhD, 1979, Fordham University; women and/in science, violence and women, socially defined identities, psychology issues for Latinas.

Guería, Juan C. * 1990, (Adjunct); MA, 1983, PhD, 1992, University of Illinois (Chicago); rhetoric, composition, literacy, ethnography.

Salas, Elizabeth 1987; MA, 1977, California State University, Los Angeles; PhD, 1987, University of California (Los Angeles); New Mexican history and politics, Chicana, Mexicana and Chicano history, minorities in the military.

Yee, Shirley J. * 1988, (Adjunct); PhD, 1987, Ohio State University; women’s history, African-American history, nineteenth-century U.S. social history.

Assistant Professors

Habell-Pallán, Michelle 1998; PhD, 1997, University of California (Santa Cruz); Chicano studies and literature, performance and popular culture, women of color feminist theories.

Nomura, Gail M. 1999; MA, 1971, University of California (Berkeley); PhD, 1978, University of Hawaii; Asian American studies, Asian American history, Asian American women's history.

Retman, Sonnet, 2002; Ph.D., 1997 University of California, Los Angeles; African-American literature and culture; popular music and film; critical race theory

Rivers, Patrick L. 1999; PhD, 1998, University of North Carolina; political science, socio-legal studies and cultural studies.
**Course Descriptions**

**AES 150 Introductory History of American Ethnic Groups (5) I&S**

**AES 151 Introduction to the Cultures of American Ethnic Groups (5) I&S**
Survey of the cultures of Chicano, African-American, Asian-American, and American-Indian communities of the United States. Each group’s culture is examined in its isolation and in its interaction with mainstream culture.

**AES 212 Comparative American Ethnic Literature (5) I&S/ VLPA Butler**

**AES 250 Race in the American University (5) I&S**
Racial integration in American institutions of higher education. Entry to, and impact on, American universities by people of color. History of ethnic studies and its relation to other disciplines. Recommended: AES 150; AES 151.

**AES 322 Race and Gender: Historical Perspectives (5) I&S**
The intersection of race and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, sexism, activism, sexuality, and inter-racial dynamics between women of color groups. Offered: jointly with WOMEN 322.

**AES 333 Race and Ethnicity in the U.S. Military (5) I&S Salas**
The experiences of racial minorities in the military. Topics include segregation of units, desegregation of military, career limitations and opportunities, minority women, military families, racism and role of veterans in civil rights struggles after service.

**AES 361 Ethnicity, Business, Unions, and Society (5) I&S Scott**

**AES 446 Music in American Cultures (3) I&S/VLPA**
Compares musical history and experience of selected American cultures that have fed into the American musical mainstream or had significant popularity on its periphery. Case studies may include African Americans, Latino/a Americans, Jewish Americans, Asian Americans, or European Americans. Considerations of social identity as well as musical styles. Offered: jointly with MUSIC 446.

**AES 461 Comparative Ethnic Race Relations in the Americas (5) I&S**
Sketches the ethnoracial systems operating in American society. Studies these systems as systems and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with SOC 461.

**AES 462 Comparative Race and Ethnic Relations (5) I&S Scott**
Race and ethnicity are examined as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with SOC 462.

**AES 489 Ethnicity, Gender, and Media (5) I&S**
Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with COM 489/WOMEN 489.

**AES 494 Community Practicum and Internship (3-5, max. 10)**
Faculty supervised practicum and internship experience in a variety of settings and agencies, e.g., ethnic specific agencies, government and civic community-based offices. Students contribute skills and knowledge to respective communities and gain experience by working with professionals and community organizers. Credit/no credit only.

**AES 495 Senior Seminar (5) I&S**
Focus on a central comparative theme for individual research topics.

**AES 496 Senior Seminar II (5) I&S**
Second of a two-part senior seminar sequence required of all majors. Research and writing of a senior paper under supervision of an
AFRAM 272 History of the South Since the Civil War (5) I&S
Confusion, transformation of race relations, and cultural influence of normalcy, economics of margin, literature of indulgence and flowed together in the Roaring Twenties. Covers politics of Interdisciplinary study of period after World War I to Great Crash.

AFRAM 261 The African-American Experience Through Extended families, and consensual families are explored. Their of black families. Single-parent families, two-parent families, This course explores the structures and functioning of various types American politics. Recommended: either AES 150, AFRAM 201, or context where there is debate about race's centrality to an African history with some attention to Africa as well as to America. Basic introductory course for sequence of lecture courses and seminars in Afro-American history. Offered: jointly with HSTAA 150.

AFRAM 214 Survey of Afro-American Literature (5) VLPA Butler A chronological survey of Afro-American literature in all genres from its beginnings to the present day. Emphasizes Afro-American writing as a literary art; the cultural and historical context of Afro-American literary expression and the aesthetic criteria of Afro-American literature. Offered: jointly with ENGL 258.

AFRAM 220 Third World Images in Film (5) I&S/VLPA Afro-American Studies Course Descriptions AFRAM 101 Introduction to African American Studies (5) I&S History, culture, religion, institutions, politics, economics, arts, and psychology of peoples of African descent as developed from experience in both the old and new worlds. Multidisciplinary analysis of social life from a Black perspective as illustrated in selected historical and contemporary writings.

AFRAM 150 Introduction to African-American History (5) I&S Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Basic introductory course for sequence of lecture courses and seminars in Afro-American history. Offered: jointly with HSTAA 150.

AFRAM 260 African American Family (5) I&S This course explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with SOC 260.

AFRAM 261 The African-American Experience Through Literature (5) I&S/VLPA Scott Instructs students in hermeneutical and sociological methods of analyses. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with SOC 261.

AFRAM 270 The Jazz Age (5) I&S Walter Interdisciplinary study of period after World War I to Great Crash. Afro-American and Anglo-American currents and impulses that flowed together in the Roaring Twenties. Covers politics of normalcy, economics of margin, literature of indulgence and confusion, transformation of race relations, and cultural influence of jazz. Offered: jointly with HSTAA 270.

AFRAM 272 History of the South Since the Civil War (5) I&S Walter Reconstructs and its aftermath, the Agrarian (Populist) revolt, disfranchisement and segregation, the effects of urbanization and subsequent depression, desegregation, and the struggle for civil rights. Examines the New South, the conflict of ideology with structural and material change, and the place of the South in contemporary America.

AFRAM 306 Basic Swahili (5) Maulana Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty.

AFRAM 307 Basic Swahili (5) Maulana Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty. Prerequisite: AFRAM 306.

AFRAM 308 Basic Swahili (5) Maulana Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty. Prerequisite: AFRAM 307.

AFRAM 309 Intensive Basic Swahili (15) Maulana First-year Kiswahili language. Introduces students to Kiswahili and allows them to explore and understand not only the language but also the diverse cultures and customs of the people of East Africa. Provides a basic foundation in speaking, reading, and writing. Primary emphasis on basic structure of Kiswahili and its operation. Offered: S.

AFRAM 315 Black Identities and Political Power (5) I&S Rivers Relates the deployment of political power within institutions to shifting racial identities. Shows how racial identities both reflect and inflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Offered: jointly with POL S 315.

AFRAM 320 Black Women in Drama (5) VLPA Character types of Black women as represented in plays by Black women. Some Black male playwrights are juxtaposed with Black female writers for comparative analysis. Playwrights include Georgia Douglas Johnson, Angelina Grimke, Alice Childress, Lorraine Hansberry, Ira Aldridge, LeRoi Jones.

AFRAM 321 History of African-American Women and the Feminist Movement (5) I&S "Feminist Movement" from early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Offered: joint with WOMEN 321.

AFRAM 334 The Sixties in America: Conflict, Confrontation, and Concession (5) I&S Walter Politico-cultural movements that collided in the sixties. Includes politics of confrontation and civil disobedience, economics of “guns and butter,” literature of conflict and angst, polarization of arts, transformation of race relations, role of Rock, and influence of domestic politics on foreign relations. Recommended: AFRAM 150; AFRAM 270. Offered: jointly with HSTAA 334.
AFRAM 337 Music and Social Change in the Sixties Era (5) I&S/VLPA

Introduction of popular music and social change in 1950s and 1960s. How this interaction effects significant change. Considers political activism for civil rights and against the Vietnam War as they intersect with the development of rock and roll, R&B, acoustic and political folk music, and post-bop jazz.

AFRAM 340 The Harlem Renaissance: A Literary Study (5) VLPA

Highlights Harlem Renaissance — 1912 through mid-1930s — as establishing a role for twentieth-century African-American writer, encompassing literature, politics, and decolonization of the image of Africa, and solidifying integrationist and nationalist schools of thought. Examines images, themes, and characterizations in creating a literary aesthetic simultaneously American and African-American.

AFRAM 350 The Black Aesthetic (3) I&S/VLPA

AFRAM 358 Literature of Black Americans (5) VLPA

AFRAM 370 Afro-American Political Thought (5) I&S

Political ideologies and philosophies of pivotal Afro-American historical figures and the conditions under which these ideologies are developed, rejected, and transformed. How ideologies relate to solution of Afro-American political problems.

AFRAM 401 Intermediate Swahili (5) VLPA

Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: either AFRAM 308 or AFRAM 309.

AFRAM 402 Intermediate Swahili (5) VLPA

Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: AFRAM 401.

AFRAM 403 Intermediate Swahili (5) VLPA

Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: AFRAM 402.

AFRAM 437 Blacks in American Law (5) I&S Walter

Historical continuity for changing relationship between American jurisprudence and Black Americans, 1640-1986. Statutory and case law which determined role of Blacks in American society, and use of law by Blacks to gain civil and personal rights.

AFRAM 498 Special Topics in African American Studies (3-5, max. 15) I&S

Topics in which students and faculty have developed an interest as a result of work done in other classes or as a result of the need to investigate in greater depth Afro-American Studies issues. Topics vary.

AFRAM 499 Independent Study and Research (1-5, max. 10)

Identification and investigation of the problems and needs of the Black community. Methods and alternatives of approaching these problems and needs. Students designate their areas of interest and subsequently pursue research and problem solving.

Asian-American Studies

Course Descriptions

AAS 101 Introduction to Asian American Cultures (5) I&S

Asian-American subcultures; evolution of Asian-American cultures in the United States from 1850 to 1950-immigration patterns, evolution of subcultures, evacuation, inter-racial relations, assimilation, and signs of social disorganization.

AAS 206 Contemporary Problems of Asian Americans (5) I&S

Recent Asian-American issues from 1950 to the present. Topics include ghetto communities, civil rights, identity problems and ethnicity, social organizations, political movements, and recent immigration.

AAS 210 Asian-American Identity (5) I&S

Examines the nature of Asian-American identity from a multidisciplinary approach. Explores influences and manifestations of Asian-American identity, using literature, history, and other texts. Topics to include gender issues, inter-racial relationships, and Amerasians. Recommended: AAS 101; AAS 206.

AAS 220 Asian-American Stereotypes in the Media (5) I&S

Asian stereotypes popularized by American literature, film, radio, and television and their effects on Asian American history, psychology, and community.

AAS 300 U.S. Pacific Islander Contemporary Culture (5) I&S

McGrath

AAS 306 Basic Tagalog (5)

Structure of spoken and written Tagalog. Concentration on the acquisition of elemental conversational skill and introduction to written texts of graded difficulty. Offered: A.

AAS 307 Basic Tagalog (5)

Structure of spoken and written Tagalog. Concentration on the acquisition of elemental conversational skill and introduction to written texts of graded difficulty. Prerequisite: AAS 306. Offered: W.

AAS 308 Basic Tagalog (5)

AAS 320 Hawaii's Literatures (5) VLPA

Sumida

Prose fiction, historical narratives, and poetry (including lyrics and songs) of Hawai`i by Native Hawai`ian and multicultural local writers and composers of the nineteenth and twentieth centuries. Analyses of colonization and its consequences frame the literary studies.

AAS 330 Asian American Theater (5) VLPA

Sumida

Explores works of Asian American plays in historical, interpretive, and artistic contexts and dimensions. Includes students' performances of dramatic readings.

AAS 350 Chinese American History and Culture (5) I&S

Experience of the Chinese in America from 1850 to the present. Transformation from an immigrant to Chinese American community: immigration patterns, anti-Chinese movements, ethnic sociopolitical and economic institutions, community issues, Chinese American culture. Recommended: AAS 205.
AAS 360 Filipino-American History and Culture (5) I&S
Revilla
History and culture of the Filipino in America and the influence of an admixture of Filipino, Spanish, and American traditions on the Filipino immigrant and his or her descendants. Recommended: AAS 205.

AAS 370 Japanese-American History and Culture (5) I&S
Historical roots and subsequent changes in the Japanese-American group examined through an interdisciplinary approach. Topics include historical events, culture, values, social and community structures, institutions, occupations, and future orientations. Recommended: AAS 205.

AAS 372 Internment Camps in North America: United States and Canada (5) I&S
Comparative study of United States and Canadian internment camps incarcerating Japanese Americans and Japanese Canadians during World War II. Focuses on early history, dislocation and internment, effects (disorganization and adjustments), effects on the internees and society, and present situation.

AAS 380 Asian-American Communities and Social Policies (5) I&S

AAS 385 Asian Americans: The Law and Immigration (5) I&S
Traces the evolution of United States immigration law and policy from the nineteenth century to modern day, from free immigration to immigration restriction, through the elimination of race as a criterion, and culminating in the passage of the Simpson-Mezzoli bill. Recommended: AAS 205 or AAS 206.

AAS 392 Asian-American Women (5) I&S

AAS 395 Southeast-Asian Americans: History and Culture (5) I&S

AAS 401 Asian-American Literature to the 1940s (5) VLPA
Asian-American literature from nineteenth-century immigrants to the 1940s. Emphasis on Chinese, Japanese, and Filipino writings detailing the experience and sensibility of first generation immigrants. Early twentieth-century writing focuses on the development not only of Asian-American community, but also of second generation American-born Asian-American writers. Recommended: AAS 205 or AAS 206.

AAS 402 Contemporary Asian-American Literature (5) VLPA
Asian-American literature from the 1940s to the present. Emphasis on the development of attitudes and identities in contemporary Asian-American literature, the role of the writer in a minority culture, and the relationship of literature to self and society.

AAS 403 Survey of Asian-American Poetry (5) VLPA
Asian-American poetry, nineteenth century to present. Readings include poetry of the early immigrant to America, cultural imperatives transferred from old world to new world, and establishment of an Asian-American identity in poetry from 1870s through 1890s.

AAS 406 Asian American Activism (5) I&S
Explores the multiple political traditions forged by Asian Americans, from the earliest challenges to racist laws and unequal wages to the latest debates over affirmative action and racial profiling. Examines Asian American communities organized to oppose and to perpetuate social inequalities. Offered: jointly with HSTAA 406.

AAS 416 Intermediate Tagalog (5) VLPA
Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Tagalog. Review of structure. Prerequisite: AAS 306, 307, 308. Offered: A.

AAS 417 Intermediate Tagalog (5) VLPA
Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Tagalog. Review of structure. Prerequisite: AAS 416. Offered: W.

AAS 418 Intermediate Tagalog (5) VLPA

AAS 426 Advanced Tagalog (5) VLPA faculty: %
Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. Prerequisite: AAS 418. Offered: %-

AAS 427 Advanced Tagalog (5) VLPA faculty: %
Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. Prerequisite: AAS 426. Offered: %-

AAS 428 Advanced Tagalog (5) VLPA faculty: %
Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. Prerequisite: AAS 427. Offered: %-

AAS 498 Special Topics (5, max. 10) I&S

AAS 499 Undergraduate Independent Study (1-5, max. 10)

Chicano Studies

Course Descriptions

CHSTU 101 Introduction to Chicano Studies (5) I&S
Gamboa, Salas
Selected themes in Chicano experience; studies in Chicano politics and Chicano socioeconomic concerns.

CHSTU 180 History of the Chicano People to 1848 (5) I&S
Gil
Historical survey of the Chicano people from pre-Hispanic times to the war between the United States and Mexico. Offered: jointly with HSTAA 180.

CHSTU 200 Latinos in the United States (5) I&S Gamboa, Salas
Historical, social, and economic experience of Latinos in the United States. Major themes include education, labor, class, and gender identity. Analyzes rapid growth of old and newly established Latino communities, based on emigration from Latin America.

CHSTU 254 Northwest Latinos: History, Community, Culture (5) I&S Gamboa
Traces the history, extent, and development of the Chicano/Latino presence from the early Spanish period to the present. Examines the major contemporary political, social, and economic issues affecting Northwest Chicano/Latinos in a broader national and international context.

CHSTU 255 Mexican Women: Past and Present (5) I&S Salas
Survey of women in Mexican society from Meso-American times to the 1940s.
CHSTU 256 Chicanas: Gender and Race Issues (5) I&S Salas
Contemporary issues in the Chicana movement since the 1940s. Issues range from feminism and Chicana political, educational, and social organizations, to work, family, health, and the arts.

CHSTU 260 Introduction to Chicano Politics (5) I&S
Surveys the political position and activities of Mexican-American peoples in the United States from two perspectives: (1) Chicanos as objects of the political process of United States life, (2) contributions of the Chicano people to United States politics.

CHSTU 330 Chicano/Chicana Autobiography (5) I&S
Explores the issue of Chicano, or Mexican-American, identity. Examines statements of selfhood by Chicanos, studied in order to understand the relationship between individual and society in creating identity.

CHSTU 340 Latina/Latino Theater (5) VLPA Habell-Pallan
Explores the contextual, theoretical, thematic, and formal dimensions of U. S. Latina and Latino theater and performance art in the contemporary period. Examines performances and play scripts as a way of analyzing innovations in form, language, and content produced by Chicano/Latino teatro and performance art.

CHSTU 352 Mexican Immigration: A Comparative Analysis (5) I&S Gamboa, Salas
Examines and compares constant Mexican immigration with that of other immigrants to the United States as one of the most important issues confronting Chicanos and other Americans in the United States.

CHSTU 356 The Chicano Family (5) I&S Salas
The historical, psycho-social, and sociocultural role of the Chicano family from Mesoes-American times to the present.

CHSTU 405 Advanced Chicano Studies (5) I&S Gamboa
Chicano culture as related to current values and health practices, Mexican labor and immigration in both historical and contemporary setting. Chicano politics 1848 to present. Recurrent problems of Chicanos in society; social movement for acceptance and for self-determination.

CHSTU 410 Latina Cultural Production (5) I&S/VLPA
Explores the expressive culture of Chicana/Mexican American/ Latina women in the United States. Cultural and artistic practices in home and in literary, music, film, spoken word, performing and visual arts. Focuses on how Chicana/Latina writers and artists re-envision traditional Iconography. Offered: jointly with WOMEN 451.

CHSTU 416 Comparative Social Movements: Mexico and the United States (5) I&S Pena
Historical, ethnographic, and theoretical perspectives in the study of Mexican-origin communities in social movements in Mexico and the United States with a focus on workers, immigrants, peasants, women, indigenous peoples, and students as forces of collective mobilization and social, cultural, and political change. Offered: jointly with ANTH 416.

CHSTU 498 Special Topics in Chicano Studies (3-5, max. 10) I&S Gamboa, Olguin, Salas
Interdisciplinary course concentrating on one or more aspects of the Chicano experience.

CHSTU 499 Independent Study and Research (1-6, max. 10)
Gamboa, Olguin, Salas
Students work individually or in teams.

American Indian Studies
C514 Padelford

American Indian studies surveys Indian cultural developments in art, music, history, medicine, media and film, language, and literature and offers performance and studio experience.

Undergraduate Program
Adviser
C514 Padelford, Box 354305
206-543-9082

The American Indian Studies Center offers the following undergraduate programs:
• Bachelor of Arts through the General Studies program
• A minor in American Indian studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: AIS 201, AIS 202, AIS 203

Department Admission Requirements
See General Studies adviser for details.

Major Requirements
A major emphasizing American Indian Studies is available through the General Studies program. All AIS courses may count toward that major. No more than 6 credits of any combination of AIS 253 and AIS 350 may be counted toward the major.

Minor

Minor Requirements: Minimum 25 credits to include:

- 10 credits of introductory course work in American Indian studies.
- 9-15 credits of course work on Native American ethnology, archaeology, history, or governmental relations
- 6-10 credits of course work in art, art history, music, or literature. See adviser for approved course options.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: American Indian studies graduates possess a broad knowledge of historical and contemporary American Indian cultures, have the ability to develop both written and oral arguments, possess knowledge of American Indian philosophy and world view, and possess an understanding of Native Nation sovereign status and treaty status.
- Instructional and Research Facilities: None
- Honors Options Available: None offered
- Research, Internships, and Service Learning: None offered
- Department Scholarships: None offered
- Student Organizations/Associations:
  - American Indians in Science and Engineering Society (AISES), UW Chapter Office: Ethnic Cultural Center and 207 Loew Hall (MSEP), 206-543-5536 or 685-8688
  - First Nations at the UW, Office: Ethnic Cultural Center, American Indian Room, 206-543-4635, ext. 12
  - Medicine Wheel Society, Office: Ethnic Cultural Center and School of Medicine

Course Descriptions

AIS 110 Musical Traditions of Native North America (3) VLPA
Utilizes historical and contemporary sources to survey the music and music-related traditions of Native North America. Examines traditional music and context from the Northwest Coast, Arctic, Southwest, Great Basin, Plains, Plateau, California, and Eastern Woodlands music-style areas, as well as contemporary neo-traditional and popular genres of American Indian music.

AIS 113 American Indian Language: Navajo (5) Witherspoon
Conversation, reading, and writing in Navajo. Oral literature and
other aspects of Navajo culture integrated into language study.

**AIS 114 American Indian Language: Navajo (5) Witherspoon**
Conversation, reading, and writing in Navajo. Oral literature and other aspects of Navajo culture integrated into language study.
Prerequisite: AIS 113.

**AIS 115 American Indian Language: Navajo (5) Witherspoon**
Conversation, reading, and writing in Navajo. Oral literature and other aspects of Navajo culture integrated into language study.
Prerequisite: AIS 114.

**AIS 151 Indian Art of Northwest Coast (3) VLPA Oliver**
Studio course on Pacific Northwest coast Indian/Eskimo art. Traditional and contemporary forms; principles of form, style, and techniques; values that influence Indian/Eskimo art styles.

**AIS 170 Survey of North American Indian Art (5) VLPA**
Major American Indian art traditions of North America. Precontact and early-contact-era traditions and the evolution of Indian art forms in contemporary times. Design and techniques in Indian art.

**AIS 201 Introduction: Ethnohistory of Native North America (5) I&S Harmon**
Survey of histories of Indians in the U. S. from native perspectives. Presents traditional creation accounts and oral histories, archaeological, and historical evidence. Focus is cultural dynamics, considering change and continuity through prehistoric, protohistoric, colonial, and American periods.

**AIS 202 Introduction to Contemporary Experience in Indian America (5) I&S**
Survey of contemporary Native-American people, cultures, and issues. Focus on modern experiences through readings from Native-American autobiographies, contemporary narratives and literature, and reports of important topical issues, e.g., water rights, Indian gaming, treaty law.

**AIS 203 Introduction: Philosophical and Aesthetic Universes (5) I&S**
Social constructions of reality, aesthetic as well as philosophic, as conceptualized by approximately five traditional American Indian cultures from different regions of North America.

**AIS 240 Native North American Women (5) I&S**
Indian women in the social structure; historical and contemporary roles; changes in male-female relationships; problems and opportunities of contemporary women; the feminist movement and Indian rights.

**AIS 253 Wood Design (3, max. 9) VLPA Oliver**
Studio course in wood sculpture utilizing Pacific Northwest Indian hand tools. Properties of woods and their uses.

**AIS 311 North American Indians: Pacific Northwest (5) I&S**
Traditional societies of the Pacific Northwest from southern Alaska to northern California; significant areal features, such as rank, totemic crests, guardian spirits, the potlatch, fishing, and foraging illustrated by comparisons and by selected ethnographic sketches. Continuity between past and present. Recommended: ANTH 100 or ANTH 202.

**AIS 312 North American Indians: The Intermountain West (5) I&S**

**AIS 316 North American Indians: The Southeast to 1850 (5) I&S**
Emphasis on prehistory, social organization, belief system, political alliances. European contact, effects of plantation slavery and slave trade on Indians, issues of ethnicity, and consequences of removal policies.

**AIS 317 North American Indians: The Southwest (5) I&S Witherspoon**
Overview of history and ethnography of the Southwest with emphasis on Apaches, Pueblos, and Pimas/Yumans. Social organization, religion, worldview, and expressive culture of specific groups as Navajo, Hopi, Zuni, Tewa, and Tohono O’odham.

**AIS 330 United States-Indian Relations (5) I&S Harmon**
History of relations between American Indians and non-Indians in the U. S. with emphasis on national laws and policies. Examines origins and impacts of Indians’ and non-Indians’ strategies for dealing with each other, historical reasons for Indians’ contemporary conditions and status.

**AIS 335 American Indians and the Law (5) I&S Harmon**
History of laws governing American Indians: aboriginal law systems, U. S. laws, and contemporary tribal laws. Effects of laws and legal institutions on contemporary Indian identity and tribal status, self-government, land ownership and use, natural resources, religion, family life, cultural and spiritual practices, crimes and punishment, and federal responsibilities for Indians.

**AIS 340 Indian Children and Families (5) I&S**
Cross-cultural survey of Indian child rearing, family structure, and related social issues. Includes historical changes in family structure, value orientation and adaptation to a bicultural environment, education, child welfare, health problems, and aging.

**AIS 341 Native Women in the Americas (5) I&S**
Histioriography, sociology, biography, autobiography, and fiction about native women in the United States and Canada. Offered: jointly with WOMEN 341. Offered: AWSpS.

**AIS 350 Two-Dimensional Art of the Northwest Coast Indians (3, max. 9) VLPA Oliver**
Studio course emphasizes principles of structure and style of two-dimensional art which can be found on many old, traditional Northwest Coast pieces, such as painted storage boxes and chests, house panels, and ceremonial screens. Students apply these principles in creating a variety of graphic projects.

**AIS 357 Contemporary American Indian Literature (5) VLPA Colonese**
Creative writings novels, short stories, poems of contemporary Indian authors; the traditions out of which these works evolved. Differences between Indian writers and writers of the dominant European/American mainstream. Offered: jointly with ENGL 359.

**AIS 425 Indians in Western Washington History (3) I&S Harmon**
Relations of Indians and non-Indians in the Puget Sound region, from the 1790s to the present, with emphasis on evolving ideas about Indian identity. Offered: jointly with HSTAA 417.

**AIS 431 History of American Indian Education (5) I&S**
Traditional and European-introduced methods of schooling, the federal role in Indian education, and contemporary Indian education issues. Special attention to Indian concepts of learning; boarding school education; the role of the Bureau of Indian Affairs; current trends in bilingual and bicultural education for Indians.

**AIS 440 Reading Native American Women’s Lives (5, max.**
Anthropology is the study of human beings in all their cultural diversity. It includes the study of human evolution, the archaeological record, language and culture, the relationship between humans and their environment, and cultural modes of being as these differ in time and space. In studying anthropology, students can better understand how to find ways to live together in today’s world, respecting cultural diversity while building upon common human values.

The study of anthropology at the University of Washington is comprised of three subdisciplines:

- **Archaeology** is the study of the human past through investigation of material remains (artifacts, food remains, features, structures, etc.) and their relationships in space and time.
- **Biocultural anthropology** focuses on understanding human variation through the study of the ecological, demographic, genetic, developmental, and epidemiological dimensions of modern human adaptation and its evolutionary basis.
- **Sociocultural anthropology** is the study of human societies from the perspective of culture as a comparative frame.

### Undergraduate Program

**Adviser**
243 Denny, Box 353100
206-543-7772

The Department of Anthropology offers the following undergraduate programs:

- The Bachelor of Arts degree with a major in anthropology
- A minor in anthropology

#### Bachelor of Arts

**Suggested First- and Second-Year College Courses:** Any two of the following: ANTH 202, ANTH 203, ANTH 204, ANTH 206, ANTH 207, ANTH 208, ANTH 209, ANTH 210, or ANTH 228; ARCHY 205; BIO A 201; at least one from STAT 220, STAT 311, or Q SCI 381.

### Department Admission Requirements

Students in good academic standing may declare this major at any time.

#### Major Requirements

55 credits as follows:

- **Core courses (25 credits):** ARCHY 205, BIO A 201; any two ANTH courses numbered 200 through 228; and one of the following: STAT 220, STAT 311, Q SCI 381
- 30 additional credits distributed across the subfields or concentrated as suits the interests of the student. 20 of these credits must be upper-division (300- or 400-level) courses.

Certain AIS courses may apply toward this requirement. See departmental adviser for list.

**Additional major requirements:**
- Courses at the 100 level and courses with a grade of 1.9 or lower do not count towards the major.
- At least 20 credits in the major must be with a minimum grade of 3.0.
- Transfer students must complete a minimum of 15 upper-division credits in anthropology at the UW.

### Minor Requirements

**Minor Requirements:** 30 credits (at least 15 credits at upper-division level) from courses with the following prefixes: ANTH, ARCHY, BIO A. (Certain AIS courses may apply toward this requirement. See departmental adviser for list.) Minimum grade of 2.0 required in each course.

### Student Outcomes and Opportunities

**Learning Objectives and Expected Outcomes:** The study of anthropology develops skills in critical thinking, research, and writing, as well as technical skills specific to the different subfields (ethnographic field techniques, interpretation of data, statistical analysis, archaeological methods of data collection and interpretation). An undergraduate degree prepares students for many positions...
that involve working with people, as well as for academic studies in a variety of fields. Careers in anthropology can be developed through employment with government agencies, museums, teaching and research, private consulting firms, and nongovernmental organizations.

**Instructional and Research Facilities:** Undergraduate students have access to the following facilities for classroom training in laboratory methods and for research experiences subject to faculty approval and supervision: the Burke Museum (ethnological, archaeological, natural history, and archival collection), Quaternary Research Center, Biodemography Lab, Luminescence Dating Laboratory, Electron Microscope Laboratory Cooperative, Geoarchaeology Lab, Digital Imaging and Microscopy Lab, Geographical Information System (GIS) Computer Lab. In addition, the department co-sponsors with the Department of Geography a writing center offering undergraduate writing support for anthropology classes.

**Honors Options Available:** With College Honors. With Departmental Distinction. See adviser for details.

**Research, Internships, and Service Learning:** The Department of Anthropology supports students who undertake community-based internships under faculty supervision.

**Department Scholarships:**
- The Brett E Baldwin Scholarship, for approximately $800, is awarded to an outstanding graduate or undergraduate majoring in anthropology.
- The Wienker Prize for Best Undergraduate Essay. Four awards are given each year, one in each subdiscipline for the best essay in an undergraduate anthropology class, and one for the best senior honors thesis.

**Student Organizations/Associations:** The Anthropology Club is run by and for students in the department.

**Areas of Knowledge and not as part of the anthropology major.**

**Graduate Program**

Graduate Program Coordinator
M31 Denny Hall, Box 353100
206-685-1562

The department recognizes four principal subfields of anthropology within its faculty, programs, and curriculum: archaeology, biocultural anthropology, environmental anthropology, and sociocultural anthropology (including anthropological linguistics). The department offers four distinct Ph.D. programs within the subdisciplines. A Ph.D. program in sociocultural anthropology with emphasis in ethnomusicology is offered in cooperation with the School of Music. The M.A. degree may be earned within the Ph.D. programs. Graduate students are admitted to, and specialize in, their chosen subfields from the beginning of their graduate studies.

**Admission Requirements**

Applicants are admitted to begin study only during autumn quarter and are advised to have their application materials completed by the beginning of the prior January. A complete application file includes the Graduate School Application, official transcripts, the Supplementary Information Form, three recommendations, a statement of purpose, and scores from the Graduate Record Examination (GRE). International students are required to take the TOEFL exam as well as the GRE.

**Program Requirements**

For each of the respective graduate programs, completion of the core requirements and a reading knowledge of one foreign language are required. Under the guidance of a supervisory committee selected from the appropriate subfield, the student shapes an individual program. The major areas emphasized in the faculty and curriculum are the United States, Mexico, Africa, South Asia, Southeast Asia, China, Oceania, and the post-Soviet states. The M.A. degree usually requires two years of graduate study; the Ph.D. programs usually require at least three years beyond the master’s level, including a year of independent field research and a year to organize field materials and write a doctoral dissertation.

**Financial Aid**

Two to four three-year fellowships are awarded to outstanding entering students. A limited number of teaching and research assistantships and hourly positions are offered primarily to advanced students. Some students may be qualified for a few Foreign Language Area Studies Fellowships. Work-study positions may also be available for eligible graduate students.

**FULL-TIME & RESEARCH FACULTY**

**Anagnost, Ann S.** (PhD Michigan 1985; Assoc Prof)
Ethnography of the state, ideology & popular culture, peasant society; China

**Bilaniuk, Laada** (PhD Michigan 1998; Asst Prof)
Linguistic anthropology, nation building & language politics; Ukraine, former Soviet Union

**Chapman, Rachel B.** (PhD UCLA 1998; Asst Prof)
Medical Anthropology, racial and ethnic disparities in health, urban and reproductive health, applied international health, and political economy; US, Mozambique

**Close, Angela E.** (PhD Cambridge 1975; Prof)
Archaeology, lithic analysis, Paleolithic; North Africa, Europe

**Eck, Gerald G.** (PhD UC Berkeley 1977; Assoc Prof)
Physical anthropology, paleontology, primatology, methodology; Africa

**Feathers, James K.** (PhD Washington 1990; Res Assoc Prof)
Prehistoric ceramic technology, archaeometry; Southeast, Southwest US

**Fitzhugh, J. Benjamin** (PhD Michigan 1996; Assoc Prof)
Archaeology, evolutionary ecological theory, complex hunter-gatherers in North Pacific, social evolution, settlement systems; Alaska, Russian Far East

**Goodreau, Steven M.** (PhD Pennsylvania State 2001; Asst Prof)
Human social networks, HIV, sexual identity and behavior, human/pathogen co-evolution, population genetics, infectious disease epidemiology

**Grayson, Donald K.** PhD Oregon 1973; Prof)
Archaeology, paleobiology, faunal analysis, history of archaeology; North America, Western US, European Paleolithic

**Green, James W.** (PhD Washington 1972; Sr Lect)
Comparative religion, visual anthropology, cross-cultural mental health, comparative study of death; West Indies, Pakistan

**Harrell, Stevan** (PhD Stanford 1974; Prof, Curator of Asian Ethnology, Burke Museum)
Demography, family, ecology, education, ethnicity, material culture; China and Taiwan

**Hoffman, Daniel** (PhD Duke 2004; Asst Prof)
Visual anthropology, violence and militarism, global capitalism, poststructuralism, experimental ethnography; West Africa

**Holman, Darryl** (PhD Pennsylvania State 1996; Asst Prof)
Anthropological demography, human reproductive ecology, paleodemography

71
Hunn, Eugene S.  (PhD UC Berkeley 1973; Prof) Folk science (cultural ecology), formal methods, human ecology, human nature & culture; Northwest American Plateau, Mesoamerica

Jolles, Carol  (PhD Washington 1990; Res Assoc Prof) Culture Change, gender, ethnography, modern hunters-gathers, Alaskan Inuit and Yupik societies, Native North America

Kahn, Miriam  (PhD Bryn Mawr 1980; Prof) Cultural representations, museum exhibition, place-making, tourism; Oceania, Melanesia, Polynesia

Keyes, Charles E.  (PhD Cornell 1967; Prof) Interpretive anthropology, religion & political-economic change, ethnic & national cultures, sociology of Theravada Buddhism; Southeast Asia, Thailand, Vietnam

Kramer, Patricia  (PhD Washington 1998; Res Asst Prof) Human and non-human primate fossils and locomotion; osteoarthritis and aging of the musculoskeletal system; biomechanics and energetics of locomotion

Lape, Peter  (PhD Brown 2000; Asst Prof; Curator, Burke Museum) Archaeology and history, culture contact, colonialism, settlement patterns, religious change; Western Pacific, West Coast North America

Leonetti, Donna L.  (PhD Washington 1976; Assoc Prof) Biocultural anthropology, human behavioral ecology and anthropological demography; fertility, child mortality and growth; intergenerational effects; aging; social epidemiology; NE India, Asian Americans

Llobera, Marcos  (PhD Oxford 1999; Asst Prof) Landscape ecology, GISc, computer and mathematical spatial modeling archaeological theory, cognition and perception; Western Mediterranean

Lowe, Celia  (PhD Yale 1999; Asst Prof) Anthropology of reason, post-colonial theory, science studies, nationalism, identity; Southeast Asia, Indonesia

Newell, Laura L.  (PhD Washington 1967; Prof) Physical anthropology, non-human primates, growth & development, disease & body composition

O’Connor, Kathleen  (PhD SUNY Albany 1995; Asst Prof) Anthropological demography, biodemography, human reproductive biology, paleodemography

Ouano, Arzoo  (PhD Stanford 2002, JD American University 1993; Asst Prof) Human rights, law, gender and Islam, refugee and asylum, liberalizm, sovereignty, mercy/forgiveness and social accountability

Peta, Devon  (PhD Texas-Austin 1983; Prof) Agroecology, bioregionalism, ethnoecology, social movements, labor process theory, workplace politics

Rhodes, Lorna Amarasingham  (PhD Cornell 1973; Prof) Cultural anthropology, culture & psychiatry; medical anthropology, religion; South Asia, Sri Lanka, US

Shell-Duncan, Bettina  (PhD Pennsylvania State 1994; Assoc Prof) Epidemiology, disease ecology, demography, maternal & child morbidity & mortality; East Africa

Sivaramakrishnan, K.  (PhD Yale 1996; Assoc Prof) Environmental anthropology, agrarian studies, historical anthropology, political & social theory, cultural geography, science & technology studies; South Asia

Smith, Eric A.  (PhD Cornell 1980; Prof) Behavioral ecology, ecological demography; arctic North America, indigenous Australia

Stein, Julie K.  (PhD Minnesota 1980; Prof; Curator, Burke Museum; Assoc Dean, Arts & Sciences) Archeology, geoarchaeology, archaeological sediments, site formation processes, shell middens; Northwest Coast, New World

Taylor, Janelle S.  (PhD Chicago 1999; Asst Prof) Science & technology, gender, feminist theory, medicine, reproduction, commodification, media & advertising; US, China

adjunct faculty

(Home department listed after academic rank)

Chrisman, Noel  (PhD UC Berkeley 1966; Prof, Psychosocial & Community Health) Medical anthropology, urban anthropology, applied anthropology, ethnicity, social networks; US

Dudley, Shannon K.  (PhD UC Berkeley 1997; Asst Prof, Music) Nationalism, Ethnicity, Performance; Caribbean, Latin America, West Africa

Ellington, Ter  (PhD Wisconsin 1979; Assoc Prof, Music) Ethnomusicology, religion; Tibet, Nepal, Sri Lanka

Jacobs, Sue-Ellen  (PhD Colorado 1970; Prof, Women Studies) Social anthropology, women cross-culturally, ethnohistory, applied anthropology; North America, Southwest US

Kyes, Randall C.  (PhD Georgia 1989; Res Asst Prof, Psychology) Population demographics & ecology of macaques, behavior genetics, social perception in monkeys in Indonesia

Lockard, Joan  (PhD Wisconsin 1963; Prof, Psychology) Behavioral primatology, behavioral ecology

McGroath, Barbara B.  (PhD Washington 1993; Research Assoc. Prof, School of Nursing) Description of cultural variation in response to illness, investigation of the role of culture in the creation of meaning, and the application of ethnographic inquiry methods in the study of health issues

Miller, Marc  (PhD UC Irvine 1974; Prof, School of Marine Affairs) Cultural anthropology, tourism planning, marine affairs, natural resource management, ethnographic methods

Muecke, Marjorie A.  (PhD Washington 1976; Prof, Psychosocial & Community Health) Medical anthropology, refugee acculturation, women; Mainland Southeast Asia, Thailand

Posner, Karen  (PhD Washington 1990; Res Asst Prof, Anesthesiology) Ethnographic analysis of clinical interaction between patients & doctors, medical anthropology, retirement planning

Sorensen, Clark  (PhD Washington 1981; Assoc Prof, Jackson School of International Studies) Sociocultural anthropology, ecological anthropology, peasant economy, development, social change; Korea, East Asia
AFFILIATE FACULTY

**Brewer, Devon D.** (PhD UC Irvine 1994)
Drug abuse, HIV, communicable diseases

**Crockett, Carolyn M.** (PhD Washington 1971)
Behavioral ecology, primate socioecology

**Epstein, Lawrence** (PhD Washington 1977)
Sociocultural anthropology, religion, symbolic anthropology; South Asia, Tibet, Himalayas

**Etier, Michael A.** (PhD Washington 2002)
Zooarchaeology, historical biogeography, paleoecology of marine mammals, modern ecology of marine mammals

**Gorman, Michael** (PhD Chicago 1980)
Substance abuse, HIV/AIDS issues, public health

**Hsieh, Shih-chung** (PhD Washington 1990)
Ethnicity, interpretive anthropology, Fourth World network analysis; SW China, northern SE Asia

**Hunt, Terry** (PhD Washington 1989)
Geomathematics, evolutionary theory, historical linguistics; Oceania

**Hutterer, Karl L.** (PhD Hawaii 1973)
Archaeology, ecology, technology; Southeast Asia, East Asia

**Lieber, Edward B.** (PhD Arizona State 1986)
American Indian community development & culture change, environmental planning

**Sepez, Jennifer** (PhD Washington 2001)
Environmental anthropology, fisheries management, social impacts of policy, subsistence hunting and fishing, environmental and Indian law; Northwest Coast and Alaska

**Takezawa, Yasuko I.** (PhD Washington 1990)
Ethnicity, cross-cultural communications, urban anthropology, family & community, education, gender; Japan

**Taylor, Katherine** (PhD Arizona 2000)
Skeletal Biology, Human Evolution, Forensic Anthropology, Evolutionary Theory

**Thompson, Gail** (PhD Washington 1978)
Cultural resources management, settlement patterns, artifact analysis; Western North America, Northwest Coast

**Wilson, Douglas** (PhD Arizona 1991)
Historical Archaeology, Public Archaeology, Method and Theory in Archaeology, Pacific Northwest Archaeology, GIS

EMERITUS & RETIRED FACULTY

**Dunnell, Robert C.** (PhD Yale 1967; Prof)
Archaeology, method & theory; Eastern US.

**Geerse, Robert E.** (PhD Harvard 1957; Assoc Prof)
Archaeology; Northwestern America, Mesoamerica

**Nason, James D.** (PhD Washington 1970; Prof; Curator, Burke Museum)
Culture contact & culture change, social organization, material culture, museology; Micronesia; Polynesia, North American Indians

**Nute, Peter E.** (PhD Duke 1969; Prof)
Physical anthropology, genetics, demography, evolutionary theory

**Osborne, Oliver H.** (PhD Michigan State 1968; Prof Emer, Psychosocial Nursing and Adjunct Emer, Anthropology)
Medical anthropology, culture and personality; Africa

**Ottenberg, Simon** (PhD Northwestern 1987; Prof)
Political organization, ethnicity, aesthetics; Africa

**Spain, David H.** (PhD Northwestern 1969; Prof)
Psychocultural anthropology, methodology, social change, history of theory; Africa

**Swindler, Daris R.** (PhD Pennsylvania 1959; Prof)
Physical anthropology, comparative primate anatomy, dental anthropology, forensic anthropology

**Watson, James B.** (PhD Chicago 1948; Prof)
Cultural ecology, sociocultural change, economic anthropology, social exchange & regional structures; Melanesia, New Guinea.

**Winans, Edgar V.** (PhD UCLA 1959; Prof)
Political & legal systems, social change, economic anthropology; Africa

Research Associates

**Greenlee, Diana** (PhD Washington 2002)
Human diet and subsistence, palaeoenvironments, bone chemistry and microstructure, maize-based farming systems, evolutionary theory; eastern North America, especially the Ohio and Mississippi River valleys

**Herslund, Ylva** (PhD Washington 2003)
Decision making, female circumcision, gender, ritual, visual communication; the Gambia and Senegal

Identity and the politics of reproduction, feminist theory, marital and family law, ethnography of the state, the effects of war on gender relations and family formation, medical anthropology; Viet Nam

**Sarton-Miller, Isabelle** (PhD Washington 2005)
Energy expenditure in Third World children; easy ways to measure energy expenditure

**Shenk, Mary K.** (PhD Washington 2005)
Human behavioral ecology; microeconomic modeling; human marriage and family systems; demographic transition; inheritance and property transfer systems; South Asia, especially India

Lecturers

**Barker, Holly**

**Lemov, Rebecca** (PhD UC Berkeley 2000)
History of anthropology, sociocultural theory, visual anthropology, systems of social control ("brainwashing")

**Porter, Leila** (PhD SUNY Stony Brook 2000)
Primate evolution, behavior, ecology, conservation; small-bodied monkeys in South America (Callitrichines); the interaction between diet, social organization and reproductive strategies in Goeldi's monkeys; how a species' behavior is affected by its current environment and its evolutionary history; conservation work in northern Bolivia
Course Descriptions

ANTH 100 Introduction to Anthropology (5) I&S
Introduction to the subfields of archaeology, biocultural anthropology, and sociocultural anthropology through the examination of selected problems in human physical, cultural, and social evolution. Not recommended for students who have had other courses in anthropology, archaeology, or biocultural anthropology. May not be counted toward the 55 credits required for the major in anthropology. Offered: AWSp.

ANTH 150 Culture and Rights: Exploring the Meaning and Practice of Human Rights (5) I&S
Examines social justice issues with the aim of obtaining deeper understanding of human rights. Analyzes historical and theoretical foundations and introduces international and regional institutions designed to implement and enforce human rights. Case studies in sovereignty, war crimes, ethnic cleansing, genocide, torture, truth commissions, and forgiveness.

ANTH 202 Principles of Sociocultural Anthropology (5) I&S
Comparison of lifeways of various non-Western and Western peoples. Introduction to basic theories and methods used in the field.

ANTH 203 Introduction to Anthropological Linguistics (5) I&S/VLPA
Linguistic methods and theories used within anthropology. Basic structural features of language; human language and animal communication compared; evidence for the innate nature of language. Language and culture: linguistic relativism, ethnography of communication, sociolinguistics. Language and nationalism, language politics in the U.S. and elsewhere. Offered: jointly with LING 203.

ANTH 204 Reading Ethnography (5) I&S
Introduction to the descriptive and analytic literature of cultural anthropology. Extended examination of representative accounts of the lifeway of peoples from selected areas of the world with an emphasis on methods of observation and analysis.

ANTH 206 The Cultural Animal (5) I&S/NW
Examination of the interaction between biology and culture in shaping human social behavior. Basic principles of natural selection, gene-environment interaction, cultural transmission, learning, and cultural evolution; application of these to various topics, including gender, violence, politics, kinship, and religion.

ANTH 207 Class and Culture in America (5) I&S
Anthropological view of the contemporary United States with emphasis on social class. Through ethnographic readings examines education, work, political economy, working class experience and the ideology of the middle class, and relations between class and race, gender, ethnicity, language, place, sexuality, and culture.

ANTH 208 The Culture Concept (5) I&S
History of the culture concept and its use in the field of cultural anthropology. History of its emergence in European colonial expansion and contemporary debates about its place as the central concept defining the field of anthropology.

ANTH 209 Anthropology Through Visual Media (5) I&S/VLPA
Theories of culture and cultural variation, as seen and understood through visual media such as films, video, and photography.

ANTH 210 Introduction to Environmental Anthropology (5) I&S
Introduction to human/environment interactions from various anthropological perspectives. Intellectual history of anthropological approaches to environment, emphasizing the mutual interconnectedness of people and nature. Survey of evolutionary models; cultural ecology; systems approaches; indigenous knowledge; ethnoecology; nature and the state; political ecology; ecofeminism; and environmentalism.

ANTH 228 Identities: Race, Class, Gender, and Sexuality in Anthropology (5) I&S
An introduction to the study of race, class, gender, and sexuality in anthropology. Through ethnographic and theoretical readings, students are introduced to the concept of identity as intersectional construction and social performance.

ANTH 289 Identities: Service Learning (3) I&S

ANTH 301 Human Nature and Culture (3) I&S
Comparison of various anthropological perspectives on the sources of variation in customs, values, and beliefs of human groups, including non-Western peoples and contemporary Americans.

ANTH 305 Anthropology of the Body (5) I&S
Surveys classic anthropological literature examining the relationship between culture and the body. Examines Euroamerican body culture historically. Explores how the body is represented in mass media and the effects this has on everyday body ideologies.

ANTH 306 Representations of the Pacific Islands and Islanders (3) I&S/VLPA Kahn
Explores written texts and visual images about the Pacific Islands and Islanders in an effort to understand the power of representation and its relationship to the construction of knowledge. Examples drawn from early explorers, artists, novelists, anthropologists, the tourist industry, and Pacific Islanders.

ANTH 307 U.S. Pacific Islander Contemporary Culture (5) I&S/McGrath
Examines U.S. Pacific Islander culture as informed by Pacific history, social and cultural organization. Emphasis on understanding contemporary experience in the U.S. and other diaspora communities. Major themes include post-colonialism, migration, family, religion, politics, gender, education, and transnational identity. Recommended: either ANTH 202 or AES 151. Offered: jointly with AAS 300. Offered: Sp.

ANTH 308 Anthropology of Women’s Health and Reproduction (5) I&S Chapman
Introduction to anthropological approaches to women’s health, addressing women’s health status and participation in healthcare. Topics include reproductive health, women’s bodies and sexuality, social policy in relation to gender, race, ethnicity, and class. Emphasis on how the politics of gender shapes women’s experiences of health care institutions in the U.S.

ANTH 310 Native North American Societies (5) I&S Smith
Traditional cultures of America north of Mexico, emphasizing diversity of North American Indian and Eskimo societies. Origins of Native-American culture areas and language groupings; subsistence systems; levels of social organization; European conquest and colonialism; and description of representative cultures from the ten culture areas. Recommended: ANTH 100.

ANTH 312 Pacific Islands Literature (5) I&S/VLPA
Focuses on works written by Pacific Islanders (novels, short stories, plays, and poetry) since the 1970s. Explores colonialism and its effects on indigenous peoples. Examines discourses of gender, class, and cultural identity within the Pacific Islands region.

Speed, Clarke

Welland, Sasha (PhD Candidate UC Santa Cruz)
Visual and expressive culture, China and Pacific Rim discourse and gender; the social role of visual art and competing ideas of aesthetic, cultural, and market value in reform-era China.
ANTH 313 Peoples of Africa (5) I&S
Survey of the many cultures of pre- and post-colonial sub-Saharan Africa. Appreciation of the adaptability, strength, and creativity of African peoples. Recommended: ANTH 100.

ANTH 314 Culture, Environment, and Identity of Island Southeast Asia (5) I&S Lowe
Anthropological study of colonial and post-colonial contexts of Island Southeast Asia. Emphasis on historical legacies, influence of world religions, formation of national and collective identities, revolution and national politics, and modernities. Prerequisite: either one 200-level

ANTH 315 Southeast Asian Civilization: Buddhist and Vietnamese Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos and in Vietnamese societies of Southeast Asia. Culture of tribal peoples who live on peripheries of these societies. Cultural transformations consequent upon the war in Indochina and resettlement of Indochinese refugees in United States. Offered: jointly with SISSE 315.

ANTH 316 Modern South Asia (5) I&S
Twentieth-century history and society of Indian subcontinent. Topics include nationalism, rural and urban life, popular culture, gender, and environmental politics. Offered: jointly with SISSE 316.

ANTH 317 Anthropology of Tibetan Civilization (5) I&S
Introduces the basic features of Tibetan society and culture, exploring how the global debate over Tibet’s past, present, and future relates to contemporary concerns in anthropology, through the examination of Tibetan history, social and political organization, religion, and other cultural themes in both traditional and contemporary contexts.

ANTH 318 Peoples and Cultures of the Islamic Middle East (3) I&S
Survey of cultures and peoples of Islamic Middle East and North Africa. First half of the course emphasizes the integration of peasant, urban, and nomadic societies in the traditional culture and economy; the second half concentrates on the transformation of the traditional life styles through the process of westernization and modernization.

ANTH 320 Game Theory, Evolution, and Behavior (4) I&S, QSR Bergstrom, Smith
Introduction to the logic and basic techniques of modern game theory, and exemplary applications to understand behavioral variation and social interaction in humans and other species. Emphasizes non-mathematical representations of fundamental concepts and processes, with considerable use of computer-based exercises and experiments. Offered: jointly with BIOL 320.

ANTH 321 Comparative Religion (3) I&S
Anthropological approaches to religious experience and belief with emphasis on conceptual issues such as ritual, symbolism, identity, ecstatic experience, and revitalization movements in the context of globalization. Also addresses the diversity of religious expression in American culture and how that compares with other societies. Offered: jointly with RELIG 321.

ANTH 322 Comparative Study of Death (5) I&S
Death analyzed from a cross-cultural perspective. Topics include funerary practices, concepts of the soul and afterlife, cultural variations in grief, cemeteries as folk art, and medical and ethical issues in comparative context. American death practices compared to those of other cultures. Offered: jointly with RELIG 320.

ANTH 323 Human Rights Law in Culture and Practice (5) I&S
Introduces the complexities of issues surrounding human rights. Examines human rights concerns through critical analyses, taking into account legal, social, economic, and historical variables. Offered: jointly with LSI 321.

ANTH 324 Culture and Politics of Africa (5) I&S Hoffman
Introduction to African cultural responses to the slave trade, European colonialism, and globalization. Topics include an examination of Euro-American representations of Africa and how they are often at odds with African realities.

ANTH 325 Buddhism and Society: The Theravada Buddhist Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos and in Vietnamese societies of Southeast Asia. Culture of tribal peoples who live on peripheries of these societies. Cultural transformations consequent upon the war in Indochina and resettlement of Indochinese refugees in United States. Offered: jointly with RELIG 330.

ANTH 331 Native Art of the Pacific Northwest Coast (5) I&S/VLPA
Survey of the indigenous arts of the Pacific Northwest Coast from the Columbia River in the south to Southeast Alaska in the north. Overview of ancient through contemporary times, focusing on the historical and cultural contexts of the arts and the stylistic differences between tribal and individual artists’ styles. Offered: jointly with ART H 331.

ANTH 333 Cultural Anthropology of Africa (5) Ramamurthy, Sivaramakrishnan
Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 339/SISA 339.

ANTH 334 Women and International Economic Development (5) I&S Ramamurthy

ANTH 335 Anthropological Studies of Women (5) I&S
Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 339/SISA 339.

ANTH 336 Comparative Studies of Childhood (5) I&S Ramamurthy
Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 339/SISA 339.

ANTH 337 Visual Anthropology (3) I&S
Introduction to the logic and basic techniques of modern game theory, and exemplary applications to understand behavioral variation and social interaction in humans and other species. Emphasizes non-mathematical representations of fundamental concepts and processes, with considerable use of computer-based exercises and experiments. Offered: jointly with BIOL 320.

ANTH 338 Peoples and Cultures of the Islamic Middle East (3) I&S
Survey of cultures and peoples of Islamic Middle East and North Africa. First half of the course emphasizes the integration of peasant, urban, and nomadic societies in the traditional culture and economy; the second half concentrates on the transformation of the traditional life styles through the process of westernization and modernization.

ANTH 339 Social Movements in Contemporary India (5) Ramamurthy, Sivaramakrishnan
Examines human rights concerns through critical analyses, taking into account legal, social, economic, and historical variables. Offered: jointly with LSI 321.

ANTH 340 Game Theory, Evolution, and Behavior (4) I&S, QSR Bergstrom, Smith
Introduction to the logic and basic techniques of modern game theory, and exemplary applications to understand behavioral variation and social interaction in humans and other species. Emphasizes non-mathematical representations of fundamental concepts and processes, with considerable use of computer-based exercises and experiments. Offered: jointly with BIOL 320.

ANTH 341 Comparative Religion (3) I&S
Anthropological approaches to religious experience and belief with emphasis on conceptual issues such as ritual, symbolism, identity, ecstatic experience, and revitalization movements in the context of globalization. Also addresses the diversity of religious expression in American culture and how that compares with other societies. Offered: jointly with RELIG 321.

ANTH 342 Comparative Study of Death (5) I&S
Death analyzed from a cross-cultural perspective. Topics include funerary practices, concepts of the soul and afterlife, cultural variations in grief, cemeteries as folk art, and medical and ethical issues in comparative context. American death practices compared to those of other cultures. Offered: jointly with RELIG 320.

ANTH 343 Human Rights Law in Culture and Practice (5) I&S
Introduces the complexities of issues surrounding human rights. Examines human rights concerns through critical analyses, taking into account legal, social, economic, and historical variables. Offered: jointly with LSI 321.

ANTH 344 Culture and Politics of Africa (5) I&S Hoffman
Introduction to African cultural responses to the slave trade, European colonialism, and globalization. Topics include an examination of Euro-American representations of Africa and how they are often at odds with African realities.

ANTH 345 Women and International Economic Development (5) I&S Ramamurthy

ANTH 346 Visual Anthropology (3) I&S
Introduction to the logic and basic techniques of modern game theory, and exemplary applications to understand behavioral variation and social interaction in humans and other species. Emphasizes non-mathematical representations of fundamental concepts and processes, with considerable use of computer-based exercises and experiments. Offered: jointly with BIOL 320.

ANTH 347 Comparative Studies of Childhood (5) I&S Ramamurthy
Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 339/SISA 339.

ANTH 348 Culture and Cognition (5) I&S/NW
Surveys anthropological theories and research on the relationship between language, thought, and behavior. Examines the influence of cultural inheritance on perception, classification, inference, and choice. Describes relevant cross-cultural research methods and evaluates theoretical models used by cognitive anthropologists.
ANTH 359 Linguistic Ethnography (5) I&S

ANTH 362 Anthropology of Tourism (5) I&S Kahn
Anthropological approaches to tourism. Debates about cultural encounters and cultural change, authenticity, economic development, social inequalities, identity, gender, ethnicity, nationality, and cultural representation. Prerequisite: one 200-level ANTH course.

ANTH 370 Han Chinese Society and Culture (5) I&S Anagnost, Harrell
Themes in the society and culture of the Han Chinese people. Concepts of self; personal interaction; family, gender, and marriage; communities and the state; religion and ritual; class, social categories, and social mobility; culturalism, nationalism, and patriotism. Offered: jointly with SISEA 370.

ANTH 371 Anthropology of Development (5) I&S Sivaramakrishnan
Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-development. Role of development in promoting national cultures. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Prerequisite: one 200-level ANTH course. Offered: jointly with ENVIR 371.

ANTH 375 Comparative Systems of Healing (3) I&S
Introduction to the anthropological study of healing. Examines four healing traditions and addresses their similarities and differences. Includes anthropological theories of healing and religion.

ANTH 379 Prisons in Anthropological Perspective (5) I&S Rhodes
An introduction to prisons from an anthropological point of view, with focus on prisons as total institutions. Topics include the experiences of prisoners and staff, prison history, issues of race and gender associated with incarceration, and the imprisonment of the mentally ill. Offered: jointly with LSJ 379.

ANTH 399 Junior Honors Seminar (5) I&S
Teaches skills required to write senior honors thesis, including evaluation of academic and scientific writing, formulation of problem, collection of bibliographic and other resources, evaluation of research proposals, and research proposal preparation. Final product is a formal thesis prospectus.

ANTH 401 West African Societies (3) I&S
Social and cultural features of coastal and interior West African societies, including the Western Sudan. Detailed study of selected societies. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 402 Societies of Eastern and Southern Africa (5) I&S
Historical background and contemporary life of cultural groups in eastern and southern Africa with special study of selected cases of political and economic organization and cultural change. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 404 South America (5) I&S
Survey of anthropological research among the traditional peoples of South America. Historical background and contemporary life of cultural groups of the Amazonian Basin. Transformation of traditional life-styles through the process of European conquest and the aftermath of colonialism. Detailed study of selected societies. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 412 South Asian Social Structure (5) I&S
Caste class, and community in modern India. Transitions from colonial typology to analysis of social change, diversity, stability, and caste hierarchy in rural society. Current debates on class and community in Indian society, rural and urban, explored through themes of identity, structure, and mobility. Prerequisite: one 200-level ANTH course. Offered: jointly with SISSE 412.

ANTH 416 Comparative Social Movements: Mexico and the United States (5) I&S Pena
Historical, ethnographic, and theoretical perspectives in the study of Mexican-origin communities in social movements in Mexico and the United States with a focus on workers, immigrants, peasants, women, indigenous peoples, and students as forces of collective mobilization and social, cultural, and political change. Offered: jointly with CHSTU 416.

ANTH 418 Indian Heritage of Mexico and Central America (5) I&S
Indian civilization of Mexico and Guatemala, their origins and ecological foundations. Contemporary communities of Mexico and Guatemala, focusing on creative adaptation of pre-Columbian traditions to modern national realities. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 420 Psychoanalysis and the Study of Culture (3) I&S Spain
Anthropological use of theories developed by Freud to understand culture. Reviews psychoanalytic theory as a foundation for examining the work of Roheim, LaBarre, Devereaux, Kardiner, and Spiro, among others. Topics covered include the universality of oedipality and the utility of psychoanalysis in non-Western cultures.

ANTH 421 Belief, Ritual, and the Structure of Religion (5) I&S
Systematic survey of concepts, models, and theories that characterize the anthropological study of religion. Consideration of the human universal basis of religion and of diverse ways in which religions are constructed and related to social experience. Prerequisite: either ANTH 321 or RELIG 201; RELIG 202.

ANTH 423 Traffic Across Cultural Boundaries (5) I&S
Focuses on the movement of cultural patterns and processes across boundaries, examining the “contact zones” in colonial encounters, moving to borrowing and blendings along ethnic and national borders. Examines border crossing of immigration and diasporas. Ethnographic examples from the Americas and Africa. Prerequisite: one 200-level ANTH course.

ANTH 424 Hunter-Gatherer Societies (4) I&S
Comparative examination of human foraging societies, emphasizing ethnographic cases and socioecological analysis. Foraging and human evolution; rationality of foraging societies; population and reproductive strategies; variability in social organization and land use; power relations between the sexes; ritual and belief; contemporary status of hunter-gatherer populations. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 425 Anthropology of the Post-Soviet States (5) I&S
Analysis of Soviet and post-Soviet culture and identity. Historical transformations in Soviet approaches to ethnicity and nationality; contemporary processes of nationbuilding and interethnic conflict. Examination of culture through the intersection of social ritual, government policies, language, economic practices, and daily life. Regional focus will vary. Offered: jointly with SISRE 425.

ANTH 427 Anthropology in Urban Settings (3) I&S
Cross-cultural examination of theoretical issues in anthropology as studied in urban places. Focuses on ethnic identity and the formation of urban ethnic groups; migration and its rural and urban conse-
Data, theories, and analytical technique used in the study of kinship systems, including our own, from around the world. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 438 The Analysis of Kinship Systems (5) I&S
Cross-cultural study of the child-rearing practices, cultural norms, and health behavior of children and adolescents in different societies. Comparative approaches, diverse theoretical postures, and empirical research findings are used. Offered: jointly with NURS 495.

ANTH 441 Psychological Anthropology (5) I&S
Assessment of mutual relevance of cultural and psychological variables in anthropology. Historical development of principal topics, e.g., cognition, national character, enculturation, personality and social change, cross-cultural psychiatry, sex and temperament, deviance, and psychoanalytic studies of culture. Prerequisite: either PSYCH 101 or PSYCH 205.

ANTH 444 Politics of Representation in Modern China (5) I&S
Focuses on issues of representation and power in twentieth century China. Combines substantive information on modern Chinese society and culture with recent debates in social theory and the politics of representation. Major themes include Chinese nationalism, body politics, popular culture, and everyday practice. Offered: jointly with SISEA 444.

ANTH 445 Literature and Society in Southeast Asia (5, max. 10) I&S/VLPA
Focus on either Vietnam or Thailand. Provides students with opportunity to explore how those living in Southeast Asia have reflected on the radical social changes their societies have undergone through novels, short stories, and poetry. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with SISEA 445.

ANTH 446 Class and Culture in East Asia (5) I&S
Examines the nexus between culture and systems of social stratification/class in East Asia, with an emphasis on Taiwan, Korea, Japan, and China. Topics include class formation, mechanisms of social mobility and reproduction, markers of status and hierarchy, resistance, and the formation of class identity. Offered: jointly with SISEA 443.

ANTH 447 Anthropology of Chinese Religion (5) I&S
Chinese religions, including folk, popular, and new religions, viewed from an anthropological perspective. Prerequisite: either ANTH 202, 204, 208, 321, 421, 370 or RELIG 202, or SISEA 370, 454.

ANTH 448 Modern Korean Society (5) I&S
Social organization and values of twentieth-century Korea. Changes in family and kinship, gender relations, rural society, urban life, education, and industrial organization since 1900. Differences between North and South Korea since 1945. Recommended: HSTAS/SISEA 212. Offered: jointly with SISEA 448.

ANTH 449 Social Transformation of Modern East Asia (5) I&S
Comparative study of social change in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale social units in rural and urban areas under both communist and capitalist political systems. Recommended: two history or anthropology of East Asia courses. Offered: jointly with SIS 449.

ANTH 450 Language and Gender (5) I&S, VLPA Bilaniuk
Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with WOMEN 450/LING 458.

ANTH 451 Comparative Historical and Social Ecology of the Tropics (5) I&S Sivaramakrishnan
Historical and social aspects of tropical environmental change.
Comparative analysis of resource management, conservation, and environmental regulation issues in Asia, Africa, and Latin America from cultural and political economic perspectives. Special focus on issues of state policy, expert knowledge, social conflict, and international politics. Prerequisite: ANTH 210. Offered: jointly with ENVIR 451.

**ANTH 454 Women, Words, Music, and Change (5)** I&S/VLPA
Comparative analysis of use of myths, tales, music, and other forms of expressive culture to account for, reinforce, and change women’s status and roles. Recommended: WOMEN 353. Offered: jointly with WOMEN 454.

**ANTH 455 Areal Linguistics (3, max. 6)** I&S/VLPA
Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Borrowing vocabulary specialization, lexical change, and language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with LING 455.

**ANTH 456 Contemporary Ethnography (5)** I&S
Techniques and theories of ethnographic description for the anthropological analysis of contemporary life. Materials drawn from the contemporary United States, with a focus on issues and events in the Seattle area. Includes fieldwork projects. Prerequisite: either one 200-level ANTH course or LING 203.

**ANTH 457 Ecological Anthropology (5)** I&S
Survey of anthropological research on interaction between human societies and their environments. Logic of different subsistence systems; intensification and transformation of subsistence strategies; population regulation; ecological aspects of human nutrition, disease, spatial organization, ethnicity, social stratification, conflict, and cooperation; historical roots of current ecological crisis.

**ANTH 458 Ethnobiology: Plants, Animals, and People (5)** I&S
*Culturally mediated relationships between human and natural environment studied in a comparative and evolutionary framework. How do peoples in diverse cultures recognize and name plants and animals and understand their relationship with nature? How is this traditional ecological knowledge applied in people’s daily lives? Prerequisite: either BIO A 201, ARCHY 205, or one 200-level ANTH course.*

**ANTH 459 Culture, Ecology, and Politics (5)** I&S
*Pena
Critical studies of class, gender and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecoculturalism, environmental justice, and social ecology. Offered: jointly with ENVIR 459.

**ANTH 460 History of Anthropology (5)** I&S
Sources and development of leading concepts, issues, and approaches in anthropology. Findings of anthropology in relation to scientific and humanistic implications and to practical application. Main contributors to field; their work and influence. Past, present, and future perspectives, including anthropological of modern life.

**ANTH 464 Language Politics and Cultural Identity (3)** I&S/VLPA
*Bilaniuk
Theories and case studies of the power of language an how it is manipulated. Multilingualism, diglossia. Role of language and linguistics in nationalism. Standardization, educational policy, language and ethnicity. World languages, language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with LING 433.

**ANTH 465 Critical Anthropology of Mass Culture (5)** I&S
Critical overview of theories of mass culture and their relationship to current anthropological practice. Analyses of the historical interconnections among capitalism and commodity fetishism, modernity and representation, and media and consumption.

**ANTH 466 Anthropology Honors Thesis (1-9)** I&S
*Pena
Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

**ANTH 467 Anthropology of Education (5)** I&S
Uses a wide range of social theory and philosophy to investigate mechanisms which reproduce inequality and asymmetry in American education.

**ANTH 469 Special Studies in Anthropology (3-5, max. 15)** I&S
Delineation and analysis of a specific problem or related problems in anthropology. Offered occasionally by visitors or resident faculty.

**ANTH 470 Minority Peoples of China (5)** I&S
Interaction between China and the peoples of its periphery, including inner Asia, Tibet, northern mainland Southeast Asia, and aboriginal peoples of Taiwan. Emphasis on ethnicity, ethnic group consciousness, and role of the Chinese state. Prerequisite: one 200-level ANTH course; LING 203; either ANTH/SISEA 370 or HSTAS 454. Offered: jointly with SISEA 470.

**ANTH 471 Colonialism and Culture (5)** I&S
Explores the cultural, political, and historical implications of the power to colonize. Readings include ethnographic, historical, and literary works on colonialism, nationalist responses, and postcolonial positions.

**ANTH 473 Anthropology of Science and Technology (5)** I&S
*Lowe, Taylor
Introduces the study of science and technology as social and cultural phenomena. Considers both theoretical and methodological questions. Readings include key texts from interdisciplinary field of science studies as well as selected ethnographic texts. Examples taken from U.S. society and other local contexts. Prerequisite: one 200-level ANTH course.

**ANTH 474 Social Difference and Medical Knowledge (5)** I&S
*Taylor
Explores relations between medical and social categories: how social differences become medicalized; how medical conditions become associated with stigmatized social groups; and how categories become sources of identity and bases for political action. Considers classifications (race, gender, sexuality, disability) and how each has shaped and/or been shaped by medical science/practice.

**ANTH 475 Perspectives in Medical Anthropology (5)** I&S
*Taylor
Introduction to medical anthropology. Explores the relationships among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with HSERV 475.

**ANTH 476 Culture, Medicine, and the Body (5)** I&S
Explores the relationship between the body and society, with emphasis on the role of medicine as a mediator between them. Case study material, primarily from contemporary bio-medicine, as well as critical, postmodern, and feminist approaches to the body introduced within a general comparative and anthropological framework.

**ANTH 477 Medicine in America: Conflicts and Contradictions (3)** I&S
Introduction to the pragmatic and theoretical dilemmas of current biomedical practice with emphasis on social and cultural context. Case studies in technological intervention, risk management, and
other health-related issues used to explore connections among patients’ experiences, medical practices, and the contemporary social context.

ANTH 478 Introduction to the Anthropology of Institutions (5) I&S Rhodes
Historical, theoretical, and ethnographic perspectives on the study of total institutions, with an emphasis on prisons and psychiatric facilities. Includes issues of subjection and subjectivity, institutional social dynamics, and social justice concerns.

ANTH 480 Introduction to Museology (3) I&S
Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics. Offered: jointly with MUSEUM 480.

ANTH 481 Museum Collection Management: Ethnology (3) I&S
Lecture and work experience in museum collection management in the ethnology collections of the Burke Memorial Washington State Museum, including identification, cataloging, fumigation, storage, cleaning, inventory, and specimen preparation for exhibition of archival and nonarchival museum specimens from North America, the Pacific, and Pacific Rim areas. Offered: jointly with MUSEUM 481.

ANTH 482 Museum Conservation (3) I&S
Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel. Offered: jointly with MUSEUM 482.

ANTH 484 Motherhood: Ideologies and Technologies (5) I&S Twine
Examines how motherhood is culturally constituted, regulated, and managed within various ideological and technologic milieus. Uses ethnographies from anthropology and case studies from feminist legal theory. Topics include slave mothers, surrogate mothers, lesbian mothers, transracial mothers, co-mothers, teen mothers. Prerequisite: WOMEN 200. Offered: jointly with WOMEN 458.

ANTH 485 Cultural Property: Legal and Ethical Issues (3) I&S
Examines the complex history of legal and ethical issues affecting the acquisition, ownership, and disposition of cultural property, with special attention to modern indigenous peoples’ requests for repatriation of collections from museums, as well as concerns with intellectual property rights, national patrimony policies, and related trade issues.

ANTH 486 Human Family Systems: Biological and Social Aspects (5) I&S
Examines the complex history of legal and ethical issues affecting the acquisition, ownership, and disposition of cultural property, with special attention to modern indigenous peoples’ requests for repatriation of collections from museums, as well as concerns with intellectual property rights, national patrimony policies, and related trade issues.

ANTH 487 Cultures and Politics of Environmental Justice (5) I&S Pena
Comparative survey of environmental justice movements in the world with focus on critical studies of environmental racism, risk, and sustainable development. Provides theoretical knowledge and research methods incorporating the study of equity and autonomy in environmental impact and risk assessment and other aspects of environmental policy politics. Offered: jointly with AES 487.

ANTH 488 Agroecology (5) I&S Pena
Cross-cultural survey of agroecological research methods, theoretical problems, policy issues, and ethical debates. Local knowledge and ethnoscientific bases of alternative agriculture. Comparative political ecology of agroecosystems with a focus on indicators of social equity and ecological sustainability.

ANTH 489 Anthropology Practicum (2-9, max. 15)
Faculty-supervised internships, either on or off campus, in organizations utilizing anthropological skills in nonacademic settings. Settings may include museums, academic journals, social service or other governmental agencies, and private nonprofit service agencies.

ANTH 491 Honors Colloquium (2, max. 12) I&S
Introduction to anthropological research. Students read original articles and papers and discuss them with authors. Research presenters include department faculty, visiting faculty, and advanced graduate students. Credit/no credit only.

ANTH 495 Advanced Problems in Ethnology (3-5, max. 10) I&S
Current problems in ethnology. Seminar format.

ANTH 497 Domesticating International Human Rights: Perspectives on U.S. Asylum and Refugee Law (5) I&S
Examines the creation, production, and proliferation of law and legal categories relating to the status of refugees and asylum-seekers in the United States. Integrates anthropological perspectives of law’s ability to create meaning in the examination of deeper implications of asylum and refugee law in American society. Offered: jointly with LSJ 425.

ANTH 498 Women’s Rights and Politics in Islamic Society (5) I&S

ANTH 499 Undergraduate Research (*, max. 12)

ANTH 500 Preceptorial Reading (6)
For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the analysis and comparison of social and cultural systems. Not open to graduate students in the sociocultural anthropology program.

ANTH 503 Preceptorial Reading in Linguistic Anthropology (6)
For beginning graduate students who have not had prior training in the problems, principles, and methods involved in linguistic anthropology. See also course description for 203. Not open to graduate students in the linguistics program.

ANTH 507 Current Issues in Sociocultural Anthropology (2-)
Weekly presentations by participants and guest lecturers of current literature and ongoing research in topics pertaining to social, cultural, and linguistic anthropology. Credit/no credit only. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

ANTH 508 Current Issues in Sociocultural Anthropology (2-)
Weekly presentations by participants and guest lecturers of current literature and ongoing research in topics pertaining to social, cultural, and linguistic anthropology. Credit/no credit only. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.
ANTH 509 Sociocultural Anthropology Problem Paper (4)
All first-year graduate students in sociocultural anthropology select a topic for independent research, conduct that research, and prepare a paper of about 25-50 pages on the topic chosen. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

ANTH 510 Seminar on North American Indians (3)
Advanced comparative treatment of selected aspects of the Indian cultures and societies of North America.

ANTH 514 Regional Seminar (3-5, max. 15)
Comparative treatment of selected aspects of cultures and societies of a particular region or area.

ANTH 517 Seminar on South Asia (3)
Advanced analysis of selected problems in South Asian ethnology and social structure. Prerequisite: ANTH 412.

ANTH 521 Seminar on the Anthropological Study of Religion (3, max. 9)
Advanced seminar in the anthropological study of religion designed for students who have a background in the theory and applications of religion developed in the anthropological study of religion. Seminar topics vary each quarter. Prerequisite: ANTH 422 and graduate standing; permission of instructor for graduate students in Comparative Religion.

ANTH 525 Seminar in Culture Processes (3, max. 6)
The concept of process and its application to the study of culture.

ANTH 527 Ethnicities, Nations, and Cultural Identities (3)
Exploration of how cultural differences have been represented in ethnic and national narratives and how these narratives have shaped identities and social relations.

ANTH 533 Law, Liberalism, and Modernity (5)
Examines relationships between law, culture, and power through post-structuralist theories that consider subjectivity, agency, and identity. Explores connections between modern liberal law and the body, possessive individualisms, and discourses of rights. Topics include rights-talk, globalization, biopolitíes, subject-making, modern nation-states, the rule of law, neo-liberalism, and legal cultures.

ANTH 535 Research Issues in Demography and Population Studies (1-2, max. 7)
Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches. Credit/no credit only. Offered: A/WSp.

ANTH 536 Seminar in Visual Anthropology (3)
Significance of anthropological cinema and photography placed in historical perspective. Screening of films to determine the role of the anthropologist as filmmaker, as well as the role of the filmmaker as anthropologist.

ANTH 537 Political Anthropology and Law (3, max. 6)
Seminar on special topics in politics and law and their interrelationships.

ANTH 538 Politics of Representation (3)
Representations of power and the powers of representation. Critical approaches to representation in colonial and postcolonial worlds. Divine kings, exemplary centers, the New World Order, voting subjects, and the possibilities of transgression.

ANTH 539 Social Movements in Contemporary India (5)
Ramamurthy, Sivaramakrishnan

Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with SISSA 539/WOMEN 539.

ANTH 541 Cultural Aspects of International Development (3)
Sivaramakrishnan
Emergence of development as an aspect of late colonialism and the decolonization process. Ways in which development came to visualize social change in sectoral terms like rural land use, cities, and education, while objectifying people in target groups. Relationships between development and modernity, and development and globalization.

ANTH 542 Seminar in Cognitive Anthropology (3)
Examines the intellectual history of cognitive anthropology; assesses its major findings in kinship, folk biology, color classification, and decision and planning theory. Replicates key studies, using cognitive anthropological methods. Evaluates influences from linguistics, psychology, and artificial intelligence research. Practical applications and future prospects.

ANTH 550 Field Techniques in Ethnography (5)
Techniques of collecting, ordering, and utilizing ethnographic data in the field. Problems of rapport, elicitation, observation, interpretation, and ethics. Credit/no credit only.

ANTH 551 Research Design (3)
Principles of research design, including problem delineation and selection of appropriate methods, as applied to current issues in sociocultural anthropology. Prerequisite: permission of instructor.

ANTH 552 Practicum in Ethnographic Research (3)
Techniques of data recording, analysis, and writing for the field ethnographer. Not recommended for non-anthropology graduate students. Prerequisite: ANTH 550 and ANTH 551.

ANTH 553 Analysis of Linguistic Structures (3, max. 6)
Syntactic, semantic, or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with LING 553.

ANTH 555 Discourses in Feminist Anthropology Seminar (5)
Jacobs
Exploration of feminist anthropological theories and the works of their critics. Ways of using feminist anthropology in preparation for and conducting fieldwork. Topics include foundations in feminist anthropology, grand theories, variation in feminist theoretical foci within the “four fields,” responses to critics. Prerequisite: graduate standing. Offered: jointly with WOMEN 553.

ANTH 556 The Evolution of the Family (3)
Biological evolution of species-specific behaviors and forms of sociality linked to human mating, reproduction, and parenting. Cultural evolution of human systems of kinship and marriage as fitness-maximizing adaptations to a wide range of habitats. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior. Offered: jointly with SOC 556.

ANTH 559 Seminar in Language and Culture (3, max. 9)
Theoretical and methodological problems in language and culture.

ANTH 561 Seminar in Methods and Theories (3, max. 9)

ANTH 562 Clinically Applied Anthropology (3)
Anthropology as it relates to interdisciplinary delivery of health care. Cultural variation in illness beliefs and behavior, types of healing practice, illness prevention, and social support networks.
Prerequisite: graduate standing and permission of instructor. Offered: jointly with NURS 562.

ANTH 565 Theory of Sociocultural Anthropology (5)
Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: graduate standing in anthropology or permission of instructor.

ANTH 566 Theory of Sociocultural Anthropology (5)
Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: ANTH 565.

ANTH 567 Theory of Sociocultural Anthropology (5)
Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: ANTH 566.

ANTH 570 Environmental Anthropology (5)
Current issues in the study of human environment interaction from a cross-cultural perspective: ecological adaptation and maladaptation; ethnecology and indigenous knowledge; anthropogenic environmental change; political ecology of “development”; interrelations of cultural and biological diversity; conflicts over indigenous land use and property rights, environmental justice, resource conservation, and sustainability.

ANTH 574 Socio-Cultural Perspectives of Public Health Genetics (3)
Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with NURS 582/PHG 521.

ANTH 575 Cultural Construction of Illness: Seminar in Medical Anthropology (5)
Historical and comparative examination of depression, neurasthenia, somatization, hypochondriasis, and hysteria. Anthropology of psychosomatics and psychiatry, including cultural analysis of selected biomedical, indigenous folk medical, and popular commonsense conceptualizations of illness.

ANTH 578 Special Topics in the Anthropology of Institutions (5)
Explores theoretical issues.

ANTH 580 Presenting Research Effectively (2)
Designed to help advanced graduate students develop the ability to present research projects effectively in a variety of formats relevant to the academic job-search process (c.v., job letter, interview, etc). Faculty and alumni speakers share information, advice, and guidance regarding the job-search and the various paths toward meaningful employment.

ANTH 581 Dissertation Writing (3)
Students experiment with different styles of anthropological writing. They apply writing techniques and styles to their own material. Students peer review for one another. Credit/no credit only.

ANTH 584 Ways of Speaking (5)
Theory and literature of the ethnography of communication, with special emphasis on the descriptive-comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with COM 584.

ANTH 590 Seminar in Museum Theory (3)
Fundamental theoretical issues involved in current museum administrative and operations work, including administrative structure, organizational conflicts, museum-community relations, and museum educational programming. Prerequisite: permission of instructor. Offered: jointly with MUSEUM 590.

ANTH 591 Seminar in Museum Operations (3)
Describing and creating a first year of operations. Design elements include architectural plan, staffing plan, initial and recurring budgets, security system, records system, educational plan, and policy making. Recommended: 590. Offered: jointly with MUSEUM 591.

ANTH 599 Effective Teaching of Anthropology (1)
Class required of all graduate students who accept teaching assistantships: instruction in teaching methods and issues, e.g., professional ethics, preparing and delivering lectures, leading discussion groups, test writing and grading, diversity in the classroom. Credit/no credit only.

ANTH 600 Independent Study or Research (*)
Credit/no credit only.

ANTH 700 Master’s Thesis (*)
Credit/no credit only.

ANTH 800 Doctoral Dissertation (*)
Credit/no credit only.

Course Descriptions

ARCHY 105 World Prehistory (5) I&S
Prehistoric human ancestors from three million years ago: their spread from Africa and Asia into the Americas; survival during ice ages, development of civilizations. Well-known archaeological finds, e.g., Olduvai Gorge; Neanderthals; Jericho; Egyptian pyramids; Mexican temples; Mesa Verde; Ozette, Washington. May not be counted toward the 55 credits required for the major in anthropology.

ARCHY 205 Principles of Archaeology (5) I&S
Techniques, methods, and goals of archaeological research. Excavation and dating of archaeological materials. General problems encountered in explaining archaeological phenomena. Offered: AWSpS.

ARCHY 212 The Archaeology of Egypt (5) I&S Wenke
A survey of ancient Egyptian culture history between about 6000 BC and AD 400, based on a synthesis of archaeological and textual evidence. Focuses on the origins and evolution of the Egyptian state and the elements of pharaonic religion, society, economy, art, architecture, and science.

ARCHY 270 Field Course in Archaeology (12) I&S
Introduction to field acquisition of archaeological data through survey and excavation. On-going field projects; recovery and recording techniques. Offered: S.

ARCHY 272 Short Field Course in Archaeology (5) Fitzhugh, Grayson, Lape, Stein
Learn how archaeologists detect human occupation on the landscape by surveying, excavating, and crating evidence of the past. Students learn from start to finish the process of archaeological field investigation. The location for this course may change from year to year. Recommended: ARCHY 205. Offered: A.

ARCHY 299 Archaeological Laboratory Techniques (1-3, max. 12) I&S
Laboratory procedures geared to one specific archaeological research project. Archaeological collection, its processing and curation, how archaeological materials are processed, and how
significance is determined. No more than 5 credits may be used toward an anthropology major. Prerequisite: either ARCHY 105 or ARCHY 205.

ARCHY 303 Old World Prehistory (5) I&S

ARCHY 304 New World Prehistory (5) I&S
History of earliest Americans, beginning with crossing of land bridge between Asia and North America and eventual spread over the Americas. Highlights prehistory and best examples of western hemisphere’s civilizations. Mexico, Yucatan, Peru, southwestern and eastern United States, Washington.

ARCHY 320 Prehistory of the Northwest Coast (5) I&S
Origins, development, and variation of Pacific Northwest cultures, focusing particularly on Washington. Adaptations to maritime and interior environments. Artifacts from a variety of archaeological sites. Technological, functional, and historical significance of Northwest artifacts.

ARCHY 325 Archaeology of Island Southeast Asia and the Pacific (5) I&S
History of the human occupation of the South Pacific Islands, especially Indonesia, Philippines, Micronesia, Melanesia, and Polynesia. Focus on current debates about human migrations, long distance maritime trade, political structures, culture contact, and colonialism. Emphasis on the analysis of the primary archaeological and documentary data. Prerequisite: ARCHY 205.

ARCHY 371 Analysis of Archaeological Data (5) I&S
Analyzing archaeological data by measuring and describing such artifacts as stone tools and ceramics. Analysis of such environmental data as bones, plant remains, and sediments. Prerequisite: ARCHY 205.

ARCHY 401 Archaeology of Human Origins (5) I&S
Close Early part of the prehistoric archaeological record in Africa and Eurasia, from >2,000,000 years ago until the spread of modern human beings; development of stone and bone technologies; ways of making a living; cultural adaptations; intellectual and social development. Prerequisite: ARCHY 205. Offered: Sp.

ARCHY 402 Archaeology and Social Difference (5) I&S
Close Examines case studies in prehistoric archaeological record for intersections of socially constructed differences including age, gender, and class. Contrasts past perceptions of difference with projection of modern differences backward to validate the present. Prerequisite: ARCHY 205; either ARCHY 105, ARCHY 303, or ARCHY 401.

ARCHY 403 The Archaeology of Landscapes (5) I&S/NW Llobera
Study of landscapes in archaeology. Methods for landscape research: historic maps, diaries, aerial photographs, geophysical and satellite imagery, etc. Archaeological landscape surveys: principles and limitations. Review of various theoretical approaches. Examination of key case studies, issues on landscape heritage and indigenous landscapes. Prerequisite: ARCHY 205.

ARCHY 465 Public Archaeology (5) I&S
Examines archaeology as practiced, regulated, represented, and paid for in the world outside of academia. Reviews the development of cultural resource management laws in the context of other social changes, investigates archaeology job opportunities outside of academia, and discusses how the public learns about and funds archaeology. Prerequisite: ARCHY 205.

ARCHY 466 Archaeology Honors Thesis ([1-9]-, max. 18) I&S
Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

ARCHY 468 Issues in Cultural Resource Management (1) I&S
Review of federal and state cultural resource management policies and the effects of these policies on the conduct of projects that may impact cultural resources on public lands. Survey of related issues in museum management. Credit/no credit only. Prerequisite: ARCHY 205; either one 200-level ANTH course or LING 203.

ARCHY 469 Special Studies in Archaeology (3-6, max. 18) I&S
Consideration in detail of specific archaeological topics, either methodological or substantive in content, of current interest. Offered occasionally by resident, new, or visiting faculty. For advanced undergraduates and graduate students. Prerequisite: ARCHY 205.

ARCHY 470 The Archaeology of Extinction (5) I&S
Grayson
Uses archaeological and paleoecological data to examine the argument that prehistoric peoples caused vertebrate extinction, from the late Ice Age extinction of ground sloths and saber-toothed cats in North America to the extinction of moas in New Zealand some 500 years ago. Offered: even years; A.

ARCHY 475 Maya Prehistory (3) I&S
Considers prehistoric cultural developments throughout the Central American region occupied by the prehistoric Maya. Temporal focus spans the late Preclassic, Classic, and Postclassic periods, from 300 BC to 1530 AD. Contrasts traditional and contemporary models of ancient Maya civilization. Prerequisite: ARCHY 205; ARCHY 304.

ARCHY 476 New World States and Empires (5) I&S
Considers theoretical and methodological scholarship on complex societies in Meso-America and the Andes. Highlights current research on population dynamics, subsistence strategies, economic foundations, and political processes in the development of states and empires. Considers archaeological evidence and texts of native and European documents. Prerequisite: ARCHY 205; ARCHY 304.

ARCHY 477 Archaeology of the North (5) I&S
Fitchugh
Archaeological history of the circumpolar arctic and subarctic from Pleistocene to the 19th century. Variability in human adaptation and social evolution in some of the world’s most extreme environments such as Eurasian tundra, North Pacific rim, Beringia, and North American high arctic. Prerequisite: ARCHY 205. Offered: Sp.

ARCHY 478 Prehistory of the Arid West (5) I&S
Archaeology of arid western North America, with particular emphasis on the earliest peoples of this region (and on the peopling of the New World in general), and on the prehistoric hunter-gathers of the Great Basin and Southwest. Prerequisite: ARCHY 205.

ARCHY 479 Prehistoric Cultures of North America: Eastern North America (5) I&S
Ecological and evolutionary account of prehistoric cultural developments in North America east of the Rocky Mountains. Cultural and environmental change from appearance of people in New World to collapse of indigenous cultural systems. Prerequisite: ARCHY 304.

ARCHY 480 Advanced Archaeological Analysis: Ceramics (6) I&S
Human technology in traditional societies. Ceramic tools as evidence for technological innovation, continuity, and change; and as evidence for ancient economic systems involving production, consumption, and distribution. Examines variety of approaches to the study of material culture — especially ceramics — including
archaeological, ethnographic, experimental, and technical. Prerequisite: ARCHY 371.

ARCHY 481 Advanced Archaeological Analysis: Faunal Remains (6) I&S
Seminar on techniques and methods employed in analysis of faunal remains from a wide range of Pleistocene and Holocene settings, including archaeological sites, coupled with a laboratory focusing on identification of faunal remains from these settings. Prerequisite: ARCHY 205.

ARCHY 482 Advanced Archaeological Analysis: Geoarchaeology (6) I&S
Identification, analysis, and interpretation of sediments and soils associated with archaeological remains. Laboratories deal with sediment description and chemical analysis; field trips and student projects focus on archaeological applications of these subjects.

ARCHY 483 Analyses of Stone Artifacts (6) I&S Close
Current approaches to lithic analysis, including types of information obtainable (technological, functional, social, ideological) and constraints affecting the formation and analysis of lithic assemblages. Lectures interspersed with application of methods under discussion to individual artifacts and to assemblages. Prerequisite: ARCHY 371.

ARCHY 489 Archaeology Practicum (2-9, max. 15) I&S
Faculty-supervised internships either on or off campus in organizations utilizing archaeological skills in academic or non-academic settings. Includes cultural resource management companies, government agencies, private non-profit organizations, tribal governments, and museums.

ARCHY 490 Museum Curation Practicum (1-5, max. 15) I&S
Application of museological training in curation of ethnographic, archeological, geological, or zoological collection materials in the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects: Offered: jointly with MUSEUM 490.

ARCHY 495 Quantitative Archaeological Analytic Techniques (5) I&S
Introduction to quantitative approaches to archaeological problems; data screening, numeric methods of classification and identification, graphical and computer-based seriation techniques, and the analysis of spatial patterning in artifact distributions.

ARCHY 497 Archaeological Method and Theory I: Formal Theory (5) I&S
Examination of theoretical constructs in the analysis of archaeological data. Terminology, typologies, and interregional comparisons. Prerequisite: ARCHY 205.

ARCHY 498 Archaeological Method and Theory II: Explanatory Theory (5) I&S
Conceptual frameworks employed by archaeologists in obtaining explanation in the three major areas of culture history, cultural reconstruction, and explanatory prehistory, considering the nature of explanation as conceived in these areas, the basic assumptions employed in achieving these aims, and an introduction to the methods employed. Prerequisite: ARCHY 205; ARCHY 497.

ARCHY 499 Undergraduate Research (*, max. 12)

ARCHY 501 Preceptorial Reading (6)
For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the reconstruction of prehistory. Not open to graduate students in the archaeology program.

ARCHY 502 Principles of Archaeological Theory (5)
Review of principles of archaeological theory. Student presentation of research on archaeological theory and seminar discussion or presentations. Open only to first-year graduate students in anthropology.

ARCHY 525 Archaeology of Island Southeast Asia and the Pacific (5)
History of the human occupation of the South Pacific Islands, especially Indonesia, Philippines, Micronesia, Melanesia, and Polynesia. Focus on current debates about human migrations, long distance maritime trade, political structure, culture contact, and colonialism. Emphasis on the analysis of the primary archaeological and documentary data.

ARCHY 530 Prehistory of the Northwest Coast (5)
Origins, development, and variation of Pacific Northwest cultures, focusing particularly on Washington. Adaptations to maritime and interior environments. Artifacts from a variety of archaeological sites. Technological, functional, and historical significance of Northwest artifacts.

ARCHY 560 Seminar in Archaeological Methods (5, max. 20)
Basis, limitations, and applications of a particular archaeological analytical method, or closely related set of methods. Prerequisite: permission of instructor.

ARCHY 570 Seminar in Archaeological Theory (3-6, max. 18)
Detailed consideration of a particular archaeological theory or closely related set of theories, including their methodological and epistemological bases. Prerequisite: ARCHY 497, ARCHY 498.

ARCHY 571 Field Course in Archaeology (5)
Introduction to field acquisition of archaeological data through survey and excavation. Ongoing field projects; instructional emphasis on recovery and recording techniques and on management of field projects. Prerequisite: permission of department.

ARCHY 572 Seminar in North American Archaeology (3, max. 6)
Selected problems in the archaeology of America north of Mexico. Prerequisite: permission of instructor.

ARCHY 575 Archaeological Field Research Design (6)
Nature of the archaeological record, and methods and techniques of field research, to illustrate range of data sources and modern techniques of general applicability. Practical experience in mapping, map interpretation, sampling design, remote sensing, photogrammetry, and research proposal writing. Prerequisite: permission of instructor.

ARCHY 576 Designing Grant Proposals (5)
Design and writing of grant proposals for archaeological research at both dissertation and senior investigator levels, with particular emphasis on National Science Foundation structure and requirements. Prerequisite: upper-level graduate standing and permission of instructor.

ARCHY 591 Advanced Field Course in Archaeology (6-9)
For students with previous field experience and graduate work in archaeology. Emphasis on decision making in field and project management. Prerequisite: ARCHY 497, ARCHY 498, ARCHY 571, and ARCHY 575 or permission of instructor.

ARCHY 600 Independent Study or Research (*)
Prerequisite: permission of instructor.

ARCHY 601 Internship (3-10, max. 10)
Credit/no credit only.
Biocultural Anthropology

Course Descriptions

BIO A 100 Evolution and Human Behavior (3) NW
Introduction to evolution by natural selection, examining the light it can throw on human biology and behavior in such areas as the nature of sex differences, sexual conflict, and conflict between parents and children. Does not fulfill major requirements. Offered: jointly with BIOL 108.

BIO A 201 Principles of Biological Anthropology (5) NW
Evolution and adaptation of the human species. Evidence from fossil record and living populations of monkeys, apes, and humans. Interrelationships between human physical and cultural variation and environment; role of natural selection in shaping our evolutionary past, present, and future. Offered: AWSpS.

BIO A 370 Introduction to Primates (5) NW Newell
Origins, major evolutionary trends, and modern taxonomic relationships of the nonhuman primates. Their distribution and habitat in relation to behavioral and morphological adaptations and their status as endangered species. Prerequisite: BIO A 201. Offered: A.

BIO A 372 Uses and Abuses of Evolutionary Views of Human Behavior (5) I&S/NW Newell
Interaction of human behavior and biology as it has been interpreted within an evolutionary framework. Discusses various challenges to Darwinian theory, particularly Lamarckism and creationism. Topics include biological determinism as exemplified by racism, myths of human origins, the clash between biological and cultural determinism, and modern genetics and behavior.

BIO A 382 Human Population Biology (3) NW
Human population biology with reference to capacity for growth in population size. Interaction of human biology, population structure, and culture in promoting such growth. Effects of economic, demographic, medical, and ecological factors. Prerequisite: either BIO A 201, BIOL 101, BIOL 180, or BIOL 201.

BIO A 387 Ecological Perspectives on Environmental Stress, Adaptation, and Health (5) NW Leonetti
How human populations respond to environmental stressors in behavioral-behavioral terms and the relationship of this adaptational process to health. Nutritional, climatic, and sociocultural stress and associated patterns of birth, disease, and death throughout human history in hunting, gathering, farming, pre-industrial, and industrial societies. Prerequisite: BIO A 201.

BIO A 388 Human Fossils and Evolution (5-) NW Eck
First of a two-part series. Evolution of human anatomy and behavior as adaptations to changing environments. Human fossils: their geological context, age, ecological setting used to reconstruct the evolution of our species during the last six million years of earth history. Prerequisite: either BIO A 201, or BIO 201 and BIO 202 and BIOL 203, or BIOL 102, or BIOL 180 and BIOL 200. Offered: W.

BIO A 389 Human Fossils and Evolution (-5) NW Eck
Second of a two-part series. Evolution of human anatomy and behavior as adaptations to changing environments. Human fossils: their geological context, age, ecological setting used to reconstruct the evolution of our species during the last six million years of earth history. Prerequisite: BIO A 388. Offered: S.

BIO A 450 Biodemography Seminar (5) I&S/NW
Introduction to theory, methods, and literature of biodemography. Examines biological mechanisms underlying patterns of aging, mortality, fertility, and population growth and decline. Includes readings from anthropology, sociology, demography, evolutionary biology, molecular biology, and epidemiology. Covers prehistoric, historic, and modern human populations, and non-human model systems. Offered: W.

BIO A 455 Reproductive Ecology Laboratory Seminar (5) NW

BIO A 465 Nutritional Anthropology (3) I&S/NW
Concerns interrelationships between biomedical, sociocultural, and ecological factors, and their influence on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with NUTR 465.

BIO A 466 Biocultural Anthropology Honors Thesis (1-9)-, max. 18) NW
Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

BIO A 469 Special Topics in Biocultural Anthropology (3-5, max. 15) NW
Delineation and analysis of a specific problem or a more general area in biocultural anthropology. Offered occasionally by visiting or resident faculty.

BIO A 473 Biological Adaptability of Human Populations (5) NW Shell-Duncan
Mechanisms enabling humans to maintain homeostasis in extreme environments: high altitude, heat, cold, nutritional deficiency, radiation. Adaptive process operating at levels of physiology, metabolism, and population, including the strategies of fertility and birth spacing. Prerequisite: BIO A 201.

BIO A 475 Environmental Impacts of Small Scale Societies (5) I&S/NW Grayson, Smith
Examines the environmental impacts (positive and negative) among prehistoric and historic/ethnographic small-scale (hunter-gatherer and horticultural) societies worldwide, and debates these impacts, within a theoretical framework provided by evolutionary ecology and biogeography. Offered: jointly with ENVIR 475.

BIO A 476 Sociocultural Ecology and Health (3) NW Leonetti
Sociocultural ecology of health/disease, focusing on humans as bioculturally integrated beings and on populations as biocultural units of adaptation. Examples of research on disease, both infectious and chronic, and patterns of morbidity and mortality, infant, maternal, old age, with particular attention to situations of sociocultural changes. Prerequisite: BIO A 201.

BIO A 477 Evolutionary Perspectives on Sex and Gender Roles (3) I&S/NW

BIO A 482 Human Population Genetics (5) NW, QSR Holman
Micro-evolutionary changes in human populations. Effects of mutation, selection, inbreeding, gene flow, and genetic drift as causes of evolutionary change. Mathematics beyond high school not required. Prerequisite: BIO A 201.

BIO A 483 Human Genetics, Disease, and Culture (5) NW
Considers relationships among genetic aspects of human disease, cultural behavior, and natural habitat for a wide variety of condi-
BIO A 491 Issues in Human Paleontology (5) NW

BIO A 485 Research in Growth and Development (2, max. 8) NW
Focus on topics relating to primate growth and development. Prerequisite: either BIO A 484, BIO A 495, or BIO A 496, any of which may be taken concurrently.

BIO A 486 Primate Socioecology (3) NW
Focus on the variety of social systems exhibited by nonhuman primates and adaptive significance of these societies; social systems in terms of the present ecology and evolutionary past of the species; the function of communicatory gestures and vocalizations, tradition, kinship, and social roles in maintaining and restructuring groups over generations; the relationship among mating systems, foraging strategies, ranging patterns, and ecological separation/resource partitioning and their contribution to species-typical social organization. Prerequisite: either BIO A 370 or PSYCH 418.

BIO A 487 Human and Comparative Osteology (3) NW
Introduction to the vertebrate skeleton. The skeleton is described in detail and various methods of determining age and sex, as well as osteometry and modern statistical methods for handling such data, are presented.

BIO A 488 Primate Evolution (5) NW
Eck
Major trends in nonhominid primate evolution through the Cenozoic. Discussion of the specimens, geological context, and age of the fossil taxa and their relationship to modern taxa. Practical experience in analyzing fossil material. Prerequisite: BIO A 201.

BIO A 491 Issues in Human Paleontology (5) NW
Eck
Addresses five major unanswered questions concerning human evolution as represented by the fossil record. Prerequisite: BIO A 389.

BIO A 495 Growth and Development: Infancy (5) NW
Newell
Genetic and environmental influences on growth and development from prenatal life through infancy. Includes exploration of methods for assessing development and comparisons of development in nonhuman primates with human development. Prerequisite: BIO A 370.

BIO A 496 Growth and Development: Adolescence and Reproductive Maturity (5) NW
Newell
Genetic and environmental influences on growth and development during adolescence. Emphasis on the interaction of biological and social factors in attainment of reproductive maturity. Compares conditions of non-human primates with human conditions. Prerequisite: BIO A 370.

BIO A 499 Undergraduate Research (*, max. 12)

BIO A 502 Preceptorial Reading (6)
For beginning graduate students who have not had adequate training in the study of primate principles and methods involved in the study of evolution, human genetics, and the evolution of modern populations. Not open to graduate students in the biocultural anthropology program. Offered: AWS.

BIO A 520 Human Behavioral Ecology (3-5)
Smith
Principles and methods of evolutionary behavioral ecology, and critical examination of their application to human behavior in such areas as resource utilization, mating, parenting, life history, cooperation, and competition.

BIO A 525 Biocultural Research Methods and Study Design (5)
Shell-Duncan
Survey of basic conceptual issues in the design of empirical research, with special attention to problems that arise during anthropological fieldwork. Topics include defining data needs, sampling strategies, problems with co-funding, proposal writing, human subjects approval, and basic ethical issues in human biocultural research.

BIO A 526 Quantitative Methods and Modeling for Biocultural Anthropology (5)
O'Connor
Surveys the concepts, tools, and methods for developing quantitative models based on underlying biocultural processes. Introduces methods of testing models from observations collected in anthropological field studies. Oriented toward longitudinal research of fertility, mortality, disease dynamics, population genetics, and other biocultural processes.

BIO A 550 Skeletal Biology and Prehistoric Demography (5)
O'Connor
Composition and structure of calcified tissue. Analytical techniques and their contribution to interpretation of the archaeological record.

BIO A 568 Human Reproductive Ecology (3)
A consideration of the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, nuptiality, duration of birth intervals, and reproductive senescence.

BIO A 569 Demographic Analysis in Biological and Social Anthropology (5)
Leonetti
Demographic analysis relevant to anthropological research on small populations. Use of data collected through local surveys, genealogical methods, and from other sources. Focuses on use of demography to analyze social and biological processes with adaptive and/or cultural-historical significance. Theoretical approaches emphasized.

BIO A 584 Topics in Ecology and Adaptation (3, max. 9)
Seminar dealing with various aspects of ecology and adaptation. Topics vary each quarter.

BIO A 588 Topics in Primate Evolution (3)
Emphasis on fossil taxa and their importance in understanding the morphologies and distributions of members of modern taxa. Prerequisite: BIO A 488 and permission of instructor.

BIO A 590 Current Issues in Human and Non-Human Primate Evolution (2, max. 18)
Biweekly presentation by participants and guest lecturers of current literature and ongoing research in topics pertaining to human and nonhuman primate evolution, biology, anatomy, genetics variation, and behavior. Credit/no credit only.

BIO A 600 Independent Study or Research (*)

Applied and Computational Mathematical Sciences
C36 Padelford

Mathematics is the common language of modern science, engineering, and business. Techniques of mathematical modeling and data analysis are key instruments in the tool kit of modern practitioners and researchers in a wide array of disciplines. ACMS is an interdisciplinary program in the mathematical sciences that provides a sound training in mathematical modeling, scientific computation, mathematical reasoning, and statistical analysis. The program is jointly administered by the Departments of Applied Mathematics, Computer Science and Engineering, Mathematics, and Statistics, offering students access to their combined resources. An ACMS
major is an excellent stepping stone to a career in engineering and the physical, life, and management sciences.

**Undergraduate Program**

Adviser
C36 Padelford, Box 354350

advising@math.washington.edu

The ACMS program offers a Bachelor of Science degree that builds on the strengths of the four mathematical sciences departments as well as the many quantitatively oriented departments across campus. All students complete a core set of courses developing basic skills in modeling, computation, mathematics, and statistics. Students choose one of the eight option areas listed below for further training and specialization.

- **Biological and Life Sciences** focuses on basic techniques of mathematical modeling and computing that are employed in the life sciences.
- **Discrete Mathematics and Algorithms** gives students a broad background in mathematics and computation with special emphasis on discrete mathematics and its application to optimization and algorithm design.
- **Engineering and Physical Sciences**: This option is an excellent choice for students with an interest in the physical world and classical areas of applied mathematics.
- **Mathematical Economics**: Students in this option obtain a firm foundation in applied and computational mathematics as well as a basic grounding in economic theory.
- **Operations Research** provides a firm foundation in the mathematical tools of operations research, particularly optimization and stochastic modeling.
- **Scientific Computing and Numerical Algorithms** focuses on the design, mathematical analysis, and efficient implementation of numerical algorithms for such problems.
- **Social and Behavioral Sciences** provides a foundation in commonly used statistical and computational techniques followed by flexibility in pursuing different sets of advanced courses.
- **Statistics**: This option is designed to introduce students to theory, methodology, and applications of statistics.

**Bachelor of Science**

**Suggested First- and Second-Year College Courses:** MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122, PHYS 123, CSE 142, CSE 143

**Department Admission Requirements**

Admission is competitive. A GPA of at least 2.50 in the following courses, with a minimum grade of 2.0 in each course: CSE 142, 143; MATH 124, MATH 125, MATH 126; MATH 307 or AMATH 351; MATH 308 or MATH 318; PHYS 121, PHYS 122, PHYS 123. Certain options allow the substitution of other courses in place of the PHYS requirements. See adviser for details.

**Major Requirements**

90 credits as follows:

- **Core**: 58 credits to include MATH 124, MATH 125, MATH 126; MATH 308 or MATH 318; MATH 307 or MATH 351; MATH/STAT 390; CSE 142, CSE 143; AMATH 352; AMATH/MATH 381, AMATH 383; PHYS 121, PHYS 122, PHYS 123. Certain options allow the substitution of other courses in place of the PHYS requirements. See an adviser for details.
- **Completion of one of the following options**: Biological and Life Sciences Option. 32 credits to include option core (12 credits): MATH 324, AMATH 353, AMATH 422, AMATH 423; and option electives (20 credits): outside area (12 credits or double major/double degree; see adviser for options) and 8 credits of approved courses at the 300 level or above, chosen from the four participating departments.

**Discrete Mathematics and Algorithms Option.** 32 credits to include option core and electives. Option core: 18 credits for non-Computer Science and Engineering majors-MATH 310, MATH/STAT 394, CSE 373, CSE 410, CSE 417 and one of CSE 413, CSE 415; 9 credits for Computer Science/Computer Science and Engineering double major/double degree-MATH/STAT 394, CSE 421, CSE 431. Option electives: 14 credits for non-Computer Science and Engineering majors, 23 credits for Computer Science/Computer Science and Engineering double majors, to include 9 credits from MATH 407, MATH 408, MATH 409, MATH 461, MATH 462, and remaining credits from approved courses at the 300 level or above from the four participating departments.

**Engineering and Physical Sciences Option.** 32 credits to include option core (15 credits): MATH 324, AMATH 401, AMATH 402, AMATH 403; and option electives (17 credits): outside area (11 credits or double major/double degree; see adviser for options) and 6 credits of approved courses at the 300 level or above, chosen from the four participating departments.

**Mathematical Economics Option.** 32 credits to include option core and electives. Option core (12 credits): MATH 310, MATH 327, MATH 407; and at least one of the following: MATH 408, STAT 423. Option electives: Either (1) or (2). (1) 20 credits including at least 15 credits from ECON 301, ECON 400, ECON 401, ECON 404, ECON 421, ECON 422, ECON 454, ECON 472, ECON 482, ECON 483, ECON 485; at least 8 additional credits at the 300 level or above from the four participating departments or from the department of Economics (taken from ECON courses listed above). (2) Complete a double major with a Bachelor of Science in Economics.

**Operations Research Option.** 32 credits to include option core and electives. Option core (15 credits): MATH 310, MATH/STAT 394, MATH/STAT 395; and at least two of the following: MATH 407, MATH 408, MATH 409. Option electives: Either (1) or (2), below. (1) 17 credits, including at least 6 credits from MATH/STAT 491, MATH/STAT 492, STAT 421, 423; at least 8 credits from OPMGT 301, OPMGT 402, OPMGT 443, OPMGT 450, OPMGT 490, QMETH 450, QMETH 490, IND E 237, IND E 324, IND E 325, IND E 326, IND E 421, IND E 424, IND E 426, IND E 430, IND E 433, (with at least one course at the 400 level); at least 3 additional credits at the 300 level or above from the four participating departments or from the departments of Management Science and Industrial Engineering (taken from IND E courses listed above). (2) Complete a double major in Management Science in the School of Business Administration or in Industrial Engineering in the College of Engineering.
Scientific Computing and Numerical Algorithms Option. 32 credits to include option core (15 credits): MATH 310, MATH 327, MATH 464, MATH 465, MATH 466; and option electives (17 credits), to include 11 credits from the following: AMATH 301; AMATH 353 or MATH 309; CSE 373 or CSE 326; CSE 410; AMATH 401, AMATH 402, AMATH 403; MATH 407, MATH 408, MATH 409; MATH 427, MATH 428, MATH 429; MATH 438, MATH 439; MATH 435, MATH 436; remaining credits from approved courses at the 300 level or above from the four participating departments.

Social and Behavioral Sciences Option. 32 credits to include option core (10 credits): MATH/STAT 394, MATH/STAT 395, STAT 423; and option electives (22 credits): outside area (12 credits or double major/double degree; see adviser for options) and 10 credits of approved courses at the 300 level or above, chosen from the four participating departments.

Statistics Option. 32 credits to include program core (22 credits): MATH/STAT 394, MATH/STAT 395, STAT 341, STAT 342, STAT 421, STAT 423; option electives (10 credits): approved courses at the 300 level or above, chosen from the four participating departments.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted above.

Student Outcomes and Opportunities

Learning Objectives and Expected Outcomes: The ACMS degree emphasizes the development of advanced skills in discrete and contiguous mathematical modeling, computing and scientific computation, mathematical reasoning and analytic skills, and statistical reasoning and analytic skills. Students develop an expertise at an advanced level in an applications area. This set of skills provides the basis for careers in a wide array of quantitative disciplines including engineering; the physical, life, and social sciences; as well as business and management sciences. In addition, the ACMS program has developed partnerships with a number of departments on campus to facilitate the pursuit of double majors. Instructional and Research Facilities: The program has access to the combined instructional and research facilities of the four participating departments, as well as the Mathematical Sciences Computing Center (MSCC), the Mathematics and Statistics library, and the Math Study Center. Honors Options Available: With College Honors. With Departmental Distinction. See adviser for details.

Research, Internships, and Service Learning: The program is provided with internship opportunities periodically, which are then passed on to students. Department Scholarships: None offered.

Student Organizations/Associations: MAA Student Chapter, Actuarial Club, SIAM

Applied Mathematics

408 Guggenheim

Applied mathematics is concerned with mathematical modeling and analysis of problems from the physical, biological, and social sciences, and from engineering.

Undergraduate Program

Adviser

412 Guggenheim, Box 352420

206-543-5493

The Department of Applied Mathematics offers the following undergraduate programs:

• The Bachelor of Science degree in Applied and Computational Mathematics, offered in cooperation with departments of Computer Science and Engineering, Mathematics, and Statistics. See Applied and Computational Mathematical Sciences for specific degree information.

• A minor in applied mathematics.

Minor

Minor Requirements: 27-28 credits as follows:

MATH 124, MATH 125, MATH 126 (5, 5, 5) or equivalent

AMATH 351, AMATH 352, AMATH 353 (3, 3, 3)

One of the following courses: AMATH 301 (4), AMATH 383 (3), AMATH 401 (4), AMATH 402 (4), AMATH 403 (4), AMATH 422 (3), AMATH 423 (3), or AMATH 441 (3)

Minimum grade of 2.0 required in each course

Graduate Program

Graduate Program Coordinator

408L Guggenheim, Box 352420

206-543-5077

The Department of Applied Mathematics offers graduate programs of study leading to the degrees of Master of Science and Doctor of Philosophy. These programs involve (1) broad training in those mathematical methods and techniques that have been found useful in applications, (2) in-depth study in at least one field of application, and (3) opportunities to explore various specialized aspects of applied mathematics.

Master of Science, Doctor of Philosophy

Admission Requirements: Prospective students for the Master of Science program should hold an undergraduate degree either in mathematics with a strong background in applications such as the physical, engineering, biological, or social sciences with a strong background in applications-oriented mathematics. Students who wish to apply to the doctoral program need to show evidence of completion of course work equivalent to that described for the master’s degree, with at least a 3.40 GPA, and indication of the ability or potential to perform independent research. It is required that the Graduate Record Examination be taken and the results sent to Graduate Admissions. Three letters of recommendation are required in support of each application and should be sent directly to the department. After receiving notification of admission to the Graduate School and a registration appointment, the student should contact the department. (On the Application for Graduate School Admission form, the student should be sure to indicate the desire to enter the Department of Applied Mathematics, rather than Mathematics.)

Master of Science

The M.S. degree program is designed to provide the student with a working knowledge of several basic areas of applied mathematics, together with exposure to at least one specific area of application. The applied mathematics areas include complex variables, ordinary and partial differential equations, applied linear algebra, numerical analysis, calculus of variations or optimization, and applied probability and statistics. The specific area of application is chosen by the student from a broad range of outside fields, such as engineering, the physical, biological, and certain areas of medical science. After fulfilling the basic course requirements, the student can obtain the M.S. degree by additional course work to complete the required minimum of 36 credits for the degree. Students may elect to do an M.S. thesis in lieu of a maximum of 6 course credits. Detailed requirements for the M.S. degree are listed in the Applied Mathematics graduate program guidelines.

Doctor of Philosophy

The Doctor of Philosophy degree in applied mathematics is primarily a research degree, not conferred as a result of course work alone. The granting of the degree is based on general proficiency
and attainment in applied mathematics, together with a demonstrated ability to carry out an independent investigation which is described in a doctoral dissertation. Proficiency and attainment in applied mathematics is demonstrated by passing the General Examination that tests the student’s ability to probe a new area of research and to exercise critical judgment on a technical issue of current importance in the chosen field of research. The doctoral dissertation must exhibit original mathematical contributions in a significant area of application. The Final Examination and defense of the dissertation is a research seminar presentation open to the public. The detailed requirements for the doctoral degree are listed in the Applied Mathematics graduate program guidelines.

Financial Aid

Both research and teaching assistantships are available to full-time students who qualify. In addition, fellowship funds for the study of applied mathematics are available and awarded on a competitive basis.

Research Facilities

Students in applied mathematics have access to a departmental computing lab equipped with a DEC Alpha server, Alpha/AXP workstations, and X-terminals, with centralized file storage. Software for scientific visualization, numerical analysis, symbolic mathematics, programming, and document preparation is available. The lab is connected to the campus network and the Internet, providing access to supercomputing facilities and other resources.

Course Descriptions

AMATH 301 Beginning Scientific Computing (3) NW
Introduction to the use of computers to solve problems arising in the physical, biological and engineering sciences. Application of mathematical judgment in selecting tools to solve problems and to communicate results. Introduction to basic MATLAB routines for numerical computation. Prerequisite: either MATH 126, Q SCI 293, MATH 129, or MATH 136; recommended: either CSE 142 or ENGR 142. Offered: AWSpS.

AMATH 351 Introduction to Differential Equations and Applications (3) NW

AMATH 352 Applied Linear Algebra and Numerical Analysis (3) NW
Development and application of numerical methods and algorithms to problems in the applied sciences and engineering. Applied linear algebra and introduction to numerical methods. Emphasis on use of conceptual methods in engineering, mathematics, and science. Extensive use of MATLAB package for programming and solution techniques. Prerequisite: either MATH 126 or Q SCI 293.

AMATH 353 Fourier Analysis and Partial Differential Equations (3) NW

AMATH 383 Introduction to Continuous Mathematical Modeling (3) NW
Introductory survey of applied mathematics with emphasis on modeling of physical and biological problems in terms of differential equations. Formulation, solution, and interpretation of the results. Prerequisite: either AMATH 351 or MATH 307. Offered: AWSpS.

AMATH 400 Mathematical Communication for Undergraduates (2) NW
Techniques of effective writing and oral presentations in the mathematical sciences. Offered: jointly with MATH 400 and STAT 400. Prerequisite: at least 15 credits in MATH, STAT, AMATH, or CSE at the 300 or 400 level, including MATH 307 or AMATH 351 and MATH 308 or AMATH 352.

AMATH 401 Vector Calculus and Complex Variables (4) NW
Emphasis on acquisition of solution techniques; ideas illustrated with specific example problems arising in science and engineering. Applications of vector differential calculus, complex variables. Line-surface integrals; integral theorems; Taylor and Laurent series, contour integration. Prerequisite: MATH 324. Offered: A.

AMATH 402 Methods for Ordinary Differential Equations (4) NW
See 401. Applications of ordinary differential equations; review of elementary concepts for first and second order equations; power series and Frobenius solutions. Laplace transforms; systems of differential equations, eigenvalues. Prerequisite: either AMATH 351 or MATH 307. Offered: W.

AMATH 403 Methods for Partial Differential Equations (4) NW
See 401. Applications of partial differential equations; linear and quasilinear first order equations, characteristics, shocks; classifica-
AMATH 422 Introduction to Mathematical Biology (3) NW
Mathematical modeling in biology and medicine. Introduction to chaos and nonlinear dynamics, population models (predator-prey and competition systems), epidemic models with applications to sexually transmitted diseases and dynamic diseases, enzyme kinetics, biological oscillators and switches. Prerequisite: either AMATH 351, MATH 136, or MATH 307. Offered: W.

AMATH 423 Mathematical Biology: Stochastic Models (3) NW
Introduction to the basics of stochastic models. Applications are taken from the biomedical sciences such as random movement of cells and molecules, activation of neurons, cancer growth and spread, population dynamics, kinetics of unimolecular reactions. Prerequisite: either AMATH 351 or MATH 307, MATH/STAT 390. Offered: Sp.

AMATH 441 Introduction to Fluid Dynamics (3) NW
Eulerian equations of mass and motion. Surface forces. Vorticity and vortex dynamics. Water waves and interfacial waves; concept of phase and group velocities. Linear instability theory. Simple viscous flows; boundary layer theory, potential theory. Low Reynolds-number flows, application to biological fluid flows. Prerequisite: AMATH 353.

AMATH 490 Special Topics (1-5, max. 15)
Topics of current interest in applied mathematics not covered by other undergraduate courses.

AMATH 498 Senior Project or Thesis (1-6, max. 6)
Intended for Honors students and other advanced undergraduates completing a special project or senior thesis in applied mathematics. Offered: AWSpS.

AMATH 499 Undergraduate Reading and Research (1-6, max. 6)
Credit/no credit only. Offered: AWSpS.

AMATH 500 Special Studies in Applied Mathematics (*, max. 12)
Lectures and discussions of topics of current interest in applied mathematics. May not be offered every quarter; content may vary from one offering to another. Prerequisite: permission of instructor.

AMATH 501 Seminar in Applied Mathematics (1, max. 6)
Special topics and selected problems of current interest in applied mathematics. Credit/no credit only. Offered: AWSp.

AMATH 502 Applied Mathematics Clinic (1)
The clinic provides consulting service for problems from different academic units requiring assistance in formulation, analysis, and interpretation of mathematical models. Students learn to delineate sources of difficulties, identify or devise a method of solution, and effectively communicate it to clients. Credit/no credit only. Prerequisite: AMATH 568, AMATH 569, and AMATH 584. Offered: AWSp.

AMATH 503 Mathematical Biology I (3)
Mathematical modeling in biomedical sciences (mainly ecology, epidemiology, physiology, and zoology). Topics covered include modeling (continuous and discrete), population interactions, dynamic diseases, reaction kinetics, biological oscillators, oscillator generated wave phenomena, epidemics, and the dynamics of infectious diseases. Prerequisite: AMATH 402 or equivalent knowledge of ordinary differential equations. Offered: A.

AMATH 504 Mathematical Biology II (3)
Mathematical modeling in the biomedical sciences (mainly ecology, epidemiology, and zoology). Topics include spatial spread of populations, traveling wave phenomena in biology, reaction diffusion theory, biological pattern formation mechanisms, mechnanochemical theory of morphogenesis, spatial spread of epidemics. (May be taken independently of 503.) Prerequisite: AMATH 402, AMATH 403 or equivalents; ordinary, partial differential equations. Offered: W.

AMATH 505 Introduction to Fluid Dynamics (4)
Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin’s theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with ATM S 505/OCEAN 511; A.

AMATH 506 Applied Probability Statistics (4)
Discrete and continuous random variables, independence and conditional probability, central limit theorem, elementary statistical estimation and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with STAT 506.

AMATH 507 Calculus of Variations (5)
Necessary and sufficient conditions for a weak and strong extremum. Legendre transformation, Hamiltonian systems. Constraints and Lagrange multipliers. Space-time problems with examples from elasticity, electromagnetics, and fluid mechanics. Sturm-Liouville problems. Approximate methods. Prerequisite: AMATH 351 or MATH 307; MATH 324, 327; recommended: AMATH 402 and AMATH 403 or MATH 428 and 429.

AMATH 509 Theory of Optimal Control (3)
Trajectories obtained from ordinary differential equations with control variables. Controllability, optimality, the maximum principle. Relaxation and the existence of solutions. Techniques of nonsmooth analysis. Prerequisite: real analysis on the level of MATH 426; background in optimization corresponding to AMATH 507 or AMATH 515. Offered: jointly with MATH 509; even years.

AMATH 510 Applications of Optimization in Engineering Design (3) Zabinsky
Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering optimal design. Prerequisite: AMATH/MATH/IND E 515 and MATH 328 or permission of instructor. Offered: jointly with IND E 516.

AMATH 512 Methods of Engineering Analysis (3)
Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Offered: jointly with CHEM E 512; A.

AMATH 514 Networks and Combinatorial Optimization (3)
Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems. Algorithms and applications. Prerequisite: MATH 308 or AMATH 352 and MATH 324. Offered: jointly with MATH 514.

AMATH 515 Fundamentals of Optimization (5)
Maximization and minimization of functions of finitely many variables subject to constraints. Basic problem types and examples of applications; linear, convex, smooth, and nonsmooth programming. Optimality conditions. Saddlepoints and dual problems.
Penalties, decomposition. Overview of computational approaches. Prerequisite: linear algebra and advanced calculus. Offered: jointly with IND E 515/MATH 515.

AMATH 516 Numerical Optimization (3)
Methods of solving optimization problems in finitely many variables, with or without constraints. Steepest descent, quasi-Newton methods. Quadratic programming and complementarity. Exact penalty methods, multiplier methods. Sequential quadratic programming. Cutting planes and nonsmooth optimization. Prerequisite: AMATH 515. Offered: jointly with MATH 516.

AMATH 517 Optimization Under Uncertainty (3)
Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications to optimal stopping, inventory control, resource management. Prerequisite: AMATH 506 (or an introduction to basic concepts of probability such as STAT 390 or 394, 395), MATH 308 and 324. Offered: jointly with MATH 517.

AMATH 520 Special Topics in Mathematical Applications (5, max. 15)
In-depth study of an application topic in applied mathematics. Topics may include special studies in geophysical fluid dynamics, hydrodynamic stability, turbulence, analytic dynamics, solid mechanics, applied optimization, tensor analysis, stochastic analysis, and nonlinear optics and lasers. Offered: W.

AMATH 521 Special Topics in Mathematical Biology (5, max. 15)
DNA-folding, patter-forming systems, stochastic analysis. Prerequisite: AMATH 402 or equivalent. Offered: Sp.

AMATH 533 Methods of Partial Differential Equations II (3)
Nonlinear first-order partial differential equations: characteristics, applications to geometrical optics and Hamilton-Jacobi theory. Linear and quasilinear hyperbolic equations: conservation laws, characteristics, shocks, examples from fluid dynamics. Approximate solution methods: regular, singular, and multiple-scale perturbations. Prerequisite: AMATH 569. Offered: odd years.

AMATH 546 Methods of Partial Differential Equations III (3)
Nonlinear first-order partial differential equations: characteristics, applications to geometrical optics and Hamilton-Jacobi theory. Linear and quasilinear hyperbolic equations: conservation laws, characteristics, shocks, examples from fluid dynamics. Approximate solution methods: regular, singular, and multiple-scale perturbations. Prerequisite: AMATH 569. Offered: odd years.

AMATH 567 Complex Variables (5)

AMATH 568 Advanced Methods for Ordinary Differential Equations (5)

AMATH 569 Advanced Methods for Partial Differential Equations (5)
Analytical solution techniques for linear partial differential equations. Discussion of how these arise in science and engineering. Transform and Green’s function methods. Classification of second-order equations, characteristics. Conservation laws, shocks. Prerequisite: AMATH 403, AMATH 568 or MATH 428 or permission of instructor. Offered: Sp.

AMATH 570 Asymptotic and Perturbation Methods (5)
Asymptotics for integrals, perturbation and multiple-scale analysis. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or permission of instructor. Offered: A.

AMATH 571 Spectral Methods (5)
Analysis and application of spectral methods for the numerical solution of differential equations. Fourier methods and the FFT; collocation methods; polynomial interpolation and Chebyshev series; approximation theory and spectral accuracy; boundary conditions. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or permission of instructor. Offered: W.

AMATH 572 Introduction to Applied Stochastic Analysis (5)

AMATH 573 Solitons and Nonlinear Waves (5)
Methods for integrable and near-integrable nonlinear partial differential equations such as the Korteweg-de Vries equation and the Nonlinear Schrodinger equation; symmetry reductions and solitons; soliton interactions; infinite-dimensional Hamiltonian systems; Lax pairs and inverse scattering; Painleve analysis. Prerequisite: AMATH 569, or permission of instructor. Offered: A.

AMATH 574 Conservation Laws and Finite Volume Methods (5)
Theory of linear and nonlinear hyperbolic conservation laws modeling wave propagation in gases, fluids, and solids. Shock and rarefaction waves. Finite volume methods for numerical approximation of solutions; Godunov’s method and high-resolution TVD methods. Stability, convergence, and entropy conditions. Prerequisite: AMATH 584 or permission of instructor. Offered: W.

AMATH 575 Dynamic Systems (5)
Overview of ways in which complex dynamics arise in nonlinear dynamical systems. Topics include bifurcation theory, universality, Poincare maps, routes to chaos, horseshoe maps, Hamiltonian chaos, fractal dimensions, Liapunov exponents, and the analysis of time series. Examples from biology, mechanics, and other fields. Prerequisite: AMATH 568 or equivalent.

AMATH 577 Perturbation Theory I (3)
Regular perturbations. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions. The methods of multiple scales and averaging, weakly nonlinear wave propagation problems and resonance phenomena, homogenization, nonlinear wave propagation in fluid, solid, and particle mechanics. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent. Offered: even years.

AMATH 578 Perturbation Theory II (3)
Regular perturbations. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions. The methods of multiple scales and averaging, weakly nonlinear wave propagation problems and resonance phenomena, homogenization, nonlinear wave propagation in fluid, solid, and particle mechanics. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent. Offered: even years.
AMATH 580 Mathematical Communication for Graduates (2)
Analysis and practice of mathematical writing. Oral and poster
cconference presentations. Academic job interview skills. Mathemat-
ics on the web. Offered: jointly with MATH 500 and STAT 500.

AMATH 581 Scientific Computing (5)
Project-oriented computational approach to solving problems
arising in the physical/engineering sciences, finance/economics,
medical, social and biological sciences. Problems requiring use of
advanced MATLAB routines and toolboxes. Covers graphical
techniques for data presentation and communication of scientific
results. Prerequisite: Proficiency in basic MATLAB or AMATH 301,
or permission of instructor.

AMATH 584 Applied Linear Algebra and Introductory
Numerical Analysis (5)
Numerical methods for solving linear systems of equations, linear
least squares problems, matrix eigen value problems, nonlinear
systems of equations, interpolation, quadrature, and initial value
ordinary differential equations. Offered: jointly with MATH 584; A.

AMATH 585 Numerical Analysis of Boundary Value Prob-
lems (5)
Numerical methods for steady-state differential equations. Two-
point boundary value problems and elliptic equations. Iterative
methods for sparse symmetric and non-symmetric linear systems:
conjugate-gradients, preconditioners. Prerequisite: AMATH 584/
MATH 584 which may be taken concurrently. Offered: jointly with
MATH 585; W.

AMATH 586 Numerical Analysis of Time Dependent Prob-
lems (5)
Numerical methods for time-dependent differential equations,
including explicit and implicit methods for hyperbolic and parabolic
equations. Stability, accuracy, and convergence theory. Spectral and
pseudospectral methods. Prerequisite: AMATH 581 or AMATH 584.
Offered: jointly with ATM S 581/MATH 586; Sp.

AMATH 587 Asymptotics and Special Functions (3)
Origin and properties of higher transcendental functions; theoretical
basis and applications of Laplace, Fourier, Bessel, Mellin transforms;
asymptotic analysis, including methods of steepest descent and
stationary phase, WKB. Prerequisite: AMATH 567, AMATH 568,
AMATH 569, or equivalent.

AMATH 588 Green’s Functions and Integral Equations (3)
Review of Sturm-Liouville theory. Green’s functions and integral
representation of solution to PDEs. Fredholm and Volterra integral
equations. Hilbert-Schmidt theory. Singular integral equations of
Cauchy type. Applications to science and engineering. Prerequisite:
AMATH 567, AMATH 568, AMATH 569, or equivalent.

AMATH 592 Special Topics in Stochastic Analysis and
Modeling (5)
Stochastic techniques and models with applications. Markov process
diffusion, stochastic differential equations, randomly perturbed
dynamical systems, and statistical mechanics. Prerequisite: AMATH
572, or permission of instructor.

AMATH 594 Special Topics in Numerical Analysis (2-3, max.
15)
Various advanced topics in numerical analysis and scientific
computing, such as iterative methods, eigenvalue computations,
approximation theory, finite element methods, inverse problems,
nonlinear conservation laws, computational fluid dynamics.
Prerequisite: AMATH 584, 585, 586, or equivalent. Offered: jointly
with MATH 594.

AMATH 595 Special Topics in Numerical Analysis (2-3, max.
15)
Various advanced topics in numerical analysis and scientific
computing. See the description for 594 for sample topics. Prerequi-
site: AMATH 584, 585, 586, or equivalent. Offered: jointly with
MATH 595.

AMATH 596 Special Topics in Numerical Analysis (2-3, max.
15)
Various advanced topics in numerical analysis and scientific
computing. See the description for 594 for sample topics. AMATH
584, 585, 586, or equivalent. Offered: jointly with MATH 596.

AMATH 600 Independent Research or Study (*)
Credit/no credit only.

AMATH 700 Master’s Thesis (*)
Credit/no credit only.

AMATH 800 Doctoral Dissertation (*)
Credit/no credit only.

Art
104 Art

The School of Art serves a dual role within the educational structure
of the University of Washington. It is both a professional school
and an academic department. As a professional school it trains
students for active careers in the visual arts, as a school of the
College of Arts and Sciences it offers studio and lecture courses. All
of its course offerings and its curriculum requirements are based on
the underlying philosophy that an awareness and understanding of
the visual arts are necessary to a liberal education, and that a liberal
education is necessary to the training of a professional artist.

Undergraduate Program
Adviser
104 Art, Box 353440
206-543-0646
usaskart@u.washington.edu

The School of Art offers the following undergraduate programs:
• The Bachelor of Arts degree with a major in interdisciplinary
  visual art or art history
• The Bachelor of Fine Arts degree with a major in
  ceramics, fibers, industrial design, metals, painting and
drawing, photography, printmaking, sculpture, or visual
  communication design

Bachelor of Arts
Interdisciplinary Visual Arts (IVA)

Department Admission Requirements

For entering freshmen or currently enrolled students: Students
complete 15 credits of prerequisite art and art history classes (listed
below under Major Requirements). Students must then complete and
submit the School of Art Portfolio Review Application to Art
Advising, 104 Art, during the quarter in which they are completing
their last prerequisite class(es). Admission is competitive, based on:
grades earned in the prerequisite art and art history classes; two
written Portfolio Reviews completed by instructors in the prerequi-
site art classes; cumulative GPA at the UW. Students will be notified
of acceptance (by mail) after final grades have been posted and/or
within 2 weeks of submitting their application.

For transfer students: Students complete the transfer equivalent of
15 credits of prerequisite art and art history classes (listed below
under Major Requirements). Students must present their portfolio
for review during their initial registration appointment with an Art
adviser at the UW. For information on how to assemble a competi-
tive portfolio, see Portfolio Guidelines for Transfer Students at
http://art.washington.edu/undergrad/apply/portfolio1.html

Two faculty members in the School of Art review the student’s portfolio. Acceptance into the School of Art is based on: two portfolio reviews by Art faculty; grades in the prerequisite transfer classes; overall GPA from the transfer college. Students will be notified of acceptance (by mail) within two weeks of presenting their portfolio. For questions about which transfer classes are equivalent to the UW prerequisite courses, please email uskart@u.washington.edu.

**Major Requirements**

**Interdisciplinary Visual Arts (63 credits total)**

15 credits prerequisites: 10 credits from ART 124, ART 126, ART 140, ART 166, or ART 190; 5 credits from an art history or art lecture course: ART 208 or ART 234, or ART H 201, ART H 202, ART H 203, ART H 204, ART H 205, ART H 230, ART H 232, ART H 290, ART H 311, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, ART H 337, ART H 351, ART H 361, ART H 366, ART H 380, ART H 384.

Successful completion of School of Art Portfolio Review. 38 credits chosen from the following areas: art history, ceramics, fibers, metals, painting and drawing, photography, printmaking, sculpture. No more than 20 credits may be taken in one area and no more than 15 credits may be taken in each subsequent area.

10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337 (or other 5 credit art history elective if non-western was satisfied at the prerequisite level).

**Bachelor of Fine Arts**

**Ceramics, Fibers, Industrial Design, Metals, Painting and Drawing, Photography, Printmaking, Sculpture, Visual Communication Design**

**Department Admission Requirements**

The minimum GPA for application to School of Art BFA programs is 2.50. Most successful applicants have significantly higher GPAs. The average GPA for successful applicants is 3.30. 

*Note: The Printmaking program will not admit new majors during the 2004/2005 academic year. The Visual Communication Design (VCD) and Industrial Design (ID) programs will have new application processes and major requirements beginning Autumn 2005; for up-to-date information please visit the VCD website (http://depts.washington.edu/vcd/) or ID website (http://depts.washington.edu/idguide/).

For entering freshmen or currently enrolled students: **Admission to the Ceramics, Fibers, Metals, and Sculpture majors:** Students must complete prerequisite art and art history courses unique to each major (see Major Requirements, below). Students then complete and submit the School of Art Portfolio Review Application to Art Advising, 104 Art, during the quarter in which they are completing their last prerequisite class(es). Admission is competitive, based on: grades earned in the prerequisite art and art history courses; two written portfolio reviews completed by instructors in the prerequisite art classes; cumulative GPA at the UW.

Students will be notified of acceptance (by mail) after final grades have been posted and/or within 2 weeks of submitting their application. Students then complete the required 200-level course and apply to the major (see Major Requirements, below). **Admission to Industrial Design, Painting and Drawing, Photography, and Visual Communication Design majors:** Students must complete prerequisite courses unique to each major (see Major Requirements, below). Students then apply to the major using the appropriate application process. Each major has its own unique application process; see Program Guides for specific information: http://art.washington.edu/undergrad/programguides/index.html.

**For transfer students:**

- **Admission to Ceramics, Fibers, Metals, and Sculpture:** Students must complete transfer equivalents of prerequisite courses unique to each major (see Major Requirements, below). Students must present their portfolio for review during their initial registration appointment with an Art adviser at the UW. For information on how to assemble a competitive portfolio, see Portfolio Guidelines for Transfer Students at http://art.washington.edu/undergrad/apply/portfolio1.html. Two faculty members in the School of Art review the student’s portfolio. Acceptance into the School of Art is based on: two portfolio reviews by Art faculty; grades in the prerequisite transfer classes; overall GPA from the transfer college. Students are notified of acceptance (by mail) within two weeks of presenting their portfolio. Students then complete the required 200-level course and apply to the major (see Major Requirements, below). For questions about which transfer classes are equivalent to the UW prerequisite courses, please email uskart@u.washington.edu.

- **Admission to Industrial Design, Painting and Drawing, Photography, and Visual Communication Design:** Students must complete prerequisite courses unique to each major (see Major Requirements, below). Students then apply to the major using the appropriate application process and submitting a portfolio. Each major has its own unique application process; see Program Guides for specific information: http://art.washington.edu/undergrad/programguides/index.html.

- **Admission Policy for Postbaccalaureate Applicants:** Postbaccalaureate study in studio art is limited; admission requirements vary within each major. See information concerning specific postbaccalaureate admission online at http://art.washington.edu.

**Major Requirements**

**Ceramics (85 credits total)**

15 credits prerequisites: 5 credits ART 124; 5 credits from ART 126, ART 140, ART 166, or ART 190; 5 credits from an art history or art lecture course: ART 208 or ART 234, or ART H 201, ART H 202, ART H 203, ART H 204, ART H 205, ART H 230, ART H 232, ART H 290, ART H 311, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, ART H 337, ART H 351, ART H 361, ART H 366, ART H 380, ART H 384.

Successful completion of the School of Art Portfolio. 5 credits ART 201 and 5 credits ART 202. These classes may not be taken together in the same quarter. Work completed in ART 201 or 202 is reviewed by Ceramics faculty for admission to the Ceramics program.

15 credits, taken in separate quarters, of ART 353. 15 credits, taken in separate quarters, of ART 485; 5 credits ART 488.

15 credits studio art or related electives.

10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337 (or other 5 credit art history elective if non-western was satisfied at the prerequisite level).

**Fibers (85 credits total)**

15 credits prerequisites: 10 credits from ART 124, ART 126, ART 140, ART 166, or ART 190; 5 credits from an art history or art lecture course: ART 208 or ART 234, or ART H 201, ART H 202, ART H 203, ART H 204, ART H 205, ART H 230, ART H 232, ART H 290, ART H 311, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, ART H 337, ART H 351, ART H 361, ART H 366, ART H 380, ART H 384.

Successful completion of School of Art Portfolio Review. 5 credits ART 226 and 5 credits ART 227. These classes may not be taken together in the same quarter. Work completed in either class is reviewed by Fibers faculty for admission to the Fibers program.

25 credits intermediate courses: ART 328, 329 or 330.

10 credits advanced courses: ART 428, taken in Autumn quarter.
Photography (85 credits total)

Painting and Drawing (110 credits total)

Metals (85 credits total)

Note: The following major requirements are not applicable after Spring 2005.

15 credits studio art or related electives.
10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337 (or other 5 credit art history elective if non-western was satisfied at the prerequisite level).

Industrial Design (126 credits total)

Note: The following major requirements are not applicable after Spring 2005.

Visual Communication Design (113 credits total)

Not available academic year 2004-2005.

Printmaking (85 credits total)

Sculpture (85 credits total)

Student Outcomes and Opportunities

Learning Objectives and Expected Outcomes: Students receiving an undergraduate degree in art can expect to develop strong writing, analytical, critical-thinking, and problem-solving skills. Students learn to recognize the power of the visual image and understand its importance in a world increasingly dependent on the aesthetic and technical skill of trained artists and designers to create images that communicate information and ideas across cultures and generations. In addition to becoming practicing artists, art graduates find careers in fields such as gallery and museum management, arts education, arts administration, photojournalism, film making, graphic and product design, interior design, teaching, advertising, art therapy, and visual and digital technology.

Instructional and Research Facilities: None.

Honors Options Available: None.

Research, Internships, and Service Learning: The School
of Art has several programs that help students develop professional practices and expand their knowledge outside the UW: internships for credit, Artist in Residence programs, K-12 Educational Partnerships, Art on Loan, and the Studio Art Rome program.

- **Department Scholarships:** None.
- **Student Organizations/Associations:** Students majoring in the studio arts have the opportunity to participate in several student associations: Hepheustum (metals), Zeeware (ceramics), Broadclothes (fiber), Printmakers Association (printmaking), a photo guild, and the Inter Arts Council. These organizations raise funds though the sale of members’ work to support visiting artists and lectures and to sponsor student involvement in regional arts events.

**Graduate Program**

**Graduate Program Coordinator**

104E Art, Box 353440

206-685-1714 or 206-543-0646

The School of Art offers eight art and design programs leading to the Master of Fine Arts degree: ceramics, fibers, metals, painting, photography, printmaking, sculpture, and visual communications design. Students are required to enroll for two years of full-time study (six quarters, excluding summer), earning a minimum of 63 credits of scheduled studio and class work and 9 credits of thesis for a total of 72 credits. Individual programs have specific requirements.

The thesis consists of a studio project representing a body of work, a written thesis statement, and documentation of the work in the form of slides. A selection of thesis work is exhibited at the School of Art’s Master of Fine Arts Thesis Exhibition.

**Admission Requirements**

Applicants for admission to the Master of Fine Arts program are required to have a Bachelor of Fine Arts degree or equivalent (determined by the quality of the applicant’s work and equivalent experience, based upon the UW B.F.A. requirements) with a minimum GPA of 3.00 in the undergraduate art major.

The Graduate Record Examination is not required. Admission is on a competitive basis. Annual deadline for applications is February 1, for consideration for admission the following autumn quarter.

**Scholarships and Teaching Assistantships**

School of Art scholarships are awarded annually to new and returning students, based on merit. Applicants admitted to the M.F.A. program may be offered School of Art scholarships for the coming year on an individual merit basis. Further application is not required.

The School of Art offers a limited number of teaching assistantships to incoming graduate students on an individual merit basis, as determined by each program. Enrolled graduate students may apply for a limited number of additional, competitive teaching assistantships.

**Faculty**

- **Paul Berger** Photography
- **Riley Brewster** Painting
- **David Brody** Painting
- **Lou Cabeen** Fibers
- **Karen Cheng** Visual Communication Design
- **Rebecca Cummins** Photography
- **Ann Gale** Painting
- **Ellen Garvens** Photography
- **Layne Goldsmith** Fibers
- **Annabelle Gould** Visual Communication Design
- **Philip Govedare** Painting
- **Mary Lee Hu** Metals
- **Denzil Hurley** Painting
- **Doug Jeck** Ceramics
- **Curt W. Labitzke** Printmaking
- **Zhi Lin** Painting
- **Daniel Loewenstein** Sculpture
- **Jim Nicholls** Sculpture
- **Helen O’Toole** Painting
- **Christopher Ozubko** Visual Communication Design
- **John Rousseau** Visual Communication Design
- **Shirley Scheier** Printmaking
- **Louise St. Pierre** Industrial Design
- **Anne Hayden Stevens** ARCH 131
- **Akio Takamori** Ceramics
- **Norman Taylor** Sculpture
- **Timea Tihanyi** ART 321
- **Douglas Wadden** Visual Communication Design
- **Jamie Walker** Ceramics
- **John T. Young** Sculpture

**Course Descriptions**

**ART 120 Issues and Influences in Contemporary Art and Design (3) VLPA**

Introduction to the contemporary concerns of various disciplines and fields of thought in the visual arts. Lectures, site visits, and discussions centering on historical, contemporary, and future issues and directions of these disciplines. Credit/no credit only.

**ART 121 Drawing (5) VLPA**

Drawing studied as the means of creating a coherent visual and expressive statement. Development of ability in the fundamentals of drawing: line, tone, and gesture, theory and practice of linear and aerial perspective, and basic concepts of composition. Offered: AWSp.

**ART 124 Three-Dimensional Design Fundamentals (5) VLPA**

Through use of a variety of materials, three-dimensional fundamentals are investigated for formal and conceptual concerns as they apply to the visual arts. Offered: AWSp.

**ART 126 Topics in Studio Art (5) VLPA**

Studio-based class introducing students, through particular studio practice of individual instructors, to methods of visual awareness, principles of organization, and approaches to visual and conceptual observation. Relationship between art history and contemporary art practice. Artistic medium in each class varies with instructor expertise. Offered: AWSp.

**ART 131 Alternative Approaches to Art and Design (5, max. 20) VLPA**

Presentation of process through which artists discover and translate ideas, feelings, and concerns into images or objects. Use of a wide variety of methods and approaches, from traditional to technological, to promote visual expression. Discussion and critiques leading toward better understanding the creative process.

**ART 133 Color Theory and Practice (5) VLPA**

Examination of color as distinct visual phenomenon with investigations of its practical, theoretical, and illusionary aspects. Various media and materials employed in exercises and compositions that demonstrate properties of color structure, symbolism, and perception and their potential applications to art and design.

**ART 140 Basic Photography (5) VLPA**

Introduction to theory, techniques, and processes of still photography. Projects stress the visual and creative potential of the medium. (Students must provide a camera with lens, shutter, and aperture controls.) Offered: AWSp.

**ART 150 Three-Dimensional Design Fundamentals (5) VLPA**

Introduction to fundamentals of three-dimensional design process.
Both practical and conceptual skills explored and demonstrated through assigned project or projects.

**ART 166 Design Foundations (5) VLPA**
The rudiments of visual structure and organization in two-dimensional design. Covers formal principles of composition with an emphasis on design processes and serves as the groundwork for subsequent design courses. Required for application to the Visual Communication Design major. Offered: A.

**ART 190 Introduction to Drawing (5) VLPA**
Builds basic drawing skills, develops understanding of primary concepts which relate to drawing and develops an understanding of the grammar or syntax of two-dimensional language. Students move beyond their current knowledge and abilities and link new skills, concepts, and understandings to creative expressing. Offered: A/W/Sp.

**ART 201 Ceramic Art: Handbuilding (5) VLPA**
Introduction to handbuilding; kiln firing and glazing processes. Examination of contemporary sculpture in clay. Prerequisite: ART 124; either ART 121, ART 123; ART 126, ART 140, ART 166, or ART 190.

**ART 202 Ceramic Art: Wheel Throwing (5) VLPA**
Introduction to wheel throwing, glazing, and kiln firing processes. Examination of contemporary vessel form in clay. Prerequisite: ART 124; either ART 121, ART 123, ART 126, ART 140, ART 166, or ART 190.

**ART 205 Introduction to Visual Communication Design (5) VLPA**
Continuation of the incoming student evaluation process for the visual communication design program. Presents a set of problems that further define the study and practice of visual communication design. Addresses organizational, conceptual, compositional, and typographic problems.

**ART 206 Photographic Visualizations (5) VLPA**
Explores photography as a means of visualizing ideas in the context of visual communication design. Students complete a series of assignments that consider technical and formal issues, critical thinking, concept development, and experimentation. Offered: Sp.

**ART 207 Drawing for Design Communication (5) VLPA**
Concentrates on developing skills used to communicate ideas that exist in the imagination. Focuses on study of design drawing history and development of basic skills necessary for ideation, exploration, communication, explanation. Prepares students to visualize and discuss ideas rapidly and professionally. For design majors only. Offered: A.

**ART 208 Survey of Design History (5) VLPA**
Comprehensive survey of the ideas, events, and individuals that determined the design of information, objects, culture, and commerce across societies. Examines the social, political and cultural contexts that shape graphic design and the ideologies and relationships of similar movement in art and architecture. Late 19th Century - contemporary issues.

**ART 209 Fundamentals of typography (5) VLPA**
Develops understanding of and sensibility to typographic details used to create effective communication. Focus moves from understanding letter forms that make up words to the complexities of developing phrases, sentences, and short paragraphs with multiple levels of hierarchical meaning. Prerequisite: ART 207; ART 208. Offered: W

**ART 210 Collaboration and Improvisation (5) VLPA**
Introduces key factors in the theory and practice of creating and participating in collaborative projects. Focuses on creating and participating in effective teams, understanding strengths and roles within teams, working through team issues, developing techniques for interdisciplinary problem solving. Prerequisite: ART 207; ART 208.

**ART 211 Image Methodology (5) VLPA**
Imagery as essential to visual communication. Ways that meaning and representation in images profoundly impact understanding. Focus on expanding image making, ideation skills, developing experimental visual processes to create meaning, finding engaging and imaginative solutions. Exploration of symbolism, abstraction, metaphors. Prerequisite: ART 209; ART 210. Offered: Sp.

**ART 212 Human-Centered Design (5) VLPA**
Introduces design methodologies including ergonomics, participatory design, user research, ethnography, inclusive design, usability testing. Focuses on design methods leading to more humane technology, providing platforms for innovation, reframing problems in unique ways, explaining complex information, exploring alternatives, visualizing and communicating solutions. Prerequisite: ART 209: ART 210. Offered: W.

**ART 226 Introduction to Structure (5) VLPA**
Explores the structure of two- and three-dimensional textile forms. Students work with floor looms, computer-aided looms, as well as working directly with materials. Prerequisite: two of the following: ART 124, ART 126, ART 140, ART 166, or ART 190.

**ART 227 Introduction to Surface (5) VLPA**
Basic techniques of dying, printing, and embellishing, with emphasis on their conceptual uses in art making. Prerequisite: ART 121; ART 123; ART 124.

**ART 234 History of Public Art and Public Space (5) VLPA**
Young Survey of the melding of public art, architecture, and landscape architecture through the ages, starting with Stonehenge, the Pyramids, and Gothic cathedrals, and ending with contemporary earthworks, public art, and twenty-first century performance art. Offered: W.

**ART 241 Intermediate Photography I (5) VLPA**
Studio projects examining the expressive and conceptual uses of alternative photographic materials and techniques. Prerequisite: ART 140. Offered: A.

**ART 243 Intermediate Photography: Color (5) VLPA**
Introduction to photographic color theory and processes with emphasis on color printing on type-C darkroom printing. Additional traditional and experimental color materials explored. Offered: Sp.

**ART 245 Concepts in Printmaking (5) VLPA**
Introduction to contemporary printing methods such as monotype, monoprint, stencil, and photocopy. Survey of historical and current approaches to the art of printmaking. Prerequisite: either ART 121 or ART 190; either ART 123, ART 124, ART 126, ART 140, or ART 166.

**ART 246 Works on Paper/Monotype (5) VLPA**
Introduces contemporary imaging methods, expands traditional drawing methods, and encourages relationship of content to structure. Introduces relationship of printmaking and painting to drawing through monotype methods. Prerequisite: either ART 121 or ART 190; either ART 123, ART 124, ART 126, ART 140, or ART 166.

**ART 258 Introduction to Metals (5) VLPA**
Introduction to concepts and techniques of metal design with an emphasis on jewelry. Skill acquisition includes sawing, filing, soldering, forging, and casting. Prerequisite: two from the following: ART 124, ART 126, ART 140, ART 166, or ART 190. Offered: A/W/Sp.
ART 261 Introduction to Industrial Design (5) VLPA
Fundamentals of three-dimensional design. Form studies in relation to geometry, structure, value, production, meaning, and context.

ART 262 Introduction to Industrial Design (5) VLPA
Fundamentals of three-dimensional design. Form studies in relation to geometry, structure, value, production, meaning, and context. Prerequisite: ART 261.

ART 263 Introduction to Industrial Design (5) VLPA
Fundamentals of three-dimensional design. Form studies in relation to geometry, structure, value, production, meaning, and context. Prerequisite: ART 262.

ART 272 Beginning Sculpture — Casting (5) VLPA Taylor
Fundamentals of composition in the round and relief with an emphasis on non-metal casting. Prerequisite: two from the following: ART 124, ART 126, ART 140, ART 166, or ART 190.

ART 273 Beginning Sculpture — Wood and Metal (5) VLPA Lynn
Introduction to sculpture, focusing on the use of wood and metal. Investigations center on a wide variety of methods and approaches, from traditional to technical, to promote visual expression. Class discussions and critiques focus on better understanding of the creative process. Prerequisite: two from the following: ART 124, ART 126, ART 140, ART 166, or ART 190.

ART 290 Beginning Drawing: The Figure (5) VLPA
Introduction to the human figure as historically traditional subject matter as well as an important component in self expression. Covers proportion, foreshortening, and composition. Prerequisite: ART 190. Offered: AWSpS.

ART 291 Beginning Drawing Topics (5) VLPA
Revolving topics in the study of drawing at the beginning level. Prerequisite: ART 190. Not open for credit to students having taken ART 290.

ART 292 Beginning Painting (5) VLPA
Beginning oil painting. Prerequisite: ART 290.

ART 293 Beginning Painting Topics (5) VLPA
Revolving topics in the study of painting at the beginning level. Prerequisite: either ART 290 or ART 291.

ART 316 Design for Industry (5) VLPA
Product design, working drawings, models, presentation drawings, product analysis, display, marketing. Prerequisite: ART 263.

ART 317 Design for Industry (5) VLPA
Product design, working drawings, models, presentation drawings, product analysis, display, marketing. Prerequisite: ART 316.

ART 318 Design for Industry (5) VLPA
Product design, working drawings, models, presentation drawings, product analysis, display, marketing. Prerequisite: ART 317.

ART 320 Industrial Design Special Projects (5, max. 15) VLPA
Progressive industrial design methodology and criticism introduced through projects corresponding to major international design competitions, visiting critics and lecturers, corporate sponsored projects, or faculty design research. Independent or group work on projects to expand students’ visual research, drawing, modelmaking, presentation, and literacy skills. Includes contemporary manufacturing and information technologies. Prerequisite: ART 261.

ART 321 Furniture Design (5) VLPA
Design of a furniture piece. Methodologies and construction, types of hardware, special shop techniques, scale modeling and full-scale functional designs.

ART 322 Presentation for Industrial Design I (5) VLPA
Introduction to presentation skills, from quick sketching of design concepts to refined representation of the finished design in a two-dimensional format. Emphasis on accuracy and development of an individual style. Prerequisite: ART 261.

ART 328 Intermediate Fiber Studio (5, max. 15) VLPA
Explores more advanced techniques used in the basic fiber media, weaving and surface design. Technical focus of each class varies. Covers pattern development, expanded scale, visual clarity, and conceptual depth. Prerequisite: either ART 226 or ART 227.

ART 329 Topics in Fiber Art (5, max. 15) VLPA
Explores a range of special topics in fibers, including non-traditional materials and processes and interdisciplinary areas of interest within the field, while offering specific technical, hands-on training when appropriate. Emphasizes the development of the thematic content of the individual’s work.

ART 330 History of Textiles (5) VLPA
Overview of Western textiles from Coptic tapestry through industrialization. Discussion of textiles not only in aesthetic terms but also as cultural documents arising from, and reflecting, a broad range of societal pressures and concerns. Special topics in contemporary issues and non-Western textiles with emphasis on holdings in the University collection.

ART 332 Intermediate Sculpture Composition — Public Art (5, max. 15) VLPA
Intermediate work in various media and techniques with an emphasis on the creation of public art.

ART 333 New Materials and Processes (5, max. 15) VLPA
Exploration of the process through which artists discover and translate ideas, feelings, and concerns into images or objects. Introduction of new ways of thinking, new materials and processes in the investigation of a variety of sculpture methods and approaches. Prerequisite: ART 121; ART 123; ART 124; either ART 272 or ART 273.

ART 334 Public/Professional Art Issues (5, max. 15) VLPA Young
Topics vary, centering on issues of public art and professional practices.

ART 335 Metal Casting (5, max. 15) VLPA
Introduction to foundry techniques as applied to fine arts casting of ferrous and nonferrous material. Prerequisite: ART 272.

ART 340 Digital Imaging I (5) VLPA
Introduction to the creative use of 2-D image manipulation and transformation of photographic and non-photographic imagery on the computer. Variety of programs, procedures, hardware (Macintosh platform), input, and output considered and employed. Previous computer experience not required. Prerequisite: ART 241. Offered: W.

ART 341 Digital Imaging II (5) VLPA Berger
Advanced topics in 2-D imaging, with emphasis on creative exploration of both software tools and possible integration with traditional art media. Prerequisite: ART 340.

ART 342 Contemporary Issues in Photography (5) VLPA
An in-depth survey of contemporary artists and issues in photography. Prerequisite: ART 241; ART 340. Offered: S.

ART 343 Advanced Photography (5, max. 15) VLPA
Topics in advanced photography, including: color printing, large-
format photography, artificial lighting, and photography image transformation. Prerequisite: ART 340. Offered: AWSp.

ART 345 Intermediate Printmaking (5, max. 25) VLPA
Development of mature and personal statement within context of the print form through studio practice and group discussion and critique. Processes and media emphasis varies on a revolving basis. Prerequisite: either ART 245 or ART 246.

ART 350 Printmaking Special Projects (5, max. 15) VLPA
Revolving topics of special interest to printmaking students beyond basic technical instruction found in beginning level courses. Prerequisite: either ART 245 or ART 246.

ART 353 Intermediate Ceramic Art (5, max. 20) VLPA
Advanced work in forming, decorating, and glazing. Prerequisite: ART 201; ART 202.

ART 354 History of Body Adornment (5) VLPA
Covers jewelry and other body adornment from Neolithic times to the present, worldwide. Discusses social and cultural relevance of forms, uses, and materials. Emphasis on today’s studio craftspeople who make jewelry as a form of aesthetic expression outside the fashion mainstream.

ART 357 Interdisciplinary Concepts in Metal (5, max. 25) VLPA Hu
Variable topics, introducing concepts that cross traditional studio definitions and address interdisciplinary approaches to artistic investigation. Topics include textile/metal processes, printmaking/metal processes, color and metal, chemical, electrical, and mechanical processes in sculpture. Prerequisite: two of the following: ART 124, ART 126, ART 140, ART 166, or ART 190.

ART 358 Topics in Metal (5, max. 25) VLPA Hu
Variable topics introducing issues and practices in metal smithing and jewelry, and their application to contemporary artmaking. Topics include casting and stone setting, ancient techniques, forming metal, production and business practices. Prerequisite: ART 258.

ART 361 Art Techniques (5, max. 15) VLPA
Study of materials and techniques of the artist and their application to painting and drawing. Prerequisite: ART 257.

ART 366 Editorial Visualizations (5) VLPA
Builds on skills developed in ART 206 while expanding the focus on design process through a broad variety of image production techniques. Emphasizes concept development through assignments that address the communication of editorial and/or persuasive content. Prerequisite: ART 206; ART 207. Offered: A.

ART 367 Communications Programs (5) VLPA
Investigation of strategies and graphic interpretations using typography, images, and diverse applications of design. Emphasis on development of conceptual themes, graphically implemented across an array of communications media. Prerequisite: ART 366, ART 376. Offered: W.

ART 368 Case Studies in Corporate Identity (5) VLPA
Research and analysis of visual identity systems for complex institutional and corporate entities. Focuses on issues that concern how design programs function across diverse application and media and how they engage various audiences. Prerequisite: ART 367, ART 377. Offered: Sp.

ART 376 Typography (5) VLPA
Explores how meaning, hierarchy, and legibility are affected by typographic contrast, organization and composition. Prerequisite: ART 206; ART 207.

ART 377 Semiotics (5) VLPA
Investigation of semiotics in the context of visual communication design through the study of symbolic representation. Students complete a quarter-long project in symbol design that emphasizes research analysis, design process, translation, and abstraction. Prerequisite: ART 366, ART 376.

ART 378 Information Architecture and Web Design (5) VLPA
Fundamental issues in web design, including site planning, information architecture, navigation, visual hierarchy, and interactivity. Emphasis on understanding the unique functional limitations of designing for the web while building an awareness of contemporary design practice. Design a simple site and produce a working prototype. Prerequisite: ART 377. Offered: Sp.

ART 381 Design and Society (5) VLPA
History, theory, and practice of ways design functions in society and culture. Emphasis on developing broad understanding of design production while working collaboratively and individually on a quarter-long research project concerned with producing a comprehensive conceptual map of the design discipline. Prerequisite: ART 211; ART 212.

ART 383 Fundamentals of Interaction Design (5) VLPA
Focus on human-to-product interaction and ways we perceive, understand, and experience the world regards to objects, environments, or on-screen controls/information. Prerequisite: ART 211; ART 212.

ART 390 Intermediate Drawing (5, max. 10) VLPA
Prerequisite: ART 290.

ART 391 Intermediate Drawing Topics (5) VLPA
Revolving topics in the study of drawing at the intermediate level. Prerequisite: either ART 290 or ART 291.

ART 392 Intermediate Painting (5, max. 10) VLPA
Prerequisite: ART 292, ART 390. Offered: AWSp.

ART 393 Intermediate Painting Topics (5) VLPA
Revolving topics in the study of painting at the intermediate level. Prerequisite: either ART 292 or ART 293: ART 390.

ART 428 Senior Thesis in Fiber Arts (5, max. 20) VLPA
Specialized investigation involving surface design and/or fabric structures. Prerequisite: ART 328; ART 329.

