- A minor in political science

Coursework in the discipline covers four major fields of political science: American politics, comparative politics, international relations, and political theory. Students may pursue faculty-supervised independent study projects and an optional senior thesis.

**Bachelor of Arts**

**Suggested First- and Second-Year College Courses:** Courses that develop writing skills and breadth of knowledge. Introductory statistics.

**Department Admission Requirements**

Sophomore standing (completion of 45 college credits). Minimum 2.00 cumulative GPA.

Three introductory political science courses (15 credits) with a grade of at least 2.0 in each from the following: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205.

Students are admitted all quarters and there are no quarterly deadlines. Applications and additional information available from advisers in 215 Smith.

**Major Requirements**

50 credits in political science as follows:

**Introductory Requirement (15 credits):** Three courses from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205

**Field Requirement (15 credits):** Three upper-division courses with a grade of at least 2.0 in each, in three different fields of political science: political theory, comparative politics, international relations, American politics, and research methods. UW political science courses that count for upper-division credit are numbered POL S 212 and above.

**Electives (20 credits):** 20 credits of upper-division political science course work with a grade of at least 2.0 in each

**GPA Requirement:** Minimum cumulative GPA of 2.25 in political science courses at graduation and a minimum grade of 2.0 in each political science course taken to fulfill requirements for the major.

Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 upper-division political science credits at the UW.

**Political Economy and Political Communication:** The department also offers political economy and political communication options, specialized programs of study that combine political science and economics or political science and communications. Students who wish to pursue these interdisciplinary options should consult with a political science adviser. A list of recommended course work is available.

**Minor**

**Minor Requirements:** 30 political science credits as follows:
One introductory course (POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205), 20 upper-division elective credits (UW political science courses that count for upper-division credit are numbered POL S 212 and above), and 5 credits at the 400-level.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The study of political science arms students with substantive knowledge of the discipline, including its concepts and theories. It also prepares them to be knowledgeable and active citizens. Through their study, students develop critical thinking, analytical, research, writing, interpersonal, and communication skills.

Graduates of political science pursue careers in many fields, including government (federal, state, and local), business, trade, public service (including non-governmental and international organizations), law, journalism, and teaching.

- **Instructional and Research Facilities:**
  - **Political Science Collaboratory:** This facility has 25 computer stations. It functions as a computer classroom and also as a general lab, primarily for political science majors and students enrolled in political science classes.
  - **Political Science Writing Center:** The Writing Center is operated in conjunction with the Jackson School of International Studies and the Law, Societies, and Justice Program. The center is staffed with peer tutors who provide drop-in help for students. The Writing Center director works with instructors to design workshops to help students with assignments.
  - **The Department of Political Science is affiliated with a number of research centers:**
  - **The Center for American Politics and Public Policy** is a focal point for the study of politics and policy processes in the United States. Research relates to public policy processes, including issues of agenda setting, decision making, implementation, quantitative and qualitative measures of policy change, and the role of ideas and dialogue in policy change. Policy arenas include education reform, health care, environmental regulation, and building code enforcement.
  - **The Center for Communication and Civic Engagement** investigates how innovative communication can improve the quality of civic life. The center’s primary focus is to understand how new information technologies can supplement more traditional forms of communication to facilitate civic engagement.
  - **Harry Bridges Center for Labor Studies** promotes the study of labor as a central concern in higher education and focuses on
of special note:

• 
  • honors options available: with college honors; with distinction (departmental honors). see adviser for requirements.
• research, internships, and service learning: the department offers three internship programs that range from part-time, 5-credit assignments to full-time, 15-credit programs. students may work in local agencies (pol s 496), in the state legislature (pol s 497), and in washington, d.c. (pol s 498).

listings of local internships and applications are available in 215 smith.

the washington state legislative internship program is a winter-quarter program in olympia and is open to students from all majors. students earn 15 credits for the internship and attend a class taught by a political science faculty member. applications are available from departmental advisers in 215 smith and are due by the end of october.

students in all majors may apply for the washington center, a comprehensive program that places students in washington, d.c. students earn 15 credits for the internship. additional information is available from departmental advisers in 215 smith.

• department scholarships:
  • hugh bone scholarship: the endowed hugh a. bone scholarship was established by the department of political science in 1986 to recognize professor bone, a former department chair, and to continue his commitment to a "participative citizenry." professor bone founded the washington state legislative internship program and many of the students who studied with him continue active political lives due to his stewardship and interest. the scholarship was established in his name to help students with financial need to study and intern away from the uw-seattle campus.
  • agnes c. nelson memorial scholarship: the departments of political science and economics make annual full-tuition awards to students who demonstrate interest in the interrelationship of politics and economics and who meet financial eligibility requirements. to apply for the scholarship, students must have completed a minimum of 25 credits in political science and economics with at least 10 credits in each discipline. deadlines are posted early in spring quarter.
  • student organizations/associations: pi sigma alpha (political science honor society), phi alpha delta (pre-law fraternity). see adviser for details.

of special note:

department awards

• the robert a. dahl award: the department of political science recognizes an outstanding graduating senior with the robert a. dahl award. to be eligible for consideration, a student must demonstrate scholarship excellence as well as high interest in political science as a discipline.
  • daniel c. lev award: the department of political science created this award to recognize the contribution of professor dan lev to the department’s honors program. the award recognizes an exceptional senior honors thesis.
  • sharon s. redeker award for public service: the department of political science created this award in honor of sharon redeker, who served for many years as the department’s director of academic services. this award recognizes the exceptional public service of a political science senior while at the university of washington.

graduate program

graduate program coordinator

polsgrad@u.washington.edu

graduate study in political science integrates traditional education in political science’s primary fields with other fields in the social sciences, allowing an eclectic, interdisciplinary approach. the department has an outstanding reputation in comparative politics, international relations, american politics, political theory, international relations, public policy, public law, political communication, and methodology. graduate students can incorporate study in other campus units, such as the school of marine affairs, the daniel j. evans school of public affairs, the henry m. jackson school of international studies, and the department of communication.

master of arts, doctor of philosophy

graduate work in political science is primarily for preparation for the doctor of philosophy degree. the master of arts program serves as the initial stage of the ph.d. program; the department does not offer a terminal master of arts degree.

the department admits for autumn quarter only. the application deadline is december 31. admission and financial-aid decisions are based on the applicant’s statement of purpose, writing sample, three letters of reference, academic transcript, and graduate record examination general test scores (no subject test is required). international students are required to submit toefl scores.

master of arts

a bachelor’s degree is required for admission to the graduate program. to earn the m.a. degree, students must complete a three-course political methodology sequence, satisfy course requirements in two fields, and submit and orally defend an essay of distinction. one of the fields must be chosen from four general fields: political theory, international relations, comparative politics, and american politics. the second field may be a second general field or one of the following specialized fields: area study, public law, political communication, public policy process, political methodology, or political economy. completion of the m.a. degree generally requires two years of full-time study.

doctor of philosophy

students who earn their m.a. degree and receive a recommendation to advance from their committee are admitted to the ph.d. program. the doctoral student must prepare a total of three fields, including at least one general field (see field listings above) and no more than one constructed field. students must also complete a three-course political methodology sequence (completed as part of the m.a.). competence in a foreign language is required only if deemed appropriate by the student’s supervisory committee. to advance to doctoral candidacy, students must complete all of the above, write examinations in each of their three fields, and defend their dissertation prospectus. once advanced to candidacy, students must research, write, and orally defend their dissertation in order to graduate. including the time required for the m.a. program, the ph.d. program usually requires a minimum of three years of full-
time study to complete coursework, write exams, and defend the prospectus. Completing the dissertation may take one or more additional years.

Research Facilities
Access to computing facilities and extensive data holdings is available through the Center for Social Science Computation and Research and the Political Science Collaboratory. The Department of Political Science is also affiliated with several research centers, including the Center for American Politics and Public Policy, the Center for Communication and Civic Engagement, the Center for Statistics and the Social Sciences, the Comparative Law and Society Studies Center, the Harry Bridges Labor Studies Center, and the Center for Comparative and Historical Analysis of Organizations and States. The University is also a member of the Inter-University Consortium for Political and Social Research.

Financial Aid
Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of study. Provided they make satisfactory progress, students are eligible for departmental financial assistance for five consecutive years.

Segura, Gary, Associate Professor
Ph.D., University of Illinois, 1992

356
Survey of African Americans within the U.S. socio-political processes. Situates African Americans within a post-civil rights context where there is debate about race’s centrality to an African American politics. Recommended: either AES 150, AFRAM 201, or POL S 202. Offered: jointly with AFRAM 246.

**POL S 249 Introduction to Labor Studies (5) I&S**
Conceptual and theoretical issues in the study of labor and work. Role of labor in national and international politics. Formation of labor movements. Historical and contemporary role of labor in the modern world. Offered: jointly with HIST 249/SOC 266.

**POL S 270 Introduction to Political Economy (5) I&S**
Political economy as a tool for understanding and evaluating the political world. Combines theory, methods, and insights derived from economics and political science and applies them to a range of substantive issues.

**POL S 273 The Concept of Political Power (5) I&S**
How to understand and explain relationships of power. Readings from Marxism, Weberian sociology, anarchism, classical political philosophy, and contemporary political science. May also include works of fiction.

**POL S 281 Introduction to American Political Culture (5) I&S/VLPA**
Introduction to the methods and theories used in the analysis of American culture. Emphasizes an interdisciplinary approach to American literature, including history, politics, anthropology, and mass media. Offered: jointly with ENGL 251.

**POL S 299 Special Topics in Political Science (2-5, max. 10) I&S**
Examines a different subject or problem of current interest with the discipline.

**POL S 301 Special Topics in Political Theory (5, max. 10) I&S**
Selected contemporary political issues. Political principles as reflected in concrete political problems. Topics might include: women’s rights, civil disobedience, national health care, affirmative action, environmental protection, privacy, human rights, and redistribution of property. Recommended: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205.

**POL S 303 Public Policy Formation in the United States (5) I&S**
Policy decision making with emphasis on: how issues arise, the way they become part of the policy agenda of the executive and the legislature, how these institutions organize to handle policy issues, and the roles of the legislature, the executive, and the bureaucracy. Public policy literature and familiarization with key aspects of policy decision making at the national, state, and local levels.

**POL S 304 The Press and Politics in the United States (5) I&S**
Journalists’ role in elections and public policy. Relationship between news coverage and political campaigns. Study and analysis of local political newswriting, reporting, and response by local and state political figures. Extensive off-campus experience included. Offered: jointly with COM 304.

**POL S 305 The Politics of Mass Communication in America (5) I&S**
Role of mass audiences in politics from the standpoint of the communication strategies used to shape their political involvement. Topics include: social structure and political participation, political propaganda and persuasion, the political uses of public opinion, and the mass media and politics. Offered: jointly with COM 305.

**POL S 306 Media, Society and Political Identity I&S (5)**
Explores how society and culture are both represented in and shaped by communication technologies and media content. Media include...
film, advertising, news, entertainment television, talk shows, and the Internet. Explores how media represent and affect individual identity, values, and political engagement. Offered: jointly with COM 306.

POL S 308 The Western Tradition of Political Thought, Ancient and Medieval (5) I&S
Origin and evolution of major political concepts from ancient Greece to the medieval period, from Thales through Aquinas.

POL S 309 The Western Tradition of Political Thought, Pre-Modern (5) I&S
Continuation of 308, treating materials from the fifteenth through eighteenth centuries, Machiavelli through Rousseau.

POL S 310 The Western Tradition of Political Thought, Modern (5) I&S
Continuation of 308 and 309, focusing on material from the eighteenth through twentieth centuries, from Rousseau through Lenin.

POL S 311 Individual and the State (5) I&S
Individualism and communitarian critics. Political and ethical implications of both. Nature of the state, liberty, responsibility, cooperation. Important individualist and collectivist literature, dealing with market institutions and citizen politics, critically assessed.

POL S 312 Women in Politics (5) I&S
Theoretical, historical, and empirical studies of women’s participation in political and social movements. Women’s diverse efforts to improve their political, social, and economic status. Policy issues of particular concern to women. Women’s political experiences in household, local, regional, national, and international arenas. Offered: jointly with WOMEN 313.

POL S 315 Black Identities and Political Power (5) I&S
Related the deployment of political power within institutions to shifting racial identities. Shows how racial identities both reflect and inflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Offered: jointly with AFRAM 315.

POL S 316 African-American Political and Social Thought (5) I&S
Race relations in U.S. politics as defined by the struggle of African Americans for economic, political, and social equality. Studies of African-American political and social thought; expands and clarifies our understanding of the strengths and weaknesses of American democratic ideals.

POL S 317 The Politics of Race in the United States (5) I&S
Introduction to the history and development of racial hierarchy in the U.S., focusing on how race shapes political institutions (including the constitution, the electoral college, Congress, political parties) and how political institutions structure racial power. Case studies of welfare state development, crime policy, immigration policy, and terrorism politics. Offered: jointly with LSJ 331.

POL S 318 American Political Thought I (5) I&S
Major thinkers and themes in American political and cultural development from Puritan origins to the Civil War.

POL S 321 American Foreign Policy (5) I&S
Constitutional framework; major factors in formulation and execution of policy; policies as modified by recent developments; the principal policymakers-President, Congress, political parties, pressure groups, and public opinion.

POL S 322 International Political Economy of Latin America (5) I&S
Exploration of politics underlying Latin America’s economic development. Topics covered include import-substituting industrialization, mercantilism, the debt crisis, neoliberalism, market integration, and poverty. Review of major theoretical perspectives such as modernization theory, dependency, and the new political economy. Offered: jointly with SISLA 322.

POL S 324 Europe in World Politics (5) I&S
Independent and coordinated efforts of Britain, France, and West Germany to adapt to the post-World War II global system. Creation and development of the Atlantic Alliance. Relations with postcommunist states. Decolonization and the evolution of relations with the Third World. The movement for European integration. Recommended: POL S 203.

POL S 325 The Arab-Israeli Conflict (5) I&S
The politics of conflicting ideologies: Zionism and Arab nationalism; formation of the state of Israel; development of Palestinian nationalism; Arab-Israeli wars. Re-emergence of Palestinian activism; domestic sources of foreign policy; the role of the superpowers.

POL S 326 Scandinavia in World Affairs (5) I&S
Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressure of interdependence. Offered: jointly with SCAND 326.

POL S 327 Women's Rights as Human Rights (5) I&S
Women’s rights in comparative perspective, focusing on varying settings that alter the meaning and practical application. Domestic level: areas including abortion politics to trafficking in women. International level: areas including equality claims before European supranational judicial bodies, rape as war crime in international law. Offered: jointly with LSJ 327.

POL S 328 International Organizations (5) I&S
Explores historical, theoretical, and empirical aspects of the United Nations, its specialized agencies, and other international organizations, both governmental and nongovernmental. Recommended: POL S 203.

POL S 329 Global Communication (5) I&S
Introduction to the history, purpose, channels, content, technologies, policy, and regulation of international communications systems. Issues covered include disparities in media development between post-industrial and developing nations, imbalances in international news and information flow, and the emergence of global communications. Offered: jointly with COM 322.

POL S 330 Communications in International Relations (5) I&S
Looks at communications in relations between international groups and states. Examines the range of functions and roles communication media play in international affairs, global issues, and intergroup relations. Also examines the strategic use of communications by various groups. Offered: jointly with COM 321.

POL S 331 Government and Politics in the Middle East and North Africa (5) I&S
Breakdown of traditional society and the problems of building modern political systems.

POL S 337 Collective Violence and the State (5) I&S
Comparative study of collective violence in modern states with emphasis on riots and pogroms. Readings include case materials drawn from Russian pogroms of the nineteenth and twentieth
centuries, Hindu-Muslim riots in modern India, and race riots in the United States and Great Britain. Offered: jointly with SIS 337.

**POL S 340 Government and Politics of South Asia (5) I&S**
Comparison of problems of national integration and political development in India, Pakistan, and Ceylon. Offered: jointly with SISSA 340.

**POL S 341 Government and Politics of Canada (5) I&S**
Critical analysis of parliamentary institutions, political parties, and the federal system in Canada. Offered: jointly with SISCA 341.

**POL S 342 Government and Politics of Latin America (5) I&S**
Analysis of the political dynamics of change in Latin America comparing various national approaches to the political problems of modernization, economic development, and social change. Offered: jointly with SISLA 342.

**POL S 343 Politics and Change in Southeast Asia (5) I&S**
Government and politics in the countries of Southeast Asia, with attention given to the nature of the social and economic environments that condition them. Offered: jointly with SISSE 343.

**POL S 346 Governments of Western Europe (5) I&S**
Modern government and politics of Great Britain, France, Germany, and Italy.

**POL S 350 Government and Interest Groups in the United States (5) I&S**
Agrarian, labor, professional, business, and ethnic interest in politics; impact on representative institutions and governmental processes.

**POL S 351 The American Democracy (5) I&S**
Democratic theory; constitutional theory; the Presidency; Congress; the Supreme Court; civil rights and civil liberties. Designed for nonmajors.

**POL S 352 American Political Parties (5) I&S**
Theories of American parties, campaigns and voting behavior; party leadership; political socialization and participation.

**POL S 353 United States Congress (5) I&S**

**POL S 354 Elections and Voting in the United States (5) I&S**
Electoral institutions and processes of the United States: the idea and practice of elections, the electoral system, individual voting behavior, collective voting behavior, and the impact of elections on policy.

**POL S 355 The American Presidency (5) I&S**
The American presidency; its evolution, its occupants, and its place within the American system. Topics include presidential character, war, elections, Watergate, the economy, and the Constitution.

**POL S 356 Society and Politics (5) I&S**
Focus on the causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Offered: jointly with SOC 356.

**POL S 360 Introduction to United States Constitutional Law (5) I&S**
Growth and development of the United States Constitution as reflected in decisions of the Supreme Court; political, social, and economic effects. Offered: jointly with LSJ 360.

**POL S 361 United States Courts and Civil Liberty (5) I&S**
Cases and literature bearing on protection of constitutionally guaranteed private rights, with particular reference to the period since 1937. Offered: jointly with LSJ 361.

**POL S 363 Law in Society (5) I&S**
Inquiry into how law matters in social practice. Examines general theories of law, the workings of legal institutions, and the character of legally constituted practices and relationships in diverse terrains of social life. Offered: jointly with LSJ 363.

**POL S 365 Lawyers in American Politics (5) I&S**
Influence of lawyers on American politics. Official and unofficial political roles, lawyers as lobbyists, as legislators, in the bureaucracy, politics of the American Bar Association. Includes study of legal education, professional values, and avenues of political access.

**POL S 367 Comparative Law and Courts (5) I&S**
Introduction to comparative judicial politics, focusing on the relationship between law and politics in cross-national perspective, as well as on the functioning of supranational and international legal entities in the international system. Offered: jointly with LSJ 367.

**POL S 368 The Politics and Law of International Human Rights (5) I&S**
Studies the international human rights movement in its legal and political context. Focus on institutions which influence, enable, and constrain the international promotion of human rights. Offered: jointly with LSJ 320.

**POL S 382 State Government (5) I&S**
Focus on the structures, processes, and policy outputs of state governments in the United States.

**POL S 383 Environmental Politics and Policy in the United States (5) I&S**
Interrelation between technological and environmental change and policy formation. Consideration of political behavior related to these phenomena and the capacity of urban public organizations to predict change and to formulate policies that can take future states into account.

**POL S 398 Honors Seminar (5, max. 15) I&S**
Intensive and advanced studies in various aspects of political science. Open only to participants in the departmental honors program.

**POL S 401 Advanced Special Topics in Political Theory (5, max. 10) I&S**
Topics can include, but are not limited to, analytical theory pertaining to justice, exploitation, and freedom; revolution and social changes; collective choice and action; sexuality and politics; critical theory; Marxist theory; post-structuralism. Content varies. Recommended: POL S 201.

**POL S 403 Advanced Special Topics in International Relations (5, max. 10) I&S**
Examination of contemporary developments in the field of international relations. Content varies according to the nature of developments and research interests of the instructor.

**POL S 404 Topics in Public Policy (3-5, max. 6) I&S**
Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with PB AF 499.

**POL S 405 American Politics Seminar (5, max. 10) I&S**
Intensive reading and research in selected problems or fields of political analysis.

**POL S 406 Marxian Political Economy (5) I&S**
Explores the relationship between social classes, the state, and
political power in advanced capitalist societies. Investigates this relationship primarily by means of the tools of Marxian political economy and, in the process, evaluates these tools. Emphasis on theoretical perspectives, although the reading list has a few empirical applications as well. Recommended: POL S 201.

POL S 407 International Conflict (5) I&S
Examines different theoretical explanations for the causes of war, including the role of international, state, organizational, and individual factors; additional topics vary with instructor. May include the development of warfare, deterring weapons of mass destruction, terrorism, intelligence, and the ethics of warfare.

POL S 409 Undergraduate Seminar in Political Economy (5, max. 10) I&S
Seminar in political economy with focus on Marxian and public choice approaches to political economy. Explores the questions raised by each approach, the assumption(s) and testability of hypotheses, and applies these approaches to a number of problems in political economy. Recommended: ECON 300; POL S 270. Offered: jointly with ECON 409.

POL S 410 Technology, Politics, and the State (5) I&S
Relationships between politics, technological change, and development of multinational corporations. Considers whether the relations between political and economic systems of industrial societies have been fundamentally altered by the increased importance and interdependence of government, experts, and new technological possibilities for intervention in social life.

POL S 411 Theories of the State (5) I&S
Topics may include origins and development of the state; arguments about the necessity, desirability, and proper role of the state; the nature and operation of modern states and the international state system; the legitimacy of modern state power.

POL S 412 Democratic Theory (5) I&S
Examines the concept of democracy and theoretical models purporting to describe its central features: majority rule, participation, and deliberation. Themes also include: representative vs. direct democracy; the rights of minorities; the relationship between democracy and other political theories such as liberalism, socialism, and conservatism. Prerequisite: POL S 201; either POL S 308, POL S 310, or POL S 318.

POL S 413 Contemporary Political Theory (5) I&S
Analysis of political theorists, exploring contemporary theories of humanity and society that form the basis for differing political ideas.

POL S 414 Politics and Culture (5) I&S
How people interpret and shape the political world around them through the use of such cultural resources as language, symbolism, myth, and ritual. The various uses of these cultural elements establish the place of the individual in society, influence the perception of political events, and create opportunities for individual and mass political responses.

POL S 415 Women’s Rights in an Integrated Europe (5) I&S
Examines the transformation in women’s rights policy within the European community from the late 1950s through the present. Focuses on the legal rules and bodies that govern not only these policy domains, but also their evolution and impacts. Offered: jointly with LSJ 428.

POL S 416 Economic Theory as Applied to the Political System (5) I&S
Explanation and evaluation of the political system, using elementary economics theory. Topics include alternative voting rules, the political effectiveness of various types of groups, causes and consequences of logrolling, and bureaucratic organizations.

Prerequisite: ECON 300. Offered: jointly with ECON 452.

POL S 418 Japanese Trade Diplomacy (5) I&S
Survey of Japan’s foreign trade diplomacy. Examines evolution of Japan’s trade patterns in exports and foreign direct investment with key partners. Covers institutional and legal frameworks of Japan’s trade relations, such as bilateral fora, regional options including free trade agreements, and multilateral venues such as the WTO. Offered: jointly with SISEA 486.

POL S 419 United States-China Relations (5) I&S
Surveys the history of United States-China relations and examines the evolution of bilateral relations, particularly since 1949. Focus on the period since 1972 and the major issues as they have evolved since that time, including trade, human rights, security, and Taiwan. Offered: jointly with SISEA 459.

POL S 420 Soviet and Russian Foreign Policy (5) I&S
I ideological, historical, and strategic components of Soviet foreign policy; Gorbachev’s “new thinking” and the collapse of the USSR; redefining post-Soviet “Russia”; Russian military and security policy; Russia and the West; Russian relations with the Newly-Independent States.

POL S 421 Relations Among Communist and Post-Communist States (5) I&S
Major disputes and types of relationships among different communist states; international effects of the communist collapse; comparative dynamics of state-building, market reform, and democratic transition; international integration and domestic politics in the former Soviet bloc; ethnic conflict and the problem of state boundaries; redefining security in the post-communist milieu.

POL S 422 International Environmental Politics Seminar (5) I&S
Study of the practical and theoretical challenges associated with global ecological interdependence. Examination of international treaties and institutions, state, and nonstate actors with an emphasis on the emerging concept of sustainability.

POL S 423 International Law (5) I&S
Origin and present status of efforts to make rules of conduct for sovereign states; simulation of a treaty-drafting conference, with students playing roles of legal advisers to foreign governments.

POL S 424 Japan in the International System (5) I&S
Comprehensive examination of Japan’s international relations. Covers issues such as trade, security, environment, aid, and human rights. Investigates Japan’s participation in international organizations, including the UN, World Bank, IMF, and WTO. Examines Japan’s relations with the United States, the European Union, Asia, Latin America, Africa, and other regions. Offered: jointly with SISEA 487.

POL S 425 War and Deterrence (5) I&S
Seminar addresses the strengths and weaknesses of deterrence theory and then applies it to a variety of international security issues. Topics may include deterring the use of nuclear, chemical, and biological weapons, the use of brute force when deterrence fails, and the role for humanitarian intervention.

POL S 426 World Politics (5) I&S
The nation-state system and its alternatives, world distributions of preferences and power, structure of international authority, historical world societies and their politics. Offered: jointly with SIS 426.

POL S 427 International Political Economy (5) I&S
Examines major theoretical problems, substantive issues, and school of thought in international political economy (IPE), including issues
of trade, production, and finance. Preparation for critical analysis of dilemmas entailed in establishing and maintaining an instrumentally effective and ethically acceptable IPE system.

**POL S 428 Military Intervention (5) I&S**

Historical and theoretical analysis of military intervention in the post-World War II era. Considers how and why interventions occur and evaluates intervention as a foreign-policy response.

**POL S 430 Civil-Military Relations in Democracies (5) I&S**

E. Kier

Explores issues of civil-military relations in the United States including debates about the garrison state hypothesis; military advice on the use of force; the civil-military "gap"; and issues of race, gender, and sexual orientation in the military.

**POL S 431 International Relations in the Middle East (5) I&S**

Study of domestic sources of foreign policy in the Middle East; politics of oil; the East-West rivalry in the arena; and conflict and collaboration among the local powers.

**POL S 432 Political Islam and Islamic Fundamentalism (5) I&S**

Study of resurgence, since mid-1970s of political Islam and what has come to be called Islamic fundamentalism, especially in the Middle East. Topics include the nature and variety of political Islam today, causes and implications of the current resurgence, and comparison with previous resurgences. Offered: jointly with SIS 406.

**POL S 433 International Relations in Southeast Asia (5) I&S**

Analysis of the problems affecting relations among the countries of Southeast Asia.

**POL S 434 International Relations of South Asia (5) I&S**

Interrelationships of domestic, interstate, and extraregional forces and their effects upon the resolution or expansion of interstate conflicts in South Asia. Offered: jointly with SISSA 434.

**POL S 435 Japanese Government and Politics (5) I&S**

Government and politics of Japan with emphasis on the period since 1945. Offered: jointly with SISEA 435.

**POL S 436 Ethnic Politics and Nationalism in Multi-Ethnic Societies (5) I&S**

Provides a broad theoretical base, both descriptive and analytical, for the comparative study of ethnicity and nationalism. Examples drawn from ethnic movements in different societies. Some previous exposure either to introductory courses in political science or to courses in ethnicity in other departments is desirable. Offered: jointly with SIS 436.

**POL S 437 Politics in Scandinavia (5) I&S**

Twentieth-century politics in Scandinavia. How Scandinavian countries have been governed. Costs and consequences of their governmental style and its uncertain future. Optimal size of polities, problems of mature welfare states, process of leadership and representation in multiparty systems, decline of political parties. Offered: jointly with SCAND 437.

**POL S 438 Politics in France (5) I&S**

Study of contemporary France. Structures of government in the Fifth Republic; nature of French voting behavior and evolution of the bipolarized political party system; behavior of political interest groups; training of France's administrative elite and functioning of the state bureaucracy; dynamics of policy-making.

**POL S 439 Politics of Divided Korea (5) I&S**

Governments, politics, and economy of South and North Korea, the inter-Korea relations, and the two Koreas' relationship with the major powers — especially the United States — with emphasis on the post-cold war period. Offered: jointly with SISEA 439.

**POL S 440 European Fascism (5) I&S**

Analysis of fascism as revolutionary movement and type of political system in post-World War I Europe: Hitler's Third Reich, Mussolini's Italy, and Vichy France. Consideration of dynamics of resistance, policies that produced Holocaust, and questions raised at trials of fascist leaders in Nuremberg and elsewhere.

**POL S 441 Government and Politics of Russia (5) I&S**

Ideological and historical bases of Soviet politics; Leninism; Stalinism; Gorbachev's perestroika and the collapse of the USSR; the role of Yeltsin; problems of Russian state-building, market reform, and democratic transition; political parties and civil society; the relationship between the center and the regions; the problem of Russian national identity.

**POL S 442 Government and Politics of China (5) I&S**

Post-1949 government and politics, with emphasis on problems of political change in modern China. Offered: jointly with SISEA 449.

**POL S 443 Comparative Political Societies (5) I&S**

Analyzes of modern and premodern types of stable political society; special attention to contemporary representative democracy.

**POL S 444 Revolutionary Regimes (5) I&S**

Analysis of the several types of political regimes concerned with effecting fundamental social change; emphasis on the twentieth century.

**POL S 445 Politics and Society in Eastern Europe (5) I&S**

Political and social issues in lands east of the Elbe, treating some historical problems but focusing particularly on developments since 1945. Includes all communist states of Eastern Europe and their successors. Offered: jointly with SISRE 445.

**POL S 446 Peasants in Politics (5) I&S**

Interdisciplinary study of peasants, with special attention to questions of rural transformation. Peasant involvement in an increasingly interdependent world. Rebellion and revolution, impact of the international market, agricultural development. Offered: jointly with SIS 444.

**POL S 447 Comparative Politics Seminar (5, max. 10) I&S**

Selected comparative political problems, political institutions, processes, and issues in comparative perspective. Strongly recommended: POL S 204.

**POL S 448 Politics of the European Community (5) I&S**

Examines the origins, structures, and political dynamics of the European Community. Attention given to theories of integration, to relations between the European Community and member states, and to the role of the European Community in world politics.

**POL S 449 Politics of Developing Areas (5) I&S**

Comparative study of problems of national integration and political development in the new states of Asia and Africa.

**POL S 450 State-Society Relations in Third World Countries (5) I&S**

**POL S 451 Communication Technology and Politics (5) I&S**

Employs some core concepts of political communication and theories of democracy to examine the emerging role of information and communication technologies in candidate and issue campaigning; online voting; protest and advocacy movements; law-making and electronic governance in the United States and internationally.
POL S 452 Mass Media and Public Opinion (5) I&S
Examines the foundations of the idea of public opinion in a
democratic environment and the role of mass communication in the
organization, implementation, and control of that opinion.
Considers these relationships from the perspectives of societal
elites, media, and citizens. Offered: jointly with COM 407.

POL S 453 The State Legislature (5) I&S
Study of American state legislatures, with special reference to
Washington State Legislature. Student must spend several Fridays in
Olympia when the legislature is in session. Those desiring a more
extensive involvement with the legislature should enroll in the
political internship.

POL S 454 Political Communication Seminar (5, max. 10)
Contemporary topics studying how communication affects citizen
genagement with public life. Offered: jointly with COM 411.

POL S 457 Topics in Labor Research (5, max. 10) I&S
Analysis of the post-World War II decline of national labor
movements and strategies employed to reverse this trend. Requires a
major research project on organizing, bargaining, or another
question in labor studies. Prerequisite: either POL S 249, HIST 249,
or SOC 266. Offered: jointly with HIST 457.

POL S 461 Mass Media Law (5) I&S
Survey of laws and regulations that affect the print and broadcast
media. Includes material on First Amendment, libel, invasion of
privacy, freedom of information, copyright, obscenity, advertising
and broadcast regulation, and matters relating to press coverage of
the judicial system. Offered: jointly with COM 440.

POL S 462 The Supreme Court in American Politics (5) I&S
Introductory public law course that examines the interplay of
constitutional law and American politics with particular attention to
the role of the Supreme Court in the formulation and implementa-
tion of public policy in such matters as criminal-law enforcement,
civil rights political expression, and economic regulation.

POL S 463 Political Analysis of United States Social
Programs (5) I&S
Social problems in the United States and policy responses. National
policies concerning poverty, health, welfare, manpower, and the
Social Security system. Examination of subgovernments that cluster
around each policy area.

POL S 464 The Politics of American Criminal Justice (5) I&S
Political forces and value choices associated with the enforcement
of criminal law. Distribution of resources among participants in the
criminal justice system (e.g., police, attorneys, defendants, and
judges). Understanding and evaluation of the interaction of criminal
justice processes with the political system.

POL S 465 Law and Public Policy in the United States (5)
I&S
Relationship between law and public policy, with particular attention
to problems of social, economic, and political change. Considers
legal and constitutional processes as they relate to such problems of
public policy as race relations, the environment, and the economy.

POL S 466 Feminist Legal Studies: Theory and Practice (5)
I&S
Examines feminist theoretical analyses of the law. Engages in
current debate on the study of critical race, gender, and class theory.
Includes: women in prison, public assistance, the sex industry,
women and health care, and immigration law. Recommended:
WOMEN 200 or WOMEN 310. Offered: jointly with LSJ 466/
WOMEN 410.

POL S 467 Comparative Law in Society (5) I&S
Legal systems around the world as they actually work in their
respective political, social, and economic contexts. Emergence and
development of European legal systems, legal customs at variance
with those of Europe, problems of legal processes in the modern
state.

POL S 468 Comparative Media Systems (5) I&S
Provides students an understanding of policies that shape national
communication processes and systems. Uses comparative analysis to
identify both similarities and differences among media structures of
nations at different levels of development. Primary emphasis on
broadcast media. Offered: jointly with COM 420/SIS 419.

POL S 469 Law, Development, and Transition in East Asia (5)
I&S
Examines the role of law and the courts in economic and political
change in the developing world. Topics include variations in legal
traditions and institutions, economic development, property rights,
dispute resolution, democratization, and human rights. Empirical
materials focus on East Asia. Offered: jointly with LSJ 469/SISEA
469.

POL S 470 Public Bureaucracies in the American Political
Order (5) I&S
Growth, power, and roles of governmental bureaucracies in America:
conflict and conformity with American political thought, other
political institutions, and the public.

POL S 473 Decision-Making in Politics (5) I&S
Process of decision-making in politics at elite and mass levels,
comparison of approaches based on the comprehensive rationality
of decision makers with approaches based on limitations on the
cognitive capacities of decision makers. Applications to real
decision-making situations.

POL S 474 Government and the Economy (5) I&S
Interaction between politics and the economy. Impact of policy
makers on economic performance. Models of partisan and political
business cycles. Concepts of economic voting. Marxist theories of
modern capitalist economics. Recommended: ECON 201; MATH
124 or MATH 134.

POL S 475 Public Choice (5) I&S
Problems and prospects for collective action in a political democ-
rary. Designing rules and institutions for effective central authority
and effective constraints on governmental power. Social choice
theory and game theory. Recommended: POL S 270 or POL S 474.

POL S 476 Strategy in Politics (5) I&S
Explores the problem of finding fair methods for making social
decisions, and examines alternative methods of social choice.
Emphasis on the importance of agenda control for outcomes, and
the implications of theories of social choice for common interpre-
tations of concepts such as democracy and the general will.
Recommended: POL S 101 or POL S 202; POL S 481.

POL S 481 Big City Politics (5) I&S
Contemporary big city politics, focusing on Seattle and the largest
twenty-five cities. Social, economic, and political trends that have
shaped characteristics of large American cities. Distribution and use
of economic and political power among parties and groups. Future
of large cities and politics of change.

POL S 488 Honors Senior Thesis (5-) I&S
Students individually arrange for independent study of selected
topics under the direction of a faculty member. Research paper is
student’s senior thesis. Students meet periodically as a group to
discuss research in progress. Recommended: 15 credits POL S 398.

POL S 489 Honors Senior Thesis (-5) I&S
Students individually arrange for independent study of selected topics under the direction of a faculty member. Research paper is student’s senior thesis. Students meet periodically as a group to discuss research in progress. Recommended: 15 credits POL S 398.

POL S 490 Foundations of Political Analysis (5) I&S
Fundamental issues pertaining to research in political science: “logics of inquiry,” problems of concept formation, and development of research methods. Positivist, postempiricist, and other arguments about the nature of scientific knowledge.

POL S 495 Study Abroad-Political Science (3-5, max. 15) I&S
For participants in the study abroad program. Specific course content determined by assigned faculty member and announced in study abroad bulletin. Politics, political culture, and institutions related to their national setting.

POL S 496 Undergraduate Internship (5, max. 15)
Students serving in approved internships.

POL S 497 Political Internship in State Government (5, max. 20)
Students serving in approved internship program with state government agencies.

POL S 498 The Washington Center Internship (15)
Full-time academic internship with the Washington Center in Washington, DC. Includes internship activities, academic seminar, assemblies, and related activities. Credit/no credit only. Recommended: POL S 202; 45 UW credits.

POL S 499 Individual Conference and Research (2-5, max. 20)
Intensive study with faculty supervision. No more than one registration in 499 under same instructor.

POL S 500 Political Research Design and Analysis (5) I&S
Major quantitative methods of empirical research in political science. Primary emphasis on research design, data collection, data analysis, and use of computers.

POL S 501 Advanced Political Research Design and Analysis (5) I&S
Third methods course in political research. Testing theories with empirical evidence. Examines current topics in research methods and statistical analysis in political science. Content varies according to recent developments in the field and with interests of instructor. Offered: jointly with CS&SS 501.

POL S 502 Qualitative Research Methods (5) I&S
Introduction to qualitative methods in political science, emphasizing practical experience with techniques. Readings and exercises cover research design, multiple methods, varieties of qualitative data, measurement and validation, participant observation, interviewing, and content analysis. Research decision-making issues include analytical strategies, presentation of data, ethics, epistemology, and theory-building.

POL S 503 Advanced Quantitative Political Methodology (5)
Quinn, Ward

POL S 505 Comparative Politics (5)
Core course. Modern theories, approaches, and methods in the study of comparative politics.

POL S 509 Political Theory—Core (5, max. 10)
Introduction to central themes in political theory and the works of major political theorists, past and present.

POL S 511 Seminar in Ethical and Political Theory (5)
Ethical writings of major political philosophers. Coherent themes arising from these works and assessment of their impact on concepts of politics.

POL S 513 Issues in Feminist Theory (5)
Contemporary issues in feminist theory as they affect studies of women, politics, and society.

POL S 514 Selected Topics in Political Theory (5, max. 15)
Selected topics, historical and conceptual, national, regional, and universal. Prerequisite: permission of instructor.

POL S 515 Political Theory Research Seminar (5)
Survey of paradigmatic research approaches in political theory through the exploration of a theme (canonical text, theoretical concept, and specific topic). Methods covered may include rational choice, psychoanalytic, Straussian, Marxian, and feminist approaches. Students carry out substantive theoretical research. Recommended: second- or third-year graduate standing.

POL S 516 Special Topics in American Political Thought (3/5)
Special topics or themes in the development of American political culture.

POL S 517 Marxism and Critical Theory (5)
Works of Marx and Engels as well as selected works of twentieth-century Marxist and critical theorists. Themes such as Marx’s method, twentieth-century interpretations of Marx, and relationship of twentieth-century theorists to their eighteenth- and nineteenth-century forebears.

POL S 519 Modern Scandinavian Politics (5)
Analyzes the political, economic, and historical development of Sweden, Norway, Denmark, Iceland, and Finland from World War II to the present. Readings focus on domestic and foreign policies that distinguish these countries from other advanced industrial societies. Offered: jointly with SCAND 519.

POL S 520 Seminar on Russian Foreign Policy (3)
Selected topics in the development and objectives of the foreign policy of the Russian Federation. Prerequisite: permission of instructor.

POL S 521 International Relations I: Theory and Method (5)
Part one of the core course in the field of international relations. Reviews contemporary theory, research, and methodology in the study of world politics.

POL S 522 International Political Economy (5)
Theories of international political economy. Focuses on the emergence and development of the modern world system, the transition from feudalism to capitalism, and the institution of the nation-state system. Examines the political economy of trade, investment, and the international division of labor from a variety of theoretical perspectives. Prerequisite: POL S 521.

POL S 523 World System Analysis (4)
Evolution of the world system. Historical-structural approaches to world politics: neo-realism; long cycles; world economy. Prerequisite: POL S 521.

POL S 524 International Security (5)
Kier, Mercer
Introduces some of the major debates concerning the use of force in international politics. Covers traditional issues in international security such as alliances and the causes of war, as well as some of the new and important questions, such as explaining war outcomes and war termination.

POL S 525 International Law — Policy (5)
POL S 527 Special Topics in International Relations Research (5, max. 15)
Examination of current topics in the theory and practice of world politics. Content varies according to recent developments in the field and research interests of the instructor.

POL S 528 Advanced International Relations Theory (5)
Covers advanced works in international relations theory, e.g., realism, neorealism, game theory, and theories of cooperation and conflict. Includes some classic works (Thucydides, Hobbes, E. H. Carr) to show continuity of debates in the present. Modern theories of war, conflict, cooperation, and international institutions also explored. Prerequisite: POL S 521.

POL S 529 Problems of American Foreign Policy (3)
Critical analysis of the historical foundations and contemporary problems of foreign-policy making, with attention given to selected foreign-policy decisions. Prerequisite: POL S 321 or permission of instructor.

POL S 530 Transatlantic Relations: The United States and Europe in World Politics (5)
Fulfills required component of “American Module” of Transatlantic Studies program. Addresses political dynamics of relations between United States and Europe from American republic’s founding to post-Cold War era. Limited to students in Transatlantic Studies program.

POL S 532 The Chinese Political System (5)
Examination of key questions, interpretations, and secondary literature in the study of contemporary Chinese politics. Prerequisite: permission of instructor. Offered: jointly with SISEA 532.

POL S 533 Seminar on Contemporary Chinese Politics (5)
Research on selected problems in contemporary Chinese politics. Prerequisite: POL S 532 or permission of instructor. Offered: jointly with SISEA 533.

POL S 534 International Affairs (3)
Provides a broad understanding of international issues and United States policy. Students explore US foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with PB AF 530/ SIS 534.

POL S 535 International Relations of Modern China (5)
Foreign policy of the People’s Republic of China: historical antecedents; domestic and international systemic determinants; and Chinese policies toward major states, regions, and issues. Prerequisite: a course on contemporary Chinese politics or history, or permission of instructor. Offered: jointly with SISEA 535.

POL S 536 Ethnic Politics and Nationality Formation (3)
Seminar on analysis and theoretical understanding of two interrelated processes: ethnic group persistence and change over time; and the transformation of ethnic groups into politically self-conscious and influential nationalities. The readings and discussions deal with these two processes in the contexts of both developing societies and advanced industrial societies.

POL S 537 Approaches to East European Politics (3-5)
Selected concepts and methodologies useful for the analysis of politics and social structure in the socialist countries of east-central and southeastern Europe. Prerequisite: permission of instructor. Offered: jointly with SISRE 504; alternate years.

POL S 538 Government and Politics in the Middle East and North Africa (5)
Political change in the area within the context of comparative politics; breakdown of traditional political systems; new range of choice expressed in competing ideologies; governmental and nongovernmental instrumentation of change; and problems of international relations and regional conflict and integration.

POL S 539 International Relations of Northeast Asia (5)
Comprehensive survey of contemporary international relations of Northeast Asia with emphasis on Russia, Japan, China, and the United States. Multidisciplinary approach placing contemporary problems in historical context, drawing on modern social science theories. Connections between defense and economies are examined. Prerequisite: permission of instructor. Offered: jointly with SISEA 551.

POL S 540 Problems in South Asian Politics (3)
Research problems in contemporary Indian politics.

POL S 541 Institutions and Institutional Change in the Soviet Union, Russia, and the Newly Independent States (5)
Critical appraisal of the principal theories and research methods dealing with the development of the Soviet state from 1917-1991 and the formation of the newly-independent states after the Soviet collapse. Prerequisite: permission of instructor.

POL S 542 Seminar: State and Society (5)
Examines the mutually conditioning relationship between states and the societies they seek to govern. Studies states as large, complex organizations and their interactions with society on different levels. Shows that interactions on any level affect the nature of the state on other levels as well. Offered: jointly with SIS 542.

POL S 543 Latin American Politics (5)
Theories of authoritarianism, corporatism, democratization, and revolution in Latin America. Explores role of international and domestic economic factors shaping politics and the affect of politics on economic development. Examines elite behavior and grassroots social movements.

POL S 544 Problems in Comparative Government (5, max. 15)
Selected problems in the comparative analysis of political institutions, organizations, and systems.

POL S 547 Politics of Reform (5)
Examines cases of reform in democratic political systems, e.g., Roosevelt’s New Deal, Allende’s Chilean “revolution,” Mitterand’s socialist experiment in France, and the Thatcher government in Britain.

POL S 548 Comparative Political Parties (5)
Role of political parties in the modern state. Similarities and differences in origins and development of political parties and functions they perform, both in established democracies and in developing countries.

POL S 549 Problems of Political Development (5)
Concepts of development and modernization, with particular attention to their political dimensions and their application to various historical and contemporary cases.

POL S 550 American Politics — Core (5)
Core course in American government and politics. Systematic survey of the literature; focuses on national politics. Prerequisite: undergraduate courses in American government and politics.

POL S 551 Political Communication (5)
Surveys classic works and new directions in political communication,
including functionalist, structuralist, constructivist, network, and comparative approaches, reflecting a range of methods. Examines political organizing, electoral and legislative processes, civic (dis)engagement, media and politics, public deliberation and opinion formation, political identify and discourse. Offered: jointly with COM 551.