ART 436 Sculpture Composition (5, max. 15) VLPA
Individual compositions in various media in large scale. Prerequisite:either ART 332, ART 333 or ART 335.

ART 440 Senior Thesis in Photography (5, max. 15) VLPA
Development of a coherent photographic theme or topic evolved over two consecutive quarters resulting in a finished thesis portfolio. Prerequisite: ART 343. Offered: AWSp.

ART 445 Advanced Industrial Design (5) VLPA
Market analysis and selected professional problems in industrial design. Consultation techniques; psychological, sociological, and economic factors involved in designing for consumer acceptance. Prerequisite: ART 318.

ART 446 Advanced Industrial Design (5) VLPA
Market analysis and selected professional problems in industrial design. Consultation techniques; psychological, sociological, and economic factors involved in designing for consumer acceptance. Prerequisite: ART 445.

ART 447 Advanced Industrial Design (5) VLPA
Market analysis and selected professional problems in industrial design. Consultation techniques; psychological, sociological, and economic factors involved in designing for consumer acceptance.
ART 450 Individual Projects in Printmaking (5, max. 15) VLPA
Individual media study within the context of group discussion and critique. Prerequisite: ART 345; ART 350.

ART 460 Advanced Metal Design (5, max. 25) VLPA
Advanced individual projects in metal design. Prerequisite: either ART 357 or ART 358.

ART 466 Publication Design (5) VLPA
Stresses the research, development, organization, design, and presentation of a complex printed document, such as a journal, annual report, or large publication. Addresses all aspects of design, content, image creation, and production through a quarter-long project. Prerequisite: ART 368; ART 378. Offered: A.

ART 468 Senior Project/Presentation (5) VLPA
Designed to allow ceramics majors to explore and define the primary sources of inspiration for their interest in art and why they make it.

ART 469 Senior Seminar in Painting and Drawing (5, max. 20) VLPA
Drawing and painting from the model. Prerequisite: ART 390; ART 392. Offered: AWSp.

ART 478 Information Design (5) VLPA
Exploration of strategies for enhancing and visually presenting complex statistics and data. Various information subjects are selected and formed into charts, diagrams, graphs, tables, directories and maps. Identify, through personal investigations, the principles which provide the most successful means for presentation of information. Prerequisite: ART 368; ART 378.

ART 479 Interaction Design (5) VLPA
Exploration of design issues unique to user-centered interaction in digital media. Explore a range of formal and conceptual issues including user interface, organization, narrative, motion, time, and sound. Prerequisite: ART 466, ART 478. Offered: W.

ART 480 Senior Project/Presentation (5) VLPA
Presents an opportunity for advanced, individualized design research and study. Complete a unique capstone project based on individual design interests and prior experiences in the VCD program. Public exhibition of this project is required in the BFA Graduation Exhibition. Prerequisite: ART 467, ART 479. Offered: W.

ART 481 Issues in Design Theory (5) VLPA
Students develop an understanding of significant theoretical models related to design through a series of readings, lectures, discussions, and assignments. Prerequisite: ART 211; ART 212.

ART 482 Capstone Design Project (5, max. 10) VLPA
Two-quarter sequence capstone for students in the design studies program. Develop individual projects that address issues of theory and practice in the design field. Students present their projects in a public forum. Prerequisite: ART 381; ART 481.

ART 483 Fundamentals of Interface Design (5) VLPA
Highlights the role visual interface designers play in the multidisciplinary attempt to achieve functionality and usability. Introduces the unique challenges of designing within the realm of a digital and interactive medium to create products that humans find usable, useful, and desirable. Prerequisite: ART 383.

ART 484 Projects in Interaction Design (5) VLPA
Project-based course gives students the opportunity to explore key issues and theories in the field of interaction design. Multi-disciplinary studio requiring collaboration between students from a variety of backgrounds including design, engineering, and computer science. Prerequisite: ART 383; ART 483.

ART 485 Advanced Ceramic Art (5, max. 20) VLPA
Pottery design and construction, stoneware, clay bodies, glazes. Prerequisite: ART 353.

ART 488 Senior Source Presentation, Ceramics (5) VLPA
Designed to allow ceramics majors to explore and define the primary sources of inspiration for their interest in art and why they make it.

ART 491 Advanced Drawing Topics (5) VLPA
Revolving topics in the study of drawing at the advanced level. Prerequisite: either ART 390 or ART 391. Not open for credit to students having taken ART 490.

ART 492 Advanced Painting: The Figure (5, max. 10) VLPA
Drawing and painting from the model. Prerequisite: ART 390; ART 392. Offered: AWSp.

ART 493 Advanced Painting Topics (5) VLPA
Revolving topics in the study of painting at the advanced level. Prerequisite: either ART 390 or ART 391; either ART 392 or ART 393.

ART 494 Senior Seminar in Painting and Drawing (5, max. 15) VLPA

ART 496 Undergraduate Internship (2-5, max. 10)
Faculty supervised fieldwork in art related activities. Credit/no credit only.

ART 497 Study Abroad-Studio Individual Projects (3-10, max. 20) VLPA

ART 498 Individual Projects-Painting/Sculpture (2-5, max. 15)

ART 499 Individual Projects-Design (2-5, max. 15)

ART 505 Sculpture (3-15, max. 60)

ART 509 Senior Seminar in Painting and Sculpture (5, max. 30)

ART 582 Visual Communication Design Studio I (5)
Topics vary.

ART 590 Interdisciplinary Graduate Seminar in Contemporary Practices (5, max. 25)
Constructive forum for developing dialogue and critique in practicum-based setting. Professional development highlights the student’s experience.
Supervised studio for advanced-level students from various media-based disciplines designed to develop an interest in and familiarity with aspects of drawing. Utilization of various media. Discussion of historical and contemporary issues concerning drawing.

**ART 592 Graduate Studio: Painting (3-15, max. 60)**
Offered: AWSp.

**ART 594 Graduate Seminar in Painting and Drawing (3, max. 18)**
Designed as a forum for the presentation and criticism of student work as well as for discussion of contemporary directions in visual art. Credit/no credit only.

**ART 595 Master of Fine Arts Research Project (2-5, max. 9)**
An independent research project related to and informed by the MFA student’s studio work. Final project form may be a lecture, slide presentation, or paper.

**ART 600 Independent Study or Research (*)**

**ART 700 Master’s Thesis (*)**

**Art History**

209 Art

Art history is the study of the creation, style, and meaning of works of art in relation to the artists and societies that created them. The history of art involves the interaction of styles, techniques, concepts, individual personalities, and social values from many places over long periods of time. This discipline is comparative in nature and requires many different skills, derived from the study of history and culture, foreign languages and literature, iconography, stylistic analysis, and connoisseurship.

**Undergraduate Program**

**Adviser**
104 Art, Box 353440
206-543-0646
uaskart@u.washington.edu

The Division of Art History offers the following undergraduate programs:

- The Bachelor of Arts degree with a major in art history
- A minor in art history

**Bachelor of Arts**

Courses to enhance writing skills, and courses in history, literature, anthropology, classics, and foreign languages.

**Department Admission Requirements**

Entering freshmen and transfer students may declare an Art History major by scheduling an appointment with the Art History adviser on or after their orientation/registration date. Currently enrolled University students who wish to declare an Art History major must have a minimum 2.50 GPA and meet with the adviser anytime during the quarter except the first week.

**Admission Policy for Postbaccalaureate Applicants:**
Postbaccalaureate study in Art History is limited. Acceptance is competitive, based upon transcripts of prior college work and a School of Art Supplemental Information Form.

**Major Requirements**

55 credits in art history, including one course from each of the following four groups plus three 400-level art history courses:
- ART H 201, ART H 202, ART H 290, ART H 340, ART H 341, ART H 342, ART H 343, ART H 351, ART H 352, ART H 361, or ART H 373
- ART H 204, ART H 306, ART H 311, ART H 315, ART H 316, or ART H 321
- ART H 205, ART H 206, ART H 230, ART H 330, ART H 331, or ART H 337
- ART H 203, ART H 232, ART H 380, ART H 381, ART H 382, or ART H 384.

**Minor**

**Minor Requirements:** 30 credits of art history courses, of which 15 must be upper-division courses. Minimum grade of 2.0 required in each course applied to the minor. At least 15 credits must be completed at the UW.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Students studying in the field of art history can expect to develop strong writing, research, analytical, critical thinking, and problem-solving skills. Course work is designed to allow students to comprehend the social, historical, ethical, and aesthetic significance of the visual realm that is our present environment and the heritage of many cultures. Art history graduates pursue careers in fields such as gallery and museum management, visual technology, teaching, arts administration, arts education, research, curating and restoration, interior design, and art and antique connoisseurship.
- **Instructional and Research Facilities:** None
- **Honors Options Available:** With College Honors. With Departmental Distinction. See adviser for details.
- **Research, Internships, and Service Learning:** The Art History Program is based in the School of Art where majors work side by side with students studying in the studio arts. They have direct access to the Art Library, Media Center, Writing Center, a state of the art Computer Center, and three active art galleries. Classes are taught in rooms equipped with the technology needed to address all the issues and complexities of a visual culture. Many art history classes are conducted at local galleries and museums where students receive first-hand knowledge of the visual arts. Enrichments outside the classroom include one quarter study abroad in Rome, opportunities to work one on one with faculty in research projects, and workshops and presentations by visiting artists and scholars.
- **Department Scholarships:** Art history majors compete each year for several major scholarships in the School of Art: Austin Award ($3,000), Marsh Scholarship ($3,000), and Milnor Roberts Award ($4,000). They are also eligible for smaller awards of excellence that range from $500 to $1,000. Applications are made in early April and scholarship winners are announced at the annual School of Art Open House in late April.

In addition to these awards, students are also encouraged to apply for the Nordstrom Research and Recognition Awards that support special projects, research, and professional development.

The $2,000 Lockitch Graduating with Excellence Award is presented each year at the School of Art Graduation Celebration to the top undergraduate in Art History.

- **Student Organizations/Associations:** Art history majors have opportunities to serve on School of Art committees which include: Open House, Gallery, Graduation Celebration, Curriculum, Space, and Career Week.

**Of Special Note:** Art history majors anticipating graduate study should acquire a reading knowledge of French, German, Chinese, Italian, or Japanese.

**Graduate Program**

Graduate Program Coordinator
209 Art, Box 353440
206-543-4876
uwah@u.washington.edu
Master of Arts

Admission Requirements:
Bachelor of Arts degree with major in the history of art, or equivalent course work
One copy of all academic transcripts (international applicants must submit two copies)
Three letters of recommendation
Statement of professional objectives in the field
Samples of the applicant's written work
Taking the Graduate Record Examination is required.

Graduation Requirements:
55 credits in the thesis track or 65 credits in the non-thesis track. Of these credits, a minimum of 45 credits in the thesis track or 55 credits in the non-thesis track must be numerically graded art history courses numbered 400 and above, exclusive of thesis or practicum credits. A maximum of 10 credits in related fields, in numerically graded courses numbered 300 and above, may be approved for credit in place of art history courses. No more than 12 credits of ART H 600 may be counted toward the minimum credit requirement for the Master of Arts degree.

A minimum of 5 numerically graded credits must be taken in four of five major areas: African or Native American; East Asian; Ancient, Classical, and Medieval; Italian and Northern Renaissance, Baroque, and Rococo; or late eighteenth- to twentieth-first-century Western.

A minimum of 15 credits must be taken in 500-level seminars, in addition to ART H 500, Methods of Art History, and ART H 504, Methodology II, both of which must be taken within the first year of residence. At least one seminar each in a Western and a non-Western area is required.

A knowledge of either French, German, or Italian, or of Chinese or Japanese if appropriate. Degree candidates specializing in Native American art may substitute Spanish for French, German, or Italian. Candidates in the thesis track are required, in addition, to demonstrate knowledge in a second language appropriate to the student's area of study as determined by the faculty. Petitions to the Faculty Graduate Committee for exemption from the second language requirement will be considered as warranted by the needs of different fields or projects. Language requirements may be satisfied by passing graduate proficiency examinations (available in French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the University with a minimum grade of 3.0; these credits must be distributed over a minimum of three quarters;

(2) a knowledge of German, French, or Italian, or of Chinese or Japanese if appropriate; a research capability in a second language adjudged appropriate to the student's area of study; a knowledge of any other languages considered necessary by the faculty. Language requirements may be satisfied by passing graduate-proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of second-year French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the University with a minimum grade of 3.0;

(3) a General Examination, written and oral, taken prior to enrollment for dissertation credits; this examination covers three specific fields of art history chosen from the following general areas: African, Native American, Chinese, Japanese, Ancient, Medieval, Renaissance, Baroque and eighteenth century, Modern, and Contemporary; no more than two fields may be selected from the same area;

(4) 30 dissertation credits in ART H 800 taken after the General Examination in preparation and defense of the dissertation. These credits must be distributed over a minimum of three quarters;

(5) a dissertation demonstrating original and independent investigation and achievement.

Financial Aid
The Art History division offers certain scholarship funds, as well as teaching assistantships, for art history graduate students. A small number of grants are awarded to outstanding entering students, but it is otherwise a policy to award financial aid and assistantships only to students who have completed at least one year of graduate study.

Doctor of Philosophy

Admission Requirements:
(1) Prior sound preparation in art history at a general level, which usually means having acquired the Master of Arts degree in the history of art;

(2) one copy of all academic transcripts (international applicants must submit two copies);

(3) three letters of recommendation;

(4) statement of professional objectives in the discipline; and

(5) samples of written research work in art history. Taking the Graduate Record Examination is required.

Graduation Requirements: Minimum of 90 credits, which include:

(1) 60 credits in numerically graded art history courses numbered 400 and above, beyond the Master of Arts degree or equivalent, and exclusive of dissertation credits; a maximum of 20 credits in related fields in numerically graded courses numbered 300 and above may be approved for credit in place of art history courses; a minimum of 10 credits must be in areas other than those tested by the General Examination; at least 30 credits must be in 500-level seminars;

(2) a knowledge of German, French, or Italian, or of Chinese or Japanese if appropriate; a research capability in a second language adjudged appropriate to the student's area of study; a knowledge of any other languages considered necessary by the faculty. Language requirements may be satisfied by passing graduate-proficiency examinations (available in French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the University with a minimum grade of 3.0; these credits must be distributed over a minimum of three quarters;

(3) a General Examination, written and oral, taken prior to enrollment for dissertation credits; this examination covers three specific fields of art history chosen from the following general areas: African, Native American, Chinese, Japanese, Ancient, Medieval, Renaissance, Baroque and eighteenth century, Modern, and Contemporary; no more than two fields may be selected from the same area;

(4) 30 dissertation credits in ART H 800 taken after the General Examination in preparation and defense of the dissertation. These credits must be distributed over a minimum of three quarters;

(5) a dissertation demonstrating original and independent investigation and achievement.

Financial Aid
The Art History division offers certain scholarship funds, as well as teaching assistantships, for art history graduate students. A small number of grants are awarded to outstanding entering students, but it is otherwise a policy to award financial aid and assistantships only to students who have completed at least one year of graduate study.

Course Descriptions

ART H 201 Survey of Western Art—Ancient (5) VLPA
Major achievements in painting, sculpture, architecture, and the decorative arts in Europe, the Near East, and North Africa, from prehistoric times to the beginnings of Christianity.

ART H 202 Survey of Western Art—Medieval and Renaissance (5) VLPA
The arts of the Byzantine Empire, Islam, and Western Christendom through 1520 AD.

ART H 203 Survey of Western Art—Modern (5) VLPA
Western art from 1520 to the present.

ART H 204 Survey of Asian Art (5) I&S/VLPA
Origins and interplay of major movements of South and East Asian art.

ART H 205 Survey of Tribal Art (5) I&S/VLPA
Arts of Sub-Saharan Africa and Oceania from prehistoric times to the present and to the pre-Columbian arts of the Americas.

ART H 206 Survey of Native-North American Art (5) I&S/VLPA
Survey of the indigenous arts of North America north of Mexico from ancient through contemporary times. Focuses on the historical and cultural contexts of the arts and the stylistic differences between tribal and individual artists’ styles.

Assesses the diversity of art by individuals of African descent in Brazil, the Caribbean, and the United States. Examines questions of form meaning, and symbolic and ritual behavior. Considers formal and conceptual relationships between art forms and their African sources; assesses their role in the construction of new African-American identities.

ART H 232 Photography: Theory and Criticism (5) I&S/VLPA
Art traditions of photography from its origins in the nineteenth century to the present. Emphasis on photographic traditions and photographers of the twentieth century.

ART H 250 Rome (5) I&S/VLPA
Focuses on Rome as an historical, intellectual, and artistic world center. Literary and historic documents, visual arts, architecture, film, and opera used to explore the changing paradigms of the Eternal City. In English. Offered: jointly with ITAL 250 and HSTEU 250.

ART H 290 History of Architecture (5) I&S/VLPA
Introduction to the history of architecture across a broad range of cultural contexts.

ART H 300 Ideas in Art (5) VLPA
Selected monuments of art and architecture in the Western tradition, from the Greeks to the twentieth century, studied in relation to the intellectual background of the ages and civilizations that produced them. Slide lectures accompanied by discussion of assigned readings in philosophical, religious, scientific, political, literary, and artistic texts. Offered: jointly with CHID 300.

ART H 306 Indian Art of South Asia (5) VLPA
Development of Indian art from its origins to the medieval period. Spread of Indian religions and related art forms in Tibet and Southeast Asia are briefly introduced.

ART H 309 Topics in ART History (5, max. 15) VLPA
Topics vary.

ART H 311 Chinese Painting (5) I&S/VLPA
An introduction to the role of painting in Chinese cultural history, with attention to regional geography, social structure, gender, traditional philosophies, twentieth-century socialism, and the patterns of Chinese history.

ART H 312 Chinese Art and Visual Culture (5) I&S/VLPA
Introduction to Chinese art and visual culture from the ancient period to the present day. Examines the visual traits of important monuments of architecture, calligraphy, film, furniture, ceramics, bronze, painting, and sculpture. Emphasizes how different artistic styles are tied to different historical, social, and cultural contexts.

ART H 313 East Asian Art: Arts in China, Japan, and Korea (5) I&S/VLPA
East Asian art and visual culture introduced through examples of art in China, Japan, and Korea from ancient times to present day. Emphasizes how artistic styles were tied to different social and cultural contexts, and how arts were transformed and exchanged within the larger cultural geographical circle of East Asia.

ART H 315 East Asian Art: Arts in China, Japan, and Korea (5) I&S/VLPA
Buddhist painting and sculpture of China, Korea, and Japan. Explores religious meaning, artistic development, and historical significance. Examples from the sixth to the seventeenth centuries, along with paintings and contemporary carvings.

ART H 317 Chado-Japanese Esthetics (4) VLPA
Introduction to Japanese printmaking practices, style, and themes. Examines concerns related to gender, issues of representation, explicit sexual imagery, cultural and artistic practice, and the function of prints.

ART H 321 Arts of Japan (5, max. 15) I&S/VLPA
The spectrum of Japanese art from prehistory to modern times. Examines the interrelationship of the major media for each historical period. Central theme: the appreciation of the varied aesthetics active in the development of Japanese painting, architecture, sculpture, and ceramics.

ART H 330 Tribal Art and Philosophy (5) I&S/VLPA
Philosophical inquiry and thought in African, Ameri-Indian, and Pacific island societies as expressed through the visual, musical, choreographic, and oral arts. Natural, moral, and ethical ideas as expressed in the arts.

ART H 331 Native Art of the Pacific Northwest Coast (5) I&S/VLPA
Survey of the indigenous arts of the Pacific Northwest Coast from the Columbia River in the south to Southeast Alaska in the north. Overview of ancient through contemporary times, focusing on the historical and cultural contexts of the arts and the stylistic differences between tribal and individual artists’ styles. Offered: jointly with ANTH 331.

ART H 337 African Art and Society (5) I&S/VLPA
Explores the ideas and notions expressed visually in sculpture, painting, ceramics, textiles, and architecture and describes their relationships to man and culture in Africa.

ART H 340 Pre-Classical Art and Archaeology (3) VLPA
Art and the other material remains of the civilizations in the Aegean from the Neolithic period to the end of the Bronze Age,
ART H 341 Greek Art and Archaeology (3) VLPAL
Material remains and the developing styles in sculpture, vase painting, architecture, and the minor arts from the Geometric to the Hellenistic periods; illustrated by slides. Principal sites and monuments, as well as techniques and methods of excavation, are examined in an attempt to reconstruct the material culture of antiquity. Offered: jointly with CL AR 341.

ART H 342 Roman Art and Archaeology (3) VLPAL
Roman architecture and art, with emphasis on the innovations of the Romans; illustrated by slides. Offered: jointly with CL AR 342.

ART H 343 Hellenistic Art and Archaeology (3) VLPAL
Art of Greece and the eastern Mediterranean from the time of Alexander the Great to the Roman conquest. Principal sites with their sculpture, painting, mosaics, and minor arts examined in lectures with slides. Offered: jointly with CL AR 343.

ART H 350 The City of Cairo (3) I&S/VLPA
Development of Fustat and Cairo, 600-1800, with special emphasis on art and architecture. Economic, social, and geographic influences on the creation of the distinctive Egyptian styles of Islamic art. Offered: jointly with NEAR E 350.

ART H 351 Early Medieval and Byzantine Art (5) I&S/VLPA
Christian art and architecture of the Roman and Byzantine empires and of western Europe through the eighth century.

ART H 352 High and Late Medieval Art (5) I&S/VLPA
Art and architecture of western Christendom from the time of Charlemagne to the Renaissance.

ART H 361 Italian Renaissance Art (5) VLPAL
Sculpture, painting, and architecture from 1300 to 1600.

ART H 366 Northern Renaissance Art (5) VLPAL
An overview of Netherlandish, French, and German art in the context of cultural developments circa 1400-1570.

ART H 372 Rococo to Romanticism (5) VLPAL
Mainstream of European art and architecture from about 1710 to about 1830. Attention is also given to central and eastern Europe, Scandinavia, and the colonial Americas.

ART H 373 Southern Baroque Art (3) VLPAL
Art of Italy and Spain, circa 1590 to circa 1710.

ART H 374 Northern Baroque Art (3) VLPAL

ART H 380 Nineteenth- and Twentieth-Century Art (5) VLPAL
Arts and architecture of Europe and America from Romanticism to the present.

ART H 381 Art Since World War II (5) I&S/VLPA
Art of Europe and the United States in the decades since World War II: painting, sculpture, and architecture, multiplication of new forms (video, performance pieces, land and installation pieces), changing context of patronage, publicity, and marketing.

ART H 382 Theory and Practice of Art Criticism (3) VLPAL
Major issues in art and architectural criticism: nature of art criticism, aims of the critic, differences between art and architectural criticism. Works by major critics and artists, mostly twentieth century.

ART H 384 American Art (5) I&S/VLPA
Achievements and issues in painting, architecture, sculpture, and other arts in the United States from the colonial era to the present.

ART H 397 Art in Rome: Augustus to Mussolini (10) VLPAL
Survey of art in Rome; studies from original monuments. Offered in Italy as part of the Art History Seminar in Rome. Focuses on representative works from the most important periods of Italian art: Ancient, Medieval, Renaissance, Baroque, Modern. Site visits, field trips, individual research projects.

ART H 399 Study Abroad: Art History Individual Projects (3-10, max. 20) VLPAL
For participants in Study Abroad programs.

ART H 400 ART History and Criticism (2-5, max. 15) VLPAL
Courses on special topics, frequently by visiting faculty, which cannot be offered on a continuing basis. Consult art history office for subjects offered.

ART H 411 Chinese Painting Experiences, 900-1800 (3) VLPAL
Examines issues of style, theme, and function in Chinese painting from the tenth to the nineteenth century. Discusses painting practice, patronage, regional diversity, the relationship of word and image, amateurism vs. professionalism, and the introduction of foreign elements.

ART H 414 Song China: Painting Production and Cultural Encounters (5) VLPAL
Examines diverse regional development of painting production and cultural exchange by Song China (960-1279) and its neighbors, Japan, Korea, Khitan/Liao, Jurchen/Jin, Tangut/Xi Xia. Focuses on well-known masterpieces, newly excavated material from tombs and archaeological sites, and little-studied anonymous works preserved in Japan.

ART H 419 Japanese Architecture (3) VLPAL
Survey of Japanese architecture from its origins to modern times. Although Shinto architecture, tea houses, gardens, and modern developments are discussed, the primary focus is on the development of Japanese Buddhist architecture. Recommended: some background in Japanese art, history, language, or literature. Offered: jointly with ARCH 453.

ART H 420 Art of the Japanese Print (3) VLPAL
Foundations of Ukiyo-e Hanga from Moronobu through Kuniyoshi. Recommended: some background in Japanese art, history, language, or literature.

ART H 430 Chinese Cinema (5) I&S/VLPA
Chinese film, 1930s to the present, studied as a visual art form, set in relation to traditional and modern Chinese arts and literature, modern history, gender, and other social issues. Recommended: some background in Chinese art, history, language, or literature.

ART H 431 Chinese Cinema (5) I&S/VLPA
Chinese film, 1930s to the present, studied as a visual art form, set in relation to traditional and modern Chinese arts and literature, modern history, gender, and other social issues. Recommended: some background in Chinese art, history, language, or literature.

ART H 432 Oceanic Art (3) I&S/VLPA
Arts of Oceania, studied through cultures of Polynesia, Micronesia, Melanesia, and Australia.

ART H 433 Northern Northwest Coast Native-American Art: Methodologies in Stylistic Analysis (3) VLPAL
Stylistic and historical analysis of Northern Northwest Coast art (Haida, Tlingit, Tsimshian, Northern Wakashan). Intensive analysis of formline rules; stylistic variation through time and between tribal and individual artists’ styles. Recommended: some background in Native American art, history, languages, or literature.
ART H 434 Native-American Art and Ceremony of the Southern and Central Northwest Coast (3) I&S/VLPA
Examination of the role of the visual arts in the ceremonial life of the Native-American people of the central and southern Northwest Coast. Emphasis on the traditional social and religious aspects of ceremonials, contrasts between tribal traditions, and continuing twentieth-century traditions. Recommended: some background in Native American art, history, languages, or literature.

ART H 435 Thematic Studies in Native-American Art (3, max. 9) I&S/VLPA Wright
Approach to Native-American art through themes and issues. Focus varies from year to year (e.g. Shamanism in Native-American art, gender identity in Native-American art, social and political aspects of Native-American art, issues in contemporary Native-American art). Recommended: some background in Native American art, history, languages, or literature.

ART H 436 Arts of Sub-Saharan Africa I (3) I&S/VLPA
Traditional arts of the Western Sudan and the Western Guinea coast with their archaeological antecedents. Recommended: some background in African art, history, languages, or literature.

ART H 437 Arts of Sub-Saharan Africa II (3) I&S/VLPA
Traditional arts of the Central Guinea coast, Nigeria, Cameroon, and Gabon, from precontact times to the present. Recommended: some background in African art, history, languages, or literature.

ART H 438 Arts of Sub-Saharan Africa III (3) I&S/VLPA
Arts of Zaire, Angola, the Swahili coast, and southern Africa. Recommended: some background in African art, history, languages, or literature.

ART H 442 Greek Painting (3) VLPA
Study of painted decoration on Greek vases, with emphasis on stylistic developments and cultural and historical influences. Painting on other media also examined as evidence allows. Offered: jointly with CL AR 442.

ART H 443 Roman Painting (3) VLPA
Study of surviving painting from the Roman World, with emphasis on wall paintings from Pompeii and Herculaneum. Principal topics for discussion: the four styles of Pompeian painting the dependence of Roman painters on Greek prototypes, and the significance of various kinds of painting as domestic decoration. Offered: jointly with CL AR 443.

ART H 444 Greek and Roman Sculpture (3) VLPA
History and development of Greek sculpture and sculptors, their Roman copyists, and Roman portraits and sarcophagi. Emphasis on Greek sculpture of the fifth century BC. Offered: jointly with CL AR 444.

ART H 446 Greek Architecture (3) VLPA
Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with CL AR 446/ARCH 454.

ART H 447 The Archaeology of Early Italy (3) VLPA Harmon
Study of the principal archaeological sites of early Italy, including Etruria, Sicily, southern Italy, and archaic Rome up to the Republican period. Attention given to the material remains and their relationship to the Etruscan, ancient Sicilian, and early Roman civilizations. Offered: jointly with CL AR 447.

ART H 448 The Archaeology of Italy (3) VLPA Harmon
Study of the principal archaeological sites in Italy with special emphasis on ancient Rome. Sites include the Alban hills, Ostia, Pompeii, Herculaneum, Tarquinia, Paestum, Tivoli, and Praeneste. Attention given to the relationship between material remains and their purpose in ancient life. Illustrated by slides. Offered: jointly with CL AR 448.

ART H 451 Topics in Early Christian and Byzantine Art and Architecture (3, max. 9) VLPA
Specific theme or area of early Christian and Byzantine art and architecture, such as early Christian and Byzantine mosaics or the art of Constantinople.

ART H 452 Art, Religion, and Politics in the Early Christian Period, 300-700 AD (3) I&S/VLPA Kartsonis
Evolution of the art of the early Christian period (300-700 AD) in the context of contemporary religious, political, and cultural developments. Recommended: some background in Byzantine art or history. Offered: jointly with RELIG 442.

ART H 453 Art, Religion, and Politics in Byzantium, 700-1453 AD (3) I&S/VLPA Kartsonis
Evolution of the art of Byzantium (700-1453 AD) in the context of contemporary religious, political, and cultural developments. Recommended: some background in Byzantine art or history. Offered: jointly with RELIG 443.

ART H 455 Special Studies in Gothic Art and Architecture (3) VLPA
Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and England. Offered: jointly with ARCH 455.

ART H 457 Flemish Art 1585-1700 (3) VLPA Goettler
History of art in the southern Netherlands during the so-called Counter-Reformation period. Discusses works by Antwerp's major painters (Rubens, van Dyck, Jordaens); new specializations in the various genres (portraiture, genre, landscape, and still-life painting); and developments of northern Baroque sculpture, architecture, and the decorative arts.

ART H 458 The Imagery of Heaven, Hell, and Purgatory (1300-1800) (3) VLPA Goettler
Interdisciplinary approach to the aspects of devotional and visionary art that links art history with religious studies, literary history, and gender studies. Focusses on the media and pictorial genres created for different social groups of worshippers and viewers, from humble devotional objects to sophisticated artifacts of aesthetic and intellectual delight.

ART H 460 Topics in Northern European Art (3-5, max. 9) VLPA Goettler
Approaches to the art of northern Europe through particular themes, genres, contexts, or other issues. Focus varies from year to year.

ART H 461 Early Renaissance Painting in Italy (3) VLPA
Painting of the fourteenth and fifteenth centuries in central and northern Italy. Recommended: some background in Italian Renaissance art or history.

ART H 462 High Renaissance Painting in Italy (3) VLPA
Painting in central and northern Italy, from about 1480 to about 1530: Leonardo, Raphael, the early Michelangelo, Sarto, Correggio, Bellini, Giorgione, and the early Titian. Recommended: some background in Italian Renaissance art or history.

ART H 463 Italian Renaissance Sculpture (3) VLPA
From Nicola Pisano to Giambologna. Recommended: some background in Italian Renaissance art or history.

ART H 466 High Renaissance Painting in Venice (3) VLPA
Painting in Venice, circa 1480 to circa 1580: Bellini, Carpaccio, Giorgione, Titian, Lotto, del Piombo, Tintoretto, and Veronese. Recommended: some background in Italian Renaissance art or history.
ART H 470 English Art: 1500-1800 (3) VLPA
English art, principally painting, and, to a lesser extent, architecture. Emphasis on patronage, on the conditions that produced the decided peculiarities of English art, and on the final triumph of the native tradition. Recommended: some background in English history.

ART H 476 French Art: Eighteenth Century (3) VLPA
Painting, sculpture, and prints; emphasis on the successive phases of Rococo style and iconography and the emergence of Neoclassicism.

ART H 481 Romanticism (3) VLPA
Romantic tendencies of the late eighteenth and early nineteenth centuries, with emphasis on stylistic and iconographic study of painting in Spain, England, Germany, France, and the United States to about 1830. Recommended: some background in the art or history of the period.

ART H 482 Realism and Impressionism (3) VLPA
Art and the world, 1830-80: high Romanticism through Realism and Impressionism, with emphasis on painting in France. Recommended: some background in the art or history of the period.

ART H 483 Post-Impressionism to 1918 (3) VLPA
Post-Impressionism and the great revolution of early twentieth-century art, with emphasis on painting. From the first revisions of Impressionism around 1880 to Fauvism, Cubism, Futurism, the Blaue Reiter, and Dadaism. Recommended: some background in the art or history of the period.

ART H 484 Topics in Modern Art (3, max. 9) VLPA
Approach to art of the nineteenth and twentieth centuries through particular themes, genres, contexts, or other issues. Focus varies from year to year. Recommended: some background in the art or history of the period.

ART H 485 Italian Futurism, Dada, Surrealism (5) VLPA
Failing
Survey of three European early modern art movements whose ultimate objective was the collapse of bourgeois culture. Central issues: the role of art and artists in catalyzing social change, strategies for destroying public faith in logic, integration of verbal and visual signs and nonaesthetic conceptions of art. Recommended: some background in the art or history of the period.

ART H 486 Abstract Expressionism: History and Myth (5) VLPA
Thematic and chronological survey of abstract expressionism, including major genres of critical interpretation, revisionist scholarship, and the relationship of artistic production to a larger context of visual production. Recommended: some background in the art or history of the period.

ART H 488 American Architecture (3) VLPA
American architecture from indigenous native American traditions to the present. Recommended: some background in the art, architecture, or history of the period. Offered: jointly with ARCH 488.

ART H 490 Nineteenth-Century Architecture (3) VLPA
From late eighteenth-century French rationalists, Neoclassicists, to fin de siecle Vienna and Paris. Includes theorists such as Ruskin, Viollet-le-Duc, and Semper; major movements, such as the Arts and Crafts, and the French Ecole des Beaux-Arts method of design. Recommended: some background in the art, architecture, or history of the period. Offered: jointly with ARCH 456.

ART H 491 Twentieth-Century Architecture (3) VLPA
Architecture in the twentieth century, mainly in Europe and the United States. Traces roots of Modernism in Europe in the 1920s, its demise (largely in the United States) in the 1960s and recent trends such as Post-Modernism and Deconstructivism. Recommended: some background in the art, architecture, or history of the period. Offered: jointly with ARCH 457.

ART H 492 Alternative Art Forms Since 1960 (5) VLPA
Survey of “post-studio” art forms developed in the 1960s by artists who did not equate artmaking with painting, sculpture, or other traditional forms. Topics include: happenings, Fluxus, land projects, artists’ video, artists, books, performance, site works, and art made for distribution on CD-ROM and on the World Wide Web.

ART H 493 Architecture Since 1945 (3) VLPA
Theories and forms in architecture from the end of World War II to the present. Includes new wave Japanese architects, recent Native-American developments, and non-Western as well as Western trends. Recommended: some background in the art, architecture, or history of the period. Offered: jointly with ARCH 459.

Spans the architectural history of Paris, from its Gallic, pre-roman origins in the 2nd century BCE through the work of 21st century architects. Focuses on changing patterns of the physical fabric of the city and its buildings, as seen within the context of the broader political, social, economic, and cultural history. Offered: jointly with EURO 496.

ART H 495 Italian Fascism: Architecture and Power (5) I&S/VLPA Clausen, Sbragia
Fascism in Italy as studied within the broader European context of nationalism, imperialism, and modernization, with particular emphasis on the arts — literature, film, architecture, and urbanism. Offered: jointly with ITAL 475; A.

ART H 497 Special Topics in Art in Rome (5, max. 10) VLPA
Topics in art and architecture in Rome and environs, studied from original works. Offered in Italy as part of the art history Seminar in Rome. Topics vary. Site visits, field trips, and individual research projects.

ART H 498 Individual Projects, Undergraduate Practicum (2-5, max. 10)
Fieldwork or internships in art-related areas in the community. Practical experience in areas such as arts administration, gallery and museum operations, collection cataloguing, curatorial responsibilities, and art education. Credit/no credit only.

ART H 499 Individual Projects (2-5, max. 10)

ART H 500 Methods of ART History (5)
Introduction to the specialized bibliography of art historical research and to the wide variety of approaches to art historical problems of all periods and regions.

ART H 501 Seminar in the General Field of Art (5, max. 15)

ART H 504 Methods of Art History: Faculty Research (2)
Discussion and analysis of methodological issues posed in faculty research. Credit/no credit only. Offered: W.

ART H 509 Seminar in Special Topics in ART History (5, max. 15)
Specific focus changes from quarter to quarter.

ART H 511 Seminar in Chinese Art (5, max. 15)
Critical appraisal of the principal research methods, theories, and types of literature dealing with the art of China.

ART H 515 Seminar in Japanese Art (5, max. 15)
Critical appraisal of the principal research methods, theories, and types of literature dealing with the art of Japan.
ART H 531 Seminar in Tribal Art (5, max. 15)
Methodological and cross-disciplinary problems in the visual arts of precolonial Africa, Oceania, and America. Specific content varies.

ART H 533 Seminar in North American Indian Art (5, max. 15)
Problems in North American Indian visual arts. Content varies.

ART H 541 Seminar in Greek and Roman Art (5)
In-depth study of selected topics and problems of the art of ancient Greece and Rome. Offered: jointly with CL AR 541.

ART H 551 Seminar in Early Christian, Byzantine, and/or Medieval Art and Architecture (5, max. 15)
Problems in early Christian, Byzantine, and medieval art and architecture. Content varies. Prerequisite: permission of instructor.

ART H 561 Seminar in Italian Renaissance Art (5, max. 15)
Problems and in-depth study of selected topics of the art of the Italian Renaissance.

ART H 566 Seminar in North European Art (5, max. 15)
Deals with problems of style and iconography of the northern European masters of the fourteenth through seventeenth centuries.

ART H 577 Seminar in Baroque Art (5, max. 15)
Iconographic and stylistic problems of the art of the Baroque period, with emphasis on the principal research methods, theories, and types of literature dealing with the art of the seventeenth and eighteenth centuries in Europe.

ART H 581 Seminar in Modern Art (5, max. 15)
Art historical problems of the nineteenth and twentieth centuries.

ART H 590 Seminar in Criticism of Contemporary Art (5, max. 15)
Contemporary art and appropriate critical methodology.

ART H 591 Seminar in Twentieth-Century Architecture (3/5)
Specific focus changes from quarter to quarter. Prerequisite: graduate standing with background in art history, architecture, architectural history, or permission of instructor. Offered: jointly with ARCH 558.

ART H 592 Seminar in American Architecture (5) Clausen
Topics vary. Offered: jointly with ARCH 529.

ART H 598 Master’s Practicum (*, max. 15)
Credit/no credit only.

ART H 599 Reading and Writing Projects (2)
Art historical issues, methods, and materials. Required of all graduate majors registered in 400-level art history courses. Open also to graduate nonmajors.

ART H 600 Independent Study or Research (*)
Credit/no credit only.

ART H 700 Master’s Thesis (*)
Credit/no credit only.

ART H 800 Doctoral Dissertation (*)
Credit/no credit only.

Asian Languages and Literature
225 Gowen
The Department of Asian Languages and Literature offers instruction in the principal languages and literatures of Asia, including East, Southeast, Central, and South Asia. Emphasis is placed on the roles of these languages within the cultures they serve as well as on linguistic, textual, and literary analysis. Courses on Asian literature in English are offered for majors and nonmajors alike.

Undergraduate Program
Adviser
223A Gowen, Box 353521
206-543-4996

The Department of Asian Languages and Literature offers the following undergraduate programs:

- The Bachelor of Arts degree with majors in Chinese, Japanese (with either a linguistic or literature concentration), Korean, and South Asian languages
- Minors in Chinese, Hindi, Japanese, and Sanskrit

Bachelor of Arts
Suggested First- and Second-Year College Courses: First and second years of the target foreign language(s): Chinese, Japanese, Korean, or South Asian (Hindi or Sanskrit). Any courses relating to the area or discipline of major study.

Department Admission Requirements:
Completion of at least 20 credits of college course work (or department-approved equivalent) in the intended primary language of concentration. The most recent course completed in the intended primary language of concentration must be a course taken at the UW, and the final grade in the most recent course in that language must be 2.5 or higher.

Completion of one writing course (W-prefix) taught in English with a minimum grade of 2.0.

The department prefers that prospective majors present a cumulative GPA of 2.50 or higher. Applicants may submit materials in addition to transcripts clarifying any aspect of past course work. Denied applicants may appeal.

Transfer students must be enrolled at the UW before applying to the major.

Note: A student entering the junior year without two years of the appropriate foreign language will not be able to complete the degree requirements in two years unless he or she takes accelerated courses such as Chinese or Japanese at the UW during summer quarter.

Major Requirements

Chinese
75 credits, as follows:
- Language courses: 30 credits required, including a minimum of 20 beyond the third-year level. Must include CHIN 451, plus other courses drawn from CHIN 411, CHIN 412, CHIN 413, CHIN 421, CHIN 422, CHIN 423, CHIN 452, CHIN 453, CHIN 470, and CHIN 482.
- Linguistics courses: 5 credits required (CHIN 342); an additional 5 credits optional (CHIN 443).

Literature courses: 15 credits required (10 if the optional 5 linguistics credits are taken). Courses may be drawn from ASIAN 201, ASIAN 204, ASIAN 211, ASIAN 263, CHIN 373, CHIN 374, CHIN 380, CHIN 381, CHIN 385, CHIN 461, CHIN 462, CHIN 463, and Chinese literature courses offered in the Department of Comparative Literature.

China-related humanities and social science courses: 25 credits required. Must include HSTAS 211, plus other courses explicitly related to China from such departments as Anthropology, Art, History, International Studies, Linguistics, and Sociology.

Japanese
75 credits as follows:
- 45 credits in language, including 30 credits beyond the second year, selected according to the student’s choice of literature or linguistics concentration; 20 credits of a literature or linguistics sequence; and 10 credits of area-related humanities and social sciences, as follows:
  - Literature Concentration
    - Language: 45 credits, with a minimum of
30 credits beyond the second year. (Second year: JAPAN 211, JAPAN 212, JAPAN 213; third year: JAPAN 311, JAPAN 312, JAPAN 313; fourth year: 15 credits from JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473.) Students who, upon the determination of the faculty in Japanese, are permitted to begin their study of Japanese at the University at a level higher than JAPAN 211, substitute, in consultation with the undergraduate adviser, an equivalent number of credits in additional courses drawn from JAPAN 431, 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473.)

Area-related humanities or social science courses: 10 credits at the 300 level or above, at least 5 of which must be from outside the Department of Asian Languages and Literature; may be taken from JAPAN 342, JAPAN 343, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473; or related courses from other departments.

Literature sequence: 20 credits, including JAPAN 321, JAPAN 322, JAPAN 323, and 5 credits from JAPAN 395, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 460, JAPAN 471, JAPAN 472, and JAPAN 473, if not used to satisfy the language requirement.

Area-related humanities or social science courses: 10 credits at the 300 level or above, at least 5 of which must be from outside the Department of Asian Languages and Literature; may be taken from JAPAN 342, JAPAN 343, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473; or related courses from other departments.

Linguistics Concentration

Language: 45 credits, with a minimum of 30 credits beyond the second year. (Second year: JAPAN 211, JAPAN 212, JAPAN 213; third year: JAPAN 311, JAPAN 312, JAPAN 313; fourth year: 15 credits from JAPAN 421, JAPAN 422, JAPAN 423, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473)

Students who, upon the determination of the faculty in Japanese, are permitted to begin their study of Japanese at the University at a level higher than JAPAN 211, substitute, in consultation with the undergraduate adviser, an equivalent number of credits in additional courses drawn from JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473, and with prior approval, other Japan-related humanities or social science courses.

Linguistics sequence: 20 credits, including at least 15 credits from JAPAN 342, JAPAN 343, JAPAN 395, JAPAN 440, JAPAN 442, JAPAN 443; 5 of the 20 credits may come from JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 460, JAPAN 471, JAPAN 472, JAPAN 473, LING 400, or related courses from other departments.

Area-related humanities or social science courses: 10 credits at the 300 level or above, at least 5 of which must be from outside the Department of Asian Languages and Literature; may be taken from JAPAN 400, JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 395, JAPAN 460, JAPAN 471, JAPAN 472, and JAPAN 473; or related courses from other departments.

Korean

75 credits as follows:
45 credits in the Korean language, 15 beyond second-year level
30 credits in literature and area-related humanities or social science courses

South Asian Languages

75 credits as follows:
60 credits in languages, of which 45 are in the major language, 15 in the minor language
15 credits in area-related humanities or social science courses to be chosen in consultation with adviser and to include HSTAS 201 and ASIAN 401

Minor

Minor Requirements

- **Chinese**: 30 credits as follows:
  Language courses: 15 credits at or above the third-year level. Must include CHIN 451, plus other courses drawn from among CHIN 301, CHIN 302, CHIN 303, CHIN 411, CHIN 412, CHIN 413, CHIN 421, CHIN 422, CHIN 423, CHIN 452, CHIN 453, CHIN 470, and CHIN 482. China-related humanities courses: 15 credits drawn from among the following: ASIAN 201, ASIAN 204, ASIAN 211, ASIAN 263 (when China is the topic), CHIN 342 (or CHIN 442), CHIN 373, CHIN 374, CHIN 380, CHIN 381, CHIN 385, CHIN 443, and CHIN 461, CHIN 462, CHIN 463.

- **Hindi**: 30 credits as follows:
  15 language credits at the second-year level (HINDI 321, HINDI 322, HINDI 323) or above
  15 credits in area-related humanities courses to include either ASIAN 203 or ASIAN 206 and any of the following: ART H 306; HSTAS 201, HSTAS 202, HSTAS 401, HSTAS 402, HSTAS 403, HSTAS 404; PHIL 386; PHIL 412; RELIG 352, RELIG 354

- **Japanese**: 30 credits as follows:
  15 language credits at the third-year level (JAPAN 311, JAPAN 312, JAPAN 313) or above
  15 credits in additional language or literature/culture courses. Acceptable courses include, but are not limited to: JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 342, JAPAN 343, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 440, JAPAN 442, JAPAN 443, JAPAN 460, JAPAN 471, JAPAN 472, JAPAN 473; ART H 316, ART H 317; ART 321; ECON 494; GEOG 313; HSTAS 422, HSTAS 423; MUSIC 495; POL S 435. Acceptable language courses include those offered by the Technical Japanese program, the Jackson School of International Studies, the
School of Law, and the School of Business Administration

- **Sanskrit:** 30 credits as follows:
  - 15 language credits at the second-year level (SNKRT 401, SNKRT 402, SNKRT 403) or above
  - 15 credits in area-related humanities courses to include either ASIAN 203 or ASIAN 206 and any of the following: ART H 306; HSTAS 201, HSTAS 202, HSTAS 401, HSTAS 402, HSTAS 403, HSTAS 404; PHIL 386, PHIL 412; RELIG 352, RELIG 354

At least half of the credits for the minor must be taken at the UW.

**Student Outcomes and Opportunities**

**Instructional and Research Facilities:** None

**Honors Program:** With College Honors. With Departmental Distinction. See adviser for details.

**Research, Internships, and Service Learning:** None offered

**Department Scholarships:** None offered

**Student Organizations/Associations:** None

**Graduate Program**

Graduate Program Coordinator
225 Gowen, Box 353521
206-543-4996

The Department of Asian Languages and Literature offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees with specializations in (1) the languages and literatures of China; (2) the language and literature of Japan; (3) the languages and literatures of South Asia, subsuming Sanskrit and Hindi. All graduate students in the department must affiliate themselves with one of these three programs. The department does not offer degrees or specializations in language pedagogy.

Financial aid for graduate students newly entering the department is very limited and is awarded on a competitive basis. National Resource Fellowships are awarded for the study of Chinese, Japanese, and Korean. The department offers incoming graduate students limited opportunities for teaching assistant positions in Chinese, Japanese, and Korean. Since some financial aid is wholly or partially determined by need, all prospective students are urged to submit the Free Application for Federal Student Aid (FAFSA) with the College Scholarship Service in New Jersey, and to apply for other forms of aid mentioned in the department’s cover letter to prospective students.

A full range of courses in other disciplines and aspects of Asian cultures and civilizations is available from other departments and schools of the University, such as the departments of Anthropology, Art History, History, Linguistics, Comparative Literature, and Political Science, and the Henry M. Jackson School of International Studies. Students in the Department of Asian Languages and Literature are encouraged to avail themselves of these offerings to complement and supplement their language and literature studies.

**Admission Requirements**

Applicants for admission should present an undergraduate major in the language and literature of specialization (four years of language training for admission to the Chinese and Japanese programs; fewer years of language acquisition may be acceptable in South Asian languages), or the background and training equivalent to such a major. Students without such a background may be qualified for admission, but will need to acquire the program prerequisites during the earliest stages of their graduate study. Besides an application and one original set of transcripts of prior postsecondary education (international students are required to send a second original set directly to the Office of Graduate Admissions), the department requires a statement of academic goals, and three letters of recommendation addressed to the Graduate Program Coordinator.

**Degree Requirements**

The research component of the Master of Arts degree may be satisfied by the writing of either a thesis or two research papers. The Doctor of Philosophy degree requires a dissertation. In addition to the language of specialization, reading knowledge of a second (usually Western) language is required for the Master of Arts degree, and of a third (usually Asian) language for the Doctor of Philosophy degree. Neither English nor, usually, the student’s native language may be used to fulfill these additional requirements.

**Faculty**

*Graduate Faculty status

**Buddhist Studies**

**Collett Cox * Professor**
Sanskrit, Pali, comparative religion, Indian and Chinese Buddhist philosophy, history of religions

**Richard G Salomon * Professor**
Sanskrit and Prakrit language and literature, epigraphy, ancient Indian history, Gandharan studies

**Chinese**

**Nyan-Ping Bi Lecturer**
Chinese language

**Judith M. Boltz Affiliate Associate Professor**
Classical Chinese language

**William G. Boltz * Professor**
Classical Chinese, philology, script, textual criticism, mythol- ogy

**Yomi Braester Adjunct Associate Professor**
Modern Chinese literature, film, literary criticism and theory of art

**Yuqing Cao Lecturer**
Chinese Language

**Hok-lam Chan Affiliate Professor**
Chinese history

**Chris Hamm * Assistant Professor**
Pre-modern Chinese vernacular literature, modern Chinese fiction and film.

**Zev Handel * Assistant Professor**
Chinese language, historical phonology, Chinese dialectology, Tibeto-Burman languages

**David R Knechtges * Professor**
Han and Six Dynasties literature, fu, Wen xuan, Chinese literary history, classical prose

**Taiping Chang Knechtges Affiliate Assistant Professor**
Chinese language and literature
Liping Yu  
Lecturer  
Chinese Language

Anne Yue-Hashimoto *  
Professor  
Chinese language, linguistics, dialectology, grammar

Michael C Shapiro *  
Professor and Department Chairman  
Hindi language and literature, Indo-Aryan languages and linguistics

Japanese

Paul Atkins *  
Assistant Professor  
Classical Japanese literature

K P Singh  
Lecturer  
Hindi language, Dalit studies, race, caste and ethnicity, South Asian diaspora, post-colonial literature

Davinder Bhowmik *  
Assistant Professor  
Modern Japanese literature

Sanskrit

Akiko Iwata  
Lecturer  
Japanese Language

Collett Cox *  
Professor  
Sanskrit, Pali, comparative religion, Indian and Chinese Buddhist philosophy, history of religions

Ted Mack *  
Assistant Professor  
Modern Japanese literature

Izumi Matsuda-Kiami  
Lecturer  
Japanese language and pedagogy

Tim Lenz  
Post-Doctoral Research Associate  
Sanskrit

Itsuko Nishikawa  
Lecturer  
Japanese language

Heidi Pauwels *  
Associate Professor  
Medieval and modern Hindi language and literature, Hinduism, Sanskrit language and literature

Judy Okada  
Lecturer  
Japanese language

Richard G Salomon *  
Professor  
Sanskrit and Prakrit language and literature, epigraphy, ancient Indian history, Gandharan studies

Amy Snyder Ohta *  
Associate Professor  
Applied linguistics, acquisition of Japanese as a second language, sociolinguistics

Kaoru Ohta  
Senior Lecturer  
Japanese linguistics, syntax and morphology

Jameel Ahmad  
Lecturer  
Urdu language and literature

Sudeshna Sen  
Affiliate Assistant Professor  
Japanese Literature and Visual Culture

Southeast Asian  
Indonesian

Desiana Pauli Sandjaja  
Lecturer  
Indonesian Language

Michio Tsutsui  
Adjunct Associate Professor  
Technical Japanese, Japanese as a second language, linguistics, computer-assisted language learning

Thai

Thomas Gething  
Affiliate Professor  
Thai language, Khammuang (Northern Thai)

Korean

Soohee Kim  
Lecturer  
Korean language and linguistics

Wiworn Kesavatana-Dohrs

Associate Professor  
Medieval and modern Hindi

Course Descriptions

ASIAN 201 Literature and Culture of China: Ancient and Classical (5) I&S/VLPA  
Introduction to ancient and classical Chinese literature in its cultural context. Texts in English translation. Offered: alternate years; A.

ASIAN 202 Literature and Culture of Japan: Traditional Japan (5) I&S/VLPA  
Introduction to traditional Japanese literature in its cultural context.
Texts in English translation. Offered: alternate years; W.

ASIAN 203 Literature and Culture of Ancient and Classical India (5) I&S/VLPA
Introduction to ancient and classical Indian literature in its cultural context. Texts in English translation. Offered: alternate years; Sp.

ASIAN 204 Literature and Culture of China from Tradition to Modernity (5) I&S/VLPA
Introduction to modern Chinese literature in its cultural context. Texts in English translation. Offered: alternate years; A.

ASIAN 205 Literature and Culture of Japan from Tradition to Modernity (5) I&S/VLPA
Introduction to Japanese literature of the nineteenth and twentieth centuries in its cultural context. May also include some Korean literature. Texts in English translation.

ASIAN 206 Literature and Culture of South Asia from Tradition to Modernity (5) I&S/VLPA Pauwels, Shapiro
Introduction to medieval and modern South Asian literature in its cultural context. Texts in English translation. Offered: alternate years; Sp.

ASIAN 207 Special Topics in Literature and Culture of Asia (5) I&S/VLPA
Introduction to the literature of one or more Asian traditions considered in its cultural context. Content varies depending on the specialization and interest of instructor. Texts in English translation. Offered: AWSp.

ASIAN 208 Introduction to the Civilization and Culture of Tibet (5) VLPA, I&S
Comprehensive introduction to the society, history, and religion of Tibet. Discusses the most salient features of Tibetan civilization, and examines their position in the larger context of Asian cultures. Traces the evolution of religious-historical developments from seventh century to 16th century. Other subjects include art, architecture, literature, and political structures. Offered: A.

ASIAN 211 Languages and Cultures of China (5) I&S/VLPA
Provides a general survey of the languages and language-families in China, emphasizing the rich linguistic diversity found there today. Languages compared with English, from linguistic and cultural perspectives, to demonstrate not only characteristics but also mutual dependence throughout their development.

ASIAN 263 Great Works of Asian Literature (5) VLPA
Selected major works of Asian literature. Taught on a rotational basis with the literary traditions of China, Japan, India covered in successive years. Content varies depending on specialization and interest of instructor. Primary emphasis on literary values of works and their tradition; attention also given to historical and social contexts and the thought and value systems of the culture involved.

ASIAN 401 Introduction to Asian Linguistics (5) VLPA Handel, K. Ohta, Shapiro
Linguistic analysis, with emphasis on languages of east, southeast, south, and central Asia. Includes phonetics, phonemics, morphology, syntax, historical reconstruction, linguistic typology, comparative grammar. Survey of major languages and language families of Asia. Diverse Asian languages as subjects of linguistic analysis. Prior knowledge of linguistics not required. Recommended: two years of any Asian language.

ASIAN 404 Writing Systems (3) VLPA Boltz, Salomon
Origin, nature, and development of writing systems. Alphabets, syllabaries, and logographic systems; relation of writing systems to spoken languages; decipherment of previously undeciphered scripts. Prerequisite: ASIAN 401. Offered: alternate years.

ASIAN 405 Advanced Problems in Asian Linguistics (3) VLPA
Handel, K. Ohta, Shapiro
Advanced problems in the analysis of the languages of east, southeast, south, and central Asia. Includes phonology, morphology, syntax, lexicography, historical reconstruction, linguistic typology, and comparative grammar. Prerequisite: ASIAN 401. Offered: alternate years.

ASIAN 411 Buddhist Literature (5) VLPA/I&S
Overview of major Buddhist literary traditions of India, China, and Tibet from antiquity to the end of the first millennium CE. Special focus on Indian Mahayana literature and the historical factors that accompanied its introduction and preservation in China and Tibet. Prerequisite: either RELIG 202, or RELIG 354. Offered: W.

ASIAN 494 Ramayana in Comparative Perspective (5) VLPA Pauwels
Examines and compares different versions (mainly South Asian) of the Ramayana, including the widely popular television version. Focuses on some famous and controversial passages, with special attention to gender issues. Incorporates background readings from the most recent research. Offered: jointly with SISSA 494.

ASIAN 498 Special Topics (1-5, max. 15) VLPA
Offered occasionally by permanent or visiting faculty members. Topics vary. Offered: AWSp.

ASIAN 503 Seminar in Asian Linguistics (1-5, max. 15) Handel, A. Ohta, K. Ohta
Topics vary. Prerequisite: permission of instructor. Offered: AWSp.

ASIAN 510 Teaching Assistant Training Workshop (3) A. Ohta
Introduction to issues and methods of teaching Asian languages in American college classrooms. Recommended for all new teaching assistants. Prerequisite: concurrent registration in ASIAN 518 and permission of instructor. Offered: A.

ASIAN 518 Foreign Language Teaching Methodology (2) Brandl

ASIAN 580 Seminar in Hindu Studies (5) Pauwels
Introduction to the academic study of Hinduism for graduate students. Examines major problems currently addressed in the academic study of Hinduism and the methods used. Provides a historical perspective on past scholarship. Offered: jointly with RELIG 580.

ASIAN 585 Seminar in Buddhism (5) Cox
Systems and history of Buddhist thought. Original and secondary sources are used. Combines the methods of specialists in south, central, and east Asian Buddhism with those of historians of religion and philosophy. Prerequisite: permission of instructor. Offered: AWSp.

ASIAN 600 Independent Study or Research (*)
Offered: AWSp.

ASIAN 700 Master's Thesis (*)
Started: AWSp.

ASIAN 800 Doctoral Dissertation (*)
Offered: AWSp.
Course Descriptions

Course Descriptions

BENG 311 Elementary Bengali (5)
Offers a balance of all four skills: speaking, reading, listening, and writing. Consists of lectures on grammar, drill sections, oral and written exercises, aural comprehension exercises, and readings in elementary level texts. Offered: W.

BENG 312 Elementary Bengali (5)
Offers a balance of all four skills: speaking, reading, listening, and writing. Consists of lectures on grammar, drill sections, oral and written exercises, aural comprehension exercises, and readings in elementary level texts. Prerequisite: BENG 311. Offered: W.

BENG 313 Elementary Bengali (5)
Offers a balance of all four skills: speaking, reading, listening, and writing. Consists of lectures on grammar, drill sections, oral and written exercises, aural comprehension exercises, and readings in elementary level texts. Prerequisite: BENG 312. Offered: Sp.

Chinese

Course Descriptions

CHIN 101 First-Year Chinese (5)
Introduction to the standard language. Emphasis on learning correct pronunciation and basic structure. Drill in oral use of the language. Open only to students who do not have any previous training in Chinese. Cannot be taken for credit in combination with CHIN 134. Offered: A.

CHIN 102 First-Year Chinese (5)
Introduction to the standard language. Emphasis on learning correct pronunciation and basic structure. Drill in oral use of the language. Open only to students who do not have any previous training in Chinese. Cannot be taken for credit in combination with CHIN 134. Prerequisite: minimum grade of 2.0 in CHIN 101. Offered: W.

CHIN 103 First-Year Chinese (5)
Introduction to the standard language. Emphasis on learning correct pronunciation and basic structure. Drill in oral use of the language. Open only to students who do not have any previous training in Chinese. Cannot be taken for credit in combination with CHIN 134. Prerequisite: minimum grade of 2.0 in CHIN 102. Offered: Sp.

CHIN 111 First-Year Chinese (Heritage) (5)
Course is intended for students who have some formal or home training in listening and speaking Mandarin. The focus is on reading comprehension and writing characters in context. Offered: A.

CHIN 112 First-Year Chinese (Heritage) (5)
Course is intended for students who have some formal or home training in listening and speaking Mandarin. The focus is on reading comprehension and writing characters in context. Prerequisite: minimum grade of 2.0 in CHIN 111. Offered: W.

CHIN 113 First-Year Chinese (Heritage) (5)
Course is intended for students who have some formal or home training in listening and speaking Mandarin. The focus is on reading comprehension and writing characters in context. Prerequisite: minimum grade of 2.0 in CHIN 112. Offered: Sp.

CHIN 121 Accelerated Chinese (10)
Covers same material as 111 and 112. In conjunction with 222 and 223, allows completion of two years’ language study in one academic year. Cannot be taken for credit in combination with 111 or 112. Offered: A.

CHIN 134 First-Year Intensive Chinese (Non-Heritage) (15)
Introduction to the standard language. Emphasis on learning correct pronunciation and basic structure. Drill in oral use of the language. Open only to students who do not have any previous training in Chinese. Cannot be taken for credit in combination with CHIN 101, 122, or 103. Offered: S.

CHIN 138 First-Year Intensive Chinese-Heritage (15)
Intended for students who have some formal or home training in listening and speaking Chinese. Focuses on reading, comprehension, and writing characters in context. Offered: S.

CHIN 145 Foreign Study: First-Year Chinese (1-15, max. 20)
Modern 100-level Chinese language studied abroad. Evaluation by department/faculty required.

CHIN 201 Second-Year Chinese for Non-Heritage Learners (5) VLPA
Continuation of CHIN 103. Advanced grammar and vocabulary expansion stressed. Aural and oral practice and structural drills continued. Cannot be taken for credit in combination with CHIN 234. Prerequisite: minimum grade of 2.0 in either CHIN 103 or CHIN 134. Offered: A.

CHIN 202 Second-Year Chinese for Non-Heritage Learners (5) VLPA
Advanced grammar and vocabulary expansion stressed. Oral practice and structural drills continued. Cannot be taken for credit in combination with CHIN 234. Prerequisite: minimum grade of 2.0 in CHIN 201. Offered: W.

CHIN 203 Second-Year Chinese for Non-Heritage Learners (5) VLPA

CHIN 211 Second-Year Chinese for Heritage Learners (5) VLPA
Continuation of 111, 112, 113. Stresses advanced grammar and vocabulary expansion. Continues Aural and oral practice. Cannot be taken for credit in combination with 234. Prerequisite: 2.0 in either CHIN 113 or CHIN 134. Offered: A.

CHIN 212 Second-Year Chinese for Heritage Learners (5) VLPA
Continuation of CHIN 211. Stresses advanced grammar and vocabulary expansion. Cannot be taken for credit in combination with CHIN 234. Prerequisite: 2.0 in CHIN 211. Offered: W.

CHIN 213 Second-Year Chinese for Heritage Learners (5) VLPA
Continuation of CHIN 212. Stresses advanced grammar and vocabulary expansion. Emphasizes reading and writing. Continues aural and oral practice. Cannot be taken for credit in combination with CHIN 234. Prerequisite: 2.0 in CHIN 212. Offered: Sp.

CHIN 222 Accelerated Chinese (10) VLPA
Covers same material as 113 and 211. In conjunction with 121 and 223, allows completion of two years’ language study in one academic year. Cannot be taken for credit in combination with 113 or 211. Prerequisite: CHIN 121. Offered: W.

CHIN 223 Accelerated Chinese (10) VLPA
Covers same material as 212 and 213. In conjunction with 121 and 222, allows completion of two years’ language study in one academic year. Cannot be taken for credit in combination with 212 or 213. Prerequisite: CHIN 222. Offered: Sp.
CHIN 234 Second-Year Intensive Chinese (15) VLPA
Equivalent of 211, 212, 213. Cannot be taken for credit in combination with 211, 212, or 213 taken. Prerequisite: either CHIN 113 or CHIN 134. Offered: S.

CHIN 245 Foreign Study: Second-Year Chinese (1-15, max. 20) VLPA
Modern 200-level Chinese language studied abroad in approved programs. Evaluation by department/faculty required.

CHIN 301 Third-Year Chinese, Non-Heritage Track (5) VLPA
Focuses on oral and aural proficiency. Covers general topics, reading ability of simple unedited text, as well as writing skill in short essay form. Prerequisite: 2.0 in CHIN 213.

CHIN 302 Third-Year Chinese, Non-Heritage Track (5) VLPA
Focuses on oral and aural proficiency. Covers general topics, reading ability of simple unedited text, as well as writing skill in short essay form. Prerequisite: 2.0 in CHIN 301.

CHIN 311 Third-Year Chinese for Heritage Learners (5) VLPA
Designed for students at the advanced third-year level who wish to improve their speaking, reading, writing, and comprehension skills while increasing knowledge of the culture and the society in which the Chinese language is spoken. Focuses on Chinese as spoken in day-to-day life. Offered: A.

CHIN 312 Third-Year Chinese for Heritage Learners (5) VLPA
Designed for students at the advanced third-year level who wish to improve their speaking, reading, writing, and comprehension skills while increasing knowledge of the culture and the society in which the Chinese language is spoken. Focuses on Chinese as spoken in day-to-day life. Offered: W.

CHIN 313 Third-Year Chinese for Heritage Learners (5) VLPA
Designed for students at the advanced third-year level who wish to improve their speaking, reading, writing, and comprehension skills while increasing knowledge of the culture and the society in which the Chinese language is spoken. Focuses on Chinese as spoken in day-to-day life. Offered: Sp.

CHIN 342 The Chinese Language (5) VLPA Handel
Nature and structure of the Chinese language, covering structural characteristics, genetic and typological affiliation, standard Mandarin and Chinese dialects, Chinese writing system, history of the Chinese language, and cultural aspects. Prerequisite: either CHIN 103, CHIN 113 or CHIN 134; recommended: either CHIN 201, CHIN 211 or CHIN 234. Offered: W.

CHIN 345 Foreign Study: Third-Year Chinese (1-15, max. 20) VLPA
Modern 300-level Chinese language studied abroad in approved programs. Evaluation by department/faculty required.

CHIN 373 Chinese Poetry (5) VLPA
Introduction to Chinese poetry. A study of its origins, forms, major themes, and relevant conventions. All readings in English. No knowledge of Chinese required. Offered: W.

CHIN 374 Chinese Prose (5) VLPA Knechtges
Survey of great works of Chinese prose, including philosophical writings, historical works, short narratives, essays, and rhyme-prose. All readings in English. No knowledge of Chinese required. Offered: Sp.

CHIN 380 Premodern Chinese Narrative in Translation (5) VLPA
Premodern Chinese fiction in English translation. Historical and cultural contexts of narrative traditions. Emphasis on the Ming and Ch’ing periods; works and topics vary from year to year. Offered: Sp.

CHIN 381 Literature in Modern China (5) VLPA
Twentieth-century Chinese literature in English translation. Introduces the historical and cultural context of modern Chinese writing, as well as various critical approaches to its study.

Introduction to Chinese popular culture from the turn-of-the-century to the present. Topics include cinema, popular music, and popular fiction; emphasis varies from year to year.

CHIN 395 Foreign Study: Intermediate Chinese Literature or Linguistics (1-15, max. 15) VLPA
Intermediate Chinese literature or linguistics studied abroad in approved programs. Evaluation by department/faculty required.

CHIN 411 Fourth-Year Chinese (5) VLPA Yue-Hashimoto
Reading of unedited texts including newspaper articles, literary selections, and academic essays. Oral discussion, listening comprehension, and composition. Prerequisite: minimum grade of 2.0 in either CHIN 213 or CHIN 303. Offered: A.

CHIN 412 Fourth-Year Chinese (5) VLPA Yue-Hashimoto
Reading of unedited texts including newspaper articles, literary selections, and academic essays. Oral discussion, listening comprehension, and composition. Prerequisite: minimum grade of 2.0 in CHIN 411. Offered: W.

CHIN 413 Fourth-Year Chinese (5) VLPA Yue-Hashimoto
Reading of unedited texts including newspaper articles, literary selections, and academic essays. Oral discussion, listening comprehension, and composition. Prerequisite: minimum grade of 2.0 in CHIN 412. Offered: Sp.

CHIN 421 Business Chinese I (5) VLPA Chang
Focus on international trade issues of Greater China in the contemporary world. Subjects include international business activities such as trade, banking, marketing, finance, and investment. Prerequisite: CHIN 313. Offered: A.

CHIN 422 Business Chinese II (5) VLPA Chang
Focus on international trade issues of Greater China in the contemporary world. Subjects include international business activities such as trade, banking, marketing, finance, and investment. Prerequisite: CHIN 421. Offered: W.

CHIN 423 Business Chinese III (5) VLPA Chang
Focus on international trade issues of Greater China in the contemporary world. Subjects include international business activities such as trade, banking, marketing, finance, and investment. Prerequisite: CHIN 422. Offered: Sp.

CHIN 442 The Chinese Language (5) VLPA
Covers the same topics as CHIN 342 (students attend CHIN 342 lectures), with additional readings and assignments. Provides necessary background for 500-level courses in Chinese linguistics and textual study. Intended for graduate students or advanced undergraduates. Prerequisite: either CHIN 103, CHIN 113, CHIN 134, CHIN 138, or CHIN 145. Offered: W.

CHIN 443 Structure of Chinese (5) VLPA Yue-Hashimoto
Outline of the major grammatical structures of Chinese. Focus on learning and teaching problems. Prerequisite: either CHIN 313 or CHIN 334. Offered: W.

CHIN 445 Foreign Study: Fourth-Year Chinese (1-15, max. 20) VLPA
Modern 400-level Chinese language studied abroad in approved programs. Evaluation by department/faculty required.

CHIN 451 First-Year Classical Chinese (5) VLPA Boltz
Exercises and selected readings in pre-Han texts. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. To be taken in sequence. Prerequisite: CHIN 213. Offered: A.

CHIN 452 First-Year Classical Chinese (5) VLPA Boltz
Exercises and selected readings in pre-Han texts. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. To be taken in sequence. Prerequisite: CHIN 451. Offered: W.

CHIN 453 First-Year Classical Chinese (5) VLPA Boltz
Exercises and selected readings in pre-Han texts. Focus on grammar, systematic sentence analysis, and distinctive functions of grammatical particles. To be taken in sequence. Prerequisite: CHIN 452. Offered: Sp.

CHIN 461 History of Chinese Literature (5) VLPA Knechtges
Chinese literature from earliest times to the end of the Six Dynasties. Offered: A.

CHIN 462 History of Chinese Literature (5) VLPA Knechtges
Chinese literature from the T'ang to the end of the Song. Prerequisite: CHIN 461. Offered: W.

CHIN 463 History of Chinese Literature (5) VLPA Knechtges
Chinese literature from the Yuan to recent times. Offered: Sp.

CHIN 470 Advanced Readings in Modern Chinese (5) VLPA
Reading and translation of scholarly articles and selections in the humanities and social sciences. Prerequisite: CHIN 413. Offered: A.

CHIN 482 Advanced Readings in Modern Chinese (5) VLPA
Modern texts in the original, mainly works published since the beginning of the twentieth century. Focus on literature, primarily short story and essay. Offered: W.

CHIN 495 Foreign Study: Advanced Chinese Literature or Linguistics (1-5, max. 15) VLPA
Advanced Chinese literature or linguistics studied abroad in approved programs. Evaluation by department/faculty required.

CHIN 496 Special Studies in Chinese (5, max. 15) VLPA
Topics vary.

CHIN 499 Undergraduate Research (3-5, max. 15)
For Chinese language and literature majors. Offered: AW/Sp.

CHIN 531 Studies in Chinese Phonology (3) Handel
Sources and methods in the study of Chinese phonology; modern standard Chinese. Prerequisite: ASIAN 401. Offered: A.

CHIN 532 Studies in Chinese Phonology (3) Handel
Sources and methods in the study of Chinese phonology; medieval period. Offered: W.

CHIN 533 Studies in Chinese Phonology (3) Handel

CHIN 540 Seminar on Chinese Linguistics (3, max. 9) Handel, Yue-Hashimoto
Advanced topics in Chinese linguistics. Subject emphasis varies from year to year. Offered: Sp.

CHIN 541 Seminar in Chinese Grammar (3, max. 9) Boltz, Yue-Hashimoto
Problems of theory and analysis of Chinese grammar, both synchronic and diachronic, modern and classical. Prerequisite: CHIN 443.

CHIN 542 Chinese Historical Phonology (3) Handel
Introduction to Chinese historical phonology; emphasis on the Middle Chinese period. Prerequisite: ASIAN 401 and permission of instructor.

CHIN 544 Chinese Dialectology (3, max. 9) Yue-Hashimoto
Methodology and theory of studying Chinese dialects. Among areas covered are fieldwork methods, dialect classification, and dialectal grammar. Prerequisite: CHIN 542, ASIAN 401, and permission of instructor.

CHIN 551 Second-Year Classical Chinese (5) Knechtges
Problems of grammar, rhetoric, and textual criticism. Early literary texts. Offered: A.

CHIN 552 Second-Year Classical Chinese (5) Knechtges
Problems of grammar, rhetoric, and textual criticism. Later literary texts. Offered: W.

CHIN 553 Second-Year Classical Chinese (5) Boltz
Continuation of 551, 552. Intermediate level readings in Han and pre-Han historical and philosophical texts. Prerequisite: CHIN 551 and CHIN 552. Offered: Sp.

CHIN 554 Readings in Chinese Prose (5) Knechtges
Selected readings in the fu of the Han, Wei, Chin, and North-South Dynasties period. Offered: alternate years.

CHIN 555 Readings in Chinese Prose (5) Knechtges
Selected readings in parallel prose (pian ti wen). Offered: alternate years.

CHIN 556 Readings in Chinese Prose (5) Knechtges
Selected readings in guwen prose of the T'ang and Sung periods. Offered: alternate years.

Continuation of 111, 112, 113. Review/expansion of fundamental grammatical patterns: morphological and syntactic structures, development of conversational skills, reading some literary and cultural materials, writing compositions. Prerequisite: INDON 211. Offered: W.

**INDON 213 Intermediate Indonesian (5) VLPA**

**INDON 311 Advanced Indonesian (5) VLPA**

Continuation of 211, 212, 213. Expanding vocabulary; preparing for research work using original sources; improving reading fluency in modern standard written Indonesian using novels, short stories, newspapers, and other authentic materials. Conversation practice centers on discussion of readings. Writing compositions. Prerequi-
JAPAN 234 Second-Year Intensive Japanese (15) VLPA
Equivalent of 211, 212, 213. Satisfies requirements for entry to 311, but recommended primarily for those going to Japan shortly upon completion. Prerequisite: either JAPAN 113, JAPAN 134, or score of 11-30 on JP200A placement test. Offered: S.

JAPAN 245 Foreign Study: Intermediate Japanese (1-15, max. 20) VLPA
For participants in study abroad programs in Japan who complete 200-level language courses in approved programs in Japan. Evaluation by department/faculty required.

JAPAN 311 Third-Year Japanese (5) VLPA
Intermediate-level skills in both spoken and written languages. Some introduction to unedited materials. Prerequisite: either JAPAN 213, JAPAN 234, or score of 21-45 on JP300A placement test. Offered: AS.

JAPAN 312 Third-Year Japanese (5) VLPA
Intermediate-level skills in both spoken and written languages. Some introduction to unedited materials. Prerequisite: either JAPAN 311 or score of 46-75 on JP300A placement test. Offered: WS.

JAPAN 313 Third-Year Japanese (5) VLPA
Intermediate-level skills in both spoken and written languages. Some introduction to unedited materials. Prerequisite: either JAPAN 312 or score of 76-90 on JP300A placement test. Offered: SpS.

JAPAN 321 Japanese Literature I (5) VLPA Atkins
Introduction to the literature and culture of Japan before 1600. Close readings of tales, poems, plays, or essays with an emphasis on understanding cultural and historical contexts. In English. Offered: A.

JAPAN 322 Japanese Literature II (5) VLPA
Introduction to the major works of 19th-early 20th century Japan in English translation, with readings of representative fiction, poetry, and criticism, plus films of selected works. In English. Offered: W.

JAPAN 323 Japanese Literature III (5) VLPA
Introduction to the major works of contemporary Japan in English translation, with readings that focus on the clash of cultures, generational struggles, and war, plus films that portray these themes and reflect modern Japanese life. In English. Offered: Sp.

JAPAN 342 The Japanese Language (5) VLPA K. Ohta
Survey of the nature and structure of the Japanese language, covering genetic and typological affiliations, writing systems, lexicon, and features of Japanese sentence structures.

JAPAN 343 Japanese Language in Society (5) I&S/VLPA A. Ohta
Survey of issues in Japanese language use. Areas covered include dialectical variation, language attitudes, gender differences, and pragmatics.

JAPAN 345 Foreign Study: Advanced Japanese (1-15, max. 20) VLPA
For participants in study abroad programs in Japan who complete 300-level language courses in approved programs in Japan. Evaluation by department/faculty required.

JAPAN 360 Topics in Japanese Culture (5) VLPA
Focuses on literature from a limited time period or particular aspects of pre-modern or modern Japanese culture.

JAPAN 395 Foreign Study: Japanese Linguistics or Literature (1-20, max. 20) VLPA
For participants in study abroad programs in Japan who complete coursework in Japanese literature or linguistics.
JAPAN 421 Fourth-Year Japanese I (5) I&S/VLPA
Reading, class discussion, oral presentations, and composition on topics related to the Japanese language and present-day Japan. Conducted in Japanese. Prerequisite: 2.5 in JAPAN 313, may not be repeated.

JAPAN 422 Fourth-Year Japanese II (5) I&S/VLPA
Reading, class discussion, oral presentations, and composition on topics related to the Japanese language and present-day Japan. Conducted in Japanese. Prerequisite: JAPAN 421.

JAPAN 423 Fourth-Year Japanese II (5) I&S/VLPA
Reading, class discussion, oral presentations, and composition on topics related to the Japanese language and present-day Japan. Conducted in Japanese. Prerequisite: JAPAN 422.

JAPAN 431 Readings in Modern Japanese Literature (5) VLPA
Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax. Prerequisite: 2.5 in JAPAN 313; may not be repeated.

JAPAN 432 Readings in Modern Japanese Literature (5) VLPA
Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax.

JAPAN 433 Readings in Modern Japanese Literature (5) VLPA
Reading and discussion of selected modern literary texts in the original language, concentrating on the short story. Close attention to grammar and syntax.

JAPAN 440 Introduction to Japanese Linguistics (5) VLPA A. Ohta, K. Ohta
Overview of major topics in the linguistic description of Japanese: phonology, morphology, syntax, history, dialects, sociolinguistics, and the writing system. Elementary training in phonological, morphological, and syntactic analysis of Japanese. Prerequisite: JAPAN 313; recommended: introductory linguistics course.

JAPAN 443 Topics in Japanese Sociolinguistics (5) I&S/VLPA A. Ohta
Methodology and theory of sociolinguistic analysis. Reading of research literature and training in analysis of Japanese language data. Prerequisite: JAPAN 313 which may be taken concurrently; recommended: JAPAN 343.

JAPAN 445 Foreign Study: Fourth-Year Japanese (1-15, max. 20) VLPA
For participants in study abroad programs in Japan who complete 400-level language courses in approved programs in Japan. Evaluation by department/faculty required.

JAPAN 451 Readings in Japanese for China and Korea Specialists (5) VLPA

JAPAN 460 Readings in Japanese Culture (5) VLPA
Reading and discussion of texts in Japanese on various aspects of Japanese culture, such as film, anime, art, and other socio-cultural phenomena. Close attention to grammar and syntax. Prerequisite: 2.5 in JAPAN 313.

JAPAN 471 Introduction to Classical Japanese (5) VLPA A. Atkins
Introduction to classical Japanese writing system, grammar, and vocabulary. Prerequisite: 2.5 in JAPAN 313; may not be repeated. Offered: A.

JAPAN 472 Readings in Classical Japanese Literature I (5) VLPA A. Atkins
Continued study of the classical language with a transition to reading literary works and understanding their cultural contexts. Prerequisite: JAPAN 471. Offered: W.

JAPAN 473 Readings in Classical Japanese Literature (5) VLPA
Readings in prose, poetry, and drama, antiquity to nineteenth century. Prerequisite: JAPAN 472. Offered: Sp.

JAPAN 499 Undergraduate Research (3-5, max. 15)
For Japanese language and literature majors. Offered: AWSpS.

JAPAN 505 Kambun (5) A. Atkins
Introduction to Kambun, a method of reading texts written in Chinese as Classical Japanese. Prerequisite: JAPAN 472; or JAPAN 471 and graduate standing.

JAPAN 531 Advanced Readings in Modern Japanese Literature (5, max. 15)
Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

JAPAN 532 Advanced Readings in Modern Japanese Literature (5, max. 15)
Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

JAPAN 533 Advanced Readings in Modern Japanese Literature (5, max. 15)
Rapid reading of modern literary and critical texts. Prerequisite: JAPAN 433 or equivalent.

JAPAN 540 Seminar on Japanese Linguistics (3, max. 15) A. Ohta
Problems in the history and structure of the Japanese language. Topics vary each quarter, according to the needs and interests of the students. Prerequisite: JAPAN 440 or permission of instructor.

JAPAN 571 Advanced Readings in Classical Japanese Literature (5)
Continued readings in classical literary texts. Prerequisite: JAPAN 473 or permission of instructor.

JAPAN 572 Advanced Readings in Classical Japanese Literature (5)
Continued readings in classical literary texts. Prerequisite: JAPAN 473 or permission of instructor.

JAPAN 573 Advanced Readings in Classical Japanese Literature (5)
Continued readings in classical literary texts. Prerequisite: JAPAN 473 or permission of instructor.

JAPAN 580 Development of Modern Japanese Fiction (5, max. 15)
Reading and translation of major works of modern fiction in the original, with emphasis on the chronological development of modern prose style. Offered: A.

JAPAN 590 Seminar in Japanese Literature (5, max. 15)
Close examination of selected periods, writers, or genres, including problems of literary criticism in Japanese literature. Prerequisite: permission of instructor. Offered: Sp.
Korean

**Course Descriptions**

**KOREAN 145 Foreign Study: Elementary Korean (1-15, max. 20)**
For participants in study abroad programs who complete elementary language courses in approved programs in Korea. Evaluation by department/faculty required.

**KOREAN 245 Foreign Study: Intermediate Korean (1-15, max. 20)** VLPA
For participants in study abroad programs who complete intermediate language courses in approved programs in Korea. Evaluation by department/faculty required.

**KOREAN 301 First-Year Korean for Novice Learners (5)**
Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with no formal or informal background in the language. Offered: A.

**KOREAN 302 First-Year Korean for Novice Learners (5)**
Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with no formal or informal background in the language. Prerequisite: KOREAN 301. Offered: W.

**KOREAN 303 First-Year Korean for Novice Learners (5)**
Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with no formal or informal background in the language. Prerequisite: KOREAN 302. Offered: Sp.

**KOREAN 304 Spoken Korean (10)** VLPA
The Korean language as spoken in ordinary conversational situations. Phonetic accuracy and appropriateness of idiom. May be taken any summer after completion of first-year Korean. Prerequisite: KOREAN 303. Offered: irregularly.

**KOREAN 305 First-Year Korean for Heritage Learners (5)**
Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with formal or informal background in the language or to students with Korean heritage. Prerequisite: score of 30-60 on KR100A placement test. Offered: A.

**KOREAN 306 First-Year Korean for Heritage Learners (5)**
Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with formal or informal background in the language or to students with Korean heritage. Prerequisite: KOREAN 305. Offered: W.

**KOREAN 307 First-Year Korean for Heritage Learners (5)**
Elementary speaking, listening, reading, and writing skills in modern Korean. Open only to students with formal or informal background in the language or to students with Korean heritage. Prerequisite: KOREAN 306. Offered: Sp.

**KOREAN 311 Second-Year Korean for Novice Learners (5)** VLPA
Development of further skills in the spoken and written languages. Open only to students with no formal or informal background in the language prior to first-year Korean at UW. Prerequisite: KOREAN 303 or placement test. Offered: A.

**KOREAN 312 Second-Year Korean for Novice Learners (5)** VLPA
Development of further skills in the spoken and written languages. Open only to students with no formal or informal background in the language prior to first-year Korean at UW. Prerequisite: KOREAN 311 or placement test. Offered: W.

**KOREAN 313 Second-Year Korean for Novice Learners (5)** VLPA
Development of further skills in the spoken and written languages. Open only to students with no formal or informal background in the language prior to first-year Korean at UW. Prerequisite: KOREAN 312 or placement test. Offered: Sp.

**KOREAN 315 Second-Year Korean for Heritage Learners (5)** VLPA
Development of further skills in the spoken and written languages. Open only to students with formal or informal background in the language prior to first-year Korean at the UW. Prerequisite: either score of 0-41 on KR200A placement test or KOREAN 307. Offered: A.

**KOREAN 316 Second-Year Korean for Heritage Learners (5)** VLPA
Development of further skills in the spoken and written languages. Open only to students with formal or informal background in the language prior to first-year Korean at the UW. Prerequisite: KOREAN 315. Offered: W.

**KOREAN 317 Second-Year Korean for Heritage Learners (5)** VLPA
Development of further skills in the spoken and written languages. Open only to students with formal or informal background in the language prior to first-year Korean at the UW. Prerequisite: KOREAN 316. Offered: Sp.

**KOREAN 345 Foreign Study: Advanced Korean (1-15, max. 20)** VLPA
For participants in study abroad programs who complete advanced language courses in approved programs in Korea. Evaluation by department/faculty required.

**KOREAN 411 Readings in Contemporary Korean (5)** VLPA
Completes the introduction to Korean writing in mixed script of 311, 312, 313. Prerequisite: either minimum score of 42 on KR200A placement test or KOREAN 313. Offered: A.

**KOREAN 412 Readings in Contemporary Korean (5)** VLPA
Provide experience in reading a variety of contemporary styles. Materials from published works include informal essays, short stories, one-act plays, academic essays, and newspaper editorials. Offered: W.

**KOREAN 413 Readings in Contemporary Korean (5)** VLPA
Provide experience in reading a variety of contemporary styles. Materials from published works include informal essays, short stories, one-act plays, academic essays, and newspaper editorials. Offered: Sp.

**KOREAN 415 Social Science Literature in Korean (3)** VLPA
Readings in selections from contemporary Korean publications in social science topics. Prerequisite: KOREAN 413. Offered: A.

**KOREAN 416 Readings in Korean Literature (3)** VLPA
Reading of various literary texts which may include pre-modern Korean narrative and poetry as well as modern literature and drama. Prerequisite: KOREAN 413. Offered: W.

**KOREAN 417 Readings in Korean Journals (3)** VLPA
Selections from Korean newspapers, news magazines, and other journals. Prerequisite: KOREAN 413. Offered: Sp.

**KOREAN 445 Foreign Study: Korean Literature (1-15, max. 20)** VLPA
For participants in study abroad programs who complete course work Korean literature.

**KOREAN 499 Undergraduate Independent Study (3-5, max. 117)**
KOREAN 501 Seminar in Korean Linguistics (3-5)
Topics in Korean linguistics. Prerequisite: background in linguistics and permission of instructor.

KOREAN 502 Seminar in Korean Linguistics (3-5)
Topics in Korean linguistics. Prerequisite: background in linguistics and permission of instructor.

KOREAN 503 Seminar in Korean Linguistics (3-5)
Topics in Korean linguistics. Prerequisite: background in linguistics and permission of instructor.

KOREAN 531 Advanced Readings in Modern Korean Literature (5)
Literature and literary criticism in Korean. Prerequisite: fourth-year Korean or equivalent. Offered: alternate years.

KOREAN 532 Advanced Readings in Traditional Vernacular Korean Literature (5)
Readings in traditional Korean vernacular literature, including poetry, sung narrative, and fiction. Prerequisite: fourth-year Korean or equivalent. Offered: alternate years.

Sanskrit

Course Descriptions

SNKRT 301 Introduction to Sanskrit (5) Cox, Salomon
Basic grammar and vocabulary of the classical language. Reading of elementary texts from the epic or Puranic literature. Offered: A.

SNKRT 302 Introduction to Sanskrit (5) Cox, Salomon
Basic grammar and vocabulary of the classical language. Reading of elementary texts from the epic or Puranic literature. Prerequisite: SNKRT 301. Offered: W.

SNKRT 303 Introduction to Sanskrit (5) Cox, Salomon
Basic grammar and vocabulary of the classical language. Reading of elementary texts from the epic or Puranic literature. Prerequisite: SNKRT 302. Offered: Sp.

SNKRT 401 Intermediate Sanskrit (5) VLPA Cox, Salomon
Further study of classical grammar; introduction to classical literature and Vedic language and texts. Prerequisite: SNKRT 303. Offered: A.

SNKRT 402 Intermediate Sanskrit (5) VLPA Cox, Salomon
Further study of classical grammar; introduction to classical literature and Vedic language and texts. Offered: W.

SNKRT 403 Intermediate Sanskrit (5) VLPA Cox, Salomon
Further study of classical grammar; introduction to classical literature and Vedic language and texts. Offered: Sp.

SNKRT 411 Advanced Sanskrit (3, max. 9) VLPA Cox, Salomon
Reading and analysis of classical texts, chosen according to students’ interests. Prerequisite: SNKRT 403. Offered: A.

SNKRT 412 Advanced Sanskrit (3, max. 9) VLPA Cox, Salomon
Reading and analysis of classical texts, chosen according to students’ interests. Offered: W.

SNKRT 413 Advanced Sanskrit (3, max. 9) VLPA Cox, Salomon
Reading and analysis of classical texts, chosen according to students’ interests. Offered: Sp.

SNKRT 491 Vedic Studies (3) VLPA Salomon
Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture. Prerequisite: SNKRT 303.

SNKRT 492 Vedic Studies (3) VLPA Salomon
Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture.

SNKRT 493 Vedic Studies (3) VLPA Salomon
Readings of selected Vedic texts, with linguistic, religious, and historical analyses. Includes background material on Vedic religion, literature, and culture.

SNKRT 494 Readings in Religious Classics of India (5) VLPA
Reading and analysis of the older religious brahmanical texts. Prerequisite: SNKRT 402.

SNKRT 495 Studies in Indian Thought (3, max. 9) VLPA Cox
Religious and philosophical traditions in South Asia. The original documents studied vary from year to year. Prerequisite: SNKRT 402.

SNKRT 499 Undergraduate Research (3-5, max. 15)

SNKRT 550 Seminar on Sanskrit Literature (3, max. 9)
Salomon
Detailed study of selected authors, periods, or traditions, within the context of Indian literary history. Prerequisite: SNKRT 403 or permission of instructor.

SNKRT 555 Seminar on Sanskrit Grammar (3, max. 6)
Salomon
Reading and critical study of traditional literature on grammar and language, including texts of Paninian and other schools. Offered: A.

SNKRT 560 Readings in Philosophical Sanskrit (3, max. 9)
Cox, Potter, Salomon
Intensive reading and analysis of Hindu or Buddhist philosophical texts. Prerequisite: SNKRT 494 or permission of instructor. Offered: AWSp.

SNKRT 570 Seminar in Indian Epigraphy and Paleography (3, max. 6) Salomon
Introduction to the study of inscriptions and other original documents in Sanskrit and Prakrit languages and in Kharosthi, Brahmi, and derived scripts. History of writing in India and development of Indic scripts. Methods of critical evaluation of inscriptions as sources of political and cultural history. Prerequisite: SNKRT 403.

Interpretation of original sources. Texts vary from year to year. Prerequisite: ability to study sources in the original languages, an introduction to Buddhist thought, and permission of instructor.

SNKRT 582 Readings in Buddhist Texts (3, max. 9) Cox
Interpretation of original sources. Texts vary from year to year. Prerequisite: ability to study sources in the original languages, an introduction to Buddhist thought, and permission of instructor.

Thai

Course Descriptions

THAI 145 Foreign Study: Elementary Thai (1-15, max. 20)
For participants in study abroad programs who complete elementary language courses in approved programs in Thailand. Evaluation by department faculty required.
THAI 245 Foreign Study: Intermediate Thai (1-15, max. 20) VLPA
For participants in study abroad programs who complete intermediate language courses in approved programs in Thailand. Evaluation by department faculty required.

THAI 301 Beginning Thai (5) Kesavatana-Dohrs
Introduction to modern spoken and written Thai. Emphasis on spoken language competence with additional skills in elementary reading and writing. Designed for students with no prior knowledge of Thai. Offered: A.

THAI 302 Beginning Thai (5) Kesavatana-Dohrs
Introduction to modern spoken and written Thai. Emphasis on spoken language competence with additional skills in elementary reading and writing. Designed for students with no prior knowledge of Thai. Prerequisite: THAI 301. Offered: W.

THAI 303 Beginning Thai (5) Kesavatana-Dohrs
Introduction to modern spoken and written Thai. Emphasis on spoken language competence with additional skills in elementary reading and writing. Designed for students with no prior knowledge of Thai. Prerequisite: THAI 302. Offered: Sp.

THAI 345 Foreign Study: Advanced Thai (1-15, max. 20) VLPA
For participants in study abroad programs who complete 300-level language courses in approved programs in Thailand. Evaluation by department faculty required.

THAI 401 Intermediate Thai (5) VLPA Kesavatana-Dohrs
Continuation of 303. Expands students’ abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 303. Offered: A.

THAI 402 Intermediate Thai (5) VLPA Kesavatana-Dohrs
Expands students’ abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 401. Offered: W.

THAI 403 Intermediate Thai (5) VLPA Kesavatana-Dohrs
Expands students’ abilities in the four language skills of listening, speaking, reading, and writing. Prerequisite: THAI 402. Offered: Sp.

THAI 410 Accelerated Reading and Writing (5) VLPA Kesavatana-Dohrs
Accelerated Thai for fluent speakers who do not read or write Thai. Emphasis on reading and writing through Intermediate Thai. Credit/no credit only.

THAI 411 Readings in Thai (3-5, max. 15) VLPA Kesavatana-Dohrs
Advanced reading and translation of selections from various Thai authors, with occasional practice in conversation and composition. Prerequisite: THAI 403. Offered: A.

THAI 412 Readings in Thai (3-5, max. 15) VLPA Kesavatana-Dohrs
Advanced reading and translation of selections from various Thai authors, with occasional practice in conversation and composition. Prerequisite: THAI 411. Offered: W.

THAI 413 Readings in Thai (3-5, max. 15) VLPA Kesavatana-Dohrs
Advanced reading and translation of selections from various Thai authors, with occasional practice in conversation and composition. Prerequisite: THAI 412. Offered: W.

THAI 499 Undergraduate Research (3-5, max. 25)
For Thai language and literature majors. Offered: AWSp.

Vietnamese

Course Descriptions

VIET 111 First-Year Vietnamese (5) Nguyen
Introduction to modern Vietnamese conversation. Emphasis on correct pronunciation, spelling, and sentence structure. Designed for students with no previous exposure to Vietnamese. Offered: A.

VIET 112 First-Year Vietnamese (5) Nguyen
Introduction to modern Vietnamese conversation. Emphasis on correct pronunciation, spelling, and sentence structure. Designed for students with no previous exposure to Vietnamese. Prerequisite: VIET 111. Offered: W.

VIET 113 First-Year Vietnamese (5) Nguyen
Introduction to modern Vietnamese conversation. Emphasis on correct pronunciation, spelling, and sentence structure. Designed for students with no previous exposure to Vietnamese. Prerequisite: VIET 112. Offered: Sp.

VIET 145 Foreign Study: Elementary Vietnamese (1-15, max. 20)
For participants in study abroad programs who complete elementary language courses in approved programs in Vietnam. Evaluation by department faculty required.

VIET 211 Second-Year Vietnamese (5) VLPA Nguyen
Continuation of 113. Development of conversation skills, reading for comprehension, and writing short compositions. Prerequisite: VIET 113. Offered: A.

VIET 212 Second-Year Vietnamese (5) VLPA Nguyen
Development of conversation skills, reading for comprehension, and writing short compositions. Prerequisite: VIET 211. Offered: W.

VIET 213 Second-Year Vietnamese (5) VLPA Nguyen
Development of conversation skills, reading for comprehension, and writing short compositions. Prerequisite: VIET 212. Offered: Sp.

VIET 214 Accelerated Vietnamese Reading and Writing (5) VLPA Nguyen
Accelerated course for fluent speakers who do not read or write Vietnamese. Emphasis on reading and writing through second-year level. Cannot be taken for credit in combination with any formal Vietnamese course. Credit/no credit only. Offered: AWSp.

VIET 245 Foreign Study: Intermediate Vietnamese (1-15, max. 20) VLPA
For participants in study abroad programs who complete intermediate language courses in approved programs in Vietnam. Evaluation by department faculty required.

VIET 345 Foreign Study: Advanced Vietnamese (1-15, max. 20) VLPA
For participants in study abroad programs who complete 300-level language courses in approved programs in Vietnam. Evaluation by department faculty required.

VIET 496 Special Studies in Vietnamese (3-5, max. 15) VLPA Nguyen

Astrobiology

The Graduate Certificate Program in Astrobiology at the University of Washington features:

• specially designed courses, seminars and workshops
• rotations through research laboratories

119
The Astrobiology Program is not a degree-granting unit or academic department. Our program is offered in cooperation with the Ph.D. programs of our participating departments, and the Certificate is earned through required coursework and activities in addition to the participating student’s Ph.D. program requirements. Admission to a participating Ph.D. program and to the Astrobiology Program is necessary to pursue the Certificate.

Prospective students must apply to the UW Graduate School, to the Ph.D. program of one of our participating departments and, concurrently, to our Graduate Certificate Program in Astrobiology.

International students are invited to apply to our program through our participating departments. However, the UW Graduate School’s special requirements for prospective international applicants must first be met.

Diversity in race and culture is valued in the UW Astrobiology community, and women and underrepresented minorities are encouraged to apply.

**Graduate Certificate in Astrobiology: Participating Departments**

The University of Washington academic departments participating in the Graduate Certificate Program in Astrobiology provide expertise in all the primary disciplines collaborating in the study of Astrobiology:

- **Aeronautics and Astronautics**
- **Astronomy**
- **Atmospheric Sciences**
- **Biochemistry**
- **Biology**
- **Genome Sciences**
- **Earth and Space Sciences**
- **History (of Science)**
- **Microbiology**
- **Oceanography**

Students wishing to participate in the Astrobiology Graduate Certificate Program must be accepted for admission in the usual way by the Ph.D. program of one of these departments.

Please contact the participating departments of your choice for Ph.D. program application requirements and deadlines.

**Course Descriptions**

**ASTBIO 115 Astrobiology: Life in the Universe (5) NW, QSR**
Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTR/BIOL/ESS/OCEAN 115.

**ASTBIO 501 Astrobiology Disciplines (4)**
Review of research and subject matter relevant to astrobiology from within the disciplines of biology, astronomy, oceanography, atmospheric science, chemistry, planetary science, and geology.

**ASTBIO 502 Astrobiology Topics (4)**
Investigation in detail of research topics of current interest.

**Astronomy**
C319 Physics-Astronomy Building

Modern research in astronomy and astrophysics encompasses a large number of disciplines and specialties. Research areas include planetary astronomy, stellar structure and evolution, interstellar matter, x-ray sources, galactic structure, extragalactic astronomy, galactic dynamics, quasars and galactic nuclei, and theoretical and observational cosmology.

**Undergraduate Program**

Adviser
C311 Physics-Astronomy, Box 351580
206-543-1988
office@astro.washington.edu

The Department of Astronomy offers the following undergraduate programs:

- The Bachelor of Science degree with a major in astronomy

**Bachelor of Science**

Suggested First-Year Courses MATH 124, MATH 125, MATH 126; MATH 308, MATH 324; PHYS 121, PHYS 122, PHYS 123. At community colleges it is better to take courses in physics, chemistry, mathematics, and computer science than the usual introductory astronomy courses.

**Department Admission Requirements**

Students in good academic standing may declare this major at any time.

**Major Requirements**

89 credits as follows:

- ASTR 321, ASTR 322, ASTR 323
- 9 credits of astronomy 400-level courses (with at least 3 credits in 480 or 499)
- PHYS 121, PHYS 122, PHYS 123; PHYS 224, PHYS 225, PHYS 227, PHYS 228; PHYS 321, PHYS 322, PHYS 334
- MATH 124, MATH 125, MATH 126; MATH 308, MATH 324
- 12 additional credits in courses at the 300 level or above in physics (chosen from PHYS 315, PHYS 323, PHYS 324, PHYS 328, PHYS 331, PHYS 335, PHYS 421, PHYS 422, PHYS 423, PHYS 424, PHYS 425, PHYS 426, PHYS 431, PHYS 432, PHYS 433, PHYS 434) or engineering as approved by adviser. Data analysis (ASTR 480 and senior-year research (ASTR 499) are highly recommended, especially for students planning graduate work.

No grade lower than 2.0 is acceptable in courses fulfilling the above requirements.

Undergraduates interested in advanced work in astronomy are advised to take a double major in astronomy and physics. Undergraduates interested in immediate employment at an observatory or other scientific institution should include computing and electronics courses as part of their program.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** With this degree, students obtain a knowledge of the components of the universe, an understanding of the physics of its structure, and the technical skills to obtain and analyze data from telescopes. Graduates go on to graduate school or work at observatories or in industrial applications (lasers, x-ray, optical imaging) or in teaching applications.

- **Instructional and Research Facilities:** The department operates a 30-inch telescope with modern instrumentation at the Manastash Ridge Observatory near Ellensburg primarily for students. The department is also part of a consortium of universities that operate a 3.5-meter optical/infrared telescope located on Sacramento Peak, New Mexico, and is a partner in the innovative Sloan
Digital Sky Survey. Students also have access to a variety of national facilities, such as the Kitt Peak and Cerro Tololo observatories and the Very Large Array. A variety of research is conducted with satellite instruments such as the Hubble Space Telescope. Data analysis and theoretical research are conducted on the department’s cluster of computers, and on a variety of UW and national supercomputer facilities. Undergraduate majors often assist faculty members in acquisition, reduction, and interpretation of data.

- **Honors Options Available**: With College Honors. With Distinction. See adviser for details.
- **Research, Internships, and Service Learning**: Space Grant
- **Department Scholarships**: Baer Prize. See adviser for details.
- **Student Organizations/Associations**: The Society of Physics Students. Undergraduate Astronomy Institute. See adviser for details.

**Of Special Note**: The first required astronomy course, ASTR 321, must be preceded by at least one year of college physics and mathematics. Any lower-division astronomy courses count as electives and not as part of the major. To finish in four years, the student must have completed PHYS 123 before autumn quarter of the junior year.

**Graduate Program**

Graduate Program Coordinator
C304 Physics-Astronomy, Box 351580
206-685-2392
office@astro.washington.edu

**Master of Science, Doctor of Philosophy**

A series of graduate courses in solar system, stellar, galactic, and extragalactic astrophysics is offered. The heart of the graduate program is the collaboration of students and faculty members in research at the frontiers of astronomy. Students work collaboratively with members of the faculty to develop the techniques and insight necessary for successful research, and, subsequently, to define a thesis topic. The student’s thesis research may be purely theoretical or use observational material (obtained through the facilities of either the University of Washington or one of the national observatories) or a combination. Active research programs are being carried out in the areas of stellar interiors, stellar atmospheres, planetary atmospheres and surfaces, x-ray sources, interplanetary dust, interacting binary stars, extragalactic astronomy, gravitation, interstellar matter, dark matter, cosmology, relativistic astrophysics, and computational astrophysics.

**Admission Qualifications**

Most, though not all, entering students have a bachelor’s degree in physics. Entering students are not required to have a background in astronomy, although some knowledge of general astronomy is expected of those to whom a teaching assistantship is to be offered. Undergraduates interested in a graduate program in astronomy are urged to concentrate on preparation in physics and mathematics before entering.

**Assistantships**

Normally all students making satisfactory academic progress receive financial support. More than three-quarters of the department’s graduate students hold fellowships or research assistantships. A number of teaching assistantships are available, primarily in the elementary astronomy courses.

**Course Descriptions**

**ASTR 101 Astronomy (5) NW, QSR**

Introduction to the universe, with emphasis on conceptual, as contrasted with mathematical, comprehension. Modern theories, observations; ideas concerning nature, evolution of galaxies; quasars, stars, black holes, planets, solar system. Not open for credit to students who have taken 102 or 201; not open to upper-division students majoring in physical sciences or engineering.

**ASTR 102 Introduction to Astronomy (5) NW, QSR**

Emphasis on mathematical and physical comprehension of nature, the sun, stars, galaxies, and cosmology. Designed for students who have had algebra and trigonometry and high school or introductory level college physics. Cannot be taken for credit in combination with ASTR 101 or ASTR 301.

**ASTR 115 Astrobiology: Life in the Universe (5) NW**

Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTBIO/ESS/OCEAN 115/BIOL 114.

**ASTR 150 The Planets (5) NW, QSR**

For liberal arts and beginning science students. Survey of the planets of the solar system, with emphases on recent space exploration of the planets and on the comparative evolution of the Earth and the other planets.

**ASTR 190 Modern Topics in Astronomy for Non-Science Majors (3/5, max. 10) NW**

Topics of current interest, such as origin of chemical elements, novae and supernovae, white dwarfs, neutron stars, black holes, active galaxies, quasars, or interstellar medium and astrochemistry. Choice of topics depends on instructor and class interest. Prerequisite: either one 100- or one 200-level ASTR course.

**ASTR 201 The Universe and the Origin of Life (5) NW, QSR**

Sequel to 101 or 102, emphasizing modern views of the atomic and molecular evolution of the universe from the initial “big bang” through the formation of the solar system and the emergence of biological forms on the earth. The latter part of the course considers questions about the existence of, and communication with, extraterrestrial intelligent life, and finally the ultimate fate of the cosmos.

**ASTR 210 Distance and Time: Size and Age in the Universe**
(5) NW, QSR
Space and time as basic concepts in physical science. How we define and measure them, how the concepts have developed over the centuries, and how modern measurements allow us to determine the size and age of the universe.

ASTR 211 The Universe and Change (5) NW, QSR
Gravity as central to the form and evolution of the universe. Conceptual formulation of gravity from the Renaissance to Einstein. Its consequences from the falling of an apple to the slowing of the expansion of the universe.

ASTR 212 Life in the Universe (5) NW, QSR
Nature and origin of cosmic large numbers. Steps to the formation of life, formation of planets (stars, galaxies, a long-lived universe), the anthropic principle. Searches for other planetary systems and extraterrestrial life.

ASTR 270 Public Outreach in Astronomy (3) NW/VLPA
Emphasis is on giving effective scientific presentations, developing and giving educational programs to school-age groups, and communicating your knowledge of astronomy to others. Give talks at the Jacobsen Observatory on campus and presentations in the Astronomy Department’s planetarium. Learn to operate a telescope and the planetarium equipment. Prerequisite: one astronomy course at either the 100-, 200-, or 300-level. Offered: A.

ASTR 301 Astronomy for Scientists and Engineers (3) NW
Introduction to astronomy for students in the physical sciences or engineering. Topics similar to 101, but the approach uses more mathematics and physics. Prerequisite: PHYS 123.

ASTR 313 Science in Civilization: Physics and Astrophysics Since 1850 (5) I&S/NW
Organization and pursuit of the physical and astrophysical sciences, focusing on the major unifying principles of physics and astronomy and the social and cultural settings in which they were created. Offered: jointly with HIST 313.

ASTR 321 The Solar System (3) NW
Solar system; planetary atmospheres, surfaces and interiors, the moon, comets. The solar wind and interplanetary medium. Formation of the solar system. Prerequisite: PHYS 224 which may be taken concurrently.

ASTR 322 The Contents of Our Galaxy (3) NW
Introduction to astronomy. Basic properties of stars, stellar systems, interstellar dust and gas, and the structure of our galaxy. Prerequisite: PHYS 224 which may be taken concurrently; PHYS 225 which may be taken concurrently.

ASTR 323 Extragalactic Astronomy and Cosmology (3) NW
Galaxies, optical and radio morphology and properties. Clusters of galaxies, radio sources, and quasars. Observational cosmology. Prerequisite: ASTR 322 which may be taken concurrently.

ASTR 421 Stellar Observations and Theory (3) NW
Observations and theory of the atmospheres, chemical composition, internal structure, energy sources, and evolutionary history of stars. Prerequisite: ASTR 322

ASTR 422 Interstellar Material (3) NW
Description and physics of the matter between the stars. Physical conditions, distribution, evolution, and motions of interstellar atoms, molecules, and dust grains. Exchange of energy and matter between stars and interstellar material.

ASTR 423 High-Energy Astrophysics (3) NW
High-energy phenomena in the universe. Includes supernova, pulsars, neutron stars, x-ray and gamma-ray sources, black holes, cosmic rays, quasi stellar objects, active galactic nuclei, diffuse background radiations. Radiative emission, absorption processes, and models derived from observational data. Prerequisite: PHYS 224; PHYS 225.

ASTR 480 Introduction to Astronomical Data Analysis (5) NW
Hands-on experience with electronic imaging devices (CCDs) and software for image reduction and analysis. Introduction to operating systems, reduction software, and statistical analysis with applications to CCD photometry. Prerequisite: ASTR 323, which may be taken concurrently.

ASTR 481 Introduction to Astronomical Observation (5) NW
Theory and practice of obtaining optical data at a telescope. Preparation, obtaining data with a CCD on a telescope, and subsequent data analysis for completion of a research project. Prerequisite: ASTR 480.

ASTR 497 Topics in Current Astronomy (1-3, max. 9) NW
Recent developments in one field of astronomy or astrophysics. Prerequisite: either ASTR 101 or ASTR 150, either of which may be taken concurrently.

ASTR 499 Undergraduate Research (*, max. 15)
Special astronomical problems and observational projects, by arrangement with instructor.

ASTR 500 Seminar in Elementary Astronomy Instruction (3)
Seminar in the preparation of lecture and workshop materials with emphasis on demonstration, visual aids, and the evaluation of students’ progress. Credit/no credit only.

ASTR 507 Physical Foundations of Astrophysics I (3)
Thermodynamics from an astronomer’s point of view: black body radiation, basic radiative transfer, equation of state, degenerate gases, crystallization at high density.

ASTR 508 Physical Foundations of Astrophysics II (3)
Introduction to astronomical hydrodynamics and magnetohydrodynamics, basic theorems and application to stellar and interstellar magnetic fields. Introduction to plasma physics, waves in a plasma.

ASTR 509 Physical Foundations of Astrophysics III (3)

ASTR 510 Nuclear Astrophysics (3)
Big bang nucleosynthesis; nuclear reactions in stars; solar neutrinos and neutrino oscillations; core-collapse supernovae; nucleosynthesis in stars, novae, and supernovae; neutron stars; composition and sources of cosmic rays; gamma ray bursts; atmospheric neutrinos. Offered: jointly with PHYS 554; A.

ASTR 511 Galactic Structure (3)
Kinematics, dynamics, and contents of the galaxy. Spiral structure. Structure and evolution of galaxies.

ASTR 512 Extragalactic Astronomy (3)
Types of galaxies. Integrated properties, content, and dynamics. Extragalactic distance scale, groups and clusters. Radio sources. Observational cosmology.

ASTR 513 Cosmology and Particle Astrophysics (3)
Big bang cosmology; relativistic world models and classical tests; background radiation; cosmological implications of nucleosynthesis; baryogenesis; inflation; galaxy and large-scale structure formation; quasars; intergalactic medium; dark matter. Offered: jointly with PHYS 555.
ASTR 519 Radiative Processes in Astrophysics (3)
Theory and applications of astrophysical radiation processes: transfer theory; thermal radiation; theory of radiation fields and radiation from moving charges; bremsstrahlung; synchrotron; Compton scattering; plasma effects.

ASTR 521 Stellar Atmospheres (3)
Theory of continuous radiation and spectral line formation. Applications to the sun and stars. Prerequisite: PHYS 421 or equivalent.

ASTR 522 Stellar Atmospheres (3)
Theory of continuous radiation and spectral line formation. Applications to the sun and stars. Prerequisite: PHYS 421 or equivalent.

ASTR 523 Solar Physics (3)
Sun as a star, solar photosphere and outer convection zone, granulation and related phenomena, solar chromosphere, and corona, solar activity (especially sunspots and solar flares), sun’s radio emission, solar-terrestrial relations.

ASTR 531 Stellar Interiors (4)
Physical laws governing the temperature, pressure, and mass distribution in stars. Equation of state, opacity, nuclear energy generation, computational methods. Models of main sequence stars and star formation. Prerequisite: PHYS 421 or equivalent.

ASTR 532 Stellar Evolution (3)
Theoretical and observational approaches to stellar evolution. Structure of red giants, supernovae, and white dwarfs. Observations of star clusters and the chemical composition of stars as they relate to the theory of stellar structure. Prerequisite: ASTR 531.

ASTR 541 Interstellar Matter (3)
Physical conditions and motions of neutral and ionized gas in interstellar space. Interstellar dust, magnetic fields, formation of grains, clouds, and stars. Prerequisite: modern physics or permission of instructor.

ASTR 555 Planetary Atmospheres (3)
Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all; roles of radiation, chemistry, and dynamical processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ATM S 555/ESS 581.

ASTR 556 Planetary Surfaces (3)
Comparison of surface processes and conditions on Mercury, Venus, Earth, moon, Mars, asteroids, and satellites of the great planets. Emphasis on understanding how and why planetary surfaces differ from one another and the implied course of solar-system evolution. Analysis of data from Earth-based telescopes and manned and unmanned space missions.

ASTR 557 Origin of the Solar System (3)
Nebular and nonnebular theories of the solar system origin; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ESS 583.

ASTR 561 High Energy Astrophysics (3)
Observed properties of supernovae, x-ray stars, radio sources, quasars. Theories explaining such objects. Origin of cosmic rays.

ASTR 575 Seminar in Astronomy (1-2, max. 20)
Discussion of recent research in astronomy and astrophysics. Credit/no credit only. Prerequisite: permission of department.

ASTR 576 Astronomy Colloquium (1, max. 20)
Current research topics in astronomy and astrophysics. Credit/no credit only. Prerequisite: permission of department.

ASTR 581 Techniques in Optical Astronomy (5)

ASTR 597 Topics in Observational Astrophysics (1-5, max. 20)
ASTR 598 Topics in Theoretical Astrophysics (1-5, max. 20)
ASTR 599 Advanced Astronomy Seminar (1-3, max. 6)
Practical exercises in astrophysics. Emphasis on methods and techniques of simulation, acquisition, evaluation, and analysis of observational data and its interpretation using models of astrophysical systems. Prerequisite: permission of instructor.

ASTR 600 Independent Study or Research (*)
ASTR 700 Master's Thesis (*)
ASTR 800 Doctoral Dissertation (*)

Atmospheric Sciences

408 Atmospheric Sciences-Geophysics Building

Atmospheric Sciences is a wide-ranging discipline that includes topics as diverse as weather forecasting, global warming, air quality, Pacific Northwest weather and climate, mountain weather, marine weather, El Nino, the ozone hole, ice ages, and the weather of Mars. It considers problems that are both scientifically challenging and critical for the welfare of modern society. These problems are addressed with theory, measurements, and computer simulations.

Undergraduate Program

Adviser
408B Atmospheric Sciences-Geophysics Building, Box 351640
206-543-6471
advise@atmos.washington.edu

The Department of Atmospheric Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in atmospheric sciences
- A minor in atmospheric sciences

Bachelor of Science

Suggested First- and Second-Year Courses: CHEM 142; CSE/ENGR 142

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

74 credits as follows:

Core requirements: MATH 124, MATH 125, MATH 126; MATH 324; PHYS 121, PHYS 122, PHYS 123; AMATH 301, AMATH 351, AMATH 353; CSE 142; ATM S 301, ATM S 321, ATM S 340, ATM S 358, ATM S 370, ATM S 431, ATM S 441

Area of specialization: 19 credits of additional coursework at the 200 level or above, selected in consultation with the faculty adviser. Suggested options include meteorology, atmosphere and environment, atmosphere and ocean, and teacher education.
A grade of 2.0 or better in each of the required courses and an overall GPA in these courses of 2.50.

Pregraduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

Minor

Minor Requirements: 25 credits to include ATM S 301 plus other approved courses. The minor may include a maximum of 6 independent study credits. Prerequisites include MATH 126 or MATH 136, and PHYS 123. Some courses may require further math or chemistry experience.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The degree program qualifies students for professional employment in weather forecasting, air-quality control and monitoring, and other areas of atmospheric sciences and related fields. The baccalaureate degree also is appropriate preparation for graduate study in atmospheric sciences.

- Instructional and Research Facilities: Extensive computer resources are available in the Departmental Computer Laboratory. The Department also maintains a map room for viewing weather data in either print or electronic format. A study area is provided for undergraduates. An instrument laboratory is maintained with a wide range of observing and data collection systems. Students also have access to a machine shop, several electronic laboratories and an extensive weather data archive.

- Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- Research, Internships, and Service Learning: Internships are available either within the department or with outside organizations, providing a valuable opportunity to test a student’s interests in various meteorological career paths and to extend the student’s knowledge. A limited number of departmental scholarships are available each year, based on academic excellence or financial need. Employment opportunities are often available in one of the many departmental research groups, and some internships are paid.

- Department Scholarships: The Bruce Caldwell Memorial Scholarship and the Anonymous Donor Atmospheric Sciences Scholarship, which are both awarded annually, based on both academic excellence and financial need.

- Student Organizations/Associations: Student Chapter of American Meteorological Society, Puget Sound American Meteorological Society Chapter, Weekly Weather Discussion for all majors.

Of Special Note: The first required atmospheric sciences course is ATM S 301, which is offered autumn quarter only. Any lower-division atmospheric sciences courses will count as electives and not as part of the major.

Graduate Program

Graduate Program Coordinator
408B Atmospheric Sciences-Geophysics, Box 351640
206-543-6471
adviser@atmos.washington.edu

Master of Science, Doctor of Philosophy

Admission to the graduate program requires a baccalaureate degree in physical science, engineering, or mathematics, or the equivalent, as well as the Graduate Record Examination. The program of graduate study varies with each individual.

Nearly all students are admitted as M.S. students. During the first year of graduate study, students concentrate on developing a strong background in the fundamentals that underlie the atmospheric sciences and on acquiring a broad understanding of the wide range of problems encountered in the atmosphere. For those students who already possess an M.S. degree, as well as for those wishing to earn only the Ph.D., there is a process by which early admission into the Ph.D. program is possible.

Assistantships

Nearly all graduate students are supported by either research assistantships or fellowships. Students are usually a teaching assistant during at least one quarter, in the second year of study. Students are supported full-time during the summer.

Faculty

- Thomas P. Ackerman, Professor
  Ph.D., University of Washington
  Clouds; radiation; remote sensing; aerosols; global climate change.

- Becky Alexander, Assistant Professor
  Ph.D., University of California, San Diego
  Paleoclimate; atmospheric chemistry; aerosols; stable isotope geochemistry.

- David S. Battisti, Professor
  Ph.D., University of Washington
  Large-scale atmosphere-ocean dynamics; tropical circulation; physics of natural variability in Arctic climate; climate dynamics; paleoclimate.

- Cecilia Bitz, Assistant Professor
  Ph.D., University of Washington
  High-latitude Climate; climate dynamics.

- Christopher S. Bretherton, Professor
  Joint Professor, Atmospheric Sciences and Applied Mathematics
  Ph.D., Massachusetts Institute of Technology
  Role of clouds in atmospheric convection and climate; boundary layer meteorology; numerical modeling; tropical meteorology.

- Dale R. Durran, Professor
  Ph.D., Massachusetts Institute of Technology
  Atmospheric dynamics; numerical methods and atmospheric modeling; mountain meteorology; mesoscale meteorology.

- Qiang Fu, Associate Professor
  Ph.D., University of Utah
  Atmospheric radiation; cloud/aerosol/radiation/climate interactions, remote sensing.

- Gregory J. Hakim, Assistant Professor
  Ph.D., University of New York
  Synoptic and mesoscale meteorology; atmo-
spheric dynamics; stratified turbulence.

**Dennis L. Hartmann**, Professor and Chair  
Ph.D., Princeton University  
Climate change; dynamic meteorology; radiation and remote sensing.

**Robert Houze**, Professor  
Ph.D., Massachusetts Institute of Technology  
Mesoscale meteorology, cloud physics and dynamics; radar meteorology; tropical and mountain meteorology.

**Lyatt Jaeglé**, Assistant Professor  
Ph.D., University of Washington  
Synoptic and mesoscale meteorology

**Peter B. Rhines**, Professor  
Joint Professor, Oceanography and Atmospheric Sciences  
Ph.D., Trinity College, University of Cambridge  
Atmospheric chemistry; tropospheric and stratospheric photochemistry; chemical modeling of atmospheric observations; influence of human activities on the composition of the atmosphere.

**Edward S. Sarachik**, Professor  
Atmospheric dynamics; large-scale atmosphere-ocean interactions; greenhouse warming; equatorial dynamics; El Niño/Southern Oscillation; climate change.

**Joel Thornton**, Assistant Professor  
Atmospheric Chemistry; in situ and laboratory studies of homogeneous and heterogeneous atmospheric chemical processes; air pollution; atmosphere-biosphere interactions.

**John M. Wallace**, Professor  
Director, Joint Institute for the Study of the Atmosphere and Ocean (JISAO)  
Atmospheric general circulation; climate variability.  
JISAO, 106 King Building, Phone (206) 543-7390  
Box 354235, Seattle WA, 98195-4235

**Stephen G. Warren**, Professor  
Joint Professor, Atmospheric Sciences and Geophysics  
Ph.D., Harvard University  
Atmospheric radiation; radiative properties of clouds, snow, and sea ice; Antarctic climate.
ATM S 514 Ice and Climate Modeling (3)
Principles of global climate modeling. Modeling seasonal cycles of
snow cover and sea ice. Ice-sheet mass balance and flow. Solar
radiation anomalies due to changes in earth’s orbit. Climate/ice-
sheet models of Pleistocene ice ages. Prerequisite: permission of
instructor. Offered: jointly with ESS 535; alternate years.

ATM S 520 Atmospheric Sciences Colloquium (1, max. 15)
Seminars on current research in advanced topics related to
atmospheric sciences, conducted by faculty and visiting professors/
scientists. Includes presentation of doctoral dissertations by
department graduate students. For Atmospheric Sciences graduate
students only. Credit/no credit only. Prerequisite: permission of
department. Offered: AWSp.

ATM S 521 Seminar in Atmospheric Dynamics (*)
Directed at current research in the subject. For advanced students.
Credit/no credit only. Prerequisite: permission of instructor. Offered:
AWSp.

ATM S 523 Seminar in Clouds and Precipitation (*)
Directed at current research in the subject. For advanced students.
Credit/no credit only. Prerequisite: permission of instructor. Offered: AW.

ATM S 524 Seminar in Climate Dynamics and Energy
Transfer (*)
Directed at current research in the subject. For advanced students.
Credit/no credit only. Prerequisite: permission of instructor. Offered:
A.

ATM S 525 Seminar Topics in Atmospheric Chemistry (1-3,
max. 6)
Seminar for atmospheric scientists, chemists, and engineers in
problems associated with the chemical composition of the
atmosphere. Topics range from the natural system to urban
pollution and global atmospheric change. Faculty lectures and
student participation. Prerequisite: CEE 301 or permission of
instructor. Offered: jointly with CEE 553; W.

ATM S 532 Atmospheric Radiation: Introductory (3)
Fundamentals of radiative transfer; absorption and scattering by
atmospheric gases; elementary applications to constraints on the
thermal structure, photochemistry, and remote sensing. Prerequisite:
PHYS 225 or permission of instructor. Offered: jointly with ESS
571; Sp.

ATM S 533 Atmospheric Radiation: Advanced (3)
Optical properties and particle absorption and scattering; solutions
of radiative transfer equation in multiple scattering atmospheres;
applications to atmospheric and surface energy balance and remote
sensing. Prerequisite: ATM S 532/ESS 571 or permission of
instructor. Offered: jointly with ESS 572; A.

ATM S 534 Remote Sensing of the Atmosphere and Climate
System (3)
Satellite systems for sensing the atmosphere and climate system.
Recovery of atmospheric and surface information from satellite
radiance measurements. Applications to research. Prerequisite: ATM
S 532 or ATM S 533. Offered: jointly with ESS 521; alternate years.

ATM S 535 Cloud Microphysics and Dynamics (3)
Basic concepts of cloud microphysics, water continuity in clouds,
cloud dynamics, and cloud models. Prerequisite: ATM S 501 or
permission of instructor. Offered: jointly with ESS 573; W.

ATM S 536 Mesoscale Storm Structure and Dynamics (3)
Techniques of observing storm structure and dynamics by radar and
aircraft, observed structures of precipitating cloud systems,
comparison of observed structures with cloud models. Prerequisite:
either ATM S 535 or ESS 573. Offered: alternate years; Sp.

ATM S 542 Synoptic and Mesoscale Dynamics (3)
Quasi-geostrophic theory, baroclinic instability, symmetric
instability, tropical disturbances, frontogenesis, orographic
disturbances, convective storms. Prerequisite: ATM S 509/GEOS
512 and AMATH 402 or equivalents. Offered: Sp.

ATM S 545 General Circulation of Atmosphere (3)
Requirements of the global angular momentum, heat, mass, and
energy budgets upon atmospheric motions as deduced from
observations. Study of the physical processes through which these
budgets are satisfied. Prerequisite: ATM S 509/GEOS 512 or
permission of instructor. Offered: A.

ATM S 547 Boundary Layer Meteorology (3)
Turbulence, turbulent fluxes, averaging. Convection and shear
instability. Monin-Obukhov similarity theory, surface roughness.
Wind profiles. Organized large eddies. Energy fluxes at ocean and
land surfaces, diurnal cycle. Convective and stably stratified
Boundary layer modeling and parameterization. Prerequisite: ATM S
505, AMATH 505, or OCEAN 511. Offered: alternate years; Sp.

ATM S 551 Atmospheric Structure and Analysis I: Synoptic
Scale Systems (4)
Extratropical cyclones and cyclogenesis. Jet streams. Upper waves
in the westerlies. Diagnosis of vertical motions. Fronts and
frontogenesis. Prerequisite: ATM S 502 and ATM S 509/GEOS
512. Offered: alternate years; A.

ATM S 552 Objective Analysis (3)
Review of objective analysis techniques commonly applied to
atmospheric problems; examples from the meteorological literature
and class projects. Superposed epoch analysis, cross-spectrum
analysis, filtering, eigenvector analysis, optimum interpolation
techniques. Offered: W.

ATM S 555 Planetary Atmospheres (3)
Problems of origin, evolution, and structure of planetary atmos-
pheres, emphasizing elements common to all; roles of radiation,
chemistry, and dynamical processes; new results on the atmospheres
of Venus, Mars, Jupiter, and other solar system objects in the
context of comparative planetology. Offered: jointly with ASTR
555/ESS 581; alternate years.

ATM S 556 Planetary-Scale Dynamics (3)
Zonally symmetric circulations, planetary waves, equatorial waves,
dynamics of the middle atmosphere, trace constituent transport,
nonlinear aspects of atmospheric flows. Prerequisite: ATM S 542 or
permission of instructor. Offered: alternate years; Sp.

ATM S 558 Atmospheric Chemistry (3)
Photochemistry of urban, rural, and marine tropospheric air, and of
the natural and perturbed ozone in the middle atmosphere. Unity of
the chemistries in these apparently different regimes. Prerequisite:
ATM S 458 or ATM S 501 or CHEM 457 or permission of
instructor. Offered: Sp.

ATM S 560 Atmosphere/Ocean Interactions (3)
Observations and theory of phenomena of the coupled atmosphere-
ocean system. El Nino/Southern Oscillation; decadal tropical
variability; atmospheric teleconnections; midlatitude atmosphere-
 ocean variability. Overview of essential ocean and atmospheric
dynamics, where appropriate. Credit/no credit only. Prerequisite:
ATM S 509/OCEAN 512. Offered: jointly with OCEAN 560;
alternate years; Sp.

ATM S 564 Atmospheric Aerosol and Multiphase Atmospheric
Chemistry (3)
Physics and chemistry of particles and droplets in the atmosphere.
Statistics of size distributions, mechanics, optics, and physical
chemistry of atmospheric aerosols. Brownian motion, sedimenta-
tion, impaction, condensation, and hydroscopic growth. Prerequisite: permission of instructor. Offered: alternate years; W.

ATM S 571 Advanced Physical Climatology (3)

ATM S 575 Large Scale Dynamics of the Tropical Atmosphere (3)
Observations and underlying dynamics of large-scale tropical circulations. Factors that determine regions of large-scale persistent precipitation in the tropics, thermal forcing of atmospheric circulations by these regions, and temporal variability of the forcing and response. Credit/no credit only. Prerequisite: ATM S 509/OCEAN 512, ATM S 542. Offered: alternate years; W.

ATM S 581 Numerical Analysis of Time Dependent Problems (5)

ATM S 582 Advanced Numerical Modeling of Geophysical Flows (3)

ATM S 585 Climate Impacts on the Pacific Northwest (4)
Mantua, Snover
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ESS/ENVR/SMa 585; Sp.

ATM S 586 Current Research in Climate Change (2, max. 20)
Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ESS 586/OCEAN 586.

ATM S 587 Climate Dynamics (3) Hartman, Thompson
Examines Earth’s climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth’s climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ESS 587/OCEAN 587; A

ATM S 588 The Global Carbon Cycle and Climate (3) Quay
Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth’s carbon cycle from geological, oceanographic and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with OCEAN 588/ESS 588; W.

ATM S 589 Paleoclimatology: Data, Modeling and Theory (3)
Battisti, Emerson, Steig

ATM S 591 Special Topics (1-4, max. 9)
Lecture series on topics of major importance in the atmospheric sciences. Prerequisite: permission of instructor.

ATM S 600 Independent Study or Research (*) Credit/no credit only. Offered: AWSpS.

ATM S 700 Master’s Thesis (*) Offered: AWSpS.

ATM S 800 Doctoral Dissertation (*) Offered: AWSpS.

Biochemistry

109 Bagley

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes.

Undergraduate Program

Adviser
109 Bagley, Box 351700
206-616-9880, 206-543-9343
advisers@chem.washington.edu

The Biochemistry Program offers the following programs of study:
• The Bachelor of Science degree with a major in biochemistry

Bachelor of Science

Suggested First and Second-Year Courses: BIOL 180, BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 with one physics lab course strongly recommended).

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

106 credits as follows:

MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116), with the PHYS 121 sequence recommended
CHEM 142, CHEM 152, CHEM 162, (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); CHEM 452, CHEM 453 (or CHEM 455, CHEM 456, CHEM 457 or CHEM 475, CHEM 476, CHEM 477)
BIOL 180, BIOL 200 (or BIOL 201, BIOL 202)
GENOME 371
BIOC 426, BIOC 440, BIOC 441, BIOC 442
11 credits chosen from a current department list (available in 109 Bagley) of upper-division science classes including math, biology, microbiology, chemistry, genome sciences, zoology. Up to 9 credits of approved advanced-level undergraduate research may also be applied to this requirement. For all chemistry, biology, and biochemistry
courses required by the major program, a minimum grade of 1.7 and a GPA of 2.80 is required. For the BIOC 440, BIOC 441, and BIOC 442 sequence, a minimum GPA of 2.20 is required. Overall cumulative GPA of 2.80 is also required to graduate.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors.

Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

- **Instructional and Research Facilities:** Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology and molecular and cellular biology, with which the department has common research interests. The laboratories are equipped with modern research equipment and are supported by external, centralized research facilities. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine.

- **Honors Options Available:** With College Honors. With Distinction. See adviser for details.

- **Research, Internships, and Service Learning:** No formal internship program. Students are encouraged to pursue national and regional internships. See advisers for more information.

- **Department Scholarships:** Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department advisers for more information.

- **Student Organizations/Associations:**
  - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
  - Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
  - The Free Radicals: a general undergraduate club for chemistry and biochemistry majors

**Of Special Note:**

- This degree requires a minimum of 196 credits.
- Students are strongly encouraged to participate in undergraduate research.

**Faculty**

- **Baker, David**
  - protein folding; bioinformatics
- **Bornstein, Paul**
  - cell/extracellular matrix interactions; wound healing
- **Chamberlain, Jeffrey**
  - muscular dystrophy; dystrophin
- **Davie, Earl**
  - structure and function; gene therapy
- **Davis, Trisha**
  - blood coagulation and fibrinolysis
- **Glomset, John**
  - chromosome dynamics; spindle pole body; yeast genomics
- **Hauschka, Stephen**
  - protein/lipid interactions; prenylation; cell signalling
- **Hol, Wim**
  - muscle development, gene regulation, and gene therapy
- **Hurley, James**
  - protein crystallography; drug design; genomics; tropical parasites
- **Kennedy, Brian**
  - photoreceptor signal transduction
  - control of DNA replication; cell cycle; carcinogenesis
- **Kimelman, David**
  - Xenopus and zebrafish development
  - Klevit, Rachel NMR; protein structure, protein/protein, protein/DNA interactions
  - Loeb, Lawrence
  - fidelity of DNA replication; HIV
  - reverse transcriptase; carcinogenesis
  - Maizels, Nancy
  - DNA repair and recombination in mammalian cells
  - Merz, Alexey
  - membrane docking and fusion; lysosome biogenesis
  - Morris, David
  - transcriptional and translational control in mammalian cells
  - Palminter, Richard
  - murine neuronal development; zinc metabolism
  - Parson, William
  - photosynthesis; protein dynamics
  - Petra, Philip
  - protein chemistry; steroid/protein interaction
  - Ruohola-Baker, Hannele
  - Drosophila as a model for human disease, Stem cells, microRNA
  - Saari, John
  - cycling and regeneration of visual pigments
  - Stenkamp, Ronald
  - protein crystallography; G-coupled protein receptors
  - Teller, David
  - protein crystallography; G-coupled protein receptors
  - Varani, Gabriele
  - NMR; RNA/protein interactions and dynamics; telomerase
  - Verlinde, Christophe
  - structure-based drug design
  - Weiner, Alan
  - chromosome fragility; small nuclear RNAs; CCA-adding enzyme
  - Young, Ted

**Adjunct Faculty**

- **Daggett, Valerie**
  - molecular dynamics; protein unfolding/folding
- **Dale-Crunk, Beverly**
  - epithelial structural proteins, antimicrobial peptides
- **Daum, Guenter**
  - cell signalling; smooth muscle development; EGF-like growth factors
- **Eyre, David**
  - skeletal tissue biology
- **Gelb, Michael**
  - lipid mediator production and inflammation, design of anti-parasite agents, proteomic methodology
- **Russell, David**
  - gene therapy, viral vectors
- **Emertus Faculty**
  - Fischer, Edmond
  - signal transduction; regulation by protein phosphorylation
  - Gordon, Milton
  - plant/bacterial interactions; plant signalling; bioremediation
BIOC 396 Research in Chemistry and the Chemical Sciences (1) NW
Presentations by researchers in academia and industry describing the opportunities for research chemistry and biochemistry. Credit does not count toward chemistry major requirements. Credit/no credit only. Prerequisite: CHEM 337. Offered: jointly with CHEM 396; A.

BIOC 405 Introduction to Biochemistry (3) NW Daum, Teller, Wiseman
Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: either BIOL 200, BIOL 201, or both BIOL 101 and GENET 371; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

BIOC 406 Introduction to Biochemistry (3) NW Hurley, Petra
Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOC 405. Offered: W.

BIOC 426 Basic Techniques in Biochemistry (4) NW Chung, Petra
Introduction to basic biochemistry experiments. Acquaints students (largely Biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 440, which may be taken concur-
BIOC 441 Biochemistry (4) NW *Davis, Klevit*
Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 2.5 in either BIOL 201 or BIOL 200; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124 or MATH 134. Offered: A.

BIOC 442 Biochemistry (4) NW *Young*
Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 1.7 in BIOC 440. Offered: W.

BIOC 444 Biochemistry (4) NW *Kimelman, Palmiter*
Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 1.7 in BIOC 406 or 1.7 in BIOC 441. Offered: Sp.

BIOC 496 Research Seminar for Undergraduates (1, max. 2) NW
formal presentations of student research. One credit applies to research component of a relevant major. Credit/no credit only. Offered: jointly with CHEM 496; Sp.

BIOC 498 Undergraduate Thesis (*)
For senior medical students. Offered: AWSpS.

BIOC 499 Undergraduate Research (*)
Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/no credit only. Offered: AWSpS.

BIOC 515 Matrix Macromolecules in Morphogenesis and Development (1, max. 30) *Bornstein*
Offered: AWSp.

BIOC 516 Molecular Mechanisms of Blood Clotting (1, max. 30) *Davie*
Offered: AWSp.

BIOC 517 Protein Structure (1, max. 30) *Baker*
Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

BIOC 518 Signaling in Development (1, max. 30) *Raikhola-Baker*
Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

BIOC 520 Seminar (1)
Seminar dealing with timely topics in the field of biochemistry. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 525 Phytoremediation (1, max. 4)
Literature survey of phytoremediation topics. Discussion of latest techniques for the use of plants to concentrate heavy metals in the soil and of plants and plant-bacteria combinations to detoxify various organic contaminants. Credit/no credit only. Offered: AWSpS.

BIOC 526 Control of Growth and Differentiation During Development (1, max. 30) *Hauschka*
Credit/no credit only. Offered: AWSpS.

BIOC 528 Signal Transduction (1, max. 30) *Hurley*
Credit/no credit only. Offered: AWSp.

BIOC 529 Molecular Biology of Early Development (1, max. 30) *Kimelman*
Offered: AWSpS.

BIOC 530 Advanced Biochemistry (3) *Baker, Gelb, Hol, Klevit, Stenkamp, Stoddard*
Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Offered: A.

BIOC 533 Topics In Biochemistry (1, max. 30) *Daum, Davie, Fischer*
Provides in-depth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference to classical papers and recent literature. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 534 Topics In Molecular Biophysics (1.5) *Parson*
Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography, NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 535 Macromolecular Structure (1, max. 30) *Klevit*
Offered: AWSp.

BIOC 536 Control of Cell Growth (1, max. 30) *Morris*
Offered: AWSp.

BIOC 537 Regulation of Gene Expression (1, max. 30) *Palmiter*
Offered: AWSpS.

BIOC 540 Literature Review (2) *Parson*
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: jointly with BMSD 540 A.

BIOC 541 Literature Review (2) *Palmiter*
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: W.

BIOC 542 Literature Review (2) *Morris*
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: Sp.

BIOC 555 Cell and Molecular Biology of Connective Tissue Proteins (1, max. 30) *Bornstein*
Offered: AWSpS.

BIOC 556 Enzymatic and Genetic Aspects of Blood Clotting (1, max. 30) *Davie*
Offered: AWSp.

BIOC 557 Growth Regulation by Calcium Binding Proteins (1, max. 30) *Davis*
Offered: AWSpS.

BIOC 558 Membrane Biochemistry and Cell Growth (1, max. 30) *Glomset*
Offered: AWSpS.
BIOC 560 Protein Folding (1, max. 30)  
Baker  
Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

BIOC 561 Origin of Polarity (1, max. 30)  
Ruohola-Baker  
Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

BIOC 565 Plant Molecular Genetics (1, max. 30)  
Offered: AWSpS.

BIOC 566 Growth and Differentiation of Skeletal and Cardiac Muscle (1, max. 30)  
Hauschka  
Offered: AWSpS.

BIOC 568 Molecular and Genetic Aspects of G Protein Signal Transduction (1, max. 30)  
Hurley  
Offered: AWSpS.

BIOC 569 Inductive Events in Early Development (1, max. 30)  
Kimelman  
Offered: AWSpS.

BIOC 575 NMR Analysis of Proteins and Nucleic Acids (1, max. 30)  
Klevit  
Offered: AWSp.

BIOC 576 Sequential Analysis of Growth Regulation (1, max. 30)  
Morris  
Offered: AWSpS.

BIOC 577 Gene Regulation in Transgenic Mice (1, max. 30)  
Palmiter  
Offered: AWSpS.

BIOC 578 Electron Transport in Photosynthesis (1, max. 30)  
Parson  
Offered: AWSp.

BIOC 581 Introduction to Biochemical Research (4, max. 16)  
Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Credit/no credit only. Prerequisite: graduate standing in biochemistry or permission of instructor. Offered: AWSpS.

BIOC 588 Molecular Biology of Yeast Gene Regulation (1, max. 30)  
Young  
Offered: AWSpS.

BIOC 600 Independent Study or Research (*)  
Offered: AWSpS.

BIOC 700 Master’s Thesis (*)  
Offered: AWSpS.

BIOC 800 Doctoral Dissertation (*)  
Offered: AWSpS.

Biochemistry, botany, genetics, microbiology, zoology, and many other natural sciences.

Undergraduate Program

Adviser  
318 Hitchcock, Box 355320  
206-543-9120  
bioladv@u.washington.edu

The Department of Biology offers the following programs of study:

- The Bachelor of Arts degree with a major in biology.
- The Bachelor of Science degree with majors in ecology and evolution; environmental and conservation biology; general biology; molecular, cellular, and development biology; physiology; and plant biology.

Designed for students desiring breadth of training, the Bachelor of Arts program does not require physics. Students do not select a concentration, and hence have greater flexibility in upper division biology electives. An ideal degree for students wishing to double major in arts or humanities and in biology or who wish to design their own degree program.

The Bachelor of Science majors are as follows:

- **Ecology and Evolution.** Emphasizes ecological and evolutionary processes and relationships of those processes to systematics and biogeography of organisms. For students who wish to pursue graduate studies or seek employment in the fields of theoretical and applied ecology, evolution, systematics and biogeography, and mathematical biology.

- **Environmental and Conservation Biology.** Addresses conservation and restoration aspects of species, populations, and ecosystems, as well as related areas of law and environmental policy. While this is the most interdisciplinary program, it does require the same supporting and foundation courses in science as the other options.

- **General Biology.** Emphasizes breadth of training in biology. This is the most flexible program and offers a greater variety of advanced electives than other options. Attractive to students desiring K-12 teaching credentials or who otherwise wish to tailor their degree to their needs.

- **Molecular, Cellular, and Development.** Designed for students who wish to pursue graduate studies in genetics, biochemistry, microbiology, cell biology, or developmental biology, as well as for candidates for professional schools such as medicine and dentistry.

- **Physiology.** Emphasizes physiological processes from the cellular to the organismal levels, and across all groups of organisms. An attractive option for students interested in graduate and professional fields in animal and human physiology, medicine, and veterinary sciences.

- **Plant Biology.** Offers students both breadth and depth of training in the field of Botany. Ideal for students desiring to enter graduate programs in botany or for those wishing to pursue careers in the plant biology or horticultural fields in state and federal agencies.

Each of the above bachelor’s degrees in the biological sciences can be combined with Washington State requirements to prepare students to teach biology in public schools at the secondary level. See the Biology Teaching Program adviser for specific requirements.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Same as for the Bachelor of Science degree as described below, except no physics is required.

Department Admission Requirements

Same as for the Bachelor of Science degree as described below.

**Major Requirements**

90 credits as follows:
Introductory biology, three to six quarters of chemistry, and mathematics are the same as required by the B.S., listed below. Likewise, biology 300-level foundation-course requirements are the same. However, physics is not required and the remaining 33 upper division elective credits may be chosen from any biology course or any courses on the electives lists from the six majors for the B.S. degree.

Additional Degree Requirements.

A minimum of 15 credits of 400-level biology electives must be taken at the UW.

Minimum GPA requirements are the same as for a B.S.

Bachelor of Science

Suggested First- and Second-Year Courses: Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Knowledge requirement during the first two years.

Department Admission Requirements

Biol 180 or Biol 201 with a minimum grade of 2.5; or Biol 180, Biol 200, Biol 220 (or Biol 201, Biol 202, Biol 203) with a cumulative GPA of 2.00 for the three courses. Chem 142, Chem 152, or equivalent. A minimum cumulative GPA of 2.00 is required for all courses which would apply toward major requirements (this includes all applicable chemistry, physics, mathematics, quantitative science, and introductory biological science courses).

Major Requirements

90 credits as follows:

For all options the following basic coursework is required:

A one year sequence of introductory biology for majors (Biol 180, Biol 200, Biol 220)

Two quarters of mathematics (calculus or statistics): Math 124 and Math 125, or Math 144 and Math 145, or Q Sci 291 and Q Sci 292, or Q Sci 381 (or Stat 311) and Q Sci 482

Two quarters of physics: Phys 114 and Phys 115, or Phys 121 and Phys 122

Third year biological sciences foundation courses including Genome 371 (required of all options), and a choice of three of the following: Biol 350 or Biol 354 or Biol 355 or Biol 356

The remaining 22-25 credits are selected from a variety of 300- and 400-level courses specific to each option, and which are designed to insure both breadth and depth of coverage.

*Chem 162 is not required for this degree; however, Chem 237, Chem 238, and Chem 239 are required by many professional programs and graduate schools, and the sequence does require Chem 162.

Additional Degree Requirements:

A minimum GPA of 2.00 for all UW courses applied toward major requirements, including required supporting courses, introductory biology, and upper division coursework. (A grade of 2.0 is not required in individual courses.)

A minimum of 15 credits of 400-level biology electives must be taken at the UW.

Two 300- or 400-level laboratory courses

Because of the differing specific requirements and choices for each option, it is extremely important for students to work closely with the Biology departmental advisers to insure completion of these 22-25 credits.

Student Outcomes and Opportunities

• Learning Objectives and Expected Outcomes: The department graduates between 350 and 400 students each year. Biology degrees are applicable to many different fields, depending upon student interests. Students in the program gain analytical and laboratory skills that prepare them for entry-level positions in a variety of biologically related areas, including, but not limited to, biotechnology, laboratory and/or field research support, health science support, wildlife biology, and ecology and conservation work with a variety of agencies, consulting firms, and research organizations in the northwest. Students may enter graduate programs that focus on some aspect of biological science (such as genetics, microbiology, immunology, ecology, environmental health, or cell and molecular biology), or enter a variety of professional programs, such as veterinary medicine, medicine, dentistry, pharmacy, laboratory medicine, nursing, and others.

• Instructional and Research Facilities: The Department of Biology occupies 128,000 square feet in Hitchcock, Johnson, and Kincaid Halls. Extensive research laboratories, teaching laboratories, computer workstations, and support services are found throughout the department. Specialized facilities include more than 16,000 square feet of greenhouse, seawater facilities, growth rooms, electron microscopes, and other specialized equipment. Undergraduates have access to most of these facilities, especially those engaged in undergraduate research. Off campus, the internationally recognized Marine Research Station, Friday Harbor Laboratories, provides many opportunities for undergraduates, from courses to research apprenticeships.

• Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

• Research, Internships, and Service Learning: Biology faculty welcome undergraduates into their research programs, often working closely with them. Approximately 40% of the 900 undergraduate Biology majors finish with undergraduate research experience. UW proximity to such Seattle area organizations as the Fred Hutchinson Cancer Research Center, Swedish Hospital, numerous biotech companies, NOAA, National Marine Fisheries Research Center, the Seattle Aquarium, and the Woodland Park Zoo, as well as the close ties of Biology faculty to Friday Harbor Laboratories, the faculty in the College of Forest Resources, and the College of Ocean and Fishery Sciences provide opportunities for biology majors to develop internships within these organizations. See adviser for ways to get credit for such experiences.

• Department Scholarships: Several scholarships are available, in a few cases to biology majors only. Most of these support students wishing to pursue an undergraduate research experience. They are competitive, sometimes highly so. They include:

  • Howard Hughes Undergraduate Research Internship: approximately 20 per year for freshmen and 20 per year for juniors and seniors.

  • Friday Harbor Laboratory (FHL) Apprenticeships: $3,000 for one quarter, spring or autumn.

  • Mary Gates Scholarships: very competitive,
across all science disciplines.

- **Herschel and Caryl Roman Scholarship:** $2,500-5,000 annually to one or two students who have an interest in genetics research.
- **Porath/Johnson Endowed Scholarship:** one-year, $5,000 scholarship to an outstanding biology major.

For qualifications, deadlines, and other details, see adviser or consult the Department of Biology Web site.

- **Student Organizations/Associations:** Beta Beta Beta Biology Honor Society, tribeta@u.washington.edu; Pre Med Society (Alpha Epsilon Delta), aed@u.washington.edu.

**Faculty**

- **Ammirati, Joseph F.** Fungal systematics and ecology
- **Bendich, Arnold J.** Structure of chromosomal DNA molecules
- **Bergstrom, Carl** Mathematical Biology, Evolutionary Theory
- **Boersma, P. Dee** Seabirds as reflectors of the environment
- **Bosma, Martha M.** Development and modulation of physiological activity in early hindbrain
- **Bradshaw, H.D.** ‘Toby’ Evolutionary genetics of natural populations
- **Brenowitz, Eliot A.** Neuroendocrine and molecular regulation of song behavior in birds
- **Carrington, Emily** Biomechanics, physiology, and ecology of marine organisms
- **Cattolico, Rose Ann** Epigenetic mechanisms of gene regulation
- **Comai, Luca Cooper, Mark S. Crowe, Alison** Dynamics and control of animal locomotion.
- **de la Iglesia, Horacio** Neural Basis of Circadian Rhythmicity
- **del Moral, Roger** Analysis of plant community dynamics
- **Felsenstein, Joseph** Evolution Graubard, Katherine neuron structure, function and modulation within small neural networks
- **Hall, Benjamin** Evolution of Plant Genes; Molecular Systematics
- **Hille, Merrill B.** Migration of cells during zebrafish morphogenesis
- **Huey, Raymond B.** Evolutionary physiology of ectotherms
- **Kenagy, Jim** Mammalian population biology, biogeography, evolution, ecology, ecophysiology and behavior.
- **Laird, Charles D.** Epigenetic biology
- **Moody, William J.** Neurobiology, Development, Physiology
- **Odell, Garrett M.** Plant molecular systematics and evolution
- **Parichy, David M** Development and evolution of pigment pattern, stem cells and metamorphosis
- **Parrish, Julia K.** Animal aggregation, seabird biology, marine conservation
- **Perkel, David J.** Neural mechanisms of learning; vocal learning in songbirds
- **Riddiford, Lynn M.** Hormonal control of insect metamorphosis
- **Rohwer, Sievert** Evolution, Behavior, Population Biology, Birds
- **Ruesink, Jennifer L.** Marine community ecology, invasions, food webs, conservation
- **Schindler, Daniel E.** Drosophila: Early development and imaginal discs
- **Schubiger, Gerold** Benthic marine ecology, coral reef ecology, hydrodynamics
- **Sebens, Kenneth** Evolution and ecology of marine embryos and larval
- **Strathmann, Richard R.** Evolution of Developmental Processes; Molecular Phylogeny; Larval Evolution; Chordate Evolution
- **Swalla, Billie** Evolutionary ecology, chemical ecology, plant-animal interactions, landscape ecology
- **Tewksbury, Joshua** Developmental genetics and cell-cell signaling in Arabidopsis
- **Truman, James W.** Leaf and plant growth regulation
- **Van Volkenburgh, Elizabeth** Biology of marine algae
- **Waaland, J. Robert** Developmental genetics of fertilization and early embryogenesis; chromatin biology
- **Wakimoto, Barbara** This laboratory explores the mechanisms by which vertebrates organize their life cycles.

**Research Faculty**

- **Dethier, Megan N.** Ecology of shorelines
- **Di Stilio, Veronica** Evolution of plant reproductive development
- **Ebrey, Thomas** Photobiology of Vision, Retinal-based Photosynthesis
- **Foe, Victoria E.** Morphogenesis and development in plants
- **Mandoli, Dina F.** McNabb, Susan
- **Morse, M. Patricia** Nemhauser, Jennifer
- **Sidor, Christian** Wasserman, James M
- **Truman, James W.** Noninvasive genetic and endocrine monitoring of wildlife; wildlife forensics
Lecturers

Bilgen, Tolga
Buchwitz, Brian
Buttemer, Helen
Dirks, Clarissa
Freeman, Scott
Herron, Jon
Kennedy, Michael
Martin-Morris, Linda
Nicotri, Mary E. ‘Bette’
O’Connor, Eileen
Petersen, Karen
Ramenofsky, Marilyn
Russell, Millie L.
Sugden, Evan
Waaland, Susan
Wenderoth, Mary Pat
Zeman, Leslie B.

Adjunct Faculty

Beecher, Michael
Development and function of bird song (laboratory and field studies).

Grünbaum, Daniel
Conservation Biology, Plant-Animal Interactions, Spatial Ecology

Hauschka, Stephen D.
Functional morphology of vertebrates; biomechanics and growth of cranial musculoskeletal system

Kimelman, David
Early vertebrate development

Nester, Eugene

O’Donnell, Sean
Division of labor in eusocial insects, behavioral physiology and genetics, tropical ecology

Raible, David W.
near crest and placode development in zebrafish

Samudrala, Ram
Computational prediction of protein and proteome structure, function and interactions. Second, David marine ecology, biological invasions, symbiosis, clonal biology, biocontrol, intertidal invertebrates, conservation, environmental science policy and communication

Affiliate Faculty

Amemiya, Chris T.
Integration of genomics to problems in evolution and development.

Dunwiddie, Peter
Conservation biology, terrestrial plant ecology, fire ecology, paleoecology

Edwards, Scott V.

Galitski, Timothy
Genetics and genomics of signaling networks

Mills, Claudia E.
Biology of medusae and ctenophores in stable and changing ocean habitats

Moens, Cecilia B.
Patternining and development of the zebrafish brain

Moore, Sue

Parkhurst, Susan M.

Peichel, Catherine
Genetic and molecular analysis of reproductive isolation in sticklebacks

Priess, James R.

Rodriguez, Russell

Rutherford, Suzannah
Genetic variation in developmental signaling pathways

Emeritus Faculty

Bakken, Aimee Hayes

Bliss, Lawrence C.

Cleland, Robert E.

Cloney, Richard A.

Edwards, John S.

Edwards, Ola

Halperin, Walter

Haskins, Edward F.

Kohn, Alan J.

Kozloff, Eugene

Kruckeberg, Arthur

Leopold, Estella

Orians, Gordon H.

Paine, Robert T.

Palka, John M.

Tsukada, Matsuo

Walker, Richard B.

Whisler, Howard

Whiteley, Arthur H.

Course Descriptions

BIOL 100 Introductory Biology (5) NW
Develops an awareness of science by studying basic biological principles and their application to problems of humans and society in the contexts of special topics or themes, which vary quarter to quarter. For non-science majors only. Offered: AW.

BIOL 104 Biology for Elementary School Teachers (5) NW
Introduction to evolution by natural selection, examining the light it can throw on human biology and behavior in such areas as the nature of sex differences, sexual conflict, and conflict between parents and children. Does not fulfill major requirements. Offered: jointly with BIO A 100.

BIOL 106 Introductory Biology Seminar (1/3, max 6) NW
Focuses on current topics in biology. Topics vary from quarter to quarter. Designed to enhance learning skills of students who intend to take BIOL 161-162 or BIOL 180/200/220 and major in one of the biological sciences. Recommended: high school chemistry and biology, or one quarter of college chemistry.

BIOL 108 Evolution and Human Behavior (3) NW
Introduction to evolution by natural selection, examining the light it can throw on human biology and behavior in such areas as the nature of sex differences, sexual conflict, and conflict between parents and children. Does not fulfill major requirements. Offered: jointly with BIO A 100.

BIOL 110 Elementary Biology for Health Professions I (2) NW
Elementary biomedical concepts. For Equal Opportunity Program students only. Credit/no credit only. Offered: A.
BIOL 111 Elementary Biology for Health Professions II (2) NW Russell
Elementary human anatomy and physiology, including selected areas in laboratory medicine. For Equal Opportunity Program students only. Credit/no credit only. Prerequisite: BIOL 110. Offered: W.

BIOL 112 Elementary Biology for Health Professions III (1-4, max. 6) NW Russell
Field experience in a health profession. For Equal Opportunity Program students only. Credit/no credit only. Prerequisite: BIOL 111. Offered: Sp.

BIOL 113 Introduction to Biosciences (1-3, max. 6) NW Dirks
Independent study/topics related to material taken in BIOL 180, BIOL 200, and BIOL 220. Credit/no credit only. Offered: AWSp.

BIOL 114 Astrobiology: Life in the Universe (5) NW, QSR
Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTR/ASTBIO/ESS/OCEAN 115.

BIOL 115 Evolution (2) NW Herron
Evolutionary biology for nonmajors. Evolutionary history of the earth and various theories of evolution. Offered: irregularly.

BIOL 116 Introductory Plant Biology (5) NW del Moral, Waaland
Basic concepts in plant biology for nonmajors, with emphasis on plant diversity and how plants grow and reproduce. Modern ideas concerning biotechnology, ecology, agriculture, and conservation and environmental issues discussed. Laboratories include greenhouse studies. Offered: W.

BIOL 117 Plant Identification and Classification (5) NW Olmstead
Plant classification and diversity of seed plants; field study and laboratory identification of the common plant families and the conspicuous flora of western and central Washington. One full-day weekend field trip (optional). For non-majors. Offered: SpS.

BIOL 118 Survey of Physiology (5) NW
Human physiology, for nonmajors and health sciences students. Offered: AWSpS.

BIOL 119 Elementary Physiology Laboratory (1) NW
Prerequisite: BIOL 118 which may be taken concurrently. Offered: AWSpS.

BIOL 120 Current Controversies in Biology (2-5, max. 6 ) NW
Explores a current controversial topic in biology, stressing information needed by the general public to make informed personal, political, and ethical decisions relating to this topic.

BIOL 161 General Biology (5-) NW
Living systems viewed from the subcellular to the community level, emphasizing the diversity, functioning, and interaction of whole organisms. Topics covered include cell structure and function, energy, genetics, animal physiology and development. Emphasizes the position of humans in the biological world. For nonmajors and majors in biology-related fields who need a thorough two-quarter introduction to biology. Recommended: high school chemistry; high school biology. Offered: A.

BIOL 162 General Biology (5-) NW
Living systems viewed from the subcellular to the community level, emphasizing the diversity, functioning, and interaction of whole organisms. Topics covered include plant and animal diversity, plant structure and function, general ecology and evolution. Emphasizes the position of humans in the biological world. For nonmajors and majors in biology-related fields who need a thorough two-quarter introduction to biology. Prerequisite: either BIOL 101 or BIOL 161. Offered: W.

BIOL 180 Introductory Biology (5) NW
For students intending to take advanced courses in the biological sciences or enroll in preprofessional programs. Mendelian genetics, evolution, biodiversity of life forms, ecology, conservation biology. First course in a three-quarter series (BIOL 180, BIOL 200, BIOL 220). Cannot be taken for credit if BIOL 203 has already been taken. Prerequisite: either CHEM 150, CHEM 152, CHEM 155, CHEM 220, CHEM 223, or CHEM 237. Offered: AWSpS.

BIOL 200 Introductory Biology (5) NW
For students intending to take advanced courses in the biological sciences or enroll in preprofessional programs. Metabolism and energetics, structure and function of biomolecules, cell structure and function, animal development. Second course in a three-quarter series (BIOL 180, BIOL 200, BIOL 220). Cannot be taken for credit if BIOL 201 has already been taken. Prerequisite: 1.5 in BIOL 180; either CHEM 150, CHEM 152, CHEM 155, CHEM 220, CHEM 223, or CHEM 237. Offered: AWSpS.

BIOL 220 Introductory Biology (5) NW
For students intending to take advanced courses in the biological sciences or enroll in preprofessional programs. Animal physiology, plant development and physiology. Final course in a three-quarter series (BIOL 180, BIOL 200, BIOL 220). Cannot be taken for credit if BIOL 202 has already been taken. Prerequisite: 1.5 in BIOL 200; either CHEM 155, CHEM 160, CHEM 162, CHEM 165, CHEM 221, CHEM 223, or CHEM 237. Offered: AWSpS.

BIOL 222 Natural History of Puget Sound Country (3) NW
Explores the greater Puget Sound Basin’s diverse physical and biological features. Emphasis on the ecology of the region and its relation to the First Peoples and European late arrivals. Emphasis on the issues of environmental preservation and custodianship of the natural amenities. Optional field trips. For non-majors. Offered: S.

BIOL 223 Diversity in Animals (5) NW
Morphological, functional, and ecological diversity within the major phyla of animals. Students who taken ZOOL/BIOL 330, ZOOL 362, ZOOL/BIOL 430, ZOOL 433, ZOOL/BIOL 434, or ZOOL/BIOL 453 are strongly discouraged from taking this course, due to substantial overlap of material. Recommended: high school biology. Offered: irregularly.

BIOL 226 Laboratory in Environmental Problems (5) NW
Processes and structure of ecosystems and conflicting uses made of these environments. For non-science majors. Role and application of science. Field trips to natural and human-modified ecosystems; weekend field trips required. Offered: S.

BIOL 250 Marine Biology (3/5, max. 5) I&S, NW
Lecture-laboratory course in Marine Biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Evening marine biology movies and weekend field trip. Honors section research project. Offered: jointly with FISH/OCEAN 250.

BIOL 293 Study Abroad — Biology (1-10, max. 10) NW
For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.

BIOL 311 Biology of Fishes (3/5) NW
Lecture and laboratory, of the morphological, physiological, behavioral, and ecological diversity of fishes of the world; designed
to provide a basic foundation for advanced courses in all areas of finfish fisheries. 3-credit option does not include laboratory. Recommended: 10 credits biological science. Offered: jointly with FISH 311; W.

BIOL 317 Plant Classification and Identification (5) NW Olmstead
Classification and diversity of seed plants; concepts and principles of classification, lab and field study of common plant families in Washington, and skill development for identification of species. Cannot be taken for credit if BIOL 117 or BOTANY 113 taken. One weekend field trip. Offered: concurrently with BIOL 117; SpS.