**POL S 552 Special Topics in Political Communication (5, max. 10)**
Examination of current topics in the theory and practice of political communication.

**POL S 553 Public Opinion (5)**
Selected problems in opinion formation, characteristics, and role of public opinion in policy-making process. Prerequisite: POL S 452.

**POL S 554 Legislative Politics (5)**
Selected problems in legislative processes and leadership, state and national.

**POL S 555 American Politics Topics (5, max. 10)**
Examination of current topics in the theory and practice of American politics. Content varies according to recent developments in the field and research interests of the instructor.

**POL S 556 American Political Development (5)** Price
Examination of leading works in, and theories of, American political development. Topics include the development approach itself; critical junctures in U.S. political history; key changes in institutions, the American state, the representation of interests and party politics; and the relevance of development studies to current politics.

**POL S 557 United States Party System (5)**
Examines the institutional and behavioral foundations of party politics in the United States, emphasizing key historical patterns of party system development and the major scholarly approaches to the study of the American parties and party politics.

**POL S 559 Special Topics in Political Methodology (5, max. 10)**
Examination of current topics on the theory and practice of political methodology. Course content varies according to recent developments in the field and the research interests of the instructor.

**POL S 560 Hierarchical Modeling for the Social Sciences (4)**
Explores ways in which data are hierarchically organized, such as voters nested within electoral districts that are in turn nested within states. Provides a basic theoretical understanding and practical knowledge of models for clustered data and a set of tools to help make accurate inferences. Prerequisite: SOC 424-425-426 or equivalent; recommended: CS&SS 505-506 or equivalent. Offered: jointly with CS&SS 560/STAT 560.

**POL S 561 Law and Politics (5)**
Points and levels at which law and politics intersect. What is distinctive about legal forms; how these legal forms influence, and are influenced by, politics. Conceptions of law, courts and public policy, law and bureaucracy, civil and criminal justice, and the legal profession.

**POL S 562 Law, Politics, and Social Control (5)**
Explores works of social scientists and lawyers regarding these competing conceptions of social control: as the seamy side of law — reinforcing equitable patterns of domination and disciplining deviants; as law embodying society’s basic values, articulating minimum rules for harmonious social interaction.

**POL S 563 Supreme Court in American Politics (5)**
Explores the tendency in the United States to turn to the Supreme Court to provide constitutional solutions for some of our biggest social, economic, and political problems. Focuses on the controversies concerning the legitimacy and capacity of the Supreme Court to intervene in American politics and public policy.

**POL S 564 Law and the Politics of Social Change (5)**
Explores the many ways that law figures into the politics of social struggle and reform activity. Analyzes law in terms of particular state institutions (courts, agencies), professional elites (lawyers, judges), and especially cultural norms (“rights” discourses) that are routinely mobilized by reform-movement activists.

**POL S 565 Special Topics in Public Law (5, max. 10)**
Examination of current topics on the theory and practice of public law. Content varies according to recent developments in the field and the research interests of the instructor.

**POL S 566 Comparative Law and Politics (5)**
Study of the interaction between law and politics, at both the macro and micro levels of politics, and discussion of research drawing from a wide array of geographical settings. Examination in comparative context of whether macro-structures are autonomous from underlying social structures of power and interest in the micro-level.

**POL S 570 The American Racial State (5)**
Explores the mutually constitutive relationship between race and American political institutions, beginning with theories of racial and racial constructions, race-making and nation-making, racial triangulation, and intersectionality. Examines various institutions and public policies as manifestations of the American racial state, focusing on the epistemological challenges of identifying race, racism, and racialization.

**POL S 571 American National Institutions (5)**
Answers the question, “Do institutions matter?” Surveys American national institutions from theoretical perspectives, focusing on how they affect the manner in which decisions are made. Employs cross-institutional perspective of American institutions.

**POL S 572 Administrative and Executive Leadership (3)**
Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities. Offered: jointly with PB AF 503.

**POL S 573 Topics in Public Policy (5, max. 10)**
Specialized research topics with a policy process or related theoretical content.

**POL S 574 Environmental Regulation Policy (5)**
Scholarly and practical aspects of environmental regulation. Examines literature concerning regulatory policy design, policy instruments, federalism, compliance and enforcement. Studies selected federal, state, and other nations’ environmental policies. Participants are expected to have a good understanding of American policy processes.

**POL S 575 Public Policy Processes (5)**
Covers political science research about policy processes. Research seminar addressing frameworks and perspectives concerning, policy processes as they concern issue emergence, agenda dynamics, policy subsystems, policy learning, and implementation.

**POL S 576 Political Culture (5)**
Values, beliefs, and rituals that guide political action in society. Some approaches emphasize symbolic sphere of value and belief over material conditions of power and economic production. Other approaches emphasize material relations. Reconciliation of symbolic and materialist approaches that explain intervention of the modern state in cultural processes.
POL S 577 The Politics of Social Movements (5)
Theoretical inquiry directed to questions of collective action and political tactics by social movement groups. Case studies include labor, civil rights, women’s, environmental, and other movements in twentieth-century United States.

POL S 578 Health Politics and Policy (5)
Introduces central themes of health-policy research: health is not health care and politics has much to do with why our health-care system works as it does. Investigates how social science helps us understand health issues.

POL S 582 Institutional Analysis (5)
Social change and property rights theory. Exploration of long-term secular change through works whose approaches derive from neoclassical economics and analytical Marxism. Evolution and transformation of property rights over land, labor, and capital and the consequences of the property rights structure for political and economic institutions.

POL S 583 Economic Theories of Politics (5)
Problems of public goods provision and collective action. Collective action theories and applications as well as critical review of the concept of rationality.

POL S 584 Comparative Political Economy (5)
Overview of current developments in comparative political economy. Topics may include globalization, the welfare state, partisan models of economic policymaking, economic development, and trade.

POL S 587 Politics of Urban Reform (5)
Interpretations of urban reformers at turn of this century and during 1960s and 1970s. Historical and political science literature on the subject. Prerequisite: graduate student standing and permission of instructor.

POL S 588 Special Topics in Comparative Political Economy (5, max. 10)
Examination of current topics in the theory and practice of comparative political economy. Content varies according to recent developments in the field and research interests of the instructor.

POL S 589 Special Topics in Political Economy (3-5, max. 10)
Evaluating research in political economy as well as developing research problems. Topics vary with instructor and with current problems in the literature. Prerequisite: POL S 406, POL S 416, ECON 400, and permission of instructor.

POL S 590 Seminar in Political Behavior (5, max. 10)
Analysis of behavioral research in selected fields of political science.

POL S 593 Theories of Decision Making (5)
Explanation of political decisions using models of such theoretical processes as preference formation, learning, heuristics, noncooperative games, collective action, agenda manipulation, and coalition formation. Examination of competing notions of political rationality and irrationality and criteria for their evaluation. Strategies for design of decision research. Prerequisite: POL S 491 or permission of instructor.

POL S 594 Political Communication Research Practicum: Community, Communication, and Civic Engagement (5)
Overview of the research process, including literature review, hypothesis generation, data gathering, empirical analysis, and writing for publication Topics vary with instructor, but generally address questions of how communication affects democracy and citizen engagement in national or international contexts. Offered: jointly with COM 556.

POL S 595 College Teaching of Political Science (1)

POL S 597 Directed Readings (1-10, max. 10)
Intensive reading in the literatures of political science, directed by the chair of the doctoral supervisory committee. Credit/no credit only.

POL S 598 Independent Writing I (1-5, max. 5)
Supervised research and writing for graduate students completing the MA essay of distinction.

POL S 599 Independent Writing II (3-5)
Supervised research and writing for graduate students completing the Ph.C. essay of distinction.

POL S 600 Independent Study or Research (*)

POL S 800 Doctoral Dissertation (*)

Psychology
119 Guthrie

Psychology involves the scientific study of behavior and its causes and the understanding of human and animal behavior in a variety of settings. Psychology is studied both as a natural science, which stresses physical and biological causes of behavior, and as a social science, which stresses the effects of the social setting on human and animal behavior. Major areas of emphasis are human cognition and perception, animal behavior, behavioral neuroscience, developmental, social and personality, and clinical psychology.

Undergraduate Program

Adviser
119 Guthrie, Box 351525
206-543-2698
psyadvis@u.washington.edu

The Department of Psychology offers the following programs of study:
- The Bachelor of Science degree with a major in psychology
- The Bachelor of Arts degree with a major in psychology

The Bachelor of Science program prepares students for doctoral programs in psychology, leading to careers in teaching, research, or clinical psychology. The program emphasizes laboratory/research experience and statistics.

The Bachelor of Arts program provides a general background in psychology for students preparing for master's-level graduate programs or professional schools, seeking employment at the baccalaureate level, or wanting to apply the principles of psychology in other disciplines.

The department does not have formal programs in educational, school, or counseling psychology; engineering psychology; or industrial psychology.

Bachelor of Science

Suggested First-Year College Courses: MATH 120 and MATH 124, or MATH 120 and MATH 144. (MATH 120 and MATH 144 is the recommended sequence.) PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

Suggested Second-Year College Courses: PSYCH 202 and 209 should be completed as soon as possible during this year; BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology Department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements,
including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

**Department Admission Requirements**

Students apply to the Department of Psychology under the same admission requirements, regardless of the degree they will pursue.

Minimum cumulative UW GPA of 2.00.

Completion of one of the following math courses with a minimum grade of 2.0: MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. (Students may fulfill this requirement with test scores that place them in MATH 112 or MATH 124 or higher.)

Completion of the following psychology courses with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses: PSYCH 101, PSYCH 202, and PSYCH 209.

Admission is competitive based on the following criteria:

- Preparation for a major in psychology as indicated by the grades earned in courses required for admission
- GPA, with an emphasis on grades earned in psychology courses
- Other evidence of a commitment to becoming a psychology major
- Personal statement reflecting an interest in and commitment to becoming a psychology major
- Copies of unofficial transcripts from all schools attended (UW and transfer).

Meeting the above criteria does not guarantee admission to the department.

The application deadline is the first Friday of autumn, winter, and spring quarters; no applications are accepted summer quarter. Applications and additional information are available in 119A Guthrie.

**Major Requirements**

84-86 credits as follows:

**Psychology Courses**

- PSYCH 101, PSYCH 202, PSYCH 209 (with a grade of 2.5 or higher), PSYCH 317 and PSYCH 318
- One lab course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
- One course from PSYCH 300, PSYCH 333, or PSYCH 355
- One course from PSYCH 303, PSYCH 305, PSYCH 306, or PSYCH 345
- One additional course from PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355
- Three additional graded upper-division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
- PSYCH 499 (3 credits)
- PSYCH 496, PSYCH 497, or PSYCH 498 (3 credits) or 3 additional credits of PSYCH 499
- Up to 6 credits in 200- to 400-level electives to make a minimum total of 66 psychology credits

(Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)

**Courses in related fields:**

- One of the following MATH sequences: MATH 120 and 124, or MATH 120 and MATH 144 (MATH 120 and MATH 144 preferred).
  - Students may satisfy this requirement by testing out of MATH 124 or MATH 144
- One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220

One of the following philosophy courses: PHIL 120, PHIL 160

One social science course (3 to 5 credits) from anthropology or sociology

Cumulative minimum GPA of 2.50 in all PSYCH courses applied toward the degree (UW and transfer), with a minimum grade of 2.0 in each course presented for the major. Note that a grade of 2.5 or higher is required in PSYCH 209 in order for students to progress to the PSYCH 317/PSYCH 318 statistics series.

Transfer students must meet all of the above requirements and are required to complete at least 15 graded credits in psychology at the 300 and 400 level at the UW.

**Bachelor of Arts**

**Suggested First-Year College Courses:** MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

**Suggested Second-Year College Courses:** PSYCH 202 and 209 should be completed as soon as possible during this year. BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162 (168 total) or BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

**Major Requirements**

63 to 65 credits as follows:

- PSYCH 101, PSYCH 202, PSYCH 209, PSYCH 315 (or PSYCH 317 and PSYCH 318)
- One lab course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
- One course from PSYCH 300, PSYCH 333, or PSYCH 355
- One course from PSYCH 303, PSYCH 305, PSYCH 306, or PSYCH 345
- One additional course from PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355
- Two additional graded upper-division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
- Up to 4 credits of PSYCH 200- to 400-level electives to make a minimum total of 50 psychology credits

(Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.)

**Courses in related fields:**

- One MATH course from MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144.
  - Students may satisfy this requirement by testing out of any of the specified classes.
- One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
- One social science course (3 to 5 credits) from anthropology or sociology

Cumulative minimum GPA of 2.50 in all psychology courses applied toward the degree (UW and transfer), with a minimum grade of 2.0 in each course presented for the major. Transfer students must meet all of the above requirements and must to complete at least 15 graded credits in psychology at the 300 and 400 level at the UW.
Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** Students understand and apply scientific methods and principles, receive an excellent preparation in the theoretical explanations of human and animal behavior, and understand the introductory concepts underlying the biological basis of behavior.
- **Instructional and Research Facilities:** The psychology faculty have extensive research facilities and research laboratories on the UW campus and nearby buildings.
- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- **Research, Internships, and Service Learning:** The Department of Psychology offers academic credit for approved field work experience. The advising office maintains internship listings which are updated regularly.
- **Department Scholarships:** None offered.
- **Student Organizations/Associations:** Psi Chi (national honors society for undergraduate psychology students).

Of Special Note: A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

Graduate Program

Graduate Program Coordinator
306 Guthrie, Box 351525
206-543-2563
psygrad@u.washington.edu

Graduate work in psychology is organized primarily as preparation for the Doctor of Philosophy degree. The optional Master of Science degree is taken by some doctoral students in the course of their work toward the doctorate.

For graduate instruction, the department is organized into six major areas of study: animal behavior, adult and child clinical, cognition and perception, developmental, physiological, and social psychology and personality. Specialization groups also exist in the sub-areas of diversity and self-regulation, and in community, sport, and quantitative psychology.

The program in clinical psychology is accredited by the American Psychological Association and provides scientific and professional training.

Admissions Qualifications

An undergraduate degree in psychology is desirable, but not required. Some preparation in biological, social, or quantitative sciences is strongly advised. Applicants are judged on a number of criteria, including academic and research backgrounds, Graduate Record Examination scores, and written evaluations submitted by former professors or supervisors. Admission of new students occurs in autumn quarter. The deadline for receipt of admissions material is December 15.

Master of Science (Optional)

A master’s-degree-only program is not available. Doctoral students have the option of obtaining a master’s degree while working toward the Ph.D.

Graduation Requirements: Completion of first-year graduate program (see Doctor of Philosophy degree requirements below) and an appropriate research program, including a research thesis.

Doctor of Philosophy

Graduation Requirements: Completion of course work in major and out-of-area requirements, completion of required course work in statistics and general methodology, independent research, General Examination, dissertation, and Final Examination. Minimum 3.00 GPA overall must be maintained; a minimum grade of 3.0 is required for all courses used to satisfy requirements. First-year requirements: Demonstrate competence in statistics and experimental design; complete at least 3 credits of independent predoctoral research and report that research at the department’s annual Research Festival.

Assistantships, Fellowships, or Traineeship Opportunities

Research and teaching assistantships are generally available. Traineeships and fellowships are also available.

Faculty

Mariam Araujo  Postdoctoral Fellow/Trainee
John Baer  Research Associate Professor
Kimberly Balsam  Postdoctoral Research Fellow
David Barash  Professor
Kimberly Barrett  Senior Lecturer
Theodore Beauchaine  Associate Professor
Miriam Bassok  Associate Professor
Ilene Bernstein  Professor
Eliot Brenowitz  Professor of Psychology and Zoology
Rechele Brooks  Postdoctoral Fellow
Jonathon Brown  Associate Professor
Steven Buck  Professor
James Canfield  Research Assistant Professor
Stephanie Carlson  Associate Professor
John Casseday  Research Professor
Ana Mari Cauce  Professor & Department Chair;

Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

Department Scholarships: None offered.

Student Organizations/Associations: Psi Chi (national honors society for undergraduate psychology students).

Of Special Note: A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

Professor of American Ethnic Studies
At-risk Children, Adolescents, & Families; Ethnic Minority Youth; Homeless Youth; Adolescent Substance Abuse; Community Psychology

Deborah Chun
Senior Lecturer
Adult Clinical Psychology; Health Psychology; Affect expression; Chronic Pain

Ellen Covey
Professor
Integration of Auditory Signals by the Mammalian Nervous System, Echolocation in Bats

Sean Cumming
Postdoctoral Fellow/Trainee

Geraldine Dawson
Professor
Child Neuropsychology, Electrophysiology, Assessment & Treatment of Autism

Elizabeth Dexter-Mazza
Research Associate
Suicidology; dialectical behavior therapy (DBT)

Jaime Diaz
Professor
Brain Development, Developmental Psychopharmacology, and the Scholarship of Teaching and Learning in Higher Education

Asoof Eftekhar
Research Associate
Treatment of PTSD, anxiety, depression

Corey Fagan
Senior Lecturer; Director, Psychological Services & Training Center
Psychotherapy with Adolescents & Adult Women, Individual & Family Therapy for Adults & Adolescents

Lynn Fainsilber Katz
Research Associate Professor
Effects of Marital Discord on Children, Antisocial Children, Social Psychophysiology, Family Interaction

Fred Fiedler
Professor Emeritus of Psychology
Leadership and group effectiveness, social and organizational psychology

Douglas Fitts
Research Associate Professor
Neurobiology, Salt/Water Regulation, Drinking

Brian Flaherty
Assistant Professor

William George
Professor
Alcohol Use & Social Behavior, Addiction Issues, Sexual Assault Issues, Cultural Issues in Addiction

John Gottman
Professor Emeritus
Children’s Emotional Development, Children’s Friendships, Family Interaction, Marital Interaction, Social Psychophysiology

Anthony Greenwald
Professor
Unconscious and implicit cognition; prejudice and stereotypes; subliminal priming

Michael Guralnick
Director of the Center on Human Development and Disability (CHDHD)
Professor of Psychology and Pediatrics

James Ha
Research Associate Professor
Primate Development, Behavior, & Reproduction; Corvid (Crow) Social Foraging; Orca Social Behavior

Renee Ha
Lecturer
Foraging, Evolution of Social Behavior in Corvids & Primates, Molecular Genetics

Melanie Harned
Research Associate
Assessment, conceptualization, and treatment of psychological problems; treatment of borderline personality disorder

Earl Hunt
Professor Emeritus
Individual Differences in Cognition, Cognition in Education & the Workplace, Artificial Intelligence, Computer Simulation Models of Reasoning, Mathematical Models of Thought

Jenise Jensen

Susan Joslyn
Senior Lecturer
Decision Making in Applied Settings, Autobiographical Memory

Peter Kahn
Associate Professor
Social and Moral Development. Information, Technology, and Nature

Nancy Kenney
Associate Professor & Associate Chair
Assisted Reproductive Technologies, Egg Donation, Social Attitudes

Beth Kerr
Associate Professor & Associate Chair
Cognition, Attention, Human Motor Control and Learning, Human Factors

Albert Kim
Post-Doctoral Fellow
Psycholinguistics, Cognitive Neuroscience

Jeansok Kim
Associate Professor
Neurobiology of stress, emotions, learning and memory

Christy Kimpo
Lecturer
Early Child Development, Pre- and Post-Natal Influences on Development, Pediatric HIV

Eileen Knight
Lecturer

Roger Knight
Lecturer

Robert Kohlenberg
Professor
Clinical Behavior Modification, Learning, Biofeedback, Psychotherapy

Lisa Kopp
Research Associate

Randall Kyes
Research Associate Professor
Head, Div. of Intl. Programs, WaNPRC
Animal Behavior, Primate Behavior/Cognition, Conservation Biology

Liliana Lengua
Associate Professor
Temperament, coping, and children’s adjustment to stressful situations; parent and child interactions.

R. Jacob Leonesio
Lecturer
Individual differences in cognitive and metacognitive processes.

Marsha Linehan
Professor
Behavioral Assessment & Therapy, Suicide & Parasuicide, Borderline Personality Disorders, Drug Abuse, Behavior Therapy with Women

Laura Little
Senior Lecturer & Assistant Chair
Teaching of Statistics & Methodology, Philosophy of Science

Joan Lockard
Professor Emeritus
Primatology, Primate Social Behavior, Human Ethology, Sociobiology, Evolutionary & Neural Mechanisms of Social Behavior
Patricia Loesche  Lecturer
Geoffrey Loftus  Professor
Visual Perception, Relations Between Low-Level Visual & Higher-Order Cognitive Processing, Confidence & Accuracy in Recognition Memory, Eyewitness Testimony, Statistics & Methodology, Computer Applications
Carolyn Mangelsdorf  Senior Lecturer
G. Alan Marlatt  Professor
Cognitive-Behavior Therapy & Assessment, Addictive Behaviors, Relapse Prevention, Harm Reduction, Health Psychology
Benny Martin  Research Associate
Clinical psychology, personality disorders
Lois McDermott  Senior Lecturer
Adult Clinical Psychology; Human Sexuality & Reproductive Physiology
Robert McMahon  Professor
Assessment, Prevention, & Treatment of Conduct Disorders; Developmental Psychopathology, Child & Adolescent Tobacco Use, Family Interaction
Andrew Meltzoff  Professor
Co-director, UW Institute for Learning and Brain Sciences Social and Cognitive Development in Infants and Young Children; Memory, Intentionality.
John Miyamoto  Associate Professor
Mathematical Psychology, Preference & Utility Theory, Cognitive Theories of Deductive & Inductive Inference, Medical Decision Making
Sheri Mizumori  Professor
Neurobiological Mechanisms of Plasticity, Spatial Learning & Memory
Jenna Monroy  Research Associate
Neurobiology and behavior
Scott Murray  Assistant Professor
Visual Perception, Attention, Functional Neuroimaging
Sean O’Donnell  Associate Professor
Genotypic & Endocrine Effects on Social Organization & Division of Labor in Insects, Evolution of Social Behavior
Jaime Olavarria  Associate Professor
Organization, Function, & Development of Neuronal Pathways in the Mammalian Central Visual System
Brian Ostafin  Research Associate-trainee
Hazardous drinking behavior
Lee Osterhout  Associate Professor
Psycholinguistics, Cognitive Neuroscience
John Palmer  Research Professor
Perception and Cognition, especially Visual Attention
Michael Passer  Senior Lecturer
Social Psychology, Teaching of Psychology
Jason Plaks  Assistant Professor
Motivation, Attribution, Stereotyping
Julie Quamma  Lecturer
Child clinical and developmental psychology; emotional functioning in school-aged children
Betty Repacholi  Assistant Professor
Social-cognitive and emotional development during infancy and early childhood.
Gene Sackett  Professor Emeritus
Primate Behavior, Early Experience & Development
Barbara Sarason  Research Professor Emeritus
Social Support, Stress, Cognitive Coping Skills, Personality Variables, Personal Relationships
Irwin Sarason  Professor Emeritus
Personality, Social Support, Stress & Anxiety
Yuichi Shoda  Associate Professor
Social Cognition, Generation and Perception of Personality Coherence
Jane Simoni  Associate Professor
Area Head, Adult Clinical Health & Community Psychology in Underrepresented Populations
Joseph Sisneros  Assistant Professor
Sensory neurobiology, animal physiology and behavioral biology
David Smith  Postdoctoral Fellow/Trainee
Brain mechanisms of learning and memory.
Ronald Smith  Professor
Director of Clinical Training Personality, Stress & Coping, Human Performance Enhancement Interventions, Clinical Psychology, Sport Psychology Research & Interventions
Frank Smoll  Professor
Sport Psychology, Leadership Behavior in Youth Sports, Psychological Correlates of Motor Development
Jessica Sommerville  Assistant Professor
early social and physical reasoning; action/perception linkages; role of agency in cognitive development; memory development
Mandy Steiman  Research Associate
Child clinical psychology, child clinical and pediatric psychology
Davida Teller  Professor Emeritus
Vision, Color Vision, Visual Development in Infants
Vivian Zayas  Postdoctoral Fellow/Trainee
Social and interpersonal cognition; Attachment processes; Adult romantic relationships; Partner preference
Lori Zoellner  Associate Professor
Information processing abnormalities in the anxiety disorders, with emphasis on the prevention and treatment of posttraumatic stress disorder

Course Descriptions

PSYCH 101 Introduction to Psychology (5) I&S McDermott, Osterhout, Passer
Surveys major areas of psychological science. Core topics include human social behavior, personality, psychological disorders and treatment, learning, memory, human development, biological influences, and research methods. Related topics may include sensation, perception, states of consciousness, thinking, intelligence, language, motivation, emotion, stress and health, cross-cultural psychology, and applied psychology. Offered: AWSpS.

PSYCH 200 Comparative Animal Behavior (5) NW Barash,
Research methods and findings of comparative animal behavior, their importance to an understanding of human behavior; rationale for study of behavioral differences/similarities between animal species, behavior viewed as part of adaptation of each species to its natural habitat. Not open for credit to students who have taken PSYCH 300.

PSYCH 201 Human Performance Enhancement (4) I&S
Smith, Smoll
Applications of psychological theories, research, and intervention strategies to performance enhancement in variety of life settings. Self-regulation models and techniques; stress and emotional control; attention control and concentration; mental rehearsal; time management; goal-setting; memory enhancement; communication and interpersonal conflict resolution. Participation in various psychological training procedures. Prerequisite: PSYCH 101.

PSYCH 202 Biopsychology (5) NW
Bernstein, Diaz, Mizumori, Olavarria
Examines the biological basis of behavior, the nervous system, how it works to control behavior and sense the world, and what happens when it malfunctions. Topics include learning and memory, development, sex, drugs, sleep, the senses, emotions, and mental disorders. Prerequisite: PSYCH 101. Offered: AWSpS.

PSYCH 203 Introduction to Personality and Individual Differences (4) I&S
Cauce, Lengua, Linehan, Marlatt, Smith
Overview of the major theories, research findings, and applications in the scientific study of personality. Covers research methods and approaches to measuring personality variables. Not open for credit to students who have taken PSYCH 303. Prerequisite: PSYCH 101.

PSYCH 206 Human Development (5) I&S
Theoretical perspectives and research methods in child development with an overview of historical and current works. Includes prenatal and biological development, the development of cognitive, linguistic, and social and emotional abilities. Not open for credit to students who have taken PSYCH 306. Prerequisite: PSYCH 101.

PSYCH 207 Psychology of Peace (5) I&S
Barash
Examination of the psychological aspects of peace in the modern world. Topics include theories of individual aggressiveness and violence, leadership personalities, crisis decision making, nuclear psychology, images of the enemy, and psychological opportunities and obstacles to the establishment of a peaceful society.

PSYCH 209 Fundamentals of Psychological Research (5)
Buck, Kerr, Little, Passer
Psychological research methodology and techniques. Topics include the logic of hypothesis testing, experimental design, research strategies and techniques, fundamentals of scientific writing, search and evaluation of research literature in psychology, and ethical issues in psychological research. Required for all psychology majors. Prerequisite: 2.0 in PSYCH 101. Offered: AWSpS.

PSYCH 210 Human Sexuality (5) I&S
McDermott
Broad survey of biological, psychological, and social determinants of human sexuality and sexual behavior. Topics include cultural diversity, sexual development (physical and psychological), sexual health, reproduction (pregnancy, contraception, abortion), development of sex, gender and orientation, adult sexual bonding, sexual abuse and assault.

PSYCH 245 Introduction to Social Psychology (5) I&S
Brown, Shoda
Overview of major findings of social psychology, emphasizing the relevance for understanding the social behaviors of individuals and groups of individuals and their relationship to social context. Not open for credit to students who have taken PSYCH 345. Prerequisite: PSYCH 101.

PSYCH 250 Racism and Minority Groups (5) I&S
Barrett
Overview of the causes, contexts, and consequences of racism and its effects upon minority groups and society. Emphasis on cultural history, political and socioeconomic structures that contribute to racism. Examination of current issues in race relations and cultural pluralism in U. S. and selected international topics.

PSYCH 257 Psychology of Gender (5) I&S
Kenney
Major psychological theories of gender-role development; biological and environmental influences that determine and maintain gender differences in behavior; roles in children and adults; topics include aggression, cognitive abilities, achievement motivation, affiliation. Recommended: either PSYCH 101 or WOMEN 200. Offered: jointly with WOMEN 257.

PSYCH 260 Psychosocial Aspects of Nuclear War (3) I&S
Barash
Introduction to basic issues of nuclear war, including its effects, weaponry, and history of the arms race. Primary focus on the psychologic underpinnings of deterrence, relations between nations, and the personal and social forces operative in the arms race and peace movements.

PSYCH 300 Animal Behavior (5) NW
Barash, Beecher, Ha, O'Donnell, Sisneros
Introduces important concepts and empirical findings in animal behavior. Emphasizes evolutionary and mechanistic approaches to understanding diversity and complexity of behavior. Topics include communication, mating, migration, and sociality. Prerequisite: either BIOL 101, BIOL 118, BIOL 161, BIOL 180, or BIOL 203.

PSYCH 303 Personality (5) I&S
Lengua, Smith
Overview of major perspectives, scientific issues, applications, and research findings in the area of personality. Direct exposure to scientific literature, writing assignments, and research-based class experiences prepare students for advanced work in personality, social, abnormal, and developmental psychology. Prerequisite: PSYCH 101; either PSYCH 202 or PSYCH 222; PSYCH 209; either PSYCH 213, PSYCH 217, PSYCH 315, or PSYCH 317.

PSYCH 305 Abnormal Psychology (5) I&S
Beauchaine, George, Kohlenberg, Linehan, Simoni, Smith, Zoellner
An overview of major categories of psychopathology, including description and classification, theoretical models, and recent research on etiology and treatment. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 306 Developmental Psychology (5) I&S
Barrett, Carlson, Melzoff, Repacholi, Sommerville
Overview of past and present theoretical and research-based approaches to biological, cognitive, and social development from the prenatal period to early adolescence. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 315 Understanding Statistics in Psychology (5) QSR
Ha, Little
Statistics for psychological research. Elementary probability theory, hypothesis testing, and estimation. Satisfies the statistics requirement for majors registered in the Psychology Bachelor of Arts degree program. Prerequisite: 2.0 in PSYCH 209; 2.0 in either MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. Offered: AWSpS.

PSYCH 317 Introduction to Probability and Statistics for Psychology (5) QSR
Little, G. Loftus
Probability theory as a model for scientific inference. Probabilistic variables and experimental outcomes, conditional probability, binomial and related distributions, experiments as samples, statistics and sampling distributions, the normal distribution, confidence intervals, problems of estimation from experiments. Prerequisite: 2.5 in PSYCH 209; 2.0 in either MATH 124, MATH 127, MATH
Introduction to the study of language, including language structure, underlying biology to perceptual processes and behavior. Prerequisite: either 2.0 in PSYCH 209; 2.0 in either PSYCH 213, PSYCH 217, PSYCH 315, or 2.0 in PSYCH 317.

PSYCH 330 Laboratory in Animal Behavior (5) NW Buck
Experience with a variety of animal species and experimental procedures and instrumentation. Prerequisite: either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 PSYCH 315, or 2.0 in PSYCH 209.

PSYCH 331 Laboratory in Human Performance (5) I&S Joslyn
Selected aspects of human cognition, perception, and performance. Prerequisite: 2.0 in PSYCH 209; either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 in PSYCH 315, or 2.0 in PSYCH 317.

PSYCH 332 Laboratory in Animal Learning (5) NW Buck
Selected aspects of animal learning emphasizing behavioral experiments with the rat. Prerequisite: either 2.0 in PSYCH 213, 2.0 in PSYCH 217, 2.0 in PSYCH 315, or 2.0 in PSYCH 317.

PSYCH 333 Sensory and Perceptual Processes (5) NW Beecher, Buck, Covey
An overview of each of the major senses with emphasis on the structure and function of sensory systems and the relation of the underlying biology to perceptual processes and behavior. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 335 Human Factors Psychology (4) I&S Kerr
Consideration of human performance factors in the design of tools/equipment, tasks/jobs, and work and living environments. Emphasis on the importance of human perception, memory, attention, and motor control for understanding ways to optimize the relationship between people and technology. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 345 Social Psychology (5) I&S J.D. Brown, Shoda
The scientific study of how people's thought, feeling, and action influence, and are influenced by, other people. Prerequisite: 2.0 in either PSYCH 202 or PSYCH 209.

PSYCH 347 Psychology of Language I (5) I&S/VLPA Corina, Osterhout
Introduction to the study of language, including language structure, speech perception, language acquisition, psychological processes underlying comprehension and production of language, the relation between brain and language, and the question of the specificity of human language. Prerequisite: either 2.0 in PSYCH 209; 2.0 in LING 200, or LING 201. Offered: jointly with LING 347.

PSYCH 350 Honors Research Seminar in Psychology (2-, max. 4) Bassak
Presentations by professors and advanced students concerning the rationale, methodology, and progress of their research projects; assistance with research projects; preparation of junior paper. Four credits of 350 required for all junior honors and distinction candidates in conjunction with 498 and 499. Offered: AWSp.

PSYCH 355 Cognitive Psychology (5) I&S
Current theory and research in perception, attention, memory and learning, attitudes, thinking and decision making, and language. For the student who wishes a survey, or who intends additional work in any of the above content areas. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 357 Psychobiology of Women (5) NW Kenney
Physiological and psychological aspects of women's lives; determinants of biological sex; physiological and psychological events of puberty; menopause; sexuality; contraception, pregnancy, childbirth, and lactation; role of culture in determining psychological response to physiological events. Recommended: PSYCH/WOMEN 257. Offered: jointly with WOMEN 357.

PSYCH 361 Laboratory in Social Psychology (5) I&S Greenwald
Methodology of laboratory and field research on social behavior; data analysis and report writing; group research projects. Prerequisite: 2.0 in PSYCH 209; 2.0 in either PSYCH 213, PSYCH 217, PSYCH 315, or PSYCH 317; 2.0 in either PSYCH 245 or PSYCH 345.

PSYCH 380 Cross-Cultural Competence (4) I&S
Facilitates development of multicultural competence; focuses on mental health/social service needs of ethnic and linguistic minorities, and developing personal/interpersonal skills to reduce barriers, enhance effective service provision to cross cultural groups, sexual minorities and disabled people. Prerequisite: PSYCH 250; either PSYCH 305 or PSYCH 306.

PSYCH 399 Foreign Study (3-5, max. 10)
Upper division psychology courses for which there are no direct University of Washington equivalents taken through the University of Washington Foreign Study Program.

PSYCH 400 Learning (5) I&S/NW
Experimental research and basic theories primarily in animal learning. Prerequisite: 2.0 in PSYCH 202.

PSYCH 402 Infant Behavior and Development (3/5) I&S Melzoff
Psychological development in the first two years of life. Basic and advanced techniques for assessing psychological development in infancy. Classic theories of human infancy and examination of a wide range of new experiments about infant behavior and development. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306 or PSYCH 414.

PSYCH 403 Motivation (5) I&S/NW
Theory and research on reinforcement, punishment, frustration, preference, instinctual mechanisms, and other factors controlling animal behavior. Prerequisite: 2.0 in PSYCH 202.

PSYCH 404 Psychobiology of Motivation (5) I&S/NW
Physiological mechanisms underlying thirst, salt appetite, hunger, reproduction, drug addiction, and fear. Evolutionary and learning processes that influence motivation. Prerequisite: 2.0 in PSYCH 202.

PSYCH 406 Insect Behavior (4) NW O'Donnell
Explores complexity and diversity of behavior in insects and related invertebrate animals. Overview of important lineages of insects and major behavioral traits. Examines how insect biology both constrains behavior and provides evolutionary opportunities. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300.

PSYCH 407 History of Psychology (5) I&S
Historical and theoretical background of the basic assumptions of modern psychology, including such doctrines as behaviorism, determinism, and associationism and the scientists who developed them. Prerequisite: 2.0 in PSYCH 209.

**PSYCH 408 Mechanisms of Animal Behavior (4) NW Beecher, Brenowitz**
Comparative exploration of physiological and perceptual mechanisms that control behaviors necessary for survival and reproduction in animals. Model systems discussed include animal communication, mate choice, escape behavior, learning and memory, orientation, biological rhythms, foraging behavior. Prerequisite: either 2.0 in BIOL 180, or 3.5 in PSYCH 200, or 2.0 in PSYCH 300. Offered: jointly with BIOL 408.

**PSYCH 409 Sociobiology (5) NW Bohner**
Biological bases of social behavior, emphasizing evolution as a paradigm. Emphasizes how to think like evolutionary biologist, especially with regard to interest conflict. Topics are individual versus group selection, kin selection, altruism, mating systems, sexual conflict, alternate reproductive strategies, and parent/offspring conflict. Prerequisite: either 3.5 in PSYCH 300, 2.0 in PSYCH 300, 2.0 in BIOL 162, or 2.0 in BIOL 180. Offered: jointly with BIOL 409.

**PSYCH 410 Child and Adolescent Behavior Disorders (5) I&S Barrett, Beauchaine, Katz, McMahon**
Introduction to psychopathology in children and adolescents, and an overview of principal modes of intervention. Particularly for students interested in advanced work in clinical psychology, social work, or special education. Prerequisite: 2.0 in PSYCH 305; either 2.0 in PSYCH 306 or 2.0 in PSYCH 202, 2.0 in PSYCH 206 and 2.0 in PSYCH 209.

**PSYCH 411 Perceptual Development (5) I&S/NW Meltzoff**
Origins and development of perception in human infancy. Object, face, and speech perception; cross-modal relations between touch, vision, audition. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, or PSYCH 414. Offered: jointly with SPHSC 411.

**PSYCH 412 Behavioral Genetics (4) NW O'Donnell**
Role of genetics in determining variation in human and animal behavior and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects, and gene expression. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, or 2.0 in BIOL 161, or 2.0 in BIOL 180.

**PSYCH 413 Adolescent Development (5) I&S**
Provides an overview of physical, cognitive, psychosocial, and emotional development of adolescents with an emphasis on understanding the context in which young people grow up. Explores cultural, environmental, and social influences on development. Prerequisite: 2.0 in PSYCH 209; 2.0 in either PSYCH 315 or PSYCH 317.

**PSYCH 414 Cognitive Development (5) I&S Sommerville**
Key theoretical and research approaches to cognitive development from infancy through adolescence. Sensorimotor development, language development, imitation, number concepts, logical reasoning, memory, cognition in adolescents, intelligence, and the role of biology, environment, and experience. Prerequisite: either 2.0 in PSYCH 306, or 2.0 in both PSYCH 206 and PSYCH 209.

**PSYCH 415 Personality Development of the Child (5) I&S Carlson, Repacholi**
Socialization theory and research, infant attachment and social relationships, development of aggressive and altruistic behaviors, sex-role development, moral development, parent and adult influences. Applied issues in social development and policy. Prerequisite: 2.0 in either PSYCH 206 or PSYCH 306; 2.0 in either PSYCH 315 or PSYCH 317.

**PSYCH 416 Animal Communication (5) NW Beecher, Brenowitz, O'Donnell, Sisneros**
Evolution and mechanisms of animal communication and related processes of perception, thinking, and social behavior. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300.

**PSYCH 417 Human Behavior as a Natural Science (5) I&S/ NW Lockard**
Evolution of human social behavior and the adaptive significance of communication systems from a sociobiological and anthropological perspective. Prerequisite: either PSYCH 200, PSYCH 300, BIO A 201, or BIOL 180.

**PSYCH 418 Primate Social Behavior (5) NW Lockard**
Social behavior, ecology, and group structure of monkeys and apes from an evolutionary, sociobiological, and anthropological perspective. Prerequisite: either 3.5 in PSYCH 200, 2.0 in PSYCH 300, 2.0 in BIO A 201, 2.0 in BIOL 180, or 2.0 in both BIOL 202 and BIOL 203.

**PSYCH 419 Behavioral Studies of Zoo Animals (5, max. 10) NW Lockard**
Observational studies of behavior of zoo animals to expand basic knowledge of animal behavior, conservation of endangered species, and research methodology with discussions and tours focusing on zoo philosophy and operations. Offered in cooperation with Woodland Park Zoo. Prerequisite: either 2.0 in BIOL 180, 3.5 in PSYCH 200, or 2.0 in PSYCH 300.

**PSYCH 420 Drugs and Behavior (3) NW Diaz**
Animal and clinical research on the behavioral consequences of drug intake. Prerequisite: PSYCH 322.

**PSYCH 421 Neural Basis of Behavior (5) NW Diaz**
Anatomical and physiological principles and resultant behavior involved in the integrative action of the nervous system. 431 recommended but not required to follow 421. Prerequisite: 2.0 in PSYCH 202.

**PSYCH 422 Sensory Basis of Behavior (5) NW Olavarria**
Study of sensory mechanisms as a way to understand behavior. Basic properties of neurons, anatomy, and physiology of sensory systems, with some emphasis on the visual system. Prerequisite: 2.0 in either PSYCH 202 or PSYCH 333.

**PSYCH 424 Vision and Its Physiological Basis (5) NW Teller**
Behavioral neurobiology of human vision: color vision, acuity and spatial vision, light and dark adaptation, visual development. Correlation of visual functioning with known optical, biochemical, physiological, and anatomical substrates. Prerequisite: 2.0 in either PSYCH 333, NBI 302, or PHIL 160. Offered: jointly with PBIO 424.

**PSYCH 425 Surgical and Histological Techniques (5) NW**
Practicum in basic and advanced surgical and histological techniques used in psychophysiological experimentation. Prerequisite: PSYCH 421.

**PSYCH 426 Neurobiology of Learning and Memory (4) NW Mizumori**
Theory and research on how animals learn and remember, including basic concepts of brain plasticity, how brain areas and neurons adapt to changes in experiences throughout the lifespan, and cellular and structural substrates of a “memory.” Prerequisite: 2.0 in either PSYCH 222, PSYCH 322, PSYCH 333, PSYCH 421, PSYCH 422, or PSYCH 423.

**PSYCH 427 Behavioral Endocrinology (5) NW Lattemann**
The endocrine system and how its secretions influence and are influenced by behavior; relationships between the nervous and endocrine systems. Prerequisite: PSYCH 421.
PSYCH 428 Human Motor Control and Learning (5) I&S/NW Kerr
Current theory and research in human motor performance and skill acquisition. Prerequisite: 2.0 in PSYCH 209; 2.0 in PSYCH 202.

PSYCH 429 Brain Anatomy for the Behavioral Scientist (1) NW Diaz
Detailed review of the neuroanatomical features of the sheep brain with laboratory demonstrations. Prerequisite: PSYCH 421 which may be taken concurrently.

PSYCH 430 Development of Brain Connections (4) NW Olavarria
Analysis of innate and environmental factors that play a role in the development of brain connections. Critical review of current literature on the various strategies used by neurons to find their appropriate targets. Prerequisite: 2.0 in either PSYCH 222, PSYCH 333, PSYCH 421, or PSYCH 422.

PSYCH 432 Visual Perception (4) I&S/NW Rudd
Surveys current facts/theories about how our brains interpret the images formed by our eyes to create a presentation of the visual environment. Topics include 3-D vision; color, form, motion, and object perception; and visual illusions. Prerequisite: 2.0 in either PSYCH 202, PSYCH 333, or PSYCH 355.

PSYCH 433 Regulatory Behavior (4) NW Kenney
Neural and endocrine mechanisms in the control of food and water intake and the regulation of body weight and fluid balance. Prerequisite: either PSYCH 421 or PSYCH 427.

PSYCH 435 Human Color Vision (5) I&S/NW Buck
Discusses how color does not exist in the physical environment but is instead a creation of our brains. Explores perceptual, physiological, developmental, evolutionary, genetic, and cultural aspects of human color vision, including its role in language, culture, and art. Prerequisite: PSYCH 202; PSYCH 209.

PSYCH 436 Developmental Aspects of Sport Competition (4) I&S Smoll
Biophysical and psychosocial influences of sport participation on growth and development of children and youth. Competition readiness, injuries, stress, aggression, roles and responsibilities of parents and coaches. Prerequisite: 2.0 in PSYCH 209.

PSYCH 437 Motor Development (4) NW Smoll
Analysis of motor development from prenatal origins through adolescence with emphasis on relations between biophysical and psychosocial development of children and youth. Prerequisite: 2.0 in PSYCH 101.

PSYCH 438 Social Psychology of Sport (4) I&S Smith, Smoll
Reciprocal effects of interpersonal and group influence processes, e.g., social facilitation, behavior modification, observational learning, individual versus group performance, group cohesion, leadership, aggression. Prerequisite: 2.0 in PSYCH 101; 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 439 Perceptual Processes (5) I&S/NW
Theory and findings in perception with a focus on visual perception in humans. Discrimination and constancy for simple judgments, segregation and identification of visual objects, and specific areas of investigation such as reading and computer vision. Prerequisite: 2.0 in PSYCH 333.

PSYCH 443 Motivational Theories in Social Psychology (5) I&S Plaks
Theories of motivation in social psychology. Emphasis on how motivation and cognition mutually influence each other to produce behavior. Explores such topics as persuasion, goal pursuit, self-regulation, achievement, and social comparison. Prerequisite: 2.0 in PSYCH 345.

PSYCH 445 Theories of Social Psychology (5) I&S J.D. Brown
Evaluation of the major theories of human social behavior supported by the empirical literature; theories of social cognition and thought; major theories of social interaction, group processes, and social learning. Prerequisite: PSYCH 345.

PSYCH 446 Personality Assessment (3) I&S R. Smith
Measurement of personality variables in personality research, social psychology, and clinical psychology. Theoretical conceptions underlying various clinical and experimental scales and an assessment of their construct validity and behavioral correlates. Prerequisite: 2.0 in PSYCH 303; 2.0 in PSYCH 315; 2.0 in PSYCH 317.

PSYCH 447 Psychology of Language II (4) I&S/VLPA Corina, Osterhout
Psychological principles applied to linguistic development and organization; language in both its stimulus and response aspects. Prerequisite: 2.0 in either PSYCH 347, PSYCH 355, or LING 400. Offered: jointly with LING 447.

PSYCH 448 Seminar in Psychology (1-15, max. 15)
Selected research topics of contemporary interest. Quarterly listings of specific offerings are available at departmental advisory office.

PSYCH 450 Honors Research Seminar in Psychology (2-, max. 4) Bassak
Senior thesis research; preparation of senior thesis; oral presentation of research. Four credits of 450 required for all senior honors and distinction candidates in conjunction with 498 and 499. Offered: AWSp.

PSYCH 451 Health Psychology (5) I&S/NW
Overview of the psychological and behavioral factors in health and disease. Includes research on both psychological causes and treatments. Topics include stress, risky behaviors, patient-provider interactions, pain, behavioral/medical treatments, and lifestyle interventions. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209; 2.0 in either PSYCH 303, or PSYCH 345.

PSYCH 452 Psychology of the Self-Concept (4) I&S J.D. Brown
Examines psychological theory and research on the role of the self-concept in regulating behavior. Topics include the development of the self-concept; self-awareness; and self-esteem maintenance. Prerequisite: 2.0 in either PSYCH 245 or PSYCH 345.

PSYCH 454 Personality and Social Influence (4) I&S Shoda
Survey of various theories and research for analyzing person-situation interactions — how the qualities of persons and situations combine to generate thoughts, feelings, and behaviors of a person in a given social situation. Prerequisite: PSYCH 209; either PSYCH 203, PSYCH 245, PSYCH 303, or PSYCH 345.

PSYCH 456 Social and Moral Development (5) I&S Kahn
Theoretical approaches toward explaining children’s social and moral development, including those that are nativistic, sociobiological, behavioralistic, psychoanalytic, and constructivist. Use of theory to investigate applied problems related to parenting, education, peer relationships, authority, sexuality, culture, ecology, and technology. Prerequisite: either PSYCH 206 or PSYCH 306.

PSYCH 457 Language Development (5) I&S/VLPA
First-language acquisition and use by children. Emphasis on theoretical issues and research techniques. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, LING 200, or LING 400. Offered: jointly with LING 457.

PSYCH 460 Cognitive Neuropsychology (4) NW Corina, Osterhout
Discussion of neural systems underlying cognitive behavior with particular focus on breakdown of cognition following brain damage. Topics include object and space perception, language, voluntary movement, attention, and memory. Examination of contributions from related areas of neuroimaging, visual perception, linguistics, physiology, and neuroscience. Prerequisite: 2.0 in either PSYCH 202, PSYCH 333, PSYCH 355, or PSYCH 421.

PSYCH 462 Human Memory (5) I&S Joslyn
Research and theory in key areas of memory. Issues covered include information processing theory, the link between memory processes and their biological underpinnings, autobiographical memory, implicit memory, and the effect of emotion on memory. Prerequisite: 2.0 in PSYCH 209; recommended: PSYCH 355.

PSYCH 465 Intelligence (5) I&S
Analysis of individual differences in cognition. Includes description/use of psychometric (“intelligence test”) models, test scores’ relationship to academic and non-academic performance, information processing and biological models of intelligence (including genetic models). Discussion of male-female and demographic group differences in cognition. Prerequisite: either PSYCH 315 or PSYCH 317; PSYCH 355.

PSYCH 466 Psychology of Judgment and Decision Making (5) I&S Miyamoto
Human information processing in judgment and decision making, especially the interface between cognitive theories and normative and prescriptive theories of decision making. Prerequisite: 2.0 in either PSYCH 315 or PSYCH 317; either PSYCH 331, PSYCH 355, or PSYCH 361.

PSYCH 469 Psychology of Reasoning (4) I&S Bassok
Cognitive processes in human learning, problem solving, deductive and inductive reasoning. Prerequisite: 2.0 in PSYCH 209.

PSYCH 470 Psychology and Music (5) I&S/VLPA Covey
Introduction to the scientific study of musical behavior. An overview of current topics in the psychology of music from the areas of musical perception and cognition, musical development, music therapy, musical performance, and composition. Includes psychoacoustical and neuropsychological foundations, research methods, and some basic material in music theory. Prerequisite: 2.0 in either PSYCH 202 or NBIO 302.

PSYCH 471 Applied Issues in Cognition (4-5, max. 10) I&S Joslyn
Examines cognitive issues in applied settings, such as the workplace and education. Topics include such issues as attention, expertise, problem solving, decision-making, human error, automation, navigation, and individual differences. Prerequisite: PSYCH 209.

PSYCH 480 Ideas of Human Nature (5) I&S Barash
Reviews various approaches to the nature of human nature, including ideas from ancient philosophy, theories of the soul, empiricism, idealism, conditioning, social constructions, concepts of Freud, Marx, the existentialists, and neo-Darwinism. Prerequisite: PSYCH 101.

PSYCH 481 Seminar in Advanced Quantitative Methods (3) Little
Examines the role of statistical methods in psychological research. Issues and controversies surrounding null hypothesis significance testing. Review of selected alternative statistical methods in psychology. Prerequisite: 2.0 in either PSYCH 315 or PSYCH 318.

PSYCH 485 Primate Conservation Biology and Behavior (5) NW Kyes
Examines the principles and concepts of conservation biology as they apply to the nonhuman primates with special attention to theoretical advances, conservation strategies, and management practices central to primate conservation. Prerequisite: 2.0 in either PSYCH 202 or PSYCH 300.

PSYCH 488 Stress and Coping (4) I&S/NW
Reviews theories and research concerning stress and its roles in behavior, personality, development, health, and interpersonal relationships. Coping analyzed as a factor in the way people respond to stressful circumstances. Prerequisite: 2.0 in PSYCH 202; 2.0 in PSYCH 209.

PSYCH 489 Clinical Psychology (3) I&S George
Basic issues, methods, and research: professional issues, psychological assessment, and approaches to psychotherapy and behavioral change. Prerequisite: 2.0 in PSYCH 305.

PSYCH 490 Stress Management (3) I&S/NW

PSYCH 494 Field Study in Animal Behavior (2-3, max. 9) Kyes
Field experience in areas relating to animal behavior through participation in seminar discussion and field exercises and training at foreign and domestic field study sites.

PSYCH 496 Undergraduate Fieldwork (2-5, max. 10)
Individual consultation with faculty member and supervised practicum experience in a broad range of community settings and agencies dealing with psychological problems. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 497 Undergraduate Teaching Experience in Psychology (2-5, max. 10)
Students are trained as assistants in quiz sections or as supplemental tutors for undergraduate psychology courses. Designed especially for those students planning graduate work or education certification. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 498 Directed Reading in Psychology (1-3, max. 18)
Readings in special interest areas under supervision of departmental faculty. Discussion of reading in conference with the instructor. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 499 Undergraduate Research (1-3, max. 18)
Design and completion of individual research projects. An overall maximum of 18 credits in 496, 497, 498, and 499 may apply toward a baccalaureate degree.

PSYCH 500 Proseminar in Psychology (1, max. 10) Greenwald
Presentations on professionally and practically useful topics by guest faculty presenters designed for first-year and second-year graduate students. Credit/no credit only. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 502 Core Concepts in Animal Behavior (3) Barash, Beecher, O’Donnel
Reading, reports, and discussion on animal behavior, with a focus on topics that lie at the interface of animal behavior, evolutionary science, neurobiology, and psychology. Include social organization, mating systems, foraging, learning, communication, and agonistic behavior. Prerequisite: Graduate standing in Psychology, or permission of instructor.

PSYCH 503 Core Concepts in Behavior Genetics (4) O’Donnell, Shoda
Overview of current approaches to genetic analysis in Psychology. Role of genetics in behavioral variation, and in regulating behavioral development. Techniques for quantifying genetic variation, behavioral effects of genes, and patterns of gene expression. Genetic effects on major behavioral differences. Prerequisite: graduate standing in Psychology, or permission of instructor.

**PSYCH 504 Core Concepts in Behavioral Neuroscience (3)**

Bernstein, Buch, Covey, Diaz, Kenney, Kim, Mizumori, Olavarria

Historical and contemporary perspectives in behavioral neuroscience. Current methodologies and research strategies. May include sensory processing, genetics, developmental neuroendocrinology, developmental neural plasticity, neurobiology of learning and memory, lifespan perspectives on behavioral neurobiology, and psychopharmacology. Prerequisite: graduate standing in Psychology, or permission of instructor.

**PSYCH 506 Core Concepts in Cognitive Neuroscience (3)**

Corina, Osterhout

Combines psychological models of information processing with research techniques in the biomedical sciences. Topics in vision, attention, memory, motor behavior, and language illustrate this integrative approach. Research methods include behavioral, single unit, lesion and neuro-imaging techniques. Prerequisite: graduate standing in Psychology, or permission of instructor.

**PSYCH 507 Core Concepts in Cognitive Psychology (5)**

Bassok

Survey of the major topics in human cognition. Discussion of memory, concepts and categories, language, decision-making, and problem solving. Prerequisite: graduate standing in Psychology, or permission of instructor.

**PSYCH 508 Core Concepts in Perception (3)**

G. Loftus

Current topics in perception, psychophysics, sensory memory, pattern recognition, letter and word perception, and visual masking. Prerequisite: graduate standing in Psychology, or permission of instructor. Offered: Sp.

**PSYCH 510 Core Concepts in Social Psychology (4)**

Plaks, Shoda

An overview of contemporary theories and research in social psychology, focusing on introducing graduate students to the field as practitioners of social psychological research. Prerequisite: graduate standing in Psychology, or permission of instructor.

**PSYCH 511 Core Concepts in Personality (3)**

Shoda, R. Smith

Review of personality research. Roles of cognitive, affective, motivational, and psychodynamic processes. Critical evaluation of current personality, its antecedents, and its influences over behavior. Attention to role of personality variables in social relationships. Prerequisite: graduate standing in Psychology, or permission of instructor.

**PSYCH 512 Core Concepts in Biological Basis of Development (4)**

Bernstein

Embryological, genetic, physiological, and evolutionary perspectives of human development; biological development in infancy; sensory development and its influence on the development of perception; primate models for human development. Prerequisite: graduate standing in Psychology, or permission of instructor.

**PSYCH 514 Core Concepts in Early Cognitive and Linguistic Development (4)**

Meltzoff, Sommerville

Origins and early development of thought and language. Piagetian theory and modern-day revisions. In depth examination of historical and philosophical bases for current empirical research. Prerequisite: graduate standing in Psychology or permission of instructor.

**PSYCH 515 Core Concepts in Personality and Social Development (4)**

Carlson

Theories and empirical literature in personality and social development throughout infancy, childhood. Prerequisite: graduate standing in Psychology, or permission of instructor.

**PSYCH 517 Core Concepts in Systems of Psychotherapy (3)**

George

Theory and research of major systems of psychotherapy, including the psychodynamic, behavioral, cognitive, and family systems approaches as an introduction to subsequent practica in clinical psychology. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate standing in psychology, or permission of instructor. Offered: A.

**PSYCH 518 Core Concepts in Behavior Disorders (5)**

Zoellner

Major types of behavior disorders, with emphasis on clinical manifestations, relevant research, and theoretical perspectives. Required for all graduate students majoring in clinical psychology. Prerequisite: graduate standing in Psychology or permission of instructor. Offered: W.

**PSYCH 519 Core Concepts in Behavior Change (5)**

Kohlenberg

Behavioral theory and behavioral approaches to treatment. Prerequisite: PSYCH 518 and permission of instructor. Offered: Sp.

**PSYCH 522 Laboratory in Statistical Computation I (2)**

Miyamoto

Techniques of computation using statistical software on personal computers. Organization of data files, transformations of variables, graphical representations of data, descriptive statistics, elementary inferential statistical analyses. Prerequisite: concurrent enrollment in PSYCH 524 or permission of instructor. Offered: A.

**PSYCH 524 Introduction to Statistics and Data Analysis (4)**

Miyamoto

Basic concepts of statistical theory and methods of data analysis. Emphasis on the integration of statistical theory, statistical computation, and psychological research methods. Required of all first-year graduate students in psychology. Prerequisite: concurrent enrollment in PSYCH 522 or permission of instructor. Offered: W.

**PSYCH 525 Linear Models and Data Analysis (4)**

Analysis of data in the behavioral sciences. Required of all first-year graduate majors. Prerequisite: PSYCH 522, PSYCH 524, concurrent registration in PSYCH 523, or permission of instructor. Offered: W.

**PSYCH 526 Multivariate Statistics (4)**

Rudd

An introduction to statistical modeling; interactive data analyses; use of regression, ANOVA, logistic regression, and log-linear models in explanatory studies. Prerequisite: PSYCH 525.

**PSYCH 527 Mathematical Modeling for Psychology and the Neurosciences (3)**

Rudd

Introduces a collection of mathematical models increasingly important to research in psychology and neuroscience, including random walks, differential equations, linear systems theory, Fourier analysis, nonlinear systems, and neural modeling. Topics illustrated by examples from recent literature. Prerequisite: undergraduate statistics.

**PSYCH 528 Practical Methods for Behavioral Research (4)**
max. 8) Greenwald
Examination of methodological, practical, and communication problems associated with research on human behavior. Topics include: selecting research problems, use of theory, types of validity, common sense about statistics, when to replicate, dealing with unpredicted results, strategies for presentation and publication. Offered: Sp.

PSYCH 529 Advanced Research Methods (5) Beauchaine
Surveys advanced clinical research methods not covered in the required statistics sequence. Examples include structural equation modeling, hierarchical linear modeling, growth curve modeling, and taxometric analyses. Hands-on experience gained through weekly assignments using each method. Prerequisite: PSYCH 525.

PSYCH 530 Introduction to Latent Variables (4) Greenland
Analyses techniques to assess effects of latent variables in presence of error in observed data. Provides experience with statistical tools for confirmatory structural equation modeling and testing of hypotheses concerning causal and other relations among latent variable. Prerequisite: PSYCH 515 or permission of instructor.

PSYCH 531 Research Methods in Clinical and Community Psychology (4) Lengua
Addresses issues concerning the design and implementation of research in clinical and community psychology. Topics include validity; reliability; experimental, quasi-, and non-experimental designs; causal inference; interpretation of data; and research ethics. Provides students with tools to evaluate research, develop hypotheses, and design rigorous empirical studies. Offered: A.

PSYCH 532 Single Subject Design and Research (3) Kohlenberg
Single subject designs (reversal, multiple baseline, changing criterion) and their application to clinical cases. Prerequisite: graduate major standing in clinical psychology or permission of instructor. Offered: W.

PSYCH 535 Scientific Writing in Psychology (5, max. 10)) Loesche
Addresses issues in scientific writing and publishing; laboratories assist with writing, and provide feedback on drafts of articles throughout the writing process. Students write a journal article to submit for publication. Other writing projects are also possible with instructor’s permission. Credit/no credit only.

PSYCH 536 Grant Preparation in Psychology (3, max. 6) Mizumori, Teller
Prepare and submit an application for a major national fellowship. Joint registration in PSYCH 598 with faculty advisor is required. Credit/no credit only. Prerequisite: graduate standing Psychology, and permission of instructor.

PSYCH 537 Teaching of Psychology (3) Passer
Examines issues concerning the teaching of psychology, including educational goals, course development, instructional methods, T.A.-student and T.A.-faculty relations, grading, student diversity, and problem situations. Assignments are designed to enhance students’ organizational, presentational, and problem-solving skills. Credit/no credit only. Prerequisite: graduate standing in the Department of Psychology.

PSYCH 538 Interactive Software for Psychological Research (4) Loftus
Introduction to computing concepts and basic programming skills. Includes principles of programming, the MATLAB programming environment, and the psychophysics toolbox. Data collection and management. Design and program experiments. No prior programming experience needed. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 540 Advances in Psychology (3-5, max. 30)
Intensive readings from the current literature on an emerging topic or theoretical perspective in psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 541 Advances in Animal Behavior (3-5, max. 30) Barash, Beecher, Brenowitz, Kyes, O’Donnell
Intensive readings from the current literature on an emerging topic or theoretical perspective in animal behavior. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 542 Advances in Behavioral Neuroscience (3-5, max. 30) Buck, Teller
Intensive readings from the current literature on an emerging topic or theoretical perspective in behavior science. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 543 Advances in Child Clinical Psychology (3-5, max. 30) Beauchaine, Cauce, Lengua, McMahon
Intensive readings from the current literature on an emerging topic or theoretical perspective in child clinical psychology. Prerequisite: graduate student in Psychology, or permission of instructor.

PSYCH 544 Advances in Clinical Psychology (3-5, max. 30) Baer, Cauce, Dawson, George, Kohlenberg, Linehan, Marlatt, McMahon, Smith, Zoellner
Intensive readings from the current literature on an emerging topic or theoretical perspective in clinical psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 545 Advances in Cognition/Perception (2) E. Loftus, G. Loftus
Intensive readings from the current literature on an emerging topic or theoretical perspective in cognition/perception. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 546 Advances in Developmental Psychology (3-5, max. 30) Carlson, Kahn, Meltzoff, Repacholi, Smoll, Sommerville, Teller
Intensive readings from the current literature on an emerging topic or theoretical perspective in Developmental Psychology. Student presentations and discussion. Prerequisite: Graduate standing in Psychology or permission of instructor.

PSYCH 547 Advances in Social/Personality (3-5, max. 30) Passer
Intensive readings from the current literature on an emerging topic or theoretical perspective in social psychology/personality. Student presentations and discussion Credit/no credit only. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 548 Advances in Quantitative Psychology (3-5, max. 30) Hunt, Lunneborg
Intensive readings from the current literature on an emerging topic or theoretical perspective in quantitative psychology. Student presentations and discussion. Prerequisite: graduate standing in Psychology or permission of instructor.

PSYCH 549 Seminar in Physiological Psychology (2) Bernstein, Diaz, Kenney, Teller
Prerequisite: permission of instructor.

PSYCH 550 Seminar in Psychology (1-2, max. 30)
Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 551 Seminar in Animal Behavior (1-2, max. 30)
PSYCH 552 Seminar in Behavioral Neuroscience (1-2, max. 30) Bernstein, Buck, Covey, Diaz, Kenney, Mismori, Olavarria, Teller
Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 553 Seminar in Child Clinical Psychology (1-2, max. 30) Beauchaine, Cauce, Dawson, Lengua, McMahon
Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 554 Seminar in Clinical Psychology (1-2, max. 30) George, Kohlenberg, Linehan, Marlatt, Smith, Zoellner
Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission instructor.

PSYCH 555 Seminar in Cognition/Perception (1-2, max. 30) Bassok, Buck, Kerr, Loftus, Rudd, Teller
Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 556 Seminar in Developmental Psychology (1-2, max. 30) Bernstein, Carlson, Meltzoff, Repacholi, Smoll, Teller
Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 557 Seminar in Social/Personality (1-2, max. 30) Brown, Greenwald, Plaks, Shoda
Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 558 Seminar in Quantitative Psychology (1-2, max. 30) Little, Miyamoto, Rudd
Weekly meetings for discussion of current topics. Prerequisite: graduate standing in Psychology, or permission of instructor.

PSYCH 560 Research Strategies (2, max. 30)
Group discussions of problems and continuing strategies for ongoing and future research projects. Prerequisite: graduate standing in Psychology, others by permission.

PSYCH 561 Current Trends in Psychology (*, max. 30)
Prerequisite: permission of instructor. Offered: AWSpS.

PSYCH 562 Evolutionary Psychology of Gender, Mating and Reproduction (3) Barash, Beecher, O'Donnell
Reviews evidence for biological factors influencing human mating and reproductive behavior, through application of concepts and theory from animal behavior, behavioral genetics, and evolutionary biology. Offered: W.

PSYCH 563 Developmental Psychology and the Human Relationship with Nature (4) Kahn
Theories of development used to investigate the ontogenesis of the human relationship with nature. An emphasis on social cognition, children's environmental moral reasoning, the effects of technology in children's lies, and evolutionary theory. Offered: W.

PSYCH 564 Advanced Attitude Theory (5) Greenwald
Theoretical, methodological, and empirical work on the concept of attitude and its practical applications. Topics include: definition of attitude, measurement of attitudes, information processing theories, functional theories, cognitive structure theories, the self as attitude object, unconscious attitudinal processes. Prerequisite: PSYCH 445; PSYCH 525 or equivalent; or permission of instructor.

PSYCH 565 Quantifying Brain Analysis (3)
Covers concepts and applications of statistically unbiased methods for quantifying brain structure. Hands-on learning and application of concepts, sampling strategies and calculations for unbiased stereological measure of the size and number of various brain components.

PSYCH 566 Neural Correlates of Perceptual Cognition (3) Olavarria
Contribution of sensory systems to perceptual capabilities. Critical review of literature on the neural correlates of abilities such as sensory discrimination, subjective perception, attention, imagery, object and face recognition, and spatial behavior. Some sensory disabilities reviewed. Offered: W.

PSYCH 567 Higher Order Cognition (3) Bassok
Survey of research on higher-order cognition with an emphasis on theoretical accounts of knowledge representation. Topics include problem solving, inductive and deductive reasoning, hypothesis testing, causal inferences, similarity judgments, and categorization.

PSYCH 568 Cognitive Approaches to Human Memory (3) E. Loftus
Examination of current topics in human memory from the perspective of cognitive psychology. Prerequisite: PSYCH 355 or permission of instructor. Offered: Sp.

PSYCH 569 Current Trends in Psychology (4)
Issues and content of child clinical psychology, promotion of student’s beginning work in research. Prerequisite: graduate major or minor standing in child-clinical psychology.

PSYCH 570 Child Clinical Psychology (4)
Issues and content of child clinical psychology, promotion of student’s beginning work in research. Prerequisite: graduate major or minor standing in child-clinical psychology.

PSYCH 571 Child Psychopathology (5) McMahon
Broad survey of major categories of child and adolescent disorders. Emphasis on scientific, empirical approach to description, classification, and research literature on these disorders. Required for all graduate students majoring in child clinical psychology. Prerequisite: graduate standing in psychology or permission of instructor.

PSYCH 572 Approaches to Child Treatment (4) Barrett, Beauchaine, Dawson
Major approaches to child psychotherapy, including specific applications, issues in treatment, and research. Prerequisite: graduate major standing in child-clinical psychology or permission of instructor. Offered: Sp.

PSYCH 573 Psychological Assessment of Children (5) Dawson
Assessment techniques appropriate to children, including those for infants, special problems of preschool and school-age children; projective tests, family interviews, and target observational assessment; training in administration of selected techniques. Prerequisite: PSYCH 576 and permission of instructor.

PSYCH 574 Community Psychology (4)
Overview of key issues and concepts in the field of community psychology. History of field and overview of different models used to conceptualize system-level mental health issues and delivery systems. Emphasizes theory and research rather than intervention. Prerequisite: psychology graduate student or permission of instructor.

PSYCH 575 Anxiety Disorders (3) Zoellner
General topics related to primary anxiety disorders (panic, OCD, GAD, posttraumatic stress disorder, and specific phobias), including diagnosis, theory, and treatment.

PSYCH 576 Assessment of Intelligence (5) Lengua
Current theory and research on intelligence and intelligence testing; training in administration, scoring, and interpretation of major intelligence tests; ethical issues in assessment. Prerequisite: graduate major standing in child clinical or clinical psychology, or graduate
minor standing in child clinical psychology. Offered: Sp.

**PSYCH 577 Psychological Assessment of Adults (3)**
Training in adult assessment and development of skills in administration, scoring, and interpretation of the Rorschach with some attention to other projective techniques. Prerequisite: PSYCH 576 and permission of instructor.

**PSYCH 578 Approaches to Psychological Assessment (4)**
Problem-solving approach to psychological assessment; review of psychological tests and procedures and presentation of approaches to their clinical interpretation and use. Required for all graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical psychology. Offered: Sp.

**PSYCH 579 Behavioral Assessment (4) Linehan**
Research, theory, and technique in behavioral assessment. Emphasis on assessing for change and relationship between assessment and therapy. Interviewing, observational techniques, self-monitoring, simulated environments, and physiological, self-report, and imaginal procedures. Prerequisite: clinical psychology graduate standing and permission of instructor.

**PSYCH 580 Minority Mental Health (3) Barrett, George**
Surveys topics on mental health and treatment of racial and ethnic minorities. Theory emphasizes include: models addressing ethnic identity, cross-cultural differences, models of culturally sensitive intervention. Practice emphases include unique psychotherapy strategies for: African-, Asian-, and Latino-Americans, and American Indians. Prerequisite: graduate clinical major standing in psychology or permission of instructor.

**PSYCH 581 Cross-Cultural Competency I (2) Barrett, George**
Focuses on development of multicultural competence in the provision of psychological services to meet APA guidelines for ethnic, linguistic, and culturally diverse populations. Students address personal development, increase their knowledge of diverse groups, and study effective models of intervention in working with clients of diverse backgrounds. Prerequisite: PSYCH 575.

**PSYCH 582 Cross-Cultural Competency II (2) Barrett, George**
Third in the graduate multicultural-competence sequence. Focuses on American ethnic minorities, multiracial children and families, social action, and organizational development. Prerequisite: PSYCH 581.

**PSYCH 584 Behavioral Methods: Clinical Interventions (3) Linehan**
Provides students with basic skills required for competent practice of cognitive and behavioral therapies. Topics include behavioral skills training, cognitive restructuring, contingency management, and exposure-based procedures. Prerequisite: second year of graduate clinical psychology, social work, psychosocial nursing, or psychiatric residency.

**PSYCH 586 Clinical Personality Assessment (3) R. Smith**
Use of objective personality inventories in the description of normal and abnormal personality and use of such information in case conceptualization and treatment planning. Minnesota Multiphasic Personality Inventory, Millon Clinical Multiaxial Inventory. Credit/no credit only. Prerequisite: clinical psychology graduate standing.

**PSYCH 587 Clinical Methods: Interviewing (2) Fagan**
Provides the foundation for developing good clinical skills. Enables students to conduct an initial clinical interview and generate a diagnostic formulation, problem list, and treatment plan after taking a complete history. Limited to and required of all second-year clinical psychology graduate students. Credit/no credit only. Offered: A.

**PSYCH 588 Clinical Methods: Ethics (2) Fagan**
Enables students to acquire a thorough working knowledge of the American Psychological Association’s Ethical Standards for Psychologists; an awareness of Washington state law as it affects psychologists and a knowledge of how to identify and solve ethical dilemmas. Limited to and required of all second-year clinical psychology graduate students. Credit/no credit only. Offered: W.

**PSYCH 589 Advanced Clinical Practicum (4) Cauce, Dawson, George, Kohlenberg, Marlatt, McMahon, Smith**
Supervised psychotherapy involving several individual clients. Separate consultations with instructor for intensive supervision of each case. Occasional meetings in small groups of instructors and students to discuss case material. Assigned readings appropriate to each case with opportunities to discuss these with instructor. Credit/no credit only. Prerequisite: clinical psychology graduate standing and permission of instructor. Offered: AWSpS.

**PSYCH 590 Practicum in Psychological Assessment (2)**
Demonstration and practice of selected psychological test procedures and interviewing skills. Concurrent registration in 535 required. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Prerequisite: graduate major standing in clinical or child-clinical psychology and permission of instructor.

**PSYCH 591 Issues in Clinical Psychology (1, max. 3)**
Personal and professional issues in clinical psychology. Required for all first-year graduate students majoring in clinical and child-clinical psychology. Credit/no credit only. Prerequisite: graduate major standing in clinical psychology. Offered: AW.

**PSYCH 593 Clinical Lectures and Practicum (1-6, max. 24) Fagan**
Required of all clinical psychology graduate students seeing clients in the clinic. Clinical colloquium required of all second-year students, optional for others. Credit/no credit only. Offered: AWS.

**PSYCH 594 Advanced Personality Theory (5) Linehan**
Conceptual models of behavioral functioning, cognition, emotion, and environment as organizers of behavior and other critical issues in personality theory. Opportunity to integrate previous courses, research, and practice, and arrive at coherent theoretical framework. Required for graduate majors in clinical psychology.

**PSYCH 596 Advanced Teaching Practicum (2, max. 6)**
Supervised participation in graduate teaching. Prerequisite: graduate student in Psychology and permission of instructor. Offered: AWSpS.

**PSYCH 597 Fieldwork in Clinical Psychology (1-5, max. 36) Baer, Cauce, Dawson, George, Kohlenberg, Linehan, Marlatt, R. Smith**
Prerequisite: second-year graduate major standing and permission of departmental faculty.

**PSYCH 598 Directed Reading in Psychology (*, max. 30)**
Selected topics. Prerequisite: permission of a supervising psychology faculty member.

**PSYCH 599 Directed Research in Psychology (1-3, max. 24)**
Supervised participation in research. Prerequisite: permission of a supervising psychology faculty member.

**PSYCH 600 Independent Study or Research (*)**
Offered: AWSpS.

**PSYCH 700 Master’s Thesis (*)**
Offered: AWSpS.

**PSYCH 800 Doctoral Dissertation (*)**
Romance Languages and Literature

C104 Padelford

The department consists of two divisions: French and Italian Studies and Spanish and Portuguese Studies. The divisions offer programs designed to develop competence in the reading, speaking, and writing of the languages and in the study of the literatures and cultures.

French and Italian Studies

C254 Padelford

Undergraduate Program

Adviser

C252 Padelford, Box 354361
206-616-5366

The Division of French and Italian Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in French or Italian
- Minors in French and Italian

Bachelor of Arts

Suggested First- and Second-Year College Courses: Community college students should take as many lower-division language courses as possible before transferring to the UW.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

French: 60 credits beyond FRENCH 203, to include FRENCH 301, FRENCH 302, FRENCH 303, FRENCH 304, FRENCH 305, FRENCH 306, FRENCH 378. Three 400-level courses and two 300- or 400-level courses chosen to satisfy the requirements for an emphasis on literature/culture. Transfer credits at the 400 level are accepted only by petition to the Faculty Studies Committee.

Italian: 50 credits in courses at the 300 and 400 levels, including ITAL 301, ITAL 302, ITAL 303, ITAL 401, ITAL 402 (or ITAL 403), and ITAL 404 (or ITAL 405); 15 additional credits in literature courses at the 400 level. Consult the Italian adviser about courses in translation.

Minor Requirements: French — 30 credits including FRENCH 301, FRENCH 302, FRENCH 303, FRENCH 304 (or French 305), FRENCH 306 (or a 400-level course, with permission of instructor), FRENCH 378.

Minor Requirements: Italian — 30 credits in courses at the 300 and 400 levels, including ITAL 301, ITAL 302, ITAL 303, ITAL 401, ITAL 402 (or ITAL 403), and ITAL 404 (or ITAL 405), (or equivalent 400-level courses).

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Employment related to foreign languages is sometimes in specialized fields, but in general could be in many areas. The combination of studies in foreign languages and international affairs is ideal for students seeking job opportunities in government (foreign service and diplomatic fields, intelligence agencies, immigration and customs, Department of Labor, law enforcement, armed forces, legal agencies, public aid, social and community work, and international agencies, such as the United Nations and UNICEF), business (airlines, marketing, banking/finance, multi-national corporations, shipping industry, travel and hotel industries, import/export firms, publishing houses, and consulting) and related fields (journalism, radio and television, fashion enterprises, teaching/counseling, translation, bilingual office work, library/museum work, nursing, phone companies, art and cultural affairs, and film and theatrical industries). Students with substantial foreign language fluency who combine their language skills with a solid foundation in liberal education and adequate job preparation and internships find fulfilling occupations. The department’s commitment is to impart to our students a genuine desire to learn throughout their lives, a flexibility that lends itself to changes, and a seriousness of purpose to apply to whatever they undertake in life.

- Instructional and Research Facilities: UW Rome Center in Rome, Italy.
- Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- Research, Internships, and Service Learning: Rome Center offers one intern position per year, providing room and board and a modest stipend. Interns work in the administrative Rome/UW office and are required to follow an independent course of language and literature study or other proposed course of study.
- Department Scholarships: None available.
- Student Organizations/Associations: Italian Club.

Of Special Note: The department sponsors study-abroad programs in France and Italy. See adviser for details.

Graduate Program

Graduate Program Coordinator

C259 Padelford, Box 354360
206-616-5366

The Division of French and Italian Studies offers programs of graduate study leading to the degrees of Master of Arts in French or Italian and Doctor of Philosophy in French. Students who wish to complete their doctoral studies in Italian may do so through the Department of Comparative Literature.

The Master of Arts degree consists of 45 credits of courses taken at the 400 and 500 levels (plus 10 credits for exam preparation). The M.A. Final Examinations are both written and oral and are administered in the last or sixth quarter of study.

The doctoral program in French requires a total of 77 credits beyond the 55 for the M.A. (including 27 dissertation credits). Doctoral students should devote at least two-thirds of their course work to the fields of specialization. Some training in the history of language is required. The General Examination is divided into three broad areas: century or literary movement, critical problem, and work to the fields of specialization. Some training in the history of language is required. The General Examination is divided into three broad areas: century or literary movement, critical problem, and outside or constructed area. A dissertation is also required. Information on specific requirements for the various degree programs is available upon request from the office of the graduate advising assistant, the graduate program coordinator, or on the division’s Web page (depts.washington.edu/frenital/).

Financial Aid

The department awards annually a number of teaching assistantships. Research assistantships are available on a limited and competitive basis. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the 10 weeks of the quarter.
Faculty

Mikkel Borch-Jacobsen
Professor of French and Comparative Literature
Ph.D. Philosophy, University of Strasbourg, 1981

Douglas Collins
Associate Professor
Ph.D., University of Missouri, 1979

Hélène V. Collins
Lecturer
Ph.D., University of Washington, 1996

Denyse Delcourt
Associate Professor
Ph.D., Université de Montréal, 1987

Evelyne Ender
Professor
Ph.D., University of Geneva

Susan Gaylard
Assistant Professor
Ph.D., University of California at Berkeley

John Keeler
Professor and Chair of French and Italian Studies; also Professor of Political Science and Director of the UW Center for West European Studies.
Ph.D., Harvard, 1978

Giuseppe Leporace
Lecturer
M.A., University of Washington, 1989

Louisa Mackenzie
Assistant Professor
Ph.D. University of California, Berkeley, 2002

Claudio Mazzola
Lecturer
Laurea, University of Milan, 1981; Ph.D., University of Washington, 1986

Hedwige Meyer
Lecturer
M.A., University of Washington, 1992

Albert Sbragia
Associate Professor
Ph.D., U.C. Berkeley, 1988

Vinay Swamy
Assistant Professor
PhD., Northwestern University, 2002

Ruggero Taradel
Lecturer
Laurea, University of Rome "La Sapienza"

Giuseppe Tassone
Lecturer
M.A., University of Washington

Sabrina Tatta
Lecturer
MA, University of Washington, 1997

Holly Woodson Waddell
Visiting Lecturer
Ph.D., Northwestern University, 2004

Eugene Vance
Professor
Ph.D., English Literature, Cornell University

Donna Yowell
Senior Lecturer
Ph.D., U.C. Berkeley, 1987

Adjunct Faculty

Meredith Clausen - Art History, School of Architecture

Jeffrey Collins - Art History

Gary Handwerk
Professor
Ph.D. 1984, Brown
- English, Comparative Literature

Raymond Jonas - History

Mary O’Neil - History

French

Course Descriptions

FRENCH 101 Elementary (5)
Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: score of 0-14 on FR TL placement test if French is language of admission.

FRENCH 102 Elementary (5)
Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: either FRENCH 101 or score of 15-30 on FR TL placement test.

FRENCH 103 Elementary (5)
Methods and objectives are primarily oral-aural. Oral practice in the language laboratory is required. Prerequisite: either FRENCH 102, FRENCH 110, or score of 31-56 on FR TL placement test.

FRENCH 110 Basic French Review (5)
Combines in one quarter the contents of 101 and 102. Designed for students who have studied French in high school but who are not ready for 102. Prerequisite: score of 10-30 on FR TL placement test.

FRENCH 121 French Immersion (5)
Methods and objectives primarily interactive based on a multi-media approach using the Reflects method: covers the equivalent of FRENCH 101. Prerequisite: score of 0-14 on FR TL placement test if French is language of admission. Offered: A.

FRENCH 122 French Immersion (5)
Methods and objectives primarily interactive based on a multi-media approach using the Reflects method: covers the equivalent of FRENCH 102. Prerequisite: FRENCH 121 or a score of 15-30 on FR TL placement test. Offered: W.

FRENCH 123 French Immersion (5)
Methods and objectives primarily interactive based on a multi-media approach using the Reflects method: covers the equivalent of FRENCH 103. Prerequisite: FRENCH 122 or a score of 31-56 on FR TL placement test. Offered: Sp.

FRENCH 134 First-year Intensive French (15)
Equivalent of 101, 102, 103. No more than 15 credits allowed for any combination of 101, 102, 103, and 134. Offered: S.

FRENCH 199 Foreign Study — Elementary (4-16, max. 16)
Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through 103.

FRENCH 201 Intermediate (5) VLPA
Designed to bring students to an intermediate level of proficiency. Emphasis on experiencing the language in context through a multi-media approach. Prerequisite: either FRENCH 103, FRENCH 134, or score of 57-100 on FR TL placement test.

FRENCH 202 Intermediate (5) VLPA
Designed to bring students to an intermediate level of proficiency. Emphasis on experiencing the language in context through a multi-
media approach. Prerequisite: FRENCH 201.

FRENCH 203 Intermediate (5) VLPA
Designed to bring students to an intermediate level of proficiency. Emphasis on experiencing the language in context through a multi-media approach. Prerequisite: FRENCH 202.

FRENCH 210 Paris (5) I&S/VLPA
Taught in English. Provides an introduction to the art, architecture, politics, and literature of the City of Light.

FRENCH 211 French Masterworks: Ancien Regime in English (5) VLPA Collins
Introduction to major figures of French culture from the Middle Ages to the eighteenth century, their contributions to the intellectual life of the Western world. Readings include Montaigne, Descartes, Rousseau, Voltaire, and Moliere. In English.

FRENCH 212 French Masterworks: Modern in English (5) VLPA Collins
Introduction to major figures of French culture from the nineteenth and twentieth centuries. Readings include Balzac, Flaubert, Proust, Sartre, and Celine. In English.

FRENCH 214 The French Fairy Tale Tradition in English (5) VLPA Delcourt
French fairy tales as a major trend in French literature and a continuing influence on modern fictions and films. Particular attention given to the numerous French women writers of fairy tales at the time of Charles Perrault (seventeenth century) and after. In English.

FRENCH 221 Second-Year French Immersion (5) VLPA
Cover the equivalent of second-year French (FRENCH 201, 202, 203) through an alternative “planned immersion” method with video as the central medium of presentation.

FRENCH 222 Second-Year French Immersion (5) VLPA
Cover the equivalent of second-year French (FRENCH 201, 202, 203) through an alternative “planned immersion” method with video as the central medium of presentation.

FRENCH 223 Second-Year French Immersion (5) VLPA
Cover the equivalent of second-year French (FRENCH 201, 202, 203) through an alternative “planned immersion” method with video as the central medium of presentation.

FRENCH 227 Intermediate Conversational French (2, max. 8) VLPA
Practice of intermediate-level French conversational skills through class discussion and oral presentations. Topics oriented toward French culture and current events. Prerequisite: FRENCH 103

FRENCH 234 Intermediate French Immersion (15) VLPA
Covers the equivalent of second-year French (FRENCH 201, 202, 203) through an alternative “planned immersion” method with video as the central medium of presentation. Prerequisite: either FRENCH 103, FRENCH 134, or score of 57-100 on FR TL placement test.

FRENCH 237 Foreign Study Conversational French (2-8, max. 8) VLPA
For participants in the Foreign Study Program.

FRENCH 250 History of French Cinema in English (5) VLPA
V. Collins
History of cinema in France from the birth of film, the seventh art, to the present. Socio-historical context of French cinema explored. In English.

FRENCH 297 Foreign Study French Civilization (3/6) VLPA
For participants in the Foreign Study Program. Literary tradition, social and cultural values as reflected in literature. Paper (in English) and higher degree of participation for 6 credits. In English.

FRENCH 299 Foreign Study — Intermediate (4-16, max. 16) VLPA
Intermediate instruction in approved foreign study program. Evaluation by departmental adviser required to establish proficiency. Further study at 200-level subject to departmental evaluation.

FRENCH 301 Advanced French (5) VLPA
Designed to bring students to an advanced level of proficiency in grammar and composition. Emphasis on experiencing the language in context through a multi-media approach. 303 prepares students for literature classes. Prerequisite: either FRENCH 203 or FRENCH 234.

FRENCH 302 Advanced French (5) VLPA
Designed to bring students to an advanced level of proficiency in grammar and composition. Emphasis on experiencing the language in context through a multi-media approach. 303 prepares students for literature classes. Prerequisite: FRENCH 301.

FRENCH 303 Advanced French (5) VLPA
Designed to bring students to an advanced level of proficiency in grammar and composition. Emphasis on experiencing the language in context through a multi-media approach. 303 prepares students for literature classes. Prerequisite: FRENCH 302.

FRENCH 304 Survey of French Literature: Origins to 1600 (5) VLPA
Thematic and formal developments in literature of the period with emphasis on movements and texts in relation to cultural background. Prerequisite: FRENCH 302.

FRENCH 305 Survey of French Literature: 1600-1789 (5) VLPA
Emphasis on literary movements and texts in relation to cultural background. Prerequisite: FRENCH 302.

FRENCH 306 Survey of French Literature: 1789 to the Present (5) VLPA
Development of modern literature through its most important writers and movements. Prerequisite: FRENCH 302.

FRENCH 308 Foreign Study Composition (3-5, max. 10) VLPA
For participants in the Foreign Study Program. Compositions on topical subjects of intermediate difficulty relating to the civilization of the French-speaking countries of Europe. Grammar review as needed. Prerequisite: FRENCH 203.

FRENCH 313 Business Communication in French (5) VLPA
Offers students the opportunity to develop French language skills (reading, writing, speaking, and listening) within the context of the French-speaking business world. Business-specific culture emphasized. May be taken in lieu of, or in addition to, 303. Prerequisite: FRENCH 302.

FRENCH 327 Advanced Conversation (2, max. 8) VLPA
Not open to students whose native language is French. Prerequisite: FRENCH 203.

FRENCH 337 Foreign Study Conversational French (2-8, max. 8) VLPA
For participants in the Foreign Study Program. Prerequisite: FRENCH 203.

FRENCH 378 The Making of Contemporary France (5) I&S/VLPA
Study of the historical origins and subsequent development of
contemporary problems and characteristics of French government and politics, economy, and society. Prerequisite: FRENCH 203.

FRENCH 390 Supervised Study (2-6, max. 20)

FRENCH 397 Foreign Study French Civilization (3/6) VLPA
For participants in the Foreign Study Program. Literary tradition, social and cultural values as reflected in literature. Paper (in French) and higher degree of participation for 6 credits. In French. Prerequisite: FRENCH 203.

FRENCH 406 Advanced French Composition (5) VLPA
Extensive guidance in advanced French composition, emphasizing stylistics and grammar. Prerequisite: FRENCH 303.

FRENCH 411 Topics in the Middle Ages (5) VLPA
Sixteenth-century literature with emphasis on poetry and the general artistic ambiance. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 412 Topics in Sixteenth Century French Literature (5) VLPA
An introduction to major French literary texts of the Sixteenth Century. Prerequisite: FRENCH 303; FRENCH 304.

FRENCH 413 Topics in Seventeenth Century (5) VLPA
Seventeenth-century literature, with emphasis on the development of classicism. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 414 French Literature of the Eighteenth Century: Enlightenment (5) VLPA
Eighteenth-century literature, with emphasis on the development of the Enlightenment ideology. Prerequisite: FRENCH 303; either FRENCH 304, FRENCH 305, or FRENCH 306. May not be repeated after achieving a grade of 2.0.

FRENCH 415 French Literature of the Eighteenth Century: Post-Enlightenment (5) VLPA
Eighteenth-century literature, with emphasis on the “dark side of the Enlightenment” and nascent romanticism. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 416 French Literature of the Nineteenth Century: Romanticism (5) VLPA
Nineteenth-century literature, with emphasis on romanticism and the early manifestations of realism. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 418 French Literature of the Early Twentieth Century (5) VLPA
Twentieth-century literature, with emphasis on the period 1900-1939. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 419 French Literature Since World War II (5) VLPA
Twentieth-century literature, with emphasis on the period 1939 to the present. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 420 Interdisciplinary Approaches to Literature (5) VLPA
Interdisciplinary studies in French literature and culture, focusing on the complex interactions of literature and other disciplines, i.e., philosophy, psychoanalysis, anthropology, architecture. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 306.

FRENCH 421 Psychoanalysis and Literature (5) VLPA Borch-Jacobsen
Readings from Freud and French critical writers regarding the relationship between psychoanalysis and literature. Prerequisite: FRENCH 303; FRENCH 306.

FRENCH 422 Literature and the Other Arts (5) VLPA
Examines the relationship between text and image in a variety of art forms. Prerequisite: FRENCH 303.

FRENCH 424 Fiction: 1800-1850 (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 425 Fiction: 1850-1900 (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 427 Fiction: Twentieth Century (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 431 Critical Approaches to French Poetry (5) VLPA
Interdisciplinary approaches to French poetry focusing on the intersection of fine art, cultural movements, and the production of literature in the Second Empire and the Third Republic.

FRENCH 432 Critical Approaches to French Fiction (5) VLPA
Addresses theory and practice of fiction within the context of a given century or movement. Content varies. Prerequisite: FRENCH 303.

FRENCH 435 Topics in Non-Fiction (5) VLPA
Content varies. Prerequisite: FRENCH 303.