BIOL 320 Game Theory, Evolution, and Behavior (4) I&S, QSR Bergstrom, Smith
Introduction to the logic and basic techniques of modern game theory, and exemplary applications to understand behavioral variation and social interaction in humans and other species. Emphasizes non-mathematical representations of fundamental concepts and processes, with considerable use of computer-based exercises and experiments. Offered: jointly with ANTH 320.

BIOL 325 Plant Physiology and Development (3) NW Nutrition, assimilation, transport, growth, photosynthesis, cellular respiration, and development in plants. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220. Offered: W.

BIOL 326 Plant Physiology Laboratory (3) NW Laboratory experiments on the growth, nutrition, and metabolism of plants. Prerequisite: BIOL 325, which may be taken concurrently. Offered: Sp.

BIOL 330 Natural History of Marine Invertebrates (5) NW Field and laboratory course emphasizing the habits, habitats, adaptations, and interrelationships of marine animals. Weekend field trips required. Offered: W.

BIOL 331 Landscape Plant Recognition (3) NW Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Recommended: either BIOL 117 or BOTANY 113. Offered: jointly with ESRM 331; SpS.

BIOL 333 Plant Communities: Resilience and Restoration (5) NW Ecological impacts by humans on native plant communities. Effects of grazing, timber removal, habitat draining and filling, fire control, application of chemicals. Potential for ecological restoration of plant communities. Three required weekend field trips. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203; either BIOL 117, BIOL 317, or BOTANY 113. Offered: jointly with ESC 333; irregularly.

BIOL 340 Genetics and Molecular Ecology (5) NW Application of molecular markers to ecology, evolution, and the management of living resources. Emphasis on understanding the strengths and weaknesses of the approach based on case studies. Offered: jointly with FISH 340. Prerequisite: either BIOL 102 or BIOL 200.

BIOL 345 Foundations in Physiology (3) NW Physiology core course for biological sciences majors. Analysis of basic principles of animal and plant physiology, with emphasis on cellular processes that mediate organismic processes. Serves as gateway to upper-division courses in physiology. Prerequisite: either BIOL 202 or BIOL 220; recommended: either PHYS 115 or PHYS 122. Offered: AWSpS.

BIOL 354 Foundations in Evolution and Systematics (3) NW Evolution and systematics core course for biological sciences majors. Emphasizes patterns, processes, and consequences of evolutionary change. Serves as gateway to 400-level courses and seminars in evolution, population genetics, sociobiology, conservation biology, phylogenetics, and systematics. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: WSpS.

BIOL 355 Foundations in Molecular Cell Biology (3) NW Cell biology core course for biological sciences majors. Emphasis on molecular approaches to understand cell structure, function, and regulation, and the analysis of experimental design and data interpretation. Serves as a prerequisite to advanced 400-level cell, molecular, and developmental biology courses and seminars. Prerequisite: either BIOL 200 or BIOL 201. Offered: AWSpS.

BIOL 356 Foundations in Ecology (3) NW Ecology core course for biological sciences majors. Emphasizes understanding species interactions in biological communities and relationships of communities to environment. Serves as a prerequisite to 400-level courses and senior seminars in ecology, population and conservation biology. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: AWSpS.

BIOL 390 Undergraduate Internship Seminar (1) NW Crowe Weekly workshop to prepare students for off-campus research internships. Required for students planning to take BIOL 399. Prerequisite: BIOL 220. Offered: AWSpS.

BIOL 397 Preparing Avian Research Specimens (5) NW Preservation of avian study skins, skeletal specimens, extended wings, and tissues for genetic analyses. Standards required for deposit of specimens in research collections. Examines needs for continued collecting, uses of specimens in discovering new knowledge, and impacts of collecting on wild populations. Prepares students for participation in expeditions. Offered: A.

BIOL 399 Biology Internship Program (3-5, max. 15) NW Crowe Coordinated internship in a biology-related field. Registration restricted to students already matched with an internship opportunity in BIOL 390 or by instructor approval. Students must complete at least a combined 10 credits in BIOL 399 over consecutive quarters. Credit/no credit only. Prerequisite: BIOL 390. Offered: AWSpS.

BIOL 401 Advanced Cell Biology (3) NW Bakken, Crowe, Hille, Wakimoto
Selected topics in molecular cell biology. Strong emphasis on reading and interpreting primary research literature. Writing intensive course. Prerequisite: BIOL 355.

BIOL 402 Cell Biology Laboratory (3) NW Investigative projects using modern molecular methods (restriction enzyme digestion, blotting, hybridization, immunohistochemistry, density gradient centrifugation, electrophoresis) and other methods currently used to study plant and animal cells, nucleic acids, and proteins. Includes practice in scientific style writing. Prerequisite: BIOL 401, which may be taken concurrently. Offered: AWSpS.

BIOL 403 Comparative Vertebrate Histology (5) NW Microscopic and submicroscopic anatomy of vertebrates. Emphasis on mammals. Light microscopy and interpretation of ultrastructure. Functions of basic tissue types and organs as related to structure. Prerequisite: BIOL 220. Offered: irregularly.

BIOL 405 Cellular and Molecular Biology of Human Disease (3) NW Concepts of cellular and molecular biology as applied to human disease. Emphasis on current experimental approaches to investigate disease mechanisms and the contributions of model systems. Selected topics in cancer biology, viral induced disease, gene therapy.
BIOL 407 Plant Nuclear and Cytoplasmic Genetics (3) NW Bendich, Comai
Covers genetic aspects specific to plants and algae, including chromosome structure, genome mapping, transposon biology, genes for floral and vegetative development, genetic engineering, ploidy levels, and cytoplasmic genetics. Prerequisite: either BIOL 101, BIOL 200, or BIOL 203; either GENET 371, GENOME 371, GENET 372, or GENOME 372.

BIOL 408 Mechanisms of Animal Behavior (4) NW Beecher, Brenowitz
Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisite: either 2.0 in BIOL 180, or 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with PSYCH 408.

BIOL 409 Sociobiology (5) NW Robker
Biological bases of social behavior, emphasizing evolution as a paradigm. Emphasizes how to think like evolutionary biologist, especially with regard to interest conflict. Topics are individual versus group selection, kin selection, altruism, mating systems, sexual conflict, alternate reproductive strategies, and parent/offspring conflict. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, 2.0 in BIOL 162 or 2.0 in BIOL 180. Offered: jointly with PSYCH 409.

BIOL 410 Circadian Rhythms and Clocks (5) NW
A laboratory-based course where students choose one organism (rodent, Drosophila or plants) on which they carry out a research project throughout the quarter. Lectures cover the basic theoretical background and discussion seminars are based on journal articles directly related to the students' research projects. Prerequisite: BIOL 350 or BIOL 355. Offered: A.

BIOL 411 Developmental Biology (4) NW Schubiger, Swalla
Embryology and subsequent development of vertebrate and invertebrate animals, including Xenopus, mammals, chicks, Drosophila, echinoderms. Morphological changes in developing animals; experimental analysis of developing systems; underlying genetic and biochemical regulation of development. Prerequisite: either BIOL 355 or BIOL 401. Offered: AW.

BIOL 412 Developmental Biology Laboratory (3) NW
Normal development of living embryos (frog, chick, insect, echinoderm). Internal anatomy of embryos on prepared slides. Comparisons between vertebrate and invertebrate animals. Scientific style reports on experiments. Prerequisite: BIOL 411, which may be taken concurrently. Offered: irregularly.

BIOL 413 Methods and Problems in Development (3) NW Schubiger
Special topics in development. Integrating classical and current approaches. Developmental genetics, experimental embryology, molecular mechanisms of developmental regulation, and gene function in cell determination and cell differentiation in animal systems. Prerequisite: BIOL 411. Offered: irregularly.

BIOL 414 Molecular Evolution (5) NW S. Edwards
Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with GENOME 414.

BIOL 415 Evolution and Development (3) NW Swalla
Analysis of intertwined developmental and evolutionary processes studied through evolution of developmental genes, proteins, and expression patterns in different organisms. Includes reading and analyzing implications for ecology evolution, and human disease. Prerequisite: either BIOL 354 or BIOL 355. Offered: irregularly.

BIOL 416 Molecular Genetics of Plant Development (3) NW Comai, Torii
Plant growth and development examined in molecular-genetic terms. Covers mutation, dominance, redundancy, epistasis, and key technologies for discovery of gene function as well as embryogenesis, meristem formation, flower development, and other problems in plant development. Prerequisite: BIOL 220, GENOME 371.

BIOL 424 Plant Eco-Physiology (5) NW Ford
Explores physiological mechanisms that underlie ecological observations, including how above- and below-ground microclimates develop and affect plant physiological processes. Discusses acclimation to environmental change along with species differences in physiological processes and plant's occupation of heterogeneous environments. Laboratories emphasize field measurement techniques. Prerequisite: either BIOL 325 or BIOL 425. Offered: jointly with ESRM 478;

BIOL 425 Advanced Plant Physiology and Development (3) NW
Expanded coverage of plant growth, nutrition, metabolism, and development. Cannot be taken for credit if BIOL 325 already taken. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220. Offered: concurrent with BIOL 325; W.

BIOL 426 Advanced Plant Physiology Laboratory (3) NW
Expanded laboratory experiments on the growth, nutrition, metabolism, and development of plants. Cannot be taken for credit if BIOL 326 already taken. Prerequisite: BIOL 325 or BIOL 425, which may be taken concurrently. Offered: concurrent with BIOL 326.; Sp.

BIOL 427 Biomechanics (4) NW Daniel
Physical biology emphasizing a mechanical approach to ecological, evolutionary, and physiological questions. Basic principles underlying fluid and solid mechanics to explore responses of animals to flows, loads, and motions. Recommended: either BIOL 102, BIOL 162, BIOL 202, or BIOL 220; either MATH 125 or Q SCI 292; either PHYS 114 or PHYS 121. Offered: W, even years.

BIOL 428 Techniques for Mathematical Biology (3) NW
Equips students to use, rather than prove, many applied mathematics techniques essential in mathematical biology. Includes instruction to use symbolic computation software (Mathematica, Macsyma) to do by computer the kind of mathematical formula manipulation that mathematicians formerly performed by hand. Recommended: calculus, linear algebra. Offered: irregularly.

BIOL 429 Models in Biology (4) NW
Explores use of models in biology in a wide range of topics, including morphogenesis, nerve signals, ecological interactions, population biology, and evolutionary theory. Emphasis on the biological insights models can provide rather than mathematical techniques. Prerequisite: either BIOL 428 or ZOOL 470; MATH 125, MATH 128, MATH 134, MATH 145, or Q SCI 292. Offered: irregularly.

BIOL 430 Marine Zoology (8) NW Strathmann
Survey of groups of invertebrate animals represented in the San Juan Archipelago; natural history, functional morphology, ecology, distribution, habitat, adaptation, trophic interrelationships, and evolution. Permission of Director, Friday Harbor Laboratories required for registration. Recommended: 20 credits in biological sciences; corequisite: BIOL 445. Offered: at Friday Harbor
BIOL 432 Marine Invertebrate Zoology (9) NW
Comparative morphology and biology of marine invertebrates with emphasis on field and laboratory studies. Representatives of all major and most minor phyla are collected, observed alive, and studied in detail. Not open for credit to students who have taken 433 or 434. Recommended: 20 credits in biological sciences. Offered: at Friday Harbor Laboratories; S.

BIOL 433 Marine Ecology (5) NW Ruesink
Study of marine ecological processes such as recruitment, disturbance, competition, and predation, and their effects on the structure and diversity of marine communities. Weekend field trips to local intertidal habitats required. Prerequisite: either BIOL 356, BIOL 472, or a minimum grade of 3.4 in BIOL 180. Offered: Sp, odd years.

BIOL 434 Invertebrate Zoology (5) NW
Comparative biology and morphology of invertebrates. Laboratory work emphasizes structures and functions. Emphasizes annelids and related worms, mollusks, and arthropods. Not open to students who have taken 430 or 432. Prerequisite: either BIOL 102, BIOL 202, or BIOL 220. Offered: irregularly.

BIOL 435 Biology of Eukaryotic Microbes (5) NW
Introduction to comparative biology of eukaryotic microbes known as protists (algae, certain fungi, and protozoa). Emphasis on the structure, reproductive characteristics, classification, phylogeny, physiology, development, biodiversity, and ecological roles of these microbes. Emphasis on examples most commonly used in contemporary biological research. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: irregularly.

BIOL 436 Advanced Systematics (5) NW
Analysis of characters and examination of evolutionary principles as they relate to systematic studies in vascular plants. Offered: irregularly. Prerequisite: BIOL 354.

BIOL 437 Origins of Our Modern Floras (5) NW
Evolution and biogeographic development of modern forest taxa and associations. Late Cenozoic forests (last 60 million years) of western North American environments, emphasizing geologic and climatic shifts that have shaped temperate and tropical vegetation. Three required weekend field trips. Prerequisite: either BIOL 117, BIOL 317, or BOTANY 113 and either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: irregularly.

BIOL 438 Biological Monitoring and Assessment (5) NW Karr
Explores the technical questions (conceptual, sampling, and analytical), the rationale, policy relevance, and legal basis for tools — existing and needed — to assess ecological health. Prepares students to see the biological components of ecological systems in diverse ways. Offered: jointly with FISH 438.

BIOL 440 General Mycology (5) NW Ammirati
General survey of the fungi with emphasis on life cycles, structure, physiology, economic importance. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: W.

BIOL 441 Morphology and Anatomy of Land Plants (5) NW
Comparative morphology and anatomy of land plants. Derivation of morphological structures and basis for current classification schemes examined using living and fossil organisms. Laboratories emphasize live plants native to the Pacific Northwest. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; recommended BIOL 317. Offered: A.

BIOL 442 Mushrooms and Related Fungi (5) NW Ammirati
General biology, ecology, and classification of mushrooms, polypores, puffballs, and other related basidiomycetes. Emphasis on Pacific Northwest species. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; recommended BIOL 440. Offered: S.

BIOL 443 Natural History of Mammals (5) NW Kenagy
Field, lecture, and laboratory course introducing mammals in a general biological context, emphasizing ecology, evolution, behavior, morphology, and adaptation to the environment. Includes required weekend field trips, for which students may be required to share a portion of transportation costs. Prerequisite: either BIOL 354 or BIOL 356. Offered: A.

BIOL 444 Natural History of Birds (5) NW Wingfield
Field, lecture, and laboratory study of birds framed in biological theory rather than taxonomy. Breeding systems, brood parasitism, appearance, molt, migration, orientation, social behavior, song, and flight are emphasized. Includes Saturday and weekend field trips for which students are required to share a portion of transportation costs. Prerequisite: BIOL 220; recommend BIOL 350 or BIOL 356. Offered: irregularly.

BIOL 445 Marine Botany (8) NW
Survey of plants represented in marine environments; natural history; ecology, distribution, habitat, adaptation, and trophic interrelationships. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; BIOL 430/ZOOL 430, which may be taken concurrently. Offered: at Friday Harbor Laboratories; Sp.

BIOL 446 Biology of Algae (5) NW Cattolico, Waaland
Study of major algal groups emphasizing form, function, reproduction, distribution, biodiversity, and ecological roles in coastal, oceanic, and global ecosystems. Topics include classification, cellular and organismal features, phylogeny, and evolution of major algal groups. Emphasizes economically useful and ecologically important algae. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: Sp.

BIOL 448 Marine Algal Ecology (3) NW Waaland

BIOL 451 Invertebrate Paleontology (5) NW Ward
Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Offered: jointly with ESS 451; W.

BIOL 452 Vertebrate Zoology (5) NW
The biology of vertebrate animals, emphasizing their diversity, adaptations, and evolutionary history. Introduces aspects of behavior, physiology, morphology, and ecology that emerge from the comparative study of vertebrates. Laboratory includes local field trips, films, and introduction to regional vertebrate fauna. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or both BIOL 202 and BIOL 203. Offered: S.

BIOL 453 Comparative Anatomy of Vertebrates (5) NW
Comparison of the structure of vertebrate organ systems: integument, skeletal, muscle, digestive, respiratory, cardiovascular, urinary, and reproductive, with an emphasis on evolutionary trends. Prerequisite: BIOL 350. Offered: W.

BIOL 454 Entomology (3) NW
Biologicalsurvey of terrestrial arthropods, with emphasis on insects. Structure, classification, physiology, and ecology of insects. Interrelationships of insects and man. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or both BIOL 202 and BIOL 203. Offered: W.

BIOL 455 Entomology Laboratory (2) NW
Structure and function of arthropods, with emphasis on insects. Field studies and taxonomy of important insect groups. Students may be required to share a portion of the transportation costs of field trips. Prerequisite: BIOL 454 which may be taken concurrently. Offered: Sp.

BIOL 456 Vegetation of Western Washington (5) NW del Moral
Vegetation of western Washington, including mature, seral, and weedy vegetation. Recognition of landscape patterns, sight identification of common and indicator species, classification of major community types, and uses of native species in landscape design. Four weekend field trips required. Prerequisite: either BIOL 117 or BIOL 317. Offered: even years; Sp.

BIOL 459 Developmental Neurobiology (3) NW Bosma, Perkel
Invertebrate and vertebrate examples illustrate the mechanisms used in constructing nervous systems. Focus on the cellular and molecular mechanisms that underlie questions about the basis of neuronal diversity, axonal pathfinding and target recognition, synaptogenesis, and activity-dependent plasticity. Prerequisite: either BIOL 350 or BIOL 355. Offered: W, every year.

BIOL 460 Mammalian Physiology (3) NW
Principles of mammalian physiology with special emphasis on the cardiac, respiratory, renal systems taught at the organ and organ systems level. Prerequisite: BIOL 350. Offered: Sp.

BIOL 461 Neurobiology (3) NW Bosma, Perkel
Broad examination of integrative mechanisms in central nervous system function, with emphasis on sensory processing, plasticity, and control of behavior. Examples are taken from a variety of animal groups. Prerequisite: BIOL 350; either PHYS 115 or PHYS 122. Offered: W, even years.

BIOL 462 Advanced Animal Physiology (3) NW Huey, Wenderoth
Physiology at levels of organisms and behavior, organ systems, and cells — an evolutionary and integrative perspective. Organismal physiology: metabolism, temperature, locomotion, osmoregulation, respiration, circulation, digestion. Prerequisite: either BIOL 202 or BIOL 220; either BIOL 350 or BIOL 460; either CHEM 152, CHEM 155, CHEM 160, CHEM 162, CHEM 164, CHEM 165, or CHEM 220; either PHYS 114 or PHYS 121. Offered: A.

BIOL 463 Advanced Animal Physiology Lab (3) NW Huey, Wenderoth
Experimental design and techniques, data analysis, written reports. Original project labs and experiments in physiology. Prerequisite: BIOL 462, which may be taken concurrently. Offered: A.

BIOL 464 Invertebrate Endocrinology (3) NW
Survey of endocrine mechanisms used by invertebrate groups to regulate homeostasis, growth, reproduction, and behavior. Special emphasis given to invertebrate model systems that provide unique insights into basic biological processes. Prerequisite: either BIOL 350 or BIOL 355; recommended BIOL 405 or BIOL 411. Offered: Sp, every year.

BIOL 465 Comparative Endocrinology (3) NW Wingfield
Hormonal integration of living processes at all levels in animals: molecules, cells, organs, organisms, populations. Prerequisite: BIOL 350. Offered: A.

BIOL 466 Comparative Endocrinology Laboratory (2) NW Wingfield
A broad introduction to endocrine techniques with appropriate experiments to accompany and enlarge on material presented in BIOL 465. Prerequisite: BIOL 465, which may be taken concurrently. Offered: A.

BIOL 467 Comparative Animal Reproduction (3) NW Ramenofsky, Wingfield
Reproductive mechanisms, environmental influences on reproductive endocrinology, physiology, behavior, ecology of vertebrates. Discussions extend from organismal to cellular level, and focus on diversity of reproductive patterns among vertebrates. Prerequisite: BIOL 350; recommended: BIOL 465. Offered: Sp.

BIOL 468 Comparative Animal Reproduction Laboratory (3) NW Ramenofsky, Wingfield
Laboratory and field studies on animal reproduction involving endocrinology, anatomy, behavior, and ecology. Accompanies, supplements, and extends material presented in 467. Prerequisite: BIOL 467, which may be taken concurrently. Offered: Sp.

BIOL 469 Experiments in Animal Physiology (2) NW Riddiford, Truman
Experimental design and techniques, data analysis, written reports. Experiments in integrative physiology. Prerequisite: BIOL 350; either PHYS 115 or PHYS 122. Offered: irregularly.

BIOL 470 Biogeography (4) NW
Analysis of historical and ecological determinants of current and past distributions of organisms. Integrates techniques developed by taxonomists, paleontologists, geologists, evolutionists, ecologists, and biogeographers to elucidate relationships between geographical distributions and continental drift, ecological interactions, climate, and dispersal abilities of organisms. Not available for credit if credit has previously been given for ZOOL 475. Recommended: one year college biology; background in ecology and evolution. Offered: irregularly.

BIOL 471 Plant Ecology (5) NW
Basic concepts of plant ecology, including studies of the environment, plant-environment interactions, populations, communities, and ecosystems. Laboratory includes one weekend field trip, laboratory and greenhouse experiments, and an introduction to ecological problem solving. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: irregularly.

BIOL 472 Community Ecology (4) NW
Explores the complexity of biological communities and interactions of plant, animal, and microbes in marine, freshwater, and terrestrial ecosystems. Promotes synthetic and integrative thinking in the environmental sciences through the study of theoretical and empirical issues and original research data. Prerequisite: BIOL 356; recommended: solid foundation in math and physics. Offered: irregularly.

BIOL 473 Limnology (3) NW Schindler
Ecology, conservation and management of inland aquatic ecosystems. Explores interactions among biological, chemical and physical features of lakes and other aquatic habitats. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: jointly with FISH 473; A.

BIOL 474 Limnology Laboratory (2) NW Schindler
Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL 473, which may be taken concurrently. Offered: jointly with FISH 474; A.

BIOL 475 Animal Migration (3) NW
Undergraduate seminar on evolution, ecology, behavior, and physiology of migration. Student presents a seminar and leads class discussion on a selected topic. Prerequisite: either BIOL 102, BIOL 162, BIOL 203, or BIOL 220; recommended: course in physiology, ecology, or animal behavior.

BIOL 476 Conservation Biology (5) NW Boersma
Explores biological, managerial, economic, and ethical concepts
affecting survival of species. Applications of ecology, biogeography, population genetics, and social sciences for the preservation of species in the face of widespread global habitat modification, destruction, and other human activities. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: AS.

BIOL 477 Marine Conservation (3) NW
Terrestrially based concepts of conservation biology applied to marine systems. Human activities affecting the marine environment including fishing and pollution; influence of legal and cultural frameworks; and ecosystem management. Prerequisite: BIOL 476. Offered: irregularly.

BIOL 478 Topics in Sustainable Fisheries (3, max. 9) I&S/NW Parrish
Seminar series featuring local, national and internationally known speakers in fisheries management and conservation. Case studies. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Final paper. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with ENVIR/FISH 478; odd years; W.

BIOL 479 Alpine Plant Ecology (5) NW
Structure of plant communities in alpine regions of the Pacific Northwest. Characteristics of physical environment which influence species adaptation and distribution. Influence, impact of humans and criteria for preservation and/or management of alpine areas. Three weekend field trips required. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: irregularly.

BIOL 480 Field Ecology (4) NW Boersma
Field projects examining ecological and behavioral topics such as foraging and social behavior, species interactions, and structure of terrestrial and aquatic communities. Two weekend field trips required. Prerequisite: either BIOL 356 or BIOL 472. Offered: Sp.

BIOL 482 Microscopy and Photography for Biologists (3) NW Waaland
Principles and practice of light microscopy, photomicrography, and scientific photography. Illumination systems, bright field, phase-contrast, dark field, fluorescence and other microscopical techniques. Photographic and video image recording of microscopic and macroscopic scientific specimens. Offered: irregularly.

BIOL 484 Senior Seminar in Evolution and Systematics (1-3, max. 9) NW
Supervised readings and group discussion. Prerequisite: BIOL 354.

BIOL 485 Senior Seminar in Cellular, Molecular and Developmental Biology (1-3, max. 9) NW
Supervised readings and group discussion. Prerequisite: BIOL 355.

BIOL 486 Senior Seminar in Ecology (1-3, max. 9) NW
Supervised readings and group discussion. Prerequisite: BIOL 356.

BIOL 487 Senior Seminar in Conservation Biology (1-3, max. 9) NW
Supervised readings and group discussion. Recommended: one upper division course in ecology or conservation biology.

BIOL 488 Senior Seminar in Physiology (1-3, max. 9) NW
Supervised readings and group discussion. Prerequisite: BIOL 350.

BIOL 489 Senior Seminar in Plant Biology (1-3, max. 9) NW
Supervised readings and group discussion. Recommended: one upper division course emphasizing plant biology

BIOL 490 Undergraduate Seminar (1-3, max. 6) NW
Supervised readings and group discussion of selected topics of broad biological significance. Prerequisite: BIOL 102, BIOL 162, BIOL 203, or BIOL 220.

BIOL 491 Special Topics in Biological Science for Teachers (1-9, max. 9) NW
Study of selected areas of biology. Designed to enhance the skills and background of K-12 teachers. Credit/no credit only. Recommended: teaching experience.

BIOL 492 The Teaching of Biology (2)
Basic course in the teaching of biology in the secondary school. Designed to help preservice teachers identify useful laboratory techniques, materials, and content for the teaching of pre-college biology. Special attention to current issues in biology education. Required for biology students in Teacher Certification Program.

BIOL 493 Study Abroad — Advanced Biology (1-15, max. 15) NW
For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval.

BIOL 496 Peer Teaching Assistants in Biology (1-5, max. 10)
Direct experience in the classroom, typically teaching a lab section of BIOL 100. Peer Teaching Assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material as well as training in teaching techniques and approaches. Credit/no credit only. Prerequisite: either BIOL 102, BIOL 162, BIOL 220, or both BIOL 202 and BIOL 203. Offered: AWSp.

BIOL 497 Special Topics in Biology (1-5, max. 10) NW

BIOL 498 Library Research (1-5, max. 10)

BIOL 499 Undergraduate Research (1-15, max. 15)

BIOL 500 Topics in Biology (1-3, max. 16)

BIOL 505 Problems in Biological Instruction (1-3, max. 3)

BIOL 510 Seminar in Mathematical Biology (1-3, max. 15)
Bergstrom, Daniel, Granbaum, Kot, Odell, Thompson Seminar on a topic of current interest in mathematical biology. Graduate status required, or permission of instructor for undergraduates.

BIOL 511 Topics in Mathematical Biology (1-3, max. 15)
Discussion of current topics in mathematical biology. Graduate status required, or permission of instructor for undergraduates.

BIOL 520 Departmental Seminar (1, max. 18)
Credit/no credit only. Offered: AWSp.

BIOL 533 Advanced Invertebrate Zoology (9)
Invertebrate fauna of the San Juan Archipelago. Topic changes from year to year. Individual research projects are emphasized. Prerequisite: course in invertebrate zoology and permission of Director of Friday Harbor Laboratories. Offered: at Friday Harbor Laboratories; SpS.

BIOL 536 Comparative Invertebrate Embryology (9)
Diversity in developmental patterns in major marine taxa. Analysis of evolutionary changes in development. Emphasis on observation of live embryos and larvae. Prerequisite: permission of Director of Friday Harbor Laboratories; recommended: courses in invertebrate zoology and developmental biology. Offered: at Friday Harbor Laboratories; SpS.

BIOL 538 Advanced Invertebrate Physiology (9)
General and comparative aspects of nerve and muscle physiology with particular emphasis upon neuronal control of behavior, neuronal interactions, and other advanced topics determined by
visiting faculty. Extensive laboratory experience, including intracellular and extracellular stimulating and recording techniques. Offered: at Friday Harbor Laboratories; Sp.

BIOL 540 Seminar in Molecular, Cellular, and Developmental Biology (1-3, max. 15)
Weekly discussions of past and current scientific literature in cell, molecular, and/or developmental biology, review of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 541 Topics in Molecular, Cellular, and Developmental Biology (1-3, max. 15)
Focused discussion of on-going cell, molecular, or developmental biology research occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.

BIOL 542 Analysis of Development (1-3, max. 15)
Analysis of structural, physiological, and molecular levels of developmental processes, including gametogenesis, fertilization, cell and tissue movements, induction, and cytodifferentiation. Graduate standing or permission of instructor.

BIOL 543 Biology of Drosophila Seminar (1, max. 12)
Weekly presentation by participants of classical literature, current literature, and research in the molecular biology, developmental biology, neurobiology, and genetics of Drosophila. Prerequisite: permission of instructor. Offered: AWSp.

BIOL 546 Experimental Design in Cell Biology (1.5)
Wakimoto, Wright, Hille, Cooper
Focusses on experimental design in cell biology. A topic of current research interest is covered in depth in order to follow a line of investigation and critically evaluate the strengths and limitations of various experimental strategies. Offered: jointly with CONJ 536; W.

BIOL 550 Seminar in Evolution and Systematics (1-3, max. 15)
Weekly discussions of past and current scientific literature in evolution and/or systematics, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor of undergraduates.

BIOL 551 Topics in Evolution and Systematics (1-3, max. 15)
Focused discussion of on-going research in evolution and/or systematics occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.

BIOL 552 Advanced Evolution (3)
Successful analytical approaches to understanding evolutionary patterns and the processes that generate them, examined by using a wide array of empirical and theoretical tools. Survey of how theory, modeling, and statistics can be applied to observations and experiments in evolutionary biology. Graduate standing required.

BIOL 560 Seminar in Ecology (1-3, max. 15)
Weekly discussions of past and current scientific literature in ecology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 561 Topics in Ecology (1-3, max. 15)
Focused discussion of on-going research in ecology occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.

BIOL 562 Advanced Ecology (3)
Successful analytical approaches to understanding ecological patterns and the mechanisms that generate them, examined by using a wide array of empirical and theoretical tools. Applying theory, modeling, and statistics to empirically derived data to providing insight and solutions to key environmental problems. Graduate standing required.

BIOL 570 Seminar in Conservation Biology (1-3, max. 15)
Weekly discussions of past and current scientific literature in conservation biology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 571 Topics in Conservation Biology (1-3, max. 15)
Focused discussion of on-going research in conservation biology occurring in the instructor’s laboratory. Graduate status required, or permission on the instructor for undergraduates.

BIOL 572 Science and Environmental Policy (3-5, max. 5)

BIOL 580 Seminar in Physiology (1-3, max. 15)
Weekly discussions of past and current scientific literature in physiology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Graduate status required, or permission of instructor for undergraduates.

BIOL 581 Topics in Physiology (1-3, max. 15)
Focused discussion of on-going research in physiology occurring in the instructor’s laboratory. Graduate status required, or permission of instructor for undergraduates.

BIOL 590 Seminar in Organismal Biology (1-3, max. 15)
Weekly discussions of past and current scientific literature in organismal biology, reviews of the state of the field, and presentation of research results. Discussions may cover the full breadth of the discipline or focus on selected topics. Prerequisite: graduate standing, or permission of instructor for undergraduates.

BIOL 591 Topics in Organismal Biology (1-3, max. 15)
Focused discussion of on-going research in organismal biology occurring the the instructor’s laboratory. Prerequisite: graduate standing, or permission of instructor for undergraduates.

BIOL 600 Independent Study or Research (1-9, max. 9)
Credit/no credit only.

BIOL 700 Master’s Thesis (*)
Credit/no credit only. Offered: AWSpS.

BIOL 800 Doctoral Dissertation (*)
Credit/no credit only. Offered: AWSpS.

Course Descriptions

CS&SS 320 Evaluating Social Science Evidence (5) I&S, QSR
A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates “facts and findings” by understanding the strengths and weaknesses of the methods that produce them. Case
CS&SS 321 Case-Based Social Statistics I (5) I&S, QSR
Handcock
Introduction to statistical reasoning for social scientists. Built around cases representing in-depth investigations into the nature and content of statistical and social-science principles and practice. Hands-on approach: weekly data-analysis laboratory. Fundamental statistical topics: measurement, exploratory data analysis, probabilistic concepts, distributions, assessment of statistical evidence. Offered: jointly with SOC/STAT 321; W.

CS&SS 322 Case-Based Social Statistics II (5) I&S, QSR
Handcock
Continuation of CS&SS/SOC/STAT 321. Progresses to questions of assessing the weight of evidence and more sophisticated models including regression-based methods. Built around cases investigating the nature and content of statistical principles and practice. Hands-on approach: weekly data analysis laboratory. Offered: jointly with SOC/STAT 322; Sp.

CS&SS 481 Introduction to Mathematical Statistics (5) NW
Probability, generating functions; the d-method, Jacobians, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 580.) Prerequisite: STAT/ECON 311; either MATH 136 or MATH 126 with either MATH 308 or MATH 309. Recommended: MATH 324. Offered: jointly with ECON/STAT 481; A.

CS&SS 501 Advanced Political Research Design and Analysis (5) I&S
Third methods course in political research. Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to recent developments in the field and with interests of instructor. Offered: jointly with POL S 501.

CS&SS 503 Advanced Quantitative Political Methodology (5)
Quinn, Ward
Theory and practice of likelihood inference. Topics covered include probability modeling, maximum likelihood estimation, models for binary responses, count models, sample selection, and basis time series analysis. Prerequisite: POL S 500; POL S 501. Offered: jointly with POL S 503.

CS&SS 504 Applied Regression (4)

CS&SS 505 Review of Mathematics for Social Scientists (1)
Reviews basic mathematical skills needed for a meaningful understanding of elementary statistics, data analysis, and social science methodology. Overview of core knowledge required for graduate courses in quantitative methods in social sciences. Topics include discrete mathematics, differential and integral calculus, review of matrix algebra, and basic probabilistic and statistical concepts. Offered: Sp.

CS&SS 506 Computer Environments for the Social Sciences (1)
Familiarizes graduate students in the social sciences with modern environments for statistical computing. Provides an overview of available resources and a description of fundamental tools used in quantitative courses and doctoral research. Topics include interfaces to Web-based resources, UNIX-based computing, and major statistical packages (R, SPLUS, SAS, and SPLUS). Offered: W.

CS&SS 507 Methodology: Quantitative Techniques in Sociology (3) I&S
Applied regression analysis with emphasis on interactive computer graphics techniques and interpretation. Application to typical sociological problems. Offered: jointly with SOC 506; A.

CS&SS 508 Introduction to R for Social Scientists (1)
Handcock
Familiarizes students with the R environment for statistical computing (http://www.r-project.org). R is a freely available, multi-platform, and powerful program for analysis and graphics similar to S-PLUS. Covers the basics of organizing, managing, and manipulating social science data; basic applications; introduction to programming; links to other major statistical packages. Offered: A.

CS&SS 526 Structural Equation Models for the Social Sciences (3)
Structural equation models for the social sciences, including specification, estimation, and testing. Topics include path analysis, confirmatory factor analysis, linear models with latent variables, MIMIC models, non-recursive models, models for nested data. Emphasizes applications to substantive problems in the social sciences. Prerequisite: SOC 424, SOC 425, SOC 426 or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 529.

CS&SS 529 Sample Survey Techniques (3)
Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with BIOST 529/STAT 529.

CS&SS 536 Log-Linear Modeling and Logistic Regression for the Social Sciences (3)
Log-linear modeling of multidimensional contingency tables. Logistic regression. Applications to social mobility, educational opportunity, and assortative marriage. Applied and computing focus. Prerequisite: SOC 424, SOC 425, SOC 426, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 536/STAT 536.

CS&SS 544 Event History Analysis of Social and Spatial Change (5)
Withers
Examines life course research using event-history analysis with applications to the substantive areas of household dynamics, family formation and dissolution, marriage, cohabitation, and divorce, migration histories, residential mobility, and housing careers. Examines continuous- and discrete-time longitudinal models during practical laboratory sessions. Offered: jointly with GEOG 544.

CS&SS 560 Hierarchical Modeling for the Social Sciences (4)
Explores ways in which data are hierarchically organized, such as voters nested within electoral districts that are in turn nested within states. Provides a basic theoretical understanding and practical knowledge of models for clustered data and a set of tools to help make accurate inferences. Prerequisite: SOC 424-425-426 or equivalent; recommended: CS&SS 505-506 or equivalent. Offered: jointly with STAT 560.

CS&SS 564 Bayesian Statistics for the Social Sciences (4)
Statistical methods based on the idea of probability as a measure of uncertainty. Topics covered include subjective notion of probability, Bayes’ Theorem, prior and posterior distributions, and data analysis techniques for statistical models. Prerequisite: SOC 424-425-426 or...
equivalent; recommended: CS&SS 505; CS&SS 506. Offered: jointly with STAT 564.

CS&SS 565 Inequality: Current Trends and Explanations (3)  
Morris  
Discussion of recent growth in economic inequality in the U.S. and competing explanations for these new trends through examination of labor market demographics, industrial composition and restructuring, and the broader political context that impacts policies like minimum wage, strength of unions, and foreign trade. Prerequisite: SOC 424, SOC 425, SOC 426, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 565.

CS&SS 566 Causal Modeling (4)  
Construction of causal hypotheses. Theories of causation, counterfactuals, intervention vs. passive observation. Contexts for causal inference: randomized experiments; sequential randomization; partial compliance; natural experiments, passive observation. Path diagrams, conditional independence and d-separation. Model equivalence and causal under-determination. Prerequisite: course in statistics, SOC 424-425-426 or equivalent; recommended: CS&SS 505-506 or equivalent. Offered: jointly with STAT 566.

CS&SS 567 Statistical Analysis of Social Networks (4)  
Statistical and mathematical descriptions of social networks. Topics include graphical and matrix representations of social networks, sampling methods, statistical analysis of network data, and applications. Prerequisite: SOC 424-425-426 or equivalent; recommended: CS&SS 505; CS&SS 506. Offered: jointly with STAT 567.

CS&SS 568 Statistical Analysis of Game-Theoretic Data (5)  
Quinn  
Provides students tools to derive appropriate statistical models from game-theoretic models of behavior. Topics include review of non-cooperative game-theory, quantal-response equilibria, analysis of experimental game data, analysis of observational game data, non-parametric and semi-parametric methods. Prerequisite: POL S 494, POL S 559. Offered: W.

CS&SS 589 Multivariate Data Analysis for the Social Sciences (3, max. 6)  
Erosheva  
Provides social scientists with an introduction to multivariate analysis techniques and the knowledge to carry them out. Focuses on statistical methods that explore relationships between observed variables. Topics include principal components, cluster, factor, latent class analysis. Prerequisite: SOCWL 587, 588, or equivalent. Offered: jointly with SOC WL 589; A.

CS&SS 590 CSSS Seminar (1, max. 20)

CS&SS 594 Special Topics in Social Science and Statistics (1-5, max. 30)  
Topics vary. Prerequisite: permission of instructor. Offered: AWSp.

Center for Studies in Demography and Ecology  
Course Descriptions

CSDE 501 Population Studies Seminar Series (1)  
CSDE affiliates and visitors present current research projects. Credit/no credit only. Offered: AWSp.

CSDE 502 Population Studies Proseminar (1)  
Professional training in demography and populations studies. Includes ethics in population research, human subjects review, proposal application and writing. DSDE faculty research specialization, and research preparation and presentation. Credit/no credit only. Offered: AWSp.

CSDE 595 Special Topics in Population Studies (3)

Examination of current substantive and methodological topics in demography. Content varies according to recent developments in the field and interest of the instructor.

Center for the Humanities  
Course Descriptions

HUM 200 Issues in the Humanities (1-5, max. 15) I&S/VLPA  
Topics and issues of current interest in the humanities and the study of the arts. Features numerous guest lecturers from the U.W. faculty together with distinguished visiting teachers, scholars, and artists.

HUM 201 Introduction to Studies in the Humanities (5)  
VLPA  
Focuses on the interdisciplinary nature of the humanities with an emphasis on writing. Team-taught lectures and discussion sections for freshmen. Offered: A.

HUM 202 Introduction to Themes in the Humanities (5)  
VLPA/I&S  
Focuses on the interdisciplinary nature of the humanities with an emphasis on writing. Investigation of forms and methods the humanities employ to explore life’s biggest questions. Team-taught lectures and discussion sections for freshmen. Offered: W.

HUM 203 Introduction to Historical and Cultural Contexts in the Humanities (5) VLP/A/I&S  
Focuses on the interdisciplinary nature of the humanities with an emphasis on writing. Historical and cultural contexts of the humanities and emergence of humanistic themes in particular geographies or among specific cultures or groups. Team-taught lectures and discussion sections for freshmen. Offered: Sp.

Investigates the complex relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic disciplines. Offered: jointly with RELIG/NEAR E 205; W.

HUM 210 Texts in Context (5, max. 15) I&S/VLPA  
Links a single, major work from any medium, or a narrowly bounded group of closely related, smaller works, to the cultural, intellectual, and historical circumstances of its creation and interpretation. Emphasizes close-reading and careful writing.

HUM 220 Themes in Time and Culture (5, max. 15) I&S/ VLPA  
Traces the articulation and development of a single overarching idea in different idioms, cultures and eras. Asks how, and if, notions that are fundamental to one era or culture find expression in other times and places. Emphasizes comparative analysis and careful writing.

HUM 411 Applications of Digital Technologies to Humanities Research (5) VLPA  
Hands-on project-based approach to imaging, new media, text, databases, metadata and accessibility, rights management, and other issues central to contemporary humanities research. Offered: jointly with DXARTS 411.

HUM 498 Special Topics in the Humanities (1-5, max. 15) I&S/VLPA  
Examination of selected topics in the humanities and the study of the arts. Taught by U.W. faculty and visiting scholars and artists.

HUM 520 Seminar in Textual Theory (5)  
Introduction to the theoretical perspectives that have shaped the emerging interdisciplinary field of Textual Studies. Included in curriculum of Textual Studies Program.
HUM 521 Seminar in Scribal Texts (5)
Relationship between oral and written texts and of the social and cultural systems which enable their production, transmission, and preservation. Included in curriculum of Textual Studies Program.

HUM 522 Seminar in Printed Texts (5)
Study of printing as a means of textual transmission in the ages of the hand press, machine press, and electronic press; of current theories of editing; and of preparing critical editions of printed texts.

HUM 523 Seminar in Hypertext and Textual Studies (5)
Several views of hypertext conceptually explored as a basis for research and evaluation of selected hypertext works. Includes initiating the construction of a World Wide Web hypertext of resources for the study of oral, graphical, hand-written, and printed texts. Included in curriculum of Textual Studies Program.

HUM 596 Humanities Research Seminar (1-5, max. 15)
Exploration of current research in the Humanities and the study of the arts. Offered by specially selected U.W. faculty and visiting scholars in the arts and humanities.

Chemistry
109 Bagley
Chemistry is a branch of natural science that deals principally with the properties of molecules, the chemical reactions that occur between them, and the natural laws that describe molecular interactions. Chemistry is a central science, having strong interactions with biology, medicine, earth and environmental sciences, physics, and mathematics.

Undergraduate Program
Adviser
109 Bagley, Box 351700
206-616-9880, 206-543-9343
advisers@chem.washington.edu

The Department of Chemistry offers the following programs of study:
- The Bachelor of Arts degree with a major in chemistry
- The Bachelor of Science degree with a major in chemistry - ACS certified
- The Bachelor of Science degree with a major in chemistry with a minor in chemistry

The Bachelor of Science degree is designed primarily for those who wish to pursue a career in chemistry or a career in which chemistry plays a central role.

The department offers two Bachelor of Science degrees. The Bachelor of Science with a major in chemistry (ACS certified) meets guidelines established by the American Chemical Society (ACS). It provides an extensive education in all branches of chemistry and also emphasizes laboratory training. The non-certified major does not emphasize laboratory work as strongly, offers more options among chemistry courses, and allows more flexibility in incorporating coursework outside of chemistry.

The Bachelor of Arts in chemistry fills the needs of students whose chosen career requires a strong background in chemistry with additional expertise in other disciplines.

Bachelor of Science

Suggested First- and Second-Year Courses: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course. PHYS 121 sequence recommended); courses in linear algebra and differential equations.

Department Admission Requirements
Students in good academic standing may declare this major at any time.

Major Requirements

Chemistry (ACS-Certified)
94 credits as follows:
Core Courses:

General Chemistry: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165)
Organic Chemistry: CHEM 237, CHEM 238, CHEM 239, CHEM 241, and CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346 and CHEM 347)
Inorganic Chemistry: CHEM 312, CHEM 317, CHEM 321, and CHEM 416 (students completing CHEM 165 are exempt from CHEM 312)
Analytical Chemistry: CHEM 321, CHEM 426
Physical Chemistry: CHEM 455, CHEM 456, and CHEM 457 (or CHEM 475, CHEM 476, and CHEM 477), CHEM 461
Biochemistry: BIOC 405 (students should contact adviser regarding alternative prerequisites for BIOC 405)

5 credits of numerically graded CHEM or BIOC 400-level courses (not previously listed) which must include CHEM 426 and CHEM 461 and one more course with laboratory (currently CHEM 462, CHEM 463, CHEM 464, and CHEM 465)

Strongly recommended, research credits in CHEM 399 and CHEM 499

MATH 124, MATH 125, MATH 126 and two additional math courses above 300 (recommended MATH 307 and MATH 308, or AMATH 351 and AMATH 352); (alternative math requirement: MATH 134, MATH 135, MATH 136)

PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.

Minimum grade of 2.0 is required in each chemistry course; a minimum GPA of 2.80 is required for courses used to satisfy the major degree requirements; a minimum overall cumulative GPA of 2.80 and minimum 184 credits required for graduation.

Chemistry
91 credits as follows:
Core Courses:

CHEM 142, CHEM 152, CHEM 162, and CHEM 312 (or CHEM 145, CHEM 155, CHEM 165, and CHEM 416)
CHEM 237, CHEM 238, CHEM 239, and CHEM 241 (or CHEM 335, CHEM 336, CHEM 337, and CHEM 346)
CHEM 455, CHEM 456, and CHEM 457 (or CHEM 475, CHEM 476, and CHEM 477)

Two of the following three: CHEM 317, CHEM 321, or CHEM 461 (CHEM 461 for 4 credits only)

5 additional lab credits chosen from the following: CHEM 242, CHEM 317, CHEM 321, CHEM 347, CHEM 426, CHEM 461, CHEM 462, CHEM 463, CHEM 464, CHEM 465, and BIOC 426

11 credits chosen from CHEM 242, CHEM 317, CHEM 321, CHEM 347, any 400-level numerically graded chemistry or biochemistry courses, or MATH 307 (or AMATH 351).
Students with chemistry GPA of 3.30 or higher may apply up to 6 credits of CHEM 399, CHEM 496, or CHEM 499 of approved research (but CHEM 498 may not be used to satisfy this requirement).

MATH 124, MATH 125, MATH 126 and one course above 300 (recommended: MATH 308 or AMATH 352);
alternative MATH requirement: MATH 134, MATH 135, MATH 136.

PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.

Minimum grade of 2.0 is required in each chemistry course;
minimum GPA of 2.80 is required for all CHEM, MATH, and PHYS courses used to satisfy major requirements.

For graduation, a minimum of 181 credits is required with an overall cumulative GPA of 2.80.

**Bachelor of Arts**

* Suggested First- and Second-Year Courses: CHEM 142, CHEM 152, CHEM 162 (CHEM 145, CHEM 155, CHEM 165), CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347).

MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), PHYS 121, PHYS 122, PHYS 123 (PHYS 114, PHYS 115, PHYS 116 plus one physics lab course; PHYS 121 sequence recommended).

**Department Admission Requirements**

Students in good academic standing may declare this major at any time.

**Major Requirements**

84 credits as follows:

- **Core Courses:**
  - CHEM 142, CHEM 152, CHEM 162, CHEM 312 (CHEM 145, CHEM 155, CHEM 165)
  - CHEM 321
  - CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)

  Either CHEM 317 or CHEM 461

  11 credits of numerically graded CHEM 400-level courses to include either CHEM 455, CHEM 456, CHEM 457 series, or CHEM 452, CHEM 453 series.

  MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)

  One year of physics including at least 1 credit of laboratory (PHYS 114, PHYS 115, and PHYS 116 and at least one of PHYS 117, PHYS 118, or PHYS 119; or PHYS 121, PHYS 122, and PHYS 123; PHYS 121 sequence recommended).

  Minimum GPA of 2.0 in chemistry courses counted toward major; and a minimum grade of 1.7 in all required chemistry courses.

**Minor**

*Minor Requirements:* 35-44 credits as follows:

  - One of the following two sequences
    - CHEM 142, CHEM 152, CHEM 162 and one of CHEM 223, CHEM 237 or CHEM 335
    - CHEM 145, CHEM 155, CHEM 165, and one of CHEM 223, CHEM 237, or CHEM 335
  - MATH 124 (or Q SCI 291 and Q SCI 292)
  - PHYS 114 or PHYS 121

  Three of the following four groups:

  - CHEM 312 (CHEM 165)
  - CHEM 321
  - One of CHEM 355, CHEM 452, CHEM 455, CHEM 456

  One of CHEM 224, CHEM 238, CHEM 336

  Minimum GPA of 2.00 for the minor and a minimum grade of 1.7 in each course presented for the minor.

**Student Outcomes and Opportunities**

- *Learning Objectives and Expected Outcomes:* At the conclusion of their studies, graduating chemistry majors should have a general knowledge of the basic areas of chemistry with a working knowledge of at least one area; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of chemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to chemistry majors.

Teaching high school chemistry, environmental or patent law practice, or working in the chemical industry in sales or management positions are career choices for which the B.A. in chemistry is generally useful.

- *Instructional and Research Facilities:* Departmental facilities include a spectroscopic and analytical instrumentation laboratory (NMR, GC-MS, X-Ray, IR), Chemistry Library, Center for Process and Analytical Chemistry (CPAC), Materials and Devices for Information Technology Research (MDITR), Center for Nanotechnology, and extensive computing capabilities. The department’s local area network (LAN) is extended through a fiber optic cable to the university-wide network that is connected to Internet, HEPNET, SPAN, and other national and international computer networks. The Chemistry Study Center offers assistance to students in 100 level chemistry courses and has 40 Pentium computers available to undergraduates taking chemistry courses.

- *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- *Research, Internships, and Service Learning:* No formal internship program. Students are encouraged to pursue national and regional internships. See advisers for information.

- *Department Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department advisers for more information.

- *Student Organizations/Associations:* Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors

  Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society

  The Free Radicals: a general undergraduate club for chemistry and biochemistry majors

Of Special Note:

- The B.S. degree in chemistry, Standard Option requires a minimum of 181 credits to graduate.

  The B.S. degree in Chemistry, ACS-Certified Option requires a minimum of 184 credits to graduate.

  The B.A. degree in Chemistry requires a minimum of 180 credits to graduate.
• Students are strongly encouraged to participate in undergraduate research.
• The maximum number of credits that may be earned combining CHEM 199 and CHEM 299 is 12; the maximum number of credits that may be earned combining CHEM 399 and CHEM 499 is 24.

**Graduate Program**

Graduate Program Coordinator  
109D Bagley, Box 351700  
206-543-4787  
graduate@chem.washington.edu

The Master of Science and Doctor of Philosophy programs are designed to lead to positions of leadership and independent investigation in research institutes, industrial laboratories, and government agencies, and as teachers, researchers, or administrators in colleges and universities in chemistry or allied fields.

Students can pursue research in the following areas of chemistry: analytical, bioanalytical, bioinorganic, bioorganic, biophysical, environmental, inorganic, medicinal, organic, organometallic, physical, polymer, process analytical, and theoretical.

Thesis research for the Master of Science degree and dissertation research for the Doctor of Philosophy degree will constitute an original contribution of knowledge worthy of report in the scientific literature.

**Master of Science**

**Admission Requirements:** Baccalaureate degree with major in chemistry or allied sciences; Graduate Record Examination.

**Graduation Requirements:** With Thesis — 36 approved credits with 18 in courses at the 500 level or above; 21 credits in courses at the 400 or 500 level taken for numerical grade; 9 credits in thesis research. Without Thesis — Same as with thesis, except that additional course work may be substituted for the required research. Minimum GPA of 3.00 required for both degrees.

**Doctor of Philosophy**

**Admission Requirements:** Same as for the Master of Science degree.

**Graduation Requirements:** 18-27 credits of approved courses at the 400 or 500 level, with a total minimum GPA of 3.00; candidacy examinations covering area of specialization; dissertation.

**Faculty**

**Professors**

Andersen, Niels H. * 1968; PhD, 1967, Northwestern University.
Andersen Research Group Home Page

Bartholomew, Glenn * 2004; Ph.D., 2002, University of California, Santa Barbara
Organic, Organic Synthesis, Materials

Callis, James B. * 1975; PhD, 1970, University of Washington
Instrumentation development, process analytical chemistry, non-invasive clinical chemistry.

Campbell, Charles T. * 1989; PhD, 1979, University of Texas (Austin)
Physical chemistry of solid surfaces: chemisorption, catalysis, and surface analysis.

Chiu, Daniel T. * 2000; PhD, 1998, Stanford University
Development of biophysical and bioanalytical tools for applications in genomics and proteomics.

Christian, Gary D. * 1972; PhD, 1964, University of Maryland
Electroanalysis, flow injection analysis, process control.

Dalton, Larry * 1998; PhD, 1971, Harvard University
Materials chemistry with particular emphasis on high technology electronic, electro-optic, and nonlinear optical materials and emphasis on nanoscale materials and architectural construction techniques.

Davidson, Ernest R. * 2002; PhD, Indiana University

Dovichi, Norman J. * 2001; PhD, University of Utah
Laser based microchemical analysis, capillary separation techniques, bioanalytical chemistry.

Drobný, Gary P. * 1982; PhD, 1981, University of California (Berkeley)
Two-dimensional and multiple quantum studies in nuclear magnetic resonance.

Engel, Thomas * 1980; PhD, 1969, University of Chicago
Surface chemistry and catalysis.

Epitcis, Nicholas D. * 1972; PhD, 1972, Princeton University
Applied quantum chemistry.

Floss, Heinz G. * 1987; PhD, 1961, Technical University of Munich (Germany)
Bioorganic and natural products chemistry.

Gamelin, Daniel * 2000; PhD 1997, Stanford University.
Physical Inorganic. Spectroscopy of metals involved in biological or materials-related redox and electron-transfer chemistry.

Gammon, Richard H. * 1989; PhD, 1970, Harvard University
Atmospheric, marine, and environmental chemistry; biogeochemical cycles, global climate change.

Gelb, Michael H. * 1985; PhD, 1982, Yale University
Mechanistic enzymology, bioorganic and medicinal chemistry.

Ginger, David S. * 2003; PhD, 2001, University of Cambridge
Physical and materials chemistry and nanotechnology.

Goldberg, Karen I. * 1995; PhD, 1988, University of California (Berkeley)
Organometallic chemistry: Synthesis, reactivity and studies of mechanisms.

Heinekey, D. Michael * 1991; PhD, 1982, University of Alberta (Canada)
Organometallic chemistry of the transition metals.

Hopkins, Paul B. * 1982; PhD, 1982, Harvard University
Organic synthesis, bioorganic chemistry.

Jenekhe, Samson * 2000; 1985, University of Minnesota
Electroluminescent Polymers for Displays, Self-Assembling Polymer Systems, Polymer Device Engineering, Tunable Optical Polymer Systems, and Polymer Nanophotonics

Jónsson, Hannes * 1988; PhD, 1985, University of California (San Diego)
Development of theoretical and computational methods, applications to materials and surface chemistry.

Kahr, Bart E. * 1996; Ph.D., 1988, Princeton University
Chemical Crystallography

Keller, Sarah L. * 2000; PhD, 1995, Princeton University
Biophysics of surfactant and self-assembling systems; in particular lipid bilayers and monolayers

...
Kovacs, Julia A. * 1988; PhD, 1986, Harvard University
Synthesis, structure, and reactivity of biologically relevant transition-metal complexes.

Kwiram, Alvin L. * 1970; PhD, 1963, California Institute of Technology
Molecular structure/dynamics in the solid state with emphasis on excited states, magnetic resonance.

Li, Xiaosong * 2005; PhD, 2003, Wayne State University
Theoretical and Computational Chemistry

Macklin, John W. * 1968; PhD, 1969, Cornell University
Spectroscopic studies of materials in condensed phase and in solutions.

Mayer, James M. * 1984; PhD, 1982, California Institute of Technology
Inorganic/organometallic chemistry, synthesis/mechanism of reactions of transition metal compounds.

Michael, Forrest * 2004; PhD, 2001, Harvard University

Palczewski, Krzysztof * 1998; PhD, 1986, Technical University of Wroclaw, Poland
Molecular events initiated by light in photoreceptor cells.

Prezhdo, Oleg * 1998; PhD, 1997, University of Texas at Austin
Theoretical understanding at the molecular level of chemical reactivity and energy transfer in complex condensed-phase chemical and biological environments.

Rathod, Pradipsinh K. * 2001; PhD, 1982, Oregon Health Sciences University
Bioorganic, medicinal, and functional genomics.

Raucher, Stanley * 1975; PhD, 1973, University of Minnesota
New methods in synthetic organic chemistry, total synthesis of natural products.

Reid, Philip J. * 1995; Ph.D., 1992, University of California (Berkeley)
Investigation of the ultrafast condensed-phase reaction dynamics of halogen-containing compounds with time- and frequency domain resonance Raman spectroscopy.

Reinhardt, William P. * 1991; PhD, 1968, Harvard University
Theoretical and computational chemistry with applications in chemistry and biophysics.

Robinson, Bruce H. * 1980; PhD, 1975, Vanderbilt University
Dynamics of Nucleic Acids, DNA Protein Recognition, Membrane Binding Proteins, and High Dipole-Moment Chromophore Ordering.

Ruzicka, Jaromir * 1987; PhD, 1963, Technical University of Prague (Czechoslovakia)
Analysis via flow injection for clinical research and industrial applications.

Sasaki, Tomikazu * 1989; PhD, 1985, Kyoto University (Japan)
Design and synthesis of functional proteins and protein mimetics.

Schurr, Michael J. * 1966; PhD, 1965, University of California (Berkeley)
Dynamics, structures, and energetics of linear and supercoiledDNAs; laser optical and nmr methods.

Synovec, Robert E. * 1986; PhD, 1986, Iowa State University
Laser-based liquid chromatography detectors, separation theory, analytical instrumentation.

Turecek, Frantisek * 1990; PhD, 1977, Charles University (Czechoslovakia)
Mass spectrometry and organic structural analysis.

Woodman, Darrell J. * 1965; PhD, 1965, Harvard University
Peptide synthesis, heterocyclic compounds, chemistry of ketoketenimines.

Varani, Gabriele * 2001; Ph.D., 1987, University of Milano
Xia, Younan * 1997; PhD, 1996, Harvard University
Materials and surface chemistry.

Zoller, William H. * 1984; PhD, 1969, Massachusetts Institute of Technology
Analytical, environmental, and nuclear chemistry.

Adjunct Faculty

Hakomori, Sen-Itiroh * 1967, (Adjunct); MD, 1951, Tohoku Imperial University (Japan)
Biochemistry and immunology of carbohydrate antigens on malignant and normal cells.

Jen, Alex K-Y. * 2000, (Adjunct); Ph. D.1984, University of Pennsylvania
Organic/Polymer Chemistry, Materials Science and Optical Science, Nanotechnology, DURINT Biomimetics

Klevit, Rachel E. * 1983, (Adjunct); DPhil, 1981, Oxford University (UK)
Molecular recognition, protein NMR.

Krohn, Kenneth A. * 1981, (Adjunct); PhD, 1971, University of California (Davis)
Chemistry, radiation oncology.

Olmstead, Marjorie A. * 1991, (Adjunct); PhD, 1985, University of California (Berkeley)
Experimental condensed-matter physics, surface and interface physics.

Parson, William W. * 1971, (Adjunct); PhD, 1965, Case Western Reserve University
Bioenergetics, with particular emphasis on photosynthesis, picosecond spectroscopy.

Stenkamp, Ronald E. * 1978, (Adjunct); PhD, 1975, University of Washington
Crystallography.

Stuve, Eric M. * 1985, (Adjunct); PhD, 1984, Stanford University
Catalytic and electrochemical surface science.

Trager, William F. * 1972, (Adjunct); PhD, 1965, University of Washington
Medicinal chemistry, bioanalytical chemistry drug metabolism.

Yager, Paul * 1987, (Adjunct); PhD, 1980, University of Oregon
Physical chemistry and applications of biomembranes.
Research Faculty

Abramson, Evan H. (Research)
Burgess, Lloyd W. (Research); PhD, 1985, Virginia Polytechnic University
Kaminsky, Werner (Research); PhD, 1990, University of Cologne

Lecturers

Nyasulu, Frazier W. 1991; PhD, 1985, University of Salford (UK), electroanalytical chemistry.

Emeritus Faculty

Charlson, Robert J. * 1962, (Emeritus); PhD, 1964, University of Washington
Atmospheric chemistry, aerosol physics, aerosol/cloud/climate interaction.

Crittenden, Alden L. * 1947, (Emeritus); PhD, 1947, University of Illinois
Mass spectra, solid electrode polarography.

Gouterman, Martin P. * 1966; PhD, 1958, University of Chicago
Electronic structure, spectra and luminescence of porphyrins, use of porphyrins as sensors.

Gregory, Norman W. * 1946, (Emeritus); PhD, 1943, Ohio State University
Structure and thermodynamic properties of inorganic substances, vaporization reactions.

Halsey, George D. * 1951, (Emeritus); PhD, 1948, Princeton University;
Surface absorption/interaction of rare gases, solid solutions of rare gases, catalysis, colloids.

Kowalski, Bruce R. * 1973; PhD, 1969, University of Washington
Analytical chemometrics, computerized instrumentation for process monitoring and control.

Pocker, Yeshayau * 1961, (Emeritus); PhD, 1953, University College, London (UK)
Organic reaction mechanisms, chemical and enzymatic catalysis, metalloenzymes.

Rabinovitch, B. Seymour * 1948, (Emeritus); PhD, 1942, McGill University (Canada)
Chemical dynamics, energy relaxation, properties of silver surfaces.

Rose, Norman J. * 1966; PhD, 1960, University of Illinois
Design, synthesis, and study of coordination compounds of transition metals, including lanthanides.

Schubert, Wolfgang M. * 1947, (Emeritus); PhD, 1947, University of Minnesota
Mechanism/steric course of organic reactions, subsituent and solvent effects, acid-base catalysis.

Vandenbosch, Robert * 1963, (Emeritus); PhD, 1957, University of California (Berkeley)
Nuclear studies, particularly fission and nuclear reaction mechanisms; heavy ion reactions.

Course Descriptions

CHEM 110 Introduction to General Chemistry (3) NW
Introduction to general chemistry with an emphasis on developing problem solving skills. Covers basic concepts of chemistry along with the mathematics required for quantitative problem solving. For students without high school chemistry or with limited mathematics background. Successful completion of CHEM 110 prepares students to enroll in CHEM 142. Credit/no credit only.

CHEM 115 Chemistry for Life (5) NW
Introduction to chemistry covering selected principles and their effect on ourselves and our environment. Includes scientific investigations conducted outside the laboratory with full class participation. Intended for non-science majors wishing to improve their science literacy and develop a long-term interest in science.

CHEM 120 Principles of Chemistry I (5) NW, QSR
First course in a three-quarter overview of chemistry. Not for students majoring in biochemistry, chemistry, or engineering. Includes matter and energy, chemical nomenclature, chemical reactions, stoichiometry, modern atomic theory, chemical bonding. Laboratory. Only 5 credits can be counted toward graduation from the following: CHEM 120, 142, 145. Offered: AS.

CHEM 142 General Chemistry (5) NW/QSR
For science and engineering majors. Atomic nature of matter, stoichiometry, periodic table, quantum concepts, and gas laws. Includes laboratory. Recommended: high school chemistry and placement into MATH 120 or higher. No more than the number of credits indicated can be counted toward graduation from the following course groups: 142, 145 (5 credits). Cannot be taken for credit if CHEM 120 already taken. Offered: A/WSpS.

CHEM 145 Honors General Chemistry (5) NW, QSR
145 and 155 cover material in 142, 152, and 162. Integrated computer and chemistry laboratory experiments. Prerequisite: either MATH 124, MATH 127, or MATH 134, any of which may be taken concurrently; score of 43% on CHEMGN placement test. No more than the number of credits indicated can be counted toward graduation from the following course groups: 142, 145 (5 credits). 145, 155, 162 (11 credits). Offered: A.

CHEM 152 General Chemistry (5) NW
Energy, enthalpy and thermochemistry, spontaneity, entropy and free energy, electrochemistry, quantum mechanics and atomic theory, general concepts of bonding. Includes laboratory. Prerequisite: either 1.7 in CHEM 142 or 1.7 in CHEM 145. No more than the number of credits indicated can be counted toward graduation from the following course groups: 152, 155 (5 credits). Offered: A/WSpS.

CHEM 155 Honors General Chemistry (5) NW
Continuation of 145. Includes integrated computer and chemistry laboratory experience. Together 145 and 155 cover material in 142, 152, and 162. No more than the number of credits indicated can be counted toward graduation from the following course groups: 152, 155 (5 credits); 145, 155, 162 (11 credits). Prerequisite: 2.2 in CHEM 145. Offered: W.

CHEM 162 General Chemistry (5) NW
Covalent bonding, chemical kinetics, liquids and solids, properties of solutions, the elements in groups 1A-4A, the elements in groups 5A-8A, transition metals and coordination chemistry, and organic chemistry. Includes laboratory. Prerequisite: 1.7 in CHEM 152. Offered: A/WSpS.

CHEM 165 Honors General Chemistry (5) NW
Introduction to systematic inorganic chemistry: representative elements, metals, and nonmetals. Includes coordination complexes, geochemistry, and metallurgy. Additional material on environmental applications of basic chemistry presented. Laboratory included. No more than the number of credits indicated can be counted toward graduation from the following course groups: 162, 165 (6 credits); 165, 312 (5 credits). Prerequisite: 2.2 in CHEM 155. Offered: Sp,
CHEM 197 Science Outreach Training (1-2, max. 2)  
Training for participation in science-related outreach activities to the community. Emphasis on support for K-12 education and environmental community efforts. Not applicable toward chemistry degree requirements. Credit/no credit only. Offered: AWSp.

CHEM 199 Special Problems (1-6, max. 6)  
Research in chemistry. Credit/no credit only. Offered: AWSp.

CHEM 220 Principles of Chemistry II (5) NW, QSR  
Second course in a three-quarter overview of chemistry. Not for students majoring in biochemistry, chemistry, or engineering. Includes gases/liquids/solids, solutions, acids and bases, equilibrium, oxidation-reduction, electrochemistry, organic compounds, hydrocarbons, aromaticity, stereochemistry. Only 5 credits can be counted toward graduation from the following: CHEM 120, 142, 145. Prerequisite: either 1.7 in CHEM 120 or 1.7 in CHEM 142. Offered: W.

CHEM 221 Principles of Chemistry III (5) NW, QSR  
Third course in a three-quarter overview of chemistry. Not for students majoring in biochemistry, chemistry, or engineering. Includes alcohols, phenols, ethers, aldehydes, ketones, carboxylic acids, amines, and structural determination. Only 5 credits can be counted toward graduation from the following: CHEM 120, 142, 145. Prerequisite: 1.7 in CHEM 220. Offered: Sp.

CHEM 223 Organic Chemistry — Short Program (4) NW  
First of a two-quarter lecture series in organic chemistry, for those who elect not to complete the CHEM 237, 238, 239 sequence. Introduction to structure, nomenclature, properties, and reactions of the main functional families of organic compounds. Stereochemistry and spectroscopy. No more than 5 credits can be counted toward graduation from the following course group: 220, 223, 237, 335. Prerequisite: either 1.7 in CHEM 155 or 1.7 in CHEM 152; recommended: CHEM 162. Offered: AS.

CHEM 224 Organic Chemistry — Short Program (4) NW  
Continuation of CHEM 223. Structure, nomenclature, properties, and reactions of aldehydes, ketones, carboxylic acid derivatives, amines, carboxylic acids, lipids, amino acids, peptides, proteins, and nucleic acids. No laboratory accompanies this course, but CHEM 241 laboratory may be taken concurrently. No more than 5 credits can be counted toward graduation from the following course group: 221, 224, 239, 337. Prerequisite: 1.7 in CHEM 223. Offered: WS.

CHEM 237 Organic Chemistry (4) NW  
First course for students planning to take three quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of the main types of organic compounds. No organic laboratory accompanies this course. No more than the number of credits indicated can be counted toward graduation from the following course groups: 220, 223, 237, 335 (5 credits). Prerequisite: either 1.7 in CHEM 155 or 1.7 in CHEM 162. Offered: WS.

CHEM 238 Organic Chemistry (4) NW  
Second course for students planning to take three quarters of organic chemistry. Further discussion of physical properties and transformations of organic molecules, especially aromatic and carbonyl compounds. No more than the number of credits indicated can be counted toward graduation from the following course groups: 238, 336 (4 credits). Prerequisite: either 1.7 in CHEM 237 or 1.7 in CHEM 335. Offered: WSpS.

CHEM 239 Organic Chemistry (3) NW  
Third course for students planning to take three quarters of organic chemistry. Polynuclear compounds and natural products, lipids, carbohydrates, amino acids, proteins, and nucleic acids. Includes introduction to membranes, enzyme mechanisms, prosthetic groups, macromolecular conformations and supramolecular architecture. Prerequisite: either 1.7 in CHEM 238 or 1.7 in CHEM 336. Offered: ASps.

CHEM 241 Organic Chemistry Laboratory (3) NW  
Introduction to organic laboratory techniques. Preparation of representative compounds. Designed to be taken with 224 or 238. No more than the number of credits indicated can be counted toward graduation from the following course groups: 241, 346 (3 credits). Prerequisite: either 1.7 in CHEM 152 or 1.7 in CHEM 155; either CHEM 224, CHEM 238, or CHEM 336, any of which may be taken concurrently; recommended: CHEM 162. Offered: W.

CHEM 242 Organic Chemistry Laboratory (3) NW  
Preparations and qualitative organic analysis. Designed to be taken with 239. No more than the number of credits indicated can be counted toward graduation from the following course groups: 242, 347 (3 credits). Prerequisite: either 1.7 in CHEM 224 or CHEM 239 which may be taken concurrently or CHEM 337 which may be taken concurrently; either 1.7 in CHEM 241 or 1.7 in CHEM 346. Offered: A.

CHEM 296 Research in Chemistry: An Introduction (1) NW  
Ten presentations describing the research programs of researchers in the chemical sciences. Does not count toward any chemistry major requirement. Credit/no credit only. Offered: W.

CHEM 297 Science Outreach Participation (1-2, max. 6)  
Continuation of 197. Work with K-12 schools or community organizations. May include scientific presentations, K-12 curriculum support, or involvement in a community project. Not applicable toward chemistry degree requirements. Credit/no credit only. Prerequisite: CHEM 197. Offered: AWSp.

CHEM 299 Special Problems and Report Writing (1-6, max. 6)  
Research in chemistry and/or study in the chemical literature. Requires writing a scientific report. Credit/no credit only. Offered: AWSp.

CHEM 312 Inorganic Chemistry (3) NW  
The periodic table: chemistry of representative and transition elements. Aqueous chemistry, solid state chemistry, and everyday aspects of inorganic chemistry emphasized. Not intended for students who have completed 165. No more than the number of credits indicated can be counted toward graduation from the following course groups: 165, 312 (5 credits). Prerequisite: either CHEM 155 or CHEM 162; either CHEM 224, CHEM 238, or CHEM 336. Offered: AW.

CHEM 317 Inorganic Chemistry Laboratory (4) NW  
Experimental exploration of the periodic table. Techniques of preparation and characterization of inorganic compounds. Handling of airsensitive materials and gases. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 242 or CHEM 347. Offered: W.

CHEM 321 Quantitative Analysis (5) NW  
Introduction to chemical analysis, including gravimetric, volumetric, spectrophotometric, and potentiometric analyses. Laboratory computer use included. Prerequisite: either CHEM 155 or CHEM 162. Offered: WS.

CHEM 335 Honors Organic Chemistry (4) NW  
For chemistry majors and otherwise qualified students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of organic compounds. Theory and mechanism of organic reactions. Studies of biomolecules. No organic laboratory accompanies this course. No more than the number of credits indicated can be counted toward graduation from the following course groups: 220, 223, 237, 335 (5 credits). Prerequisite: either CHEM 155 or CHEM 162. Offered: A.

CHEM 336 Honors Organic Chemistry (4) NW
For chemistry majors and otherwise qualified students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of organic compounds. Theory and mechanism of organic reactions. Studies of biomolecules. No more than the number of credits indicated can be counted toward graduation from the following course groups: 220, 223, 237, 335 (5 credits); 238, 336 (4 credits). Prerequisite: 2.2 in CHEM 335. Offered: W.

CHEM 337 Honors Organic Chemistry (4) NW
For chemistry majors and otherwise qualified students planning three or more quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of organic compounds. Theory and mechanism of organic reactions. Studies of biomolecules. Includes introduction to membranes, enzyme mechanisms, prosthetic groups, macromolecular conformations, and supramolecular architecture. Prerequisite: 2.2 in CHEM 336. Offered: Sp.

CHEM 346 Organic Chemistry Honors Laboratory (3) NW
To accompany 336. No more than the number of credits indicated can be counted toward graduation from the following course groups: 241, 346 (3 credits). Prerequisite: CHEM 155 or CHEM 162; CHEM 336 which may be taken concurrently. Offered: W.

CHEM 347 Organic and Qualitative Organic Honors Laboratory (3) NW
Continuation of 346. To accompany 337. No more than the number of credits indicated can be counted toward graduation from the following course groups: 242, 347 (3 credits). Prerequisite: CHEM 337 which may be taken concurrently; 2.2 in CHEM 346. Offered: Sp.

CHEM 355 Introductory Physical Chemistry for Biologists (4) NW
The following topics are discussed from a physical chemical point of view: structural study of biopolymers, enzyme kinetics, bioenergetics, and transport. No more than the number of credits indicated can be counted toward graduation from the following course groups: 355, 452 (3 credits). Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; either MATH 124, MATH 134, MATH 145, or Q SCI 291; either PHYS 114 or PHYS 121. Offered: Sp.

CHEM 364 Materials Chemistry (3) NW
Overview of basic principles, techniques, and applications associated with solid materials. Description of crystals; examples of crystal structures; structural analysis; band structures of solid materials; preparation of materials; materials for microelectronics; and materials for information technology. Prerequisite: CHEM 312; either PHYS 123 or PHYS 116. Offered: jointly with MSE 371; W.

CHEM 396 Research in Chemistry and the Chemical Sciences (1) NW
Presentations by researchers in academia and industry describing the opportunities for research chemistry and biochemistry. Credit does not count toward chemistry major requirements. Credit/no credit only. Prerequisite: CHEM 296. Offered: jointly with BIOC 396; A.

CHEM 397 Science Outreach Mentors (1-2, max. 6)
Mentoring of beginning outreach participants. Includes presentations for 197, training of outreach students, and evaluation of outreach activities. Not applicable toward chemistry degree requirements. Credit/no credit only. Prerequisite: CHEM 197. Offered: AWSp.

CHEM 399 Undergraduate Research (*. max. 12)
Research in chemistry. Credit/no credit only. Offered: AWSp.

CHEM 410 Radiochemistry Laboratory (2) NW
Introductory general service course for students planning further work in nuclear or tracer applications. Safety procedures, detection and measurement of nuclear radiation, radiochemical and tracer techniques. Prerequisite: either 1.7 in CHEM 155 or 1.7 in CHEM 162; recommended: CHEM 418. Offered: alternate years.

CHEM 414 Chemistry of the Main Group Elements (3) NW
The elements and their compounds in relation to the periodic system. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 452 or CHEM 457; either CHEM 453, CHEM 455, or CHEM 475. Offered: alternate years.

CHEM 415 The Chemical Bond (3) NW
Nature of the chemical bond. Simple bonding theories, molecular orbital methods, symmetry, and group theory. Includes weekly computer exercises in which students perform ab initio calculations. Prerequisite: either CHEM 453, CHEM 455, or CHEM 475. Offered: alternate years.

CHEM 416 Transition Metals (3) NW
Survey of selected key topics in the chemistry of the transition metals, including emphasis on the structure, bonding, and reactivity of major classes of compounds. Prerequisite: either CHEM 165 or CHEM 312; either CHEM 453, CHEM 455, or CHEM 475, which may be taken concurrently. Offered: A.

CHEM 417 Organometallic Chemistry (3) NW
Chemistry of the metal-carbon bond for both main group and transition metals. Structure and reactivity with applications to organic synthesis and catalysis. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; CHEM 416. Offered: W.

CHEM 418 Nuclear Chemistry (3) NW
Natural radioactivity, nuclear systematics and reactions, radioactive decay processes, stellar nucleosynthesis, applications of radioactivity. Prerequisite: either CHEM 452, CHEM 455, or CHEM 475. Offered: alternate years.

CHEM 419 Bioinorganic Chemistry (3) NW
Description of transition metal-containing systems found in biology. Structural and electronic properties and reactivity of metalloproteins, metalloenzymes, and metallocofactors. Methods used to probe and model metal sites by spectroscopic and synthetic techniques. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; CHEM 416. Offered: Sp, even years.

CHEM 420 Bioinstrumental Analysis (3) NW
Introduction to modern instrumental methods of chemical analysis, including chromatography, optical and mass spectroscopy, electrochemistry and flow injection analysis. Basic concepts of transducers, spectrometers, mass analysis, separation sciences, and computerized data acquisition and reduction. Includes laboratory. Prerequisite: CHEM 321. Offered: Sp.

CHEM 421 Principles of Modern Wet Analysis (3) NW
Sampling and sample dissolution, multiple chemical equilibria, pH and electrochemical measurement, reagent-based kinetic enzyme assays and immunoassays. Principles of process, environmental, clinical, and biotechnological assays. Separations and flow injection. Prerequisite: either CHEM 223, CHEM 237, or CHEM 335; CHEM 321.

CHEM 423 Bioinstrumental Analysis (3) NW
Modern instrumental methods of bioanalysis of DNA and proteins, including agarose gel electrophoresis, PCR, Sanger sequencing for nucleic acid analysis and ELISA, SDS-PAGE, and LC/MS-MS analysis of proteins. Mass analysis, separation sciences, and bioinformatics tools. Includes laboratory. No credit allowed if BIOC 426 taken. Prerequisite: CHEM 239; either CHEM 317, CHEM 321, CHEM 461 or BIOC 440. Offered: -Sp.

CHEM 429 Chemical Separation Techniques (3) NW
Introduction to modern separation techniques such as gas chromatography, high-performance liquid chromatography, electrophoresis,
and field flow fractionation. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; either CHEM 241, CHEM 321, or CHEM 346. Offered: W.

CHEM 433 Theoretical Organic Chemistry — Predictions and Experimental Tests (3) NW
Molecular orbital theory in organic chemistry. Woodward-Hoffmann rules, aromaticity, concerted reactions, photochemical transformations, and reactions of electron-deficient species. Prerequisite: either CHEM 239 or CHEM 337. Offered: alternate years.

CHEM 435 Introductory Biophysical Chemistry (3) NW
Survey of the statics and dynamics of biophysical and biochemical processes. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; either CHEM 452, CHEM 455, or CHEM 475, any of which may be taken concurrently; recommended: either BIOC 405 or BIOC 440. Offered: alternate years; W.

CHEM 436 Molecular Enzymology (3) NW
Enzyme structure, function, chemistry and inhibition, including modes of biological catalysis, stereochemistry, enzyme characterization and kinetics, and design and principles of enzyme inhibitors. Also major classes of natural products, their chemistry, biological activity, biosynthesis, physiological role, and ecological significance. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; recommended: either BIOC 405 or BIOC 440. Offered: alternate years; Sp.

CHEM 437 Organic and Bioorganic Chemistry of Nucleic Acids in Proteins (3) NW

CHEM 452 Physical Chemistry for Biochemists I (3) NW
General equilibrium thermodynamics emphasizing biochemical applications: ligand binding, biological oxidation-reduction reactions, membranes, active transport, colligative properties, and surface tension. No more than the number of credits indicated can be counted toward graduation from the following course groups: 355, 452 (4 credits); 452, 456 (3 credits). Prerequisite: either CHEM 155 or CHEM 162; either MATH 125 or MATH 134; either PHYS 115 or PHYS 122. Offered: AW.

CHEM 453 Physical Chemistry for Biochemists II (3) NW
Continuation of 452. Includes transport properties, enzyme kinetics, introduction to quantum mechanics, spectroscopy, and classical statistical mechanics. Prerequisite: either CHEM 452 or CHEM 455; either MATH 125 or MATH 135; either PHYS 116 or PHYS 123. Recommended: MATH 307; MATH 308. Offered: WSp.

CHEM 455 Physical Chemistry (3) NW
Introduction to quantum chemistry and spectroscopy. Theory of quantum mechanics presented at an elementary level and applied to the electronic structure of atoms and molecules and to molecular spectra. Prerequisite: either CHEM 155 or CHEM 162; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307; MATH 308. Offered: ASpS.

CHEM 456 Physical Chemistry (3) NW
Chemical thermodynamics. Laws of thermodynamics presented with applications to phase equilibria, chemical equilibria, and solutions. No more than the number of credits indicated can be counted toward graduation from the following course groups: 452, 456 (3 credits). Prerequisite: either CHEM 155 or CHEM 162; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307. Offered: WS.

CHEM 457 Physical Chemistry (3) NW
Introduction to statistical mechanics, kinetic theory, and chemical kinetics. Prerequisite: either CHEM 455 or CHEM 475; either CHEM E 326 which may be taken concurrently, CHEM 456 or CHEM 476. Offered: WSp.

CHEM 458 Global Atmospheric Chemistry (4) NW
Global atmosphere as chemical system. Physical factors and chemical processes. Natural variabilities and anthropogenic change. Cycling of trace substances. Global issues such as climate change, acidic deposition, influences on biosphere. Prerequisite: either ATM S 358 or CHEM 456. Offered: jointly with ATM S 458.

CHEM 460 Spectroscopic Molecular Identification (3) NW
Basic theory of spectral techniques—infrared and ultraviolet/visible spectroscopy, NMR, and mass spectrometry—with emphasis on spectral interpretation skills needed for the elucidation of structure, conformation, and dynamics in organic and biological chemistry. Prerequisite: either CHEM 224, CHEM 239, or CHEM 337; recommended: either CHEM 455 or CHEM 475. Offered: A.

CHEM 461 Physical Chemistry Laboratory (3-4) NW
Physical measurements in chemistry. Vacuum techniques, calorimetry, spectroscopic methods, electrical measurements. Prerequisite: either CHEM 155; CHEM 162, or CHEM E 436; either CHEM 453, CHEM 457, CHEM 477, or both CHEM 452 and CHEM 455; either PHYS 117, PHYS 123 or PHYS 131. Offered: ASpS.

CHEM 462 Techniques of Synthetic Organic Chemistry (2-3) NW
Laboratory techniques of synthetic organic chemistry. Vacuum distillation, multistep synthesis, air sensitive reagents, photochemistry, chromatography, and separation techniques. Prerequisite: either CHEM 242 or CHEM 347; CHEM 460 which may be taken concurrently. Offered: A.

CHEM 463 Spectroscopic Techniques for Structural Identification (2) NW
Laboratory techniques of spectroscopic analysis for structural determination using UV, IR, NMR, mass spectroscopy. Prerequisite: CHEM 460. Offered: W.

CHEM 464 Computers in Data Acquisition and Analysis (3) NW
Introduction to use of the computer in the chemistry laboratory. Principles of microcomputers and their use for such problems as data acquisition, noise reduction, and instrument control. Prerequisite: either CHEM 453, CHEM 455, or CHEM 475; MATH 136, or both MATH 307 and MATH 308. Offered: Sp.

CHEM 465 Computations in Chemistry (3) NW
Computer calculations on color graphics workstations applied to problems in chemistry. Numerical methods and algorithms for calculating classical dynamics, quantum wavefunctions, wavepacket propagation, chemical kinetics. Use of computer programs for calculating electronic wavefunctions, molecular conformations, simulations of liquids and solids. Prerequisite: either CHEM 455 or CHEM 475, either of which may be taken concurrently. Offered: W.

CHEM 471 Physical Chemistry of Macromolecules (3) NW
Classical hydrodynamic methods, and modern optical correlation and pulse techniques for studying dynamical motions and conformations of macromolecules, especially biopolymers, in solution. Cooperative thermal transitions, optical properties, and polyelectrolyte effects. Prerequisite: either CHEM 452, CHEM 456, or CHEM 476; either CHEM 453, CHEM 457, or CHEM 477. Offered: alternate years; W.

CHEM 475 Honors Physical Chemistry (3) NW
Introduction to quantum chemistry, spectroscopy. Theory of quantum mechanics applied more rigorously than in CHEM 455. Application of quantum mechanics to electronic structure of atoms
and molecules. Computer software used to solve problems. Prerequisite: either CHEM 155 or CHEM 162; either MATH 126 or MATH 136; either PHYS 116 or PHYS 123; recommended: MATH 307; MATH 308. Offered: A.

CHEM 476 Honors Physical Chemistry (3) NW
For chemistry and biochemistry majors and otherwise qualified students. Chemical Thermodynamics. Similar in scope to CHEM 456 with the study of more complicated systems. Emphasis on using computer software to solve problems. Prerequisite: CHEM 475. Offered: W.

CHEM 477 Honors Physical Chemistry (3) NW
For chemistry and biochemistry majors or otherwise qualified students. Statistical mechanics, kinetic theory, and chemical kinetics including statistical interpretations of kinetics and transport phenomena. Prerequisite: CHEM 475; either CHEM E 326, which may be taken concurrently, or CHEM 476. Offered: Sp.

CHEM 496 Research Seminar for Undergraduates (1, max. 2) NW
Formal presentations of student research. One credit applies to research component of a relevant major. Credit/no credit only. Offered: jointly with BIOC 496; Sp.

CHEM 498 Teaching Chemistry (3) NW
Training in teaching chemistry laboratory and quiz sections. For chemistry and biochemistry majors, especially those planning graduate work or secondary education. Covers teaching strategies, student diversity, learning styles, grading, and interaction with students and faculty. Credit/no credit only. Offered: A.

CHEM 499 Undergraduate Research and Report Writing (*, max. 12)
Research in chemistry and/or study in the chemical literature. Credit/no credit only. Offered: AWSpS.

CHEM 501 Readings in Chemistry (1, max. 9)
Individual meetings with faculty to discuss readings (journal articles, book chapters, proceedings) in the chemical sciences. Credit/no credit only. Offered: AWSpS.

CHEM 502 Practical NMR Methods for Biological and Organic Structure Elucidation (4)
Theory of NMR (rotating frame formalism, multi-pulse experiments, relaxation phenomena, 2D experiments) as applied to structural and dynamic problems in organic and biological chemistry. Provides basis for experiment selection and spectrum interpretation. A more advanced treatment of NMR than 460. Prerequisite: CHEM 224, CHEM 239, or CHEM 337; recommended: CHEM 460 or equivalent, CHEM 435 or CHEM 455. Offered: W.

CHEM 508 Advanced Inorganic Chemistry (3, max. 9)
Discussion of selected applications of physical techniques to the study of inorganic molecules. Topics include group theory, magnetic resonance spectroscopy (NMR and ESR), vibrational spectroscopy (IR and Raman), electronic spectroscopy, magnetism, and electrochemistry. Offered: A.

CHEM 510 Current Problems in Inorganic Chemistry (1-3, max. 12)
Primarily for doctoral candidates in inorganic chemistry. Current topics (e.g., bioinorganic, advanced organometallic, materials and solid state, advanced inorganic spectroscopy). See department for instructor and topics during any particular quarter. Offered: Sp.

CHEM 520 Current Problems in Analytical Chemistry (1-3, max. 12)
Primarily for doctoral candidates in analytical chemistry. Current topics (e.g., flow injection analysis, mass spectrometry, and advanced radiochemistry). See department for instructor and topics during any particular quarter. Offered: AW.

CHEM 521 Analytical Electrochemistry (3)
Theory and practice of modern electrochemistry with emphasis on instrumentation and applications in chemical analysis. Offered: alternate years.

CHEM 522 Atomic and Molecular Analytical Spectroscopy (3)
Quantitative analysis of atomic and molecular species, using all forms of electromagnetic radiation, electrons, and gaseous ions. Offered: alternate years.

CHEM 523 Geochemical Cycles (4)
Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with OCEAN 523/ATM S 508.

CHEM 525 Process Analytical Chemistry (3)
Chemical sensors and systems approach to chemical analysis as an integral part of monitoring and controlling chemical, biological, and medical processes. Offered: alternate years.

CHEM 526 Chemometrics (3, max. 9)
Mathematical and statistical methods for experimental design, calibration, signal resolution, and instrument control and optimization. Offered: alternate years.

CHEM 530 Advanced Organic Chemistry (3)
Fundamental aspects of organic structures and transformations. Structure and basicity of carbanions, substitution reactions, elimination reactions, nucleophilic addition and addition/elimination reactions, condensation reactions, structure and rearrangements of carbocations, electrophilic addition, electrophilic substitutions, neighboring group effects. Prerequisite: CHEM 337. Offered: A.

CHEM 531 Advanced Organic Chemistry (3)
Synthetic organic chemistry. Discussion of practical methods for the synthesis of complex organic molecules with an emphasis on strategy and the control of stereochemistry. Prerequisite: CHEM 530. Offered: W.

CHEM 532 Advanced Organic Chemistry (3)
Chemical Biology. Application of chemical methods to the study of biological processes that occur in cells. Prerequisite: CHEM 530 and CHEM 531. Offered: Sp.

CHEM 540 Current Problems in Organic Chemistry (1-3, max. 12)
Primarily for doctoral candidates in organic chemistry. Discussions of topics of current interest and importance. See department for instructor and topic during any particular quarter.

CHEM 550 Introduction to Quantum Chemistry (3)
Origins and basic postulates of quantum mechanics, solutions to single-particle problems, angular momentum and hydrogenic wave functions, matrix methods, perturbation theory, variational methods. Prerequisite: CHEM 455. Offered: A.

CHEM 551 Introduction to Quantum Chemistry (3)
Electronic structure of many-electron atoms and molecules, vibration and rotation levels of molecules, effects of particle exchange, angular momentum and group theory, spectroscopic selection rules. Prerequisite: CHEM 550. Offered: W.

CHEM 552 Statistical Mechanics (3)
General theorems of statistical mechanics, relation of the equilibrium theory to classical thermodynamics, quantum statistics, theory of imperfect gases, lattice statistics and simple cooperative
phenomena, lattice dynamics and theory of solids, liquids, solutions, and polymers, time-dependent phenomena and mechanisms of interaction. Prerequisite: CHEM 455 and CHEM 456 (concurrent registration permitted) or equivalent. Offered: Sp.

CHEM 553 Statistical Mechanics (3)
General theorems of statistical mechanics, relation of the equilibrium theory to classical thermodynamics, quantum statistics, theory of imperfect gases, lattice statistics and simple cooperative phenomena, lattice dynamics and theory of solids, liquids, solutions, and polymers, time-dependent phenomena and mechanisms of interaction. Prerequisite: CHEM 552. Offered: A.

CHEM 550 Current Problems in Physical Chemistry (1-3, max. 12)
Primarily for doctoral candidates in physical chemistry. A discussion of topics selected from active research fields. See department for instructor and the topic during any particular quarter.

CHEM 561 Macromolecules (3, max. 9)
Physical chemistry of macromolecules and biopolymers. Topics include solution thermodynamics, hydrodynamic properties, molecular weight distributions, optical and electro-optic techniques, chain configuration statistics, cooperative phenomena, theory of rubber elasticity, and polyelectrolytes. Offered: alternate years.

CHEM 564 Organic Electronic and Photonic Materials/Polymers (3)

CHEM 575 Molecular Modeling Methods (4)
Introduction to theory and practice of computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Discussion of background theory, implementation details, capabilities and practical limitations of these methods. Prerequisite: previous coursework in biochemistry and physical chemistry and/or permission of instructor. Offered: jointly with BIOEN 575; A.

CHEM 580 Topics in Chemistry (1, max. 3)
General topics of interest relating to chemistry. Credit/no credit only.

CHEM 581 Topics in Inorganic Chemistry (3, max. 18)
Open only to students accepted for doctoral work in chemistry. Credit/no credit only. Offered: AWSp.

CHEM 582 Topics in Analytical Chemistry (3, max. 18)
Open only to students accepted for doctoral work in chemistry. Credit/no credit only. Offered: AWSp.

CHEM 583 Topics in Organic Chemistry (3, max. 18)
Open only to students accepted for doctoral work in chemistry. Credit/no credit only. Offered: AWSp.

CHEM 585 Topics in Physical Chemistry (3, max. 18)
Open only to students accepted for doctoral work in chemistry. Credit/no credit only. Offered: AWSp.

CHEM 590 Seminar in General Chemistry (1, max. 18)
For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

CHEM 591 Seminar in Inorganic Chemistry (1, max. 18)
For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

CHEM 592 Seminar in Analytical Chemistry (1, max. 18)
For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

CHEM 593 Seminar in Organic Chemistry (1, max. 18)
For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

CHEM 594 Seminar in Physical Chemistry (1, max. 18)
For chemistry graduate students only. Credit/no credit only. Offered: AWSpS.

CHEM 600 Independent Study or Research (*)
Prerequisite: permission of coordinator. Offered: AWSpS.

CHEM 700 Master's Thesis (*)
Prerequisite: permission of coordinator. Offered: AWSpS.

CHEM 800 Doctoral Dissertation (*)
Prerequisite: permission of coordinator. Offered: AWSpS.

Classics
218 Denny

The discipline of classics concerns itself with the cultures of ancient Greece and Rome from prehistoric times to the Middle Ages. The department is concerned with the Greek and Latin languages and their literatures, including poetry, drama, history, philosophy, rhetoric, and political theory, as well as with classical art and archaeology. The ancient cultures of Greece and Rome hold an extraordinary place in the American past and present, thanks to their central role in forming the basic conceptual categories that shape our intellectual, professional, and civic lives. The vast temporal and geographic gulf that divides these ancient cultures from modernity brings students and scholars of classics face to face with the otherness of antiquity and forces a critical examination of our own cultural roots.

Undergraduate Program

clasdept@uwashington.edu

The Department of Classics offers the following programs of study:
- The Bachelor of arts degree with majors in classics, Greek, Latin, and classical studies.
- Minors in classical studies, Greek, Latin, and classics and ancient history.

The majors in classics, Greek, and Latin emphasize the development of expertise in Greek and Latin and can include coursework in the history, literature, philosophy, science, and the art and archaeology of these two contrasting but related cultures. Students who intend to continue their studies to the Ph.D. degree are advised to take the B.A. in classics or, alternatively, the B.A. in Latin or Greek with as many courses in the second language as possible.

A fourth major, the Bachelor of Arts in Classical Studies, is especially suited to students wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity primarily through English translations. The classical studies major demands less study of the classical languages of Greece and Rome than is required for the other majors. Students with no previous exposure to Greek or Latin can complete the classical studies major in two years. Students have often combined this major with another major such as English, history, or art history, and even with a non-humanities major such as computer science, biochemistry, or
Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Latin and/or classical Greek, classics in translation, ancient history, classical art and archaeology, ancient philosophy.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

66 credits in each of the majors, as follows:

- **Greek:** 27 approved credits in Greek at the 400 level plus 9 credits chosen with department approval from courses in Latin, Greek at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. The major must include a minimum of 2 credits of CLAS 495.
- **Latin:** 27 approved credits in Latin at the 400 level plus 9 credits chosen with department approval from courses in Greek, Latin at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. The major must include a minimum of 2 credits of CLAS 495.
- **Classics:** 15 approved credits in Greek at the 400 level and 15 approved credits in Latin at the 400 level; 6 additional credits (including 2 credits of CLAS 495) chosen from the following courses: Greek and Latin at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science.
- **Classical Studies:** Greek or Latin through 307 or the equivalent; 36 additional credits chosen with department approval from the following courses: Greek and Latin at 400 level (including a minimum of 2 credits of CLAS 495), classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. Classical studies is especially suited to students not preparing for graduate study in classics but wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity primarily through English translations.

Minor

Minor Requirements: 25 credits as follows for each of the minors:

- **Classical Studies:** 25 approved credits from classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science.
- **Greek:** Minimum 25 credits in Greek, including at least 6 credits at the 400 level (excluding 490).
- **Latin:** Minimum 25 credits in Latin, including at least 6 credits at the 400 level (excluding 490).
- **Classics and Ancient History:** 30 credits from the following list, including at least 20 upper-division credits (15 of which must be taken at the UW). 100-level credit is not accepted. Minimum 10 credits from each department (Classics and History). A minimum grade of 2.0 is required in each course. Not available to students pursuing majors or other minors in classics.

Courses: CLAS 210, CLAS 320, CLAS 322, CLAS 324, CLAS 326, CLAS 328, CLAS 330, CLAS 424, CLAS 427, CLAS 428, CLAS 430, CLAS 432, CLAS 435, CLAS 445, CLAS 496 (except when topic is medieval); CL AR 340, CL AR 341, CL AR 342, CL AR 343, CL AR 442, CL AR 443, CL AR 444, CL AR 446, CL AR 447, CL AR 448; GREEK (all upper-division courses except GREEK 300 and GREEK 301); LATIN (all upper-division courses except LATIN 300, LATIN 301, LATIN 401, and LATIN 402); HSTAM 205, HSTAM 301, HSTAM 302, HSTAM 312, HSTAM 313, HSTAM 314, HSTAM 330, HSTAM 401, HSTAM 402, HSTAM 403, HIST 490 (when topic is ancient), HIST 498 (when topic is ancient).

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The undergraduate study of classics emphasizes critical analysis of language and culture and clear and effective writing. The B.A. with a major in classics is a respected terminal degree in itself. Like other degree programs in the humanities, it emphasizes the acquisition of those analytic and communications skills which are indispensable for careers in government, journalism, law, industry, medicine, and business. The Classics major (especially in its more language intensive forms) is often a mark of distinction when a graduate applies for admission to professional school.

Many who take the bachelor’s degree in classics go on to pursue graduate work in the subject at leading Ph.D. programs. Graduates include winners of prestigious national awards such as Mellon Fellowships for graduate study and the Rhodes Scholarship.

- **Instructional and Research Facilities:** The departmental office provides access to several computers for research and coursework. The Classics Department sponsors numerous lectures by distinguished speakers visiting from universities in this country and abroad; undergraduates are always welcome to attend.
- **Honors Options Available:** With College Honors. With Distinction. See adviser for details.
- **Research, Internships, and Service Learning:** None offered.

- **Department Scholarships:**
  - **Jim Greenfield Undergraduate Scholarship** is intended for undergraduate majors in Classics. The object of the Jim Greenfield scholarship is to enable exceptionally well-qualified students to devote the maximum time and energy to their study of the Classics at the University of Washington. While the first criterion is academic promise, an applicant’s current means of support will also be taken into consideration; therefore, the amount of the award may vary from partial tuition to full tuition and some expenses. Successful candidates may reapply for the following year.

- **Jim Greenfield Undergraduate Travel Bursaries:** Awards for the calendar year 2005 (including summer 2005) are made on the basis of a competition to be held in autumn quarter 2004, with an application deadline of October 15, 2004. Jim Greenfield Undergraduate Travel Bursaries may be used for the department’s Rome Program, for travel associated with participation in archaeological excavations, for independent travel to areas of classical interest, or for other kinds of study-related travel for which the applicant can make a cogent case. In some cases an award might allow a student to remain overseas for study travel in the wake of the department’s Rome Program. Further information about applying for a Jim Greenfield Undergraduate Travel Bursary is available in the department office.
- **Student Organizations/Associations:** None

Of Special Note:

- CLAS 101, CLAS 102, CLAS 205, and HIST 111 may not be taken in fulfillment of major requirements for
baccalaureate degrees in the Department of Classics.

- **Classical Seminar in Rome:** During spring quarter, the department offers instruction in classics for advanced undergraduate majors and graduate students at the University of Washington Rome Center, located in the Palazzo Pio on the Campo de’ Fiori.

**Graduate Program**

Graduate Program Coordinator
218 Denny, Box 353110

clasdept@u.washington.edu

The Department of Classics offers programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The M.A. degree may be in Greek, Latin, or Classics (a combination of Greek and Latin). The Ph.D. degree requires both Greek and Latin.

The program of formal instruction has been designed to ensure comprehensive and thorough training in the basic disciplines needed for teaching and research. The department offers courses in the major writers and periods of literature, philosophy, and history, in classical art and archaeology, and in Greek and Latin linguistics. The courses in Greek and Latin literature include many works on the Ph.D.-degree reading list. Seminars introduce research techniques through the study of more specialized topics, which vary from quarter to quarter. Students may include in their programs courses and seminars given by other departments in such subjects as ancient philosophy, ancient and medieval history, comparative literature, and linguistics. A brochure, The Graduate Program in Classics, available from the department, gives additional information.

The Suzzallo Library has an extensive classics collection. The department’s seminar room in Denny Hall, which is available to graduate students for their study and research, contains an excellent noncirculating library with such reference works as Pauly-Wissowa, L’Année Philologique, the Thesaurus Linguae Latini, the Müller Handbuch series, the Teubner and Oxford texts, commentaries on the classical authors, standard collections of inscriptions and fragments, and a number of important serials. The department also possesses an Ibycus scholar computer and a license for the Thesaurus Linguae Graecae, Thesaurus Linguae Latinae, Perseus, and other databases.

Applicants for admission to the M.A. program should present an undergraduate major or its equivalent in Greek, Latin, or Classics. Prospective aspirants for the Ph.D. degree should have had two years of upper-division study in both languages, but may be admitted with less preparation in one language if their preparation in the other language is exceptionally strong. Admission to the Ph.D. program may be granted after completion of the requirements for the M.A. degree.

The M.A. degree requires a minimum of 27 credits in courses or seminars in Greek or Latin or both, and in related subjects approved by the department; a reading knowledge of French, German, or Italian; either an acceptable thesis or 9 additional credits in approved graduate courses and seminars and a research paper.

The Doctor of Philosophy degree requires a minimum of 72 credits in courses or seminars in Greek, Latin, and related subjects approved by the department; a reading knowledge of German and either French or Italian; Greek and Latin prose composition; translation examinations on Greek and Latin; examinations in two special authors and one field of classical studies; an oral General Examination; dissertation; and Final Examination. Graduate students must have teaching experience before completing requirements for their terminal degree.

A number of teaching assistantships as well as the Jim Greenfield Graduate Fellowship are available. Assistants teach sections of elementary Latin and Greek, a course in Latin and Greek derivatives, hold discussion sections in classical literature in translation, or assist faculty members with other courses. The teaching load is four to six hours a week throughout the academic year.

**Faculty**

**James J. Claus** Ph.D. (California, Berkeley), Professor of Classics; Chair, Department of Classics: Hellenistic poetry; Republican and Augustan literature; Roman History and Historiography; city of Rome; cinema studies jjc@u.washington.edu; http://faculty.washington.edu/jjc

**Lawrence J. Bliqz** Ph.D. (Stanford), Professor Emeritus of Classics and Art History: Greek art; Greek historiography and historians; Greek and Roman medicine lbliqz@u.washington.edu

**Ruby Blondell** Ph.D. (California, Berkeley), Professor of Classics (Adjunct in Women Studies); Graduate Program Coordinator: Plato; Greek Tragedy; Greek intellectual history blondell@u.washington.edu

**Catherine M. Connors** Ph.D. (Michigan), Associate Professor of Classics (Adjunct in Women Studies): Roman literature and culture; ancient representations of nature and geography; the ancient Greek and Roman novel and its reception cconnors@u.washington.edu

**Alain M. Gowing** Ph.D. (Bryn Mawr), Professor of Classics (Adjunct in History): Latin and Greek historiography; imperial Latin literature alain@u.washington.edu; http://faculty.washington.edu/alain

**Daniel P. Harmon** Ph.D. (Northwestern), Professor Emeritus of Classics: Latin poetry; Greek and Roman religion; archaic Rome; linguistics dph@u.washington.edu

**Stephen E. Hinds** Ph.D. (Cambridge) Professor of Classics: Latin poetry; literary criticism and theory shinds@u.washington.edu

**Alexander Hollmann** Ph.D. (Harvard), Assistant Professor of Classics: Herodotus; Greek literature, esp. prose of classical and imperial periods; ancient magic; Greek religion and myth

**Olga Levaniouk** Ph.D. (Harvard), Assistant Professor of Classics, Homer; early Greek poetry; Greek religion and myth; history of Greek; additional interests in Avestan, Sanskrit, Hititite, and Tocharian. olevaniouk@u.washington.edu

**Pierre A. MacKay** Ph.D. (California, Berkeley), Professor Emeritus of Classics, Near Eastern Languages and Civilization, and Comparative Literature: Greek literature; post-classical and Byzantine Greek literature; numismatics mackay@cs.washington.edu

**Paul Pascal** Ph.D. (North Carolina), Professor Emeritus of Classics: Latin literature and paleography; medieval Latin paulpascal@u.washington.edu

**Timothy Power** Ph.D. (Harvard), Assistant Professor of Classics, Greek lyric poetry and performance, Athenian drama; music and meter. tcpower@u.washington.edu

**Sarah Culpepper Stroup** Ph.D. (Bekeley), Assistant Professor of Classics, Latin Prose literature, Greek and Roman drama, cultural studies scstrip@u.washington.edu, http://faculty.washington.edu/washington.edu

**S. Marc Cohen** Ph.D. (Cornell), Professor of Philosophy: Ancient philosophy; philosophy of mind

**Sandra R. Joshef** Ph.D. (Rutgers), Associate Professor of History: history of the late Republic and early Empire; Roman social history; Roman slavery
Anna Kartsonis Ph.D. (NYS, Institute of Fine Arts), Professor of Art History; medieval and Byzantine art history

David Keyt Ph.D. (Cornell), Professor of Philosophy: Ancient and contemporary philosophy

Margaret Laird Ph.D. (Princeton), Assistant Professor of Art History: Roman Art and Archaeology mlaird@u.washington.edu

Scott Noegel Ph.D. (Cornell), Associate Professor of Biblical and Ancient Near Eastern Languages and Literatures: Levantine, Mesopotamian, and Egyptian languages, culture, and history. snoegel@u.washington.edu

Jean Roberts Ph.D. (Pittsburgh), Associate Professor of Philosophy: Ancient philosophy

Carol G. Thomas Ph.D. (Northwestern), Professor of History: Greek history

Joel T. Walker Ph.D. (Princeton), Assistant Professor of History: Late antiquity, Sasanian empire, archaeology of the late Roman Empire

Cass Weller Ph.D. (Pittsburgh), Associate Professor of Philosophy: cognition and practical reason in Plato and Aristotle

Michael A. Williams Ph.D. (Harvard), Professor of Comparative Religion: Koine Greek texts

Course Descriptions

CLAS 101 Latin and Greek in Current Use (2) VLPA
Designed to improve and increase English vocabulary through a study of the Latin and Greek elements in English, with emphasis on words in current literary and scientific use. No auditors. Knowledge of Latin or Greek is not required. Offered: AWSpS.

CLAS 102 Grammar and Syntax through Latin (3) VLPA
Improve familiarity with basic grammar, syntax, logic through study of mechanics of the Latin language. For Educational Opportunity Program students only. No auditors. Knowledge of Latin or Greek not required.

CLAS 122 Gateway to the Ancient Greco-Roman World (5) VLPA
Introduces students to aspects of Ancient Greek and/or Roman literature and culture. Develop understanding of the nature and process of critical thinking and basic research techniques.

CLAS 205 Bioscientific Vocabulary Building From Latin and Greek (3) VLPA
Designed to help the student master the scientific vocabulary of his or her particular field by a study of the Latin and Greek roots that are used to create the majority of scientific terms. No auditors. Knowledge of Latin or Greek is not required. Offered: AWSpS.

CLAS 210 Greek and Roman Classics in English (5) VLPA
Bliquez, Blondell, Claus, Connors, Gowing, Harmon, Hinds, Levaniouk, Power, Stroup
Introduction to classical literature through a study of the major Greek and Latin authors in modern translation. Offered: AWSp.

CLAS 320 Greek and Roman Private and Public Life (5) I&S/ VLPA Bliquez
Study of the civie and social practices and institutions of everyday Greek and Roman private and public life, including the family, social classes, the courts and legal systems, military service and war, technology and the trades, money and banking, agriculture and rural life. Many lectures illustrated by slides. Offered: A.

CLAS 322 Intellectual History of Classical Greece (5) I&S/ VLPA Blondell
Uses Plato’s Republic as a core text to explore a range of issues of ancient and contemporary interest, such as justice, political theory, male attitudes toward women, and the nature of the soul. Besides the Republic and other works of Plato, readings are taken from Homer, tragedy, comedy, Aristotle, and others. Offered: Sp.

CLAS 324 Greek and Roman Athletics (3) I&S
Greek and Roman athletic festivals and events, and the place of athletes and sport in ancient society.

CLAS 326 Women in Antiquity (3) I&S/VLPA Connors, Levaniouk
A broad survey of primary sources in medicine, law, philosophy, religious ritual, myth, history, and ethnography, informed by perspectives from literature, art, and archaeology. Provides students the tools to analyze the social roles of women in ancient Greece and Rome.

CLAS 328 Sex, Gender, and Representation in Greek and Roman Literature (3) I&S/VLPA Hinds, Stroup
Affirmation and inversion of gender roles in Greek and Roman literature, myths of male and female heroism; marginalization of female consciousness; interaction of gender, status, and sexual preference in love poetry. Readings from epic, drama, historiography, romance, and lyric.

CLAS 330 The Age of Augustus (5) I&S/VLPA Gowing
Detailed study of the history and culture of the reign of Augustus, the first Roman emperor (31 BC-AD 14). Includes readings in Augustan authors such as Vergil, Ovid, and Horace as well as the study of Augustan art and architecture. Offered: jointly with HSTAM 330.

CLAS 399 Study Abroad: Classics (3-15, max. 20) VLPA
For participants in Classics overseas study programs. Specific course content determined by assigned faculty member. Credit not applicable to majors in the Classics Department without approval.

CLAS 401 Undergraduate Seminar in Classics (3-5) VLPA
Seminar on a broadly defined topic in classics. Includes reading in Latin or Greek as appropriate for individual students. Additional readings of works in English translation and works of scholarship chosen to give undergraduate majors familiarity with research methods and perspective on the discipline.

CLAS 424 The Epic Tradition (5) VLPA Claus, Levaniouk
Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, and Aeneid; the Roland or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies according to instructor’s preference. Offered: jointly with C LIT 424.

CLAS 427 Greek and Roman Tragedy in English (5) VLPA Stroup
Study of the development of Greek and Roman tragedy, with extensive readings in representative plays of Aeschylus, Sophocles, Euripides, and Seneca.

CLAS 428 Greek and Roman Comedy in English (3) VLPA Power, Stroup
Readings from the comedies of Aristophanes, Plautus, and Terence.

CLAS 430 Greek and Roman Mythology (3/5) VLPA
Principal myths found in classical and later literature. Offered: AWSp.

CLAS 432 Classical Mythology in Film (3/5) VLPA Claus
Comparison and discussion of classical myths and modern films inspired by them. Promotes access to the reading of classical mythology. Analyzes significant differences between ancient literary and modern cinematic representations of the myth.

CLAS 435 The Ancient Novel (3) VLPA Connors, Power
Reading and discussion of the principal Greek and Roman novels, the earliest European prose fiction, with attention to earlier literature and to imperial culture.

CLAS 445 Greek and Roman Religion (3) I&S/VLPA Harmon, Levaniouk
Religion in the social life of the Greeks and Romans, with emphasis placed on their public rituals and festivals. Attention is given to the priesthoods, personal piety, rituals of purification and healing, and the conflict of religions in the early Roman Empire. Many lectures illustrated by slides. Recommended: RELIG 201. Offered: jointly with RELIG 445.

CLAS 495 Senior Essay (1-3, max. 4) VLPA
Usually written in conjunction with another course in the final year of study in the major.

CLAS 496 Special Topics (2-5, max. 15) VLPA
Offered occasionally by visitors or resident faculty.

CLAS 520 Seminar (5, max. 45)
Advanced comparative work on Greek and Latin materials studied in both original languages.

CLAS 525 Proseminar (5)
Introduces graduate students to the chief subfields, together with their various methodologies and resources, of the broad discipline of classical studies.

CLAS 540 Topics in Greek and Latin Literary History (5)
Reading of a range of Greek and Latin texts by various authors.

CLAS 700 Master’s Thesis (*)

CLAS 800 Doctoral Dissertation (*)

Classical Archaeology

Course Descriptions

CL AR 340 Pre-Classical Art and Archaeology (3) VLPA
Survey of the art and the other material remains of the civilizations in the Aegean from the Neolithic Age to the end of the Bronze Age, with special emphasis on Minoan Crete and the Mycenaean kingdoms of mainland Greece, illustrated by slides. The history, techniques, and results of significant excavations are examined. Offered: jointly with ART H 340.

CL AR 341 Greek Art and Archaeology (3) VLPA Bliquez
Survey of the material remains and the developing styles in sculpture, vase painting, architecture, and the minor arts from the geometric to the Hellenistic periods, illustrated by slides. Principal sites and monuments, as well as techniques and methods of excavation, are examined in an attempt to reconstruct the material culture of antiquity. Offered: jointly with ART H 341.

CL AR 342 Roman Art and Archaeology (3) VLPA Harmon
Roman architecture and art, with emphasis on the innovations of the Romans; illustrated by slides. Offered: jointly with ART H 342.

CL AR 343 Hellenistic Art and Archaeology (3) VLPA
Survey of the art of Greece and the eastern Mediterranean from the time of Alexander the Great to the Roman conquest. Principal sites with their sculpture, painting, mosaics, and minor arts examined in lectures illustrated with slides. Offered: jointly with ART H 343.

CL AR 442 Greek Painting (3) VLPA
Study of painted decoration on Greek vases, with emphasis on stylistic developments and cultural and historical influences. Painting on other media also examined as evidence allows. Offered: jointly with ART H 442.

CL AR 443 Roman Painting (3) VLPA
Study of surviving painting from the Roman World, with emphasis on wall paintings from Pompeii and Herculaneum. Principal topics for discussion: the four styles of Pompeian painting the dependence of Roman painters on Greek prototypes, and the significance of various kinds of painting as domestic decoration. Offered: jointly with ART H 443.

CL AR 444 Greek and Roman Sculpture (3) VLPA
History and development of Greek sculpture and sculptors, their Roman copies, and Roman portraits and sarcophagi. Emphasis on Greek sculpture of the fifth century BC. Offered: jointly with ART H 444.

CL AR 446 Greek Architecture (3) VLPA
Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ARCH 454/ART H 446.

CL AR 447 The Archaeology of Early Italy (3) VLPA Harmon
Study of the principal archaeological sites of early Italy, including Etruria, Sicily, southern Italy, and archaic Rome up to the Republican period. Attention given to the material remains and their relationship to the Etruscan, ancient Sicilian, and early Roman civilizations. Offered: jointly with ART H 447.

CL AR 448 The Archaeology of Italy (3) VLPA Harmon
Study of the principal archaeological sites in Italy with special emphasis on ancient Rome. Sites include the Alban hills, Ostia, Pompeii, Herculaneum, Tarquinia, Paestum, Tivoli, and Praeneste. Attention given to the relationship between material remains and their purpose in ancient life. Illustrated by slides. Offered: jointly with ART H 448.

CL AR 513 Athenian Topography (5)
Detailed consideration of the topography and monuments of ancient Athens from the beginning through the Roman period.

CL AR 541 Seminar in Greek and Roman Art (3)
In-depth study of selected topics and problems of the art of ancient Greece and Rome. Offered: jointly with ART H 541.

Classical Linguistics

Course Descriptions

CL LI 501 Comparative Phonology of Greek and Latin (5) Harmon
Phonological developments of Greek and Latin from Indo-European to the classical periods of both languages.

CL LI 503 History of the Greek Language (5)
Morphological and syntactical development of the Greek language from Homer through the New Testament; the development of prose and poetic style.

CL LI 505 History of the Latin Language (5) Harmon
Morphological and syntactical development of the Latin language; the development of Latin as a literary language.

CL LI 506 Italic Dialects (5) Harmon
Principal remains of the non-Latin languages and dialects of ancient Italy.

CL LI 508 Greek Dialects (5)
The non-Attic dialects of ancient Greek, based on a study of
inscriptions and the literary remains.

**Greek**

**Course Descriptions**

**GREEK 101 Elementary Greek (5)**  
An intensive study of grammar, with reading and writing of simple Attic prose. Offered: A.

**GREEK 102 Elementary Greek (5)**  
An intensive study of grammar, with reading and writing of simple Attic prose. Prerequisite: GREEK 101. Offered: W.

**GREEK 103 Elementary Greek (5)**  
Reading of selections from classical Greek literature. Prerequisite: GREEK 102. Offered: Sp.

**GREEK 300 Greek Language, Accelerated (5)**  
Intensive introduction to Attic Greek. Not accepted as upper-division credit toward a major in Greek or classics. Does not satisfy foreign language proficiency requirement. Cannot be taken for credit if GREEK 101 already taken. Offered: W.

**GREEK 301 Greek Language, Accelerated (5)**  
Intensive introduction to Attic Greek. Not accepted as upper-division credit toward a major in Greek or classics. Does not satisfy foreign language proficiency requirement. Cannot be taken for credit if GREEK 101 already taken. Prerequisite: GREEK 300. Offered: Sp.

**GREEK 305 Attic Prose (5) VLP**  
Translation of selections from Attic prose; elementary exercises in Attic prose composition. Recommended: GREEK 103, GREEK 301, or equivalent.

**GREEK 306 Attic Prose (5) VLP**  
Translation of selections from Attic prose; elementary exercises in Attic prose composition. Prerequisite: GREEK 305.

**GREEK 307 Homer (5) VLP**  
Translation of selections from the Iliad or the Odyssey; Attic prose composition, metrics. Prerequisite: GREEK 306. Offered: Sp.

**GREEK 308 Introduction to Koine Greek Texts (3) VLP**  
Reading and discussion of selected religious and philosophical texts from Koine Greek.

**GREEK 413 The Pre-Socratic Philosophers (3) VLP**  
Blondell  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 414 Plato (3) VLP**  
Blondell  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 415 Aristotle (3) VLP**  
Blondell  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 422 Herodotus and the Persian Wars (3) VLP**  
Bliquez, Levaniouk, Power  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 424 Thucydidies and the Peloponnesian War (3) VLP**  
Bliquez  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 426 Attic Orators (3) VLP**  
Bliquez, Power  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 428 Imperial Greek Literature (3-5, max. 15) VLP**  
Clauss, Gowing  
Readings in imperial Greek prose and poetry from the first century CE onward, including Dio Chrysostom, Appian, Plutarch, Aelius Aristides, Lucian, Athenaeus, and New Testament Koine. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 442 Greek Drama (3) VLP**  
Blondell, Levaniouk, Power  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 443 Greek Drama (3) VLP**  
Blondell, Levaniouk, Power  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 444 Greek Drama (3) VLP**  
Blondell, Levaniouk, Power  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 449 Greek Epic (3) VLP**  
Levaniouk  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 451 Lyric Poetry (3) VLP**  
Blondell, Levaniouk, Power  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 453 Pindar: The Epinician Odes (3) VLP**  
Levaniouk  
Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 461 Early Greek Literature (3-5, max. 15) VLP**  
Readings and discussion of selected authors of the early Greek period. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 462 Literature of Classical Athens (3-5, max. 15) VLP**  
Readings and discussion of selected authors of classical Athens. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 463 Hellenistic Greek Literature (3-5, max. 15) VLP**  
Clauss  
Readings and discussion of selected authors of the Hellenistic Age. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 490 Supervised Study (*, max. 18)**  
Special work in literary and philosophical texts for graduates and undergraduates. Recommended: minimum of two years of ancient Greek language study at college level (or equivalent).

**GREEK 500 Grammar and Composition (5)**  
Bliquez, Blondell  
Translation of passages from English to Greek for the purpose of acquiring advanced knowledge of the grammar and the style of the classical tongue.

**GREEK 501 Homer (5)**  
Levaniouk  
Readings from the Iliad or the Odyssey.

**GREEK 503 Aristophanes (5)**  
Bliquez  
Select comedies.

**GREEK 504 Plato (5)**  
Blondell  
The Republic or other dialogues.
GREEK 506 Aristotle (5) Blondell
GREEK 508 Lysias and Demosthenes (5) Bliquez
Select speeches, oratortory theory, historical questions.
GREEK 510 Greek Historians (5, max. 10) Bliquez
GREEK 512 Greek Tragedy (5, max. 10)
Aeschylus, Sophocles, and/or Euripides.
GREEK 515 Greek Epigraphy (5)
Selected inscriptions from various Greek states and sanctuaries and
evidence they provide for religious and social practices, literature,
and political history. Classification and editing of inscriptions, and
epigraphical techniques.
GREEK 520 Seminar (5, max. 45)
GREEK 540 Topics in Greek Literary History (5)
Reading of a range of Greek texts by various authors.
GREEK 590 Supervised Study (*, max. 18)
Prerequisite: permission of graduate program coordinator.
GREEK 600 Independent Study or Research (*)
Latin
Course Descriptions
LATIN 101 Elementary Latin (5)
An intensive study of grammar, with reading and writing of simple
Latin prose. Offered: A.
LATIN 102 Elementary Latin (5)
An intensive study of grammar, with reading and writing of simple
Latin prose. Prerequisite: LATIN 101. Offered: W.
LATIN 103 Elementary Latin (5)
Reading of selections from classical Latin literature. Prerequisite:
LATIN 102. Offered: Sp.
LATIN 300 Latin Language, Accelerated (5)
Intensive introduction to classical Latin. Not accepted as upper-
division credit toward a major in Latin or classics. Does not satisfy
foreign language proficiency requirement. Cannot be taken for
credit if LATIN 101 already taken. Offered: W.
LATIN 301 Latin Language, Accelerated (5)
Intensive introduction to classical Latin. Not accepted as upper-
division credit toward a major in Latin or classics. Does not satisfy
foreign language proficiency requirement. Cannot be taken for
credit if LATIN 101 already taken. Prerequisite: LATIN 300.
Offered: Sp.
LATIN 305 Introduction to Latin Literature (5) VLPA
Readings in prose and poetry from various Latin authors; element-
ary exercises in Latin prose composition. Recommended: LATIN
103, LATIN 301, or equivalent. Offered: A.
LATIN 306 Cicero and Ovid (5) VLPA
Readings from the orations of Cicero and the poetry of Ovid;
elementary exercises in Latin prose composition. Prerequisite:
LATIN 305. Offered: W.
LATIN 307 Vergil (5) VLPA
Selections from the first six books of the Aeneid; elementary
exercises in Latin prose composition or metrics. Prerequisite:
LATIN 401 Medieval Latin Literature to 1200 (3) VLPA Hinds
Texts read in Latin; cultural and historical contexts discussed.
Presupposes year and a half of Latin or equivalent. Informal
individual guidance available to members of class handling medieval
or renaissance Latin texts in their research. Recommended: LATIN
306.
LATIN 402 Later Medieval and Renaissance Latin Literature
(3) VLPA Hinds
Texts read in Latin; cultural and historical contexts discussed.
Presupposes year and a half of Latin or equivalent. Informal
individual guidance available to members of class handling medieval
or renaissance Latin texts in their research. Recommended: LATIN
306.
LATIN 412 Lucretius (3) VLPA Blondell, Clauss
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 414 Seneca (3) VLPA Blondell, Stroup
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 422 Livy (3) VLPA Clauss, Gowing
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 423 Cicero and Sallust (3) VLPA Clauss, Gowing, Stroup
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 424 Tacitus (3) VLPA Clauss, Gowing
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 447 Roman Lyric (3) VLPA Clauss, Harmon
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 449 Roman Elegy (3) VLPA Harmon, Hinds
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 451 Roman Satire (3) VLPA Connors, Stroup
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 457 Roman Drama (3) VLPA Connors
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 458 Roman Epic (3) VLPA Clauss, Connors, Harmon,
Hinds
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 461 Latin Literature of the Republic (3-5, max. 15)
VLPA
Readings and discussion of selected authors from the era of the
Roman Republic. Recommended: minimum of two years of Latin
language study at college level (or equivalent).
LATIN 462 Latin Literature of the Augustan Age (3-5, max.
15) VLPA
Readings and discussion of selected authors from the Augustan era.
Recommended: minimum of two years of Latin language study at
college level (or equivalent).
LATIN 463 Latin Literature of the Empire (3-5, max. 15)
VLPA
Readings and discussion of selected authors from the Roman Empire.
Recommended: minimum of two years of Latin language study at
The Department of Communication offers the following programs:

**LATIN 465 Roman Topography and Monuments (5, max. 10)**
**VLPA Clauss, Gowing, Harmon, Stroup**
Study of the material remains of ancient Rome from the archaic period through the imperial age. Reading of source materials and inscriptions in Latin. Conducted in Rome. Recommended: minimum of two years of Latin language study at college level (or equivalent). Offered: Sp.

**LATIN 490 Supervised Study (*, max. 18)**
Special work in literary and philosophical texts for graduates and undergraduates. Recommended: minimum of two years of Latin language study at college level (or equivalent).

**LATIN 500 Grammar and Composition (5) Clauss, Gowing, Hinds, Stroup**
Translation of passages from English to Latin for the purpose of acquiring advanced knowledge of the grammar and style of the classical tongue.

**LATIN 501 Vergil (5) Clauss, Harmon, Hinds**

**LATIN 502 Horace (5) Clauss, Harmon**

**LATIN 503 Plautus and Terence: Early Republican Literature (5) Blondell, Connors, Stroup**

**LATIN 504 Philosophy at Rome (5) Blondell, Stroup**
Selected philosophical works of Cicero and other sources for Hellenistic and Roman philosophy.

**LATIN 506 Cicero (5) Gowing, Stroup**
Select speeches, with attention to rhetorical theory and/or letters.

**LATIN 508 Silver Latin Literature (5) Connors, Hinds**

**LATIN 510 Roman Historians (5, max. 10) Clauss, Gowing**

**LATIN 512 Augustan Poetry (5, max. 15)**

**LATIN 520 Seminar (5, max. 45)**

**LATIN 565 Seminar in Rome (5, max. 10) Clauss, Gowing, Harmon, Stroup**
Study of selected topics and authors in Latin literature. Conducted in Rome.

**LATIN 590 Supervised Study (*, max. 18)**
Prerequisite: permission of graduate program coordinator.

**LATIN 600 Independent Study or Research (*)**

**Communication**

102 Communications

Communication is a process that creates and reveals meanings, relationships, and cultural patterns.

**Undergraduate Program**

Adviser
118 Communications, Box 353740
206-543-8860

The Department of Communication offers the following programs of study:
- The Bachelor of Arts degree with a major in communication
- The Bachelor of Arts degree with a major in communication: journalism

**Bachelor of Arts**

**Suggested First- and Second-Year College Courses:** COM 201, COM 202.

**Department Admission Requirements**

Admission is competitive, based on information in the application packet, cumulative GPA, and grades in COM 201 and/or COM 202. Minimum cumulative 2.50 GPA ensures consideration, but not acceptance.

Students are admitted quarterly — autumn, winter, and spring. Applications are due Monday, the third week of autumn, winter, and spring quarters. Applications and additional information are available on the Web and in 118 Communications. Students are notified of acceptance by the end of the fifth week of the quarter. If accepted, they can register for the next quarter as majors.

Applications are available from the department Web site on the first day of the quarter. Applications should include application form, copies of transcripts and grade reports, and an essay explaining what led applicants to apply to the major.

Minimum 45 quarter credits completed (transfer students must complete at least 10 graded credits at UW). For the standard Communication program, credits must include completion of COM 201 and COM 202 or completion of one of these and current enrollment in the other. For the Journalism option, credits must include completion of either COM 201 or 202.

**Major Requirements**

**Communication:** 50 credits, to include the following:
- Methods in inquiry (5 credits): Examples of courses that apply include COM 382, COM 405, and COM 485. For full list, see department adviser or Web.

**Area concentration (15 credits):**
- Communication and culture, communication technology and society, international communication, political communication, rhetoric and critical studies, or social interaction. See advising office or Web for description of each area and lists of qualifying courses.

**Electives (20 credits):**
- From the Department of Communication and from selected courses outside the department. See advising office or Web for electives list.

Of the 50 required credits specified above, at least 20 must be Communication courses at the 300 level or above, and of those 20, at least 10 must be Communication courses at the 400 level (excluding COM 498/499).

**Journalism Option:** A minimum of 61 credits, including the following:
- Introductory courses (5 credits): Either COM 201 or COM 202.
- Law and Ethics core (10 credits): COM 440, COM 468.
- Emphasis/Specialization (10 credits) in one of the following areas: communication and culture, communication technology and society, international communication, political communication, rhetoric and critical studies, or social interaction. See advising office or Web for description of each area and lists of qualifying courses.
- Advanced Skills/Competencies (8 credits minimum) selected from the following: COM 301, COM 460, COM 461, COM 463, COM 465, COM 466.
- Other requirements (15 credits): 5 credits each in economics, political science, and history. See advising office for list of acceptable courses.

**Student Outcomes and Opportunities**
• Learning Objectives and Expected Outcomes: The Department of Communication prepares students for the challenges of a society that is informed, entertained, persuaded, and shaped by communication. The department seeks out and appeals to students from a variety of backgrounds and perspectives. It nurtures socially responsible, literate citizens who can interpret and evaluate images and messages they create and receive. It teaches students to think critically, respect diversity, communicate effectively, and develop the skills needed for the life-long learning that is central to successful careers and rewarding lives. Undergraduate study in communication has four pedagogical emphases: communication literacy, communication inquiry, theory and concepts, and community engagement.

• Instructional and Research Facilities: The Department of Communication has the following labs: Media Lab, News Lab, Observation Labs. It also has an Instructional Resources Center and video-editing facilities. Additionally, the department manages the following centers: The Dart Center, the Center for Communication and Civic Engagement, and the Resource Center for Cyberculture Studies. See the department Web site for further information.

• Honors Options Available: With College Honors. With Distinction. See adviser for details.

• Research, Internships, and Service Learning: See adviser for details. Department Scholarships: None offered.

Student Organizations/Associations:
- Society of Professional Journalists
- Public Relations Student Society of America

Graduate Program
Graduate Program Coordinator

206-543-7269
cominfo@u.washington.edu

Graduate study in communication engages students in the complexity of modern communication and its centrality to society and, in doing so, prepares them to become thoughtful scholars, teachers, practitioners, and leaders related to this field. The Department of Communication offers graduate programs leading to the degrees of Master of Arts, Doctor of Philosophy, and Master of Communication (M.C.).

Graduate study in the Department of Communication is guided by four related principles: intellectual and cultural pluralism, interdisciplinary theorizing, collaboration, and public scholarship. Coursework brings together humanistic and social scientific intellectual traditions through a unified core curriculum and a wide selection of graduate seminars. Research and teaching in the department focus on six interrelated areas: communication and culture, communication technology and society, international communication, social interaction, political communication, and rhetoric and critical studies.

The M.A. degree program provides training in research and scholarship and can be either preparation for doctoral study or a terminal degree. The M.A. degree requires a minimum of 45 credits of approved coursework and a research thesis. The Ph.D. degree program develops conceptual and methodological capabilities in a substantive area of communication. The Ph.D. degree requires completion of a minimum of 45 post-master credits, general examinations, and a dissertation presenting an original scholarly contribution to the field.

The Department of Communication also offers three M.C. degrees, each of which has specific requirements tailored to that degree. The general M.C. degree is targeted for mid-career communication professionals who seek to develop an understanding of communication theory related to a special area of interest. The M.C. in digital media is a professional degree focused on digital media content creation, management, and policy. Native Voices is an M.C. degree offered in conjunction with American Indian Studies. It is designed for documentary filmmakers who focus their work on subjects relevant to the Native American Community.

Special Requirements

Students are admitted to programs in the autumn quarter only. Admission into the Ph.D. program requires completion of a master's degree in communication or a related field. Visit the department Web site for application forms and details. Applicants for M.A. and Ph.D. degrees may be considered for financial assistance in the form of teaching or research assistantships. The application deadline for those wishing to be considered for financial assistance is February 1. For all others, the application deadline is April 1. In all cases, international students must apply by November 1.

Research Facilities

In addition to the University’s research facilities available to all students, the Department of Communication houses a collection of specialized research laboratories, including the Digital Media Lab, Graduate Computer Lab, Observational Research Facility, Instructional Resources Center, and Video Editing Lab.

Faculty

Baldasty, Gerald J.
Ph.D., Communications, University of Washington, 1978, Professor

Bennett, Lance
Ph.D., Political Science, Yale University, 1974, Professor

Ceccarelli, Leah
Ph.D., Northwestern University, 1995, Associate Professor

Chan, Anthony B.
Ph.D., History, York University, Canada, 1980, Professor

Coutu, Lisa
Ph.D., University of Washington, 1996, Senior Lecturer

Domke, David S.

Ph.D., University of Wisconsin-Madison, 1994, Associate Professor

Giffard, Anthony
Ph.D., English, University of Washington, 1968, Professor

Gill, Kathy E.
M.S., Agricultural Economics, Virginia Tech, 1977, Senior Lecturer

Hart, Daniel
MFA, Temple University, 1984

Henderson, Michael W.
B.S. Political Science, University of Oregon, 1971, Senior Lecturer

Howard, Philip
Ph.D., Northwestern University, 2002, Assistant Professor
Principles discussed and developed in the context of international inquiry, theories and concepts, and community engagement. and practice of communication — communication literacy, research

Introduces students to four core principles that undergird the study of communication, political communication, and communication technology and society.

**COM 202 Introduction to Communication II (5) I&S/VLPA**

Introduces students to four core principles that undergird the study and practice of communication — communication literacy, research inquiry, theories and concepts, and community engagement. Principles discussed and developed in the context of social interaction, rhetoric and critical studies, and communication and culture.

**COM 220 Introduction to Public Speaking (5) I&S/VLPA**

Designed to increase competence in public speaking and the critique of public speaking. Emphasizes choice and organization of material, sound reasoning, audience analysis, and delivery.

**COM 222 Speech Communication in a Free Society (3) I&S/ VLPA**

Problems and arguments related to freedom of speech; early English writers on freedom of expression; background of freedom of speech in the United States; contemporary freedom of speech issues.

**COM 234 Public Debate (5) I&S**

Examines public debate in a democracy by developing a rhetorical perspective of public argument and skills to evaluate debates critically. Develops an understanding of rhetoric, values, audiences, tests of reasoning, and sources of information. Sharpens critical skills and applies them to contemporary controversies in the public sphere.

**COM 251 Interviewing (5) I&S/VLPA**

Interviewing principles and practices, with emphasis on information gathering, selection, and persuasive interviews. Purposes and types of interviews, structure of interviews, and influence of communication patterns on interview outcomes.

**COM 270 Interpersonal Communication (5) I&S/VLPA**

Emphasizes analyzing and understanding communication variables affecting human relationships, such as person perception, feedback, idea development, nonverbal cues. Focus on informal communication settings.

**COM 273 Parliamentary Procedure (3) I&S/VLPA**

Principles and practice: a study of the historical bases and contemporary uses of parliamentary procedure; methods and practice in organizing and conducting public meetings.

**COM 300 Basic Concepts of New Media (5) I&S/VLPA**

Provides a comprehensive examination of the effects of new, digital media on interpersonal communication, media industries, and media culture. Emphasis on economic, social, political, and aesthetic implications. Provides limited experience with computer-based media. No prior technical computer experience assumed.

**COM 301 Navigating Information Networks for Mass Media (5) I&S**

Builds familiarity with computer-mediated information networks. Introduces and compares network search engines, agents, browsing/viewing tools and retrieval/transfer software for use by reporters and other media workers. Instruction and practice with searching/acquiring information, its analysis and interpretation, illustration, and write-up. No prior computer or network experience assumed.

**COM 302 The Cultural Impact of Information Technology (5) I&S/VLPA**

Utilizing approaches from the history of technology, cultural studies, and literary theory, seeks to analyze the cultural and social impact of information technology. Considers how information technologies impact our relationships with others, our concept(s) of self, and the structure of the communities to which we belong. Offered: jointly with CHID 370.
COM 304 The Press and Politics in the United States (5) I&S
Journalist's role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and response by local and state political figures. Offered: jointly with POL S 304.

COM 305 The Politics of Mass Communication in America (5) I&S
Role of mass audiences in politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics. Offered: jointly with POL S 305.

COM 306 Media, Society and Political Identity (5) I&S
Explores how society and culture are both represented in and shaped by communication technologies and media content. Media include film, advertising, news, entertainment television, talk shows, and the Internet. Explores how media represent and affect individual identity, values, and political engagement. Offered: jointly with POL S 306.

COM 320 Public Speaking (5) I&S/VLPA
Practice in preparation and presentation of a variety of types of public speeches based on study of their structure and form; emphasis on organization and delivery. Prerequisite: COM 220.

COM 321 Communications in International Relations (5) I&S
Looks at communications in relations between international groups and states. Examines the range of functions and roles communication media play in international affairs, global issues, and intergroup relations. Also examines the strategic use of communications by various groups. Offered: jointly with POL S 330.

COM 322 Global Communication (5) I&S
Introduction to the history, purpose, channels, content, technologies, policy, and regulation of international communications systems. Issues covered include disparities in media development between post-industrial and developing nations, imbalances in international news and information flow, and the emergence of global communications. Offered: jointly with POL S 329.

COM 329 Rhetoric of Social and Political Movements (5) I&S/VLPA
Inquiry into the rhetoric of social and political movements; emphasis on investigation of persuasive discourse; examination of the nonverbal symbols of persuasion.

COM 331 The Rhetorical Tradition in Western Thought (5) I&S/VLPA
Analysis of the major theories that prescribe and describe the use of symbols to change attitudes and behavior. Principal emphasis is placed upon defining the nature and scope of rhetoric and upon analyzing the art's underlying assumptions about human beings as symbol users. Some background in history, philosophy, and literature is desirable.

COM 334 Essentials of Argument (5) I&S/VLPA
Argument as a technique in the investigation of social problems; evidence, proof, refutation, persuasion; training in argumentative speaking.

COM 340 History of Mass Communication (5) I&S
History and development of communication from prehistoric times; rise of mass media; political and economic context of newspapers, radio, film, and television.

COM 342 Media Structure (5) I&S
Industrial organization and culture; consumer and producer decisions; public policy toward media; workforce and unions. Media role in culture and political economy.

COM 343 Effects of Mass Communication (5) I&S
Effects of mass communication on individuals and society. Relevant theories applied to research evidence, addressing such topics as effects of stereotypes, violent and sexual imagery, and persuasive messages on our knowledge, attitudes, and behaviors.

COM 359 Writing for Mass Media (5) I&S

COM 360 Beginning Newswriting and Reporting (4) I&S
Introduction to newswriting and reporting for print media. Focus on defining news, general writing skills, constructing leads, preparing a variety of basic journalism news stories, interviewing techniques, covering beats, and journalistic style.

COM 361 Advanced Reporting and Newswriting (4) I&S
In-depth training in the development of advanced-level reporting and newswriting skills. Practice in information gathering, interviewing, use of sources, database analysis, and investigative reporting techniques. Recommended: COM 360.

COM 362 Community Journalism: News Lab (5) I&S
Newswriting-skills course. Students gain real-world experience by producing news and feature stories for client papers in the Puget Sound Region. Involves considerable one-on-one work with the lecturer/editor. Requires writing and reporting skills. Recommended: COM 361.

COM 373 Communication in Small Groups (5) I&S/VLPA
Discussion as an everyday community activity, with emphasis on the informal cooperative decision-making methods of committee, conference, and roundtable groups.

COM 374 Perspectives on Language (5) I&S/VLPA
Study of language and meaning, and survey of several influential modern approaches, including the semantic, general semantic, behavioral, and analytic philosophical. Relates theories of language and meaning to the study of speech communication.

COM 375 Communication Ethics (5) I&S/VLPA
Ethical problems in interpersonal and public speech communication. Alternative ways of evaluating and responding to moral problems in a variety of communication situations.

COM 376 Nonverbal Communication (5) I&S/VLPA
Reviews the nature of nonverbal communication as part of the human message system. Discusses research on the types of cues that are part of the nonverbal system, reviews some communicative functions allowed by nonverbal cues (e.g., emotional expressions, relational messages, deception, coordination, or interaction), and ties nonverbal communication to language.

COM 378 Social Approaches to Interpersonal Communication (5) I&S/VLPA
Exploration of several social approaches to interpersonal communication, emphasizing the theorists’ philosophical orientations and practical applications.

COM 382 Social Scientific Approaches to Communication Research (5) I&S
Comprehensive introduction to research methods employed in basic and applied communication research, including sample surveys, content analysis, experimentation, and elementary statistics.

COM 395 Communication Internship (2-5, max. 5)
Faculty-supervised study of communication principles in internship contexts. Readings to aid students in observations of communication concepts combined with individualized reading structured around topics of interest for each student.
COM 401 Telecommunication Policy and Convergent Media (5) I&S
Examines contemporary media and telecommunications industries since 1980 and their accelerating convergence. Attention given to economic, policy, and mass use issues. Review of major industry leaders, promising technologies, and new services. Social issues, government initiatives, and new legislation covered for both North American and international markets. Recommended: COM 301.

COM 402 New Media as Virtual Communities (5) I&S
Technologically-mediated virtual communities considered through analysis of historical precedents and influences and through an exploration of the concept of community. Issues include a focus on social interactions; the social, political, economic, and technological contexts of virtual communities and the limits for their sustenance.

COM 405 New Media Criticism (5) I&S/VLPA
Examines critically the content of new media forms, contrasting them with traditional media. Stresses influences of social, economic, political, and technological forces on content and developing strategies for critical analysis.

COM 406 Public Discourse on the Internet (5) I&S/VLPA
Study of public advocacy and persuasion in internet environments, including public interest advocacy sites, political campaigns, advertisements, editorials, and essays. Various critical models applied to analyze narratives, style, argument structure, and credibility of internet discourse. Recommended: COM 331, COM 435, or COM 436.

COM 407 Communication Technology and Politics (5) I&S
Employs some core concepts of political communication and theories of democracy to examine the emerging role of information and communication technologies in candidate and issue campaigning; online voting; protest and advocacy movements; law-making and electronic governance in the United States and internationally. Offered: jointly with POL S 451.

COM 411 Political Communication Seminar (5, max. 10) I&S
Contemporary topics studying how communication affects citizen engagement with public life. Offered: jointly with POL S 454.

COM 414 Mass Media and Public Opinion (5) I&S
Examines the foundations of the idea of public opinion in a democratic environment and the role of mass communication in the organization, implementation, and control of that opinion. Considers these relationships from the perspectives of societal elites, media, and citizens. Offered: jointly with POL S 452.

COM 417 Political Deliberation (5) I&S
Exploration of philosophical and empirical writings on political deliberation in small groups, campaigns, and other public settings. Contemporary deliberative theory. Participation in face-to-face discussions on current issues. Recommended: either COM 273 or COM 373.

COM 418 Communications and the Environment (5) I&S
Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with ENVIR 418.

COM 420 Comparative Media Systems (5) I&S
Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with SIS 419/POL S 468.

COM 423 Communication and Social Change (5) I&S
Examines both theory and application involved in using communications media as a tool for addressing political, social, and economic development issues. Utilizes a case study approach to look at localized applications of traditional and new communications tools in the pursuit of sustainable development.

COM 425 European Media Systems (5) I&S
Examines media systems in selected countries in Europe and policy issues that link (or divide) members of the European Union and other major media producers. Media studied in context of the contemporary economic, social, political, and cultural milieu in which they operate. Offered: jointly with EURO 425.

COM 426 International Media Images (5) I&S
Ways in which media construct images of international peoples and events. Develops a set of critical tools for assessing media portrayals of international affairs and cultures.

COM 427 International Communications Law and Policy (5) I&S
Examines the international and comparative aspects of traditional press law, broadcast regulation, and telecommunications policy. Also examines freedom of the press in international reporting and the efforts of countries to limit foreign media influences within their borders.

COM 428 Asian Media Systems (5) I&S
Examines the media systems and communication policies in selected Asian countries. Identifies and analyzes the cultural, economic, historical, and political parameters that influence these media.

COM 429 Chinese Communications Systems (5) I&S
Examines the media systems and communication policies in selected Asian countries. Identifies and analyzes the cultural, economic, historical, and political foundations of communications systems in the region of Chinese Asia: China, Hong Kong, Singapore, and Taiwan. Focus primarily on print and broadcast journalism.

COM 430 Canadian Documentary Film Traditions (5) I&S/VLPA
History and development of non-fiction film documentary traditions, especially in Canada, the first institutionally defined area in which documentaries became prominent through the National Film Board and the Canadian Broadcasting Corporation. Discussion of Flaherty, Greirson, and independent network producers who developed present-day style of documentaries. Offered: jointly with SISCA 430.

COM 431 Rhetorical Criticism (5) I&S/VLPA
Study of approaches to rhetorical inquiry that aid in the description, analysis, interpretation, and evaluation of discourse. Applies various critical models to a chosen artifact.

COM 433 Speech Composition (5) I&S/VLPA
Preparation and delivery of public speeches with emphasis on style, thought organization, and proof. Analysis of model speeches. Recommended: SP COM 220.

COM 434 Argumentation Theory (5) I&S/VLPA
Theory and research on the structure and properties of argument, argument fields, argument modeling, the influence of audience, argument criticism, and related topics. Prerequisite: either COM 220 or COM 334.

COM 435 Historic American Public Discourse (5) I&S/VLPA
Rhetorical criticism of historical public speeches, essays, and declarations. Includes readings of public texts in their historical and political context to increase understanding of those texts, their rhetorical construction, and the culture from which they arose. Covers the beginnings of the nation to the middle of the 20th century.
COM 436 Contemporary American Public Discourse (5) I&S/VLPA
Rhetorical criticism of contemporary public messages. Includes reading of public texts in their context to increase understanding of those texts, their rhetorical construction, and the culture from which they arose. Covers mid-20th century to the present.

COM 437 Rhetorical Perspectives in Intellectual Revolutions (5) I&S/VLPA
Rhetorical investigation of selected major writings. Examines the rhetorical dimension in the progress of ideas through analysis of documents of major intellectual revolutions as persuasive works. Relates principal revolutions in Western thought to contemporary controversy. Examines Rights of Man, Communist Manifesto, The Origin of Species.

COM 440 Mass Media Law (5) I&S
Survey of laws and regulations that affect the print and broadcast media. Includes material on First Amendment, libel, invasion of privacy, freedom of information, copyright, obscenity, advertising and broadcast regulation, and matters relating to press coverage of the judicial system. Offered: jointly with POL S 461.

COM 441 United States Media History (5) I&S
Development of mass communication in the United States with emphasis on role of mass media in politics, economics, gender, and race.

COM 442 History of Media Technology and Regulation (5) I&S
Impact of pre-1980s media technologies — printing, telecommunications, broadcasting, photography, and more — on individuals and institutions, especially government, business, and the mass media. How laws and policies have changed to govern new media forms.

COM 444 Public Relations and Society (5) I&S
Overview of issues, strategies, and role of public relations professionals in various areas of American society, including media relations, government relations, community affairs, and consumer relations.

COM 445 Journalism and Literature (5) I&S/VLPA
Explores the relationship between journalism and fiction writing. In the United States. Examines writers who began their careers as journalists and forged a fiction-writing philosophy related to what they learned in journalism. Readings in fiction and journalism.

COM 451 Mass Media and Culture (5) I&S/VLPA
Empirical and theoretical framework for analyzing role of mass media in cultural change. Historical and contemporary cases consider ethnic, gender, class, and urban-rural conflicts and cultural roles of sports, elections, and national rituals. Focus on visual electronic media.

COM 452 Crisis Communications (5) I&S
Study of the functions of communications professionals during crises. Covers public relations professionals as advocates for organizations and companies in crisis and the news media as advocates of the mass public. Discussion of cases.

COM 460 Special Reporting Topics (4, max. 8) I&S
Topics vary.

COM 461 Computer-Assisted Journalism (5) I&S
Introduction to computer-assisted journalism and other advanced reporting techniques. Includes hands-on electronic data analysis, exploration of on-line investigative tools, and the fashioning of electronically-retrieved information into news stories. Students examine ethical and technical challenges these tools present to media and society.

COM 462 Magazine Writing (4) I&S
Techniques of writing and marketing the full-length magazine article.

COM 463 Copy Editing and Design (5) I&S
Focus on editing copy for publications, covering grammar and style, production methods, news criteria, use of wire services, headlines, make-up and design, pagination, and online publication.

COM 464 Opinion Writing (5) VLPA
Combines the teaching expertise of a Department of Communication faculty member with the professional expertise of an opinion-writing journalist. Students learn about and practice writing newspaper editorials, columns, and various forms of criticism in order to gain an understanding of the differences between news and opinion content in print journalism. Prerequisite: COM 361.

COM 465 Legislative Reporting (12) I&S
Coverage of Washington legislature for a daily newspaper. Selected students live in Olympia, interview legislative delegations, report on committee and floor sessions, and attend and report on gubernatorial and other press conferences.

COM 466 Digital Journalism (5) I&S
A. Chan
Introduction to digital journalism. Integrates Web design, video, still, and sound to develop an Internet Webcast called DIA (Digital Interactive). News. Students serve as sole initiator of DIA news, utilizing journalistic standard of storytelling, video production, and editing and design. Prerequisite: COM 300.

COM 468 Journalistic Ethics (5) I&S Simpson
Provides a method and substantive context based on ethical theory, media history, and value systems analysis for analyzing and resolving dilemmas raised by journalistic practices.

COM 469 Intellectual Foundations of American Journalism (5) I&S
Examines the thinkers and philosophers who have influenced modern journalism. Studies the main ideas in the development of world thought and their impact on today's journalists. Explores the role communications systems have played in the creation of the world's cultures.

COM 470 Discourse: Analyzing Talk and Texts (5) I&S/VLPA
From gossip to globalization, a critical and practical introduction to contemporary theories/methods in the study of discourse: how verbal communication is used in conversational talk and mediated texts to construct identities and relationships; and how power, control, and ideology are reproduced through language used in everyday social interactions.

COM 471 Persuasion (5) I&S/VLPA
Analysis of the ways in which beliefs, values, attitudes, and behavior are deliberately influenced through communication.

COM 472 Empirical Approaches to Interpersonal Communication (5) I&S
Examination of theories and research on the development and deterioration of interpersonal relationships. Emphasis on the nature of interpersonal interaction, the role of language and nonverbal communication in relationships, functional and dysfunctional interaction patterns, and the dynamics of interpersonal networks.

COM 473 Problems of Discussion Leadership (3) I&S/VLPA
Critical analysis of leadership in committee and conference, with emphasis on the development of speech effectiveness in the cooperative achievement of goals. Prerequisite: COM 373.

COM 474 Communication, Conflict, and Cooperation (5) I&S/VLPA
Role of communication in resolving informal conflicts and in
facilitating interpersonal and intergroup cooperation. Review of empirical literature. In-class simulations and exercises.

**COM 475 Organizational Communication (5) I&S/VLPA**
Role of communication in organizations, the types of problems arising, and approaches to their resolution. Communication in the human relations and productivity of organizations. Applying communication skills in various organization roles.

**COM 476 Models and Theories in Communication (5) I&S**
Examination of selected theories and models of speech communication as well as of criteria applicable to them. Emphasis on the nature and function of theories and models, especially as these relate to basic principles underlying the scientific, interpretive, and critical study of speech communication phenomena.

**COM 477 Intercultural Communication (5) I&S**
Investigates intercultural communication theory and its application for varying levels of human interaction: interpersonal, intergroup, and international.

**COM 479 Communication in Children’s Environments (5) I&S/VLPA**
Study of the communication capacity of children with emphasis on the analysis of the communication process in formal and informal learning environments. Includes examination of communication-based educational approaches and instructional strategies.

**COM 480 Communication in Adolescent Environments (5) I&S/VLPA**
Study of the communication process in youth environments with a primary focus on formal and informal learning. Includes critical analysis of communication in contemporary instructional settings and the development of communication strategies for teaching and learning.

**COM 482 Computer-Mediated Interpersonal Communication (5) I&S**
Examination of relationships and groups formed through computer-mediated interpersonal communication. Focus on how people manage interactions and identities, develop interpersonal relationships, engage in collaboration and conflict, and develop communities in virtual environments. Involves both the study and use of network-based computer-mediated systems.

**COM 484 Cultural Codes in Communication (5) I&S/VLPA**
Social and cultural codes in interpersonal communication, with special reference to contemporary American subcultural groups and their communication patterns.

**COM 485 Fieldwork in Communication Studies (5) I&S/VLPA**
Theory and practice of participant observation, intensive interviewing, and discourse analysis in the study of communicative practices. Prerequisite: COM 484.

**COM 489 Ethnicity, Gender, and Media (5) I&S**
Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with AES 489/WOMEN 489.

**COM 495 Special Topics in Communication (2-5, max. 15)**
Lecture, seminar, and/or team study. Topics vary.

**COM 496 Honors Seminar (5) I&S/VLPA**
Preparation for researching and writing senior honors thesis.

**COM 497 Honors Thesis (5, max. 15) I&S/VLPA**
Researching and writing honors thesis.

**COM 498 Independent Research (2-6, max. 6)**
Work on research projects designed and conducted by undergraduate students.

**COM 499 Directed Research (1-5, max. 10)**
Work on research projects designed by faculty members.

**COM 500 Communication Theory Development (5)**
Covers the philosophy behind theory development, discusses the basic components of theories, and reviews significant theoretical contributions in communication from social scientific and humanistic traditions. Introduces students to the process of conceptualization and theory design through reading and discussion of relevant bodies of communication scholarship.

**COM 501 Methods of Inquiry (5)**
Overviews some of the most important methods of inquiry used to investigate communication phenomena. Includes textual criticism, content analysis, ethnography, experimentation, survey research, and historical approaches. Explores the utility of different methods for investigating research topics, defining and measuring concepts, reading texts, and investigating theories.

**COM 502 Communication Scholarship and Public Life (5)**
Examines potential connections between communication scholarship and government, markets, civil society, and the general public.

**COM 507 Interdisciplinary Communication Theory (5)**
Introduces students to challenges, benefits, and processes of interdisciplinary research. Explores formation of disciplinary boundaries. Considers significant theories that have influenced communication research. Considers how synthetic theoretical arguments are made and how to integrate work from fields with different epistemologies.

**COM 509 Collaboration and Scholarship (5)**
Examines the collaborative research process. Students identify and conceptualize a group project, carry it out, and present findings. Topic varies. Prerequisite: COM 501 or equivalent.

**COM 511 Content Analysis (5)**
Content analysis as a technique for making inferences from texts. Includes quantitative, qualitative, and computer-assisted approaches to analysis.

**COM 512 Critical, Social, and Practice-Based Approaches (5)**
Explores approaches to communication research developed from understandings of human communication as inherently social, grounded in tool-mediated action, and interwoven with power relations. Covers a range of theories that are associated with these approaches, and the implications of these theories for methods of data collection and analysis.

**COM 513 Fieldwork Research Methods (5-, max. 10)**
Methods of fieldwork research in communication studies, with emphasis on participant observation, ethnography, and discourse analysis.

**COM 515 Rhetorical Criticism (5)**
History and method of rhetorical criticism. Application of critical standards to various rhetorical artifacts.

**COM 516 Descriptive and Analytic Communication Research Methods (5)**
Development of the historical approach to communications research. Study of historical methods, bibliography, and criticism.

**COM 517 Survey Research (5)**
Faculty-directed project in survey research in which basic principles of survey design, including sampling, observation, measurement, data analysis, and data interpretation, are all applied. Prerequisite: elementary statistics or permission of instructor.
COM 520 Statistical Methods in Communication (5)
Reviews the steps taken in social scientific research on communication, with emphasis on the conceptualization, operationalization, and analysis of quantifiable variables. Highlights understanding of computer application of univariate and bivariate statistics, focusing on both parametric and nonparametric tests.

COM 521 Advanced Statistical Methods in Communication (4)
Discusses complexities in quantitative research on communication. Focus on multivariate data design and analysis, including multiple and logistic regression, ANOVA and MANOVA, and factor analysis. Prerequisite: COM 520.

COM 527 International Communication Research Methods (5)
Methodological issues particular to the design or analysis of research that deals with data from different countries, cultures, or subcultures. Prerequisite: COM 501 or equivalent.

COM 528 Designing Internet Research (5)
Focuses on designing Internet research, assessing the adaptation of proven methods to Internet tools and environments, and developing new methods in view of particular capacities and characteristics of Internet applications. Legal and ethical aspects of Internet research receive ongoing consideration.

COM 529 Research Strategies and Methodologies in Digital Media (5)
Introduces and compares methods of inquiry into digital media industries, practitioners, and consumers. Develops theories and skills applicable in business decision-making processes, as well as in scholarly research.

COM 530 Philosophical Issues in Rhetorical and Communication Theory (5)
Survey of selected philosophical controversies among speech communication theorists, and analysis of one philosopher’s approach to communication. Topics include paradigm descriptions of communication, rhetoric and knowledge, linguistic analysis and communication, hermeneutics and dialogue.

COM 531 Rhetoric in Society (5)
Selected works of major rhetorical theorists such as Aristotle, Cicero, Augustine, Campbell, Whately, Perelman, and Burke. Examines how rhetorical themes are responsive to and symptomatic of societal conditions and values.

COM 532 Classical Rhetoric (5)
Development of the classical tradition in rhetorical theory, criticism, and pedagogy from the sophists to Augustine; analysis of the contributions of major figures and works to that tradition.

COM 534 Studies in Contemporary Rhetoric (5)
Critical analysis of theories of twentieth-century rhetoric.

COM 535 Critical Theory Applications in Communication (5)
Major approaches in critical theory: Marxism, psychoanalysis, structuralism, and semiology. Synthesizes these approaches by viewing the "cultural studies" tradition. Assesses critical theory through empirical study of network television in the United States and the United Kingdom.

COM 538 Theories and Criticism of Communication Technologies (5)
Potential of the computer for use in behavioral science. Prerequisite: elementary programming, elementary statistics.

COM 540 The Rhetoric of Science (5)
Examines selected topics in the rhetoric of science, underscoring the interplay of language, situation, culture, and prior tradition in the quest for exact knowledge of the natural world. Scrutinizes scientific communication in intradisciplinary, interdisciplinary, and extradisciplinary contexts.

COM 542 Readings in Communication History (5)
Selected readings on the history of communication.

COM 543 Research Seminar in Historic and Contemporary Communication (5)
Topical research seminar in historic and contemporary communication.

COM 545 Development of Mass Communication (5)
Institutions of mass communication. Political and social roles.

COM 546 Evolution and Trends in Digital Media (5)
Examines the past, present, and future of digital communication from diverse disciplinary and theoretical perspectives. Offered: A.

COM 547 Telecommunications Policy and Convergent Media (5)
Structures and policies governing the functioning of communication technologies and data flow: United States and international perspectives. Interdisciplinary approach.

COM 549 Mass Communication Process and Effects (5)
Analytic approach to conceptualization and research in the field since 1900.

COM 550 European Union Information Society Policy (5)
Analysis of European Union policy and regulatory documents relating to cultural, economic, political, social, and technological aspect of the new information society, including efforts to promote transborder flows of television programs in Europe.

COM 551 Political Communication (5)
Surveys classic works and new directions in political communication, including functionalist, structuralist, constructivist, network, and comparative approaches, reflecting a range of methods. Examines political organizing, electoral and legislative processes, civic (dis)engagement, media and politics, public deliberation and opinion formation, political identity and discourse. Offered: jointly with POL S 551.

COM 553 Public Opinion and Communication (5)
Conceptual and methodological approaches to public opinion and communication as historical and behavioral phenomena. United States and international perspectives.

COM 555 Political Deliberation (5)
VLPA I&S Gastil
Exploration of deliberative theories of democracy and research on political discussion in campaigns, face-to-face meetings, on-line forums, and informal conversations. Presents different uses and understandings of deliberation and its role in democratic governance. Recommended: COM 577, POL S 551/COM 551.

COM 556 Political Communication Research Practicum: Community, Communication, and Civic Engagement (5)
Overview of the research process, including literature review, hypothesis generation, data gathering, empirical analysis, and writing for publication. Topics vary with instructor, but generally address questions of how communication affects democracy and citizen engagement in national or international contests. Offered: jointly with POL S 594.

COM 557 Government and Mass Communication (5)
Legal problems of mass communication, institutions, and media operations.
COM 558 U. S. Digital Media Law and Policy (5)
Examines the conceptual framework and social application of existing regulations and policies on digital media, with the aim of helping professionals address the changing legal and policy environments.

COM 559 Media and Foreign Policy (5)
The role of communications media in how nations interact. The media as source, actor, and catalyst in international affairs. Interdisciplinary focus.

COM 560 Regional Communication Systems (5)
Communication as a factor in economic, sociocultural, and political relations among nations of a region. Focus varies with specialization of instructor. Consult graduate secretary for details. Interdisciplinary focus.

COM 561 International Communication Systems (5)
International communications and contemporary issues that affect the functioning of global communication systems. Interdisciplinary focus.

COM 562 Media, Myth, and Ritual (5) Douglas
Examines the way media operate in a secular society with many of the characteristics that traditionally have been imputed to spirituality and religion. Analyzes media’s mythological and ritualistic function in society by taking an interdisciplinary approach informed by religious studies, cultural studies, journalism, and communication theory.

COM 563 Mass Media Structure (5)
Research on the structural aspects of mass communication.

COM 564 Gender, Race, and Communication (5)
Analysis of the role of media in the construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with WOMEN 589.

COM 565 Organizational Communication (5)
Examination of social scientific theory and research on communication in organizations. Topics include quantitative and qualitative approaches to process of organizational communication, function and structure of macro networks, superior-subordinate relationships, and the role of communication in organizational change, development, and effectiveness.