FRENCH 436 Women Writers and Feminist Theory (5) VLPA
Focus on French women writers from different periods and places. Gender issues addressed in critical fashion, considering the different historical and ideological contexts in which each of the works were produced. Prerequisite: FRENCH 303.

FRENCH 441 Quebecois Literature (5) VLPA
Readings of novels, plays, and occasionally, poetry. Special attention paid to how Quebecois authors represent in their works the complex socio-political reality of their culture. Conducted in French. French majors required to read and write in French; all others may read and write in English. Prerequisite: FRENCH 303; FRENCH 306. Offered: jointly with SISCA 441.

FRENCH 442 Poetry: Romantic (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 446 Poetry: Twentieth Century (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 450 Themes in French Literature and Culture (5) VLPA
Interdisciplinary studies in French literature and culture, focusing on the construction and representation of gender roles in the French novel from the early eighteenth century. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 451 History and Literature of the French Religious Wars (5) I&S/VLPA
Major political, social, and religious movements and events of, and related to, the French religious wars of 1560 to the end of the century, along with the treatment of these in the prose, poetry, and drama of the period. For students receiving French credit, readings must be done in French. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 454 Nonfiction of the Classic Period (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.
FRENCH 455 One Author in French Literature/Culture (5, max. 15) VLPA
In depth focus on the works of one author in French Literature or Culture. Prerequisite: FRENCH 303.

FRENCH 457 One Decade in French Literature and Culture (5, max. 15) VLPA
Content varies. Prerequisite: FRENCH 303.

FRENCH 458 French Art and Literature: Period Studies (5) VLPA
Comparative studies of theme and technique in art and literature to illustrate major concerns of a particular period as expressed in these two media. Recommended: background in French literature.

FRENCH 461 Seventeenth-Century Drama (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 463 Nineteenth-Century Drama (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 465 Twentieth-Century Drama (5) VLPA
Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 470 Cinema (5) VLPA
Major films and figures of French cinema from the beginnings to the present. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 472 French-English/English-French Translation (5) VLPA
Intense practice of translation from English into French and from French into English. Translation issues specific to French and English syntactic, semantic, and grammatical differences with emphasis on the naturalness of the target language and the accuracy of the translation of the source language. Conducted in French. Prerequisite: FRENCH 303.

FRENCH 481 Twentieth-Century French Novel in English (5) VLPA

FRENCH 482 French Poetry From Baudelaire to the Present in English (5) VLPA
Analysis in English of the major trends and movements in modern French poetry with representative works, from Baudelaire to the poets of the 1950s.

FRENCH 483 Trends in Twentieth-Century Theatre in English (5) VLPA
Study of the evolution of the French theatre from the turn of the century to the present. Special emphasis is given the French theatrical scene since World War II.

FRENCH 484 Rabelais and Montaigne in English (5) VLPA
Reading and discussion of selected passages from the works of Rabelais and the essays of Montaigne. Background information through informal lectures and outside reading on the two figures as illustrative of the Renaissance in France.

FRENCH 485 Racine and Molière in English (5) VLPA

FRENCH 486 Literature of the Enlightenment in English (5) VLPA

FRENCH 487 Nineteenth-Century Fiction in English (5) VLPA

FRENCH 488 Women in French Literature in English (5) VLPA
Masterpieces of French literature are read in an attempt to understand French attitudes toward women. From the sixteenth century, with a concentration on the twentieth century.

FRENCH 490 Honors Seminar (2-5, max. 10) VLPA
Special studies in French literature. Required of candidates for honors and distinction in French.

FRENCH 496 Poetry and Song as Elements in French Civilization (5) VLPA
Relationship of poetry and music as expressed in the chanson in several periods of French culture. Emphasis on twentieth-century poet-composer-performers. Attention given to the medieval troubadours and to poet-musician collaboration in the Renaissance and later periods. Prerequisite: FRENCH 303; FRENCH 304; FRENCH 305; FRENCH 306.

FRENCH 499 Special Topics (1-5, max. 10)
Topics to meet special needs. Prerequisite: FRENCH 303.

FRENCH 510 Methodology of French Language Teaching (3)
Theoretical and practical foundation of teaching French. Major topics include modern theories of language and language acquisition which underlie modern methods of foreign language teaching, teaching techniques, testing, and classroom relations with emphasis on the multiple-approach direct method. Required for beginning French Teaching Assistants. Credit/no credit only.

FRENCH 515 French Literature of the High Middle Ages (5, max. 10)
Old French literature, from the beginning to 1315. Prerequisite: permission of instructor.

FRENCH 516 Middle French Literature (5, max. 10)
French literature from 1315 to 1500. Prerequisite: permission of instructor.

FRENCH 520 Renaissance Prose: Rabelais (5)

FRENCH 521 Renaissance Prose: Montaigne (5)

FRENCH 523 Studies in Fiction: 1660-1800 (5, max. 10)

FRENCH 525 Studies in Fiction: 1850-1900 (5, max. 10)

FRENCH 526 Studies in Fiction: 1900-1950 (5, max. 10)

FRENCH 530 Studies in Renaissance Poetry (5, max. 10)

FRENCH 532 Studies in Nineteenth-Century Poetry (5, max. 10)

FRENCH 534 Studies in Twentieth-Century Poetry (5, max. 10)

FRENCH 541 History of the French Language (5)
Survey of the phonological, morphological, and syntactical development of the French language from its origins to the present.

FRENCH 542 History of the French Language (5)
Survey of the phonological, morphological, and syntactical development of the French language from its origins to the present.

FRENCH 555 French Nonfiction (5, max. 10)

FRENCH 561 Studies in Seventeenth-Century Drama (5, max. 10)

FRENCH 565 Studies in French Drama (5, max. 10)
Studies in French drama, sixteenth to twentieth centuries.
FRENCH 570 Seminar in Cinema (5, max. 10)
Prerequisite: permission of instructor.

FRENCH 575 Literary Criticism (5)

FRENCH 576 Critical Methodology (5)
Basic scholarly tools of bibliography; historical review of literary doctrine; an introduction to critical methodology.

FRENCH 577 Modern Critical Methods (5)
Modern critical methodology and theory.

FRENCH 590 Special Seminar and Conference (1-10, max. 30)
Group seminars, or individual conferences, are scheduled under this number to meet special needs. Prerequisite: permission of the graduate program coordinator.

FRENCH 591 Literary Problems: Middle Ages (5, max. 10)

FRENCH 592 Literary Problems: Renaissance (5, max. 10)

FRENCH 593 Literary Problems: Seventeenth Century (5, max. 10)

FRENCH 594 Literary Problems: Eighteenth Century (5, max. 10)

FRENCH 595 Literary Problems: Nineteenth Century (5, max. 10)

FRENCH 596 Literary Problems: Twentieth Century (5, max. 10)

FRENCH 600 Independent Study or Research (*)

FRENCH 800 Doctoral Dissertation (*)
Credit/no credit only.

ITAL 101 Elementary (5)
Methods and objectives are primarily oral-aural. Language laboratory is required. Offered: A.

ITAL 102 Elementary (5)
Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisite: either ITAL 101 or score of 15-30 on IT TL placement test. Offered: W.

ITAL 103 Elementary (5)
Methods and objectives are primarily oral-aural. Language laboratory is required. Prerequisite: either ITAL 102, ITAL 111, or score of 31-56 on IT TL placement test. Offered: Sp.

ITAL 108 Intensive Italian Grammar and Reading (5)
Intensive two-quarter presentation of Italian grammar with emphasis on reading Italian texts. For persons who require solid reading knowledge of Italian or who plan to study in Italy.

ITAL 111 Accelerated First-Year Italian (10)
Intensive version of 101 and 102. Designed for highly motivated students. Offered: A.

ITAL 113 Accelerated First-Year Italian (10)
Intensive version of 102 and 103. Design for highly motivated students. Offered: W.

ITAL 127 Beginning Conversational Italian (2, max. 6)
Practice of beginning-level Italian conversational skills through class discussions and oral presentations. Topics vary. Not open to native speakers.

ITAL 134 Intensive First-Year Italian (15)
An intensive language course equivalent to 101, 102, 103, designed for highly motivated students. Not open for credit to students who have taken 102 and 103. Offered: S.

ITAL 199 Foreign Study — Elementary (4-16, max. 16)
Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through 103.

ITAL 201 Intermediate (5) VLPA
Intensive speaking, reading, and writing. Functional review of grammar. Prerequisite: either ITAL 103, ITAL 113, ITAL 134, or score of 57-100 on IT TL placement test.

ITAL 202 Intermediate (5) VLPA
Intensive speaking, reading, and writing. Functional review of grammar. Prerequisite: ITAL 201.

ITAL 203 Intermediate (5) VLPA

ITAL 208 Intensive Italian Grammar and Reading (5) VLPA
Intensive two-quarter presentation of Italian grammar with emphasis on reading Italian texts. For persons who require solid reading knowledge of Italian or who plan to study in Italy.

ITAL 227 Intermediate Conversational Italian (2, max. 6) VLPA
Practice of intermediate-level Italian conversational skills through class discussions and oral presentations. Topics vary. Not open to native speakers. Prerequisite: ITAL 103.

ITAL 234 Intensive Second-Year Italian (15) VLPA
Intensive language course designed for highly motivated students. Equivalent to 201, 202, 203. Prerequisite: either ITAL 103, ITAL 113, ITAL 134, or score of 57-100 on IT TL placement test. Offered: S.

ITAL 250 Rome (5) I&S/VLPA
Focuses on Rome as an historical, intellectual, and artistic world center. Literary and historic documents, visual arts, architecture, film, and opera will be used to explore the changing paradigms of the Eternal City. In English. Offered: jointly with ART H 250/ HSTEU 250.

ITAL 299 Foreign Study — Intermediate (4-16, max. 16) VLPA
Intermediate instruction in approved foreign study program. Evaluation by departmental adviser required to establish proficiency. Further study at 200-level subject to departmental evaluation.

ITAL 301 Advanced Syntax and Composition (5) VLPA
Prerequisite: either ITAL 203 or ITAL 234.

ITAL 302 Advanced Syntax and Composition (5) VLPA
Prerequisite: ITAL 301.

ITAL 303 Italian Stylistics (5) VLPA
Functional grammar review; creative written and oral composition and reading, with special attention to problems of style. Prerequisite: ITAL 302.

ITAL 318 Italian Literature in English (5) VLPA
ITAL 319 The Italian Short Story in English (5) VLPA
The short story from the Novellino and Bocaccio to modern masters of the form. The translations are studied both as examples of narrative technique and as reflections of particular moments in Italian cultural history.

ITAL 327 Advanced Conversation (2, max. 8) VLPA
Not open to students whose native language is Italian. Prerequisite: ITAL 203.

ITAL 341 Italian and American Poetry in Translation (5) VLPA
Introduction to basic concepts and skills required for Italian-to-English translation. Examines the main aspects of contrastive grammar and stylistics used in translation, providing practical opportunities to incorporate and apply the material. Exposure to a variety of translation fields. Prerequisite: ITAL 302.

ITAL 342 Advanced Italian Composition and Essay Writing (5) VLPA Azzolini
Addresses issues of syntax and grammar, register and style, and advanced vocabulary for academic writing. Teaches students to write a cogent, well-structured essay for upper-level literature classes in Italian. Writing intensive. Conducted in Italian (some material in English). Prerequisite: ITAL 302, which may be taken concurrently.

ITAL 351 Contemporary Italian Culture (5)
Italian culture from the 1980s to the present, with discussion of major events of the period and readings from fiction, political manifestos, song lyrics, etc. Emphasis on recent linguistic developments, changed role of women, meaning of multiculturalism in Italy, and the spread of global culture. Conducted in Italian. Prerequisite: ITAL 203.

ITAL 352 Italian Cultural History (5) I&S
ITAL 366 Italian Society in Film and Literature (5, max. 15) I&S/VLPA Sbragia
Studies the evolution of Italian postwar society through the analysis of film and literature as well as critical, historical, and sociological readings.

ITAL 384 Renaissance Literature of Italy in English (3) VLPA
ITAL 390 Supervised Study (2-6, max. 20)
ITAL 395 Italian Cultural History (5) I&S/VLPA
Explores Italian cultural history through a variety of literary and other textual traditions. Prerequisite: ITAL 302; may not be repeated.

ITAL 399 Foreign Study: Advanced (4-16, max. 16) VLPA
Advanced instruction in approved foreign study program.

ITAL 400 The Development of the Italian Language (5) VLPA
Historical survey of Italian phonology, morphology, and syntax. Evolution of the language is illustrated with study of pertinent documents from various periods. Prerequisite: either ITAL 303; LING 400 or ROLING 401. Offered: jointly with LING 419.

ITAL 401 Medieval Italian Readings (5) VLPA
Exploration of medieval Italian cultural history through a broad variety of literary and other textual traditions. Prerequisite: ITAL 302.

ITAL 402 Early Modern Italian Readings I (5) VLPA
Readings in Italian Quattro/Cinquecento, covering the period of the Renaissance. Prerequisite: ITAL 302.

ITAL 403 Early Modern Italian Readings II (5) VLPA
Readings in Italian Sei/Settecento, covering the periods of Baroque and Enlightenment literature. Prerequisite: ITAL 302.

ITAL 404 Modern Italian Readings I (5) VLPA
Readings in Italian Ottocento, covering the period of Romanticism. Prerequisite: ITAL 302.

ITAL 405 Modern Italian Readings II (5) VLPA
Readings in Italian Novecento, covering the work of major Italian twentieth-century authors. Prerequisite: ITAL 302.

ITAL 413 Literature of the Renaissance: Quattrocento (5) VLPA
The early Renaissance. Humanism; writings of Lorenzo de’ Medici, Poliziano, Belcari, Alberti, Masuccio, Sanmazzaro, Pulci, Boiardo. Prerequisite: ITAL 302.

ITAL 414 Literature of the Renaissance: Cinquecento (5) VLPA
The high Renaissance. Bembo and the Petrarchans, Machiavelli, Guicciardini, Castiglione, Ariosto, Guarini, Tasso. Prerequisite: ITAL 302.

ITAL 415 Modern Italian Readings I (5) VLPA
Readings in Italian Postwar, covering the period of Fascism in Italy. Conducted in Italian. Prerequisite: ITAL 302.

ITAL 423 Seventeenth-Century Italian Literature (5) VLPA
New sciences and new poetics: Campanella, Sarpi, Della Valle, Marino, Tesauro, Bartoli, Galileo, Redi. Prerequisite: ITAL 302.

ITAL 424 Eighteenth-Century Italian Literature (5) VLPA
Survey of eighteenth-century literature — the melodrama, drama and poetry: Metastasio, Goldoni, Alfieri, Parini, Monti, andfoscolo. Prerequisite: ITAL 303.

ITAL 431 Italian Theater (5) VLPA
The development of Italian theater from the Renaissance to the twentieth century. Prerequisite: ITAL 303.

ITAL 450 The Romantic Movement (5) VLPA
Beginning with an examination of the pre-romantic works of Ugo Foscolo, focuses on the literary and critical writings of Alessandro Manzoni and Giacomo Leopardi. Discusses the Romantic movement in Italy within the context of European Romanticism. Reference made to later variations on Romantic themes. Prerequisite: ITAL 303.

ITAL 460 Verismo (5) VLPA
The development of Verismo with extensive readings from its main exponents-Capuana, Verga, Serao, Deledda, Fucini, and d’Annunzio. Prerequisite: ITAL 302.

ITAL 465 Contemporary Italian Narrative (5, max. 15) VLPA
Critical reading of selected modern exponents of the short story and novel. Prerequisite: ITAL 302.

ITAL 466 Italian Society in Cinema and Literature in Italian (5, max. 15) I&S/VLPA Sbragia
Studies the evolution of Italian postwar society through the analysis of film and literature as well as critical, historical, and sociological readings. Offered in Italian. Prerequisite: ITAL 302.

ITAL 470 Dante (5) VLPA
Introduction to Dante’s Commedia and minor works, conducted in Italian. Prerequisite: ITAL 303.

ITAL 475 Italian Fascism: Architecture and Power (5) I&S/ VLPA
Fascism in Italy as studied within the broader European context of nationalism, imperialism, and modernization, with particular emphasis on the arts — literature, film, architecture, and urbanism. Offered: jointly with ART H 495; A.

ITAL 480 Dante’s Comedy in English (5) VLPA
Introduction to Dante’s Comedy. Considers formal, structural,
ITAL 481 Dante's Comedy in English (5) VLPA
Second half of a two-quarter series. Close study of Dante’s Purgatory and Paradiso and retrospective reading of Inferno. Explores Dante’s concept of art, both human and divine, as it is developed in and defines the poem. Prerequisite: ITAL 480.

ITAL 482 The Decameron in English (5) VLPA
An integral reading of the Decameron, with some consideration of its place in world literature and as an expression of the culture of its time.

ITAL 490 Proseminar in Italian Literature (3-5) VLPA
Intended to help the student achieve a mature critical mastery of Italian literature. Prerequisite: ITAL 302.

ITAL 499 Special Topics (1-5, max. 10)
Topics to meet special needs. Prerequisite: ITAL 302.

ITAL 501 Medieval Italian Readings (5) Yowell
Exploration of medieval Italian cultural history through a broad variety of literary and other textual traditions.

ITAL 502 Early Modern Italian Readings I (5)
Readings in Italian Quattro/Cinquecento over the period of the Renaissance. Covers major intellectual, literary, and cultural movements and figures of the period, including humanistic rediscovery of Graeco-Roman models, chivalric poems, comic theater.

ITAL 503 Early Modern Italian Readings II (5) Scalabrini
Readings in Italian Sei/Seicento, covering the periods of Baroque and Enlightenment literature.

ITAL 504 Modern Italian Readings I (5) Sbragia, Scalabrini
Readings in Italian Ottocento, covering the period of Romanticism.

ITAL 505 Modern Italian Readings II (5) Sbragia, Scalabrini
Readings in Italian Novecento, covering the work of the major Italian twentieth-century authors.

ITAL 514 Dante (5, max. 10)
ITAL 531 Italian Theater (5)
The development of Italian theater from the Renaissance to the Twentieth Century. Individual conferences with lecturing professor. Prerequisite: graduate students only.

ITAL 570 Seminar in Cinema (5)
Studies in various areas of Italian cinema, concentrating on major directors, critics, and movements. Prerequisite: permission of instructor.

ITAL 590 Special Seminar and Conference (1-10, max. 30)
Group seminars, or individual conferences, are scheduled under this number to meet special needs. Prerequisite: permission of instructor.

ITAL 591 Literary Problems: Middle Ages and Fourteenth Century (5, max. 10)
ITAL 592 Literary Problems: Renaissance (5, max. 10)
ITAL 593 Literary Problems: Early Modern (5, max. 10)
ITAL 594 Literary Problems: Eighteenth Century (5, max. 10)
ITAL 595 Literary Problems: Nineteenth Century (5, max. 10)
ITAL 596 Literary Problems: Twentieth Century (5, max. 10)
ITAL 600 Independent Study or Research (*)

Spanish and Portuguese Studies
C104 Padelford

The educational philosophy of Spanish and Portuguese studies is that knowledge and understanding of other cultures is fundamental in an increasingly global world, and that competence in the languages of those cultures is an indispensable gateway to them. Spanish studies provides students with the four basic language skills (listening, speaking, reading, and writing) in increasing levels of sophistication so that they may read and analyze works of literature written in Spanish as well as understand complex cultural structures and artifacts from Spain, Latin America, and the Latino populations of the U.S. The UW offers beginning and intermediate Portuguese and all levels of Spanish.

Undergraduate Program
Adviser
C104F Padelford, Box 354360
206-543-2073
spanport@u.washington.edu

The Division of Spanish and Portuguese Studies offers the following programs of study:
• The Bachelor of Arts degree in with a major in Spanish
• A minor in Spanish

Bachelor of Arts

Suggested First- and Second-Year College Courses: SPAN 101, SPAN 102, SPAN 103, or SPAN 121, SPAN 122, SPAN 123, or SPAN 134; SPAN 201, SPAN 202, SPAN 203. Spanish, Latin American, and Chicano literature. Courses related to history and culture. Courses in English literature and comparative literature.

Department Admission Requirements
Completion of SPAN 203, with a minimum cumulative GPA of 2.70 for all Spanish course work completed and a minimum grade of 2.5 in each Spanish course.
Completion of at least 10 credits of English composition with a minimum grade of 2.5 in each course. The student may apply while concurrently enrolled in the second English composition course.
Admission is competitive, based on the following minimum qualifications:
Preparation for the major as indicated by a student’s grades in courses required for application
Overall scholastic record
Personal statement, in Spanish, of interest in and commitment to the major. Other evidence reflecting the student’s interest may be appended.
Completion of the above requirements does not guarantee admission.
Application deadline is the first Friday of autumn, winter, and spring quarters, for admission in the fifth week of the same quarter. Applicants denied admission may submit written petitions requesting reconsideration. Applications are available in C104F Padelford.

Major Requirements
59 credits beyond SPAN 203 as follows:
SPAN301, SPAN 302, SPAN 303, SPAN 321, SPAN 322, SPAN 323
Three 300-level elective courses (maximum of two from film series)
Four 400-level courses (one from SPAN 400 through SPAN 409).
Minor

Minor Requirements: Minimum 32 credits above the 203 level as follows:
SPAN 301, SPAN 302, SPAN 303
Five courses numbered SPAN 304 to SPAN 495, including at least 5 credits from SPAN 400 to SPAN 409.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes**: The study of Spanish and Portuguese is both skills- and content-based, i.e., it has practical and cognitive elements. Students learn to communicate in Spanish or Portuguese, refining their language skills as they acquire a body of knowledge about the literary and cultural history of Spain, Latin America, and the Spanish-speaking populations of the United States. Graduates have found these skills extremely useful as they pursue careers in teaching, business, NGOs and human rights organizations, law, and politics.

- **Instructional and Research Facilities**: Departmental facilities include a Writing Center for students registered in third-year Spanish. The Center for Spanish Studies, housed in the department, is a joint initiative of the University of Washington, the Education Office of the Embassy of Spain, and the Office of Superintendent of Public Instruction. This center provides services that include workshops for K-12 teachers of Spanish, sponsorship of cultural events, and a lending library of books as well as audio and visual materials.

The department directs two study abroad programs, in Mexico (Oaxaca) and Spain (Cadiz). These programs are “living laboratories.” Approximately 75 students participate each year.

- **Honors Options Available**: With College Honors. With Distinction. See adviser for details.

- **Research, Internships, and Service Learning**: Internship opportunities are posted on the department Web site as they become available. Also, students may participate in service learning, in which they combine study with service to the community. Students must volunteer two to five hours per week (a minimum of 20 hours per quarter) in organizations that provide services primarily, although not exclusively, to Spanish speakers. Alternatively, they may volunteer in public schools as tutors of different academic themes. Some of the organizations and schools involved include CASA Latina, The Mexican Consulate, El Centro de la Raza, Our Lady of Mt. Carmel, Northwest Immigrant Rights Project, Cascade People’s Center, Center for Spanish Studies, John Stanford International School, Bryant Elementary School, John Hay Elementary School, Hamilton Middle School, Nathan Hale High School, the Pipeline Project, and the East Side Literacy program. Students apply and increase their knowledge of the Spanish language in a real context. They are exposed to Hispanic multiculturalism and become active agents of social change in the community. Approximately 18 students participate each year.

- **Department Scholarships**: An annual scholarship, the Susan B. Johnson Memorial Endowment Fund, is awarded to a student of Spanish for foreign study in Spain.

- **Student Organizations/Associations**: None.

**Of Special Note**: 100- and 200-level Spanish courses do not count toward major/minor requirements.

**Graduate Program**

Graduate Program Coordinator
C104 Padelford, Box 354360
206-543-2075
spanport@u.washington.edu

The Division of Spanish and Portuguese Studies offers programs of graduate study leading to the Master of Arts degree. The Master of Arts degree program in Hispanic Literary and Cultural Studies was reformed and updated in 2001 to foster study of Hispanic culture, literature, and language together. The program calls attention to the rich diversity of Hispanic cultural texts and to their interdisciplinary study while also promoting broad understanding of Spanish and Latin American literature. The program gives careful attention to acquainting students with the traditions of scholarship in the field as well as a range of current textual theory, criticism, and research methods. Study of Portuguese and other Romance literatures and cultures, comparative literature, Romance and Spanish linguistics, and other related disciplines may be included in the Master’s degree program. The degree is earned normally in six academic quarters.

Students who wish to pursue advanced study in Spanish and Portuguese in a post-Master’s degree program may do so by entering the doctoral studies programs of Comparative Literature or other departments of the University. Information on specific requirements for the various degree programs is available upon request from the office of the division’s academic counselor or on the division’s Web page.

**Financial Aid**

The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the ten weeks of the quarter.

**Faculty**

Farris Anderson Emeritus Professor
Ph. D., Wisconsin. Modern Spanish Literature (Prose, Drama) & Civilization, Advanced Spanish Grammar

Anthony Geist Professor/Chair
Ph. D., California (Berkeley). 20th Century Spanish Literature, Surrealism

Donald Gilbert-Santamaria Assistant Professor
Ph. D., California (Berkeley).

Leigh Mercer Assistant Professor
Ph. D., Brown University. Eighteenth- and nineteenth-century Spanish Literature

Edgar O’Hara Professor
Ph. D., Texas. Latin American Literature, Modern & Contemporary Poetry

Suzanne Petersen Associate Professor
Ph. D. Wisconsin. Medieval Spanish Literature, Romancero pánhispánico

Alvaro Salvador Visiting Professor

George Shipley Emeritus Associate Professor
Ph. D., Harvard. Golden Age Spanish Literature, Picaresque, Cervantes

Thomas Spaccarelli Visiting Professor from the University of the South, 2005-06; Resident Director of the NW Cádiz Program

Portuguese

Course Descriptions
PORT 101 Elementary (5)  Methods and objectives are primarily oral-aural. Covers all major elements of Portuguese grammar.
PORT 102 Elementary (5)  Methods and objectives are primarily oral-aural. Covers all major elements of Portuguese grammar. Prerequisite: PORT 101.
PORT 103 Elementary (5)  Methods and objectives are primarily oral-aural. Covers all major elements of Portuguese grammar. Prerequisite: PORT 102.
PORT 105 Intensive Portuguese for Spanish Speakers (6)  Covers the verbal system and major grammatical points. Does not satisfy Foreign Language Requirement. Prerequisite: SPAN 203.
PORT 201 Intermediate (5) VLPA  Modern texts, compositions, conversation, and a systematic review of grammar. Prerequisite: either PORT 103 or PORT 105.
PORT 202 Intermediate (5) VLPA  Modern texts, compositions, conversation, and a systematic review of grammar. Prerequisite: PORT 201.
PORT 301 Grammar and Lexicon (3) VLPA  Prerequisite: PORT 203.
PORT 302 Grammar and Lexicon (3) VLPA  Prerequisite: PORT 301.
PORT 310 Introduction to Lusophone Literature (3) VLPA  Introduction to the studies of Lusophone literature and culture.
PORT 335 Twentieth Century Brazilian Fiction in English (5, max. 10) VLPA  Reading texts in connection with cultural and theoretical issues.

Romance Languages and Literature

Course Descriptions
ROMAN 411 Critical Approaches to Romance Literature (5) VLPA  Explores theoretical as well as fictional texts in at least two Romance languages.
ROMAN 593 Literary Problems: Early Modern Period (5)
ROMAN 596 Problems in Comparative Contemporary Literary Studies (5)  Seminar exploring contemporary literary thought through theoretical and/or creative literature. A selection of texts from at least two Romance languages and literary traditions. Prerequisite: competence in at least two Romance languages; completion of several upper division literature courses; some familiarity with critical methodologies.
ROMAN 600 Independent Study or Research (*)  Credit/no credit only.
ROMAN 700 Master’s Thesis (*)  Credit/no credit only.
ROMAN 800 Doctoral Dissertation (*)
Spanish Immersion (5)
Covers the equivalent of elementary Spanish (SPAN 101, 102, 103) through an alternative “planned immersion” method with video as the central medium of presentation. Prerequisite: SPAN 122.

SPAN 134 Intensive First-Year Spanish (15)
Equivalent of 121, 122, 123. Employs “planned immersion” method with video as the central medium of presentation. Not open for credit to students who have taken 121, 122, 123 or 102, 103.

Offered: S.

SPAN 199 Foreign Study — Elementary (2-16, max. 16)
Elementary instruction in approved foreign study program. Students who wish to satisfy foreign language proficiency requirement must see the departmental adviser and may be required to take additional courses through 103.

SPAN 201 Intermediate (5) VLPA
Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. Prerequisite: either SPAN 103, SPAN 123, SPAN 134, score of 70-100 on SP100A placement test, minimum score of 51 on SP TL placement test, or score of 0-75 on SP200A placement test.

SPAN 202 Intermediate (5) VLPA
Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. Prerequisite: either SPAN 201 or score of 76-145 on SP200A placement test.

SPAN 203 Intermediate (5) VLPA
Intensive practice in speaking, reading, and writing. Review of Spanish grammar. Oral practice based on literary and cultural readings. Prerequisite: either SPAN 202 or score of 146-165 on SP200A placement test.

SPAN 205 Culture of Andalusia (5) I&S/VLPA
Introduction to the culture and society of Andalusia, Southern Spain, regional vs. national identity, syncretism of Arab, Jewish, and Christian cultures, and a variety of contemporary cultural manifestations, among them Carnaval, flamenco, the Alhabra, and contemporary literature and cinema. Of particular interest to students considering study abroad in Cadiz. Prerequisite: SPAN 202.

SPAN 206 Arts and Culture of Oaxaca (3) I&S/VLPA
Steene
Introduction to the contemporary culture of Oaxaca, Mexico, particularly painting, folk arts, and Days of the Dead, in the context of recent Mexican politics and society. Prerequisite: SPAN 103, which may be taken concurrently.

SPAN 210 Accelerated Intermediate Spanish (10) VLPA
Merges SPAN 201 and SPAN 202. Designed to build listening, speaking, reading, and writing skills and to expand knowledge of culture and literature of the Spanish-speaking world. Combines classroom experience with accelerated Web-enhanced activities provided through Spain’s Instituto Cervantes. Prerequisite: either SPAN 103, SPAN 123, or SPAN 134.

SPAN 299 Foreign Study — Intermediate (2-16, max. 16) VLPA
Intermediate instruction in approved foreign study program. Further study at 200 level subject to placement test score.

SPAN 301 Grammar and Lexicon (5) VLPA
Prerequisite: either SPAN 203 or score of 166-175 on SP200A placement test.

SPAN 302 Grammar and Lexicon (5) VLPA
Prerequisite: SPAN 301.
SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 306 Survey of Spanish Literature: 1681 to the Present (3) VLPA
Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 307 Introduction to Latin American Literature (3) VLPA
Study of selected works of twentieth-century Latin American literature and their sociohistorical context. Development of reading and writing skills. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 308 Spanish for Reading Knowledge I (5)
Intended primarily for graduate students. Emphasis on developing reading comprehension of Spanish texts which are pertinent to graduate student’s field of research. Credit may not be applied toward Spanish major.

SPAN 309 Spanish for Reading Knowledge II (5) VLPA
Intended primarily for graduate students. Emphasizes developing reading comprehension of Spanish texts which are pertinent to graduate student’s field of research. Credit may not be applied toward Spanish major. Prerequisite: SPAN 308.

SPAN 310 Accelerated Intermediate-Advanced Grammar and Lexicon (10) VLPA
Intensive Web-enhanced grammar and writing, combining SPAN 301 and SPAN 302. Designed to develop skills at the intermediate-advanced level in areas of listening, speaking, reading, and writing. Prerequisite: SPAN 203.

SPAN 312 Creative Writing in Spanish (3) I&S O’Hara
Creative writing for students who have finished third year and who have literary interests, as well as a solid command of grammar. Prerequisite: either SPAN 303 or SPAN 316.

SPAN 313 Business Communication in Spanish (5) VLPA
This intermediate level course offers students the opportunity to develop their Spanish language skills (reading, writing, speaking, and listening) within the context of the Spanish-speaking business world. Business-specific culture emphasized. Prerequisite: SPAN 203.

SPAN 314 Spanish for Bilingual/Heritage Students (5) VLPA Gillman
Provides bilingual students whose formal education has primarily been in English with the skills necessary to succeed in upper-division Spanish classes. Intensive review of grammar, readings of literary and journalistic texts, Web-based exercises, writing review, and a play to enhance their verbal skills.

SPAN 315 Spanish for Bilingual/Heritage Students (5) VLPA Doremus, Gillman
Emphasizes reading, with attention to problems particular to Spanish-heritage students. Emphasis on critical reading, vocabulary expansion, and grammar review. Prerequisite: SPAN 314.

SPAN 316 Stylistics and Composition for Heritage Students (5) VLPA
Emphasis on the process of writing essays to help students develop a notion of style in Spanish, with attention to problems particular to Spanish heritage students. Prerequisite: SPAN 315 Offered: Sp.

SPAN 317 Spanish Masterworks in English Translation (5) VLPA
Spanish literary masterpieces of the twelfth to sixteenth centuries, in English translation, with consideration of their background and influence.

SPAN 318 Spanish Masterworks in English Translation (5) VLPA
Spanish literary masterpieces of the seventeenth to twentieth centuries, in English translation, with consideration of their background and influence.

SPAN 319 Mexican Literature (3) VLPA Steele
Analysis of selected works of Mexican literature from the second half of the twentieth century: short stories, poetry, essay, and theatre. Focus on issues such as nationalism and national identity, gender, ethnicity, dependent development, and globalization. Prerequisite: either SPAN 301 or SPAN 314.

SPAN 320 Contemporary Latin American Literature in English Translation (3) VLPA
Selected texts of contemporary Latin American literature, including examples of magical realism, the New Novel, and Central American poetry, in their sociohistorical context.

SPAN 321 Introduction to Hispanic Literary Studies (5) VLPA
Acquaints the third-year student with elementary techniques of literary analysis, as applied to examples of narrative, poetry and theater, within the context of the Spanish and Latin American literary traditions. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently. Offered: A.

SPAN 322 Introduction to Hispanic Cultural Studies (5) I&S/ VLPA
Introduces students to elite, mass, and folk cultures of Latin America, Spain, and Latinos in the United States. Sample topics include transculturation, globalization, border culture, and relations between culture, democratization, and human rights. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently. Offered: Sp.

SPAN 323 Introduction to Spanish Linguistics (5) VLPA
Synchronic and diachronic linguistic analysis of Spanish, including Spanish phonetics and phonology, morphology, syntax, and evolution of the language. Prerequisite: either SPAN 301 or SPAN 314, either of which may be taken concurrently. Offered: W.

SPAN 324 Spanish Cultural Studies (5) I&S/ VLPA
Study abroad courses focussing on historical, social, and ideological aspects of modern Spanish culture. Lectures, readings, discussions, and written work in Spanish. For pre-approved study abroad courses only. Prerequisite: either SPAN 301 or SPAN 314.

SPAN 329 Latin American Cultural Studies (5) I&S/ VLPA
Study abroad courses focussing on historical, social, and ideological aspects of modern Latin American culture. Lectures, readings, discussions, and written work in Spanish. For pre-approved study abroad courses only. Prerequisite: either SPAN 301 or SPAN 314.

SPAN 330 Composition and Literary Analysis (5) VLPA
Includes writing of critical essays, practising critical reading, developing promising thesis statements, and training in research methods. Emphasizes critiquing fellow students’ work as collaborative activities. Prerequisite: either SPAN 302 or SPAN 315.

SPAN 331 Themes in Mexican-American Studies (5) I&S/ VLPA
Examination of significant historical and cultural themes of the Mexican-American experience. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 332 Chicano Film and Narrative (5) I&S/VLPA Flores Historical overview of the evolution of Chicano culture through film. Critical examination of the portrayal and self-portrayal of Chicanos in film and selected works of narrative. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 333 Hispanic Film Studies (3) I&S/VLPA Introduction to major issues in the study of Hispanic cinema from various national contexts. The relationship of film to other types of narrative, and of film to society, specifically relations between class, gender, ethnicity, and artistic production, as well as between cinema and social change. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 334 Latin American Film (3) I&S/VLPA Overview of the history of Latin American cinema, including the new Latin American cinema of the 1960s; the development of strong film industries in Mexico, Cuba, and Brazil; and recent developments in the context of globalization and democratization. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 337 Foreign Study Conversational Spanish (2-6, max. 6) VLPA For participants in foreign study program. Prerequisite: SPAN 203.

SPAN 339 Women Writers in English Translation (3) VLPA Feminist analysis of selected contemporary texts in English or English translation by Chicana/Latina writers in the United States; or by Spanish-American, Luso-Brazilian and/or Spanish women writers, in their specific socio-historical context.

SPAN 350 Drama (3) VLPA Generic study of Spanish drama. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 351 Poetry (3) VLPA Generic study of Spanish poetry. Prerequisite: either SPAN 302 or SPAN 315, either of which may be taken concurrently.

SPAN 352 Fiction (3) VLPA Generic study of Spanish fiction. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 353 Cervantes' Don Quixote in English (5) VLPA Cervantes’s Don Quixote de la Mancha: close study of this comic masterpiece, and the life, times, and works of its author. Consideration of the work’s enduring influence and vitality.

SPAN 360 Contemporary Spain (5) I&S/VLPA Social, political, and cultural developments in Spain since the end of the Franco dictatorship in 1975. Extensive use of Spanish Web sites. Prerequisite: either SPAN 302 or SPAN 315, either of which may be taken concurrently. Offered: jointly with EURO 360.

SPAN 376 Introduction to Latin American Poetry (3) VLPA Traces the oral, musical, and written traditions of Latin American poetry. Prerequisite: either SPAN 302 or SPAN 315, either of which may be taken concurrently.

SPAN 390 Supervised Study (2-6, max. 20) VLPA Study in Spanish speaking country outside the standard Spanish curriculum of the University of Washington. Prerequisite: SPAN 301 or SPAN 314, either of which may be taken concurrently.

SPAN 400 The Syntactic Structure of Spanish (5) VLPA Strozer, Zagona Scientific study of the syntax of Spanish: structure of phrases, transformationally derived structures, grammatical relations, principles of interpretation. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 400.

SPAN 401 The Morphological Structure of Spanish (5) VLPA Strozer, Zagona Principles of word formation, including derivational and inflectional morphology. Relationship between inflectional morphology and other components of grammar. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 401.

SPAN 402 The Phonological Structure of Spanish (5) VLPA Strozer, Zagona Phonological component of the generative grammar of Spanish; representations of syllabic and segmental units, phonological rules, distinctive features and their articulatory correlates. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 402.

SPAN 403 The Evolution of the Spanish Language (5) VLPA Zagona Historical survey of Spanish phonology, morphology, and syntax, from Latin origins to the modern language. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 403.

SPAN 406 Advanced Spanish Grammar (5) VLPA Problems of Spanish grammar. Differences from English grammar. Techniques for the effective teaching of Spanish. Prerequisite: either SPAN 303 or SPAN 316; SPAN 323. Offered: jointly with SPLING 406.

SPAN 407 Dialects of World Spanish (5) Introduction to dialectical variants of Spanish. Considers standardization and the real academia; variation and change; pragmatics and politeness; Spanish in contact; sound, word formation, and grammar variation. Taught in Spanish. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 203, 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 407.

SPAN 408 Spanish Translation Workshop (5) VLPA Intensive practice in translation to and from Spanish. Texts include literary prose, poetry, expository writing, newspaper and magazine articles. Problems of standard versus colloquial language, transcription of cultural references, concept of fidelity in translation. Prerequisite: either SPAN 303 or SPAN 316; SPAN 323; recommended: SPAN 406.

SPAN 409 Spanish Phonetics (5) VLPA Analysis of sounds: training in pronunciation, intonation, and close transcription of Spanish language in its modalities. Prerequisite: either SPAN 301 or SPAN 314; either ANTH 203, LING 200, 201, 203, LING 400, or SPAN 323. Offered: jointly with SPLING 409.

SPAN 414 Spanish Literature: Eighteenth Century (5) VLPA Prerequisite: Either SPAN 305 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 415 Spanish Literature: Nineteenth Century (5) VLPA Prerequisite: Either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 416 Spanish Literature: 1900-1936 (5) VLPA Spanish literature of the twentieth century prior to the Civil War (1900-1936). Concentration on Generations of 1898 and 1927. Prerequisite: Either SPAN 305 or SPAN 316; SPAN 321; one
additional 300-level course above SPAN 303.

SPAN 417 Spanish Literature From 1940 to the Present (5) VLPA
Prerequisite: Either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 420 Spanish Poetry: Origins Through the Fifteenth Century (5) VLPA
Prerequisite: Either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 423 Spanish Poetry: The Golden Age, Sixteenth Through Seventeenth Centuries (5) VLPA
Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 424 Hispanic Poetry (5) VLPA
Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 425 Hispanic Poetry (5) VLPA
Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 426 Hispanic Poetry (5) VLPA
Modern lyric poetry of the Hispanic world. The period studied extends from 1870 to 1936 and deals with thirteen major poets, from Becquer to Hernandez. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 433 Golden Age Prose (5) VLPA
Representative, and outstanding, prose works of sixteenth- and seventeenth-century Spain. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 436 Spanish Novel of the Nineteenth Century (5) VLPA
Representative works of Galdos, Clarin, Pereda, Valera, and Blasco Ibanez. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 437 Spanish Novel: 1900-1936 (5) VLPA
Spanish novel from the generation of 1898 to the beginning of the Civil War (1936). Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 438 Spanish Novel: 1939 to the Present (5) VLPA
Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 439 Women Writers (5) I&S/VLPA
Feminist analysis of selected texts by Chicana/Latina writers in the United States as well as by Spanish-American, Luso-Brazilian and/or Spanish women writers in their specific socio-historical contexts. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 440 Spanish Drama: 1150-1600 (5) VLPA
From the beginning to Lope de Vega. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 441 Spanish Drama: 1600-1635 (5) VLPA
Spanish theatre of the seventeenth century, with emphasis on Lope de Vega. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 444 Chicano Literature: Fiction (5) VLPA
Nineteenth- and early twentieth-century fiction, as well as contemporary works, are examined in attempts to trace the development of Chicano fiction in the proper historical trajectory. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 445 The Modern Theatre in Spain, 1700-1900 (5) VLPA
Literature and historical context of Spain’s theatre in the eighteenth and nineteenth centuries. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 446 The Modern Theatre in Spain, 1900-1936 (5) VLPA
Major currents and literature of Spain’s theatre in this century, up to the Spanish Civil War in 1936. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 447 Spanish Theatre Since the Civil War (5) VLPA
Works of Spain’s major dramatists of the postwar period. Special attention given to the social and political context of the theatre in Spain under the Franco regime. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 449 Spanish Drama and Play Production (5, max. 10) VLPA
Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 453 Cervantes and His Times (5) VLPA
Study of Cervantes and his moment in Spanish history, with special attention to his cultural and artistic environment. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 461 Cultural Background of Latin American Literature (5) VLPA
Survey of ideas and art forms and their relationship to literature in four periods: pre-Columbian, colonial, early independence, and twentieth century. Prerequisite: either SPAN 303 or SPAN 316; either SPAN 321 or SPAN 322; one additional 300-level course above SPAN 303.

SPAN 462 Early Spanish Civilization (5) I&S/VLPA
Development of Spanish society and art forms from early times to 1700. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 463 Spanish Civilization Since 1700 (5) I&S/VLPA
Spanish civilization and its major artistic products since 1700. Major moments in the development of Spanish society and intellectual life as reflected in music, painting, and especially literature. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 464 Chicana Expressive Culture (5) I&S/VLPA
Expressive culture of Mexican women in United States. Cultural and artistic practices in home, film, literary (print, oral) performing and visual arts. Focuses on ways Chicanas/Latinas re-vision traditional iconography. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 465 Contemporary Chicano Literature (5) VLPA
Examination of one or more problems, themes, and/or figures in the developing body of Chicano literature. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.
Civil War; persecution and censorship of women activists, artists, intellectuals during Franco years; changes in women’s culture brought about by reindroduction of democracy; major issues addressed by contemporary Spanish feminists. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322; one additional 300-level course above SPAN 303.

SPAN 468 Latin American Women (5) I&S/VLPA
The elaboration of discourses of identity in relation to gender, ethnicity, social class, and nationality, by women writers from South America, Mexico, Central America, and the Caribbean. Testimonial literature, literature and resistance, women’s experimental fiction. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303. Offered: jointly with WOMEN 468.

SPAN 469 Concepts of Cannibalism in the Colonial World (5) I&S Barbon
Study of textual and iconographic representations of American cannibalism in the 16th and 17th century. Introduction to research produced by literary critics, anthropologists, and historians. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321 or SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SISLA 469.

SPAN 473 Latin American Fiction: Nineteenth Century (5, max. 15) VLPA
Study of prose fiction in Latin America in the nineteenth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 474 Latin American Fiction: Twentieth Century (5) VLPA
Study of prose fiction in Latin America in the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 475 Latin American Poetry: Colonial Through Nineteenth Century (5) VLPA
Poetic movements of the seventeenth, eighteenth, and nineteenth centuries in Spanish American, Renaissance, baroque, neoclassicism, romanticism, and modernism. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 476 Contemporary Latin American Poetry (5) VLPA
Evolution of Latin American poetry, from postmodernism and vanguardism to the most recent poetic expression: Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 477 Latin American Essay (5) VLPA
Literary expression of ideas in Latin American countries, nineteenth and twentieth centuries. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 478 Modern Latin American Theater (5) VLPA
Study of the origin, development, and achievements of Latin American theater with an overview of its history prior to the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 479 The City and Latin American Literature: Points of Departure (5) VLPA/O’Hara
Representations of Latin American, United States, and European cities by Latin American authors, and of Latin American and Latino cities by authors from other literary traditions. The literary relation of urbanization to modernization, globalization, exile, and alienation. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 480 Spanish Medieval Literature (5) VLPA
Principal literary works of the Spanish Middle Ages in the context of evolving intellectual, spiritual, and artistic climates of the period. Covers the evolution of narrative and lyric prose and verse in both their traditional and learned manifestations. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 481 Sixteenth- and Seventeenth-Century Spanish Literature (5) VLPA
Spanish literature of the sixteenth and seventeenth centuries. Close study of key texts from all genres as well as their socio-historical contexts. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 482 Eighteenth- through Twentieth-Century Spanish Literature (5) VLPA
Survey of Spanish literature since 1700, and its historical context. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 483 Latin American Literature: Origins to Independence (5) VLPA
The elaboration of discourses of legitimation by the Spanish conquistadores, and of resistance and accommodation by native and mestizo peoples; the development of a New World Baroque aesthetic; literatures of independence from Spain and of nation-building. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 484 Latin American Literature: Modernismo to the Present (5) VLPA
Principal literary movements of Latin America, late nineteenth century to the present, with particular emphasis on poetry and narrative: modernismo, postmodernismo, the vanguard, nueva and novisima narrativa. Includes essays and autobiographical writings to help place the literary works in socio-historical perspective. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303.

SPAN 485 Cultural Studies of Latin America (5) I&S/VLPA
Identity, representation, and transculturation in Latin American popular culture. Topics vary but may include cinema, folk art, and historical, ethnographic, and travel writing. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322; one additional 300-level course above SPAN 303. Offered: jointly with SISLA 485.

SPAN 486 Photography and Cultural Studies in Latin America (5) I&S/VLPA
Interdisciplinary exploration of the connections between visual anthropology (ethnography through photography and film), documentary and art photography, and colonial and post-colonial discourse in Latin America during the twentieth century. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322 and one additional 300-level course beyond SPAN 303. Offered: jointly with SISLA 486.

SPAN 487 Mexican Cinema (5) I&S/VLPA Steele
Analysis of representative films about post-revolutionary Mexico by directors from both the Golden Age of Mexican Cinema (1940-1960) and the Mexican New Film movement (1975-the present). Revolutionary nationalism, modernization and its discontents; construction of gender, class and ethnicity; migration and globalization. Prerequisite: either SPAN 303 or SPAN 316; SPAN 322 and one additional 300-level course beyond SPAN 303.

SPAN 488 The Fantastic in Latin American Literature (5) VLPA O’Hara
Introduction to the Fantastic in literature, in contrast to realism, and how the concept has been adapted by Latin American authors. May focus on a particular writer: Augusto Monterroso (Guatemala) or Julio Cortazar (Argentina), or survey various authors. Prerequi-
SPAN 499 Special Topics (1-5, max. 10)
Topics to meet special needs.

SPAN 510 Methodology of Spanish Language Teaching (3)
Borneguero
Theoretical and practical foundation for teaching Spanish. Major topics include modern theories of language and language acquisition which underlie modern methods of foreign language teaching, teaching techniques, testing, classroom relations. Emphasis on the multiple-approach direct method. Required for beginning Spanish Teaching Assistants. Credit/no credit only.

SPAN 521 The Renaissance in Spain (5)
Literary creation and the cultural, social, historical context of Spanish literature from La Celestina through the sixteenth century. Extensive study of secondary materials, intensive analysis of representative literary texts.

SPAN 522 The Renaissance in Spain (5)
Literary creation and the cultural, social, historical context of Spanish literature from La Celestina through the sixteenth century. Extensive study of secondary materials, intensive analysis of representative literary texts.

SPAN 541 History of the Spanish Language (5)
Summary of the evolution of Spanish language from the fragmentation of Peninsular Romance to Cantar de Mio Cid. The main work consists of analysis of early Castilian texts.

SPAN 542 History of the Spanish Language (5)
Summary of the evolution of Spanish language from the fragmentation of Peninsular Romance to Cantar de Mio Cid. The main work consists of analysis of early Castilian texts.

SPAN 561 Spanish-American Novel From 1940 to the Present (5)
SPAN 571 The Modern Essay in Spanish America (5)

SPAN 572 Twentieth-Century Spanish Poetry (5, max. 10)
SPAN 573 Twentieth-Century Spanish-American Poetry (5, max. 10)
SPAN 575 Literary Criticism (5)
SPAN 577 Contemporary Literary Theory (5)
Introduction to various structuralist and poststructuralist theories of literary analysis, including those developed by Hispanic theorists, and their application to the study of texts from the Spanish and Latin American traditions.

SPAN 590 Special Seminar and Conference (1-10, max. 30)
Group seminars, or individual conferences, are scheduled under this number to meet special needs. Prerequisite: permission of the graduate program coordinator.

SPAN 591 Literary Problems: Middle Ages (5, max. 10)
SPAN 592 Literary Problems: Renaissance (5, max. 10)
SPAN 593 Literary Problems: Golden Age (5, max. 10)
SPAN 594 Literary Problems: Eighteenth Century (5, max. 10)
SPAN 595 Literary Problems: Nineteenth Century (5, max. 10)
SPAN 596 Literary Problems: Twentieth Century (5, max. 10)
SPAN 597 Literary Problems: Spanish-American Colonial Literature (5, max. 10)
SPAN 598 Literary Problems: Latin America (5, max. 10)
SPAN 600 Independent Study or Research (*)
SPAN 700 Master's Thesis (*)
Credit/no credit only.
SPAN 800 Doctoral Dissertation (*)
Credit/no credit only.

Scandinavian Studies
318 Raitt

Scandinavian studies is concerned with the study of languages, literature, history, politics, and cultures of Denmark, Finland, Iceland, Norway, Sweden, and the Baltic States of Estonia, Latvia, and Lithuania. Emphasis is placed both on contemporary literature and culture and on historical development. Although most courses designed for majors are taught in the original languages, a broad spectrum of courses designed primarily for nonmajors is offered in English.

Undergraduate Program
Adviser
305Z Raitt, Box 353420
206-543-6099

The Department of Scandinavian Studies offers the following programs of study:
- The Bachelor of Arts degree with a major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies.
- Minors in Danish, Finnish, Norwegian, Swedish, Baltic studies, and Scandinavian area studies.
Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Danish, Estonian, Finnish, Latvian, Lithuanian, Norwegian, or Swedish.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Danish, Finnish, Norwegian, or Swedish: 65 credits, of which 35 are in upper-division courses. The 65 credits include 30 credits in first- and second-year language training, 15 credits in literature courses in the chosen language, one course in Scandinavian area studies, a course in the history of Scandinavian languages or Finnish cultural studies, a course in Scandinavian literature in translation, and a senior essay (SCAND 498).

Scandinavian Area Studies: 65 credits, of which 30 are in upper-division courses. The 65 credits include 30 credits in the chosen language, and a course in Scandinavian or Baltic language (normally first and second year), a minimum of one course from each of four area-studies fields (Scandinavian folklore and film; literature in translation; history and mythology; society and politics), and a senior essay (SCAND 498).

Minor

Minor Requirements:

Baltic Studies: 35 credits as follows:
- 15 credits of an intermediate Baltic language (Estonian, Latvian, or Lithuanian)
- 10 credits of Baltic courses
- 10 credits of additional course work (minimum 5 credits at the 300 level or above) from the fields of Scandinavian folklore and film, literature, history and mythology, and society and politics

Danish, Finnish, Norwegian, or Swedish: 35 credits as follows:
- 15 credits of second-year language
- 10 credits in literature courses in the chosen language
- 10 credits of additional course work (minimum 5 credits at the 300 level or above) from the fields of Scandinavian folklore and film, literature, history and mythology, and society and politics.

Scandinavian Area Studies: 35 credits as follows:
- 15 credits of second-year language courses in Danish, Finnish, Norwegian, or Swedish
- 20 credits of additional course work (minimum 15 credits at the 300 level or above) in two of the following fields: Scandinavian folklore and film, literature, history and mythology, and society and politics.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Graduates of the Department of Scandinavian Studies have an advanced level of proficiency in a Scandinavian, Fenno-Ugric, or Baltic language. They can talk about a wide range of concrete topics in a sustained conversation and have the ability to interpret and write about literary texts, non-fiction, and other media. Graduates also have knowledge of major figures, ideas, and institutions in Baltic or Nordic culture, history, literature, and politics that enriches a global perspective. They have the ability to research and synthesize source material in the target language and can produce a scholarly essay in English on a topic within their area of concentration.

Graduates of the Scandinavian studies program have the qualifications to embark on careers that require skills in the interpretation of information in various media, critical analysis, and effective communication and to continue in graduate programs and professional schools that value an international perspective.

- Instructional and Research Facilities: None
- Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- Research, Internships, and Service Learning: Internships at museums or with Scandinavian businesses are possible. Exchange program opportunities with Aarhus, Copenhagen, Linköping, Stockholm, Uppsala, Bergen, Oslo, Åbo/Turku, and Helsinki also exist.
- Department Scholarships: The department offers several scholarships for students of Danish, Finnish, Norwegian, and Swedish.
- Student Organizations/Associations: the Danish Club, the Norwegian Club, the Swedish Club, and the Finnish Club.

Graduate Program

Graduate Program Coordinator

uwscand@u.washington.edu

The Department of Scandinavian Studies offers graduate programs of study leading to the Master of Arts and Doctor of Philosophy degrees. For the M.A. degree, the emphasis may be placed on Old Icelandic (Old Norse), Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies. Ph.D. degree aspirants must complete one quarter’s study of Old Icelandic and concentrate their studies primarily within one of five areas: Danish language and literature, Finnish language and literature, Norwegian language and literature, Swedish language and literature, or Scandinavian area studies.

For the graduate student, the programs in Scandinavian languages and literature open several areas of study: medieval, particularly Old Icelandic; modern, including the eighteenth century; Romanticism; the Modern Breakthrough, and the twentieth century. Attention is paid to the history of the Scandinavian languages, prose, drama, and poetry. Opportunities for supervised study and specialization also exist in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies. There are also opportunities for comparative-literature study.

Master of Arts

For the M.A. degree, two options are available, each allowing the student to emphasize a target language while pursuing courses in Scandinavian languages, literature, or area studies.

An emphasis on Scandinavian languages and literature includes acquisition of a working knowledge of literary history, critical theory and text analysis, plus study of one secondary area.

An emphasis on Scandinavian area studies includes the study of Scandinavian folklore, mythology, history, politics, society, and Baltic studies, with an emphasis in one of these areas.

Admission Requirement: Bachelor of Arts degree with major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies, or equivalent background, including advanced language proficiency in one Nordic language.

Graduation Requirements: Minimum of 40 credits in courses or seminars in Scandinavian and related subjects approved by the department, of which at least 20 credits must be in courses numbered 500 and above; reading knowledge of French or German (another non-Scandinavian language may be substituted with faculty approval); written and oral examination; option between thesis and non-thesis program. Candidates in Scandinavian languages and literature must satisfy the departmental requirement in Old Icelandic.
Doctor of Philosophy

For the Ph.D. degree, the student concentrates primarily on one of two areas: Scandinavian languages and literature, or Scandinavian area studies, with an emphasis on the student’s chosen target language. Major attention is given to the history of the Scandinavian languages, literary history and theory, and genre study. Opportunities for graduate work also exist in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies.

Admission Requirement: Master of Arts degree with major in Scandinavian languages and literature or equivalent background. Graduation Requirements: 40 credits beyond the master’s degree in courses or seminars in Scandinavian languages and literature and related subjects approved by the department, one quarter’s study of Old Icelandic, a reading knowledge of French and German (other non-Scandinavian languages may be substituted with faculty approval), General Examination for admission to candidacy, 27 credits of SCAND 800 (dissertation) taken over at least three quarters, and a Final Examination on the dissertation.

Financial Aid

Teaching assistantships in Danish, Finnish, Norwegian, Swedish, and Scandinavian Area Studies are usually available, as well as occasional research assistantships. If funding allows, a Baltic-language teaching assistantship may be available.

Danish

Course Descriptions

DANISH 101 Elementary Danish (5)
Fundamentals of oral and written Danish.

DANISH 102 Elementary Danish (5)
Fundamentals of oral and written Danish.

DANISH 103 Elementary Danish (5)
Fundamentals of oral and written Danish.

DANISH 199 Foreign Study: Elementary Danish (1-15, max. 15)
Fundamental of oral and written Danish.

DANISH 201 Second-Year Danish (5) VLPA

DANISH 202 Second-Year Danish (5) VLPA

DANISH 203 Second-Year Danish (5) VLPA
DANISH 299 Foreign Study: Intermediate Danish (1-15, max. 15) VLPA
Intensive practice in speaking, reading, and writing. Functional review of grammar. Discussion of culture and current events in Denmark.

DANISH 310 Topics in Danish Short Prose (5, max. 15) VLPA
Focuses on the fairy tale and story, with selections by Biche, H.C. Andersen, Bang, Blixen, and others.

DANISH 311 Topics in Danish Literature and Culture (5, max. 15) VLPA
Selected topics in modern Danish literature and culture, such as women's literature, Danish identity and the European Union, contemporary drama and film, or children's literature. Recommended: DANISH 203.

DANISH 312 Topics in the Danish Novel (5, max. 15) VLPA
Focuses on selected novels from the 19th and 20th centuries by figures such as J.P. Jacobsen, Herman Bang, J.V. Jensen, Hans Kirk, Scherfig and Ditlevsen.

DANISH 395 Foreign Study: Danish Area Studies (1-5, max. 10) I&S
Courses in Danish history, society, and/or politics.

DANISH 399 Foreign Study: Topics in Danish Literature and Culture (1-5, max. 15) VLPA
Topics in Danish literature, life, and civilization.

DANISH 490 Supervised Reading (1-5, max. 10)
Readings in a selected area of Danish language, literature, or related fields.

Estonia

Course Descriptions

ESTO 101 Elementary Estonian (5)
Fundamentals of oral and written Estonian.

ESTO 102 Elementary Estonian (5)
Fundamentals of oral and written Estonian.

ESTO 103 Elementary Estonian (5)
Fundamentals of oral and written Estonian.

ESTO 150 Intensive Estonian (15)

ESTO 201 Second-Year Estonian (5) VLPA

ESTO 202 Second-Year Estonian (5) VLPA

ESTO 203 Second-Year Estonian (5) VLPA

ESTO 250 Intensive Intermediate Estonian (15) VLPA

ESTO 490 Supervised Reading (1-5, max. 10)
Readings in a selected area of Estonian language, culture, or society.

Finnish

Course Descriptions

FINN 101 Elementary Finnish (5)
Fundamentals of oral and written Finnish.

FINN 102 Elementary Finnish (5)
Fundamentals of oral and written Finnish.

FINN 103 Elementary Finnish (5)
Fundamentals of oral and written Finnish.

FINN 150 Intensive First-Year Finnish (15)

FINN 199 Foreign Study: Elementary Finnish (1-15, max. 15)
Fundamentals of oral and written Finnish.

FINN 201 Second-Year Finnish (5) VLPA

FINN 202 Second-Year Finnish (5) VLPA

FINN 203 Second-Year Finnish (5) VLPA

FINN 299 Foreign Study: Intermediate Finnish (1-15, max. 15) VLPA
Intensive practice in speaking, reading, and writing. Functional review of grammar. Discussion of culture and current events in Finland.

FINN 310 Topics in Finnish Language and Culture (5, max. 15) VLPA

FINN 395 Foreign Study: Finnish Area Studies (1-5, max. 10) I&S
Courses in Finnish history, society, and/or politics.

FINN 399 Foreign Study: Topics in Finnish Literature and Culture (1-5, max. 15) VLPA
Topics in Finnish literature, life, and civilization.

FINN 490 Supervised Reading (1-5, max. 10)
Readings in a selected area of Finnish language, culture, or society.

Latvian

Course Descriptions

LATV 101 Elementary Latvian (5)
Fundamentals of oral and written Latvian.

LATV 102 Elementary Latvian (5)
Fundamentals of oral and written Latvian.

LATV 103 Elementary Latvian (5)
Fundamentals of oral and written Latvian.

LATV 150 Intensive Latvian (15)
Fundamentals of oral and written Latvian. Intensive practice in speaking, reading, and writing Latvian. Interactive classroom,
computer-assisted learning, language, and reading laboratories. Emphasis on contemporary Latvian culture and society.

LATV 201 Second-Year Latvian (5) VLPA

LATV 202 Second-Year Latvian (5) VLPA

LATV 203 Second-Year Latvian (5) VLPA

LATV 250 Intensive Intermediate Estonian (15) VLPA

LATV 310 Topics in Latvian Literature (5, max. 15) VLPA
Topics in Latvian literature, life, and civilization. Recommended: LATV 203.

LATV 490 Supervised Reading (1-5, max. 10)
Readings in a selected area of Latvian language, culture, or society.

Lithuanian

Course Descriptions

LITH 101 Elementary Lithuanian (5)
Fundamentals of oral and written Lithuanian.

LITH 102 Elementary Lithuanian (5)
Fundamentals of oral and written Lithuanian.

LITH 103 Elementary Lithuanian (5)
Fundamentals of oral and written Lithuanian.

LITH 150 Intensive Lithuanian (15)

LITH 201 Second-Year Lithuanian (5) VLPA

LITH 202 Second-Year Lithuanian (5) VLPA

LITH 203 Second-Year Lithuanian (5) VLPA

LITH 250 Intensive Intermediate Lithuanian (15) VLPA

LITH 490 Supervised Reading (1-5, max. 10)
Readings in a selected area of Lithuanian language, culture, or society.

Norwegian

Course Descriptions

NORW 101 Elementary Norwegian (5)
Fundamentals of oral and written Norwegian.

NORW 102 Elementary Norwegian (5)
Fundamentals of oral and written Norwegian.

NORW 103 Elementary Norwegian (5)
Fundamentals of oral and written Norwegian.

NORW 150 Intensive First-Year Norwegian (15)

NORW 199 Foreign Study: Elementary Norwegian (1-15, max. 15)
Fundamentals of oral and written Norwegian.

NORW 201 Second-Year Norwegian (5) VLPA

NORW 202 Second-Year Norwegian (5) VLPA

NORW 203 Second-Year Norwegian (5) VLPA

NORW 299 Foreign Study: Intermediate Norwegian (1-15, max. 15) VLPA

NORW 310 The Norwegian Short Story (5) VLPA

NORW 311 Drama After Ibsen (5) VLPA
Recommended: NORW 203.

NORW 312 Topics in Norwegian Literature and Culture (5, max. 15) VLPA
Topics related to Norwegian literature, life, and civilization. Recommended: NORW 203.

NORW 321 The Plays of Henrik Ibsen (5) VLPA
Study of selected plays of Ibsen. Recommended: NORW 203.

NORW 395 Foreign Study: Norwegian Area Studies (1-5, max. 10) I&S
Courses in Norwegian history, society, and/or politics.

NORW 399 Foreign Study: Topics in Norwegian Literature and Culture VLPA (1-5, max. 15)
Topics in Norwegian literature, life, and civilization.

NORW 490 Supervised Reading (1-5, max. 10)
Readings in a selected area of Norwegian language, literature, or related fields.

Scandinavian

Course Descriptions

SCAND 100 Introduction to Scandinavian Culture (5) I&S/ VLPA
The Scandinavian experience from the Viking Age to the present day; the background for contemporary Scandinavian democracy, with major emphasis on the cultural, political, and religious development of the Scandinavian countries.

SCAND 150 Norwegian Literary and Cultural History (5)
SCAND 331 Folk Narrative (5) VLPA
A survey of Norwegian literary and cultural history from the Vikings to the present. Authors read include Bjornson, Ibsen, Hamsun, and Roelvaag.

SCAND 151 Finnish Literary and Cultural History (5) VLPA
A survey of Finnish literature and cultural history during the 19th and 20 centuries. Authors studied include Lonnrot, Snellmann, Kivi, Sodergran, Linna, Haavikko, and Kaurismaki.

SCAND 200 Contemporary Scandinavian Society (5) I&S
Examines the distinctive policies, institutions, and social norms of contemporary Scandinavian societies. Topics include: Nordic geography, the development of a “middle way” between capitalism and socialism, universal social policies; Scandinavia in the international system, and contemporary challenges to Scandinavian societies. Recommended: SCAND 100.

SCAND 230 Introduction to Folklore Studies (5) I&S/VLPA
Comprehensive overview of the field of folkloristics, focusing on verbal genres, customs, belief, and material culture. Particular attention to the issues of community, identity, and ethnicity. Offered: jointly with C LIT 230.

SCAND 232 Hans Christian Andersen and the Fairy Tale Tradition (5) VLPA
Influence of Hans Christian Andersen and the fairy tale on modern Scandinavian tales and stories. Investigates the significance of the fairy tale in modern world, with attentions to writers such as Isak Dinesen, Knut Hamsun, Villy Sorensen, William Heinesen.

SCAND 251 Holberg and His Comedies in English (2) VLPA
Holberg and his major dramas, with attention to the comic tradition in the Scandinavian theatre.

SCAND 270 Icelandic Sagas of the Vikings (5) VLPA
Icelandic sagas and poetry about Vikings in the context of thirteenth-century society.

SCAND 280 Ibsen and His Major Plays in English (5) VLPA
Reading and discussion of Ibsen’s major plays.

SCAND 312 Masterpieces of Scandinavian Literature (5) VLPA
Major works of Scandinavian literature by selected authors.

SCAND 325 Public Policy in Scandinavia (5) I&S
Comparative and historical analysis of the evolution and change of domestic public policies in the Nordic welfare states; emphasis on health, education, social welfare, economic management, as well as the future of the welfare state.

SCAND 326 Scandinavia in World Affairs (5) I&S
Introduction to the foreign relations of Scandinavia with a focus on Nordic security, international economic pressures, and global conflict resolution. Includes a survey of the national settings for international involvements and highlights the dilemmas for industrial societies exposed to the pressures of interdependence. Offered: jointly with POL S 326.

SCAND 327 Women in Scandinavian Society (5) I&S/VLPA
Examines the changing position of women in Norway, Denmark, Finland, and Sweden from the 1880s to the contemporary period. Readings in literature and political science.

SCAND 330 Scandinavian Mythology (5) VLPA

SCAND 331 Folk Narrative (5) VLPA
Survey of various genres of folk narratives studied in performance contexts to reveal their socio-cultural functions in a variety of milieus. Theory and history of folk narrative study, taxonomy, genre classification, and interpretative approaches. Recommended: SCAND 230 or C LIT 230. Offered: jointly with C LIT 331.

SCAND 332 Folk Belief and World View (5) VLPA
Study of folk belief and world view expressed in memorats, legends, magic formulas, and other examples of oral tradition. Analysis of forms and origins of belief genres, their esthetic and social functions, and the role of oral tradition as a tool of social control and change. Offered: jointly with C LIT 332.

SCAND 333 Folklore and Material Culture (5) VLPA
Material culture in traditional and contemporary Scandinavia. Comprehensive examination of nonverbal genres (including vernacular architecture, settlement, textile foodways) with an emphasis on broad theoretical issues such as community, identity, ethnicity. Recommended: SCAND 230 or C LIT 230. Offered: jointly with C LIT 333.

SCAND 334 Immigrant and Ethnic Folklore (5) I&S/VLPA
Survey of verbal, customary, and material folk traditions in ethnic context. Theories of ethnic folklore research applied to the traditions of American communities of Scandinavian, Baltic, or other European ancestry. Recommended: SCAND 230 or C LIT 230. Offered: jointly with C LIT 334.

SCAND 335 Scandinavian Children’s Literature (5) VLPA
The history, forms, and themes of Scandinavian children’s literature from H. C. Andersen to the present. Exploration of the dominant concerns of authors, adult and non-adult audiences, and the uses to which juvenile and adolescent literature are put. Film adaptations and Scandinavian-American materials included.

SCAND 340 Kalevala and the Epic Tradition (5) VLPA

SCAND 341 Sami Culture and History (5) I&S/VLPA
An interdisciplinary look at the culture of Sami (Lapp) people in Scandinavia from the earliest archeological and textual evidence to the present day. Focus on indigenous modes of expression and worldview, as well as contemporary cultural and political activism.

SCAND 344 The Baltic States and Scandinavia (5) I&S
Survey of the cultures and history of Estonia, Latvia, and Lithuania from the Viking Age to the present, with particular attention to Baltic-Scandinavian contacts. Offered: jointly with EURO 344.

SCAND 345 Baltic Cultures (5) I&S/VLPA
Cultures and peoples of Estonia, Latvia, and Lithuania. Baltic literature, music, art, and film in social and historical context. Traditional contacts with Scandinavia and Central and East Europe. Offered: jointly with EURO 345.

SCAND 350 Environmental Norms in International Politics (5) I&S
Surveys development of international environmental consciousness from 1960s to present. Models of “green development”; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with ENVIR 360/SIS 350.

SCAND 350 Scandinavian Cinema (3/5) VLPA
Major Scandinavian films and film directors from the 1920s to the present.
SCAND 367 Sexuality in Scandinavia: Myth and Reality (5) I&S/VLPA
Examines selected Scandinavian literary and socio-political texts, films, and art to manifest the reality behind the myths of sexual freedom in Scandinavia.

SCAND 370 The Vikings (5) I&S/VLPA
Vikings at home in Scandinavia and abroad, with particular emphasis on their activities as revealed in archaeological finds and in historical and literary sources. Offered: jointly with HSTAM 370.

SCAND 380 History of Scandinavia to 1720 (5) I&S
Scandinavian history from the Viking Age to 1720, with an emphasis on the political, social, and economic development of Denmark, Norway, Sweden, Finland, and Iceland from the Middle Ages to the Enlightenment. Offered: jointly with HSTEU 380.

SCAND 381 History of Scandinavia Since 1720 (5) I&S
Scandinavian history from the Enlightenment to the Welfare State with emphasis on the political, social, and economic development of the modern Scandinavian nations of Denmark, Norway, Sweden, Finland, and Iceland. Offered: jointly with HSTEU 381.

SCAND 399 Foreign Study in Scandinavia (1-5, max. 20)
Pan-Scandinavian coursework in Scandinavia, including courses in English.

SCAND 402 International Political Economy and Scandinavia (5) I&S
Overview of the most prominent theoretical approaches to the study of international political economy. Evaluates competing theories and applies these to explain contemporary problems in International Political Economy. Readings include examples from Scandinavia’s experience.

SCAND 403 Scandinavian Immigration in History and Literature (5) VLPA/I&S
History and literature of Scandinavian immigration to North America, including immigrant life and culture, community structures and traditions, and the literature about and by immigrants from Denmark, Finland, Iceland, Norway, and Sweden. Offered: jointly with HIST 403.

SCAND 427 Scandinavian Women Writers in English Translation (5) VLPA
Selected works by major Scandinavian women writers from mid-nineteenth-century bourgeois realism to the present with focus on feminist issues in literary criticism. Offered: jointly with WOMEN 429.

SCAND 430 Readings in Folklore (5) VLPA
Exploration of theoretical and methodological issues in folklore studies through independent reading of journal articles published during the last five years. Recommended: SCAND 230 or C LIT 230. Offered: jointly with C LIT 430.

SCAND 431 The Northern European Ballad (5) VLPA
Integrative study of the Northern European Ballad, with an emphasis on texts, performance, context, history, theory, genre classification, and interpretive approaches. Offered: jointly with C LIT 431.

SCAND 437 Politics in Scandinavia (5) I&S
Twentieth-century politics in Scandinavia. How Scandinavian countries have been governed. Costs and consequences of their governmental style and its uncertain future. Optimal size of polities, problems of mature welfare states, process of leadership and representation in multiparty systems, decline of political parties. Offered: jointly with POL S 437.

SCAND 445 War and Occupation in Northern Europe: History, Fiction, and Memoir (5)
The study of literary representations (fiction, memoirs, and personal narratives) dealing with World War II and the occupation of the Nordic and Baltic countries. Offered: jointly with EURO 445.

SCAND 450 Scandinavian Literary History (5) VLPA
Survey of Scandinavian literary history. Recommended: DANISH 203, FINN 203, NORW 203, or SWED 203.

SCAND 454 Baltic History (5) I&S
Overview of the history of the area occupied by the Baltic countries of Latvia, Lithuania, and Estonia. Emphasizes their emergence as modern European nation-states. Era from World War I to present treated in depth, including the historical role and present situation of non-Baltic peoples, particularly Russians. Offered: jointly with HSTEU 454.

SCAND 455 Baltic States Since 1991 (5) I&S

SCAND 460 History of the Scandinavian Languages (5) VLPA
Development of languages from common Scandinavian to contemporary Danish, Norwegian, Swedish, Faroese, and Icelandic. Recommended: DANISH 203, FINN 203, NORW 203, or SWED 203.

SCAND 462 Isak Dinesen and Karen Blixen (5) VLPA
The fiction of Isak Dinesen (pseudonym for Karen Blixen) reevaluated in light of current issues in literary criticism, particularly feminist criticism. Close readings of selected tales, essays, and criticism. Offered: jointly with WOMEN 462.

SCAND 470 Senior Seminar in Folklore (5) VLPA
Investigates ethnic and several American folk traditions in the Pacific Northwest through extensive fieldwork. Recommended: SCAND 230 or C LIT 230. Offered: jointly with C LIT 470.

SCAND 480 Kierkegaard and Decadence in European Literature (5) VLPA
Reading and discussion of core texts by Soren Kierkegaard, as well as a consideration of the relationship between Kierkegaardian thought and the literary practice of various writers of Scandinavian and European decadence.

SCAND 481 August Strindberg and European Cultural History (5) I&S/VLPA
Examines the work of Swedish dramatist, novelist, and painter August Strindberg, in the context of European literary movements and history of ideas from 1880 to 1912, and Strindberg's influence on 20th-century drama and film. Offered: jointly with EURO 481.

SCAND 484 The Films of Ingmar Bergman (5) VLPA
Major films of Ingmar Bergman.

SCAND 490 Special Topics (1-5, max. 15)
Special topics in Scandinavian art, literature, culture, and history. Course offerings based on instructor’s specialty and student demand.

SCAND 495 Foreign Study: Research Project (1-5, max. 10)
Research on approved topic.

SCAND 498 Senior Essay (5) VLPA
Undergraduate research and the writing of a senior essay in Scandinavian area studies.

SCAND 499 Independent Study or Research (1-5, max. 10)
Independent study or research in Scandinavian area studies. May be done in a Scandinavian language or in English.
SCAND 500 Introductory Readings in Old Icelandic (5)
Systematic study of the grammatical structure of Old Icelandic and
the reading of several short prose works.

SCAND 501 Old Icelandic Language and Literature (5)
Reading of a major work in Old Icelandic literature as a vehicle for
discussions about literary history and genre, narrative, and rhetorical
strategies.

SCAND 503 Methods of Scandinavian Studies (5)
Introduction to Scandinavian studies on the graduate level with
emphasis on Scandinavian literature, folklore, history, and politics.

SCAND 504 Contemporary Literary Theory (5)
Contemporary literary theory and its application to Scandinavian
texts. Prerequisite: graduate student standing or permission of
instructor.

SCAND 505 Topics in Scandinavian Drama and Film (5, max.
15)
Seminar on a selected topic in Scandinavian drama or film, such as
an author (Holberg, Ibsen, Strindberg, Bergman), a period, a genre,
or a movement.

SCAND 508 Topics in Scandinavian Prose (5, max. 15)
Seminar on various topics in Scandinavian prose, including shorter
prose texts, as well as a selection of the significant novels of the
nineteenth and twentieth centuries.

SCAND 513 Scandinavian Linguistics (3)
Selected topics in Scandinavian linguistics.

SCAND 515 Pre-Nineteenth-Century Scandinavian Litera-
ture (5)
Seminar on Scandinavian literature of the sixteenth, seventeenth,
and eighteenth centuries.

SCAND 518 Foreign Language Teaching Methodology (2)
Current foreign language teaching methods and approaches.
Learning and teaching strategies and techniques for the four skills
(reading, writing, speaking, listening) including cultural notions.
Current and future trends in pedagogy and technology. Offered:
jointly with ASIAN 518/GERMAN 518/NEAR E 518/SCAND 518/
SLAV 518.

SCAND 519 Modern Scandinavian Politics (5)
Analyzes the political, economic, and historical development of
Sweden, Norway, Denmark, Iceland, and Finland from World War II
to the present. Readings focus on domestic and foreign policies that
distinguish these countries from other advanced industrial societies.
Offered: jointly with POL S 519.

SCAND 520 Topics in Scandinavian Poetry (5, max. 15)
Seminar on selected periods of Scandinavian poetry: romanticism,
symbolism, modernism, and contemporary poetry. Poetry examined
in relation to the literary canon of each country and to Scandina-
vian literature as a whole. International influences also discussed.

SCAND 525 Topics in Scandinavian History (5, max. 15)
Seminar on selected topics in Scandinavian history.

SCAND 530 Old Norse Literature (3)
Studies in the poetry and prose tradition of medieval Iceland and
Norway.

SCAND 533 Interdisciplinary Approaches to Community in
Scandinavia (5)
Humanistic examination of community creation, maintenance, and
change in the Nordic region. Examples drawn from folklore,
literature, activism, popular culture, history. Focus on issues of
gender, belief, and art in relation to community. Coursework
includes both individual and collaborative assignments.

SCAND 550 Introductory Readings in Old Icelandic (5)
Systematic study of the grammatical structure of Old Icelandic and
the reading of several short prose works.

SCAND 551 Old Icelandic Language and Literature (5)
Reading of a major work in Old Icelandic literature as a vehicle for
discussions about literary history and genre, narrative, and rhetorical
strategies.

SCAND 553 Methods of Scandinavian Studies (5)
Introduction to Scandinavian studies on the graduate level with
emphasis on Scandinavian literature, folklore, history, and politics.

SCAND 554 Contemporary Literary Theory (5)
Contemporary literary theory and its application to Scandinavian
texts. Prerequisite: graduate student standing or permission of
instructor.

SCAND 555 Topics in Scandinavian Drama and Film (5, max.
15)
Seminar on a selected topic in Scandinavian drama or film, such as
an author (Holberg, Ibsen, Strindberg, Bergman), a period, a genre,
or a movement.

SCAND 558 Topics in Scandinavian Prose (5, max. 15)
Seminar on various topics in Scandinavian prose, including shorter
prose texts, as well as a selection of the significant novels of the
nineteenth and twentieth centuries.

SCAND 551 Scandinavian Linguistics (3)
Selected topics in Scandinavian linguistics.

SCAND 555 Pre-Nineteenth-Century Scandinavian Litera-
ture (5)
Seminar on Scandinavian literature of the sixteenth, seventeenth,
and eighteenth centuries.

SCAND 558 Foreign Language Teaching Methodology (2)
Current foreign language teaching methods and approaches.
Learning and teaching strategies and techniques for the four skills
(reading, writing, speaking, listening) including cultural notions.
Current and future trends in pedagogy and technology. Offered:
jointly with ASIAN 518/GERMAN 518/NEAR E 518/SCAND 518/
SLAV 518.

SCAND 559 Modern Scandinavian Politics (5)
Analyzes the political, economic, and historical development of
Sweden, Norway, Denmark, Iceland, and Finland from World War II
to the present. Readings focus on domestic and foreign policies that
distinguish these countries from other advanced industrial societies.
Offered: jointly with POL S 519.

SCAND 552 Topics in Scandinavian Poetry (5, max. 15)
Seminar on selected periods of Scandinavian poetry: romanticism,
symbolism, modernism, and contemporary poetry. Poetry examined
in relation to the literary canon of each country and to Scandina-
vian literature as a whole. International influences also discussed.

SCAND 555 Topics in Scandinavian History (5, max. 15)
Seminar on selected topics in Scandinavian history.

SCAND 550 Old Norse Literature (3)
Studies in the poetry and prose tradition of medieval Iceland and
Norway.

SCAND 553 Interdisciplinary Approaches to Community in
Scandinavia (5)
Humanistic examination of community creation, maintenance, and
change in the Nordic region. Examples drawn from folklore,
literature, activism, popular culture, history. Focus on issues of
gender, belief, and art in relation to community. Coursework
includes both individual and collaborative assignments.
Students in good academic standing may declare this major at any second-year Russian. Courses that develop writing skills.

**Suggested First- and Second-Year College Courses:**

<table>
<thead>
<tr>
<th>Bachelor of Arts</th>
<th></th>
<th></th>
</tr>
</thead>
</table>

The Department of Slavic Languages and Literatures offers the following programs of study:

- The Bachelor of Arts degree with a major in Slavic languages and literatures with options in Russian language, literature, and culture; Russian language and history; and East European languages and culture.
- Minors in Russian language, Russian literature/Slavic literatures, and Slavic languages.

**Bachelor of Arts**

**Suggested First- and Second-Year College Courses:** First- and second-year Russian. Courses that develop writing skills.

**Department Admission Requirements**

Students in good academic standing may declare this major at any time.

**Major Requirements**

All options must be completed with a minimum cumulative GPA of 2.50 in all RUSS and SLAV courses completed (UW and transfer), with a minimum grade of 2.0 in each course presented for the major. Transfer students are required to complete at least 15 graded credits in Slavic department courses at the UW.

**Russian Language, Literature, and Culture Option (65 credits beyond second year):**

- RUSS 301, RUSS 302, RUSS 303, or the equivalent
- RUSS 401, RUSS 402, RUSS 403, or the equivalent
- RUSS 321, RUSS 322, RUSS 323
- SLAV 351, SLAV 352, SLAV 420, SLAV 421, RUSS 422, RUSS 423, RUSS 424, RUSS 425, RUSS 430, RUSS 451, RUSS 461, RUSS 490, SLAV 351, SLAV 420, SLAV 423, SLAV 425, SLAV 426, SLAV 490.

**Russian Language and History Option (60 credits beyond second year):**

- RUSS 301, RUSS 302, RUSS 303, or the equivalent
- RUSS 401, RUSS 402, RUSS 403, or the equivalent
- RUSS 321, RUSS 322, RUSS 323
- HSTM 443, HSTEU 444, HSTEU 445.

**East European Languages and Culture Option (55 credits):**

- Two years of a principal East European language, or the equivalent
- SLAV 351
- 20 credits of literature, culture, linguistics, and history, as appropriate.

**Minor**

**Minor Requirements:**

Transfer students are required to complete at least 15 graded credits in Slavic department courses at the UW.

**Russian Language:** 25 credits to include RUSS 301, RUSS 302, RUSS 303 and 10 credits from RUSS 351, RUSS 352, RUSS 401, RUSS 402, RUSS 403, RUSS 451, SLAV 351, SLAV 425.

**Russian Literature/Slavic Literatures:** 25 credits to include RUSS 321, RUSS 322, RUSS 323 and 10 credits from RUSS 420, RUSS 421, RUSS 422, RUSS 430, RUSS 461, RUSS 490 (Russian-literature option), or 10 credits from CR SB 420, CZECH 420, POLISH 420, SLAV 420, SLAV 423, SLAV 490 (Slavic-literatures option).

**Slavic Languages:** 25 credits to include language courses in a Slavic language (other than Russian) numbered 404, 405, 406; SLAV 351; and 5 credits from CR SB 420, CZECH 420, POLISH 420, SLAV 423, SLAV 490.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Graduating majors in Slavic languages and literatures have a solid command of a Slavic language with speaking, listening, reading and writing, and translation skills at the intermediate high or advanced level. They have a broad knowledge of the history of the relevant country, and of its modern culture. Students in the literature and culture option have a general knowledge of major periods and detailed knowledge of two or three particular authors or genres. Students in the linguistics option have a good understanding of Slavic languages in general and the language of their specialization in particular, as well as knowledge of major issues in contemporary phonology, morphology, and syntax. All students develop good general analytical skills and the ability to explore and understand another culture through mastery of its language.
- **Instructional and Research Facilities:** None.
- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- **Research, Internships, and Service Learning:** None.
- **Department Scholarships:** Vadim Pahn Scholarship for continued study of Russian in an intensive summer language program.
- **Student Organizations/Associations:** Rodnoi Ugolok, the Russian student society.

**Graduate Program**

Graduate Program Coordinator

slavic@u.washington.edu

The Department of Slavic Languages and Literatures offers a complete program of courses and seminars leading to the Master of Arts and Doctor of Philosophy degrees in Russian and East European languages, literatures, and cultures. Languages taught in the department include Czech, Old Church Slavonic, Polish, Russian, and Croatian/Serbian.

The graduate program is organized to permit completion of the master’s degree in four to six quarters and the doctoral degree in three additional years. The duration of each program, however, will depend on the extent of the student’s preparation upon entrance into the program.

**Research Facilities**

The Suzzallo Library holdings include some 400,000 titles in Slavic languages and in other languages on Slavic subjects. It subscribes to all important periodicals and newspapers in Russian and other languages and has exceptionally strong holdings in rare and antiquarian Slavic titles on microfilm and microfiche.
Admission Qualifications

For the Master of Arts Program: Bachelor of Arts degree with major in Russian or Eastern European languages and literatures, or equivalent background.

For the Doctor of Philosophy Program: Master of Arts degree with major in Slavic Languages, Literatures, and Cultures.

Assistantship Opportunities

The department regularly offers a number of teaching assistantships. In conjunction with the Henry M. Jackson School of International Studies, students in the department are eligible for several other types of fellowships.

Bulgarian

Course Descriptions

BULGR 401 Advanced Bulgarian (5) VLPA
Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: 2.0 in BULGR 403. Offered: A.

BULGR 405 Advanced Bulgarian (5) VLPA
Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 404. Offered: W.

BULGR 406 Advanced Bulgarian (5) VLPA
Continuation of 401, 402, 403. Selected readings in Bulgarian literature, history, and culture. Reinforces and extends basic knowledge of Bulgarian grammar and vocabulary. Prerequisite: BULGR 405. Offered: Sp.

Croatian-Serbian

Course Descriptions

CR SB 401 Elementary Croatian/Serbian (5)
Comprehensive introduction to spoken and written literary Croatian and Serbian. Offered: A.

CR SB 402 Elementary Croatian/Serbian (5)
Comprehensive introduction to spoken and written literary Croatian and Serbian. Prerequisite: CR SB 401, which may be taken concurrently. Offered: W.

CR SB 403 Elementary Croatian/Serbian (5)
Comprehensive introduction to spoken and written literary Croatian and Serbian. Prerequisite: CR SB 402, which may be taken concurrently. Offered: Sp.

CR SB 404 Advanced Croatian/Serbian (5) VLPA
Continuation of 401, 402, 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories both Croatian and Serbian. Prerequisite: 2.0 in CR SB 403. Offered: A.

CR SB 405 Advanced Croatian/Serbian (5) VLPA
Continuation of 401, 402, 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories both Croatian and Serbian. Prerequisite: 2.0 in CR SB 403. Offered: A.

CR SB 406 Advanced Croatian/Serbian (5) VLPA
Continuation of 401, 402, 403; reinforces basic grasp of language and enlarges both vocabulary and command of grammatical patterns through the reading of contemporary short stories both Croatian and Serbian. Prerequisite: 2.0 in CR SB 403. Offered: A.

CR SB 420 Literature, Film, and Culture of the Former Yugoslavia and the Yugoslav Successor States (5) VLPA
A travelogue through the intellectual and cultural landscape of the former Yugoslavia and the Yugoslav successor states, studying the select literary works, films, and other artifacts, with the exploration of both how these phenomena are a part of their intellectual and historical environment, and how they transcend and change it.

Czech

Course Descriptions

CZECH 401 Elementary Czech (5)
Introduction to spoken and written Czech. Offered: A.

CZECH 402 Elementary Czech (5)
Introduction to spoken and written Czech. Prerequisite: CZECH 401. Offered: W.
CZECH 403 Elementary Czech (5)
Modern Czech prose, leading to a command of the language as a research tool and providing an adequate basis for further study. Prerequisite: CZECH 402. Offered: Sp.

CZECH 404 Advanced Czech (5) VLPA
Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisite: 2.0 in CZECH 403. Offered: A.

CZECH 405 Advanced Czech (5) VLPA
Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisite: CZECH 404. Offered: W.

CZECH 406 Advanced Czech (5) VLPA
Continuation of 401, 402, 403. Selected readings from the main works of Czech authors of the nineteenth and twentieth centuries. Reinforces and extends basic knowledge of Czech grammar and vocabulary. Prerequisite: CZECH 405. Offered: Sp.

Polish

Course Descriptions

POLISH 401 Elementary Polish (5)
Principal morphological and syntactic features of the Polish language through the medium of a basic vocabulary. Offered: A.

POLISH 402 Elementary Polish (5)
Principal morphological and syntactic features of the Polish language through the medium of a basic vocabulary. Prerequisite: POLISH 401. Offered: W.

POLISH 403 Elementary Polish (5)
Designed to enlarge general vocabulary by the reading of short texts selected from Polish authors of the nineteenth and twentieth centuries. Prerequisite: POLISH 402. Offered: Sp.

POLISH 404 Advanced Polish (5) VLPA
Continuation of 401, 402, 403. Selected readings from the main works from nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: 2.0 in POLISH 403. Offered: A.

POLISH 405 Advanced Polish (5) VLPA
Continuation of 401, 402, 403. Selected readings from the main works from nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: POLISH 404. Offered: W.

POLISH 406 Advanced Polish (5) VLPA
Continuation of 401, 402, 403. Selected readings from the main works from nineteenth and twentieth centuries. Reinforces basic knowledge of vocabulary, grammatical patterns, and conversation. Prerequisite: POLISH 405. Offered: Sp.

Romanian

Course Descriptions

ROMN 401 Elementary Romanian (5)
Comprehensive introduction to spoken and literary Romanian. Offered: jointly with RMN 401; A.

ROMN 402 Elementary Romanian (5)
Comprehensive introduction to spoken and literary Romanian. Prerequisite: ROMN/RMN 401. Offered: jointly with RMN 402; W.

ROMN 403 Elementary Romanian (5)
Designed to increase vocabulary and enhance knowledge of grammar through readings in modern Romanian. Prerequisite: ROMN/RMN 402. Offered: jointly with RMN 403; Sp.