COM 566 Discourse and Sex/uality (5)
Seminar-based analysis of discourse and social construction of eroticism/desire in face-to-face/mediatized talk and texts; examination of the reproduction of power, control and ideology through the linguistic and semiotic realization of sex/uality. Offered: jointly with WOMEN 566.

COM 567 Discourse and Sex/uality (5)
Analysis of the role of media in the construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with WOMEN 589.

COM 568 Communication Education Research (5)
Emphasizes research methods and influences of culture and context.

COM 569 Nonverbal Communication (5)
Reviews primary theories and research on nonverbal communication. Focus on developmental and social aspects of nonverbal cues, including review of communicative functions served by nonverbal channels. Topics include paralinguistic systems, relational messages, deception, acquisition of cue use, and emotional expression. Emphasizes research methods and influences of culture and context.

COM 570 Communication Education Research (5)
Communication in instructional environments. Nature of instructional communication, paradigms for instructional communication research, quantitative and qualitative approaches to instructional communication, verbal and nonverbal classroom interaction.

COM 571 Communication Theory (5)
Theory and literature of the ethnography of communication, with special emphasis on the descriptive-comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with ANTH 584.

COM 572 Digital Media Message Design and Content Creation (5)
Applies communication theory to the identification, creation, and evaluation of digital media message design to meet needs of the target audience. Introduces the theory and practice of hypertext and project management techniques needed to organize digital assets, allocate resources, and meet deadlines.

COM 573 Digital Media Economics and Management (5)
Emphasizes communication theory to analyze effective management of digital media enterprises, with practical application of economic theory to entrepreneurial strategies. Topics include analysis of the total business process, patterns of ownership, merger and acquisitions, finance and accounting, human resources development, sales and marketing, and ethics.

COM 574 Digital Media Branding and Marketing (5)
Critically examines the role of advertising, marketing, and other promotional efforts in establishing the branding of digital media companies. By using communication theory to analyze successful cases of established and start-up digital media companies, participants identify practicable and effective strategies for brand building and enhancement.

COM 575 Global Digital Media Law, Policy, and Ethics (5)
Examines the legal, social, political, and policy environments of digital media laws, policies and ethics around the world. Offers a comparative perspective, which prepares digital media managers to expand into other markets outside their home bases.

COM 576 Selected Readings (1-5, max. 10)
Selected readings assigned by faculty.

COM 577 Independent Research (1-5, max. 10)
Research projects designed and led by students with faculty supervision.

COM 578 Directed Research (1-5, max. 10)
Student participation in faculty-directed research projects.
COM 593 Communication Internship (1-5, max 15)
Provides students an opportunity to connect their scholarship with communities outside academia by engaging in a project that uses communication theory to inform practical work.

COM 594 Professional Proseminar (1, max. 6)
Helps students develop a range of professional competencies. Focuses on a particular topic such as computer-assisted research, technology in the classroom, obtaining funding for research, writing for academic publication, career choices after graduate school, and ethics in research and teaching.

COM 595 Public Speaking Pedagogy (1, max. 5)
Content and effective teaching skills for public speaking course. Emphasizes the rhetorical tradition, grading speeches, and facilitating oral critiques. Required for all COM 220 TAs; recommended for those who want to teach COM 220. Only 3 credits count toward degree. Credit/no credit only.

COM 596 Communication Pedagogy (1, max. 3)
Development of effective teaching and professional skills. Emphasizes interactive teaching, leading discussions, lecturing, planning courses, evaluating resource materials, grading and evaluation, teaching philosophies, and effective classroom management and communications. Required of all graduate students who accept teaching assistantships. Credit/no credit only.

COM 597 Special Topics in Communication (5, max. 10)
Examination of current topics in the theory and practice of political communication. Offered: jointly with POL S 552.

COM 600 Independent Study or Research Project (*)
Prerequisite: permission of supervisory committee chairperson. Credit/no credit only.

COM 700 Master’s Thesis (*)

COM 800 Doctoral Dissertation (*)

Comparative History of Ideas
B102 Padelford

Comparative History of Ideas is an interdisciplinary program that draws on a wide variety of disciplines within the College of Arts and Sciences to examine the interplay of ideas and their cultural, historical, and political contexts.

Undergraduate Program
Adviser
B102D Padelford, Box 354300
206-543-2097
chid@u.washington.edu

The Comparative History of Ideas program offers the following programs of study:

- The Bachelor of Arts degree with a major in comparative history of ideas
- A minor in comparative history of ideas

Bachelor of Arts

Suggested First- and Second-Year College Courses: Course work in the history of relevant periods, areas, and themes. Introductory courses in philosophy, English, comparative literature, ethnic and gender studies, and other areas of the humanities and social sciences. CHID 110.

Department Admission Requirements
Students in good academic standing may declare this major after meeting with an adviser.

Major Requirements

55 credits as follows:
- 10 credits in Group A: Introduction to the History of Ideas
- 10 credits in Group B: History of Intellectual Cultures (5 credits in each subgroup)
- 10 credits in Group C: History of Particular Ideas or Themes
CHID 390: The Colloquium in the History of Ideas
A 5-credit senior project (CHID 491)
The remaining 15 credits should be chosen from among approved electives.

At least half of the credits presented for the major must be at the upper-division level.

A minimum GPA of 2.50 in the classes presented for the major.

Students may expand the senior project to 10 or 15 credits if they choose (CHID 492/493). The 5 to 10 optional senior project credits are in addition to the 55 credits required of all CHID majors.

Please see the program adviser for current lists of Group A, B, and C courses.

Minor

Minor Requirements: 30 credits as follows:
- 5 credits in Group A: Introduction to the History of Ideas
- 10 credits in Group B: History of Intellectual Cultures (5 credits in each subgroup)
- 5 credits in Group C: History of Particular Ideas or Themes
CHID 390: The Colloquium in the History of Ideas
A 5-credit CHID 498: Special Colloquia.

Please see the program adviser for current lists of Group A, B, and C courses.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The program encourages students to adopt nuanced perspectives on their position relative to texts, cultures, societies, and historical periods. Program graduates have gone on to postgraduate studies in the humanities and social sciences, as well as professional training and careers in a wide variety of fields including law, administration and public policy, medicine, education, journalism, new media, and film. Instructional and Research Facilities: The program provides computer workstations for students in Padelford B102.

- Research, Internships, and Service Learning: CHID undergraduates participate in a variety of educational experiences outside the classroom. For example, many of the study abroad programs incorporate an “engaged community learning” project, which provides an opportunity for students to apply their analytical skills and understanding of the historical and cultural context to a close participation in the work of local organizations. The diversity of these community efforts allows students to engage their particular interests through participation in social welfare organizations, grassroots community groups, after-school programs, health clinics, theater and other performing arts groups, as well as video and other visual arts projects.

- Department Scholarships: None offered.

- Student Organizations/Associations: CHID students spearheaded the formation and development of the DIALOGUE Project, a group open to all UW students interested in international issues. The project serves to facilitate greater international and intercultural dialogue within our own community centered around topics germane to each student’s own educational goals. Many students work directly to develop and help coordinate international clubs in high schools across the state.
**Course Descriptions**

**CHID 110 The Question of Human Nature (5) I&S/VLPA**

Clowes, Merrell

Considers the relationship between the individual and his/her culture. Traces the evolution of the notion of human nature in Europe and the United States and compares this tradition with representations of the human being from other cultural traditions.

**CHID 205 Method, Imagination, and Inquiry (5) VLPA Searle**

Examines ideas of method and imagination in a variety of texts, in literature, philosophy, and science. Particularly concerned with intellectual backgrounds and methods of inquiry that have shaped modern Western literature. Offered: jointly with ENGL 205.

**CHID 207 Introduction to Intellectual History (5) I&S Clowes, Toews**

Ideas in historical context. Comparative and developmental analysis of Western conceptions of "community," from Plato to Freud. Offered: jointly with HIST 207.

**CHID 210 The Idea of the University: Ways of Learning, Exploring, and Knowing (5) I&S**

Toews

Considers different ways of learning, exploring, and knowing in the context of the historical development, social context, and impact of universities in general and of the University of Washington in particular. Includes reflective workshops on choosing areas of study (majors) in collaboration with Undergraduate Advising.

**CHID 270 Special Topics (5, max. 15) I&S**

Each special topics course examines a different subject or problem from a comparative framework.

**CHID 300 Ideas in Art (5) VLPA Opperman**

Selected monuments of art and architecture in the Western tradition, from the Greeks to the twentieth century, studied in relation to the intellectual background of the ages and civilizations that produced them. Slide lectures accompanied by discussion of assigned readings in philosophical, religious, scientific, political, literary, and artistic texts. Offered: jointly with ART H 300.

**CHID 332 Disability and Society: Introduction to Disability Studies (5) I&S**

Introduction to the field of disability studies. Focuses on theoretical questions of how society predominantly understands disability and the social justice consequences. Examines biological, social, cultural, political, and economic determinants in social creation/construction (framing) of disability and effects on those claiming and/or labeled as disabled. Offered: jointly with LSJ 332.

**CHID 350 Women in Law and Literature (5) I&S/VLPA Tupper**

Representations of women in American law and literature. Considers how women’s political status and social roles have influenced legal and literary accounts of their behavior. Examines how legal cases and issues involving women are represented in literary texts and also how law can influence literary expression. Offered: jointly with WOMEN 350.

**CHID 370 The Cultural Impact of Information Technology (5) I&S/VLPA**

Jaffee, Webb

Utilizing approaches from the history of technology, cultural studies, and literary theory, seeks to analyze the cultural and social impact of information technology. Considers how information technologies impact our relationships with others, our concept(s) of self, and the structure of the communities to which we belong. Offered: jointly with COM 302.

**CHID 380 The Nature of Religion and its Study (5) I&S Clowes, Toews, Tupper**

Jaffee

Study of religion as a general human phenomenon. Manner in which different methods of inquiry (phenomenology, anthropology, sociology, psychology, literary criticism, archaeology, philosophy, theology) illuminate different aspects of religion and shape our conceptions of its nature. Recommended: RELIG 201 or RELIG 202. Offered: jointly with RELIG 380.

**CHID 390 Colloquium in the History of Ideas (5) I&S Clowes, Toews, Tupper**

Basic theoretical issues in the comparative history of ideas as a disciplined mode of inquiry; examination of representative historical figures and problems. Primarily for majors.

**CHID 433 Disability Law, Policy, and the Community (5) Croxson, Toews, Webb**

Seminar addressing legal rights of disabled people, history of disability policy in the United States, and the role of community activism and other forces in policy development and systems change. Introduction to the existing social service systems that affect disabled people. Prerequisite: LSJ 332. Offered: jointly with LSJ 343.

**CHID 470 CHID Study Abroad (5, max. 15) I&S**

For participants in study-abroad program. Specific course content varies.

**CHID 471 Europe Study Abroad (5, max. 15) I&S**

For participants in study-abroad program. Specific course content varies.

**CHID 472 Latin America Study Abroad (5, max. 15) I&S**

For participants in study-abroad program. Specific course content varies.

**CHID 473 Africa Study Abroad (5, max. 15) I&S**

For participants in study-abroad program. Specific course content varies.

**CHID 474 Asia Study Abroad (5, max. 15) I&S**

For participants in study-abroad program. Specific course content varies.

**CHID 475 East Asia Study Abroad (5, max. 15) I&S**

For participants in study-abroad program. Specific course content varies.

**CHID 476 South Pacific Study Abroad (5, max. 15) I&S**

For participants in study-abroad program. Specific course content varies.

**CHID 477 Middle East Study Abroad (5, max. 15) I&S**
For participants in study-abroad program. Specific course content varies.

**CHID 484 Colonial Encounters (5) I&S**
History of European colonialism, focusing on British, French, and Dutch colonial encounters from 1750s to 1950s. Units on colonial law, medicine, religion, sexuality, and commodity culture. Offered: jointly with HSTEU 484.

**CHID 491 Senior Thesis (5-) I&S**
Critical and methodological issues. Required of candidates for an honors degree.

**CHID 492 Senior Thesis (-5-) I&S**
Critical and methodological issues. Required of candidates for an honors degree.

**CHID 493 Senior Thesis (-5) I&S**
Research and writing of thesis under supervision of a faculty member. Required of candidates for an honors degree.

**CHID 496 Focus Groups (1-2, max. 4)**
Credit/no credit only.

**CHID 497 Peer Facilitators (5)**

**CHID 498 Special Colloquia (1-5, max. 20) I&S**
Each colloquium examines a different subject or problem from a comparative framework. A list of topics is available from the CHID office.

**CHID 499 Undergraduate Independent Study or Research (1-5, max. 10)**
Supervised independent study for students who wish to pursue topics not available in regular course offerings.

**Comparative Literature**
B-531 Padelford

Comparative literature works across national and regional boundaries to explore the relationships among multiple literary traditions. Comparative literature also focuses on the relationship of literature to the other arts and to fields of knowledge such as philosophy, anthropology, history, and media or cultural studies.

**Undergraduate Program**
Adviser
B-534 Padelford, Box 354338
206-685-1642
kholl@u.washington.edu

The Comparative Literature program offers the following programs of study:

- Bachelor of Arts with a major in comparative literature
- Bachelor of Arts with a major in comparative literature (cinema studies)
- Minor in comparative literature (literature minor only)

The literature track includes core course requirements in literary analysis (C LIT 300), literary theory (C LIT 400) and regional literatures (C LIT 320, C LIT 322, C LIT 323).

The cinema studies track is structured around two series of required core courses devoted to film theory and film history.

**Bachelor of Arts**

**Suggested First- and Second-Year College Courses:** Courses in foreign languages, classics, history, philosophy, literature, and writing. Sufficient preparation in a foreign language (completion of second year or higher) to enable the student to take a 300- or 400-level literature or national film course by the senior year.

**Department Admission Requirements**
Minimum 2.00 overall GPA; completion of one course fulfilling either College of Arts and Science English composition requirement or the W (writing) requirement (5 credits).

**Cinema Studies:** Same as above, plus completion of C LIT 270 or the equivalent.

**Major Requirements**

**Literary Studies Option:** (50 credits)
- C LIT 300, C LIT 400 (10 credits).
- Two differently-numbered courses from among C LIT 320, C LIT 321, C LIT 322, C LIT 323 (10 credits).
- Two additional courses in comparative literature at the 300 or 400 level (10 credits).
- At least one foreign literature course, studied in the original language (3/5 credits).
- Remaining (17/15 credits) to be earned, with few exceptions, in 300- and 400-level literature courses from among the offerings of Comparative Literature and participating departments.

**Cinema Studies Option:** (50 credits)
- 15 credits from cinema studies core courses, with at least one course in film theory and one course in film history (C LIT 301, C LIT 302, C LIT 303, C LIT 310, C LIT 311, C LIT 312).
- 10 credits from C LIT core requirements (choice of either C LIT 300 or 400, and one course from C LIT 320, C LIT 321, C LIT 322, C LIT 323).
- One national cinema course (3/5 credits).
- Remaining credits to be earned in recommended 300- and 400-level cinema elective courses offered by Comparative Literature or any UW department.

**Minor**

**Minor Requirements:** 30 credits to include C LIT 300, C LIT 400, and one from among C LIT 320, C LIT 321, C LIT 322, and C LIT 323; at least one course in a literature, studied in the original language, other than English; and the remaining credits in upper-division literature courses offered through Comparative Literature and participating departments.

A minor is not available for the Cinema Studies option.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The study of comparative literature provides training in the analysis and critique of varied kinds of social texts and discourses. It stresses the centrality of historical and cross-cultural awareness for effective interpretation of both verbal and visual texts. Students earning the degree in comparative literature may pursue advanced work at the M.A. and Ph.D. level in language and literature programs, or allied curricula in film studies, philosophy, intellectual history, and cultural studies. They may aim for degrees in education, specializing in language arts, foreign language teaching, or both. Comparative literature majors may also find jobs in fields where liberal arts skills, such as strong writing ability and fluency in foreign languages, are valued. Cinema studies majors often seek positions associated with film production and distribution.

**Instructional and Research Facilities:**
- **Honors Options Available:** Departmental honors by invitation. See adviser.
- **Undergraduate Research, Internships, and Service Learning:** See adviser for internship information.
- **Department Scholarships:** Some financial support available for student film projects.
- **Student Organizations/Associations:**
  - Film Club, film@u.washington.edu
  - UW Film Colloquium, filmcol@u.washington.edu
The Department of Comparative Literature offers a program of study with faculty members from the following participating departments: Asian Languages and Literature, English, French and Italian Studies, Germanics, Near Eastern Languages and Civilization, Scandinavian Studies, Slavic Languages and Literatures, Spanish and Portuguese Studies, and Women Studies. Study in this program leads to a Master of Arts or Doctor of Philosophy degree. Students concentrate on graduate courses in comparative literature and specialize in two or more national literatures of major interest to them, studied in the original language. With permission, a Ph.D. aspirant may choose as a third area of study a field outside of literature (e.g., philosophy, religion, art, political thought). On receiving the advanced degree, the student is qualified for teaching and research in comparative and general literature, as well as the language and literature of specialization.

**Admission Requirements**

Applicants for the M.A. program are required to have a B.A. degree in comparative literature, English, or any foreign literature, or an equivalent background; applicants for the Ph.D. program are required to have an M.A. in one of the above areas. M.A. students are required to demonstrate advanced reading knowledge in one language other than English and a basic reading knowledge of a second. Ph.D. students are required to demonstrate advanced reading knowledge in two languages other than English and a basic reading knowledge of a third. Language competence is evaluated by Comparative Literature faculty through departmental examinations or by evidence of completion of satisfactory advanced (400- or 500-level) course work in the language.

**Financial Aid**

The department awards teaching assistanceships annually to qualified students and provides up to five years of support toward the Ph.D. to students who enter with a B.A. Teaching assistanceships can be assigned in Comparative Literature, Cinema Studies, or in any of the national literature departments affiliated with Comparative Literature.

**Ph.D. Program in Theory and Criticism**

This is a joint-doctoral program with eleven participating doctoral programs (Asian Languages and Literature; Classics; Comparative Literature; Drama; English; Germanics; French and Italian Studies; Scandinavian Studies; Slavic Languages and Literatures; Spanish and Portuguese Studies; and Communication). The program combines the doctoral program in one of the participating departments with an additional set of courses in theory and criticism into an integrated course of study. The purpose is to broaden a student’s perspective and to increase awareness of different critical approaches to literature and related fields. Study in this program leads to a Ph.D. in the respective major field and theory and criticism.

**Admission Requirements**

Applicants to the Ph.D. program in theory and criticism must have been admitted to one of the participating departments and have received a Master’s degree in a subject represented by these departments or in a related field.

**Faculty**

- Alaniz, José Adj. Asst. Prof.
- Ammerlahn, Hellmut Professor
- Bean, Jennifer Asst. Prof.
- Behler, Diana Professor
- Benitez, Francisco Acting Asst. Prof. (Temp.)
- Blau, Herbert Professor
- Borch-Jacobsen, Mikkel Professor
- Braeister, Yomi Assoc. Prof.
- Brown, Jane Professor
- Brown, Marshall Professor
- Collins, Douglas Assoc. Prof.

- Wang, Ching-Hsien Professor
- Webb, Eugene Prof. Emer

**Course Descriptions**

**C LIT 200 Introduction to Literature (3/5) VLPA**

Reading, understanding, and enjoying literature from various countries, in different forms of expression (e.g., dramatic, lyric, narrative, rhetorical) and of representative periods. Emphasis on the comparative study of themes and motifs common to many literatures of the world.

**C LIT 210 Literature and Science (5, max. 15) VLPA**

Introduces the rich and complex relationship between science and literature from the seventeenth century to the present day. Students examine selected literary, scientific, and philosophical texts, considering ways in which literature and science can be viewed as forms of imaginative activity.

**C LIT 211 Literature and Culture (5, max. 15) I&S/VLPA**

Study of literature in its relation to culture. Focuses on literature as a cultural institution, directly related to the construction of individual identity and the dissemination and critique of values.

**C LIT 230 Introduction to Folklore Studies (5) I&S/VLPA**

Comprehensive overview of the field of folkloristics, focusing on oral genres, customs, belief, and material culture. Particular attention to the issues of community, identity, and ethnicity. Offered: jointly with SCAND 230.

**C LIT 240 Writing in Comparative Literature (5, max. 15) C**

Comparative approach to literature and a workshop in writing comparative papers in English. Emphasis on cross-cultural comparison of literary works. Readings in English with an option to read selected texts in the original languages Offered: AWSp.

**C LIT 270 Perspectives on Film: Introduction (5) VLPA**

Introduction to film form, style, and techniques. Examples from silent film and from contemporary film. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

**C LIT 271 Perspectives on Film: Great Directors (5) VLPA**

Introduction to authorship in the cinema. The work of a major director or directors. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

**C LIT 272 Perspectives on Film: Genre (5) VLPA**
Introduction to study of film genre. Literary, mythic, and historic aspects of film genre. 270, 271, 272 are designed to be taken as a sequence, but may be taken individually.

C LIT 280 The Medieval World: Social, Religious, Intellec-
tual Life in the Middle Ages (5) I&S/VLPA
A broadly comparative introduction to medieval culture drawing on literature, philosophy, history, art, and music. Varying topics and faculty.

C LIT 281 The Medieval World: Social, Religious, Intellec-
tual Life in the Middle Ages (5) I&S/VLPA
A broadly comparative introduction to medieval culture drawing on literature, philosophy, history, art, and music. Varying topics and faculty.

C LIT 300 Introduction to Comparative Literature: Forms,
Genres, History (5) VLPA
An introduction to comparative literary study designed for departmental majors. Examines how literary forms and genres shape our reading of texts; how these forms and genres change over time; and how literary forms and genres manifest themselves in different cultural traditions. Includes theoretical readings and substantial writing.

C LIT 301 Theory of Film: Analysis (5) VLPA
Introduction to the analysis of film. Covers major aspects of cinematic form: mise en scene, framing and camera movement, editing, and sound and color. Considers how these elements are organized in traditional cinematic narrative and in alternative approaches.

C LIT 302 Theory of Film: Critical Concepts (5) VLPA
Overview of the main conceptual problems in film criticism such as: “what is a film?”, “what is the relationship between film and reality?”, “does a film have a language?”, “what is the connection between image and sound?” Follows a historical timeline within five individual sections.

C LIT 303 Theory of Film: Genre (5) VLPA
Introduction to the history and significance of film genres from the early days of film to the present. Examines a selection of several genres, drawn from a list including western, melodrama, musical, thriller, road odyssey, film noir, and documentary. Topics include form, ideology, authority, history, innovation, and parody.

C LIT 310 History of Film: 1895-1929 (5) VLPA
Film history from its beginnings in the 1890s through the golden era of silent film in the 1920s. Topics include the invention of major film techniques, the creation of Hollywood and the studios, and movements such as expressionism, constructivism, and surrealism.

C LIT 311 History of Film: 1930-1959 (5) VLPA
Film history from the introduction of sound through the late 1950s. Focuses mostly on the golden age of the Hollywood studios and on alternative developments after World War II in Italy (Neo-Realism), France (the New Wave), and Japan.

C LIT 312 History of Film: 1960 - 1988 (5) VLPA
Covers the vast changes in filmmaking since 1960. Topics include the continuing influence of the French New Wave, the New German Cinema of the 70s and the “New Hollywood” of the 70s, American independent film of the 80s, and the resurgence of Chinese filmmaking since 1980.

C LIT 313 History of Film: 1989-Present (5) VLPA
Addresses the latest trends in international filmmaking typically with an emphasis on world cinema and issues of globalization and diaspora. Sometimes taught in conjunction with the Seattle International Film Festival.

C LIT 315 National Cinemas (3-5, max. 15) VLPA
Examines the cinema of a particular national, ethnic or cultural group, with films typically shown in the original language with subtitles. Topics reflect themes and trends in the national cinema being studied.

C LIT 320 Studies in European Literature (5, max. 15) VLPA
Examination of the development of European literature in a variety of genres and periods. Possible areas of study include literature from romantic fiction of early nineteenth century through great realist classics of second half of the century or from symbolism to expressionism and existentialism.

C LIT 321 Studies in Literature of the Americas (5, max. 15) VLPA
Emphasizes connections between twentieth century literature of the United States and Canada and current literature of Latin America. Emphasizes that, despite obvious differences, much is shared in terms of culture and national sensibility across the two continents.

C LIT 322 Studies in Asian and Western Literatures (5, max. 15) VLPA
Topics designated by individual instructors.

C LIT 323 Studies in the Literature of Emerging Nations (5, max. 15) VLPA
Novels and short stories, from Africa, the Middle East, and South Asia. Discusses relationship of Western literary genres to an oral literary tradition, as well as issues like colonialism, gender relations, narrative technique, native and non-native languages.

C LIT 330 The European Fairy Tale (5) VLPA
An introduction to folktale and literary tales from various traditions and periods. A discussion of their origin, special characteristics, dissemination, and relevance to the contemporary reader.

C LIT 331 Folk Narrative (5) VLPA
Survey of various genres of folk narratives studied in performance contexts to reveal their socio-cultural functions in a variety of milieu. Theory and history of folk narrative study, taxonomy, genre classification, and interpretative approaches. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 331.

C LIT 332 Folk Belief and World View (5) VLPA
Study of folk belief and world view expressed in memorats, legends, magic formulas, and other examples of oral tradition. Analysis of forms and origins of belief genres, their esthetic and social functions, and the role of oral tradition as a tool of social control and change. Offered: jointly with SCAND 332.

C LIT 333 Folklore and Material Culture (5) VLPA
Material culture in traditional and contemporary Scandinavia. Comprehensive examination of nonverbal genres (including vernacular architecture, settlement, textile foodways) with an emphasis on broad theoretical issues such as community, identity, ethnicity. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 333.

C LIT 334 Immigrant and Ethnic Folklore (5) I&S/VLPA
Survey of verbal, customary, and material folk traditions in ethnic context. Theories of ethnic folklore research applied to the traditions of American communities of Scandinavian, Baltic, or other European ancestry. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 334.

C LIT 350 Themes in World Literature: Parents and
Children (5) VLPA
World literature, from the Renaissance to modern times, based upon the theme of “parents and children.” Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the motive of generational conflict.
C LIT 351 Themes in World Literature: Love, Sex, and Murder (5) VLPA
World literature, from the Renaissance to modern times, based upon the theme of “love, sex, and murder.” Selections drawn from European, English, and American literature, not limited to period and genre. Focus upon the human potential for both great violence and extraordinary compassion.

C LIT 352 Themes in World Literature: Death and Transfiguration (5) VLPA
Theme of death, transfiguration, and new life in world literature. Selections from Tolstoy, D. H. Lawrence, Celine, E. M. Forster, and other major writers.

C LIT 357 Literature and Film (3-5, max. 10) VLPA
The film as an art form, with particular reference to the literary dimension of film and to the interaction of literature with the other artistic media employed in the form. Films are shown as an integral part of the course. Content varies.

C LIT 371 Literature and the Visual Arts (5) VLPA
Focuses on specific theoretical problems. Examines the relationship between text and image in a variety of art forms including poetry, novels, paintings, photography, essays, comic strips, film, and advertisement. Readings, in English, from a wide variety of national literatures.

C LIT 375 Images of Women in Literature (5, max. 15) VLPA
Comparative study of the ways women’s image, social role, and psychology have been portrayed by writers of various nationalities and literary periods. Selection of theme varies from quarter to quarter. Works are read in English translation.

C LIT 396 Special Studies in Comparative Literature (3-5, max. 10) VLPA
Offered by visitors or resident faculty. Content varies.

C LIT 397 Special Topics in Cinema Studies (3-5, max. 10) I&S/VLPA
Varying topics relating to film in social contexts. Offered by resident or visiting faculty.

C LIT 400 Introduction to the Theory and Criticism (5) VLPA
A selection of major theoretical statements in the history of literary theory and criticism, with texts drawn from such fields as literary studies, aesthetic theory, film studies, philosophy, and cultural studies.

C LIT 410 Studies in Literary History (5, max. 15) VLPA
Introduction to a major figure or movement associated with the development of literary history. Through the study of one aspect of literary history students gain a thorough understanding of a particular point of view, while exploring the breadth of contemporary approaches to literature.

C LIT 421 Studies in Connections: Literature and Other Disciplines (5, max. 15) VLPA
Examines the links between literature and other disciplines or art forms. Literature and history, literature and philosophy, literature and music, literature and the visual arts are all appropriate topics. Selection of focus depends on instructor.

C LIT 422 Studies in Genre (5, max. 15) VLPA
Major genres of world literature: poetry, fiction, drama. Readings, in English from a wide selection of national literatures.

C LIT 424 The Epic Tradition (5) VLPA
Ancient and medieval epic and heroic poetry of Europe in English: the Iliad, Odyssey, and Aeneid; the Roland or a comparable work from the medieval oral tradition; pre-Greek forerunners, other Greco-Roman literary epics, and later medieval and Renaissance developments and adaptations of the genre. Choice of reading material varies. Literary background recommended. Offered: jointly with CLAS 424.

C LIT 430 Readings in Folklore (5) VLPA
Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 430.

C LIT 431 The Northern European Ballad (5) VLPA
Integrative study of the Northern European Ballad, with an emphasis on texts, performance, context, history, theory, genre classification, and interpretive approaches. Offered: jointly with SCAND 431.

C LIT 460 Cinematic Production (5) VLPA
Examines fictional or documentary filmmaking/video production from concept, focus, treatment, research, data gathering, story development, scripting, narrating, performing and postproduction. Students will be exposed to a wide variety of filmmaking styles and will engage in a group creative project.

C LIT 470 Senior Seminar in Folklore (5) VLPA
Investigates ethnic and several American folk traditions in the Pacific Northwest through extensive fieldwork. Recommended: SCAND 230 or C LIT 230. Offered: jointly with SCAND 470.

C LIT 490 Directed Study or Research (1-5, max. 10)
Individual study of topics in comparative literature by arrangement with the instructor and the Comparative Literature office.

C LIT 491 Internship (1-5, max. 5)
Supervised experience in local businesses and other agencies. Open to upper-division Comparative Literature and Cinema Studies majors. Recommended: 25 credits of C LIT courses.

C LIT 493 Comparative Literature Honors Seminar (5, max. 15) VLPA
Special topics in comparative literature. Required of honors students in comparative literature.

C LIT 495 Honors Thesis (5) VLPA
Preparation of an honors thesis under the direction and supervision of a faculty member.

C LIT 496 Special Studies in Comparative Literature (3-5, max. 15) VLPA
Offered occasionally by visitors or resident faculty. Content varies.

C LIT 497 Special Topics in Cinema Studies (3-5, max. 10) VLPA
Varying topics in Cinema Studies. Offered by resident or visiting faculty.

C LIT 500 The Theory of Literature I: The Literary Text (5, max. 15)
An investigation into the nature of literature in contrast to other forms of writing and into essential features of literature such as genres, imagery, modes of communication, and structure.

C LIT 501 The Theory of Literature II: History of Literature (5, max. 15)
An exploration of topics of literary history such as periods, traditions, the writing of literary history, and literary history in contrast to other histories.

C LIT 502 The Theory of Literature III: Special Topics (5, max. 15)
Offerings vary to cover topics such as individual theorists, theoretical movements, or the intersection of literary theory with
other disciplines or arts (psychoanalysis, structuralism, ethics, aesthetics).

C LIT 507 History of Literary Criticism and Theory I (5, max. 15)
A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle, Longinus, and the major medieval critics. Offered: jointly with ENGL 507.

C LIT 508 History of Literary Criticism and Theory II (5, max. 15)
Literature criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Offered: jointly with ENGL 508.

C LIT 509 History of Literary Criticism and Theory III (5, max. 15)
Literary criticism and theory from Kant’s Critique of Judgment to the mid-twentieth century and the work of Northrop Frey. Offered: jointly with ENGL 509.

C LIT 510 History of Literary Criticism and Theory IV (5, max. 15)
A study of the major issues in literary criticism and theory since about 1965. Offered: jointly with ENGL 510.

C LIT 511 Literary Translation (5, max. 15)
Lectures on principles of translating literary works into readable English. Students present and comment on translations made by them and write seminar papers on problems of translation in theory and practice.

C LIT 516 Colloquium in Criticism (5, max. 15)
Recent trends in literary criticism, taught by representatives from various literature departments, covering critical trends such as structuralism, poststructuralism, hermeneutics, reception theory, and sociological approaches to literature.

C LIT 517 Colloquium in Folklore (5)
Recent trends in folklore studies, taught by representatives from various literature departments and disciplines in the social sciences.

C LIT 518 Colloquium in Medieval Studies (5)
Salient literary aspects of the European Middle Ages, taught by representatives from various literature departments as well as from related disciplines, such as philosophy, art history, history, and comparative religion.

C LIT 530 Cultural Criticism and Ideology Critique I (5, max. 15)
A study of the main attempts to come to an understanding of the humanities and the nature of historical interpretation in a cultural context.

C LIT 535 Cultural Criticism and Ideology Critique II (5, max. 15)
Offerings vary to cover individual theorists and particular manifestations of cultural criticism and ideology critique.

C LIT 545 Medieval Studies (3/5, max. 15)
Literature, intellectual history, and sociology of the Middle Ages, 500-1200. Topics may include “renaissance” of the twelfth century; the educational ideal; rise of universities; philosophical concepts.

C LIT 546 Studies in Renaissance and Baroque (3-5, max. 10)
Aspects of Western European literature during the Renaissance and Baroque period. Course content varies.

C LIT 547 Studies in Eighteenth-Century Literature (3-5, max. 10)
Examination of various trends in eighteenth-century literature including the Enlightenment, Rationalism, Pre-Romanticism, and Neo-Classicism. Course content varies with instructor.

C LIT 548 Studies in Nineteenth-Century Literature (3-5, max. 10)
Examination of various trends in nineteenth century literature including Romanticism, Realism, Naturalism, and Symbolism.

C LIT 549 Twentieth-Century Literature (3-5, max. 10)
Selected movements, schools, and trends of significance in twentieth-century literature of Europe and Americas. Symbolism, surrealism, dada, expressionism, neorealism, existentialism, nouveau roman, and absurd may be considered. Texts in English, French, and German figure most prominently, but Spanish, Italian, Russian, and other materials may be examined. Content and emphasis vary.

C LIT 570 The Novel: Theory and Practice (3-5, max. 15)
Study of the novel as a genre, examining two or more novels of varying national literatures. Course content varies.

C LIT 571 The Lyric: Theory and Practice (3-5, max. 15)
Examination of central questions in the study of the lyric genre as approached from an international point of view. Course content varies.

C LIT 572 The Epic: Theory and Practice (3-5, max. 15)
Examination of epic literature as exemplified by selected works chosen from various cultures and periods (e.g., French and German medieval courtly epic, the epic in Renaissance and baroque Europe, traditions of the mock epic). Course content varies.

C LIT 573 The Drama: Theory and Practice (3-5, max. 15)
Examination of various aspects of the drama as a major literary genre, as approached from international and multilingual points of view. Course content varies.

C LIT 576 Seminar in East-West Literary Relations (3-5, max. 15)
Comparative investigation of literary topics requiring the study of both Eastern and Western documents. Explores parallels and contradictions between the two, in concepts, ideas, and specific topics. A comparative paper on a chosen topic with qualified conclusions is required. Emphasis varies. Prerequisite: at least one East Asian language.

C LIT 590 Master of Arts Essay (5/10, max. 10)
Research and writing project under the supervision of a faculty member.

C LIT 596 Special Studies in Comparative Literature (3-5, max. 15)
Offered occasionally by visiting or resident faculty. Course content varies.

C LIT 599 Special Seminar or Conference (1-9, max. 30)
Group seminars or individual conferences scheduled to meet special needs. Prerequisite: permission of graduate program adviser.

C LIT 600 Independent Study or Research (*)

C LIT 700 Master’s Thesis (*)

C LIT 800 Doctoral Dissertation (*)

Computer Science
AC101 Paul G. Allen Center for Computer Science and Engineering

Computer science is the study of information and algorithms within the context of real and abstract computing devices. Computer scientists are interested in such topics as the representation and
storage of information; algorithms to access, display, edit, and transform information; programming languages to express algorithms; and hardware and software processors to execute algorithms. These concerns lead to practical developments in computer systems software, such as operating systems and compilers; in application areas, such as artificial intelligence, computer graphics, and computational biology; and also lead to theoretical investigations of computers, algorithms, and data.

**Undergraduate Program**

Adviser
101 Paul G. Allen Center for Computer Science and Engineering,
Box 352350
206-543-1695
ugrad-advisor@cs.washington.edu

The Department of Computer Science and Engineering offers the following programs of study:

- The Bachelor of Science degree with a major in computer science
- The Bachelor of Science degree with a major in computer engineering (see Computer Engineering section)

The core requirements of the two undergraduate majors are identical. The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the theory, design, and implementation of software systems and applications (for example, the techniques of modern compilers or the algorithms behind computer graphics and animation).

The computer engineering major may be more appropriate for students who are interested in creating and building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints.

The program includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole.

**Bachelor of Science**

**Department Admission Requirements**

Applicants are considered in two groups — Direct Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

**Direct Admission Group:** Computer Science and Engineering enrols up to 20 percent of its incoming class directly out of high school, prior to the completion of university-level prerequisites. Freshman applicants to the University listing Computer Science or Computer Engineering as their intended major are automatically considered. Competitive applicants will have taken calculus and at least five years of English composition. Admission is for autumn quarter only.

**Upper-Division Admission Group:** Students must have completed MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), PHYS 121 or CHEM 142/145, CSE 142, CSE 143, and at least 5 credits of English composition. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.

**Major Requirements**

84-87 credits as follows:

- **Science (10 credits):** 10 credits from the list of approved natural science courses in the CS&E Handbook. Courses that meet the department’s science requirement include PHYS 121, CHEM 142/145, and any course in biology, chemistry, physics, earth and space sciences, astronomy, and atmospheric sciences that requires PHYS 121 or CHEM 142/145 as a prerequisite.
- **Mathematics (19-22 credits):** MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken); MATH/STAT 390 or MATH/STAT 391.

**Required Courses (32 credits):** CSE 142, CSE 143, CSE 321, CSE 322, CSE 326, CSE 341, CSE 370, CSE 378.

**Senior Electives (minimum of 23 credits):** At least 23 credits from the senior electives courses listed in the CS&E Handbook, including at least four of the following courses: CSE 401, CSE 403, CSE 421, CSE 431, CSE 444, CSE 451, CSE 455, CSE 457, CSE 461, CSE 471, CSE 473. Transfer students must earn a minimum of 24 graded credits toward the major at the UW.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The computer science field has a broad base of private- and public-sector jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, applications programmer, technical sales and marketing, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers. The field is also highly valued for practicing entrepreneurship.
- **Instructional and Research Facilities:** In autumn 2003 the department moved to the new state-of-the-art Paul G. Allen Center for Computer Science and Engineering. The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence. The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

- **Honors Options Available:** With Departmental Honors. See adviser for details.
- **Research, Internships, and Service Learning:** Internships and co-op opportunities are available for computer science undergraduates. See http://www.engr.washington.edu/coop and http://depts.washington.edu/careers for information.
- **Departmental Scholarships:** CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at www.cs.washington.edu/education/ugradscholars/scholarships.html
- **Student Organizations/Associations:** A student chapter of the Association for Computing Machinery (ACM) operates within CSE.

**Dance**

258 Meany
Dance is part of a liberal arts curriculum and provides students with a foundation for future advanced work in performance or movement-related work. Faculty work closely with students to guide them on
the educational track that best serves their career goals.

**Undergraduate Program**

Adviser
261 Meany, Box 351150
206-543-0550
uwdance@u.washington.edu

The Dance Program offers the following programs of study:
- The Bachelor of Arts degree with a major in dance.
- A minor in dance.

**Bachelor of Arts**

**Program Admission Requirements**

Application is during spring quarter for fall quarter admission. Application deadline (transcript and essay) is March 1.

- Unofficial transcript
- Two-page (maximum) essay. Applicants write on one of four topics. Details regarding essay topics and format are available from the Dance Program Web site, or at the Dance Program Office.
- Two-hour technique assessment class prior to the beginning of spring quarter (date and time are posted on the program Web site). Prospective applicants unable to attend this assessment class should contact the Dance Program adviser to make alternate arrangement.

For additional information regarding application procedure and time/date/location of the spring-quarter assessment class, contact the Dance Program adviser or visit the Dance Program Web site.

**Major Requirements**

Minimum 65 credits in dance as follows:

**Core Curriculum Courses:** DANCE 166, DANCE 242, DANCE 250, DANCE 270 (2 credits, 1 crew minimum), DANCE 344 or DANCE 345, DANCE 390, DANCE 480, DANCE 493.

28 credits from the following (12 credit minimum at the 200-level or above; 6 credits minimum in both ballet and modern dance): DANCE 102, DANCE 103, DANCE 104, DANCE 105, DANCE 106, DANCE 107, DANCE 108, DANCE 109, DANCE 110, DANCE 111, DANCE 112, DANCE 201, DANCE 202, DANCE 203, DANCE 204, DANCE 205, DANCE 206, DANCE 210, DANCE 211, DANCE 212, DANCE 230, DANCE 301, DANCE 302, DANCE 303, DANCE 304, DANCE 305, DANCE 306, DANCE 310, DANCE 312, DANCE 311, DANCE 401, DANCE 402, DANCE 403, DANCE 404, DANCE 405, DANCE 406.

Minimum of two courses from the following dance electives:
- DANCE 234, DANCE 266, DANCE 366, DANCE 371, DANCE 420, DANCE 490. Up to 4 additional credits of DANCE 270 may be taken as electives and count toward completion of the dance major.

**Minor Requirements:** Minimum 25 credits to include 10 credits from DANCE 166, DANCE 234, DANCE 250, DANCE 270, DANCE 344, DANCE 345, DANCE 390, DANCE 420, DANCE 490, DANCE 493; and 15 credits from DANCE 102, DANCE 103, DANCE 104, DANCE 105, DANCE 106, DANCE 107, DANCE 108, DANCE 109, DANCE 110, DANCE 111, DANCE 112, DANCE 201, DANCE 202, DANCE 203, DANCE 204, DANCE 205, DANCE 206, DANCE 210, DANCE 211, DANCE 212, DANCE 230, DANCE 301, DANCE 302, DANCE 303, DANCE 304, DANCE 305, DANCE 306, DANCE 310, DANCE 312, DANCE 401, DANCE 402, DANCE 403, DANCE 404, DANCE 405, DANCE 406.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The Dance Program curriculum provides a balance between academic rigor and artistic development and serves as a basis for a broad range of career choices. Majors are encouraged to supplement their dance studies with coursework in other disciplines that provide a foundation for later specialization in dance ethnology, dance history and criticism, performance art, education, movement therapy, or movement science.
- **Instructional and Research Facilities:** Three spacious and well equipped dance studios in Meany Hall. Use of Meany Hall and the Meany Studio Theatre for Dance Program performances.
- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- **Research, Internships, and Service Learning:** See adviser.
- **Department Scholarships:** See adviser.
- **Student Organizations/Associations:** Dance Student Association, University Ballet Company

**Graduate Program**

Graduate Program Coordinator
258 Meany, Box 351150
206-543-5594
uwdance@u.washington.edu

The dance program offers graduate study leading to a Master of Fine Arts degree. This program is designed specifically for professional dance performers who wish to prepare for a transition into college teaching careers. All graduate students will comprise the Chamber Dance Company and will hold teaching assistantships. During the two-year program, a student must complete at least 72 credits, of which a minimum of 24 must be in an area of specialization (e.g., history, criticism, aesthetics, anatomy, ethnology).

**Admission Requirements**

A letter of application and resume.

- An undergraduate degree.
- A minimum of eight years of professional performing experience.
- The ability to demonstrate movement skills at a professional level in at least one idiom, and an in-person audition or performance video tape.
- Three letters of reference verifying success and responsibility in the professional dance arena. Neither a foreign language nor the Graduate Record Examination is required. Application deadline is January 15.

**Financial Aid**

All graduate students will receive tuition waivers and teaching assistant stipends.

**Faculty**

**Elizabeth Cooper**
Director and Associate Professor, M.F.A. in Dance from the University of Washington and her B.A. in Archeological Studies from Yale University.

**Mark Haim**
Artist in Residence

**Jürg Koch**
Full-time Lecturer

**Peter Kyle**
Full-time Lecturer, MFA in Dance from the University of Washington, and his BA in Dance and German Area Studies from Kenyon College.
Paul Moore  
Musical Director

Jennifer Salk  
Assistant Professor, MFA in Choreography from Ohio State University, and her BFA from University of Utah.

Maria Simpson  
Assistant Professor, earned a Bachelor of Fine Arts degree from the University of Massachusetts in 1988 and a Master of Fine Arts from the University of Washington in 1996.

Joan Skinner  
Professor Emeritus

Hannah C. Wiley  
Professor, B.A. in Drama from the UW in 1973 and M.A. from New York University in 1981.

Michael Wellborn  
Technical Director, Master of Fine Arts in Lighting Design in 1989 from the University of Washington

Course Descriptions

DANCE 101 Introduction to Dance (5) VLPA  
Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet and modern dance techniques. Attendance required at outside events.

DANCE 102 Introduction to Dance (5, max. 10) VLPA  
Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet and modern dance techniques. Attendance required at outside events. Prerequisite: DANCE 101.

DANCE 103 Introduction to Dance (5, max. 10) VLPA  
Introduction to dance as an art form. Lectures in dance appreciation. Studio experience in ballet and modern dance techniques. Attendance required at outside events. Prerequisite: DANCE 102.

DANCE 104 Modern Technique (1-8, max. 8) VLPA  
Advanced beginning. Continued development of all beginning areas and expansion of movement vocabulary.

DANCE 105 Modern Technique (1-8, max. 8) VLPA  
Advanced beginning. Continued development of all beginning areas and expansion of movement vocabulary.

DANCE 106 Modern Technique (1-8, max. 8) VLPA  
Advanced beginning. Continued development of all beginning areas and expansion of movement vocabulary.

DANCE 107 Ballet Technique I (1-8, max. 8) VLPA  
Advanced beginning. Continued development of all beginning areas. Expansion of ballet vocabulary.

DANCE 108 Ballet Technique I (1-8, max. 8) VLPA  
Advanced beginning. Continued development of all beginning areas. Expansion of ballet vocabulary.

DANCE 109 Ballet Technique I (1-8, max. 8) VLPA  
Advanced beginning. Continued development of all beginning areas. Expansion of ballet vocabulary.

DANCE 110 Jazz Technique I (1-4, max. 4) VLPA  
Introduction to jazz technique. Dance performance attendance required.

DANCE 111 Jazz Technique I (1-4, max. 4) VLPA  
Introduction to jazz technique. Dance performance attendance required.

DANCE 112 Jazz Technique I (1-4, max. 4) VLPA  
Introduction to jazz technique. Dance performance attendance required.

DANCE 166 Dance Composition I (5) VLPA  
Introduction to the principles of dance composition through improvisation.

DANCE 201 Ballet Technique II (1-8, max. 8) VLPA  

DANCE 202 Ballet Technique II (1-8, max. 8) VLPA  

DANCE 203 Ballet Technique II (1-8, max. 8) VLPA  

DANCE 204 Modern Dance Technique II (1-8, max. 8) VLPA  

DANCE 205 Modern Dance Technique II (1-8, max. 8) VLPA  

DANCE 206 Modern Dance Technique II (1-8, max. 8) VLPA  

DANCE 210 Jazz Technique II (1-4, max. 4) VLPA  

DANCE 211 Jazz Technique II (1-4, max. 4) VLPA  

DANCE 212 Jazz Technique II (1-4, max. 4) VLPA  

DANCE 230 Alternative Movement Studies (3, max. 9) VLPA  
Introduction to an alternative approach to movement study. Topics vary.

DANCE 234 World Dance and Culture (3, max. 9) I&S/VLPA  
Survey course presenting selected dance idioms as they relate to ethnicity in their performance, aesthetics, and history. May have studio component.

DANCE 242 Music in Relation to Dance (3) VLPA Moore  
Provides students with music skills necessary to the areas of dance pedagogy, performance, choreography, dance analysis/criticism, and production. Includes an introduction to music theory, compositional and rhythmic analysis, music for dance class, and training on music/sound editing equipment.

DANCE 250 The Creative Context (1-5, max. 8) I&S/VLPA Cooper  
An in-depth investigation of historically significant choreographic works from the western theatre dance canon. Topics vary annually and may include repertoire performed by the UW Dance Program’s Chamber Dance Company. Emphasizes the social, historical, and artistic significance of select choreographic works. Offered: WS.

DANCE 266 Dance Composition II (3-5, max. 5) VLPA  
Dance composition in relation to music. Emphasis on solos and
small groups. Prerequisite: DANCE 166. Offered: alternate years.

DANCE 270 Dance Performance Activities (1-3, max. 9) VLPA
Performance in a dance or work on a crew for a dance production, either a studio showing or public performance, conducted under faculty supervision. Credit/no credit only.

DANCE 301 Ballet Technique III (1-8, max. 8) VLPA
Advanced-intermediate level: continued development and expansion in all areas of technique.

DANCE 302 Ballet Technique III (1-8, max. 8) VLPA
Advanced-intermediate level: continued development and expansion in all areas of technique.

DANCE 303 Ballet Technique III (1-8, max. 8) VLPA
Advanced-intermediate level: continued development and expansion in all areas of technique.

DANCE 304 Modern Dance Technique III (1-8, max. 8) VLPA
Intermediate-advanced. Dance sequences of greater complexity.

DANCE 305 Modern Dance Technique III (1-8, max. 8) VLPA
Intermediate-advanced. Dance sequences of greater complexity.

DANCE 306 Modern Dance Technique III (1-8, max. 8) VLPA
Intermediate-advanced. Dance sequences of greater complexity.

DANCE 344 Early Dance History (3-5, max. 5) I&S/ VLPA
Cooper
Survey of ballet history. Offered: A.

DANCE 345 Late Dance History (3-5, max. 5) I&S/ VLPA
Survey of modern dance history.

DANCE 366 Dance Composition III (3-5, max. 5) VLPA
Dance composition in relation to production. Emphasis on larger group works. Prerequisite: DANCE 166.

DANCE 371 Choreographic Workshop (2-5, max. 5) VLPA
Performing experience for students in pieces choreographed by faculty members and guest choreographers.

DANCE 390 Dance Teaching Methodologies (3-5) VLPA
Introduction to dance pedagogy, including educational theory, motor learning, and biomechanical principles and music as it relates to the teaching of dance.

DANCE 420 Dance Aesthetics (3) I&S/ VLPA
Philosophical investigation of the expressive elements of dance. Reading and discussion of the concepts of beauty, style, and aesthetic theory.

DANCE 480 Senior Seminar (3) VLPA
Culminating project emphasizing a synthesis of experiences in the Dance Program with a focus on individual interests.

DANCE 490 Special Studies in Dance (1-3, max. 10) VLPA
Special studies designed to address contemporary and historical concerns in the field of dance.

DANCE 493 Anatomy for Dance (3-5) NW/ VLPA
Simpson
Anatomy of the musculoskeletal system and its applications in dance movement.

DANCE 499 Undergraduate Independent Study (*, max. 6)
DANCE 510 Chamber Dance Production (3, max. 9)
Dance production in the university environment. Publicity, programming, budgeting. Rehearsal, rehearsal direction, and performance of Chamber Dance Company repertoire. Credit/no credit only.

DANCE 515 Dance Research Methods (3)
Seminar in problem identification and definition, theory development, research design, data analysis, and interpretation. Examples of various types of dance research.

DANCE 520 Dance in Higher Education (3)
Readings, discussion, and observation of teaching methods. Students assist faculty in the instruction of lower-level classes. Selected topics: anatomical, historical, and aesthetic concepts as they relate to dance pedagogy. Development of a personal teaching style appropriate for university-level dance courses.

DANCE 521 Dance Administration (3)
Readings and discussion relating to dance administration in college and professional settings. Topics include: curricular development, academic advising, budgetary procedures, personnel issues, and problems related to dance as a performing art within the university structure.

DANCE 530 Choreographer/Composer Collaboration (2, max. 6)

DANCE 531 Choreographer/Composer Collaborative Performance (3, max. 9)
Collaboration between choreographers and composers culminating in public performance. Offered: A.

DANCE 544 Early Dance History (3-5)
Study of the evolution of dance from ritual to a theatre art form.

DANCE 545 Late Dance History (3-5)
Roots of contemporary dance as an art form and its relationship to developments in ballet since the turn of the century.

DANCE 590 Dance Teaching Methodologies (3-5)
Introduction to dance pedagogy with an emphasis on motor learning skills and biomechanics. Practical teaching experience.

DANCE 595 Master’s Project (3)
Project in area of interest developed in consultation with faculty advisor and supported by elective courses. Full faculty approval of proposed project by end of first year. Formal presentation, appropriate to project’s content, presented to full faculty during second year. Project culminates in the teaching of an undergraduate dance course.

DANCE 600 Independent Study or Research (*, max. 10)

Digital Arts and Experimental Media

207 Raitt

The processes of inquiry encompassing imagination, exploration, discovery, and reflection are universal among artists, scholars, scientists, and engineers. All seek to uncover new knowledge through innovations that will improve our lives and communicate new ways of understanding ourselves and the universe. The Center for Digital Arts and Experimental Media (DXARTS) is a creative research convergence zone for intrepid artists and scholars who are pioneers of an unfolding new era in the arts.

The DXARTS program embraces an expansive range of arts practice, theory, and research across multiple disciplines. The center is home to its own undergraduate and graduate degree programs, but welcomes into its facilities and courses many who are not directly affiliated with one of these programs. Faculty and students at
DXARTS may focus their work in a particular area of experimental arts (digital video, digital media art, computer music and sound art, computer animation, design computing, mechatronics, and so on), or they may pursue areas of creative research that have no media allegiance overlapping with and drawing from several or many different areas. Whatever the case, artists and scholars working at DXARTS engage in teaching, learning, and research within the synergistic, multidisciplinary setting of the center’s labs, studios, and classrooms.

A common thread running through all of the work at DXARTS is the implicit maxim that to discover new knowledge we must challenge all assumptions. DXARTS is a place where the ideas and outcomes of creative arts research are in an ongoing state of becoming.

Undergraduate Program
Adviser
207 Raitt Hall, Box 353414
206-543-4218
dxarts@u.washington.edu

The DXARTS program offers the following program of study:
- The Bachelor of Fine Arts degree with a major in digital arts and experimental media

Bachelor of Fine Arts

Program Admission Requirements
Admission is competitive. Application is once a year, in spring quarter, normally during the sophomore year. Students must enroll in DXARTS 200 autumn quarter. Based on performance in DXARTS 200, students are selected to continue in DXARTS 201 winter quarter. Students enrolled in DXARTS 201 are eligible to submit an application and supplemental materials to be considered for admission spring quarter. Students must complete the following prior to application:
- CSE 142, CSE 143
- PHYS 114 or PHYS 121
- MUSIC 120 or ART H 203
- Mathematics proficiency through the pre-calculus level. Proficiency may be demonstrated by completion of MATH 120 or equivalent, a minimum score of 68% on the UW Advanced Mathematics placement test, a minimum score of 2 on the mathematics AP exam, or completion of a college-level calculus course.

Major Requirements
In addition to the courses required for admission as described above, major requirements include the following:
- DXARTS 202
- Three quarters of DXARTS 400
- DXARTS 412, DXARTS 430, DXARTS 450, DXARTS 460 300- and 400-level supporting electives (50 credits), with a minimum of 25 credits taken from DXARTS; the remainder may be additional DXARTS courses or from a list of approved electives in other areas;
- Senior thesis in the form of 15 credits of DXARTS 498, including the completion and exhibition of a BFA thesis project that is a significant and original contribution both aesthetically and technically
- A minimum GPA of 2.50 in all DXARTS courses

For complete information about the BFA program visit the program’s Web page

Student Outcomes and Opportunities
- Learning Objectives and Expected Outcomes: The program goal is to create opportunities for entering artists to discover and document new knowledge and expertise. Unlike other BFA degrees, which offer initial professional studio art education, this BFA is primarily a pre-graduate, research-oriented degree, signifying that an individual is professionally qualified to investigate fundamental problems in the nature and practice of digital arts and experimental media. Graduates are prepared to pursue original creative and technical research in the field and contribute to the development of knowledge and its consequences in society and culture.
- Instructional and Research Facilities: DXARTS houses extensive laboratories and advanced research studios with state-of-the-art computing, imaging, sound, networking, mechatronics, and electronics equipment to support a wide range of experimental art.
- Honors Options Available: None.
- Research, Internships, and Service Learning: Some areas of research and professional opportunities within DXARTS include digital video art, computer music composition, Web site design and programming, 3D animation, motion graphics design, user interface design, sound design, interactive media production, multimedia art, electronic stage and set design, authoring of electronic online publications, special effects design, virtual environment design, sound art, and installations art (in galleries, public, and virtual spaces).
- Department Scholarships: Limited in number with competitive application processes. Please see adviser for details.
- Student Organizations/Associations: None.

dxarts@u.washington.edu

Doctor of Philosophy
The goal of doctoral education in Digital Arts and Experimental Media is to create opportunities for artists to discover and document new knowledge and expertise at the most advanced levels higher education can offer. While creating new art is at the center of all activities in the program, the DXARTS Ph.D. is a research-oriented degree requiring a substantial commitment to graduate-level study and reflection. The Ph.D. degree prepares artists to pursue original creative and technical research in digital arts and experimental media and pioneer lasting innovations on which future artists and scholars can build.

To qualify for application to the program applicants should have completed a Master’s degree or its equivalent in a discipline or field related to the proposed doctoral work. In addition to a portfolio of their artistic work, applicants must submit as a statement of purpose a substantial and detailed digital, experimental arts project proposal. All students will be expected to show competence in computing, general technology literacy, and skill and imagination in their areas of interest.

For complete details about the DXARTS Ph.D. program including application and admissions procedures, course work, research areas, and financial aid see the DXARTS Web site.

Faculty
Richard Karpen
Director of The Center for Digital Arts and Experimental Media (DXARTS), Professor of

Shawn Brixey
Associate Director of the University of Washington’s, newly established research center and PhD. program in Digital Arts and Experimental Media.

Juan Pampin
Assistant Professor of Music, MA in Composition from
Conservatoire National Supérieur de Musique de Lyon, France and a DMA in Composition from Stanford University.

**Stephanie Andrews**
Assistant Professor, BA in Art, University of Washington 1996, in fall of 2004, MFA in Art and Technology from SAIC in 2002.

**Paul Berger**

**Barbara Mones**

**James Coupe**
Research associate, Educated in Fine Art at the University of Edinburgh (Scotland) and Creative Technology at the University of Salford (England).

**Joshua Parmenter**
D.M.A. in Composition at the University of Washington, Master of Music in Composition in 2002 from the University of Washington. He received a Bachelor of Arts in Music from the University of California, Berkeley.

**Course Descriptions**

**DXARTS 198 Digital Arts Seminar (5, max. 10) VLPA**
Topics vary and are announced during the preceding quarter. Taught by UW faculty and visiting artists, engineers, scientists, and humanities scholars.

**DXARTS 200 Digital Art and New Media: History, Theory, and Practice (3) VLPA**
Provides a historical and critical overview of artists and scientists pioneering the digital arts. Discusses important digital media issues from aesthetics, creative strategies, emerging trends, and socio-cultural aspirations.

**DXARTS 201 Fundamentals of Digital and Experimental Art I (5) VLPA**
Principles of digital media creation through a combination of lectures, practical assignments, and studio seminars. All resources, assignments, and reviews are web-based. Requires access to a fast, networked computer outside of class. Prerequisite: DXARTS 200.

**DXARTS 202 Fundamentals of Digital and Experimental Art II (5) VLPA**
Server-based art course. Introduces principles of digital media creation. All resources, assignments, and reviews are web-based. Requires access to a fast, networked computer outside of class. Prerequisite: DXARTS 201.

**DXARTS 400 Undergraduate Research Studio (2, max. 6) VLPA**
Covers recent advances and current trends in digital arts and experimental media research. Topics may include in-depth examination of new artwork and research by pioneering figures in the field.

**DXARTS 411 Applications of Digital Technologies to Humanities Research (5) VLPA**
Hands-on project-based approach to imaging, new media, text, databases, metadata and accessibility, rights management, and other issues central to contemporary humanities research. Offered: jointly with HUM 411.

**DXARTS 430 Algorithmic Processes in the Arts (5) VLPA**
Basics of computer programming and algorithmic thinking in digital arts. Emphasis on experimental art forms where building of custom software is integral to realizing an artistic vision.

**DXARTS 441 3D Space I: Computer Modeling and Environment (5) VLPA Andrews**
Introduction to 3D graphics for experimental artists. Utilizes sophisticated software tools to explore object modeling, environment construction, surface texturing, and image rendering. Through lectures, viewings, tutorials, and projects, students develop a multipurpose skill set that can be used for innovative content creation, visualization, project planning, documentation, and cross-media integration. Offered: A.

**DXARTS 442 3D Space II: Computer Motion and Advanced Techniques (5) VLPA Andrews**
Further investigation into 3D visualization for experimental artists. Building on foundations established DXARTS 441, introduces methods for orchestrating movement, including deformation, dynamics, and rigging. Also covers techniques such as particle systems, simulation, and scripting, giving students experience using advanced tools for envisioning and creating original artwork. Prerequisite: DXARTS 441. Offered: W.

**DXARTS 443 3D Space III: Special Topics in 3D Computer Arts (5) VLPA Andrews**
In-depth exploration of topics in advanced 3D arts research, specific subjects vary. Students integrate skill developed in DXARTS 441 and DXARTS 442 to realize ambitious art projects related to particular class focus. Sample topics include virtual reality, interactive 3D, networked environments, and rapid prototyping. Prerequisite: DXARTS 442. Offered: Sp.

**DXARTS 450 Introduction to Experiments in Digital Video: The Architecture of Time I (5) VLPA**
Introduction to the skills and concepts used in digital video production. Includes exposure to industry standard equipment, terminology, and digital video production skills in experimental arts context. Basic research areas include field production and electronic image gathering, field and studio lighting, basic non-linear editing.

**DXARTS 451 Experiments in Digital Video: The Architecture of Time II (5) VLPA**
Nonlinear and nondestructive editing methods used in digital video are defining new architectures of time for cinematic creation. Continues previous digital video research with intermediate nonlinear editing, digital audio, compositing, and digital effects. Focuses specifically on student research with alternative cinematic strategies in an experimental arts context. Prerequisite: DXARTS 450.

**DXARTS 452 Experiments in Digital Video: The Architecture of Time III (5) VLPA**
Furthers skills and concepts taught in DXARTS 450 and 451. Emphasizes development of advanced research interests. Research topics include interactive video installation, web-based e-cinema projects, anamorphic image research, video and electronics as support systems for installation, CCTV research, basic D D authoring, and live keying techniques. Prerequisite: DXARTS 451.

**DXARTS 460 Digital Sound (3) VLPA**
Foundations of digital sound for digital arts applications. Digital sound theory; transducers; audio signals; mixer architectures; field recording strategies. Multi-track editing for recording, analysis, editing, montae, mixing, synchronization, and mastering. Problem-solving for innovative applications in video, multi-media, and installation art.

**DXARTS 461 Digital Sound Synthesis (5) VLPA**
Introduction to software sound synthesis techniques. Includes acoustics and psychoacoustics; virtual synthesizers and unit generators; table-lookup oscillators and wavetable; additive synthesis; modulation synthesis; ring amplitude, phase and frequency; granular synthesis; noise; subtractive synthesis and filters. Prerequisite: DXARTS 460. Offered: jointly with MUSIC 401; A.

**DXARTS 462 Digital Sound Processing (5) VLPA**
Introduction to digital sound processing techniques. Includes sampling techniques and time-domain transformation of samples; sound; sample-rate conversion; sound granulation and time stretching; delay lines; introduction to digital filtering; FIR and IIR filters; digital effects; reverberation; virtual-room acoustics and dynamic sound location. Prerequisite: DXARTS 461/MUSIC 401. Offered: jointly with MUSIC 402; W.

DXARTS 463 Advanced Digital Sound Synthesis and Processing (5) VLPA
Advanced sound processing and synthesis techniques. Includes sound time warping; analysis-synthesis techniques; linear predictive coding; the phase vocoder; frequency-domain sound transformations; introduction to physical modeling. Prerequisite: DXARTS 462/ MUSIC 402. Offered: jointly with MUSIC 403; S.

DXARTS 490 Special Topics in Digital Arts and Experimental Media (3-5, max. 15)
Taught by UW faculty and visiting artists, engineers, scientists, and humanities scholars.

DXARTS 491 Senior Thesis I (5) VLPA
Introductory course of the senior thesis sequence. Includes weekly seminars, selection of a thesis topic, and contract with an appropriate faculty advisor. Majors and senior standing only. Offered: A.

DXARTS 492 Senior Thesis II (5) VLPA
Second course of the senior thesis sequence. Majors and senior standing only Prerequisite: DXARTS 491. Offered: W.

DXARTS 493 Senior Thesis III (5) VLPA
Third course of the senior thesis sequence. Completion and presentation of final project. Majors and senior standing only Prerequisite: DXARTS 492. Offered: Sp.

DXARTS 499 Undergraduate Research (1-5, max. 12)
Covers recent advances and current trends in digital arts and experimental media research. Students discuss and demonstrate their own ongoing research and creative projects. In-depth examination of new artwork and research by pioneering figures in the field. Prerequisite: DXARTS graduate student.

DXARTS 505 Research Techniques in Digital Arts (3)
Digital arts research resources; structuring and strategizing research as part of artistic development; standards for writing and publishing; ethics and approach to technology transfer, and issues such as patenting. Prerequisite: DXARTS doctoral student.

DXARTS 517 Psychology of Audio and Visual Perception in the Arts (5)
Processes behind sound and image perception, with emphasis on cognition and practical applications for artists. Includes cross-modal theory and synaesthesia. Prerequisite: DXARTS graduate student.

DXARTS 528 Real-Time Digital Image Processing (5)
Theory, aesthetics, and practice of real-time video manipulation/performance systems. Theory and high-level programming of image synthesis and processing. Prerequisite: DXARTS 450; DXARTS 531.

DXARTS 531 Sensing and Control Systems for Digital Arts (5)
Software- and hardware-based tools and approaches to real-time I/O and electromechanical control in performance, art installations, and other digital arts applications. Focus on prepackaged but flexible tools. Real-time systems programming and design.

DXARTS 552 Advanced Topics in Digital Video (5)
Covers recent advances and current trends in digital video research. May include in-depth examination of new artwork and research by faculty, students, and visiting professionals. Prerequisite: DXARTS 450; and either DXARTS 451 or 452.

DXARTS 565 Spectral Modeling of Sound (5)
Theory and practice of sound modeling in the spectral domain. Implementation of software tools for spectral analysis, transformation, and synthesis. Prerequisite: DXARTS 463.

DXARTS 567 Sound in Space (5)
Theory and practice of spatial sound. Custom-designed software for spatial location of sound. Soundfield microphones used for team-based location recording sessions. Prerequisite: DXARTS 463.

DXARTS 569 Real-time Digital Sound Processing (5)
Introduction to real-time digital sound processing techniques. Includes: foundation of real-time systems; integration; reactive environments in performance and installation work; interfaces; communication protocols (MIDI, TCP); feature detection; pitch tracking; transient detection; time-domain processing techniques; frequency-domain processing techniques; algorithmic processes. Prerequisite: DXARTS 463.

DXARTS 571 Mechatronic Art, Design, and Fabrication I (5)
A systems based approach to design and fabrication of functional experimental art devices. Combines principles of mechanical, electronic, software engineering, robotics, motion control, sensors, actuators, and other control devices. Integrated review of new hardware and software components. Prerequisite: DXARTS 430, 431, 432, 531.

DXARTS 572 Mechatronic Art, Design, and Fabrication II (5)
Continues the systems based approach to the design and fabrication of functional experimental art devices. Combines principles of mechanical, electronic and electrical engineering, software engineering, robotics and motion control, application of sensors, actuators, and other control devices. Prerequisite: DXARTS 430, 432, 531 and 571.

DXARTS 573 Mechatronic Art, Design, and Fabrication (5)
Continues systems based approach to the design and fabrication of functional experimental art devices. Combines principles of mechanical, electronic and electrical engineering, software engineering, robotics and motion control, application of sensors, actuators, and other control devices. Prerequisite: DXARTS 430, 432, 531, 571, and 572.

DXARTS 598 Advanced Topics in Digital Arts and Experimental Media (3-5, max. 21)
Covers recent advances and current trends in digital arts and experimental media research. Various topics may include in-depth examination of new artwork and research by faculty, students, and visiting professionals.

DXARTS 600 Independent Study or Research (1-9, max. 27)

DXARTS 800 Doctoral Dissertation (*)
At least 27 hours of dissertation credit is required for the award of a Ph.D. in Digital Arts and Experimental Media. No more than 10 credits may be taken in any quarter, except summer. Credit/no credit only.

Drama

101 Hutchinson

Drama as an art form is a far-reaching discipline providing a humanistic approach to today’s societal problems and issues. Drama wrestles with the most compelling issues of our time, to derive new understanding for the advancement of the human condition. It also fosters curiosity, invention, bravery, and humor, promoting practical innovation and personal revelation as lifelong habits of the
The School of Drama offers the following program of study:

- The Bachelor of Arts degree with a major in drama

**Bachelor of Arts**

**Suggested First- and Second-Year College Courses:** See department admission requirements below.

**Department Admission Requirements**

Undergraduates who declare a major in drama are expected to have completed the following courses, with satisfactory grades, before declaring a major: DRAMA 100, DRAMA 111, DRAMA 112, two of the following: DRAMA 210, DRAMA 211, DRAMA 212; and a minimum GPA of 2.50 for the five courses.

No audition is required to enter the program.

**Major Requirements**

62 credits as follows:

- **DRAMA 251, DRAMA 252, DRAMA 253:** Beginning Acting Series (12 credits)
- **DRAMA 210:** Scenic Design and Construction (4 credits)
- **DRAMA 211:** Costume Design and Construction (4 credits)
- **DRAMA 212:** Stage Lighting (4 credits)
- **DRAMA 290, DRAMA 291, DRAMA 292:** Mainstage Crew, (1-3 credits each)
- **DRAMA 302:** Analysis of the Theatre (5 credits)

One course from the following:

- **DRAMA 374, DRAMA 377, DRAMA 378, DRAMA 471, DRAMA 472:** (5 credits)
- **DRAMA 473, DRAMA 475, DRAMA 476:** (5 credits)
- **DRAMA 371, DRAMA 373, DRAMA 416, DRAMA 494:** (5 credits)
- **One additional course from the above three groups:** (5 credits)
- **300- and 400-level drama electives:** (10 credits)
- **One credit of DRAMA 401**

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The faculty of the School of Drama considers the optimum preparation for the theatre artist to be comprised of a liberal arts undergraduate major in drama and a graduate conservatory education.

Learning objectives include enriched artistic expression, a foundation for further study, and cultivation of essential life skills: teamwork, communication, critical thinking, and imagination.

Students earning the Bachelor of Arts in drama are prepared to seek employment in the theatre industry, apply for advanced degrees in a specific area of theatre (e.g., MFA in acting or design) or transfer the skills gained through the program to broader career opportunities.

Recent graduates have pursued careers in acting, directing, technical direction, stage management, dramaturgy, playwriting, literary management, teaching, and in such non-theatre occupations as real estate agent, fund-raiser, public relations staff, politician, librarian, academic counselor, lawyer, nurse, translator of foreign films, admissions counselor, trade show/convention production assistant, talent agent, casting director, music promoter, special events coordinator, tour guide, human resources coordinator, wedding coordinator, aerobics instructor, music promoter.

- **Instructional and Research Facilities:** Rehearsal and performance spaces include the Glenn Hughes Penthouse Theatre (the first theatre-in-the-round built in the United States), the thrust-stage Playhouse Theatre, the end-stage Meany Studio Theatre, and the proscenium in Meany Hall. Other spaces include the Cabaret, Studio 201, and Hutchinson 218. School of Drama facilities include a Design Studio, Costume Shop, Scene Shop, and computer labs.

The Drama Library houses reserve books, plays, sound effects, dialect tapes, local audition and job notices, and a special collection of acting editions. Also available are specialized indexes and theatre databases. The librarian assists in the use of reference materials and indexes, bibliographic searches of on-line databases, and offers reference service and bibliographic instruction sessions for groups and individuals.

- **Honors Options Available:** Ad hoc honors only. See adviser for details.

- **Research, Internships and Service Learning:** Student participation in all aspects of dramatic art is provided through student productions, and faculty-and student-directed plays drawn from the full range of world dramatic literature and produced throughout the year. The School also produces operas in association with the School of Music.

To enhance employability and gain hands-on experience, students are encouraged to participate in internships with regional theatres, and related organizations or businesses. Academic credit may be earned for internships under the course number GEN ST 350. Internship credits count toward non-major elective credits to graduate. A resource guide to drama-related internships is available at the drama undergraduate advising homepage. Drama students are also encouraged to apply for undergraduate research, leadership and/or fellowship grants available through the Mary Gates Endowment.

- **Department Scholarships:** School of Drama scholarships are awarded annually every spring for the following academic year to students who have demonstrated academic merit and contributed significantly to the School of Drama. Applications are available from the advising office mid-January.

- **Student Organizations/Associations:** The Undergraduate Theatrical Society (UTS) is a student organization that produces undergraduate theatre works in the Cabaret performance space. Any UW student may audition for UTS productions, UTS members also participate in annual New Student Orientation and other school events on a volunteer basis.

A volunteer elected group of drama students, the BA Council, meets regularly with the Executive Director of the School of Drama to discuss issues relative to the undergraduate program.

**Of Special Note:**

**Continuation Policy:** Drama majors who fall below a 2.00 GPA in drama courses will be placed on academic probation for one quarter. Students who fail to raise their GPA to 2.00 in that time are dropped from the major and returned to premajor status. Students may petition the School of Drama for readmission.
The School of Drama offers professional training and scholarly programs leading to the Master of Fine Arts (M.F.A.) and Doctor of Philosophy (Ph.D.) degrees. Areas of study for the M.F.A. degree are acting, stage direction, scene design, lighting design, and costume design. Most students should expect to spend three intensive years completing the requirements for the M.F.A. degree.

The Ph.D. program provides students with training for scholarly research in theatre history, dramatic literature, theory, and criticism. Students are also encouraged to do interdisciplinary work with such allied programs as the Ph.D. program in critical theory.

**Admission Requirements**

Students may enter only in autumn quarter. Since admission requirements vary for each of the graduate programs, applicants should contact the School for current application information and deadlines.

**Faculty**

Sarah Bryant-Bertail  
Associate Professor of theory and criticism, earned a Ph.D. from the University of Minnesota.

Jerry Collum  
BFA in Technical Theatre from Auburn University.

Valerie Curtis-Newton  
Associate Professor in Acting and Directing,

Robert A. Dahlstrom  
Professor Emeritus in scenic design,

William D. Forrester  
Associate Professor Emeritus in scenic design, MFA from Yale University in 1969.

Sarah Nash Gates  
Executive Director & Professor

Robyn Hunt  
Professor

Mark Jenkins  
Associate Professor,

Odai Johnson  
Associate Professor in theatre history and head of the Ph.D. program, MFA from the University of Utah and his Ph.D. from the University of Texas at Austin.

Jon Jory  
Professor of Acting and Directing.

Geoff Korf  
Assistant Professor of Lighting Design and Head of the Design Program, MFA from Yale in 1991

Thomas Lynch  
Associate Professor in Scenic Design, MFA from Yale

Catherine Madden  
Assistant Professor in Alexander Technique,

Shanga K. Parker

Associate Professor

Steven Pearson  
Professor in the PATP, graduate of Carnegie-Mellon University with degrees in acting and directing,

Judith Shahn  
Senior Lecturer in Voice and Dialects in the PATP,

Deborah Trout  
Senior Lecturer in Costume Design,

Barry Witham  
Professor of theatre history.

**Course Descriptions**

**DRAMA 101 Introduction to the Theatre (5) VLPA Redd**  
Theatre as an art form with emphasis on the play in production. The role of the various theatre artists: actors, directors, designers, and playwrights. Required attendance at one or more performances. Lecture and discussion groups. For nonmajors. Offered: AWSp.

**DRAMA 201 Play Analysis (5) VLPA**  
Play structure through analysis of one-act plays in all genres, with special attention to plotting and the various means used to achieve a unity of action as the basis of all drama.

**DRAMA 210 Theatre Technical Practice (4) VLPA**  
Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Technical procedures.

**DRAMA 211 Theatre Technical Practice (4) VLPA Trout**  
Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Costumes.

**DRAMA 212 Theatre Technical Practice (4) VLPA**  
Intensive lecture-laboratory in basic theories, techniques, and equipment of the stage. Stage lighting.

**DRAMA 251 Acting (4) VLPA**  
Theory and practice of fundamentals of American “method,” based on principles of Stanislavsky and their American evolution. Development of basic acting skills through monologue work. Offered: A.

**DRAMA 252 Acting (4) VLPA**  

**DRAMA 253 Acting (4) VLPA**  

**DRAMA 255 UWOnCue (1-4, max. 12) VLPA**  

**DRAMA 259 Performance Practicum (2-6, max. 12) VLPA**  
Special work in various aspects of performance technique.

**DRAMA 290 Theatre Technical Practices Laboratory (1-3, max. 3) VLPA**  
Laboratory course involving specific production assignment, either
in-shop or in-theatre or both. Offered: AWSp.

**DRAMA 291 Theatre Technical Practices Laboratory (1-3, max. 3) VLPA**
Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Offered: AWSp.

**DRAMA 292 Theatre Technical Practices Laboratory (1-3, max. 3) VLPA**
Laboratory course involving specific production assignment, either in-shop or in-theatre or both. Offered: AWSp.

**DRAMA 298 Theatre Production (1-2, max. 9) VLPA**
Laboratory course for students participating in School of Drama minor productions and projects. Credit/no credit only. Offered: AWSp.

**DRAMA 302 Critical Analysis of Theatre (5) VLPA Bryant-Bertail, Redd**
Analyses of plays, based on leading critical traditions. Illustrates variety of approaches to a play, criteria for choosing best approach for a given play, and ways in which criticism aids in understanding dramatic effect, for both reader and practitioner. Offered: AWSp.

**DRAMA 305 Computers in the Theatre (5) VLPA**
Computing and information systems as problem solving tools for the theatre. Analysis of problems in theatre production and scholarship, with approaches to solutions through computing. Database, spreadsheet, and CAD system applications in the practice and study of lighting and scenic design, theatre management, and research in theatre history and criticism.

**DRAMA 313 Scenery Construction (3) VLPA**
Survey of materials, processes, and equipment in the fabrication, assembly, painting, rigging, and installation of stage scenery and properties. Recommended: DRAMA 210.

**DRAMA 314 Introduction to Design for the Performing Arts (3) VLPA Forrester**
Survey of the role of design (scenery, costume, lighting, and sound) in the contemporary performing arts. Consideration of communicative mission and limitations of each of the design areas. Recommended: DRAMA 210; DRAMA 211; DRAMA 212.

**DRAMA 316 Theatrical Makeup (2) VLPA**
Basic principles, with intensive practice in application of makeup for use on proscenium and arena stages. Open to nonmajors.

**DRAMA 350 Introduction to Acting Methods (4) VLPA**
Advanced scene study from three actor-training viewpoints. Approach based in the American “method” through such proponents as Adler, Strasberg, Hagen, Meisner. Exposure to more physically-based systems such as Alexander and Suzuki included. Recommended: DRAMA 252 or equivalent.

**DRAMA 351 Intermediate Acting-Scene Study (4) VLPA**
Actor-training methodologies of Stanislavsky, Meyerhold, Michael Chekov, and other physically-based approaches. Increases understanding of psychological motivation, concentration, focus of attention, clarity of physical expressiveness. Perform three scenes. Recommended: one of DRAMA 210, DRAMA 211, DRAMA 212; two of DRAMA 290, DRAMA 291, DRAMA 292; DRAMA 253; audition; and 2 credits of DRAMA 466 within two quarters. Offered: A

**DRAMA 352 Intermediate Acting-Verse (4) VLPA Parker**
Addresses character motivation within classical verse of Shakespeare, Moliere, Racine, etc. Sonnets, monologues, scenes in iambic pentameter and rhyming couplet, exploring rhythm, music, and how these relate to character psychology, motivation. Recommended: one of DRAMA 210, DRAMA 211, DRAMA 212; two of DRAMA 290, DRAMA 291, DRAMA 292; DRAMA 253; audition; and 2 credits of 466 within two quarters. Offered: A

**DRAMA 353 Intermediate Acting — Production (4) VLPA**
Explores the ten-minute play. Focus shifts to full-length play script, developing ensemble playing, sustained concentration, focus of attention, character motivation, and extended through-line. Culminates in public performance. Recommended: one of DRAMA 210, DRAMA 211, DRAMA 212; two of DRAMA 290, DRAMA 291, DRAMA 292; audition; and 2 credits of 466 within two quarters. Offered: Sp.

**DRAMA 365 Ethnic Studies in Drama (3-5, max. 15) I&S/ VLPA Curtis-Newton, Redd**
A professional seminar featuring guest artists and career development specialists. Credit/no credit only. Offered: A.

**DRAMA 371 Theatre and Society (5) I&S/VLPA**
Introduction to the history of the theatre from the Greeks to the present day. Development of the theatre as a social institution. Reading of major texts from each period.

**DRAMA 373 Women in Theatre (5) VLPA Redd**
Examines both the inclusion and exclusion of women by the cultural practice of theatre. Has two primary aims: to provide an historical overview of women in playwriting, acting, directing and criticism, and to apply contemporary social issues to the practice, texts, and criticism of the stage. Prerequisite: DRAMA 302.

**DRAMA 374 History of Greek and Roman Theatre (5) VLPA Johnson**
Survey of Classical and Hellenistic Greek and Roman theatre culture, including texts, architecture, iconography, scenic practices, and conventions of performance from the Festival of Dionysus to the bloodsports of the Roman arenas. Prerequisite: DRAMA 302.

**DRAMA 377 History of Medieval and Renaissance Theatre (5) VLPA Johnson**
Survey of the rise of theatre from the early liturgical drama through the High Middle Ages to the Reformation and the great flowering of secular drama in Elizabethan England and the Golden Age of Spain. Prerequisite: DRAMA 302.

**DRAMA 378 History of European Theatre, Renaissance to Revolution (5) VLPA Johnson**
Survey of the drama, theatre, and theatre culture from the Italian Renaissance through the French Revolution. Examines the rise of court culture, opera, French neo-classicism, as well as the popular commedia dell Arte. Prerequisite: DRAMA 302.

**DRAMA 391 Beginning Technical Practices (1-3, max. 9) VLPA**
Laboratory course involving specific production assignments, either in-shop or in-theatre, or both. Recommended: DRAMA 290; DRAMA 291; DRAMA 292.

**DRAMA 401 Senior Seminar (1, max. 2) VLPA Gates**
A professional seminar featuring guest artists and career development specialists. Credit/no credit only. Offered: A.

**DRAMA 405 Computer Graphics Systems (3) VLPA**
Introduction to CAD applications in theatre design and technology. Focus on learning to use general purpose graphics software for CAD. Discussion of available hardware and software. Recommended: DRAMA 420.

**DRAMA 410 Advanced Theatre Technical Practices (2-4, max. 20) VLPA**
Production-related apprenticeship, in the areas of scene construction, scene painting, costume, or lighting. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 418. Offered: AWSp.

**DRAMA 413 Advanced Scene Construction (3) VLPA**
Special problems in scene construction materials and rigging. Recommended: DRAMA 210; DRAMA 212; DRAMA 290; DRAMA 292; DRAMA 410; DRAMA 420.

**DRAMA 414 Scene Design (3, max. 6) VLPA Dahlstrom, Forrester**
Theory, practice, and rendering of scene designs. Repeat of course involves intermediate designs and models. Recommended: DRAMA 203; DRAMA 210.

**DRAMA 415 Stage Costume Design (3, max. 6) VLPA Trout**
Theory, practice, and rendering of costume designs for the theatre. Repeat of course involves intermediate designs. Recommended: ART H 203; DRAMA 211; DRAMA 416 if repeating.

**DRAMA 416 History of Western Dress (5) VLPA Gates**
Survey history of Western dress. Emphasis on use of this information by theatrical costume designers. Includes development of costume for drama, ballet, and opera. Prerequisite: DRAMA 302.

**DRAMA 417 Stage Costume Patternmaking and Construction (3, max. 6) VLPA**
Techniques of costume construction, including study of fabrics; emphasis on creating patterns by draping. Recommended: DRAMA 211; DRAMA 416.

**DRAMA 418 Scene Painting (3, max. 6) VLPA Forrester**
Lecture-laboratory with focus on techniques and principles of scene painting. Uses of various media and types of equipment as applicable to varied scenic pieces. Recommended: DRAMA 210.

**DRAMA 419 Advanced Stage Lighting Design (3, max. 9) VLPA**
Development of a working process consistent with current professional practice. Includes drafting, worksheets, study of color. Students read plays and develop analytical skills. Recommended: DRAMA 212.

**DRAMA 420 Design and Technical Drafting (2, max. 4) VLPA Forrester**
Laboratory and project critique covering stage design graphics and technical drawing; specifically: designer’s elevations, ground plans, sections, detail drawing, transposition of design drafting information to technical drawings. Recommended: DRAMA 210.

**DRAMA 421 Drawing and Rendering Techniques for the Theatre (2, max. 10) VLPA Forrester**
Weekly figure-drawing laboratories with live model and weekly field trips for laboratories in drawing natural phenomena and architectural detail. Studies in historical drawing styles. Practice in use of several media and techniques of expression. Recommended: DRAMA 210; DRAMA 211.

**DRAMA 441 Beginning Playwriting (1-6, max. 12) VLPA**
Writing exercises and drafts of a one-act play provide first experience in writing for performance. Readings of representative one-act plays introduce genres and writing styles. Recommended: DRAMA 253 or DRAMA 353; DRAMA 210; DRAMA 211; DRAMA 212.

**DRAMA 450 Rehearsal Laboratory (2, max. 6) VLPA**
Acting in projects directed by graduate directing students. Recommended: DRAMA 253.

**DRAMA 451 Advanced Acting — Production Workshop (4) VLPA**
Improvisation skills. Methodology employed develops one five-minute solo work, using either original or adaptations of non-dramatic texts. Culminates in two public showings of the five-minute one-person works. Offered: A.

**DRAMA 452 Advanced Acting — Scene Study (4) VLPA**
Invites actor to create a role. Script reading for action and consequence. Use and employment of five senses to express a character’s life, presenting a coherent and alive person to the stage. Culminates in public performance. Offered: W.

**DRAMA 453 Advanced Acting — Physical Training (4) VLPA**
Introduction to physical training methods of Tadashi Suzuki, Kenji Suzuki, and the relationship of their methodologies to Constantin Stanislavsky. Contemporary monologues analyzed for psychological motivation, while exploring the physical analog of “action” as expressed and accessed by the new physical training. Offered: Sp.

**DRAMA 454 Projects in Acting (3, max. 9) VLPA**
Rehearsal and classroom performance of dramatic literature of various periods and styles.

**DRAMA 455 Alexander Technique (3) VLPA Madden**
A practical and theoretical introduction to the Alexander Technique, a psychophysical re-education process developed by F. M. Alexander (1869-1955). Studio application of this work improves physical/vocal coordination, enhances creativity, and clarifies thinking.

**DRAMA 460 Introduction to Directing (4) VLPA Curtis-Newton, Students**
introduced to the art of the stage director. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 253 or DRAMA 353; DRAMA 302. Offered: A.

**DRAMA 461 Elementary Directing (4) VLPA Curtis-Newton**
Elementary study of the art of the stage director. Recommended: DRAMA 460.

**DRAMA 462 Elementary Directing (4) VLPA**
Elementary study of the art of the stage director. Recommended: DRAMA 461.

**DRAMA 466 Stage Management (2-5, max. 15) VLPA Stewart**
Study and practice of stage management. Recommended: DRAMA 210; DRAMA 211; DRAMA 212; DRAMA 290; DRAMA 291; DRAMA 292.

**DRAMA 471 History of the English Restoration and 18th Century Theatre (5) VLPA Johnson**
Examination of the relationship of the physical theatre and the productions that took place within that theatre. Particular emphasis on the text performed, styles of acting, scenic elements, and the critical theories that influenced the theatre of the period. Prerequisite: DRAMA 302.

**DRAMA 472 European and American Theatre, Revolution to Modernism (1780-1920) (5) VLPA Johnson**
Survey of the drama, theatre, and theatre culture from the French Revolution into the beginnings of Modernism; social and political aspects of theatre, rise of Romanticism, melodrama, and variety entertainment through the 19th century to the artistic revolution that paved the way for modern theatre. Prerequisite: DRAMA 302.

**DRAMA 473 Modern European Theatre and Drama (5) VLPA Witham**
Major movements and figures in contemporary European theatre from French absurdism to the present. Prerequisite: DRAMA 302.

**DRAMA 475 Modern English Theatre and Drama (5) VLPA Witham**
Major trends in contemporary English theatre, post-World War II to the present. Performers, dramatists, and designers who shaped the
course of the theatre following the “angry young rebellion” of the 1950s. Prerequisite: DRAMA 302.

DRAMA 476 Modern American Theatre and Drama (5) VLPA
Witham
Major forces shaping modern American theatre, Eugene O’Neill to the present. Leading dramatists, directors, and designers of the post-World War II era. Experiments such as the Federal Theatre Project, Group Theatre, and Living Theatre. Prerequisite: DRAMA 302.

DRAMA 490 Special Studies in Acting-Directing (1-6, max. 12) VLPA

DRAMA 491 Special Studies in Design-Technical (1-6, max. 6) VLPA

DRAMA 494 Special Studies in Theatre and Drama (5, max. 20) VLPA
Bryant-Bertail, Johnson, Redd, Witham
Topics in drama, history, and criticism. See Time Schedule for specific topic. Prerequisite: DRAMA 302.

DRAMA 495 Practicum in Design and Technical Theatre (2-6, max. 15) VLPA
Emphasis on developing design and technology problem-solving skills through laboratory and project evaluation. Recommended: DRAMA 211, DRAMA 212, DRAMA 313.

DRAMA 496 Stage Costume Problems (2, max. 8) VLPA
Specific research problems of stage costume design and execution: accessories, masks, wigs, fabric modification, millinery or construction analysis for specialized costumes. Topics vary. Recommended: DRAMA 211; DRAMA 416.

DRAMA 498 Theatre Production (1-2, max. 9) VLPA
Laboratory course for students participating in School of Drama major productions. Credit/no credit only. Offered: AWSp.

DRAMA 499 Undergraduate Research (1-5, max. 15)

DRAMA 502 Designer-Director Analysis (4) Dahlstrom
Dahlstrom, Forrest, Trout
Methods of examining plays to make the collaboration of director and designer productive. Attempts to create a structural whole from visual and verbal approaches to analysis. Prerequisite: graduate standing in drama.

DRAMA 510 Design Studio (3, max. 18) Dahlstrom, Forrest, Trout
Investigation of space, form, light, texture, and color in total theatre design, stressing mastery of the media, methods of presentation and execution, and intelligent and appropriate visual reaction to a dramatic text. Prerequisite: graduate standing in drama.

DRAMA 512 Lighting Design Seminar (1/4, max. 18)
Forum for graduate lighting students to further explore the art of lighting design. Assignments include paper projects, School of Drama production, and field trips to local theatres. Prerequisite: graduate standing.

DRAMA 514 Design and Technical Theatre Colloquium (2, max. 18)
Discussion of work in progress or completed in production, centering on the conceptual work of the designer/director on the production and the methods of execution in the shops and on stage. Offered: AWSp.

DRAMA 518 Studies in Historic Design (3) Dahlstrom
Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods.

DRAMA 519 Studies in Historic Design (3) Dahlstrom
Investigation of artistic principles and modes that influenced the art, architecture, furniture, and decor of selected historic periods. Prerequisite: DRAMA 518, or permission of instructor.

DRAMA 520 Advanced Theatre Practicum (1-5, max. 15)
Professional student internship with professional theatres: scenery, lighting, scene painting, costume, acting, directing, stage management, theatre management. Prerequisite: permission of instructor.

DRAMA 551 Teaching of Acting (1-3, max. 3)
Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 552 Teaching of Acting (1-3, max. 3)
Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 553 Teaching of Acting (1-3, max. 3)
Seminar discussion on problems in teaching acting to undergraduate students in 251, 252, and 253. Prerequisite: permission of instructor and being a teaching assistant in acting.

DRAMA 555 Special Studies in Acting (2-6, max. 18)
Individual or group work on special skills for the actor. Topics vary. Prerequisite: admission to the Professional Actor Training Program. Offered: AWSp.

DRAMA 557 Studio I (12, max. 36) Hunt, Jenkins, Jory, Madden, Pearson, Shahn
Skill development in acting, voice, speech, and movement necessary for professional training in acting. Prerequisite: admission to the Professional Actor Training Program. Offered: AWSp.

DRAMA 558 Studio II (12, max. 36) Hunt, Jenkins, Jory, Madden, Pearson, Shahn
Continuation of 557. Prerequisite: DRAMA 557 and completion of the first year of the Professional Actor Training program. Offered: AWSp.

DRAMA 559 Studio III (6, max. 18) Hunt, Jenkins, Jory, Madden, Pearson, Shahn
Specialized and individualized work relating to the main curriculum of the third year of the Professional Actor Training Program. Prerequisite: DRAMA 558 and completion of the second year of the Professional Actor Training Program. Offered: AWSp.

DRAMA 560 Managing the Rehearsal and Production Process (2)
Introduction to graduate-level directing. Play analysis, research, performance theory, and concept development as it relates to process-acting and rehearsal, design, staging techniques, and production management. Reading and writing assignments augmented by faculty and professional guests in performance, design, production, and dramaturgy.

DRAMA 561 Directing Projects (2-3, max. 12)
Rehearsal techniques and staging skills in a variety of spatial configurations. One-act and full-length plays which follow a prescribed sequence. Prerequisite: graduate standing in the directing program.

DRAMA 562 Performance Studio (1-3, max. 12)
Performance techniques in specialized areas of importance to the professional director, including stage combat, speech and dialect, mask, physical comedy, improvisation, and puppetry.

DRAMA 563 Seminar in Directing (2, max. 18)
Seminar discussion of current productions; focused readings and discussion in specific areas of dramatic literature and problems related to stage direction. Prerequisite: graduate standing in drama.
and permission of instructor.

**DRAMA 564 Theatre Studies: History, Theory, Criticism (3, max. 15)**
Special topics in history, theory, and criticism.

**DRAMA 565 Verse Workshop (4)**
Techniques necessary to direct and perform plays of Shakespeare, Moliere, and other verse playwrights: scansion and imagery; period and style using verse text; crowd scenes, transformations of time and space, and other staging exercises; direction of scenes or acts from verse plays.

**DRAMA 566 Directing for the Camera (3)**
Story-boarding, setting up camera shots, improvisation, and rehearsal techniques for directing actors on camera (both in studio and on location). Students direct one- and two-camera scenes; and write, direct, and edit a short screenplay.

**DRAMA 567 Acting Process (1-3, max. 12)**
Development of acting skills necessary for the professional director. Emphasis on physical training, playing action, strong internal technique, imagination and clarity of expression.

**DRAMA 568 Writing for the Stage (3, max. 6)**
Focus on adaptation for the stage of non-dramatic sources, such as literature, poetry, history, and contemporary events. Emphasis on structure, dialogue, dramatic action, rhythm, characterization. Writing exercises using fictive and non-fictive sources, biographical sources, and found objects. For MFA Directing students only.

**DRAMA 569 Directing/Teaching Apprenticeship (3)**
Assisting faculty or professional guest director in production for the entire rehearsal period, or assisting faculty in performance training.

**DRAMA 571 Problems in Theatre History Research (5)**
Johnson, Witham
Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

**DRAMA 572 Problems in Theatre History Research (5)**
Johnson, Witham
Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

**DRAMA 573 Problems in Theatre History Research (5)**
Johnson, Witham
Methods and techniques of research, interpretation, and writing in theatre history. Relationship of theatre arts to culture in diverse periods and places.

**DRAMA 574 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 575 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 576 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 577 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 581 Analysis of Dramatic Texts (5)**
Bryant-Bertail, Redd
Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

**DRAMA 582 Analysis of Dramatic Texts (5)**
Bryant-Bertail, Redd
Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

**DRAMA 583 Analysis of Dramatic Texts (5)**
Bryant-Bertail, Redd
Analytic approaches to dramatic materials, concentrating on semiotics, Marxism, feminism, or a related critical theory.

**DRAMA 585 Seminar in Dramatic Theory (5)**
Bryant-Bertail, Redd
Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

**DRAMA 586 Seminar in Dramatic Theory (5)**
Bryant-Bertail, Redd
Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

**DRAMA 587 Seminar in Dramatic Theory (5)**
Bryant-Bertail, Redd
Major problems in dramatic theory, such as aesthetics, mimesis, and the nature of theatre.

**DRAMA 588 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 589 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 590 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 591 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 592 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 593 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 594 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 595 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 596 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 597 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 598 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 599 Seminar in Theatre History (5)**
Johnson, Witham
Specific topics in theatre history, examining the drama of various national, linguistic, and/or religious culture in detail.

**DRAMA 700 Master's Thesis (*)**

**DRAMA 800 Doctoral Dissertation (*)**

---

**Earth and Space Sciences**

310 Condon Hall

Earth and space sciences seeks to further the understanding of the Earth, the solar system, and their histories. The scope extends from the center of Earth to the rim of the solar system, and activities cut across traditional disciplines of physics, chemistry, biology, geology, and mathematics. The discipline examines Earth’s interior structure, chemistry, motion, and dynamics; geologic hazards; processes affecting the surface environment and climate; the surrounding space environment; planetary processes; and geobiology.

**Undergraduate Program**

advising@ess.washington.edu

The Department of Earth and Space Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in earth and space sciences, with options in biology and physics
- The Bachelor of Arts degree with a major in earth and space sciences
- A minor in earth and space sciences

The Bachelor of Science degree is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector, where field and technology experiences and problem-solving skills are an important asset. The Biology Option enables B.S. students interested in paleontology and paleobiology to emphasize biology courses. The Physics Option allows for an emphasis in physics and geophysics. The Bachelor of Arts degree is designed for students who wish to obtain a broad understanding of earth sciences as a background for careers such as science journalism, environmental law, K-12 teaching, or environmental policy.
Bachelor of Science

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

90 credits as follows:

Science Core (35 Credits):

Basic Supporting Science (20 credits): MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students wishing to pursue the ESS Physics Option must take PHYS 121.)

ESS Required Core Courses (15 credits): ESS 211, ESS 212, ESS 213. (Students in the ESS Physics Option may substitute ESS 205 for one of these.)

ESS Options (55 Credits):

Standard Option.

Supporting science (13-15 credits):

MATH 126 or equivalent; PHYS 115/PHYS 118 or PHYS 122; and one of PHYS 116/PHYS 119 or PHYS 123, CHEM 152, MATH 307, MATH 308, STAT 311.

ESS required (22 credits): Two of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400 or equivalent field/ experiential component.

ESS electives (18-20 credits): ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered 490 through 499.)

Biology Option.

Supporting science (21 credits): CHEM 152, CHEM 162 or equivalent; BIOL 180, BIOL 200 (or two from BIOL 201, BIOL 202, BIOL 203); MATH 126 recommended but not required.

ESS required (22 credits): Two of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400 or equivalent field/ experiential component.

ESS electives (12 credits): ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered 490 through 499.)

Physics Option.

Supporting science (32-35 credits):

MATH 126, MATH 308, MATH 324 or MATH 136, MATH 324; PHYS 122, PHYS 123, PHYS 227, PHYS 228, PHYS 321, PHYS 322.

ESS required (5 credits): One of ESS 311, ESS 312, ESS 313, ESS 314.

ESS electives (15-18 credits): ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered 490 through 499.)

All courses must be completed with a minimum grade of 2.0.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Q SCI 291, Q SCI 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

90 credits as follows:

Supporting Science (35 Credits):

B.S. Science Core requirements (see above) or the following Basic Supporting Science (20 credits): CHEM 142; Q SCI 291, Q SCI 292 or MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121.

Additional courses: 15 credits from department’s approved list of courses in science and mathematics. See adviser for current list.

ESS Courses (55 Credits):

Required courses (15 credits): Two of ESS 211, ESS 212, ESS 213. One of ESS 311, ESS 312, ESS 313, ESS 314.

Elective Courses: 40 upper division credits (300- and 400-level) with at least 10 credits at the 400-level. (May not include independent study or seminar courses numbered 490 through 499.)

All courses must be completed with a minimum grade of 2.0

Minor

Minor Requirements: 30 ESS credits with at least 15 at the upper division level (300- or 400-level) of which at least 3 credits must be at the 400-level. (May not include independent study or seminar courses numbered 490 through 499.) All courses must be completed with a minimum grade of 2.0.

Student Outcomes and Opportunities

• Instructional and Research Facilities: See below.
• Honors Options Available: With College Honors. With Distinction. See adviser or department Web site for details.
• Research, Internships, and Service Learning: Job and internship possibilities are posted in the department and forwarded by email to all undergraduate students.
• Department Scholarships: There are a limited number of departmental scholarships available. Scholarship applications are invited from all undergraduate students in the major during spring quarter. The awards are applicable to the following academic year.
• Student Organizations/Associations: Geo Club organizes field trips and social gatherings. Information about meetings and events is forwarded by email to all undergraduate students.

Graduate Program

Graduate Program Coordinator
310 Condon Hall, Box 351310
206-543-1190
advising@ess.washington.edu

The Department of Earth and Space Sciences offers graduate programs leading to the Master of Science (M.S.) degree and the Doctor of Philosophy (Ph.D.) degree in both Geological Sciences and in Geophysics. The programs emphasize a rigorous quantitative approach in conjunction with detailed in-situ and/or laboratory observations to address significant problems that will lead to a better understanding of the Earth and its environment.
Major areas of interest are the internal and surface structures and materials of the Earth and planets, dynamic processes within the earth, oceans, atmosphere, and space environments, their history and the interaction of life with these environments. The required curriculum is flexible to facilitate interdisciplinary research approaches. The department is also one of the core departments (with the Departments of Atmospheric Sciences and Oceanography) in the interdisciplinary graduate Program on Climate Change and a participant in the Astrobiology program.

Research Facilities

Extensive laboratory facilities are available for a wide range of experimental/field work. These include a wet chemistry laboratory, a JEOL 733 Superprobe with EDS/WDS and a high resolution laser Raman spectrometer for mineral analysis, a thermal-ionization mass spectrometer, a multi-collector inductively-coupled-plasma mass spectrometer and associated clean laboratories for analysis of stable and radiogenic isotopes, a computer laboratory, a remote-sensing laboratory with an image-processing system with LANDSAT tape library and spectral reflectance equipment, and high temperature controlled atmosphere furnaces. There is also field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including a laser-induced phonon spectrometer and diamond anvil cells for studying such rock and mineral properties as compression, sound velocities, and thermal conductivity; a permanent, regional seismic network; a portable telemetered seismic laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical-fluids laboratory; two cloud microphysics laboratories; a space physics and aeronomy laboratory for preparing ground-based, balloon, rocket, and satellite experiments; and a laboratory for the study of advanced plasma propulsion concepts. Additional facilities are provided by the Quaternary Research Center (which houses state-of-the art cosmogenic isotope and stable-isotope research laboratories, palynology, snow and ice research, and a periglacial laboratory) and the Burke Memorial Washington State Museum (which houses paleontological laboratories and extensive reference collections of invertebrate, vertebrate, and plant fossils, and minerals).

Master of Science

Graduation Requirements: With Thesis — 36 credits, of which 18 must be in courses at the 400 level or above and up to 9 may be for thesis (ESS 700). Final examination consists of oral presentation and defense of thesis. Without Thesis — 45 credits, of which 18 must be in courses at the 400 level or above, which includes a 5-credit research paper (ESS 600). Final examination is oral and is administered by a supervisory committee.

Doctor of Philosophy

Graduation Requirements: Completion of two years of graduate study, passage of the Ph.D. candidacy requirement (which includes the defense of a proposal), General Examination, completion of acceptable dissertation and passage of Final Examination; one-half total program, including dissertation, must be in courses at the 500 level or above; a minimum of 27 credits for thesis (ESS 800); at least 18 credits completed with numerical grade in courses at the 400 and 500 levels.

Financial Aid

Most graduate students receive support in the form of teaching or research assistantships, and endowed fellowships and scholarships.

Academic and Research

Aalto, Rolf E. Research Assistant Professor
Geomorphology, Sedimentary Processes

Abramson, Evan H. Research Associate Professor
Mineral Physics

Anderson, Patricia Research Professor
Palynology, Paleoecology

Bergantz, George Professor
Physical Petrology

Booth, Derek Research Professor
Geomorphology

Booker, John Professor
Magnetotellurics, Tectonics, Inverse Theory

Brown, J. Michael Professor
Mineral Physics

Buick, Roger Professor
Precambrian Life, Environments, Astrobiology

Chernicoff, Stan Senior Lecturer
Quaternary Geology, Geomorphology

Chopelas, Anastasia Research Professor
Mineral Physics, Petrology

Conway, Howard Research Professor
Glacier and Ice Sheet History, Snow Avalanches

Cooper, Kari Assistant Professor
Isotope geochemistry, igneous petrology, volcanology

Cowan, Darrel Professor
Structural Geology, Tectonics

Creager, Kenneth Professor
Seismology, inverse theory

Gillespie, Alan Professor
Glacial Geomorphology, Remote Sensing

Hallet, Bernard Professor
Glacial and Periglacial Geomorphology, (Alpine & Polar)

Harrill, Michael Lecturer
Mineral Physics

Harris, Walter Assistant Professor
Experimental Space Physics

Hernandez, Gonzalo Research Professor
Aeronomy, Optics

Hoppe, Kathryn Acting Assistant Professor
Geobiology

Holzworth, Robert Professor
Experimental Space and Plasma Physics

Adjunct Professor, UW Dept of Physics

Affiliate

Anderson, Hugh Affiliate Professor
Space Plasma Physics, Science Education
Sr. Res. Scientist, SAIC/NW

Armentrout, John Affiliate Professor
Seismic Sequence Stratigraphy, Paleontology
Geological Consultant, Mobil Oil Corp. (retired)

Atwater, Brian Affiliate Professor
Quaternary geology, paleoseismology
Research Scientist, U.S.G.S.

Brown, Tom Affiliate Assistant Professor
Accelerator Mass Spectrometry, Global Climate Change, Geochronology, Actinides
Research Physicist, Lawrence Livermore National Laboratory

Cladouhos, Trenton Affiliate Assistant Professor
Fault rocks, shear zones, & flow modeling

DeCosmo, Janice Affiliate Assistant Professor
Air-sea Interaction, Climate Change, Science Education.
Director, WA/NASA Space Grant Consortium
Assistant Dean, UW Office of Undergraduate Education

Flosadottir, Agusta Affiliate Assistant Professor
Ocean Climate Research, Western Boundary Currents
Research Engineer, NOAA/PMEL (JISAO)

Handcock, Rebecca Affiliate Assistant Professor
Remote Sensing, GIS, Spatial-Temporal Analysis
Research Scientist, CSIRO Australia

Haugerud, Ralph Affiliate Assistant Professor
Regional Geology, Mapping, GIS
Research Geologist, U.S.G.S

Houk, Ted Affiliate Assistant Professor
Aeronomy Instrumentation
President, Applied Physics Services

Iverson, Richard Affiliate Professor
Volcanology
Research Scientist, U.S.G.S, Cascade Volcano Observatory

Larsen, Jimmy Affiliate Associate Professor
Ocean Transport, Geomagnetism
Geophysicist, NOAA/PMEL (retired)

McCord, Thomas Affiliate Professor Planetary Science
Professor Emeritus, Institute of Geophysics and Planetology, U. of Hawai‘i

Nesbitt, Liz Affiliate Assistant Professor Paleontology
Curator, Geology Devision, Burke Museum
Curator of Invertebrate and Micro-paleontology, UW Burke Museum

Neumann, Tom Affiliate Assistant Professor
Glaciology, Polar Snow Geochemistry
Res. Asst. Professor, U. Vermont

Newhall, Chris Affiliate Professor
Volcanology
Research Scientist, U.S.G.S.

Owens, Tom Affiliate Professor
Seismology
Professor, Geological Sciences, University of So. Carolina

Pratt, Tom Affiliate Professor
Earthquake hazards, active fault structures, seismic imaging
Seismologist, School of Oceanography

Sack, Richard Affiliate Professor
Geochemistry, Petrology

Sherrod, Brian L. Affiliate Assistant Professor
Puget Sound Fault Zones
Research Geologist, U.S.G.S

Swanson, Don Affiliate Professor
Volcanology
Research Scientist, U.S.G.S.

Titov, Vasily Affiliate Assistant Professor
Tsunami Modelling
Research Scientist, JISAO (NOAA/PMEL)
Assoc. Director, Center for TIME, PMEL

Tyler, Robert Affiliate Assistant Professor
Geodynamic Processes, atmosphere/ocean/solid earth
Oceanographer, Applied Physics Lab

Whipple, Elden Affiliate Professor
Space Plasma Physics, magnetosphere large-scale dynamics
Branch Chief, Space Physics Division, NASA (retired)

Faculty, Post-Doctoral

Balco, Greg Research Associate
Cosmogenic isotope geochronology, Glacial geology

Foriel, Julien Research Associate
Isotopic Geochemistry, Biogeochemical Cycling, Astrobiology

Hughes, Jonathan Research Associate
Paleoseismology, tidal-marsh and bog paleoecology, dendrochronology
USGS

Junge, Karen Research Associate
Sea-Ice Nucleation, biological impacts

Pettit, Erin Research Associate
Periglaciology

Smith, Ben Research Associate
Glaciology, Polar Remote Sensing

Thomas, Jeremy Research Associate
Atmospheric Electrodynamics

Thorsteinsson, Throstur Research Associate
Glaciology, ice flow modeling

Emeritus

Adams, John Emeritus Professor
Remote Sensing, Planetary Geology

Baker, Marcia Emeritus Professor
Atmospheric geophysics
Emeritus Professor, UW Dept of Atmospheric Sciences
Course Descriptions

**ESS 100 Dinosaurs (2) NW Rensberger**
Biological, behavior, ecology, evolution, and extinction of dinosaurs, and a history of their exploration. With dinosaurs as focal point, course also introduces the student to how hypotheses in geological and paleobiological science are formulated and tested. Offered: A.

**ESS 101 Introduction to Geological Sciences (5) NW Chernicoff, Swanson**
Survey of the physical systems that give the earth its form. Emphasizes the dynamic nature of interior and surface processes and their relevance to mankind and stresses the value of rocks and earth forms in the understanding of past events. A course with laboratory for non-science majors. Not open for credit to students who have taken GEOL 205, ESS 105, or ESS 210. Field trips. Offered: AWSp.

**ESS 102 Space and Space Travel (5) NW Holzworth, Parks, Winglee**
Explores powering the sun, making of space weather conditions, observations from space and from Earth, Earth’s space environment, radiation belts and hazards, plasma storms and auroras, electron beams, spacecraft requirements, tooling up for manned exploration. Open to non-science majors. Offered: A.

**ESS 103 Minerals and Gems (3) NW Brown, Ghose**
Introduction to the nature of minerals: composition, structure, physical properties, and origins, with emphasis on gem minerals. Focuses on topics of particular interest in gemology, such as mechanisms of color, history and lore of gems, and uses of gems. Hands-on laboratories using about one hundred representative gems and minerals.

**ESS 104 Prehistoric Life (3) NW Buick**
Fossils and how they are preserved. What fossils tell us about past life and environments. How the history of life unfolded and what caused the great events in biological evolution. Open to non-science majors, but also lays a foundation for higher-level geobiology courses. Offered: Sp.

**ESS 105 The Earth: Its Processes and Hazards (5) NW Chernicoff**
Introduction to physical and environmental geology. Focuses on both large-scale tectonics forces that create Earth’s continents and oceans, and surficial forces that shape Earth’s landscapes. Emphasizes processes that endanger human populations (such as earthquakes, volcanic eruptions, and floods). Not open for credit to students who have taken ESS 101.

**ESS 106 Living with Volcanoes (3) I&S/NW Bergantz, Cooper, Nelson**
Explores volcanoes and volcanic eruptions on Earth and in the solar system. Examines how volcanoes work and how they affect the environment, life, and human societies. Illustrates principles using local examples of recent volcanism and ancient examples of mega-eruptions. Evaluates the possibility of predicting future eruptions.
ESS 107 Environments of Washington Through Geologic Time (5) NW Bourgeois, Nesbitt
Introduces students to the geologic and paleontologic history of our region. Students collect data from field studies and museum collections of fossils and rock to reconstruct ancient environments, creating paleogeographic and paleoclimatic maps through geologic sequences of time. Includes three, one-day field trips on weekdays.

ESS 115 Astrobiology: Life in the Universe (5) NW
Introduction to the new science of astrobiology, study of the origin and evolution of life on Earth, and the search for microbial and intelligent life elsewhere in the Universe. Designed for non-science, liberal arts majors. Offered: jointly with ASTBIO/ASTR/OCEAN 115/BIOL 114.

ESS 201 The Earth System and Climate (5) NW Steig
Earth’s dynamic environment, global energy balance, interplay of chemical, physical, and biological processes shaping the Earth’s surface and climate. Emphasis on quantitative methods for measuring, evaluating, and understanding contemporary changes relative to the last several thousand years. Prerequisite: either MATH 124, MATH 144, or Q SCI 291. Offered: W.

ESS 202 Earthquakes (5) NW Brown, Creager, Crosson
Earthquakes of the Pacific Northwest and around the world — their cause and relationship to plate tectonics; why, where, and when they occur. How earthquakes affect human life: shaping landscape hazards. Laboratory explores physical processes associated with earthquakes. One field trip. Open to non-science majors. Offered: Sp.

ESS 203 Glaciers and Global Change (5) NW Raymond, Waddington

ESS 204 Geology of the National Parks (5) NW
Review of fundamental geological processes, using North American parks and monuments as examples of natural laboratories. Includes volcanism, glaciation, water and wind erosion, plate-tectonic forces as preserved in geologic exposures of National Parks. Specific topics explored in laboratory sessions and field trips. Prerequisite: either ESS 101, ESS 211, ESS 210, GEOL 101, GEOL 201, or GEOL 205.

ESS 205 Access to Space (5) NW Holworth
Group development of student experiments to the outer rim of our atmosphere and the beginning of space; investigation of stratosphere, mesosphere, thermosphere, magnetosphere, development of exploration packages; basic electronic fabrication, global positioning, radio tracking, expectations at high altitudes. Open to all disciplines. No previous experience of electronics required.

ESS 209 Interdisciplinary Earth Sciences Field Seminar (3-12, max. 12) NW
Miscellaneous field-based and experiential learning activities in Earth and Space Sciences.

ESS 210 Physical Geology (5) NW
Introduction to the physical and chemical processes of the earth's surface and interior. Plate tectonics, earthquakes, volcanism, glaciation. Optional field trips to Cascades and Olympics. Background in geology not required but science background desirable. Not open for credit to students who have taken 101. Offered: A.

ESS 211 Physical Processes of the Earth (5) NW
Overview of Earth. Deformation of soil, sediment, and rock. Erosional and depositional processes and landforms. Seismicity and plate-tectonics. Structural, geomorphic, and climatic interactions in major tectonic regimes. Use of stereonets, air photos, geologic maps, and cross sections. Two one-day field excursions. Prerequisite: either PHYS 114 or PHYS 121. Offered: A.

ESS 212 Earth Materials and Processes (5) NW
Crystallography, crystal chemistry, and characteristics of rock-forming and ore minerals. Description, phase equilibria, origin, and associations of igneous, sedimentary, and metamorphic rocks. Laboratory study of hand specimens. Two one-day field excursions. Prerequisite: either ESS 211 or GEOL 201; CHEM 142. Offered: W.

ESS 213 Evolution of the Earth (5) NW
Introduction to paleontology, types of stratigraphy, and radiometric dating. The physical, chemical, biological, and plate tectonic evolution of the earth’s crust, seawater, and atmosphere. Comparison with other planets. Climate changes and man as a geological agent. Two one-day field excursions. Prerequisite: any ESS or GEOL course. Offered: Sp.

ESS 230 Rivers and Beaches (3/5) NW Montgomery, Nittrouer
Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focus on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with OCEAN 230.

ESS 301 Geology of the Northwest (5) NW Chernicoff, Swanson
Geologic history of Washington, Oregon, and Idaho. Emphasis on use of geologic principles in interpreting evidence found in landscapes and rocks. Weekend field trips optional. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, GEOL 101, GEOL 201, or GEOL 205.

ESS 302 Great Ice Age (5) NW Swanson
Growth of mile-thick ice sheets, worldwide lowering of sea level, and other geological and paleoclimatological changes that accompany the harsh environments of a global glaciation. Geology of the last three million years, focusing on the causes and effects of global glaciation and future climate change. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, GEOL 101, GEOL 201, or GEOL 205.

ESS 303 Geologic Hazards (5) NW
Geological forces dramatically alter the earth’s surface, devastating communities, taking human lives. Uses lectures and field work to examine geological hazards affecting civilizations around the world. Northwest examples illustrate causes and effects of many catastrophic geological processes, including: earthquakes, volcanoes, floods, glaciers, landslides. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, GEOL 101, GEOL 201, or GEOL 205.

ESS 304 Volcanoes and Glaciers of the Pacific Northwest (5) NW Irving
Introduction to volcanic and glacial processes, emphasizing examples in the Pacific Northwest. Volcanic products, landforms, hazards, prediction, and history. Relationship to tectonics. Nature and distribution of present and former glaciers in Washington. Two all-day Saturday field trips to Cascade volcanoes required.

ESS 305 Earthscapes (5) NW Swanson
Introduction to study of landforms and geomorphic processes. Topics include tectonics, volcanoes, weathering, soils, erosion, mass wasting, rivers, glaciers, coastal landscapes, and arid landscapes. Laboratory analysis of landforms, with the writing of scientific abstracts, is included. Optional weekend field trips introduce students to geomorphic landscapes found in western Washington. Prerequisite: either ESS 101, ESS 105, ESS 210, ESS 211, GEOL 101, GEOL 201, or GEOL 205.

ESS 306 Planetary Geology (5) NW Irving
Up-to-date survey of geological features and processes on and within planets and their moons deduced from sampling, remote sensing,
phenomena and processes. Development of skills in mapping, field
mapping, construction of cross sections, measurement and analysis
of stratigraphic sections, field excursion, and supervised individual
research projects.

ESS 403 Plate Tectonics (4) NW Willett
Introduction to the principles and methods of plate tectonics,
including motions on a sphere, polar-wander paths, plate-boundary
seismics, and focal mechanisms. Also includes modern observations
and theories of plate deformation and continental dynamics.
Prerequisite: PHYS 121. Offered: Sp.

ESS 404 Great Geological Issues (3) NW Bourgeois
History and development of geological and paleontological theories
and controversies; philosophy and methodology that have driven
scientific inquiry in the earth sciences. Recommended: HIST 311;
HIST 312. Offered: alternate years.

ESS 406 Earth Sciences for Middle and High School Science
Teachers: Solid Earth (3) NW Nesbitt
Topics of contemporary interest selected to meet state academic
standards. Topics include Pacific Northwest earthquakes and
volcanoes, global and regional plate tectonics, history of the Earth,
the Earth’s interior, planetary geology, and surface processes on the
Earth. Does not count toward the ESS degree. Prerequisite: ESS 101.

ESS 411 Geophysical Continuum Mechanics (3) NW
Analysis of stress and strain. Measurement and interpretation of
strain in geological materials. Elasticity applied to determine stress
in the earth’s lithosphere. Creep of solids and flow of geological
materials. Prerequisite: either MATH 136 or both MATH 307 and
MATH 308. Offered: A.

ESS 412 Seismology (3) NW
Introduction to theoretical and observational seismology. Elastic
plane wave propagation through stratified media. Surface waves,
eigenvibrations, ray theory. Structure of the Earth’s mantle and
core. Seismicity distributions, earthquake focal mechanisms and
relationship to tectonics. Prerequisite: either ESS 411 or GPHYS
401; recommended: concurrent registration in ESS 466. Offered: W.

ESS 413 Geophysics: The Earth (3) NW
The earth and its interior; gravity, magnetism, heat flow, seismol-
y. Earth’s outer structure, studied through the unifying concepts
of plate tectonic theory. Quantitative approaches to problems, using
techniques of classical physics. Prerequisite: either ESS 412 or
GPHYS 402; PHYS 322. Offered: Sp.

ESS 414 Geophysics: Fluids (3) NW
Introduction to geophysical fluid dynamics. An overview of fluids in
geosystems with emphasis on the oceans. A nonrigorous develop-
ment of the equations of motion with examples drawn from
oceanography and solid earth geophysics. Prerequisite: either
MATH 136 or both MATH 307 and MATH 308; PHYS 322. Offered: A.
ESS 415 Space and Plasmas (3) NW
Survey of various phenomena occurring in outer regions of Earth’s atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Prerequisite: PHYS 321. Offered: W.

ESS 416 Geophysics: The Atmosphere (3) NW
Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Prerequisite: either ESS 414 or PHYS 404. Offered: Sp.

ESS 421 Introduction to Geological Remote Sensing (4) NW
Gillespie

ESS 422 Intermediate Spectral Remote Sensing (4) NW
Gillespie, Weeks
Explores spectral image processing with ENVI software, used in individualized projects involving satellite or aircraft images. Emphasis on integration of remote sensing and field measurement using process models and Geographic Information Systems (GIS). Recommended: introductory courses in physics, chemistry, calculus, geology, and field geology. Prerequisite: either ESS 421 or GEOL 410. Offered: W.

ESS 424 Water in the Environment (3) NW
Baker, Raymond, Waddington, Warren
Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/PHYS 460. Offered: A.

ESS 426 Fluvial Geomorphology (5) NW
Montgomery
Hydraulic and morphological characteristics of streams and valley floors. Landscape evolution by stream erosion and deposition. Field exercises emphasize quantitative analysis of fluvial processes, channel forms, acquisition of various skills, such as mapping, topographic surveying, report writing. Prerequisite: either ESS 311, ESS 326, GEOL 392, or GEOL 411.

ESS 427 Hillslope Geomorphology (5) NW
Montgomery
Theoretical, laboratory, and field study of hillslope evolution by mass wasting and water erosion. Prerequisite: either ESS 311, ESS 326, GEOL 392, or GEOL 411. Offered: alternate years; W.

ESS 428 Landscape Evolution (5) NW
Hallet
Advanced examination of landscape evolution. Emphasis on interactions among tectonics, climate, and hillslope, fluvial, and glacial processes. Intended for seniors and graduate students in geomorphology and related disciplines. Prerequisite: either ESS 426, ESS 427, GEOL 412, GEOL 413, or GEOL 418. Offered: alternate years; W.

ESS 431 Principles of Glaciology (3) NW
Hallet, Porter, Raymond, Waddington, Warren
Snow deposition and metamorphism, avalanches, heat and mass balance at snow and ice surfaces, glacier flow, ice sheets, sea ice, permafrost, methods of paleoclimate reconstruction, Ice Age theories. Prerequisite: PHYS 121; PHYS 122. Offered: A.

ESS 432 Glacial Geology (5) NW
Swanson
Interpretation of glacial environments and history through study of sediments and landforms. The laboratory component is largely field based and visits some spectacular glaciated landscapes. Provides students an experiential learning approach to the field as well as an opportunity to conduct independent research.

ESS 433 Environmental Change in the Glacial Ages (3) NW
Porter

ESS 437 Mineralogy (5) NW
McCallum
Symmetry of crystals and crystal structures. Rules of crystal chemistry. Microscopic, diffraction, and spectroscopic techniques of mineral characterization. Transformation processes in minerals: order-disorder, phase transition, and exsolution. Crystal chemistry and phase relations. Reactions on mineral surfaces. Physical properties, deformation, and creep. Prerequisite: CHEM 142; either ESS 212 or GEOL 202; either ESS 312 or GEOL 391. Offered: A.

ESS 439 Petrology of Igneous Rocks (5) NW
McCallum
Systematic study of the major families of volcanic and plutonic igneous rocks with emphasis on tectonic setting, phase relations, geochemistry, and models of their origin and evolution throughout geologic time. Laboratory emphasizes thin-section study of rocks using transmitted and reflected light. Prerequisite: either ESS 312 or GEOL 391. Offered: W.

ESS 440 Petrography and Petrology of Metamorphic Rocks (5) NW
Evans
Mineralogy, textures, and origins of metamorphic rocks; metamoorphic facies and metamorphic phase equilibria; controls of metamorphism. Prerequisite: either ESS 312 or GEOL 391; either ESS 438 or GEOL 423. Offered: Sp.

ESS 441 Petrology and Petrography of Sedimentary Rocks (5) NW
Stewart
Mineralogy, textures, and origin of sedimentary rocks, using petrographic microscope. Prerequisite: either ESS 312 or GEOL 391.

ESS 445 Geology of Ore Deposits (5) NW
Cheney
The geologic principles, environmental aspects, and exploration strategies of selected types of metallic and nonmetallic ore deposits and coal. Prerequisite: either ESS 312 or GEOL 391.

ESS 450 Paleobiology (3) NW
Buick
Biological evolution over the past 500 million years, considering how the reciprocal interactions between environment and evolution have influenced the major episodes in life’s history and providing a background for assessing the evolutionary impact of modern environmental change. Offered: even years; W.

ESS 451 Invertebrate Paleontology (5) NW
Ward
Important larger invertebrate groups; morphology, classification, stratigraphic distribution, evolution, paleoecology. Offered: jointly with BIOL 451.

ESS 452 Fossil Vertebrates (5) NW
Rensberger
Highlights in evolutionary history of the fossil vertebrates, from early Paleozoic fishes through late Cenozoic mammals. Morphology, adaptations, relationships of the major groups. Bone structures and systematic relationships. Field trip. Prerequisite: either BIOL 101, ESS 100, or GEOL 100.

ESS 453 Fossil Mammals (5) NW
Rensberger
Evolutionary relationships of fossil mammals, from mammal-like reptiles of late Paleozoic to diverse Cenozoic groups. Morphology,
adaptations, extinctions, evolutionary patterns. Structures and relationships of major groups. Field trip. Prerequisite: either BIOL 101, ESS 100, ESS 452, GEOL 100, or GEOL 437.

ESS 455 Stratigraphy (4) NW Bourgeois
Systematic study of stratified rocks and space-time implications. Principles of stratigraphy, including biostratigraphy, magnetostratigraphy, seismic stratigraphy, subsurface analysis. Basin analysis, evolution of sedimentary basins and continental margins. Prerequisite: either ESS 213 or GEOL 203. Offered: A.

ESS 456 Depositional Environments (4) NW Bourgeois
Principles of sedimentary facies analysis, including survey of modern processes that produce sedimentary sequences. Recognition of various depositional environments represented in the geologic record, including terrestrial, marine terrigenous, and carbonate environments. Two field trips required. Prerequisite: either ESS 213 or GEOL 203. Offered: Sp.

ESS 458 Isotope and Trace Element Geology: Lithosphere (3)
Radiogenic isotopes and trace element as petrogenetic indicators; evolution of earth’s major geochemical reservoirs; application to problems in igneous, metamorphic, sedimentary petrology; stable isotope geothermometry; nucleosynthesis, origin, and chronology of solar system formation; U-Th disequilibrium series. Prerequisite: either CHEM 150, CHEM 152, or CHEM 155; either ESS 312 or GEOL 391.

ESS 459 Isotope Geology (3) NW Steig
The geochemistry of stable isotopes. Topics covered include the chemical properties of isotopes, a survey of isotopic variations in nature, application of isotopes as natural tracers in surficial processes, and the use of isotopic proxy indicators for interpreting paleoclimate. Prerequisite: either ESS 312 or GEOL 391.

ESS 460 Cosmogenic Nuclides in Geomorphology (3) NW Stone
Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Open to undergraduate students only. Prerequisite: either ESS 312 or ESS 313. Offered: Sp.

ESS 461 Geological Time (3) NW Stone
Principles of radiometric dating. Methods applicable to Earth history from planetary formation to the recent past. Radiocarbon dating; geological dating with long-lived isotopes; uranium series, trapped charge and cosmogenic isotope techniques. Applications in archaeology, climate change, geomorphology, tectonics, and Earth evolution. Offered: odd years; W.

ESS 462 Volcanic Processes (3) NW Bergantz, Nelson, Newhall, Qamar
Pre-eruption, eruption, and post-eruption processes. Examines triggers of magma ascent, controls on volatile build-up and loss, magma fragmentation, magma-groundwater interaction, eruption column dynamics, gravity-controlled eruptive phenomena, syn- and post-eruption lahars and other re-working of deposits. Prerequisite: either ESS 311, ESS 312, GEOL 391, or GEOL 392. Offered: Sp.

ESS 463 Structure and Tectonics (5) NW Cowan
Geometry, kinematics, and tectonic setting of major types of structures, including those in contractional fold-and-thrust belts; extended crust; strike-slip-dominated regimes; and shear zones. Laboratory exercises develop basic tools of structural geology. Prerequisite: either ESS 213 or GEOL 203. Offered: Sp.

ESS 464 Geodynamics (4) NW
Principles of continuum mechanics, their application to flow of water, mud, magma; deformation of soil, rock, ice. Emphasis on sound physical understanding of these principles and use of elementary mathematics in their application to earth sciences problems. Prerequisite: either ESS 311 or GEOL 392; either MATH 126, MATH 129, or MATH 136; PHYS 121.

ESS 465 Seismology and Earthquake Engineering (3) NW
Overview of earthquake processes and characteristics of destructive ground motion; effects of such motion on engineering structures; current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either MATH 136 or both MATH 307 and MATH 308. Offered: jointly with CEE 431.

ESS 466 Applied Seismology (2) NW Qamar

ESS 467 Seismic Exploration (5) NW Brown
Introduction to theory and practice of seismic exploration. Application of refraction and reflection techniques to problems in engineering geology and mineral exploration. Constraints in the interpretation of subsurface structure. Prerequisite: either ESS 311 or GEOL 392; either MATH 126, MATH 129, or MATH 136; PHYS 123.

ESS 471 Introduction to Space Physics (3) NW Holzwarth, Winglee
Introduces several areas of space physics, the physical principles that apply therein, and the methods by which significant observations are made. Covers electromagnetic and plasma processes from the center of the sun to the surface of the earth. Prerequisite: PHYS 123. Offered: A.

ESS 490 Special Topics (2-10, max. 20) NW

ESS 492 Undergraduate Teaching Experience and Outreach (1-2, max. 2) NW
Designed to help undergraduate majors acquire effective teaching skills at the college and public school level. Teaching experience gained through assisting graduate student teaching assistant or K-12 public school outreach. Involves classroom teaching experience and improving communications and presentation skills. Offered: AWSpS.

ESS 495 NASA Science and Engineering Research Seminar (1, max. 4) NW DeCosmo
Review of current space science-related research. Emphasis varies, but topics may include planetary geology, astronomy, global change, aeronautical engineering, and remote sensing. Credit/no credit only. Offered: Sp.

ESS 498 Undergraduate Thesis (5) NW
The thesis must be submitted at least one month before graduation.

ESS 499 Undergraduate Research (* max. 15)

ESS 504 Great Geological Issues (3) Bourgeois
History and development of geological and paleontological theories and controversies; philosophy and methodology that have driven scientific inquiry in the earth sciences. Requires a term paper analyzing primary material. Prerequisite: graduate standing in earth sciences, or in history of science, or permission of instructor.

ESS 511 Geophysical Continuum Mechanics (3)
Analysis of stress and strain. Measurement and interpretation of strain in geological materials. Elasticity applied to determine stress in the earth’s lithosphere. Creep of solids and flow of geological
materials. Includes advanced, research-oriented problems. Prerequisite: MATH 307 and MATH 308 or equivalent. Offered: A.

ESS 512 Seismology (3)
Theoretical and observational seismology. Elastic plane wave propagation through stratified media. Surface waves, eigenvibrations, ray theory. Structure of Earth’s mantle and core. Seismicity distributions, earthquake focal mechanisms and relationship to tectonics. Advanced, research-oriented problems. Prerequisite: either ESS 511 or GPHYS 501; recommended: concurrent registration in ESS 466. Offered: W.

ESS 513 Geophysics: The Earth (3)
Study of gravity, magnetism, heat flow, seismology. Earth’s outer structure studied through unifying concepts of plate tectonic theory. Quantitative approaches to problems, using techniques of classical physics. Includes advanced, research-oriented problems. Prerequisite: either ESS 512 or GPHYS 502; PHYS 322. Offered: Sp.

ESS 514 Geophysics: Fluids (3)
Geophysical fluid dynamics. Fluids in geophysics with emphasis on the oceans. Development of the equations of motion with examples drawn from oceanography and solid earth geophysics. Includes advanced, research-oriented problems. Prerequisite: PHYS 322, MATH 307 and MATH 308 or equivalent. Offered: A.

ESS 515 Geophysics: Space (3)
Various phenomena occurring in outer regions of Earth’s atmosphere, ionosphere, magnetosphere, and Van Allen radiation belts. Laboratory applications include plasma thrusters and fusion. Concepts include charged particles in magnetic fields, drift motion, plasma, magnetohydrodynamic waves. Includes advanced, research-oriented problems. Prerequisite: PHYS 321 or equivalent. Offered: W.

ESS 516 Geophysics: The Atmosphere (3)
Phenomena of the lower atmosphere: some simple applications of the principles of classical thermodynamics, fluid dynamics, and radiative transfer to the atmospheric hydrological cycle, global energy balance, and atmospheric dynamics and climate. Includes advanced, research-oriented problems. Prerequisite: either ESS 514 or GPHYS 504. Offered: Sp.

ESS 517 Early Earth Evolution (3)
Geological, biological, and environmental evolution of the Earth over the first 4 billion years of its history, as an analogue for the development of other habitable planets. Offered: W, odd years.

ESS 520 Remote Sensing of the Atmosphere and Climate System (3)
Leovy, Warren
Satellite systems for sensing the atmosphere and climate system. Recovery of atmospheric and surface information from satellite radiance measurements. Applications for research. Prerequisite: ESS 571 or GPHYS 532; ESS 572 or GPHYS 533. Offered: jointly with ATM S 534.

ESS 521 Geophysical Data Collection and Analysis (3)
Crosson
Theory and practical application of data collection and analysis applied to geophysical problems. Digital processing of signals; filtering and spectral analysis. Laboratory sessions include problem solving on computer-based processing system. Offered: A.

ESS 522 Geophysical Inverse Theory (3)
Booker
Introduction to the mathematical techniques for estimating properties of physical systems, such as the earth or atmosphere, from data that is insufficient for a precise specification of the system. Emphasis is on the concept of the resolving power of data sets. The ideas developed are quite general and have a wide range of applicability in the field of data interpretation. Prerequisite: either ESS 522 or GPHYS 563, or permission of instructor. Offered: odd years; Sp.

ESS 526 Sediment Dynamics and Boundary-Layer Physics (4)
Parsons
Introduction to the quantitative treatment of transport phenomena with applications to mantle and magma convection, volcanic eruptions, landslides, porous flow, and reaction. Emphasis on the governing equations of fluid dynamics including porous and multiple flow, chaotic convection, mixing, heat transfer, rheology, analytical, numerical, and scaling solutions. Offered: W.

ESS 528 Interpretation of Sedimentary Structures (2-4, max. 4)
Bourgeois
Physical and environmental analysis of sedimentary structures, including biogenic sedimentary structures. Clastic sediments and rocks. Field trips required.

ESS 529 Principles of Fluid Dynamics, Heat, and Mass Transfer in Earth Sciences (3)
Introduction to the quantitative treatment of transport phenomena with applications to mantle and magma convection, volcanic eruptions, landslides, porous flow, and reaction. Emphasis on the governing equations of fluid dynamics including porous and multiple flow, chaotic convection, mixing, heat transfer, rheology, analytical, numerical, and scaling solutions. Offered: W.

ESS 531 Physics of Ice (3)
Raymond
Structure of the water molecule. Crystallographic structures of ice. Electrical, optical, thermal, and mechanical properties of ice. Growth of ice from vapor and liquid phases. Prerequisite: permission of instructor. Offered: jointly with ATM S 510; alternate years.

ESS 532 Formation of Snow and Ice Masses (3)
Warren

ESS 533 Dynamics of Snow and Ice Masses (3)
Raymond
Rheology of snow and ice. Sliding and processes at glacier beds. Thermal regime and motion of seasonal snow, glaciers, and ice sheets. Avalanche and glacier surges. Deformation and drift of sea ice. Response of natural ice masses to change in climate. Prerequisite: permission of instructor. Offered: jointly with ATM S 512; odd years.

ESS 534 Structural Glaciology (3)
Raymond
Physical and chemical processes in snow, stratigraphy, and metamorphism. Interpretation of ice sheet stratigraphy in terms of paleoenvironment. Dynamic metamorphism of ice from flow. Structures formed at freezing interfaces. Structure of river, lake, and sea ice. Relationship between structures and bulk physical properties. Prerequisite: permission of instructor. Offered: jointly with ATM S 513; even years.

ESS 535 Ice and Climate Modeling (3)
Warren
Principles of global climate modeling. Modeling seasonal cycles of snow cover and sea ice. Ice-sheet mass balance and flow. Solar radiation anomalies due to changes in earth’s orbit. Climate/ice-sheet models of Pleistocene ice ages. Prerequisite: permission of instructor. Offered: jointly with ATM S 514; alternate years.

ESS 537 Advanced Mineralogy (3)
Ghose
Crystal symmetry: point groups, space groups. Mathematical description of crystal structures; group theory, irreducible representations; tensor description of physical properties: stress, strain, piezoelectricity, elasticity; structural and magnetic phase transitions, Landau theory, deformation and creep crystals; elasto-viscous properties of earth’s mantle, crystal chemistry, solid state reactions.
ESS 538 Petrogenesis of Igneous Rocks (3) McCallum
Origin of one or more of the major groups of igneous rocks. Selected petrogenetic problems in light of tectonic setting, petrography, geochemistry, and experimental studies. Prerequisite: either ESS 439 or GEOL 424 or equivalent. Offered: alternate years.

ESS 540 Advanced Igneous Petrology (4) McCallum

ESS 545 Economic Geology of Sedimentary Rocks (5) Cheney
Description and origin of metallic and nonmetallic ore deposits indigenous to regoliths, sediments, and sedimentary rocks. Prerequisite: either ESS 445 or GEOL 485, or equivalent or permission of instructor. Offered: alternate years.

ESS 548 Geodynamics (3)
Advanced study of various aspects of the dynamics of the solid Earth. Topics may include plate tectonics, mantle convection, rotational dynamics, post-glacial rebound, fault mechanics, and geodetic measurement of crustal deformation. Offered: odd years.

ESS 549 Geomagnetism (3) Merrill
Advanced aspects of earth magnetism intended for specialists in this field. Extensive discussion of origin theories and their implications; physical basis and theories of magnetism in rocks; paleomagnetic techniques and results. Prerequisite: permission of instructor. Offered: even years.

ESS 550 Electromagnetic and Potential Field Methods (3) Booker
Development of equations of electromagnetic fields in conducting media. Solution of forward and inverse problems with natural and controlled sources: magnetotelluric and related methods. Includes the special case of static fields: DC resistivity, gravity, and magnetic interpretation. Prerequisite: either ESS 413, ESS 513, GPHYS 403, or GPHYS 503; either ESS 522 or GPHYS 563; PHYS 323; or permission of instructor. Offered: even years; W.

ESS 551 Mineral Physics (3) Brown, Merrill
Applications of solid-state physics to various geophysical problems. Topics vary, but usually include the thermal properties of relevant geophysical materials, the equation of state for the earth's mantle and core, defects in solids and their roles in tectonophysics. Prerequisite: permission of instructor. Offered: alternate years.

ESS 552 Solution Geochemistry (4)
Solution chemistry and thermodynamics as applied to solid and liquid silicates and aqueous fluids. Modeling configurational entropies in solids, activity coefficients and complexes in aqueous solution, and modeling chemical mass transfer in geologic systems. Prerequisite: either ESS 312 or GEOL 391, or equivalent.

ESS 553 Electron Beam Microanalysis (4) Kuehner
Materials analysis using electron beams, including electron-target interactions, wave and energy dispersive x-ray analysis, scanning electron microscopy, and applications of these and related techniques to geological problems.

ESS 555 Physics and Chemistry of the Earth's Interior (3) Brown, Creager, Irving, Merrill
Emphasizes current issues in global tectonics and mantle dynamics. Examples include global seismic tomography and its bearing on geodynamics, the fate of subducted lithosphere and geochemical constraints on mantle convection. Prerequisite: permission of instructor.

ESS 556 Physical Petrology (3) Bergantz
The quantitative treatment of magmatic processes: thermomechanical state of the lithosphere, solidification, convection, conjugate heat transfer, crystal settling, magma mixing, diapirism and melt extraction, hydrothermal convection. Emphasis on continental lithosphere. Prerequisite: permission of instructor.

ESS 560 Cosmogenic Nuclides in Geomorphology (3) NW Stone
Use of cosmic-ray-produced nuclides to date rock surfaces and analyze geomorphic processes. Nuclide production by cosmic radiation above and below ground; tracer methods; exposure dating; coupling of cosmogenic nuclide data to geomorphic models. Prerequisite: either AMATH 301, AMATH 351, or permission of instructor. Offered: Sp.

ESS 562 Observational Seismology (1, max. 18) Creager, Crosson, Malone, Qamar
Quarterly research themes introduce students to a variety of digital and analog seismograms and techniques for their interpretation. Students present results of short investigations in an informal seminar setting. Credit/no credit only. Prerequisite: either ESS 412, ESS 512, GPHYS 402, or GPHYS 502 or permission of instructor. Offered: AWSp.

ESS 563 Theoretical Seismology I (3) Creager, Crosson
Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: either ESS 412, ESS 512, GPHYS 402, or GPHYS 502, or permission of instructor. Offered: even years; Sp.

ESS 564 Theoretical Seismology II (3) Creager, Crosson
Advanced theoretical seismology. Attenuation and physical dispersion. Waves in anisotropic media. Moment-tensor source representation. Lamb's problem. Waves in stratified media: propagator methods, asymptotic ray theory, WKBJ seismograms. Inverse methods and analysis of seismological data. Prerequisite: either ESS 563 or GPHYS 541. Offered: even years; A.

ESS 565 Low-Frequency Seismology (3) Creager
Represent seismic displacement field, including surface and body waves, as superposition of normal modes. Rigorous development of equations of motion, their solution, energy integrals, Rayleigh's Principle, perturbation theory, attenuation, and excitation formulae. Moment-tensor representation of seismic sources. Prerequisite: either ESS 412, ESS 512, GPHYS 402, or GPHYS 502, or permission of instructor. Offered: odd years; Sp.

ESS 566 Physics of the Oceanic Lithosphere (3)
Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with OCEAN 545.

ESS 571 Atmospheric Radiation: Introductory (3)
Fundamentals of radiative transfer; absorption and scattering by atmospheric gases; elementary applications to constraints on the thermal structure, photochemistry, and remote sensing. Prerequisite: PHYS 225 or permission of instructor. Offered: jointly with ATM S 532; Sp.

ESS 572 Atmospheric Radiation: Advanced (3)
Optical properties and particle absorption and scattering; solutions...
of radiative transfer equation in multiple scattering atmospheres; applications to atmospheric and surface energy balance and remote sensing. Prerequisite: ATM S 532/ESS 571 or permission of instructor. Offered: jointly with ATM S 533; A.

ESS 573 Cloud Microphysics and Dynamics (3) Baker, Houze
Basic concepts of cloud microphysics, water continuity in clouds, cloud dynamics, and cloud models. Prerequisite: ATM S 501 or permission of instructor. Offered: jointly with ATM S 535; W.

ESS 574 Atmospheric Electrical Dynamics (3) Holzworth
Global and local dynamic electric field models, including upper atmospheric and tropospheric sources as modified by propagation delays, orographic features, and transient phenomena. Radiation and plasma waves along with microphysics of corona discharge and charge separation mechanisms. Prerequisite: either ESS 415 or GPHYS 405; either ESS 416 or GPHYS 406; or permission of instructor. Offered: A.

ESS 575 Space and Laboratory Plasma Physics (3) Holzworth, Parks, Winglee
Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: either ESS 415 or GPHYS 405; or equivalent or permission of instructor. Offered: A.

ESS 576 Advanced Space Plasma Physics (3) Holzworth, Parks, Winglee
Formation by the interaction of solar wind with geomagnetic field. Trapped particles. Electromagnetic waves in anisotropic plasma. Dynamic disturbances and plasma instabilities. Prerequisite: either ESS 415 or GPHYS 405, or permission of instructor. Offered: A.

ESS 577 Kinetic Theory and Simulation of Space Plasmas (3) Winglee
Wave-particle interactions in space plasmas. Generation of different wave modes, electrostatic and electromagnetic, Langmuir waves to Alfvén waves. Beam, Weibel, and masers instabilities, heavy ion interactions. Particle simulations, electrostatic and electromagnetic, for non-linear wave evolution and particle heating. Offered: even years; W.

ESS 579 Computational Methods and Modeling in Geophysics I (3) Winglee
Solution of complex dispersion equations including multiple root finding. Data analysis, fitting, smoothing, fast integration. Ray tracing and particle tracking in 2-D and 3-D. Computer simulation of fluid interactions, unmagnetized and magnetized, compressible and incompressible, and flow around objects. Offered: odd years; W.

ESS 581 Planetary Atmospheres (3) Leovy
Problems of origin, evolution, and structure of planetary atmospheres, emphasizing elements common to all planetary atmospheres; roles of radiation, chemistry, and dynamic processes; new results on the atmospheres of Venus, Mars, Jupiter, and other solar system objects in the context of comparative planetology. Offered: jointly with ASTR 555/ATM S 555; alternate years.

ESS 583 Origin of the Solar System (3)
Nebular and nonnebular theories of the origin of the solar system; collapse from the interstellar medium, grain growth in the solar nebula, formation of planetesimals and planets, early evolution of the planets and other possible planetary systems; examination of the physical and chemical evidence upon which the ideas concerning the origin of the solar system are based. Offered: jointly with ASTR 557.

ESS 585 Climate Impacts on the Pacific Northwest (4)
Mantua, Snover
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S/ENVIR/SMA 585; Sp.

ESS 586 Current Research in Climate Change (2, max. 20)
Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ATM S 587/OCEAN 587. Offered: A.

ESS 587 Climate Dynamics (3) Hartman, Thompson
Examines Earth’s climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth’s climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/OCEAN 587. Offered: A.

ESS 588 The Global Carbon Cycle and Climate (3) Quay
Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth’s carbon cycle from geological, oceanographic and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/OCEAN 588; W.

ESS 589 Paleoclimatology: Data, Modeling and Theory (3) Battisti, Emerson, Steig

ESS 590 Special Topics (2-10, max. 20)

ESS 594 Introduction to Earth and Space Sciences Research (1-2, max. 4)
Introduces research of faculty and advanced graduate students to first-year graduate students and provides experience for the formulation, oral presentation, and defense of research proposals and results. Offered: AWSp.

ESS 595 Earth and Space Sciences Research Methods (2, max. 12)
Current research methodology and results based on recent literature and on faculty and student research. Designed to develop student perspective on observational and theoretical methods and on relation of specific research to broader developments in geophysics and interdisciplinary aspects of geophysics through faculty-guided presentations and discussion by students. Offered: AWSp.

ESS 599 Seminar (1, max. 15)
Review of current literature in geophysics and graduate student research with faculty participation. Credit/no credit only. Offered: AWSp.

ESS 600 Independent Study or Research (*)
Credit/no credit only.

ESS 700 Master’s Thesis (*)

ESS 800 Doctoral Dissertation (*)

Economics
302 Savery
Economics concerns the wealth of nations. As a social science, it
The institutions and arrangements that societies use to create and allocate productive resources in order to increase the well being of their members. It advances understanding of the choices and behavior of individuals, households, firms, and other organizations.

Undergraduate Program

Advisers
304 Savery, Box 353330
206-543-5794
econadv@u.washington.edu

The Department of Economics offers the following programs of study:

- The Bachelor of Arts degree with a major in economics
- The Bachelor of Science degree with a major in economics

The Bachelor of Arts degree is designed to provide a general background in economics, and is the choice of the vast majority of departmental majors.

The Bachelor of Science degree requires more mathematics for admission, and its graduation requirements have a more pronounced quantitative emphasis.

Applied fields of study available include money and banking, industrial organization, natural resource economics, labor economics, public finance, economic history, comparative systems and development, international trade, and econometrics.

Bachelor of Arts

Suggested First- and Second-Year College Courses: ECON 200, ECON 201 and MATH 120, MATH 124 or MATH 111, MATH 112. Courses that develop strong analytical and quantitative-reasoning skills.

Department Admission Requirements

A minimum of 45 quarter credits completed, including ECON 200, ECON 201; STAT 311; MATH 112, MATH 124, MATH 134, or MATH 145; a 5-credit English composition course.

A minimum cumulative GPA for all prior college work of 2.80; GPA for five courses required for entrance must be at least 2.80 with a minimum of 2.0 in each course;

Transfer students must be enrolled at the UW before applying to the major;

Application deadline is the second Friday of each quarter (including summer). All applicants who meet the minimum admission requirements are admitted in time to register as economics majors for the following quarter.

Major Requirements

65 credits as follows:

- Admission to the major.
- 15 credits in MATH 124, MATH 125, MATH 126 or equivalent.

A minimum of 50 credits in economics, including ECON 200, ECON 201; ECON 300, ECON 301; ECON 400 (or equivalent) or ECON 401; at least 10 additional credits chosen from the following courses: ECON 400 (or equivalent) or ECON 401, ECON 424, ECON 435, ECON 473, ECON 481 (or equivalent), ECON 482, ECON 483, ECON 485, ECON 486; at least 15 additional credits at the 400 level, excluding ECON 496, ECON 497, and ECON 499.

Grades of 2.0 or better in ECON 200, ECON 201, ECON 300, and ECON 301.

Transfer students are required to complete a minimum of 25 upper-division economics credits in residence at the UW.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: For undergraduates, the role of the Department of Economics is to train students in a rigorous, analytical discipline that advances their problem-solving abilities and their understanding of important public issues. The Bachelor of Arts program provides the flexibility and social science training to prepare students for employment in a variety of areas. Also, it is excellent preparation for many masters-level graduate programs in other disciplines and for professional schools such as law, business and medicine.

The Bachelor of Science program is designed to provide undergraduates a rigorous background in economic analysis. This degree is designed for students who plan to do graduate study in economics or who plan to enter certain technically oriented professions, such as actuarial science, demography, financial analysis, or environmental consulting.

- Instructional and Research Facilities: The department currently has a Resources Room (Savery 310), staffed during tutoring hours, which are posted in Savery 304 or at http://depts.washington.edu/ecnboard/tutor.html.

- Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- Internships, Research and Service Learning: Course credit available for internships and research.

- Department Scholarships: Scholarship course credit available for internships and research.
Graduate requirements for the Ph.D. degree include ECON 500, 501, 502, 503, 508, 580, 581, and 582. In addition to this core program, Ph.D. students must take eight other elective field courses in economics at the graduate level. Each Ph.D. student must satisfy the requirements for two fields of specialization. The fields of specialization include advanced macroeconomic theory, advanced microeconomic theory, comparative systems and development, econometrics, finance, health economics, industrial organization, international economics, labor economics, natural resource economics, and public finance.

The doctoral dissertation is the final major requirement for the Ph.D. degree. Each Ph.D. student chooses a dissertation topic and a doctoral supervisory committee is appointed. After the dissertation topic has been developed, Ph.D. students take the General Examination, an oral defense of the dissertation proposal. When the dissertation is completed, Ph.D. students take the Final Examination, an oral defense of the completed dissertation. A foreign language is not required. The doctoral program is designed to be completed in four years, although most students take slightly longer.

Financial Aid

The principal form of financial aid available to graduate students in economics is a teaching assistantship. A number of such assistantships are available to entering graduate students with promising academic records.

Research and Computing Resources

The Institute for Economic Research houses a computer laboratory that provides hardware and software for economic modeling, economic estimation, word processing, and other faculty and graduate student research functions. Access is restricted to economics graduate students and faculty. In addition, the Center for Social Science Computation and Research (CSSCR) maintains an extensive library of computer software and data, and offers free consulting services to aid faculty and students with computing problems.

Faculty

Barzel, Yoram Professor
Brock, Philip Associate Professor
Bruce, Neil Professor and Chair
Chen, Yu-chin Assistant Professor
Davis, Larina Part-Time Lecturer
Eicher, Theo S Associate Professor and Robert R. Richards Distinguished Scholar
Ellis, Greg Senior Lecturer
Fearon, Gervan Visiting Associate Professor
Goldhaber, Dan Adjunct Research Associate Professor
Hadjimichalakis, Michael Associate Professor
Halvorsen, Robert Professor and Associate Chair
Hartman, Richard Professor
Huppert, Dan Adjunct Professor
Khalil, Fahad Associate Professor
Kim, Chang-Jin Affiliate Professor
Kochin, Levis Associate Professor

Of Special Note:

- Courses accepted in transfer as ECON 1XX or ECON 2XX cannot be applied to the major requirements unless courses equivalent to ECON 200 and ECON 201 were required as prerequisites. ECON X courses not having these prerequisites may be applied to electives for the degree, but not to the 50-credit economics-course requirement.
- Internship and independent study ECON credits do not count towards the required ECON credits for the BA or BS degree.

Graduate Program

Graduate Program Coordinator
304A Savery, Box 353330
206-685-1384
econadv@u.washington.edu

The department offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. The academic programs in economics are designed to develop trained economists for careers in teaching, private industry, government, and international agencies. Frequent seminars led by U.S. and foreign visitors as well as by faculty and students are conducted as an integral element of the department’s graduate program.

Special Requirements

Applicants should have completed undergraduate training that includes courses in at least intermediate-level microeconomic and macroeconomic theory. In addition, applicants must have had at least one year of calculus, one term of linear algebra, and one term of statistics. A course in differential equations is strongly recommended. Additional work in calculus, matrix algebra, and probability and statistics is also strongly recommended. An undergraduate major in economics is not required for admission to the graduate program provided that the above prerequisites have been met. All applicants are required to take the General Test of the Graduate Record Examination (GRE).

Graduate requirements for the M.A. degree include ECON 500, 501, 502, 503, 508, 580, 581, and 582. In addition to this core program, M.A. students must take at least seven elective courses in economics at the graduate level. At least three of these courses must be in applied areas, and at least two must be in the same area (the field of specialization). M.A. students also must complete 6 credits of a supervised internship. Well-prepared students should be able to complete the M.A. program in two years.

Graduate requirements for the Ph.D. degree include ECON 500, 501, 502, 503, 508, 580, 581, and 582. Ph.D. students are required to pass core examinations in microeconomics and macroeconomics.
Lawarree, Jacques  Associate Professor  
Layton, David  Adjunct Associate Professor  
Leffler, Keith  Associate Professor  
Long, Mark  Adjunct Assistant Professor  
Lundberg, Shelly  Castor Professor of Economics  
Nelson, Charles  Van Voorhis Professor  
Parks, Richard  Professor  
Plotnick, Robert  Adjunct Professor  
Pörtner, Claus  Assistant Professor  
Rose, Elaina  Associate Professor  
Salehi-Esfahani, Haideh  Senior Lecturer  
Shi, Lan  Assistant Professor  
Silberberg, Eugene  Professor  
Sirakaya, Sibel  Assistant Professor, Statistics/Economics/CSSS  
Startz, Richard  Castor Professor  
Thornton, Judith  Professor  
Turnovsky, Michelle  Senior Lecturer  
Turnovsky, Stephen  Castor Professor  
Watts, Carolyn (Cindy)  Adjunct Professor  
Weninger, Quinn  Visiting Associate Professor  
Wong, Kar-yiu  Professor  
Zivot, Eric  Associate Professor, and Gary Waterman Distinguished Scholar  

Course Descriptions

**ECON 100 Principles of Economics (5) I&S, QSR**
Fundamental concepts of economic analysis with application to contemporary problems. Cannot be taken for credit if 200 or 201 previously taken.

**ECON 150 Quantitative Preparation for Economics and Business (5) NW, QSR**
Introduces students to the kinds of quantitative analysis used in economics and business courses. Uses practical examples to build skills in graphical analysis, use of algebra, basic probability, introductory computer use, and quantitative reasoning.

**ECON 200 Introduction to Microeconomics (5) I&S, QSR**
Analysis of markets: consumer demand, production, exchange, the price system, resource allocation, government intervention. Recommended: MATH 111. Offered: AWSps.

**ECON 201 Introduction to Macroeconomics (5) I&S, QSR**
Analysis of the aggregate economy: national income, inflation, business fluctuations, unemployment, monetary system, federal budget, international trade and finance. Prerequisite: ECON 200; recommended: MATH 111. Offered: AWSps.

**ECON 235 Introduction to Environmental Economics (5) I&S/NW**
Introduces non-economics majors to environmental and natural resource economics. Discussion of fundamental economic concepts, including markets and private property. Students learn basic tools used in the economic assessment of environmental problems and apply these methods to key environmental issues. Offered: jointly with ENVIR 235

**ECON 299 Study Abroad: Economics (5, max. 10) I&S**
For participants in the Study Abroad program. Specific course content determined by assigned faculty member and announced in Study Abroad bulletins.

**ECON 300 Intermediate Microeconomics (5) I&S**
Analysis of decisions by individuals and by firms and of outcomes in factor and product markets. Policy issues and applications. Prerequisite: ECON 200; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: AWSps.

**ECON 301 Intermediate Macroeconomics (5) I&S**
Analysis of the determinants of the aggregate level of employment, output, prices, and income of an economy. Policy issues and applications with special reference to current monetary and fiscal policy. Prerequisite: 2.0 in ECON 201; 2.0 in ECON 300. Offered: AWSps.

**ECON 306 Topics in Economics (1-5, max. 10) I&S**
Provides undergraduates the opportunity to apply tools learned in introductory economics courses to topics of interest outside the standard curriculum. Topics vary. Prerequisite: ECON 201.

**ECON 399 Economics Internship (1-5, max. 10)**
Academic work completed in conjunction with an economics-related internship. Faculty supervision required. Does not apply toward major.

**ECON 400 Advanced Topics in Microeconomics (5) NW**
Application of calculus to microeconomics. Development of comparative statics used in production and consumption theory, including derivation of the Slutsky equation and duality results. Prerequisite: 2.0 in ECON 300; either MATH 124, MATH 127, MATH 134, or MATH 145; recommended: MATH 126 and 2.5 in ECON 300.

**ECON 401 Advanced Topics in Macroeconomics (5) NW**
Application of mathematics to macroeconomics. Possible topics include economic dynamics and growth, rational expectations, real business cycle models, and New Keynesian approach. Prerequisite: 2.0 in ECON 301; either MATH 126, MATH 129, or MATH 136; recommended: 2.5 in ECON 301.

**ECON 402 Microeconomics: Methods and Applications (5) I&S**
Generalizations and extensions of the course models of competition and monopoly taught in ECON 300. Topics include: factor markets and effects of monopoly power; game theory and oligopoly theory; decision making over time; uncertainty and under asymmetric information; contracts and incentives. Prerequisite: 2.0 in ECON 300.

**ECON 403 The Economics of Property Rights (5) I&S**
Property rights as an economic concept. Delineation of rights as a subject of optimization. Formation of contracts to maximize the value of personal property. Formation of organizations to induce efficient use of resources and minimize losses to public domain. Prerequisite: 2.0 in ECON 300; recommended: two 400-level microeconomics classes.

**ECON 404 Industrial Organization and Price Analysis (5) I&S**
Analysis of firm behavior in imperfectly competitive markets. Topics include monopoly, oligopoly, product differentiation, entry deterrence, and the role of asymmetric information. Game theoretic tools and empirical evidence used to analyze topics. Prerequisite: ECON 300.

ECON 406 Undergraduate Seminar in Economics (5, max. 10) I&S
Provides undergraduate student an opportunity to apply the tools of economic analysis in a critical examination of theoretical and empirical work. A list of topics is available in the departmental office. Prerequisite: ECON 200.

ECON 407 Development of Economic Thought (5) I&S
From the early modern period to the present. The main subjects treated are Adam Smith and the classical school, Karl Marx, the neoclassical reformulation and its critics, the impact of J. M. Keynes, and the evolution of economics in the twentieth century. Prerequisite: 2.0 in ECON 300.

ECON 409 Undergraduate Seminar in Political Economy (5, max. 10) I&S
Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Recommended: ECON 300; POL S 270. Offered: jointly with POL S 409.

ECON 411 Money, Credit, and the Economy (5) I&S
Role of money and the banking system in the United States economy. Relation of money to inflation, interest rates, and business fluctuations. Monetary policy and Federal Reserve System. Prerequisite: 2.0 in ECON 301.

ECON 422 Investment, Capital, and Finance (5) I&S
Intertemporal optimization: consumption and portfolio allocation decisions of households, investment and financing decisions of firms. Introduction to financial decisions under uncertainty. Portfolio theory, asset pricing, options, and futures. Financial market institutions and efficiency. Prerequisite: 2.0 in ECON 301; either ECON 311, STAT 311, MATH 390, STAT 390, or QMETH 201.

ECON 423 Topics in Financial Economics (5) I&S
Topics of current interest such as regulation of securities markets and valuation of stocks. Allows students to apply tools of economics to real world problems in finance. Prerequisite: 2.0 in ECON 301; ACCTG 215. Offered: AWSpS.

ECON 424 Computational Finance and Financial Econometrics (5) NW
Covers probability models, data analysis, quantitative, and statistical methods using applications in finance. Prerequisite: 2.0 in ECON 301; either ECON/STAT 311, STAT 341, MATH/STAT 390, or QMETH 300; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145. Offered: AWSpS.

ECON 431 Government and Business (5) I&S
Economic effects of various governmental regulatory agencies and policies. Antitrust legislation as a means of promoting desired market performance. Observed economic effects of policies intended to regulate business practices, control prices, conserve resources, or promote competition. Prerequisite: 2.0 in ECON 300.