ROMN 404 Advanced Romanian (5) VLPA
Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: 2.0 in ROMN/RMN 403. Offered: jointly with RMN 404; A.

ROMN 405 Advanced Romanian (5) VLPA
Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: ROMN/RMN 404. Offered: jointly with RMN 405; W.

ROMN 406 Advanced Romanian (5) VLPA
Continuation of 401, 402, 403. Introduction to Romanian literature, history, and culture through selected readings. Reinforces and extends basic knowledge of grammar and vocabulary. Prerequisite: ROMN/RMN 405. Offered: jointly with RMN 406; Sp.

Russian

Course Descriptions

RUSS 101 First-Year Russian (5)
Introduction to Russian. Emphasis on oral communication with limited vocabulary. Short readings and writing exercises. Basic grammar. Conducted mostly in Russian. See credit note above. Offered: A.

RUSS 102 First-Year Russian (5)
Introduction to Russian. Emphasis on oral communication with limited vocabulary. Short readings and writing exercises. Basic grammar. Conducted mostly in Russian. See credit note above. Prerequisite: RUSS 101. Offered: W.

RUSS 103 First-Year Russian (5)

RUSS 110 Introduction to Russian Culture and Civilization (5) I&S/VLPA
Introduction to Russian culture and history from pre-Christian times to the present, as seen through literary texts, music, film, visual art, and historical works. All lectures and written materials in English. No prior knowledge of Russian necessary.

RUSS 120 Topics in Russian Literary and Cultural History (5) VLPA
Introduction to important issues in Russian literary and cultural history. Topics and instructors vary. Offered in English.

RUSS 150 Intensive First-Year Russian (15)
Covers material of 101, 102, 103 in one quarter. Meets three to four hours daily. For continuation, see 250 or 201, 202, 203. See credit note above. Offered: S.

RUSS 201 Second-Year Russian (5) VLPA
Comprehensive review of Russian grammar with continuing oral practice and elementary composition. Conducted mostly in Russian. See credit note above. Prerequisite: either 2.0 in RUSS 103 or 2.0 in RUSS 150. Offered: A.

RUSS 202 Second-Year Russian (5) VLPA
Comprehensive review of Russian grammar with continuing oral practice and elementary composition. Conducted mostly in Russian. See credit note above. Prerequisite: RUSS 201. Offered: W.
RUSS 203 Second-Year Russian (5) VLPA

RUSS 230 Masterpieces of Russian Literature (5) VLPA
Examines the greatest authors and masterpieces of Russian literature, including Tolstoy, Dostoevsky, and Chekhov. All readings, discussions, and assignments are in English.

RUSS 250 Intensive Second-Year Russian (15) VLPA
Covers material of 201, 202, 203 in one quarter. Meets three to four hours daily. See credit note above. Prerequisite: either 2.0 in RUSS 103 or 2.0 in RUSS 150. Offered: S.

RUSS 301 Intermediate Russian (5) VLPA
Extensive practice in spoken and written Russian based on a variety of prose readings. Intensive review and supplementation of strategic grammatical concepts. See credit note above. Prerequisite: either 2.0 in RUSS 203 or 2.0 in RUSS 250. Offered: A.

RUSS 302 Intermediate Russian (5) VLPA
Extensive practice in spoken and written Russian based on a variety of prose readings. Intensive review and supplementation of strategic grammatical concepts. See credit note above. Prerequisite: RUSS 301. Offered: W.

RUSS 303 Intermediate Russian (5) VLPA
Extensive practice in spoken and written Russian based on a variety of prose readings. Intensive review and supplementation of strategic grammatical concepts. See credit note above. Prerequisite: RUSS 302. Offered: Sp.

RUSS 304 Reading and Translation (1, max. 3) VLPA
Translation techniques with emphasis on development of vocabulary and reading skills. Primarily for Russian regional studies majors. Credit/no credit only. Prerequisite: either RUSS 203 or RUSS 250. Offered: AWSp.

RUSS 313 Business Russian (5) VLPA
Emphasizes the language and practice of business in Russia today. Prerequisite: either RUSS 203 or RUSS 250.

RUSS 321 Russian Literature and Culture 1700 - 1840 (5) I&S/VLPA
Introduction to literary works, art, and architecture in relation to the development of Russian thought, both secular and religious. Attention given to the influences of Western Europe and what is distinctly Russian, and to the formation of national self-awareness. Offered: A.

Analysis of history and development of Russian drama from the 18th century to present times. Playwrights featured include Alexander Griboedov, Alexander Ostrovsky, Anton Chekhov, Vladimir Mayakovskiy, and others. Taught in English.

RUSS 430 Major Authors (5, max. 15) VLPA
Major Russian writers of the nineteenth and twentieth centuries. Among authors read are Pushkin, Gogol, Lermontov, Turgenev, Tolstoy, Dostoevsky, Chekhov, Babel, Ifl and Petrov, Olesha. Content varies.

RUSS 450 Intensive Fourth-Year Russian (15) VLPA
Covers material of 401, 402, 403 in one quarter. Meets three hours daily. See credit note above. Prerequisite: either 2.0 in RUSS 303 or 2.0 in RUSS 350. Offered: S.

RUSS 451 Structure of Russian (5) VLPA
Descriptive analysis of contemporary standard Russian. Detailed phonetic transcription, discussion of major Great Russian dialects as well as variations in popular speech, examination of common roots and productive derivational elements in Russian words, and elementary principles of syntax. Prerequisite: either RUSS 303 or RUSS 350. Offered: A.

RUSS 452 Structure of Russian (5) VLPA
Descriptive analysis of contemporary standard Russian. Detailed phonetic transcription, discussion of major Great Russian dialects as well as variations in popular speech, examination of common roots and productive derivational elements in Russian words, and elementary principles of syntax. Prerequisite: RUSS 451. Offered: W.

RUSS 461 Introduction to Russian Literature in Russian (5) VLPA
Analysis of original Russian literary texts representative of different varieties of Russian writing. Vocabulary of Russian literary analysis; typically Russian approaches to literature, some readings of secondary critical texts; discussion in Russian of passages studied. Prerequisite: RUSS 403 or RUSS 450.

RUSS 481 Russian Language in Russia (5, max. 15) VLPA
Daily work in phonetics, grammar, conversation, translation, analytical reading, stylistics, newspaper analysis, and advanced syntax. Prerequisite: either RUSS 203 or RUSS 250. Offered: AWSpS.

RUSS 482 Research Project in Russia (3, max. 15) VLPA
Supervised research in student’s selected area of concentration, combined with language instruction tailored to the student’s field. Successful completion of course requires a 15-page term paper in Russian. Prerequisite: either RUSS 203 or RUSS 550. Offered: AWSpS.

RUSS 483 Russian Literature in Russia (3, max. 15) VLPA
Selection of courses on specialized topics in Russian literature; specific authors or periods. Prerequisite: either RUSS 203 or RUSS 250. Offered: AWSpS.

RUSS 486 Culture in Russia (3, max. 15) I&S/VLPA
Lectures on education, history, economics, law, the arts, ethnography, architecture; complemented by visits to places of cultural and historical interest and meetings with Russian groups. 4 credits for summer program, 6 for semester program. Prerequisite: either RUSS 203 or RUSS 250. Offered: AWSpS.

RUSS 490 Studies in Russian Literature (3-5, max. 15) VLPA
In either Russian or English. Topics vary.

RUSS 499 Directed Study or Research (1-5, max. 15)
Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literatures office. Offered: AWSpS.

RUSS 501 Russian Language for Graduate Students (2, max. 10)
Develops skills of particular use to graduate students. Emphasis on rapid assimilation of variety of written materials with sophisticated understanding and maximum retention of vocabulary, and ability to discuss in Russian the more theoretical and abstract kinds of material. Prerequisite: RUSS 403 or equivalent and graduate standing in Russian, East European, and Central Asian Studies.

RUSS 502 Russian Translation (3)
Introduction to the theory of translation; translation to and from Russian of selected prose passages in a variety of styles, with emphasis on idiomatic accuracy and stylistic compatibility. Prerequisite: two quarters of RUSS 501 or permission of instructor.

RUSS 512 Russian Literary Criticism (3)
A study of critical positions, problems, and literary values of major Russian literary critics from Belinsky to the present.

RUSS 520 Topics in Russian Literature and Culture (5, max. 20)
Detailed study of a single author or a movement, theme, or short period in Russian literature or culture.

RUSS 521 Russian Literature to 1800 (5)
Representative works of East Slavic, Muscovite, and Russian literature from the beginnings to 1800. Studies include a varied selection of primary texts. Intended as an introduction to the study of modern literature for beginning graduate students in Russian literature. Offered: alternate years.

RUSS 522 Russian Literature of the Nineteenth Century (5)
Survey of nineteenth-century Russian poetry and prose. Representative works of Russia’s major and minor authors, literary trends, and genres. Offered: alternate years.

RUSS 523 Russian Literature of the Twentieth Century (5)
Survey of twentieth-century Russian poetry and prose. Pre-revolutionary, Soviet, and Emigré authors, trends, and genres. Includes survey of twentieth-century Literary Criticism as well, in particular Russian Formalists and Mikhail Bakhtin. Offered: alternate years.

RUSS 526 Modern Russian Literary, Cultural, and Film Studies (5, max. 15)
Modern literature and film. Topics include post-colonialism, gender, reflections of social upheavals, artistic experimentation, issues of commercialism in art, search for new cultural expressions and identity. Readings in both Russian and English. Offered: Sp.

RUSS 542 Seminar in Russian Poetry (5, max. 20)
One specific problem or theme in Russian poetry, seen in its widest possible dimensions. Students read, in Russian, the literary works involved and become familiar with the social, historical, and philosophical backgrounds that inspire them.

RUSS 543 Seminar in Contemporary Russian Prose (5, max. 20)
Analysis of Russian prose fiction. Selected authors and topics.

RUSS 554 History of the Russian Literary Language (5)
Russian literary language from the eleventh through the twentieth centuries, with special attention to syntax and lexicon and to the development of notions of literary styles. Offered in Russian. Prerequisite: RUSS 555 or SLAV 565, or permission of instructor. Offered: alternate years.

RUSS 570 Research Seminar in Russian Literature (5)
Diment, Haney, Kramer, West
Working in consultation with a faculty adviser, students formulate a topic and prepare a 30-minute oral presentation to be delivered at the seminar and submit a written paper to be read and critiqued by all participants.

RUSS 577 Russian Folk Literature (5)
Analysis of representative works of the various genres of folk
literature, including the byliny, skazki, historical and lyrical songs, and the spiritual stikhii.

RUSS 600 Independent Study or Research (*)

Slavic

Course Descriptions

SLAV 223 Russian and East European Cinema (5) VLPA
Introduction to Russian and Eastern European film from the origins to present day. Highlights achievements of Russian and Eastern European filmmakers, both in their countries of origin and abroad.

SLAV 351 History of the Slavic Languages (5) VLPA
External and internal history of Slavic literary languages from the beginnings to the present time, including the development of writing systems, external attempts at reform, and the development of vocabulary.

SLAV 420 The Other Europe: Contemporary East European Fiction (5, max. 15) VLPA Crnkovic
Contemporary fiction by Czech, East German, Hungarian, Polish, Baltic, and Balkan writers. Topics include: history of colonization, the imagination of social utopia, socialism and nationalism, everyday life under communism, cultural identity between East and West, experimental writing, new fiction in post-communist Eastern Europe. All readings in English.

SLAV 423 East European Film (5) VLPA Crnkovic
Survey of major East European film makers. Compares East European and Western production of those directors who worked partially in the West, e.g., Polanski, Forman, Holland, Makavejev. Topics include film in socialist versus market economy, politics, gender, sexuality.

SLAV 425 Ways of Meaning: Universal and Culture Specific Aspects of Language (5) I&S/ VLPA Dziwirek
Social and cultural conditioning of language use. Language as a mirror of culture and national character. Universal and culture/language specific components in linguistic expression of emotions, courtesy/politeness and rudeness, prejudice and (in)sensitivities, linguistic expression of gender differences in different cultures. Offered: Sp.

SLAV 426 Ways of Feeling: Expressions of Emotions Across Languages and Cultures (5) I&S/ VLPA Dziwirek
Universal and culture specific aspects of linguistic expression of emotion. Are there feelings that all people share independent of language, culture, gender, and race? Examination of the meaning and form of emotion words in different languages, facial expressions, cultural attitudes to emotion and emotional behavior, and gender-specific emotional expressions.

SLAV 470 Special Topics in Slavic Linguistics (3-5, max. 15) VLPA Augerot, Coats, Dziwirek
Special topics in Slavic linguistics. Course offerings based on instructor's specialty and student demand. Offered: AWSp.

SLAV 481 East European Language in Eastern Europe (5, max. 15) VLPA
Daily work in phonetic, grammar, conversation, translation, analytical reading, stylistics, newspaper analysis, and advanced syntax. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSp.

SLAV 482 Research Project in Eastern Europe (3, max. 15) VLPA
Supervised research in student's selected area of concentration, combined with language instruction tailored to the student's field. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSp.

SLAV 483 East European Literature in Eastern Europe (3, max. 15) VLPA
Selection of courses on specialized topics in East European literature; specific authors or periods. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSp.

SLAV 486 East European Culture in Eastern Europe (3, max. 15) VLPA
Lectures on various aspects of Eastern European culture, complemented by visits to places of cultural historical interest. Provides an opportunity to earn credits while studying in Eastern Europe. Offered: AWSp.

SLAV 490 Studies in Slavic Literatures (3-5, max. 15) VLPA
Topics vary.

SLAV 499 Directed Study or Research (1-5, max. 15)
Individual study of topics to meet specific needs. By arrangement with the instructor and the Department of Slavic Languages and Literatures office. Prerequisite: permission of instructor and undergraduate adviser. Offered: AWSp.

SLAV 501 Using Slavic Resources (2)
Introduction to graduate studies in Slavic languages, literatures, and cultures. Discusses field of study and research materials and techniques employed.

SLAV 518 Foreign Language Teaching Methodology (2) Brandl

SLAV 519 Slavic Language Pedagogy (3, max. 6) Boyle
Introduction to current issues of foreign language pedagogy. Concentrates on the practical classroom application of methodological theory through lectures and micro-teaching presentation. Topics discussed and practiced include testing, proficiency teaching, teaching listening and reading skills, writing, teaching grammar, and computers. Offered: A.

SLAV 520 New Trends in Literary Theory (3) Crnkovic
Explores recent theoretical trends which no longer search for a unified theoretical meta-narrative (i.e., post-structuralism or new historicism), but instead explore various literary genres (such as diary or fictional book reviews) and texts as the primary terrain of theory. Bakhtin, Lem, Bruns, Corradi-Fiumara, Cmkovic, and others.

SLAV 550 Synchronic Slavic Linguistics (5)
Linguistic analysis of the phonology, morphology, and syntax of Russian and other Slavic languages. Investigation of current theoretical work in these areas.

SLAV 551 The Introduction to the Study of Slavic Languages (5)
External and internal history of Slavic literary languages from the beginnings to the present time, including the development of writing systems, external attempts at reform, and the development of vocabulary.

SLAV 560 Diachronic Slavic Linguistics (5)
Development of the phonological and morphological system of Common Slavic from Indo-European. Evolution of Russian and other modern Slavic languages from Common Slavic. Offered: A.
SLAV 562 History of the West Slavic Languages (5)
Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of literary Polish, Czech, Slovak, and Upper and Lower Sorbian languages. Prerequisite: SLAV 560. Offered: alternate years.

SLAV 563 History of the South Slavic Languages (5)
Designed to acquaint majors in Slavic linguistics with the details of the historical development of the phonological and morphological structure of the South Slavic languages. Prerequisite: SLAV 560.

SLAV 565 Old Church Slavic (4)
Rise and development of earliest Slavic literary language and a descriptive study of its orthography, phonology, morphology, and syntax. Readings from normalized texts. Offered: alternate years.

SLAV 566 Readings in Old Church Slavic (4)
Reading and grammatical interpretation of a selected group of canonical texts, as well as some examples of the various later recensions of Old Church Slavonic. Prerequisite: SLAV 565. Offered: alternate years.

SLAV 570 Special Topics in Slavic Linguistics (3-5, max. 15)
Investigation and discussion of special topics in Slavic linguistics.

Slavic Languages and Literatures

Course Descriptions
SLAVIC 175 The Slavic Text and Its Context (2) VLPA
A contextual study of a significant work or intellectual movement from a Slavic culture study includes literature, film, music, or art. Credit/no credit only.

SLAVIC 498 Senior Honors Thesis ([3-9, max. 9]-) VLPA
Directed research on a topic approved by department for a thesis presented in partial fulfillment of requirement for degrees “with honors” or “with distinction.” Offered: AWSpS.

SLAVIC 600 Independent Study or Research (*)

SLAVIC 800 Doctoral Dissertation (*)

Ukrainian

Course Descriptions
UKR 401 Elementary Ukrainian (5)
Introduction to spoken and written Ukrainian.

UKR 402 Elementary Ukrainian (5)
Introduction to spoken and written Ukrainian. Prerequisite: UKR 401, which may be taken concurrently.

UKR 403 Elementary Ukrainian (5)
Introduction to spoken and written Ukrainian. Prerequisite: UKR 402, which may be taken concurrently.

Interdisciplinary Social Sciences

Course Descriptions
SOCSCI 200 The Family: Social Science Perspectives (5) I&S
Explores how the study of families lies at the heart of classic questions in social science. Examines how people become social beings, how resources are distributed; who gets what and why, and what accounts for order and continuity in a society across generations.

SOCSCI 201 Human Rights: Social Science Perspectives (5) I&S
Examines the concept of human rights comparatively and in local and global perspective. Explores culture, sovereignty, and geographic specificity as frameworks for understanding contemporary tensions in human rights.

Examines the relationship between science and society. Explores scientific developments over the past 50-years with a particular emphasis on genetic research and its consequences and asks a fundamental question about what it means to be human.

Sociology

202 Savery

The Department of Sociology has a strong commitment to research, publication, and training and is dedicated to providing a rich undergraduate program, both for students majoring in sociology and for others who wish to learn about human society and social relations.

Undergraduate Program

Adviser
117 Savery, Box 353340
206-543-5396
asksoc@u.washington.edu

The Department of Sociology offers the following program of study
• The Bachelor of Arts degree with a major in sociology

Bachelor of Arts

Suggested First- and Second-Year College Courses: SOC 110, SOC 212, SOC 240, SOC 270, SOC 271, or any 200-level sociology courses. General coursework developing critical thinking or analytical skills.

Department Admission Requirements

Any two of the following: SOC 110 or SOC 111, SOC 212, SOC 240, SOC 270, SOC 271.
Minimum cumulative GPA of 2.50 for all courses applied to major requirements at the time of application. Special circumstances will be reviewed on a case-by-case basis.
Minimum grade of 2.0 in each course applied to major requirements.
Minimum cumulative GPA of 2.00 for all prior college work.

Application deadlines are the second Friday of each quarter. All applicants who meet the qualifications stated above will be admitted in time to register as Sociology majors for the following quarter.

Major Requirements

50 credits as follows:
Introductory courses (10 credits): Two courses from SOC 110 or SOC 111, SOC 212, SOC 240, SOC 270, and SOC 271.
Sociological methods and theory (10 credits): SOC 220 (5) and SOC 316 (5).
Upper division sociology electives (20 credits): Chosen from any 300-level or 400-level sociology courses, excluding SOC 316, SOC 395, and independent study courses (SOC 399, SOC 499).
Sociology electives (10 credits): Chosen from any other sociology courses. A maximum of five credits of independent study (SOC 399, SOC 499) can be counted.

409
Minimum grade of 2.0 in any course applied to major requirements. Minimum cumulative GPA of 2.50 for courses applied to major requirements. 25 of 50 required sociology credits completed in residence at UW.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The Department of Sociology’s undergraduate degree is oriented toward a traditional liberal arts education, with the aim of educating majors to think in a systematic way about the relationships among individuals, groups, organizations, and societies. Sociology majors engage in current research in areas including political sociology, social stratification, race and ethnicity, deviance and social control, and demography. Sociology majors also develop quantitative and analytical skills in research methods and social theory courses.

- **Instructional and Research Facilities:** The department is a member of the Center for Social Science Computing and Research (CSSCR). CSSCR maintains an extensive data archive, and offers consulting support and computer lab access to students in Sociology courses. Sociology is also affiliated with the Center for Studies in Demography and Ecology (CSDE) and the Center for Statistics and the Social Sciences (CSSS), providing interdisciplinary courses, seminars, and research opportunities for Sociology students.

- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- **Research, Internships, and Service Learning:** Sociology majors participate in a variety of internships each quarter. Students can receive academic credit under the supervision of a Sociology faculty member. See adviser for details.

- **Department Scholarships:** None offered.

- **Student Organizations/Associations:** A chapter of the Alpha Kappa Delta International Sociology Honor Society organizes events involving undergraduates with faculty and graduate students.

**Graduate Program**

Graduate Program Coordinator
117 Savery, Box 353340
206-543-5396
asksoc@u.washington.edu

Sociology seeks to explain social structure, social institutions, and social interaction. There are three emphases in the graduate training program at the University of Washington: understanding and critically evaluating social theory and empirical research; doing theoretically guided research that explores, assesses, and further develops explanatory theories; and developing communication skills (with emphasis on teaching and scholarly writing) that will be useful in transmitting sociological knowledge. The department has graduate program specialization in demography and ecology, deviance and social control, race and ethnic relations, family systems, gender studies, institutional analysis, quantitative research methodology, social psychology, sociological theory, and stratification.

Emphasis is on empirical research aimed at developing explanatory theories. Students are trained in problem formulation, research design, data gathering and analysis, and bringing data to bear on significant questions. Instruction is offered in various methods: statistical, survey, demographic and ecological, field research, and historical. Students learn social research by participating in faculty projects or developing their own studies. Also available is a program training students to teach.

The graduate program aims at completion of the Master of Arts degree in two calendar years and the Doctor of Philosophy degree in three years beyond the M.A. degree, although not all students finish in this time. A thesis is required for the M.A. degree. For the Ph.D. degree, the student must be certified in general methodology and in a major and a minor substantive area, in addition to completing an approved dissertation.

**Special Requirements**

Applicants for admission to the Master of Arts program are evaluated on undergraduate performance, Graduate Record Examination scores, statement of educational plans, recommendations, and samples of written work. For admission to the Ph.D. program, students are expected to have completed an M.A. degree in sociology in this department or elsewhere. Occasionally, M.A. degrees in other fields are accepted as a basis for admission to the Ph.D. program. The department encourages applications from minority students.

**Financial Aid**

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of training.

**Faculty**

Julie Brines Associate Professor
Gender Stratification, Family and Household Dynamics, Labor Markets and Employment
1990 Harvard University

Paul Burstein Professor
political sociology, social movements, social stratification, law and policy, American Jewish community
1974 Harvard University

Daniel Chirot Professor
Joint Appointment with Jackson School of International Studies
1973 Columbia University

Sam Clark Assistant Professor
Demography, Quantitative Methodology, Microcomputing
2001 University of Pennsylvania

Robert Crutchfield Professor
Deviance, Criminology, Stratification, Race and Ethnic Relations
1980 Vanderbilt University

Gary Hamilton Professor
Joint Appointment with Jackson School of International Studies
Economic Sociology, Sociology of Organizations, Historical and Comparative Sociology, Chinese Societies, East Asian Societies and Economies
1975 University of Washington

Mark S. Handcock Professor
Joint Appointment with Statistics
Statistics, Inequality, Quantitative Methods
1989 University of Chicago

Lowell Hargens Professor
Sociology of Science, Quantitative Methods, Occupations/Professions, Demography
1971 University of Wisconsin

Alexes Harris Assistant Professor
Race and ethnicity, juvenile justice system, social stratification and inequality, qualitative research methods
2002 University of California, Los Angeles

Michael Hechter Professor
Course Descriptions

SOC 100 Survey of Sociology (5) I&S
Human interaction, social institutions, social stratification, socialization, deviance, social control, and social and cultural change. Course content may vary, depending upon instructor. Offered: AWSp.

SOC 111 American Society (5) I&S
Explores the power of social structures using examples drawn primarily from the American culture. The impact of social institutions, the emergence of concrete patterns of social relations which organize and regulate social life and the inequality inherent in most social structures.

SOC 177 The Jewish Community in the United States: Success, Influence, and Prospects (5) I&S Bernstein
Examines relationship between American society and its ethnic/religious groups through study of the American Jewish community. Focuses on economic success; challenges to religious traditions; relationships between American and Jewish cultures; and impact of Jewish ideas and organizations on American politics. Offered: jointly with SISJE 177; S.

SOC 195 Study Abroad: Sociology (2-5, max. 10) I&S
Lower-division sociology courses for which there are no direct University of Washington equivalents, taken through a University of Washington study abroad program.

SOC 212 Evolution and Revolution: An Introduction to the Study of Comparative Social Change (5) I&S Chirot, Hirschman
Examines the major aspects of human societies, including political and economic systems, family structure, social stratification, and demographic patterns as influenced by environmental conditions, technology, cultural traditions, and legacies of prior history and relationships to other societies. Not open for credit to students who have taken SOC 112.

SOC 220 Introduction to Sociological Methods (5) I&S, QSR
Familiarizes students with the logic of analysis in social sciences. Students learn to recognize good research design, understand and interpret main arguments employing different methods, and evaluate whether research findings support stated conclusions.

SOC 222 Sociology of Sport (5) I&S Weis
Introduction to the sociological analysis of sport. Issues discussed include the history, definition, and functions of sport; role of sport in the socialization of children; the relationship between sport and values; athletics within the social organization of education; deviance, crime, and violence in sport; the business and economics of sport.

SOC 240 Introduction to Social Psychology: Perspectives on Individual Behavior (5) I&S
Major theoretical perspectives on individual behavior in social settings. Social cognition, behaviorism, symbolic interaction, and attitudes. Ways people develop as social beings. Traditional lecture format is not used in this course. Student learning is based on individualized programs of reading and frequent tests of student comprehension. Offered: AWSp.

SOC 241 Introduction to Social Psychology: Perspectives on Social Interaction (5) I&S
Major perspectives on social interaction. Social exchange, cooperation and competition, group dynamics, social influence, leadership, altruism and aggression. Situational and personal variables that determine social interaction. Traditional lecture format is not used in this course. Student learning is based on individualized programs of reading and frequent tests of student comprehension. Offered: AWSp.

SOC 246 Sects and Violence: Cults, Religious Innovation, and Social Conflict (5) I&S
Examines controversial religious groups often called cults. Use sociological lenses to examine cults’ occasionally catastrophic conflicts with government authorities, established religious organizations, and anti-cult movements.

SOC 247 Contemporary Social Movements (5) I&S Minkoff
Introduction to theory and research on national-level collective mobilizations organized for political change. Emphasis on how political, organizational, and cultural factors shape social movement emergence and development, and individual participation.

SOC 260 African American Family (5) I&S Scott
Explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with AFRAM 260.

SOC 261 The African-American Experience Through Literature (5) I&S/VLPA Scott
Instructs students in hermeneutical and sociological methods of analyses. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with AFRAM 261.

SOC 265 Globalization and the Transformation Economy and Society in Asia (5) I&S Hamilton
Examines the rapid and extensive social and economic development throughout Asia since the mid-20th century; the corresponding retail revolution in the American economy; the evolution of characteristic Asian product categories; and the impact of these developments on the social and economic organization of Asian economies. Offered: jointly with SISA 265.

SOC 266 Introduction to Labor Studies (5) I&S
Conceptual and theoretical issues in the study of labor and work. Role of labor in national and international politics. Formation of labor movements. Historical and contemporary role of labor in the modern world. Offered: jointly with HIST 249/POL S 249.

SOC 270 Social Problems (5) I&S Black
Processes of social and personal disorganization and reorganization in relation to poverty, crime, suicide, family disorganization, mental disorders, and similar social problems.

SOC 271 Introduction to the Sociology of Deviance and Social Control (5) I&S Crutchfield
Examination of deviance, deviant behavior, and social control. Deviance as a social process; types of deviant behavior (e.g., suicide, mental illness, drug use, crime, “sexual deviance,” delinquency); theories of deviance and deviant behavior; nature and social organization of societal reactions; and social and legal policy issues.
Offered: AWSpS.

SOC 275 Murder (5) I&S Weis
Introduces topics related to the crime of murder, including: laws of homicide; research on the characteristics of victims, killers, and murders; theories of murder and related violence; investigation strategies; and crime and control policies.

SOC 287 Introduction of the Sociology of Sexuality (5) I&S
Investigates sexuality on the basis of social construction of norms and values, within the context of gender, race, class, and sub-cultures and in the social control of sexuality and why it is so highly regulated. Looks for social, rather than biological or personal explanations for why human sexuality is conceptualize or practiced in a certain way.

SOC 292 Who Gets Ahead? Public Schooling in America (5) I&S LePore
Addresses fundamental questions about the relationship between education and society. Examines why some students learn more and advance further than others; what factors shape how schools are run/organized and which materials are taught; how race/class/gender affect students within schools; how schools maintain our economic system and can become more effective.

SOC 299 Sociology Interest Group (2) I&S
Provides opportunity for students new to the major, or contemplating the major, to meet twice weekly in a small group to discuss issues relating to two designated five-credit sociology courses. Concurrent enrollment in the two five-credit designated courses required. See department adviser. Offered: ASp.

SOC 301 War (5) I&S
Origins and conduct of war, readings from anthropology, political science, economics, and history, as well as two novels and some recent articles on the arms-control controversy. Modern forms of warfare, including guerrilla war, world war, and nuclear war. Offered: jointly with SIS 301.

SOC 316 Introduction to Sociological Theory (5) I&S
Introduction to sociological theory. Includes classical theorists Adam Smith, Karl Marx, Emile Durkheim, and Max Weber and their influence on contemporary theoretical debate.

SOC 320 Evaluating Social Science Evidence (5) I&S, QSR Morris
A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates “facts and findings” by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with CS&SS 320/STAT 320; A.

SOC 321 Case-Based Social Statistics I (5) I&S, QSR Handcock
Introduction to statistical reasoning for social scientists. Built around cases representing in-depth investigations into the nature and content of statistical and social-science principles and practice. Hands-on approach: weekly data analysis laboratory. Offered: jointly with CS&SS/STAT 321; W.

SOC 322 Case-Based Social Statistics II (5) I&S, QSR Handcock
Continuation of CS&SS/SOC/STAT 321. Progresses to questions of assessing the weight of evidence and more sophisticated models including regression-based methods. Built around cases investigating the nature and content of statistical principles and practice. Hands-on approach: weekly data analysis laboratory. Offered: jointly with CS&SS/STAT 322; Sp.

SOC 328 Methodology of Sociological Research (5-) I&S, QSR
Logic of formulating, testing, and modifying hypotheses. Methods of producing social data (survey research, evaluation research, field observation) and utilizing stored data (census tapes, historical materials). Methods of quantitative data analysis techniques commonly used in contemporary sociological analysis. Not open for credit to students who have taken 320 or 323. Offered: AWS.

SOC 329 Methodology of Sociological Research (5-) I&S, QSR
Logic of formulating, testing, and modifying hypotheses. Methods of producing social data (survey research, evaluation research, field observation) and utilizing stored data (census tapes, historical materials). Methods of quantitative data analysis techniques commonly used in contemporary sociological analysis. Not open for credit to students who have taken 320 or 323. Offered: WSpS.

SOC 330 Human Ecology (5) I&S
Factors and forces that determine the distribution of people and institutions.

SOC 331 Population and Society (5) I&S Guest, Lavely
Population growth and distribution, population composition, population theory, urbanization. Determinants and consequences of fertility and mortality trends and migration in economically developed and underdeveloped areas.

SOC 340 Symbolic Interaction (5) I&S
Role of language and culture in changing the human organism into a socialized human being; interpersonal processes and how they are shaped by the symbolic environment.

SOC 344 Cognitive Social Psychology (5) I&S Howard
Cognitive structures and processes and their antecedents and consequences, both societal and individual. Reciprocal influences of social roles, social institutions, and social cognition.

SOC 346 Group Processes (5) I&S
Systematic analysis of social processes in small groups, including conformity, deviance, cooperation, competition, coalition formation, status and role differentiation, inequity, communication, and authority and power. A variety of methods of research are considered: field studies, field experiments, laboratory studies, and the simulation of social processes.

SOC 347 National Social Movements: Current Trends and Explanations (5) I&S Minkoff
Introduction to theory and research on a specific form of social movement: national-level collective mobilizations organized for political change. Emphasizes how political, organizational, and cultural factors shape social movement emergence and development. Focuses on American activism, New Left, women’s movements, the abortion conflict, gay/lesbian activism, and Central American Peac movement.

SOC 352 The Family (5) I&S Pettit, Schwartz
The family as a social institution. Historical changes and societal variation in family patterns. Changes over the life cycle. Alternative family forms.

SOC 353 The Family in Cross-Cultural Perspective (5) I&S Scott
Form, content, and functions of families through case studies of different countries. Family organization, including family structure, inheritance, sexual division of labor, and socialization with attention given to life-cycle stages.

SOC 355 Social Change in Latin America (5) I&S
Explores cultures, identities, political economy, and popular mobilization in Latin America. Examines relations of power and
production between social classes and ethnic groups, as well as ideologies and intellectual movements. Offered: jointly with SISLA 355.

**SOC 356 Society and Politics (5) I&S Burstein, Kiser**
Causes of political change in democratic countries, including public opinion, social movements, interest group activity, and party organization. Offered: jointly with POL S 356.

**SOC 360 Introduction to Social Stratification (5) I&S**
Social class and social inequality in American society. Status, power, authority, and unequal opportunity are examined in depth, using material from other societies to provide a comparative and historical perspective. Sociological origins of recurrent conflicts involving race, sex, poverty, and political ideology.

**SOC 361 Age and Sex Differentiation (3) I&S**
Physiological and social bases of age and sex differentiation in human societies. The implications of age and sex distinctions for kinship, economic, and political structures. The relationship between age, sex, and other bases of social inequality.

**SOC 362 Race Relations (5) I&S Black, Pitchford**
Interracial contacts and conflicts.

**SOC 363 Ethnicity, Business, Unions, and Society (5) I&S Scott**

**SOC 364 Women in the Social Structure (5) I&S**
Gender and social institutions: the family, politics, education, medicine, law, the labor force. Intersection of gender with other minority statuses such as race, age, socioeconomic status, and sexual orientation. Structural, ideological, and historical determinants of gender relations.

**SOC 365 Urban Community (5) I&S Guest**
Comparative and analytic study of organization and activities of urban groups.

**SOC 366 Bureaucracy in Society (5) I&S Hamilton**
The coming of organizational societies; historical causes of bureaucracy; informal relations and work groups; ideologies; authority and the division of labor; social change in bureaucracies; comparative organizations.

**SOC 367 Immigration and Ethnicity (5) I&S Hirschman**
Focuses on contemporary American diversity — the multiethnic multicultural society created by recent immigrants from Latin America, Asia, and by peoples of European, African, and American Indian origins, its issues and debates, including ethnic conflict, integration, multiculturalism, and assimilation, as viewed through comparisons with the past and with other societies.

**SOC 368 Sociology of Black Americans (5) I&S Black**
Socio-cultural context of the Black person’s environment and consequences of interaction with that environment. Not open for credit to students who have taken SOC 105.

**SOC 371 Criminology (5) I&S Crutchfield, Matsueda**
Survey of legal definitions, types of criminal behavior, trends and patterns, recidivism, characteristics of offenders, environmental influences, diagnostic methods, prediction, theories of crime and delinquency prevention, social policy.

**SOC 372 Introduction to Criminal Justice (5) I&S**
Examines role of police, courts, and corrections in criminal justice. Applies sociological theories and perspectives to issues in law enforcement, adjudication, and corrections. Legislative reforms. Innovations in policy.

**SOC 374 Law and Society (5) I&S Stovel**
Introduces major issues of the sociological foundations and implications of legal institutions; examines social life within legal institutions, the individual and collective justice, the malleability of precedent, and truth and the effects of inequality on legal outcomes. Encompasses legal practice and social science.

**SOC 376 Drugs and Society (5) I&S Beckett**
Explores the questions of drug use and abuse, social and political factors that shape response to their use, and the social conditions under which drug use is likely to have adverse consequences. Also covers U.S. drug control policy, the political economy of legal and illegal drugs, and political aspects of drug use. Offered: jointly with LSJ 376.

**SOC 377 The American Jewish Community (5) I&S Burstein**
Development and current status of American Jewish community: immigration; changes in religious practice, institutions in response to circumstances in American Society; creation of new types of secular communal organizations; assimilation; confrontation with antisemitism; family life; social, economic mobility; religious, secular education; intermarriage, and future of community. Offered: jointly with SISJE 377.

**SOC 378 Contemporary Jewish American Identities (5) I&S Friedman**
Introduction to the debates about post-Holocaust Jewish identities in multicultural America. Explores whether a distinctive Jewish community is headed toward assimilation, experiencing revival, or merely transforming the multiple ways Jewish experience is lived. Topics include new Jewish immigrants, the new Orthodox, Black Jews, Jewish feminism, children of Holocaust survivors. Offered: jointly with SISJE 378.

**SOC 379 Environmental Sociology (5) I&S/NW Lee**
Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/ENVIR 379; WS

**SOC 395 Study Abroad: Sociology (2-5, max. 15) I&S**
Upper-division sociology courses for which there are no direct University of Washington equivalents, taken through a University of Washington study abroad program.

**SOC 399 Undergraduate Internship (2-5, max. 10)**
Students serve in approved internships. Credit/no credit only.

**SOC 401 Special Topics in Sociology (5, max. 15) I&S**
Selected topics of contemporary interest taught by a sociologist active in the field. Topics vary and may be substantive, theoretical, or methodological.

**SOC 410 History of Sociological Thought (5) I&S**
Contributions of individual theorists (from Comte to the present); emphasis on cumulative development of concepts and principles, emergence of sociology as a science, probable future developments.

**SOC 416 Sociological Theory (5) I&S Kiser**
Theories of individual action, social order, and institutional change. Cumulative development of solutions rather than on works of given theorists. Theories of social order. How sociological treatments of these issues compare with those offered by economists and other
social scientists.

SOC 420 Fieldwork: Observation and Interviewing (-5) I&S
Logic and techniques of qualitative social research and analysis. Intensive interviewing, participant observation, qualitative data analysis (including applications of data base technology, problem reformulation, and techniques of visual documentation). Results of student work reported and discussed in class. Offered: Sp.

SOC 427 Statistical Classification and Measurement (3) I&S
Application of statistical principles and methods to problems of classification and measurement in social research.

SOC 428 Principles of Study Design (3) I&S
Study design from problem formulation to the analysis and interpretation of data. Offered: Sp.

SOC 429 Practicum in Data Analysis (3) I&S
Introduction to selected programs for data analysis and practice in their application. Practice in coordination research problem, data, and mode of analysis into a coherent, interrelated set. Interpretation of results. Offered: A.

SOC 430 Urbanism and Urbanization (3) I&S

SOC 431 Fertility and Mortality (3) I&S
Theories of fertility and mortality, demographic transitions, individual variations. Specific analytic approaches. Familiarity with basic fertility and mortality measures, and with the life table, is assumed.

SOC 432 Population and Modernization (3) I&S Hirschman, Lavely
Examines role of demographic factors in the process of social modernization and economic growth. The approach is both historical, focusing on populations of developed countries since 1700, and analytic, stressing the attempts made by different disciplines to model demographic relationships, with attention to less-developed regions. Offered: jointly with SIS 432.

SOC 433 Research Methods in Demography (3) I&S Hirschman
Basic measures and models used in demographic research. Sources and quality of demographic data. Rate construction, standardization, the life table, stable population models, migration models, population estimation and projection, measures of concentration and dispersion, measures of family formation and dissolution.

SOC 434 Demographic Issues in Asia (3-5) I&S Hirschman, Lavely
Contemporary Asian countries face a number of issues with demographic components, including environmental and resource issues, ethnic rivalries, international migration, and public health. This seminar addresses a set of these issues by focusing on the demography of one or more countries in Asia. Offered: jointly with SISEA 434.

SOC 445 Religious Movements: The Sociology of Cults and Sects (5) I&S
Investigates the organizational dynamics of new religious movements. Seeks to understand why ‘cults’ emerge and how they proliferate or decay. Examines conflicts within established churches, counter-movements, and the state.

SOC 447 Social Movements (5) I&S Kim
Social movements as collective attempts to change society: why people join; characteristics of successful and unsuccessful movements; consequences of social movement activities.

SOC 449 Social Relationships (5) I&S
The structure of different kinds of relationships and the nature of interaction within them. Concept of social relationships in general, several specific types of relationships. Close personal relationships: marriage, nonmarital sexual relationships, and the parent-child relationship.

SOC 450 Political Economy of Women and Family in the Third World (5) I&S
Theoretical and empirical aspects of the political economy of women and the family in the Third World during the process of development, with a focus on labor. Main theoretical approaches examined and applied to case studies from Asia and Latin America. Offered: jointly with SIS 450.

SOC 451 Theory and Process of Social Change (5) I&S Hamilton
Basic trends in economic and social development; comparative and historical analysis of social and economic changes; the rise of capitalist societies.

SOC 453 Social Factors in the Family (5) I&S
Review and analysis of empirical research in courtship and marriage, marital adjustment, and specific areas of marriage and family life.

SOC 456 Political Sociology (5) I&S Burstein
Relationships between social change and political change. Focus on selected issues, including social bases of democracy, political organization, elections, and consequences of public policy.

SOC 460 Social Differentiation (5) I&S
Analysis of societal organization based on sex, age, residence, occupation, community, class, caste, and race.

SOC 461 Comparative Ethnic Race Relations in the Americas (5) I&S Scott
Sketches the ethnoracial systems operating in American society. Studies these systems as systems and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with AES 461.

SOC 462 Comparative Race and Ethnic Relations (5) I&S
Race and ethnicity as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with AES 462.

SOC 463 African-American Political Thought (5) I&S Black
Examines the historical and sociological experiences of African-Americans from slavery, emancipation, mobilization, and organization, to present socioeconomic situation. Reviews the political philosophy of Black leaders from the early Black Conventions to today, the Black experience in the American education system, and origins and evolution of the black middle class.

SOC 464 Contemporary Society in the Peoples Republic of China (5) I&S Lavely
Separate development of rural and urban social institutions in the Peoples Republic of China since 1949 from a sociological perspective. Family and marriage, social control, educational institutions. Dilemmas of contemporary China and reasons for institutional change. Offered: jointly with SISEA 464.

SOC 465 Complex Organizations (5) I&S Hamilton
Examination of the structure of complex organizations. Attention to developing generalizations applicable to industrial organizations, businesses, hospitals, prisons, labor unions, governments, universities, armies, and similar formally instituted organizations. The major focus is on empirical research, with some attention to
methodological problems in studying such organizations.

SOC 466 Economic Sociology (5) I&S Hamilton
Changing focus of field; cultural variation, work, and the worker; technology, society, and the evolution of industrial forms; types and forms of industrial organizations; industrial organizations as social and technical systems; issues of control, process, and change; the individual in social and technical systems.

SOC 467 Immigration and Ethnicity (5) I&S Hirschman
Focus on contemporary American diversity — the multiethnic, multicultural society created by recent immigrants from Latin America, Asia, and by people of European, African, and American Indian origins; its issues and debates, including ethnic conflict, integration, multiculturalism, and assimilation, as viewed through comparisons with the past and with other societies.

SOC 468 Sociology of Occupations and Professions (5) I&S
Frameworks for study of occupations and professions; occupational structure and mobility in American society in relation to adult socialization and career development; occupational and professional associations and society.

SOC 469 Balkan Societies (5) I&S Chrost
Examination of the roots of Balkan social problems (economic backwardness, minority-group conflicts, peasant problem), the failure of pre-1945 attempts to solve these problems, the post-1945 communist failures, the causes of the upheavals of 1989, and the prospects for success in the 1990s.

SOC 470 Contemporary Southeast Asia (5) I&S Hirschman
Sociological survey of Southeast Asia, including development, demographic changes, family structure, and ethnic relations.

SOC 472 Juvenile Delinquency (5) I&S Crutchfield, Weis
Factors in delinquency, juvenile courts. Programs of treatment and prevention.

SOC 473 Corrections (5) I&S
Analyzes research on diversionary methods and treatment of convicted offenders. Emphasis on program evaluation. Community treatment, fines, restitution; probation, parole, halfway houses, and other alternatives to incarceration; correctional institutions. Organization of state and federal systems. Problems of administration, Subsidies and governmental control. Planning and public participation. Recommended: SOC 371; SOC 372. Offered: jointly with LSJ 473.

SOC 476 Miscarriages of Justice (5) I&S
Examines legal and social factors that shape criminal case outcomes, analyzing how one type of miscarriage of justice — wrongful conviction — occur. How can cases of wrongful conviction be explained? Why are some people, against whom there is only weak evidence, convicted — and sometimes even executed? Offered: jointly with LSJ 476.

SOC 481 Issues in Analytic Sociology (5, max. 15) I&S
Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 482 Issues in Analytic Sociology (3, max. 9) I&S
Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 483 Issues in Analytic Sociology (1-3, max. 9) I&S
Examination of current issues in sociological analysis. Specific content of the course varies according to recent developments in sociology and the interests of the instructor.

SOC 485 Family Change in Western Europe and the United States (5) I&S
Investigates patterns of recent family change. Explores similarities and differences in family life between Western Europe and US as well as variations among countries and among population subgroups within countries. Focuses on differences and similarities in social, economic, political, and cultural environments. Offered: jointly with EURO 485.