ECON 435 Natural Resource Economics (5) I&S
Survey of the economics of renewable and nonrenewable resources including fisheries, forest, minerals, and fuels. Optimal trade-offs between benefits and costs of resource use, including trade-offs between current and future use. Effects of property rights on resource use. Prerequisite: ECON 300.

ECON 436 Economics of the Environment (5) I&S
Microeconomic analysis of environmental regulation. The problem of social cost, policy instrument choice, enforcement of regulations, methods for damage assessment, and estimating benefits of environmental improvement. Prerequisite: 2.0 in ECON 300.

ECON 437 Economics of Biological Resources (5) I&S
Application of economic concepts to biology and biological concepts to economics. Examination of theory of species maximization, parallels in behavior between humans and other biota, animal choices among alternative food sources, games animals play, evidence of risk aversion in animals. Prerequisite: 2.0 in ECON 300.

ECON 442 Investment, Capital, and Finance (5) I&S
Intertemporal optimization: consumption and portfolio allocation decisions of households, investment and financing decisions of firms. Introduction to financial decisions under uncertainty. Portfolio theory, asset pricing, options, and futures. Financial market institutions and efficiency. Prerequisite: 2.0 in ECON 301; either ECON 311, STAT 311, MATH 390, STAT 390, or QMETH 201.

ECON 443 Labor Market Analysis (5) I&S
Determinants of employment and incomes in the United States: analysis of individual and firm decisions and of equilibrium in the labor market. Topics include decisions to work and retire, education and occupation choices, compensation, discrimination, poverty, unemployment and unions. Examination of policy issues affecting the labor market. Prerequisite: 2.0 in ECON 300.

ECON 444 Topics in Labor Market Analysis (5) I&S
In-depth analysis of special topics in the operation of labor markets and public policies affecting incomes and employment. Course content varies by instructor. Prerequisite: 2.0 in ECON 300.

ECON 446 Economics of Education (5) I&S
Examines formal education as an investment industry, the economics of human capital investment, and competition among government owned schools and the non-profit sector. Prerequisite: 2.0 in ECON 300. Offered: AWSpS.

ECON 447 Economics of Gender (5) I&S
Microeconomic analysis of the sources of gender differences in earnings, labor force participation, occupational choice, education, and consumption. Economic theories of discrimination, human capital, fertility and intrahousehold resource allocation. Economics of the family in developed and developing countries. Prerequisite: 2.0 in ECON 300. Offered: jointly with WOMEN 447.

ECON 448 Population and Development (5) I&S
Survey of topics in population economics, including history of thought, demographic experience of currently developing countries, household production models, fertility demand, quantity-quality models of fertility, mortality, health and nutrition, migration, macroeconomic-demographic linkages. Prerequisite: 2.0 in ECON 300.

ECON 450 Public Finance: Expenditure Policy (5) I&S
Application of normative microeconomic theory to analysis of government expenditures. Rationale for government economic activity, collective choice, public goods, and externalities, income redistribution, public sector pricing, and specific expenditure programs. Prerequisite: 2.0 in ECON 300.

ECON 451 Public Finance: Tax Policy (5) I&S
Microeconomics of taxation: efficiency, incidence, effect on distribution of income, personal and corporate income taxes, sales and consumption taxes, taxation of property and estates. Prerequisite: 2.0 in ECON 300.

ECON 454 Cost-Benefit Analysis (5) I&S
Theory and practice of cost-benefit analysis of public sector projects and policies. Welfare criteria, investment criteria, shadow prices, social discount rate, marginal-willingness-to-pay for non-market goods, social risk, and special topics. Prerequisite: 2.0 in ECON 300.

ECON 455 Microeconomics of Public Policy (5) I&S
Topics include general equilibrium analysis of efficiency and equity, income and substitution effects, analysis of alternative welfare
programs, intergovernmental grants, price discrimination, price controls, rationing, industry regulation, and public goods. Prerequisite: 2.0 in ECON 300.

ECON 460 Economic History of Europe (5) I&S Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Recommended: ECON 201. Offered: jointly with HIST 481.

ECON 462 Economic History of the United States to the Civil War (5) I&S Systematic study of the changing pre-Civil War economic conditions and the consequences of these changes for the American society. Prerequisite: ECON 201.

ECON 463 Economic History of the United States From the Civil War to the Present (5) I&S Systematic study of the changing economic conditions since the Civil War and the consequences of these changes for the American society. Prerequisite: ECON 201.

ECON 464 Financial Crisis (5) I&S Causes, effects, and cures for financial crisis traced through history from the Tulip Bubble, to the Great Depression, to the East Asian Crisis of 1997, and beyond. Explores the original work of Fisher, Keynes, Friedman, and Krugman, among others. Prerequisite: 2.0 in ECON 301. Offered: AWSpS.

ECON 468 China’s Economic Reforms-Integration Into World Economy (5) I&S Systematic survey of China’s economic reforms since 1978, including China’s increasing integration into the world economy. Prerequisite: ECON 201. Offered: jointly with SISEA 468.

ECON 473 Topics in International Trade (5) I&S Advanced theory of trade and analysis of government trade policies. International trade and factor mobility. Theory of commercial policy. Prerequisite: 2.0 in ECON 301; ECON 471.

ECON 475 Economics of the European Union (5) I&S Analysis of economic issues relating to the European union. Explores the institutional aspects, the attempt to coordinate social and economic policies-welfare, employment, commercial, fiscal, and monetary-and the economic linkages between the European Union and the rest of the world. Prerequisite: 2.0 in ECON 301.

ECON 481 Introduction to Mathematical Statistics (5) NW Probability, generating functions; the d-method, Jacobians, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 580.) Prerequisite: STAT/ECON 311; either MATH 136 or MATH 126 with either MATH 308 or MATH 309. Recommended: MATH 324. Offered: jointly with CS&SS/STAT 481; A.

ECON 482 Econometric Methods (5) NW Application of statistical modeling to empirical work in economics. A mixture of theory and applied computer work. Primary focus is regression analysis. Prerequisite: 2.0 in ECON 300; either ECON 311/STAT 311 or MATH 390/STAT 390.

ECON 483 Applied Econometric Modeling (5) NW Provides undergraduates the opportunity to learn econometric model building for a particular problem while applying the theory learned in various courses to specific economic cases. Students estimate, test, and forecast economic models. Extensive use of the computer and econometric programs. Prerequisite: 2.0 in ECON 301; either ECON/STAT 311, STAT 341, MATH/STAT 390, or QMETH 300; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145.

ECON 485 Game Theory with Applications to Economics (5) NW Introduction to the main concepts of game theory: strategy, solution concepts for games, strategic behavior, commitment, cooperation, and incentives. Application to economics oligopoly theory, bargaining theory, and contract theory. Prerequisite: either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145; recommended: ECON 300; ECON 404.

ECON 486 Economics of Information (5) I&S, QSR Khalil, Lawarree Basic models of decision making and strategic interaction in the presence of imperfect and incomplete information. Information issues in market exchange and in hierarchical settings. Includes adverse selection, moral hazard, signaling, and screening. Recommended: ECON 404 or ECON 485. Prerequisite: 2.0 in ECON 300.

ECON 490 Comparative Economic Systems (5) I&S Study of resource allocation, growth, and income distribution in capitalist, market socialist, and centrally planned economies. Prerequisite: 2.0 in ECON 301.

ECON 491 Issues in Economic Development (5) I&S Examines factors contributing to the economic problems of developing countries and possible solutions. Theory and applications in economic development and international trade. Prerequisite: 2.0 in ECON 301.

ECON 492 Economic Transformation of Russia and Eastern Europe (5) I&S Analysis of the economic growth of Japan since about 1850 to the present. The reasons for rapid industrialization, various effects of sustained economic growth, and significant contemporary issues are investigated. Prerequisite: ECON 201. Offered: jointly with SISEA 494.

ECON 493 Economic History of the United States to the Civil War (5) I&S Systematic study of the changing economic conditions since the Civil War and the consequences of these changes for the American society. Prerequisite: ECON 201.

ECON 494 Economy of Japan (5) I&S Analysis of the economic growth of Japan since about 1850 to the present. The reasons for rapid industrialization, various effects of sustained economic growth, and significant contemporary issues are investigated. Prerequisite: ECON 201. Offered: jointly with SISEA 494.

ECON 495 Economic Transformation of Russia and Eastern Europe (5) I&S Analytical survey of the economic institutions and economic structures of the transforming socialist economies. Socialist resource allocation. Market institutions. Structural change and the sequencing of economic reform. Primary focus on Russia and Eastern Europe. Prerequisite: 2.0 in ECON 301.

ECON 496 Honors Seminar (5) I&S Honors and other students in high standing have the opportunity to develop research techniques, to pursue topics in breadth and depth, and to apply tools of economic analysis to selected topics in economic theory and current issues of national and international economic policy. For seniors only.

ECON 497 Honors Directed Study (5) Students write their honors thesis on the topic chosen in the Honors Seminar working under the previously arranged supervision of an economics faculty adviser. Prerequisite: ECON 496.

ECON 498 Senior Seminar (5) I&S Advanced undergraduate research in economics. Students formulate
some underlying economic issue, organize its study, gather necessary information, and analyze results. Does not satisfy graduation requirement for the major. Prerequisite: ECON 301; one 400-level ECON course; recommended: two 400-level ECON courses.

ECON 499 Undergraduate Research (1-5, max. 10) May not be applied toward an advanced degree.

ECON 501 Microeconomic Analysis II (4) General equilibrium and welfare economics. Introduction to game theory. Prerequisite: ECON 500.

ECON 502 Macroeconomic Analysis I (4) An introduction to advanced macroeconomics. Theories of income, employment, inflation, and growth. Prerequisite: ECON 300 and ECON 301.

ECON 505 Microeconomic Theory: Problems and Applications (3) Seminar for graduate students who have completed the basic core sequence in price theory. Designed to extend the student’s analytic and problem-solving abilities by working systematically through a programmed set of readings and problems. The material includes both formal analytical techniques and applications of economic theory. Prerequisite: ECON 501.

ECON 507 History of Economic Thought (3) Classical and neoclassical economics with emphasis on alternative conceptions of the nature and significance of economic science.

ECON 508 Microeconomic Analysis III (4) Information economics. Prerequisite: ECON 500, ECON 501.

ECON 509 Macroeconomic Analysis III (4) Modern macroeconomic dynamics, presenting a range of approaches based on intertemporal optimization. Representative agent models with special emphasis on the analysis of government policy. More advanced discussion of economic growth. Prerequisite: ECON 502, ECON 503 or equivalent.

ECON 511 Advanced Microeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced microtheory. Selected topics of special interest and significance. Prerequisite: ECON 500, ECON 501.

ECON 512 Advanced Macroeconomic Theory: Selected Topics (3, max. 12) Seminar in advanced macrotheory. Selected topics of special interest and significance.

ECON 513 Mathematical Economics: Linear Analysis (3) Theory and application of linear algebra and linear economic models. Prerequisite: ECON 300 and MATH 126 or equivalent.

ECON 514 General Equilibrium Analysis (3) Study of the existence, uniqueness, and stability of general equilibrium models under the assumptions of competition. Emphasis is on recent developments in the literature with consideration given to both positive and normative economics.

ECON 515 Special Topics in Mathematical Economics (3, max. 12)

ECON 516 Introduction to Noncooperative Game Theory (3) Study of both pure game theory and its applications to such problems as oligopoly pricing, non-cooperative bargaining, entry deterrence, reputation phenomena. Focus on game theory as a modeling tool as opposed to a body of known results. Prerequisite: ECON 508.

ECON 518 Contract Theory (3) Basic contract theory models, including hidden action and hidden information models. Current developments in contract theory. Prerequisite: ECON 508 and ECON 516 or permission of instructor.

ECON 520 The Economics of Property Rights (3) Application of standard economic theory to analyze various forms of property rights as constraints of competition; the costs associated with delineation and enforcement of rights; the costs of negotiating and enforcing contracts for right transfers; resource allocation and income distribution implied by different property right and transaction cost constraints. Prerequisite: ECON 500 and ECON 501, or permission of instructor.

ECON 521 Game Theory (3) Using tools of property rights, industrial organization, and game theory, explores the emergence of the state. Specifies conditions conducive to constitutional rule. Analyzes circumstances amenable to state-promoted exchange as opposed to self-enforced agreements. Prerequisite: ECON 500 and ECON 501 or permission of instructor.

ECON 523 Government Regulation of Business (3) Public policy in the United States with respect to industrial organization and business conduct. Economic issues in antitrust policy emphasized. Prerequisite: ECON 500, ECON 501.

ECON 524 Theory of Industrial Organization I (3) Analysis of the monopolist’s problem in different choice variables. Topics include the theory of the firm; pricing; choice of quality and advertising; price discrimination; and vertical control. Prerequisite: ECON 500, ECON 501.

ECON 525 Theory of Industrial Organization II (3) The application of game theory to problems of strategic behavior that arise in the study of imperfectly competitive markets. Topics include vertical integration, short- and long-run price competition, folk theorems, empirical tests of oligopoly pricing models, entry deterrence, research and development, and product differentiation. Prerequisite: ECON 500, ECON 501.

ECON 526 Environmental Economics (3) Half of integrated two-course sequence in environmental and natural resource economics. Dynamic optimization. Nonrenewable resource extraction and exploration, including effects of market structure, uncertainty, and taxation. Renewable resources, including fisheries and forests. Prerequisite: ECON 500, ECON 501, or permission of instructor.

ECON 527 Economic Aspects of Marine Policy (3) Huppert Development of pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with SMA 537, W.

ECON 528 Economics of Living Marine Resources (3) Huppert Develops pertinent economic concepts and applications for
conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with SMA 538; Sp.

ECON 539 Economics of Natural Resources Seminar III (3)
Selected advanced topics in the economics of natural resources and environmental regulation. Topics may include environmental regulation as a problem in optimal mechanism design, enforcement of regulations, regulatory regimes for common property resources, and the measurement of market power in nonrenewable resource industries. Prerequisite: ECON 536.

ECON 541 Labor Economics (3)
Theoretical and empirical analysis of the labor market. The determinants of labor supply and demand, human capital investment, the pattern of compensation, employment contracts and incentives, unemployment and labor market dynamics.

ECON 542 Labor Economics (3)
Theoretical and empirical analysis of the labor market. The determinants of labor supply and demand, human capital investment, the pattern of compensation, employment contracts and incentives, unemployment and labor market dynamics.

ECON 543 Population Economics (3)
Economic determinants and consequences of population growth; emphasis on formal theoretical models and on empirical analysis. Introduction to: formal demography; welfare economics of population change, including analyses of population effects on consumption, savings, investment, and technical change; and determinants of mortality, fertility, and migration. Prerequisite: ECON 500, ECON 501, or permission of instructor.

ECON 544 Health Economics (3)
Theoretical and empirical models of the demand for health and health care; supply of health care from physicians and hospitals; government programs that subsidize health care; occupational health; cost-benefit analyses of preventive health care and new medical technologies. Prerequisite: graduate-level microeconomics, HSERV 585, or permission of instructor.

ECON 545 Health Policy Economics (3)
Selected topics in health economics, including risk and insurance, medical malpractice, the market for physician services, and industry regulation. Prerequisite: a course in intermediate microeconomics or permission of instructor. Offered: jointly with HSERV 587.

ECON 546 Health Economics (3)
Theoretical and empirical models of the demand for health and health care; supply of health care from physicians and hospitals; government programs that subsidize health care; occupational health; cost-benefit analyses of preventive health care and new medical technologies. Prerequisite: graduate-level microeconomics, HSERV 585, or permission of instructor.

ECON 547 Health Policy Economics (3)
Selected topics in health economics, including risk and insurance, medical malpractice, the market for physician services, and industry regulation. Prerequisite: a course in intermediate microeconomics or permission of instructor. Offered: jointly with HSERV 587.

ECON 550 Public Finance: Expenditure Policy (3)
Theory of public finance with emphasis on public expenditures. Social welfare maximization, public goods and externalities, decreasing cost industries, theory of collective choice, second-best analysis. Prerequisite: ECON 500, ECON 501, or permission of instructor.

ECON 551 Public Finance: Tax Policy (3)
Theory of public finance with emphasis on taxation. Second-best analysis, optimal taxation, general equilibrium incidence analysis, issues in personal income taxation and corporate income taxation. Prerequisite: ECON 500, ECON 501, or permission of instructor.

ECON 554 Cost-Benefit Analysis (3)
Covers the theoretical foundations of cost-benefit analysis using graduate microeconomics. Stresses both the conceptual and practical problems encountered in the subject. Emphasis on problem solving and term project. Prerequisite: ECON 500, ECON 501.

ECON 571 International Trade Theory (3)
Comparative advantage, resource allocation, income distribution, and foreign trade. Different theories of trade, with or without perfect competition and constant returns. International factor mobility. Prerequisite: ECON 500, ECON 501.

ECON 572 International Financial and Monetary Economics (3)
Analysis of open economy macro models with emphasis on exchange rates and balance of payments determination. Prerequisite: ECON 502, ECON 503.

ECON 573 International Commercial Policy (3)
Analysis of welfare aspects of international trade and factor mobility. Costs and benefits of protection; implications of different government policies. Import competition and response. Prerequisite: ECON 571 or permission of instructor.

ECON 574 International Macroeconomics (3)
Surveys recent developments in international macroeconomics, placing particular emphasis on the dynamic aspects. One sector, multisector, and two-country international models discussed. Fiscal issues treated in depth. Stochastic aspects introduced and related to the literature on international real business cycles. Prerequisite: ECON 509 or equivalent.

ECON 580 Econometrics I (4)
Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Students may receive credit for only one of MATH/STAT 390, ECON/STAT 481, and ECON 580.

ECON 581 Econometrics II (4)
Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 580.

ECON 582 Econometrics III (4)
Methods, tools, and theory of econometrics as the basis for empirical investigation in economics. Specification, testing, and use of econometric models with reference to examples in the literature. Prerequisite: ECON 580.

ECON 583 Econometric Theory I (3)
Estimation and testing in linear and nonlinear regression models. Asymptotic theory, bootstrapping. Theoretical developments are reinforced with a variety of empirical examples and applications. Prerequisite: ECON 580, ECON 581, ECON 582 or equivalent.

ECON 584 Econometric Theory II (3)
Continuation of 583. Analysis of stationary and nonstationary, univariate, and multivariate time series models. Emphasis on empirical applications. Prerequisite: ECON 583.

ECON 585 Applied Microeconometrics (3)
Econometric issues that arise in applied microeconomic research. Topics include the use of panel data and models with limited and qualitative dependent variables. Prerequisite: ECON 582 or equivalent.

ECON 590 Theory and Practice of Economic Planning (3)
Analysis of incentives for, and methods of, government intervention in socialist and developing countries, with a focus on microeconomic issues.

ECON 591 Theoretical Issues in Economic Development (3)
Analysis of issues in economic development with application to the less-developed countries of the world today. Prerequisite: ECON 500, ECON 501, or permission of instructor.

ECON 592 Development Policy (3)
Theoretical and empirical analysis of macroeconomic policies pursued by developing countries. Topics include the determination of exchange rates and relative prices in small economies; the examination of government spending, taxation, banking, trade, and labor market policies; and the evaluation of market-oriented economic reform programs. Prerequisite: ECON 503; recommended: ECON 591.

ECON 595 Analysis of the Transforming Socialist Economies (3)
Applications of economic analysis to the economic problems of transforming socialist economies. Economic institutions. The role of the state. Privatization and the behavior of decentralized organizations. Integration into the world market. Prerequisite: micro- and macroeconomic theory and permission of instructor.

ECON 596 Research Practicum in Microeconomics (1, max. 6)
Provides opportunity to practice research and presentation skills in applied and theoretical microeconomics. Students develop and refine thesis topics under faculty supervision. Peer criticism a significant part of participation requirement. Maximum of 6 credits allowed in 596, 597, and 598 combined. Credit/no credit only.

ECON 597 Research Practicum in Macroeconomics (1, max. 6)
Provides opportunity to practice research and presentation skills in applied and theoretical macroeconomics. Students develop and refine thesis topics under faculty supervision. Peer criticism a significant part of participation requirement. Maximum of 6 credits allowed in 596, 597, and 598 combined. Credit/no credit only.

ECON 598 Research Practicum in Labor and Development (1, max. 6)
Provides opportunity to practice research and presentation skills in economics of labor and development. Students develop and refine thesis topics under faculty supervision. Peer criticism a significant part of participation requirement. Maximum of 6 credits allowed in 596, 597, and 598 combined. Credit/no credit only.

ECON 599 Research Issues in Demography and Population Studies (1-2, max. 7)
Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches. Credit/no credit only. Offered: AWSp.

ECON 600 Independent Study or Research (*)
Credit/no credit only.

ECON 601 Internship (1-9, max. 9)
Credit/no credit only.

ECON 602 Teaching Introductory Economics (1)
Examines problems encountered in preparing and presenting courses in introductory economics. Credit/no credit only.

ECON 800 Doctoral Dissertation (*)
Credit/no credit only.

English
A101 Padelford

The Department of English offers courses in English, American, and related literatures. Courses in literature emphasize techniques of literary analysis; theoretical problems in the interpretation of texts; the social, historical, and political context of literary production and reception; and the pleasures of reading. Most require significant written work and stress critical thinking skills. Courses in language study examine the structural, historical, social, and aesthetic dimensions of English. The Creative Writing Program offers workshops in verse, short story, novel, and expository writing. English majors are exposed to many critical perspectives, and pursue interests in literary history, critical theory, language studies, and creative writing.

Undergraduate Education
Adviser
A2B Padelford, Box 354330
206-543-2634
engladv@u.washington.edu

The Department of English offers the following program of study:
• The Bachelor of Arts degree with a major in English. A creative writing option is also available.

Bachelor of Arts

Suggested First- and Second-Year College Courses:
Foreign languages, classics, English history, American history, and philosophy.

Department Admission Requirements
Completion of 10 credits in any English literature courses.
Completion of ENGL 202 and the attached writing link, ENGL 197, may also fulfill this requirement.
Minimum cumulative GPA of 2.00.
Minimum cumulative English GPA of 2.50.
Students apply to the English Advising Office, A2B Padelford, during the first two weeks of autumn, winter, and spring quarters. Transfer students must be enrolled at the UW before applying.
Admission of competitive. Completion of the above requirements does not guarantee admission.

Additional requirements for admission to the creative writing option:
• Admission to the English major.
  Completion of ENGL 283 and ENGL 284 or transfer equivalents.
  Submission of an unofficial transcript and a writing sample of 3-5 poems and 5-10 pages of fiction (preferably a complete story).
  Students interested in the creative writing option should apply to the Creative Writing Office, B-25 Padelford, during the first three weeks of autumn and spring quarters.
  Admission is competitive. Completion of the above requirements does not guarantee admission.

Major Requirements
A minimum of 55 credits as follows:
ENGL 202 and writing link ENGL 197 (10 credits). It is recommended these courses be completed by the first quarter of admission to the major and no later than the second quarter after admission.
ENGL 302 (5 credits)
English core (25 credits): At least 5 credits from each of the following categories: (1) Theories and Methodologies of Language and Literature; (2) Forms and Genres of Language and Literature; (3) Histories of Language and Literature. A list of approved courses is available from the department advising office or department website: http://depts.washington.edu/engl/.

English electives (10 credits): Must be 200-level or above. At least 15 credits must be in courses focused on pre-1900 literature.
Senior capstone course (5 credits) chosen from ENGL 407, ENGL 440, ENGL 442, ENGL 443, ENGL 444, ENGL 473, or ENGL 498.
A maximum of 20 credits of 200-level courses and a maximum of 5 credits of creative writing may be applied towards the major.
A minimum of 25 credits of English at the 200-level or above must be completed in residence at the UW. The department strongly recommends, but does not require, 5 credits in one of the following English language courses: ENGL 370, ENGL 371, ENGL 373, ENGL 374, ENGL 478, ENGL 479, or LING 200.

Creative Writing Option - A minimum of 60 credits as follows:
ENGL 202 and writing link ENGL 297 (10 credits)
ENGL 283 and ENGL 284 (10 credits)
ENGL 202 and writing link ENGL 297 (10 credits)

English core (20 credits) - At least 5 credits from each of the following categories: (1) Theories and Methodologies of Language and Literature; (2) Histories of Language and Literature. A list of approved courses is available from the department advising office or department website: http://depts.washington.edu/engl/

At least 15 credits must be in courses focused on pre-1900 literature.
ENGL 383 and ENGL 384 (10 credits)
10 credits of approved 400-level creative writing courses.
A maximum of 20 credits of 200-level courses may be applied towards the major.
A minimum of 25 credits of English at the 200-level or above must be completed in residence at the UW.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Good writing, analytical ability, research skills, and broadened perspectives are among the practical accomplishments majors acquire, all of which can be applied to a range of careers, including, but not limited to advertising, business and marketing, law, library science, the media, public administration, publishing, the social services, and teaching.

The undergraduate program of study in English concentrates on developing students’ critical and interpretive abilities with regard to literatures written in English. Students become familiar with the critical developments in the study of language and literary forms, including especially understanding the cultural and historical contexts of various forms of literature. Students are, accordingly, asked to cultivate a habit of self-conscious and careful reading of written texts. Honing a successful habit of reading depends on acquiring an early awareness of the broad range of critical and interpretive methods available to readers of literature, as well as comprehending the basic purpose and effects at stake in different reading methods. Finally, students develop the ability to compose effective and persuasive written analyses of texts in a manner that demonstrates comprehension of the complexities or nuances of language, literature, and culture.

- Instructional and Research Facilities: Computer labs in Mary Gates Hall for computer-integrated sections.
- Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- Research, Internships, and Service Learning: The English Internship Program maintains an active list of over 200 local employers, including publishers, arts organizations, the media, advertising agencies, social service groups, schools, and businesses. Credit is available to declared English majors (ENGL 491).
- Department Scholarships:
  - English Department scholarships are available to declared English majors enrolled at the UW for at least two quarters with a UW GPA of 3.50 and a UW English GPA of 3.70. Scholarship recipients must enroll for at least two quarters and carry at least 6 credits each quarter during the term of the scholarship. Applications, due in early March, are available in A11 and A2B Padelford.
  - Additional scholarships and prizes in creative writing are open to UW English majors only. Applications, due in early March, are available in B25 and A2B Padelford.
  - Student Organizations/Associations: Bricolage is a student literary arts annual published entirely by UW undergraduates and features the works of University students, faculty, staff, and alumni. Students from all majors welcome. Contact: brico@u.washington.edu for details.

Of Special Note:

- Students considering teaching English at the secondary level should consult an English adviser regarding coursework for the English Language Arts endorsement required for entry into the Secondary Teacher Education Program (TEP).
- The Department of English offers study abroad opportunities in London and Rome. Students from all majors welcome. See department web site for more information.

Graduate Program

Graduate Program Coordinator
A105 Padelford, Box 354330
206-543-6077
englgrad@u.washington.edu

The Department of English offers a complete program of graduate courses and seminars designed to provide aspirants for the Master of Arts and Doctor of Philosophy degrees with a knowledge of English literature and language and the necessary scholarship for training in literary criticism and theory, literary history, and English-language study, including rhetoric and composition. It is possible to pursue a literature- or language-study emphasis. The Master of Fine Arts program in creative writing emphasizes projects in imaginative writing in fiction and poetry, supported by courses in criticism and literary periods and types. A special degree program, the Master of Arts for Teachers, is offered for English teachers in secondary schools and community colleges and a Master of Arts for Teachers (of English to speakers of other languages) for those interested in teaching English to speakers of other languages. The graduate program permits completion of master’s degree requirements in four to six quarters and doctoral degree requirements in five years (including the master’s degree). In a typical five-year Ph.D. program, a student is encouraged to complete course requirements (75 credits) during the first three years, the General Examination for the doctorate in the fourth year, and the dissertation in the fifth year. Those admitted with a master’s degree from another university can complete the doctorate in four years: two years of course work, exam year, and dissertation year.

Financial Aid

The department annually awards 10 or more new teaching assistantships. To be considered for the following autumn, applicants must submit an assistantship application and supporting materials for admission to the graduate program by January 15. A statement of purpose, three recommendations, the GRE general test, and a critical-writing sample are required [except M.A.T. (E.S.O. L.)]. Teaching assistantship applicants who are not native speakers of English must submit as part of their application a score of 290 or better on the Test of Spoken English (TSE) or UW-administered SPEAK test.

Master of Arts

Admission Requirements: Bachelor of Arts degree: Major in English equivalent to that awarded by the UW preferred. Graduate Record Examination general test [GRE (literature in English) subject test recommended]. Three letters of recommendation, statement of purpose, and a critical writing sample.
Graduation Requirements: Intermediate-level proficiency in a language other than English. 40 credits, including 30 credits in graduate English seminars. For students continuing to the doctoral program, a 10-credit master’s essay. For a terminal master’s degree, students may substitute 10 additional credits in graduate English seminars for the master’s essay. A maximum of 5 credits may be transferred from an accredited graduate program elsewhere.

**Master of Fine Arts**

Admission Requirements: Bachelor of Arts degree, Graduate Record Examination general test, three letters of recommendation, statement of purpose, a critical-writing sample, and a creative-writing sample.

Graduation Requirements: 55 credits, including 20 credits in creative writing, 15 credits in graduate English seminars (5 credits must be from an approved course in criticism), 5 elective credits, 15 thesis credits (including a creative thesis, an MFA essay, and a final oral examination); demonstration of proficiency in a language other than English.

**Master of Arts for Teachers**

Admission Requirements: Same as for the Master of Arts degree, but usually including prior teaching experience.

Graduation Requirements: 45 credits, of which 25 must be in courses numbered 500 or above; including at least one course each in English language or linguistics, rhetoric and/or composition, literary criticism or critical theory, and literature; three courses must have a stated orientation on teaching English; and 5 credits of M.A.T. essay. In addition to the 45 credits, a student with no regular or formal teaching experience is required to complete at least 6 credits of ENGL 601 (Internship). 15 of these may be taken outside the department in courses related to the teaching of English, subject to approval.

**Master of Arts for Teachers (of English to Speakers of Other Languages)**

Admission Requirements: Bachelor of Arts degree, Graduate Record Examination general test, statement of purpose, three letters of recommendation. Students without training in linguistic method and theory must take LING 400 as a prerequisite for 400-level linguistics courses.

Graduation Requirements: 45-54 credits, including ENGL 571, 572, 574, 576; LING 446 or 450, ENGL 575 or LING 461; three courses from ENGL 471, 478, 479, 560, 561, 562, 563, 564, 567, 569, 575, LING 433/ANTH 464, LING 457/PSYCH 457, LING 451, 462; one elective course; 3-6 credits of ENGL 570. Intermediate-level proficiency in a language other than English.

**Doctor of Philosophy**

Admission Requirements: By petition to the Graduate Studies Committee upon completion of the M.A. degree option in literature. Students with recent master’s degrees from other institutions are admitted at the post-master’s level following the guidelines for admission to the M.A. option and must complete two quarters before petitioning the Graduate Studies Committee for admission to the doctoral program. Students transferring with a master’s degree from other institutions may be required to submit an equivalent to the master’s essay. Students with M.F.A., M.A.T., or M.A.T. (E.S.L.) degrees from this University must complete course-work and language requirements for the M.A. degree option and submit an equivalent to the master’s essay.

Graduation Requirements: 75 graded credits of electives in graduate English seminars. Students with a recent master’s degree from another university may count up to 30 credits from their master’s program, upon approval of the Director of Graduate Studies. Students with a master’s degree from the UW may count up to 40 credits in courses taken before admission to the doctoral program. Fluency in at least one language other than English, plus whatever additional language study the supervisory committee advises.

Written examinations for literature emphasis: (1) historical period, (2) specialized field of study, (3) second period, genre, or topic; written examinations for language emphasis: (1) major approach to English-language study, (2) second approach to language study, (3) textual focus (can be literary period); an oral General Examination; 27 credits of ENGL 800 (Dissertation) and a Final Examination based on the dissertation.

Course Descriptions

ENGL 100 Intermediate ESL for Non-Native Speakers (5)
Offered as three separate sections. Each language structure course focuses on the grammar and vocabulary necessary for academic reading and writing. Sections must be taken consecutively. Special fee required. Credits averaged in GPA but do not count toward graduation.

ENGL 101 Advanced ESL for Non-Native Speakers (5)
Offered as two separate sections: one for writing about readings, particularly answering short answer and short essay questions; the other for listening skills related to academic lectures. Sections may be taken concurrently. Special fee required. Credits averaged in GPA but do not count toward graduation.

ENGL 102 Advanced ESL for International Teaching Assistants (5)
Speaking skills for international teaching assistants: language behaviors related to lecturing, classroom management, and teacher-student interaction. Credits averaged in GPA but do not count toward graduation.

ENGL 103 Introduction to Writing for EOP/SSS Students (5)
Development of writing skills necessary to produce college-level short and medium-length essays. Sequence of five essays designed to develop personal voice and competence in writing for academic disciplines.

ENGL 104 Introductory Composition (5-) C
Development of writing skills: sentence strategies and paragraph structures. Expository, critical, and persuasive essay techniques based on analysis of selected readings. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs.

ENGL 105 Introductory Composition (-5) C
Development of writing skills: sentence strategies and paragraph structures. Expository, critical, and persuasive essay techniques based on analysis of selected readings. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs.

ENGL 106 Practical Forms of Writing (5) C
Instruction in writing essay examinations, reports, reviews, and research papers. For Educational Opportunity Program students only, upon recommendation by the Office of Minority Affairs.

ENGL 111 Composition: Literature (5) C
Study and practice of good writing; topics derived from reading and discussing stories, poems, essays, and plays.

ENGL 112 Composition: Social Issues (5) C
Study and practice of good writing; topics derived from reading and discussing essays and fiction about current social and moral issues.

ENGL 113 Composition: Exposition (5) C
Study and practice of good writing: topics derived from a variety of personal, academic, and public subjects.

ENGL 182 The Research Paper (5) C
Includes study of library resources, the analysis of reading materials, and writing preparatory papers as basic to writing a reference or research paper. Open to all undergraduates. Prerequisite: either ENGL 111, ENGL 121, or ENGL 131.

ENGL 197 Interdisciplinary Writing/Humanities (5, max. 15) C
Expository writing based on material presented in a specified humanities lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytical prose. Concurrent registration in the specified course required.

ENGL 198 Interdisciplinary Writing/Social Science (5, max. 15) C
Expository writing based on material presented in a specified social science lecture course. Assignments include drafts of papers to be submitted in the specified course, and other pieces of analytical prose. Concurrent registration in the specified course required.

ENGL 200 Reading Literature (5) VLPA
Techniques and practice in reading and enjoying literature. Examines some of the best works in English and American literature and considers such features of literary meaning as imagery, characterization, narration, and patterning in sound and sense. Emphasis on literature as a source of pleasure and knowledge about human experience.

ENGL 202 Introduction to the Study of English Language and Literature (5)
Gateway course designed for English pre-majors and majors. Introduces critical, historical, and theoretical frameworks important to studying the literature, language, and cultures of English. Concurrent registration with ENGL 197 required. Offered: .

ENGL 205 Method, Imagination, and Inquiry (5) VLPA
Examines ideas of method and imagination in a variety of texts, in literature, philosophy, and science. Particularly concerned with intellectual backgrounds and methods of inquiry that have shaped modern Western literature. Offered: jointly with CHID 205.

ENGL 207 Introduction to Cultural Studies (5) VLPA
Asks three questions: What is Cultural Studies? How does one read from a Cultural Studies perspective? What is the value of reading this way? Provides historical understanding of Cultural Studies, its terms and its specific way of interpreting a variety of texts, i.e. literature, visual images, music, video, and performance.

ENGL 210 Literature and the Ancient World (5) VLPA
Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions to the Middle Ages.

ENGL 211 Medieval and Renaissance Literature (5) VLPA
Introduction to literature from a broadly cultural point of view, focusing on major works that have shaped the development of literary and intellectual traditions from the Middle Ages to the eighteenth century.

ENGL 212 Literature of Enlightenment and Revolution (5)
VLPA: Introduction to eighteenth- and nineteenth-century literature from a broadly cultural point of view, focusing on representative works that illustrate literary and intellectual developments of the period.

ENGL 213 Modern and Postmodern Literature (5) VLPA: Introduction to twentieth-century literature from a broadly cultural point of view, focusing on representative works that illustrate literary and intellectual developments since 1900.

ENGL 225 Shakespeare (5) VLPA: Survey of Shakespeare's career as dramatist. Study of representative comedies, tragedies, romances, and history plays.

ENGL 228 English Literary Culture: To 1600 (5) VLPA: British literature from Middle Ages to end of sixteenth century. Study of literature in its cultural context, with attention to changes in language, form, content, and style.

ENGL 229 English Literary Culture: 1600-1800 (5) VLPA: British literature in seventeenth and eighteenth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 230 English Literary Culture: After 1800 (5) VLPA: British literature in the nineteenth and twentieth centuries. Study of literature in its cultural context, with attention to changes in form, content, and style.

ENGL 242 Reading Fiction (5) VLPA: Critical interpretation and meaning in fiction. Different examples of fiction representing a variety of types from the medieval to modern periods.

ENGL 243 Reading Poetry (5) VLPA: Critical interpretation and meaning in poems. Different examples of poetry representing a variety of types from the medieval to modern periods.

ENGL 244 Reading Drama (5) VLPA: Critical interpretation and meaning in plays. Different examples of drama representing a variety of types from the medieval to modern periods.

ENGL 250 Introduction to American Literature (5) VLPA: Survey of the major writers, modes, and themes in American literature, from the beginnings to the present. Specific readings vary, but often included are: Taylor, Edwards, Franklin, Poe, Hawthorne, Melville, Emerson, Thoreau, Whitman, Dickinson, Twain, James, Eliot, Stevens, O’Neill, Faulkner, Hemingway, Ellison, and Bellow.

ENGL 257 Introduction to Asian-American Literature (5) VLPA: Introductory survey of Asian-American literature provides introduction to Chinese, Japanese, Filipino, Korean, Hawaiian, South-Asian, and Southeast-Asian American literatures and a comparative study of the basic cultural histories of those Asian-American communities from the 1800s to the present.

ENGL 258 African-American Literature: 1745 to Present (5) VLPA: A chronological survey of Afro-American literature in all genres from its beginnings to the present day. Emphasizes Afro-American writing as a literary art; the cultural and historical context of Afro-American literary expression and the aesthetic criteria of Afro-American literature. Offered: jointly with AFRAM 214.

ENGL 264 Literature and Science (5) VLPA: Explores the relationships between literature and science as ways of comprehending humanity’s interaction with the world we inhabit. As a course in criticism, explores how literature and science structure and are structured by social, religious, political, and economic factors in culture.

ENGL 270 Cultural Issues in English (5) VLPA: Survey of the assumptions, methodologies, and major issues of English in its cultural settings. Designed to connect English language study with the study of literature, orality and literacy, education, ethnicity, gender, and public policy.

ENGL 281 Intermediate Expository Writing (5) C: Writing papers communicating information and opinion to develop accurate, competent, and effective expression.

ENGL 282 Composing for the Web (5): Introduces the writing of nonfiction narrative and expository pieces for publication on the Web. Analysis and criticism of on-line work.

ENGL 284 Beginning Short Story Writing (5) VLPA: Introduction to the theory and practice of writing the short story.

ENGL 300 Reading Major Texts (5) VLPA: Intensive examination of one or a few major works of literature. Classroom work to develop skills of careful and critical reading. Book selection varies, but reading consists of major works by important authors and of selected supplementary materials.

ENGL 302 Critical Practice (5) VLPA: Intensive study of, and exercise in, applying important or influential interpretive practices for studying language, literature, and culture, along with consideration of their powers/limits. Focuses on developing critical writing abilities. Topics vary and may include critical and interpretive practice from scripture and myth to more contemporary approaches, including newer interdisciplinary practices.

ENGL 303 History of Literary Criticism and Theory I (5) VLPA: Literary criticism and theory from its beginnings in Plato through the early twentieth century. Philosophical and theoretical grounds for critical practice put forward by philosophers and critics.

ENGL 304 History of Literary Criticism and Theory II (5) VLPA: Contemporary criticism and theory and its background in the New Criticism, structuralism, and phenomenology.

ENGL 305 Theories of Imagination (5) I&S/VLPA: Survey of theories of imagination since the seventeenth century. Focuses on the uses of the concept in literature, criticism, science, and society.

ENGL 307 Cultural Studies: Literature and the Age (5) VLPA: Problems of literary periodization. Works by major and minor authors in the context of cultural history; critical and theoretical approaches that have led to the idea of periodization. Emphasis varies. Recommended: one 300-level ENGL course in the literary period being studied.

ENGL 310 The Bible as Literature (5) VLPA: Introduction to the development of the religious ideas and institutions of ancient Israel, with selected readings from the Old

**ENGL 311 Modern Jewish Literature in Translation (5) VLPA**
Survey of Jewish experience and its literary expression since 1880. Includes such Yiddish writers as Sholom Aleichem, Perez, and I. B. Singer; such Israeli writers as Agnon, Hazaz, and Appelfeld; and such writers in non-Jewish languages as Primo Levi and Kafka.

**ENGL 312 Jewish Literature: Biblical to Modern (5) I&S/ VLPA**
A study of Jewish literature from Biblical narrative and rabbinic commentary to modern prose and poetry with intervening texts primarily organized around major themes: martyrdom and suffering, destruction and exile, messianism, Hasidism and Enlightenment, Yiddishism and Zionism. Various critical approaches; geographic and historic contexts. Offered: jointly with SISJE 312.

**ENGL 313 Modern European Literature in Translation (5) VLPA**
Fiction, poetry, and drama from the development of modernism to the present. Works by such writers as Mann, Proust, Kafka, Gide, Hesse, Rilke, Brecht, Sartre, and Camus.

**ENGL 315 Literary Modernism (5) VLPA**
Various modern authors, from Wordsworth to the present, in relation to such major thinkers as Kant, Hegel, Darwin, Marx, Nietzsche, Bergson, and Wittgenstein, who have helped create the context and the content of modern literature. Recommended: ENGL 230 or one 300-level course in 19th or 20th century literature.

**ENGL 316 Postcolonial Literature and Culture (5, max. 10) VLPA**
Readings of major texts and writers in postcolonial literature and culture. Surveys some of the most important questions and debates in postcolonial literature, including issues of identity, globalization, language, and nationalism. The cultural focus may vary, so students should check with the professor for specific details.

**ENGL 317 Literature of the Americas (5) VLPA**
Examines writings by and about people of the Americas, with a focus on intersections of gender, colonialism, race, sexuality, and ethnicity.

**ENGL 320 English Literature: The Middle Ages (5) VLPA**
Literary culture of Middle Ages in England, as seen in selected works from earlier and later periods, ages of Beowulf and of Geoffrey Chaucer. Read in translation, except for a few later works, which are read in Middle English.

**ENGL 321 Chaucer (5) VLPA**
Chaucer’s Canterbury Tales and other poetry, with attention to Chaucer’s social, historical, and intellectual milieu.

**ENGL 322 English Literature: The Age of Queen Elizabeth (5) VLPA**
The golden age of English poetry, with poems by Shakespeare, Spenser, Sidney, and others; drama by Marlowe and other early rivals to Shakespeare; prose by Sir Thomas More and the great Elizabethan translators.

**ENGL 323 Shakespeare to 1603 (5) VLPA**
Shakespeare’s career as dramatist before 1603 (including Hamlet). Study of history plays, comedies, and tragedies.

**ENGL 324 Shakespeare After 1603 (5) VLPA**
Shakespeare’s career as dramatist after 1603. Study of comedies, tragedies, and romances.

**ENGL 325 English Literature: The Late Renaissance (5) VLPA**
A period of skepticism for some, faith for others, but intellectual upheaval generally. Poems by John Donne and the “metaphysical” school; poems and plays by Ben Jonson and other late rivals to Shakespeare; prose by Sir Francis Bacon and other writers.

**ENGL 326 Milton (5) VLPA**
Milton’s early poems and the prose; Paradise Lost, Paradise Regained, and Samson Agonistes, with attention to the religious, intellectual, and literary contexts.

**ENGL 327 English Literature: Restoration and Early Eighteenth Century (5) VLPA**
Selections from wits and satirists; poems by John Dryden and Alexander Pope; plays by Dryden, William Congreve, and other wits; the great satires of Jonathan Swift, and the first stirring of the novel.

**ENGL 328 English Literature: Later Eighteenth Century (5) VLPA**
Classic age of English prose. Essays, biography, and criticism by Samuel Johnson, Oliver Goldsmith, and others; comedies by Goldsmith and Richard Brinsley Sheridan; fiction by Henry Fielding and others; poetry by a variety of writers.

**ENGL 329 Rise of the English Novel (5) VLPA**
Study of the development of this major and popular modern literary form in the eighteenth century. Readings of the best of the novelists who founded the form, and some minor ones, from Defoe to Fielding, Richardson, and Sterne, early Austen, and the gothic and other writers.

**ENGL 330 English Literature: The Romantic Age (5) VLPA**
Literary, intellectual, and historical ferment of the period from the French Revolution to the 1830s. Readings from major authors in different literary forms; discussions of critical and philosophical issues in a time of change.

**ENGL 331 Romantic Poetry I (5) VLPA**
Blake, Wordsworth, Coleridge, and their contemporaries.

**ENGL 332 Romantic Poetry II (5) VLPA**
Byron, Shelley, Keats, and their contemporaries.

**ENGL 333 English Novel: Early and Middle Nineteenth Century (5) VLPA**
Studies in the novel in one of its classic phases. Authors include Austen, the Brontes, Dickens, Thackeray.

**ENGL 334 English Novel: Later Nineteenth Century (5) VLPA**
Studies in the novel as it passes from a classic format to formats more experimental. Authors include George Eliot, Thomas Hardy, Joseph Conrad, and others.

**ENGL 335 English Literature: The Age of Victoria (5) VLPA**
Literature in an era of revolution that also sought continuity, when culture faced redefinition as mass culture and found in the process new demands and creative energies, new material and forms, and transformations of old ones. Readings range from works of Tennyson, Browning, Arnold, Shaw, to Dickens, Eliot, Hardy.

**ENGL 336 English Literature: The Early Modern Period (5) VLPA**
Experiments in fiction and poetry. Novels by Joyce, Woolf, Lawrence, and others; poetry by Eliot and Yeats and others.

**ENGL 337 The Modern Novel (5) VLPA**
The novel on both sides of the Atlantic in the first half of the twentieth century. Includes such writers as Joyce, Woolf, Lawrence, Stein, Hemingway, Faulkner, and others.

**ENGL 338 Modern Poetry (5) VLPA**
Poetry in the modernist mode, including such poets as Yeats, Eliot, Pound, Auden, and Moore.

ENGL 339 English Literature: Contemporary England (5) VLPA
Return to more traditional forms in such writers as Bowen, Orwell, Waugh, Cary, Lessing, Drabble.

ENGL 340 Modern Anglo-Irish Literature (5) VLPA
Principal writers in English of the modern Irish literary movement — Yeats, Joyce, Synge, Gregory, and O’Casey among them — with attention to traditions of Irish culture and history.

ENGL 342 Contemporary Novel (5) VLPA
Recent efforts to change the shape and direction of the novel by such writers as Murdoch, Barth, Hawkes, Fowles, and Atwood.

ENGL 343 Contemporary Poetry (5) VLPA
Recent developments by such poets as Hughes, Heaney, Rich, Kinnell, and Hugo.

ENGL 344 Twentieth-Century Dramatic Literature (5) VLPA
Modern and contemporary plays by such writers as Shaw, Synge, O’Casey, Yeats, Eliot, Beckett, Pinter, and Albee.

ENGL 345 Studies in Film (5) VLPA
Types, techniques, and issues explored by filmmakers. Emphasis on narrative, image, and point of view.

ENGL 346 Studies in Short Fiction (5) VLPA
The American and English short story, with attention to the influence of writers of other cultures. Aspects of the short story that distinguish it, in style and purpose, from longer fiction.

ENGL 347 The Art of Prose (5) VLPA
Techniques and varieties of prose — autobiography, biography, personal essay, reflective and meditative writing, social and scientific inquiry, and persuasive writing. Special attention to use of poetic, fictional, and dramatic devices. Recommended: one introductory literature course.

ENGL 348 Studies in Drama (5) VLPA
Investigation of one of the major types of drama: tragedy or comedy. Emphasis on drama prior to the twentieth century.

ENGL 349 Science Fiction and Fantasy (5) VLPA
The study of the development of and specific debates in the related genres of fantasy and science fiction literature.

ENGL 350 Traditions in American Fiction (5) VLPA
A literary form in which America has found its distinctively American expression. Selected readings among important novelists from the beginnings until 1900, including Cooper, Hawthorne, Melville, Twain, Chopin, James, and Wharton.

ENGL 351 American Literature: The Colonial Period (5) VLPA
The lineage and characteristics of lyric and epic in America.

ENGL 352 American Literature: The Early Nation (5) VLPA

ENGL 353 American Literature: Later Nineteenth Century (5) VLPA
Poetry by Taylor, Whitman, Dickinson, and such others as Poe, Bradstreet, Crane, Robinson. The lineage and characteristics of lyric and epic in America.

ENGL 354 American Literature: The Early Modern Period (5) VLPA

ENGL 355 American Literature: Contemporary America (5) VLPA
Poetry by such writers as Ellison, Williams, O’Connor, Lowell, Bar, Rich, and Hawkes.

ENGL 356 Classic American Poetry (5) VLPA
Study of the work of women writers in English and American literature.

ENGL 357 Women Writers (5, max. 15) VLPA
The relationship of certain theories of gender to relevant works of history and development of the major theoretical trends, including politics of literature and culture. Examines special topics in the study of contemporary approaches to analyzing the gender of American literature, including history, politics, anthropology, and mass media.

ENGL 358 Literature of Black Americans (5) VLPA
Creative writings — novels, short stories, poems — of contemporary African-American authors; traditions out of which they evolved. Differences between African-American and European-American cultures. Offered: jointly with AFRAM 358.

ENGL 359 Contemporary American Indian Literature (5) VLPA
Creative writings — novels, short stories, poems — of contemporary Native American writers. Study of the historical and cultural context within which they evolved. Differences between Native American writers and writers of the European-American tradition. Emphasis varies. Offered: jointly with AFRAM 358.

ENGL 360 American Political Culture: To 1865 (5) I&S/VLPA
History, politics, and social analysis of American literature in its political and cultural context from the Puritan origins to the Civil War. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media.

ENGL 361 American Political Culture: After 1865 (5) I&S/VLPA
American literature in its political and cultural context from the Civil War to the present. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media.

ENGL 362 Literature and the Other Arts and Disciplines (5, max. 10) VLPA
Focus on the relationships between literature and other arts, such as painting, photography, architecture, and music, or between literature and other disciplines, such as science. Content varies.

ENGL 363 Literature and Medicine (5) I&S/VLPA
The study of the relationship between literature and other arts, such as painting, photography, architecture, and music, or between literature and other disciplines, such as science. Content varies.

ENGL 364 Literature and Medicine (5) I&S/VLPA
How changing concepts of doctor-patient relationship and of body depicted in literary texts affect decisions throughout the human life cycle. Medicine and disease as metaphors for personal experience and social analysis.

ENGL 365 Gender Studies in Literature (5, max. 15) VLPA
The study of contemporary approaches to analyzing the gender politics of literature and culture. Examines special topics in the history and development of the major theoretical trends, including the relationship of certain theories of gender to relevant works of literature.

ENGL 366 Literature and the Other Arts and Disciplines (5, max. 10) VLPA
Study of the work of women writers in English and American literature.
ENGL 370 English Language Study (5) VLPA
Wide-range introduction to the study of written and spoken English. The nature of language; ways of describing language; the use of language study as an approach to English literature and the teaching of English.

ENGL 371 English Syntax (5) VLPA
Description of sentence, phrase, and word structures in present-day English. Prerequisite: either ENGL 370 or LING 200.

ENGL 372 Language Variation in Current English (5) VLPA
Examination of geographical, social, and occupational varieties of American English. Relationship between societal attitudes and language use.

ENGL 373 History of the English Language (5) VLPA
Evolution of English sounds, forms, structures, and word meanings from Anglo-Saxon times to the present. Prerequisite: either ENGL 370 or LING 200.

ENGL 374 The Language of Literature (5) VLPA
Roles of explicitly describable language features in the understanding and appreciation of various verbal forms. Emphasis on literature, but attention also may be given to nonliterary prose and oral forms.

ENGL 381 Advanced Expository Writing (5) VLPA
Concentration on the development of prose style for experienced writers.

ENGL 382 Writing for the Web (5) C
Writing substantial Web essays on topics of current concern. Extensive analysis and criticism of on-line essays. Prerequisite: ENGL 282.

ENGL 383 The Craft of Verse (5) VLPA
Intensive study of various aspects of the craft verse. Readings in contemporary verse and writing using emulation and imitation. Prerequisite: ENGL 283; ENGL 284.

ENGL 407 Special Topics in Cultural Studies (5) VLPA
Advanced work in cultural studies.

ENGL 411 Introduction to the Folktale Among Literate Peoples (3) VLPA
Techniques of classification, geographic-historical distribution, theories of origin and interpretations, and related areas of investigation of the oral prose folk narrative of literate peoples.

ENGL 422 Arthurian Legends (5) VLPA
Medieval romance in its cultural and historical setting, with concentration on the evolution of Arthurian romance.

ENGL 430 British Writers: Studies in Major Authors (5, max. 15) VLPA
Concentration on one writer or a special group of British writers.

ENGL 431 Topics in British Literature (5, max. 15) VLPA
Themes and topics of special meaning to British literature.

ENGL 440 Special Studies in Literature (3/5, max. 10) VLPA
Themes and topics offering special approaches to literature.

ENGL 442 The Novel: Special Studies (5, max. 10) VLPA
Readings may be English or American and drawn from different periods, or they may concentrate on different types — gothic, experimental, novel of consciousness, realistic novel. Special attention to the novel as a distinct literary form. Specific topic varies from quarter to quarter.

ENGL 443 Poetry: Special Studies (5, max. 10) VLPA
A poetic tradition or group of poems connected by subject matter or poetic technique. Specific topics vary, but might include poetry as a geography of mind, the development of the love lyric, the comic poem.

ENGL 444 Dramatic Literature: Special Studies (5, max. 10) VLPA
Study of a particular dramatic tradition (such as expressionism or the absurd theatre) or character (the clown) or technique (play-within-a-play, the neoclassical three unities). Topics vary.

ENGL 451 American Writers: Studies in Major Authors (5, max. 15) VLPA
Concentration on one writer or a special group of American writers.

ENGL 452 Topics in American Literature (5, max. 15) VLPA
Exploration of a theme or special topic in American literary expression.

ENGL 453 Introduction to American Folklore (5) VLPA
Study of different kinds of folklore inherited from America’s past and to be found in America today.

ENGL 466 Gay and Lesbian Studies (5) I&S/VLPA
Examination of ways gays and lesbians are represented in literature, film, performance, and popular culture and how these representations are interpreted in mainstream, gay/lesbian, and academic writing.

ENGL 470 Literature, Literary Study, and Society (5) I&S/VLPA
Relationship of literature to society with particular emphasis on literary education. What social values determine the educational importance of literature, what segments of society are trained to read and to write literature, and how literature is institutionalized as part of pedagogical methodology. Emphasis varies.

ENGL 471 The Composition Process (5) VLPA
Consideration of psychological and formal elements basic to writing and related forms of nonverbal expression and the critical principles that apply to evaluation.

ENGL 472 Language Learning (5) VLPA
Consideration of how an individual achieves psychological and aesthetic grasp of reality through language; relates language development to reading skills, literary interpretation, grammar acquisition, oral fluency, discursive and imaginative writing.

ENGL 473 Current Developments in English Studies: Conference (5) VLPA

ENGL 474 Special Topics in English for Teachers (1-10, max. 10) VLPA

ENGL 475 Colloquium in English for Teachers (1-5, max. 10) VLPA

ENGL 476 Puget Sound Writing Program Institute (10) VLPA

ENGL 477 Children's Literature (5) VLPA
An examination of books that form a part of the imaginative experience of children, as well as a part of a larger literary heritage, viewed in the light of their social, psychological, political, and moral implications.

ENGL 478 Language and Social Policy (5) I&S/VLPA
Examines the relationship between language policy and social organization; the impact of language policy on immigration, education, and access to resources and political institutions; language policy and revolutionary change; language rights.
ENGL 479 Language Variation and Language Policy in North America (5) I&S/VLPA
Surveys basic issues of language variation: phonological, syntactic, semantic, and narrative/discourse differences among speech communities of North American English; examines how language policy can affect access to education, the labor force, and political institutions.

ENGL 481 Special Studies in Expository Writing (5) VLPA
Individual projects in various types of nonfictional prose, such as biographical sketches, informational reports, literary reviews, and essays.

ENGL 483 Advanced Verse Workshop (5, max. 15) VLPA
Intensive verse workshop. Emphasis on the production and discussion of student poetry. Prerequisite: ENGL 383; ENGL 384.

ENGL 484 Advanced Prose Workshop (5, max. 10) VLPA
Intensive prose workshop. Emphasis on the production and discussion of student fiction and/or creative nonfiction. Prerequisite: ENGL 383; ENGL 384.

ENGL 485 Novel Writing (5, max. 15) VLPA
Experience in planning, writing, and revising a work of long fiction, whether from the outset, in progress, or in already completed draft. Prerequisite: ENGL 384.

ENGL 486 Playwriting (5, max. 10) VLPA
Experience in planning, writing, and revising a play, whether from the outset, in progress, or in already completed draft.

ENGL 487 Screenwriting (5) VLPA
Students read screenwriting manuals and screenplays, analyze exemplary films, and write synopses, treatments, and first acts of their own screenplays.

ENGL 490 Study Abroad Program (5, max. 15) VLPA
This course, for students in the Study Abroad program, relates major works of literature to the landscape and activities of their settings.

ENGL 491 Internship (1-6, max. 12)
Supervised experience in local businesses and other agencies. Open only to upper-division English majors. Credit/no credit only.

ENGL 492 Advanced Expository Writing Conference (1-5, max. 10)
Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken.

ENGL 493 Advanced Creative Writing Conference (1-5, max. 10)
Tutorial arranged by prior mutual agreement between individual student and instructor. Revision of manuscripts is emphasized, but new work may also be undertaken.

ENGL 494 Honors Seminar (5, max. 10) VLPA
Survey of current issues confronting literary critics today, based on revolving themes and topics. Focuses on debates and developments affecting English language and literatures, including questions about: the relationship of culture and history; the effect of emergent technologies on literary study; the rise of interdisciplinary approaches in the humanities.

ENGL 495 Major Conference for Honors in Creative Writing (5)
Special projects available to honors students in creative writing. Required of, and limited to, honors students in creative writing.

ENGL 496 Major Conference for Honors (5)
Individual study (reading, papers) by arrangement with the instructor. Required of, and limited to, honors seniors in English.

ENGL 497 Honors Senior Seminar (5) VLPA
Seminar study of special topics in language and literary study. Limited to honors students majoring in English.

ENGL 498 Senior Seminar (5) VLPA
Seminar study of special topics in language and literary study. Limited to seniors majoring in English.

ENGL 499 Independent Study (1-5, max. 10)
Individual study by arrangement with instructor.

ENGL 500 Reading Medieval Literature (5)
Special problems involved in the study and interpretation of medieval texts, selected examples drawn from the beginnings of English literature to 1500.

ENGL 501 The Renaissance and Literary Tradition (5)
Examination of selected texts from 1500 to 1660, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the Renaissance.

ENGL 502 English Literary Culture: 1660-1800 (5)
Examination of selected texts of the Restoration and eighteenth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 503 English Literary Culture: 1800-1900 (5)
Examination of selected texts from the nineteenth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 504 Backgrounds of Modern Literature (5)
Examination of selected texts from the twentieth century, concentrating on specific problems of interpretation and scholarship characteristic of the study of works written during the period.

ENGL 505 Theories of American Literature (5)
Examination of selected texts in American Literature, concentrating on the specific problems of interpretation and scholarship characteristic of the study of works in this field.

ENGL 506 Modern and Contemporary Critical Theory (5)
Engages ongoing critical conversations that inform English studies, including: language, textual production, disciplinarity, the university, capital, nation formation, postcolonialism, the environment, race, gender, class, and sexuality. The historical focus is contemporary, with attention to foundational modern theorists.

ENGL 507 History of Literary Criticism and Theory I (5, max. 15)
A general introduction to the major issues in the history of criticism followed by the study of the classical theorists, including Plato, Aristotle, Longinus, and the major medieval critics. Offered: jointly with C LIT 507.

ENGL 508 History of Literary Criticism and Theory II (5, max. 15)
Literary criticism and theory from the Middle Ages and the Renaissance through the eighteenth century to, but not including, Kant. Offered: jointly with C LIT 508.

ENGL 509 History of Literary Criticism and Theory III (5, max. 15)
Literary criticism and theory from Kant's Critique of Judgment to the mid-twentieth century and the work of Northrop Frye. Offered: jointly with C LIT 509.

ENGL 510 History of Literary Criticism and Theory IV (5,
A study of the major issues in literary criticism and theory since about 1965. Offered: jointly with C LIT 510.

ENGL 512 Introductory Reading in Old English (5)
ENGL 513 Old English Language and Literature (5, max. 15)
ENGL 514 Middle English (5, max. 15)
ENGL 515 Chaucer (5, max. 15)
ENGL 516 Topics in Medieval English Literature (5, max. 15)
ENGL 517 Sixteenth-Century Literature (5, max. 15)
ENGL 518 Shakespeare (5, max. 15)
ENGL 520 Seventeenth-Century Literature (5, max. 15)
ENGL 521 Milton (5, max. 15)
ENGL 522 Topics in the English Renaissance, 1485-1660 (5, max. 15)
ENGL 524 Restoration and Eighteenth-Century Literature (5, max. 15)
ENGL 525 Topics in Restoration and Eighteenth-Century Studies (5, max. 15)
ENGL 527 Romanticism (5, max. 15)
ENGL 528 Victorian Literature (5, max. 15)
ENGL 529 Topics in Nineteenth-Century Studies (5, max. 15)
ENGL 531 Early American Literature (5, max. 15)
ENGL 532 Nineteenth-Century American Literature (5, max. 15)
ENGL 533 Modern American Literature (5, max. 15)
ENGL 535 American Culture and Criticism (5, max. 15)
ENGL 537 Topics in American Studies (5, max. 15)
ENGL 540 Modern Literature (5, max. 15)
ENGL 541 Contemporary Literature (5, max. 15)
ENGL 543 Anglo-Irish Literature (5, max. 15)
ENGL 544 World Literature in English (5, max. 15)
ENGL 546 Topics in Twentieth-Century Literature (5, max. 15)
ENGL 550 Studies in Narrative (5, max. 15)
ENGL 551 Studies in Poetry (5, max. 15)
ENGL 552 Studies in Drama (5, max. 15)
ENGL 554 Theories of Structure, Genre, Form, and Function (5, max. 15)
ENGL 555 Feminist Theories (5, max. 15)
ENGL 556 Cultural Studies (5, max. 15)

ENGL 559 Literature and Other Disciplines (5, max. 15)
ENGL 560 The Nature of Language: History and Theory (5)
ENGL 561 Stylistics (5)
ENGL 562 Discourse Analysis (5)
ENGL 563 Comparative Grammars (5)
ENGL 564 Current Rhetorical Theory (5)
Prerequisite: teaching experience.
ENGL 567 Approaches to Teaching Composition (1-5, max. 10)
Readings in composition theory and discussion of practical classroom applications. Prerequisite: previous experience or concurrent assignment in teaching writing.
ENGL 569 Topics in Language and Rhetoric (5, max. 15)
ENGL 570 Practicum in Teaching English as a Second Language (3, max. 6)
Discussion and practice of second-language teaching techniques. Three hours per week teaching required in addition to regular class meetings. Credit/no credit only. Prerequisite: ENGL 571 or permission of instructor.
ENGL 571 Theory and Practice on Teaching English to Speakers of Other Languages (5)
Topics include second language reading, aural/oral skills, critical pedagogy, program administration, and language policy.
ENGL 572 Methods and Materials for Teaching English as a Second Language (5)
Prerequisite: LING 445 or permission of instructor.
ENGL 574 Research Methods in Second-Language Acquisition (5)
Prerequisite: ENGL 572, LING 449, or permission of instructor.
ENGL 575 Pedagogy and Grammar in Teaching English as a Second Language (5)
ENGL 576 Testing and Evaluation in English as a Second Language (5)
Evaluation and testing of English language proficiency, including testing theory, types of tests, and teacher-prepared classroom tests. Prerequisite: ENGL 571 and ENGL 572 or permission of instructor.
ENGL 578 Colloquium in Teaching English to Speakers of Other Languages (5, max. 10)
Overview of major issues in second-language acquisition, teaching methodology, and classroom practice with special emphasis on links between theories of language learning and practical aspects of teaching English to speakers of other languages.
ENGL 581 The Creative Writer as Critical Reader (5)
ENGL 584 Advanced Fiction Workshop (5, max. 15)
Prerequisite: graduate standing.
ENGL 585 Advanced Poetry Workshop (5, max. 15)
Prerequisite: graduate standing.
ENGL 586 Graduate Writing Conference (5)
ENGL 587 Topics in the Teaching of Creative Writing (3/5)
VLPA
ENGL 590 Master of Arts Essay (5/10, max. 10)
The General Studies program offers the following programs of study:

- Bachelor of Arts
- Bachelor of Science

Degree depends on the theme and curriculum of the approved major.

- Ethnomusicology, technical writing, and public health are three faculty-designed major options also available through General Studies. Ethnomusicology (B.A.) focuses on the study of world cultures through their musical expression. Technical writing (B.A. or B.S.) offers the study of writing and other modes of communication in a variety of technical environments. Public health (B.A. or B.S.) involves the study of historical and contemporary issues in public health, including social and behavioral determinants of health, the geography of health and illness, the etiology of chronic and infectious diseases, the relationship between environmental factors and health, and access to health care and modes of delivery of health services.

Bachelor of Arts, Bachelor of Science

Suggested First- and Second-Year College Courses:

- Varies, depending on student’s intended major.

Program Admission Requirements

Before developing a General Studies major, students should obtain a copy of Designing a General Studies Major from the Undergraduate Advising Center, 171 Mary Gates Hall. Particular attention should be paid to the sections defining restrictions on themes and restricted access to courses. General Studies majors are not possible in a number of subjects because the UW does not offer sufficient course work. Upper-division courses in departments with competitive admission are generally not available to students not in that major and ordinarily cannot be included in General Studies proposals.

After reading the guidelines, the student must go through the following steps to design a major:

1. Identify the unifying interdisciplinary theme of your program.
2. Make a list of courses you have taken or plan to take toward this goal. This list should comprise between 50 and 70 quarter credits, all of which are related to your area of concentration. These courses must come from at least two departments, but may come from any number of areas, so long as interrelationships are discernible. Most of the courses must be 300- and 400-level courses. At least half of the 50-70 credits selected for the major must come from courses taught within the College of Arts and Sciences.
3. Draft a statement that describes your proposed major and discusses the interrelationships among the courses you have chosen. Propose a brief, descriptive title for your major.
4. Submit your proposal to the General Studies Committee for initial approval. Prospective majors should submit proposals to the General Studies Committee for review at least three quarters prior to graduation.
5. Identify at least two faculty sponsors for the major. The faculty sponsors attest to the intellectual soundness of your proposal and agree to provide whatever guidance you may jointly decide you need. They may also suggest changes in your previously approved written proposal or list of courses.
6. Obtain final approval from a General Studies adviser. Transfer students must be enrolled at the UW before applying to the major. Admission requirements for the three faculty-designed major options vary. See an adviser for more details.

Major Requirements

- 55 to 70 credits, including completion of the approved curriculum and a 5-credit required senior study (minimum grade of 2.7 required for senior study). Awarding of the Bachelor of Arts or Bachelor of Science degree depends on the content of each student’s program.
Student Outcomes and Opportunities
- **Learning Objectives and Expected Outcomes:** Varies, depending on student’s theme.
- **Instructional and Research Facilities:** None
- **Honors Options Available:** With College Honors. With Distinction. See adviser for details.
- **Research, Internships, and Service Learning:** None
- **Department Scholarships:** None offered
- **Student Organizations/Associations:** None

Course Descriptions

**GEN ST 101 University Learning Skills (1-3)**
Introduction to university culture. Practice in skills necessary for academic success, including note-taking, test-taking, writing, active learning, and time and stress management. Academic planning. Introduction to university resources.

**GEN ST 105 Introduction to Liberal Studies (1-10, max. 10)**
Designed to increase the academic proficiencies of new freshmen entering the University. Includes coursework in the liberal arts and sciences and related work in writing, speaking, and mathematics. Introduces students to computing and campus culture. Credit/no credit only.

**GEN ST 197 Freshman Seminar (1-3, max. 3)**
Small-group discussion with faculty representing a wide spectrum of academic disciplines. Topics and approaches vary. Instructor may introduce research techniques or findings, concentrate on readings in his/her area of interest, or illustrate problems and alternatives related to the study of a particular academic discipline. Credit/no credit only. Offered: AWSp.

**GEN ST 199 The University Community (1-2, max. 2)**
Introduces students to various aspects of the University of Washington community. Includes exploration of university resources and opportunities, and academically related skill development. Credit/no credit only. Offered: A.

**GEN ST 350 Independent Fieldwork (1-6, max. 18)**
Independent fieldwork in community agencies, apprenticeships, internships, as approved for College of Arts and Sciences credit. Faculty sponsor and internship supervisor are required. Credit/no credit only. Offered: AWSpS.

**GEN ST 391 Supervised Study in Selected Fields (*, max. 15)**
Special supervised study in a field represented in the College of Arts and Sciences. Faculty supervisor required. Credit/no credit only. Offered: AWSpS.

**GEN ST 470 Undergraduate Peer Instructor Practicum (1-3, max. 12)**
Provides instruction in group leadership and promotion of values and methods of learning within a university setting. For Peer Instructors in the FIG and TRIG programs. Credit/no credit only. Offered: AWSpS.

**GEN ST 480 Senior Seminar: Humanities (5)**
Seminar examining the relationships and parallels in languages, literature, and culture. Each student required to complete a project or research paper on a topic appropriate to a humanities track.

**GEN ST 481 Senior Seminar: Social Sciences (5)**
Historic and contemporary issues related to tracks considered. Each student required to complete a project or research paper on a topic appropriate to the major track.

**GEN ST 493 Senior Study (5)**
For General Studies majors only. Faculty supervisor required. Offered: AWSpS.

Geography

408A Smith

Geography is a far-reaching discipline providing a distinctive spatial approach to many of today’s societal problems and issues: regional inequality; growth of service activities; residential and educational segregation; health-care delivery; urban growth management; transportation efficiency; environmental and pollution problems; economic impacts of major investments or technological changes; spatial efficiency of industrial production; spatial inequality in the distribution of goods, services, and resources; and the activities of international corporations and political states. Geography is the study of how individuals, groups, and societies interact with their environments. The discipline offers sufficient skills training to enable graduates to be competitive in many job markets.

Geography seeks to understand the complex processes that result in the patterns, trends and impacts of urbanization, migration, trade, and development. Geographers use interviews, written material, observation, and secondary data to construct models, maps, and other tools for understanding.

Undergraduate Program

Adviser
415B Smith, Box 353550
206-543-3246
gelog@u.washington.edu

The Department of Geography offers the following programs of study:
- Bachelor of Arts degree with a major in geography
- A minor in geography

Individual undergraduate programs are built around five program concentrations. Students are encouraged to develop a specific, individualized focus of study within their chosen concentration.

**Urban, Social, and Political Processes and Patterns.** Human population distribution, migration, settlement systems, and organization. Geographic facets of ethnicity, race, sexuality, and gender; wealth and poverty; and health and disease. Cultural landscapes; politics, nationalism, and identity formation; geopolitics. Location of urban services, including health-care systems, urban transportation, housing, neighborhood development and land use, as well as issues raised by questions of law and social control.

**Economic Geography.** Key questions in this concentration include the following: Why do some cities and regions grow while others decline? What local characteristics attract businesses and employment? What determines the flows of goods, services, ideas, people, and capital that bind together the world economy and the regions within it? How are all these relationships being affected by, and in turn influencing, technological change? What can governments and non-governmental organizations do to affect these characteristics and flows? What personal, organizational, and institutional attributes tend to influence spatial behaviors? What are the relevant economic analysis tools to apply to questions of environmental regulation and land use? What effects do global corporations have on the economies of regions and nation-states? To what extent is international development driven by questions of political economy? Courses include: GEOG 207, GEOG 208, GEOG 230, GEOG 302, GEOG 330, GEOG 336, GEOG 349, GEOG 366, GEOG 367, GEOG 370, GEOG 371, GEOG 430, GEOG 433, GEOG 435, GEOG 440, GEOG 443, GEOG 447, GEOG
Students in good academic standing may declare this major at any time. Development and analytical thinking skills. Geographers’ skill sets include the ability to use Geographic Information Systems (GIS) software to produce maps; advanced technical skills in statistical analysis; the ability to use census and other demographic data; sophistication in locating data and interpreting it to help make an argument; sophistication in visual techniques for displaying data, including maps, charts, and graphs; advanced use of such software as spreadsheets, relational data bases, and Web page design; and the ability to present multiple models of land-use patterns for analysis in environmental and economic decision making. Graduates have pursued careers as urban planners, environmental planners and land-use analysts, GIS analysts, economic analysts (marketing, location, geodemographics), public health researchers, NGO specialists in developing nations, airline route analysts, import-export/international-trade specialists, real estate valuation specialists, economic development specialists, social studies teachers, and college professors.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

59-61 credits as follows:

Foundation Courses (36 credits, to be taken in the first year of the major): (1) Societies, Cities, and Economies — 10 credits from GEOG 200, GEOG 207, GEOG 208, GEOG 230, GEOG 277, or GEOG 280. (2) Environment and Society — 10 credits, to include GEOG 205, plus one of the following: GEOG 270, GEOG 370, GEOG 371, GEOG 372, or GEOG 380. (3) Geographic Methods — 15 credits to include GEOG 326 and GEOG 360, both of which must be taken within two quarters of entrance to the major, and one of the following: GEOG 367, GEOG 425, GEOG 426, GEOG 445, GEOG 460, GEOG 461, or GEOG 471. (4) Tutorial for Majors — GEOG 397 (1 credit) to be taken within two quarters of entrance to the major

Concentration (15 credits): Three upper-division GEOG courses, including two 400-level courses. Concentrations are the areas of primary expertise that majors develop in the course of their studies. Students’ concentrations are a collection of courses that together provide specialization in a subfield of geography, combining systematic and analytical knowledge and skills (see advising for a list of these concentrations).

Electives (5 credits): 5 credits of GEOG courses at the 200-level or above. Upper-division electives are preferred.

Regional Geography and International Development Studies. Continental and global patterns of international relations and development. Political economy of development; development theory and practice; globalization. Analysis of geographic concepts in the regional context, especially on such topics as population growth and migration; development history, theory, and practice; hunger, resources, and poverty; and interconnections in the global economy. Special emphasis on East Asia, Russia and the former Soviet republics, Africa, Latin America, Canada, and the United States. Courses include: GEOG 230, GEOG 271, GEOG 302, GEOG 308, GEOG 330, GEOG 335, GEOG 336, GEOG 349, GEOG 371, GEOG 375, GEOG 404, GEOG 430, GEOG 431.

Geographic Information Systems (GIS). Role, design, and use of geographic information systems for research, planning, management, and decision making. Use of computers in the collection, manipulation, analysis, and presentation of geographical data. Courses include: GEOG 360, GEOG 370, GEOG 443, GEOG 458, GEOG 460, GEOG 461, GEOG 463, GEOG 465, GEOG 467.

Society and Environment. Examines the key debates on the causes and outcomes of environmental change and degradation and the paths to sustainable development; the use of data in the formulation of human-environment interaction models; perceptions of nature; nature-culture relationships; and historical and contemporary societal responses to environmental degradation, health problems, and resource consumption. Courses include: GEOG 270, GEOG 360, GEOG 370, GEOG 371, GEOG 372, GEOG 431, GEOG 432, GEOG 460, GEOG 461, GEOG 463, GEOG 471, GEOG 472, GEOG 480, GEOG 490.

Bachelor of Arts

Suggested First- and Second-Year College Courses: GEOG 100, GEOG 205, GEOG 207, GEOG 230, GEOG 277. Courses that develop strong writing, analytical, and qualitative- and quantitative-reasoning skills. Geography is inherently interdisciplinary, so exposure to many social science fields of study in the first two years is ideal.

Learning Objectives and Expected Outcomes:
The study of geography emphasizes both technical and critical thinking skills. Geographers develop analytical thinking skills, which are particularly relevant to the study of geographic phenomena. Geographers employ a variety of methods to collect, analyze, and interpret data related to human-environment interactions. They develop strong writing, analytical, and qualitative- and quantitative-reasoning skills.

Geographers are trained to think critically and analytically about complex social, economic, and environmental issues. They are skilled in quantitative and qualitative research methods, and are able to use Geographic Information Systems (GIS) software to produce maps; advanced technical skills in statistical analysis; the ability to use census and other demographic data; sophistication in locating data and interpreting it to help make an argument; sophistication in visual techniques for displaying data, including maps, charts, and graphs; advanced use of such software as spreadsheets, relational data bases, and Web page design; and the ability to present multiple models of land-use patterns for analysis in environmental and economic decision making. Graduates have pursued careers as urban planners, environmental planners and land-use analysts, GIS analysts, economic analysts (marketing, location, geodemographics), public health researchers, NGO specialists in developing nations, airline route analysts, import-export/international-trade specialists, real estate valuation specialists, economic development specialists, social studies teachers, and college professors.

Instructional and Research Facilities: A map center in Suzzallo Library houses atlases, sheet maps, and aerial photographs. Departmental facilities include the Edward L. Ullman Geography Collaboratory and the John C. Sherman Laboratory, which houses a variety of computer workstations connected to the campus computer network. The Ullman Collaboratory in 415 Smith provides a unique collaborative classroom with networked computer work stations. The Geography Commons also provides computer work stations for students. The Department of Geography is a member of the Center for Social Science Computation and Research, which maintains an extensive data archive and offers many statistical and software consulting services.

Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

Research, Internships, and Service Learning: More than 125 geography students participate each year in internships. For lists of these opportunities, see the department’s career site on the world wide web.

Department Scholarships: None offered.

Student Organizations/Associations: The Undergraduate Geography Student Association, the Student Geographical Association, the Seattle Club, and the University of Washington Geography Club.

Capstone Experience (3-5 credits): One of the following: Senior essay, senior seminars, honors seminars, workshop courses, or other approved arrangements.

Additional Degree Requirements:
(1) Transfer students must complete a minimum of 25 upper-division credits in Geography in residence at the University of Washington.
(2) Students must attain a minimum grade of 2.0 for all GEOG courses to be applied toward the degree. Students must attain a minimum GPA in Geography courses of 2.50.
(3) Students are encouraged to take appropriate elective courses outside the Geography department in fields which support their selected option. Courses are available on lists supplied by the Geography advisers or may be recommended by the faculty adviser.

Minor

Minor Requirements: 30 credits in geography, including 15 upper-division geography credits with at least 5 credits at the 400 level. No more than 5 credits applied to the minor may be from 100-level classes. Independent learning and internship credits (GEOG 494, GEOG 496, GEOG 497, GEOG 499) may not be counted as part of the 30 credits. A minimum grade of 2.0 for each course counted toward the minor. At least 15 credits of upper-division geography courses must be taken at the UW.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The study of geography emphasizes both technical and critical thinking skills. Geographers develop analytical thinking skills, which are particularly relevant to the study of geographic phenomena. Geographers employ a variety of methods to collect, analyze, and interpret data related to human-environment interactions. They develop strong writing, analytical, and qualitative- and quantitative-reasoning skills. Geography is inherently interdisciplinary, so exposure to many social science fields of study in the first two years is ideal.

- **Department Admission Requirements:**

- **Major Requirements:**

59-61 credits as follows:

**Foundation Courses (36 credits, to be taken in the first year of the major):**

1. **Societies, Cities, and Economies — 10 credits from GEOG 200, GEOG 207, GEOG 208, GEOG 230, GEOG 277, or GEOG 280.**
2. **Environment and Society — 10 credits, to include GEOG 205, plus one of the following: GEOG 270, GEOG 370, GEOG 371, GEOG 372, or GEOG 380.**
3. **Geographic Methods — 15 credits to include GEOG 326 and GEOG 360, both of which must be taken within two quarters of entrance to the major, and one of the following: GEOG 367, GEOG 425, GEOG 426, GEOG 445, GEOG 460, GEOG 461, or GEOG 471.**
4. **Tutorial for Majors — GEOG 397 (1 credit) to be taken within two quarters of entrance to the major**

**Concentration (15 credits):** Three upper-division GEOG courses, including two 400-level courses. Concentrations are the areas of primary expertise that majors develop in the course of their studies. Students’ concentrations are a collection of courses that together provide specialization in a subfield of geography, combining systematic and analytical knowledge and skills (see advising for a list of these concentrations).

**Electives (5 credits):** 5 credits of GEOG courses at the 200-level or above. Upper-division electives are preferred.
The Department of Geography has flexible programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The aspirant to the master’s degree is expected to complete all work for the degree in four to six quarters. The aspirant to the doctoral degree is expected to undertake two years of post-master’s study and must take a departmental diagnostic examination upon entry, pass the General Examination, attain an appropriate level of competence in a foreign language or cognate field, and successfully complete a dissertation. Normally, doctoral program students complete all degree requirements in three to four years.

**Admission Requirements**

Admission to the graduate program normally requires a minimum GPA of 3.00 (on a 4.00 scale), or “B.” Students holding a master’s degree must meet this minimum scholastic requirement, but also should have achieved a GPA higher than 3.00 for graduate studies completed. All applicants must take the Graduate Record Examination. Specific information regarding application procedures may be obtained by writing to the graduate program adviser.

**Financial Aid**

The department usually awards approximately 15 to 20 teaching assistantships for the academic year. Most of the assistantships are for teaching quiz sections for a larger lecture class. A few of the more advanced doctoral candidates may teach a class. Normally, several research assistantships are also available. In recent years, approximately 85 percent of the department’s graduate students have been funded by internal or external sources.

**Faculty**

**William B. Beyers**
Ph.D., Washington, 1967, Professor
Regional science; economic geography; geography of producer services; regional analysis; geography of the Pacific Northwest

**Michael P. Brown**
Ph.D., British Columbia, 1994, Associate Professor
Local, political, and cultural geography; sexuality; health geography; history of geography thought; the home

**Kam Wing Chan**
Ph.D., Toronto, 1988, Professor
Urban and economic development; migration; China

**Mark Ellis**
(On Leave 2005-06)
Ph.D., Indiana, 1988, Professor
Immigration, race and ethnicity, labor markets

**Kim England**
Ph.D., Indiana, 1988, Professor
Urban social geographies, feminist geographies, labor markets

**James W. Harrington**
(On Leave 2005-06)
Ph.D., Washington, 1983, Professor and Chair
Service industries; industrial location; regional economic development; international trade

**Steve Herbert**
Ph.D., Associate Professor
Urban and political geography; geography and the law; social control in the city.

**David C. Hodge**
Ph.D., Pennsylvania State, 1975, Professor; Adjunct Professor, Department of Civil Engineering; Dean, College of Arts and Sciences
Urban geography; urban transportation; information and communications technology; spatial equity; gender; research methods

**Julie Hwang** (new)
Ph.D. State University of New York at Buffalo, Lecturer
GIScience, GIS for Transportation (GIS-T), the link between land use (housing market) and transportation, fuzzy geodemographics, applying artificial intelligence techniques to urban studies and transportation research.

**Lucy A. Jarosz**
Ph.D., UC-Berkeley, 1990, Associate Professor
Geography of food and agriculture; environmental and landscape change; development theory; Africa

**Craig Jeffrey** (new)
Ph.D., University of Cambridge, 1999, Assistant Professor
Interests: the social geography of class, caste and gender in rural north India, social inequality, changing schooling regimes, the relationship between people and the state, and the political economy of development.

**Victoria A. Lawson**
Ph.D., Ohio State, 1986, Professor
Development theory; migration; Latin America; social theory; economic and employment restructuring

**Jonathan D. Mayer**
Ph.D., Michigan, 1977, Professor; Geography, Epidemiology and International Health; Adjunct Professor, Dept. of Medicine, Division of Infectious Diseases; Dept. of Family Medicine, and Health Services; Clinical Faculty, Travel/Tropical Medicine, UW Medical Center; Co-Director, Undergraduate Program in Public Health
Medical geography; infectious disease ecology and epidemiology; HIV in sub-Saharan Africa; HIV, poverty, and development.

**Douglas Mercer**
Ph.D., Washington, 1999, Full-time Lecturer
Environment and Society, environmental health and risk management.

**Katharyne Mitchell**
Ph.D., UC-Berkeley, 1993, Professor
Cultural and economic geography; the urban environment; migration and capital flows between the Pacific Rim and the Pacific
Northwest; social theory

Timothy L. Nyerges Ph.D., Ohio State, 1980, Professor
Geographic information systems; spatial decision support systems and group decision making; transportation and environmental analysis using GIS; human-computer interaction and spatial cognition

Matthew Sparke Ph.D., British Columbia, 1996, Associate Professor; Faculty Member, Jackson School of International Studies
Critical geopolitics; political and economic geography; social theory including post-colonial theory and feminist and anti-racist theory, U.S. and Canada

Suzanne Davies Withers Ph.D., UCLA, 1992, Associate Professor
Quantitative and longitudinal methods; poverty; urban housing; population; spatial demography

Craig ZumBrunnen Ph.D., UC-Berkeley, 1973, Professor; Faculty Member, Russian, East European and Central Asia Studies Program and Middle East Studies Program, Jackson School of International Studies, Co-Director, Program on environment
Natural resource management and conservation; environmental quality problems; methods of resource analysis; physical geography; former Soviet Union; modeling of human impact in natural systems

Kuei-sheng Chang Ph.D., Michigan, 1955, Associate Professor Emeritus
Economic geography of China; geographical exploration; Third World development

Douglas K. Fleming Ph.D., Washington, 1965, Professor

W.A. Jackson Ph.D. Maryland, 1953 Professor Emeritus (also School of International Studies)
Political systems, nature and culture, Canada, Russia

George Kakiuchi Ph.D. Michigan, 1957, Associate Professor Emeritus (also School of International Studies)—Japan, agriculture, internal migration, regional geography

Richard Morrill Ph.D., Washington, 1959, Spatial organization, migration, diffusion and population, regional planning and development, inequality

Günter Krumme Ph.D., Washington, 1966, Professor
Economic geography; information economy; regional economics; location theory; organization and decision theory; Central European regional development policies

Joseph Velikonja Ph.D., Rome (Italy), 1948, Professor
Social and political geography; history of geography; immigrant in America; Eastern Europe

Adjunct & Affiliate Faculty

Kathleen E. Braden Ph.D., Washington, 1980, Affiliate Professor (also Department of Geography, Seattle Pacific University)
Russian studies; resources and technology

Richard S. Conway Ph.D., Pennsylvania, 1976, Affiliate Associate Professor
Regional economic modeling

L. Gary Hart Ph.D., Washington, 1985, Adjunct Associate Research Professor (also School of Public Health)
Medical geography

Michael Hayes Ph.D., McMaster, 1989, Affiliate Associate Professor
Medical geography

Yehuda Hayuth Ph.D., Washington, 1978, Affiliate Professor
Transportation geography

Paul A. Waddell Ph.D. University of Texas at Dallas, 1989, Associate Professor
Urban policy and planning, land use and transportation, urban simulation models.

Course Descriptions

GEOG 100 Introduction to Geography (5) I&S
Introduction to the study of human geography and the major themes of the discipline. Topics include: human-environment interactions, migration and human mobility, patterns of health and nutrition, industrialization and urbanization, and the geography of culture and politics. Offered: AWSpS.

GEOG 102 World Regions (5) I&S
Spatial study of world regions, based on historical, cultural, political, economic, and other factors. An attempt to understand the underlying forces that have led to the formation of regions and regional patterns.

GEOG 123 Introduction to Globalization (5) I&S Sparke
Provides an introduction to the debates over globalization. Focuses on the growth and intensification of global ties. Addresses the resulting inequalities and tensions, as well as the new opportunities for cultural and political exchange. Topics include the impacts on government, finance, labor, culture, the environment, health, and activism. Offered: jointly with SIS 123.

GEOG 195 Special Topics in Geography (1-5, max. 10) I&S

GEOG 200 Introduction to Human Geography (5) I&S Withers
Patterns and systems of human occupancy of the world. Emphasis on cultural processes, dynamic change, functional relations, networks, and diffusion models.

GEOG 205 Introduction to Physical Sciences and the Environment (5) NW ZumBrunnen
Major atmospheric, hydrologic, and geomorphic processes used to interpret the character, distribution, and human significance of different natural and human-altered environments. Includes laboratory exercises for science and non-science majors, geography majors and nonmajors.

GEOG 207 Economic Geography (5) I&S Beyers, Harrington
The changing locations and spatial patterns of economic activity, including: production in agriculture, manufacturing, and services; spatial economic principles of trade, transportation, communications, and corporate organization; regional economic development, and the diffusion of technological innovation. Offered: AWS.

GEOG 208 Geography of the World Economy: Regional Fortunes and the Rise of Global Markets (5) I&S
Examines the relationship between the globalization of economic activity and regional development. Topics include international trade, colonialism, industrial capitalism, advanced capitalism, and the globalization of labor markets.

GEOG 227 Geographic Perspectives on Minorities in the United States (5) I&S
GEOG 230 Urbanization and Development: Geographies of Global Inequality (5) I&S Lawson
Examines global local interactions of economic, political, and social forces shaping urbanization and development processes across the globe. Provides an introduction to critical development studies, focusing on Latin America, Africa, and Asia. Also examines debates over the causes and geographic patterns of social inequality worldwide.

GEOG 236 Geography of Greater China (5) I&S Chan %~% Studies the geography of development processes, patterns, and problems in “Greater China”: mainland China, Taiwan, and Hong Kong. Covers physical geography, history, and economic and political systems, with major focus on geographical issues in China’s development: agriculture, population, industry and trade, and relations with Hong Kong and Taiwan. Offered: jointly with SISEA 236.

GEOG 245 Geographic perspectives on U.S. Population Diversity (5) I&S Withers
Introduction to population geography. Offers a practical understanding of population processes (fertility, mortality, and migration); knowledge of geographic variation in population structures and characteristics; knowledge of data sources for demographic research; experience using formal demographic methods for geographic research; and an appreciation for the demographic underpinnings of contemporary social issues. Offered: W

GEOG 258 Maps and GIS (5) I&S
Explores how people represent the world with maps and geographic information systems (GIS). Trains students in map use for basic navigation, urban management, and environmental analysis. Considers role of spatial databases in commerce, decision-making, and analysis. Helps map readers better determine quality, usefulness, and representation of information. Offered: W

GEOG 270 Geographies and International Development and Environmental Change (5) I&S
Considers the meaning of development and how debates over international development link to environmental concerns. Examines how the globalization of agricultural production and debates over genetically modified food alter ideas about development, nature, and the environment. Addresses fair trade policies and practices and the obligations of multinational corporations. Offered: A.

GEOG 271 Geography of Food and Eating (5) I&S Jarosz
Examines food production, distribution, and consumption issues across geographic scales. Focus ranges from the microcosm of the individual body to food and eating at the national and global scales. Explores the political, social, cultural, and economic dimensions of food and eating in particular spaces, places, environments, contexts, and regions. Offered: Sp.

GEOG 276 Introduction to Political Geography (5) I&S Brown
Examines both the geography of politics and the politics of geography at a variety of spatial scales and in different global locations. Typical topics include: geographies of the state and state power; geopolitics and globalization; national and local politics, and other politics of culture, health, nature, and the body. Offered: Sp.

GEOG 277 Geography of Cities (5) I&S England, Withers
Study of (1) systems of cities—their location, distribution, functions, and competition; and (2) their internal structure—the location of activities within urban areas. Particular emphasis on current urban problems—sprawl, housing, segregation, economic growth, and metropolitan transportation.

GEOG 280 Introduction to the Geography of Health and Health Care (5) I&S Mayer
Concepts of health from a geographical viewpoint, including human-environment relations, development, geographical patterns of disease, and health systems in developed and developing countries. Offered: Sp.

GEOG 295 Special Topics in Geography (1-5, max. 10) I&S
GEOG 300 Concepts of Regions (5) I&S
Historical development and application of the concept of region. Examines systematically how varied societies constitute parts of a total world order.

GEOG 301 Cultural Geography (5) I&S
Analysis of the role of culture in the formation of landscape patterns; components of culture that contribute not only to a “sense of place,” but also to the mosaic of settlement patterns and occupancy that can be traced to culture.

GEOG 302 The Pacific Northwest (3) I&S Beyers
Settlement pattern in the Pacific Northwest, emphasizing economic and historical factors, including the location of resource-oriented industries, policies regarding the use of public lands, and bases of the development of major urban areas in the region. Offered: W.

GEOG 304 Western Europe (5) I&S
Physical and socioeconomic characteristics of western Europe. Contemporary political and economic integration trends in their regional context.

GEOG 308 Canada: A Geographic Interpretation (5) I&S Sparke
Examines the overlapping economic, cultural, and political geographies shaping life in contemporary Canada. Topics include: free trade, constitutional crisis, feminism in Canada, aboriginal politics, and border region phenomena. Attention paid to how specific geographic interpretations of Canada by Canadians actually play a part in national life. Offered: jointly with SISCA 308; Sp.

GEOG 310 Immigrant America: Trends and Policies from a Geographic Perspective (5) I&S Ellis
Examines U.S. immigration trends and policies from a geographic perspective. Topics include where immigrants come from, where they settle in the United States. immigrant employment enclaves, the effects of U.S. immigration policy on immigrant settlement and employment patterns, illegal immigration, citizenship, and barriers to immigrant success in the United States.

GEOG 313 East Asia (5) I&S Chan
Introduction to the contemporary geography of East Asia, including China, Hong Kong, Taiwan, Japan, and Korea. Topics include: physical geography, historical settings, general development patterns, agriculture, population, industry, and trade. Focuses on major geographic issues in development. Case studies from different countries used to illustrate various themes.

GEOG 315 Explanation and Understanding in Geography (5)
I&S Brown
Covers the beginning steps in the research process. Introduces the discipline of geography, the department, and current faculty through the research aims of explanation and understanding that frame social scientific inquiry. Students develop basic library and writing skills as preparation for future research methods classes and independent research.

GEOG 316 Urban Economics (5) I&S
Application of economic analysis to urban trends, problems, and prescriptions, such as changing urban form and function, urban public finance, housing and renewal, poverty and race, transportation, and environmental problems. Prerequisite: ECON 200. Offered: jointly with ECON 316.

GEOG 326 Introduction to Geographic Research (5) I&S, QSR Chan
Introduction to the tools of geographic research. Topics include defining problems, designing research, and methods for gathering and operationalizing statistics. Provides experience defining a geographic research problem, collecting and analyzing data, and drawing conclusions from that endeavor. Offered: W.

GEOG 330 Latin America: Landscapes of Change (5) I&S Lawson
Examines operation of economic, social, and political processes across countries of Latin America-on international, national, and local scales-to understand common issues facing the region and different impacts in particular countries. Topics include internationalization of Latin American economies; agrarian and urban change; popular movements. Offered: W.

GEOG 333 Russia’s Changing Landscape (5) I&S ZumBrunnen
The Russian landscape as it has been affected by Soviet planning, migration and settlement, urbanization, industrialization, the results of collectivization in agriculture, and the growth of a transport network.

GEOG 335 Geography of the Developing World (5) I&S Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Recommended: GEOG 100 or GEOG 230. Offered: jointly with SIS 335.

GEOG 336 Development and Challenge in China (5) I&S Chan
Examines the geography of China’s development since 1949. Introduces China’s physical geography, history, and economic and political system. Emphasizes China’s uneven development in agriculture, population, industry, and trade. Also examines problems China faces in meeting its internal food demand, as well as the external processes of globalization. Offered: W.

GEOG 342 Geography of Inequality (5) I&S England Geographies of social, political, and economic inequality. Focus is usually on North American cities. Examines the theoretical underpinning of inequality. Explores topics such as the spatial distribution of wealth and poverty, the geographies of exclusion, and discrimination in paid employment and housing.

GEOG 344 Migration in the Global Economy (5) I&S Mitchell
Analyzes the relationship between human mobility in the late 20th century and changes in the global economy. Allows the students to gain familiarity with scholarly research on international migration from a diversity of approaches and methods. Offered: jointly with SIS 344; W.

GEOG 349 Geography of International Trade (5) I&S Harrington
Introduces the theories and practice of international trade and foreign direct investment. Topics include: trade theory and policy; economic integration; currency markets and foreign exchange; trade operations and logistics; the international regulatory environment; and marketing, location and entry, and finance, accounting, and taxation. Offered: W.

GEOG 366 Introduction to Regional Economic Development (3/5) I&S Harrington
The process of regional economic development. Theories and conceptualizations of economic growth and structural change, technological change and industrial development, spatial variation in economic activities and government policies. Recommended: GEOG 207; ECON 201.

GEOG 367 Economic Uses of Geographic Information (5) I&S Harrington
Uses of area data and the geographic information systems (GISs) that handle them in routing, marketing, service-are assessment, and site location. Considers key economic-geography concepts, marketing approaches, questions of data availability and suitability, and GIS. Prerequisite: GEOG 360.

GEOG 370 Problems in Resource Management (5) I&S ZumBrunnen
Principles and practices of effective conservation and utilization of natural resources. Role of technology in resource use. Physical, political, and economic aspects of resource management for food, population, land, water, air, energy, and timber resources. Recommended: GEOG 100. Offered: Sp.

GEOG 371 World Hunger and Resource Development (5) I&S Jarosz
Addresses issues of hunger and poverty in their relationship to resource development at the local, national, and global levels. Examines various approaches to the problem of world hunger rooted in critical development studies. Recommended: GEOG 230, GEOG 330, or GEOG 335.

GEOG 372 Asian Sustainable Development (5) I&S Jarosz
Examines the contemporary relationship between environmental protection and development paths in Asia. Inquires into the forces driving both environmental change and societal responses (state and local regulations, social movements, etc.) to that change, at many geographical scales. Asian concepts of nature-society relations also explored. Offered: jointly with SISA 372; W.

GEOG 375 Geopolitics (5) I&S Sparke
An introduction to both political geography and geopolitics, addressing the fundamental links between power and space. Topics covered include: theories of power, space, and modernity; the formation of modern states; international geopolitics in the aftermath of the Cold War; the post-colonial nation-state; and the geopolitics of resistance. Offered: jointly with SIS 375.

GEOG 377 Urban Political Geography (5) I&S Harrington
Examines how the spatial structure of cities and towns affects and is
affected by political processes. Considers both traditional and newer forms of politics, as global and local issues. Special attention paid to where politics take place within local contexts across state, civil society, home, and the body. Offered: Sp.

GEOG 378 Policing the City (5) I&S Herbert
Investigates how and why formal and informal order is established in urban areas, how this order produces advantages and disadvantages, and possibilities of alternative visions of order. Topics include formal means of control (zoning, laws, policing, building codes) and informal means of control (gossip, ostracism, peer pressure, local politics). Offered: jointly with LSJ 378; A.

GEOG 380 Geographical Patterns of Health and Disease (4) I&S Mayer
Geography of infectious and chronic diseases at local, national, and international scales; environmental, cultural, and social explanations of those variations; comparative aspects of health systems. Offered: W.

GEOG 395 Special Topics in Geography (1-5, max. 10) I&S

GEOG 397 Tutorial for Majors (1)
Overview of the discipline of geography including faculty research interests, teaching philosophies, and course offerings as well as essential study and research skills and career developments strategies. Students meet concurrently with faculty adviser to identify academic interests and devise plan of studies. Credit/no credit only. Offered: Asp.

GEOG 401 Culture, Capital, and the City (5) I&S
Examines current themes in social theory as they apply to the urban landscape. Includes the interconnections of cultural and economic processes and the spatial patternings of race, class, and gender in the modern urban context. Offered: A.

GEOG 425 Qualitative Methodology in Geography (5) I&S Jarosz
Historical and philosophical overview of qualitative methodology in design of geography research strategies. Techniques of interviewing, participant observation, and archival research. Forms of analyses such as textual interpretation, discourse analysis and computer-aided analyses of interview transcriptions and ethnography. Questions of ethics, field notes and write-up. Offered: W.

GEOG 426 Quantitative Methods in Geography (5) I&S, QSR Withers
Quantitative methods for empirical research in geography. Emphasis on statistical analysis; use of geographic data bases like the United States Census; understanding special issues and problems associated with geographically ordered data; verbal and graphic presentation in a computer environment. Recommended: GEOG 326. Offered: Sp.

GEOG 430 Contemporary Development Issues in Latin America (5) I&S Lawson
Contemporary development issues in Latin America, seen from a spatial perspective. Concept of development; competing theories as related to various Latin American states. Economic structural transformation, migration, urbanization, regional inequality, and related policies. Offered: A.

GEOG 431 Geography and Gender (5) I&S Jarosz
Examines theories and case studies across international, national, and regional scales in order to illustrate the impacts of social and economic processes upon the construction of gender in particular places. Offered: Sp.

GEOG 432 Population and Urbanization Problems of Russia and the Newly Independent States (5) I&S ZumBrunnen
Historical background and evolution of Soviet/Russian population and urbanization processes and problems. Distinguishing demo-
GEOG 449 Geography of Ocean Transportation (5) I&S
Geographic analysis of ocean trade routes, cargo and passenger flows, and port activities. Evaluation of the role of the transportation carrier in international trade.

GEOG 451 Cultural Geography of Latin America (5) I&S
Interdisciplinary senior seminar examining how physical and social geographies are culturally constructed and interconnected with subjectivities and power in Latin America. Topics include identity formation grounded in particular territories and the social constitution of space via an interplay of material and cultural forces. Offered: jointly with SISLA 451.

GEOG 458 Map Sources and Errors (5) I&S
Analysis and appraisal of source materials for maps, production constraints of mapping agencies, coverage and quality. Focus on errors inherent in maps and geographic information; metadata resources; judgment of fitness for specific applications. Prerequisite: 2.0 in GEOG 360. Offered: odd years; W.

GEOG 460 Geographic Information Systems Analysis (5) I&S
Methods of Analysis provided by geographic information systems (GIS). Operations on map information including map overlay, aggregation/disaggregation, and other spatial and attribute procedures. Exposure to raster and vector software. Review of capabilities of current available GIS software. Prerequisite: 2.0 in GEOG 360. Offered: A.

GEOG 461 Urban Geographic Information Systems (5) I&S
Nyerges
Use of geographic information systems to investigate urban/regional issues; focus on transportation, land-use and environmental issues; all urban change problems considered. GIS data processing strategies. Problem definition for GIS processing. Data collection, geocoding issues. Data structuring strategies. Prerequisite: 2.0 in GEOG 360; recommended: GEOG 277. Offered: W.

GEOG 463 Geographic Information Systems Workshop (5) I&S Nyerges
Practical experience applying geographic information system (GIS) tools to analyze spatial data. Workshop format requires student-motivated projects; diverse backgrounds encouraged. Prerequisite: either 2.0 in GEOG 460 or 2.0 in GEOG 461. Offered: Sp.

GEOG 465 Analytical Cartography (5) I&S
Algorithms and data structures for selected topics in computer-assisted cartography. Emphasis on point, line, area, and surface data representation, map design, generalization, and data transformations. Prerequisite: either 2.0 in GEOG 460 or 2.0 in GEOG 461. Offered: odd years; W.

GEOG 466 Regional Economic Development (5) I&S Harrington
Provides a theoretical overview of sub-national, regional economic growth and structural change, including the roles of interregional interaction and international trade, technological change, social, and legal institutions. Emphasizes inter-regional disparities in the context of relatively wealthy countries. Explores the constraints and effectiveness of government (and other organizations') policy. Offered: W.

GEOG 471 Methods of Resource Analysis (5) I&S ZumBrunnen
Economic and noneconomic criteria for resource analysis. Theory and methods of linear models of natural resource analysis. Includes materials-balance modeling, residual management, constrained system optimization approaches to water quality analysis, land-use patterns and interregional energy use, and multiple objective planning techniques applied to natural resource problems. Recommended: GEOG 370.

GEOG 472 Ecoscapes: Nature, Culture, and Place (5) I&S
Relationship between nature, culture, and place as the heart of geographic inquiry. Examines how perceptions of nature are influenced by changing political-economic, cultural, and scientific practices. Uses cultural studies of ecological science as a primary method of analysis. Offered: Sp.

GEOG 474 Geography and the Law (5) I&S Herbert
Examines the relationship between geography, law, and socio-legal analysis; reviews significant instances where law and geography intersect, such as the regulation of public space, the regulation of borders and mobility, and disputes over property and land use. Offered: jointly with LSJ 474.

GEOG 476 Women and the City (5) I&S England
Explores the reciprocal relations between gender relations, the layout of cities, and the activities of urban residents. Topics include: feminist theory and geography (women, gender, and the organization of space); women and urban poverty, housing and homelessness; gender roles and labor patterns; geographies of childcare; and women and urban politics. Offered: jointly with WOMEN 476.

GEOG 477 Advanced Urban Geography (5) Brown

GEOG 478 Intraurban Spatial Patterns (5) I&S Mitchell
Geographic patterns and processes within metropolitan areas. Economic land-use patterns (commercial and industrial location), social land-use patterns (segregation, housing, and neighborhood change), urban political geography, analysis of urban infrastructure, and assessment of contemporary and future trends in urban development. Recommended: GEOG 277. Offered: Sp.

GEOG 479 Race, Ethnicity, and the American City (5) I&S Ellis
Explores America's cities as sites where ethnic and racial interaction have generated specific patterns of opportunity and disadvantage in housing and labor markets; how ethnic identities and racial formations are changed by living and working in cities, and questions of assimilation, multiculturalism, and America's ethnically-racial future.

GEOG 480 Environmental Geography, Climate, and Health (5) I&S Mayer
Demonstrates and investigates how human-environment relations are expressed in the context of health and disease. Local and global examples emphasize the ways medical geography is situated at the intersection of the social, physical, and biological sciences. Examines interactions between individual health, public health, and social, biological, and physical phenomena. Offered: W.

GEOG 486 Problem Analysis in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Investigates pressing local and regional issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with ENVIR 474/CFR 474; A.

Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: either GEOG 486, CFR 474, or ENVIR 486. Offered: jointly with CFR 475/ENVIR 487; W.
GEOG 488 Research in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzloff, Ryan, ZumBrunnen
Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present results section. Prerequisite: either GEOG 487, CFR 475, or ENVIR 487. Offered jointly with CFR 476/ENVIR 488; Sp.

GEOG 490 Field Research: The Seattle Region (6) I&S Morrill
Field methods for contemporary urban research. Survey designs used in the analysis of transportation, land use, location of employment, shopping and housing, political fragmentation, and environmental degradation. Field report required, based on field work in the Seattle region.

GEOG 492 Library Research in Geography (3) I&S
Introduction to library research methods in geography. Review and assessment of geographical bibliographies and abstract services for monographs, periodicals, gazetteers, dictionaries, encyclopedias, government publications, and statistical sources. Credit/no credit only.

GEOG 493 Assessing Geographic Learning (2) Harrington
Enables graduating geography majors to articulate and assess their academic development and professional readiness by examining ways of representing geographic skills and capabilities. Offered: Sp.

GEOG 494 Senior Essay (3) I&S
Supervised individual research and writing of major paper during senior year. Offered: AWSp.

GEOG 495 Special Topics (*, max. 15) I&S
Topics vary and are announced in the preceding quarter. Offered: AWSp.

GEOG 496 Internship in Geography (3/5, max. 12)
Internship in the public or private sector, supervised by a faculty member. Credit/no credit only. Offered: AWSp.

GEOG 497 Tutorial in Geography (1-5, max. 15) I&S ZumBrunnen
Intensive directed study and tutoring. Literature reviews, formulations of project outlines and research designs, orientation in contemporary geographic thought and trends. Directed writing. Required for honors students. Offered: AWSp.

GEOG 498 Undergraduate Seminar in Economic Geography and Regional Science (3) I&S
Selected advanced topics and current problems in economic geography. Emphasis on formulating research questions, developing an appropriate research process, selecting methods, searching for resources, writing up and documenting research results, and using the Internet for research purposes. Offered: Sp.

GEOG 499 Special Studies (*, max. 15)
Supervised reading programs, undergraduate and graduate library and field research; special projects for undergraduate honors students. Offered: AWSp.

GEOG 500 Contemporary Geographic Thought (4, max. 8)
GEOG 502 Professional Writing in Geography (*, max. 6)
GEOG 505 Research Seminar: China (5, max. 10) Chan
Offered: A.

GEOG 506 Research Seminar: Southeast Asia (3, max. 6)
GEOG 507 Research Seminar: Canadian Problems (3, max. 6)
Consideration of the spatial dimensions of Canadian socioeconomic, cultural, and political development, with emphasis on resource potentials and relations with the United States, Japan, and other important trading partners. Prerequisite: GEOG 308 or permission of instructor. Offered: jointly with SISCA 507.

GEOG 512 History of Geographic Thought (5)
Historical development of modern geography. Emphasis on various philosophical and methodological debates in geography and the contexts from which they emerged. Investigates geography’s foundational concepts and institutions; how they have responded to and influenced the world around them. Offered: A.

GEOG 513 Research Grant Workshop (5, max. 10)
Writing research proposals. Participants learn to identify and approach sponsors; practice the peer-review process; develop a competitive research proposal. Prerequisite: GEOG 512 or GEOG 515 or equivalent; training and experience with quantitative, qualitative, or cartographic analysis; an already-formulated research project.

GEOG 515 Evidence and Explanation in Geography (5) Sparke
Introduces the main strands of philosophical debate shaping the discipline of human geography, including description, prediction, explanation, abstraction, structuration, representation, and institutionalization. Focuses on ways “theories” from outside the discipline have shaped the questions and concerns of geographers, and the ways geography reworks such theories. Offered: Sp.

GEOG 520 Research Seminar: Geographic Information Representation (5) Nyerges
Current issues in geographic information representation for geographic information systems (GIS). Includes representation for visualization, databases, and analyses. Prerequisite: one course in GIS.

GEOG 526 Advanced Quantitative Methods in Geography (4) Morrill, Withers
GEOG 531 Latin American Development Seminar (5, max. 10) Lawson
Evolution of development theory in Latin America from a spatial perspective. Theories and development issues, using case studies from Latin America. How geographers have conceptualized development problems and solutions. Prerequisite: GEOG 430.

GEOG 532 Rural Development Seminar (5, max. 10) Jaroz
Contemporary issues in international development theory related to regional and agrarian change, with emphasis on Africa.

GEOG 533 Research Seminar: Russia and the Newly Independent States (5, max. 10) ZumBrunnen
GEOG 538 Research Seminar: Geography of Transportation (3, max. 6) Mayer
GEOG 540 Research Seminar: Industrial Geography (5, max. 10) Beyers Offered: W.

GEOG 541 Research Seminar: Feminist Geographies (5) England
Explores major research themes in feminist geographies. Particular attention to the concept that gendered identities and spaces are discursively (re)produced. Emphasizes recent feminist scholarship that emphasizes difference, as well as the intersections between gender, “race,” ethnicity, sexuality, age, nationality, class, and other social identities and divisions. Offered: jointly with WOMEN 541; W.

GEOG 542 Research Seminar: Social and Population Geography (5, max. 10) Morrill
GEOG 543 Research Seminar: Immigration, Ethnicity, and Employment (5) Ellis
Employment patterns and outcomes for immigrants and ethnic minorities. Emphasis is on the U.S. experience and topics covered include labor market segmentation, theories of discrimination, job/labor queues, networks, ethnic niches and enclaves, skills and spatial mismatches. Specific focus changes annually.

GEOG 544 Event History Analysis of Social and Spatial Change (5) Withers
Examines life course research using event-history analysis with applications to the substantive areas of household dynamics, family formation and dissolution, marriage, cohabitation, and divorce, migration histories, residential mobility, and housing careers. Examines continuous- and discrete-time longitudinal models during practical laboratory sessions. Offered: jointly with CS&SS 544.

GEOG 550 Research Seminar in Location Theory (3)
Current research topics in economic and business geography. Focus shifts from year to year. Examples include spatial structures and economic development, economic geography of information, transaction cost perspectives of the location problem, and relationships between organization theory and theories of spatial organization.

GEOG 553 Advanced Topics in Cultural Geography (5, max. 10) Mitchell
Focuses on important contemporary topics in cultural geography. Examines current theoretical debates in anthropology, sociology, geography, feminist criticism, and cultural studies as they relate to the landscape. Include critical questions surrounding issues of representation and ethnography. Designed to help student prepare for advanced fieldwork. Offered: Sp.

GEOG 560 Research Seminar: GIS Analysis (5, max. 10)
Current research topics in geographic information systems. Particular emphasis on analytical methods, and their use in practical circumstances. Prerequisite: graduate status in GIS or related field. Offered: Sp.

GEOG 563 Algorithms and Data Structures for Geographic Information Systems (5)
Anatomy of a software package for geographic information processing. Emphasis on analysis of algorithmic complexity and software design techniques. Presents dynamic data structures, persistence of temporal data, and data flow algorithms. Prerequisite: GEOG 460, GEOG 465, and CSE 326 or CSE 373.

GEOG 567 Research Seminar: Geography and Economic Development (5, max. 10) Harrington
Explores ways in which economic and social changes affect the well-being and development of subnational, regional economies. Explanatory roles of such factors as labor and labor institutions, governments, technical change, corporations, capital markets, information costs, and international trade in the process of global restructuring. Specific focus changes annually.

GEOG 570 Research Seminar: Natural Resources Analysis (3, max. 6) ZumBrunnen

GEOG 571 Research Seminar: Critical and Normative Ecologies (5)
Engages in an ecocritique of mainstream managerial environmentalisms by unearthing their ideological bases, and delves into the ethical underpinnings of ecological resistance struggles or green utopias such as ecofeminist, deep and social ecology, and environmental justice movements. Offered: A.

GEOG 573 Urban Political Geography: Research Seminar (5) Brown
Covers both classic and contemporary theoretical debates and research on the relation between power, place, and the local body. Considers both conventional sites (e.g., the local state) as well as new forms and locations of city politics (e.g., sexuality and the body).

GEOG 574 Research Seminar: Geography, Law, and Social Control (5) Herbert
Examines relationship between the construction and enforcement of law and the landscape of lived experience; reviews major approaches in socio-legal analysis and seeks to augment these with insights from contemporary human geography research; explores various ways in which geographical variance shapes legal behavior.

GEOG 575 Advanced Political Geography (5) Sparke
Provides resources for theorizing how politics shapes and is shaped by geographical relationships. Examines how politics are situated in complex material and discursive geographies that are partly reproduced through political negotiations. Examines interrelationships of contemporary capitalism with other complex systems of social and political power relations. Offered: jointly with SIS 575.

GEOG 577 Research Seminar: Internal Spatial Structure of Cities (4, max. 8) Hodge
Offered: A.

GEOG 578 Research Seminar: Theorizing the City (5) Ellis
Considers classic and contemporary writings in urban theory in the twentieth century, including social ecology (Chicago School), political economy, and contemporary theoretical debates in poststructuralism, deconstructionism, and culture as they relate to cities and space. Offered: W.

GEOG 580 Medical Geography (3) Mayer
Geography of disease, consideration in health systems planning. Analysis of distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services; distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research; health-related issues. Offered: jointly with HSERV 586; W.

GEOG 581 Seminar in Medical Geography (5, max. 10) Mayer
Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with HSERV 585; A.

GEOG 588 Advanced Urban Ecology (5) Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Discussion of current and important theoretical and empirical papers in urban ecology. Students continue to research interdisciplinary urban ecology projects while developing publishable manuscripts and oral presentations. Offered: jointly with CFR 588; AWSp.

GEOG 597 Tutorial for Graduate Students (2)
Introduces beginning geography students to the main research agendas of the faculty; identifies the range of current discourse communities formed by current faculty and graduate students; establishes a process of mentoring and long-term planning for each new graduate student. Credit/no credit only. Offered: A.

GEOG 598 Geography Colloquium (1, max. 3)
Participation in, and critique of, student thesis and dissertation research, faculty research, and visitor contributions. Offered: AWSp.

GEOG 599 Effective Teaching of Geography (1)
Designed for the ongoing development of effective teaching and professional skills. Topics/activities include micro-teaching, communications and presentation skills; course organization, time management, personal and small group dynamics; design of geography curricula using simulations and computer-assisted...
The Department of Germanics offers the following programs of study:

- The Bachelor of Arts degree with a major in Germanics with options in German language and literature, and German cultural studies
- A minor in Germanics with options in cultural studies, language and literature, and linguistics.

**Bachelor of Arts**

**Suggested First- and Second-Year College Courses:** First- and second-year German or equivalent. Courses in Central European history, literature and culture, GERMAN 150 and 250 (conversational German through film). Courses on broad cultural topics offered by Germanics.

**Department Admission Requirements**

Admission to major status requires the completion of first- and second-year German or equivalent.

**Major Requirements**

**German Language and Literature:** 53-55 credits as follows:
- 15 credits to include: GERMAN 311, GERMAN 312, and either GERMAN 322 or GERMAN 323
- 15 credits from the following: GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, or GERMAN 495
- One of the following: GERMAN 333, GERMAN 334, GERMAN 401, or GERMAN 403
- 18 credits in upper-division Germanics courses which may include (a) no more than 4 credits of total GERMAN 395 and GERMAN 396; (b) no more than 5 credits of GERMAN 446; and (c) no more than 5 credits of GERMAN 447. Credits from any two of the following may be included: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295.

**Specialization in Linguistics:** Students must take GERMAN 451 and GERMAN 452 as part of the 18 elective credits and may, with the adviser’s permission, count relevant courses in linguistics outside Germanics as well.

**German Cultural Studies:** 50 credits as follows:
- 15 credits as follows: GERMAN 322, GERMAN 323, and either GERMAN 311 or GERMAN 312
- 15 credits from the following: GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, or GERMAN 495

**Minor Requirements:**

Minimum 30 credits from the following three options:

- **Language and Literature:**
  - 15 credits as follows: GERMAN 311, GERMAN 312; either GERMAN 322 or GERMAN 323
  - At least one upper-division language course beyond 302
  - 10 credits in upper-division Germanics which may include (a) no more than 4 credits total of GERMAN 395 and GERMAN 396; (b) no more than 5 credits of GERMAN 446; and (c) no more than 5 credits of GERMAN 447. Credits from any two of the following may be included: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295.

- **Linguistics:**
  - 10 credits of GERMAN 451 and GERMAN 452
  - At least two courses beyond 302 in the language series
  - One course from GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323
  - 9 upper-division credits in Germanics or other departments offering linguistics.

- **Cultural Studies:**
  - 15 credits of GERMAN 322, GERMAN 323; and either GERMAN 311 or GERMAN 312
  - 5 upper-division credits in Germanics offered in English
  - 10 credits in upper-division Germanics which may include (a) no more than 4 total credits of GERMAN 395 and GERMAN 396; (b) no more than 5 credits of GERMAN 446; and (c) no more than 5 credits of GERMAN 447. Credits from any two of the following may be included: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295.

A minimum grade of 2.0 is required for each course counted toward the minor.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The department’s objective is the dissemination of the intellectual and artistic traditions of the German-speaking countries. Toward this goal the department offers courses conducted not only in German but also in English on aspects of German culture and history for general humanistic education.

The major in German language and literature offers training in verbal interpretation and analysis useful for any career that involves formulating and solving problems, especially for those with some special interest in Europe and Germany. It provides excellent preparation
for students planning to do graduate work in German literature or linguistics, and also for those who wish to teach German in K-12 settings. Stress is placed on the critical analysis of texts, both in English and in German, and the development of high proficiency in language fluency, grammar, and style.

The major in German cultural studies also offers training in interpretation and analysis useful for any career that involves formulating and solving problems. It is designed for students who wish to study the German-speaking countries and their culture in the broadest context and encourages students to develop critical skills to analyze various aspects of culture and society, such as literature, film, art, architecture, and political and social institutions.

**Instructional and Research Facilities:**

An active and dynamic faculty prepares students for graduate study and for careers in teaching and the profession. A full range of graduate courses is offered, including seminars, tutorials, and readings. Each graduate student is assigned a faculty advisor, who provides advice on course selection and research. The Center for German and Austrian Studies and the Department of Comparative Literature offer additional resources.

**Special Requirements**

Aspirants for advanced degrees in German must have the equivalent of an undergraduate major in German. A reading knowledge of one foreign language (usually German) is a prerequisite for the M.A. degree. Reading knowledge of a second language is required before the student is admitted to the Ph.D. General Examination. The languages chosen are subject to approval by the department.

**Financial Aid**

A limited number of teaching assistantships and fellowships are available. The teaching load consists of a five-hour course on the first- or second-year level. The teaching assistants are supervised by experienced faculty members.

**Faculty**

**Eric Ames, Professor,** 2000; PhD, 2000, University of California (Berkeley); nineteenth-and twentieth-century German literature, cultural studies; film.

**Hellmut Ammerlahn, Professor,** 1968; PhD, 1965, University of Texas (Austin); Goethe, eighteenth- to early twentieth-century, comparative literature.

**Manfred Bansleben, Professor** 1988; PhD, 1979, University of Vienna (Austria); German language and methodology, history, culture studies.

**Charles Barrack, Professor,** 1968; PhD, 1969, University of Washington; Germanic linguistics.

**Diana Behler, Professor,** 1969; PhD, 1970, University of Washington; romanticism, nineteenth century, comparative literature.

**Richard Block, Professor,** German literature of the nineteenth and early twentieth centuries, literary theory, Jewish studies and queer theory.

**Jane K. Brown, Professor,** 1988; PhD, 1971, Yale University; eighteenth-, eighteenth- and nineteenth-century, comparative literature.

**Richard Gray, Professor,** 1991; PhD, 1981, University of Virginia; eighteenth-, nineteenth- and early twentieth-century literature, literary sociology, critical theory.

**Brigitte Prutti, Professor,** 1991; PhD, 1995, University of California at Irvine; DPhil, 1988, University of Graz (Austria); Eighteenth-century literature, twentieth-century Austrian literature, theory and history of drama.

**Joseph Voyles, Professor,** 1965; PhD, 1965, Indiana University; Germanics and linguistics.

**Sabine Wilke, Professor,** 1989; PhD, 1986, University of Mainz (Germany); critical theory, contemporary theater and film, literature and philosophy.

**Faculty Emeritus**

**Gunter Hertling,** Professor Emeritus (UC Berkeley)

**Antonin Hruby,** Professor Emeritus (Prague)

**Sammy McLean,** Associate Professor Emeritus (Michigan)
William Rey, Professor Emeritus (Frankfurt)

Adjunct Faculty

Marshall Brown, Professor, Department of English and Comparative Literature. 18th & 19th Century literature, theory and criticism, music and literature

Klaus Brandl, Professor, Department of Scandinavian Studies. Foreign Language Pedagogy, Applied Linguistics, Computer Assisted Language Learning

Affiliate Faculty

Heidi Tilghman

Course Descriptions

GERMAN 100 Intensive First-Year German (15)
Accelerated first-year German. Speaking and listening. Secondary objectives are reading and writing. Offered: S.

GERMAN 101 First-Year German (5)
The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. (See credit note following 104.) Prerequisite: score of 0-11 on GER TL placement test if German is language of admission. Offered: AWS.

GERMAN 102 First-Year German (5)
The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. (See credit note following 104.) Prerequisite: either GERMAN 101 or score of 12-35 on German placement test. Offered: AWSp.

GERMAN 103 First-Year German (5)
The methods and objectives are primarily communicative, with emphasis on speaking and listening. Secondary objectives are reading and writing. Offered: AWS.

GERMAN 104 Individualized First-Year German (1-15, max. 15)
Individualized approach to elementary German instruction. Students progress at their own pace. Credits vary. Depending upon amount of material mastered, any number of credits up to 15 may be earned per quarter. Credit/no credit only.

GERMAN 111 Basic German Review (5)
Combines in one quarter the contents of 101 and 102. Designed for students with background in German who however feel unprepared to take 102. Highly motivated beginners are also encouraged to take the course. Offered: A.

GERMAN 121 First-Year Reading German (5)
Special beginning course devoted exclusively to the reading objective. Offered: AS.

GERMAN 122 First-Year Reading German (5)
Special beginning course devoted exclusively to the reading objective; 122 continuation of 121. Offered: WS.

GERMAN 150 Conversational German Through Films (2, max. 6)
Conversational practice in small groups based on films. Because series progresses through the year, beginners may enroll only Autumn Quarter. May be taken concurrently with other Germanics courses. Cannot be taken for credit if 250 previously taken. Offered: AWSp.

GERMAN 199 Supervised Study (1-10, max. 10)
Study in German language and culture.

GERMAN 200 Intensive Second-Year German (15) VLPA

GERMAN 201 Second-Year German (5) VLPA

GERMAN 202 Second-Year German (5) VLPA

GERMAN 203 Second-Year German (5) VLPA

GERMAN 210 Classics of German Literature and Thought (5) VLPA
Introduction to major figures of German culture from the Reformation to the present, their contribution to the intellectual life of the Western world. Luther, Kant, Goethe, Schopenhauer, Marx, Freud, Nietzsche, Kafka, Brecht, and Mann. In English.

GERMAN 220 Origins of the Germanic Languages (5) VLPA
Introduction to basic grammatical concepts, terminology, and linguistics with emphasis on German-English relationship. Overview of phonology, morphology, syntax, and history of Germanic languages and people, both ancient and modern. Languages covered include Old, Middle, and New High German; English, Frisian, Dutch, Old Saxon, and Gothic. Taught in English. Offered: jointly with LING 220; AWSp.

GERMAN 221 The German Express: Second Year (10) VLPA
Intensive version of 201 and 202. Stresses development of reading and speaking skills. Limited to students who have demonstrated exceptional skills in first-year German. Recommended: GERMAN 103. Offered: A.

GERMAN 230 Conversational German (5) VLPA
Intensive conversational German. Recommended: GERMAN 103. Offered: S.

GERMAN 243 Fairy Tale and Fantasy (5) VLPA
Studies of the Grimm brothers’ fairy tales, their reception in different cultural frameworks, and their influence on fantasy literature from the nineteenth century to the twentieth century, including discussions of their sociological, psychological, and psychoanalytical implications and gender issues. In English.

GERMAN 250 Advanced Conversational German Through Films (2, max. 6) VLPA
Conversational practice in small groups based on films. May be taken concurrently with other Germanics courses. Recommended: GERMAN 103 and GERMAN 150. Offered: WS.

GERMAN 293 Introduction to Contemporary German Culture (5) I&S/VLPA
Introduction to culture of today’s German-speaking world through readings from various media and discussion of diverse manifestations of both high and popular culture, its underlying beliefs and values, and its institutions and historical background. Readings and
discussions in English.

**GERMAN 295 The Contributions of German Jews to German Culture (5)** I&S/VLPA
Contribution, assimilation and alienation of German-speaking Jews — such as Karl Marx, Sigmund Freud and Franz Kafka — emphasizing the multi-cultural nature of that which is understood as "German culture."

**GERMAN 299 Supervised Study (1-5, max. 10)**

**GERMAN 300 Studies in Germanics (5, max. 15) VLPA**
Topics or figures of German literature or language. German texts.

**GERMAN 301 Conversation and Writing Skills (3-5) VLPA**
Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 203. Offered: AW.

**GERMAN 302 Conversation and Writing Skills (3-5) VLPA**
Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 301. Offered: WS.

**GERMAN 303 Conversation and Writing Skills (3-5) VLPA**
Language skill development (speaking, writing) using materials selected to broaden understanding of German-speaking countries. Recommended: GERMAN 302. Offered: Sp.

**GERMAN 304 Contemporary German Play (5, max. 15) VLPA**
Reading, analysis, and performance of one play by a contemporary German author. Taught in German. Performance scheduled for last week of quarter. Prerequisite: GERMAN 203.

**GERMAN 311 Critical Approaches to German Literature (5) VLPA**
Introduction to literary terminology. Diverse interpretive strategies, ranging from close reading to biographical and sociological approaches. Characteristics of different genres (poetry, prose, drama). Readings from eighteenth- to twentieth-century literature. Recommended: GERMAN 203. Offered: A.

**GERMAN 312 Historical Approaches to German Literature (5) VLPA**
German literature from the Middle Ages to the present: Medieval Courtly period, Baroque, Enlightenment, Sturm und Drang, Classicism, Romanticism, Realism, Neoromanticism, Expressionism. Recommended: GERMAN 311. Offered: W.

**GERMAN 313 Major Figures of German Literature (5) VLPA**
Focus on major figure such as Goethe, Schiller, Kleist, Fontane, Thomas Mann, Kafka. Emphasis on his/her cultural and sociopolitical contexts. Literary and nonliterary texts, including film, art, political, historical, and philosophical texts. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312. Offered: Sp.

**GERMAN 314 Introduction to German Studies (5) VLPA**
German quest for national identity and the conflict of unity and division. Readings from literature, history, politics, and anthropology. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312. Offered: W.

**GERMAN 315 Institutions and Their Ideas (5) I&S/VLPA**
Analysis of central institutions of contemporary Germany in their historical development. Recommended: GERMAN 203; either GERMAN 311 or GERMAN 312; GERMAN 322. Offered: Sp.

**GERMAN 316 Conversational German (3-5) VLPA**
For participants in special summer programs only.

**GERMAN 333 Business German 1 (5) VLPA**
Introduction to the language and practices of German business. Recommended: GERMAN 203. Offered: A.

**GERMAN 334 Business German 2 (5) VLPA**
Introduction to the language and practices of German business. Recommended: GERMAN 203. Offered: W.

**GERMAN 340 Friedrich Nietzsche in English (5) I&S/VLPA**
Analysis of Friedrich Nietzsche’s chief works and the discussion of his position within modern German literature and thought.

**GERMAN 341 Franz Kafka in English (5) VLPA**
Short stories and novels of Franz Kafka; emphasis on philosophical relevance and esthetic significance.

**GERMAN 342 Thomas Mann in English (5) VLPA**

**GERMAN 343 Goethe in English (5) VLPA**
Selected major works (especially Faust) of Goethe, whose literary, philosophical, and scientific achievements are examined as integral parts of his quest for meaning, wholeness, and universality, and whose impact on Western thinking is traced up to Thomas Mann and C. G. Jung.

**GERMAN 344 The Contemporary German Novel in English (5) VLPA**
Major novels of the postwar period (1945 to present), discussed in their historical context.

**GERMAN 345 Bertolt Brecht in English (5) VLPA**
Brecht’s life and work, particularly his plays and writings on theatre, and some poems and short prose pieces to provide additional perspective on his life and work as a whole. The development of his writing and of his ideas and attitudes.

**GERMAN 346 The Contemporary German Novel in English (5) VLPA**

**GERMAN 350 The German Drama in English (5) VLPA**
German drama from the eighteenth to the twentieth centuries. German history and culture as reflected in the plays. Discussion of major themes.

**GERMAN 351 Vienna 1900 in English (5) I&S/VLPA**
Interdisciplinary study of Vienna at the turn of the century. Discussion of literary texts with emphasis on other intellectual and cultural trends of this very rich and complex period.

**GERMAN 352 Literature and Society in Weimar and National Socialist Germany in English (5) I&S/VLPA**
Literature, theater, and film, with adjunct consideration of art and architecture, in relation to the German social and cultural situation circa 1918 to circa 1947.

**GERMAN 353 Postwar Germany (5) I&S/VLPA**
Postwar development and present-day character of cultural, social, and political life in Germany. Readings include literary and nonliterary texts devoted to culture and everyday life. In English.

**GERMAN 354 German Literature and Film in English (5) VLPA**
Relationship between literature and film in the German tradition. Content varies; focus may be on a particular time period, director, or theme. Special attention paid to critical and analytical skills required for interpreting the two mediums.

**GERMAN 355 German Literature and Film in English (5) VLPA**

**GERMAN 356 Pagan Germany: Myth, Religion, Folklore in English (5) I&S/VLPA**
History and culture of the German peoples before and during the transition to Christianity. Readings include Tacitus’s Germania and other historical sources, Beowulf, Nibelungenlied, Grimm’s Fairy Tales, and German legends. Treatment of archaeological finds and a variety of materials that bear on religion, prophecy, magic, folk
GERMAN 360 Women in German Literature in English (5) 
I&S/ VLPA
Investigates the changing social roles of women in German society on the example of various literary texts from different periods.

GERMAN 370 History of German Cinema (5) I&S/ VLPA
History of German cinema, emphasizing the cultural and political context. Works considered include films by Lang, Murnau, Sternberg, Riefenstahl, Fassbinder, Wenders, and Trotta. Readings and discussions in English.

GERMAN 371 Special Topics: German Cinema (5, max. 10) 
VLPA
Covers one or more German film directors, a specific genre, or a chosen theme. Topics vary.

GERMAN 390 Germanic Studies in English (5, max. 15) 
VLPA
Topics or figures of German literature or language.

GERMAN 395 Proctoring of First-Year German Film Course 
(1-2, max. 6) VLPA
Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups in 150. Leaders may participate one or two hours per week and receive 1 credit for each hour in class with 6 credits allowed in 3 quarters. Credit/no credit only. Recommended: GERMAN 203. Offered: AWSp.

GERMAN 396 Proctoring of Second-Year German Film Course 
(1-2, max. 6) VLPA
Restricted to upper-division students of German who have demonstrated sufficient proficiency in speaking German to lead discussion groups in 250. Leaders may participate one or two hours per week and receive 1 credit for each hour in class with 6 credits allowed in three quarters. Credit/no credit only. Recommended: GERMAN 303; either GERMAN 322 or GERMAN 323. Offered: WSp.

GERMAN 397 Foreign Studies in German Literature (1-6, 
max. 15) VLPA
GERMAN 398 Foreign Studies in German Language (1-6, 
max. 15) VLPA
GERMAN 399 Foreign Studies in German Culture (1-6, max. 15) I&S/ VLPA
GERMAN 401 Advanced Writing and Conversation (3-5) 
VLPA
Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

GERMAN 402 Advanced Writing and Conversation (3-5) 
VLPA
Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

GERMAN 403 Advanced Writing and Conversation (3-5) 
VLPA
Texts and exercises, both grammatical and stylistic, to develop vocabulary, stylistic awareness, and the practical application of grammatical rules in written German. Recommended: GERMAN 303. Offered: AWSp.

GERMAN 406 Intensive Elementary Yiddish (5-15, max. 15) 
Intensive study of Yiddish grammar, with oral and written drills and reading of selected texts. Offered: S.

GERMAN 411 Studies in Medieval Literature and Culture (5) 
VLPA
Rotating special topics in literature and culture of the Middle Ages, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 412 Studies in Renaissance and Baroque Literature and Culture (5) VLPA
Rotating special topics in literature and culture of the Renaissance and Baroque, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 421 Studies in Eighteenth-Century Literature and Culture (5) VLPA
Rotating special topics in literature and culture of the eighteenth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 422 Studies in Nineteenth-Century Literature and Culture (5) VLPA
Rotating special topics in literature and culture of the nineteenth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 423 Studies in Twentieth-Century Literature and Culture: (5) VLPA
Rotating special topics in literature and culture of the twentieth century, such as particular movements, authors, genres, themes, or problems. Recommended: GERMAN 303; either GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323.

GERMAN 444 Undergraduate Thesis in Germanics (5) VLPA
Supervised research leading to the writing of a research thesis.

GERMAN 446 Internship in German (2-5, max. 10) 
Prerequisite: 6 credits of upper-level German language courses. Credit/no credit only.

GERMAN 447 Undergraduate Research (1-5, max. 15) 
Supervised research with faculty member. Offered: AWSpS.

GERMAN 451 Linguistic Analysis of German (5) VLPA
Recommended: GERMAN 203 Offered: A.

GERMAN 452 History of the German Language (5) VLPA
Traces the history of the German language from early Germanic to the present. Recommended: LING 200 and GERMAN 203 Offered: jointly with LING 415.

GERMAN 479 Special Topics in the Teaching of Foreign Languages (3, max. 9) VLPA
Intensive workshop for in-service and preservice teachers of all foreign languages on some aspect of foreign-language teaching methodology.

GERMAN 490 Contemporary German Literature (5) VLPA
Interpretation of selected works by contemporary German authors. Recommended: GERMAN 303; either GERMAN 311 or GERMAN 312.

GERMAN 493 Special Topics in German Culture (5) I&S/ VLPA
Recommended: GERMAN 303; either GERMAN 322 or GERMAN 323.
GERMAN 494 Studies in German Poetry (5) VLPA
Introduction to various methods of interpretation and to their practical application. Recommended: GERMAN 303; either GERMAN 311 or GERMAN 312.

GERMAN 495 Proseminar in German Literature (5, max. 15) VLPA
Special topics, the subject matter and depth of which are not included in other literature courses, arranged through consultation among students and faculty members.

GERMAN 496 History of Germanic Philology (5) VLPA
Introduction to the works of outstanding scholars in the field of Germanics.

GERMAN 497 Studies in German Literature (1-6, max. 15)

GERMAN 498 Studies in the German Language (1-6, max. 15)

GERMAN 499 Studies in German Culture (1-6, max. 15)

GERMAN 500 Literary Theory, Methodology, and Bibliography (5)
Historical survey and analysis of criticism (Methodengeschichte) and modern trends in contemporary theory. Methods of research and bibliography, as well as theoretical aspects of practical interpretation.

GERMAN 501 Proseminar in Methods and Writing (5)
Introduction to research methods, presentation of research, scholarly writing, and general poetological issues. Each year a different special topic is chosen as a focus for students’ research in the course.

GERMAN 503 Contemporary German Literature (5, max. 15)
Seminar analyzing the esthetic movements and thought of contemporary German literature, the social and political problems dealt with in the works of representative authors, and major experimental concepts. Some previous exposure to the German literature and civilization after 1945 is expected.

GERMAN 504 Special Studies in Literary Criticism and Theory (5, max. 15)
Literary criticism and theory, focusing on special topics proposed by the instructor. Taught in English. Prerequisite: GERMAN 500 or equivalent.

GERMAN 510 Studies in Medieval Literature and Culture (5, max. 15)
Seminar on rotating special topics in literature and culture of the Middle Ages, such as particular movements, authors, genres, themes, or problems.

GERMAN 511 Studies in Renaissance and Baroque Literature and Culture (5, max. 15)
Seminar on rotating special topics in literature and culture of the Renaissance and Baroque, such as particular movements, authors, genres, themes, or problems.

GERMAN 512 Studies in Eighteenth-Century Literature and Culture (5, max. 15)
Seminar on rotating special topics in literature and culture of the eighteenth century, such as particular movements, authors, genres, themes, or problems.

GERMAN 514 Studies in Nineteenth-Century Literature and Culture (5, max. 15)
Seminar on rotating special topics in literature and culture of the nineteenth century, such as particular movements, authors, genres, themes, or problems.

GERMAN 516 Studies in Twentieth-Century Literature and Culture (5, max. 15)
Seminar on rotating special topics in literature and culture of the twentieth century, such as particular movements, authors, genres, themes, or problems.

GERMAN 518 Foreign Language Teaching Methodology (2) Brandl

GERMAN 525 Seminar in Romanticism (5, max. 15)

GERMAN 526 Seminar in Nineteenth-Century Drama (5, max. 15)

GERMAN 527 Seminar in Nineteenth-Century Prose (5, max. 15)

GERMAN 528 Nineteenth-Century Poetry (5, max. 15)
Representative selections from Holderlin, the late Goethe, and from prevalent trends in nineteenth-century poetry, such as romanticism, “Young Germany,” poetic realism, and the experimental poetry of naturalism.

GERMAN 529 Studies in Literature 1870-1920 (5, max. 15)
Seminar on rotating special topics drawn from the period 1870-1920, such as particular movements, authors, genres, themes, or problems.

GERMAN 533 Seminar in Eighteenth-Century Literature (5, max. 15)
Study of one or more of the literary movements: Enlightenment, sentimentalism, anacreontics, storm and stress, classicism, early romanticism, and works by principal authors such as Gottsched, Bodmer, Gellert, Lessing, Wieland, Klopstock, Herder, Lenz, Goethe, Schiller, Jean Paul.

GERMAN 534 Storm and Stress (5, max. 15)
Extensive investigation of poetological and esthetic concepts advanced by initiators and exponents of German storm and stress. Analyses of narrative and dramatic works of storm and stress reveal reflections and implementations of the new theoretical concepts.

GERMAN 535 Classicism: Goethe, Schiller (5, max. 15)

GERMAN 537 Studies in Literature 1770-1830 (5, max. 15)
Seminar on rotating special topics drawn from the period 1770-1830, such as particular movements, authors, genres, themes, or problems.

GERMAN 540 Twentieth-Century Poetry (5, max. 15)
Development of German poetry from Rilke, Hofmannsthal, and George through Trakl, Benn, the Expressionists and the Dadaists, Brecht, and Enzensberger, to such contemporaries as Eich, Heissenbuttel, the concrete poets, Celan, and Bachmann.

GERMAN 541 Twentieth-Century German Drama (5, max. 15)
Selection from modern German novels, short novels, and short stories by representative authors dealing with the social and political problems of Germany as well as with individual problems of existence and identity.
GERMAN 550 Gothic (5)

GERMAN 551 Seminar in Germanic Philology and Linguistics (5, max. 15)
Topics vary. Prerequisite: basic knowledge of German and at least one elementary linguistics course.

GERMAN 552 Old High German (5)

GERMAN 555 Old Saxon (5)

GERMAN 556 Middle High German (5)

GERMAN 558 Middle High German Literature (5)

GERMAN 560 Modern Dialects (5)

GERMAN 565 Seminar in Courtly Epic (5)
Aspects and methods of literary analysis pertaining to the study of medieval courtly epics.

GERMAN 566 Late Middle High German Narrative (3)

GERMAN 567 Minnesang (3)
In-depth study of medieval German lyrics in the context of German and European literary and intellectual development. Poems of the period from Kurenberger through Walther are analyzed with stress on grammatical, formal, stylistic, and ideological interpretation. Prerequisite: adequate knowledge of Middle High German.

GERMAN 568 Seminar in Heroic Epic (5)
Literary and historic problems of the German heroic epic, with special emphasis on the Nibelungenlied and the Dietrichsepek.

GERMAN 575 Teaching of German Literature and Civilization (5)
Teaching of German language and literature on the advanced level in secondary schools and colleges. Credit/no credit only.

GERMAN 576 Modern Methods and Materials in Teaching German (3)
Theory and practice of communicative language teaching; current developments in foreign-language teaching; evaluation of teaching materials. Credit/no credit only.

GERMAN 577 Principles of Second Language Learning (2)

GERMAN 580 Seminar in German Literature (5, max. 15)
Open topics seminar with varying content.

GERMAN 581 Seminar in Poetry (5, max. 15)
Open topics seminar with varying content.

GERMAN 582 Seminar in Drama (5, max. 15)
Open topics seminar with varying content.

GERMAN 583 Seminar in Prose (5, max. 15)
Open topics seminar with varying content.

GERMAN 590 Philosophical Issues in German Culture (5, max. 15)
Seminar on rotating special topics dealing with the impact of particular thinkers, movements, or philosophical problems in German culture.

GERMAN 591 Studies in German Intellectual History (5, max. 15)
Seminar on rotating special topics dealing with interactions of history, literature, and culture in the German tradition.

GERMAN 592 Cultural Studies (5, max. 15)
Seminar on rotating special topics dealing with periods, themes, or particular problems in German life and culture.

GERMAN 600 Independent Study or Research (*)

GERMAN 700 Master's Thesis (*)

GERMAN 800 Doctoral Dissertation (*)

History
315 Smith

History undertakes the study of human affairs in a manner that seeks to understand change and development rather than the state of things at a given moment, taking into account societies in diverse parts of the world from the earliest times for which written records exist to the present.

Undergraduate Program
Adviser
318 Smith, Box 353560
206-543-5691
histadv@u.washington.edu

The Department of History offers the following programs of study:
• The Bachelor of Arts degree with a major in history
• The Bachelor of Arts degree with a major in the history and philosophy of science, offered jointly with the
• Department of Philosophy
• Minors in history and history of science

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that develop writing skills.

Department Admission Requirements
Minimum University GPA of 2.00.
Completion of 10 credits of college history with a minimum cumulative GPA of 2.50.
Completion of 10 credits of composition/writing courses with a minimum grade of 2.0 for each course. The requirement may be met by a freshman English composition course or a “W” course.
Students may apply to the major at any time in the quarter.
Transfer students must be enrolled at the UW before applying.

Major Requirements

60 credits as follows:
At least one 5-credit “broad” course (as designated by the department) in each of the following fields: European, United States, and non-Western history (any area outside Europe, the United States, and Canada)
At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
At least 30 upper-division credits completed in residence at the UW
5 credits of HIST 388, to be completed no later than within two quarters after declaring the major
5 credits of undergraduate senior seminar (as designated by the department)
Beyond the required subjects, the student may or may not specialize, depending upon personal interests and career plans
A minimum GPA of 2.25 for all history courses and minimum grade of 2.0 in all history courses taken to fulfill requirements for the major.
Minor

Minor Requirements:

History: 30 credits of history, of which 20 must be upper-division, with a minimum grade of 2.0 in each course applied toward the minor. A minimum of 15 of the 20 upper-division credits must be completed in residence at the UW.

History of Science: 25 credits, including HIST 311, 312, 390, and 490; plus one course from HIST 215, 310, 313, 315, 316, 317, 318, 412, 498 (when topic is relevant), MHE 401, 422, 424. A minimum grade of 2.0 is required in each course.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The study of history enhances critical thinking and writing skills. It is a creative process in which students learn to use arguments and evidence to communicate a sound historical thesis. It is a liberal arts degree that encourages students to become well rounded, educated people. Graduates are prepared for careers in many professions and businesses. Students are prepared for teaching, research, and museum and archives work, recent graduates have pursued careers as political lobbyists, journalists, and law enforcement officers. Many history majors pursue, and are well prepared for, further education and professional programs such as medicine, law, library science, and museum curators.

- **Instructional and Research Facilities:** The department funds a writing center for students enrolled in history courses. The department also has a small computer lab available for history majors.

- **Honors Options Available:** With College Honors. With Distinction. See adviser for details.

- **Research, Internships, and Service Learning:** The department encourages students to participate in internships that include historical elements. Students work with a sponsoring organization and a history faculty member. See adviser for details.

- **Department Scholarships:**
  - The Faye Wilson Scholarship is awarded to students emphasizing U.S. history and the Schwartz Fellowship to students pursuing historical study of a non-western civilization.
  - History majors may compete for two paper prizes: The Thomas Power Prize for papers written in a history course of the last year, and the York/Mason Award for history papers written on African Americans in the West.
  - In addition, the department allows students to nominate their high school history teacher for the Pressly Prize, which honors excellence in education.
  - Scholarship and prize competitions run in February and March of each year. See adviser for details.

- **Student Organizations/Associations:** Phi Alpha Theta, a history honors society. See adviser for details.

Graduate Program

Graduate Program Coordinator

206-543-8291
histgrad@u.washington.edu

The Department of History offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in a large number of fields within the discipline. Students in the programs prepare for careers as college teachers who combine teaching with scholarship and professional writing. A few graduates enter government service, college administration, or publishing. The M.A. program is normally completed in five or six full-time academic quarters or their equivalent. The Ph.D. program requires at least three years of full-time work beyond the M.A. degree. Graduate training at both levels includes (1) course work and independent study leading to examinations in specific historical fields, and (2) sustained investigation and interpretation of historical problems in seminars involving the writing of essays. A dissertation must be prepared for the Ph.D.

**Special Requirements**

Admission to the graduate program requires a sound undergraduate major in history or in one of the basic disciplines related to history. The department also requires evidence of the applicant’s ability to write cogently and lucidly and to interpret historical data.

**Financial Aid**

Entering graduate students are considered for any departmental fellowships and other funding for which they are eligible. Students with, or who expect to receive, the M.A. degree by the time they begin their studies may apply for teaching assistantships and may, with continued satisfactory scholarly progress, hold a T.A. appointment for a total of nine quarters, provided adequate funds are available.

**Faculty**

Alden, Dauril Professor Emeritus
Bacharach, Jere Professor Emeritus
Bailkin, Jordanna Assistant Professor
Barlow, Tani Professor
Behlmer, George Professor Emeritus
Bergquist, Charles Professor Emeritus
Bridgman, Jon Professor Emeritus
Butow, Robert Professor Emeritus
Camp, Stephanie Associate Professor
Campbell, Michael Lecturer
Conlon, Frank Professor Emeritus
Denny, Brewster Professor Emeritus
Dong, Madeleine Associate Professor
Ebrey, Patricia Professor Emeritus

</tr>
<tr>
<td>and contemporary role of labor in the modern world. Offered: jointly with POL S</td>
</tr>
<tr>
<td>249/SOC 266.</td>
</tr>
</tbody>
</table>
HIST 250 The Jews in Western Civilization (5) I&S
History of the Jews from late antiquity to the present. Examines the relationship between Jewish communities and the larger societies in which they are found. Offered: jointly with SISJE 250.

HIST 254 European Colonialism in North Africa, 1830 to the Present (5) I&S
Examines European colonialism in North Africa, life under colonial domination, influences of Islam, rise of nationalism, struggles for independence, and the legacy of this relationship on contemporary conflicts of immigration, religion, and cultural identity. Focuses on Algeria and France, but also considers Britain, Germany, Italy, Libya, Morocco, Spain, and Tunisia.

HIST 260 Slavery in History: A Comparative Study (5) I&S
Slavery as a universal historical phenomenon lending itself to a comparative analysis is studied in terms of its philosophical justifications, economic importance, and local practices. The following historical periods are surveyed: the ancient Near East, Greece, Rome, Islam, Africa, Latin America, and North America.

HIST 269 The Holocaust: History and Memory (5) I&S
Explores the Holocaust as crucial event of the twentieth century. Examines the origins of the Holocaust, perpetrators and victims, and efforts to come to terms with this genocide in Europe, Israel, and the United States. Offered: jointly with SISJE 269.

HIST 283 Introduction to Women's History (5) I&S
Includes units on American, European, and Third World women that examine centers of women's activities (convents, women's clubs), women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technology, colonization). Offered: jointly with WOMEN 283.

HIST 290 Topics in History (5, max. 10) I&S
Examines special topics in history.

HIST 300 Marx and Nietzsche: The Assault on Bourgeois-Christian Civilization (5) I&S
Major dilemmas and conflicts of modern Western consciousness through historical analysis of Marx, Nietzsche, and the movements they spawned. Emphasis on the relationship between sociocultural change, biography, and ideological innovation.

HIST 310 Science and Religion in Historical Perspective (5) I&S
Scientific and religious ideas have been two of the major forces shaping our modern view of the world. Often regarded as being in conflict, they can equally well be seen as complementary and interdependent. Study of the relationship between scientific and religious ideas with focus on particular episodes of history from ancient to modern times.

HIST 311 Science in Civilization: Antiquity to 1600 (5) I&S
From preclassical antiquity to the end of the Middle Ages, stressing the growth of scientific ideas, the cultural context in which they take shape, and their relationship to other movements of thought in the history of civilization.

HIST 312 Science in Civilization: Science in Modern Society (5) I&S
Growth of modern science since the Renaissance, emphasizing the scientific revolution of the seventeenth century, the development of methodology, and the emergence of new fields of interest and new modes of thought.

HIST 313 Science in Civilization: Physics and Astrophysics Since 1850 (5) I&S/NW
Organization and pursuit of the physical and astrophysical sciences, focusing on the major unifying principles of physics and astronomy and the social and cultural settings in which they were created. Offered: jointly with ASTR 313.

HIST 314 The Psychoanalytic Revolution in Historical Perspective (5) I&S
Genesis and evolution of Freudian theory in context of the crisis of liberal-bourgeois culture in central Europe and parallel developments in philosophy, literature, and social theory. Emergence and division of the psychoanalytic movement. Transformation of psychoanalysis as it was absorbed into British, French, and especially American cultural traditions.

HIST 315 History of Technology to 1940 (5) I&S
Technology since the Middle Ages, in its social and historical contexts. From the medieval foundations of metal working, its social consequences and the establishment of a class of engineering practitioners, to the transformation of American rural life, domestic technology, and industry before World War II.

HIST 320 Greek History: 7000 BC to Present (5) I&S
History of Greece from its Neolithic village origins to the present. Examines the different forms of one of the most resilient cultures in the human story. Offered: jointly with EURO 320.

HIST 345 War and Society (5) I&S
Analysis of the techniques of war from the Renaissance to the present with consideration of the social, political, and economic consequences of war in the Western world.

HIST 346 Images of War in History, Literature, and Media (5) I&S/VLPA
Explores images of war generated by historians, writers, artists, filmmakers, television producers, and journalists, analyzing the perspectives on war adopted by various observers to see what motivates their representations. Focuses on ways in which various media shape images of war and the effect of this shaping on human consciousness.

HIST 369 The Jewish Twentieth Century in Film (5) I&S Stein
Surveys twentieth-century Jewish history in its European, American, and Middle Eastern contexts by examining films produced in these settings. Considers central events that shaped modern Jewish culture: the changing geography of Europe and the Middle East, mass migrations, the Holocaust, shifting meanings of race, culture, and religion. Offered: jointly with SISJE 369.

HIST 388 Colloquium: Introduction to History (5, max. 10) I&S
Introduction to the discipline of history for new or prospective majors. Emphasizes the basic skills of reading, analysis, and communication (both verbal and written) that are central to the historian's craft. Each seminar discusses a different subject or problem.

HIST 390 Colloquium in History and Science (5) I&S
Study in the history of science to bridge the gap between the natural sciences and the humanities. Students should have a strong background both in history and in a natural science.

HIST 395 Modern Historical Writing, Honors Seminar (5) I&S
New types of problems examined by historians and new techniques that have evolved for solution. Brief historiographical introduction, reaching back to the "scientific" historians of the mid-nineteenth century, then continues by examining the impact on historians of new disciplines such as psychology, sociology, and economics, and of new techniques such as statistics and prosopography. Readings are in the theorists and in those who followed their lead. Admission by departmental invitation only.

HIST 399 Advanced Foreign Study (3-5, max. 15) I&S
Upper-division history courses, for which there are no direct

241
University of Washington equivalents, taken through the University of Washington Foreign Study Program.

HIST 403 Scandinavian Immigration in History and Literature (5) VLPA/I&S
History and literature of Scandinavian immigration to North America, including immigrant life and culture, community structures and traditions, and the literature about and by immigrants from Denmark, Finland, Iceland, Norway, and Sweden. Offered: jointly with SCAND 403.

HIST 412 Science and the Enlightenment (5) I&S
The role of science in relation to intellectual, social, economic, and religious forces in the eighteenth century, and growth of the international community in science during the same period.

HIST 420 The Olympics: The Merging of Old and New in Modern Greece (5) I&S
Explores the role of the Olympic games in the history and culture of Greece, from Bronze Age pre-Olympiads to the 2004 Athens Games. Topics include mythical and historical origins of the Olympics, moral principles and practices in Greet sports, and modern Olympics, 1896 to 2004. Offered: jointly with EURO 420.

HIST 425 History of the British Empire and Commonwealth Since 1783 (5) I&S
Britain in the Caribbean, Africa, India, Southeast Asia, and the Pacific; and the settlement, economic development, and political evolution of Canada, Australia, New Zealand, and South Africa.

HIST 449 Issues in Comparative Labor History (5) I&S
Role of labor in the modern world. Emphasis on the centrality of workers’ struggles in the evolution of national societies on the conceptual, research, and expository strategies of contemporary students of the labor movement and on differences and relationships between labor in developed and underdeveloped countries.

HIST 451 Eastern and Central Africa Since 1500 (5) I&S
Explores the history of Eastern and Central Africa from the period prior to the slave trade through European colonialism to the post-colonial present. Focuses on political, economic, and social change and continuity. Emphasis on understanding how various historical actors and historians have interpreted these processes.

HIST 452 Southern Africa Since 1500 (5) I&S
Explores the history of Southern Africa from pre-colonial social institutions through European colonialism and industrialization to the post-apartheid present. Focuses on the interplay between race, class, ethnicity, and gender in the structuring of political relations. Emphasis on understanding how various historical actors and historians have interpreted these processes.

HIST 457 Topics in Labor Research (5, max. 10) I&S
Analysis of the post-World War II decline of national labor movements and strategies employed to reverse this trend. Requires a major research project on organizing, bargaining, or another question in labor studies. Prerequisite: either POL S 249, HIST 249, or SOC 266. Offered: jointly with POL S 457.

HIST 461 History of the Middle East: 622-1300 (5) I&S
Political and economic analysis of the period circa AD 600, preliminary to rise of Islam, to arrival of the Turks. Muhammad’s teaching and impact; Islamization and Arabization.

HIST 462 History of the Middle East: 1258-1798 (5) I&S
Conquests by successors of Ghengis Khan; creation in Egypt, Syria, and Iran of cavalry-based states; domination of political, social, and economic history by Ottoman and Safavid empires. The Napoleonic invasion.

HIST 463 History of the Middle East Since 1789 (5) I&S
Critical issues and themes in the changing Middle East, including Westernization, growth of nationalism, Arab-Israeli dispute, Iranian revolution, and the role of Islam.

HIST 467 Nations and States in the Modern World (5) I&S
Development of national consciousness in the “old nations” of Europe before the French Revolution. Replacement by new nationalism, spreading into East Central Europe, Russia, Ibero-America, Asia, and Africa. Offered: jointly with SIS 467.

HIST 474 Special Topics in History for Teachers (1-10, max. 10) I&S
Credit/no credit only.

HIST 481 Economic History of Europe (5) I&S
Origins of the modern European economy; historical analysis of economic change and growth from medieval times that stresses the preconditions and consequences of industrialization. Recommended: ECON 201. Offered: jointly with ECON 460.

HIST 490 Topics in History (5, max. 10) I&S
Examines special topics in history.

HIST 491 Honors Historical Method (5-) I&S
The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism. For honors students.

HIST 492 Honors Historical Method (-5) I&S
The purposes, materials, and techniques of historical scholarship. Theory, practice, and criticism. For honors students.

HIST 493 Senior Thesis in the History of Science (5, max. 10) I&S
Preparation of the senior thesis for the History and Science emphasis.

HIST 494 Colloquium in Historiography (5, max. 15) I&S
Advanced seminar examining central issues in historiography. Emphasizes reading, discussion, and writing.

HIST 495 History Internship (1-5, max. 10)
Off-campus independent fieldwork with a community agency in an apprenticeship or internship situation. Work to be jointly supervised by a member of the History Department and an on-site field supervisor.

HIST 498 Colloquium in History (5, max. 15) I&S
Each seminar examines a different subject or problem. A quarterly list of the seminars and their instructors is available in the Department of History undergraduate advising office.

HIST 499 Undergraduate Research (1-5, max. 15)

HIST 501 Ancient Greece and Rome: Writings and Interpretations (3-6, max. 6)
Study of historians, development of historical study as a distinct pursuit, focus of attention in historical scholarship in the ancient world and comparison with modern interpretation of antiquity.

HIST 502 Medieval Europe: Writings and Interpretations (3-6, max. 6)
Study of historians, schools of history, and interpretations of medieval European history.

HIST 503 Modern Europe: Writings and Interpretations (3-6, max. 6)
Study of historians, schools of history, and interpretations of modern European history.

HIST 504 Comparative Ethnicity and Nationalism (5)
Theoretical approaches to, and historical case studies of, the phenomena of ethnicity, nationalism, and ethnic conflict in the modern world. Emphasis on Europe and Asia.
HIST 511 History of Science (3-6, max. 6)

HIST 512 Seminar in the History of Science (3-6, max. 6)

HIST 513 Seminar in the History of Science (3-6, max. 6)

HIST 514 Seminar in the History of Science (3-6, max. 6)

HIST 515 Field Course in the History of Technology (5)
Introduces students to the literature, methodology, and problems of the history of technology, and prepares them for independent study in the field.

HIST 530 Comparative Colonialisms: Methodological and Conceptual Approaches (5)
Introduces students to the historiography of modern European/ American colonialisms, focusing on Africa, Asia, and/or the Americas. Addresses methodological and conceptual issues by examining relationship between capitalism and colonialism; violence and routinization of colonial power; colonial categories of race, ethnicity, class, and gender; and resistance movements and nationalist politics.

HIST 552 Field Course in African History (5)
Methodological and conceptual issues in African historiography, focusing on 1500 to the present. Examines topics including pre-colonial politics and economics, slavery and the slave trades, European conquest and colonization, resistance movements and nationalist politics, and post-colonial debates and dilemmas. Special attention to issues of gender, race, ethnicity, and class.

HIST 561 Islamic History (3-6, max. 6)
Field course. Introduction to advanced study in the major periods and problems of Islam. Bibliographical guidance is stressed.

HIST 562 Ottoman History (3-6, max. 6)
Field course. Introduction to the major periods and problems of Ottoman history, 1300-1914, by acquainting the student with the major works in at least two languages. An attempt is made to teach some use of Ottoman materials. A minor problem is investigated in detail by every student. Prerequisite: knowledge of at least one major language besides English (French, German, Russian, or other).

HIST 563 Modern Near East (3-6, max. 6)
Field course introducing the student to the major periods and problems of Near Eastern history, 1798 to the present.

HIST 570 Topics in Teaching History (3)
Topics include active learning, teaching writing, assessment, and course design. Designed for history graduate students working or planning to work as TAs or instructors. Students produce a teaching portfolio and conduct peer observations. Credit/no credit only.

HIST 571 Orientation to an Academic Career in History (3)
Course for prospective college and university history instructors, preparing them for the nonacademic aspects of their duties. Prerequisite: Master of Arts degree in history or permission of instructor.

HIST 580 Gender and History (5)
Introduction to gender as category of historical analysis, examining the impact of feminist theory within the discipline of history. Course traces historiographical debates in women’s and gender history and explores, through cross-cultural comparisons, how scholars have conceived the relationship between gender and categories such as class, race, ethnicity, and sexuality.