SOC 486 Human Family Systems: Biological and Social Aspects (5) I&S
Biological bases for human mating and reproduction, and an examination of the range of cross-cultural variability in human systems of kinship and marriage. Compares wide range of human and nonhuman species, and Western and non-Western human societies. Interplay of biological, ecological, and sociocultural factors in determining the structure and function of human family systems. Offered: jointly with ANTH 486.

SOC 487 Sociology of Gender and Sexuality (5) I&S Schwartz
Addresses the intersection of gender and sexuality in U.S. society, social institutions and movements, families, and the individual. Topics include the history of sexuality as practiced and politicized since colonial times, major theoretical approaches to sexuality, and how gender and other social status characteristics influence the meanings of sexuality.

SOC 490 The Urban Underclass (5) I&S Crutchfield
Examines underlying issues which have led to the emergence and perpetuation of an underclass within an affluent society. Explores some of the consequences for these people and for this society. Considers policies that might be used to address problems of the urban underclass.

SOC 492 Sociology of Education (5) I&S LePore
Emphasizes the ways in which schools and colleges reproduce, reinforce, and challenge prevailing social, economic, and political relationships. Examines the structures, practices, content, and outcomes of schooling and its relationship to the wider society as well as the rise and dynamics of the modern education system.

SOC 495 Honors Senior Thesis (1-5, max. 5) I&S
Preparation of senior honors thesis. Sociology majors only.

SOC 496 Honors Senior Seminar (1/3-5) I&S
Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: A.

SOC 497 Honors Senior Seminar (-1/3-5) I&S
Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: W.

SOC 498 Honors Senior Seminar (-1/3-5) I&S
Exploration of selected sociological problems with emphasis on research experience and the interpretation of data. For sociology majors only, primarily for honors students. Offered: Sp.

SOC 499 Undergraduate Independent Study or Research (2-5, max. 10)
Credit/no credit only.

SOC 500 Teaching Sociology as a Teaching Assistant (1)
Techniques of quiz section administration, advising of students, and student evaluation important to successful teaching as a Teaching Assistant. Students develop presentations and classroom materials and develop and grade student examinations. Credit/no credit only. Prerequisite: admission to graduate program in sociology.

SOC 501 Proseminar (1-3, max. 3)
Introduction for first-year graduate students to substantive areas of
sociology, research and information resources, and issues in graduate education and professional socialization. Credit/no credit only. Offered: A.

SOC 502 Seminar on Teaching Sociology (3) Howard
Techniques of lecturing, leading discussion, evaluating student performance, and other pedagogical skills ancillary to successful teaching. Students develop a course and obtain videotaped feedback of presentations. Prerequisite: completion of MA. Offered: W.

SOC 503 Seminar on Writing Social Science (3) Burstein, Howard
Techniques, skills, and strategies helpful for publishing in the social sciences. Includes writing and revision of own work and evaluation of the writing of other students. Also includes social scientific analysis of writing and other forms of academic communication. Prerequisite: completion of MA. Offered: A.

SOC 504 Applied Social Statistics (3-) I&S
Applications of statistics in sociology and related social sciences. Emphasis on problems of analysis with imperfect data. Probability in statistical inference. Analysis of variance; contingency table analysis, nonparametric procedures; regression analysis in social research. Offered: W.

SOC 505 Applied Social Statistics (-3) I&S

SOC 506 Methodology: Quantitative Techniques in Sociology (3) I&S
Applied regression analysis with emphasis on interactive computer graphics techniques and interpretation. Application to typical sociological problems. Offered: jointly with CS&SS 507; A.

SOC 510 Seminar in Sociological Theory (3) Kiser
 Macrosociological theories; functionalism and neoevolutionism; conflict and consensus approach; comparative strategies; models and long-range theories; ideology and sociology. From Marx and de Tocqueville to contemporary literature. Offered: A.

SOC 511 Classical Social Theory (3) Chirota
 Study of classical masters of social theory: Marx, Durkheim, and Weber, their precursors, and their immediate successors.

SOC 513 Demography and Ecology (3) Hirschman
Theories and research on human fertility, mortality, mobility, migration, and urbanization in social/economic context. Comparative and historical materials on Europe, the United States, and the Third World.

SOC 514 Current Theories in Social Psychology (3)
Broad graduate-level introduction to the theories in the field of social psychology.

SOC 515 Current Research in Social Psychology (3) Howard
Broad graduate-level introduction to the research in the field of social psychology.

SOC 516 Organizations (3) Hamilton
Broad graduate-level introduction to the theory and research on complex organizations.

SOC 517 Deviance and Social Control (3) Bridges, Crutchfield, Weis
Survey of current research on deviant behavior and mechanisms of social control; definitions and forms of deviant behavior, causal analysis, and legal or other methods of social control.

SOC 518 Social Stratification (3) Burstein
Intensive preparation in theoretical, methodological, and substantive topics in social stratification.

SOC 519 Fieldwork: Observation and Interviewing (3) I&S
Perspective, logic, and techniques of qualitative social research and analysis. Nature and uses of intensive interviewing, participant observation, and analytic ethnography. Application of field research principles. Research project required in addition to reading and analysis of classic studies. Offered: W.

SOC 525 Experimental Methods in Social Research (3)
For graduate students who wish additional understanding of techniques, problems, and issues involved in the design and conduct of experimental social research. Considers strengths and weaknesses of various experimental designs, artifacts and their control, problems in going from the laboratory to the field, and ethical issues. Prerequisite: SOC 424-425 and SOC 428, SOC 429, or equivalents.

SOC 526 Causal Approach to Theory Building and Data Analysis (3)
Theory construction and testing from a causal models perspective. Path analysis, standardized versus unstandardized measures, feedback models, identification problems, estimation in overidentified models, difference equations, differential equations, stability conditions. Multiplicative models as alternatives to additive ones. Causal approach to measurement error.

SOC 527 Measurement of Basic Sociological Concepts (3)
Conceptualization and measurement problems in sociology, using major concepts as illustrations of basic issues. Causal approach to measurement to deal with problems of indirect measurement, cross-level measurement problems, aggregation and disaggregation. Consequences of crude measurement for data analyses. Prerequisite: SOC 424; recommended: SOC 426.

SOC 528 Seminar on Selected Statistical Problems in Social Research (3) Raftery
Prerequisite: SOC 426.

SOC 529 Structural Equation Models for the Social Sciences (3)
Structural equation models for the social sciences, including specification, estimation, and testing. Topics include path analysis, confirmatory factor analysis, linear models with latent variables, MIMIC models, non-recursive models, models for nested data. Emphasizes applications to substantive problems in the social sciences. Prerequisite: SOC 424, SOC 425, SOC 426 or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with CS&SS 526.

SOC 535 Research Issues in Demography and Population Studies (1-2, max. 7)
Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches. Offered: AWSp.

SOC 536 Log-Linear Modeling and Logistic Regression for the Social Sciences (3) Raftery
Log-linear modeling of multidimensional contingency tables. Logistic regression. Applications to social mobility, educational opportunity, and assortative marriage. Applied and computing focus. Prerequisite: SOC 424, SOC 425, SOC 426, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with STAT 536/CS&SS 536.

SOC 537 Modeling Emergence: Social Simulation (3)
Seminar and practicum in computational modeling of social processes with emphasis on using agent-based simulation models to
investigate and refine theory.

SOC 539 Selected Topics in Demography and Ecology (3, max. 9)
Specialized problems in demography or ecology are covered; for example, migration, fertility, mortality, language, race and ethnic relations, metropolitan community. See quarterly announcement for specific problem to be covered.

SOC 542 Selected Topics in Group Processes (3)
Theories, methodology, and studies in the area of small-group research. Prerequisite: permission of instructor for nonmajors.

SOC 543 Seminar on Group Solidarity (3)
Interdisciplinary perspectives on solidarity, focusing on member commitment, group structure, and contributions to collective goals.

SOC 544 Seminar on Social Power (3)
Examination of basic principles concerning power, influence, and authority in small groups, organizations, and communities.

SOC 546 Seminar on Symbolic Interaction (3)
Focuses on several key areas in, and related to, the symbolic interactionist perspective (e.g., language, the self, the dramaturgic perspective, ethnomet hodology, stigma, the social construction of social problems). Prerequisite: permission of instructor for nonmajors.

SOC 547 Social Cognition and Attribution (3) Howard
Theories and research on social cognition and attribution. Theoretical and methodological debates on cognition. Sociological aspects of attribution. Prerequisite: SOC 514 or equivalent.

SOC 550 Changing Patterns of Family Organization (3) Schwartz
History of the family with emphasis on changes in European and American families since 1600. Concomitant changes in other institutions and their relation to changes in the family.

SOC 551 Family and Gender Relations (3) Schwartz
Overview of major research findings on marriage, the family, and gender, including demographic trends, the place of children in society, courtship, the internal management of intimate relationships, divorce, and social policy.

SOC 553 Seminar on Gender and Sexuality (3)
Research seminar considering theoretical and empirical approaches to sexuality, with particular attention to the importance of gender. Examines the social control of sexuality by the state and by families, as well as social meanings of sexuality within social movements related to various aspects of sexuality.

SOC 554 Seminar in the Sociology of Religion (3)
Survey of significant and active areas of theory and research in contemporary social scientific studies of religion.

SOC 555 Methods in Macro, Comparative, and Historical Sociology (3)
Systems of conducting research with qualitative methods brought to bear on broad questions.

SOC 556 The Evolution of the Family (3)
Biological evolution of species-specific behaviors and forms of sociality linked to human mating, reproduction, and parenting. Cultural evolution of human systems of kinship and marriage as fitness-maximizing adaptations to a wide range of habitats. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior. Offered: jointly with ANTH 556.

SOC 559 Seminar on Gender Roles (3) Brines, Howard

SOC 562 Seminar in Comparative Race Relations (3)
Cross-cultural approach to race and ethnic relations, including case studies from Africa and Latin America. Prerequisite: graduate standing in social sciences.

SOC 565 Inequality: Current Trends and Explanations (3) Morris
Discussion of recent growth in economic inequality in the U.S. and competing explanations for these new trends through examination of labor market demographics, industrial composition and restructuring, and the broader political context that impacts policies like minimum wage, strength of unions, and foreign trade. Prerequisite: SOC 424, SOC 425, SOC 426, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with CS&SS 565.

SOC 566 Seminar in Complex Organizations (3)
Special topic seminars in the field of complex organizations or industrial sociology.

SOC 567 Seminar in Complex Organizations (3)
Special topic seminars in the field of complex organizations or industrial sociology.

SOC 568 Social Mobility (3)
Description and measurement of social mobility. Determinants of mobility and cross-national comparisons. Consequences of mobility for social behaviors. Emphasizes movement from the socioeconomic position of family of origin to adult position. Prerequisite: SOC 518.

SOC 569 Demographic Studies of Stratification (3) Hirschman
Overview of development of models of socioeconomic achievement (“status attainment” paradigm) in the field of stratification. Begins with work of Blau and Duncan. Covers elaboration of basic models to include race and ethnicity, social psychological variables, class, school and labor market effects, and other structural variables. Prerequisite: SOC 513, SOC 518.

SOC 570 Seminar on Environmental Sociology (3) Lee
Perspectives on environmental sociology, with emphasis on the social construction of environmental problems. European and American schools of thought and their implications for environmental policy. Examination of global and regional issues in the context of risk society. Offered: jointly with CFR 570; A.

SOC 574 Seminar in Methods of Criminological Research (3) Bridges, Weis
Provides training in the technical analysis of published research in criminology; designs and processes studies in parole prediction, prediction of prison adjustment, and prediction of treatment effect.

SOC 575 Social Movements: Politics and Organization (3)
Theoretical perspectives and research on the dynamics of national social movements from a macrosociological perspective. Introduces dominant models that stress organizational and political processes, with some examination of approaches that consider the intersection of politics, organization, and culture. Emphasis on the United States.

SOC 581 Special Topics in Theory and the History of Sociological Thought (3, max. 9)
Examination of current topics in theory and the history of sociological thought. Content varies according to recent develop-
Speech and hearing sciences concern the processes and disorders of human communication. This includes the study of normal hearing, speech, and language development, speech acoustics, speech physiology and perception, hearing, the nature of language, speech and hearing disorders in children and adults, social and cultural aspects of communication disorders, and the clinical processes involved in identification, prevention, and remediation of those disorders.

Undergraduate Program

Adviser
210 Eagleson, Box 354875
206-685-7403
sphscadv@u.washington.edu

The Department of Speech and Hearing Sciences offers the following program of study:

- The Bachelor of Science degree with a major in speech and hearing sciences

Bachelor of Science

Suggested First- and Second-Year College Courses:
PSYCH 101, BIOL 118, LING 200, introductory math and statistics courses.

Department Admission Requirements

Admission is competitive. The admissions committee reviews all applicants based on the following criteria: GPA (minimum 2.50 overall GPA guarantees consideration but not admission), personal statement reflecting an interest in and commitment to speech and hearing sciences; other evidence of a commitment to becoming a speech and hearing sciences major. Students may apply any time after they have earned 60 credits. The application deadline for current UW students is Monday of the third week of the quarter for admission the next quarter; transfer students may apply to the department and the University concurrently. Admission is for autumn, winter, or spring quarter. Only students admitted to the UW are eligible for admission to the major. Applicants will be notified of the department’s decision within four weeks. Applications and additional information are available outside 210 Eagleson and on the department’s Web site.

Students who meet admission requirements are eligible for one of two options: Option 1, General Academic, is intended to provide broad perspectives of the discipline, but not to prepare students specifically for careers in clinical speech pathology and audiology. It is appropriate for students with interests in education, health care, and communication. Option 2, Speech and Hearing Sciences and Disorders, is intended for students interested in graduate study in speech and hearing sciences and clinical speech-language pathology and audiology. (Note that graduate study is required for the professions of speech language pathologist and audiologist.)

Major Requirements

Core Requirements for Both Options: 32 credits in the following courses: SPHSC 250, SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC 320, SPHSC 371, SPHSC 461. A cumulative GPA of 3.00 is required in core courses for students following Option 2.

Option 1, General Academic: 71-73 credits as follows:

Core requirements listed above (32 credits)
22 credits from the following: SPHSC 305, SPHSC 308, SPHSC 405, SPHSC 406, SPHSC 425, SPHSC 445, SPHSC 462, SPHSC 499 (6 credits maximum)
BIOL 118 (5 credits)

A 3-5 credit college-level mathematics course (not including MATH 098, MATH 100, MATH 102, MATH 103, or other remedial, historical, or methodology math course) or statistics course (not including STAT 111)

Minimum 9 credits at the 200 level or above in psychology, educational psychology, or special education, or 300 level or above in linguistics.

Speech and Hearing Sciences

210 Eagleson
Option II, Speech and Hearing Sciences and Disorders: 81-83 credits as follows:

- Core requirements listed above (32 credits)
- SPHSC 305, SPHSC 308, SPHSC 405, SPHSC 406, SPHSC 425, SPHSC 445, SPHSC 471, SPHSC 481 (32 credits)
- BIOL 118 (5 credits)
- A 3-5 credit college-level mathematics (not including MATH 098, MATH 100, MATH 102, MATH 103, or other remedial, historical, or methodology math course) or statistics course (not including STAT 111)
- Minimum 9 credits at the 200 level or above in psychology, educational psychology, or special education, or 300 level or above in linguistics.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:**
  - The graduate will (1) have knowledge of the following: mechanisms involved in speech, language, and hearing; societal implications of language differences and of disorders of speech, language, and hearing; opportunities in, and requirements for, careers available to those in the speech and hearing sciences. (2) understand the following: normal acquisition of speech and language; the etiology and nature of communication disorders across the lifespan; principles and procedures for diagnosis and treatment of speech, language, and hearing disorders; the manner in which context (specifically, situation, social/interpersonal, and culture context) influences communication and disorders; social-cultural aspects of communication development and disorders. (3) have the following abilities: to analyze language in terms of its auditory, phonetic, phonological, morphological, and syntactic properties; to utilize strategies for solving scientific problems; to read and understand relevant literature; (4) have experience with a research project
- **Instructional and Research Facilities:** Research labs, computer lab, and clinic located in the department.
- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- **Research, Internships, and Service Learning:**
  - None offered
- **Department Scholarships:** None offered
- **Student Organizations/Associations:** The National Student Speech Language Hearing Association (NSSLHA) UW chapter, 153 Eagleson.

Graduate Program

Graduate Program Coordinator
205 Eagleson, Box 354875
206-685-7402
sphsadv@u.washington.edu

The Department of Speech and Hearing Sciences offers the Master of Science, Doctor of Audiology, and Doctor of Philosophy degrees. The program consists of a wide range of course work and seminars providing opportunities for the development of scholarly and professional competence in various areas of specialization: speech and language acquisition, phonetics, speech production, hearing, hearing development, psychoacoustics, physiological acoustics, speech perception, and human communication disorders related to language, speech, and hearing. At the Doctor of Audiology (Aud) and speech-language pathology master's (SLP MS) level, the specific focus is on the clinical procedures involved in the identification, prevention, and remediation of communication disorders. To complement departmental curricula in various specialization areas, close interdisciplinary relationships are maintained with other University departments and off-campus centers. Advanced degrees in the speech and hearing sciences equip the student to do research, to teach at the college and university level, and to provide clinical services to the communicatively impaired.

Special Requirements

Prospective candidates for advanced degrees are expected to have earned 50-60 quarter credits in the speech and hearing sciences at the undergraduate level. The M.S. and Aud degrees are intended primarily for students who desire careers as speech-language pathologists and audiologists, but who may or may not continue study for the Ph.D. degree. Students complete the academic and practical experience requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association. Students must also meet all Graduate School requirements for the M.S. and Aud degrees. A thesis is optional. A non-clinical M.S. degree, requiring a thesis, may be designed as well. (Please contact the graduate program coordinator.) For the Ph.D. degree, individually tailored programs of study are developed to focus on specialized areas of interest within speech, language, and hearing science; experimental and clinical audiology; and speech/language pathology.

Financial Aid

A number of teaching and research assistantships are available for qualified graduate students. In addition, the department has traineeships/fellowships supported by the National Institutes of Health.

Research Facilities

The department’s research laboratories, as well as those of the Virginia Merrill Bloedel Hearing Research Center, contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Center on Human Development and Disability also provide laboratories to support basic and applied research in speech, language and hearing development and disorders, across the life span.

Faculty

Bierer, Julie, Cochlear implant psychophysics and physiology.
Carpenter, Robert L., Language; Language Disorders in Children; Reading Disabilities
Coggins, Truman E., Language Disorders
Dowden, Patricia A., Augmentative and Alternative Communication
Eadie, Tanya, Voice Disorders
Folsom, Richard C., Pediatric Audiology; Auditory Evoked Potentials
Kuhl, Patricia K., Speech Perception
Moore, Christopher, (Chair) Speech Physiology
Olswang, Lesley B., Child Language Disorders, Clinical Processes
Rogers, Margaret A., Neurogenic Speech-Language Disorders
Souza, Pamela E., Audiology; Clinical Evaluation; Hearing Aids
Spencer, Kristie, Motor Speech Disorders
Stecker, G. Christopher, Spatial hearing, neuroimaging (fMRI)
Stoe-Gammon, Carol, Developmental Phonology; Phonetics
Tremblay, Kelly, Audiology; Adult Assessment
Werner, Lynne A., Infant Auditory Development

Lecturers and Clinical Instructors
Alarcon, Nancy, Adult Speech-Language Disorders
Harney, Martha, Audiologic Assessment, Amplification and Aural Rehabilitation
Johnson, Chris, Hearing Conservation, Audiologic Assessment and Amplification
Labiak, James, Audiologic Evaluation, Calibration
Miller, Robert M., Motor, Speech, and Swallowing
Nevdahl, Marty, Voice and Fluency Disorders
Oyloe, Nancy, Child Speech-Language Disorders
Sanborn, Sue, Audiologic Rehabilitation
Sargent, Laura, Child Speech-Language Disorders
Siva, Nithya, Child and Adult Speech-Language Disorders
Stone-Goldman, Judy, Child Speech-Language Disorders, Counseling
Adjunct and clinical faculty (UW Affiliation)
Carmichael-Olson, Heather, Psychiatry & Behavioral Sciences
Gates, George A., Otolaryngology
Meltzoff, Andrew, Psychology
Norton, Susan, Children's Hospital
Rees, Thomas, Otolaryngology
Schwartz, Ilene, Education
Yorkston, Kathryn, Rehabilitive Medicine

Course Descriptions

SPHSC 100 Voice and Articulation Improvement (3) VLPA
For native speakers of English only. Voice production and the sound system of standard American speech. Speech standards, regional and social dialects, voice quality and basic language-oriented characteristics. Practice for improving speech style. May not be repeated. Offered: AWSpS.

SPHSC 111 The American English Sound System (2, max. 4)
For non-native speakers of English only. Speech sounds of American English. Practice in listening and using American speech sounds and intonation patterns. Credit/no credit only. Offered: AWSpS.

SPHSC 250 Human Communication and Its Disorders (5)
I&S/NW
Overview of normal and impaired human communication, including speech, language, and hearing disorders. Required for majors, open to nonmajors. Offered: AS.

SPHSC 261 The Nature of Sound (3) NW
Fundamental principles of sound and vibration with emphasis on examples relevant to the speech and hearing systems. Required for majors: open to nonmajors. Recommended: MATH 101. Offered: W.

SPHSC 302 Phonetics (3) VLPA
Introduction to the description and classification of speech sounds with a focus on American English. Phonetic analysis of segmental and suprasegmental properties of speech. Practice using the International Phonetic Alphabet to transcribe normal and disordered speech patterns. Required for majors; open to nonmajors. Prerequisite: either SPHSC 303, LING 200, or LING 400. Offered: W.

SPHSC 303 Language Science (3) VLPA
Introduction to techniques of linguistic analysis used in the study of phonology, morphology, syntax, and semantics. Required for majors; open to nonmajors. Offered: A.

SPHSC 304 Developmental Aspects of Communication (5)
I&S
Patterns of communicative development in English speaking children and adolescents. Introduction to the study of language and communication from a developmental perspective. Application to children with various types of communication impairments. Required for majors; open to nonmajors. Prerequisite: either SPHSC 303, ANTH 203, LING 200, or LING 400; may not be repeated. Offered: Sp.

SPHSC 305 Speech and Language Disorders (5) NW
Etiology and nature of developmental and acquired communication disorders across the lifespan. Behavioral characteristics of language delay and disorders, developmental apraxia of speech, phonological disorders, stuttering, acquired aphasia, apraxia of speech and dysarthria, craniofacial anomalies, and voice disorders. Required for majors; open to nonmajors. Prerequisite: SPHSC 302; SPHSC 304; SPHSC 320. Offered: A.

SPHSC 308 Social-Cultural Aspects of Communication (3)
I&S
Introduction to human communication in context. Exploration of ways communication is influenced by context, including situational, social/interpersonal, and cultural variables. Studies systems and cultural practices as they influence communication. Required for majors; open to nonmajors. Offered: WSu.

SPHSC 320 Anatomy and Physiology of Speech (5) NW
Anatomy and physiology of the respiratory, laryngeal, and articulatory systems. Examples and laboratory work are directed toward clinical issues in Speech-Language Pathology. Required for majors; open to nonmajors. Offered: Sp.

SPHSC 371 Hearing Disorders (3) I&S/NW

SPHSC 391 Practicum in Audiology (1-4, max. 10)
Guided experiences in audiological assessment and aural rehabilitation of children and adults. Credit/no credit only. Offered: AWSpS.

SPHSC 405 Diagnosis of Speech and Language Disorders (3)
NW
Principles and procedures for the diagnosis of speech and language disorders. Required for majors. Prerequisite: SPHSC 305. Offered: W.

SPHSC 406 Treatment of Speech and Language Disorders (4)
NW
Principles and procedures for planning, implementing, and evaluating treatment for speech and language disorders. Required for majors. Prerequisite: SPHSC 405; may not be repeated. Offered: SpS.

SPHSC 411 Perceptual Development (5) I&S/NW Meltzoff
Origins and development of perception in human infancy. Object, face, and speech perception; cross-modal relations between touch, vision, audition. Prerequisite: 2.0 in either PSYCH 206, PSYCH 306, or PSYCH 414. Offered: jointly with PSYCH 411.

SPHSC 425 Speech, Language, and the Brain (5) NW
Historical perspectives and current research on speech acoustics, speech perception, and brain processing of speech information;
speech development; techniques used in speech analysis; machine recognition of speech; brain imaging techniques, animal communication systems; speech evolution; implications for impaired populations. May not be repeated. Offered: A.

SPHSC 445 Models of Speech Processing (3) NW
Examines models and basic issues concerning how spoken language is processed. Presents current issues, theories, and research relative to the levels of processing entailed in producing and comprehending speech. Required for majors; open to nonmajors. Recommended: SPHSC 302; SPHSC 303; SPHSC 320; SPHSC 425. Offered: SpS.

SPHSC 449 Special Studies in Speech Pathology and Audiology (*, max. 30)
Selected special problems in speech pathology and audiology. Offered: S.

SPHSC 453 Augmentative and Alternative Communication: Implementation Strategies (2-3) NW
Communication needs of nonspeaking individuals. Interdisciplinary approaches to the evaluation, selection, and implementation of aided and unaided communication augmentation systems. Recommended: basic course work in either SPHSC, OT, PT, or ENGR. Offered: jointly with REHAB 458; S.

SPHSC 454 Augmentative and Alternative Communication: Access for Technology (3) NW
Communication technology and motor evaluation of augmentative and alternative users. Issues related to hardware, software, switch placement and access, with opportunities for clinical trials. Recommended: SPHSC 453 or REHAB 458. Offered: jointly with REHAB 459.

SPHSC 461 Introduction to Hearing Science (5) NW
Basic aspects of hearing and the ear and auditory nervous system. How the auditory system constructs an image of the acoustic environment. How attention and memory influence hearing. Effects of damage to the auditory system. Prerequisite: either SPHSC 261 or PSYCH 333. Offered: Sp.

SPHSC 462 Hearing Development (3) NW
Description of the changes that occur in human hearing during development. Consideration of the possible explanations for early immaturity. Prerequisite: SPHSC 461; may not be repeated. Offered: even years; A.

SPHSC 471 Basic Audiology (5) NW
Theory and practice of the assessment of hearing function, including standard pure-tone audiometry, speech audiometry, and basic impedance audiometry. Required for majors. Prerequisite: SPHSC 371; SPHSC 461; may not be repeated. Offered: AWS.

SPHSC 481 Management of Hearing Loss (4) NW
Introduction to methods of communicative rehabilitation of person with hearing loss. Remediation principles of auditory and visual perception, amplification, communication strategies, and information counseling. Required for majors. Prerequisite: SPHSC 471; may not be repeated. Offered: WSp.

SPHSC 491 Audiology Practicum in Schools (2)
Special projects in clinical audiology practicum, offered only in the school setting. Provides an opportunity for students to extend audiology practicum experiences into the school environment. Prerequisite: SPHSC 471. Offered: AS.

SPHSC 499 Undergraduate Research (1-5, max. 15)
Offered: AWSpS.

SPHSC 500 Clinical Methodology for Documenting Change (4)
Introduction to clinical methodology for examining efficacy of treatments for individuals with communication problems. Students consider nature of intervention designed to alter communication disorders and types of accountability questions that need to be raised. They learn methodology for collecting and analyzing data to document effectiveness, effects, and efficiency of treatments.

SPHSC 501 Neural Bases of Speech, Language, and Hearing (4)
Neuroanatomical and neurophysiological bases of language, hearing, sensory, and motor function. Special emphasis given to brain behavior correlates and behavioral consequences to speech, language, and hearing as a result of neurologic injury or disease.

SPHSC 502 Advanced Anatomy of Speech and Hearing Structures (2)
Directed independent dissection and study of selected anatomic structures of the speech or hearing mechanisms.

SPHSC 503 Current Issues in Speech and Hearing Sciences (3)
Application of experimental methods to research in speech and hearing sciences.

SPHSC 504 Research Methods in Speech and Hearing Sciences (3)
Introduction to empirical methods in the speech and hearing sciences.

SPHSC 505 Clinical Research in Communication Disorders (3)
Introduction to clinical research. Methodological issues concerning the evaluation of treatment for speech, hearing, and language disorders. Primary emphasis on time series designs. Prerequisite: SPHSC 504 or permission of instructor.

SPHSC 509 Advanced Hearing Science (3)
Consideration of physiological acoustics and psychoacoustics, the pertinent literature, and the experimental techniques related to study in these areas. Offered: %-A.

SPHSC 510 Physiological Acoustics (3)
Study of pertinent literature and experimental techniques incident to the physiology of the normal and abnormal auditory system. Prerequisite: SPHSC 461.

SPHSC 511 Psychoacoustics (3)
Review of significant literature and theory pertinent to normal auditory sensitivity, pitch, loudness, and other attributes of auditory sensation. Prerequisite: SPHSC 461, SPHSC 510.

SPHSC 514 Speech Physiology (3)
Study of the physiological parameters of acoustic speech production. Prerequisite: SPHSC 320, SPHSC 461.

SPHSC 515 Speech Acoustics (3)
Study of the acoustical correlates of the distinctive parameters of speech. Prerequisite: SPHSC 320, SPHSC 461, SPHSC 514.

SPHSC 516 Speech Perception (3)
Study of the perceptual and linguistic parameters of speech perception. Prerequisite: SPHSC 320, SPHSC 461, SPHSC 515.

SPHSC 519 Seminar in Speech Science (2, max. 6)
Design and use of electronic and electroacoustic devices in the speech and hearing sciences. Four hours of laboratory required each week.

SPHSC 520 Advanced Instrumentation for Speech and Hearing Sciences (3)
Introduction to basic instrumentation used in audiology and hearing sciences.

SPHSC 521 Instrumentation for Audiology (4)

science; detailed instruction in audiometer calibration including a review of current national and international standards pertinent to audiology; emphasis on use rather than theory. Prerequisite: permission of instructor.

SPHSC 522 Hearing Instrument Modification/Repair (1)
Minor repair of hearing aids or associated accessories. Includes operation of hand tools and small power tools used in repair. Familiarity with different materials used to make or repair hearing aids/accessories. Troubleshooting damaged, malfunctioning, or inoperative instruments. Interpreting acoustic and electroacoustic test results to aid in troubleshooting or repair.

SPHSC 523 Special Topics (3)
Applied and theoretical issues related to audiology. Weekly seminar includes guest speakers discussing current and future trends in science that relate to hearing and the practice of audiology.

SPHSC 525 Speech Signal Processing (3)
Theory, evaluation, and use of speech signal processing algorithms such as sampling, filtering, spectral analysis, autocorrelation, and speech synthesis. Laboratory assignments develop skills in using signal analysis and synthesis software applied to normal and pathological speech.

SPHSC 530 Language Disorders in Children (4)
Consideration of the nature of language impairment in children, the types of children in whom language impairment is an important dimension, and approaches to treatment. Prerequisite: SPHSC 303 and SPHSC 304, or equivalent

SPHSC 531 Neurogenic Motor Speech Disorders (4)
The nature of apraxia of speech and dysarthria and the assessment and treatment of those disorders. Prerequisite: SPHSC 501 or permission of instructor.

SPHSC 532 Neurogenic Language Disorders (4)
Nature of aphasias and other neurogenic language disorders; evaluation and treatment of those disorders. Prerequisite: SPHSC 501 or permission of instructor.

SPHSC 533 Medical Speech Pathology (3)
Nature of speech pathology practiced in medical settings. Prerequisite: SPHSC 501, SPHSC 531, and SPHSC 532, or permission of instructor.

SPHSC 534 Special Topics in Dysphagia and Associated Disorders (2, max. 4)
Anatophysiologic bases of function and dysfunction associated with speech-language disorders. Mastication and swallowing problems, their causes, assessments, and management. Prerequisite: SPHSC 501 or permission of instructor.

SPHSC 535 Voice and Resonance Disorders (4)
Physiology, acoustics, and perception of voice quality and speech resonance. Etiology, evaluation, and treatment of voice and resonance disorders.

SPHSC 536 Assessment of Language Impairment in Children (4)
Principles and procedures used in the assessment of speech- and language-disordered children and adolescents.

SPHSC 537 Fluency Disorders (4)
Characteristics of fluent speech and the nature and treatment of stuttering in children and adults are studied in relation to normal speech production processes, human learning, principal explanations of stuttering, and treatment systems.

SPHSC 538 Management of Acquired Cognitive Disorders (2)
Epidemiology, neuropathology, assessment, and management of acquired cognitive disorders. Focus on traumatic brain injury in adults and children, dementia, and right brain injury. Prerequisite: SPHSC 501 and SPHSC 532 or permission of instructor.

SPHSC 539 Articulation and Phonological Disorders (4)

SPHSC 540 Phonological Development (3)
Selected topics in the developmental sequence of phonological systems in normal-speaking children. Relationships between possible phonological inventories and rule systems in different languages. Prerequisite: LING 451, LING 452, or permission of instructor. Offered: jointly with LING 540.

SPHSC 542 Counseling and Interactive Skills for Speech-Language Pathologists and Audiologists (2-3)
Introduction to counseling theory and practice in speech-language pathology, audiology, and related fields. Provides opportunities for learning and practicing counseling skills. Addresses key counseling issues, including professional boundaries, intense emotions, and counselor’s feelings and reactions. Prerequisite: graduate standing or permission of instructor.

SPHSC 550 Practicum in Speech Pathology (1-10, max. 10)
Laboratory experience in the evaluation of speech and language disorders. Credit/no credit only. Prerequisite: SPHSC 536 and permission of instructor.

SPHSC 555 Preinternship in Speech and Hearing Sciences (1-10, max. 10)
Practicum in speech pathology or audiology designed to teach the clinical regimen of a participating professional center prior to assuming a full internship assignment. Credit/no credit only.

SPHSC 560 Studies in Speech Science and Disorders (3)
Examines contemporary models and research paradigms in speech science and disorders. Topics include respiratory physiology, laryngeal physiology, aerodynamics of speech production, articulatory dynamics, speech acoustics, and speech perception.

SPHSC 561 Studies in Hearing Sciences and Disorders (3)
Examines contemporary models and research paradigms in the area of hearing science and disorders. Topics include psychoacoustics; amplification; electrophysiological evaluation; physiological acoustics; and perceptual consequences of hearing loss.

SPHSC 562 Studies in Language Science and Disorders (3)
Examines research in the area of language science and disorders including word recognition and production; storage of retrieval of word form and meaning; comprehension and production of sentences and discourse; and language in social context. Topics examined relative to development, language impairments, and normal language processing.

SPHSC 563 Proseminar: Instructional Development Forum (1, max. 3)
Olswang
Emphasizes instructional techniques and issues as they relate to teaching in the discipline of communication sciences and its disorders. Topics include course development, grading, student-faculty relations, teaching methods, and diversity. Credit/no credit only. Prerequisite: graduate standing in Speech and Hearing Sciences.
SPHSC 564 Teaching Practicum (1-5, max. 5)
Provides experience in preparing and giving lectures, leading discussions, preparing and grading assignments and tests, and working directly with undergraduate and graduate students. Prerequisite: doctoral student standing and permission of instructor. Credit/no credit only. Offered: AWSpS.

SPHSC 565 Speech and Language Pathology Proseminar (1, max. 6)
Consideration of professional issues and student and faculty research. Credit/no credit only.

SPHSC 566 Seminar in Speech-Language Development (2, max. 6)
Prerequisite: permission of instructor.

SPHSC 567 Research Seminar in Speech and Hearing Sciences (1)
A platform for the presentation and exchange of scientific information (research data, new hardware and software development, scientific papers) resulting from ongoing research projects by graduate students and faculty within the Speech and Hearing Sciences department. Credit/no credit only.

SPHSC 568 Grant Writing in Hearing, Language, and Speech Science (3)
Design and writing of grant proposals in speech, language, and hearing sciences and disorders. Explanation of the funding process at various agencies, particularly the National Institutes of Health. Students prepare a proposal and review the proposals of their peers. Prerequisite: upper-level doctoral standing and permission of instructor.

SPHSC 569 Seminar in Speech-Language Pathology (2, max. 6)

SPHSC 570 Assessment of Auditory Dysfunction I (4–)
Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471.

SPHSC 571 Assessment of Auditory Dysfunction II (4–)
Strategies and procedures in the auditory evaluation of hearing-impaired adults. Use of diagnostic tests in the evaluation of auditory pathologies. Laboratory required. Prerequisite: SPHSC 471.

SPHSC 572 Pediatric Audiology (3)
Assessment of auditory disorders in infants and young children. Emphasis on behavioral and electrophysiologic techniques and on the role of the audiologist in the clinical management of the young hearing-impaired child. Prerequisite: SPHSC 471 or equivalent.

SPHSC 573 Physiologic Assessment of Auditory Function (4)
Consideration of physiologic techniques that may be used to evaluate the normal and disordered auditory system. Outside laboratory required. Prerequisite: SPHSC 461, SPHSC 571.

SPHSC 574 Assessment of Balance Function (4)
Examines normal anatomy and physiology of the peripheral and central vestibular system. Reviews peripheral and central vestibular disorders and treatment protocols. Major focus of assessment on electronystagmography with associated lab. Provides overview of rotational and posturography measures of balance function. Prerequisite: permission of instructor.

SPHSC 575 Medical Backgrounds in Audiology (3)
Diseases and injuries of the ear resulting in reduced audition. Prerequisite: SPHSC 571 or permission of instructor.

SPHSC 576 Otoacoustic Emissions (2)
Consideration of otoacoustic emissions and the physiologic techniques used to record them. Includes interpretation of responses in both the normal and disordered auditory system as well as clinical application of emissions in both adult and infant populations. Laboratory required. Prerequisite: SPHSC 571, SPHSC 572, and SPHSC 573, or permission of instructor.

SPHSC 577 Industrial and Community Hearing Conservation (2)
Psychophysiological effects of environmental noise on man. Techniques of noise measurement and attenuation, including the planning of hearing conservation programs in industry and in the community. Prerequisite: SPHSC 471 or permission of instructor.

SPHSC 578 Hearing Screening (2)
Consideration of hearing screening programs and the statistical techniques used to evaluate them. Includes history, rationale, and technical aspects of hearing screening as well as current models for developing neonatal, school-age, and adult hearing screening programs. Prerequisite: SPHSC 572, SPHSC 573, and SPHSC 576, or permission of instructor.

SPHSC 579 Geriatric Audiology (2)
Examines the biological, psychological, and social aspects which relate normal correlates of the aging process, and those changes which are disorders. Emphasizes the identification and diagnosis of hearing problems associated with the aging process and its rehabilitation. Prerequisite: SPHSC 571.

SPHSC 580 Rehabilitative Audiology (3)
Explores technology to enhance communication effectiveness of hearing impaired persons. Selection and training in the use of assistive systems and cochlear implants. Advanced perception assessment and training methodology. Prerequisite: SPHSC 571 and SPHSC 583.

SPHSC 581 Management of Hearing-Impaired Children (2)
Management of hearing-impaired children, including identification of target behaviors and methods for modification such as individual-ized therapy programs and parent and teacher involvement.

SPHSC 582 Hearing Aid Amplification (4)
Acoustic amplification and methods of determining electroacoustic characteristics. Includes earmold technology. Prerequisite: SPHSC 471 and SPHSC 570 or permission of instructor.

SPHSC 583 Hearing Aid Selection (4)
Consideration of strategies utilized in selecting acoustic amplification for the hearing impaired, including review of pertinent research literature. Prerequisite: SPHSC 582 or permission of instructor.

SPHSC 584 Advanced Amplification (3)
Current topics in hearing aids and amplification technology; review of pertinent research articles. Prerequisite: SPHSC 582, 583.

SPHSC 585 Pediatric Amplification (2)
Consideration of strategies utilized in selecting and verifying acoustic amplification for infants and children, including review of pertinent research literature. Prerequisite: SPHSC 582 or permission of instructor.

SPHSC 586 Cochlear Implants (2)

SPHSC 587 Ethics (1)
Analysis and discussion of ethical considerations in the clinical practice of audiology, codes of professional organizations, and additional consideration of research ethics and ethics in neonatal hearing screening.

SPHSC 588 Audiology Proseminar (1, max. 3)
Consideration of professional issues and student/faculty research in
The Department of Statistics offers the following programs of study:

- The Bachelor of Science degree with a major in statistics
- In conjunction with the departments of Applied Mathematics, Computer Science and Engineering, and Mathematics, the Bachelor of Science degree with a major in applied and computational mathematical sciences.
- A minor in statistics

Bachelor of Science

Suggested First-and Second-Year College Courses: CSE 142; CSE 143; MATH 307, MATH 308, MATH 309, MATH 327, MATH 328. Additional courses in the sciences and quantitative methods. It is recommended that the student declare the major only after completion of STAT 341.

Department Admission Requirements

Completion of 45 credits, including MATH 124, MATH 125, MATH 126; a minimum 8 credits from one of the following groups of courses: ASTR 101, ASTR 102, ASTR 190, ASTR 201, ASTR 301; CHEM 120, CHEM 142, CHEM 145, CHEM 152, CHEM 155; GENOME 351, GENOME 372, GENOME 453, GENOME 455; PHYS 114, PHYS 115, PHYS 116, PHYS 117, PHYS 118, PHYS 119, PHYS 121, PHYS 122, PHYS 123, PHYS 210, PHYS 211, PHYS 212; and one course from STAT 220, STAT 311, STAT 390, or an approved substitute. The 8 credits must be from within the same group (e.g., CHEM 142, CHEM 152).

Minimum grade of 2.0 in each of the above listed prerequisites and a cumulative GPA of 2.80 for these courses.

Students wishing to declare a statistics major must apply by contacting the adviser after prerequisites are completed and graded.

Major Requirements

Minimum 71 credits, as follows:

- MATH 124, MATH 125, MATH 126; MATH 307, MATH 308, MATH 309; MATH 327, MATH 328 (the honors sequences in calculus may replace the corresponding regular sequences)
- CHEM 142, CHEM 143

One course from STAT 220, STAT 311, STAT 390, or approved substitute (STAT 311 is recommended)

STAT 394, STAT 395, followed by STAT 341, STAT 342, STAT 421, STAT 423.

Electives (at least 9 credits): one upper-division course in statistics, mathematics, or computer science, plus two upper-division courses in any discipline (including but not limited to statistics, mathematics, and computer science), all subject to prior approval by the Statistics adviser. The first elective defines the flavor of the major within these interrelated mathematical fields, and the other two give a chance to broaden the basis of the major into a special-interest area, chosen from the full range of upper-division courses offered at the University. However, three Department of Statistics courses is the most common choice. Any other choice must fit into an approved coherent plan.

A minimum grade of 2.0 in all courses used to satisfy major requirements.

A minimum cumulative GPA of 2.50 in required statistics courses.

Minor

Minor Requirements: 38 credits, as follows:

- MATH 124, MATH 125, MATH 126
- STAT 311 or approved substitute
- STAT 394, followed by STAT 341, STAT 342, STAT 421 (or STAT 423)

One elective from the following choices: STAT 395 (strongly recommended), STAT 396, STAT 403, STAT 423, STAT 424
Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Statistics emphasizes decision making in the face of uncertainty. Tools developed by the major include probability theory, mathematical statistics, experience with data analysis, and use of statistical tools via the computer. Graduates have pursued careers in actuarial science, financial planning, drug development, statistical consulting, teaching, public health, military science, aerospace, computer technology, and forest resources.

- Instructional and Research Facilities: Computer workstations are available on a drop-in basis through the Mathematical Sciences Computing Center. Tutoring in a set of introductory statistics courses is currently available at the Statistics Tutor and Study Center.

- Honors Options Available: None offered.

- Research, Internships, and Service Learning: Some students receive limited support and the opportunity to participate in the VIGRE program which, funded by the National Science Foundation, encourages undergraduates to participate in research; sometimes students function in teams with faculty and graduate students. A special seminar series for undergraduates is offered in conjunction with the ACMS program.

- Department Scholarships: None offered.

- Student Organizations/Associations: The Actuary Club at the University of Washington, http://students.washington.edu/actuary

Graduate Programs

Graduate Program Coordinator
B309 Padelford, Box 354322
206-543-8296

The graduate programs emphasize both the theory and application of statistics, including probability theory, mathematical statistics, data analysis, statistical computing, and scientific applications. Computing facilities in the Department of Statistics rank among the best of any statistics programs in the country and reflect the department's expertise in the field of statistical computing. An ongoing statistical consulting program provides the students with practical experience in using statistics and in communicating with clients. Under faculty supervision, participants in the program assist members of the University community in applying statistical methodology. The department offers Master of Science and Doctor of Philosophy degrees.

Admission Requirements

Background in mathematics, statistics, or a quantitative field, with 30 or more quarter credits in mathematics and statistics, to include a year of advanced (second-year) calculus, one course in linear algebra, and one course in probability theory; Graduate Record Examination scores (the Advanced Mathematics subject test is encouraged but not required); and three letters of recommendation from appropriate former or current faculty.

Master of Science

Graduation Requirements: In addition to Graduate School requirements, at least twelve approved courses numbered 400 or above with a value of 36 credits or more; of these, at least six courses must be numbered in the 500 series (exclusive of STAT 512, 513) with a value of 18 credits or more, and with a coherent theme. Approved proficiency in statistical computing. Satisfactory participation in statistical consulting and the departmental seminar. Passage of an appropriate final master's examination or successful completion of a master's thesis which can count as up to three courses worth 9 credits but cannot replace any of the six courses in the 500 series mentioned above. All programs must be approved in advance by the departmental graduate program coordinator.

Doctor of Philosophy

Graduation Requirements: In addition to Graduate School requirements, appropriate training in statistics and related sciences. Appropriate General Examinations of basic graduate-level knowledge in statistics and probability (including two preliminary examinations). Satisfactory performance in MATH 574, 575, 576. Satisfactory performance in three approved core-course sequences chosen from STAT 570, 571, 572; 581, 582, 583; 521, 522, 523; 534, 535, 538; and 516, 517, 518. (In some circumstances, other graduate-level mathematical science courses may be used as a substitute.) Approved performance in statistical consulting (typically STAT 598 and 599). Demonstration of proficiency in computing. 1 credit of STAT 590 per quarter. Final Examination. The graduation requirements for the Ph.D. tracks in statistical genetics and statistics in the social sciences may replace or be in addition to some of the requirements listed above.