HIST 590 Topics in History (5, max. 15)
Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

HIST 595 Historical Practices (5)
Emphasizes the interrelatedness of theoretical issues and historical research. Students read works that encourage the rethinking of sources and their historical meaning and experiment with sources, methods, and questions in a set of practical assignments.

HIST 598 Methods of Historical Research (5)
Exploration of new historical and scholarly techniques employed in historical research. Use of social science methodology and literary theory in the evaluation and interpretation of historical sources. Use of feminist theory, deconstruction, critical theory, and orality/ literacy studies. Student research paper is based upon a chosen theoretical approach.

HIST 600 Independent Study or Research (*)

HIST 700 Master’s Thesis (*)

HIST 800 Doctoral Dissertation (*)

Ancient & Medieval History

Course Descriptions

HSTAM 203 Introduction to the Middle Ages: Medieval People (5) I&S
Introduction to the Western Middle Ages through a study of social roles and statuses as seen through documents and imaginative literature. The groups studied are rulers, aristocracy, peasants, townspeople, clergy, outcasts, and outsiders.

HSTAM 205 Military History of the Ancient World (5) I&S
Military history from prehistoric times to the fall of the Roman Empire, with special emphasis on the Greco-Roman period and the campaigns of Alexander the Great, Hannibal, Scipio Africanus, and Julius Caesar.

HSTAM 276 Celtic Civilizations of the European Middle Ages (5) I&S
Introduction to the history and pseudo-history of medieval Ireland, Wales, Scotland, and Gaul. Topics include “Celtic” religion, mythology, social institutions, nationalism, and the relationship between history and myth. Particular attention to how historians “do” history in the absence of straightforward historical sources.

HSTAM 290 Topics in Ancient/Medieval History (5, max. 10) I&S
Examines special topics in ancient/medieval history.

HSTAM 302 Ancient History (5) I&S
Political, social, economic, and cultural development of Rome from the beginnings in the eighth century BC to the beginning of the Middle Ages.

HSTAM 312 The Roman Republic (5) I&S
Political, social, economic, and cultural history, with emphasis on the development of the constitution and territorial expansions.

HSTAM 313 The Roman Empire (5) I&S
Political, social, and cultural history, with special emphasis on the period of Cicero and Caesar.

HSTAM 314 The World of Late Antiquity (5) I&S
Examines the transformation of the ancient world from the third-century crisis of the Roman Empire to the rise of Islamic civilization. Explores the manifold political, cultural, and social changes that transformed Europe, the Mediterranean, and the Near East between the third and the eighth centuries CE.

HSTAM 315 The Byzantine Empire (5) I&S
Political, social, economic, and cultural history of the eastern Roman Empire from the fourth to fifteenth centuries.

HSTAM 330 The Age of Augustus (5) I&S/CLAS
Detailed study of the history and culture of the reign of Augustus, the first Roman emperor (31 BC-AD 14). Includes readings in Augustan authors such as Virgil, Ovid, and Horace as well as the study of Augustan art and architecture. Offered: jointly with CLAS 330.

HSTAM 331 Early Middle Ages (5) I&S
The Dark Ages, feudalism, emergence of the medieval order of civilization, and the development of Romanesque culture.

HSTAM 332 Central Middle Ages (5) I&S
Europe in the central Middle Ages: culture of cathedrals and universities, formation of national states, development of urban society.

HSTAM 333 Late Middle Ages (5) I&S
Disintegration of the medieval order under the impact of the national state, the secularization of society, and the decline of the church. Movements of reform and revolution. The culture of late gothic Europe.

HSTAM 334 Medieval Women (5) I&S
The experiences of women in medieval society: public and private power, changing concepts of family and the domestic sphere, ideal and reality in courtly love, women in religious life, women in the workplace, the querelle des femmes and the beginnings of “feminist” thought.

HSTAM 360 Medieval Christianity (5) I&S
Development of Christianity in the medieval west circa 400 to 1500. Emphasis on the forms of religious life: monasticism, the papacy, friars, hermits, mystics, and reformers; and on the emergence of new modes of piety, both lay and clerical.

HSTAM 365 Medieval England, 1042-1485 (5) I&S
Upper level survey of English history from the Norman conquest until 1485. Emphasis on political, social, and economic history, with special attention to the peculiarities of English development as these had emerged by 1485.

HSTAM 367 Medieval Jewish History (5) I&S
Social and intellectual history of the Jews in western Europe to the fifteenth century. Jews under Islam and Christianity; the church and the Jews; the Crusades and their legacy; intellectual achievements; conflict and cooperation. Offered: jointly with SISJE 467.

HSTAM 370 The Vikings (5) I&S/CLAS
The Vikings at home in Scandinavia and abroad, with particular emphasis on their activities as revealed in archaeological finds and in historical and literary sources. Offered: jointly with SCAND 370.

HSTAM 401 Early Greece (5) I&S
Bronze and Dark Age Greece: realities of the heroic age of ancient Greece.

HSTAM 402 Classical Greece (5) I&S
The classical civilization of ancient Greece, with special emphasis on the legacy of Greece to Western civilization.

HSTAM 403 Alexander the Great and the Hellenistic Age (5) I&S
Rise of Macedonia, conquest of Near East by Alexander, and division into lesser kingdoms after Alexander’s death. Special emphasis on fusion of cultures and change from city-state to world-state.

HSTAM 443 Kievian and Muscovite Russia: 850-1700 (5) I&S
Development of Russia from earliest times to the reign of Peter the Great. Offered: jointly with SISRE 443.

HSTAM 490 Topics in Ancient/Medieval History (5, max. 10)
I&S
Examines special topics in ancient/medieval history.

HSTAM 501 Greek History Field Course (3-6, max. 6)
Examines various topics and themes in Greek history. Content varies.

HSTAM 510 Roman History Field Course (3-6, max. 6)
Examines various topics and themes in Roman history. Content varies.

HSTAM 512 Seminar in Ancient History (13-6, max. 6+)
Detailed study of special topics in ancient history.

HSTAM 530 Early Middle Ages (3-6, max. 6)
Field course. Survey of early European history through the times of tribal migrations and invasions from Asia. Problems and methods of research.

HSTAM 531 Medieval European History (3-6, max. 6)

HSTAM 532 Medieval European Seminar (3-6, max. 6)
Prerequisite: reading knowledge of Latin.

HSTAM 533 Medieval European Seminar (3-6, max. 6)
Prerequisite: reading knowledge of Latin.

HSTAM 534 Medieval European Seminar (3-6, max. 6)
Prerequisite: reading knowledge of Latin.

HSTAM 535 Later Medieval Europe (3-6, max. 6)
Field course. Surveys European history from ca. 1250 to 1500, with particular attention to historiography.

HSTAM 536 Topics in Early Medieval History (3-6, max. 6)
Graduate level study of specific topics in early medieval history. Topics vary from quarter to quarter; for information, please see instructor.

HSTAM 590 Topics in Ancient and Medieval History (5)
Seminar on selected topics in ancient and medieval history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

History of Asia

Course Descriptions

HSTAS 200 South Asian History, Pre-History to the Present (5) I&S
Examines history of the modern nations of India, Pakistan, Bangladesh, Sri Lanka, Nepal, Bhutan, Afghanistan, and the Maldives from pre-history to the present. Addresses development of religious systems, arrival of Islam, relations between religious and ethnic communities, and creation of states and empires in South Asia.

HSTAS 201 Ancient Indian Civilization (5) I&S
Religions, literature, philosophy, politics, arts, and history of India.
from earliest times to the Mughal empire.

**HSTAS 202 Modern Indian Civilization (5) I&S**
The Islamic impact, British conquest, and contemporary India. Emphasis on the rise of nationalism, social organization, and contemporary life and history.

**HSTAS 211 History of Chinese Civilization (5) I&S**
Intensive survey of Chinese civilization from earliest times to today. Introduces all students, including East Asian history majors, to the general sweep of Chinese history. Social, cultural, and intellectual developments.

**HSTAS 212 History of Korean Civilization (5) I&S**
From earliest times to the present. Development of Korean society and culture in terms of government organization, social and economic change, literature, and art. Offered: jointly with SISEA 212.

**HSTAS 221 History of Southeast Asia (5) I&S**
Surveys Southeast Asian civilizations at the outset of Western colonial rule; the colonial impact on the traditional societies of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, and the Philippines; nineteenth- and twentieth-century nationalist and revolutionary movements; emergence of Southeast Asia as a region in the modern world. Offered: jointly with SISEA 221.

**HSTAS 241 Japanese Civilization (5) I&S**
Japan’s civilization, including its origins, government, literature, economic institutions, material culture, social organization, and religions, in relation to the development of Japan as a society and nation. Cannot be taken for credit if SISEA 341 previously taken. Offered: jointly with SISEA 241.

**HSTAS 244 Imperialism and Anti-Colonialism in Asia (5) I&S**
Introduction to Western imperialism expansion, conquest, and colonial rule in Asia; the anti-colonial, nationalist resistances they engendered; and the resultant cultural, political, economic, and intellectual transformations in Asian societies. Covers post-1800 violence, racial hierarchies, human rights abuses, post-colonial memories, persistent strategies of domination, and structural inequities. Offered: jointly with SISA 244.

**HSTAS 245 Human Rights in Asia (5) I&S Callahan, Giebel**
Introduction to recent and ongoing human rights issues in South, Southeast, and East Asia. Focuses on how human rights politics have played out in domestic political arenas. Provides exposure to views/insights into the historical context in which human rights claims, abuses, and debates arise. Offered: jointly with SISA 245.

**HSTAS 265 The Viet Nam Wars (5) I&S Giebel**
Recent Vietnamese history and struggles for independence and national unification vis-a-vis French colonialism, Japanese occupation, American intervention, and internal divisions. Covers historical roots and contemporary contexts of revolution and war, objectives and motivations of participants, and the enormous human costs. Emphasizes socio-cultural changes and wars’ legacies. Offered: jointly with SISEA 265.

**HSTAS 290 Topics in Asian History (5, max. 10) I&S**
Examines special topics in Asian history.

**HSTAS 348 Alternative Routes to Modernity (5) I&S**
Routes to modernity followed by non-Western societies between 1600 and 1900. Historical experiences of non-Western societies seen in the contexts of European history and of development theory. Primary sources and techniques for posing theoretical questions of historical data. Offered: jointly with SIS 348.

**HSTAS 401 History of Ancient India (5) I&S**
India in ancient times; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

**HSTAS 402 History of Medieval and Mughal India (5) I&S**
Medieval India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

**HSTAS 403 History of Modern India to 1900 (5) I&S**
Modern India; emphasis on forms of political organizations and economic life, social organizations, and cultural developments.

**HSTAS 404 History of Twentieth-Century India (5) I&S**
Analysis of the problems in the fields of social life, international and domestic politics, education, economics, and other areas that confront India today.

**HSTAS 423 History of Modern Japan (5) I&S**
Political, social, economic, and cultural development of Japan from the late Tokugawa period to the present with special emphasis on the cultural impact of the West. Offered: jointly with SISEA 423.

**HSTAS 424 The Emergence of Postwar Japan (5) I&S**
The making of modern Japan; World War II and surrender; American occupation; postoccupation rebuilding; emergence as an industrial power. Recommended: HSTAS 423 or SISEA 423. Offered: jointly with SISEA 440.

**HSTAS 441 Economic and Social History of Japan to 1900 (5) I&S**
Lecture-seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and decline of the shoen system, the rise of commerce, social change, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. Prerequisite: either SISEA 244/HSTAS 241 or SISEA 341/HSTAS 341. Offered: jointly with SISEA 441.

**HSTAS 451 Chinese History: Earliest Times to 221 BC (5) Preimperial China.**

**HSTAS 452 Chinese History from Earliest Times to 1276 (5) I&S**
Traces the development of Chinese civilization form earliest times through the Song dynasty. Examines social, cultural, political, and economic history.

**HSTAS 453 Chinese History: AD 906 to 1840 (5) I&S**
Political, social, economic, and intellectual history form the time of the Mongol conquest of China to the Sino-Japanese war. Focus on the evolution of the late imperial Chinese state and the “early modern” era in China.

**HSTAS 454 History of Modern China (5) I&S**
Social, cultural, political, economic, and intellectual transformations and continuities in China from the end of the imperial period to the present. Offered: jointly with SISEA 454.

**HSTAS 456 Topics in Chinese Social History (5) I&S**
Surveys major issues and approaches to the study of the role of the Chinese people in China’s historical development. Historical focus of course varies with instructor. Recommended: HSTAS 211, HSTAS 452, HSTAS 453, or HSTAS/SISEA 454. Offered: jointly with SISEA 456.

**HSTAS 457 Women in China to 1800 (5) I&S**
Gender in Chinese culture, women’s situations in the patrilineal family system, and the ways women’s situations changed as other dimensions of China’s political system, economy, and culture changed from early times through the nineteenth century. Offered: jointly with WOMEN 457.
HSTAS 459 Gender Histories of Modern China, 18th to 20th Centuries (5) I&S
Emergence of modernist social, political, intellectual gender formations in social activism, revolutionary writing, scientific ideologies, economic globalization. Stresses gender difference in colonial modernity, revolutionary movement, communism, post-socialist market society. Relates modern Chinese women to global flows, new division of labor, local and regional experience. Offered: jointly with WOMEN 459.

HSTAS 460 Cities in China: Past and Present (5) I&S
Economic, political, social, and cultural functions of the city in modern Chinese history. Changes in China's urban system. The city as cultural center and focus of literary and cinematic representation. Attention to architecture, commerce, urbanization, the role of capital cities in the power of the state. Offered: jointly with SISEA 460.

HSTAS 462 Southeast Asian History to 1800 (5) I&S
Absorption and modification of cultures (Indian and Chinese), religions (Islam, Buddhism, Catholicism), and peoples (northern European) by island- and mainland-Southeast Asians. Main themes are cultural contact and the growth of states and peoples.

HSTAS 463 Southeast Asian History from 1800 to the Present (5) I&S
Post-eighteenth-century history of the present countries of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Singapore, Brunei, Indonesia, and the Philippines. Deals with colonial rule, emerging nationalism, and political independence. Investigates broad themes of social, economic, and cultural history.

HSTAS 466 Islam, Mysticism, Politics and Performance in Indonesian Culture (5) VLPA/I&S
Examines how Indonesia, the world's fourth most-populous country, with the largest Islamic population, weaves together local practices and influences from India and Persia. Offers ways of understanding modern Indonesian performing arts, religion, and politics. Offered: jointly with SISIEA 466.

HSTAS 481 History of Traditional Korea: Earliest Times to the Nineteenth Century (5) I&S
Korean history from earliest times to the modern period.

HSTAS 482 History of Modern Korea: 1860 to the Present (5) I&S
Traditional institutions and society, Japanese colonial rule, liberation and the Korean War, early Korean communist movement, and North Korea and South Korea since 1945.

HSTAS 490 Topics in Asian History (5, max. 10) I&S

HSTAS 501 Indian History (3-6, max. 6)
Prerequisite: permission of instructor.

HSTAS 502 Seminar: History of India (3-6, max. 12)
Seminar on selected topics and problems in the history of medieval and modern India. Prerequisite: HSTAS 501 and permission of instructor.

HSTAS 503 Seminar: History of India (3-6, max. 12)
Seminar on selected topics and problems in the history of medieval and modern India. Prerequisite: HSTAS 501 and permission of instructor.

HSTAS 520 Premodern Japanese History (5)
Field course; Japanese history prior to 1868. Prerequisite: HSTAS 421 and HSTAS 422, or SISEA 441 and SISEA 541, or permission of instructor.

HSTAS 521 Modern Japanese History (3-6, max. 6)
Field course. Prerequisite: HSTAS 422, HSTAS 423, or permission of instructor.

HSTAS 530 Field Course in Southeast Asian History (5)
Introduction to major English-language works on Southeast Asian history and to the major historiographical issues of the era.

HSTAS 532 Seminar in Southeast Asian History (5)
Selected topics in Southeast Asian history and historiography. Preparation for theses and doctoral dissertations on Southeast Asian History.

HSTAS 541 Economic and Social History of Japan to 1900 (5)
Analyses of landholding systems, the rise of commerce, demographic changes, urbanization, early industrialization, and social change. Prerequisite: previous course work in Japanese history or economic history, or permission of instructor. Not open to students who have taken HSTAS 441. Offered: jointly with SISEA 541.

HSTAS 546 Gender and Colonialism in Eastern Asia (5)
Economic-political colonialization, post colonialism, and statist-gendered citizenship; intra-Asian subimperialism structuring domestic production, family, and gendered subjectivities; humanism and the New Woman; modern contests over new masculinity and new femininity; and the effect of war, imperialist occupation and colonial modernity on interregional flows of ideas, labor, capital, and jurisprudence. Offered: jointly with WOMEN 546; AWSpS.

HSTAS 547 Gender and the New International Division of Labor in Asia Pacific (5)
Shift of the dynamic relation of gender, state, and citizens from modernization (national development) to globalization (intraregional development) strategies in Pacific Asia, 1945 to present. Consumption, service provision, migratory labor, intra-Asian investment, localization. Offered: jointly with WOMEN 547.

HSTAS 551 Field Course in Chinese History: Pre-Sung Period (3-6, max. 6) Ebrey
Introduction to the English-language literature on Chinese history through the Song dynasty. Recommended: HSTAS 452 or equivalent.

HSTAS 552 Seminar in Chinese History: Earliest Times to 1276 (3-6, max. 12) Ebrey
Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 553 Seminar in Chinese History: Earliest Times to 1276 (3-6, max. 12) Ebrey
Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 554 Seminar in Chinese History: Earliest Times to 1276 (3-6, max. 12) Ebrey
Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 555 Seminar in Chinese History: Earliest Times to 1276 (3-6, max. 12) Ebrey
Methods and materials for research in early imperial Chinese history. Prerequisite: reading knowledge of classical Chinese. Recommended: HSTAS 452, HSTAS 550, or HSTAS 551, or equivalent.

HSTAS 560 Field Course in Chinese History: 1276-1895 (3-6, max. 6) Guy
Introduction to the English-language literature on the Yuan, Min, and Qing dynasties. Recommended: HSTAS 453 or equivalent.

HSTAS 561 Field Course in Chinese History: 1276-1895 (3-6, max. 6) Guy
Introduction to the English-language literature on the Yuan, Min, and Qing dynasties. Recommended: HSTAS 453 or equivalent.
HSTAS 562 Seminar in Chinese History: 1268-1895 ([3-6, max. 6]) Gay
Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 563 Seminar in Chinese History: 1268-1895 ([3-6, max. 6]) Gay
Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 564 Seminar in Chinese History: 1268-1895 ([3-6, max. 6]) Gay
Materials and methods for research in imperial Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 567 Field Course in Modern Chinese History ([3-6, max. 6]) Dong
Introduction to the major English-language literature on modern Chinese history and to the major historiographical issues of the period. Prerequisite: HSTAS 454 or equivalent, and permission of instructor.

HSTAS 572 Seminar in Twentieth Century Chinese History ([3-6, max. 6]) Dong
Materials and methods for research in twentieth-century Chinese history. Prerequisite: reading knowledge of Chinese. Recommended: HSTAS 453, HSTAS 560, HSTAS 561, or equivalent.

HSTAS 573 Seminar in Twentieth Century Chinese History ([3-6, max. 12]) Dong
Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 574 Seminar in Twentieth Century Chinese History ([3-6, max. 12]) Dong
Materials and methods for research in twentieth-century Chinese history. Prerequisite: knowledge of Chinese and permission of instructor.

HSTAS 575 Seminar in Chinese History: Modern Period ([3-6, max. 12])
Research seminar in modern Chinese history. Training in the materials and methods of research, and preparation of extended research papers. Prerequisite: HSTAS 571-572 or permission of instructor and reading knowledge of Chinese.

HSTAS 581 Modern Korean History (3-6, max. 6)
Field course. Prerequisite: permission of instructor.

HSTAS 582 Seminar in Korean History ([3-6, max. 6])
Selected topics in Korean history and historiography.

HSTAS 583 Seminar in Korean History ([3-6, max. 6])
Selected topics in Korean history and historiography.

HSTAS 584 Seminar in Korean History ([3-6, max. 6])
Selected topics in Korean history and historiography.

HSTAS 590 Topics in History (5, max. 15)
Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

HSTAS 580 Race and Power in America, 1861-1940 (5) I&S
Survey of political, economic, and social history of Latin America from the Iberian conquest to the present. Lectures, discussions, and films focus on developing understanding of Latin America’s current problems through study of their historical roots. Designed for the beginning student and the nonspecialist.

HSTAA 150 Introduction to African-American History (5) I&S
Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Provides some general knowledge and serves as a basic introductory course for a sequence of lecture courses and seminars in Afro-American history. Offered: jointly with AFRAM 150.

HSTAA 202 Makers of American Foreign Policy, 1776 to the Present (5) I&S
Survey of the history of American foreign relations. Focus on the individuals responsible for initiating new foreign policies or for realigning old ones.

HSTAA 205 Asian American History (5) I&S
Introductory history of Asian Indians, Chinese, Filipinos, Japanese, and Koreans in the United States from the 1840s to the 1960s. Major themes include imperialism, labor migration, racism, community formation, and resistance.

HSTAA 212 The Military History of the United States From Colonial Times to the Present (5) I&S
Development of American military policies, organizational patterns, tactics, and weaponry, from beginnings as a seventeenth-century frontier defense force to the global conflicts and military commitments of the twentieth century. Interaction and tension between need for an effective military force and concept of civilian control of that force.

HSTAA 221 Environmental History of the U.S. (5) I&S
Survey of the relationship between nature and human history, including the impact of the non-human environment on American history and the environmental effects of colonization, urbanization, and consumerism; the cultural construction of nature in different eras and its social implications; the sources and limits of modern environmental politics.

HSTAA 225 American Slavery (5) I&S
Explores the making of American slavery from beginnings on the African coast to the plantations of the southern United States. Includes slave life, pro-slavery thought, slave management, representations of slavery then and now, abolitionism, and debates about slavery.

HSTAA 230 Race and Power in America, 1861-1940 (5) I&S
Explores race and the shaping of American society between the Civil War and World War II. Topics include reconstruction, segregation and lynching, immigration and naturalization, imperialism, and movements for social justice.

HSTAA 235 The American People and Their Culture in the Modern Era: A History of the United States Since 1940 (5)
Through study of documents, personal testimony, and other source materials, through written reports on historical problems, and through discussions, lectures, films, and audiovisual presentations, students are encouraged to examine evidence and to think "historically" about persons, events, and movements within the memory of their own generation and that immediately preceding theirs. Primarily for first-year students.

HSTAA 270 The Jazz Age (5)
Interdisciplinary study of period after World War I to Great Crash. Afro-American and Anglo-American currents and impulses that flowed together in the Roaring Twenties. Covers politics of normalcy, economics of margin, literature of indulgence and confusion, transformation of race relations, and cultural influence of jazz. Offered: jointly with AFRAM 270.

HSTAA 273 Women of the American West (5)
Women of the Trans-Mississippi West, from the time of European contact to World War II, studied in all their multifarious roles. Explores ethnicity, class, work, family, suffrage, politics, reform, women's groups, arts and entertainment, religion, civilizing and resistance, and gender ideology.

HSTAA 282 Social History of Mexico (5)
Overview of Mexican history from late Aztec times until the twenty-first century. Emphasizes how women, campesinos, indigenous populations, free and enslaved Afro-Mexicans, and the urban poor experienced the past, challenged colonial and post-colonial rule, and shaped modern Mexican society and culture.

HSTAA 283 History of the Chicano People to 1848 (5)
Historical survey of the Chicano people from pre-Hispanic times to the war between the United States and Mexico. Offered: jointly with CHSTU 180.

HSTAA 284 History of the Chicano People Since 1848 (5)
Historical survey of the Chicano people since the war between the United States and Mexico.

HSTAA 285 Latin American History Through Film (5)
Critical analysis of Latin American films as historical documents. Subjects include Iberian conquest and colonialism, the struggle for independence in the nineteenth century, social revolutions of the twentieth century, and problems of contemporary development. Readings and lectures place each film in the context of the historiography of the subject matter.

HSTAA 290 Topics in American History (5, max. 10)
Examines special topics in American history.

HSTAA 301 Foundations of American Civilization (5)
Early America from the sixteenth century to the end of the American Revolution: the founding years, social and religious development, race relations, development of the Atlantic world, origins and legacy of American independence.

HSTAA 302 American Civilization: The First Century of Independence (5)
Establishment of the constitutional system; national expansion; intellectual and cultural development; internal conflicts, the Civil War, and Reconstruction.

HSTAA 303 Modern American Civilization From 1877 (5)
Emergence of modern America, after the Civil War; interrelationships of economic, social, political, and intellectual developments.

HSTAA 313 African Americans in the American West (5)
Explores pre-1848 Spanish-speaking black settlers, slavery, post-civil war migration, buffalo soldiers. 19th and 20th century black urban settlers, World War II migration, the civil rights movement in the West, the interaction of African Americans with other people of color. Particular focus on Seattle and the Pacific Northwest.

HSTAA 315 Researching Indians' History (5)
Finding and interpreting sources of information about American Indians' history. Offered: jointly with AIS 370.

HSTAA 316 History of American Science (5)
History of science in the United States, including migration of European science, development in colonial America, growth of an American scientific community, and expansion of American science in the twentieth century. Issues of scientific attitudes to the natural world, race, ethnicity, and gender are included.

HSTAA 321 Becoming Black Americans (5)
History of Africans in America from slave trade through the Civil War, with emphasis on how gender informed African-American experience. Topics include slave trade, middle passage, life in plantation south, culture, family structure and resistance, and the experience of free blacks, North and South.

HSTAA 322 African-American History, 1865 To The Present (5)
African-American experience from Reconstruction to the present, emphasizing the variety of African-American political expression. Gender and class differences closely examined, as well as such constructs as “community,” “race,” and “blackness.”

HSTAA 334 The Sixties in America: Conflict, Confrontation, and Concession (5)
Politicocultural movements that collided in the sixties. Includes politics of confrontation and civil disobedience, economics of “guns and butter,” literature of conflict and angst, polarization of arts, transformation of race relations, role of Rock, and influence of domestic politics on foreign relations. Recommended: AFRAM 150; AFRAM 270. Offered: jointly with AFRAM 334.

HSTAA 335 American Jewish Community 1654-1885 (5)
History of Jewish community from the first Jewish settlers in America to the start of the 19th century. Focus on the Jewish community's role in American society and culture, including its contributions to American culture and its struggle for acceptance.

HSTAA 336 American Jewish History Since 1885 (5)
Political, social, economic, religious history of American Jewish community from the late 19th century to the present. Focus on the integration of immigrant community into general American society, rise of nativism, development of American socialism, World War I and II, and reactions of American Jews to these events. Offered: jointly with SISJE 336.

HSTAA 338 The United States and Vietnam (5)
American involvement in Vietnam, including: the complex of negotiations; strategies and objectives of both sides; military, political, and economic operations of the United States; efforts at pacification; impact of Vietnam on American affairs.

HSTAA 353 Class and Labor in American History (5)
The history of workers and class formation from early industrialization to the present. Focuses on the interaction of class with race, ethnicity, gender, and political culture within the context of American economic development. Explores the role of unions, labor politics, and radical movements.

HSTAA 365 The History of the American Film (5)
Explores relationship between film and American social and cultural history. Considers films as products of specific periods, individual
filmmakers, and developments within the film industry. Examines representations of political and social issues on the screen, impact of movies on our understanding of the past, and significance of genres and visual styles.

HSTAA 370 Consumer Culture in Twentieth Century America (5) I&S
Studies the American attempt in this century to create, sustain, and organize the world’s first consumer-oriented industrial society. Topics to be considered include: the economy of mass consumption, how a culture of consumption was created, and the ideas of social critics who have rejected consumerism.

HSTAA 373 Social History of American Women to 1890 (5) I&S
A multi-racial, multicultural study of women in the United States from the 17th century to 1890 emphasizing women’s unpaid work, participation in the paid labor force, charitable and reform activities, and 19th century social movements. Uses primary materials such as diaries, letters, speeches, and artifacts. Offered: jointly with WOMEN 383; W.

HSTAA 377 History of Canada (5) I&S
General survey and analysis of political, economic, social, and cultural aspects of Canadian history from the foundation of New France to present; Canadian-American relations, the rise of Quebec nationalism, and the development of the Canadian West. Offered: jointly with SISCA 377.

HSTAA 381 Latin America: The Early Colonial Period (5) I&S
Discovery and founding of Spanish and Portuguese empires in the New World and their development until the eighteenth-century reorganizations.

HSTAA 382 Latin America: Late Colonial and Early National Periods (5) I&S
Imperial reforms, the struggle for independence; the founding of new nations.

HSTAA 383 Modern Latin America (5) I&S
Analysis of economic problems, political and social changes, and intellectual trends in major Latin American republics since the late nineteenth century.

HSTAA 384 Latin America: Inter-American and Intra-Continental Relations (5) I&S
Inter-American relations, focusing on the United States’ diplomatic and military responses to the problems of Latin America since 1776. Intra-Latin American relations and regional organizations (e.g., the Organization of American States).

HSTAA 401 American Revolution and Confederation (5) I&S
Causes of separation of the United States from the British empire; political theory of the Revolution; its military history; diplomacy of the Revolution; the Revolution as a social movement; intellectual aspects; readjustment after independence; the formation of the American union; the Constitution.

HSTAA 404 New England: From the Foundings to the Civil War (5) I&S
New England from colonial beginnings to the region’s emergence to national leadership in the mid-nineteenth century. Emphasis on Puritanism, the New England town, adjustment to empire, revolution and constitution making, the growth of party, abolitionism, the flowering of a regional culture, and the personalities who embodied these key themes and periods.

HSTAA 406 Asian American Activism (5) I&S
Explores the multiple political traditions forged by Asian Americans, from the earliest challenges to racist laws and unequal wages to the latest debates over affirmative action and racial profiling. Examines Asian American communities organized to oppose and to perpetuate social inequalities. Offered: jointly with AAS 406.

HSTAA 407 Andrew Jackson’s United States (5) I&S
In-depth examination of the U.S. from 1820 to 1850, including changes which affected American politics, society, and culture.

HSTAA 409 American Social History: The Early Years (5) I&S
Survey of American society and institutions from the colonial era through the Civil War, with special attention to reform, labor, immigration, education, law enforcement and the city.

HSTAA 410 American Social History: The Modern Era (5) I&S
Survey of American society and institutions from Reconstruction to the present with special attention to reform, poverty, social mobility, immigrant and ethnic groups, the city, and law enforcement.

HSTAA 411 The United States During the Era of Civil War and Reconstruction (5) I&S
Conflicting interests, ideologies, and ways of life in the United States from the 1840s to the 1870s.

HSTAA 412 The Westward Movement, 1700-1850 (5) I&S
Anglo-American advance into interior of continental United States culminating in occupation of Far West. Rivalry with New France and New Spain in colonial period; role of federal government in westward expansion; land policy and land distribution; migration, settlement, and the pioneering experience; federal Indian policies and implementation; political evolution, urbanization, and economic development of trans-Appalachian West; shaping of national character and institutions.

HSTAA 413 History of the Trans-Mississippi West (5) I&S
Anglo-American exploration, conquest, occupation, and exploitation of the trans-Mississippi West, with emphasis on economic development into the twentieth century. Considers wide range of developmental themes (social, political, cultural) in historiography of American West.

HSTAA 414 The Canadian West, 1670-1990 (5) I&S
Examines the history of colonization and settlement of Canada’s four westernmost provinces with emphasis on their economic, social, and Native history.

HSTAA 415 History of Indian-White Relations in Anglo-America (5) I&S
Explores the wide variety of interactions in North America, ranging from close alliances to outright warfare, between Native Americans and Europeans and their descendants from contact through the removal of most of the remaining eastern Indians to land west of the Mississippi River during the 1830s.

HSTAA 417 Indians in Western Washington History (3) I&S
Harmon
Relations of Indians and non-Indians in the Puget Sound region, 1790s to the present, with emphasis on evolving ideas about Indian identity. Offered: jointly with AIS 425.

HSTAA 431 American Politics and Society Since 1920 (5) I&S
Political, social, economic, and intellectual developments in the United States from 1920 to the present.
HSTAA 432 History of Washington and the Pacific Northwest (5) I&S Exploration and settlement; economic development; growth of government and social institutions; statehood.

HSTAA 454 The Intellectual History of the United States (5) I&S/VLPA Lectures and discussions devoted to the development of the American mind, from historical beginnings to the present.

HSTAA 462 Diplomatic History of the United States, 1901-Present (5) I&S Foreign policy of the United States government during the twentieth century. International wars and the other major episodes in diplomacy are emphasized.

HSTAA 473 Homefront: American Cultures and Society in the 1940s (5) I&S An exploration of the impact of WWII on American culture and social thought. Topics include the effects of war on civil liberties and civil rights, the uses of nationalism, patriotism, and racial ideology, the internment of Japanese-Americans, responses to the Holocaust, and the effects of war on social life.

HSTAA 480 Labor and Popular Movements in Latin America (5) I&S Interdisciplinary approach to origins and trajectory of labor movement from late nineteenth century to present. Emphasis in contemporary period on popular movements, including neighborhood associations, religious base communities, women’s movement, and ethnic mobilization for democratic social and political reform. Recommended: two non-English-language Latin American studies courses. Offered: jointly with SISLA 480.

HSTAA 482 The History of Brazil: Colonial Period to the Present (5) I&S Colonial foundations; the first and second empires; the old and new republics; current problems; prospects for the future.

HSTAA 487 History of Mexico: 1822 to the Present (5) I&S Political, social, and economic history of Mexico from its independence from Spain to the present.

HSTAA 488 History of the Caribbean and Central America (5) I&S Political, social, and economic history of principal countries in the Caribbean and Central America from their discovery to the present.

HSTAA 490 Topics in American History (5, max. 10) I&S Examines special topics in American history.

HSTAA 501 American History: Early (3-6, max. 6)

HSTAA 503 Seminar in American History, Early (3-) Research seminar in early American History, 1600-1875.

HSTAA 504 Seminar in American History, Early (3-6, max. 12) Research seminar in early American History, 1600-1875.

HSTAA 506 Slavery in the Americas (5) Explores the rise of American slavery beginning with the development of the Atlantic slave trade between southern European powers and coastal African traders. Topics include cultures of slavery in the Americas, comparative racial formations, cultural change, and the role of gender in slave societies.

HSTAA 512 American History: Western (3-6, max. 6)

HSTAA 513 Seminar in American History: Western ([3-6, max. 12]-)

HSTAA 514 Seminar in American History: Western (-[3-6, max. 12])

HSTAA 516 Hispanics of the United States (3-6, max. 6)

HSTAA 517 Field Course in American Indian History (5) Field-reading course. Survey of major problems and literature concerning indigenous peoples of North America and their descendents.

HSTAA 519 Asian American History (5) Introduces students to the field of Asian American history, with an emphasis on historiographical shifts and debates. Includes a broad range of topics and methodologies that often cross disciplinary boundaries.

HSTAA 521 American History: Writings and Interpretations, 1770-1870 (4-6)

HSTAA 522 American History: Writings and Interpretations Since 1870 (4-6)

HSTAA 524 American Social History Before 1860 (3-6, max. 6) Field course. Survey of major problems and literature in American social history before 1860.

HSTAA 525 American Social History After 1860 (3-6, max. 6) Field course. Survey of major problems and literature in American social history after 1860.

HSTAA 531 American History: Twentieth Century (3-6, max. 6)

HSTAA 532 Seminar in American History: Recent Period ([3-6, max. 12]-)

HSTAA 533 Seminar in American History: Recent Period (-[3-6, max. 12]-)

HSTAA 534 Seminar in American History: Recent Period (-[3-6, max. 12])

HSTAA 540 African American Urban History: 1700-2000 (5) Examines the growth and evolution of African-American urban communities from the colonial era to the present, with particular emphasis on cities of the West.

HSTAA 549 Culture, Politics, and Power in Nineteenth-Century Black America (5) Camp Canonical issues, problems, and topics in nineteenth-century black social history. Traces major developments during the period; engages historiographical debates; and explores methodological questions such as the intersection of social and cultural history, and the challenges and possibilities of writing the history of a people with few written records.

HSTAA 550 African-American History to Reconstruction (5) Comprehensive introduction to the major topics and writings in African-American history from the colonial era to 1900, including the inception of slavery, free Blacks, slave revolts, Black abolition, Blacks in the Civil War and Reconstruction, and the Black female role in the struggle for freedom.
HSTAA 551 African-American History Since Reconstruction (5)
Comprehensive introduction to the major topics and writings in African-American history in the twentieth century, including Jim Crow era, Black Women's Movement, Harlem Renaissance, legal origins of Civil Rights Revolution, Second Reconstruction, and Politics of Cultural Pluralism.

HSTAA 552 Graduate Seminar in African-American History (5-)
Research experiences and opportunities in African-American history. Provides students with skills and methodology to pursue advanced research in the field.

HSTAA 553 Graduate Seminar in African-American History (5-)
Research experiences and opportunities in African-American history. Provides students with skills and methodology to pursue advanced research in the field.

HSTAA 554 American History: Intellectual (3-6, max. 6)

HSTAA 555 Seminar: American Intellectual History (5-6)
Develops research and writing competence in American intellectual history. Prerequisite: permission of instructor or graduate program coordinator.

HSTAA 556 Seminar: American Intellectual History (4-6)
Develops research and writing competence in American intellectual history. Prerequisite: permission of instructor or graduate program coordinator.

HSTAA 561 History of American Foreign Policy (3-6, max. 6)

HSTAA 562 Seminar in American Diplomatic History (4-6)

HSTAA 563 Seminar in American Diplomatic History (4-6)

HSTAA 570 American Environmental History (5)
Readings in environmental history emphasizing theory, methodology, and principal themes in the field. Readings emphasize the environmental history of North America and the United States.

HSTAA 581 Latin American History: Colonial Period (3-6, max. 6)

HSTAA 582 Latin American History: National Period (3-6, max. 6)

HSTAA 583 Seminar in Latin American History (4-6, max. 12)
Problems of historical research in the history of Latin America from colonial beginnings to the present.

HSTAA 584 Seminar in Latin American History (4-6, max. 12)
Problems of historical research in the history of Latin America from colonial beginnings to the present.

HSTAA 585 Seminar in Latin American History (4-6, max. 12)
Problems of historical research in the history of Latin America from colonial beginnings to the present.

HSTAA 590 Topics in American History (5, max. 15)
Seminar on selected topics in American history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

Modern European History

Course Descriptions

HSTEU 205 European Witch Trials (5) I&S
Witchcraft and magical beliefs in Europe considered as a problem in intellectual, social, and legal history. Medieval background, systematization of witchcraft theory in fifteenth century; comparison of learned and popular beliefs; mechanisms of witch trials and inquisitorial procedure; the Faust legend; growth of skepticism and decline of witchcraft in seventeenth century.

HSTEU 211 France: A Portrait (5) I&S
Thematic approach to the history of France. Abandons the conventional chronological format in favor of a constellation of topics and themes — architecture, science, sex, cities, barricades, etc. — that, taken together and in historical perspective, make up a portrait of France.

HSTEU 220 Introduction to East European Studies (5) I&S
Introduction to the history of post-1945 Eastern Europe focusing on political, economic, social, cultural, and diplomatic issues. Countries surveyed include Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, and Yugoslavia. Offered: jointly with EURO 220.

HSTEU 250 Rome (5) I&S/VLPA
Focuses on Rome as an historical, intellectual, and artistic world center. Literary and historic documents, visual arts, architecture, film, and opera used to explore the changing paradigms of the Eternal City. In English. Offered: jointly with ART H 250/ITAL 250.

HSTEU 273 Women and Gender in Modern Europe (5) I&S
Examines European women’s changing social role and competing views of femininity from the Enlightenment to the end of the cold war. Special focus on the relationship of gender and politics and on the female body in bourgeois society, industrialization, imperialism, the welfare state, fascism, and the cold war.

HSTEU 274 Twentieth Century Europe (5) I&S
Introduction to themes in 20th-century European history (1890s-1990s), including the histories of fascism, world war, communism, decolonization, and the fate of Europe under the European Union.

HSTEU 275 Life in England (5) I&S
Social history of England from the Norman conquest to the present, seen through letters, autobiographies, novels, and plays of the time. Life of the ordinary inhabitant-in the village and the manor house.

HSTEU 290 Topics in European History (5, max. 10) I&S
Examines special topics in European history.

HSTEU 301 Early Modern European History: 1450-1648 (5) I&S
Political, social, economic, and cultural history from the late Renaissance to the Peace of Westphalia.

HSTEU 302 Modern European History: 1648-1815 (5) I&S
Political, social, economic, and cultural history from the Peace of Westphalia to the fall of Napoleon.

HSTEU 303 Contemporary European History Since 1815 (5) I&S
Political, social, economic, and cultural history from the fall of Napoleon to the present.

HSTEU 304 Cultural History of Renaissance Europe (5) I&S/VLPA
Examination of Medicean Florence, late sixteenth-century France,
Elizabethan England, and the baroque courts of the early seventeenth century as cultural centers. Includes analysis of painters such as Botticelli and Rubens; poets such as Ronsard and Donne; philosophers such as Pico and Montaigne; and playwrights such as Marlowe, Shakespeare and Lope de Vega.

HSTEU 323 France Since 1814 (5) I&S
Political, economic, and social history since the Congress of Vienna. Special emphasis upon the continuity of the revolutionary tradition.

HSTEU 334 Germany 1871-1989 (5) I&S
Society and politics from Germany’s first unification to its reunification; domestic and foreign policy; political, economic, social, and cultural developments; high emphasis on German society’s self-perception and on the variety of interpretations of this period’s history Offered: by different “schools” of historians.

HSTEU 361 Spain and Its Golden Age, 1469-1700 (5) I&S
History and culture of Spain and its empire from the late Middle Ages through the seventeenth century.

HSTEU 364 Modern Greece: 1821 to the Present (5) I&S
Politics and society of Greece from War of Independence to the present. Emergence and development of the Greek state; Greece in the world wars; civil war and post-war politics; military dictatorship; transition to democracy; recent developments. No prior study of Greece assumed. Offered: jointly with EURO 364.

HSTEU 368 Modern European Jewish History (5) I&S Stein
Surveys European Jewish history from the Spanish expulsion (1492) to World War I (1914). Considers diversity of European Jewries and the factors that cohered them. Examines how European Jewries ordered their lives, shaped gender and class norms, and interacted with the societies in which they lived. Offered: jointly with SISJE 368.

HSTEU 376 Modern Irish History (5) I&S
Political and social history from 1800 to the present; the Irish Question after the Act of Union; development of Irish nationalism in the Home Rule and Sinn Fein periods; the Irish Free State and Northern Ireland since 1921; current problems in Northern Ireland.

HSTEU 378 The Making of Contemporary France (5) I&S
Historical origins and subsequent development of nine contemporary problems and characteristics of French government and politics, economy, and society.

HSTEU 380 History of Scandinavia to 1720 (5) I&S
Scandinavian history from the Viking Age to 1720, with an emphasis on the political, social, and economic development of Denmark, Norway, Sweden, Finland, and Iceland from the Middle Ages to the Enlightenment. Offered: jointly with SCAND 380.

HSTEU 381 History of Scandinavia Since 1720 (5) I&S
Scandinavian history from the Enlightenment to the Welfare State with emphasis on the political, social, and economic development of the modern Scandinavian nations of Denmark, Norway, Sweden, Finland, and Iceland. Offered: jointly with SCAND 381.

HSTEU 401 The Italian Renaissance: (5) I&S
Conditions of Renaissance culture: Italian republics and despots, humanism, the classical ideal of the arts, Machiavelli and the foundations of modern political thought; the end of an era.

HSTEU 402 The Reformation (5) I&S
Origins of the disunity of Europe in the crisis of the sixteenth century with emphasis on the relations between religion and politics.

HSTEU 405 European Intellectual History: Eighteenth Century (5) I&S/VLPA
Development of the social sciences, moral theory, political theory, and religious thought in eighteenth-century Europe. Rationalism, empiricism, utilitarianism, and the sources of idealism.

HSTEU 406 European Intellectual History: Nineteenth Century (5) I&S/VLPA
Selected topics in intellectual history up to 1890. The philosophical consequences of the French Revolution, the development of idealism, conservatism, romanticism, and early socialist theory; positivism, the problems of historicism, new forms of Christian apologetics, utilitarianism in decline, liberalism as philosophy, the early Marx.

HSTEU 407 European Intellectual History: Twentieth Century (5) I&S/VLPA
Selected topics in the intellectual history of the late nineteenth and early twentieth centuries. The aftermath of Darwinism, the problems of methodology in modern social science, historicism and moral relativism, irrationalism in philosophy and social theory, revisionism in secular and orthodox religions.

HSTEU 411 Europe: 1814-70 (5) I&S
Development of Europe during the age of Metternich, the revolutions of 1848, and the emergence of new national states.

HSTEU 412 Europe: 1870-1914 (5) I&S
Impact of population increase and technological change on European society; stresses and strains in European life and outlook.

HSTEU 413 Europe: 1914-45 (5) I&S
Politics and society of Europe in the age of the concentration camp.

HSTEU 414 Europe Since 1945 (5) I&S
Political, economic, and military developments in Europe under the impact of the Cold War.

HSTEU 415 Europe in the Second World War (5) I&S
Inquiry to discover what the war of 1939-45 was about and what it did to more than five hundred million Europeans.

HSTEU 422 The French Revolution and Napoleon: 1789-1815 (5) I&S
Transformation of France under the Revolution of 1789; the Reign of Terror and Napoleon; the impact of the revolution and Napoleon upon Europe.

HSTEU 432 Germany: 1914-1945 (5) I&S
Politics and society from the collapse of the Bismarckian empire to the collapse of Hitler’s empire.

HSTEU 440 History of Communism (5) I&S
Communism from its origins in the Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Recommended: two history or politics of Europe courses. Offered: jointly with SISJE 440.

HSTEU 444 Imperial Russia: 1700-1900 (5) I&S
Development of Russia from Peter the Great to Nicholas II. Offered: jointly with SISJE 444.

HSTEU 445 Twentieth-Century Russia (5) I&S
Russia and the USSR from Nicholas II to the present. Offered: jointly with SISJE 448.

HSTEU 451 East-Central Europe Since 1342 (5) I&S
Focus on the lands of today’s Poland, Czechoslovakia, Hungary, and Germany from the time they were great powers to the present. Traces the major changes in the fortunes of these lands in both local and international settings.
HSTEU 452 Eastern Europe Since 1918 (5) I&S
Poland, Czechoslovakia, Hungary, Romania, Yugoslavia, Bulgaria, and Albania, from the end of World War I to the present.

HSTEU 453 History of the Balkans, 1400 to the Present (5) I&S
Centuries of Ottoman rule that produced a new basis for the reemergence of independent states in the nineteenth and twentieth centuries; history of these new states until the present.

HSTEU 454 Baltic History (5) I&S
Overview of the history of the area occupied by the Baltic countries of Latvia, Lithuania, and Estonia. Emphasizes their emergence as modern European nation-states. Era from World War I to present treated in depth, including the historical role and present situation of non-Baltic peoples, particularly Russians. Offered: jointly with SCAND 454.

HSTEU 464 The Jews in Spanish History (5) I&S

HSTEU 465 The Jews of Eastern Europe (5) I&S
Jewish society in Poland, Russia, the Hapsburg Lands, and Romania from the late Middle Ages to the Holocaust. Offered: jointly with SISJE 465.

HSTEU 466 The Sephardic Diaspora: 1492-Present (5) I&S
Stein
Examines the history and culture of Sephardic Jewry from the expulsion from the Iberian Peninsula in 1492 to the present. Explores the creation of Sephardic communities in the Dutch and Ottoman Empires, Western Europe, the Americas, and Africa, and the history of the conversos and “hidden Jews.” Offered: jointly with SISJE 466.

HSTEU 470 The Jacobethan Age: England 1580-1630 (5) I&S
Emphasis on arts and society instead of the traditional kings, battles, and politics; the way people at all levels of society lived, in towns and in the countryside, within the bounds of the royal court or outside in the political wilderness. Classes on poetry, drama, music, architecture, painting, interior decoration, and some of the minor arts, as well as on demography and some of the traditional historical subjects. Not open for credit to students who have taken 471 or 472.

HSTEU 471 England in the Sixteenth Century (5) I&S
Political, administrative, and social history from Henry VII to Elizabeth I, with emphasis on the Reformation and its effects and on conditions of life in Elizabethan England. Not open to students who have taken 470.

HSTEU 472 England in the Seventeenth Century (5) I&S
Political, administrative, and social history from the accession of James I to the Glorious Revolution. Not open to students who have taken 470.

HSTEU 474 England in the Nineteenth Century (5) I&S
Political, social, and cultural development; the agrarian, industrial, and French revolutions; the rise of parliamentary democracy; the Victorian age; political thought from utilitarianism to Fabianism; Irish home rule.

HSTEU 475 England in the Twentieth Century (5) I&S
From the Boer War to the present; conservatism, liberalism, and socialism; England in two world wars; the decline of British imperialism.

HSTEU 482 Fascism in Europe (5) I&S
History of the fascist era in modern Europe from 1919 to 1945. A study of the principal examples of national fascism and fascist-like movements coupled with a general theoretical consideration of the phenomenon.

HSTEU 484 Colonial Encounters (5) I&S
History of European colonialism, focusing on British, French, and Dutch colonial encounters from 1750s to 1950s. Units on colonial law, medicine, religion, sexuality, and commodity culture. Offered: jointly with CHID 484.

HSTEU 490 Topics in European History (5, max. 10) I&S
Examines special topics in European history.

HSTEU 501 Renaissance Field Course (3-6, max. 6)
Topics in the cultural, political, and social history of the Renaissance era.

HSTEU 502 Reformation Field Course (3-6, max. 6)
Topics in the religious, political, and social history of the Reformation era.

HSTEU 505 Early Modern European History (3-6, max. 18)
Select topics in early modern European history. Topics vary from quarter to quarter. Prerequisite: permission of instructor.

HSTEU 510 Core Seminar in the History of Modern Europe (5-)
An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 511 Core Seminar in the History of Modern Europe (5-)
An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 512 Core Seminar in the History of Modern Europe (5-)
An introduction to historiographical classics and exemplary new works in the various fields of modern European history. Members of the seminar choose research topics and present the results of their research to the seminar.

HSTEU 515 Modern European Intellectual History (3-6, max. 6)

HSTEU 516 Seminar: European Intellectual History (5-6-)

HSTEU 517 Seminar: European Intellectual History (5-6-)

HSTEU 521 Modern European History: France (3-6, max. 6)

HSTEU 531 Modern European History: Germany (3-6, max. 6)

HSTEU 532 Seminar in Modern European History: Germany (5-6-)

HSTEU 533 Seminar in Modern European History: Germany (5-6-)

HSTEU 534 Seminar in Modern European History: Germany (5-6-)

HSTEU 544 Modern Russian History (3-6, max. 6)
HSTEU 545 Seminar in Modern Russian History ([3-6, max. 6]-)  
Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 546 Seminar in Modern Russian History ([-3-6, max. 6]-)  
Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 547 Seminar in Modern Russian History ([-3-6, max. 6])  
Prerequisite: reading knowledge of Russian and either French or German.

HSTEU 548 Field Course in Soviet History (3-6, max. 6)  
Specialized course for graduate history students in the scholarly literature of Russian history since 1917. Intended for graduate students preparing for MA or Ph.D. field examination in Russian history of the Soviet period.

HSTEU 551 History of Eastern Europe: 1772-1939 (5)  
Study of the east-central European region: Poland, Czechoslovakia, Hungary, Romania, and the Balkan countries, from their rebirth to World War II. Prerequisite: reading knowledge of German, French, Russian, or one East European language.

HSTEU 552 History of Eastern Europe: 1939 to the Present (5)  
Prerequisite: reading knowledge of one major European or one East European language.

HSTEU 553 Seminar in Modern East European History ([3-6, max. 6]-)  
Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 554 Seminar in Modern East European History ([-3-6, max. 6]-)  
Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 555 Seminar in Modern East European History ([-3-6, max. 6])  
Study and research involving special methods dealing with the histories of the East European countries in the modern period.

HSTEU 571 English History: Tudor and Stuart (3-6, max. 6)

HSTEU 572 English History (3-6, max. 6)

HSTEU 573 Seminar in Modern English History ([3-6, max. 6]-)  
History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

HSTEU 574 Seminar in Modern English History ([-3-6, max. 6])  
History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

HSTEU 575 Seminar in Tudor-Stuart History ([3-6, max. 6]-)  
History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

HSTEU 576 Seminar in Tudor-Stuart History ([-3-6, max. 6])  
History of England under the Tudors and the Stuarts. Prerequisite: HSTEU 571 or permission of instructor.

HSTEU 590 Topics in History (5, max. 15)  
Seminar on selected topics in general history, with special emphasis on preparation for field examinations. Topics vary according to interests of students and instructor.

Honors
211 Mary Gates Hall  
uwhonors@u.washington.edu

The honors program offers outstanding undergraduate students a special curriculum featuring small classes, challenging instruction, and close contact with faculty and other honors students. An emphasis on writing is incorporated into the honors core curriculum and honors seminars. Directed and independent study are particularly encouraged for upper-division students, commonly leading to a senior honors thesis or project. For a description of honors program requirements, see the Honors Web site.

Course Descriptions

H A&S 220 Science for Honors Students I (5, max. 10)  
Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: A.

H A&S 221 Science for Honors Students II (5, max. 10)  
Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: W.

H A&S 222 Science for Honors Students III (5, max. 10)  
Evolution of an idea or concept central to the natural sciences. Intended for non-science majors. Content varies from year to year. For university honors students only. Offered: Sp.

H A&S 251 Western Civilization I (5, max. 10)  
Introduction to ideas and society in Western Civilization. For university honors students only. Offered: A.

H A&S 252 Western Civilization II (5, max. 10)  
Introduction to ideas and society in Western Civilization. For university honors students only. Offered: W.

H A&S 253 Western Civilization III (5, max. 10)  
Introduction to ideas and society in Western Civilization. For university honors students only. Offered: Sp.

H A&S 261 World Civilization I (5, max. 10)  
Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: A.

H A&S 262 World Civilization II (5, max. 10)  
Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: W.

H A&S 263 World Civilization III (5, max. 10)  
Introduction to ideas and society of civilization other than the Western. Specific civilization (Chinese, Japanese, Middle Eastern, South Asian) differs from year to year and section to section. For university honors students only. Offered: Sp.

H A&S 300 Introduction to the Professions (2-5, max. 15)  
Studies oriented toward professional work (law, medicine, public affairs). For university honors students only.

H A&S 350 Honors Seminar (2, max. 20)  
Discussion of selected topics in a variety of subject-matter fields. Topics and reading material vary from year to year. For university honors students only. Credit/no credit only.

H A&S 396 Interdisciplinary Special Topics—Natural Science (1-5, max. 10)
Special courses drawn from interdisciplinary groups in the natural sciences. Content varies.

H A&S 397 Interdisciplinary Special Topics—Social Science (1-5, max. 10)
Special courses drawn from interdisciplinary groups in the social sciences. Content varies.

H A&S 398 Interdisciplinary Special Topics—Humanities (1-5, max. 10)
Special courses drawn from interdisciplinary groups in the humanities. Content varies.

H A&S 499 Honors Independent Study or Research (1-5, max. 10)
Faculty supervised honors independent study or research for students in areas extending beyond their major departments or along lines not otherwise accommodated by existing honors courses. Honors students only.

Human Rights
Adviser
42 Gowen, Box 353530
206-543-2396
lsisadv@u.washington.edu

111 Thomson, Box 353650
206-543-6001
lsisadv@u.washington.edu

The Human Rights minor is offered at all three University campuses, allowing students to take advantage of the expertise available on the campuses where they are not regularly in residence, although the minor can be completed on any one campus.

Minor
Minor Requirements: 25 credits, to include the following:
10 credits from an approved list of courses* concerned with human rights as a core concept.
5 credits from an approved list of courses* concerned with human rights in a broad context.
10 additional credits drawn from the above approved lists of courses concerned with human rights.*

At least 3 credits of the required 25 credits must be in a human-rights-related internship, practicum, international study abroad, or demonstrated equivalent. Courses that satisfy this requirement include BIS 403, BIS 480; LSJ 310, LSJ 499; POL S 496, SIS 399, and similar practicum and study-abroad courses in other programs (on the Seattle campus); and TIAS 496. See adviser for faculty-approved alternatives. Courses used to satisfy this requirement must be approved/monitored by the faculty offering courses appropriate to the minor. Credits for the minor may be completed across the three UW campuses, or on any single campus. If the minor is completed by a Seattle-major student, no more than 10 credits applied to the minor may be in the student’s major department.

*The list of core courses and context courses is maintained by the Human Rights Advisory Committee. For the current list of such courses, see depts.washington.edu/hrights/hrminor.html. Note: From time to time, the Advisory Committee adds, subtracts, or reclassifies courses on the approved list. Students who have planned their studies on the basis of an earlier list may fulfill the requirements of the minor as specified in that earlier list.

International Studies
401 Thomson

The Henry M. Jackson School of International Studies organizes and supports interdisciplinary teaching and research in international affairs. The school consists of a group of interdisciplinary area-studies programs on major world regions, as well as topical and comparative programs of study that transcend national and regional boundaries.

Adviser
111 Thomson, Box 353650
206-543-6001
jisadv@u.washington.edu

The School of International Studies offers the following programs of study:
- The Bachelor of Arts degree with a major in international studies with options in Asian studies, Canadian studies, comparative religion, European studies, international studies, Jewish studies, and Latin American studies
- Minors in African studies, Canadian studies, China studies, comparative Islamic studies, comparative religion, European studies, international forestry, international studies, Japan studies, Jewish studies, Korea studies, Latin America studies, South Asian studies, and Southeast Asian studies.

African Studies
Lynn M. Thomas, Chair
Adviser
302D Thomson, Box 353650
206-616-0998
african1@u.washington.edu

African Studies involves a cross-campus, interdisciplinary group of faculty, staff, and students who share an interest in interdisciplinary questions relating to Africa and the African diaspora. Africa-focused courses are taught in a variety of scholarly disciplines and programs, including art, music, anthropology, forestry and fisheries, geography, history, international health, and American ethnic studies. The Program on Africa coordinates and disseminates information on African Studies activities; administers a minor for undergraduates; and facilitates research, internships, and study abroad opportunities.

Minor
Minor Requirements:
30 credits chosen from at least three departments whose courses are listed below, including at least 10 credits at the 100, 200, or 300 level and at least 20 credits at the 400 level.

Students are encouraged to study relevant languages such as Arabic, Swahili, Portuguese, or French.

Courses may be chosen from the following: AFRAM 150, AFRAM 201, AFRAM 306 through AFRAM 309, AFRAM 401, AFRAM 402, AFRAM 403; ANTH 313, ANTH 318, ANTH 401, ANTH 402, ANTH 423, ANTH 471; ARCHY 303, ARCHY 312, ARCHY 401, BIO A 388, BIO A 389; ARAB 401, ARAB 402, ARAB 421, ARAB 422, ARAB 423; ARCHY 251; ART H 205, ART H 230, ART H 300, ART H 337, ART H 500, ART H 436, ART H 437, ART H 438; GEOG 220, GEOG 371, GEOG/SIS 335; HIST 151, HIST 152, HIST 260, HIST 425, HIST 451, HIST 452; MUSIC 317, MUSIC 319; NEAR E/SISME 210; POL S 331, POL S 449; SIS 456/POL S 450, SISAF 444, SISAF 499; SOC/AES 462; WOMEN/SIS/ANTH 345.

Minimum grade of 2.0 in each course applied toward the minor.

Asian Studies
The undergraduate program in Asian Studies is directed by a committee consisting of the chairs of China Studies, Korea Studies, Japan Studies, South Asian Studies, and Southeast Asian Studies (see below under Minors), and a designated faculty coordinator. The Asian Studies major combines language training with interdisciplinary study of an Asian region or single country. The program
emphasizes social science approaches to the study of history, culture, and society, with provision for study of literature and the arts as well. Students may focus on China, Japan, Korea, South Asia (Bangladesh, India, Nepal, Pakistan, Sri Lanka, Tibet), Southeast Asia (Brunei, Burma (Myanmar), Cambodia, East Timor, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, Vietnam), or Asia as a whole. Five interdisciplinary minors on individual countries or regions also are offered.

**Bachelor of Arts**

**Suggested First- and Second-Year College Courses:** Either SISA 209 or 210, and two introductory Asian civilization course (see major requirements, below). Progress toward two years of a relevant Asian language. Courses that develop writing skills, especially in the social sciences.

**Department Admission Requirements**

Students in good academic standing may declare this major at any time.

**Major Requirements**

80 credits as follows:

- 30 credits or second-year equivalent language training in a language appropriate to student’s option
  
  Either SISA 209 or SISA 210 (5 credits)

- Two Asian civilization courses (one in student’s option and one on a second civilization) chosen from SISEA/HSTAS 212, SISEA 241, HSTAS 201, HSTAS 202, HSTAS 211, SISSE/HSTAS 221 (10 credits)

- A thematic or cross-regional course chosen from an approved list (5 credits)

- 30 credits of approved coursework from one regional or country option, or from the general Asia option

- Approved research paper required in one of the upper-division option courses

- Minimum grade of 2.0 in all courses counted toward the major (except first- and second-year language courses, where grades must average 2.00)

- 30 of the 35 credits required for the thematic/cross-regional and option requirements must be taken in residence at the University of Washington.

**Minor Requirements:**

The following are the approved Asian civilization courses for the minors: SISA 209, SISA 210; SISEA/HSTAS 212 (Korea); SISEA/HSTAS 241 (Japan); SISSE/HSTAS 221 (Southeast Asia); HSTAS 201 (India), HSTAS 202 (India); HSTAS 211 (China).

**China Studies**

R. Kent Guy, Chair

**Minor Requirements:** 30 credits, to include the following:

- HSTAS 211 and either RELIG 202 or one additional Asian civilization course from approved list above (10 credits)

- 15 credits of electives taken at the UW, chosen from SISEA 370, SISEA 444, SISEA 445, SISEA 449, SISEA 454, SISEA 468 (or their joint-listed equivalents), ECON 466, GEOG 336, GEOG 435, HSTAS 453, HSTAS 457/ WOMEN 457, HSTAS 459/WOMEN 459

- A maximum of 5 credits chosen from CHIN 373, CHIN 374, CHIN 380, CHIN 381, ART H 311, ART H 410 through ART H 418, ART H 430 also may be included

- 5 additional credits chosen from the elective list above, or in Chinese language beyond second-year level, or in upper-division transfer courses on China

- Minimum grade of 2.0 required in each course applied toward the minor.

**Japan Studies**

Marie C. Anchordoguy, Chair

**Minor Requirements:** 30 credits, to include the following:

- SISEA/HSTAS 241 and one additional Asian civilization course from approved list above (10 credits)

- 15 credits of electives taken at the UW, chosen from SISEA 242, SISEA 422, SISEA 423, SISEA 435, SISEA 440, SISEA 441, SISEA 442, SISEA 447, SISEA 474, SISEA 475, SISEA 482, SISEA 486, SISEA 487, SISEA 494 (or their joint-listed equivalents). (A maximum of 5 credits chosen from JAPAN 321, JAPAN 322, JAPAN 323, ART H 204, ART H 321, ART H 420 through ART H 427, ART H 429 also may be included in the 15 credits.)

- 5 additional credits in Japanese language beyond second-year level, or in upper-division transfer courses on Japan, or in additional electives chosen from electives listed above.

- Minimum grade of 2.0 required in each course applied toward the minor.

**Korea Studies**

Clark W. Sorensen, Chair

**Minor Requirements:** 30 credits, to include the following:

- SISEA/HSTAS 212 and one additional Asian civilization course from approved list above (10 credits)

- 15 credits of electives taken at the UW, chosen from SISEA/ ANTH 448, HSTAS 481, HSTAS 482, SIS/ANTH 449

- A maximum of 5 credits chosen from other upper-division SISEA-prefix courses on China, Japan, or East Asia also may be included

- 5 additional credits in Korean language beyond second-year level, or in upper-division transfer courses on Korea, or in additional electives chosen from list above.

- Minimum grade of 2.0 required in each course applied toward the minor.

**South Asian Studies**

K. Sivaramakrishnan, Chair

**Minor Requirements:** 30 credits, to include the following:

- HSTAS 202 or SISSA 200 and one additional Asian civilization course from approved list above (10 credits)

- 15 credits of electives taken at the UW, chosen from the following: any SISSA-prefix course or its joint-listed equivalent; ANTH 437, ANTH 471; ANTH/ENVIR 371, ANTH/ENVIR 451; ANTH/RELIG 321, ANTH 352/ RELIG 350; ART H 204, ASIAN 203, ASIAN 206, ASIA 263, ASIAN 411, HSTAS 401 through HSTAS 404, HSTAS 431; HUM 101; MUSIC 316, MUSIC 428, MUSIC 447; PHIL 412, PHIL 418; RELIG 202, RELIG 352, RELIG 354, RELIG 452; SIS/POL S 337, SIS/POL S 436; WOMEN/SIS 333, WOMEN/SIS 345

- 5 additional credits in a South Asian language beyond second-year level, or in upper-division transfer courses on South Asia, or in additional electives chosen from list above.

- Minimum grade of 2.0 required in each course applied toward the minor.

**Southeast Asian Studies**

Marjorie A. Muecke, Chair

**Minor Requirements:** 30 credits, to include the following:

- SISEA/HSTAS 221 and one additional Asian civilization course from approved list above (10 credits)

- 15 credits of electives taken at the UW, chosen from any SISSE-prefix course or its joint-listed equivalent, ANTH...
Comparative Islamic Studies offers a program that provides a broad understanding of Islamic society, culture and communications, historical development, and contemporary problems.

Bachelor of Arts

Suggested First- and Second-Year College Courses: ECON 200, ECON 201. Progress toward two years of French language. Canadian history courses. Courses that develop writing skills.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

83 credits as follows:
- 30 credits or second-year-equivalent French language training
- SIS 200, SIS 201, SIS 202; ECON 200, ECON 201; SISCA 356, SISCA 498

Minimum grade of 2.0 required in each course applied toward the minor.

Minor Requirements:

- 25 credits as follows:
  - SISCA 356 and SISCA 498 (10 credits)
  - 15 credits of electives. Recommended electives: SISCA 308, SISCA 341, SISCA 377, SISCA 424, SISCA 430, SISCA 441, or joint-listed equivalents. Other approved electives: AAS 372, ANTH 310, COM 420/SIS 419/POL S 468, ENGL 359/AIS 377

Minimum grade of 2.0 required in each course applied to the minor.

Minimum of 15 credits to be completed at the UW

Comparative Islamic Studies

Comparative Islamic Studies offers a program that provides a broad understanding of Islamic society, culture and communications, historical development, and contemporary problems.

Minor

Minor Requirements: 30 credits as follows:
- NEAR E/SISME 210 (5)
- NEAR E/RELIG 211 or NEAR E/RELIG 212 (5)
- 10 credits in Islamic religious traditions and texts, chosen from NEAR E 402, NEAR E 423, NEAR E 442, NEAR E/RELIG 430, NEAR E/RELIG 432, NEAR E/RELIG 433, ARAB 451 through ARAB 456, ARAB 459, ARAB 460, ARAB 462, ARAB 470, PRSAN 452 through PRSAN 456, TKIC 454 through TKIC 456, TKISH 451, TKISH 452

5 additional credits in a Southeast Asian language beyond second-year level, or in upper-division transfer courses on Southeast Asia, or in additional electives chosen from list above.

Minimum grade of 2.0 required in each course applied toward the minor.

Comparative Religion

Martin S. Jaffee, Chair

The Comparative Religion major introduces students to broad theoretical issues in the academic study of religion, and encourages them to explore these issues through mastering details of the textual canons, historical traditions, social contexts, and cultural forms of religion.

Bachelor of Arts

Suggested First- and Second-Year College Courses: RELIG 201, RELIG 202. Courses that develop writing proficiency. Courses in particular religious traditions such as Christianity, Judaism, Islam, Hinduism, and Buddhism. Courses in the history of civilizations such as Chinese, South Asian, and Western.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

50 credits as follows:
- RELIG 201, RELIG 202; RELIG/CHID 380
- 35 additional credits in RELIG or non-RELIG prefix courses, of which at least 15 must be at the 300 level or above, selected from the three rubrics of textual canons, historical traditions, and social contexts and cultural forms. The distribution must include at least 5 credits and no more than 20 credits in any particular rubric.

Minor

Minor Requirements: 30 credits as follows:
- RELIG 201, RELIG 202
- 15 additional credits in RELIG-prefix courses or joint-listed equivalents
- 5 additional credits chosen from RELIG courses or from ANTH/SISSE 315, ANTH 447/SISSE 445, ANTH 321, ANTH 421, HIST/SISJE 250, HIST 209, HIST 310, HSTAS 201, HSTAS 211, HSTAS/SISSE 212, NEAR E/ SISME 210, PHIL 267, SISEA/HSTAS 241, SOC 457.

European Studies

Carol G. Thomas, Chair

The curriculum in European Studies prepares students to pursue careers requiring an understanding of all the forces, both material and cultural, contemporary and historical, that are shaping Europe today (north, south, east, and west), taking into account transitions involved in the post-Soviet era and the movement toward greater political, economic, and cultural integration among the various nations involved. Students also may concentrate, within the major, on Hellenic studies, European Union studies, or Russian, East European, and Central Asian studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Progress toward two years of a modern European language. A survey course on modern Europe.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

70 credits as follows:
10 credits of a foreign language at the third-year level or beyond
15 credits of core courses, including EURO 301 (5 credits), a
survey course on modern Europe (5), and a cross-cultural
or interdisciplinary case study (5)
One quarter (10 credits minimum) of foreign study
15 credits from approved list of electives
EURO 494-EURO 495, Senior Research Seminar (10 credits)
See adviser for specific course options.

Minor
Minor Requirements: 25 credits as follows:
Foreign language through the sixth quarter
15 credits of core courses including EURO 301 (5 credits), a
survey course on modern Europe (5), and a cross-cultural
or cross-disciplinary case study (5)
10 credits from approved list of electives.

International Studies
Mary P. Callahan, Chair
The general program in International Studies gives students a
comprehensive and interdisciplinary perspective on world problems
and an ability to analyze the subtle interactions of politics,
economics, and culture within the global system.

Bachelor of Arts
Suggested First- and Second-Year College Courses: 30 credits of a
single foreign language. ECON 200, ECON 201.

Department Admission Requirements
Admission is competitive, based on overall GPA, grades in the
social sciences, a written statement of goals, language
background, and any international experience. Before
applying, students must complete either ECON 200 or
201, and either SIS 200 or 201. Grades in these courses
will be given special consideration.
Application deadline is the third Friday of each quarter;
students are notified by the sixth Friday of the quarter in
which they apply. Transfer students must be enrolled at
the UW before applying to the major.

Major Requirements
100 credits, including foreign languages, as follows:
Foreign-language competency through the second-year college
level
ECON 200, ECON 201; SIS 200, SIS 201, SIS 202, SIS 401, SIS
495, SIS 498
Three or four upper-division courses in an approved option
Three upper-division interdisciplinary courses in international
studies from an approved core list
A research paper of approximately 25 pages to be completed
in one of the courses in the student’s approved option or
in one of the approved interdisciplinary courses
Majors are required to maintain a GPA of at least 2.50, both
overall and in the program, and to earn a minimum grade
of 2.0 in all required SIS-prefixed courses.

Minor
Minor Requirements:
International Studies: 30 credits as follows:
10 credits chosen from SIS 200, SIS 201, SIS 202
15 credits in SIS-prefix courses numbered 200 or above
(courses with other JSIS prefixes are not eligible). These
15 credits must include at least 5 credits at 400 level (SIS
401 is recommended).
5 additional credits chosen from SIS-prefix courses or from
undergraduate courses having any of the following
prefixes: SISA, SISAF, SISCA, SISEA, SISJE, SISLA,
SISME, SISRE, SISSA, SISSE, EURO, RELIG
Minimum grade of 2.0 is required in each course applied toward
the minor.

International Forestry: 30 credits as follows: Core courses (18
credits) — I BUS 300 or SIS 330, GEOG/SIS 335, F M 423, and F M
492 Upper-division electives (12 credits) —
• For students majoring in forest management, wildland
conservation, forest engineering, wildlife sciences, or
environmental horticulture and urban forestry: SIS 401,
430, GEOG/SIS 375, GEOG/SIS 372, and GEOG/SISCA
308, or any I BUS, SIS, SISEA, SISSA, SISRE, SISS, or
SISSE course.
• For students majoring in other programs: ESC 322, ESC
410, F E 368, F M 320, F M 360, F M 371, F M 470, or
any F M, ESC, or F E course. See faculty adviser for other
options.
Minimum grade of 2.0 required in each course.

Jewish Studies
Paul Burstein, Chair
Jewish Studies takes an interdisciplinary approach to the global study
of Jews, exploring the rich diversity of their cultures, their
philosophies, their religious practices, their histories, their roles in
politics, and other areas of contemporary life.
Areas of concentration include ancient cultures and sacred texts,
modern literature and culture, Jewish languages, American Jewish
studies, Sephardic studies, European Jewish studies, and Israel and
Middle East studies.

Bachelor of Arts
Suggested First- and Second-Year College Courses: RELIG 210,
SISJE/HIST 250. Courses that develop writing skills. Courses in
international studies and world history — ancient, medieval, and
modern. Modern European languages, e.g., French, German, Italian,
Spanish. Progress toward two years of Hebrew.

Department Admission Requirements
Students in good academic standing may declare this major at any
time.

Major Requirements
52 credits as follows:
Introductory courses (15 credits): RELIG 210, SISJE/HIST
250, SIS 201
Jewish Studies Track (20 credits): Approved courses in either
The Judaic Cultural Tradition or The Jewish People in the
Modern World
Jewish Languages and Texts (15 credits). A minimum of 15
credits selected from an approved list of courses. Students
must be proficient in the Hebrew language through second
year level. Students in the Cultural Tradition track may
study ancient or modern Hebrew. Modern Hebrew is
required for students in the Modern World track. Under
certain circumstances substitution of coursework in an
appropriate Jewish lingua franca other than Hebrew may
be approved by petition.
SIS 494 (2 credits): Senior paper or project

The lists of Jewish Studies courses are maintained by the Jewish
Studies Program as part of its Web site. For the current list of such
courses, see

Minor
Minor Requirements: 30 credits as follows:
RELIG 210 (5 credits), SISJE/HIST 250 (5)
20 additional credits chosen from any upper-division SISJE-
prefix courses (except 499) or their joint-listed equiva-
Ients, or from ENGL 311, ENGL 312, GERMAN 295,
HEBR-prefix courses numbered 451 or higher, HEBR/
Latin American Studies

Jonathan Warren, Chair

The Latin American Studies major combines language study in Spanish and Portuguese with work in history, the humanities, and the social sciences. It provides a comprehensive, interdisciplinary understanding of this major world region, emphasizing themes such as economic development, popular movements, cultural analysis, and hemispheric relations. At the same time, it gives students the option to develop their own particular disciplinary and thematic interests.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Substantial progress toward completing two years of Spanish and one year of Portuguese, or two years of Portuguese and one year of Spanish. Courses in any of the following disciplines that deal with Latin America: history, literature, economics, geography, sociology, political science.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

52 credits plus language training, as follows:

- Training in two foreign languages of Latin America, to include the sixth quarter (or equivalent) of one language chosen from Spanish, Portuguese, or French, and the third quarter (or equivalent) of a second of these languages.
- SIS 201 (5 credits)
  
  Latin American History (10 credits): Courses to be selected from an approved list.
- Contemporary Latin America (15 credits): Courses drawn from a range of disciplines including anthropology, comparative literature, geography, international studies, and Spanish. See program Web site for a complete list of courses.
- Electives (15 credits): Courses on Latin America and international studies selected from an approved list.
- Interdisciplinary seminar (5 credits): SISLA 485, SISLA 486, SISLA 492, or another course chosen from an approved list of research seminars.
- SIS 494 (2 credits): Senior paper or project

Lists of Latin American Studies courses are maintained by the Latin American Studies Program as part of its Web site. For the current list of such courses, see http://jsis.washington.edu/programs/latinam/Webs/Program/Courses/courseList.asp

Minor

Minor Requirements: 30 credits as follows, plus foreign language:

- One year of Spanish or Portuguese, or equivalent proficiency
- At least 3 credits chosen from HSTAA 185, HSTAA 381, HSTAA 382, HSTAA 383, and HSTAA 384

At least 5 credits chosen from CHSTU 101, CHSTU 200, CHSTU 330, HSTAA 285, MUSIC 433, PORT 310, PORT 335, SISLA/SPAN 485, SISLA/SPAN 486, SISLA/SPAN 489, SPAN 307, SPAN 320, SPAN 321, SPAN 322, SPAN 332, SPAN 333, SPAN 376, SPAN 439, SPAN 473, SPAN 474, SPAN 475, SPAN 476, SPAN 483, SPAN 484

At least 5 credits chosen from ANTH 404, ANTH 418, CHSTU 255, CHSTU 352, CHSTU 354, CHSTU 355, SISLA 451, SISLA 468, SISLA 470, SISLA 472, SISLA 473, SISLA 474, SISLA 475, SISLA 476, SISLA 478, SISLA 479, SISLA 480, SISLA 481, SISLA 482, SISLA 483, SISLA 484, SISLA 485, SISLA 486, SISLA 487, SISLA 488, SISLA 283/CHSTU 180, HSTEU 361, HSTEU 462, MUSIC 300, MUSIC 317, MUSIC 319, SIS 201, SIS 401, SIS 455, SIS 480, SIS/ANTH/WOMEN 345, SISAF 444, SISLA 470 (max. 5 credits), SISLA 490, SISLA 492, SPAN 331, SPAN 461, SPAN 464, SPAN 465, SPAN 466, SPAN 478.

At least 20 of the 30 credits must be completed at the University of Washington (UW Foreign Study programs included).

Minimum grade of 2.0 required in each course applied toward the minor.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The majors offered in the School of International Studies emphasize development of critical thinking and provide a challenging framework for research and writing. Graduates attain competency in foreign language and an understanding of the political, economic and cultural underpinnings of the global system and specific world regions. This background lays a foundation for advanced study in professional and academic disciplines, and for careers in the evolving global community. Graduates work in a wide range of jobs, depending on their interests and skills, including: Foreign Service officers, international trade specialists, political analysts, human rights associates, research assistants, social studies and language teachers, international student advisers, foreign study coordinators, program officers/managers for international non-profits and NGOs, foreign exchange specialists, international sales representatives/managers, import/export brokers, marketing analysts, associate editors/publicists, international news writers/journalists.

- Instructional and Research Facilities: More than 1.5 million volumes in the University library system are related to international studies. The library receives more than 265 newspapers, 160 of which are foreign. Specialized facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. The University’s library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

The University of Washington is also a major center for research on Eastern Europe, Russia, and the independent states of the former Soviet Union, notably the Baltics and the countries of Central Asia. In addition to extensive holdings in Russian, East European, and Baltic language materials, the library has one of the best Central Asian language collections in the country and the largest collection of Latvian books outside Latvia. The strengths of the program are complemented by strong programs in East Asian and Middle Eastern Studies.

Jackson School undergraduates can draw upon an extensive roster of UW study-abroad programs to enrich their studies, including nearly 40 programs in Asia, over 80 in Europe, and another 40-45 programs in Latin America, the Middle East, and other regions of the world.
The Jackson School offers six area-studies programs that lead to a Master of Arts in International Studies degree. These include China Studies; Japan Studies; Korea Studies; Middle East Studies; Russian, East European, and Central Asian Studies; and South Asian Studies. Specific requirements vary from one program to another, but all stress interdisciplinary study within the context of the historical cultures, contemporary situations, and languages of the world areas. In addition, the Jackson School offers a program in Comparative Religion for the Master of Arts in International Studies.

The Jackson School also offers a graduate program in International Studies that concentrates on the interaction of international economic, political, and cultural processes with states and societies around the world. This program was developed in conjunction with several professional schools and is designed as a concurrent degree program.

**Graduate Program**

**Graduate Program Information**
111 Thomson, Box 353650
206-543-6001
jsisinfo@u.washington.edu

**Research Facilities (East Asia):** Research and training facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. In addition, the University is affiliated with the Inter-University Program for Chinese Language Studies in Beijing, language programs in Japan and the People’s Republic of China sponsored by the Council on International Educational Exchange, the International University Center for Japanese Language Studies in Yokohama, and other programs which provide intensive language training for advanced undergraduate and graduate students. The School has ongoing projects on China, Japan, and Korea in which advanced graduate students and recognized scholars from the United States and foreign institutions regularly participate.

See also descriptions of research facilities on Russia, East Europe, and Central Asia as well as South Asia under the appropriate headings below.

**Comparative Religion**

Martin S. Jaffee, Chair

The Comparative Religion program leading to the Master of Arts in International Studies offers an interdisciplinary curriculum in the study of religion, with several choices for areas of concentration. The required core seminars focus on methodology and comparative perspective in the study of religion. For the remaining course requirements, primary and secondary curricular concentrations are available in Buddhism, Hinduism, Judaism, Islam, Christianity, Biblical and ancient Near Eastern religion, and religion and culture; further secondary curricular concentrations are available in Greco-Roman religions, East Asian indigenous traditions, and African religious traditions.

**Admission Requirements:** See above under Graduate Program. The Comparative Religion faculty reserve the right to determine in each case whether an applicant has sufficient language preparation and background in the study of religion for acceptance into the program.

**Financial Aid:** Financial support is available in the form of Title VI Foreign Language and Area Studies Fellowships. Some Jackson School programs have additional fellowships available for specific areas of study. Graduate students are also eligible for a limited number of teaching or research assistantships and readerships.
Italian, Dutch, Spanish); certification of basic competency in the history of world religions; RELIG 501-502; one course focused on historical relations between religious traditions; at least four courses in a major concentration and two in a minor; one or two final research paper(s); and a comprehensive examination including both oral and written segments.

**International Studies**

Mary P. Callahan, Chair

The general program in International Studies provides students with broad knowledge and skills in analyzing international affairs. Designed for students entering many different professional fields, the program trains them in international and comparative studies in a multidisciplinary setting. Students are prepared to undertake sophisticated analyses of international affairs and typically will hold positions after graduation with the international divisions of federal and state governments, international divisions of banks, trading companies, policy-study institutes, corporations with international operations, and international development and educational organizations. More than half of all students are enrolled in a concurrent graduate professional-degree program. This adds approximately one year to the student’s course of study.

**Admission Requirements:** See above under Graduate Program. Those applying concurrently to a professional program (Business Administration, Public Affairs, Marine Affairs, Forest Resources, Law, or Public Health and Community Medicine) must first be accepted by the professional school. For non-concurrent applicants, preference is given to those who have a professional interest, or previous professional experience or education. Prior study of a foreign language and preparation in intermediate-level microeconomics and macroeconomics are highly recommended.

**Graduation Requirements:** Japanese or Chinese language through the third year or any other modern foreign language through the second year; SIS 500, 501, 502, 511, 512, and 522 (3 credits each); courses in two of the following three fields: a regional studies field, a professional field, or a special topics field (minimum three classes — 9 credits — for each field); two seminar papers; and an oral examination. Students in concurrent graduate-degree programs also must meet Graduate School requirements for the second degree.

**Japan Studies**

Marie C. Anchordoguy, Chair

The graduate program in Japan Studies gives students in-depth knowledge of many facets of Japan, including its history, political economy, society, and language. Course work helps prepare students for careers in business, government, journalism, secondary-school teaching, and a wide variety of other professional fields. The program is specifically designed (1) for students with bachelor’s degrees in a discipline who need language and interdisciplinary training on Japan to pursue their career goals, and (2) as preparation for doctoral work in an academic discipline involving Japan for students who have had little or no training on Japan or in the language. A concurrent degree program with the Business School (MAIS/MBA) is offered and other combinations (e.g., with Law) can be arranged.

**Admission Requirements:** See above under Graduate Program. At least one year of prior training in Japanese language is strongly recommended.

**Graduation Requirements:** Japanese language training through the third year (15 credits minimum training at the UW); SISEA 555 (5 credits) and SISEA 559 (5); 26 credits in discipline study of Japan to include at least one history course and one social science course; essay of distinction; and an oral examination.

**Korea Studies**

Clark W. Sorenson, Chair

The graduate program in Korea Studies offers courses in Korean language, history, and society. Regular offerings are supplemented by visiting faculty from political science, economics and economic development, folklore, and literature. The program emphasizes the study of Korea in the context of East Asian civilization and the modern world economy, not simply as a single country in isolation from its neighbors. The objective of the program is to provide students with a broad background which will be of use for further graduate study, or in a variety of professions such as teaching, business, and government.

**Admission Requirements:** See above under Graduate Program. Previous language training is recommended.

**Graduation Requirements:** Korean language through the third year of instruction (through the second year of instruction if the student is admitted with no previous language training); HISTAS 481-482, SISEA 584 (5 credits each), and SISEA 585 (6 credits); 15 credits in discipline study of East Asia or international studies; two seminar papers or an essay of distinction; comprehensive oral examination.

**Middle Eastern Studies**

Ellis Goldberg, Chair

The Middle East program is designed for students who wish to study the region within an interdisciplinary framework, focusing especially on the social, political, economic, and legal systems of the Middle East and/or Islamic Central Asia. To provide a thorough grounding in this region, students take courses in the social sciences, humanities, and a Middle Eastern or Central Asian language.

**Admission Requirements:** See above under Graduate Program. Although knowledge of a Middle Eastern or Central Asian language is not a prerequisite for admission, applicants are generally expected to have had at least the equivalent of one year’s study of the language in which they plan to concentrate. Students accepted with no language training may wish to begin their language study in an intensive summer program.

**Graduation Requirements:** Three 3-credit or two 5-credit Middle Eastern language courses beyond the second-year (native speakers as well as non-native speakers); 20 credits on the modern Middle East from at least two social science or humanities disciplines; one approved Jackson School course; two courses in one social science discipline or in one professional school other than courses taken for preceding requirements; either a thesis and an oral examination, or two seminar papers and a four-hour written examination.

**Russian, East European, and Central Asian Studies**

Stephen E. Hanson, Chair

Designed primarily for students with bachelor’s degrees in a discipline, the program offers a background for professional pursuits in government and nongovernmental organizations, journalism, business, or teaching, or for advanced graduate study leading to the Ph.D. degree in a discipline. The program includes language training, a concentration of study in a chosen discipline, and a combination of courses in other disciplines that deal with aspects of the area. Students usually focus on one region (Russia, East Europe, the Baltics, or Central Asia), although the program provides flexibility to take courses on another region.

**Admission Requirements:** See above under Graduate Program. A prerequisite for all applicants is two years of college-level language courses or the equivalent. For those focusing on Russia the language must be Russian; for other regions of the former Soviet Union and East Europe, two years of a language of the region, or another relevant language.

**Graduation Requirements:** Including the two years required for
entry, four years of a language of the region being studied or two years each of two relevant languages (four years of Russian required for Russian focus); SISRE 501 and 502 (3 credits each); 30 credits in disciplines other than language, with 15-20 credits in a discipline of concentration and 10-15 credits in at least two additional disciplines; a thesis (9 credits of SISRE 700); a written examination in the discipline of concentration and an oral interdisciplinary examination.

Research Facilities: The University of Washington is a major center for research on Eastern Europe, Russia, and the independent states of the former Soviet Union, notably the Baltics and the countries of Central Asia. In addition to extensive holdings in Russian, East European, and Baltic language materials, the library has one of the best Central Asian language collections in the country and the largest collection of Latvian books outside Latvia. The strengths of the program are complemented by strong programs in East Asian and Middle Eastern Studies.

South Asian Studies
K. Sivaramakrishnan, Chair

The South Asian Studies program has been designed for students whose career objectives involve teaching and research in a traditional discipline with geographical interests within South Asia (i.e., India, Pakistan, Bangladesh, Sri Lanka, Tibet, and Nepal); those planning to enter professional-training programs (e.g., education, business administration, journalism, law, or public affairs); or students planning a career in government service (e.g., the foreign service) who wish to acquire a special understanding of the South Asia area.

Admission Requirements: See above under Graduate Program.
Graduation Requirements: Completion of the third year of a South Asian language to include at least 7 credits at the 400 level or above; SISSA 510 and 511 (5 credits each); 26 credits in coursework from at least two different departments, focused primarily on South Asia or in courses taught by South Asia faculty on topics relevant to the student’s specializations (students may take a maximum of 10 credits not focused on South Asia, nor taught by South Asia faculty, to help fulfill disciplinary or professional objectives); two seminar papers; and a comprehensive oral examination.

Research Facilities: The University of Washington library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

Faculty

Marie Anchordoguy, Associate Professor, East Asian Studies, Chair, Japan Studies Program Jackson School of International Studies

David Bachman, Professor
B.A. 1975 with High Honors, History, Swarthmore College, M.A. 1977, Political Science, Stanford University, Ph.D. 1984, Political Science, Stanford University

Kathrin Braun, Visiting Associate Professor

Paul Burstein, Professor, Sociology, Adjunct Professor, Political Science

Mary P. Callahan, Assistant Professor

Daniel Chirot, Professor, International Studies, Director and Chair, International Studies
B.A. Harvard University (Cambridge, MA 02138), Magna Cum Laude in Social Studies, 1964; Ph.D. Columbia University (New York, NY 10027), Sociology, 1973

Patrick Christie, Assistant Professor, University of Washington School of Marine Affairs and Henry M. Jackson School of International Studies
Ph.D., University of Michigan, School of Natural Resources and Environment 1999

Madeleine Yue Dong, Associate Professor, International Studies University of California, San Diego, Ph.D. in History, December 1996; University of Oregon, M.A. in Asian Studies, 1991; Peking University, M.A. in Western Literature, 1989; Peking University, B.A. in Chinese Language and Literature, 1986.

Herbert Ellison, Professor
B.A. 1951 History, University of Washington; M.A. 1952 History, University of Washington; Ph.D. 1955 History, University of London

Kim England, Associate Professor of Geography, Director of the Canadian Studies Center, Adjunct Professor of Women Studies, Affiliated Member of the Center for Research on Families

Kathie Friedman, Chair, Jewish Studies Program; Associate Professor of International Studies; Adjunct Associate Professor, Depts. of Sociology and Women Studies

Thomas Gething, Affiliate Professor, Asian Language and Literature

Christoph Giebel, Assistant Professor of History & International Studies
Ph.D. Southeast Asian History, 1996; M.A. Southeast Asian History, 1991; M.A. Asian Studies: Southeast Asia, 1989, Cornell University, Ithaca, NY

Angelina Snodgrass Godoy, Assistant Professor Law, Societies, and Justice, Jackson School of International Studies, Adjunct Assistant Professor of Sociology
Ph.D., Sociology, University of California at Berkeley, December 2001; M.A., Sociology, University of California at Berkeley, May 1997; B.A., Sociology, Harvard University, magna cum laude, June 1994

Ellis Goldberg, Professor
Ph.D., University of California, Berkeley

R. Kent Guy, Associate Professor, Department of History and Jackson School of International Studies
1970, B. A., Magna Cum Laude, Yale University; 1974, M. A. East Asian Regional Studies, Harvard University; 1980, Ph.D. History and East Asian Languages, Harvard University

International Studies  

Course Descriptions  

**SIS 103 Society and the Oceans (5) I&S/NW**  
Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as “tragedy of the commons”. Offered: jointly with ENVIR/SMA 103

**SIS 123 Introduction to Globalization (5) I&S Sparke**  
Provides an introduction to the debates over globalization. Focuses on the growth and intensification of global ties. Addresses the resulting inequalities and tensions, as well as the new opportunities for cultural and political exchange. Topics include the impacts on government, finance, labor, culture, the environment, health, and activism. Offered: jointly with GEOG 123.

**SIS 200 States and Capitalism: The Origins of the Modern Global System (5) I&S Chirot, Kasaba, Migdal**  
Origins of the modern world system in the sixteenth century and its history until World War I. Interacting forces of politics and economics around the globe, with particular attention to key periods of expansion and crisis.

**SIS 201 Introduction to International Political Economy (5) I&S Jones, Migdal**  
International political economy through examination of major facets of the post-World War I era. Analyzes the twentieth century economic order and its crises in the 1930s, 1970s, and 1980s, North-South relations, and the cold war and its aftermath. Recommended: ECON 200.

**SIS 202 Cultural Interactions in an Interdependent World (5) I&S Guy, Sorensen, Warren**  
Cultural interaction among societies and civilizations, particularly Western and non-Western. Intellectual, cultural, social, and artistic aspects; historical factors.

**SIS 225 The Silk Road (5) I&S Waugh**  
History of cultural and economic exchange across Eurasia from the early Common Era to modern times. Topics include spread of religions such as Islam and Buddhism, overland trade in rare commodities, interaction between nomadic and sedentary cultures, the role of empires, the culture of daily life, and the arts. Offered: jointly with HIST 225.

**SIS 301 War (5) I&S**  
Origins and conduct of war; readings from anthropology, political science, economics, and history, as well as novels and some recent works on the arms-control controversy. Modern forms of warfare, including guerrilla war, world war, and nuclear war. Offered: jointly with SOC 301.

**SIS 302 Intercultural Relations (5) I&S**  
Perspectives on foreign cultures through literary example. Interdisciplinary approaches to the study of culture as such and problems of intercultural relations. Prerequisite: either one 200-level ANTH course, LING 203 or SIS 202.

**SIS 325 Immigration (5) I&S**  
Introduces key theoretical debates in international migration. Examines immigrants’ political, economic, religious, and social integration into host societies, and continued ties to homelands. Experiences of voluntary and involuntary immigrants, of the second generation, and of incorporation into America and Europe. Designed around interdisciplinary texts and fieldwork in Seattle.

**SIS 330 Political Economy of Development (5) I&S Poznanski, Wong**  
Growth, income distribution, and economic development in less-developed countries today. Policies concerning trade, industrialization, the agricultural sector, human resources, and financing of development. Prerequisite: ECON 201 which may be taken concurrently.

**SIS 332 Political Economy of International Trade and Finance (5) I&S Poznanski**  
Theoretical and historical analysis to explore the causes and effects of the rise and decline of four major international trade and monetary regimes. Foundations and emerging features of the new international trade and monetary regime and its implications for the world economy.

**SIS 333 Gender and Globalization: Theory and Process (5) I&S Ramamurthy**  
Theoretical, historical, and empirical analysis of how current processes of globalization are transforming the actual conditions of women’s lives, labor, gender ideologies, and politics in complex and contradictory ways. Topics include feminist exploration of colonialism, capitalism, economic restructuring policies, resistance in consumer and environmental movements. Offered: jointly with WOMEN 333.

**SIS 335 Geography of the Developing World (5) I&S**  
Characteristics and causes, external and internal, of Third World development and obstacles to that development. Special attention to demographic and agricultural patterns, resource development, industrialization, and urbanization, drawing on specific case studies from Asia, Africa, and Latin America. Offered: jointly with GEOG 335.

**SIS 337 Collective Violence and the State (5) I&S**  
Comparative study of collective violence in modern states with emphasis on riots and pogroms. Readings include case materials drawn from Russian pogroms of the nineteenth and twentieth centuries, Hindu-Muslim riots in modern India, and race riots in the United States and Great Britain. Offered: jointly with POL S 337.

**SIS 342 Social Theory in International Context (5) I&S**  
Comparative, historical introduction to the foundations of modern social theory in the work of Max Weber, Sigmund Freud, and Claude Levi-Strauss. Focus on tensions between universalist claims, European origins, and non-European applications of models of cultural formation and development.

**SIS 344 Migration in the Global Economy (5) I&S Mitchell**  
Analyzes the relationship between human mobility in the late 20th century and changes in the global economy. Allows the student to gain familiarity with scholarly research on international migration.

SIS 348 Alternative Routes to Modernity (5) I&S Routes to modernity followed by non-Western societies between 1600 and 1900. Historical experiences of non-Western societies seen in the context of European history and of development theory. Emphasizes primary sources and techniques for posing theoretical questions of historical data. Offered: jointly with HSTAS 348.

SIS 350 Environmental Norms in International Politics (5) I&S Ingebritsen Surveys development of international environmental consciousness from 1960s to present. Models of “green development”; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with ENVIR 360/SCAND 350.

SIS 360 Technology, Growth, and Competition (5) I&S Poznanski Discusses theoretical accounts of empirical findings on technological change (invention, innovation, diffusion) and factors behind technological change, e.g., market structure, business cycle, state policies. Analyzes the impact of technology on economic growth, i.e., productivity. Discusses the role of technology in foreign trade, particularly in the United States.

SIS 362 Law and Justice: An Introduction to Social Theory (5) I&S Godoy %-- Provides conceptual tools for understanding law and its role in society by acquainting students with major currents of social theory. Topics include liberalism, Marxism, critical feminist theory, and critical race theory. Offered: jointly with LSI 362.

SIS 365 World Cities (5) I&S Kasaba, Sparke Factors that have propelled New York, London, and Tokyo into key positions in the organization of the late twentieth century international system. Asks historical and comparative questions and discuss the reasons behind the diminished position of cities such as Venice, Vienna, and Istanbul in that system.

SIS 375 Geopolitics (5) I&S An introduction to both political geography and geopolitics, addressing the fundamental links between power and space. Topics covered include: theories of power, space, and modernity; the formation of modern states; international geopolitics in the aftermath of the Cold War; the post-colonial nation-state; and the geopolitics of resistance. Offered: jointly with GEOG 375.

SIS 377 Turkic Peoples of Central Asia (3) I&S Cirtautas History of the Turkic peoples, AD 552 to present. Emphasis on current status of Turkic peoples in Central Asia. Geographical distribution, demographic data, reactions and adaptations to changes resulting from the 1917 revolution. Turkic viewpoint on past and present developments. Offered: jointly with NEAR E 375.

SIS 390 Political Economy of Industrialized Nations (5) I&S Ingebritsen Theoretical bases of various political economic systems of industrialized nations. Several major issues these political economies currently face; usefulness and limits of economic analyses within broader perspective of political economy. Prerequisite: ECON 201 which may be taken concurrently.

SIS 397 Junior Honors Seminar (5) I&S Designed to facilitate writing of honors thesis through methodological and bibliographical research. Required of honors candidates.

SIS 399 Study Abroad — International Studies (1-5, max. 15) I&S For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SIS 401 International Political Economy (5) I&S Ingebritsen, Poznanski Establishment, maintenance, and decay of the post-1945 international economic order. Political economy of international trade, monetary relations, inflation, and North-South relations. Prerequisite: SIS 201 which may be taken concurrently; ECON 201 which may be taken concurrently.

SIS 405 Political Economy of Religious Institutions (5) I&S Comparative study of Buddhist, Taoist, Christian, and Islamic religious institutions as political and economic phenomena. Impact of wealth and power on religious institutions or religious ideas. Temporal coverage from the formative period to the present. Recommended: one China, Japan, Middle East, or Europe course.

SIS 406 Political Islam and Islamic Fundamentalism (5) I&S Study of resurgence, since mid-1970s, of political Islam and what has come to be called Islamic fundamentalism, especially in the Middle East. Topics include the nature and variety of political Islam today, causes and implications of the current resurgence, and comparison with previous resurgences. Offered: jointly with POL S 432.

SIS 410 Introduction to Global Internet Political Economy (5) I&S Hellmann Impact of the Internet revolution on structure and operating procedures of the international system. Effects of Internet-driven forces on aspects of the global political economy: cultural and political identities; interactions between states and markets; meaning of the boundaries of sovereignty and civil society.

SIS 419 Comparative Media Systems (5) I&S Jones Provides students an understanding of policies that shape national communication processes and systems. Uses comparative analysis to identify both similarities and differences among media structures of nations at different levels of development. Primary emphasis on broadcast media. Offered: jointly with COM 420/POL S 468.

SIS 421 National Security and International Affairs (5) I&S Jones Major military aspects of contemporary international politics. Uses and limitations of military capabilities for sustaining a stable international order and national security. Processes by which states detect and assess threats to their security; practice of deterrence; transfer of arms among states; pursuit of arms control. Recommended: one SIS or international relations course.

SIS 422 The United States in the Contemporary International System (5) I&S United States in the world: ways in which international circumstances shape the political-strategic, economic, and cultural dimensions of America’s policy. Case studies from post-1945 period. Recommended: one international relations or foreign policy course.

SIS 423 Practicing American Foreign Policy (5) I&S Develops familiarity with tools available to promote international objectives of the United States. International case studies selected to illustrate the diverse considerations inherent in the policy process.
and evaluate the strengths and weaknesses of the national institutions involved. Prerequisite: SIS 201.

**SIS 425 International Law and Arms Control (5) I&S**
Surveys the political, legal, and technological history of 20th-century arms control agreements with emphasis on the treaties which ended the Cold War. Examines current issues of law, politics, military strategy, and technology in regard to weapons of mass destruction and related topics in international security. Offered: Sp.

**SIS 426 World Politics (5) I&S Caporaso, Models**
Nation-state system and its alternatives; world distributions of preferences and power; structures of international authority; historical world societies and their politics. Offered: jointly with POL S 426.

**SIS 430 International Population (5) I&S Lavel**
Demographic situation of the world and of major world regions. The demographic transition. Topics include public health, policies of fertility and mortality control, international migration, relation of population growth to economic development, social change, and resource constraints. Exploration and manipulation of international demographic data.

**SIS 432 Population and Modernization (3) I&S Hirschman, Lavel**
Examines role of demographic factors in process of social modernization and economic growth. Approach is historical, focusing on populations of developed countries since 1700, and analytic, stressing attempts made by different disciplines to model demographic relationships, with attention to less developed regions. Offered: jointly with SOC 432.

**SIS 433 Environmental Degradation in the Tropics (5) I&S/ NW**
Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with ENVIR 433/SMA 433.

**SIS 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S**
Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Offered: jointly with POL S 436.

**SIS 440 History of Communism (5) I&S Ellison**
Communism from its origins in Bolshevik faction of Russian social democracy to the present, treating the development of the ideology, the various communist parties, and the communist states. Recommended: two history or politics of Europe courses. Offered: jointly with HSTEU 440.

**SIS 444 Peasants in Politics (5) I&S Young**
Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly independent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with POL S 446.

**SIS 446 History, Memory, and Justice (5) I&S Giebel**
Focuses on the complex interactions between history and historical representation, remembrance and commemoration, memory and identity, and notions of justice and reconciliation. Addresses these issues on methodological, theoretical, and practical grounds, drawing on examples from various genres, periods, and world regions. Offered.

**SIS 449 Social Transformation of Modern East Asia (5) I&S Sorensen**
Comparative study of social change in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale urban units in rural and urban areas under both communist and capitalist political systems. Recommended: two history or anthropology of East Asia courses. Offered: jointly with ANTH 449.

**SIS 450 Political Economy of Women and Family in the Third World (5) I&S**
Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with SOC 450.

**SIS 452 Law and Politics of International Trade (5) I&S Pekkanen**
Survey of global trade politics in the context of the World trade Organization (WTO), with attention to positive and negative aspects of its governance. Examines the impact of the WTO legal framework on trade relations among developed and developing countries. Covers topics such as dispute settlement, development, safeguards, antidumping, intellectual property, and regionalism.

**SIS 455 Industry and the State (5) I&S Whiting**
Builds on states and markets approach of 200 and 201 through specific examination of effects of industry and industrial structure on political outcomes and roles of state. Emphasis on late-developing and newly developing economies. Prerequisite: SIS 200; SIS 201.

**SIS 456 State-Society Relations in Third World Countries (5) I&S Bachman, Katsaba**
Relationships among political, social, and economic changes in Asia, Africa, and Latin America. Problems of economic and political development, revolution and reform, state-society relations, imperialism and dependency. Offered: jointly with POL S 450.

**SIS 460 Law, State, and Society (5) I&S Migdal**
Examination of both state law and non-state law (rules and ways of ordering behavior such as customary law, religious law, and social conventions). Focuses on the ways non-state law interacts with and affects state law and is affected by state law.

**SIS 465 Deeply Divided Societies (5) I&S Migdal**
Ethnic conflict seen from two perspectives: 1. the study of theoretical approaches as a means of understanding deeply divided societies; 2. a focus on one or more specific conflicts. Recommended: SIS 201 or POL S 204.

**SIS 467 Nations and States in the Modern World (5) I&S**
Development of national consciousness in the “old nations” of Europe before the French Revolution. Replacement by the new nationalism and its spread into East Central Europe, Russia, Iberia, America, Asia, and Africa. Offered: jointly with HIST 467.

**SIS 470 Human Rights in Latin America (5) I&S**
Human rights in Latin America, focusing on twentieth century dictatorships and current regional events and their implications for human rights. Cannot be taken for credit if GIS 174 or SIS/LA 120 previously taken. Offered: jointly with LSJ 410. Prerequisite: either LSJ 320/321, POL S 368, PHIL 338, or SIS 200.

**SIS 476 Comparative International Political Economy (5) I&S Ingebritsen, Poznanski**
Comparative analysis of four major approaches to international political economy: mercantilism, Marxism, liberalism, and evolutionary approach. Focus on international cooperation, social change, and economic institutions. Theoretical analysis of the four paradigms and applications to historic and current issues in
SIS 490 Special Topics (1-5, max. 15) I&S
Content varies from quarter to quarter.

SIS 491 Senior Honors Seminar (5-) I&S
Study of issues related to students' thesis topics. Develops thesis-writing skills. Open only to Jackson School honors students.

SIS 492 Senior Honors Seminar (5-) I&S
Students write a senior thesis working with their individual writing advisers.

SIS 494 Senior Research (2)
Independent research and writing under supervision of a faculty member. Open only to International Studies majors.

SIS 495 Task Force (5) I&S
Small-group seminars address current problems in international affairs, each focusing on one specific policy question and producing a joint task force report. Restricted to senior majors in International Studies. Prerequisite: SIS 200; SIS 201; SIS 202; SIS 401.

SIS 497 Internship (1-5, max. 15)
Credit for the completion of an approved internship in international studies. Credit/no credit only.

SIS 498 Readings in International Studies (5) I&S
Reading and discussion of selected works of major importance in interdisciplinary international studies. Restricted to majors in International Studies.

SIS 499 Undergraduate Research (1-5, max. 15)

SIS 500 Seminar: Origins of the Modern Global System (3) Kasaba, Migdal
Development of global interdependence from the fifteenth century to World War II. Interrelationship of politics and economics. International political economy from contextual, institutional, and historical perspectives.

SIS 501 Seminar: Comparative International Studies (3) Kasaba, Poznanski
Focuses on comparison across geographical areas including comparative political economy, comparative cultures, and comparative institutions. Provides familiarity with the comparative method of inquiry, an understanding of the interplay between area studies and cross-regional theories, and skills in conducting comparative research and writing. Prerequisite: ECON 200; ECON 201.

SIS 502 Seminar: Globalization and International Relations (3) Jones
Focuses on globalization, including international relations and transnational studies. Provides an understanding of the interplay of area studies with processes that transcend geographical areas and intersect political boundaries, an overview of transnationalism or international relations, and skills in undertaking a major research and writing project.

SIS 511 Practicum: Methods in International Studies (3) Chirot
Assumptions underlying leading methodologies for comparative study of societies and other large-scale social entities. Quantitative and nonquantitative methods illustrated by recent research. Prerequisite: SIS 502.

SIS 512 Task Force in International Affairs (3) Chirot
Seminar addressing a current problem in international affairs and resulting in a joint task-force report. Results presented to, and critiqued by, a distinguished outside evaluator at end of term.

SIS 520 Introduction to Theories and Quantitative Methods for Social Science Research (5)
Selected social scientific theories and quantitative methods for students in international and area-studies programs. Introduction to methodological neoclassicism, neo-institutional analysis, "developmentalism," rational choice and dynamic institutionalist approaches, and selected theories from political science. Essentials of statistical analysis.

SIS 522 Special Topics in Ethnicity and Nationalism (3, max. 6)
Topics vary, but always focus on ethnic group relations and nationalism viewed from a broad, comparative, interdisciplinary perspective. Emphasis is heavily cross-cultural, and the geographical coverage world-wide.

SIS 524 International Security (5) Kier, Mercer
Introduces some of the major debates concerning the use of force in international politics. Covers traditional issues in international security such as alliances and the causes of war, as well as some of the new and important questions, such as explaining war outcomes and war termination. Offered jointly with POL S 524.

SIS 534 International Affairs (3)
Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF 530/ POL S 534.

SIS 542 Seminar: State and Society (5) Migdal
Examines the mutually conditioning relationship between states and the societies they seek to govern. Studies states as large, complex organizations and their interactions with society on different levels. Shows that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with POL S 542.

SIS 552 Law and Politics of International Trade (5) I&S Pekkanen
Survey of global trade politics in the context of the World Trade Organization (WTO), with attention to positive and negative aspects of its governance. Examines the impact of the WTO legal framework on trade relations among developed and developing countries. Covers topics such as dispute settlement, development, safeguards, antidumping, intellectual property, and regionalism.

SIS 553 Environment and Health in the World Trade Organization (5) Pekkanen
Conflicts between global environmental and public health on the one hand and international trade expansion on the other in the World Trade Organization (WTO). Focuses on the state of GATT/WTO jurisprudence and its interaction with sovereign laws and regulations. Cases include asbestos, reformulated gasoline, beef hormones, shrimp-turtle, and genetically modified organisms. Offered:

SIS 562 Law, Globalization, and Multinational Corporations (3)
An interdisciplinary workshop that examines the role of multinational corporations in a global society. Topics include the legal construct of the multinational corporation, the multinational and the state, the multinational and human rights, and the multinational in the international arena. Offered: jointly with LAW E 512.

SIS 575 Advanced Political Geography (5) Sparke
Provides resources for theorizing how politics shapes and is shaped by geographical relationships. Examines how politics are situated in complex material and discursive geographies that are partly reproduced through political negotiations. Examines interrelation-
ships of contemporary capitalism with other complex systems of social and political power relations. Offered: jointly with GEOG 575.

**SIS 580 Teaching International Studies (2, max. 4) Migdal**
For current and prospective teaching assistants. Includes teaching writing, leading effective discussions, the art of evaluation, and teaching critical reading skills; videotaping of actual teaching sessions of participants in class. Credit/no credit only.

**SIS 590 Special Topics (2-5, max. 10)**
Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

**SIS 600 Independent Study or Research (*)**
International Studies: African Studies

**Course Descriptions**

**SISAF 399 Study Abroad: African Studies (1-5, max. 15) I&S**
For participants in study abroad program. Specific content varies. Courses do not automatically apply to major/minor requirements.

**SISAF 444 African Studies Seminar (5, max. 15) I&S**
Interdisciplinary seminar focusing upon one particular aspect of the African continent. Emphasis may be humanistic, social scientific, or historical. African Studies faculty and visiting scholars lecture on areas of their own expertise.

**SISAF 490 Special Topics (1-5, max. 15) I&S**

**SISAF 499 Undergraduate Research (1-5, max. 15)**
International Studies: Asia

**Course Descriptions**

**SISA 210 Rise of Asia (5) I&S Anchordoguy, Bachman, Giebel, Sorensen**
Key themes in the study of Asia, with focus on the present. Topics include: the notion of “Asia;” cultural and religious similarities and differences; comparison of colonial experiences under Western and Asian powers; World War II and liberation; postwar patterns of economic and political development; social patterns and issues. Offered: A.

**SISA 244 Imperialism and Anti-Colonialism in Asia (5) I&S**
Introduction to Western imperialism expansion, conquest, and colonial rule in Asia; the anti-colonial, nationalist resistances they engendered; and the resultant cultural, political, economic, and intellectual transformations in Asian societies. Covers post-1800 violence, racial hierarchies, human rights abuses, post-colonial memories, persistent strategies of domination, and structural inequities. Offered: jointly with HSTAS 244.

**SISA 245 Human Rights in Asia (5) I&S Callahan, Giebel**
Introduction to recent and ongoing human rights issues in South, Southeast, and East Asia. Focuses on how human rights politics have played out in domestic political arenas. Provides exposure to views/insights into the historical context in which human rights claims, abuses, and debates arise. Offered: jointly with HSTAS 245.

**SISA 265 Globalization and the Transformation Economy and Society in Asia (5) I&S Hamilton**
Examines the rapid and extensive social and economic development throughout Asia since the mid-20th century; the corresponding retail revolution in the American economy; the evolution of characteristic Asian product categories; and the impact of these developments on the social and economic organization of Asian economies. Offered: jointly with SOC 265.

**SISA 372 Asian Sustainable Development (5) I&S Jhaveri**
Examines the contemporary relationship between environmental protection and development paths in Asia. Inquires into the forces driving both environmental change and societal responses (state and local regulations, social movements, etc.) to that change, at many geographical scales. Asian concepts of nature-society relations also explored. Offered: jointly with GEOG 372.

**SISA 399 Study Abroad: Asian Studies (1-5, max. 15) I&S**
For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

**SISA 490 Special Topics (1-5, max. 15) I&S**
Content varies.

**SISA 499 Undergraduate Research (1-5, max. 15)**

**SISA 590 Special Topics (1-5, max. 10) I&S **
Special topics in Asian Studies. Course content varies by instructor.

**International Studies: Canadian Studies**

**Course Descriptions**

**SISCA 308 Canada: A Geographic Interpretation (5) I&S Jackson**
Examines the overlapping economic, cultural, and political geographies shaping life in contemporary Canada. Topics include: free trade, constitutional crisis, feminism in Canada, aboriginal politics, and border region phenomena. Attention paid to how specific geographic interpretations of Canada by Canadians actually play a part in national life. Offered: jointly with GEOG 308.

**SISCA 341 Government and Politics of Canada (5) I&S**
Critical analysis of parliamentary institutions, political parties, and the federal system in Canada. Offered: jointly with POL S 341.

**SISCA 356 Canadian Society (5) I&S**
Origins to the present in its North American setting; political development, cultural evolution, and emergence of multinationalism; economic base; arts and literature; problems of the environment; Canadian foreign relations.

**SISCA 377 History of Canada (5) I&S Jackson**
General survey and analysis of political, economic, social, and cultural aspects of Canadian history from the foundation of New France to present; Canadian-American relations, the rise of Quebec nationalism, and the development of the Canadian West. Offered: jointly with HSTAA 377.

**SISCA 399 Study Abroad: Canadian Studies (1-5, max. 15) I&S**
For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

**SISCA 400 Canadian Values and Symbols (5) I&S**
Overview of the ideas, events, and activities which help define Canadians as a people. Examines the “national” expression of these values and symbols, as evidenced in historical experience, a physical environment often harsh and unyielding, a diverse people and cultures, and a pride in achievement that is frequently slow to surface.

**SISCA 424 Canadian Media Systems (5) I&S**
Structure and operation of Canadian mass media and telecommuni-
structures. Background with emphasis on basic conceptual and symbolic religions (Judaism, Christianity, Islam) and to their ancient world developed west of the Indus. Primary attention to the Semitic History of religions, concentrating on religious traditions that have Traditions (5) I&S

RELIG 201 Introduction to World Religions: Western Traditions (5) I&S
History of religions, concentrating on religious traditions that have developed west of the Indus. Primary attention to the Semitic religions (Judaism, Christianity, Islam) and to their ancient world background with emphasis on basic conceptual and symbolic structures.

RELIG 202 Introduction to World Religions: Eastern Traditions (5) I&S
History of religions, concentrating on religions that have developed in South Asia and East Asia. Primary attention to Hinduism and Buddhism; other important Asian religions are discussed in relation to them, with emphasis on basic conceptual and symbolic structures.

Investigates the complex relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic disciplines. Offered: jointly with HUM/NEAR E 205;

RELIG 210 Introduction to Judaism (5) I&S Jaffee
Basic ideas and motifs of Judaism: God, Covenant, Law, Life Cycle (birth, marriage, family life, sexual laws, role of women, death); Cycle of the Year (Sabbath, holidays, festivals); Holy Land, prayer, Messianism.

RELIG 211 Islam (5) I&S/VLPA Wheeler
Introduction to important cultural and historical aspects of Islam, focusing on basic concepts and developments such as prophethood, Quran and Hadith, canon and law, ritual, social theory, Sufism, theology, and sectarianism. Special attention to comparison of varied Muslim practices and beliefs, and their relation to textual and personal authority. Offered: jointly with NEAR E 211.

RELIG 212 Introduction to the Quran (5) I&S/VLPA Wheeler
Emphasis on the historical context of the Quran, the history of the text, its collection, organization, and interpretation. In English. Offered: jointly with NEAR E 212.

RELIG 220 Introduction to the New Testament (5) I&S/VLPA Williams
Modern scholarly methods of research and analysis in dealing with New Testament books and their interpretation. Genres of various books (gospel, epistle, sacred history, apocalypse); problems of the relationships among author, material, and intended audience; relationships between theme and image.

RELIG 240 Introduction to the Hebrew Bible: Old Testament (5) I&S/VLPA Noegel

RELIG 254 American Religions (5) I&S Wellman
Seeks to understand religious diversity in the American context and the varieties of religions in the American historical horizon including religious minorities, American Protestants, public religious expressions, and new American religions.

RELIG 264 Sacred Music in the European Tradition (5) VLPA Surveys European and American sacred music from the 12th to 20th centuries, examining the important role of music in religious worship. Considers the means composers used to make musical works sound the way they do to convey the messages of the texts through music. Offered: jointly with MUSIC 264.

RELIG 301 Religious Thought Since the Middle Ages (5) I&S Development of religious thought in the West from the Middle Ages to the twentieth century. History of focal ideas: God, man, knowledge, and authority during this period and the relation of changes in these ideas to the ways in which basic issues in religious thought have been conceived. Recommended: RELIG 201
RELIG 320 Comparative Study of Death (5) I&S
Death analyzed from a cross-cultural perspective. Topics include funerary practices, concepts of the soul and afterlife, cultural variations in grief, cemeteries as folk art, and medical and ethical issues in comparative context. American death practices compared to those of other cultures. Offered: jointly with ANTH 322.

RELIG 321 Comparative Religion (3) I&S
Anthropological approaches to religious experience and belief with emphasis on conceptual issues such as ritual, symbolization, identity, ecstatic experience, and revitalization movements in the context of globalization. Also addresses the diversity of religious expression in American culture and how that compares with other societies. Offered: jointly with ANTH 321.

RELIG 322 The Gospels and Jesus of Nazareth (5) I&S
*Williams* 
Gospel material from early Christianity, including both canonical and noncanonical gospels. Relation of gospels to analogous literature from the Hellenistic-Roman period. Recommended: ENGL 310 or RELIG 220.

RELIG 324 The Emergence of Christianity (5) I&S
*Williams* 
Studies stages in the development of Christianity as a new religion, during the first to fifth centuries CE, as the classical forms and institutions of Christian “orthodoxy” gradually achieved definition, and as this emerging Christian tradition became a dominant cultural and socio-political force. Recommended: HISL 307, RELIG 201, or RELIG 220.

RELIG 327 Eastern Christian Traditions (5) I&S
Eastern Christian traditions, with principal focus on Eastern Orthodox tradition in Byzantium and Russia from time of the Council of Nicea to the twentieth century. Considers significant differences between eastern and western Christianity and their doctrinal and cultural origins; explores distinctive features of eastern tradition. Recommended: HISL 307 or RELIG 201.

RELIG 330 Religion, Identity, and Cultural Pluralism (5) I&S
The role of religion in shaping personal and communal identity in a pluralistic society. Themes include current dimensions of American pluralism, effects of ethnicity, immigration, and electronic communication on building religious communities, and issues of conflict, violence, and reconciliation. Offered: jointly with ANTH 330.

RELIG 350 Buddhism and Society: The Theravada Buddhist Tradition in South and Southeast Asia (5) I&S
*Keyes* 
Religious tradition of Theravada Buddhism (as practiced in Sri Lanka, Burma, Thailand, Laos, and Cambodia). Variations in ethical orientations developed through Theravada Buddhist ideas. Recommended: RELIG 202 or one eastern religious course. Offered: jointly with ANTH 352.

RELIG 352 Hinduism (5) I&S
*Pauwels* 
Varieties of Hindu religious practice; the diverse patterns of religious thought and action among contemporary Hindus. Includes ritual behavior, village Hinduism, tantrism, sadhus, yoga, sects, the major gods and their mythologies, religious art, and the adjustments of Hinduism to modernity. Recommended: RELIG 202 or one South Asian culture course.

RELIG 354 Buddhism (5) I&S
*Cox* 
Buddhism as a religious way and as a way of thinking; the forms of Buddhism known in South Asia (India, Sri Lanka) and those introduced from there to Tibet and other parts of Central Asia. Includes the “Three Jewels” (i.e., the Buddha or Awakened Person, the Teaching [Dharma], and Community [Sangha]) around which Buddhism is traditionally articulated. Recommended: RELIG 202 or one Asian cultures course.

RELIG 380 The Nature of Religion and Its Study (5) I&S
*Jaffee* 
Study of religion as a general human phenomenon. Manner in which different methods of inquiry (phenomenology, anthropology, sociology, psychology, literary criticism, archaeology, philosophy, theology) illuminate different aspects of religion and help to shape our conceptions of its nature. Recommended: RELIG 201 or RELIG 202. Offered: jointly with CHID 380.

RELIG 399 Study Abroad — Comparative Religion (1-5, max. 15) I&S
For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

RELIG 400 The Jewish Mystical Tradition (5) I&S
*Jaffee* 

RELIG 405 Scripture in Judaism (5) I&S
*Jaffee* 
Explores the phenomenon of religious interpretation of sacred books by attending to the destiny of the Bible as read within Judaism. Begins with the canonization of the biblical text itself and continues into the rationalist and mystical interpretive innovations of the Middle Ages. Recommended: HISL/SISJE 250, RELIG 201, or RELIG 210.

RELIG 410 Law in Judaic Experience (5) I&S
*Jaffee* 
Place and function of law in Jewish social and personal experience. Discusses the various ideological justifications of the law in biblical and rabbinic literature, examines representative texts, and explores theological reflection on law by medieval and modern thinkers. Recommended: RELIG 201; RELIG 210; RELIG 400 or RELIG 405.

RELIG 415 Modern Jewish Thought (5) I&S
*Jaffee* 
Major trends in Jewish religious thought since the European Enlightenment, focusing on encounters between Judaism and the modern world. Includes Haskalah; varieties of religious reform and accommodation; Zionism; socialism; the philosophy of Rosenzweig, Buber, and Kaplan; and theological responses to the Holocaust. Recommended: HISL/SISJE 250, HSTEI/SISJE 469, RELIG 201, or RELIG 210.

RELIG 420 The World of the Early Church (5) I&S
*Williams* 
Early Christian church within the context of the Greco-Roman sociopolitical, philosophical, and religious environment. Covers the period from about AD 100 to 300. Christian thinkers and documents studied include both the classical “orthodox” and the “heretical.” Recommended: HISL 307, RELIG 220, or RELIG 324.

RELIG 421 The Age of St. Augustine (5) I&S
Christian church in the fourth and fifth centuries as a major institution in the Roman Empire. Great figures of patristic theology, such as Athanasius, Gregory Nazianzus, Gregory of Nyssa, and Augustine. Recommended: HISL 307, RELIG 320, or RELIG 324.

RELIG 426 Gnosticism and Early Christianity (5) I&S
*Williams* 
Impact of Gnosticism on the development of Christianity and several other religious groups of that period. Readings dating from the first through the third centuries AD.

RELIG 428 Modern Christian Theology (5) I&S
Modern Protestant and Catholic thought since the nineteenth century: Kierkegaard, Barth, Bultmann, Rahner, Lonergan, and other major figures. Recommended: RELIG 301.

RELIG 430 Scripture and Law in Islam (5) I&S/VLPA
RELIG 432 Ritual and Territory in Islam (5) I&S/VLPA

Wheeler

Comparative study of Islamic ritual practices and related development of jurisprudence and law. Focus on sacrifice, political and social legal theory, pilgrimage, regulation of the body, and the diversity of contemporary practices. In English. Offered: jointly with NEAR E 432.

RELIG 433 Life of Prophet Muhammad (5) I&S/VLPA

Wheeler

Examines historical and religious traditions associated with the life of the Prophet Muhammad with particular attention to the biography in classical Islam. Focuses on Muhammad as prophet, holy man, law-giver, mystic, and statesman. Comparison with other religious figures such as Jesus and the Buddha. In English. Offered: jointly with NEAR E 433.

RELIG 442 Art, Religion, and Politics in the Early Christian Period, 300-700 AD (3) I&S/VLPA

Kartsonis

Evolution of the art of the early Christian period (300-700 AD) in the context of contemporary religious, political, and cultural developments. Recommended: some background in Byzantine art or history. Offered: jointly with ART H 452.

RELIG 443 Art, Religion, and Politics in Byzantium, 700-1453 AD (3) I&S/VLPA

Kartsonis

Evolution of the art of Byzantium (700-1453 AD) in the context of contemporary religious, political, and cultural developments. Recommended: some background in Byzantine art or history. Offered: jointly with ART H 453.

RELIG 445 Greek and Roman Religion (3) I&S/VLPA

Harmon

RELIG 449 Religious Movements: The Sociology of Cults and Sects (5) I&S

Investigates the organizational dynamics of new religious movements. Seeks to understand why ‘cults’ emerge and how they proliferate or decay. Examines conflicts within established churches, counter-movements, and the state. Offered: jointly with SOC 445.

RELIG 452 Topics in the Buddhism of Tibet (3) I&S

Topics in the development of Buddhism of Tibet. Includes the relationship between reasoning and religious thought; the concept of a person; the formation of the different schools of Tibetan Buddhism; the notion of lineage; the master-disciple relationship in the tantric tradition. Recommended: ANTH 352, RELIG 202, RELIG 350, or RELIG 354.

RELIG 454 Perceptions of the Feminine Divine in Hinduism (5) VLP A

Pauwels

Explores implications of the perception of a feminine divine for gender issues in South Asia. Includes historical overview of goddess worship in South Asia, mythologies, philosophical systems, cults, and rituals associated with the major goddesses, the phenomena of sutee, goddess possession, and women’s goddess rituals at the village level.

RELIG 456 Women in Ancient Judaism (3) I&S/VLPA

Noegel

Explores those texts in early Jewish literature in which women play prominent roles and those in which women are surprisingly absent. Discusses the literary portrayal of women for what they tell us about the people who wrote the texts. No knowledge of Hebrew is required. Offered: jointly with NEAR E 456.

RELIG 457 The History of Biblical Interpretation (3) I&S/VLPA

Noegel

Traces biblical interpretation and translation technique from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopts a “hands-on” approach to the material and explores various hermeneutics by applying them in class. Offered: jointly with NEAR E 457.

RELIG 460 Anti-Semitism As a Cultural System (5) I&S

Jaffee

Comparative study of various anti-Semitic cultural systems from ancient to modern times. Topics include how anti-Semitism can be defined as a cultural phenomenon; the conditions that explain the circulation of anti-Semitic traditions in a given society; the conditions under which social conflict with Jews becomes anti-Semitism.

RELIG 490 Special Topics (1-5, max. 15) I&S

Topics vary with each offering.

RELIG 491 Seminar: Topics and Issues in Judaism (5) I&S

Jaffee

Topics vary. Recommended: RELIG 210; RELIG 400, RELIG 405, or RELIG 410.

RELIG 492 Seminar: Topics in Early Christianity (5) I&S

Williams

Topics vary. Recommended: one early Christian history or literature course.

RELIG 497 Field Archaeology (1-10, max. 20)

Professionally-guided archaeological fieldwork at a recognized archeological dig in the United States or abroad. Offered: S.

RELIG 498 Honors Thesis (5) I&S

Required course for Comparative Religion honors students.

RELIG 499 Undergraduate Research (1-5, max. 15)

Primarily for comparative religion majors and minors in the School of International Studies.

RELIG 501 Approaches to the Study of Religion (5)

Major approaches employed by modern scholarship in the study of religion, including historical, phenomenological, anthropological, sociological, and psychological. Prerequisite: admission to the comparative religion MAIS program or permission of instructor.

RELIG 502 Religion in Comparative Perspective (5, max. 15)

Analysis of selected theme or symbols in relation to several different religious traditions. Topics vary. Prerequisite: admission to the comparative religion MAIS program or permission of instructor.

RELIG 504 Religion and Culture (5)

Study of the relations between religion and culture, with attention to the role of religion in defining conceptions of order and grounding socio-political and artistic traditions.

RELIG 510 Colloquium in Comparative Religion (1, max. 6)

Required colloquium for graduate students in comparative religion program. Introduction to faculty research and to major methods and disciplines in the study of religion. Credit/no credit only.

RELIG 520 Seminar On Early Christianity (5) Williams

Problems in the history and literature of early Christianity.

RELIG 528 Christian Theology (5)

Study of exemplary figures in the history of Christian religious
SISEA 212 History of Korean Civilization (5) I&S
From earliest times to present. Development of Korean society and culture in terms of government organization, social and economic change, literature, art. Offered: jointly with HSTAS 212.

SISEA 213 The Korean Peninsula and World Politics (5) I&S
Introduction to Korean politics, economics, society, and international relations since the late nineteenth century. Addresses the evolution of Korea in international society by comparing Korea's experience with that of China and Japan. Offered: jointly with POL S 213.

SISEA 236 Geography of Greater China (5) I&S Chau
Studies the geography of development processes, patterns, and problems in “Greater China”: mainland China, Taiwan, and Hong Kong. Covers physical geography, history, and economic and political systems, with major focus on geographical issues in China's development: agriculture, population, industry and trade, and relations with Hong Kong and Taiwan. Offered: jointly with GEOG 236.

SISEA 241 Japanese Civilization (5) I&S
Japan’s civilization, including its origins, government, literature, economic institutions, material culture, social organization, and religions, in relation to the development of Japan as a society and nation. Cannot be taken for credit if SISEA 341 previously taken. Offered: jointly with HSTAS 241.

SISEA 242 Japan in the Contemporary World (5) I&S
Interdisciplinary introduction to various aspects of contemporary Japan, such as its politics, economics, and society. Focuses on how Japan has interacted with the global community in the period since World War II.

SISEA 370 Han Chinese Society and Culture (5) I&S Anchordoguy
Themes in the society and culture of the Han Chinese people. Concepts of self; personal interaction; family, gender, and marriage; communities and the state; religion and ritual; class, social categories, and social mobility; culturalism, nationalism, and patriotism. Offered: jointly with ANTH 370.

SISEA 399 Study Abroad: East Asian Studies (1-5, max. 15) I&S
For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISEA 423 History of Modern Japan (5) I&S Pyle
Political, social, economic, and cultural development of Japan from the late Tokugawa period to the present with special emphasis on the cultural impact of the West. Offered: jointly with HSTAS 423.

SISEA 424 Perspectives on East Asia for Teachers (3, max. 6) I&S
Substantive concepts, resources, and materials employed in teaching about East Asia. Requirements may vary in relation to the background of participants.

SISEA 434 Demographic Issues in Asia (3-5) I&S Hirschman, Lavely
Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. Addresses a set of these issues by focusing on the demography of one or more countries in Asia. Offered: jointly with SOC 434.

SISEA 435 Japanese Government and Politics (5) I&S Hellmann
Government and politics of Japan with emphasis on the period since 1945. Offered: jointly with POL S 435.

SISEA 439 Politics of Divided Korea (5) I&S
Governments, politics, and economy of South and North Korea, the inter-Korea relations, and the two Koreas' relationship with the major powers — especially the United States — with emphasis on the post-cold war period. Offered: jointly with POL S 439.

SISEA 440 The Emergence of Postwar Japan (5) I&S Pyle
The making of modern Japan; World War II and surrender; American occupation; postoccupation rebuilding; emergence as an industrial power. Recommended: HSTAS 423 or SISEA 423. Offered: jointly with HSTAS 424.

SISEA 441 Economic and Social History of Japan to 1900 (5) I&S
Lecture-seminar on Japanese economic and social history from 700 to 1900. Analyses of the rise and decline of the shoen system, the rise of commerce, social change, changes in the living standard, demographic changes, and the early phases of industrialization. Political and cultural developments as related to economic and social change. Prerequisite: either SISEA 241/HSTAS 241 or SISEA 341/HSTAS 341. Offered: jointly with HSTAS 441.

SISEA 442 Political Economy of Postwar Japan (5) I&S Anchordoguy

SISEA 443 Class and Culture in East Asia (5) I&S
Examines the nexus between culture and systems of social stratification/class in East Asia, with an emphasis on Taiwan, Korea, Japan, and China. Topics include class formation, mechanisms of social mobility and reproduction, markers of status and hierarchy, resistance, and the formation of class identity. Offered: jointly with ANTH 444.

SISEA 444 Politics of Representation in Modern China (5) I&S
Focuses on issues of representation and power in twentieth century China. Combines substantive information on modern Chinese society and culture with recent debates in social theory and the politics of representation. Major themes include Chinese nationalism, body politics, popular culture, and everyday practice. Offered: jointly with ANTH 444.

SISEA 445 Religion in China (5) I&S Harrell
Religion in Chinese society, doctrines, practices, and social
consequences of the eclectic folk religion, the elite Confucian, Taoist, and Buddhist traditions, syncretistic sects, and imported Christianity. Prerequisite: either one 200-level ANTH course, ANTH 370, ANTH 403, LING 203, HSTAS 211, HSTAS 454, RELIG 202, SISEA 370, or SISEA 443.

SISEA 448 Modern Korean Society (5) I&S Sorensen
Social organization and values of twentieth-century Korea. Changes in family and kinship, gender relations, rural society, urban life, education, and industrial organization since 1900. Differences between North and South Korea since 1945. Recommended: HSTAS/ SISEA 212. Offered: jointly with ANTH 448.

SISEA 449 Government and Politics of China (5) I&S Whiting
Post-1949 government and politics, with emphasis on problems of political change in modern China. Offered: jointly with POL S 442.

SISEA 454 History of Modern China (5) I&S Dong
Social, cultural, political, economic, and intellectual transformations and continuities in China from the end of the imperial period to the present. Offered: jointly with HSTAS 454.

SISEA 456 Topics in Chinese Social History (5) I&S Ebrey, Guy
Surveys major issues and approaches to the study of the role of the Chinese people in China’s historical development. Historical focus of course varies with instructor. Recommended: HSTAS 211, HSTAS 452, HSTAS 453, or HSTAS/SISEA 454. Offered: jointly with HSTAS 456.

SISEA 459 United States-China Relations (5) I&S Bachman
Surveys the history of United States-China relations and examines the evolution of bilateral relations, particularly since 1949. Focus on the period since 1972 and the major issues as they have evolved since that time, including trade, human rights, security, and Taiwan. Offered: jointly with POL S 419.

SISEA 460 Cities in China: Past and Present (5) I&S
Economic, political, social, and cultural functions of the city in modern Chinese history. Changes in China’s urban system. The city as cultural center and focus of literary and cinematic representation. Attention to architecture, commerce, urbanization, the role of capital cities in the power of the state. Offered: jointly with HSTAS 460.

SISEA 462 China and Globalization (5) I&S Bachman
Examines the dynamics of the rise of China, its growing interactions with the international system and how it is in turn affected by the processes associated with globalization. Specific areas of examination include flows of resources, people, and information, and conceptions of Chinese identity. Prerequisite: SISA 210.

SISEA 468 China’s Economic Reforms: Integration Into World Economy (5) I&S Wong
A systematic survey of China’s economic reforms since 1978, including China’s increasing integration into world economy. Prerequisite: ECON 201. Offered: jointly with ECON 468.

SISEA 469 Law, Development, and Transition in East Asia (5) I&S
Examines the role of law and the courts in economic and political change in the developing world. Topics include variations in legal traditions and institutions, economic development, property rights, dispute resolution, democratization, and human rights. Empirical materials focus on East Asia. Offered: jointly with LSI 469/POL S 469.

SISEA 470 Minority Peoples of China (5) I&S Harrell
Interaction between China and the peoples of its periphery, including Inner Asia, Tibet, Northern Mainland, Southeast Asia, and aboriginal peoples of Taiwan. Emphasis on ethnicity, ethnic group consciousness, and role of the Chinese state. Prerequisite: either ANTH/SISEA 370, HSTAS 454, LING 203, or one 200-level ANTH course. Offered: jointly with ANTH 470.

SISEA 474 Civil Society in Japan and East Asia (5) I&S Pekkanen
Examines a wide range of nongovernmental organizations (NGOs) nonprofits, and voluntary groups under the unifying rubric of civil society. Theoretical introduction to civil society and ideas of social capital. Investigates general aspects of civil society, focusing on its specific characteristics in Japan and other parts of Asia.

SISEA 475 Japanese Society (5) I&S

SISEA 478 Readings in the Social Sciences in Japanese (3-5) I&S
Introduction to articles and short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313.

SISEA 479 Readings in the Social Sciences in Japanese (3-5) I&S
Introduction to articles and short works in economics, history, political science, and other social sciences. Assignments chosen from major Japanese monthlies and academic works. All readings in Japanese. Prerequisite: JAPAN 313.

SISEA 480 New Orders in East Asia (5) I&S Pyle
Rise and fall of successive international systems in East Asia over the past 150 years: Sino-centric, imperialist, Washington Treaty system, Japan’s East Asian order, Yalta system, cold-war system. Post cold-war search for a new order. Special attention to triangular relations among the United States, China, and Japan.

SISEA 481 Science, Technology, and Innovation Policies in East Asia (5) I&S Anchordoguy
Role of state and technological change in economic development. Analyzes state and corporate technology policies historically. Basic technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia’s rise in world technology and explores whether conditions for its success will continue. Recommended: SISEA or SISA course. Offered: jointly with I BUS 461.

SISEA 482 Japanese Business and Technology (5) I&S Anchordoguy
Examination of Japan’s postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with I BUS 462.

SISEA 486 Japanese Trade Diplomacy (5) I&S
Survey of Japan’s foreign trade diplomacy. Examines evolution of Japan’s trade patterns in exports and foreign direct investment with key partners. Covers institutional and legal frameworks of Japan’s trade relations, such as bilateral fora, regional options including free trade agreements, and multilateral venues such as the WTO. Offered: jointly with POL S 418.

SISEA 487 Japan in the International System (5) I&S
Comprehensive examination of Japan’s international relations. Covers issues such as trade, security, environment, aid, and human rights. Investigates Japan’s participation in international organizations, including the UN, World Bank, IMF, and WTO. Examines Japan’s relations with the United States, the European Union, Asia,
SISEA 490 Special Topics (1-5, max. 15) I&S
Course content varies.

SISEA 494 Economy of Japan (5) I&S
Analysis of the economic growth of Japan since about 1850 to the present. The reasons for rapid industrialization, various effects of sustained economic growth, and significant contemporary issues are investigated. Prerequisite: ECON 201. Offered: jointly with ECON 494.

SISEA 499 Undergraduate Research (1-5, max. 15)

SISEA 517 Foreign Trade and Investment Law of the People’s Republic of China (1-4, max. 4)
Introduction to the regulatory regime governing foreign trade and investment in China and in-depth coverage of key aspects of the regime, with focus on issues faced by U.S. businesses. Covers specific regulations, their implementation in practice, as well as the political and economic background. Offered: jointly with LAW E 517.

SISEA 521 Seminar: Introduction to the Interdisciplinary Study of China (5-) Bachman, Dong, Guy

SISEA 522 Seminar: Introduction to the Interdisciplinary Study of China (-5) Bachman, Dong, Guy

SISEA 530 Seminar on China (3, max. 6)
Problems of Chinese history. Prerequisite: permission of instructor.

SISEA 531 Chinese History: Research Methods and Bibliographic Guides (3, max. 6) Guy
Introductory research seminar dealing with the methodological and bibliographical problems concerning all periods and aspects of Chinese history from the earliest times to the nineteenth century. Prerequisite: two years of classical or modern Chinese.

SISEA 532 The Chinese Political System (5) Bachman, Whiting
Examination of key approaches, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor. Offered: jointly with POL S 532.

SISEA 533 Seminar on Contemporary Chinese Politics (5)
Research on selected problems in contemporary Chinese politics. Prerequisite: SISEA 532 or permission of instructor. Offered: jointly with POL S 533.

SISEA 535 International Relations of Modern China (5)
Foreign policy of the People’s Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with POL S 535.

SISEA 538 Selected Topics on the Chinese Economy (5)
Introduction to key issues of China’s growth; the transition from planned economy; the changing role of the state; central-local relations; macro-management of the economy; income distribution; resources and agriculture; the external sector and the WTO.

SISEA 540 Japanese Law (4) Taylor
Basic institutions and processes of the Japanese legal system. Historical development and traditional role of law, reception of Western law, and cultural and structural factors that influence the function of law and legal institutions. Offered: jointly with LAW B 540.

SISEA 541 Economic and Social History of Japan to 1900 (5)
Analyses of landholding systems, the rise of commerce, demo-
SISEA 575 Seminar on Japanese Society (5)
Interdisciplinary seminar with class-led discussions on readings from anthropology, history, sociology, and nondiscipline-specific articles on Japanese society. Prerequisite: background on Japan. Not open to students who have taken SISEA 475.

SISEA 577 Readings on Political Economy of Japan and Northeast Asia (5) Anchordoguy
Analysis of major issues in Japan and also in Korea and China, such as the state’s role in industrial development, trade and investment in Asia, trade and security relations with the U.S., and Asian models of capitalism.

SISEA 581 Science, Technology, and Innovation Policies in East Asia (5) Anchordoguy
Role of state and technological change in economic development. Analyzes state and corporate policies historically. Technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia’s rise in world of technology and explores conditions for its successful continuation. Not open to undergraduates. Recommended: SISEA/SSIA course. Offered: jointly with I BUS 561.

SISEA 582 Japanese Business and Technology (5)
Anchordoguy
Examination of Japan’s postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with I BUS 562.

SISEA 584 Survey of Korean Society (5) Sorensen
Introduction to the social and political institutions of North and South Korea with an opportunity to master the most important literature on modern Korea. Focuses on the twentieth century with the major emphasis on the post-1945 period. Offered: A.

SISEA 585 Research Seminar: Modern Korea (6) Sorensen
Advanced instruction in problems and methods of research in Korean history. Foreign language not required. Prerequisite: permission of instructor.

SISEA 586 Japanese Trade Diplomacy (5)
Survey of Japan’s foreign trade diplomacy. Examines evolution of Japan’s trade patterns in exports and foreign direct investment with key partners. Covers institutional and legal frameworks of Japan’s trade relations, such as bilateral fora, regional options including free trade agreements, and multilateral venues such as the WTO. Not open to students who have taken SISEA 486.

SISEA 587 Japan in the International System (5)
Comprehensive examination of Japan’s international relations. Covers issues such as trade, security, environment, aid, and human rights. Investigates Japan’s participation in international organizations, including the UN, World Bank, IMF, and WTO. Examines Japan’s relations with the United States, the European Union, Asia, Latin America, Africa, and other regions. Not open to students who have taken SISEA 487.

SISEA 590 Special Topics (2-5, max. 10)
Seminar. Course content varies. Offered occasionally by visiting or resident faculty.

SISEA 600 Independent Study or Research (*)

SISEA 700 Master’s Thesis (*)

International Studies: Europe

Course Descriptions

EURO 111 Elementary Modern Greek (5)
Fundamentals of oral and written modern Greek. Offered: A.

EURO 112 Elementary Modern Greek (5)
Fundamentals of oral and written modern Greek. Recommended: EURO 111 or GREEK 401. Offered: W.

EURO 113 Elementary Modern Greek (5)

EURO 140 Russia From the Tenth Century to the Present (5) I&S
Russian political, social, and economic history from the tenth century to the present. Offered: jointly with HIST 140.

EURO 211 Second-Year Modern Greek (5) VLPA
Continuation of EURO 111, 112, 113. Intensive practice in speaking, reading, and writing. Recommended: EURO 113 or GREEK 403. Offered: A.

EURO 212 Second-Year Modern Greek (5) VLPA
Continuation of EURO 111, 112, 113. Intensive practice in speaking, reading, and writing. Recommended: EURO 211. Offered: W.

EURO 213 Second-Year Modern Greek (5) VLPA

EURO 220 Introduction to East European Studies (5) I&S Felak
Introduction to the history of post-1945 Eastern Europe focusing on political, economic, social, cultural, and diplomatic issues. Countries surveyed include Albania, Bulgaria, Czechoslovakia, Hungary, Poland, Romania, and Yugoslavia. Offered: jointly with HSTEU 220.

EURO 243 Russian Civilization (5) I&S
Russia’s civilization, including fine arts, literature, religion, and history; political, social, and legal institutions and thought in relation to the general development of Russian society from early times to 1917.

A multi-disciplinary approach to contemporary Europe focusing on social, political, cultural, and economic change, with special reference to developments in the countries of the European Union, Scandinavia, and those in Eastern Europe in the post-Soviet era.

EURO 320 Greek History: 7000 BC to Present (5) I&S Thomas
History of Greece from its Neolithic village origins to the present. Examines the different forms of one of the most resilient cultures in the human story. Offered: jointly with HIST 320, A.

EURO 324 Soviet and Post-Soviet Society (5) I&S
Social, cultural, political, and economic systems of the major nations which, until 1991, comprised the Soviet Union and are now independent states. Deals with period of full communist power and changes brought about by its demise.

EURO 344 The Baltic States and Scandinavia (5) I&S
Survey of the cultures and history of Estonia, Latvia, and Lithuania from the Viking Age to the present, with particular attention to Baltic-Scandinavian contacts. Offered: jointly with SCAND 344.
EURO 345 Baltic Cultures (5) I&S/VLPA

EURO 360 Contemporary Spain (5) I&S/VLPA
Social, political, and cultural developments in Spain since the end of the Franco dictatorship in 1975. Extensive use of Spanish Web sites. Prerequisite: SPAN 302 which may be taken concurrently. Offered: jointly with SPAN 360.

EURO 364 Modern Greece: 1821 to the Present (5) I&S
Politics and society of Greece from War of Independence to the present. Emergence and development of the Greek state; Greece in the world wars; civil war and post-war politics; military dictatorship; transition to democracy; recent developments. No prior study of Greece assumed. Offered: jointly with HSTEU 364.

EURO 395 Supervised Internship (1-5, max. 5)
EURO 399 Study Abroad (1-5, max. 15) I&S
For participants in Study Abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

EURO 420 The Olympics: The Merging of Old and New in Modern Greece (5) I&S
Explores the role of the Olympic games in the history and culture of Greece, from Bronze Age pre-Olympiads to the 2004 Athens Games. Topics include mythical and historical origins of the Olympics, moral principles and practices in Greek sports, and modern Olympics, 1896 to 2004. Offered: jointly with HIST 420.

EURO 425 European Media Systems (5) I&S
Examines media systems in selected countries in Europe and policy issues that link (or divide) members of the European Union and other major media producers. Media studied in context of the contemporary economic, social, political, and cultural milieu in which they operate. Offered: jointly with COM 425.

EURO 445 War and Occupation in Northern Europe: History, Fiction, and Memoir (5)
The study of literary representations (fiction, memoirs, and personal narratives) dealing with World War II and the occupation of the Nordic and Baltic countries. Offered: jointly with SCAND 445.

EURO 481 August Strindberg and European Cultural History (5) I&S/VLPA
Examines the work of Swedish dramatist, novelist, and painter August Strindberg, in the context of European literary movements and history of ideas from 1880 to 1912, and Strindberg’s influence on 20th-century drama and film. Offered: jointly with SCAND 481.

EURO 490 Special Topics (1-5, max. 15) I&S

EURO 494 Senior Seminar I (5) I&S
Introduction to research into European topics and to the analysis of problems.

EURO 495 Senior Seminar II (5) I&S
Writing and discussion of senior thesis. Prerequisite: EURO 494. Offered: Sp.

EURO 496 Paris: Architecture and Urbanism (3-5, max. 5) I&S/VLPA
Spans the architectural history of Paris, from its Gallic, pre-roman origins in the 2nd century BCE through the work of 21st century architects. Focuses on changing patterns of the physical fabric of the city and its buildings, as seen within the context of the broader political, social, economic, and cultural history. Offered: jointly with ART H 494.

EURO 499 Undergraduate Research (1-5, max. 15)

International Studies: Jewish Studies

Course Descriptions
SISJE 177 The Jewish Community in the United States: Success, Influence, and Prospects (5) I&S Bernstein
Examines relationship between American society and its ethnic/religious groups through study of the American Jewish community. Focuses on economic success; challenges to religious traditions; relationships between American and Jewish cultures; and impact of Jewish ideas and organizations on American politics. Offered: jointly with SOC 177; S.

SISJE 250 The Jews in Western Civilization (5) I&S Jaffe
History of the Jews from late antiquity to the present. Examines the relationship between Jewish communities and the larger societies in which they are found. Offered: jointly with HIST 250.

SISJE 269 The Holocaust: History and Memory (5) I&S
Explores the Holocaust as crucial event of the twentieth century. Examines the origins of the Holocaust, perpetrators and victims, and efforts to come to terms with this genocide in Europe, Israel, and the United States. Offered: jointly with HIST 269.

SISJE 312 Jewish Literature: Biblical to Modern (5) I&S/ VLPA
A study of Jewish literature from Biblical narrative and rabbinic commentary to modern prose and poetry with intervening texts primarily organized around major themes: martyrdom and suffering, destruction and exile, messianism, Hasidism and Enlightenment, Yiddishism and Zionism. Various critical approaches; geographic and historic contexts. Offered: jointly with ENGL 312.

SISJE 336 American Jewish History Since 1885 (5) I&S
Political, social, economic, religious history of American Jewish community from great eastern European migration to present. Integration of immigrant community into general American community; rise of nativism; development of American socialism; World War I and II; and reactions of American Jews to these events. Offered: jointly with HSTAA 336.

SISJE 367 Medieval Jewish History (5) I&S Stacey
Social and intellectual history of the Jews in Western Europe to fifteenth century. Jews under Islam and Christianity; the church and the Jews; the Crusades and their legacy; intellectual achievements; conflict and cooperation. Offered: jointly with HSTEU 367.

SISJE 368 Modern European Jewish History (5) I&S Stein
Survey of European Jewish history from the Spanish expulsion (1492) to World War I (1914). Considers diversity of European Jewries and the factors that cohered them. Examines how European Jewries ordered their lives, shaped gender and class norms, and interacted with the societies in which they lived. Offered: jointly with HSTEU 368.

SISJE 377 The American Jewish Community (5) I&S Burstein
Development and current status of American Jewish community: immigration; changes in religious practice, institutions in response to circumstances in American Society; creation of new types of secular communal organizations; assimilation; confrontation with antisemitism; family life; social, economic mobility; religious, secular education; intermarriage, and future of community. Offered: jointly with SOC 377.

SISJE 378 Contemporary Jewish American Identities (5) I&S Friedman
Introduction to the debates about post-Holocaust Jewish identities in multicultural America. Explores whether a distinctive Jewish community is headed toward assimilation, experiencing revival, or merely transforming the multiple ways Jewish experience is lived. Topics include new Jewish immigrants, the new Orthodox, Black Jews, Jewish feminism, children of Holocaust survivors. Offered: jointly with SOC 378.

SISJE 399 Study Abroad — Jewish Studies (1-5, max. 15) I&S
For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISJE 438 Jewish Women in Contemporary America (5) I&S
Examines how Jewish women’s identities are socially constructed and transformed in contemporary America, using social histories, memoirs, and ethnographies to analyze scholars’ approaches to Jewish women’s lives. Topics include the role of social class, religion, migration, the Holocaust, and race relations in Jewish women’s lives. Offered: jointly with WOMEN 438.

SISJE 452 The Biblical Song of Songs (3) VLPA Noegel
Examines the erotic and beautiful Song of Songs within the context of ancient (and medieval) Near Eastern love poetry and correlates close readings of the book with various interpretations it has received from antiquity until today. No knowledge of Hebrew or the Bible is required. Offered: jointly with NEAR E 452.

SISJE 453 The Biblical Prophets (3) VLPA I&S Noegel
Examines the biblical prophets (in translation) within their Near Eastern contexts. Studies them for their historicity, literary and rhetorical sophistication, and ideological agendas. This course seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible is required. Offered: jointly with NEAR E 453.

SISJE 454 Israel: The First Six Centuries BCE (3) VLPA I&S Noegel
Traces the Israelites, from the Babylonian destruction of the Jerusalemite Temple (586 BCE) to events following the destruction of the second Temple (1st century CE). Focuses on primary historical and literary sources as well as archaeological and artistic evidence. No knowledge of Hebrew or the Bible is required. Offered: jointly with NEAR E 454.

SISJE 455 The Kings of Monarchic Israel (3) VLPA I&S Noegel
Examines the biblical accounts (in translation) concerning the formation and collapse of the united Israelite monarchy. Investigates the archaeological and textual evidence for their historicity, the literary sophistication of these accounts, and Israelite kingship within the wider context of the ancient Near East. No knowledge of the Bible is required. Offered: jointly with NEAR E 455.

SISJE 465 The Jews of Eastern Europe (5) I&S
Jewish society in Poland, Russia, the Habsburg Lands, and Romania from the late Middle Ages to the Holocaust. Offered: jointly with HSTEU 465.

SISJE 466 The Sephardic Diaspora: 1492-Present (5) I&S Stein
Examines the history and culture of Sephardic Jewry from the expulsion from the Iberian Peninsula in 1492 to the present. Explores the creation of Sephardic communities in the Dutch and Ottoman Empires, Western Europe, the Americas, and Africa, and the history of the conversos and “hidden Jews.” Offered: jointly with HSTEU 466.

SISJE 469 Enlightenment, Emancipation, Antisemitism: History of the Jews, 1770-1914 (5) I&S Stein
The Jewish experience in the modern world from the European Enlightenment to the First World War. Focus on the debates surrounding Jewish emancipation, the reception of Jews within European society, modern antisemitism, nationalist movements, mass migration, and war. Offered: jointly with HSTEU 469.

SISJE 490 Special Topics (1-5, max. 15) I&S
Content varies.

SISJE 495 Seminar in Jewish Studies (5) I&S Jaffe
History of Jewish Studies as an organized field of academic inquiry. Explores the implications for Jewish Studies of its present setting within the context of the humanities and the social sciences.

SISJE 499 Undergraduate Research (1-5, max. 15) I&S
Professionally-guided archaeological fieldwork at a recognized archeological dig in the United States or abroad. Offered: S.

International Studies: Latin American Studies

Course Descriptions

SISLA 120 Introduction to Human Rights in Latin America (5) I&S Godoy
Overview of human rights issues and how they have evolved in recent Latin American history, from the military dictatorships of the authoritarian period to contemporary challenges faced in the region’s democracies. Credit not allowed if LSJ 470/SIS 410 already taken.

SISLA 322 International Political Economy of Latin America (5) I&S
Study of international relations and the global political economy of Latin America and the Caribbean. Topics include power and production between social classes and ethnic groups, as well as ideologies and intellectual movements. Offered: jointly with POL S 322.

SISLA 342 Government and Politics of Latin America (5) I&S
Exploration of politics underlying Latin America’s economic development. Topics covered include import-substituting industrialization, mercantilism, the debt crisis, neoliberalism, market integration, and poverty. Review of major theoretical perspectives such as modernization theory, dependency, and the new political economy. Offered: jointly with POL S 322.

SISLA 355 Social Change in Latin America (5) I&S
Explores changes in Latin America, including social, political, and economic development, and popular mobilization in Latin America. Examines relations of power and production between social classes and ethnic groups, as well as ideologies and intellectual movements. Offered: jointly with SOC 355.

SISJE 399 Study Abroad: Latin American Studies (1-5, max. 15) I&S
For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISLA 451 Cultural Geography of Latin America (5) I&S
Interdisciplinary senior seminar examining how physical and social geographies are culturally constructed and interconnected with subjectivities and power in Latin America. Topics include identity formation grounded in particular territories and the social constitu-
tation of space via an interplay of material and cultural forces.

**SISLA 469 Concepts of Cannibalism in the Colonial World (5) I&S**

Barbon

Study of textual and iconicographic representations of American cannibalism in the 18th and 17th century. Introduction to research produced by literary critics, anthropologists, and historians.

Prerequisite: either SPAN 303 or SPAN 316; SPAN 321 or SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 469.

**SISLA 470 Latin American Studies Internship (1-5, max. 10)**

Off-campus fieldwork with a community national, or international organization, in an apprenticeship or internship situation. Supervised by on-site field supervisor and Latin American Studies faculty member.

**SISLA 480 Labor and Popular Movements in Latin America (5) I&S Bergquist**

Interdisciplinary approach to origins and trajectory of labor movement from late nineteenth century to present. Emphasis in contemporary period on popular movements, including neighborhood associations, religious base communities, women’s movement, and ethnic mobilization for democratic social and political reform. Recommended: two non-language Latin American studies courses. Offered: jointly with HSTAA 480.

**SISLA 485 Cultural Studies of Latin America (5) I&S/ VLPA Steele**

Identity, representation, and transculturation in Latin American popular culture. Topics vary but may include, cinema, folk art, and historical, ethnographic, and travel writing. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 485.

**SISLA 486 Photography and Cultural Studies in Latin America (5) I&S/ VLPA Steele**

Interdisciplinary exploration of the connections between visual anthropology (ethnography through photography and film), documentary and art photography, and colonial and post-colonial discourse in Latin America during the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322 and one additional 300-level course beyond 303. Offered: jointly with SPAN 486.

**SISLA 489 The Mexico-U.S. Border in Literature and Film (5) I&S/ VLPA Doremus, Steele**

Analysis of the Mexico-U.S. Border region in literature and film of the 1990s and early 2000s. Includes migration, tourism, NGOs, globalization, transnational commerce, multiculturalism, and politics of gender, sexuality and race. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322 and one additional 300-level course above SPAN 303. Offered: jointly with SPAN 489.

**SISLA 490 Special Topics (1-5, max. 15) I&S**

Content varies.

**SISLA 492 Latin American Studies Seminar (5, max. 15) I&S**

**SISLA 499 Undergraduate Research (1-5, max. 15)**

**International Studies: Middle East**

**Course Descriptions**

**SISME 210 Introduction to Islamic Civilization (5) I&S/ VLPA DeYoung**

Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Offered: jointly with NEAR E 210.

**SISME 213 Introduction to the Modern Middle East (5) I&S**

Barbon

Major social and political trends in the Middle East during the 18th, 19th, and 20th centuries. Basic principles of Islam and its diversity, changing balance of power during the early modern period; European colonialism and withdrawal; pan-Arabism, nationalism, feminism and religious resurgence. Offered: jointly with NEAR E 213.

**SISME 399 Study Abroad: Middle Eastern Studies (1-5, max. 15) I&S**

For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

**SISME 400 The Middle East in the Modern World (5) I&S**

Kasaba

Economic, political, and cultural ties between the Middle East and the modern world between the eighteenth century and the present. Particular attention to the transformation of societies, formation of modern states, the relationship between Islam and democracy, and gender and society in the Middle East.

**SISME 420 International Humanitarian Law (5) I&S Lorenz**

Investigates International Humanitarian Law (sometimes called the Law of Armed Conflict), the field is concerned with rules developed by civilized nations to protect the victims of armed conflict, including the Geneva Conventions. Case studies include the conflict between Israel and the Palestinians, as well as developments in Afghanistan and Iraq.

**SISME 430 Economic Development of the Middle East (5) I&S**

Kasaba

Comparative examination of economic development in the Middle East. Includes population growth, agrarian change, industrialization, foreign trade, capital flows, and fiscal and monetary policies.

**SISME 432 The Middle East and the World Economy (5) I&S**

Kasaba

Early nineteenth century to the 1980s. Production and export of agricultural and raw materials, extension of loans and investments by Europeans, commercial exploitation and export of oil as major phases of economic interaction. These phases and their political repercussions; their significance and consequences.

**SISME 458 Israel: Politics and Society (5) I&S Migdal**

Examines how parts of the mosaic of Israel’s ethnic groups and religions have interacted over time to create today’s society. Focus on politics, especially interaction of the state with the mosaic society. The religious divide; the Jewish ethnic divide; Palestinians in Israel; war and its effect on Israel; the long road to peace.

**SISME 490 Special Topics (1-5, max. 15) I&S**

Content varies.

**SISME 495 Trends in the Contemporary Middle East (3) I&S**

Perspectives on cultural, political, and other aspects of Middle Eastern societies. Focuses on background complexities rather than immediate political-military confrontations. Topics vary. Offered: jointly with NEAR E 495.

**SISME 499 Undergraduate Research (1-5, max. 15)**

**SISME 530 Reading Seminar on Middle East Studies (2)**

Middle Eastern historiography, Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East. Credit/no credit only.

**SISME 531 Reading Seminar on Middle East Studies (2)**

Middle Eastern historiography, Islamic law, Islamic theology, relations between the Middle East and the world economy, political
structures, social movements in the Middle East. Credit/no credit only.

SISME 532 Reading Seminar on Middle East Studies (2) Middle Eastern historiography, Islamic law, Islamic theology, relations between the Middle East and the world economy, political structures, social movements in the Middle East. Credit/no credit only.

SISME 560 Seminar in Turkish Studies (2, max. 12) Recent research and writings focused on the Ottoman Empire and modern Turkey. Credit/no credit only.

SISME 590 Special Topics (3-5, max. 10) Content varies.

SISME 600 Independent Study or Research (*)

SISME 700 Master’s Thesis (*)

International Studies: Russian, East European and Central Asian Studies

Course Descriptions

SISRE 405 Peoples of Russia (5) I&S Traditional cultural and social organizations of the various nationalities in Russia. Particular emphasis on peoples of Siberia. Role of traditional culture in shaping contemporary lifestyles in a multiethnic, diversified setting. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 405.

SISRE 410 Writers and Intellectuals of Central Asia (3) I&S/ VLPA Covers modern native writers and intellectuals of Central Asia and compares them with writers educated before the revolution of 1917. Prerequisite: NEAR E/SISRE 375.

SISRE 418 Eastern Europe: the Political Economy of the Region (5) I&S Poznanski Focus on the classical command-type economy and the most recent economic and political transition in Eastern Europe. Analysis of current institutional reform, privatization, and trade relations.

SISRE 425 Anthropology of the Post-Soviet States (5) I&S Bilaniuk Analysis of Soviet and post-Soviet culture and identity. Historical transformations in Soviet approaches to ethnicity and nationality; contemporary processes of nationbuilding and interethnic conflict. Examination of culture through the intersection of social ritual, government policies, language, economic practices, and daily life. Regional focus will vary. Offered: jointly with ANTH 425.

SISRE 443 Kievian and Muscovite Russia: 850-1700 (5) I&S Waugh Development of Russia from earliest times to the reign of Peter the Great. Offered: jointly with HSTAM 443.

SISRE 444 Imperial Russia: 1700-1900 (5) I&S Young Development of Russia from Peter the Great to Nicholas II. Offered: jointly with HSTEU 444.

SISRE 448 Twentieth-Century Russia (5) I&S Ellison, Young Russia and the USSR from Nicholas II to the present. Offered: jointly with HSTEU 445.

SISRE 450 Survey of the Cultures of the Turkic Peoples of Central Asia (3) I&S/VLPA Nomadic and sedentary cultures of the Turkic peoples of Central Asia. Emphasis on languages, literature, and adherence to traditional modes of life. Offered: jointly with NEAR E 450.

SISRE 455 Marine Business Environment in Russia and Eastern Europe (3) I&S Kaczynski International marine business environment of Russia and the maritime nations of East Europe; their transition process from communist to free market economic systems. Covers aspects of doing business in marine-related fields such as shipping, fisheries, shipbuilding, ports, and land infrastructures, marine tourism, and water sports. Offered: jointly with SMA 455.

SISRE 490 Special Topics (1-5, max. 15) I&S Topics vary.

SISRE 501 Bibliography and Research Methods (5) Introduction to bibliographic and other scholarly resources in field; development of research techniques. Some use of relevant language required. Required of all first-year MAIS students.

SISRE 502 Thesis Seminar (3) Required of all second-year MAIS students. Credit/no credit only.

SISRE 504 Approaches to East European Politics (3-5) Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with POL S 537.

SISRE 505 Seminar: Problems of Social and Political Development in Eastern Europe (3-6, max. 6) Research seminar dealing with selected problems of continuity and change in eastern Europe. Prerequisite: some previous course work on eastern Europe.

SISRE 555 Russian Ocean Policy (3) Kaczynski Russian ocean policy following perestroika and disintegration of Soviet empire. Discusses Russian navy, fishery industry, merchant marine, ocean research fleet, in light of international agreements, and joint ventures and new political, economic, and social environments. Prerequisite: knowledge of Soviet/Russian socio-economic problems or permission of instructor. Offered: jointly with SMA 555.

SISRE 590 Special Topics (2-5, max. 10) Course content varies. Offered occasionally by visitors or resident faculty.

SISRE 600 Independent Study or Research (*)

SISRE 700 Master's Thesis (*)
SISSA 200 South Asia Today (5) I&S
Interdisciplinary introduction to the field of South Asian Studies. Overview of the topographic, social, and linguistic geography and history of India, Pakistan, Bangladesh, Sri Lanka, and Nepal. Examines politics, economy, social structure, religion, cultural production and the arts, popular culture, and transnationalism.

SISSA 316 Modern South Asia (5) I&S Sivaramakrishnan
Twentieth-century history and society of Indian subcontinent. Topics include nationalism, rural and urban life, popular culture gender and environmental politics. Offered: jointly with ANTH 316.

SISSA 339 Social Movements in Contemporary India (5)
Ramanurthy, Sivaramakrishnan
Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 339/ANTH 339.

SISSA 340 Government and Politics of South Asia (5) I&S
Comparison of problems of national integration and political development in India, Pakistan, and Ceylon. Offered: jointly with POL S 340.

SISSA 386 Introduction to the Philosophical Systems of India (5) I&S Potter
Fundamental views of classical Indian philosophical schools on epistemology and metaphysics through readings in translation of basic works. Nyaya, Vaisesika, Samkhya, Yoga, Jain philosophy, Vijnanavada and Madhyamika Buddhism, Advaita Vedanta, and later developments. Offered: jointly with PHIL 386.

SISSA 399 Study Abroad: South Asian Studies (1-5, max. 15) I&S
For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISSA 417 Political Economy of India (5) I&S
Analysis of relationships among processes of economic change, political institutions, and structures of political power in contemporary India. Includes contrasting approaches to Indian economic development, land reform, radical and agrarian political movements, and role of foreign aid. Offered: jointly with POL S 417.

SISSA 434 International Relations of South Asia (5) I&S
Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Offered: jointly with POL S 434.

SISSA 490 Special Topics (1-5, max. 15) I&S
Topics vary.

SISSA 494 Ramayana in Comparative Perspective (5) VLPA
Pauwels
Examines and compares different versions (mainly South Asian) of the Ramayana, including the widely popular television version. Focuses on some famous and controversial passages, with special attention to gender issues. Incorporates background readings from the most recent research. Offered: jointly with ASIAN 494.

SISSA 498 Undergraduate Colloquium on South Asia (5) I&S
Interrelationship of the various social science disciplines in the study of South Asian history and culture.

SISSA 499 Undergraduate Research (1-5, max. 15)
SISSA 510 Introduction to Interdisciplinary Study of South Asia (5)
Examines work done in the various disciplines focusing on South Asia.

SISSA 512 Seminar on South Asia (5)
Interdisciplinary seminar for graduate students in which research and writing on individual research topics are critically developed. Designed to provide each student with an opportunity to synthesize his or her studies on South Asia. Prerequisite: SISSA 510; SISSA 511 or permission of graduate program coordinator.

SISSA 539 Social Movements in Contemporary India (5)
Ramanurthy, Sivaramakrishnan
Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women’s movements. Includes critiques of development and conflicts over forests, dams, women’s rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 539/ANTH 539.

SISSA 590 Special Topics (2-5, max. 10)
Seminar. Course content varies. Offered occasionally by visitors or resident faculty.

SISSA 600 Independent Study or Research (*)

SISSA 700 Master’s Thesis (*)

International Studies: Southeast Asian Studies

Course Descriptions

SISSA 221 History of Southeast Asia (5) I&S Giebel, Sears
Surveys Southeast Asian civilizations at the outset of Western colonial rule; the colonial impact on the traditional societies of Burma, Thailand, Cambodia, Laos, Vietnam, Malaysia, Indonesia, and the Philippines; nineteenth- and twentieth-century nationalist and revolutionary movements; emergence of Southeast Asia as a region in the modern world. Offered: jointly with HSTAS 221.

SISSA 265 The Viet Nam Wars (5) I&S Giebel
Recent Vietnamese history and strategies for independence and national unification vis-a-vis French colonialism, Japanese occupation, American intervention, and internal divisions. Covers historical roots and contemporary contexts of revolution and war, objectives and motivations of participants, and the enormous human costs. Emphasizes socio-cultural changes and wars’ legacies. Offered: jointly with HSTAS 265.

SISSA 314 Culture, Environment, and Identity in Island Southeast Asia (5) I&S Lowe
Anthropological study of colonial and post-colonial contexts of Island Southeast Asia. Emphasis on historical legacies, influence of world religions, formation of national and collective identities, revolution and national politics, and modernities. Prerequisite: either one 200-level ANTH course, LING 201, or one SIS course. Offered: jointly with ANTH 314.

SISSA 315 Southeast Asian Civilization: Buddhist and Vietnamese (5) I&S Keyes
Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos and in Vietnamese societies of Southeast Asia. Culture of tribal peoples who live on peripheries of these societies. Cultural transformations consequent upon the war in Indochina and resettlement of Indochinese refugees in United States. Offered: jointly with ANTH 315.

SISSA 343 Politics and Change in Southeast Asia (5) I&S
Government and politics in the countries of Southeast Asia, with attention given to the nature of the social and economic environments that condition them. Offered: jointly with POL S 343.

SISSE 399 Study Abroad: Southeast Asian Studies (1-5, max. 15) I&S
For participants in study abroad program. Specific course content varies. Courses do not automatically apply to major/minor requirements.

SISSE 445 Literature and Society in Southeast Asia (5, max. 10) I&S/VLPA
Focus on either Vietnam or Thailand. Provides students with opportunity to explore how those living in Southeast Asia have reflected on the radical social changes their societies have undergone through novels, short stories, and poetry. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with ANTH 445.

SISSE 465 The Viet Nam Wars (5) I&S
Recent Vietnamese history and struggles for independence and national unification vis-a-vis French colonialism, Japanese occupation, American intervention, and internal divisions. Covers historical roots and contemporary contexts of revolution and war, objectives and motivations of participants, and the enormous human costs. Emphasizes socio-cultural changes and wars’ legacies. Offered: jointly with HSTAS 465.

SISSE 466 Islam, Mysticism, Politics and Performance in Indonesian Culture (5) I&S/VLPA
Shows how Indonesia, the world’s fourth most-populous country, with the largest Islamic population, weaves together local practices and influences from India and Persia. Offers ways of understanding modern Indonesian performing arts, religion, and politics. Offered: jointly with HSTAS 446.

SISSE 469 Topics in Southeast Asian History (5) I&S
Introduces major issues within the history and culture of one country of Southeast Asia. Content varies. Topics may include religion, economics, colonialism, perspectives on gender, labor history, literatures, popular culture, and performing arts. Focuses on a different Southeast Asian country each time offered. Offered: jointly with HSTAS 469.

SISSE 490 Special Topics in Southeast Asian Studies (1-5, max. 15) I&S
Content varies.

SISSE 499 Undergraduate Research (1-5, max. 15)

Law Society and Justice
42 Gowen

The program in Law, Societies, and Justice provides an interdisciplinary liberal arts education focusing on the unique forms of social control, institutionalized disputing, and justice that we identify with law or legality. Courses inquire into the historically embedded principles and institutional practices associated with diverse legal domains — constitutional, criminal, administrative, and civil law as well as fundamental human rights — in the United States and throughout much of the world. The program encourages complex assessments of the workings and implications of law in society according to standards that are both internal and external to the rule of law itself.

Undergraduate Program
Adviser
42 Gowen, Box 353530
206-543-2396
lsjadv@u.washington.edu

Law, Societies, and Justice offers the following programs of study:

• The Bachelor of Arts degree with a major in law, societies, and justice.
• A minor in law, societies, and justice
• A minor in human rights involving courses at the three UW campuses
• A minor in disability studies

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that emphasize development of reading, writing, and especially analytical skills. Also, classes that provide background knowledge of modern world history, politics, institutions, and political theory.

Department Admission Requirements

Admission is competitive, based on the following: GPA, with emphasis on grades received in courses required for admission (applicants accepted normally present cumulative GPAs considerably above 2.50); personal statement representing the student’s interest in and commitment to becoming a Law, Societies, and Justice major; other evidence of a commitment to the study of society, justice, and law. Junior standing preferred.

Completion of one of the following courses: LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ 363/POL S 363 or LSJ 362; LSJ 375 or SOC 372.

Completion of one research methods or statistics class. See the program’s Web site or advising office for a list of approved courses.

Completion of one English composition course. (Further evidence of writing skills in the social sciences is encouraged.)

A minimum cumulative GPA of 2.00 at the University of Washington.

Students may apply in autumn, winter, or spring quarters. Applications for admission are due no later than the second Friday of each quarter. Students are notified of admissions decisions by the fifth week of the quarter in which they apply.

Major Requirements

58 credits as follows:

Completion of the four LSJ core courses: LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ/POL S 363 or LSJ/SIS 362; LSJ/POL S 367; LSJ 375 or SOC 372 (20 credits)

One research methods or statistics course from approved list (4-5 credits)

Three courses from one of the three designated subfields of study (crime, social control, and justice; comparative legal
Minor Requirements: 30 credits as follows:

- Two courses from LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ 363/POL S 363 or LSJ 362; LSJ 367/POL S 367; LSJ 375 or SOC 372 (10 credits).
- Two courses from a single Law, Societies, and Justice major subfield. The major subfield areas are crime, social control, & justice; comparative legal institutions & politics; and rights, resistance, & reconstruction in law. Classes fulfilling the subfield requirement are outlined on the departmental web pages and handouts (6-10 credits).
- One course from a second major subfield or from the Law, Societies, and Justice research methods list. The research methods list is outlined in departmental web pages and handouts (3-5 credits).
- Elective courses from the list of LSJ core courses or LSJ major subfields. Only one course from the research methods list can be used to reach the total of 30 credits.

Minor Requirements (Disability Studies): 30 credits

Core courses: LSJ 332, LSJ 433, LSJ 434 (15 credits).

Internship or independent study: LSJ 332 (prerequisite course to completing an internship or independent study) (5 credits)

Disability studies electives: See LSJ adviser or LSJ program homepage for complete information. Courses challenge students to develop the capacities to: read and interpret texts, including theoretical, empirical and legal documents; comprehend and contrast arguments; develop and defend arguments; contrast theoretical arguments with empirical realities; assess contemporary practices of justice delivery against contemporary conceptions of justice. Students are required to express these skills in both verbal and written forms, through active class discussions and well-constructed writing assignments. The development of these skills assists students in a range of possible future endeavors, including a wide array of careers in law and justice.

Instructional and Research Facilities: Students have access to the Political Science computer lab and writing center for most classes. Research opportunities are available on an individual and group basis with many professors.

Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

Research, Internships, and Service Learning: LSJ was the first program in the social sciences to require an internship as part of its major. The internship aims: (1) to provide students with insights into the workings of law in practice; (2) to scrutinize and 'test' some of the theories and concepts found in the literature against 'real world' practice; (3) to advance career development and goals, and (4) to provide 100 hours of local community service. Students work with a variety of governmental and non-governmental agencies and organizations, including private law firms, federal law enforcement agencies, and social service organizations (see the Internship Listings for complete information). It is the student's responsibility to find an internship, although the LSJ adviser can help you find a suitable one. Students are required to write two papers according to specific guidelines for internship course credit. Many of the LSJ faculty regularly invite majors to assist them in the development and execution of research endeavors. These provide students an unparalleled opportunity to understand the challenges and mechanics of high-level research.

Department Scholarships: None available, although the program does provide several awards with modest cash stipends to graduating seniors.

Student Organizations/Associations: Law, Societies, and Justice is a founding member of the National Consortium of Law and Society Programs. The program is presently reassessing the status of student associations and organizations.

Of Special Note: The required senior seminar emphasizes close reading of texts, active class discussions, and well-reasoned analytic writing, providing an unmatched opportunity to establish a close connection to faculty and other students, and to hone the analytic and communicative skills.

Faculty

Katherine Beckett, Associate Professor
Ph.D. in Sociology at UCLA

Rachel A. Cichowski, Assistant Professor
PhD, University of California , Irvine , 2002

Julius Debro, Professor (retired)
B.A. from the University of San Francisco; M.A. in Sociology from San Jose State University; Ph.D. in Criminology from U.C. Berkeley.

Larry Fehr Lecturer

Joan M. Fitzpatrick, Professor
B.A. from Rice University (1972); J.D., Harvard University (1975); Diploma in Law from Oxford University (1980).

Angelina Snodgrass Godoy, Assistant Professor
PhD in Sociology from UC Berkeley in 2001

Steven Herbert, Professor
Ph.D., UCLA 1995

George Lovell, Assistant Professor
Ph.D., Michigan

Jamie Mayerfeld, Associate Professor
PhD, Princeton

Michael McCann, Professor, Director Law, Societies and Justice.

Joel S. Migdal, Professor
Ph.D., Harvard

Arzoo Osanloo, Assistant Professor
Ph.D., Stanford University 2002; J.D., American University 1993

Anita Ramasastry, Assistant Professor

William Redkey, Lecturer

Patrick L. Rivers, Assistant Professor
Ph.D., University of North Carolina in Political Science.
Stuart Scheingold, Professor Emeritus

William Talbott, Associate Professor
Bachelor's degree in philosophy, Princeton; Doctorate, Harvard, 1976.

Veronica Taylor, Professor

Mimi Walsh, Adjunct Faculty
BA in Economics from Wilson College; MA in Criminal Justice; Ph.D. in Criminal Justice from the State University of New York at Albany.

Walter Walsh, Assistant Professor

Susan Whiting, Associate Professor
Ph.D., University of Michigan

Louis Wolcher, Professor
BA in History, 1969; Harvard Law School (JD, 1973)

Course Descriptions

LSJ 299 Special Topics in Law, Societies, and Justice (2-5, max. 10) I&S Examines a different subject or problem of current interest within the discipline.

LSJ 301 Internship (1-5, max. 5) Participation in an approved internship. Credit/no credit only.

LSJ 310 Research in Law, Societies, and Justice (1-5, max. 15) I&S Supervised introductory individual and/or seminar based research on some aspect of society and justice.

LSJ 316 Law, Justice, and Social Theory (5) I&S Provides students interested in law a background in social theory, including Marx, Weber, Durkheim, and contemporary theorists. Explores the law's ambiguous role as both mechanism of enforcement for social hierarchies of class, race, and gender; and as a tool for emancipation, enabling, and empowering oppressed groups' claims to equality.

LSJ 321 Human Rights Law in Culture and Practice (5) I&S Introduces the complexities of issues surrounding human rights. Examines human rights concerns through critical analyses, taking into account legal, social, economic, and historical variables. Offered: jointly with ANTH 323.

LSJ 327 Women's Rights as Human Rights (5) I&S Women's rights in comparative perspective, focusing on varying settings that alter the meaning and practical application. Domestic level: areas including abortion politics to trafficking in women. International level: areas including equality claims before European supranational judicial bodies, rape as war crime in international law. Offered: jointly with POL S 327.

LSJ 330 Beyond Civil Rights: Law, Culture, and Change (5) I&S Assessment of the contemporary politics of civil rights as shaped by an identity politics that is both significant and passe. Recommended: LSJ 363 or one course in either AES or WOMEN. Offered: jointly with AES 330.

LSJ 331 The Politics of Race in the United States (5) I&S Introduction to the history and development of racial hierarchy in the U.S., focusing on how race shapes political institutions (including the constitution, the electoral college, Congress, political parties) and how political institutions structure racial power. Case studies of welfare state development, crime policy, immigration policy, and terrorism politics. Offered: jointly with POL S 317.

LSJ 332 Disability and Society: Introduction to Disability Studies (5) I&S Introduction to the field of disability studies. Focuses on theoretical questions of how society predominantly understands disability and the social justice consequences. Examines biological, social, cultural, political, and economic determinants in social creation/construction (framing) of disability and effects on those claiming and/or labeled as disabled. Offered: jointly with CHID 332.

LSJ 355 Introduction to the American Court System (3) I&S Philosophical and structural bases of the American court system; roles of attorneys, judges and the public in that system. Some focus also on current challenges to the courts posed by court congestion and alternative dispute resolution, and on future prospects for the courts.

LSJ 360 Introduction to United States Constitutional Law (5) I&S Growth and development of the United States Constitution as reflected in decisions of the Supreme Court; political, social, and economic effects. Offered: jointly with POL S 360.

LSJ 361 United States Courts and Civil Liberty (5) I&S Cases and literature bearing on protection of constitutionally guaranteed private rights, with particular reference to the period since 1937. Offered: jointly with POL S 361.

LSJ 362 Law and Justice: An Introduction to Social Theory (5) I&S Godoy Provides conceptual tools for understanding law and its role in society by acquainting students with major currents of social theory. Topics include liberalism, Marxism, critical feminist theory, and critical race theory.

LSJ 363 Law in Society (5) I&S Inquiry into how law matters in social practice. Examines general theories of law, the workings of legal institutions, and the character of legally constituted practices and relationships in diverse terrains of social life. Offered: jointly with POL S 363.

LSJ 367 Comparative Law and Courts (5) I&S Introduction to comparative judicial politics, focusing on the relationship between law and politics in cross-national perspective, as well as on the functioning of supranational and international legal entities in the international system. Offered: jointly with POL S 367.

LSJ 375 Crime, Politics, and Justice (5) I&S Reviews the major components — police, courts, and corrections — of the U.S. criminal justice system; investigates critical factors that shape criminal procedure; considers the relationship between criminal procedure and wider concerns of justice.

LSJ 376 Drugs and Society (5) I&S Beckett Explores the questions of drug use and abuse, social and political factors that shape response to their use, and the social conditions under which drug use is likely to have adverse consequences. Also covers U.S. drug control policy, the political economy of legal and illegal drugs, and political aspects of drug use. Offered: jointly with SOC 376.
LSJ 377 Punishment: Theory and Practice (5) I&S Lovell
Examines the philosophical reasoning that underlies punishment practices such as sentencing, imprisonment, or capital punishment. Considers policy issues in these areas in light of theories about morality and human nature. Helps students learn how to analyze punishment policies from ethical and philosophical perspectives.

LSJ 378 Policing the City (5) I&S Herbert
Investigates how and why formal and informal order is established in urban areas, how this order produces advantages and disadvantages, and possibilities of alternative visions of order. Topics include formal means of control (zoning, laws, policing, building codes) and informal means of control (gossip, ostracism, peer pressure, local politics). Offered: jointly with GEOG 378; A.

LSJ 379 Prisons in Anthropological Perspective (5) I&S Rhodes
An introduction to prisons from an anthropological point of view, with focus on prisons as total institutions. Topics include the experiences of prisoners and staff, prison history, issues of race and gender associated with incarceration, and the imprisonment of the mentally ill. Offered: jointly with ANTH 379.

LSJ 380 Contemporary Issues in Law, Societies, and Justice (5, max. 10) I&S
Theoretical, empirical, and comparative aspects of such topics as human rights, socio-legal concepts, justice, and legal policy. Recommended: POL S 101, POL S 202, POL S 204, or SOC 110.

LSJ 400 Senior Seminar (5, max. 10)
For students in their final year as Law, Societies, and Justice majors. Incorporates material learned in student’s primary field of specialization. Includes independent research, oral presentations, and the completion of a substantial paper.

LSJ 401 Field Experience in Law, Societies, and Justice (5)
Participant observation in a public or private agency relevant to the study of law, justice, human rights, or court systems.

LSJ 410 Human Rights in Latin America (5) I&S
Human rights in Latin America, focusing on twentieth century dictatorships and current regional events and their implications for human rights. Cannot be taken for credit if GIS 174 or SISLA 120 previously taken. Offered: jointly with SIS 470. Prerequisite: either LSJ 320/321, POL S 368, PHIL 338, or SIS 200.

LSJ 420 The Politics of Rights (5) M. McCann
Examines rights in practical and social interaction, rights as social conventions, relations of rights practices to official state policies, disputing practices, interest formation, and identity construction at individual and group levels. Explores how rights practices figure into the constellation of contested power relations within modern societies.

LSJ 421 Women’s Rights and Politics in Islamic Society (5) I&S

Examines the creation, production, and proliferation of law and legal categories relating to the status of refugees and asylum-seekers in the United States. Integrates anthropological perspectives of law’s ability to create meaning in the examination of deeper implications of asylum and refugee law in American society. Offered: jointly with ANTH 497.

LSJ 428 Women’s Rights in an Integrated Europe (5) I&S
Examines the transformation in women’s rights policy within the European community from the late 1950s through the present. Focuses on the legal rules and bodies that govern not only these policy domains, but also their evolution and impacts. Offered: jointly with POL S 415.

LSJ 433 Disability Law, Policy, and the Community (5)
Seminar addressing legal rights of disabled people, history of disability policy in the United States, and the role of community activism and other forces in policy development and systems change. Introduction to the existing social service systems that affect disabled people. Prerequisite: LSJ 332. Offered: jointly with CHID 433.

LSJ 434 Civil and Human Rights Law for Disabled People (5) I&S
Designed for students interested in expanding their knowledge of civil and human rights for disabled people. Examines the American perspective (ADA) as well as various international models including the United Nations International Human Rights treaties as they relate to disabled people. Prerequisite: LSJ 332. Offered: jointly with CHID 434; A.

LSJ 440 Criminal Law and Procedure (5) I&S
Substantive and procedural criminal law for lay persons; analysis of the philosophy behind the law, with an emphasis on due process in adult and juvenile courts; case-analysis teaching technique.

LSJ 444 Ethics in Law and Justice (5) I&S
Applies ethical theories, research, and practice to the law and justice system, with the goals of: (1) analyzing the moral dimensions of criminal law, (2) studying ethical issues in law enforcement, adjudications, and corrections, and (3) examining a variety of controversial ethical issues associated with the justice system.

LSJ 466 Feminist Legal Studies: Theory and Practice (5) I&S
Examines feminist theoretical analyses of the law. Engages in current debate on the study of critical race, gender, and class theory. Includes: women in prison, public assistance, the sex industry, women and health care, and immigration law. Recommended: WOMEN 200 or WOMEN 310. Offered: jointly with POL S 466/ WOMEN 410.

LSJ 469 Law, Development, and Transition in East Asia (5) I&S
Examines the role of law and the courts in economic and political change in the developing world. Topics include variations in legal traditions and institutions, economic development, property rights, dispute resolution, democratization, and human rights. Empirical materials focus on East Asia. Offered: jointly with POL S 469/SISEA 469.

LSJ 470 Evaluation Research in Criminal Justice (5) I&S
Social science research methods relevant to criminal justice evaluation and operations research. Ethical considerations, formulation of goals and objectives, problem definition and research design, sources and methods of data collection, descriptive statistics, data interpretation, and utilization of research results.

LSJ 473 Corrections (5) I&S

LSJ 474 Geography and the Law (5) I&S Herbert
Examine the relationship between geography, law, and socio-legal analysis; reviews significant instances where law and geography intersect, such as the regulation of public space, the regulation of borders and mobility, and disputes over property and land use. Offered: jointly with GEOG 474.

**LING 485 Introduction to Organized and White Collar Crime (3) I&S**
Overview of organized and white collar crime. Exposure to definitional problems, distinctive characteristics, potential areas of overlap, and barriers to more effective social control. Addresses impediments resulting from inadequate conceptualizations, legal and operational difficulties in pursuing offenders, and effects of corruption and discretion in the justice system.

**LING 490 Special Topics in Law, Societies, and Justice (1-5, max. 15) I&S**
Examination of socio-legal topics. Content varies.

**LING 501 Law and Society Studies (5) Beckett, Herbert, McCann**
Provides a broad overview of, and introduction to, the interdisciplinary field of Law and Society Studies, including the historical development of law and society studies and an overview of its main concerns and questions.

**LINGUISTICS**
A210 Padelford

Linguistics is the scientific study of language, which is one of the most characteristic human attributes. In contrast to other language-related disciplines, linguistics is concerned with describing the rule-governed structures of languages, determining the extent to which these structures are universal or language-particular, positing constraints on possible linguistic structures, and explaining why there is only a fairly narrow range of possible human languages.

**Undergraduate Program**
Adviser
A215 Padelford, Box 354340
206-685-4846

The Department of Linguistics offers the following programs of study:
- The Bachelor of Arts degree with options in general linguistics and Romance linguistics
- A minor in linguistics

**Bachelor of Arts**

**General Linguistics**

**Suggested First- and Second-Year College Courses:** LING 400 or other introductory course in linguistics. One year of a foreign language that belongs to a different family from the student’s native language.

**Department Admission Requirements**

- Completion of at least the third quarter, or equivalent, of a foreign language.
- Completion of at least one writing (W) course and two quantitative and symbolic reasoning (Q/SR) courses, with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses.
- The department accepts students who meet the minimum requirements stated above, but recognizes that a GPA of 2.50 or higher is indicative of the motivation and academic skills needed for a reasonable probability of success in the program.

**Major Requirements**

- LING 400 or other introductory course in linguistics
- LING 450, LING 451, LING 461, and LING 462
- At least one of LING 432, LING 442, or LING 481
- At least one year of each of two languages, one of which must belong to a different language family than the student’s native language
- 20 additional credits of departmentally approved courses in linguistics.

**Romance Linguistics**

**Suggested First- and Second-Year Courses:** Two college years of study: A Romance language; LING 400 or other introductory course in linguistics.

**Department Admission Requirements**

- Completion of at least one year of college work in a single Romance language.
- Completion of at least one writing (W) course and two quantitative and symbolic reasoning (Q/SR) courses, with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses.
- The department accepts students who meet the minimum requirements stated above, but recognizes that a GPA of 2.50 or higher is indicative of the motivation and academic skills needed for the reasonable probability of success in the program.

**Major Requirements**

- LING 400 or other introductory course in linguistics
- LING 450, LING 451, LING 461, and LING 462
- ROLING 402
- 15 credits at the 300 level or higher of one Romance language; ROLING 490; 20 additional credits of departmentally approved courses in linguistics.

**Minor**

**Minor Requirements:** 32 credits to include LING 400 or another introductory course in linguistics; three courses from LING 432, LING 442, LING 450, LING 451, LING 461, LING 462, or LING
Admission Requirements: At least one previous course in linguistics is highly recommended, as is proficiency in one language other than the student’s native language. For a specialization in Romance, substantial upper-division coursework in a Romance language or equivalent is required. Two to three letters of recommendation (M.A.) or three letters of recommendation (Ph.D.) and Graduate Record Examination scores are required for all applicants. Doctoral degree applicants should send the department a copy of their master’s thesis or a paper of high quality, or both.

Master of Arts

General Linguistics Option:
Two courses each in syntax and phonetics/phonology.
One course in semantics.
Three courses not in categories (1) and (2) above.
Three courses at the 400 or 500 level. At least two of these must be 500-level courses for which papers or projects are required. (LING 504, 505, 506, 507, 508, and 509 do not qualify for this requirement. Also note the University requirement for 9 credits at the 500 to 600 level.)

Romance Linguistics Option:
Three courses in syntax and phonetics/phonology.
ROLING 402, ROLING 551, LATIN 300
Six additional linguistics-related courses at the 400 or 500 level. One of these must be a 400-level FRLING or SPLING class and at least two of these must be 500-level classes for which papers or projects are required.

No course fulfilling any of the above requirements can be taken for the 2-credit (no paper) option.
Demonstrated ability to read the linguistic literature in a language other than English. (For the Romance option, the demonstrated ability must be in a Romance language.) This can be satisfied at any time during the program by arrangement with the Graduate Program Coordinator.
An M.A. exam in any areas in which the grade point average for the required course work in that area is below 3.30.
Formation of a supervisory committee after the second quarter.
A short M.A. thesis (30 to 50 pages), which will typically be an expansion of a term paper. Students must register for 9 credits of LING 700.
All requirements must be completed within the equivalent of seven full-time quarters.

Doctor of Philosophy

Direct admission to the Ph.D. program will be considered on an individual basis for applicants holding a degree from a comparable M.A. thesis program in linguistics or a closely related field. Some such applicants may be granted admission directly into the Ph.D. program, with the stipulation that they make up one or more M.A.-level deficiencies.

Requirements for the Ph.D. degree are an M.A. degree plus the following:
35 additional credits of course work. At least 18 credits at the 500 level and above must be completed before the General Exam, 9 credits of which must follow the M.A. A minimum cumulative GPA of 3.00 is required for graduate course work.

During the course of the entire M.A.-Ph.D. program, the student must have completed at least three courses each in syntax and phonetics/phonology and at least two courses in semantics, and have taken a total of five 500-level classes for which papers or projects are required. (LING 504, 505, 506, 507, 508, and 509 do not qualify for this requirement.) There is also a major, minor, and breadth requirement as follows: Major-six courses in the student’s primary area of specialization; Minor-four
courses in a second area (the major and minor together should form a coherent research area); Breadth-eight courses in other areas of the field. The student’s supervisory committee will be the final judge of what courses might qualify to meet these requirements. However, it is worth noting that (a) courses fulfilling these requirements do not necessarily have to be offered from within the Department of Linguistics; (b) non-language instruction courses in a language area can fulfill the major or minor requirement; and (c) no course fulfilling any of the above requirements can be taken for the 2-credit (no paper) option.

27 credits of LING 800.

Language Requirement:

General Linguistics option: An exotic language requirement as follows: (a) for native speakers of an Indo-European language, a year of a non-Indo-European language; (b) for native speakers of a non-Indo-European language, a year of a language that is not English or in the same sub-family as their language. The student has the right to petition the supervisory committee to allow a language excluded in (a) or (b) above.

Romance Linguistics option: The completion of LATIN 301, as well as the demonstrated ability to read the linguistic literature in a Romance language.

Two linguistic papers delivered at a colloquium or conference. Each will be evaluated by a member of the student’s Ph.D. committee with expertise in the area of the paper. The evaluation may be either of the oral presentation or of the paper in written form. The student should request evaluation by a faculty member for any paper to be considered for this requirement.

By the end of the first quarter after admission to the Ph.D. program, the student will constitute a Ph.D. committee, in accord with Graduate School requirements. As part of this process, the student will work out with the committee members (by email or in person) a strategy for degree completion. The student’s Ph.D. committee will administer a General Examination, which involves 2 parts:

Two generals papers in different areas. At least one of the papers must be in some area of grammatical theory and one must be in the projected dissertation area. (One of the two papers, of course, can fulfill both the grammatical theory and the dissertation area requirements). At least one of the student’s Ph.D. committee members must have expertise in each of the chosen areas.

An oral examination, in which the candidate is questioned on the two papers. The oral examination may not be scheduled until the committee has read the two papers and approved them as passing. The oral examination must be completed within the equivalent of 12 full-time quarters (excluding summer) after entrance into the M.A. program.

Within six months of the oral examination, the student will present a formal dissertation proposal to the subset of Ph.D. committee members who constitute the Reading Committee along with a proposed calendar for completion of the dissertation.

A Final Exam on the dissertation attended by the candidate’s Supervisory Committee and open to others interested.
Computational linguistics

Karen Zagona, Professor (currently on leave)
PhD. 1982, University of Washington
Syntactic theory, tense and aspect, Spanish syntax

Adjunct Faculty Members

Professors

Augerot, James E.
PhD. 1968, University of Washington
Slavic linguistics, Romanian, Bulgarian

Barrack, Charles M.
PhD. 1969, University of Washington
Germanic Linguistics

Hunn, Eugene S.
PhD. 1973, University of California
Cognitive anthropology, ethnobiology, cultural ecology and evolution, North American Indians

Kautz, Henry
PhD. 1988, University of Rochester
Artificial intelligence, knowledge representation, decision-theoretic control of reasoning

Kuhl, Patricia K.
PhD. 1973, University of Minnesota
Speech perception

Mickelson, Lew R., Emeritus
PhD. 1951, Harvard University
Slavic linguistics

Ostendorf, Mari
PhD. 1985, Stanford University
Speech synthesis and understanding, spoken document retrieval, statistical pattern recognition

Silberstein, Sandra V.
PhD. 1982, University of Michigan
TESL, critical theory, discourse analysis, sociolinguistics, language and culture

Stoel-Gammon, Carol
PhD. 1974, Stanford University
Develomental phonology and phonetics

Tollefson, James W.
PhD. 1978, Stanford University
English as a second language, language planning

Voyles, Joseph B.
PhD. 1965, Indiana University
Germanics and linguistics

Yue-Hashimoto, Anne O.
PhD. 1966, Ohio State University
Chinese linguistics, grammar (historical and modern), dialectology, historical reconstruction

Associate Professors

Bilmes, Jeffrey A.
PhD. 1999, University of California (Berkeley)
Speech and pattern recognition, learning, audio processing, high-$B$ computing, human-computer

Corina, David P.
PhD. 1991, University of California (San Diego)
Cognitive neuropsychology, psycholinguistics, computational modeling

Dziwirek, Katarzyna A.
PhD. 1991, University of California (San Diego)
Linguistics, syntax, and typology

Etzioni, Oren
PhD. 1990, Carnegie Mellon University
Artificial intelligence and information retrieval, natural language interfaces, software agents

Ohta, Amy
PhD. 1993, University of California (Los Angeles)
Applied linguistics, second language acquisition, discourse analysis, Japanese

Osterhout, Lee E.
PhD. 1990, Tufts University
Psycholinguistics, cognitive psychophysiology

Assistant Professors

Bilaniuk, Laada M.
PhD. 1998, University of Michigan
Language politics, language ideology, ethnicity, nationalism, gender, Ukraine, former USSR

Handel, Zev
PhD. 1998, University of California (Berkeley)
Chinese historical phonology, Sino-Tibetan linguistics

Course Descriptions

LING 100 Fundamentals of Grammar (5) VLPA
Introduction to basic grammatical concepts and terminology. Specifically intended for students planning to take a foreign language or linguistics. Does not count toward the linguistics major or minor.

LING 101 Fundamentals of Pronunciation for Language Learners (5) VLPA Kaisse
Fundamentals of pronunciation for language learners. Introduces students to systematic characteristics of language sounds through examination of specific languages and their differences from English. Includes a laboratory component developing perceptual and productive skills of non-English sounds.

LING 200 Introduction to Linguistic Thought (5) I&S/VLPA, QSR
Language as the fundamental characteristic of the human species; diversity and complexity of human languages; phonological and grammatical analysis; dimensions of language use; language and writing; impact of historical linguistics on contemporary theory. Not open for credit to students who have completed LING 201.

LING 201 Introduction to Linguistic Theory and Analysis (5) I&S/VLPA, QSR
Background and scope of modern linguistics; behaviorist versus rationalist theories of language; universal and cognitive aspects of language structure; interplay of genetic and social factors in language formation; linguistic analysis. Not open for credit to students who have completed LING 200.

LING 203 Introduction to Anthropological Linguistics (5) I&S/VLPA Hargus, Hunn, Palmer
Linguistic methods, theories used within anthropology. Basic structural features of language; human language and animal communication compared; evidence for the innate nature of
language. Language and culture: linguistic relativism, ethnography of communication, sociolinguistics. Language and nationalism, language politics in the U.S. and elsewhere. Offered: jointly with ANTH 203.

LING 220 Origins of the Germanic Languages (5) VLPA Barrack, Voyles
Introduction to basic grammatical concepts, terminology, and linguistics with emphasis on German-English relationship. Overview of phonology, morphology, syntax, and history of Germanic languages and people, both ancient and modern. Languages covered include Old, Middle, and New High German; English, Frisian, Dutch, Old Saxon, and Gothic. Taught in English. Offered: jointly with GERMAN 220; AWSpS.

LING 242 Introduction to Meaning (5) VLPA Ogihara
Non-technical introduction to meaning in language and how it functions in communication and thinking. Discussion of how and why meanings of words change through time. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 270 Introduction to Perl Programming for Linguists (5) Bender
Fundamental programming techniques, including data types, control flow, regular expressions, file handling, GUI design, and CGI interaction. Content relates to a variety of linguistic concepts including syntax, morphology, phonology, lexicon building and foreign language corpora. No previous programming necessary; however, a background in general linguistic theory is assumed. Offered: W.

LING 300 Introduction to the Languages of the World (5) VLPA Brane, Klausesnurger
A survey of the world’s languages, focusing on their syntactic, phonological, and morphological properties. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 333 Linguistics and Society (3) I&S/VLPA
Interaction of language, culture, and society, and the relationship of linguistic theory to societal problems. Ethical and political considerations involved in the application of linguistic theory.

LING 347 Psychology of Language 1 (5) I&S/VLPA Corina, Osterhout
Introduction to the study of language, including language structure, speech perception, language acquisition, psychological processes underlying comprehension and production of language, the relation between brain and language, and the question of the species-specificity of human language. Prerequisite: 2.0 in either PSYCH 209 or either LING 200 or LING 201. Offered: jointly with PSYCH 347.

LING 372 Language and Translation (5) VLPA Tarlinskaja
Role of linguistic concepts in the process of translation from one language to another. Attention to both language universals and language particulars.

LING 390 Foreign Studies in Linguistics (3-5, max. 10) I&S
For students who take linguistics courses while participating in a University of Washington study abroad program and for which there is no direct University of Washington equivalent.

LING 400 Survey of Linguistic Method and Theory (5) I&S/ VLPA, QSR
Major linguistic theories in phonology, syntax and semantics; linguistic analysis and argumentation. Intended for students who plan to pursue further linguistic or language-related study. Students who have taken LING 200 or 201 should not take LING 400, although credit is allowed for both if 400 is taken after 200 or 201.

LING 401 The Linguistic, Philosophical, and Political

Thougt of Noam Chomsky (3) I&S/VLPA
Relation of current work in Chomskyan linguistics to philosophical, psychological, political, and educational thought.

LING 402 Survey of the History of Linguistics (3) I&S/VLPA Newmeyer
Main trends in linguistic theory and philosophy of linguistics from ancient times through advent of transformational-generative grammar. Includes nineteenth-century comparative and historical grammar, Prague school grammar, American structuralist grammar, major concerns of linguistics today. Prerequisite: LING 451.

LING 403 Structure of American Sign Language (5) VLPA Hargus
Introduction to the phonological, morphological, and syntactic structure of American Sign Language. Topics include acquisition, sociolinguistics, neurolinguistics, lexicography, history, and culture. Knowledge of American Sign Language is not required. Prerequisite: LING 200, 201, 203, or 400.

LING 404 Indo-European (3) VLPA Voyles
Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 405 Indo-European (3) VLPA Voyles
Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 406 Indo-European (3) VLPA Voyles
Overview of the Indo-European languages, of comparative method, and of the phonology, morphology, and syntax of reconstructed Indo-European. Grammatical analyses and texts from various attested ancient and modern Indo-European languages, selected according to the interests of the students.

LING 411 Native Languages and Language Families of Washington State (3) VLPA Hargus
Survey of linguistic structures of Washington native languages. Language families consist of Salish, Wakashan, Chemakuan, Athabaskan, Chinookan, Sahaptian, Cayuse. Structure and origin of Chinook jargon. Prerequisite: LING 450; either LING 461 or LING 481.

LING 415 History of the German Language (5) VLPA Traces the history of the German language from early Germanic to the present. Recommended: LING 200 and GERMAN 203 Offered: jointly with GERMAN 452.

LING 419 The Development of the Italian Language (5) VLPA Historical survey of Italian phonology, morphology, and syntax. Evolution of the language is illustrated with study of pertinent documents from various periods. Prerequisite: ITAL 303; either LING 400 or ROLING 401. Offered: jointly with ITAL 400.

LING 432 Sociolinguistics 1 (5) I&S/VLPA Wassink
Social variation in the phonology, morphology, syntax, lexicron of languages and dialects. Nonstandard language, diglossia, pidgins and creoles, gender differences, bi- and multilingualism, ethnography of speaking, pragmatics, and language attitudes. Prerequisite: either LING 200 or LING 400; recommended: prior or concurrent registration in LING 450. Offered: jointly with ANTH 432.

LING 433 Language Politics and Cultural Identity (3) I&S/ VLPA Bilaniuk
Theories and case studies of the power of language and how it is
manipulated. Multilingualism, diglossia. Role of language and linguistics in nationalism. Standardization, educational policy, language and ethnicity. World languages, language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with ANTH 464.

LING 434 Sociolinguistics II (3) I&S/VLPA Wassink
Examines field methods linguists use in socially oriented studies of language variation and change. Students learn to target and design interviews appropriate for eliciting specific kinds of linguistic data. Discussion of issues related to recording, ethics, and analysis of large bodies of data. Prerequisite: LING 432. Offered: jointly with ANTH 433.

LING 441 Linguistics and Poetic Language (3) VLPA
Introduction to the Relationship between linguistic structures, linguistic universals, and the poetic uses of language; linguistic description in the analysis of literature. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 442 Semantics I (5) NW/VLPA Ogihara
Introduction to the study of meaning as part of linguistic theory. Relation of semantics to syntax. Emphasis on formal semantics and pragmatics. Discussion of various semantic phenomena in natural language that are theoretically relevant. Prerequisite: LING 461, Syntax 1.

LING 443 Philosophy and Linguistics (3) I&S/VLPA
Philosophical problems that arise in the attempt to understand current linguistic theories and the implications of linguistics for philosophy. Offered: jointly with PHIL 443.

LING 444 Philosophy of Language-Pragmatics (3) I&S/VLPA Potter
Language as communicative activity. Speech act theory in Austin, Greice, and contemporary writings. Applications to problems of reference, presupposition, metaphor, relativism. Offered: jointly with PHIL 444.

LING 445 Descriptive Aspects of English as a Foreign Language (3) VLPA
Linguistic analysis as a basis for the teaching of English as a foreign language; language as rule-governed behavior. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 446 Descriptive Aspects of English: Phonology and Morphology (3) VLPA Hargus, Kaisse
Descriptively oriented analysis of English phonology and morphology; dialect differences. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 447 Psychology of Language II (4) I&S/VLPA Corina, Osterhout
Psychological principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisite: 2.0 in either PSYCH 347, PSYCH 355, or LING 400. Offered: jointly with PSYCH 447.

LING 449 Second-Language Learning (5) VLPA Herschensohn, Tarlinskaja
Issues related to the linguistic aspects of second-language learning. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 450 Introduction to Linguistic Phonetics (5) NW/VLPA Wright
Introduction to the articulatory and acoustic correlates of phonological features. Issues covered include the mapping of dynamic events to static representations, phonetic evidence for phonological description, universal constraints on phonological structure, and implications of psychological speech-sound categorization for phonological theory. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 451 Phonology I (5) I&S/VLPA Hargus, Kaisse
Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 450.

LING 452 Phonology II (5) I&S/VLPA Hargus, Kaisse
Speech sounds, mechanism of their production, and structuring of sounds in languages; generative view of phonology; autosegmental and metrical phonology. Prerequisite: LING 451.

LING 453 Experimental Phonetics (5) I&S/NW/VLPA Hargus, Kaisse
Examines phonetic and phonological aspects of spoken language using experimental methods. Focuses on acoustic phonetics and speech perception. Significant time devoted to experimental design and hands-on data analysis techniques. Prerequisite: LING 451.

LING 454 Methods in Comparative Linguistics (3) VLPA Klausenburger, Shapiro, Voyles
Method and theory of historical and comparative linguistics. Problems of phonological, morphological, syntactic, and semantic change and reconstruction. Prerequisite: LING 400.

LING 455 Areal Linguistics (3, max. 6) I&S/VLPA
Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Processes such as borrowing, vocabulary specialization, lexical change, and language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with ANTH 455.

LING 457 Language Development (5) I&S/VLPA
First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, LING 200, or LING 400. Offered: jointly with PSYCH 457.

LING 458 Language and Gender (5) I&S, VLPA Bilaniuk
Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with ANTH 450/WOMEN 450.

LING 461 Syntax I (5) I&S/VLPA Brame, Contreras, Kim, Newmeyer, Zagona
Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400.

LING 462 Syntax II (5) I&S/VLPA Brame, Contreras, Kim, Newmeyer, Zagona
Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: LING 461.

LING 463 Syntax III (4) I&S/VLPA Brame, Contreras, Kim, Newmeyer
Study of the structural properties of language; introduction to generative transformational syntax. Prerequisite: LING 462.

LING 472 Introduction to Computational Linguistics (5) NW/VLPA Hoard
Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation, and natural language generation. Prerequisite: LING 200; 203; 400; and 461 or CSE 321. Offered: jointly with CSE 472.
LING 476 Philosophy of Language (5) I&S/VLPA
Current theories of meaning, reference, predication, and related concepts. Offered: jointly with PHIL 453.

LING 479 Semantics II (3) I&S/ NW/VLPA Ogihara
Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 442. Offered: jointly with PHIL 479.

LING 480 Topics in Linguistics (3, max. 12) VLPA
Introduction to an area of linguistic study not covered by the regular departmental course offerings.

LING 481 Introduction to Morphology (5) VLPA Brame, Kaisse, Newmeyer
Structure of words and the processes by which they are formed. Morphological processes in a wide variety of languages. Prerequisite: either LING 200, LING 201, ANTH 203, LING 203, or LING 400.

LING 484 Lexical Semantics and the Lexicon (3) VLPA Kim
Role of the lexicon in syntax and semantics. Topics include the syntax-lexicon mapping; theories of argument structure; complex predicate formation and lexical subordinating; the lexicon and language acquisition; the role of the lexicon in linguistic theory; and the lexicon and sentence processing. Prerequisite: LING 461.

LING 490 Undergraduate Fieldwork (1-3, max. 6)
Individual consultation with faculty member and supervised practical experience in a broad range of industry, community, clinical settings dealing with linguistic issues. Credit/no credit only. Offered: AWSpS.

LING 499 Undergraduate Research (1-5, max. 10)
Credit/no credit only.

LING 501 Field Methods (3)
Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 452, LING 462, or LING 508.

LING 502 Field Methods (3)
Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 452, LING 462, or LING 508.

LING 503 Field Methods (3)
Guided analysis of a language unfamiliar to all students of the class; construction of a grammar based on material elicited from native informant. Prerequisite: LING 453, LING 462, or permission of instructor.

LING 507 Syntactic Theory I (4)
Introduction to the principles and parameters model of syntactic theory. The lexicon and its relation to syntactic representations. Syntactic modules and principles. Problem solving.

LING 508 Syntactic Theory II (4)
Historical antecedents of the principles-and-parameters theory. Lexicalism versus transformationalism. The unification of transformational operations and conditions. Origins of subtheories. Extensive reading list of primary sources. Practical training in syntactic argumentation. Prerequisite: LING 507 or permission of instructor.

LING 509 Syntactic Theory III (4)
Current issues in syntactic theory, including logical form, empty categories, the range of parametric variation, barriers, minimality, and the status of functional categories. Training in the methodology of syntactic research. Prerequisite: LING 508 or permission of instructor.

LING 514 Seminar in Comparative Linguistics (3) Kaisse
Nineteenth- and twentieth-century theories of phonological change. Prerequisite: LING 404 or permission of instructor.

LING 515 Topics in the History of Germanic Languages (5) Brame, Ogihara
Topics in diachronic studies of Germanic languages such as Gothic, Old High German, Old Saxon.

LING 519 Mathematical Models of Grammar (3) Brame, Ogihara
Study of some mathematical models of language recognition, emphasizing context-free and context-sensitive grammars. Prerequisite: graduate standing in mathematics, linguistics, or psychology, or permission of instructor.

LING 522 Topics in the History of Linguistics (3) Newmeyer
Intensive investigation of the main trends in the history of linguistics, concentrating on the development of nineteenth-century historical linguistics, the various schools of structural linguistics, and transformational-generative grammar. Prerequisite: LING 451.

LING 524 Seminar in Theoretical Linguistics (4, max. 8)
Individual and joint research on selected topics in theoretical linguistics. Topics change each quarter. Typical topics are semantics, generative grammar, phonological theories. Prerequisite: LING 453, LING 463.

LING 525 Seminar in Theoretical Phonology (4, max. 12)
Individual and joint research on selected topics in theoretical phonology. Topics vary. Typical offerings include phonology and the lexicon, syntax and phonology, phonological representations. Prerequisite: LING 452.

LING 530 Dialectology (3)
The principles of dialect deviation as related to linguistic structure and usage. Prerequisite: LING 452, LING 462, LING 508, or permission of instructor. Offered: jointly with ANTH 530.

LING 531 Problems in Romance Linguistics (2-5, max. 15)
Group seminar, or individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with ROLING 531.

LING 550 Advanced Phonology (2-3) Hargus, Kaisse
Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 452.

LING 551 Advanced Phonology (2-3) Hargus, Kaisse
Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 452.

LING 552 Advanced Phonology (2-3) Hargus, Kaisse
Problems in phonological theory, generative phonology, phonological change. Theories of prosody. Prerequisite: LING 452.

LING 553 Analysis of Linguistic Structures (3, max. 6)
Syntactic, semantic, and/or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with ANTH 553.

LING 554 Advanced Linguistic Phonetics (3, max. 9) Wright, Wassink
Individual and joint projects on selected topics in theoretical and experimental phonetics. Topics may include articulatory timing, the phonetics phonology interface, and constraints and constraint interaction. Prerequisite: LING 450 or LING 452. Offered: Sp.

LING 561 Advanced Syntax (2-3, max. 9)
Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.
LING 562 Advanced Syntax (2-3, max. 9)
Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 563 Advanced Syntax (2-3, max. 9)
Advanced study in modern syntactic theory. Topics change each quarter. Typical topics are history of transformational grammar, anaphora, logical form. Prerequisite: LING 461, LING 462.

LING 565 Contrastive Linguistics (3)
The attempt to look across linguistic systems for comparable and contrastive classes and subclasses. Problems of subcategorization and universal grammar. Three conceptually distinct models: structural, transfer grammar, generative. Prerequisite: LING 452, LING 463.

LING 566 Introduction to Syntax for Computational Linguistics (3) Bender
Introduction to syntactic analysis and concepts with emphasis on the formally precise encoding in linguistic hypotheses and the design of grammars that can be scaled to practical applications. Coursework progressively builds up a consistent grammar for a fragment of English, while also considering data and phenomena from other languages. Offered: A.

LING 567 Grammar Engineering (3)
Introduction to the development of implemented linguistic grammars for use in Natural Language Processing applications. Includes grammatical theory and engineering skills. Prerequisite: LING 461.

LING 579 Comparative Altaic Linguistics (3)
Comparative phonology and morphology of Mongolian, Turkic, and other Altaic languages. Prerequisite: permission of instructor. Offered: jointly with ALTAI 579.

LING 580 Problems in Linguistics (2-3, max. 12)
Advanced study in current theories of syntax, semantics, phonology, or morphology.

LING 590 Graduate Fieldwork (1-3, max. 6)
Individual consultation with faculty member and supervised practical experience in a broad range of industry, community, clinical settings dealing with linguistic issues. Offered: AWSpS.

LING 599 Linguistics Colloquium (1, max. 6)
Seminar attended by faculty and graduate students to discuss research in progress and topics of general interest. Presentation of two seminars required for doctoral students. Prerequisite: permission of instructor.

LING 600 Independent Study or Research (*)
LING 700 Master’s Thesis (*)
LING 800 Doctoral Dissertation (*)
French Linguistics

Course Descriptions

FRLING 400 The Syntactic Structure of French (5) VLPA
Klausenburger
Scientific study of the syntax of French: phrase structure and movement, with emphasis on passives, relatives, and interrogatives. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.

FRLING 401 The Morphological Structure of French (5) VLPA
Klausenburger
Linguistic study of French morphology. Prerequisite: either FRENCH 203, FRENCH 223, or FRENCH 234; either LING 200 or LING 400.
Specific problems in linguistic analysis of the Romance languages. Prerequisite: permission of instructor.

ROLING 522 Seminar in Romance Linguistics (5) Contreras, Klausenburger, Zagona
Specific problems in linguistic analysis of the Romance languages. Prerequisite: permission of instructor.

ROLING 531 Problems in Romance Linguistics (2-5, max. 15)
Group seminar, or individual conferences are scheduled under this number to meet special needs. Prerequisite: permission of graduate program coordinator. Offered: jointly with LING 531.

ROLING 551 Romance Linguistics: History, Methodology, and Bibliography (5)
For new graduate students in the Romance linguistics program. History of Romance linguistics and linguistic science in the nineteenth and twentieth centuries as it relates to Romance studies. Comparative and descriptive methods used in contemporary scholarship. Prerequisite: LING 200, LING 400, or equivalent.

ROLING 600 Independent Study or Research (*)
Spanish Linguistics

Course Descriptions

SPLING 400 The Syntactic Structure of Spanish (5) VLPA Strozer, Zagona
Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 400.

SPLING 401 The Morphological Structure of Spanish (5) VLPA Strozer, Zagona
Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 401.

SPLING 402 The Phonological Structure of Spanish (5) VLPA Strozer, Zagona
Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 402.

SPLING 403 The Evolution of the Spanish Language (5) VLPA Zagona
Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 403.

SPLING 406 Advanced Spanish Grammar (5) VLPA Anderson, Strozer
Problems of Spanish grammar. Difference from English grammar. Techniques for the effective teaching of Spanish. Prerequisite: either SPAN 303 or SPAN 316; SPAN 323. Offered: jointly with SPAN 406.

SPLING 407 Dialects of World Spanish (5)
Introduction to dialectical variants of Spanish. Considers standardization and the real academia; variation and change; pragmatics and politeness; Spanish in contact; sound, word formation, and grammar variation. Taught in Spanish. Prerequisite: either SPAN 301 or SPAN 314; either SPAN 323, LING 200, or LING 400. Offered: jointly with SPAN 407.

SPLING 409 Spanish Phonetics (5) VLPA
Analysis of sounds: training in pronunciation, intonation, and close transcription of Spanish language in its modalities. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, LING 201, LING 203, LING 400, or SPAN 323. Offered: jointly with SPAN 409.

Mathematics
C138 Padelford

Mathematics is both a science and an art. Like any great art, mathematics has an intrinsic beauty and coherence that has attracted practitioners for centuries. Yet, unlike other arts, mathematics is a surprisingly effective tool for describing the natural world. Indeed, mathematics has come to serve as the foundation of modern science, through its language and results. Some mathematical results were initially developed in order to solve internally generated mathematical problems and only later found application in other disciplines; other mathematical results were inspired by the needs of these other disciplines. The two facets of mathematics — tool of science and subject of inquiry for its own sake — have come to be interwoven into a complex fabric.

Undergraduate Program
Adviser
C36 Padelford, Box 354350
206-543-6830
advising@math.washington.edu

The Department of Mathematics offers the following programs of study:
• The Bachelor of Arts degree with a major in mathematics — standard option
• The Bachelor of Arts degree with a major in mathematics — philosophy option
• The Bachelor of Arts degree with a major in mathematics with an option designed specifically for students who plan to pursue secondary teaching careers.
• The Bachelor of Science degree with a major in mathematics
• The Bachelor of Science degree with a major in mathematics — comprehensive option
• The Bachelor of Science degree with a major in applied and computational mathematical sciences (ACMS). The Department of Mathematics cooperates with the departments of Applied Mathematics, Computer Science and Engineering, and Statistics in offering this major. (See ACMS for requirements.)
• A minor in mathematics

Bachelor of Arts

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136.

Department Admission Requirements

Admission Requirements for Standard Option and Philosophy Option:
MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), and at least one 200- or 300-level mathematics course required for the degree, preferably MATH 307.
A minimum grade of 2.0 in each course to be offered as part of the major; a minimum overall GPA of 2.00 for all mathematics courses.
Application to the program should be made at the end of the sophomore year. Transfer students must be enrolled at the UW before applying to the major.
Admission Requirements for Teacher Preparation Option:
MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136) and at least one 200- or 300-level mathematics course required for the degree, preferably MATH 307.
A minimum grade of 2.5 in each course to be offered as part of the major; a minimum overall GPA of 2.50 for all mathematics courses.
Application to the program should be made at the end of the sophomore year. Transfer students must be enrolled at the UW before applying to the major.

Major Requirements

Standard Option (50 credits):
MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 307, MATH 309, MATH 318, MATH 324; and 26 additional credits at the 300 level and above.
A minimum grade of 2.0 must be obtained in all mathematics courses presented to satisfy the mathematics requirement and in required related courses. A GPA of 2.00 or higher must be obtained in all mathematics courses taken at the UW.
At least 18 credits of graded mathematics courses numbered 300 or higher must be taken in residence at the UW.

Philosophy Option (58 credits):
MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 300, MATH 318, MATH 327, MATH 328; five additional mathematics courses at the 300 or 400 level, including at least one two-quarter sequence at the 400 level other than MATH 407, MATH 408, MATH 409, or MATH 421, MATH 422.
PHIL 120 or an upper-level course in logic; PHIL 100, PHIL 160, or PHIL 240; one philosophy course at the 300 level; one philosophy course at the 400 level.

Teacher Preparation Option (58 credits):
MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 307, MATH 309, MATH 318, MATH 324, MATH 326, MATH 327, and MATH 328. (MATH 334, MATH 335, MATH 336 may be substituted for MATH 300, MATH 309, MATH 324, MATH 326, MATH 327, and MATH 328.)

Intermediate Mathematics Core (12 credits): MATH 308 (3) or MATH 318 (3); MATH 326, MATH 327, MATH 328 (3, 3, 3). (MATH 334, MATH 335, MATH 336 may be substituted for MATH 300, MATH 309, MATH 324, MATH 326, MATH 327, and MATH 328.)

Advanced Mathematics Core (21 credits): At least seven courses from the following, from at least three different areas, and including at least two two-quarter sequences:
- Algebra: MATH 402, MATH 403, MATH 404 (3, 3, 3).
- Analysis: MATH 424, MATH 425, MATH 426 (3, 3, 3).
- Geometry: MATH 441, MATH 442, MATH 443 (3, 3, 3).
- Other Analysis: MATH 307, MATH 309 (3, 3); MATH 427, MATH 428, MATH 429 (3, 3, 3); MATH 435, MATH 436 (3, 3); MATH 438, MATH 439 (3, 3).
- Probability: MATH 394, MATH 395, MATH 396 (3, 3, 3); MATH 491, MATH 492 (3, 3).
- Other Mathematics: MATH 381 (3); MATH 407, MATH 408, MATH 409 (3, 3, 3); MATH 461, MATH 462 (3, 3); MATH 464, MATH 465, MATH 466 (3, 3, 3).

Electives (12 credits): Four additional mathematics courses, including a two-quarter sequence at the 300- or 400-level (teacher-preparation courses not allowed). Two of the four courses may be chosen from an approved list of courses offered by the departments of Applied Mathematics, Statistics, and Computer Science, or from certain other departments. The list is updated each year by the Undergraduate Program Coordinator; students may petition for approval of courses not on the list. Courses from the additional mathematics core sequences not used to fulfill core requirements can be used to fulfill the elective requirement.

Comprehensive Option (69 credits):
Emphasizes the fundamental subjects of algebra, analysis, and geometry and is designed to provide a deep understanding of these basic areas of modern mathematics. It lays a good foundation for more advanced study. For this option, the grade, elementary core, and elective requirements remain unchanged, with the same substitutions permitted from the accelerated/honors sequences. (Items 1, 2, 3, and 6 shown for the standard option, above.) MATH 318 is required in the intermediate core and the advanced mathematics core becomes the following:

Advanced Mathematics Core, Comprehensive Option (24 credits): At least eight courses from the following, including at least two in each of the first three areas. If only six courses are chosen from the first three areas, then the two courses chosen from the fourth area must form a two-quarter sequence:
- Algebra: MATH 402, MATH 403, MATH 404 (3, 3, 3).
- Analysis: MATH 424, MATH 425, MATH 426 (3, 3, 3).
- Geometry: MATH 441, MATH 442, MATH 443 (3, 3, 3).
- Other Analysis: MATH 307, MATH 309 (3, 3); MATH 427, MATH 428, MATH 429 (3, 3, 3); MATH 435, MATH 436 (3, 3); MATH 438, MATH 439 (3, 3).

Minor

Minor Requirements (33 credits):
Core (21-25 credits): MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308 (or MATH 318) (21 credits) or MATH 134, MATH 135, MATH 136 (25 credits, including 10 advanced-placement credits)
Electives (8-12 credits): mathematics courses numbered 300 or
Graduate Program Coordinator

206-543-6830
grads@math.washington.edu

The degrees of Master of Arts, Master of Science, and Doctor of Philosophy are offered. Opportunities are available within the department for study of abstract and applied mathematics for each of these degree programs. The Master of Arts degree is appropriate for students who need a broad background in advanced mathematics and who expect to continue working with mathematics of approximately the same level in their careers. The Master of Science degree is appropriate for students who expect to be working with more specialized mathematics of increasing order of complexity in their careers. The Doctor of Philosophy degree is the highest professional degree in mathematics. It is appropriate for students who plan on a career of research and/or teaching of mathematics at the highest levels.

Of the master’s degrees, the M.S. non-thesis program has the most demanding course requirements and most closely matches the early stages of the Ph.D. program. Most students who enroll in the department begin their studies with the Ph.D. or M.S. non-thesis program in mind. The M.S. programs with options in numerical analysis or optimization provide more focused training in these directions, which can be useful for students seeking employment in certain industries; however, students intending to do research in these areas would normally follow the requirements of the Ph.D. program. Note that the department does not offer a master’s degree in mathematics education.

Master of Arts

Admission Requirement: Bachelor of Arts degree with major in mathematics or equivalent background (minimum of 45 quarter credits or 30 semester credits of mathematics beyond college algebra).

Graduation Requirements:

Master of Arts, Non-Thesis: A minimum of twelve approved one-quarter courses at the 400 or 500 level, including two courses in each of algebra, analysis, and one other field. The course total must include six courses chosen from the designated core graduate courses or, with prior approval of the graduate program coordinator, from other 500-level sequences. The six courses at the 500 level should be distributed over no more than three sequences.

Written examination in an area agreed upon by the student and the chair of the examining committee. Oral examination may be substituted with prior approval of the graduate program coordinator.

Master of Science

Admission Requirement: Bachelor of Science degree with major in mathematics, Bachelor of Arts degree with strong major in mathematics or equivalent background. In particular, at least one senior-level course in abstract algebra or real analysis is expected.

Graduation Requirements:

Master of Science, Thesis: A total of twelve numerically graded one-quarter courses from MATH 402, MATH 403, MATH 404; MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 441, MATH 442, MATH 443; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586; plus 9 thesis credits (700). Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include at least two quarters from each of two designated core graduate courses and one other 500-level sequence. Transfer credits are not accepted at the 400 level; other transfer credits and substitutions are at the discretion of the graduate program coordinator.

The thesis, which is defended in an oral examination, should demonstrate the ability to do independent research.

Master of Science, Non-Thesis: A total of fifteen numerically graded one-quarter courses from MATH 402, MATH 403, MATH 404; MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 441, MATH 442, MATH 443; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586. Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include at least two quarters from each of three designated core graduate courses, and in addition one three-quarter sequence of 500-level mathematics courses in an area of specialization approved by the graduate program coordinator and the chair of the student’s examining committee.

Oral examination in the area of specialization on a topic agreed upon by the student and the chair of the examining committee, or the General Examination for the Ph.D. degree.

Master of Science, Numerical Analysis and Optimization Options, Non-thesis: A total of fifteen one-quarter courses, at least six of which are at the 500 level, chosen from MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 438, MATH 439; MATH 441, MATH 442, MATH 443; MATH 461, MATH 462; MATH 491, MATH 492; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586. Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include four from AMATH 584-586 and MATH 594-596.

Oral examination in a special topic agreed upon by the student and the chair of the student’s examining committee.

Doctor of Philosophy

Admission Requirement: Mathematical training equivalent to a bachelor’s degree with strong major in mathematics, including rigorous course work in real analysis and abstract algebra.

Graduation Requirements: Completion of Graduate School requirements to include satisfactory performance in six three-quarter sequences numbered 500 or above, including three sequences from the department’s list of core graduate courses; passing of three preliminary exams; Foreign Language/Computer Requirement:
Demonstration of proficiency in two of three languages: French, German and Russian or demonstration of proficiency in one foreign language exam and passing a computer programming exam.

Financial Support

Most graduate students in mathematics are supported by fellowships, research assistantships, and teaching assistantships. The workload of teaching assistants allows ample time for graduate courses and thesis work.

Faculty

Ardila, Federico, Visiting Assistant Professor (A); Primary affiliation: Microsoft Research (Ph.D. M.I.T. 2003)

Arms, Judith M., Associate Professor, appointed 1980 (Ph.D. Berkeley 1977)
Geometric analysis of Hamiltonian systems with symmetry

Arsove, Maynard G., Professor Emeritus, appointed 1951 (Ph.D. Brown 1950)
Potential theory, complex function theory, theory of bases

Asok, Aravind, Acting Assistant Professor/VIGRE Postdoc Fellow, appointed 2005 (Ph.D. Princeton 2004)
Algebraic geometry, representation theory, mathematical physics

Atar, Rami, Visiting Associate Professor; Primary affiliation: Technion (Ph.D. Technion 1997)
Stochastic processes, control and partial differential equations

Babson, Eric, Associate Professor, appointed 1998 (Ph.D. M.I.T. 1993)
Combinatorics

Bekyel, Ebru, Part-time lecturer (Ph.D. Brown University 2002)
Number Theory

Billey, Sara, Associate Professor, appointed 2002 (Ph.D. UC San Diego 1994)
Algebraic combinatorics, Lie theory and computational geometry

Blumenthal, Robert, Professor Emeritus, appointed 1956 (Ph.D. Cornell 1956)
Probability theory (Markov Processes)

Borgs, Christian, Affiliate Professor; Primary affiliation: Microsoft Research, appointed 1999 (Ph.D. University of Munich 1987)
Field theory and statistical mechanics

Brownell, Frank H., Professor Emeritus, appointed 1950 (Ph.D. Yale and Princeton 1949)
Spectral analysis of Hilbert space operators, mathematical quantum mechanics, partial differential equations

Bube, Kenneth P., Professor and Undergraduate Program Director, appointed 1986 (Ph.D. Stanford 1978)
Numerical analysis, partial differential equations

Bungart, Lutz, Associate Professor Emeritus, appointed 1966 (Ph.D. Princeton 1962)
Analysis/Geometry (Several complex variables, complex varieties)

Burdzy, Krzysztof, Professor, appointed 1988 (Ph.D. UC Berkeley 1984)
Probability theory

Burke, James, Professor and Director of the ACMS Program, appointed 1985 (Ph.D. University of Illinois at Urbana-Champaign 1983)
Optimization, nonsmooth analysis

Chayes, Jennifer, Affiliate Professor; Primary affiliation: Microsoft Research, appointed 1999 (Ph.D. Princeton 1983)
Mathematical physics

Chen, Zhen-Qing, Professor, appointed 1998 (Ph.D. Washington University 1992)
Probability theory, stochastic analysis

Cohn, Henry, Affiliate Assistant Professor; Primary affiliation: Microsoft Research, appointed 2001 (Ph.D. Harvard 2000)
Computational and analytic number theory; algebraic and probabilistic combinatorics; mathematical logic, computational complexity, and theoretical computer science; cryptography

Collingwood, David, Professor, appointed 1987 (Ph.D. University of Utah 1983)
Computational biology, Lie theory

Conroy, Matthew, Lecturer, appointed 2004 (Ph.D. University of Colorado 1997)
Analytic number theory

Curiel, Caspar R., Professor Emeritus, appointed 1964 (Ph.D. ETH, Zurich 1960)
Algebraic topology

Curtis, Edward B., Professor, appointed 1970 (Ph.D. Harvard 1962)
Graph theory, networks

Devinatz, Ethan, Associate Professor, appointed 1991 (Ph.D. M.I.T. 1985)
Algebraic topology

Doran, Charles, Assistant Professor, appointed 2003 (Ph.D. Harvard 1999)
Geometry, string theory, number theory

Dubisch, Roy, Professor Emeritus, appointed 1961 (Ph.D. University of Chicago 1943)
Teacher training, elementary and secondary curriculum

Duchamp, Thomas E., Professor and Graduate Program Director, appointed 1979 (Ph.D. University of Illinois 1976)
Differential geometry

Erickson, K. Bruce, Professor, appointed 1973 (Ph.D. University of Wisconsin 1970)
Probability theory

Folland, Gerald B., Professor, appointed 1973 (Ph.D. Princeton 1971)
Harmonic analysis and differential equations

Freedman, Michael, Affiliate Professor; Primary affiliation: Microsoft Research, appointed 1999 (Ph.D. Princeton 1973)
Topology

Gangolli, Ramesh A., Professor Emeritus, appointed 1962 (Ph.D. M.I.T. 1961)
Probability theory, harmonic analysis on Lie groups

Goebel, Ralf, Part-time Lecturer (Ph.D. University of Washington 2000)
Control, Optimization, Variational, set-valued, convex analysis

Goldstein, Allen A., Professor Emeritus, appointed 1964 (Ph.D. Georgetown 1954)
Approximation theory, non-linear programming, control theory, calculus of variations
Goodearl, Ken, Affiliate Professor; Primary affiliation: UC Santa Barbara, appointed 1998 (Ph.D. University of Washington 1971)
Noncommutative algebra

Partial differential equations, differential geometry, invariant theory

Greenbaum, Anne, Professor, appointed 1997 (Ph.D. UC Berkeley 1981)
Applied analysis and computational mathematics

Greenberg, Ralph, Professor, appointed 1978 (Ph.D. Princeton 1971)
Number theory

Grünbaum, Branko, Professor Emeritus, appointed 1966 (Ph.D. Hebrew University 1957)
Geometry

Hoffman, Christopher, Associate Professor, appointed 1999 (Ph.D. Stanford 1996)
Ergodic theory of p-adic endomorphisms, percolation theory

Iqbal, Amer, Assistant Professor, appointed 2004 (Ph.D. M.I.T. 2000)
String theory

Irving, Ronald S., Professor and Divisional Dean for the Natural Sciences, appointed 1980 (Ph.D. M.I.T. 1977)
Algebra

Kas, Arnold, Affiliate Professor; Primary affiliation: Boeing, appointed 1996 (Ph.D. Stanford 1966)
PDE, applied mathematics

Kasikova, Anna, Part-time Lecturer (Ph.D. Kansas State 1999)
Groups and geometries

Kim, Jeong Han, Affiliate Associate Professor; Primary affiliation: Microsoft Research, appointed 1999 (Ph.D. Rutgers 1993)
Mathematical physics (statistical mechanics), combinatorics

King, James R., Associate Professor, appointed 1974 (Ph.D. UC Berkeley 1969)
Complex manifolds, instructional computing in geometry

Klee, Victor, Professor Emeritus, appointed 1953 (Ph.D. University of Virginia 1949)
Convex sets, functional analysis, analysis of algorithms, optimization, combinatorics

Kobliitz, Neal I., Professor, appointed 1979 (Ph.D. Princeton 1974)
Number theory and cryptography

Kovács, Sándor, Associate Professor, appointed 2000 (Ph.D. University of Utah 1995)
Algebraic geometry

Lange, Carsten, Visiting Assistant Professor (AW); Primary affiliation: TU Berlin (Ph.D. TU Berlin 2004)
Geometric combinatorics

Lee, John M., Professor and Graduate Admissions Director, appointed 1986 (Ph.D. M.I.T. 1982)
Differential geometry, partial differential equations

Li, Xiaosheng, Acting Assistant Professor, appointed 2005 (Ph.D. UCLA 2005)
Partial differential equations, inverse problems

Lind, Douglas A., Professor, appointed 1975 (Ph.D. Stanford 1973)
Ergodic theory

Lovász, László, Affiliate Professor; Primary affiliation: Microsoft Research, appointed 1999 (Ph.D. Hungarian Academy of Science 1977)
Discrete mathematics

Loveless, Andrew, Lecturer, appointed 2005 (Ph.D. Washington State University 2005)
Number theory, cryptography, and combinatorics

Marshall, Donald E., Professor, appointed 1976 (Ph.D. UCLA 1976)
Complex analysis

McGovern, William, Monty Professor, appointed 1990 (Ph.D. M.I.T. 1987)
Representation theory

Michael, Ernest A., Professor Emeritus, appointed 1953 (Ph.D. University of Chicago 1951)
General topology

Milic, Thomas, Part-time Lecturer (Ph.D. University of Washington 1995)
Applied mathematics

Mitchell, Stephen, Professor, appointed 1985 (Ph.D. University of Washington 1981)
Algebraic topology

Monk, Steven G., Associate Professor, appointed 1964 (Ph.D. University of Minnesota 1966)
Mathematics education

Moore, Robert T., Associate Professor, appointed 1968 (Ph.D. Princeton 1964)
Operator theory, group representations, mathematical software and experimental mathematics

Morrow, James A., College of Arts and Sciences Alumni Distinguished Professor, appointed 1969 (Ph.D. Stanford 1967)
Complex singularities, inverse problems

Namikawa, Kazuhiro, Professor, appointed 1993 (Ph.D. University of Tokyo 1987)
Mathematics education

Nichifor, Alexandra, Lecturer, appointed 2004 (Ph.D. University of Washington 2004)
Algebraic number theory

Nijenhuis, Albert, Affiliate Professor; Primary affiliation: University of Pennsylvania, appointed 1988 (Ph.D. University of Amsterdam 1952)
Geometry, combinatorics, computational complexity

Novik, Isabella, Assistant Professor, appointed 2004 (Ph.D. Hebrew University 1999)
Geometric combinatorics

Novke, Ronald J., Professor Emeritus, appointed 1958 (Ph.D. University of Chicago 1955)
Category theory, Abelian groups

Oh, Byung-Geun, Acting Assistant Professor, appointed 2004 (Ph.D. Purdue 2004)
Geometric function theory

Osborne, M. Scott, Professor, appointed 1975 (Ph.D. Yale 1972)
Representation theory

Ozols, Vilnis, Assistant Professor Emeritus, appointed 1968 (Ph.D. UC Berkeley 1967)
Lie groups, Riemannian geometry

Palmieri, John, Associate Professor, appointed 1999 (Ph.D. M.I.T. 1991)
Algebraic topology, representation theory

Perkins, Patrick, Senior Lecturer, Director of the Math Study Center, appointed 2000 (Ph.D. University of Washington 1988)
Algebra and combinatorics

Pevtsova, Julia, Acting Assistant Professor, appointed 2005 (Ph.D. Northwestern University 2002)
Algebraic geometry, algebraic topology and representation theory

Phelps, Robert, Professor Emeritus, appointed 1962 (Ph.D. University of Washington 1958)
Functional analysis, geometry of Banach spaces, convexity, optimization

Pollack, Daniel, Associate Professor, appointed 1996 (Ph.D. Stanford 1991)
Differential geometry, partial differential equations, general relativity

Pyke, Ronald, Professor Emeritus, appointed 1960 (Ph.D. University of Washington 1956)
Probability: Brownian and empirical processes

Ragozin, David, Professor Emeritus, appointed 1969 (Ph.D. Harvard 1967)
Approximation theory, splines, wavelets, numerical analysis, harmonic analysis

Rockafellar, R., Tyrell Professor Emeritus, appointed 1966 (Ph.D. Harvard 1963)
Variational analysis and optimization

Rohde, Steffen, Professor, appointed 1998 (Ph.D. Technische Universität Berlin 1989)
Analysis and Probability, with an emphasis on geometric function theory

Schramm, Oded, Affiliate Professor; Primary affiliation: Microsoft Research, appointed 1999 (Ph.D. Princeton 1990)
Complex analysis

Segal, Jack, Professor Emeritus, appointed 1960 (Ph.D. University of Georgia 1960)
Topology, shape theory

Sharafutdinov, Vladimir, Visiting Professor (A); Primary affiliation: Sobolev Institute of Mathematics (Ph.D. Novosibirsk State University 1973)
Differential geometry and topology

Shorack, Galen R., Adjunct Professor; Primary affiliation: Statistics Department at the UW, appointed 1965 (Ph.D. University of Oregon and Stanford 1965)
Empirical processes, robustness, nonparametric statistics

Partial differential equations, Fourier analysis

Smith, S. Paul, Professor, appointed 1986 (Ph.D. Leeds 1981)
Algebra

Solomyak, Boris, Professor, appointed 1992 (Ph.D. Leningrad University 1986)
Fractals and dynamics

Solomyak, Margarita, Part-time Lecturer (Ph.D. University of Washington 1997)
Random spanning trees on finite graphs

Stout, E. Lee, Professor, appointed 1969 (Ph.D. University of Wisconsin 1964)
Complex analysis

Sullivan, John B., Professor, appointed 1973 (Ph.D. Cornell 1971)
Representations of classical groups

Sylvester, John, Professor, appointed 1987 (Ph.D. Courant 1980)
Partial differential equations

Taggart, Jennifer, Lecturer, appointed 2001 (Ph.D. University of Colorado 1997)

Thomas, Rekha, Associate Professor, appointed 2000 (Ph.D. Cornell 1994)
Computational algebra

Toro, Tatiana, Professor, appointed 1996 (Ph.D. Stanford 1992)
Analysis, geometric measure theory

Tseng, Paul, Professor, appointed 1990 (Ph.D. M.I.T. 1986)
Optimization

Tuncel, Selim, Professor and Chair, appointed 1986 (Ph.D. University of Warwick 1982)
Ergodic theory, symbolic dynamics

Uhlmann, Gunther, Professor, appointed 1984 (Ph.D. M.I.T. 1976)
Partial differential equations

Vologodskiy, Vitaliy, Acting Assistant Professor, PIMS Postdoctoral Fellow, appointed 2003 (Ph.D. University of Georgia 2003)
Algebraic geometry

Warfield, Virginia M., Senior Lecturer and Director of Math 100-102, appointed 1973 (Ph.D. Brown 1971)
Probability and the teaching of mathematics

Warner, Garth, Professor, appointed 1966 (Ph.D. University of Michigan 1966)
Algebraic topology

Westwater, M., John Professor Emeritus, appointed 1970 (Ph.D. Cambridge 1967)
Mathematical Physics

Wilson, David, Affiliate Assistant Professor; Primary affiliation: Microsoft Research, appointed 2000 (Ph.D. M.I.T. 1996)
Stochastic processes, computer algorithms, probability and combinatorics

Yuan, Yu, Associate Professor, appointed 2001 (Ph.D. University of Minnesota 1998)
Partial differential equations and differential geometry

Zhang, James, Professor, appointed 1994 (Ph.D. M.I.T. 1991)
Algebra and noncommutative algebraic geometry

Course Descriptions

MATH 098 Intermediate Algebra (0)
MATH 100 Algebra (5)

MATH 102 Algebra (5)

MATH 103 Introduction to Elementary Functions (5)
Continues the study of algebra begun in 100 and 102 with emphasis on functions (polynomial, rational, logarithmic, exponential, and trigonometric). Open only to students who have completed 102. Prerequisite: either score of 26-56% on MATHEA placement test or MATH 102. Offered: AWSp.

MATH 107 Mathematics: A Practical Art (5) NW, QSR
For students who have at least 1.5 years of high school algebra and do not plan to take additional mathematics. The exponential function; how it applies to a wide variety of phenomena. Elementary probability and statistics; their use in a variety of applications. Offered: WSp.

MATH 111 Algebra with Applications (5) NW, QSR
Use of graphs and algebraic functions as found in business and economics. Algebraic and graphical manipulations to solve problems. Exponential and logarithm functions; various applications to growth of money. Prerequisite: either 2.0 in MATH 098, 2.0 in MATH 102, 2.0 in MATH 103, score of 49% on MATHIA placement test, score of 35% on MATHEAP placement test, or score of 50% on MATHEA placement test. Offered: AWS.

MATH 112 Application of Calculus to Business and Economics (5) NW, QSR
Rates of change, tangent, derivative, accumulation, area, integrals in specific contexts, particularly economics. Techniques of differentiation and integration. Application to problem solving. Optimization. Credit does not apply toward a mathematics major. Prerequisite: 2.0 in MATH 111. Offered: AWSpS.

MATH 120 Precalculus (5) NW
Basic properties of functions, graphs; with emphasis on linear, quadratic, trigonometric, exponential functions and their inverses. Emphasis on multi-step problem solving. Prerequisite: either 2.5 in MATH 098, 3.0 in MATH 103, score of 60% on MATHIA test, score of 40% on MATHEAP test, or score of 77% on MATHEA placement test. Offered: AWSSpS.

MATH 124 Calculus with Analytic Geometry I (5) NW, QSR
First quarter in calculus of functions of a single variable. Emphasizes differential calculus. Emphasizes applications and problem solving using the tools of calculus. Prerequisite: 2.5 in MATH 120, score of 68% on MATHEAP placement test, score of 75% on MATHEC placement test, or score of 2 on AP test. Offered: AWSpS.

MATH 125 Calculus with Analytic Geometry II (5) NW
Second quarter in the calculus of functions of a single variable. Emphasizes integral calculus. Emphasizes applications and problem solving using the tools of calculus. Prerequisites: either 2.0 in MATH 124, score of 3 on AB advanced placement test, or score of 3 on BC advanced placement test. Offered: AWSpS.

MATH 126 Calculus with Analytic Geometry III (5) NW
Third quarter in calculus sequence. Sequences, series, Taylor expansions, and an introduction to multivariable differential calculus. Prerequisite: either 2.0 in MATH 125, 2.0 in MATH 145, 2.0 in MATH 146, score of 5 on AB advanced placement test, or score of 4 on BC advanced placement test. Offered: AWSpS.

MATH 134 Accelerated [Honors] Calculus (5) NW, QSR
Covers the material of 124, 125, 126; 307, 308, 318. First year of a two-year accelerated sequence. May receive advanced placement (AP) credit for 124 after taking 134. For students with above average preparation, interest, and ability in mathematics. Offered: A.

MATH 135 Accelerated [Honors] Calculus (5) NW
Covers the material of 124, 125, 126; 307, 308, 318. First year of a two-year accelerated sequence. May receive advanced placement (AP) credit for 125 after taking 135. For students with above average preparation, interest, and ability in mathematics. Offered: W.

MATH 136 Accelerated [Honors] Calculus (5) NW
Covers the material of 124, 125, 126; 307, 308, 318. First year of a two-year accelerated sequence. May not receive credit for both 126 and 136. For students with above average preparation, interest, and ability in mathematics. Offered: Sp.

MATH 144 Calculus for Life Sciences (5) NW, QSR Curtis, Smith, Tuncel
Introduction discrete probability, with examples from the life sciences. Exponential and logarithmic functions: exponential growth and decay. Prerequisite: either 2.5 in MATH 120, score of 68% on MATHEAP placement test, score of 75% on MATHEC placement test, or score of 2 on advanced placement test.

MATH 145 Calculus for Life Sciences (5) NW, QSR Curtis, Smith, Tuncel
Differential and integral calculus, with examples from the life sciences. Applications of the derivative to curve sketching; min/max problems. Antiderivatives and the fundamental theorem of calculus with applications. Continuous probability distributions; Normal and Poisson distribution Prerequisite: either 2.0 in MATH 124, 2.0 in MATH 144, 3.2 in MATH 120, score of 75% on MATHEC placement test, or score of 3 on advanced placement test.

MATH 146 Calculus for Life Sciences (5) NW Curtis, Smith, Tuncel
Further applications of integration; elementary differential equations, with examples from the life sciences. Growth models; Leslie matrices; compartment models. Prerequisite: either 2.0 in MATH 125 or 2.0 in MATH 145.

MATH 170 Mathematics for Elementary School Teachers (3) NW
Basic concepts of numbers and operations. Emphasizes problem solving. Communication of mathematical ideas, and analysis of sources of difficulty in learning/teaching these concepts. Credit may not apply toward a mathematics major. Required for elementary education students. Credit/no credit only. Offered: AWS.

MATH 171 Mathematics for Elementary School Teachers (3) NW
Basic concepts of geometry. Emphasizes problem solving. Communication of mathematical ideas, and analysis of sources of difficulty in learning/teaching these concepts. Credit may not apply toward a mathematics major. Credit/no credit only. Offered: Sp.

MATH 187 Elementary Mathematics Computer Laboratory (1, max. 3) NW
Laboratory activities designed to introduce computing as a tool for doing mathematics, to be taken jointly with a designated section of a 100-level mathematics course. Credit/no credit only. Offered: AWSp.

MATH 197 Problem Solving in Mathematics (2, max. 4) NW
Lectures and problem sessions in mathematics with applications. Enrollment restricted to EOP students only. Credit/no credit only.

MATH 334 Accelerated [Honors] Advanced Calculus (5) NW
Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take MATH 300, 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: either 2.0 in MATH 136, or 2.0 in MATH 205, or 2.0 in MATH 308, or 2.0 in MATH 318. Offered: A.

MATH 335 Accelerated [Honors] Advanced Calculus (5) NW
Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: 2.0 in MATH 334. Offered: A/WSp.

MATH 336 Accelerated [Honors] Advanced Calculus (5) NW
Introduction to proofs and rigor; uniform convergence, Fourier series and partial differential equations, vector calculus, complex variables. Students who complete this sequence are not required to take 309, 324, 326, 327, 328, and 427. Second year of an accelerated two-year sequence; prepares students for senior-level mathematics courses. Prerequisite: 2.0 in MATH 335. Offered: Sp.

MATH 337 Math Enrichment for the Schools (5) NW
Map and graph coloring, spanning trees, dominating sets, cryptography, interpretation of graphs, circular motion, statistics that mislead, other topics. Focus on middle school level, with sixth or seventh grade classroom visits every week. Discussion of readings on math education reform. Prerequisite: MATH 126. Offered: A.

MATH 338 Math Enrichment for the Schools (5) NW
Map and graph coloring, spanning trees, dominating sets, cryptography, interpretation of graphs, circular motion, statistics that mislead, other topics. Focus on middle school level, with sixth or seventh grade classroom visits lasting all Tuesday morning in alternate weeks. Discussion of readings on math education reform. Prerequisite: MATH 334. Offered: W.

MATH 339 Discrete Mathematical Modeling (3) NW
Introduction to methods of discrete mathematics, including topics from graph theory, network flows, and combinatorics. Emphasis on these tools to formulate models and solve problems arising in variety of applications, such as computer science, biology, and management science. Prerequisite: either 2.0 in MATH 136, or 2.0 in MATH 308, or 2.0 in MATH 318.

MATH 340 Intermediate Mathematics Computer Laboratory (1-2, max. 6) NW
Laboratory activities in the use of computing as tool for doing mathematics, to be taken jointly with a designated section of a 300-level mathematics course. Credit/no credit only.

MATH 341 Probability and Statistics in Engineering and Science (4) NW
Concepts of probability and statistics. Conditional probability, independence, random variables, distribution functions. Descriptive statistics, transformations, sampling errors, confidence intervals, least squares and maximum likelihood. Exploratory data analysis and interactive computing. Students may receive credit for only one of 390, STAT/ECON 481, and ECON 580. Prerequisite: either MATH 126 or MATH 136. Offered: jointly with STAT 390; A/WSp.
MATH 394 Probability I (3) NW
Sample spaces; basic axioms of probability; combinatorial probability; conditional probability and independence; binomial, Poisson, and normal distributions. Prerequisite: either 2.0 in MATH 126 or 2.0 in MATH 136; recommended: MATH 324 or MATH 327. Offered: jointly with STAT 394; AWS.

MATH 395 Probability II (3) NW
Random variables; expectation and variance; laws of large numbers; normal approximation and other limit theorems; multidimensional distributions and transformations. Prerequisite: 2.0 in STAT/MATH 394. Offered: jointly with STAT 395; WSpS.

MATH 396 Probability III (3) NW
Characteristic functions and generating functions; recurrent events and renewal theory; random walk. Prerequisite: 2.0 in MATH 395 or 2.0 in STAT 511. Offered: jointly with STAT 396; Sp.

MATH 398 Special Topics in Mathematics (1-5, max. 15)
Independent reading in math. Does not count as credit toward a math major. Credit/no credit only. Offered: AWSpS.

MATH 400 Mathematical Communication for Undergraduates (2) NW
Techniques of effective writing and oral presentations in the mathematical sciences. Offered: jointly with AMATH 400/STAT 400. Prerequisite: at least 15 credits in MATH, STAT, AMATH, or CSE at the 300 or 400 level, including MATH 307 or AMATH 351 and MATH 308 or AMATH 352.

MATH 402 Introduction to Modern Algebra (3) NW
Algebraic systems; elementary theory of groups, rings, and fields; polynomials; topics in linear algebra; reductions of forms. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 327, 2.0 in MATH 336, or 2.0 in MATH 340. Offered: AS.

MATH 403 Introduction to Modern Algebra (3) NW
Algebraic systems; elementary theory of groups, rings, and fields; polynomials; topics in linear algebra; reductions of forms. Prerequisite: 2.0 in MATH 402. Offered: AS.

MATH 404 Introduction to Modern Algebra (3) NW
Algebraic systems; elementary theory of groups, rings, and fields; polynomials; topics in linear algebra; reductions of forms. Prerequisite: 2.0 in MATH 403. Offered: Sp.

MATH 407 Linear Optimization (3) NW
Maximization and minimization of linear functions subject to constraints consisting of linear equations and inequalities; linear programming and mathematical modeling. Simplex method, elementary games and duality. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308, 2.0 in MATH 318, or 2.0 in AMATH 352. Offered: AWS.

MATH 408 Nonlinear Optimization (3) NW
Maximization and minimization of nonlinear functions, constrained and unconstrained; nonlinear programming problems and methods. Lagrange multipliers; Kuhn-Tucker conditions, convexity. Quadratic programming. Prerequisite: either 2.0 in MATH 308 or 2.0 in MATH 318; either 2.0 in MATH 327 or 2.0 in MATH 334. Offered: W.

MATH 409 Discrete Optimization (3) NW
Maximization and minimization problems in graphs and networks (shortest paths, minimum spanning trees, maximum flows, minimum cost flows); transportation and trans-shipment problems, NP-completeness. Prerequisite: 2.0 in MATH 407. Offered: Sp.

MATH 411 Introduction to Modern Algebra for Teachers (3) NW
Basic concepts of abstract algebra with an emphasis on problem solving, constructing proofs, and communication of mathematical ideas. Designed for teaching majors; not open for credit to students who have taken 402, 403. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: either 2.0 in MATH 205, 2.0 in MATH 308, 2.0 in MATH 318, or 2.0 in MATH 136. Offered: AS.

MATH 412 Introduction to Modern Algebra for Teachers (3) NW
Basic concepts of abstract algebra with an emphasis on problem solving, constructing proofs, and communication of mathematical ideas. Designed for teaching majors; not open for credit to students who have taken 402, 403. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 411. Offered: WS.

MATH 414 Number Theory (3) NW
Congruences, arithmetic of quadratic fields, binary quadratic forms, Dirichlet’s theorem on primes in an arithmetic progression, Chebyshev’s theorem on distribution of primes, the partition function, equations over finite fields. Prerequisite: either 2.0 in MATH 301 or 2.0 in MATH 402.

MATH 415 Number Theory (3) NW
Congruences, arithmetic of quadratic fields, binary quadratic forms, Dirichlet’s theorem on primes in an arithmetic progression, Chebyshev’s theorem on distribution of primes, the partition function, equations over finite fields. Prerequisite: 2.0 in MATH 414.

MATH 420 History of Mathematics (3) NW
Survey of the development of mathematics from its earliest beginnings through the first half of the twentieth century. Prerequisite: either 2.0 in MATH 402 or 2.0 in MATH 411, either of which may be taken concurrently. Offered: S.

MATH 421 Conceptual Calculus for Teachers (4) NW
In-depth conceptual study of calculus, approached from many points of view, including the study of patterns of physical change, discrete approximation to continuous phenomena, and the historical development of calculus. Intended for future teachers. Cannot be used as elective credit for either BS program in mathematics.

MATH 422 Conceptual Calculus for Teachers (3) NW
In-depth conceptual study of calculus, approached from many points of view, including the study of patterns of physical change, discrete approximation to continuous phenomena, and the historical development of calculus. Intended for future teachers. Cannot be used as elective credit for either BS program in mathematics.

MATH 424 Fundamental Concepts of Analysis (3) NW
Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Prerequisite: either 2.0 in MATH 328 or 2.0 in MATH 335. Offered: A.

MATH 425 Fundamental Concepts of Analysis (3) NW
Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Prerequisite: either 2.0 in MATH 326 or 2.0 in MATH 335; 2.0 in MATH 424. Offered: W.

MATH 426 Fundamental Concepts of Analysis (3) NW
Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Prerequisite: 2.0 in MATH 425. Offered: Sp.

MATH 427 Topics in Applied Analysis (3) NW
Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications.
Prerequisite: either 2.0 in MATH 327 or 2.0 in MATH 335; recommended: MATH 328. Offered: AS.

MATH 428 Topics in Applied Analysis (3) NW
Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications. Prerequisite: either 2.0 in MATH 335 or 2.0 in MATH 309 and 2.0 in MATH 327. Offered: W.

MATH 429 Topics in Applied Analysis (3) NW
Elementary functions of a complex variable; Cauchy integral formula. Taylor and Laurent series; conformal mapping. Fourier series; orthogonal functions; boundary value problems; applications. Prerequisite: either 2.0 in MATH 427 or 2.0 in MATH 336; 2.0 in MATH 428. Offered: Sp.

MATH 435 Introduction to Dynamical Systems (3) NW
Examples of dynamical systems in mathematics and in natural phenomena. Iterated functions, phase portraits, fixed and periodic points. Hyperbolicity, bifurcations. Chaos. Interval maps; quadratic families. Fractals; iterated function systems. Elements of higher dimensional dynamics. Julia sets, the Mandelbrot set. Prerequisite: 2.0 in MATH 335 or 2.0 in MATH 327; either 2.0 in MATH 309 or 2.0 in AMATH 352 and 2.0 in AMATH 353.

MATH 436 Introduction to Dynamical Systems (3) NW
Examples of dynamical systems in mathematics and in natural phenomena. Iterated functions, phase portraits, fixed and periodic points. Hyperbolicity, bifurcations. Chaos. Interval maps; quadratic families. Fractals; iterated function systems. Elements of higher dimensional dynamics. Julia sets, the Mandelbrot set. Prerequisite: 2.0 in MATH 435.

MATH 438 Introduction to Partial Differential Equations (3) NW
Integral curves and surfaces of vector fields, initial value problems for first-order linear and quasi-linear equations, Cauchy-Kovalevskaya theorem, general Cauchy problem characteristics, special equations. Prerequisite: either 2.0 in both MATH 309 and MATH 326 or 2.0 in MATH 336.

MATH 439 Introduction to Partial Differential Equations (3) NW
Continuation of 438. Laplace’s equation and general elliptic equations, wave equation and general hyperbolic equations, heat equation and general parabolic equations. Initial value problems and Dirichlet problems. Green’s functions. Maximum principle. Prerequisite: 2.0 in MATH 438.

MATH 441 Topology (3) NW
Metric and topological spaces, convergence, continuity, finite products, connectedness, and compactness. Prerequisite: either 2.0 in MATH 328 or 2.0 in MATH 335. Offered: A.

MATH 442 Differential Geometry (3) NW
Curves in 3-space, continuity and differentiability in 3-space, surfaces, tangent planes, first fundamental form, area, orientation, the Gauss Map. Prerequisite: either 2.0 in MATH 335, or 2.0 in MATH 326 and 2.0 in MATH 328 and 2.0 in either MATH 308 or 2.0 in MATH 318. Offered: W.

MATH 443 Topics in Topology and Geometry (3) NW
Content selected from such topics as homotopy theory, topological surfaces, advanced differential geometry, projective geometry, hyperbolic geometry, spherical geometry, and combinatorial geometry. Offered: Sp.

MATH 444 Geometry for Teachers (3) NW
Concepts of geometry from multiple approaches; discovery, formal and informal reasoning, transformations, coordinates, exploration using computers and models. Topics selected from Euclidean plane and space geometry, spherical geometry, non-Euclidean geometries, fractal geometry. Designed for teaching majors. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 126; either 2.0 in MATH 136, 2.0 in MATH 205, 2.0 in MATH 308, or 2.0 in MATH 318. Offered: A8.

MATH 445 Geometry for Teachers (3) NW
Concepts of geometry from multiple approaches; discovery, formal and informal reasoning, transformations, coordinates, exploration using computers and models. Topics selected from Euclidean plane and space geometry, spherical geometry, non-Euclidean geometries, fractal geometry. Designed for teaching majors. Cannot be used as elective credit for either BS program in mathematics. Prerequisite: 2.0 in MATH 444. Offered: WS.

MATH 461 Combinatorial Theory (3) NW
Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisite: either 2.0 in MATH 308 or 2.0 in MATH 318.

MATH 462 Combinatorial Theory (3) NW
Selected topics from among: block designs and finite geometries, coding theory, generating functions and other enumeration methods, graph theory, matroid theory, combinatorial algorithms, applications of combinatorics. Prerequisite: 2.0 in MATH 461.

MATH 464 Numerical Analysis I (3) NW
Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: either 2.0 in MATH 136, 2.0 in MATH 308 and 2.0 in MATH 327, 2.0 in MATH 318 and 2.0 in MATH 327, or 2.0 in MATH 335. Offered: A.

MATH 465 Numerical Analysis II (3) NW
Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: 2.0 in MATH 464. Offered: W.

MATH 466 Numerical Analysis III (3) NW
Basic principles of numerical analysis, classical interpolation and approximation formulas, finite differences and difference equations. Numerical methods in algebra, systems of linear equations, matrix inversion, successive approximations, iterative and relaxation methods. Numerical differentiation and integration. Solution of differential equations and systems of such equations. Prerequisite: either 2.0 in MATH 307 or 2.0 in MATH 136; 2.0 in MATH 465. Offered: Sp.

MATH 480 Special Topics in Undergraduate Mathematics (3, max. 12)
Advanced topics in various areas of undergraduate mathematics.

MATH 487 Advanced Mathematics Computer Laboratory (1-2, max. 6) NW
Laboratory activities in the use of computing as a tool for doing mathematics, to be taken jointly with a designated section of a 400-level mathematics course. Credit/no credit only.

MATH 491 Introduction to Stochastic Processes (3) NW
Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory,
stationary processes. Prerequisite: either 2.0 in MATH 396 or STAT 396. Offered: jointly with STAT 491; A.

MATH 492 Stochastic Calculus for Option Pricing (3) NW
Introduction to stochastic calculus mathematical foundation for option pricing and derivatives. Basic stochastic analysis tools, including stochastic integrals, stochastic differential equations, Ito's formula, theorems of Girsanov and Feynman-Kac, Black-Scholes option pricing, American and exotic options, bond options. Prerequisite: MATH STAT 394-5. Offered: jointly with MATH 492; W.

MATH 496 Honors Senior Thesis (1-5) NW
Problem seminar for honors students. Cannot be repeated for credit. Offered: AWSp.

MATH 497 Special Topics in Mathematics for Teachers (2-9, max. 9) NW
Study of selected areas of mathematics. Designed for the improvement of teachers of mathematics. Offered: jointly with EDC&I 478.

MATH 498 Special Topics in Mathematics (1-5, max. 15)
Reading and lecture course intended for special needs of advanced students. Offered: AWSp.

MATH 499 Undergraduate Research (8)
Summer research opportunity for undergraduates. Credit/no credit only. Offered: S.

MATH 500 Mathematical Communication for Graduates (2)

MATH 501 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)
Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 502 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)
Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 503 Special Topics in Teaching and Learning Mathematics (2-3, max. 15)
Selected Topics dealing with issues in the teaching and learning of mathematics.

MATH 504 Modern Algebra (5)
First quarter of a three-quarter sequence covering group theory; field theory and Galois theory; commutative rings and modules, linear algebra, theory of forms; representation theory, associative rings and modules, commutative algebra and elementary algebraic geometry. Prerequisite: MATH 404 or equivalent.

MATH 505 Modern Algebra (5)
Continuation of MATH 504. Prerequisite: MATH 504.

MATH 506 Modern Algebra (5)
Continuation of MATH 505. Prerequisite: MATH 505.

MATH 507 Algebraic Geometry (3)
First quarter of a two-quarter sequence covering the basic theory of affine and projective varieties, rings of functions, the Hilbert Nullstellensatz, localization, and dimension; the theory of algebraic curves, divisors, cohomology, genus, and the Riemann-Roch theorem; and related topics. Prerequisite: MATH 506.

MATH 508 Algebraic Geometry (3)
Continuation of MATH 507. Prerequisite: MATH 507.

MATH 509 Theory of Optimal Control (3)
Trajectories from ordinary differential equations with control variables. Controllability, optimality, maximum principle. Relaxation and existence of solutions. Techniques of nonsmooth analysis. Prerequisite: real analysis on the level of MATH 426; background in optimization corresponding to MATH 515. Offered: jointly with AMATH 509; even years.

MATH 510 Seminar in Algebra (2-5, max. 5)
Credit/no credit only. Prerequisite: permission of graduate program coordinator.

MATH 514 Networks and Combinatorial Optimization (3)
Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems. Algorithms and applications. Prerequisite: MATH 308 or AMATH 352 and MATH 324. Offered: jointly with AMATH 514.

MATH 515 Fundamentals of Optimization (5)

MATH 516 Numerical Optimization (3)
Methods of solving optimization problems in finitely many variables, with or without constraints. Steepest descent, quasi-Newton methods. Quadratic programming and complementarity. Exact penalty methods, multiplier methods. Sequential quadratic programming. Cutting planes and nonsmooth optimization. Prerequisite: MATH 515. Offered: jointly with AMATH 516.

MATH 517 Optimization Under Uncertainty (3)
Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications such as to optimal stopping, inventory control, resource management. Prerequisite: MATH 308, MATH 324 and an introduction to basic concepts of probability, such as MATH 390 or MATH 394, MATH 395. Offered: jointly with AMATH 517.

MATH 521 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 521.

MATH 522 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 522.

MATH 523 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers, Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with STAT 523.

MATH 524 Real Analysis (5)
First quarter of a three-quarter sequence covering the theory of measure and integration, point set topology, Banach spaces, Lp spaces, applications to the theory of functions of one and several
real variables. Additional topics to be chosen by instructor. Prerequisite: MATH 426 or equivalent.

**MATH 525 Real Analysis (5)**
Continuation of MATH 524. Prerequisite: MATH 524.

**MATH 526 Real Analysis (5)**
Continuation of MATH 525. Prerequisite: MATH 525.

**MATH 527 Functional Analysis (3)**
First quarter of a three-quarter sequence. Review of Banach, Hilbert, and Lp spaces; locally convex spaces (duality and separation theory, distributions, and function spaces); operators on locally convex spaces (adjoints, closed graph/open mapping and Banach-Steinhaus theorems); Banach algebras (spectral theory, elementary applications); spectral theorem for Hilbert space operators. Additional topics chosen by instructor. A working knowledge of real variables, general topology, and complex variables is assumed.

**MATH 528 Functional Analysis (3)**
Continuation of MATH 527. Prerequisite: MATH 527.

**MATH 529 Functional Analysis (3)**
Continuation of MATH 528. Prerequisite: MATH 528.

**MATH 530 Seminar in Analysis (2-5, max. 5)**
Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 534 Complex Analysis (5)**
First quarter of a three-quarter sequence covering complex numbers, analytic functions, contour integration, power series, analytic continuation, sequences of analytic functions, conformal mapping of simply connected regions, and related topics. Prerequisite: MATH 426.

**MATH 535 Complex Analysis (5)**
Continuation of MATH 534. Prerequisite: MATH 534.

**MATH 536 Complex Analysis (5)**
Continuation of MATH 535. Prerequisite: MATH 535.

**MATH 537 Several Complex Variables (3)**
First quarter of a three-quarter sequence covering Weierstrass preparation theorem and its immediate consequences, analytic continuation, domains of holomorphy, pseudoconvexity, Cartan-Oka theory of coherence, embedding theorems; the CR equations, CR manifolds, connections with algebraic geometry. Prerequisite: MATH 536.

**MATH 538 Several Complex Variables (3)**
Continuation of MATH 537. Prerequisite: MATH 537.

**MATH 539 Several Complex Variables (3)**
Continuation of MATH 538. Prerequisite: MATH 538.

**MATH 541 Special Topics in Applied Mathematics (2-3, max. 15)**
Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

**MATH 542 Special Topics in Applied Mathematics (2-3, max. 15)**
Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

**MATH 543 Special Topics in Applied Mathematics (2-3, max. 15)**
Such topics as mathematical quantum theory, fluid mechanics, optimization and operations research, and control theory.

**MATH 544 Topology and Geometry of Manifolds (5)**
First quarter of a three-quarter sequence covering general topology, the fundamental group, covering spaces, topological and differentiable manifolds, vector fields, flows, the Frobenius theorem, Lie groups, homogeneous spaces, tensor fields, differential forms, Stokes's theorem, deRham cohomology. Prerequisite: MATH 404 and MATH 426 or equivalent.

**MATH 545 Topology and Geometry of Manifolds (5)**
Continuation of MATH 544. Prerequisite: MATH 544.

**MATH 546 Topology and Geometry of Manifolds (5)**
Continuation of MATH 545. Prerequisite: MATH 545.

**MATH 547 Geometric Structures (3, max. 9)**
First quarter of a three-quarter sequence covering differential-geometric structures on manifolds, Riemannian metrics, geodesics, covariant differentiation, curvature, Jacobi fields, Gauss-Bonnet theorem. Additional topics to be chosen by the instructor, such as connections in vector bundles and principal bundles, symplectic geometry, Riemannian comparison theorems, symmetric spaces, symplectic geometry, complex manifolds, Hodge theory. Prerequisite: MATH 546.

**MATH 548 Geometric Structures (3, max. 9)**
Continuation of MATH 547. Prerequisite: MATH 547.

**MATH 549 Geometric Structures (3, max. 9)**
Continuation of MATH 548. Prerequisite: MATH 548.

**MATH 550 Seminar in Geometry (2-5, max. 5)**
Credit/no credit only. Prerequisite: permission of graduate program coordinator.

**MATH 554 Linear Analysis (5)**
First quarter of a three-quarter sequence covering advanced linear algebra and matrix analysis, ordinary differential equations (existence and uniqueness theory, linear systems, numerical approximations), Fourier analysis, introductions to functional analysis and partial differential equations, distribution theory. Prerequisite: MATH 426 and familiarity with complex analysis at the level of 427 (the latter may be obtained concurrently).

**MATH 555 Linear Analysis (5)**
Continuation of MATH 554. Prerequisite: MATH 554.

**MATH 556 Linear Analysis (5)**
Continuation of MATH 555. Prerequisite: MATH 555.

**MATH 557 Introduction to Partial Differential Equations (3)**

**MATH 558 Introduction to Partial Differential Equations (3)**
Continuation of MATH 557. Prerequisite: MATH 557.

**MATH 559 Introduction to Partial Differential Equations (3)**
Continuation of MATH 558. Prerequisite: MATH 558.

**MATH 564 Algebraic Topology (3)**
First quarter of a three-quarter sequence covering classical and modern approaches; complexes and their homology theory; applications; fixed points, products and Poincare duality; axiomatic approach. Prerequisite: MATH 506 and MATH 544, or equivalent.
MATH 565 Algebraic Topology (3)
Continuation of MATH 564. Prerequisite: MATH 564.

MATH 566 Algebraic Topology (3)
Continuation of MATH 565. Prerequisite: MATH 565.

MATH 570 Seminar in Topology (2-5, max. 5)
Credit/no credit only. Prerequisite: permission of graduate program coordinator.

MATH 574 Fundamental Concepts of Analysis (3) Hoffman, Toro
Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.

MATH 575 Fundamental Concepts of Analysis (3) Hoffman, Toro
Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.

MATH 576 Fundamental Concepts of Analysis (3) Hoffman, Toro
Sets, real numbers, topology of metric spaces, normed linear spaces, multivariable calculus from an advanced viewpoint. Introduction to Lebesgue measure and integration. Intended for students in Biostatistics and related fields; does not fulfill requirements for degrees in mathematics.

MATH 577 Lie Groups and Lie Algebras (3, max. 9)
Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 506; MATH 526 or MATH 546.

MATH 578 Lie Groups and Lie Algebras (3, max. 9)
Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 506; MATH 526 or MATH 546.

MATH 579 Lie Groups and Lie Algebras (3, max. 9)
Topics chosen from: root systems and reflection groups; the structure, classification, and representation theory of complex semisimple Lie algebras, compact Lie groups, or semisimple Lie groups; algebraic groups; enveloping algebras; infinite-dimensional representation theory of Lie groups and Lie algebras; harmonic analysis on Lie groups. Prerequisite: MATH 506; MATH 526 or MATH 546.

MATH 580 Current Topics in Mathematics (2, max. 12)
Discussion of current research topics in mathematics, with emphasis on current departmental research projects and interests. Offered: AWSp.

MATH 581 Special Topics in Mathematics (*, max. 36)
Advanced topics in various areas of mathematics. Offered: AWSpS.

MATH 582 Special Topics in Mathematics (*, max. 36)
Advanced topics in various areas of mathematics. Offered: AWSpS.

MATH 583 Special Topics in Mathematics (*, max. 36)
Advanced topics in various areas of mathematics. Offered: AWSpS.

MATH 584 Applied Linear Algebra and Introductory Numerical Analysis (5)

MATH 585 Numerical Analysis of Boundary Value Problems (5)
Numerical methods for steady-state differential equations. Two-point boundary value problems and elliptic equations. Iterative methods for sparse symmetric and non-symmetric linear systems: conjugate-gradients, preconditioners. Prerequisite: AMATH 584/ MATH 584 which may be taken concurrently. Offered: jointly with AMATH 585; W.

MATH 586 Numerical Analysis of Time Dependent Problems (5)

MATH 590 Seminar in Probability (2-5, max. 5)
Credit/no credit only. Prerequisite: permission of instructor.

MATH 594 Special Topics in Numerical Analysis (2-3, max. 15)
Various advanced topics in numerical analysis and scientific computing, such as iterative methods, eigenvalue computations, approximation theory, finite element methods, inverse problems, nonlinear conservation laws, computational fluid dynamics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 594.

MATH 595 Special Topics in Numerical Analysis (2-3, max. 15)
Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or equivalent. Offered: jointly with AMATH 595.

MATH 596 Special Topics in Numerical Analysis (2-3, max. 15)
Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, AMATH 585, 586, or equivalent. Offered: jointly with AMATH 596.

MATH 597 Seminar on Teaching Math (1, max. 3)
Issues in the teaching and learning of college mathematics, such as discovering and working with student background and expectations, increasing student engagement with course material, and evaluating student achievement. For graduate students who are, or soon will be, teaching mathematics courses on their own. Credit/no credit only.

MATH 598 Seminar on Technology (1, max. 3)
Explores the use of computer technology in teaching and research in mathematics. Develops the basic skills required for using computer mathematics software.

MATH 600 Independent Study or Research (*)

MATH 700 Master's Thesis (*)
The foremost goal of the School of Music is the discovery, preservation, and transmission of the practice and knowledge of music, as well as the role of music in culture and history. The school expands the frontiers of artistic enterprise and cultural knowledge through research, scholarship, and creative production, in its publications, performances, and teaching.

Through its instructional offerings, the School of Music provides opportunities for all students of the University of Washington to explore the role of music in the cultural nature of the world, past, present, and future. The school teaches students to think creatively and critically. The faculty provides professional training to musical performers as well as to academic scholars. The ultimate goal of the school is to instill the standards and ideals of excellence in both the artistic and scholarly endeavor of its students.

The School of Music is committed to furthering and transmitting technological advances through its research and instruction. Because of its prominence in public performance, the School of Music has a unique external visibility, playing a vital role in the cultural life of the University, region, and beyond through the performance, creation, and study of music and culture. To that end, the school maintains strong links with professional arts organizations regionally as well as nationally.

**Undergraduate Program**

Adviser
116 Music, Box 353450
206-543-1239
musicadv@u.washington.edu

The School of Music offers the following programs of study:
- The Bachelor of Arts degree with a major in music (music theory-history track; vocal track; instrumental track)
- The Bachelor of Music degree with a major in composition, piano, string instruments, voice, organ, orchestral instruments, guitar, jazz studies, music education, and music history
- The Bachelor of Arts degree with a major in general studies (ethnomusicology) (See general studies adviser in 171 Mary Gates Hall for requirements.)
- A minor in music

**Information Applicable to All Music Majors**

**Department Admission Requirements**

All students must participate in an entrance audition and qualify at the MUSAP 320 level or better in their principal performance areas to be admitted as music majors and to receive private instruction. Entrance auditions are held in late September, late January, and as needed throughout the year. (See department web site for more information.) Major status in performance areas is determined by an audition.

Most degree programs in the School of Music require one to two years of basic piano, to be completed during the course of study at the University.

**Pre-Core Preparation**

In preparation for beginning the music core course work, all students must be evaluated by placement test to determine their levels in music theory and music history. Students who have minimal background in these areas may be required to take MUSIC 113/MUSIC 119 and MUSIC 120 before beginning the music core. Transfer students who have had at least two quarters of music theory or music history are evaluated by a faculty member the quarter they are admitted to their program.

**Music Core Requirements**

The music core (36 credits), required in each of the undergraduate program tracks, is as follows: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206; MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course.

**Grade Requirements**

Undergraduate music majors are required to earn a minimum grade of 2.0 in each course (core and elective) counted toward music major requirements. An overall minimum GPA in music course work required for graduation is 2.50.

**Bachelor of Arts**

**General Requirements**

A minimum of 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Cumulative GPA of 2.50 for all music courses and a minimum grade of 2.0 for each music course counted toward the major.

**Major Requirements**

**Music Theory-History Track (63 credits):** Music core, plus 12 credits of approved upper-level MUSIC or MUHST electives, 10 credits of MUSAP vocal or instrumental private applied instruction, 5 credits of MUSEN (ensembles).

**Instrumental Track (69 credits):** Music core, plus 6 credits of approved upper-level MUSIC or MUHST electives, 18 credits of MUSAP instrumental private applied instruction, and 9 credits in ensembles.

**Vocal Track (75 credits):** Music core, plus 6 credits of approved upper-level MUSIC or MUHST electives, 18 credits of MUSAP vocal private applied instruction, 6 credits of vocal diction, and 9 credits in ensembles. The vocal track also requires proficiency through the third quarter college level in two languages from French, German, and Italian.

**Bachelor of Music**

**Admission Requirements:** All students must participate in an entrance audition as described above. Students admitted into the BA program have the option to jury into the BM program at the end of the freshman and sophomore years. The Composition and Music Education programs have additional application requirements as described in the listings below.

**General Requirements**

A minimum of 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and
Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Knowledge, to include at least 20 credits each in two of the following three areas: Visual, Literary, & Performing Arts; Individuals & Societies; and the Natural World. Piano proficiency at MUSAP 235 level, a minimum grade of 2.0 in each music course counted toward the major, and a GPA of 2.50 in music courses is required for graduation.

Major Requirements (and Additional Admission Requirements, as noted)

Composition (114-120 credits)

Additional Admission Requirements: To be considered for admission to the Composition major, students must complete MUSIC 302 and MUSIC 305; MUHST 212; and MUSIC 216, MUSIC 217, MUSIC 218. Prospective students must also submit a portfolio of recent compositions. Please see the adviser for more information on the application process.

Major Requirements: Music core (36 credits) plus MUSIC 216, MUSIC 217, MUSIC 218; PHYS 207; 18 credits of division-approved upper-level Music or MUHST electives; MUSIC 380, MUSIC 381, MUSIC 382; MUSIC 400 or MUSIC 401; MUSIC 471 or MUSIC 472; MUSIC 490; 18 credits of private instruction in composition (MUSIC 391/MUSIC 491); 12-18 credits of MUSAP applied instruction; 6 credits of MUSEN ensembles; and one 400-level course in ethnomusicology. See the Music undergraduate adviser for more specific information on these requirements.

Guitar (120 credits)

Music core (36 credits) plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487 or MUSIC 438; 36 credits of MUSAP applied instruction; 7 credits of electives; 2 credits of recitals; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 380, MUSIC 381, MUSIC 382; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Jazz Studies (120 credits)

Music core (36 credits) plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 319 or MUSIC 331; MUHST 425; MUSIC 336 and MUSIC 436; MUSIC 467, MUSIC 468, MUSIC 469; MUSIC 379, MUSIC 479; 6 credits of MUSIC 464; 10 credits of music electives; 30 credits of MUSAP applied instruction; 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Music Education (115-119 credits)

Additional Admission Requirements: To be considered for admission to the Music Education major, students must complete a separate Music Education audition and interview. Please see the adviser for more information on the application process.

Major Requirements: Music core (36 credits) plus MUSIC 300, MUSIC 350, MUSIC 351, MUSIC 352 (or MUSIC 380, MUSIC 381, MUSIC 382); MUSED 301; MUSED 304, MUSED 305, MUSED 306; MUSED 340; MUSED 403; MUSED 405 (or MUSEN 303); MUSED 440; MUSED 442 (or MUSED 443); MUSED 452; MUSED 465; 18 credits of MUSAP applied instruction; 6-7 credits of MUSEN ensembles; 12-14 credits of techniques courses; 3 credits of approved jazz coursework; ED&SCI 494; and 3 credits of education electives. See the Music undergraduate adviser for more specific information on these requirements.

Orchestral Instruments (116 credits)

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSAP applied instruction; 18 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Organ (120 credits)

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSAP applied instruction; MUSIC 454; MUSIC 473 and MUSIC 474; MUSIC 458 and MUSIC 459; MUSIC 350, MUSIC 351, MUSIC 352; 1 credit of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Piano (120 credits)

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSAP applied instruction; MUSIC 434, 435, 436; MUSIC 326, MUSIC 327, MUSIC 328; 7 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Strings (117 credits)

Music core (36 credits) plus 15 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSAP applied instruction; 6 credits of MUSIC 429; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 380; 3 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Voice (119 credits)

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 307, MUSIC 308, MUSIC 309; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434; MUSIC 460, MUSIC 461, and MUSIC 462; MUSIC 379 and MUSIC 479; 36 credits of MUSAP applied instruction; 10 credits of MUSEN ensembles; and 3 credits of music electives. Voice majors must be proficient through the third quarter college level in two languages from French, German, and Italian. See the Music undergraduate adviser for more specific information on these requirements.

Academic Options

Music History

Admission Requirements: In addition to the admission requirements for all music majors, shown above, formal application to the Music History division, to include verified completion of music core, 3.00 GPA in music core courses, 3.00 overall GPA, and a writing sample. Completion of minimum entrance requirements does not guarantee admission. The program of study and preparation of the senior thesis is developed in consultation with a Music History faculty adviser. Students who intend to pursue graduate studies are strongly advised to establish proficiency in German or French and to acquire some acquaintance with one or two additional foreign languages.

Major Requirements: 135 credits as follows: Music core (36 credits) plus 6 credits of 300-level MUHST electives; 36 credits of 400-level MUSIC or MUHST (minimum 12 courses); a 3-credit 400-level course in ethnomusicology; 3 credits of MUSIC 498; 18 credits of MUSAP applied instruction (3 years); 9 credits of MUSEN ensembles; and 24 credits of music electives.

Minor

Minor Requirements: A minimum of 25 credits of music courses (MUSIC, MUHST, MUSEN, MUSAP, or MUSED prefixes). Maximum 10 credits at the 100 level, minimum 15 credits at the 200 level or above including:
- At least 4 credits from courses dealing with the elements of music (chosen from MUSIC 116, MUSIC 117, MUSIC 118, MUSIC 113/MUSIC 119, or MUSIC 120).
- 5 credits from courses for nonmajors that focus on a particular music area (MUSIC 121, MUSIC 122, MUSIC 160, MUSIC 162, MUSIC 316, MUSIC 317, MUSIC 318, MUSIC 319, MUSIC 331).
- Maximum 10 transfer credits (including maximum 5 transfer credits in performance lessons and ensembles) may count

307
toward the minor.

Student Outcomes and Opportunities

- **Instructional and Research Facilities:** None.
- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- **Research, Internships, and Service Learning:** None.
- **Department Scholarships:** None.
- **Student Organizations/Associations:**
  - **Music Student Association (MSA):** A group of undergraduate and graduate students from various divisions of the School of Music, working to foster a stronger sense of professional community, serve the larger cultural community, and build practical tools for encouraging and promoting student musicians’ endeavors. For more information, contact sonare@u.washington.edu.
  - **Ethnomusicology Student Association:** A student association which deals with the concerns of the ethnomusicology division, as well as meeting socially. For further information, contact the division at 206-543-0949 or 64 Music Building.
  - **Music Educators National Conference (MENC):** A local chapter of this national scholarly organization of music educators is directly involved in annual state and regional meetings and events. Contact Professor Patricia Campbell pcamp@u.washington.edu for further details.

Of Special Note:

**Continuation of Major Status**

Performance studies should begin after audition and acceptance, and continue each subsequent quarter of registration until the minimum program requirements for applied-music lessons have been met. Applied-music study should continue as long as the student is registered and in residence until the final approved recital is given. In order to retain major standing, the student must make and demonstrate consistent and acceptable progress at the annual required jury. Concurrent enrollment or participation in at least one School of Music ensemble is required during each quarter in which a student receives “MUSAP” applied-music instruction, at the 300 level and above, except for MUSAP 359/559. Also, basic piano proficiency is required for all majors. Non-keyboard majors must enroll in the MUSAP 133/235 series until appropriate proficiency is attained. Any departure from the above requirements must have the recommendation of the appropriate divisional chair and the written consent of the Director of the School of Music.

**Graduate Program**

Graduate Program Coordinator
116 Music, Box 353450
206-543-2726
musicadv@u.washington.edu

Graduate programs in the School of Music take into consideration the dual nature of music’s subject matter. First, it is one of the creative arts, requiring constant renewal through the efforts of composers, performers, and teachers. Second, it is a branch of the humanities, subject to scholarly study and interpretation of its theoretical concepts and historical development.

**Special Requirements**

Performance degrees require an audition (see below)

**Financial Aid**

A limited number of teaching and staff assistantships (including accompanying) are available. Competitive auditions for perfor-

**Research Facilities**

The Music Building contains the music library, an electronic composition laboratory, a listening center, and the ethnomusicology archives, as well as the studio, practice, and classroom facilities of a modern music department.

Ensembles available for student participation include University Symphony Orchestra, University Chorale, Opera Chorus, Contemporary Group, and Baroque Ensemble, as well as non-Western ensembles with visiting artists from around the globe.

**Master of Music, Doctor of Musical Arts**

The programs with more creative emphasis lead to the degrees of Master of Music and Doctor of Musical Arts. Areas of specialization: performance (brass, harp, harpsichord, piano, organ, percussion, string, voice, woodwinds), instrumental conducting, choral conducting, composition, and opera production. The Graduate Record Examination is not required for application to these graduate programs. All graduate students must maintain a GPA of at least 3.00, and a minimum grade of 2.7 in courses used to fulfill School of Music graduation requirements.

**Master of Music**

**Admission Requirements:** Audition required for entrance to performance except for composition. Details of requirements for each of the areas of specialization are available from the School of Music Office of Graduate and Undergraduate Advising and on the School’s Web site (above).

**Graduation Requirements:** Please see the School’s Web site for individual degree program plans.

**Doctor of Musical Arts**

**Admission Requirements:** Audition required for performance. (See the School’s Web site for suggested audition repertoire and audition dates.) See the School’s Web site or visit the advising office for specific application and admission requirements.

**Graduation Requirements:** 90 credits of graduate coursework (60 must be taken at the UW), and demonstration of proficiency in one or two languages must be completed before taking the General Examination. Please see individual program plans on the School’s Web site for complete graduation requirements.

**Master of Arts, Doctor of Philosophy**

The research-oriented programs lead to the degrees of Master of Arts and Doctor of Philosophy. Areas of specialization are music theory, music history, ethnomusicology, and music education. The Graduate Record Examination is required for application to these graduate programs with the exception of ethnomusicology. Check individual program requirements on the School’s Web site. All graduate students must maintain a GPA of at least 3.00, and a minimum grade of 2.7 in courses used to fulfill School of Music graduation requirements.

**Master of Arts**

**Admission Requirements:** Requirements vary for the different areas of specialization. Details of requirements for each of the areas of specialization are available from the School of Music Advising Office and on its Web site.

**Graduation Requirements:** Degree requirements vary by program. Please see individual program plans on the School’s Web site.

**Doctor of Philosophy**

**Admission Requirements:** Requirements vary for the different areas of specialization. Details of requirements for each of the areas of
specialization are available from the School of Music Advising Office and on the School’s Web site.

**Graduation Requirements:** 90 credits of approved academic coursework, completion of the foreign language requirement as specified for the degree, General Examination and defense of the dissertation. Please refer to the program plans on the School’s Web site for specific degree requirements.

**Faculty**

**Jonathan Bernard**, Professor  
Ph.D., M.Phil., and M.A. degrees at Yale University and an A.B. degree at Harvard College

**Marisol Berrios-Miranda**, Lecturer  
Doctoral and Master's degrees in music (ethnomusicology) from the University of California, Berkeley; a master's degree in music from San Jose State University (Calif.); and a bachelor's degree in music form the University of Puerto Rico.

**John Bishop**, Lecturer

**Geoffrey Boers**, Associate Professor

**George Bozarth**, Professor  
Ph.D. at Princeton University.

**Michael Brockman**,

**J. Melvin Butler**,  
Bachelor of Music degree from the Oberlin Conservatory of Music; Master of Music and Doctor of Musical Arts degrees, Eastman School of Music.

**Phyllis Byrdwell**, Lecturer

**Patricia Campbell**, Professor  
Ph.D., Kent State University; B.F.A. from Ohio University

**Douglas Cleveland**, Lecturer

**Vinson Cole**, Professor

**Tom Collier**, Assistant Professor  
BA/BM in percussion performance, University of Washington 1971

**Dave Cross**, Lecturer

Michael Crusoe, Artist in Residence

**Steven Demorest**, Associate Professor  
Ph.D. in Curriculum and Instruction, University of Wisconsin-Madison; M.M. in Choral Conducting from Westminster Choir College; B.A. in music from Luther College.

**Shannon Dudley**, Associate Professor  
PhD from the University of California at Berkeley

**Joël-François Durand**, Professor  
Ph.D. in Composition (awarded in 1988) at the University of New York, Stony Brook

**Ter Ellingson**, Professor of Music and Adjunct Associate Professor of Anthropology, Comparative Religion, and South Asian Studies. M.A., Religion, University of Chicago; Ph.D., Anthropology/Buddhist Studies, University of Wisconsin.

**Peter Erös**, Professor  
Graduate of the Franz Liszt Music Academy

**Thomas Harper**, Associate Professor

**Nathan Hughes**, Lecturer  
Degrees from the Cleveland Institute of Music, where he studied with John Mack, and The Juilliard School, where he studied with Elaine Douvas

**Don Iimmel**, Associate Professor

**David Kappy**, Professor  
M.M. and B.M. degrees from the University of Wisconsin

**Richard Karpen**, Professor of Music, Director of The Center for Digital Arts and Experimental Media (DXARTS) at the University of Washington.  
Doctorate in composition from Stanford University.

**Philip Kelsey**, Lecturer  
Bachelor's degree, Harvard College; Master's in music theory, Harvard University

**Rhonda Kline**, Lecturer

**Seth Krimsky**, Lecturer  
Bachelor of Music, 1983, University of Southern California

**Barry Lieberman**, Artist in Residence

**Robin McCabe**, Professor  
Bachelor of music, summa cum laude, University of Washington School of Music; Master's and Doctorate degrees at the Juilliard School of Music

**William Mc Coll**, Professor

**Brad McDavid**, Lecturer  
Bachelor’s degree in Music Education, The Ohio State University; Master's of Music degree from Arizona State University; PhD, 1999, in Music Education from Ohio State

**Patricia Michaelian**, Associate Professor  
Steven Morrison, Associate Professor  
B.M., Northwestern University; M.M. from the University of Wisconsin; Ph.D. from Louisiana State University.

**Steven Novacek**, Lecturer  
B.M., California State University at Northridge

**Christopher Olka**, Lecturer

**Juan Pampin**, Assistant Professor of Music Composition  
MA from Conservatoire National Supérieur de Musique de Lyon, France; DMA in Composition from Stanford University

**Joshua Parmenter**, Research Associate  
D.M.A. in Composition, University of Washington, Master of Music in Composition, 2002, University of Washington; Bachelor of Arts in Music, University of California

**Julian Patrick**,  
B.A. from Cincinnati Conservatory of Music

**Ronald Patterson**, Professor

**John Rahn**, Professor of Music Composition and Music Theory, and Professor of Critical Theory at the University of Washington BA, Diploma, MFA, Ph.D

**Juliana Rambaldi**, Lecturer  
BA/BM degree in vocal performance, University of Washington School of Music
Stephen Rumph, Assistant Professor
B.M. in voice, Oberlin Conservatory; M.A. and Ph.D. in musicology, University of California, Berkeley

Toby Saks, Professor of cello

Timothy Salzman, Professor of Music
Bachelor of Music Education, Wheaton College, IL; Master of Music in low brass performance, Northern Illinois University

Philip Schuyler, Associate Professor of Music
M.A. and Ph.D. in Music, University of Wisconsin.

Marc Seales, Professor of Jazz Piano

Craig Sheppard, Professor of Piano
Graduate of the Curtis Institute in Philadelphia and the Juilliard School in New York City

Vern Sielert, Assistant Professor
Bachelor of Music, jazz studies and music education; Master of Music, jazz studies, University of North Texas; D.M.A., University of Illinois.

Felix Skowronek, Professor
BM in Flute Performance from the Curtis Institute of Music in Philadelphia

Phil Sparks, Lecturer

Larry Starr, Professor
Ph.D., University of California, Berkeley

JoAnn Taricani, Associate Professor
Ph.D., University of Pennsylvania

Carole Terry, Professor of Organ and Harpsichord

Diane Thome, Professor
Ph.D. in music, Princeton University; M.F.A. in composition, Princeton University; M.A. in theory and composition, University of Pennsylvania, two undergraduate degrees with distinction in piano and composition from the Eastman School of Music

Judy Tsou,
M.I.L.S., University of Michigan; M.A., Columbia University.

Carol Vaness, Senior Artist in Residence

Allen Vizzutti, Artist in Residence
Bachelor’s and master’s degrees in music, Eastman School of Music; Artist’s Diploma, Eastman School of Music.

Pamela Vokolek, Lecturer
B.A. (Phi Beta Kappa and magna cum laude), University of Washington, in Harp performance; M.M., Cleveland Institute of Music.

Melia Watras, Assistant Professor
Bachelor’s and Master’s, Indiana University.

Regina Yeh, Lecturer

Claudia Zahn, Associate Professor and director of opera programs
BFA with honors, Carnegie-Mellon University School of Drama

Steven Zopfi, Acting Assistant Professor
Doctor of Musical Arts, University of Colorado

---

Course Descriptions

MUSIC 113 Pre-Core Ear Training (0/1, max. 1) VLPA
Pre-core course in musicianship. Offered: ASp.

MUSIC 116 Elementary Music Theory (2) VLPA
For nonmusic majors. For people with no hands-on music experience. Rudiments of music; notation of time, small pitch structures (e.g., some scales, chords, rhythmic patterns), some analysis. Recommended: some music training including ability to read music.

MUSIC 117 Elementary Music Theory (2) VLPA
For nonmusic majors. For students who can read music, having some performance experience. Prerequisite: MUSIC 116.

MUSIC 118 Elementary Music Theory (2) VLPA
For nonmusic majors. For students who read music, have some performance experience, are familiar with scales, chords, intervals. Includes analysis composition in various styles. Prerequisite: MUSIC 117.

MUSIC 119 Introduction to Music Theory and Musicianship (3) VLPA
Basic elements of music theory: introduction to acoustics, major and minor scales, triads and seventh chords, keys, four-part writing, functional harmony, modes, simple forms, and jazz notation. Offered: A.

MUSIC 120 Survey of Music (5) VLPA
Studies in listening, with emphasis on the changing components of Western art music. Illustrated lectures, laboratory section meetings, and presentations by guest artists.

MUSIC 121 The Orchestra (2) VLPA
Development of the orchestra and its literature.

MUSIC 122 The Opera (2) VLPA
An introduction to opera through selected masterworks, from Monteverdi to the present. Primarily for nonmajors.

MUSIC 160 Anglo-American Folk Music (5) VLPA
Genres and styles from earliest roots to the present; Anglo-American ballads, dance music, French and other European immigrant groups.

MUSIC 161 American Musical Theater (5) VLPA
Historical and stylistic study of the development of the American musical theater. European roots in opera and operetta. Contributions from jazz and popular music. Selected musicals studied.

MUSIC 162 American Popular Song (5) VLPA
Historical, social, and stylistic study of popular idioms from the late nineteenth century to the present. Most attention to contemporary idioms (rock, country-western, soul, hip-hop). Various facets of the industry examined to learn how they influence taste and musical style.

MUSIC 185 The Concert Season (2) VLPA
Performances from the School of Music concert season, supplemented by lecture topics related to concert repertoire. Analysis of applicable musical topics appropriate for enhanced appreciation of historical and cultural contexts of works performed. Attendance at ten concerts required.

MUSIC 191 Composition (3, max. 9) VLPA
One-hour private instruction and one-hour laboratory session each week. Intended to develop skill in creative musical expression. For composition majors only.

MUSIC 200 Music, Child, and Family (3) VLPA
MUSIC 201 First-Year Theory I (3) VLPA
Introduction to tonal harmony and counterpoint; triadic progressions in root position; first and second species counterpoint; analysis of simple works. Prerequisite: 2.0 in MUSIC 119; recommended: concurrent registration in MUSIC 204. Offered: W.

MUSIC 202 First-Year Theory II (3) VLPA
Continued instruction in tonal harmony and counterpoint; triadic progressions with inversions; third and fourth species counterpoint; further analysis of basic forms. Prerequisite: 2.0 in MUSIC 201; recommended: concurrent registration in MUSIC 205. Offered: Sp.

MUSIC 203 First-Year Theory III (3) VLPA
Further introduction in tonal harmony and counterpoint; seventh chords; modulations to closely related keys; secondary dominants; introduction to chromaticism; emphasis on analysis and writing of four-part chorales in early 18th century style. Prerequisite: 2.0 in MUSIC 202; recommended: concurrent registration in MUSIC 206. Offered: A.

MUSIC 204 First-Year Ear Training I (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 113; corequisite: MUSIC 201. Offered: W.

MUSIC 205 First-Year Ear Training II (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 204; corequisite: MUSIC 202. Offered: Sp.

MUSIC 206 First-Year Ear Training III (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 205; corequisite: MUSIC 203. Offered: AWSp.

MUSIC 216 Introductory Composition (2) VLPA
For students not majoring in composition. Prerequisite: MUSIC 202.

MUSIC 217 Introductory Composition (2) VLPA
For students not majoring in composition. Prerequisite: MUSIC 216.

MUSIC 218 Introductory Composition (2) VLPA
For students not majoring in composition. Prerequisite: MUSIC 217.

MUSIC 240 Reed-Making Techniques (1, max. 6) VLPA
Applies basic reed-making principles and techniques. Individualized instruction allows students of all levels to take the course simultaneously.

MUSIC 250 World Music (3) I&S/VLPA
Introduction to world musical traditions, including both sound and socio-cultural dimensions of music. Topics include instruments, rhythm, melody, form, composition, improvisation, music in the family and community, politics, economy, religion, and case studies of major world musical traditions. Prerequisite: MUSIC 201; MUSIC 204.

MUSIC 260 Orchestral Music (5) VLPA
Orchestral music from its beginnings in the seventeenth century through recent developments; evolution of the symphony.

MUSIC 261 Mozart (5) VLPA
Introduction to Mozart’s music and to musical life in Habsburg Austria during the Enlightenment. Mozart’s musical personality studied through masterpieces in all genres, with principal emphasis on listening. Ability to read music not required.

MUSIC 262 Introduction to Twentieth-Century Music (3) VLPA
Starr
Listener’s survey of important composers and trends from Debussy through electronic music.

MUSIC 263 Opera (5) VLPA
Contributions of music, text, and staging; study of representative works concentrating on problems of combining these elements into a composite work of art.

MUSIC 264 Sacred Music in the European Tradition (5) VLPA
Surveys European and American sacred music from the 12th to 20th centuries, examining the important role of music in religious worship. Considers the means composers used to make musical works sound the way they do to convey the messages of the texts through music. Offered: jointly with RELIG 264.

MUSIC 270 World Popular Music (5) I&S/VLPA
A global survey of popular music, including Latin America, Africa, Eastern Europe, the Middle East, Asia, and the Pacific. Emphasis on students’ ability to recognize styles and to analyze the social and historical processes that have shaped them.

MUSIC 291 Composition (3, max. 9) VLPA
One-hour private instruction and one-hour laboratory session per week. Prerequisite: MUSIC 191.

MUSIC 300 Fundamentals of Music Technology (3) VLPA
Introduction to the principles of music technology. Exploration of different categories of music software, in terms of their functionality as well as the fundamental basis of these theories. Prerequisite: MUSIC 203 and MUSIC 206.

MUSIC 301 Second-Year Theory (3) VLPA
Further study of modulation and chromatic harmony; analysis of 18th- and 19th-century short forms; technical exercises; model composition. Prerequisite: 2.0 in MUSIC 203; 2.0 in MUSIC 206; corequisite: MUSIC 304; recommended: concurrent registration in MUSIC 304. Offered: W.

MUSIC 302 Second-Year Theory (3) VLPA
More advanced study in mid- to late 19th-century chromaticism and compositional style; analysis of representative works; technical exercises; model composition. Prerequisite: 2.0 in MUSIC 301; 2.0 in MUSIC 304; corequisite: MUSIC 305. Offered: Sp.

MUSIC 303 Second-Year Theory (3) VLPA
Core theory sequence for majors. Introduction to the theory and analysis of 20th-century music. Prerequisite: 2.0 in MUSIC 302; 2.0 in MUSIC 305; corequisite: MUSIC 506. Offered: A.

MUSIC 304 Second-Year Ear-Training I (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 203; 2.0 in MUSIC 206; corequisite: MUSIC 301. Offered: W.

MUSIC 305 Second-Year Ear-Training II (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 301; 2.0 in MUSIC 304; corequisite: MUSIC 302. Offered: Sp.

MUSIC 306 Second-Year Ear-Training III (0/1, max. 1) VLPA
Core ear-training sequence for majors. Prerequisite: 2.0 in MUSIC 302; 2.0 in MUSIC 305; corequisite: MUSIC 303. Offered: A.

MUSIC 307 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in Italian. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 308 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in French. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 309 Diction for Singers (2) VLPA
Application of basic rules of diction, enunciation, and articulation in German. Materials include texts from the basic vocal repertoire. Primarily for the voice majors at freshman and sophomore levels; nonmajors on a space-available basis.

MUSIC 316 Music Cultures of the World (5) I&S/VLPA
Near East, Central Asia, Far East, South and Southeast Asia, Indonesia, and the Philippines. Content varies.

MUSIC 317 Music Cultures of the World (5) I&S/VLPA
Music of Africa, Americas, and Oceania. Content varies.

MUSIC 318 Music Cultures of the World (5) I&S/VLPA
Folk and popular music in western and eastern Europe and the Americas. Content varies.

MUSIC 319 Afro-American Music (5) I&S/VLPA
Centers on Black music in the United States, but also clarifies the relationship of this music to the musics of other Afro-American cultures as well as to their African roots.

MUSIC 326 Repertoire (2) VLPA
For music majors.

MUSIC 327 Repertoire (2) VLPA
For music majors.

MUSIC 328 Repertoire (2) VLPA
For music majors.

MUSIC 331 History of Jazz (5) VLPA
Extensive overview of important musicians, composers, arrangers, and stylistic periods of jazz history from emergence of the first jazz bands at the turn of the 20th century through post-modern bebop era of the 1990s.

MUSIC 332 Music in European Society: Antiquity to 1700 (5) I&S/VLPA
Music and its relationship to aspects of European culture and society-philosophy, politics, social conditions, and the visual arts from antiquity to 1700.

MUSIC 333 Music in Western Culture (5) I&S/VLPA
Music in Europe and North America, drawn from classical, popular, jazz, opera, and musical theatre traditions. Emphasis on the relationship between musical works and their social, philosophical, political, and other contexts.

MUSIC 334 Band Arranging (2) VLPA
Prerequisite: MUSIC 303.

MUSIC 336 Jazz Arranging (2) VLPA
Writing in jazz style for various instrumental combinations. To be able to arrange for modern jazz orchestra. Prerequisite: MUSIC 303.

MUSIC 344 Psychology of Music (3) I&S/VLPA
Human response to musical phenomena, with particular emphasis on perception, learning, measurement, and functional applications.

MUSIC 350 Choral Conducting (1) VLPA
Kaplan
Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 302; corequisite: MUSEN 307.

MUSIC 351 Choral Conducting (1) VLPA
Kaplan
Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 350; corequisite: MUSEN 307.

MUSIC 352 Choral Conducting (1) VLPA
Kaplan
Overview of choral conducting patterns. Score, voice warm-up, and intonation. Tempo fluctuation, left hand, diction, discipline. Designed for music and music education majors. Prerequisite: MUSIC 351; corequisite: MUSEN 307.

MUSIC 356 Cylinders to Platters—A Survey of Recorded Music Since 1888 (3) VLPA
Music as reflected through the influences of the recording industry and the development of related technologies. Examines social and artistic impacts that the recording age has brought to American and European musical cultures. Recommended: MUSIC 120; MUSIC 162.

MUSIC 357 Beginning Jazz Improvisation I (1) VLPA
Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 302.

MUSIC 358 Beginning Jazz Improvisation II (1) VLPA
Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 367.

MUSIC 359 Beginning Jazz Improvisation III (1) VLPA
Beginning jazz improvisation techniques used in the performance of basic jazz styles such as the blues. Primarily for music majors. Prerequisite: MUSIC 368.

MUSIC 370 Junior Recital (1) VLPA
For participants in the Bachelor of Music degree program only.

MUSIC 371 Advanced Piano (2) VLPA
Kaplan
Prerequisite: MUSIC 330.

MUSIC 372 Advanced European Music History (4) VLPA
Kaplan
Western music history covering the Baroque, Classical, and Romantic periods. Prerequisite: MUSIC 220.

MUSIC 374 Jazz Pedagogy (2) VLPA
Salzman
Stylistic and aesthetic developments in the performance of jazz. Key musical ingredients in the evolution of jazz as an art form and the skills commensurate with teaching these. Designed for music majors
MUSIC 390 Special Topics in Music (3, max. 9) (5) VLPA
Starr
Topics vary.

MUSIC 391 Composition (3, max. 9) VLPA
One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 291.

MUSIC 400 Computer Applications to Music (3, max. 9) VLPA
Music workstation applications using microcomputers, music synthesizers, and analog-to-digital converters: music editing and score production, transcription, waveform and spectral analysis, and introduction to programming.

MUSIC 401 Digital Sound Synthesis (5) VLPA
Introduction to software sound synthesis techniques. Includes acoustics and psychoacoustics; virtual synthesizers and unit generators; table-lookup oscillators and wavetable synthesis; additive synthesis; modulation synthesis; ring amplitude, phase and frequency; granular synthesis; noise; subtractive synthesis and filters. Prerequisite: DXARTS 460. Offered: jointly with DXARTS 461; A.

MUSIC 402 Digital Sound Processing (5) VLPA
Introduction to digital sound processing techniques. Includes sampling techniques and time-domain transformation of samples sound; sample-rate conversion; sound granulation and time stretching; delay lines; introduction to digital filtering; FIR and IIR filters; digital effects; reverberation; virtual-room acoustics and dynamic sound location. Prerequisite: DXARTS 461/MUSIC 401. Offered: jointly with DXARTS 462; W.

MUSIC 403 Advanced Digital Sound Synthesis and Processing (5) VLPA
Advanced sound processing and synthesis techniques. Includes sound time warping; analysis-synthesis techniques; linear predictive coding; the phase vocoder; frequency-domain sound transformations; introduction to physical modeling. Prerequisite: DXARTS 462/ MUSIC 402. Offered: jointly with DXARTS 463; S.

MUSIC 405 Liturgies and Hymnology: Practical Applications I (2) VLPA
Butler
Prepares organ majors and other advanced organ students to play hymns in a manner that inspires congregational singing. Includes a study of hymnology as well as instruction on the realization of anthem accompaniments and piano scores at the organ. Prerequisite: MUSIC 302; MUSIC 305; MUHST 212. Offered: A.

MUSIC 406 Liturgies and Hymnology: Practical Applications II (2) VLPA
Butler
Survey of church choir repertoire with emphasis on the smaller choir, choir organization and rehearsal techniques, choral conductor’s preparation, a brief study of choral styles and editions, and choral arranging for the church choir. Prerequisite: either MUSIC 303, MUSIC 306, and MUHST 210, or MUSIC 405. Offered: W.

MUSIC 407 Liturgies and Hymnology: Practical Applications III (2) VLPA
Butler
History of Psalm singing, traditional and contemporary liturgies, plainchant, liturgical use of handbells, “contemporary” repertoire for the church, orchestral instruments and their use in worship (arranging for amateur players, basics of string bowing and editing, organizing instrumental ensembles), youth choir organization. Prerequisite: either MUSIC 303, MUSIC 306, and MUHST 210, or MUSIC 406. Offered: Sp.

MUSIC 410 ElectroAcoustic Music: History and Analysis (3) VLPA
Thome
Examines the music of major electro-acoustic composers. Emphasis on the relationship between technological resources and compositional advances. Addresses issues raised by the diversity of approaches to musical composition; relates particular creative contributions to the historical, cultural, and technological contexts in which they originated. Prerequisite: MUSIC 303; MUSIC 306; MUHST 210. Offered: Sp.

MUSIC 418 Baroque Ornumtation and Improvisation (3) VLPA
Terry
The study of ornamentation and improvisation for keyboard, woodwinds, voice, and strings of selected German, Italian, French, and English repertoire from 1600 to 1800.

MUSIC 420 Organ Improvisation and Service Playing I (2) VLPA
Prepares students to improvise, especially for the church/synagogue service. Includes a brief study of hymnology, hymn elaboration, altered harmonizations, improvisation based on existing hymn tunes, interludes, chorale preludes, ornamented chorales. Prerequisite: MUSIC 303; MUSIC 306. Offered: A.

MUSIC 421 Organ Improvisation and Service Playing II (2) VLPA
Continuation of MUSIC 420. Includes brief review of figured bass and functional harmony, free improvisation in simple antecedent/consequent ABA forms and more complex forms (rondo, theme, and variation), improvising partitas, interludes, improvisations based on plainchant. A survey of important improvisation texts. Prerequisite: MUSIC 420. Offered: W.

MUSIC 422 Organ Improvisation and Service Playing III (2) VLPA
Continuation of MUSIC 421. Advanced improvisation: baroque improvisation techniques, fughettas, baroque praeludias and fantasias, canons, toccatas, duos, trios, and simple fugues. Prerequisite: MUSIC 421. Offered: Sp.

MUSIC 426 Advanced Jazz Arranging (2) VLPA
Brockman
Advanced arranging techniques for jazz ensembles of various sizes, exploring methods employed by Duke Ellington, Gil Evans, and others. Assignments include one original arrangement each for small-combo and full-jazz ensemble. Prerequisite: MUSIC 336. Offered: Sp.

MUSIC 427 Music of Africa (3) I&S/VLPA
Music cultures of Africa, Traditional styles and more recent developments. Open to all students with an interest in the area. Prerequisite: MUSIC 317.

MUSIC 428 Music of North India (3) I&S/VLPA
Classical music of North India, the Hindustani tradition with emphasis on the Dhrupad and Khyal styles. Recommended: ethnomusicology or South Asian studies background.

MUSIC 429 String Orchestral Repertoire (2, max. 18) VLPA
Lieberman Patterson, Saks, Watras
Intended for undergraduate BA/BM and BM music majors. Offered: biannually; AWSp.

MUSIC 430 Organology (3) VLPA
Systematic study of musical instruments, involving the history, acoustical phenomena, and physical topologies of instruments from around the world, with emphasis on non-Western music.

MUSIC 433 Music of Latin America (3) I&S/VLPA
The music of the Spanish-, French-, and Portuguese-speaking New World countries.

MUSIC 434 Pedagogy (2) VLPA
Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 435 Pedagogy (2) VLPA
Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 436 Pedagogy (2) VLPA
Principles of effective studio teaching; survey and evaluation of teaching materials.

MUSIC 438 Problems in Contemporary Music Performance (3, max. 9) VLPA Kappy
An active course examining and solving problems relevant to the successful performance of twentieth-century music. Preparation for complex rhythms, odd groupings, new notation, and extended performing techniques.

MUSIC 439 Music of Indonesia and the Philippines (3) I&S/ VLPA
Includes the traditions of Sumatra, Sunda, Java, Bali, Sunda Islands, and the Philippines. Open to students in music and to students with an interest in the area.

MUSIC 444 Music of the Near East (3) I&S/VLPA
Classical and folk musical traditions of Iran, Turkey, and the Arab world. Prerequisite: MUSIC 316.

MUSIC 445 Selected Topics in Ethnomusicology (3, max. 9) I&S/VLPA
Deals with areas not covered by other courses in ethnomusicology. Content varies with different instructors.

MUSIC 446 Music in American Cultures (3) I&S/VLPA
Compares musical history and experience of selected American cultures that have fed into the American musical mainstream or had significant popularity on its periphery. Case studies may include African Americans, Latino/a Americans, Jewish Americans, Asian Americans, or European Americans. Considerations of social identity as well as musical styles. Offered: jointly with AES 446.

MUSIC 447 Music of Southern India (3) I&S/VLPA
Classical music of South India, the Karnatic tradition, with emphasis on the concert repertoire. Recommended: ethnomusicology or South Asian studies background.

MUSIC 448 Music of China (3) I&S/VLPA
Confucian philosophies that relate to music, theory, scale systems, cosmology. Development of instrumental styles, vocal and dramatic regional forms from early historical periods to the present; recommended: background in either ethnomusicology or East Asian Studies. Recommended: ethnomusicology or East Asian studies background.

MUSIC 449 Advanced Piano Repertoire (2, max. 6) VLPA McCabe, Michaelian, Sheppard
For piano majors who wish an in-depth survey of major areas of the piano repertoire. Prerequisite: MUSIC 328. Offered: AWSp.

MUSIC 450 Percussion Education Institute (2) VLPA Collier, Crusoe
Intensive four-week institute focusing on techniques in percussion, timpani, and mallet performance. Intended for music educators with little or no percussion experience desiring additional training to enhance their careers as music teachers. Includes private instruction, master classes, and percussion ensemble participation. Prerequisite: MUSAP 217.

MUSIC 451 Summer Jazz Institute (1) VLPA Brockman, Collier, Seales
Intensive one-week institute designed for the serious jazz student as well as for music educators. Six hours of daily instruction in jazz theory, ear-training, improvisation, arranging, as well as emphasis on rehearsal and performance techniques through sectional workshops and small group “jam sessions.”

MUSIC 454 Organ Pedagogy (3) VLPA Terry
Pedagogical approaches to organ techniques and performance practice, provides opportunity for practical application by means of student teaching.

MUSIC 455 Choral Arranging (3) VLPA
Primarily for choral conductors who need to modify, arrange or compose material to suit the capabilities of specific choral groups and performance situations.

MUSIC 458 Organ Repertoire: Middle Ages through Baroque (3) VLPA Terry
Analysis and performance practices of organ literature, Middle Ages through baroque period. Development of the organ as musical instrument. Prerequisite: either MUHST 400, MUHST 401, MUHST 402, MUHST 403, MUHST 406, or MUHST 407.

MUSIC 459 Organ Repertoire: Bach to Present (3) VLPA Terry
Analysis and performance practices of organ literature, classical period through the twentieth century. Development of the organ as a musical instrument. Prerequisite: either MUHST 408, MUHST 409, MUHST 410, MUHST 411, MUHST 412, MUHST 413, MUHST 414, MUHST 415, MUHST 417, MUHST 418, MUHST 419, MUHST 423, MUHST 424, or MUHST 426.

MUSIC 460 Advanced Vocal Repertoire: Pre-Nineteenth-Century Art Songs (2, max. 6) VLPA
Professional preparation of pre-nineteenth-century songs with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 328.

MUSIC 461 Advanced Vocal Repertoire: Nineteenth-Century Art Songs (2, max. 6) VLPA
Professional preparation of works from the literature of nineteenth-century German lieder, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 460.

MUSIC 462 Advanced Vocal Repertoire: Twentieth-Century Art Songs (2, max. 6) VLPA
Preparation of works from the twentieth-century repertoire of French, German, Italian, Spanish, and English songs, with a view to total artistic-musical realization in performance. Appropriate style, character, balance, phrasing, diction, and projection for vocalists and pianists. Prerequisite: MUSIC 461.

MUSIC 464 Jazz Laboratory (1, max. 9) VLPA Seales
Forum for testing new technical skills, improvisational techniques, and jazz compositions and/or arrangements in a formal laboratory setting.

MUSIC 465 Acting for Singers (2, max. 6) VLPA
Workshop designed specifically for the singing actor, focusing on character analysis, movement, and audition department skills.

MUSIC 467 Advanced Jazz Improvisation I (1) VLPA Collier, Seales
Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 369.

MUSIC 468 Advanced Jazz Improvisation II (1) VLPA
Collier, Seales
Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 467.

MUSIC 469 Advanced Jazz Improvisation III (1) VLPA
Collier, Seales
Performance techniques in jazz improvisation for the advanced student. Prerequisite: MUSIC 468.

MUSIC 470 Analysis of Tonal Music: Introduction to Schenker (3) VLPA
Bernard, Kopp, Bahn
Introduction to the theories of Heinrich Schenker and their subsequent development; analysis of music from the common-practice period (1700-1900), with possible excursions into the twentieth century. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

MUSIC 471 Introduction to Atonal Theory and Analysis (3) VLPA
Bernard, Bahn
Theory of atonal music, including the “classical” twelve-tone repertoire. Analysis of works by Schoenberg, Berg, Webern, and others. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

MUSIC 472 Analysis of Twentieth Century Music, 1900-1950 (3, max. 6) VLPA
Bernard, Durand, Karpen, Kopp, Rahn, Thome
Analytical examination of musical works of the first half of the twentieth century in Europe and the United States, with emphasis on music other than that of the second Viennese school. Prerequisite: either MUSIC 303 and MUHST 212 or MUSIC 312 and MUHST 215.

MUSIC 473 Keyboard Harmony and Transposition (3) VLPA
Terry
Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: either MUSIC 363 and MUHST 212 or MUSIC 312 and MUHST 215. Offered: alternate years.

MUSIC 474 Keyboard Harmony and Transposition (3) VLPA
Terry
Keyboard harmonization from the baroque period to present; transposition of vocal and instrumental pieces to different pitch levels. Prerequisite: MUSIC 473. Offered: alternate years.

MUSIC 475 Figured Bass Realization (3) VLPA
Terry
Various styles of continuo realization for keyboardists, emphasizing Bach cantatas, Haydn symphonies, and Mozart operas. Prerequisite: MUSIC 474. Offered: alternate years.

MUSIC 476 Advanced Vocal Repertoire: Seventeenth and Eighteenth Centuries (2) VLPA
Opera repertoire, 1600 to the Bel Canto era (Bellini, Rossini, Donizetti); style, traditions, embellishments in Italian, French, and German arias. Prerequisite: MUSIC 328.

MUSIC 477 Advanced Vocal Repertoire: Nineteenth Century (2) VLPA
Opera repertoire, the post Bel Canto era through Verdi, Puccini and verismo, and significant German, French, and Slavic repertoire. Prerequisite: MUSIC 476.

MUSIC 478 Advanced Vocal Repertoire: Twentieth Century (2) VLPA
Opera repertoire, twentieth-century opera literature (Barber, Menotti, Bartok, Dvorak); understanding of style, character and overall artistic and musical needs of the present. Prerequisite: MUSIC 477.

MUSIC 479 Senior Recital (1) VLPA

MUSIC 480 The Anthropology of Music (3) I&S/VLPA
Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation. e.g., evolutionist, diffusionist, historical particularist, structuralist, functionalist, symbolist, and semiotic, through detailed examination of seminal texts. Offered: jointly with ANTH 430.

MUSIC 481 Choral Repertoire: Sixteenth and Seventeenth Centuries (3) VLPA
Sacred and secular choral literature from the Renaissance through the early baroque, covering Europe and England. Various genres and styles of major composers, including performance practice, rehearsals, and conducting.

MUSIC 482 Choral Repertoire: Eighteenth Century (3) VLPA
Sacred and secular choral literature of the baroque, covering mainland Europe and England. Choral works of Bach, his predecessors, and contemporaries. Stylistic analysis and study of performance practice.

MUSIC 483 Choral Repertoire: Nineteenth Century (3) VLPA
Sacred and secular choral literature of the nineteenth century, covering mainland Europe and England. Analysis of accompanied and a cappella choral works by major composers with implications for conducting and programming of literature.

MUSIC 484 Choral Repertoire: Twentieth Century (3) VLPA
Choral literature of the twentieth century, covering America, England, and mainland Europe. Various genres and styles, including score study and teaching strategies.

MUSIC 487 Tonal Counterpoint (3) VLPA
Bernard, Durand, Kopp, Rahn
Introduction to tonal counterpoint through exercises in analysis and composition, focusing on 18th-century styles. Study of melody principles of counterpoint in two and three voices, dance forms, inventions, fugue. Prerequisite: either MUSIC 311 or MUSIC 202.

MUSIC 489 Special Topics in Music Theory (3, max. 9) VLPA
Prerequisite: either MUSIC 303 and MUHST 210 or MUSIC 312 and MUHST 314.

MUSIC 490 Orchestration (3) VLPA
Study of the instruments of the orchestra and practical experience in combining them; to enable the student to score for various instrumental combinations. Ideally to be taken before band arranging or jazz arranging, but is not a prerequisite.

MUSIC 491 Composition (3, max. 18) VLPA
One-hour private instruction and one-hour laboratory session each week. Prerequisite: MUSIC 391.

MUSIC 492 Opera Direction and Production (4) VLPA
Practical experience with problems of the theater.

MUSIC 493 Opera Direction and Production (4) VLPA
Practical experience with problems of the theater. Prerequisite: MUSIC 492.

MUSIC 495 Music of Japan (3) I&S/VLPA
Survey of major Japanese musical traditions. Open to students in music and East Asian area studies. Prerequisite: MUSIC 316.
MUSIC 498 Senior Thesis (3-, max. 9) VLPA
Design and completion of an individual research project and writing of a thesis under supervision of a faculty member.

MUSIC 499 Undergraduate Research (*, max. 6)

MUSIC 511 Seminar in Field and Laboratory Methods (3)
Methodology of field research in ethnomusicology along with practical experience. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 512 Seminar in Ethnomusicology (3, max. 18)
Deals with advanced theoretical and methodological problems in ethnomusicology, and with the relationship of ethnomusicology to allied disciplines. Prerequisite: graduate student standing in ethnomusicology or permission of instructor.

MUSIC 520 Music in Higher Education (3)
Morrison
Philosophical and practical issues surrounding music within the context of higher education. Topics include mission and structure of music programs, development of teaching expertise, teacher/student evaluation, academic freedom, and job opportunities. Appropriate for all graduate music students and does not require background in teaching or education.

MUSIC 523 Seminar in Music and Socialization (3, max. 9)
Lundquist
The socialization process and music, including the interaction whereby music culture is learned. Prerequisite: MUSIC 345 or MUSIC 545 or permission of instructor.

MUSIC 526 History of Theory (3)
Ancient, medieval, early Renaissance.

MUSIC 527 History of Theory (3)
Renaissance, baroque, early classic.

MUSIC 528 History of Theory (3)
Classic, romantic, twentieth century.

MUSIC 530 Seminar in Music Cognition (3, max. 9)
Study of research literature in cognition and music cognition, particularly as it relates to nonverbal musical experience. Prerequisite: MUSIC 344 or MUSIC 544 or permission of instructor.

MUSIC 531 Proseminar in Ethnomusicology (3)
Theoretical and methodological issues in ethnomusicology based on historical and contemporary major writings. Critical evaluations of works with a broad view toward developing ethnomusicological research. Prerequisite: permission of instructor.

MUSIC 532 Seminar in Ethnomusicology (3)
Study of key ethnomusicological literature on the music cultures of Asia. Meets with MUSIC 316. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 533 Preceptorial Readings in Ethnomusicology (5)
Significant ethnomusicological literature on the music cultures of Africa, the Americas, and Oceania. Meets with MUSIC 317. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 534 Preceptorial Readings in Ethnomusicology (5)
Significant ethnomusicological literature on the music cultures of Europe and North America. Meets with MUSIC 318. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 536 Transcription and Analysis (3)
Study of the methodological principles of transcription and analysis, together with practical exercises in developing transcription skills. Prerequisite: graduate student standing in ethnomusicology and permission of instructor.

MUSIC 544 Music Perception and Cognition (3, max. 9)
Examines the systematic research literature on the cognitive operations involved in musical performance, composition, and listening. Topics include: the mental representation of musical concepts, communication of expressiveness in music, memory for music, processing of tonal and nontonal music; computer models of music cognition; melodic and rhythmic development; composition and improvisation.

MUSIC 551 Practicum in Music Instruction (3, max. 9)
Practical application and validation of results of investigation in curriculum, music teaching and learning, performance and theoretical studies. Prerequisite: teaching experience or permission of instructor.

MUSIC 552 Seminar in Music and Socialization (3, max. 9)
Lundquist
The socialization process and music, including the interaction whereby music culture is learned. Prerequisite: MUSIC 345 or MUSIC 545 or permission of instructor.

MUSIC 553 Advanced Choral Techniques (2, max. 18)
Practical application of technique and pedagogy related to choral music. Surveys major choral repertoire. Concurrent enrollment in MUSIC 583 required.

MUSIC 559 Master’s Recital (3, max. 6)
Public performance for students in the Master of Music degree program. Prerequisite: permission of instructor and Master of Music program standing.

MUSIC 560 Seminar in Schenkerian Analysis (3, max. 9)
Bernard, Kopp, Rahn
Advanced work in Schenkerian analysis. Prerequisite: MUSIC 470.

MUSIC 570 Seminar in Serialism (3, max. 9)
Bernard, Kopp, Rahn
Advanced theoretical and analytical work in serialism and other nontonal systems. Prerequisite: MUSIC 471 or equivalent.

MUSIC 571 Seminar in Schenkerian Analysis (3, max. 9)
Bernard, Kopp, Rahn
Advanced work in Schenkerian analysis. Prerequisite: MUSIC 470.

MUSIC 572 Advanced Topics in Computer Music (3)
Karpen, Rahn
Topics vary. Offered: AWSpS.

MUSIC 573 Seminar in Tonal Analysis (3, max. 9)
Karpen, Rahn
Modern theoretical and analytical methods appropriate to study of western music of the eighteenth and nineteenth centuries, conceived independently of or in response to the work of Heinrich Schenker. Prerequisite: MUSIC 470 or permission of instructor.

MUSIC 574 Analysis of Twentieth-Century Music: 1950 — Present (3)
Bernard, Durand, Karpen, Kopp, Rahn, Thome
Analytical examination of major works of second half of twentieth century. Prerequisite: MUSIC 471 and MUSIC 472 or permission of instructor.

MUSIC 575 Seminar in Theory (3, max. 18)
Bernard, Kopp, Rahn
Development and discussion of current student and faculty research in compositional/analytical theory and metatheory.

MUSIC 576 Critical Theory of Music (3, max. 18)
Philosophical foundations of the criticism of music, including relevant contemporary thought in the criticism of literature and the other arts.

MUSIC 577 Composers of the Twentieth Century (3, max. 9)
Bernard, Durand, Karpen, Kopp, Rahn, Thome
Analytical examination of the work of a major composer of the twentieth century. Prerequisite: MUSIC 574 or permission of instructor.

**MUSIC 580 Advanced Conducting (3, max. 9)**
*Eros, Salzman*

**MUSIC 581 Advanced Conducting (3, max. 9)**
*Eros, Salzman*

**MUSIC 582 Advanced Conducting (3, max. 9)**
*Eros, Salzman*

**MUSIC 583 Advanced Choral Conducting (2, max. 18)**
*Kaplan*

**MUSIC 590 Keyboard and Doctoral Lecture Recital or Concerto Recital (6, max. 18)**
Lecture recital or Concerto recital for students in the Doctor of Musical Arts in Piano Performance, in Harpsichord Performance, and in Organ Performance degree programs.

**MUSIC 591 Graduate Composition (*, max. 30)**
*Bernard, Durand, Karpen, Rahn, Thome*

**MUSIC 599 Advanced Selected Topics (1-3, max. 27)**
Selected readings on current issues and problems in music. Prerequisite: permission of a supervising music faculty member.

**MUSIC 600 Independent Study or Research (*)**

**MUSIC 700 Master’s Thesis (*)**

**MUSIC 800 Doctoral Dissertation (*)**

**Music - Applied**

*Course Descriptions*

**MUSAP 133 Basic Keyboard (2) VLPA**
Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSIC 116.

**MUSAP 134 Basic Keyboard (2) VLPA**
Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSAP 133.

**MUSAP 135 Basic Keyboard (2) VLPA**
Keyboard harmony and simple keyboard pieces. Class instruction. Audition required. Prerequisite: MUSAP 134.

**MUSAP 136 Basic Jazz Keyboard (2, max. 6) VLPA**
*Seales*
Basics of jazz and pop chord voicings, reading lead sheets, basic accompanying in various jazz and pop styles. Audition required.

**MUSAP 137 Class Instruction: Voice (1) VLPA**
Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required.

**MUSAP 138 Class Instruction: Voice (1) VLPA**
Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required. Prerequisite: MUSAP 137.

**MUSAP 139 Class Instruction: Voice (1) VLPA**
Basic fundamentals of good singing: breathing, diction, voice focus. Materials include mainly early Italian art songs, some English and French songs. Audition required. Prerequisite: MUSAP 139.

**MUSAP 205 String Techniques (2, max. 12) VLPA**
Designed to prepare music education students to teach beginning and intermediate strings in the public schools.

**MUSAP 210 Wind Techniques (2, max. 12) VLPA**
Designed to prepare music education students to teach beginning and intermediate woodwinds and brass in the public schools.

**MUSAP 217 Percussion Techniques (2, max. 4) VLPA Collier**
The study of basic percussion techniques as they apply to music in the public schools. Acquaints the prospective music education major with percussion performance and teaching techniques.

**MUSAP 218 Guitar Techniques (2, max. 4) VLPA Novacek**
Includes exercises to develop a good basic technique emphasizing correct position and movement of both hands, basic folk song accompaniments including a variety of strums, finger picking patterns, hammering on and bass runs, reading guitar music, classical pieces, special effects, and access to other styles. Offered: W.

**MUSAP 233 Secondary Piano (2) VLPA**
Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 135.

**MUSAP 234 Secondary Piano (2) VLPA**
Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 233.

**MUSAP 235 Secondary Piano (2) VLPA**
Focus is on advanced keyboard skills and piano repertoire. Audition required. Prerequisite: MUSAP 235.

**MUSAP 237 Secondary Class Instruction: Voice (2, max. 6) VLPA**
Continuation of basic fundamentals of good singing: breathing, diction, voice focus and repertoire. Designed for students not yet prepared for private instruction. Audition required. Prerequisite: MUSAP 139.

**MUSAP 239 Secondary Piano (2, max. 8) VLPA**

**MUSAP 300 Private instruction: Voice (2-3, max. 45) VLPA Harper, Patrick**
Intended for undergraduate non-majors. Audition required.

**MUSAP 301 Private Instruction: Piano (2-3, max. 45) VLPA McCabe, Michaelian, Seales, Sheppard**
Intended for undergraduate non-majors. Audition required.

**MUSAP 302 Private Instruction: Organ (2-3, max. 45) VLPA Terry**
Terry
Intended for undergraduate non-majors. Audition required.

**MUSAP 303 Private Instruction: Harpsichord (2-3, max. 45) VLPA Terry**
Terry
Intended for undergraduate non-majors. Audition required.

**MUSAP 304 Private Instruction: Violin (2-3, max. 45) VLPA**
Intended for undergraduate non-majors. Audition required.

**MUSAP 305 Private Instruction: Violoncello (2-3, max. 45) VLPA Saks**
Saks
Intended for undergraduate non-majors. Audition required.

**MUSAP 306 Private Instruction: Double Bass (2-3, max. 45) VLPA Lieberman**
Lieberman
Intended for undergraduate non-majors. Audition required.

**MUSAP 307 Private Instruction: Flute (2-3, max. 45) VLPA Skowronek**
Skowronek
Intended for undergraduate non-majors. Audition required.

MUSAP 308 Private Instruction: Oboe (2-3, max. 45) VLPA
Intended for undergraduate non-majors. Audition required.

MUSAP 309 Private Instruction: Clarinet (2-3, max. 45) VLPA
McColl
Intended for undergraduate non-majors. Audition required.

MUSAP 310 Private Instruction: Bassoon (2-3, max. 45) VLPA
Grossman
Intended for undergraduate non-majors. Audition required.

MUSAP 311 Private Instruction: Saxophone (2-3, max. 45) VLPA
Brockman
Intended for undergraduate non-majors. Audition required.

MUSAP 312 Private Instruction: Horn (2-3, max. 45) VLPA
Kappy
Intended for undergraduate non-majors. Audition required.

MUSAP 313 Private Instruction: Trumpet (2-3, max. 45) VLPA
Intended for undergraduate non-majors. Audition required.

MUSAP 314 Private Instruction: Trombone (2-3, max. 45) VLPA
Immel
Intended for undergraduate non-majors. Audition required.

MUSAP 315 Private Instruction: Tuba (2-3, max. 45) VLPA
Phillips
Intended for undergraduate non-majors. Audition required.

MUSAP 316 Private Instruction: Harp (2-3, max. 45) VLPA
Vokolek
Intended for undergraduate non-majors. Audition required.

MUSAP 317 Private Instruction: Percussion (2-3, max. 45) VLPA
Collier, Crusoe
Intended for undergraduate non-majors. Audition required.

MUSAP 318 Private Instruction: Guitar (2-3, max. 45) VLPA
Novacek
Intended for undergraduate non-majors. Audition required.

MUSAP 319 Private Instruction: Viola da Gamba (2-3, max. 45) VLPA
Tindemans
Intended for undergraduate non-majors. Audition required.

MUSAP 320 Private Instruction: Voice (2-3, max. 27) VLPA
Harper, Patrick
Intended for undergraduate majors. Audition required.

MUSAP 321 Private Instruction: Piano (2-3, max. 27) VLPA
McCabe, Michaelian, Seales, Sheppard
Intended for undergraduate majors. Audition required.

MUSAP 322 Private Instruction: Organ (2-3, max. 27) VLPA
Terry
Intended for undergraduate majors. Audition required.

MUSAP 323 Private Instruction: Harpsichord (2-3, max. 27) VLPA
Terry
Intended for undergraduate majors. Audition required.

MUSAP 324 Private Instruction: Violin (2-3, max. 27) VLPA
Callus, Patterson
Intended for undergraduate majors. Audition required.

MUSAP 325 Private Instruction: Violoncello (2-3, max. 27) VLPA
Saks

Intended for undergraduate majors. Audition required.

MUSAP 326 Private Instruction: Double Bass (2-3, max. 27) VLPA
Lieberman
Intended for undergraduate majors. Audition required.

MUSAP 327 Private Instruction: Flute (2-3, max. 27) VLPA
Skowronek
Intended for undergraduate majors. Audition required.

MUSAP 328 Private Instruction: Oboe (2-3, max. 27) VLPA
Intended for undergraduate majors. Audition required.

MUSAP 329 Private Instruction: Clarinet (2-3, max. 27) VLPA
McColl
Intended for undergraduate majors. Audition required.

MUSAP 330 Private Instruction: Bassoon (2-3, max. 27) VLPA
Grossman
Intended for undergraduate majors. Audition required.

MUSAP 331 Private Instruction: Saxophone (2-3, max. 27) VLPA
Brockman
Intended for undergraduate majors. Audition required.

MUSAP 332 Private Instruction: Horn (2-3, max. 27) VLPA
Kappy
Intended for undergraduate majors. Audition required.

MUSAP 333 Private Instruction: Trumpet (2-3, max. 27) VLPA
Intended for undergraduate majors. Audition required.

MUSAP 334 Private Instruction: Trombone (2-3, max. 27) VLPA
Immel
Intended for undergraduate majors. Audition required.

MUSAP 335 Private Instruction: Tuba (2-3, max. 27) VLPA
Phillips
Intended for undergraduate majors. Audition required.

MUSAP 336 Private Instruction: Harp (2-3, max. 27) VLPA
Vokolek
Intended for undergraduate majors. Audition required.

MUSAP 337 Private Instruction: Percussion (2-3, max. 27) VLPA
Collier, Crusoe
Intended for undergraduate majors. Audition required.

MUSAP 338 Private Instruction: Guitar (2-3, max. 27) VLPA
Novacek
Intended for undergraduate majors. Audition required.

MUSAP 339 Private Instruction: Viola da Gamba (2-3, max. 27) VLPA
Tindemans
Intended for undergraduate majors. Audition required.

MUSAP 340 Timpani (2-3, max. 27) VLPA
Crusoe
Intended for undergraduate majors. Audition required.

MUSAP 341 Mallet Percussion (2-3, max. 27) VLPA
Collier
Intended for undergraduate majors. Audition required.

MUSAP 343 Private Instruction: Viola (2-3, max. 45) VLPA
Intended for undergraduate non-majors. Audition required.

MUSAP 363 Private Instruction: Viola (2-3, max. 27) VLPA
Tindemans
Intended for undergraduate majors. Audition required.

MUSAP 389 World Music (2-3, max. 18) I&S/VLPA
World music traditions taught by visiting native artists. Consult
ethnomusicology staff for current offerings. Intended for undergraduate majors. Audition required. Credit/no credit only.

MUSAP 420 Private Instruction: Voice (2-3, max. 27) VLPA
Harper, Patrick
Intended for undergraduate majors. Audition required.

MUSAP 421 Private Instruction: Piano (2-3, max. 27) VLPA
McCabe, Michaelian, Seales, Sheppard
Intended for undergraduate majors. Audition required.

MUSAP 422 Private Instruction: Organ (2-3, max. 27) VLPA
Terry
Intended for undergraduate majors. Audition required.

MUSAP 423 Private Instruction: Harpsichord (2-3, max. 27) VLPA
Terry
Intended for undergraduate majors. Audition required.

MUSAP 424 Private Instruction: Violin (2-3, max. 27) VLPA
Callus, Patterson
Intended for undergraduate majors. Audition required.

MUSAP 425 Private Instruction: Violoncello (2-3, max. 27) VLPA
Saks
Intended for undergraduate majors. Audition required.

MUSAP 426 Private Instruction: Double Bass (2-3, max. 27) VLPA
Lieberman
Intended for undergraduate majors. Audition required.

MUSAP 427 Private Instruction: Flute (2-3, max. 27) VLPA
Skowronek
Intended for undergraduate majors. Audition required.

MUSAP 428 Private Instruction: Oboe (2-3, max. 27) VLPA
Intended for undergraduate majors. Audition required.

MUSAP 429 Private Instruction: Clarinet (2-3, max. 27) VLPA
McColl
Intended for undergraduate majors. Audition required.

MUSAP 430 Private Instruction: Bassoon (2-3, max. 27) VLPA
Grossman
Intended for undergraduate majors. Audition required.

MUSAP 431 Private Instruction: Saxophone (2-3, max. 27) VLPA
Brockman
Intended for undergraduate majors. Audition required.

MUSAP 432 Private Instruction: Horn (2-3, max. 27) VLPA
Kappy
Intended for undergraduate majors. Audition required.

MUSAP 433 Private Instruction: Trumpet (2-3, max. 27) VLPA
Intended for undergraduate majors. Audition required.

MUSAP 434 Private Instruction: Trombone (2-3, max. 27) VLPA
Immel
Intended for undergraduate majors. Audition required.

MUSAP 435 Private Instruction: Tuba (2-3, max. 27) VLPA
Phillips
Intended for undergraduate majors. Audition required.

MUSAP 436 Private Instruction: Harp (2-3, max. 27) VLPA
Vokolek
Intended for undergraduate majors. Audition required.

MUSAP 437 Private Instruction: Percussion (2-3, max. 27) VLPA
Collier, Crusoe
Intended for undergraduate majors. Audition required.

MUSAP 438 Private Instruction: Guitar (2-3, max. 27) VLPA
Novacek
Intended for undergraduate majors. Audition required.

MUSAP 439 Private Instruction: Viola da Gamba (2-3, max. 27) VLPA
Tindemans
Intended for undergraduate majors. Audition required.

MUSAP 440 Timpani (2-3, max. 27) VLPA
Crusoe
Intended for undergraduate majors. Audition required.

MUSAP 441 Mallet Percussion (2-3, max. 27) VLPA
Collier
Intended for undergraduate majors. Audition required.

MUSAP 442 Jazz and Non-Western Drumming Techniques (2/3, max. 18) VLPA
Collier
Focused study of American jazz drumming and/or hand drumming techniques of various world music cultures to broaden the skills of percussion students, preparing them for new demands of contemporary musical styles. Designed primarily for music undergraduates enrolled in the percussion program. Audition required.

MUSAP 463 Private Instruction: Viola (2-3, max. 27) VLPA
Intended for undergraduate majors. Audition required.

MUSAP 500 Private Instruction: Voice (2-3, max. 45) Harper, Patrick
Intended for graduate non-majors. Audition required.

MUSAP 501 Private Instruction: Piano (2-3, max. 45) McCabe, Michaelian, Seales, Sheppard
Intended for graduate non-majors. Audition required.

MUSAP 502 Private Instruction: Organ (2-3, max. 45) Terry
Intended for graduate non-majors. Audition required.

MUSAP 503 Private Instruction: Harpsichord (2-3, max. 45) Terry
Intended for graduate non-majors. Audition required.

MUSAP 504 Private Instruction: Violin (2-3, max. 45) Intended for graduate non-majors. Audition required.

MUSAP 505 Private Instruction: Violoncello (2-3, max. 45) Saks
Intended for graduate non-majors. Audition required.

MUSAP 506 Private Instruction: Double Bass (2-3, max. 45) Lieberman
Intended for graduate non-majors. Audition required.

MUSAP 507 Private Instruction: Flute (2-3, max. 45) Skowronek
Intended for graduate non-majors. Audition required.

MUSAP 508 Private Instruction: Oboe (2-3, max. 45) Intended for graduate non-majors. Audition required.

MUSAP 509 Private Instruction: Clarinet (2-3, max. 45) McCall
Intended for graduate non-majors. Audition required.

MUSAP 510 Private Instruction: Bassoon (2-3, max. 45)
MUSAP 511 Private Instruction: Saxophone (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 512 Private Instruction: Horn (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 513 Private Instruction: Trumpet (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 514 Private Instruction: Trombone (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 515 Private Instruction: Tuba (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 516 Private Instruction: Harp (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 517 Private Instruction: Percussion (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 518 Private Instruction: Guitar (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 519 Private Instruction: Viola da Gamba (2-3, max. 45)
Intended for graduate non-majors. Audition required.

MUSAP 520 Private Instruction: Voice (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 521 Private Instruction: Piano (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 522 Private Instruction: Organ (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 523 Private Instruction: Harpsichord (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 524 Private Instruction: Violin (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 525 Private Instruction: Violoncello (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 526 Private Instruction: Double Bass (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 527 Private Instruction: Flute (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 528 Private Instruction: Oboe (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 529 Private Instruction: Clarinet (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 530 Private Instruction: Bassoon (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 531 Private Instruction: Saxophone (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 532 Private Instruction: Horn (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 533 Private Instruction: Trumpet (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 534 Private Instruction: Trombone (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 535 Private Instruction: Tuba (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 536 Private Instruction: Harp (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 537 Private Instruction: Percussion (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 538 Private Instruction: Guitar (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 539 Private Instruction: Viola da Gamba (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 540 Private Instruction: Viola (2-3, max. 45)
Intended for graduate non-majors. Audition required. Offered: AWSpS.

MUSAP 541 Mallet Percussion (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 542 Private Instruction: Viola da Gamba (3, max. 18)
Intended for graduate majors. Audition required.

MUSAP 543 Private Instruction: Viola (2-3, max. 45)
Intended for graduate non-majors. Audition required. Offered: AWSpS.

MUSAP 544 Private Instruction: Violin (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 545 Private Instruction: Piano (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 546 Private Instruction: Organ (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 547 Private Instruction: Harpsichord (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 548 Private Instruction: Double Bass (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 549 Private Instruction: Flute (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 550 Private Instruction: Oboe (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 551 Private Instruction: Clarinet (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 552 Private Instruction: Bassoon (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 553 Private Instruction: Saxophone (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 554 Private Instruction: Horn (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 555 Private Instruction: Trumpet (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 556 Private Instruction: Trombone (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 557 Private Instruction: Tuba (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 558 Private Instruction: Harp (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 559 Private Instruction: Percussion (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 560 Private Instruction: Guitar (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 561 Private Instruction: Viola da Gamba (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 562 Private Instruction: Viola (2-3, max. 45)
Intended for graduate non-majors. Audition required. Offered: AWSpS.

MUSAP 563 Private Instruction: Violin (2-3, max. 45)
Intended for Master’s degree candidates. Audition required. Offered: AWSpS.

MUSAP 564 Private Instruction: Piano (2-3, max. 45)
Intended for graduate majors. Audition required.

MUSAP 565 Private Instruction: Organ (2-3, max. 45)
Intended for graduate majors. Audition required.

MUSAP 566 Private Instruction: Harpsichord (2-3, max. 45)
Intended for graduate majors. Audition required.

MUSAP 567 Private Instruction: Double Bass (2-3, max. 45)
Intended for graduate majors. Audition required.
AWSpS.

MUSAP 593 Private Instruction: Viola (2-3, max. 45)
Intended for graduate majors. Audition required.

Tindemans

MUSAP 592 Private Instruction: Viola da Gamba (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 577 Private Instruction: Flute (3, max. 27)
Skowronek
Intended for graduate majors. Audition required.

MUSAP 578 Private Instruction: Oboe (3, max. 27)
Intended for graduate majors. Audition required.

MUSAP 579 Private Instruction: Clarinet (3, max. 27)
McCull
Intended for graduate majors. Audition required.

MUSAP 580 Private Instruction: Bassoon (3, max. 27)
Grossman
Intended for graduate majors. Audition required.

MUSAP 581 Private Instruction: Saxophone (3, max. 27)
Brockman
Intended for graduate majors. Audition required.

MUSAP 582 Private Instruction: Horn (3, max. 27) Kappy
Intended for graduate majors. Audition required.

MUSAP 583 Private Instruction: Trumpet (3, max. 27)
Lieberman
Intended for graduate majors. Audition required.

MUSAP 584 Private Instruction: Trombone (3, max. 27) Immel
Intended for graduate majors. Audition required.

MUSAP 585 Private Instruction: Tuba (3, max. 27) Phillips
Intended for graduate majors. Audition required.

MUSAP 586 Private Instruction: Harp (3, max. 27) Vokolek
Intended for graduate majors. Audition required.

MUSAP 587 Private Instruction: Percussion (3, max. 27)
Collier, Crusoe
Intended for graduate majors. Audition required.

MUSAP 588 Private Instruction: Guitar (3, max. 27) Novacek

MUSAP 589 World Music Laboratory (2-3, max. 18)
World music traditions taught by visiting artists with emphasis on cultural pedagogy and traditional theory. The particular culture studied changes from year to year. Required of all graduate students in ethnomusicology. Credit/no credit only. Audition required.

MUSAP 590 Timpani (3, max. 27) Crusoe
Intended for graduate majors. Audition required.

MUSAP 591 Mallet Percussion (3, max. 27) Collier
Intended for graduate majors. Audition required.

MUSAP 592 Private Instruction: Viola da Gamba (3, max. 27)
Tindemans
Intended for graduate majors. Audition required.

MUSAP 593 Private Instruction: Viola (2-3, max. 45)
Intended for Doctoral degree candidates. Audition required. Offered: AWSpS.
MUSED 405 Marching Band Technique (2) VLPA McDavid, Morrison, Salzman
Basics of marching and maneuvering discussed and used to write drill. Covers selection of music, use of marching procession, and show design. Students complete a drill for their own band or for an instrumentation determined by the instructor.

MUSED 410 Instrumental Rehearsal Techniques (3) VLPA Salzman
Includes score preparation, rehearsal formats, and error detection.

MUSED 431 Curriculum in Music Education (3) VLPA Campbell, Demorest, Morrison
Principles and practices of curriculum design applied to the development of the music curriculum. Individual or group work on elementary and secondary school music curriculum projects.

MUSED 432 Comprehensive Music in the Secondary School (3) VLPA Demorest
The teaching of music and its literature in music classes other than traditional ensembles from grade six through adults. Prerequisite: MUSED 340.

MUSED 440 Music for Children (3) VLPA Campbell
Identification and selection of appropriate objectives, materials, teaching strategies and evaluation techniques used in teaching music from birth through grade five, with consideration of various approaches (e.g., Delcroze, Kodaly, Orff) for the musical development of children. Prerequisite: MUSED 302; MUSED 340.

MUSED 442 Instrumental Curriculum: Methods and Materials (3) VLPA Morrison
Study of the organization and administration of school instrumental music; the selection and use of materials and teaching strategies from beginning to advanced levels of instrumental instruction. Prerequisite: MUSED 340.

MUSED 443 Choral Curriculum: Methods and Materials (3) VLPA Demorest
Study of the organization and administration of school choral music; the selection and use of materials and teaching strategies from beginning to advanced levels of choral instruction. Prerequisite: MUSED 340.

MUSED 452 Ethnomusicology in the Schools (3) VLPA Campbell
Issues, teaching materials, and techniques involved in incorporating music cultures of United States and related world music repertoires in K-12 classroom instruction. Prerequisite: MUSED 340.

MUSED 453 Approaches to Classroom Instruction: K-12 (3) VLPA Campbell
Examines such major instructional approaches as MMCP, Orff, Kodaly, and Dalcroze. Included are the philosophy of each and the methods, materials, and instructional skills needed for classroom application. Prerequisite: MUSED 403.

MUSED 465 Classroom Management and Evaluation in Music Education (3) VLPA Morrison
Provides future teachers with strategies and techniques for classroom management, motivation, assessment, and evaluation for applications to K-12 school music programs. Prerequisite: MUSED 340.

MUSED 475 Teaching the Music of Selected Cultures (1, max. 6) VLPA Campbell
Music and culture of a specific world region with particular attention to songs, stories, and instrumental pieces applicable to the teaching of music and the arts in elementary and secondary schools.

MUSED 480 Music Methods for Classroom Teachers (3) VLPA Campbell
Addresses the basic fundamentals of music and methods for teaching K-6 school children. Topics include repertoire appropriate for different age levels, methods and materials for integrating music into the K-6 curriculum.

MUSED 496 Special Topics in Music Education (1-3, max. 10) VLPA
Special studies designed to reflect contemporary emphases and concerns in the music education profession.

MUSED 501 Introduction to Research in Music Education (3) Campbell, Demorest, Morrison
Seminar in research design and method with emphasis on identification of problems in music instruction, interpretation of data, and application of findings to classroom settings.

MUSED 502 Quantitative Research in Music Education (3) Campbell, Demorest, Morrison
Seminar in quantitative research utilizing experimental, quasi-experimental, and descriptive design, with emphasis on the pursuit of solutions to pedagogical problems through appropriate research procedures, analysis, and interpretation of findings. Prerequisite: MUSED 501.

MUSED 503 Qualitative Research in Music Education (3) Campbell, Demorest, Morrison
Examination of qualitative modes of inquiry (including ethnographic, case study, phenomenological, and historical) to music instruction in classroom, studio, and community settings. Prerequisite: MUSED 502.

MUSED 522 Psychology of Music Learning and Teaching (3) Campbell, Demorest, Morrison
Examines previous research in areas related to music cognition, including music perception, music performance, musical creativity, musical affect, musical preference, and social psychology. Explores how this research relates to curriculum and practice in music education. Role of theory, method, and procedure for psychological research in music education.

MUSED 523 Tests and Measurement (3) Campbell, Demorest, Morrison
Examination of currently published aptitude and achievement tests in music and their uses in music education. Explores the basic methods for constructing classroom tests and their use in evaluation. Selected readings include researching test construction and application of tests and measurement to program evaluation.

MUSED 524 Seminar in Music Education (3) Campbell, Demorest, Morrison
Special problems in the teaching and supervision of music in the elementary grades. Prerequisite: one year of teaching experience.

MUSED 525 Seminar in Music Education (3) Campbell, Demorest, Morrison
Special problems in the teaching and administration of music in the secondary school and community college. Prerequisite: one year of teaching experience.

MUSED 530 Administration and Supervision in Music Education (3) Campbell, Demorest, Morrison
Survey of issues in policy and systems for facilities, student personnel, technology, school/community relations, and special programs in music education. Focuses on evaluating and improving existing programs. Includes supervision of student teachers.

MUSED 535 Seminar in Musical Development (3) Campbell, Demorest, Morrison
Critical review of theories, methods of inquiry, designs, and conclusions of research in musical development from early
childhood through adolescence. Emphasis on evaluating theories and methods of studying musical development and exploring their relationship to theories of general intellectual development; adult music cognition research; and curriculum and practice in music education.

MUSED 540 History of American Music Education (3)
Campbell, Demorest, Morrison
A chronological examination of individual, social, and political events, and educational philosophies, that characterized the development of music instruction in American schools from colonial times to the present.

MUSED 542 Comparative Music Education (3) Campbell, Demorest, Morrison
A transcultural examination of philosophy and practice of music instruction.

MUSED 550 Proseminar in Music Education (3) Campbell, Demorest, Morrison
Examination of the major literature in the philosophy, history, psychology, and sociology of formal school music instruction.

MUSED 552 World Music Education (3) Campbell
Seminar on issues of multiculturalism and the world music “movement” as they affect school music curriculum and instruction. Curricular content and cultural context examined in relation to teaching K-12 students, teachers, and undergraduate students in music education programs. Offered: AWSpS.

MUSED 560 Contemporary Issues in Music Education (1-3, max. 6) Campbell, Demorest, Morrison
Seminar focusing on review of literature on psychological and sociological aspects of music education, including historical and philosophical foundations of music education in the United States. Appropriate for MA students seeking guidance in preparation of topic for examinations. Prerequisite: MUSED 501.

MUSED 561 Seminar in Theories of Music Instruction (3, max. 9) Campbell, Demorest, Morrison
Theories of music instruction, with special attention to curriculum, instructional procedures, and assessment of learning. Prerequisite: MUSED 501 or permission of instructor.

MUSED 575 Seminar in Music Education Research (1-3, max. 6) Campbell, Demorest, Morrison
Examines research and research-based issues relevant to music instruction and learning. Doctoral students should register each quarter until successful completion of general examination. Offered: A.

Music Ensemble

Course Descriptions

MUSEN 100 University Singers (1, max. 15) VLPA Credit/no credit only.

MUSEN 300 University Symphony Orchestra (1, max. 15) VLPA

MUSEN 301 Wind Ensemble (1, max. 15) VLPA Salzman

MUSEN 302 Symphonic Band (1, max. 10) VLPA Salzman

MUSEN 303 Marching Band (2, max. 10) VLPA McDavid

MUSEN 304 Percussion Ensemble (1, max. 12) VLPA Collier

MUSEN 305 Brass Ensemble (1, max. 12) VLPA Kappy

MUSEN 306 Woodwind Ensemble (1, max. 12) VLPA

MUSEN 307 Recital Choir (1, max. 15) VLPA Kaplan
Choir presents two recital programs per quarter, surveying a wide variety of repertoire of all styles and periods. Credit/no credit only.

MUSEN 308 Guitar Ensemble (1, max. 18) VLPA Novacek
Study and performance works for two, three, and four guitars and one guitar with various solo instruments or voice. Designed for guitar performance majors. Other instrumentalists may register with instructor’s permission. Offered: AWSp.

MUSEN 309 Concert Band (1) VLPA Salzman
Open for membership without audition to students from any major field of study as well as faculty and community members. This ensemble is also an outstanding forum for music majors to refine skills on primary or secondary instruments. Offered: AWSpS.

MUSEN 325 Accompanying (2, max. 30) VLPA

MUSEN 340 Vocal Jazz Ensemble (1, max. 6) VLPA
Credit/no credit only.

MUSEN 345 Jazz Workshop (1, max. 12) VLPA Collier, Seales

MUSEN 346 Studio Jazz Ensemble (1, max. 6) VLPA

MUSEN 347 Opera Chorus (1, max. 12) VLPA Kaplan

MUSEN 350 University Chorale (1, max. 12) VLPA Credit/no credit only.

MUSEN 351 Chamber Singers (1, max. 15) VLPA Boers

MUSEN 361 Piano Ensemble (1, max. 3) VLPA
Study and performance of works for four hands at one or two pianos. Designed for upper-level piano majors or students with equivalent ability.

MUSEN 368 Harp Ensemble (1, max. 12) VLPA Vokolek

MUSEN 369 Baroque Chamber Ensemble (1, max. 18) VLPA Terry, Tindemans

MUSEN 375 Opera Workshop (1, max. 6) VLPA Zahn
Preparation of music theatre repertoire. Intended for the mature voice student.

MUSEN 381 Chamber Music (1, max. 18) VLPA

MUSEN 382 Opera Theatre (2, max. 6) VLPA Zahn
Public performance of roles in opera.

MUSEN 383 Collegium Musicum (1, max. 6) VLPA Tindemans

MUSEN 384 Contemporary Group (1, max. 6) VLPA Durand
Exploration of notation and performance problems in today’s music; preparation for public performance. Credit/no credit only.

MUSEN 410 Steelband (1, max. 6) VLPA
Performing and arranging techniques for the steelband, and percussion, in a variety of Caribbean and Latin American music styles, including calypso, soca, reggae, and salsa.

MUSEN 446 Advanced Studio Jazz Ensemble (1, max. 9) VLPA
Preparation and performance of material appropriate to large jazz ensemble concerts, clinics, and radio and television broadcasts. Recommended: three quarters of MUSEN 346.

MUSEN 500 University Symphony Orchestra (1, max. 9)

MUSEN 501 Wind Ensemble (1, max. 9) Salzman
MUSEN 503 Marching Band (2, max. 6) McDavid
MUSEN 504 Percussion Ensemble (1, max. 9) Collier
MUSEN 505 Brass Ensemble (1, max. 9) Kappy
MUSEN 506 Woodwind Ensemble (1, max. 9) Skowronek
MUSEN 507 Recital Choir (1, max. 9) VLPA Kaplan
MUSEN 508 Guitar Ensemble (1, max. 9) VLPA Novacek
MUSEN 509 Chamber Singers (1, max. 9) Boers
MUSEN 510 Piano Ensemble (1, max. 9) VLPA Novacek
MUSEN 511 University Chorale (1, max. 9) VLPA Novacek
MUSEN 512 Baroque Chamber Ensemble (1) Terry, Tindemans
MUSEN 513 Opera Workshop (1, max. 9) Zahn
MUSEN 514 Sinfonietta (1, max. 9) VLPA Novacek
MUSEN 515 Chamber Music (1, max. 9) VLPA Novacek
MUSEN 516 Opera Theatre (2, max. 18) VLPA Novacek

Music History

Course Descriptions

MUHST 210 Introduction to the History of Western Music I (3) VLPA Taricani
MUHST 211 Introduction to the History of Western Music II (3) VLPA Starr, Taricani
MUHST 212 Introduction to the History of Western Music III (3) VLPA Starr
MUHST 301 Music and the American Experience (3) I&S/VLPA Novacek
MUHST 330 Music in the United States (5) VLPA Novacek
MUHST 400 Medieval Music: To 1400 (3) VLPA Taricani
MUHST 401 Early British Music: 1300-1700 (3) VLPA Taricani
MUHST 402 Late Renaissance Secular Music: 1525-1630 (3) VLPA Taricani
MUHST 403 Late Renaissance Sacred and Instrumental Music: 1525-1630 (3) VLPA Taricani
MUHST 404 Baroque Keyboard Music (3) VLPA Novacek
MUHST 405 Orchestral Music: 1620-1760 (3) VLPA Novacek

324
Monteverdi through Handel. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 407 Baroque Opera (3) VLPA
Monteverdi through Handel.

MUHST 408 Keyboard Music: 1760-1830 (3) VLPA Bozarth
Haydn through Schubert. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 409 Chamber Music: 1760-1830 (3) VLPA Bozarth
Haydn through Schubert. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 410 Orchestral Music: 1760-1830 (3) VLPA
Haydn through early Berlioz.

MUHST 411 Art Song, 1760-1830 (3) VLPA Bozarth
The art song in European culture during the Classical and early Romantic periods. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 412 Choral Music: 1750-1830 (3) VLPA Bozarth
Large works for chorus and orchestra, Haydn through Beethoven.

MUHST 413 Opera: 1750-1830 (3) VLPA Bozarth
Gluck through Bellini.

MUHST 414 Keyboard Music: 1830-1915 (3) VLPA Bozarth
Schumann through Debussy. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 415 Chamber Music: 1830-1915 (3) VLPA Bozarth
Schumann through Ravel. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 416 Orchestral Music: 1830-1915 (3) VLPA Bozarth
Schumann and Mendelssohn through early Schoenberg and Stravinsky. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 417 Art Song: 1830-1915 (3) VLPA Bozarth
The Lieder of Schumann, Brahms, Wolf, Strauss, Mahler, and Schoenberg. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 418 Choral Music: 1830-1915 (3) VLPA Bozarth
Selected choral masterpieces. Mendelssohn through Schoenberg.

MUHST 419 Opera: 1830-1915 (3) VLPA Bozarth
German, French, and Italian operatic traditions. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 420 Authenticity and Performance (3) VLPA
The practical and philosophical issues raised by historically informed performance of early music on period instruments. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 421 Music Criticism (3) VLPA Starr
Study of the various forms of music criticism, with an emphasis on the writing of valid examples and evaluation of one’s own work along with that of others — classmates, journalists, and academic critics. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 422 Gender and Music (3) VLPA Tsou
Investigates how gender issues have shaped the creation and perception of music; introduces women composers and their music. Topics include writing women’s biography; creation of the music canon; gender issues in opera; intertwining issues of race, class, and gender, blues women; and popular music. Offered: W. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 423 Twentieth-Century Music to 1945 (3) VLPA Starr
Intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of the twentieth century. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 424 Music Since 1945 (3) VLPA Starr
Diversity of the contemporary musical scene. Vocabularies appropriate for the description and understanding of the new music, developed through study of representative composers and works, and appropriate readings. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 425 Jazz History and Analysis (3) VLPA Collier
Major eras and styles of jazz with emphasis on technical aspects of jazz music: composition, arranging, improvisation practices. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 426 American Popular Music (3) VLPA Starr
An in-depth consideration of American popular music styles and repertoire from about 1920 to the present day. Analysis of representative pieces; consideration of critical and aesthetic issues relating to popular music; relationship of popular music to “art” music and to American culture and society. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 427 Seminar in Popular Music Analysis (3) VLPA Collier
An intensive study of American popular music styles and repertoire from 1945 to the present day. Includes works of a particular time period or investigation of a specific problem in comparative art. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 428 Seminar in Baroque Music (3) VLPA Collier
An intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of the Baroque period. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 429 Seminar in Renaissance Music (3) VLPA Collier
An intensive study of selected composers and works exemplifying the new vocabularies, grammars, and styles of the early part of the Renaissance period. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 430 Music and the Law (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 431 Seminar in Music and the Media (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 432 Seminar in Media and the Communication of Music (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 433 Seminar in Music and the Media (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 434 Seminar in Media and the Communication of Music (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 435 Seminar in Music and the Media (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 436 Seminar in Media and the Communication of Music (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 437 Seminar in Music and the Media (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.

MUHST 438 Seminar in Media and the Communication of Music (3) VLPA Collier
A study of the practical issues related to music composition, performance, and distribution. Prerequisite: 2.0 in MUHST 210; 2.0 in MUSIC 303; 2.0 in MUSIC 306.
Near Eastern Languages and Civilization
229 Denny

Near Eastern languages and civilization focuses on the languages and civilizations of the Near East with an emphasis on the ancient and medieval roots of these civilizations as well as more recent cultural developments. Each language offered represents a major literary tradition. Arabic, Persian, Turkish, and Central Asian Turkic are the languages of the most significant literary manifestations of Islamic civilization. Hebrew and Aramaic are the languages of the Bible and are central to Judaism and Jewish culture. Egyptian languages (Coptic, Hieroglyphic) and other Mesopotamian and Mediterranean languages (Akkadian, Ugaritic, Phoenician) are important to the ancient and Christian cultures of the Near East. These languages are taught in conjunction with courses on the social, cultural, and religious history of the Near East, providing students with a broad understanding and solid foundation for more advanced studies or professional career development.

Undergraduate Program
Adviser
229B Denny, Box 353120
206-543-6928
neareast@u.washington.edu

The department offers the following programs of study:
- The Bachelor of Arts degree with a major in Near Eastern languages and civilization, Near Eastern culture and civilization, comparative Islamic studies, and Biblical and ancient studies
- A minor in Near Eastern languages and civilization

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses in any discipline that deals with the Near East, e.g., history, political science, economics. Courses in writing, literature, French, German, and Russian are also recommended.

Major Requirements

Near Eastern Studies — Languages and Civilization
69 credits as follows:
- Two years of one Near Eastern language, or its equivalent as evidenced by examination
- At least 9 credits in advanced literature or text courses in that language
- NEAR E 210
- One of the following: NEAR E 211, NEAR E 240, or RELIG 210
- An approved program of 20 further credits in courses offered by the department or courses on the Near East offered by other departments, or both

Near Eastern Studies — Culture and Civilization
73 credits as follows:
- Two years of one Near Eastern language or its equivalent as evidenced by examination
- NEAR E 210 or (with approval of adviser) NEAR E 220
- One of the following: NEAR E 211, NEAR E 240, or RELIG 210
- An approved program of 20 further credits in Near Eastern courses including at least one course from each of the following areas: Near Eastern civilization, Near Eastern religion, Near Eastern literature in translation
- 8 credits in non-language, upper-division courses related to the Near East in the department or in other departments
- A senior essay on a topic of Near Eastern civilization (5 credits).

Near Eastern Studies — Comparative Islamic Studies
70 credits as follows:
- Two years of one of the following languages or its equivalent as evidenced by examination: Arabic, Persian, Turkish, Uzbek, Kazakh, or other appropriate languages with approval of adviser
- NEAR E 210
- NEAR E 212 or 240
- An approved program of 10 credits in courses in Islamic religious traditions and texts, and 15 credits in history, society and culture of Islam
- A senior essay on a topic in comparative Islamic studies (5 credits).

Near Eastern Studies — Biblical and Ancient
73 credits as follows:
- Two years of Biblical Hebrew or its equivalent as evidenced by examination (alternatively, a student may satisfy this language requirement by combining a minimum of four quarters of Biblical Hebrew with two quarters of other ancient Near Eastern languages, including Aramaic, hieroglyphic Egyptian, Coptic, Akkadian, second-year Greek, or other appropriate languages as approved by adviser)
- NEAR E 220 and NEAR E 240
- An approved program of 20 credits in courses in ancient Near Eastern history, society and culture, and ancient Near Eastern literature in translation
- 8 credits in non-language, upper-division Near Eastern courses related to the ancient Near East
- A senior essay on a topic in biblical and ancient Near Eastern studies (5 credits).

Minor

Minor Requirements: 25 credits as follows:
- NEAR E 210 or NEAR E 220
- One course from NEAR E 211, NEAR E 240, RELIG 210
- Additional credits from Near Eastern civilization or language courses (may not include language courses at the beginning or intermediate level).
Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The NELC undergraduate degree offers a liberal arts education with a particular focus on the study of cultures and languages of the Near East and Central Asia. Educational outcomes from this degree serve a broad spectrum of undergraduates, ranging from those intending to begin the acquisition of specific linguistic and cultural proficiencies for the purpose of pursuing some career, academic or otherwise, related to these regions, to students for whom the Near East and/or Central Asia are regions with histories and cultures that are of special intellectual or personal interest. Students often combine Near Eastern Studies as a double major with some other degree program that may be in a quite different discipline. For these students the NELC undergraduate major offers the important opportunity, as a core element in a broader liberal arts education, for expanding their cultural vision and understanding in ways made possible only through serious study of a language and literature other than one’s own. Graduates from the B.A. degree have followed a wide range of post-baccalaureate paths, including further graduate study in the humanities or social sciences, professional degree programs in law or medicine, and employment with government or non-governmental organizations.

- **Instructional and Research Facilities:** The department draws on collections of books, serials, and other resources in the UW libraries that are unusually rich in the quantity and quality of items relating to Near Eastern and Central Asian languages and cultures. Students in the department’s language classes make use of the University’s well-equipped Language Learning Center.

- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- **Research, Internships, and Service Learning:** None offered

- **Department Scholarships:** See departmental website for most current information

- **Student Organizations/Associations:** There are no formal student organizations in the department, but the department frequently sponsors educational and cultural events organized by students and faculty involved in interest groups such as the Central Asian Circle or the Persian Circle.

Graduate Program

Graduate Program Coordinator
M29A Denny, Box 353120
206-685-3800
neareast@u.washington.edu

**Master of Arts**

The Department of Near Eastern Languages and Civilization offers a graduate program of studies leading to the Master of Arts degree. The program is designed to provide students with advanced training in at least one Near Eastern language and in a specific field of specialization. Students may concentrate in Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended not only for those students who wish to continue their studies at the doctoral level but also for students who wish to pursue careers in government or business.

**Admission Requirements:** Statement of purpose; a sample of written academic work; three letters of recommendation, of which at least two must attest to scholarly ability; GRE scores. Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had the equivalent of two years’ study of the language in which they plan to concentrate.

**Graduation Requirements:** Departmental requirements, in addition to those required by the Graduate School for the Master of Arts degree, include a reading knowledge of French or German, or, with the prior approval of the student’s M.A. committee, any other language pertinent to the research in the student’s field of study; a seminar paper representing the student’s best work; a written examination consisting of four parts: (1) on the general culture of the Near East, (2) on the student’s field of specialization, (3) on the student’s language of concentration, (4) on a second Near Eastern language related to the language concentration. Fulfillment of these requirements normally entails the completion of at least two years of study.

**Doctor of Philosophy**

Some of the department faculty are part of an interdisciplinary faculty group which offers doctoral study in Near and Middle Eastern Studies. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of this catalog.

**Summer Programs**

The department offers Summer Intensive Language programs in Arabic, Hebrew, and Central Asian languages (Uzbek, Kazakh, Tajik, and others).

**Research Facilities**

The University of Washington Libraries holds an extensive collection of books and materials in the languages of the Near East, the Turkic regions of Central Asia, and in European languages on Near Eastern and Central Asian Turkic subjects. Candidates for the master’s degree as well as doctoral students will find in the collection adequate resources for their research. The library participated in the Library of Congress Middle East Cooperative program for the acquisition of Arabic serials, and the Library of Congress Cooperative program for Pakistan for the purchase of Persian books and serials. The library staff includes Near East and Central Asia specialists responsible for acquiring and cataloging the collection. The library maintains book exchanges with the Central Asian republics, some of these beginning as early as 1961. They are handled through the Near East and Slavic Sections of the University’s Suzzallo Library. Among its staff are an exchange librarian and a specialist trained in Central Asian Turkic languages. A book exchange with Xinjiang is administered through the East Asia Library.

**Financial Aid**

A limited number of teaching assistantships are available for graduate students in the department who are fluent in speaking and writing a Near Eastern language. A limited number of graduate fellowships are also available.

**Exchange Agreements**

The department participates actively in exchange programs involving institutions abroad, sending students for language and cultural study and research to a variety of locations, and training many students from institutions overseas. Students take advantage of existing formal UW exchange agreements with several universities in North Africa and the Middle East, such as American University in Cairo; Al-Akhawayn University in Ifrane, Morocco; Yarmouk University and Mu’tah University in Jordan; American University in Beirut; Hebrew University in Jerusalem; and Bogazici University in Istanbul. There have also been departmental-level exchange agreements with Xinjiang University in Urumchi, China (for Uighur, Kazakh, Kirghiz), or institutions in Central Asia such as Tashkent State University, the Humanities University of Bishkek, Kyrgyzstan, or Kyrgyz State National University, Bishkek. NELC students also study at other institutions in which there are not currently formal exchanges, such as the University of Damascus (for the study of Arabic and related subjects).
Andrews, Walter G., Research Professor Turkish language and literature,

Bacharach, Jere L., Interim Chair, Adjunct Professor Emeritus

Cirtautas, Ilse D., Professor Turkic languages and literatures

DeYoung, Terri L., Associate Professor Modern Arabic language and literature

Elkhafafi, Hussein, Assistant Professor Arabic Language; language pedagogy

Gamoran, Hillel, Affiliate Lecturer Talmudic texts and other rabbinic literature

Goldberg, Ellis, Adjunct Professor Political Economy of the Middle East

Heer, Nicholas L., Professor Emeritus Arabic language and literature, Islamic law, Islamic institutions

Jaffee, Martin S., Adjunct Professor History of Judaism and late antiquity, methods in study of religion

Kasaba, Resat, Adjunct Professor

Kuru, Selim, Assistant Professor Modern and Ottoman Turkish

MacKay, Pierre A., Professor Emeritus Topography of the Near East, Ottoman Turkish and Classical Arabic literatures

Noegel, Scott, Associate Professor Northwest Semitic languages and literatures, Assyriology, Hieroglyphic Egyptian, and Medieval Hebrew poetics

Osanloo, Arzoo, Adjunct Assistant Professor

Papan-Matin, Firoozeh, Assistant Professor Persian language and literature, Sufism

Schuyler, Philip, Adjunct Associate Professor

Schwarz, Florian, Adjunct Assistant Professor History of the medieval and pre-modern Middle East, History of Islamic Central Asia

Sokoloff, Naomi B., Professor Modern Hebrew language and literature

Stilt, Kristin, Adjunct Assistant Professor

Walker, Joel, Adjunct Assistant Professor History and archaeology of the Near East in late antiquity

Williams, Michael A., Professor Early Christianity and religions of Greco-Roman world, Coptic language

Ziadeh, Farhat J., Professor Emeritus Arabic language and literature, Islamic law, Islamic institutions

Course Descriptions

Investigates the complex relationship between violence and peace in a variety of religious traditions. Examines case studies from the ancient Near East, medieval East Asia, and the contemporary West from the standpoint of lived experiences and contemporary theories derived from several academic disciplines. Offered: jointly with HUM/RELIG 205; W.

NEAR E 210 Introduction to Islamic Civilization (5) I&S/ VLPA
Major developments in Islamic civilization from advent of Islam in seventh century to present. Islamic history, law, theology, and mysticism, as well as the politics, cultures, and literatures of the various Islamic societies. Offered: jointly with SISME 210.

NEAR E 211 Islam (5) I&S/ VLPA B. Wheeler
Introduction to important cultural and historical aspects of Islam, focusing on basic concepts and developments such as prophethood, Quran and Hadith, canon and law, ritual, social theory, Sufism, theology, and sectarianism. Special attention to comparison of varied Muslim practices and beliefs, and their relation to textual and personal authority. Offered: jointly with RELIG 211.

NEAR E 212 Introduction to the Quran (5) I&S/ VLPA B. Wheeler
Emphasis on the historical context of the Quran, the history of the text, its collection, organization, and interpretation. In English. Offered: jointly with RELIG 212.

NEAR E 213 Introduction to the Modern Middle East (5) I&S
Major social and political trends in the Middle East during the 18th, 19th, and 20th centuries. Basic principles of Islam and its diversity, changing balance of power during the early modern period; European colonialism and withdrawal; pan-Arabism, nationalism, feminism and religious resurgence. Offered: jointly with SISME 213.

NEAR E 215 Prophets in Islam and Judaism (5) I&S/ VLPA Noegel, Wheeler
Explores prophecy and prophets within the context of the ancient Mediterranean world. Particular attention to the exegetical traditions concerning prophets in the Bible and Quran. Examines the stories of Abraham, Moses, Gideon, Elijah/Khidr, and others. Prophecy and mysticism examined for their relationship to oracles, sufism, and sacred texts. Offered: Sp.

NEAR E 220 Introduction to the Ancient Near East (5) I&S/ VLPA Noegel
Surveys the peoples, places and events of the ancient Near East. Examines the cultures of Mesopotamia, Egypt, Canaan, and Israel with an eye to each culture’s cultural contributions. Pays special attention to shared cultural elements as well as distinguishing characteristics of the peoples of these regions.

NEAR E 221 Digital Egypt (3) I&S/ VLPA
Uses technology to explore themes surrounding the study of Egypt, from ancient times through the early Islamic period. Intended as a broad interdisciplinary introduction to Egypt’s history and cultural legacy.

NEAR E 230 Themes in Near Eastern Literature (5) VLPA, I&S
Significant and interesting aspects of Near Eastern culture and society as represented by literary themes. Aspects of Near Eastern life and art such as women, minority groups, mysticism, and modern literature. Content varies.

NEAR E 240 Introduction to the Hebrew Bible: Old Testament (5) I&S/ VLPA

NEAR E 242 Cultural History of Turkey: From Empire to Nation (5) I&S/ VLPA
Topics include: social, economic, and political structures of
Ottoman and Turkish Anatolia; language, literature, and artistic tradition; social status of women, literacy and illiteracy, the secular enterprise of Kemal Ataturk; Islamic fundamentalism, educational institutions, Kurdish nationalism. Offered: W.

NEAR E 250 Iranian Culture and Civilization (5) I&S/VLPA Karimi-Hakkak
Explores the culture and civilization of this Middle Eastern society through a multi-disciplinary approach that includes such manifestations as architecture, carpet-weaving, story-telling, and the composition of poetry.

NEAR E 251 Jewish Life in Literature and Film (3) I&S/VLPA
Major themes of Jewish life treated in modern narrative and cinema. Topics include religious tradition and modernity. Jewish immigration to America, responses to the Holocaust and Zionism.

NEAR E 252 The Middle East in Film (3) I&S/VLPA
The cinema of Egypt, Iran, Israel, Turkey, and other Middle Eastern nations; compares and contrasts the films with Middle Eastern literature from the twentieth century. Both films and literature illustrate how Middle Easterners view the world: their concepts of self versus society, religion, art, and politics.

NEAR E 310 Modern Near Eastern Literatures in English Translation (3) VLPA
Contemporary cultures of the Middle East studied through exposure to a representative sample of their literary work. Texts selected address major issues in Middle Eastern societies, e.g. tradition versus modernity, national identity and the challenge of the West, Arab-Israeli conflict.

NEAR E 325 Modern Hebrew Literature in English (3) VLPA Sokoloff
Major developments in Hebrew literature from the Enlightenment to the current Israeli literature.

NEAR E 326 Israeli Identities (5) VLPA Sokoloff
Examines fiction and film, as well as selected poetry, popular songs, and essays, to explore diverse groups within contemporary Israeli society. Topics include the sabra ideal, Holocaust survivors, Sephardic/Mizrahi communities, religious and secular Jews, Israel's Arab minority, and questions of gender.

NEAR E 350 The City of Cairo (3) I&S/VLPA
Development of Fustat and Cairo, 600-1800, with special emphasis on art and architecture. Consideration of the economic, social, and geographical influences on the creation of the distinctive Egyptian styles of Islamic art. Offered: jointly with ART H 350.

NEAR E 363 Oral Literature of the Turkic Peoples of Central Asia I: the Heroic Epos (3) VLPA Cirtautas
Representative heroic poems of Central Asian Turkic peoples now living in the Central Asian Republics and China. Origin of the heroic epics, its relation to the romantic epos and other oral literary genres. Art of the singer and his role in nomadic Turkic society. Emphasis on Manas, the monumental epics of Kirghiz. Offered: jointly with TKIC 363.

NEAR E 375 Turkic Peoples of Central Asia (3) I&S Cirtautas
History of the Turkic peoples, AD 552 to present. Emphasis on current status of Turkic peoples in Central Asia. Geographical distribution, demographic data, reactions and adaptations to changes resulting from the 1917 revolution. Turkic viewpoint on past and present developments. Offered: jointly with HIS 377.

NEAR E 402 Classical Arabic Literature in Translation (3) VLPA DeYoung
Examines development of Arabic literature from its beginnings through the fall of the Abbasid dynasty to the Mongols. Coincides with period when Arabic language and literature were dominant forces in Islamic civilization. Topics include: impact of Islam on the literature, courtly love, mystical poetry, the Thousand-and-One Nights, and Hispano-Arabic literature.

NEAR E 403 Colonialism, Nationalism, and the Modern Arabic Novel (3) I&S/VLPA DeYoung
Examines how representative novels from the modern canon in Arabic have both endorsed and critiqued aspects of nationalism and colonialist ideology. Recommended: NEAR E 210.

NEAR E 420 Islamic Theological Literature in English (3) VLPA
Readings from Mu'tazilite and Ash'arite works and from traditionalists opposed to theology.

NEAR E 421 Islamic Mystical Literature in English (3) VLPA
Readings from the works of principal Sufi writers and poets.

NEAR E 422 Islamic Philosophical and Scientific Literature in English (3) VLPA
Readings in philosophy, the physical sciences, and medicine.

NEAR E 423 Persian Literature in Translation (3) VLPA
Designed to familiarize students with an expanding collection of works translated from Persian literature, both classical and modern, into English. Focuses on a few representative texts and offers interpretations of the culture through close readings. Prior acquaintance with Iranian culture not required.

NEAR E 425 Current Trends in Modern Near Eastern Literature and Criticism (3) VLPA
Modern literary tradition of the Near East with emphasis on major literary movements and/or genres and literary criticism in the modern period. The literatures of the Arab world, Persia, Turkey, and Israel are considered in alternate quarters.

NEAR E 430 Scripture and Law in Islam (5) I&S/VLPA B. Wheeler
Examines concept and use of scripture in Islam, with special attention to issues of canon and commentary, heavenly books, talismanic uses, and the place of scripture in ritual. In English. Offered: jointly with RELIG 430.

NEAR E 432 Ritual and Territory in Islam (5) I&S/VLPA B. Wheeler
Comparative study of Islamic ritual practices and related development of jurisprudence and law. Focus on sacrifice, political and social legal theory, pilgrimage, regulation of the body, and the diversity of contemporary practices. In English. Offered: jointly with RELIG 432.

NEAR E 433 Life of Prophet Muhammad (5) I&S/VLPA B. Wheeler
Examines historical and religious traditions associated with the life of the Prophet Muhammad with particular attention to the biography in classical Islam. Focuses on Muhammad as prophet, holy man, law-giver, mystic, and statesman. Comparison with other religious figures such as Jesus and the Buddha. In English. Offered: jointly with RELIG 433.

NEAR E 435 Major Trends in Modern Arabic Fiction (3) VLPA DeYoung
Development of Arabic prose fiction from the end of the nineteenth century to the present.

NEAR E 436 Arab American Writers (3) I&S/VLPA DeYoung
Explores the influence of Arab American writing both in the United States and the Arab world during the nineteenth and twentieth centuries. Discusses issues of emigration to the United States from the Arab world and its impact on the formation of a distinctive Arab American identity.

<td>NEAR E 450</td>
<td>Survey of the Cultures of the Turkic Peoples of Central Asia (3) I&amp;S/VLPA Cirtautas</td>
<td>Nomadic and sedentary cultures of the Turkic peoples of Central Asia. Emphasis on language, literature, and adherence to traditional modes of life. Offered: jointly with SISRE 450.</td>
</tr>
<tr>
<td>NEAR E 451</td>
<td>Pharaonic Egypt in the Context of the Ancient Near East (3) I&amp;S/VLPA Noegel</td>
<td>Surveys the history, literature, and archaeology of ancient Egypt from the first pharaohs to the conquest of Alexander the Great. Introduces the field of Egyptology, and focuses on the continuity of Egyptian history and culture in context. Slide presentations supplement the readings and in-class lectures.</td>
</tr>
<tr>
<td>NEAR E 452</td>
<td>The Biblical Song of Songs (3) VLPA Noegel</td>
<td>Examines the erotic and beautiful Song of Songs within the context of ancient (and medieval) Near Eastern love poetry and correlates close readings of the book with various interpretations it has received from antiquity until today. No knowledge of Hebrew or the Bible is required. Offered: jointly with SISJE 452.</td>
</tr>
<tr>
<td>NEAR E 453</td>
<td>The Biblical Prophets (3) I&amp;S/VLPA Noegel</td>
<td>Explores the biblical prophets (in translation) within their Near Eastern contexts. Studies them for their historicity, literary and rhetorical sophistication, and ideological agendas. This course seeks to uncover the meaning and distinctiveness of Israelite prophecy within the context of the larger Near East. No knowledge of the Bible is required. Offered: jointly with SISJE 453.</td>
</tr>
<tr>
<td>NEAR E 454</td>
<td>Israel: The First Six Centuries BCE (3) I&amp;S/VLPA Noegel</td>
<td>Traces the Israelites, from the Babylonian destruction of the Jerusalemite Temple (586 BCE) to events following the destruction of the second Temple (1st century CE). Focuses on primary historical and literary sources as well as archaeological and artistic evidence. No knowledge of Hebrew or the Bible is required. Offered: jointly with SISJE 454.</td>
</tr>
<tr>
<td>NEAR E 455</td>
<td>The Kings of Monarchic Israel (3) I&amp;S/VLPA Noegel</td>
<td>Examines the biblical accounts (in translation) concerning the formation and collapse of the united Israelite monarchy. Investigates the archaeological and textual evidence for their historicity, the literary sophistication of these accounts, and Israelite kingship within the wider context of the ancient Near East. No knowledge of the Bible is required. Offered: jointly with SISJE 455.</td>
</tr>
<tr>
<td>NEAR E 456</td>
<td>Women in Ancient Judaism (3) I&amp;S/VLPA Noegel</td>
<td>Explores those texts in early Jewish literature in which women play prominent roles and those in which women are surprisingly absent. Discusses the literary portrayal of women for what they tell us about the people who wrote the texts. No knowledge of Hebrew is required. Offered: jointly with RELIG 456.</td>
</tr>
<tr>
<td>NEAR E 457</td>
<td>The History of Biblical Interpretation (3) I&amp;S/VLPA Noegel</td>
<td>Traces biblical interpretation and translation technique from the earliest translations of the Hebrew Bible (Old Testament) to the various historical literary, deconstructionist, and holistic strategies of more recent times. Adopts a “hands-on” approach to the material and explores various hermeneutics by applying them in class. Offered: jointly with RELIG 457.</td>
</tr>

<td>Islamic Theology (3)</td>
<td>Various schools of Islamic theology.</td>
</tr>
<tr>
<td>NEAR E 523</td>
<td>Islamic Philosophy (3)</td>
<td>Various topics and problems dealt with by the Islamic philosophers.</td>
</tr>
<tr>
<td>NEAR E 524</td>
<td>Islamic Law (3)</td>
<td>Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with LAW B 556.</td>
</tr>
<tr>
<td>NEAR E 525</td>
<td>Islamic Institutions (3)</td>
<td>Islamic institutions of the caliphate, the sultanate, the bureaucracy, taxation, mosques, and madrasahs, as well as theories of government.</td>
</tr>
</tbody>
</table>
NEAR E 530 Seminar on Near Eastern Literature (3, max. 27)  
Prerequisite: reading knowledge of at least one Near Eastern  
language. Content varies.

NEAR E 531 Proseminar in Literary Analysis (3, max. 9)  
Introduction to the theory and techniques of the study of literature  
in general and Near Eastern literatures in particular. Content varies.  
Prerequisite: reading knowledge of at least one Near Eastern  
language.

NEAR E 532 Theory and Practice in Modern Near Eastern  
Literature (3)  
Application of literary theory to works of modern Near Eastern  
literature. Concentrates on one major theory each year. Content  
varies.

NEAR E 533 Islamic Poetry and Poetics (3)  
Detailed introduction to prosody and rhyme in classical Arabic and  
Persian, followed by critical analysis of selected texts. Prerequisite:  
advanced level of Arabic or Persian; some knowledge of the other  
recommended.

NEAR E 595 Modern Methods and Materials in Teaching Near  
Eastern Languages (3) Elkhafafi  
Theory and practice of communicative language teaching; current  
developments in foreign-language teaching; evaluation of teaching  
materials; includes participation at the departmental and university-  
wide fall orientation; required for beginning teaching assistants of  
Near Eastern languages; requires enrollment in Near E 518. Credit/  
no credit only. Offered: A.

NEAR E 596 Special Studies in Near Eastern Languages and  
Civilization (3-5, max. 15)  
Offered occasionally by visitors or resident faculty. Content varies.

NEAR E 600 Independent Study or Research (*)

Akkadian  

Course Descriptions

AKKAD 401 Elementary Akkadian (3)  
Introduction to the Akkadian language (Assyrian and Babylonian).  
Readings in original Akkadian cuneiform from historical, legal, and  
literary texts.

AKKAD 402 Elementary Akkadian (3)  
Introduction to the Akkadian language (Assyrian and Babylonian).  
Readings in original Akkadian cuneiform from historical, legal, and  
literary texts.

AKKAD 403 Elementary Akkadian (3)  
Introduction to the Akkadian language (Assyrian and Babylonian).  
Readings in original Akkadian cuneiform from historical, legal, and  
literary texts.

AKKAD 421 Intermediate Akkadian (3) VLPA  
Readings in Akkadian texts.

AKKAD 422 Intermediate Akkadian (3) VLPA  
Readings in Akkadian texts.

AKKAD 423 Intermediate Akkadian (3) VLPA  
Readings in Akkadian texts.

Arabic  

Course Descriptions

ARAB 401 Intensive Elementary Arabic (15)  
Study of grammar, with oral and written drill and reading of simple  
texts. (Cannot be taken for credit if 411, 412, 413 taken.) Offered:  
S.

ARAB 411 Elementary Arabic (5)  
Study of grammar, with oral and written drill and reading of simple  
texts. (Cannot be taken for credit if 401 taken.).

ARAB 412 Elementary Arabic (5)  
Study of grammar, with oral and written drill and reading of simple  
texts. (Cannot be taken for credit if 401 taken.) Prerequisite: ARAB  
411.

ARAB 413 Elementary Arabic (5)  
Study of grammar, with oral and written drill and reading of simple  
texts. (Cannot be taken for credit if 401 taken.) Prerequisite: ARAB  
412.

ARAB 414 Spoken Arabic (3)  
Study of grammar with emphasis on oral drill in modern spoken  
Arabic (Western or Eastern).

ARAB 415 Spoken Arabic (3)  
Study of grammar with emphasis on oral drill in modern spoken  
Arabic (Western or Eastern).

ARAB 416 Spoken Arabic (3)  
Study of grammar with emphasis on oral drill in modern spoken  
Arabic (Western or Eastern).

ARAB 421 Intermediate Arabic (5) VLPA  
Reading of selected texts in standard Arabic, with continuing  
emphasis on grammar and syntax. Prerequisite: either ARAB 401 or  
ARAB 413.

ARAB 422 Intermediate Arabic (5) VLPA  
Reading of selected texts in standard Arabic, with continuing  
emphasis on grammar and syntax. Prerequisite: ARAB 421.

ARAB 423 Intermediate Arabic (5) VLPA  
Reading of selected texts in standard Arabic, with continuing  
emphasis on grammar and syntax. Prerequisite: ARAB 422.

ARAB 424 Intensive Intermediate Arabic (15) VLPA  
Equivalent to one year of study of standard Arabic at intermediate  
level. Extension of knowledge in grammar, syntax and vocabulary,  
and skills in reading, writing, and conversation. May not be taken  
for credit if ARAB 421, 422, 423 previously taken for credit.  
Prerequisite: either ARAB 401 or ARAB 413. Offered: S.

ARAB 431 Advanced Arabic (5) VLPA  
Focus on Arabic at the advanced level through in-depth examination  
of grammar, reading of selected texts, and brief surveys of some  
major reference materials. Prerequisite: ARAB 423.

ARAB 432 Advanced Arabic (5) VLPA  
Focus on Arabic at the advanced level through in-depth examination  
of grammar, reading of selected texts, and brief surveys of some  
major reference materials. Prerequisite: ARAB 431.

ARAB 433 Advanced Arabic (5) VLPA  
Focus on Arabic at the advanced level through in-depth examination  
of grammar, reading of selected texts, and brief surveys of some  
major reference materials. Prerequisite: ARAB 432.

ARAB 451 Adab Prose: Jahiz (3) VLPA  
Readings in early Arabic prose. Prerequisite: ARAB 432.

ARAB 452 Maqamat: Hamadhani, Hariri (3) VLPA MacKay  
Reading of several maqamat (essays in rhymed prose) of al-  
Hamadhani and al-Hariri. Examination of the maqamat genre as a  
whole. Prerequisite: ARAB 432.
ARAB 453 Historical Texts (3) I&S/VLPA B. Wheeler
Readings in Arab historians with particular reference to scholars such as Tabari, Ibn al-Jawzi, and Ibn al-Athir. Prerequisite: ARAB 432.

ARAB 454 Quran and Its Interpretation (3) VLPA B. Wheeler
Reading of selected passages from the Quran in relation to their interpretation in classical commentaries (tafsir) and in legal texts (ahkam al-Quran). Focus on the various types of classical scholarship applied to the text of the Quran (ulum al-Quran). Prerequisite: ARAB 432.

ARAB 455 Ritual and Legal Texts (3) VLPA B. Wheeler
Selected readings from well-known Islamic legal texts (furu al-fiqh) with attention to the sources of the law and methods of exegesis (usul al-fiqh). Prerequisite: ARAB 432.

ARAB 456 Islamic Political Theorists (3) I&S/VLPA
Readings from the main political theorists: al-Baghdadi, al-Mawardi, and Ibn Khaldun. Prerequisite: ARAB 432.

ARAB 457 Grammatical and Lexical Texts (3) VLPA B. Wheeler
Introduction to concepts and terminology of Arabic grammar and lexicography through readings from scholars such as Sibawayh, Ibn Aqil, and Ibn Manzur. Prerequisite: ARAB 432.

ARAB 458 Modern Poetry (3) VLPA DeYoung
Neoclassical poetry of the nineteenth and twentieth centuries, and the development of modern verse. Prerequisite: ARAB 432.

ARAB 459 Islamic Philosophical Literature (3) I&S/VLPA
Reading of selected texts by representative Islamic philosophers. Prerequisite: ARAB 432.

ARAB 460 Islamic Theological and Mystical Literature (3) VLPA
Reading of selected texts representative of Islamic theological and mystical schools. Prerequisite: ARAB 432.

ARAB 461 Modern Prose (3) VLPA DeYoung
Modern essays, fiction, and ideological writings. Prerequisite: ARAB 432.

ARAB 462 Sirah and Maghazi Texts (3) I&S/VLPA B. Wheeler
Reading and discussion of selected historical texts devoted to the life of the Prophet Muhammad, such as Ibn Ishaq, Ibn Hisham, al-Waqidi, Ibn Sa’d, and al-Bayhaqi. Some attention to related genres and contemporary scholarship. Prerequisite: ARAB 432.

ARAB 470 Stories of the Prophets (3) I&S/VLPA B. Wheeler
Reading and discussion of Jewish and Islamic exegesis of selected Biblical and Quranic narratives dealing with such figures as Moses, Abraham, Jacob, or Adam and Eve. Prerequisite: either ARAB 432 or HEBR 423. Offered: jointly with HEBR 470.

ARAB 472 Quran and Bible Masorah (3) VLPA B. Wheeler
Introduces and discusses selected readings in textual apparatuses for the Quran and Bible. Attention to marginalia in Rabbinic texts, and Islamic scholars such as al-Zarkashi and as-Suyuti. Prerequisite: either ARAB 432, HEBR 427, or HEBR 432. Offered: jointly with HEBR 472.

ARAB 481 South Arabian Epigraphic (3) VLPA
Introduction to epigraphic languages used in Southern Arabia from first half of first millennium BCE to mid-fifth century CE. Overview of script, basic grammar, and vocabulary with readings from selected Minaic, Sabaic, Qatabanic, and Hadramitic inscriptions. No previous study of Arabic required.

ARAB 482 North Arabic Inscriptions (3) VLPA
Introduction to Arabic Languages of pre-Islamic Northern Arabia from 6th century B.C.E. to 5th century C.E. Overview of scripts, grammar and vocabulary with readings from Thaudic, Taymanite, Dedanite, Libyanate, Safaitic, and Hassean. No previous Arabic study required. Prerequisite: either ARAB 423, HEBR 423, or HEBR 426.

ARAB 490 Supervised Study (1-6, max. 18)
Special work in literary texts for graduates and undergraduates. Prerequisite: ARAB 423.

ARAB 496 Special Studies in Arabic (3-5, max. 15) VLPA
Topics vary. Offered occasionally by visiting or resident faculty.

ARAB 499 Undergraduate Research (1-6, max. 18)
Topics vary. Offered occasionally by visiting or resident faculty.

ARAB 600 Independent Study or Research (*)

Course Descriptions

ARAB 411 Syriac (3) Walker, Wheeler
Beginning Syriac including basic grammar and vocabulary with selected readings from simple prose passages and poetry selected from early Christian and other late antique writings. No previous study of Aramaic required. Offered: A.

ARAB 412 Syriac (3) Walker, Wheeler
Beginning Syriac including basic grammar and vocabulary with selected readings from simple prose passages and poetry selected from early Christian and other late antique writings. No previous study of Aramaic required. Offered: W.

ARAB 421 Biblical Aramaic (5) VLPA Noegel
Fundamentals of Aramaic grammar and the differences that distinguish Aramaic from Hebrew, includes select Aramaic portions of the Bible. Emphasis on grammar and comprehension. Designed for students with some knowledge of Hebrew. Prerequisite: HEBR 333 or HEBR 426.

ARAB 422 Targumic Aramaic (5) VLPA Noegel
The Targum (ancient Aramaic translation) of the Hebrew Bible forms an important basis for biblical interpretation. Emphasis on comprehension and interpretive strategies. Recommended: knowledge of Hebrew and/or Aramaic. Prerequisite: HEBR 333 or HEBR 426.

ARAB 423 Readings in Syriac (3) VLPA Walker, Wheeler
Readings from selected passages in Biblical and Christian literature with emphasis on writings of late antique and medieval Christian communities of Syria, Iraq, and Iran until the Mongol invasions. Prerequisite: ARAM 412. Offered: Sp.

ARAB 451 Aramaic Epigraphy (3, max. 6) VLPA Noegel, Walker, B. Wheeler
Examination of selected Aramaic inscriptions with particular focus on different languages and periods including ancient and imperial Aramaic, and late antique Aramaic epigraphy, such as Nabataean, Palmyrene, and Hatran.

Egyptian

Course Descriptions

EGYPT 410 Hieroglyphic Egyptian (5) VLPA Noegel
Provides an introduction to hieroglyphic Egyptian as written during the Middle Kingdom (c. 2040-1782 BCE). Focuses on reading and writing hieroglyphics, including reading a complete Egyptian text. No knowledge of Egyptian or any other Near Eastern language is required.
EGYPT 411 Introduction to Coptic (3) Williams
Elements of grammar of the Sahidic dialect of the Coptic language.

EGYPT 422 Readings in Coptic (3) VLPA Williams
Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi texts. Prerequisite: COPTC 411 or EGYPT 411.

EGYPT 423 Readings in Coptic (3) VLPA Williams
Readings from ancient Coptic Christian literature, with emphasis on the Nag Hammadi texts. Prerequisite: COPTC 411 or EGYPT 411.

Hebrew

Course Descriptions

HEBR 401 Intensive Elementary Modern Hebrew (15)
Intensive study of grammar, with oral and written drill and reading of simple texts. (Cannot be taken for credit if 411, 412, 413 taken.) Offered: S.

HEBR 404 Beginning Modern Hebrew (3)
Reading, writing, listening, and speaking skills in modern Israeli Hebrew. Not open for credit to student who have taken HEBR 401 or HEBR 411/412/413.

HEBR 405 Beginning Modern Hebrew (3)
Reading, writing, listening, and speaking skills in modern Israeli Hebrew. Not open for credit to student who have taken HEBR 401 or HEBR 411/412/413.

HEBR 406 Beginning Modern Hebrew (3)
Reading, writing, listening, and speaking skills in modern Israeli Hebrew. Not open for credit to student who have taken HEBR 401 or HEBR 411/412/413.

HEBR 411 Elementary Modern Hebrew (5) Sokoloff
Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.)

HEBR 412 Elementary Modern Hebrew (5) Sokoloff
Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.) Prerequisite: HEBR 411.

HEBR 413 Elementary Modern Hebrew (5) Sokoloff
Modern Israeli Hebrew. Core vocabulary, grammar, conversational text, and oral and written communication. Excerpts from modern Hebrew prose and poetry. (Cannot be taken for credit if 401 taken.) Prerequisite: HEBR 412.

HEBR 414 Elementary Biblical Hebrew (5) Noegel
Offers an inductive introduction to the biblical Hebrew language. Covers the basics of Hebrew grammar while reading the stories of Joseph in the book of Genesis. No prior knowledge of Hebrew necessary.

HEBR 415 Elementary Biblical Hebrew (5) Noegel
Continues the inductive introduction to the biblical Hebrew language begun in HEBR 414. Moves beyond the textbook and into select portions of the Hebrew Bible. Prerequisite: HEBR 331 or HEBR 414.

HEBR 421 Intermediate Modern Hebrew (5) VLPA Sokoloff
Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: either HEBR 401 or HEBR 413.

HEBR 422 Intermediate Modern Hebrew (5) VLPA Sokoloff
Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: HEBR 421.

HEBR 423 Intermediate Modern Hebrew (5) VLPA Sokoloff
Readings of selected texts in modern Hebrew with continuing emphasis on grammar, syntax, composition, and conversation. Prerequisite: HEBR 422.

HEBR 426 Biblical Hebrew Prose (5) VLPA Noegel
Explores select prose sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: HEBR 332 or HEBR 415.

HEBR 427 Biblical Hebrew Poetry (5) VLPA Noegel
Explores select poetic sections of the Hebrew Bible (Old Testament) in conjunction with English translations and commentaries. Emphasis on close readings, the grammatical insights of textual criticism, and the interpretive strategies and agendas of the English translations. Prerequisite: HEBR 333 or HEBR 426.

HEBR 428 Inscriptions from Biblical Times (5) VLPA Noegel
Surveys Northwest Semitic inscriptions that bear significantly on our understanding of Biblical history and ancient Hebrew including the Moabite stone, Israelite ostraca, Siloam engraving, Gezer calendar, Deir Alla (Gilead) inscriptions, the Asherah texts, Ammonite fragments, and Phoenician monuments. Prerequisite: HEBR 333 or HEBR 426.

HEBR 431 The Book of Job (5) VLPA Noegel
Examines the language, style, and sophistication of the biblical Book of Job within the context of ancient Near Eastern dispute poetry. Correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: HEBR 426. Offered: A.

HEBR 432 The Book of Proverbs (5) VLPA Noegel
Examines the language, style, and sophistication of the biblical Book of Proverbs within the context of ancient Near Eastern dispute poetry. Correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: HEBR 426. Offered: W.

HEBR 433 The Book of Ecclesiastes (5) VLPA Noegel
Examines the language, style, and sophistication of the biblical Book of Ecclesiastes within the context of ancient Near Eastern dispute poetry. Correlates close readings of the book in the original Hebrew language with various interpretations it has received since antiquity. Prerequisite: HEBR 426. Offered: A.

HEBR 451 Introduction to Hebrew Literature (3) VLPA Sokoloff
Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts-short poetry, fiction, and essays-with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

HEBR 452 Introduction to Hebrew Literature (3) VLPA Sokoloff
Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts-short poetry, fiction, and essays-with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.
Literary texts and analysis. Grammar, composition, and dictionary skills. Primarily modern texts—short poetry, fiction, and essays—with some selections as well from biblical passages, the liturgy, midrash, and medieval poetry. Prerequisite: HEBR 423.

HEBR 454 Hebrew Poetry (3) VLPA Sokoloff
Selections of poetry by prominent twentieth-century Hebrew poets whose texts comment or elaborate on biblical texts. Original source considered side-by-side with modern poetry, to examine ways recent literature models itself on, draws upon, and revises traditional sources. Prerequisite: HEBR 423.

HEBR 455 Hebrew Fiction (3) VLPA Sokoloff
Selections of fiction by prominent modern Hebrew writers, including S.Y. Agnon, Aharon Appelfeld, David Shahar, Aharon Megged, and others. Prerequisite: HEBR 423.

HEBR 456 Hebrew Poems and Prayers (3) VLPA Sokoloff
Examines modern Hebrew poems side by side with texts from the traditional Jewish liturgy, analyzing how contemporary writers have drawn on classical sources to reflect on matters of faith and the language of prayer. Prerequisite: HEBR 423.

HEBR 457 Hebrew in Song (3) VLPA Sokoloff
Selections of Israeli folk song, pop, rock, children’s songs, and musika mizrahit. While building vocabulary and improving dictionary and composition skills, students examine the role of popular song in the construction of modern Hebrew culture and Israeli identity.

HEBR 470 Stories of the Prophets (3) I&S/VLPA B. Wheeler
Reading and discussion of Jewish and Islamic exegesis of selected Biblical and Quranic narratives dealing with such figures as Moses, Abraham, Jacob, or Adam and Eve. Prerequisite: either ARAB 432 or HEBR 423. Offered: jointly with ARAB 470.

HEBR 472 Quran and Bible Masorah (3) VLPA Wheeler
Introduces and discusses selected readings in textual apparatuses for the Quran and Bible. Attention to marginalia in Rabbinic texts, and Islamic scholars such as al-Zarkashi and as-Suyuti. Prerequisite: either ARAB 437, HEBR 427, or HEBR 432. Offered: jointly with ARAB 472.

HEBR 490 Supervised Study (1-6, max. 18)
Special work in literary texts for graduates and undergraduates. Prerequisite: HEBR 423.

HEBR 499 Undergraduate Research (1-6, max. 18)

HEBR 600 Independent Study or Research (*)
Persian

Course Descriptions

PRSAN 401 Intensive Elementary Tajik (15)
Intensive study of grammar with oral and written drill and reading of selected texts in Tajik, the literary language spoken and written in the Central Asian Republic of Tajikistan. Offered: S.

PRSAN 404 Intensive Persian for Native Speakers (15) VLPA
Enables students with a degree of proficiency in spoken Persian to read and write, to translate rudimentary texts, and to conceptualize the use of the formal style of composition. Reading, writing, and comprehension, particularly of handwritten manuscripts of the scribal tradition. Also covers calligraphy, translation, journalistic prose, and other facets of the language and the script. Offered: S.

PRSAN 411 Elementary Persian (5)
Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words.

PRSAN 412 Elementary Persian (5)
Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 411.

PRSAN 413 Elementary Persian (5)
Conversation, pronunciation, and graded reading. Persian alphabet and basic sentence constructions. Offers rudimentary conversational and reading ability with a vocabulary of about two thousand words. Prerequisite: PRSAN 412.

PRSAN 421 Intermediate Persian (5) VLPA
Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 413.

PRSAN 422 Intermediate Persian (5) VLPA
Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 421.

PRSAN 423 Intermediate Persian (5) VLPA
Reading of simple texts with emphasis on reading and writing, conversation skills, grammar, and syntax. Builds a vocabulary of standard Persian in preparation for advanced reading and comprehension of literary texts. Prerequisite: PRSAN 422.

PRSAN 431 Advanced Persian (3) VLPA
Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 423.

PRSAN 432 Advanced Persian (3) VLPA
Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 431.

PRSAN 433 Advanced Persian (3) VLPA
Designed to improve reading and writing skills. Graded reading and writing and exposure to the writing system, textual history, newspaper reading, and translation. Cultural materials presented as appropriate. The art of calligraphy introduced. For students with a degree of proficiency in spoken Persian. Prerequisite: PRSAN 432.

PRSAN 451 Introduction to Persian Literature (3) VLPA
Selected texts from modern and classical Persian poetry and prose. Provides insights into Iranian culture and its past and present achievements in literature. Prepares the student for a more comprehensive and critical study of Persian literature. Prerequisite: PRSAN 423.

PRSAN 452 Modern Persian Literature: A Survey (3) VLPA
Development of poetry and prose after Iran felt and absorbed the impact of Western cultures. Periods and genres. Works of such authors as Jamalzadeh, Hedayat, Dehkoda, Al-e Ahmad, Nima, Sepehri, and Forough. Prerequisite: PRSAN 423.

PRSAN 453 Classical Persian Literature: A Survey (3) VLPA
History of Persian literature from Rudaki to Hafiz. Studies epic, lyric, and mystic traditions placed in historical settings. Covers the most important genres such as the Qasida, the Ghazal, the Ruba’i and the Masnavi. Prerequisite: PRSAN 423.
Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 412 Elementary Uzbek (5) Cirtautas
Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 413 Elementary Uzbek (5) Cirtautas
Introduction to the modern written and spoken language. Cannot be taken for credit if 401 taken.

TKIC 414 Introduction to Kazakh (3) Cirtautas
Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 402 taken.

TKIC 415 Introduction to Kazakh (3) Cirtautas
Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 402 taken.

TKIC 416 Introduction to Kazakh (3) Cirtautas
Position of Kazakh within the community of other Turkic languages; alphabets used for Kazakh; reading of texts from Kazakhstan and China (Xinjiang); oral and written exercises. Cannot be taken for credit if 402 taken.

TKIC 417 Introduction to Uighur (5) Cirtautas
Designed for students with no prior knowledge of Uighur. Includes acquisition of Uighur Arabic alphabet, general phonological rules, and basic grammar. Basic reading, listening, and oral comprehension practice all offered throughout the course. Offered: A.

TKIC 418 Introduction to Uighur (5) Cirtautas
Continuation of basic modern Uighur: phonological rules, grammar, and vocabulary. Practice in reading, listening, and oral comprehension. Prerequisite: TKIC 417. Offered: W.

TKIC 419 Introduction to Uighur (5) Cirtautas
Continuation of basic modern Uighur: phonological rules, grammar, and vocabulary. Practice in reading, listening, and oral comprehension. Prerequisite: TKIC 418. Offered: Sp.

TKIC 421 Intermediate Uzbek (3) VLPA Cirtautas
Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: either TKIC 401 or TKIC 413.

TKIC 422 Intermediate Uzbek (3) VLPA Cirtautas
Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: TKIC 421.

TKIC 423 Intermediate Uzbek (3) VLPA Cirtautas
Continuation of elementary Uzbek. Oral work, grammar, and readings in Uzbek literature. Prerequisite: TKIC 422.

TKIC 451 Introduction to Turkic Studies (3) VLPA Cirtautas
Bibliography, problems, and methods of research in the field of Turkic studies for advanced students of Turkish/Turkic languages, including readings in those languages on the languages, literatures, and ethnography of past and present Turkic peoples.

TKIC 454 Introduction to Uzbek Literature (3) VLPA Cirtautas
Readings from selected Uzbek writers. Content varies.

TKIC 455 Introduction to Uzbek Literature (3) VLPA Cirtautas
Readings from selected Uzbek writers. Content varies.

TKIC 456 Introduction to Uzbek Literature (3) VLPA Cirtautas
Readings from selected Uzbek writers. Content varies.
TKIC 490 Supervised Study (1-6, max. 18)
Special work in literary texts for graduates and undergraduates. Prerequisite: either TKIC 404, TKIC 405, or TKIC 423.

TKIC 499 Undergraduate Research (3-5, max. 15)
For Turkic language and literature majors.

TKIC 542 Comparative and Historical Grammar of Turkic Languages (3) Cirtautas
Classification of the Turkic languages; alphabets used; phonology, morphology, and syntax; lexical composition; structure changing developments. Prerequisite: TKIC 404.

TKIC 543 Comparative and Historical Grammar of Turkic Languages (3) Cirtautas
Classification of the Turkic languages; alphabets used; phonology, morphology, and syntax; lexical composition; structure changing developments. Prerequisite: TKIC 404.

TKIC 546 Old Turkic (3) Cirtautas
Introduction to Runic script; phonology, morphology, and syntax of the oldest form of Turkic; reading and translation of eighth-century inscriptions of historical and literary importance. Prerequisite: permission of instructor.

TKIC 547 Old Uighur (3) Cirtautas
Introduction to script systems; phonology, morphology, and syntax. Reading and translation of mainly Buddhist texts in Uighur script, eighth through eleventh centuries. Prerequisite: background in a Turkic language or permission of instructor.

TKIC 561 Middle Turkic (3) Cirtautas
Introduction to the phonology, morphology, and syntax of the Middle Turkic languages; reading and translation of texts in Karakhanid, Khorazmian Turkic, Kipchak, and Chagatai. Prerequisite: permission of instructor.

TKIC 562 Middle Turkic (3) Cirtautas
Introduction to the phonology, morphology, and syntax of the Middle Turkic languages; reading and translation of texts in Karakhanid, Khorazmian Turkic, Kipchak, and Chagatai. Prerequisite: permission of instructor.

TKIC 563 Seminar on Turkic Literature (5) Cirtautas
Topics in oral and written literature. Prerequisite: permission of instructor.

TKIC 600 Independent Study or Research (*)
Turkish

Course Descriptions

TKISH 411 Elementary Turkish (5)
Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. (Cannot be taken for credit if TKISH 401 is taken.)

TKISH 412 Elementary Turkish (5)
Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. (Cannot be taken for credit if TKISH 401 is taken.) Prerequisite: TKISH 411.

TKISH 413 Elementary Turkish (5)
Introduction to modern Turkish. Pronunciation and conversation, grammar and composition, graded reading. Latin characters used throughout. (Cannot be taken for credit if TKISH 401 is taken.) Prerequisite: TKISH 412.

TKISH 421 Intermediate Turkish (5) VLPA
Introduction to modern Turkish literature. Prerequisite: TKISH 413.

TKISH 422 Intermediate Turkish (5) VLPA
Introduction to modern Turkish literature. Prerequisite: TKISH 421.

TKISH 423 Intermediate Turkish (5) VLPA
Introduction to modern Turkish literature. Prerequisite: TKISH 422.

TKISH 451 Readings in Turkish Literary History I: Modern (3) VLPA Kuru
The development of modern Turkish literature and its ties to, and divergence from, the Ottoman tradition. Readings in modern and Tanzimat poetry, short story, drama, and novel. Prerequisite: TKISH 423.

TKISH 452 Readings in Turkish Literary History II: Literature of the Ottoman Empire (3) VLPA Kuru
The parallel development of the classical high-culture literature and the popular literatures of the Ottoman Empire. Readings in poetry, history, travel-literature, drama, and popular narrative forms. Prerequisite: TKISH 423.

TKISH 453 Ottoman Travelers and Geography (3) VLPA MacKay
Introduction to the geographic literature of Ottoman Turkish: readings from traditional cosmographies, travel journals, sailing instructions (portulans), ambassadorial and secret service reports. Prerequisite: TKISH 456.

TKISH 454 Turkish Literary Genres: Prose (3) VLPA
Major genres, styles, and themes of Turkish art-prose from Ottoman times to present; creation of stylistic and critical norms. Prerequisite: TKISH 423.

TKISH 455 Turkish Literary Genres: Poetry (3) VLPA
Poetic traditions of Turkey with a focus on the development of peculiarly Turkish aspects of style and structure. Social functions of poetry and the poetic milieu. Prerequisite: TKISH 423.

TKISH 456 Introduction to Ottoman Turkish (3) VLPA Kuru
Introduction to Turkish in Arabic characters to cover the peculiar grammatical and syntactical problems of Ottoman.

TKISH 490 Supervised Study (1-6, max. 18)
Special work in literary texts for graduates and undergraduates. Prerequisite: TKISH 423.

TKISH 499 Undergraduate Research (1-6, max. 18)

TKISH 600 Independent Study or Research (*)

Neurobiology
318 Hitchcock

Neurobiology offers students an intense introduction to the study of nervous systems. Faculty in both the College of Arts and Sciences and the School of Medicine teach courses in the major. Students study the cellular and molecular properties of single nerve cells and the connections among them and learn how these properties determine animal behavior and human disease.

Undergraduate Program
Adviser
318 Hitchcock, Box 355320
206-616-3982

The Neurobiology Program offers the following program of study:
- The Bachelor of Science degree with a major in neurobiology
Bachelor of Science

**Department Admission Requirements**

BIOL 180, BIOL 200, BIOL 220, with minimum 2.0 grade in each
Completion of most supporting course work in physics, math, and chemistry recommended (see specific course lists, below), with minimum 2.50 GPA in any such work completed at time of application

Admission is competitive; meeting minimum standards guarantees consideration but not acceptance. Early application is encouraged and may increase chances for acceptance. Since the program uses rolling admission, there is no specific deadline for applying. See adviser for details about applying.

**Major Requirements**

Minimum 86 credits, as follows:

**Supporting course work (minimum 48 credits):**

- **Chemistry:** Option 1 — CHEM 120, CHEM 220, CHEM 221; Option 2 (recommended) — CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); and CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239) (or CHEM 335, CHEM 336, CHEM 337) (labs not required)

- **Physics:** Option 1: PHYS 114, PHYS 115; Option 2 (recommended): PHYS 121, PHYS 122. (8 to 10 credits)

- **Mathematics:** Two quarters of calculus (MATH 124, MATH 125, or MATH 144, MATH 145, or Q SCI 291, Q SCI 292)

- **Physical Chemistry:** Strongly recommended but not required. CHEM 355, or CHEM 452 and CHEM 453 (CHEM 456 may be substituted)

**Introductory Biology (minimum 15 credits):**

- BIOL 180, BIOL 200, BIOL 220

**Introduction to Neurobiology (10 credits):** NBIO 301, NBIO 302.

**Advanced courses in neurobiology (12 credits):** NBIO 401, NBIO 402, NBIO 403, NBIO 404.

**Electives:** Minimum 16 credits from a wide variety of 400-level courses in the biological sciences. See adviser for list of courses. Courses not listed may be allowed with permission of program director. Students may apply up to 7 credits of undergraduate research toward the 16 elective credits.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Throughout the core sequence of neurobiology, students gain a deep understanding of the basic concepts of nervous system function and learn many of the basic techniques used to study nerve cells. Students also learn how to analyze neurophysiological data, and compose and present results. Graduates pursue careers in medicine, public health, education, pharmaceutical sales, computing, and graduate study.

- **Instructional and Research Facilities:** Labs are required with introductory courses. NBIO 301 and NBIO 302. The program offers state-of-the-art facilities and equipment for each course.

- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- **Research, Internships, and Service Learning:** Most neurobiology students participate in undergraduate research with faculty from both the College of Arts and Sciences and the School of Medicine.

- **Department Scholarships:** None offered.

**Student Organizations/Associations:** Beta Beta Beta, the national premedical honorary society.

**Faculty**

Jeansok Kim, Ph.D., Assistant Professor of Psychology
B.S., Psychobiology, University of California, Los Angeles; Ph.D., Behavioral Neuroscience, University of California, Los Angeles

William Moody, Ph.D., Professor of Biology, Director, Undergraduate Neurobiology
B.S., Molecular Biology, Yale University; Ph.D., Neurobiology, Stanford University

David I. Perkel, Ph.D., Associate Professor of Biology and Otolaryngology
BA, Harvard University; Ph.D., Neuroscience, University of California, San Francisco

Farrel (Ric) Robinson, Ph.D., Associate Professor Department of Biological Structure
BA, Psychology, University of Chicago; Ph.D., Psychology, Brown University

**Course Descriptions**

- **NBIO 301 Introduction to Cellular and Molecular Neurobiology (5)** NW Moody
  Introduces students to the physiological and molecular properties of individual nerve cells and the synaptic connections between them, and to principles of nervous system development. Includes weekly laboratory sessions. Prerequisite: either BIOL 202 or BIOL 220. Offered: W.

- **NBIO 302 Introduction to Systems and Behavioral Neurobiology (5)** NW Canfield, Kennedy, Perkel
  Introduces neuroethology, i.e., the mechanisms by which neurons and the synaptic connections among them produce sensory perceptions and complex behavioral outputs. Includes weekly laboratory sessions. Prerequisite: NBIO 301. Offered: Sp.

- **NBIO 401 Systems Neurobiology (5)** NW Robinson
  Introduces students to the anatomical and physiological organization of the major sensory, motor, and associative systems of the mammalian brain. Behavioral data used to stress functional integration of systems. Includes gross brain anatomy demonstration and computer tutorials. Prerequisite: NBIO 302. Offered: A.

- **NBIO 402 Neuropathophysiology (3)** NW Critt
  Introduces students to the basic physiological mechanisms of information processing in the mammalian brain by having students study a series of human neurological diseases that result from a specific disruption of these mechanisms. Prerequisite: NBIO 401. Offered: W.

- **NBIO 403 Systems and Behavioral Neurobiology (3)** NW Robinson
  Topics include information processing in sensory and motor systems, sensory-motor integration, learning, and memory. Using examples from the field of neuroethology, encourages students to independently work on problems taken from the recent neurobiological research literature. Prerequisite: NBIO 401. Offered: W.

- **NBIO 404 Neuropharmacology (3)** NW Stella
  Actions of drugs on the brain at clinical, cellular, and molecular levels. Therapeutic use of drugs in treatment of neurological and psychiatric diseases. Abuse of drugs and the mechanisms of addiction, tolerance, and withdrawal. Prerequisite: NBIO 401. Offered: Sp.

- **NBIO 440 Topics in Current Neurobiology Research (2, max.**
6) NW
Credit/no credit only. Prerequisite: NBIO 302.

NBIO 450 Current Research Literature in Neurobiology (2, max. 6) NW
Weekly journal club in neurobiology. Students read and discuss original research articles in neurobiology, centered around a specific topic each quarter. Credit/no credit only. Prerequisite: either BIOL 202 or BIOL 220.

NBIO 496 Peer Teaching Assistant in Neurobiology (5)
Direct classroom experience teaching in NBIO 301 or 302. Credit/no credit only. Prerequisite: NBIO 302. Offered: WSp.

NBIO 499 Individual Research in Neurobiology (3-6, max. 18)
Students carry out projects in laboratories of program faculty. Prerequisite: NBIO 302.

Philosophy
345 Savery
Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, aesthetics, philosophy of science, philosophy of mind, philosophy of language, philosophy of law, and philosophy of religion.

Undergraduate Program
Adviser
345 Savery, Box 353350
206-616-1488
philinfo@u.washington.edu

The Department of Philosophy offers the following programs of study:
• The Bachelor of Arts degree with a major in philosophy
• The Bachelor of Arts degree with a major in history and philosophy of science, offered jointly with the Department of History
• A minor in philosophy

Bachelor of Arts

History and Philosophy of Science
Suggested First- and Second-Year College Courses: PHIL 120, PHIL 160. Courses that develop writing skills. Introductory science courses and mathematics courses through calculus.

Department Admission Requirements
HIST 311, HIST 312; PHIL 160 or PHIL 460; PHIL 120, each with a minimum grade of 2.0.
Completion of 10 credits toward the Natural World (science) requirement (see below), each course with a minimum grade of 2.0.
Minimum UW GPA of 2.0.
Completion of 10 credits of composition/writing courses with a minimum grade of 2.0 for each course. This requirement may be met by a freshman English composition course, a “W” course, or any course in which the student has written a graded paper (to be reviewed by HPS faculty) of at least 10 pages.

Major Requirements
85 credits as follows:
Core Courses: HIST 311, HIST 312, HIST 390; PHIL 160 or PHIL 460; PHIL 120 (25 credits). A minimum grade of 2.0 in each course and an overall minimum GPA of 2.50.
Electives: 25 credits from the following, of which at least 10 must be PHIL courses and at least 5 must be HIST courses (or others upon petition): HIST 211, HIST 215, HIST 310, HIST 313 (or ASTR 313), HIST 314, HIST 315, HIST 316, HIST 317, HIST 318 (also MHE 424), HIST 412, PHIL 112, PHIL 350, PHIL 360, PHIL 406, PHIL 450, PHIL 460 (if PHIL 160 has been taken), PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, PHIL 483. A minimum grade of 2.0 in each class.
Capstone: Completion of HPS 400, with a minimum grade of 2.0 (5 credits).

Science Component: 30 credits of Natural World (NW) courses from anthropology, astronomy, atmospheric sciences, biology, chemistry, computer science, earth and space sciences, economics, environmental studies, mathematics, physics, psychology, and sociology, with a minimum GPA of 2.50 in these courses and a minimum grade of 2.0 in each course. At least 15 of the credits must be outside mathematics.

Minor
Minor Requirements: 30 credits, to include:
PHIL 115 or PHIL 120, or an upper-division course in logic
At least 15 UW philosophy credits at the 300 level or above, excluding PHIL 484.

Student Outcomes and Opportunities
• Learning Objectives and Expected Outcomes: Graduates of the Department of Philosophy acquire considerable skills in abstract thinking, analysis, and critical writing (constructing and critiquing arguments). Because of these skills, philosophical training is invaluable in almost any area of life. Recent graduates have been successful in software development, financial planning, journalism, teaching, and aviation. A few go on to graduate school and become professional philosophers.

Students’ work is subjected to careful critical scrutiny. As a result, students benefit from philosophy courses with an increased competence in expository clarity, logical rigor, and analytical skill.

Philosophy is an excellent undergraduate major for pre-professional students. It is perhaps ideal for those who aspire to work in the legal profession. The History and Philosophy of Science major is of particular interest to
those planning careers in the sciences. Courses in ethics offer students in any field the opportunity to think clearly about the normative dimensions of their career choices. Because the skills of philosophical analysis can be applied widely, philosophy is always a good complementary second degree for any major, whether it is in the physical sciences, social sciences, arts, or humanities.

- **Instructional and Research Facilities:** The Philosophy Writing Center provides a free tutoring service to any student writing a philosophical paper. The Philosophy Commons includes a computer lab for students and a small conference room that can be reserved for study groups.

- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- **Research, Internships, and Service Learning:** The department offers internship credits for students leading its new majors seminar. Students may also arrange for internship credit with individual faculty. See adviser for details.

- **Department Scholarships:** None offered.

- **Student Organizations/Associations:** The Society for Undergraduate Philosophy Students (SUPS) is dedicated to the informal discussion of philosophical issues. Women in Philosophy encourages members of traditionally underrepresented groups to participate in the field.

*Of Special Note:* The department offers a new majors seminar for those wishing to explore the major.

**Graduate Program**

Graduate Program Coordinator
345 Savery, Box 353350
206-543-5855
philinfo@u.washington.edu

**Master of Arts, Doctor of Philosophy**

The Department of Philosophy offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees, the M.A. program serving as the initial stage of the Ph.D. program. The Master of Arts program option is a two-year non-thesis program which may be extended to three years depending on the outcome of the spring research papers. The student must take twelve courses in philosophy, satisfy a logic requirement, and at the end of the second year, submit three research papers for evaluation by the graduate faculty of the department. The courses and the papers must satisfy a distribution requirement. The departmental evaluation of the student’s papers and course work determines whether an M.A. degree is awarded and also whether admission to the Ph.D. program is granted. The M.A. portion of the program serves as the initial stage of the Ph.D. program.

The Ph.D. program, which normally requires at least two years of study beyond the M.A., has three general requirements: (1) General Examination, (2) dissertation, and (3) Final Examination.

**Special Requirements**

An undergraduate major in philosophy is recommended, although not required, for admission to the M.A. program. An applicant’s philosophical potential is assessed primarily on the basis of a sample of his or her written work in philosophy and secondarily on the basis of his or her undergraduate record, Graduate Record Examination scores, and letters of recommendation.

**Financial Aid**

The department has some teaching assistantships available to incoming students and the Graduate School offers some non-teaching assistantships.

**Faculty**

Kenneth Clatterbaugh, Professor, Chair, Ph.D., 1967, Indiana University

Ann M. Baker, Senior Lecturer, Ph.D., 1990, University of Washington

Michael Blake, Associate Professor, Ph.D., 1998, Stanford University

Laurence BonJour, Professor, Ph.D., 1969, Princeton University

Robert C. Coburn, Ph.D., 1958, Harvard University

S. Marc Cohen, Professor, Ph.D., 1967, Cornell University

Arthur Fine, Professor, Ph.D., 1963, University of Chicago

Stephen Gardiner, Assistant Professor, Ph.D., 1999, Cornell University

Sara Goering, Assistant Professor, Ph.D., 1998, University of Colorado

Lynn Hankinson Nelson, Professor, Ph.D., 1987, Temple University

David Keyt, Professor, Ph.D., 1955, Cornell University

Andrew Light, Associate Professor, Ph.D., 1996, University of California, Riverside

Adam Moore, Assistant Professor, Ph.D., 1997, Ohio State University

Ronald M. Moore, Associate Professor, Ph.D., 1971, Columbia University

Jean Roberts, Associate Professor, Ph.D., 1982, University of Pittsburgh

Michael Rosenthal, Associate Professor, Ph.D., 1996, University of Chicago

Angela Smith, Assistant Professor, Ph.D., 1999, Harvard University

William J. Talbott, Professor, Ph.D., 1976, Harvard University

Cass Weller, Associate Professor, Ph.D., 1983, University of Pittsburgh

Andrea Woody, Associate Professor, Graduate Adviser, Ph.D., 1997, University of Pittsburgh

Alison Wylie, Professor, Ph.D., 1982, State University of New York
Adjunct & Affiliate Faculty

Nancy S. Jecker, Adjunct Associate Professor, Medical History and Ethics

Christine Keyt, Affiliate Assistant Professor, Existentialism, Indian Philosophy

Jana Mohr Lone, Affiliate Assistant Professor, Ethics, Philosophy of Education, Philosophy of Childhood, Philosophy of Law

Miriam Lucien, Affiliate Assistant Professor, Logic,

Henry J. Staten, Adjunct Professor, Wittgenstein and Twentieth Century Continental Philosophy

Michael Townsend, Adjunct Associate Professor, Law

Emeritus Faculty

John F. Boler, Medieval Philosophy, Peirce,

Paul Dietrichson, Philosophy of Religion, Kant, Existentialism,

Charles Marks, Philosophy of Mind, Modern Philosophy

James K. Mish’alani, Contemporary Continental Philosophy

Karl H. Potter, Philosophy of Language, Indian Philosophy

Course Descriptions

PHIL 100 Introduction to Philosophy (5) I&S BonJour, Rosenthal
Major philosophical questions relating to such matters as the existence of God, the foundations of knowledge, the nature of reality, and the nature of morality. Approach may be either historical or topical. Offered: AWSpS.

PHIL 102 Contemporary Moral Problems (5) I&S/VLPA A. Moore
Philosophical consideration of some of the main moral problems of modern society and civilization, such as abortion, euthanasia, war, and capital punishment. Topics vary.

PHIL 110 Introduction to Social and Political Philosophy (5) I&S Clatterbaugh, Coburn
An introduction to political theories such as conservatism, liberalism, and socialism and their treatment of select social issues.

PHIL 112 Philosophical Issues in Environmental Studies (5) I&S Clatterbaugh, Coburn, Woody
Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change.

PHIL 114 Philosophical Issues in the Law (5) I&S R. Moore
Analysis and critical assessment of various philosophical issues in law and legal reasoning. Material drawn from actual law cases, as well as writings by contemporary philosophers of law and lawyers. Topics include criminal responsibility, civil disobedience, abortion, enforcement of morals. Special legal or philosophical training not required.

PHIL 115 Practical Reasoning (5) I&S, QSR
Introduction to logic emphasizing concepts and methods useful for practical analysis of arguments in everyday contexts; meaning, syllogisms, logical diagrams, inductive and statistical inference, informal fallacies, argument structure, perhaps some beginning symbolic logic. Offered: AWSpS.

PHIL 120 Introduction to Logic (5) I&S/NW, QSR BonJour, Cohen, Fine, Keyt, Welter
Elementary symbolic logic. The development, application, and theoretical properties of an artificial symbolic language designed to provide a clear representation of the logical structure of deductive arguments. Offered: AWSpS.

PHIL 160 Why Do We Believe in Quarks, Evolution, and Other Crazy Things? Perspectives on Science, Reason, and Reality (5) I&S Hankinson Nelson
Study of how scientific theories are justified and why they are accepted, using selected examples from the history of science.

PHIL 199 New Majors Seminar (2) I&S/VLPA
Introduces undergraduates to the field and to the interests of various faculty. Prerequisite: one previous PHIL course.

PHIL 200 Topics in Philosophy (3-5, max. 10) I&S
A study of philosophical topics at the introductory level. The content of the course is entirely at the discretion of the instructor.

PHIL 206 Philosophy of Feminism (5) I&S
Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with POL S 212/WOMEN 206.

PHIL 230 Philosophic Issues in World Affairs (3) I&S Coburn
Moral problems that arise in connection with such topics as affluence, hunger, and overpopulation; global environmental degradation; war and weaponry; restructuring the international order.

PHIL 240 Introduction to Ethics (5) I&S/VLPA Roberts, Smith, Talbott
Critical introduction to various philosophical views of the basis and presuppositions of morality and moral knowledge. Critical introduction to various types of normative ethical theory, including utilitarian, deontological, and virtue theories.

PHIL 241 Topics in Ethics (5, max. 10) I&S/VLPA
Introduction to ethics through in-depth study of one or more selected topics (e.g., limits of moral community, animal rights, moral education, and freedom). Topics vary.

PHIL 242 Introduction to Medical Ethics (5) I&S/VLPA
Goering Introduction to ethics, primarily for first- and second-year students. Emphasizes philosophical thinking and writing through an in-depth study of philosophical issues arising in the practice of medicine. Examines the issues of medical ethics from a patient’s point of view.

PHIL 257 Introduction to Philosophy of Religion (5) I&S Clatterbaugh, Coburn
Consideration of the sources of religious ideas and practices, the main kinds of religious views and the problems they raise, and the different forms that spirituality can take. Issues concerning the relations of religion to science and morality also treated.

PHIL 301 Intermediate Topics in Philosophy (3-5, max. 10) I&S Baker, Woody
Philosophical topics at the intermediate level. Content varies each quarter, depending on instructor.

**PHIL 314 Philosophy of Crime and Punishment (5) I&S R. Moore**
Examination of philosophical theories regarding criminal habits and punishment and the philosophical problems connected with specific topics in criminal law. Examines proper subject matter of criminal law (drug use, pornography, euthanasia); limits of criminal sanctions; crime and privilege (corporate crime, white-collar crime, blackmail); justifications for punishment; mercy; and execution.

**PHIL 320 Ancient Philosophy (5) I&S Cohen, Keyt, Roberts, Weller**
Survey of ancient Greek philosophy, beginning with the pre-Socratics and proceeding on through Plato to Aristotle.

**PHIL 321 Medieval Philosophy (5) I&S**
Development of main lines of philosophical thought in the Latin West from 400 to 1400, with emphasis on Augustine, Anselm, Abelard, Aquinas, and Ockham.

**PHIL 322 Modern Philosophy (5) I&S Baker, BonJour, Clattenburg, Coburn, Rosenthal, Weller**
Examination of metaphysical and epistemological problems from the works of Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant.

**PHIL 325 Nineteenth-Century Philosophy (5) I&S Coburn**
Examination of post-Kantian thinkers through the end of the nineteenth century considering such major themes as idealism, romanticism, positivism, historicism, naturalism, existentialism, and pragmatism.

**PHIL 327 American Philosophy (5) I&S**
Study of some of the major American philosophers such as Peirce, Royce, Dewey, William James, C. I. Lewis, Goodman, Quine.

**PHIL 330 History of Ancient Political Philosophy (5) I&S Keyt, Roberts**
Political philosophy of fourth- and fifth-century Greece, especially the Sophists, Plato, and Aristotle, stressing the connection between the political philosophy and the underlying philosophical system of each philosopher.

**PHIL 332 History of Modern Political Philosophy (5) I&S BonJour, Clattenburg, Talbott**
Examination of major political philosophies from the sixteenth century to the nineteenth century, with attention to the underlying philosophical methods and foundations.

**PHIL 334 Philosophy of Marxism (3) I&S Clattenburg**
Philosophy of Marx and the Marxist tradition with attention to key Marxist concepts such as exploitation, alienation, and historical materialism.

**PHIL 335 Plato’s Republic (5) I&S/VLPA Keyt**
Designed especially for philosophy majors, but open to non-majors. Intensive study of Plato’s masterpiece. Prerequisite: one PHIL course.

**PHIL 338 Philosophy of Human Rights (5) I&S Talbott**
Theories of human rights and the bearing of these theories on issues of public policy such as legitimacy of war and terrorism, economic justice, and whether future generations have rights.

**PHIL 340 History of Ancient Ethics (5) I&S/VLPA Keyt, Roberts**
Development of moral thought from Socrates through the Stoics. Particular emphasis on the ethical writings of Plato and Aristotle.

**PHIL 342 History of Modern Ethics (5) I&S/VLPA Jecker, Smith, Weller**
Development of moral thought from Hobbes through Nietzsche, with particular emphasis on the ethical writings of Hume, Kant, and John Stuart Mill.

**PHIL 344 History of Recent Ethics (5) I&S/ VLPA**
Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition.

**PHIL 345 Moral Issues of Life and Death (5) I&S/ VLPA Coburn, Goering**
Examination of such topics as war and murder, famine relief, capital punishment, high-risk technologies, abortion, suicide, and the rights of future generations.

**PHIL 346 Personal Values and Human Good (3) I&S Baker, Coburn, Goering, Smith**
Examination of the idea of a good human life. Emphases differ from year to year. Typical topics include happiness and prudence, rationality and life plans, personal values and the meaning of life, autonomy and false consciousness, self-respect and self-esteem, honesty and self-deception, faith and “vital lies.”.

**PHIL 347 Philosophy in Literature (5) I&S/ VLPA**
Study of philosophical ideas expressed in works of literature.

**PHIL 350 Introduction to Epistemology (4) I&S Baker, BonJour, Talbott**
Nature, definition, and possibility of knowledge.

**PHIL 353 Introduction to the Philosophy of Language (5) I&S**
Philosophical theories about the nature of language. Topics include meaning, reference, truth, propositions, relations between language and thought.

**PHIL 356 Introduction to Metaphysics (5) I&S Baker**
Introductory examination of some of the main problems in metaphysics, such as the nature of truth and reality, the metaphysical status of properties, the existence of free will.

**PHIL 360 Introductory Topics in Philosophy of Science (5, max. 10) I&S Fine, Hankinson Nelson, Woody**
Study of one or more current topics in philosophy of science such as scientific realism, explanation, confirmation, causation. Prerequisite: one PHIL course; recommended: PHIL 120; PHIL 160.

**PHIL 363 Introduction to the Philosophy of Mind (5) I&S**
Various theories of the nature of mind, the relationship between mind and body, the self, introspection, and knowledge of other minds.

**PHIL 386 Introduction to the Philosophical Systems of India (5) I&S**
The fundamental views of classical Indian philosophical schools on epistemology and metaphysics through readings in translation of basic works. Nyaya, Vaisesika, Samkhya, Yoga, Jain philosophy, Vijnanavada and Madhyamika Buddhism, Advaita Vedanta and later developments. Offered: jointly with SISSA 386.

**PHIL 399 Foreign Study (2-5, max. 10)**
Upper division philosophy studies with no direct UW equivalents, taken through UW foreign study programs.

**PHIL 401 Advanced Topics in Philosophy (3-5, max 10) I&S Baker**
A study of philosophical topics at the advanced level. Topics vary.

**PHIL 406 Philosophical Topics in Feminism (5) I&S Roberts, Hankinson Nelson, Woody**
Detailed examination of questions raised by recent feminist scholarship in particular areas of philosophy, such as political...
theory, ethics, epistemology, or philosophy of science. Emphasis varies.

PHIL 410 Social Philosophy (5) I&S Clatterbaugh, Coburn, Talbott
An examination of topics pertaining to social structures and institutions such as liberty, distributive justice, and human rights.

PHIL 411 Justice in Health Care (5) I&S/VLPA Jecker
Examination of the ethical problem of allocating scarce medical resources. Emphasis on fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or medical ethics. Offered: jointly with MHE 474.

PHIL 412 Indian Philosophy (5) I&S
Historical survey of the major systems and the traditional problems of philosophy in India. Readings in Buddhism, Nyaya, Samkhya, and Vedanta.

PHIL 414 Philosophy of Law (3) I&S BonJour, A. Moore, R. Moore
Nature and function of law. Relation of law to morality. Legal rights, judicial reasoning.

PHIL 418 Indian Buddhist Philosophy (3) I&S
Topics from Buddhist thought, both Sarvakayast and Mahayanist, touching on the following areas: epistemology, theory of liberation, metaphysics and the theory of the absolute, cosmology, and ethics. Readings in translation. At least one course in Indian philosophy or Hinduism or Buddhism recommended.

PHIL 422 Studies in Continental Rationalism (3, max. 9) I&S Clatterbaugh, Coburn
Study of one or more of the major continental Rationalists: Descartes, Spinoza, Leibniz.

PHIL 425 Studies in Nineteenth-Century Philosophy (3) I&S Baker
Study of post-Kantian metaphysical theories, with special emphasis on idealism, realist, and/or pragmatist. Typical authors include F. H. Bradley, J. McTaggart, Royce, and Green.

PHIL 426 Twentieth-Century Philosophy (5) I&S Baker, Weller
A study of development of contemporary analytic philosophy, the revolt against idealism, and the linguistic turn in philosophy.

PHIL 430 Philosophy of Plato (3, max. 6) I&S Cohen, Keyt, Roberts, Weller
Study of selected middle and late dialogues.

PHIL 433 Philosophy of Aristotle (3, max. 6) I&S Cohen, Keyt, Roberts, Weller
Study of several major Aristotelian treatises.

PHIL 434 Philosophy of Thomas Aquinas (3) I&S
Examination of the major philosophical positions of Thomas Aquinas in the theory of knowledge, metaphysics, and ethics.

PHIL 436 British Empiricism (3) I&S BonJour
Examination of the metaphysical and epistemological views of Locke and Berkeley, with perhaps some attention also to Hume. Prerequisite: either PHIL 322 or PHIL 350.

PHIL 437 Philosophy of Hume (3) I&S Marks, Weller
Study Hume’s analyses of knowledge, the passions, and morals.

PHIL 438 Philosophy of Kant (5) I&S BonJour, Weller
Systematic study of The Critique of Pure Reason.

PHIL 439 The Later Philosophy of Wittgenstein (3) I&S Coburn
Detailed study of topics in the later philosophy of Wittgenstein, with particular attention to the Philosophical Investigations.

PHIL 440 Ethics (5) I&S Coburn, Roberts, Smith, Talbott
Critical examination of the concepts and judgments of value, including an analytical treatment of the notions of good and bad, right and wrong, and obligation. Emphasis varies from quarter to quarter.

PHIL 443 Philosophy and Linguistics (3) I&S/VLPA
Study of philosophical problems that arise in the attempt to understand current linguistic theories and of the implications of linguistics for philosophy. Offered: jointly with LING 443.

PHIL 444 Philosophy of Language-Pragmatics (3) I&S/VLPA
Language as communicative activity. Speech act theory in Austin, Grice, and contemporary writings. Applications to problems of reference, presupposition, metaphor, relativism. Offered: jointly with LING 444.

PHIL 445 Philosophy of Art (5) I&S/VLPA R. Moore
Critical examination of various accounts of the nature of art, artistic activity, the aesthetic experience. Problems in interpretation and evaluation of works of art.

PHIL 446 Development of Aesthetic Theory (5) I&S/VLPA R. Moore, Coburn, Roberts, Smith, Talbott
Historical development of aesthetics, emphasizing such major figures as Plato, Aristotle, Hume, Kant, Hegel, and Goodman.

PHIL 447 Philosophy of Literature (3) I&S/VLPA
Investigation of philosophical questions about literature: What is literature? Must literature be interpreted? What is interpretation? Literature and ideology.

PHIL 450 Epistemology (5) I&S Baker, BonJour, Talbott
Systematic study of some of the main problems of the theory of knowledge, such as: the definition of “knowledge;” a priori knowledge; perception and knowledge of the external world; and whether knowledge has or requires a foundation. Emphasis varies from quarter to quarter.

PHIL 453 Philosophy of Language (5) I&S/VLPA
Current theories of meaning, reference, predication, and related concepts. Offered: jointly with LING 476.

PHIL 456 Metaphysics (5) I&S Baker, Coburn
Examination of such topics as freedom of the will, the nature of persons and personal identity, the existence of God, time, necessary truth, and universals. The emphasis varies from year to year.

PHIL 460 Philosophy of Science (5) I&S/NW Hankinson Nelson, Woody
Critical study of the nature of scientific knowledge. Topics include

342
PHIL 473 Philosophy of Mathematics (5) I&S/NW
with the Zermelo-Fraenkel Axioms. Development of axiomatic set theory up to and including the Skolem-Lowenheim theorem. Formalized theories. Notions of necessity and possibility, using the classical systems T, S4, and S5, and the syntax and the semantics (Kripke models) of these systems.

PHIL 461 Philosophical Anthropology (5) I&S

PHIL 463 Philosophy of Mind (5) I&S BonJour
Examination of current theories of the nature of the mind and mental processes.

PHIL 464 Philosophical Issues in the Cognitive Sciences (5) I&S/NW
Philosophical problems connected with research in psychology, artificial intelligence, and other cognitive sciences. Topics vary. Readings from both philosophical and scientific literature. Accessible to nonphilosophers with suitable interests and backgrounds.

PHIL 465 Philosophy of History (3) I&S Baker
Analyses of basic concepts employed in historical interpretation, and study of some of the principal philosophers of history, such as Plato, Saint Augustine, Hegel, Marx, Spengler, Toynbee.

PHIL 466 Philosophy of the Social Sciences (5) I&S
Hankinson Nelson, Talbott
Examination of fundamental issues in the foundations, methodology, and interpretation of the social sciences. Topics include value orientation and objectivity, methodological individualism, functionalism, reductionism, and the status of idealized models, including models involving idealized conceptions of individual rationality. Emphasis varies from quarter to quarter.

PHIL 467 Philosophy of Religion (5) I&S Clatterbaugh, Rosenthal
Study of selected topics and problems in the philosophy of religion, such as: arguments for the existence of God; the problem of evil; atheism; faith; religious experience and revelation; the attributes of God; miracles; immortality; and the relation between religion and morality. Readings from historical and contemporary authors.

PHIL 469 Existentialist Philosophy (3) I&S
Examination of major ideas of selected existentialist philosophers.

PHIL 470 Intermediate Logic (5) I&S/NW, QSR Fine, Keyt
An introduction to the concepts and methods of metatheory and their application to the sentential calculus.

PHIL 471 Advanced Logic (5) I&S/NW Keyt

PHIL 472 Axiomatic Set Theory (5) I&S/NW Keyt, Townsend
Development of axiomatic set theory up to and including the consistency of the Axiom of Choice and Continuum Hypothesis with the Zermelo-Fraenkel Axioms.

PHIL 473 Philosophy of Mathematics (5) I&S/NW Fine
Study of the traditional accounts of the nature of mathematical entities and mathematical truth given by logicism, intuitionism, and formalism, and the impact of Godel’s incompleteness theorems on these accounts.

PHIL 474 Modal Logic (5) I&S/NW
Notions of necessity and possibility, using the classical systems T, S4, and S5, and the syntax and the semantics (Kripke models) of these systems.

PHIL 479 Semantics II (3) I&S/NW/VLPA Ogihara
Formal characterization of linguistic meaning. Emphasis on nature and purpose of formal semantics and on its relation to formal syntax. Prerequisite: LING 442. Offered: jointly with LING 479.

PHIL 481 Philosophy of Biology (5) I&S/NW Hankinson Nelson
Study of several current topics in philosophy of biology, which may include the logical structure of evolutionary theory, fitness, taxonomy, the concept of a living thing, reductionism, the concept of a biological species, evolutionary explanations, and philosophical consequences of sociology. Recommended: college-level course in biological science; prerequisite: one PHIL course.

PHIL 482 Philosophy of Physical Science (5, max. 10) I&S/NW Fine, Woody
Study of philosophical issues raised by theories in physics or chemistry, such as whether space (time) is a substance, how causation and locality are treated in quantum mechanics, temporal anisotropy and time travel, the nature of a field of force, the reduction of chemistry to physics. Prerequisite: one PHIL course.

PHIL 500 Proseminar in Philosophy (5)
Introduces incoming graduate students to topics representative of the field and the faculty’s interest. Each class session is devoted to a separate topic taught by a different member of the faculty. In addition to reading and short written assignments. Students prepare a term paper on a topic presented. Offered: A.

PHIL 501 Foresight in Science and Technology: Choices and Consequences (3)
Examination of the foresight (or lack of it) with which we practice science and use technology. Contrasts potential risks of various choices with potential benefits. Credit/no credit only. Offered: jointly with ENVIR 535/PHYS 535/ZOOL 532.

PHIL 505 Seminar in Teaching Philosophy (1, max. 10) Baker
First quarter: seminar on topics of importance to a graduate student teaching two quiz sections of a large lecture course. Second quarter: focus on helping student prepare to teach own course. Prerequisite: graduate standing in philosophy. Offered: AW.

PHIL 510 Seminar in Social Philosophy (5, max. 20) Talbott
PHIL 514 Seminar in Legal Philosophy (5, max. 20) R. Moore
PHIL 520 Seminar in Ancient Philosophy (5, max. 20) Cohen, Keyt, Roberts, Weller
PHIL 521 Seminar in Medieval Philosophy (5, max. 20) Conard
PHIL 522 Seminar in Modern Philosophy (5, max. 20)
Clatterbaugh, Weller

PHIL 525 Seminar in Nineteenth-Century Philosophy (5, max. 20)
Baker

PHIL 526 Seminar in Recent Philosophy (5, max. 20)
Keyt

PHIL 538 Philosophy of Human Rights (5, max. 20)
Talbott

PHIL 540 Seminar in Ethics (5, max. 20)
Coburn, Roberts, Smith, Talbott

PHIL 545 Seminar in the Philosophy of Art (5, max. 20)
Moore

PHIL 550 Seminar in Epistemology (5, max. 20)
BonJour, Talbott

PHIL 553 Seminar in Philosophy of Language (5, max. 20)

PHIL 556 Seminar in Metaphysics (5, max. 20)
Baker, BonJour, Coburn

PHIL 560 Seminar in the Philosophy of Science (5, max. 20)
Fine, Woody

PHIL 563 Seminar in the Philosophy of Mind (5, max. 20)
BonJour

PHIL 566 Seminar in Philosophy of the Social Sciences (5, max. 20)

PHIL 567 Seminar in the Philosophy of Religion (5, max. 20)
Coburn

PHIL 570 Seminar in Logic (5, max. 20)
Keyt
Prerequisite: PHIL 470.

PHIL 584 Reading in Philosophy (1-5, max. 20)
Intensive reading in philosophical literature. Prerequisite: permission of graduate program coordinator.

PHIL 587 Contemporary Analytic Philosophy (5, max. 20)
Baker

PHIL 600 Independent Study or Research (*)
Prerequisite: permission of graduate program coordinator.

PHIL 700 Master's Thesis (*)

PHIL 800 Doctoral Dissertation (*)

History and Philosophy of Science

Course Descriptions

HPS 210 Issues in the History and Philosophy of Science (5) I&S
Examination of selected topics in the history and philosophy of science at the introductory level. Taught by UW faculty and visiting scholars.

HPS 400 Colloquium in the History and Philosophy of Science (5) I&S/SNW
Examines issues from the perspectives of both history and philosophy. Prerequisite: either HIST 311, HIST 312, HIST 313, HIST 314, HIST 315, HIST 317, HIST 318, or HIST 412; either PHIL 350, PHIL 360, PHIL 450, PHIL 460, PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, or PHIL 483.

Physics

C121 Physics-Astronomy Building

Physics is the study of the fundamental structure of matter and the interaction of its constituents, with the goal of providing a quantitative description of nature based on a limited number of physical principles.

Undergraduate Program

Adviser
C139A Physics-Astronomy, Box 351560
206-543-2772

The Department of Physics offers the following programs of study:
- The Bachelor of Science degree with a major in physics
- A minor in physics

Bachelor of Science

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126 (or MATH 144, MATH 145, MATH 146), MATH 308, MATH 324, PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227, PHYS 228. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 308.)

These physics and mathematics courses are required prerequisites for junior-level work in physics not only at the UW but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college will either need to take more than four years to earn a degree or will be limited to a minimal course of study for graduation in four years.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

85 credits as follows:

Core courses: PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227, PHYS 228, PHYS 321, PHYS 322, PHYS 334.
3 credits selected from upper-division lecture courses in modern physics: either PHYS 315 or PHYS 324.

6 credits selected from upper-division physics laboratory courses: PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434.

3 credits from PHYS 401, PHYS 402, PHYS 403; or PHYS 485, PHYS 486, PHYS 487; or PHYS 491, PHYS 492, PHYS 493; or PHYS 494, PHYS 495, PHYS 496; or ASTR 480. 1-3 credits of independent research that has significant physics content in a cognate subject (astronomy, chemistry, etc.) may be substituted for 1-3 credits of the above choices with approval of the adviser.

5 credits selected from approved upper-division physics lecture courses or approved lecture courses in cognate subjects.

At least 12 credits of the physics courses presented to satisfy requirements 1 through 5, above, shall be in physics courses numbered 300 or above taken at the UW.

A minimum grade of 2.0 is required in all courses presented in fulfillment of requirements 1 through 5, above.

Students who plan graduate study in physics are strongly advised to complete PHYS 323, PHYS 324, PHYS 325, PHYS 328, as well as several of the following: PHYS 231, PHYS 232, PHYS 331, PHYS 421, PHYS 422, PHYS 423, PHYS 424, PHYS 425, PHYS 426, PHYS 431,
Of Special Note:

Minor Requirements: 30-36 physics credits as follows:
- Core courses: PHYS 121, PHYS 122, PHYS 123, PHYS 224, and PHYS 225
- One of the following options:
  - Physics Education: PHYS 407, PHYS 408, PHYS 409 (total 36 physics credits)
  - Experimental Physics: PHYS 231, PHYS 334 and one course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434 (total 30 physics credits)
  - Mathematical Physics: PHYS 227, PHYS 228 (MATH 308 required), and one course from PHYS 321 or PHYS 324 (MATH 324 required) (total 30 physics credits)
- Minimum grade of 2.0 required for each physics course counted toward the minor.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The program is one of the largest in the nation, with approximately 70 majors graduating every year. Graduates may join the work force in a variety of technical occupations where analytical, computational, and problem-solving skills are highly valued, both in government and the private sector. They may also continue to further studies in physics, further studies in other fields (such as astronomy, medicine, law, business, biology, or engineering).
- Instructional and Research Facilities: The Physics and Astronomy departments share a modern building with excellent instructional and research facilities. Undergraduate students are strongly encouraged to participate in ongoing research in the department.
- Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- Research, Internships, and Service Learning: Most undergraduate physics majors participate in a research experience, either on campus or off. Research internships in physics and related departments are available for both pay and course credit. Many students participate in national programs, typically the summer after their junior year. The department also maintains an exchange program with Universität Leibig in Geissen, Germany.
- Department Scholarships: None available

Of Special Note:
- One year of high school physics is strongly recommended before taking PHYS 121.
- Progress Requirement: In each academic year, every undergraduate physics major who either has completed the required 200-level courses in physics or has begun physics courses beyond the 200 level must (1) complete at least 15 credits of course work acceptable in fulfillment of the departmental major requirements, exclusive of credits earned by repeating courses in which acceptable credit has been earned previously, or (2) satisfactorily complete an approved part-time program of study. Students who do not satisfy the above requirement will be dropped as physics majors unless exempted explicitly by the Physics Undergraduate Majors Committee. Students dropped for this reason may petition the committee for readmission to the major.

Graduate Program

Graduate Program Coordinator
C139 B Physics-Astronomy, Box 351560
206-543-2488

The Department of Physics offers studies leading to the degrees of Master of Science and Doctor of Philosophy. The department has a permanent faculty of 46 members, about 14 research faculty, and about 56 adjunct, affiliate, and emeritus faculty. An average of twenty Ph.D. and thirty M.S. degrees in physics have been awarded annually in recent years.

Research Facilities

The department is well equipped, both in staff and facilities, for instruction and research in a discipline that emphasizes fundamental problems in the understanding of the physical universe. Areas of research available to the Ph.D. student within the department include atomic physics, astrophysics, condensed-matter physics, elementary-particle physics, nuclear physics, and physics education. In addition, students may do research in physics with adjunct faculty members whose primary appointment is in another department such as Aeronautics and Astronautics, Astronomy, Biochemistry, Bioengineering, Chemistry, Earth and Space Sciences, Materials Science and Engineering, or Physiology and Biophysics.

Experimental work in atomic physics is concentrated on the measurement of fundamental physical properties through laser, ion trap, and radiofrequency techniques. The emphasis on fundamental measurements is continued in experiments on the gravitational force, carried out by faculty and students in atomic physics, nuclear physics, and astrophysics. Condensed-matter experiment includes research on surfaces, interfaces, nanotubes, lower-dimensional and bulk matter, with materials as diverse as high-temperature superconductors and low-temperature hydrogen monolayers. Facilities used range from synchrotron radiation and neutron sources in the U.S. and abroad to on-campus laboratories with low-temperature, high-pressure, scanning-probe microscopy, x-ray and light scattering, and surface-physics equipment.

Members of the high-energy and particle astrophysics experimental groups are heavily engaged in experiments at the European Center for Nuclear Research in Geneva, Kamiokande, KFK in Japan, and Fermilab in Illinois. Faculty and students of the nuclear physics group are involved in a broad spectrum of research including studies of neutrino properties, relativistic heavy ions, fundamental symmetries and nuclear astrophysics. Researchers use the on-campus accelerators of the Center for Experimental Physics and Astrophysics (CENPA), as well as major facilities in the U.S., Canada, and Europe.

Theorists in the department are concerned with problems in: the theories of elementary particles and quantum fields, string theory, nuclear and high-energy reactions from the very lowest to the very highest energies, phase transitions and statistical mechanics, condensed-matter physics from localization in disordered systems to electron transport in mesoscopic systems, atomic physics, general relativity, and astrophysics. The Institute for Nuclear Theory, a national facility closely associated with the department, offers a unique opportunity for students to pursue research with distinguished permanent and visiting staff. Students in physics have the opportunity to obtain a physics degree in a number of interdisciplinary and applied physics areas through research with faculty members in other departments.

Department facilities are housed in the Physics-Astronomy Building and the Center for Experimental Physics and Astrophysics (CENPA).

Master of Science (Applications of Physics)

Admission Requirements: This option is designed for students who are currently employed and whose background is in physical science,
engineering, mathematics, or computer science. Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of instruction offered in the physics department. Entering students are expected to have an undergraduate background equivalent to a B.S. degree in physical science, engineering, mathematics, or computer science. This program is a part-time program with classes offered evenings.

**Graduation Requirements:** As part of the standard Graduate School requirements, students are expected to complete the sequence of core courses PHYS 441, 541, and 543, and to select appropriate elective courses. In addition, students must complete an independent-study project in consultation with a faculty member. This project may be carried out at the University or at the student’s place of employment. A written report as well as an oral presentation of the project are required. Students must complete a total of 36 credits of work at the 400 level or above, with at least 18 of those credits at the 500 level or above. Of the 36 credits, at least 18 credits must be from numerically graded courses. No thesis is required.

**Master of Science, Doctor of Philosophy**

**Admission Requirements:** Undergraduate preparation should include upper-division courses in mechanics; electricity and magnetism; statistical physics and thermodynamics; modern physics, including an introduction to quantum mechanics; and advanced laboratory work. Preparation in mathematics should include vector analysis, complex variables, ordinary differential equations, Fourier analysis, boundary-value problems, and special functions. Admission is determined by: the applicant’s undergraduate program, undergraduate grades, Graduate Record Examination aptitude and advanced physics scores, letters of recommendation, and a statement of educational and professional objectives.

**Master of Science**

Graduation Requirements: Students must take at least 3 credits of PHYS 600 while completing the project. Students must complete a total of 36 credits of work at the 400 level or above, with at least 18 of those credits at the 500 level or above. Of the 36 credits, at least 18 credits must be from numerically graded courses. A qualifying examination is required. No thesis is required.

**Doctor of Philosophy**

Graduation Requirements: The student is expected to obtain here, or elsewhere with a master’s degree, a background in physics equivalent to that contained in the following basic graduate courses: PHYS 505, 506, 511, 513, 514, 515, 517, 518, 519, 520, and 524; in specialized courses appropriate to each student’s interests; and two advanced elective courses outside the student’s area of research. The student is required to pass, successively, a written qualifying examination (typically at the beginning of the second year), an oral General Examination for admission to candidacy, and an oral Final Examination. In order to take the General Examination, the student must have been accepted by a graduate faculty member as a research student and have completed the graduate studies outlined above. This examination concentrates on the area in which the dissertation research is planned. Teaching experience is required of all candidates. Courses in teaching techniques in physics, PHYS 501-503, are required of students holding teaching assistantships.

**Financial Aid**

Most graduate students are supported by fellowships and assistantships. Applications for the Ph.D. program are automatically considered for these fellowships and assistantships.

Rosenberg, Leslie, Professor
Course Descriptions

PHYS 101 Physical Science by Inquiry I (5-) NW, QSR
Laboratory-based development of concepts and reasoning skills. Helps prepare preservice teachers to teach science by inquiry. Liberal arts students gain experience in the scientific process. Useful for students with weak science preparation before taking standard science courses. Forms foundation for scientific literacy. Offered: AW.

PHYS 102 Physical Science by Inquiry I (-5) NW, QSR
Laboratory-based development of concepts and reasoning skills. Helps prepare preservice teachers to teach science by inquiry. Liberal arts students gain experience in the scientific process. Useful for students with weak science preparation before taking standard science courses. Forms foundation for scientific literacy. Prerequisite: PHYS 101. Offered: Sp.

PHYS 103 Physical Science by Inquiry I (5) NW, QSR
See PHYS 101-102. Prerequisite: PHYS 102.

PHYS 110 Liberal Arts Physics (5) NW, QSR
Basic concepts of physics presented with emphasis on their origin and their impact on society and the Western intellectual tradition. Primarily for students in the arts, humanities, and social sciences. Offered: AS.

PHYS 114 General Physics (4) NW, QSR
Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Mechanics. Credit is not given for both 114 and 121. Recommended: working knowledge of algebra and trigonometry; one year high school physics; concurrent registration in PHYS 117. Offered: AWSpS.

PHYS 115 General Physics (4) NW, QSR
Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Heat and electromagnetism. Credit is not given for both 115 and 122. Prerequisite: PHYS 114 or 121; recommended: concurrent registration in PHYS 118. Offered: AWSpS.

PHYS 116 General Physics (4) NW, QSR
Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Sound, light, and modern physics. Credit is not given for both 116 and 123. Prerequisite: PHYS 115 or 122; recommended: concurrent registration in PHYS 119. Offered: AWSpS.

PHYS 117 General Physics Laboratory (1) NW
Mechanics laboratory. Credit/no credit only. Credit is not given for both 117 and the 121 lab. Prerequisite: PHYS 114 which may be taken concurrently. Offered: AWSpS.

PHYS 118 General Physics Laboratory (1) NW
Heat and electromagnetism laboratory. Credit/no credit only. Credit is not given for both 118 and the 122 lab. Prerequisite: PHYS 115 which may be taken concurrently. Offered: AWSpS.

PHYS 119 General Physics Laboratory (1) NW
Sound, light, and modern physics laboratory. Credit/no credit only. Credit is not given for both 119 and the 123 lab. Prerequisite: PHYS 116 which may be taken concurrently. Offered: AWSpS.

PHYS 121 Mechanics (0/5, max. 5) NW, QSR
Basic principles of mechanics and experiments in mechanics for physical science and engineering majors. Lecture tutorial and lab components must all be taken to receive credit. Credit is not given for both 114 and 121. Prerequisite: MATH 124, MATH 127,
PHYS 121 Physics by Inquiry I (5) NW
Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics and physical science as a process of inquiry. Prerequisite: either PHYS 103, PHYS 116, or PHYS 123. Offered: A.

PHYS 211 Physics by Inquiry I (5) NW
Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics and physical science as a process of inquiry. Prerequisite: PHYS 210. Offered: W.

PHYS 212 Physics by Inquiry I (5) NW
Selected topics in physics with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics and physical science as a process of inquiry. Prerequisite: PHYS 211. Offered: Sp.

PHYS 214 Light and Color (5) NW, QSR
Compares past explanation of certain familiar natural phenomena with present understandings. Lamps and lighting, outdoor light, optical devices, color vision, perspective, paints, and pigments. Quantitative comparison critical to the course, but college-level mathematics background not required. Intended for non-science students.

PHYS 215 A Way of Knowing (5) NW, QSR Boynton
Insight to the character and culture of scientific inquiry through a historical examination of how we have interpreted our experience of the phenomena of gravitation. Specifically for non-science majors. Quantitative reasoning and critical thinking required, but no college-level mathematics.

PHYS 216 Time and Change (5) NW, QSR
Includes miracles and magic, how and why things move, basic forces in nature, quantum mechanics, relativity, past and future of the universe. Quantitative comparison critical to course, but college-level mathematics background not required. 214, 215, 216 may be taken independently or in any order. Intended for non-science students.

PHYS 224 Thermal Physics (3) NW
Introduction to heat, thermodynamics, elementary kinetic theory, and the physics of continuous media. Prerequisite: MATH 126, MATH 129, or MATH 136, any of which may be taken concurrently; PHYS 122 which may be taken concurrently. Offered: AWSpS.

PHYS 225 Modern Physics (3) NW
Special theory of relativity; phenomena of modern physics with emphasis on photons, electrons, and atoms; introduction to quantum physics. Prerequisite: 2.0 in PHYS 123 which may be taken concurrently. Offered: AWSpS.

PHYS 228 Elementary Mathematical Physics (3) NW
Applications of mathematics in physics with emphasis on the mechanics of particles and continuous systems. Prerequisite: PHYS 227. Offered: ASp.

PHYS 231 Introductory Experimental Physics (3) NW
Introduction to data acquisition and analysis using experiments which measure fundamental constants or properties of nature (Planck’s constant, Boltzmann’s constant, speed of light, charge of electron). Prerequisite: 2.0 in PHYS 123.

PHYS 311 Relativity and Gravitation (3) NW
Special theory of relativity, Newtonian gravity, and relativistic effects of gravitation, including black holes, gravitational waves, and applications to cosmology. Prerequisite: 2.0 in PHYS 123.

PHYS 315 Applications of Modern Physics (3)
Foundations of quantum physics, including Schroedinger equation, tunneling, atoms, spin, and applications. These include semiconductor devices, lasers, magnetic resonance imaging (MRI), quantum cryptography, atomic microscopes. Recommended: PHYS 224, PHYS 225, PHYS 227 which may be taken concurrently. Offered: W.

PHYS 321 Electromagnetism (4) NW
First of a three-quarter sequence. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: either MATH 324 which may be taken concurrently, MATH 334, MATH 335, or MATH 336; PHYS 228. Offered: AW.

PHYS 322 Electromagnetism (4) NW
Continuation of PHYS 321. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: PHYS 321. Offered: WSp.

PHYS 323 Electromagnetism (4) NW
Continuation of PHYS 322. Continued focus on electromagnetic waves, including applications to photography, atomic and nuclear physics, and general relativity. Prerequisite: PHYS 321.

PHYS 324 Applications of Modern Physics (3)
Continuation of PHYS 323. Applications of modern physics including quantum mechanics, special and general relativity, and atomic and nuclear physics. Prerequisite: PHYS 323.

PHYS 325 Modern Physics (3) NW
Applications of modern physics including quantum mechanics, special and general relativity, and atomic and nuclear physics. Prerequisite: PHYS 324.

PHYS 326 Quantum Mechanics (3) NW
Advanced topics in quantum mechanics, including applications to atomic and nuclear physics. Prerequisite: PHYS 323.
Continuation of PHYS 322. Charges at rest and in motion; dielectric and magnetic media; electromagnetic waves; relativity and electromagnetism; physical optics. Prerequisite: PHYS 322.

PHYS 324 Quantum Mechanics (4) NW
First part of a two-quarter sequence. Introduction to nonrelativistic quantum mechanics: need for quantum theory, Schrodinger equation, operators, angular momentum, the hydrogen atom, identical particles, and the periodic table. Prerequisite: either MATH 324, MATH 334, MATH 335, or MATH 336; PHYS 225; PHYS 228. Offered: ASu.

PHYS 325 Quantum Mechanics (4) NW
Continuation of PHYS 324. Introduction to nonrelativistic quantum mechanics: perturbation theory, the variation principle, radiation; application of quantum mechanics to atomic physics, magnetic resonance, scattering, and various special topics. Prerequisite: PHYS 324. Offered: W.

PHYS 328 Statistical Physics (3) NW
Elements of statistical mechanics and their applications. Prerequisite: PHYS 224; PHYS 324. Offered: Sp.

PHYS 331 Optics Laboratory (3) NW
Measurements of interference and diffraction, optical properties of matter, image processing, interferometry, holography. Prerequisite: PHYS 227. Offered: Sp.

PHYS 334 Electric Circuits Laboratory (3) NW
Basic elements of DC, AC, and transient circuits; electronic devices; electrical measurements. Prerequisite: either MATH 126, MATH 129, or MATH 136; 2.0 in PHYS 123. Offered: WS.

PHYS 335 Electric Circuits Laboratory (3) NW

PHYS 401 Special Problems (*, max. 30)
Supervised individual study. Offered: A, WS, SpS.

PHYS 402 Special Problems (*, max. 30)
Supervised individual study. Offered: A, WS, SpS.

PHYS 403 Special Problems (*, max. 30)
Supervised individual study. Offered: A, WS, SpS.

PHYS 405 Physical Science by Inquiry II (5-) NW
Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Offered: A.

PHYS 406 Physical Science by Inquiry II (5-) NW
Emphasis on depth of understanding and development of reasoning and representational skills essential to the scientific process. Provides background for teaching physical science as a process of inquiry and develops scientific literacy. Offered: A.

PHYS 407 Physics by Inquiry II (5) NW
Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 123. Offered: A.

PHYS 408 Physics by Inquiry II (5) NW
Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 407. Offered: W.

PHYS 409 Physics by Inquiry II (5) NW
Selected topics in physics, with emphasis on depth of understanding and development of skills essential to the scientific process. Background for teaching physics at secondary school and introductory college levels. Some mathematical proficiency required. Prerequisite: PHYS 408. Offered: Sp.

PHYS 410 Physics by Inquiry for In-Service Teachers (1-2, max. 30) NW
A “hands-on” inquiry-oriented approach designed to train in-service teachers in the use of the physical science content for any of several science programs selected by a school or school district. Credit/no credit only.

PHYS 411 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW
Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: A.

PHYS 412 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW
Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: A.

PHYS 413 Physics by Inquiry for Lead Teachers (1-4, max. 4) NW
Extends the content covered in previous courses and helps prepare lead teachers to train colleagues to use any of several science programs selected by schools or districts. Credit/no credit only. Prerequisite: two courses selected from PHYS 405, PHYS 406, PHYS 407, PHYS 408, and PHYS 409. Offered: A.

PHYS 414 Atomic and Molecular Physics (3) NW
Survey of the principal phenomena of atomic and molecular physics. Prerequisite: PHYS 323; PHYS 325. Offered: W.

PHYS 415 Nuclear and Elementary-Particle Physics (3) NW
Survey of the principal phenomena of nuclear and elementary-particle physics. Prerequisite: PHYS 323; PHYS 325. Offered: Sp.

PHYS 416 Solid-State Physics (3) NW
Survey of the principal phenomena of solid-state physics. Prerequisite: PHYS 323; PHYS 325. Offered: Sp.

PHYS 417 Mathematical Physics (3) NW
Advanced classical mechanics. Prerequisite: PHYS 323; PHYS 325. Offered: A.

PHYS 418 Applications of Physics (1-3, max. 12) NW
Current applications of physics to problems in the sciences and technology.

PHYS 419 Selected Topics in Physics (1-5, max. 12) NW
Measurement in modern atomic, molecular, and solid-state physics. Recommended: 30 credits in physics. Offered: A.

PHYS 420 Modern Physics Laboratory (3) NW
Measurement in modern atomic, molecular, and solid-state physics. Recommended: 30 credits in physics. Offered: W.
Techniques in nuclear and elementary-particle research. Offered: Sp.

**PHYS 434 Application of Computers to Physical Measurement (3) NW**
Laboratory giving specific instruction and experience in interfacing laboratory equipment to computers. Prerequisite: PHYS 334. Offered: A.

**PHYS 436 Nonlinear Dynamics and Chaos (4) NW**
Variational Principle, Lagrangian and Hamiltonian Mechanics, phase space, nonlinear dynamics, approach to chaos, Lyapunov exponents, applications to physical systems. Numerical exercises to illustrate phenomena. Prerequisite: MATH 309.

**PHYS 441 Quantum Physics (4) NW**
Introduction to concepts and methods of quantum physics: wave mechanics (de Broglie wavelength, uncertainty principle, Schrodinger equation), one-dimensional examples (tunneling, harmonic oscillator), formalism of quantum physics, angular momentum and the hydrogen atom. Recommended: 30 credits in physical science or engineering. Offered: W.

**PHYS 451 Issues for Ethnic Minorities and Women In Science and Engineering (3/5) I&S**
Addresses issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions to those issues for women and ethnic minorities in physical sciences and engineering. Offered: jointly with WOMEN 485.

**PHYS 460 Water in the Environment (3) NW Baker, Raymond, Waddington, Warren**
Discusses the unique physical and chemical properties of the water molecule in relation to the atmospheric greenhouse effect, precipitation formation, oceanic circulations, infiltration of water through soils, geyser eruptions, and glacier and sea ice thickness. Prerequisite: either MATH 124, MATH 126, MATH 129, or MATH 136; PHYS 123. Offered: jointly with ATM S 460/ESS 424. Offered: A.

**PHYS 486 Senior Honors Seminar (1, max. 3) NW**
Offered: W.

**PHYS 487 Senior Honors Seminar (1, max. 3) NW**
Offered: Sp.

**PHYS 491 Independent Research (1-3, max. 3)**
Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: A.

**PHYS 492 Independent Research (1-3, max. 3)**
Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: W.

**PHYS 493 Independent Research (1-3, max. 3)**
Supervised, independent study requiring written and oral presentations summarizing work accomplished. Recommended: 12 credits in physics above 200 level. Offered: Sp.

**PHYS 494 Seminar on Current Problems in Physics (1, max. 3) NW**
Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: A.

**PHYS 495 Seminar on Current Problems in Physics (1, max. 3) NW**
Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: W.

**PHYS 496 Seminar on Current Problems in Physics (1, max. 3) NW**
Supervised, independent study of topics (chosen by faculty in charge) of current interest in physics. Written and oral presentation summarizing work accomplished are required. Recommended: 12 credits in physics above 200 level. Offered: Sp.

**PHYS 501 Tutorials in Teaching Physics (1, max. 2)**
Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: A.

**PHYS 502 Tutorials in Teaching Physics (1, max. 2)**
Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: W.

**PHYS 503 Tutorials in Teaching Physics (1, max. 2)**
Preparation for teaching introductory physics; use and critical analysis of instructional materials in a collaborative learning environment; supervised teaching practicum in which instructional materials are used with undergraduates. Credit/no credit only. Offered: Sp.

**PHYS 504 Mechanics (3)**
Lagrangian and Hamiltonian dynamics, with applications to various topics such as coupled oscillators, parametric resonance, anharmonic oscillations, chaos. Offered: A.

**PHYS 506 Numerical Methods (3)**
Integration, solution of differential equations, Monte Carlo methods, function minimization, data analysis, modern computing techniques, computation in experimental physics. Offered: Sp.

**PHYS 507 Physical Applications of Group Theory (3)**
Applications of finite and continuous groups, representation theory, symmetry, and conservation laws to physical systems. Offered: Sp.

**PHYS 511 Topics in Contemporary Physics (3, max. 9)**
Topics of current experimental, theoretical, or technological interest in modern physics. Offered: Sp.

**PHYS 513 Electromagnetism and Relativity (4)**
First of a three-part sequence. Principles of electrostatics, complex variable techniques, boundary value problems and their associated mathematical techniques, Green’s functions. Offered: A.

**PHYS 514 Electromagnetism and Relativity (3)**
Continuation of PHYS 513. Electric and magnetic fields in free space and material media, wave guides and cavity resonators. Offered: W.

**PHYS 515 Electromagnetism and Relativity (4)**
Continuation of PHYS 514. Special relativity, electromagnetic radiation from accelerated charges, synchrotron radiation, Cerenkov radiation, radiation reaction. Offered: Sp.

**PHYS 517 Quantum Mechanics (4)**
First of a three-part sequence. Modern non-relativistic quantum mechanics developed, beginning with its basic principles. Dirac and abstract operator notation introduced, starting with simple examples. Offered: A.
PHYS 518 Quantum Mechanics (4)
Continuation of PHYS 517. Modern non-relativistic quantum mechanics. The character of the theory illustrated both with physical examples and with conceptual problems. Topics include: atomic structure, scattering processes, density operator description of mixed states, and measurement theory. Abstract operator methods emphasized in the exposition of angular momentum, scattering, and perturbation theory. Offered: W.

PHYS 519 Quantum Mechanics (4)
Continuation of PHYS 518. Modern non-relativistic quantum mechanics. Physical examples and conceptual problems. Topics include: atomic structure, scattering processes, density operator description of mixed states, and measurement theory. Abstract operator methods emphasized in the exposition of angular momentum, scattering, and perturbation theory. Offered: W.

PHYS 520 Advanced Quantum Mechanics — Introduction to Quantum Field Theory (4)
Multi-particle systems, second quantization, diagrammatic perturbation theory, radiation, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: A.

PHYS 521 Advanced Quantum Mechanics — Introduction to Quantum Field Theory (3)
Multi-particle systems, second quantization, diagrammatic perturbation theory, radiation, correlation functions and multi-particle scattering, relativistic theories, renormalizability, basic quantum electrodynamics, and other applications. Offered: W.

PHYS 522 Advanced Quantum Mechanics: Introduction to Modern Quantum Field Theory (3)
Functional integrals, symmetry breaking, critical phenomena and continuum limits, and non-perturbative methods. Credit/no credit only. Offered: Sp.

PHYS 524 Thermodynamics and Statistical Mechanics (4)
Statistical mechanical basis of the fundamental thermodynamical laws and concepts; classical and quantum statistical distribution functions; applications to selected thermodynamic processes and examples of Bose and Fermi statistics. Offered: W.

PHYS 525 Statistical Mechanics (3)
Introduction to equilibrium and non-equilibrium aspects of many-body systems; scale invariance and universality at phase transitions and critical phenomena; exactly soluble models; Markov processes, master equations and Langevin equation in non-equilibrium stochastic processes. Prerequisite: PHYS 524. Offered: A.

PHYS 527 Current Problems in Physics (1)
Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: A.

PHYS 528 Current Problems in Physics (1)
Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: W.

PHYS 530 Laser Physics (4)
Physics underlying laser design and operation in the context of common laboratory systems. Topics may include continuous and pulsed lasers; solid, liquid, and gas gain media; Q-switching, mode-locking, resonator theory, nonlinear optics, and others. Prerequisite: basic quantum mechanics, electromagnetism, and optics; recommended: PHYS 541.

PHYS 532 Liquid Crystal Devices (4)
Physics of liquid crystals and applications to practical display devices. Phases, phase transitions, optical and dielectric properties, molecular and device "engineering," future prospects.

PHYS 536 Introduction to Acoustics and Digital Signal Processing (4) Chaloupka
Introduces mathematical and physics principles of acoustics in digital signal processing applications. Complex analysis and Fourier methods, physics of vibrations and waves, solutions of the wave equation, digital convolution and correlation methods, and Maximum Length Sequence method in signal analysis and spread-spectrum applications. Prerequisite: PHYS 123; MATH 120.

PHYS 541 Applications of Quantum Physics (4)
Techniques of quantum mechanics applied to lasers, quantum electronics, solids, and surfaces. Emphasis on approximation methods and interaction of electromagnetic radiation with matter. Prerequisite: PHYS 421 or PHYS 441 or equivalent. Offered: Sp.

PHYS 542 Numerical Methods in Physics (4)
Numerical methods for analysis and computation in physics. Topics may include integration, differential equations, partial differential equations, optimization, data handling, and Monte Carlo techniques. Emphasis is applications in physics. Prerequisite: 30 credits in physical sciences, computer science, or engineering.

PHYS 543 Electromagnetic Theory (4)
Principal concepts of electromagnetism. Static electric and magnetic fields. Boundary-value problems. Electric and magnetic properties of materials. Electromagnetic waves and radiation. Prerequisite: 30 credits in physical sciences, computer science, or engineering. Offered: A.

PHYS 544 Applications of Electromagnetic Theory (4)
Emphasis may vary from year to year. Topics may include electromagnetic waves, radiation, scattering, wave guides, plasma physics, quantum electronics, and accelerator physics. Prerequisite: PHYS 543 or equivalent.

PHYS 545 Contemporary Optics (4)
Coordinated lecture and laboratory treatment of topics in contemporary optics. Subjects include Fourier optics, lens systems, interferometry, laser optics, holography, polarization, crystal optics, birefringence, laser and conventional light sources, optical detectors. Prerequisite: PHYS 543 or equivalent.

PHYS 546 Condensed-Matter Physics (4)
Introduction to the theory of solids: crystal structure in real space and reciprocal space, phonons, free electrons, band theory, semiconductor devices. Prerequisite: PHYS 441 or equivalent.

PHYS 547 Electronics for Physics Research (4)
Electronic techniques as applied in physics research. Topics include noise, control-system analysis, operational amplifiers, lock-in amplifiers, precision power supplies and metering, data transmission, microprocessors. Several integrated measurement systems are examined in the context of specific research problems. Prerequisite: elementary electronics.

PHYS 549 Low-Temperature Physics and Cryogenics (4)

PHYS 550 Atomic Physics (3)
Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.

PHYS 551 Atomic Physics (3)
Theory of atomic structure and spectra; atomic and molecular beams; resonance techniques; atomic collisions; topics of current interest. Prerequisite: PHYS 519.
PHYS 544 Nuclear Astrophysics (3)
Big bang nucleosynthesis; nuclear reactions in stars; solar neutrinos and neutrino oscillations; core-collapse supernovae; nucleosynthesis in stars, novae, and supernovae; neutron stars; composition and sources of cosmic rays; gamma ray bursts; atmospheric neutrinos. Offered: jointly with ASTR 510; A.

PHYS 555 Cosmology and Particle Astrophysics (3)
Big bang cosmology; relativistic world models and classical tests; background radiation; cosmological implications of nucleosynthesis; baryogenesis; inflation; galaxy and large-scale structure formation; quasars; intergalactic medium; dark matter. Offered: jointly with ASTR 513; W.

PHYS 557 High Energy Physics (3)
First quarter of a three-quarter series. Emphasis on the experimental foundations of particle physics. Prerequisite: PHYS 519; recommended: PHYS 520, which may be taken concurrently. Offered: A.

PHYS 558 High Energy Physics (3)
Second quarter of a three-quarter series. Phenomenology of the standard model of strong and electro-weak interactions, including an introduction to Feynman diagrams. Prerequisite: PHYS 519; recommended: PHYS 520 and PHYS 521, which may be taken concurrently. Offered: W.

PHYS 559 High Energy Physics (3)
Third quarter of a three-quarter series. Topics of current interest in high-energy particle physics. Prerequisite: PHYS 519; recommended: PHYS 520 and 521, which may be taken concurrently. Offered: Sp.

PHYS 560 Theoretical Nuclear Physics (3)
First of a two-part sequence. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: A.

PHYS 561 Theoretical Nuclear Physics (3)
Continuation of PHYS 560. Nuclear structure, scattering, reactions, and decays in terms of elementary properties of nucleons and current theoretical models. Prerequisite: PHYS 519. Offered: W.

PHYS 564 General Relativity (3)
First of a two-part sequence. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein’s field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

PHYS 565 General Relativity (3)
Continuation of PHYS 564. General covariance and tensor analysis, the relativistic theory of gravitation as given by Einstein’s field equations, experimental tests and their significance, and applications of general relativity, particularly in the areas of astrophysics and cosmology. Prerequisite: PHYS 515.

PHYS 567 Theory of Solids (3)
First quarter of a course on modern solid state and condensed matter physics, aimed at bringing student’s knowledge up to the level of current literature. Topics include structural, electronic, and vibrational properties; optical response functions and dynamics; transport theory; and cooperative phenomena. Prerequisite: PHYS 519, PHYS 524. Offered: AW.

PHYS 568 Theory of Solids (3)
Second quarter of a course on modern solid state and condensed matter physics, aimed at bringing student’s knowledge up to the level of current literature. Additional topics (see PHYS 567) include magnetism, quantum Hall effect, superconductivity. Offered: WSp.

PHYS 570 Quantum Field Theory (3)
Emphasis varies in different years between relativistic quantum field theory and the many-body problem. Credit/no credit only. Prerequisite: PHYS 522.

PHYS 571 Quantum Field Theory (3)
Emphasis varies in different years between relativistic quantum field theory and the many-body problem. Credit/no credit only. Prerequisite: PHYS 522.

PHYS 572 Modern Quantum Field Theory (3)
Advanced topics in quantum field theory. Credit/no credit only. Prerequisite: PHYS 570, PHYS 571.

PHYS 575 Selected Topics in Applications of Physics (*, max. 30)

PHYS 576 Selected Topics in Experimental Physics (*, max. 30)

PHYS 578 Selected Topics in Theoretical Physics (*, max. 30)

PHYS 579 Independent Study or Research (*)
Study or research under the supervision of individual faculty
members. Credit/no credit only. Prerequisite: permission of supervisor. Offered: AWSpS.

**PHYS 800 Doctoral Dissertation (*)**
Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson. Offered: AWSpS.

**Political Science**

101 Gowen

Political science, broadly conceived, is the study of governments and other political actors, including their origins and foundations, interactions with groups and individuals, and interactions with nations. Within this larger framework political scientists study power, authority, conflict, economic relationships, culture, laws, policy, values, ethics, justice, equality, rights, legitimacy, and representation, to list only a few. Using these and other concepts, they analyze the political impacts of social issues such as war, peace, poverty, crime, education, the environment, race, gender, and globalization. Modes of inquiry are highly interdisciplinary.

**Undergraduate Program**

Adviser
215 Smith, Box 353530
206-543-1824
polsadvc@u.washington.edu

The Department of Political Science offers the following programs of study:

- The Bachelor of Arts degree with a major in political science with options in political economy and political communication