Financial Aid

The department annually awards a limited number of teaching and research assistantships and fellowships for the support of new and continuing graduate students on the basis of academic promise.

Faculty

Julian Besag Professor
Spatial statistics, with applications to epidemiology, image analysis, agriculture, etc., Bayesian inference, Markov chain Monte Carlo.

Fred L. Bookstein Professor

Elena Erosheva Assistant Professor (WOT)

Tom Fleming Professor
Department of Biostatistics
Survival analysis, clinical trials, sequential analysis, AIDS and cancer.

Tilmann Gneiting Associate Professor
NRCSE
Spatial and environmental statistics, positive definite functions, applications in meteorology.

Peter Guttorp Professor and Chair
NRCSE and QERM
Point processes, stochastic models, applications in hydrology, atmospheric science, and environmental science.

Mark Handcock Professor
Department of Sociology
Methodology for the social sciences, spatial and environmental statistical modeling, distributional comparison, models for random graphs.

Peter Hoff Assistant Professor
CSSS and Department of Biostatistics
Constrained estimation, nonparametric Bayesian methods, two-sided matching models, applications to cancer research.

Richard Kronmal Professor
Department of Biostatistics
Nonparametric density estimation, computer algorithms, cardiovascular data analysis.

R. Douglas Martin Professor
QERM
Robust methods, modern statistics in finance, including portfolio optimization and risk management, options and derivatives, data mining.

425
Marina Meila  Assistant Professor
Graphical probability models, machine learning, algorithms, data mining.

June Morita  Acting Associate Professor
Statistics & mathematics education (K-20+), data analysis, & survey methodology.

Martina Morris  Professor
Department of Sociology
Methodology for the social sciences, distributional comparison, inequality, social networks, epidemiology of HIV.

Michael D. Perlman  Professor
Multivariate analysis, graphical Markov models, decision theory, probability inequalities, convexity.

Adrian E. Raftery  Professor
Sociology
Bayesian statistics, model selection, model-based clustering, spatial statistics, applications in sociology and environmental sciences, gene expression data

Thomas Richardson  Associate Professor
CSSS and NRCSE
Graphical models, algorithmic model selection, Bayesian inference, causal models, applications in economics.

Galen Shorack  Professor
Empirical and quantile processes, limit theorems, L-statistics, bootstrapping, reliability.

Sibel Sirakaya  Assistant Professor
CSSS and Department of Economics
Methodology for the social sciences, Model selection, Applications in economics.

Matthew Stephens  Assistant Professor
Bayesian inference, classification and clustering, Markov chain Monte Carlo, statistical genetics

Werner Stuetzle  Professor
Computer Science and Engineering
Nonparametric methods in multivariate analysis, statistical applications of computer graphics, scientific computing.

Elizabeth Thompson  Professor
Department of Genome Sciences

Jon Wakefield  Professor
Department of Biostatistics
Bayesian data analysis, statistical methods in epidemiology, spatial epidemiology, pharmacodynamic models.

Jon A. Wellner  Professor
Department of Biostatistics
Large sample theory, asymptotic efficiency, empirical processes, semiparametric models.

Research Faculty
Paul D. Sampson  Research Professor
NRCE and QERM
Spatial statistics and environmetrics, morphometrics, applied multivariate analysis, statistical consulting.

Judy Zeh  Research Professor
QERM
Population size estimation, population dynamics, robust statistical methods, statistical computing, applications in infectious disease research.

Course Descriptions

STAT 111 Lectures in Applied Statistics (1) NW
Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Contact instructor for information on emphasized fields of applications. Credit/no credit only. Offered: jointly with BIOT 111; Sp.

STAT 220 Basic Statistics (5) NW, QSR
Objectives and pitfalls of statistical studies. Structure of data sets, histograms, means, and standard deviations. Correlation and regression. Probability, binomial and normal. Interpretation of estimates, confidence intervals, and significance tests. (Students may receive credit for only one of 220, 311, and ECON 311.) Offered: AWSpS.

STAT 311 Elements of Statistical Methods (5) NW, QSR
Elementary concepts of probability and sampling; binomial and normal distributions. Basic concepts of hypothesis testing, estimation, and confidence intervals; t-tests and chi-square tests. Linear regression theory and the analysis of variance. (Students may receive credit for only one of 220, 311, and ECON 311.) Prerequisite: either MATH 111, MATH 120, MATH 124, MATH 127, or MATH 144. Offered: AWSpS.

STAT 316 Design of Experiments and Regression Analysis (4)
NW Kapur
Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with IND E 316.

STAT 320 Evaluating Social Science Evidence (5) I&S, QSR
A critical introduction to the methods used to collect data in social science: surveys, archival research, experiments, and participant observation. Evaluates “facts and findings” by understanding the strengths and weaknesses of the methods that produce them. Case based. Offered: jointly with CS&SS 320/SOC 320; A.

STAT 321 Case-Based Social Statistics I (5) I&S, QSR
Handcock

STAT 322 Case-Based Social Statistics II (5) I&S, QSR
Handcock
Continuation of CS&SS/SOC/STAT 321. Progresses to questions of assessing the weight of evidence and more sophisticated models including regression-based methods. Built around cases investigating the nature and content of statistical principles and practice. Hands-on approach: weekly data analysis laboratory. Offered: jointly with CS&SS/SOC 322; Sp.

STAT 341 Introduction to Probability and Statistical Inference I (4) NW
Brief review of: sample spaces, random variables, probability. Distribution: binomial, normal, Poisson, geometric. Following by: expectation, variance, central limit theorem. Basic concepts of estimation, testing, and confidence intervals. Maximum likelihood estimators and likelihood ratio tests, efficiency. Introduction to
STAT 424 Applied Regression and Analysis of Variance (4) NW

STAT 425 Introduction to Nonparametric Statistics (3) NW
Overview of nonparametric methods, such as rank tests, goodness of fit tests, 2 x 2 tables, nonparametric estimation. Useful for students with only a statistical methods course background. Prerequisite: STAT/MATH 390. Offered: jointly with BIOST 425; when demand is sufficient.

STAT 427 Introduction to Analysis of Categorical Data (4) NW
Techniques for analysis of count data. Log-linear models, logistic regression, and analysis of ordered response categories. Illustrations from the behavioral and biological sciences. Computational procedures. Prerequisite: either STAT 342, STAT 362, or STAT 421. Offered: alternate years.

STAT 428 Multivariate Analysis for the Social Sciences (4) NW
Multivariate techniques commonly used in the social and behavioral sciences. Linear models for dependence analysis (multivariate regression, MANOVA, and discriminant analysis) and for interdependence analysis (principal components and factor analysis). Techniques applied to social science data using computer statistical packages. Prerequisite: either STAT 342, STAT 362, or STAT 421. Offered: alternate years.

STAT 480 Sampling Theory for Biologists (3) NW
Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with Q SCI 480; even years.

STAT 481 Introduction to Mathematical Statistics (5) NW
Probability, generating functions; the d-method, Jacobians, Bayes theorem; maximum likelihoods, Neyman-Pearson, efficiency, decision theory, regression, correlation, bivariate normal. (Credit allowed for only one of 390, 481, and ECON 590.) Prerequisite: STAT/ECON 311; either MATH 136 or MATH 126. Offered: jointly with CS&SS/ECON 481; A.

STAT 486 Experimental Design (3) NW
Topics in analysis of variance and experimental designs: choice of designs, comparison of efficiency, power, sample size, pseudoreplication, factor structure. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with Q SCI 486.

STAT 491 Introduction to Stochastic Processes (3) NW
Random walks, Markov chains, branching processes, Poisson process, point processes, birth and death processes, queuing theory, stationary processes. Offered: jointly with MATH 491; A.

STAT 492 Stochastic Calculus for Option Pricing (3) NW
Introductory stochastic calculus mathematical foundation for
STAT 499 Undergraduate Research (1-5, max. 15) NW
Reading and lecture course intended for special needs of students. Offered: when demand is sufficient.

STAT 500 Mathematical Communication for Graduates (2)

STAT 502 Design and Analysis of Experiments (4)
Design of experiments covering concepts such as randomization, blocking, and confounding. Analysis of experiments using randomization tests, analysis of variance, and analysis of covariance. Prerequisite: either STAT 342, MATH/STAT 390, ECON/STAT 481, ECON 580 or equivalent; MATH 308 or equivalent. Offered: A.

STAT 504 Applied Regression (4)

STAT 506 Applied Probability and Statistics (4)
Discrete and continuous random variables, independence and conditional probability, central limit theorem, elementary statistical estimation and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with AMATH 506.

STAT 512 Statistical Inference (4)
Review of random variables; transformations, conditional expectation, moment generating functions, convergence, limit theorems, estimation; Cramer-Rao lower bound, maximum likelihood estimation, sufficiency, ancillarity, completeness. Rao-Blackwell theorem. Hypothesis testing: Neyman-Pearson lemma, monotone likelihood ratio, likelihood-ratio tests, large-sample theory. Contingency tables, confidence intervals, invariance. Introduction to decision theory. Prerequisite: STAT 395 and STAT 421, STAT 423, STAT 504, or BIOST 512 (concurrent registration permitted for these three). Offered: A.

STAT 513 Statistical Inference (4)

STAT 516 Stochastic Modeling of Scientific Data (4-)
Markovian and semi-Markovian models, point processes, cluster models, queuing models, likelihood methods, estimating equations. Prerequisite: STAT 511 or STAT 396. Offered: A.

STAT 517 Stochastic Modeling of Scientific Data (4-)
Markovian and semi-Markovian models, point processes, cluster models, queuing models, likelihood methods, estimating equations. Prerequisite: STAT 516. Offered: W.

STAT 518 Stochastic Modeling Project (4)
Supervised, applied project based on stochastic modeling of scientific data. Prerequisite: STAT 517. Offered: Sp.

STAT 519 Time Series Analysis (3)

STAT 520 Spectral Analysis of Time Series (4)

STAT 521 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 521; A.

STAT 522 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 522; W.

STAT 523 Advanced Probability (3)
Measure theory and integration, independence, laws of large numbers. Fourier analysis of distributions, central limit problem and infinitely divisible laws, conditional expectations, martingales. Prerequisite: either MATH 426 or MATH 576. Offered: jointly with MATH 523; Sp.

STAT 524 Design of Medical Studies (3)
Emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for students in biostatistics and other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of STAT 421, STAT 423, BIOST 513, BIOST 518, or EP 512; or permission of instructor. Offered: jointly with BIOST 524; even years.

STAT 529 Sample Survey Techniques (3)
Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling: multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent; or permission of instructor. Offered: jointly with BIOST 529/CS&SS 529.

STAT 530 Wavelets: Data Analysis, Algorithms, and Theory
STAT 533 Classical Theory of Linear Models (3)
Introduction to one-, two-way analysis of variance; randomized blocks; fixed, random effects, multiple comparisons. Statistical distribution theory for quadratic forms of normal variables. Fitting of the general linear model by least squares. Prerequisite: STAT 421 or STAT 423; and STAT 513, BIOST 515; and a course in matrix algebra. Offered: jointly with BIOST 533; Sp.

STAT 534 Statistical Computing (3)
Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific computing projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 534; Sp.

STAT 535 Statistical Computing (3)
Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific computing projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 535; A.

STAT 536 Log-Linear Modeling and Logistic Regression for the Social Sciences (3)
Log-linear modeling of multidimensional contingency tables. Logistic regression. Applications to social mobility, educational opportunity, and assortative marriage. Applied and computing focus. Prerequisite: SOC 424, SOC 425, SOC 426, or equivalent; recommended: CS&SS 505 and CS&SS 506, or equivalent. Offered: jointly with SOC 536/CS&SS 536.

STAT 538 Statistical Computing (3)
Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific computing projects. Prerequisite: experience with programming in a high level language. Offered: jointly with BIOST 538; W.

STAT 542 Multivariate Analysis (3)
Multivariate normal distribution; partial and multiple correlation; Hotelling's T2; Bartlett's decomposition; various likelihood ratio tests; discriminant analysis; principal components; graphical Markov models. Prerequisite: STAT 582 or permission of instructor. Offered: alternate years.

STAT 544 Bayesian Statistical Methods (3)

STAT 547 Derivatives: Theory, Statistics, and Computing (4)
Covers theory, computation, and statistics of options and derivatives pricing, including options on stocks, stock indices, futures, currencies, and interest rate derivatives. Prerequisite: STAT 506 or equivalent, or permission of instructor. Recommended: ECON 424.

STAT 549 Statistical Methods for Portfolios (4)
Covers the fundamentals of modern statistical portfolio construction and risk measurement, including theoretical foundations, statistical methodology, and computational methods using modern object-oriented software for data analysis, statistical modeling, and numerical portfolio optimization. Prerequisite: ECON 424 or equivalent, or permission of instructor.

STAT 550 Statistical Genetics I: Mendelian Traits (3)
Thompson
Mendelian genetic traits. Population genetics; Hardy-Weinberg, allelic variation, subdivision. Likelihood inference, information and power; latent variables and EM algorithm. Pedigree relationships and gene identity. Meiosis and recombination. Linkage detection. Multipoint linkage analysis. Prerequisite: STAT 390 and STAT 394, or permission of instructor. Offered: jointly with BIOST 550; A.

STAT 551 Statistical Genetics II: Quantitative Traits (3)
Monks
Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550; STAT 423 or BIOST 515; or permission of instructor. Offered: jointly with BIOST 551; W.

STAT 552 Statistical Genetics III: Design and Analysis (3)
Wijsman
Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affected sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENET 371; or permission of instructor. Offered: jointly with BIOST 552; Sp.

STAT 554 Bayesian Statistics for the Social Sciences (4)
Monks
Statistical methods based on the idea of probability as a measure of uncertainty. Topics covered include subjective notion of probability, Bayes' Theorem, prior and posterior distributions, and data analysis techniques for statistical models. SOC 424-425-426 or equivalent; recommended: CS&SS 505; CS&SS 506. Offered: jointly with CS&SS 564.

STAT 561 Special Topics in Applied Statistics (1-5, max. 15)
Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

STAT 562 Special Topics in Applied Statistics (1-5, max. 15)
Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

STAT 563 Special Topics in Applied Statistics (1-5, max. 15)
Data analysis, spectral analysis or robust estimation. Prerequisite: permission of instructor.

STAT 564 Bayesian Statistics for the Social Sciences (4)
Monks
Statistical methods based on the idea of probability as a measure of uncertainty. Topics covered include subjective notion of probability, Bayes' Theorem, prior and posterior distributions, and data analysis techniques for statistical models. SOC 424-425-426 or equivalent; recommended: CS&SS 505; CS&SS 506. Offered: jointly with CS&SS 564.

STAT 566 Causal Modeling (4)
Construction of causal hypotheses. Theories of causation, counterfactuals, intervention vs. passive observation. Contexts for causal inference: randomized experiments; sequential randomization; partial compliance; natural experiments, passive observation. Path diagrams, conditional independence and d-separation. Model
STAT 567 Statistical Analysis of Social Networks (4)
Statistical and mathematical descriptions of social networks. Topics include graphical and matrix representations of social networks, sampling methods, statistical analysis of network data, and applications. Prerequisite: SOC 424-425-426 or equivalent; recommended: CS&SS 505-506 or equivalent. Offered: jointly with CS&SS 566.

STAT 570 Advanced Applied Statistics and Linear Models (3)
Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 513; STAT 533 or STAT 421 and STAT 423, and a course in matrix algebra for STAT 570. Offered: jointly with BIOST 570; A.

STAT 571 Advanced Applied Statistics and Linear Models (3)
Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 570. Offered: jointly with BIOST 571; W.

STAT 572 Advanced Applied Statistics and Linear Models (3)

STAT 573 Statistical Methods for Categorical Data (3)
Advanced topics in general linear models and the analysis of categorical data: overdispersion, quasilikeyhood, parameters in link and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no credit only. Prerequisite: STAT 571 and STAT 582. Offered: jointly with BIOST 573; alternate years.

STAT 574 Multivariate Statistical Methods (3)
Use of multivariate normal sampling theory, linear transformations of random variables, one- and two-sample tests, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Prerequisite: STAT 570 or permission of instructor. Offered: jointly with BIOST 574; alternate years.

STAT 576 Statistical Methods for Survival Data (3)
Statistical methods for censored survival data. Covers parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either STAT 423, BIOST 515, or Q SCI 483, or equivalent. Offered: jointly with BIOST 576; alternate years.

STAT 577 Advanced Design and Analysis of Experiments (3)
Concepts important in experimental design: randomization, blocking, confounding. Application and analysis of data from randomized blocks designs, Latin and Graeco-Latin squares, incomplete blocks designs, split-plot and repeated measures, factorial and fractional replicates, response surface experiments. Prerequisite: STAT 570 or STAT 421 (minimum grade 3.0), or permission of instructor. Offered: jointly with BIOST 577.

STAT 578 Special Topics in Advanced Biostatistics (*, max. 3)
Advanced-level topics in biostatistics offered by regular and visiting faculty members. Prerequisite: permission of instructor. Offered: jointly with BIOST 578.

STAT 579 Data Analysis and Reporting (2)
Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with BIOST 579; %-AWSp.

STAT 581 Advanced Theory of Statistical Inference (3)
Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability; (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 513; either MATH 426 or MATH 576. Offered: A.

STAT 582 Advanced Theory of Statistical Inference (3)
Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability; (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 581. Offered: W.

STAT 583 Advanced Theory of Statistical Inference (3)
Limit theorems, asymptotic methods, asymptotic efficiency and efficiency bounds for estimation, maximum likelihood estimation, Bayes methods, asymptotics via derivatives of functionals, sample-based estimates of variability; (bootstrap and jackknife); robustness; estimation for dependent data, nonparametric estimation and testing. Prerequisite: STAT 582. Offered: Sp.

STAT 586 Martingales: Survival Analysis (3)
Theory of counting processes and martingales to provide unified study of survival analysis methods. Focus on survival distribution estimators, censored data rank statistics, regression methods with censored survival data. Development of small samples moments, asymptotic distributions, and efficiencies. Prerequisite: STAT 521 or STAT 583 or permission of instructor; recommended: STAT 576. Offered: jointly with BIOST 586; W.

STAT 590 Statistics Seminar (*, max. 15)
Credit/no credit only. Prerequisite: permission of graduate program coordinator. Offered: AWSp.

STAT 591 Special Topics in Statistics (1-5, max. 15)
Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: A.

STAT 592 Special Topics in Statistics (1-5, max. 15)
Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: W.

STAT 593 Special Topics in Statistics (1-5, max. 15)
Distribution-free inference, game and decision theory, advanced theory of estimation (including sequential estimation), robustness, advanced probability theory, stochastic processes or empirical processes. Prerequisite: permission of instructor. Offered: Sp.

STAT 598 Techniques of Statistical Consulting (1)
Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication.
with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with BOST 598; ASp.

STAT 599 Statistical Consulting (*, max. 12) Consulting experience in data analysis, applied statistics. Student required to provide consulting services to students and faculty three hours per week. Credit/no credit only. Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

STAT 600 Independent Study or Research (*) Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

STAT 700 Master’s Thesis (*) Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

STAT 800 Doctoral Dissertation (*) Prerequisite: permission of graduate program coordinator. Offered: AWSpS.

Women Studies
B110 Padelford

Women studies is an interdisciplinary discipline that offers students a cohesive framework for the study of women’s and men’s lives within historical and contemporary contexts, and from multidisciplinary, multi-cultural, and international perspectives. As a field of inquiry, women studies challenges traditional scholarship about human societies and fosters the construction of new theoretical and methodological approaches to understanding diverse experiences and realities.

Undergraduate Program
Adviser
B110C Padelford, Box 354345
206-543-6902
wsadvise@u.washington.edu

The Department of Women Studies offers the following programs of study:

- The Bachelor of Arts degree with a major in women studies
- A minor

Bachelor of Arts

Suggested First- and Second-Year College Courses: WOMEN 200, and any of the following: WOMEN 206, WOMEN 257, WOMEN 283, WOMEN 290.

Department Admission Requirements
Any student with a cumulative GPA of at least 2.00 can declare this major at any time.

Major Requirements

Minimum 62 credits, as follows:

- WOMEN 200 or equivalent, two credits of WOMEN 299, and one course from WOMEN 206, WOMEN 257, WOMEN 283, WOMEN 290, or transfer equivalent
- WOMEN 322 or WOMEN 456 (may overlap with option or upper-division requirement); WOMEN 357 (may overlap with option requirement)

One course in feminist theory (WOMEN 455 is recommended for those planning to pursue graduate study. See department adviser for a complete list of acceptable courses.)

The senior thesis sequence of WOMEN 491, WOMEN 492, and WOMEN 493.

A minimum of 3 credits of WOMEN 497 fieldwork
10 additional upper-division credits within the major

Completion of a 25-credit interdisciplinary option. Options can include up to 15 credits of upper-division courses from other departments. Students may select pre-approved options or design an option specific to their academic interest in consultation with adviser.

Minor

Minor Requirements: 30 credits as follows:

- WOMEN 200
- One of the following: WOMEN 206, WOMEN 257, WOMEN 283, WOMEN 290, or transfer equivalent
- WOMEN 322 or WOMEN 456
- 15 additional upper-division credits in women studies (excludes independent-study courses)

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: A Bachelor of Arts in Women Studies helps students prepare for careers in human, health, legal, or civil service, as well as in the private sector. Some women studies graduates develop careers that focus directly or indirectly on women and women’s issues. Many others move into careers that entail understanding the dynamics of gender, race, class, and sexuality. Such positions exist in politics, business, education, government, medicine, and the arts. Recent graduates of women studies have found employment in public agencies, community services, health services, private businesses, and legal firms.

- Instructional and Research Facilities: The Women Studies Technology Center (WSTC)
- Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- Research, Internships, and Service Learning: Students intern in local agencies or businesses to develop skills in an area of specialization appropriate to their area of interest. For lists of these opportunities, see adviser.
- Department Scholarships: None offered.
- Student Organizations/Associations: Students can join the National Women’s Studies Association (NWSA), as well as a local student group, Feminism on Campus (FOC).

Graduate Program

Graduate Program Coordinator
B110 Padelford, Box 354345
206-543-6900
womenst@u.washington.edu

The Department of Women Studies offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in interdisciplinary women studies as well as in a chosen discipline. The core faculty represent the following disciplines: anthropology, American Indian studies, economics and development, history, international studies, English, sociology, and psychology. Although students are required to work primarily with a core faculty member in Women Studies, they have the opportunity to study with more than 60 faculty members from a wide range of disciplines who are adjunct faculty to Women Studies. M.A. students must complete a thesis or practicum. Ph.D. students must complete a dissertation.

Admission Requirements
Applicants are admitted to begin study during autumn quarter only and are required to have their application materials completed by the beginning of the prior January. A complete application file includes the Graduate School application, one copy of official transcripts, three recommendations, a statement of purpose, and scores from the Graduate Record Examination (GRE).

Program Requirements
All students are required to complete 15 credits of the core seminars: History of Feminism (WOMEN 501), Problems in
Feminist Theory (WOMEN 502), and Feminist Research and Methods of Inquiry (WOMEN 503). Under the guidance of a core faculty mentor and advisory committee, the student shapes an individual program of study. The master’s program usually requires two years of graduate study; the doctoral program usually requires three years of study beyond the master’s level, including independent field research and preparation of a dissertation. Ph.D. students must exhibit proficiency in a language relevant to their theoretical and regional areas of specialization. Students are urged to establish foreign language competency as undergraduates before entering the graduate program or as early as possible in their graduate careers.

Financial Aid
A limited number of teaching and research assistantships are offered to Ph.D. students.

Faculty

**David Allen**, Professor, Psychosocial Nursing: using critical and feminist theories to conceptualize and research how mental health and mental illnesses are socially constituted and managed, especially in prisons and jails; anti-racism, postcolonial theory; multiculturalism and the role of Whiteness in education and research Ph.D., Iowa (1975)

**Tani Barlow**, Professor of Women Studies and Professor of History Ph.D, History, University of California, Davis, 1985; M.A., History, University of California, Davis, 1979; B.A., History and Chinese language dual degree, San Francisco State University, CA, 1975

**Angela Ginorio**, Associate Professor of Women Studies, Adjunct Associate Professor of Psychology and Adjunct Associate Professor of American Ethnic Studies Ph.D., Psychology, Fordham University, New York, 1979; M.A., Psychology, University of Puerto Rico, 1971; B.A., Psychology, University of Puerto Rico, 1968

**Judy Howard**, Professor of Sociology Ph.D., University of Wisconsin-Madison, 1982

**Sue-Ellen Jacobs**, Professor Emerita of Women Studies, Adjunct Professor Emerita of Psychology and Adjunct Professor Emerita of Music Ph.D., Anthropology, University of Colorado, 1970; M.A., Anthropology, University of Colorado, 1966; B.A., Sociology-Anthropology and Nursing, Adams State College, 1963

**Susan Jeffords**, Vice Provost for Academic Planning, Office of the Provost, Professor of Women Studies, Professor of English Ph.D., English, University of Pennsylvania, 1981

**Nancy J. Kenney**, Associate Professor of Women Studies, Associate Professor of Psychology Ph.D., Psychology, University of Virginia - Charlottesville, 1974; M.A., Psychology, University of Virginia - Charlottesville, 1972; B.A., Psychology, PsyWilkes College, Summa Cum Laude, 1970

**Kathleen Noble**, Halbert and Nancy Robinson Professor, Professor of Women Studies, Director, Halbert and Nancy Robinson Center for Young Scholars Ph.D., Counseling Psychology, University of Washington, 1984; M.Ed., Counseling, University of Washington, 1978; B.A., Society and Justice, University of Washington, 1976

**Priti Ramamurthy**, Associate Professor of Women Studies Ph.D., Social Science, Syracuse University, 1995; M.B.A., Indian Institute of Management, 1978; B.A., Economics, University of Delhi, 1976

**Luana Ross**, Associate Professor of Women Studies Ph.D., University of Oregon, 1992

**Amanda Swarr**, Ph.D., History, Ohio State University, 1987; M.A., History, Ohio State University, 1983; B.A. University of Scranton, 1981

**Shirley J. Yee**, Associate Professor, Department of Women Studies, Adjunct Associate Professor in the Department of History and Adjunct Associate Professor in the Department of American Ethnic Studies Ph.D., History, Ohio State University, 1987; M.A., History, Ohio State University, 1983

**Part-time Lecturers**

**Debra Boyer**, Affiliate Assistant Professor, Women Studies:

- use and its impact on women and development; women in science and environmental problems
- Part-time Lecturers
- History, Ohio State University, 1987; M.A., History, Ohio State University, 1983; B.A. University of Scranton, 1981

**Jeanne Kohl-Welles**, Professor Emerita of Women Studies, Adjunct Associate Professor in the Department of American Ethnic Studies

**Philip Bereano**, Professor, Technical Communications: technology and social values; social theory, public policy and technologies; distributional aspects of technology’s impacts; women and technology; ethnicity and technology J.D., Columbia (1965)

**Kathleen Blake**, Professor, English: women and literature; feminist literary criticism and theory; Victorian literature, including the woman question; issues of empire Ph.D., California-San Diego (1971)

**Ruby Blondell**, Professor, Classics, Graduate Program Coordinator: Greek and Roman philosophy and literature Ph.D., Berkeley

**Dee Boersma**, Professor, Zoology: conservation biology; resource use and its impact on women and development; women in science and environmental problems Ph.D., Ohio State (1974)

**Debra Boyer**, Affiliate Assistant Professor, Women Studies:
feminist research methodology; policy and evaluation issues; sexuality; reproduction; child maltreatment; deviant behavior and adolescence; urban applied anthropology
Ph.D., Washington (1986)

Course Descriptions

WOMEN 200 Introduction to Women Studies (5) I&S
Feminist analysis of the construction and enforcement of gender differences and gender inequalities in various contexts. Emphasis on the intersection of race, class, sexuality, and nationality in the lives of women. Topics include feminist theory, motherhood, popular culture, sexual autonomy, racism, and activism in the United States, Asia, Latin America. Offered: AWSpS.

WOMEN 206 Philosophy of Feminism (5) I&S
Philosophical analysis of the concepts and assumptions central to feminism. Theoretical positions within the feminist movement; view of the ideal society, goals and strategies of the movement, intersections of the sex-gender system with other systems of oppression. Offered: jointly with PHIL 206/POL S 212.

WOMEN 207 Introduction to Feminist Theories (5) I&S
Introduction to the multiplicity of feminist theories in both the United States and transnational contexts; examination of the histories of different theoretical positions and their relationship to feminist praxis. Topics include feminist analysis of knowledge production, power, and the categories of gender, race, class, sexualities, ethnicity, and nation.

WOMEN 257 Psychology of Gender (5) I&S Kenney
Major psychological theories of gender-role development; biological and environmental influences that determine and maintain gender differences in behavior; roles in children and adults; topics include aggression, cognitive abilities, achievement motivation, affiliation. Recommended: either PSYCH 101, PSYCH 102, or WOMEN 200. Offered: jointly with PSYCH 257.

WOMEN 283 Introduction to Women's History (5) I&S
Includes units on American, European, and Third World women that examine centers of women's activities, women's place in male-dominated spheres (politics), women's impact on culture (health, arts), and the effect of larger changes on women's lives (technology, colonization). Offered: jointly with HIST 283; A.

WOMEN 290 Special Topics in Women Studies (2-5, max. 15) I&S
Exploration of specific problems and issues relevant to the study of women. Offered by visiting or resident faculty members.

WOMEN 299 Women Studies Community in Colloquia (2) I&S
Introduces new majors to the field of women studies. Includes helping students develop a course of study for their major, meeting their departmental advisor and the faculty. Students are encouraged to take this course immediately upon declaring the major. May be linked to service learning.

WOMEN 302 Research Methods in Women Studies (5) I&S Jacobs
Explores appropriate research methodologies for interdisciplinary work in women studies. Examines current debates and issues in feminist methodologies and critiques of methodology. Use of historical documents and theoretical texts. Computer applications in research in women studies. Prerequisite: either WOMEN 200 or WOMEN 206.

WOMEN 305 Feminism in an International Context (5) I&S Ramamurthy, Sunindyo
Women and feminism from global theoretical perspectives. Critical theoretical ways of thinking about feminism. How women are differently situated throughout the world. How they are represented affects women's agency. Focus on how race and gender affect one another. Representations of and by women throughout the world.

WOMEN 310 Women and the Law (5) I&S
Examines how law addresses women, how the courts have made attempts to address women of color, poor women, lesbians, and women with disabilities. Topics include constitutional construction of equality, employment discrimination, reproductive rights, regulation of sexuality, families and motherhood, sexual harassment, violence against women and international women and human rights.

WOMEN 313 Women in Politics (5) I&S DiStefano
Theoretical, historical, and empirical studies of women's participation in political and social movements. Women's diverse efforts to improve their political, social, and economic status. Policy issues of particular concern to women. Women's political experiences in household, local, regional, national, and international arenas. Offered: jointly with POL S 313.

WOMEN 321 History of Afro-American Women and the Feminist Movement (5) I&S
"Feminist Movement" from early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Offered: joint with AFRAM 321.

WOMEN 322 Race, Class, and Gender (5) I&S Ramamurthy, Sunindyo
The intersection of race, class, and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, classism, sexism, activism, sexuality, and inter-racial dynamics between women of color groups. Offered: jointly with AES 322.

WOMEN 323 History of Racial Formation in the United States: 1800-1990 (5) I&S Yee
Traces the development of the concept of race in the United States from the nineteenth century to the late twentieth century. Specific topics include paid and unpaid labor, media, reproduction, migration, social activism, and the processes of identity and community formation.

WOMEN 333 Gender and Globalization: Theory and Process (5) I&S Ramamurthy
Theoretical, historical, and empirical analysis of how current processes of globalization are transforming the actual conditions of women's lives, labor, gender ideologies, and politics in complex and contradictory ways. Topics include feminist exploration of colonialism, capitalism, economic restructuring policies, resistance in consumer and environmental movements. Offered: jointly with SIS 333.

WOMEN 339 Social Movements in Contemporary India (5) Ramamurthy, Sivaramakrishnan
Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women's movements. Includes critiques of development and conflicts over forests, dams, women's rights, religious community, ethnicity, and citizenship. Offered: jointly with ANTH 339/ SISA 339.

WOMEN 341 Native Women in the Americas (5) I&S
Historiography, sociology, biography, autobiography, and fiction about native women in the United States and Canada. Offered: jointly with AIS 341; AWSpS.

WOMEN 345 Women and International Economic Development (5) I&S Ramamurthy

WOMEN 350 Women in Law and Literature (5) I&S/VLPA Tupper
Representations of women in American law and literature. Considers how women’s political status and social roles have influenced legal and literary accounts of their behavior. Examines how legal cases and issues involving women are represented in literary texts and also how law can influence literary expression. Offered: jointly with CHID 350.

WOMEN 351 Women of Color as Cross-Cultural Artists (5) I&S/VLPA Habell-Pallan
Provides a historical context for artistic forms produced by racialized women. Examines the cultural production of Chicanas and Latinas in relation to that Native American, African American, East and South Asian American, and Arab American women as well as those women of mixed heritage in the U.S. Offered: jointly with AES 310.

WOMEN 353 Anthropological Studies of Women (5) I&S Jacobs
Critical examination of the intersections between anthropology, research on gender issues, and feminism. Readings and class discussions examine the ways women have been represented in the field of anthropology and the repercussions of these anthropological images of women on contemporary understandings of gender. Offered: jointly with ANTH 353; W.

WOMEN 355 Men and Masculinity (5) I&S Clatterbaugh
Critical study of systematic responses of men to feminist movements, including conservative, pro-feminist, men’s rights, mythopoetic, and religious responses. How men of color and gay men view these various men’s movements and their issues. Special attention given to philosophical problems such as nature of oppression, human nature, justice, and masculinity. Recommended: WOMEN 200.

WOMEN 357 Psychobiology of Women (5) NW Kenney
Physiological and psychological aspects of women’s lives: determinants of biological sex; physiological and psychological events of puberty, menstruation, and menopause; sexuality; pregnancy, childbirth; the role of culture in determining the psychological response to the physiological events. Recommended: PSYCH/WOMEN 257. Offered: jointly with PSYCH 357.

WOMEN 383 Social History of American Women to 1890 (5) I&S Yee
A multi-racial, multicultural study of women in the United States from the 17th century to 1890 emphasizing women’s unpaid work, participation in the paid labor force, charitable and reform activities, and 19th century social movements. Uses primary materials such as diaries, letters, speeches, and artifacts. Offered: jointly with HSTAA 373; W.

WOMEN 384 Social History of American Women in the 20th Century (5) I&S
Analyzes major themes in the history of women in North America from 1890 through the 1990s. Themes include family and community formation, social activism, education, paid and unpaid labor patterns, war, migration, and changing conceptions of womanhood and femininity in the 20th century. Offered: jointly with HSTAA 374.

WOMEN 392 Asian-American Women (5) I&S Root

WOMEN 404 Critical Pedagogies of Social Change (5) I&S Examines theories of critical pedagogy as developed in struggles against race, class, and gender oppression in the U.S. and transnationally. Topics include the relation between theory and practice, the position of educators in struggles for social change, and the role of the arts in movement-building. Offered: jointly with AES 404.

WOMEN 405 Comparative Women’s Movements and Activism (5) I&S Sunindojo
Comparative cultural, national, and historical study of women’s movements and activism. Critically analyzes multiple arenas of women’s movements and resistance. Topics include feminist anti-racism, pre-nationalism and nationalism, economics, electoral politics, women’s and human rights, and international/transnational feminisms. Prerequisite: either WOMEN 205, WOMEN 305, or SOC 364.

WOMEN 415 Gender and Education (5) I&S Gender bias, discrimination, and gender-equity efforts in education. Includes curriculum instruction, instructional materials, testing, counseling, athletics, teacher education, educational employment issues, and sexual harassment. Relevant federal and state laws, court decisions, and strategies for promoting gender equity also addressed. Recommended: WOMEN 200 or SOC 110. Offered: jointly with EDC&I 440; S.

WOMEN 417 The Politics of Talent Development (5) I&S Investigation of the psychological, cultural, socioeconomic, and political factors that enhance or inhibit the development of exceptional ability, focusing principally, but not exclusively, on women and girls. Pays special attention to issues of race, class, gender, geography, and an individual’s orientation to the mainstream of her culture.

WOMEN 423 Feminism, the State, and Democracy in Indonesia (5) I&S Examines feminist theoretical analyses of the law. Engages in current debate on the study of critical race, gender, and class theory. Includes: women in prison, public assistance, the sex industry, women and health care, and immigration law. Recommended: WOMEN 200 or WOMEN 310. Offered: jointly with LSJ 466/POL S 466.

WOMEN 424 Women in Midlife (5) I&S Explores women’s lives, experiences, and concerns in the middle years. Topics include physical and physiological changes; psychological development; representations and treatment of midlife women in literature, media, and other institutions; economics of aging; crosscultural and subcultural differences in the aging process; the synergistic effects of sexism and ageism on women.

WOMEN 425 Femininity, Feminism, and Antifeminism in Popular Culture (5) I&S/VLPA Twine Explores shifting meanings and reconfigurations of femininity, feminism, and antifeminism in United States popular culture. Analyzes the incorporation and transformation of feminist critiques of dominant ideologies into popular culture. Popular forms examined may include television serials, music videos, advertisements, films, and novels. Prerequisite: WOMEN 200.
WOMEN 427 Women and Violence (5) I&S Ginorio
Multi-disciplinary explorations of the continuum of violence which affects women’s lives, ranging from experience in personal settings (family violence) to cultural or state policies (prisons, wars). Violence against women explored in the context of societal, political, and state violence. Recommended: WOMEN 200.

WOMEN 429 Scandinavian Women Writers in English Translation (5) VLPA Gavel-Adams
Selected works by major Scandinavian women writers from mid-nineteenth-century bourgeois realism to the present with focus on feminist issues in literary criticism. Offered: jointly with SCAND 427.

WOMEN 435 Gender and Spirituality (5) I&S Exploration of ways in which gender informs spiritual teachings and practices of different groups in ancient and contemporary times, with particular attention to the relationship between spiritual beliefs and the construction of social, psychological, and political realities.

WOMEN 438 Jewish Women in Contemporary America (5) I&S Examines how Jewish women’s identities are socially constructed and transformed in contemporary America, using social histories, memoirs, and ethnographies to analyze scholars’ approaches to Jewish women’s lives. Topics include the role of social class, religion, migration, the Holocaust, and race relations in Jewish women’s lives. Offered: jointly with SISJE 438.

WOMEN 440 Reading Native American Women’s Lives (5) I&S Jacobs, Ross Seminar based on social science writings, autobiographies, biographies, and fiction written by, with, or about indigenous women of the United States and Canada. Offered: jointly with AIS 440.

WOMEN 442 Images of Natives in the Cinema and Popular Cultures (5) I&S/VLPA Ross Cultural examination of images of native people in cinema and popular culture based on social science writings and films by or about natives in the United States and Canada. Offered: jointly with AIS 442.

WOMEN 447 Economics of Gender (5) I&S Rose Microeconomic analysis of the sources of gender differences in earnings, labor force participation, occupational choice, education, and consumption. Economic theories of discrimination, human capital, fertility and intrahousehold resource allocation. Economics of the family in developed and developing countries. Prerequisite: 2.0 ECON 300. Offered: jointly with ECON 447.

WOMEN 450 Language and Gender (5) I&S, VLPA Bilaniuk Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with ANTH 450/LING 458.

WOMEN 451 Latina Cultural Production (5) I&S/VLPA Explores the expressive culture of Chicana/Mexican American/ Latina women in the United States. Cultural and artistic practices in home and in literary, music, film, spoken word, performing and visual arts. Focuses on how Chicana/Latina writers and artists re-envision traditional Iconography. Offered: jointly with CHSTU 410.

WOMEN 453 Lesbian Lives and Culture (5) I&S An exploration and overview of lesbianism in historical, social, cultural, and interpersonal contexts. Prerequisite: either WOMEN 200 or WOMEN 206.

WOMEN 454 Women, Words, Music, and Change (5) I&S/ VLPA Jacobs Comparative analysis of use of myths, tales, music, and other forms of expressive culture to account for, reinforce, and change women’s status and roles. Recommended: WOMEN 353. Offered: jointly with ANTH 454.

WOMEN 455 Contemporary Feminist Theory (5) I&S Barlow Raises the question of how political contexts condition the way some ideas become theory. Emphasizes the present crises in thinking about a transnational feminism.

WOMEN 456 Feminism, Racism, and Anti-Racism (5) I&S Examines meaning of racism and feminism in women’s lives in an international context. Building upon an analysis of racial hierarchies and institutionalized racism, explores strategies used by women engaged in feminist and anti-racist activism. Prerequisite: WOMEN 200.

WOMEN 457 Women in China to 1800 (5) I&S Ebrey Gender in Chinese culture, women’s situations in the patrilineal family system, and the ways women’s situations changed as other dimensions of China’s political system, economy, and culture changed from early times through the nineteenth century. Offered: jointly with HSTAS 457.

WOMEN 458 Ideologies and Technologies of Motherhood (5) I&S Examines how motherhood is culturally constituted, regulated, and managed within various ideological and technological milieus. Uses ethnographies from anthropology and case studies from feminist legal theory. Topics include slave mothers, surrogate mothers, lesbian mothers, transracial mothers, co-mothers, teen mothers. Prerequisite: WOMEN 200. Offered: jointly with ANTH 484.

WOMEN 459 Gender Histories of Modern China, 18th to 20th Centuries (5) I&S Barlow Emergence of modernist social, political, intellectual gender formations in social activism, revolutionary writing, scientific ideologies, economic globalization. Stresses gender difference in colonial modernity, revolutionary movement, communism, post-socialist market society. Relates modern Chinese women to global flows, new division of labor, local and regional experience. Offered: jointly with HSTAS 459.

WOMEN 462 Isak Dinesen and Karen Blixen (5) VLPA Stecher-Hansen The fiction of Isak Dinesen (pseudonym for Karen Blixen) reevaluated in light of current issues in literary criticism, particularly feminist criticism. Close readings of selected tales, essays, and criticism. Offered: jointly with SCAND 462.

WOMEN 468 Latin American Women (5) I&S/VLPA Steele The elaboration of discourses of identity in relation to gender, ethnicity, social class, and nationality, by women writers from South America, Mexico, Central America, and the Caribbean. Testimonial literature, literature and resistance, women’s experimental fiction. Prerequisite: either SPAN 303 or SPAN 316; SPAN 321; one additional 300-level course above SPAN 303. Offered: jointly with SPAN 468.

WOMEN 476 Women and the City (5) I&S England Explores the reciprocal relations between gender relations, the layout of cities, and the activities of urban residents. Topics include feminist theory and geography (women, gender, and the organization of space); women and urban poverty, housing and homelessness; gender roles and labor patterns; geographies of childcare; and women and urban politics. Offered: jointly with GEOG 476.

WOMEN 483 Topics in U.S. Women's History (5, max. 10) I&S Tee
Selected topics in United States women’s history from the nineteenth and twentieth centuries. Prerequisite: either WOMEN 200, WOMEN 283, or WOMEN 383.

WOMEN 485 Issues for Ethnic Minorities and Women In Science and Engineering (3/5) I&S
Addresses issues faced by women and ethnic minorities in physical sciences and engineering. Focuses on participation, barriers to participation, and solutions to those issues for women and ethnic minorities in physical sciences and engineering. Offered: jointly with PHYS 451.

WOMEN 488 Women and/in Science (5) I&S Ginorio
Explores science as a method of inquiry and as a profession while also expanding knowledge about women through the use of biographies of women scientists, discipline-based and feminist critiques, and the psycho-social concept of socially defined identities. Recommended: one Women Studies course and one college-level science course.

WOMEN 489 Ethnicity, Gender, and Media (5) I&S Baldasty
Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with COM 489/AES 489.

WOMEN 490 Special Topics in Women Studies (2-5, max. 15) I&S
Exploration of specific problems and issues relevant to the study of women. Offered by visiting or resident faculty members. Primarily for upper-division and graduate students.

WOMEN 491 Senior Thesis I (3) I&S
Introductory course of the senior thesis sequence required of all majors. Students attend a weekly seminar, select a thesis topic, and contract with an appropriate faculty adviser. Successful completion of the course is contingent on submission of an acceptable thesis proposal. Majors and senior standing only. Offered: A.

WOMEN 492 Senior Thesis II (3) I&S
Second course in senior thesis sequence required of majors. Majors and seniors only. Prerequisite: WOMEN 491. Offered: W.

WOMEN 493 Senior Thesis III (4) I&S
Research and writing of thesis under supervision of a faculty member. Required of all majors. Prerequisite: WOMEN 492. Offered: A.

WOMEN 495 Tutoring Women Studies (5)
Students train to serve as tutors in designated courses. Facilitate weekly group discussions, assist with writing assignments, explain course materials. Credit/no credit only.

WOMEN 496 Global Feminisms: Women Studies International and Indigenous (3-5, max. 10) I&S
Participation in academic programs related to Women Studies emphasizing globalization and study in international contexts or indigenous communities within the United States. Credit/no credit only. Prerequisite: WOMEN 200.

WOMEN 497 Fieldwork in Women Studies (1-15, max. 15)
Internships in local agencies. Allows development of specific skills in area of specialization. Credit/no credit only. Offered: A/WSpS.

WOMEN 499 Undergraduate Research (1-5, max. 10)
Independent study and research supervised by a faculty member with appropriate academic interest. Offered: A/WSpS.

WOMEN 501 History of Feminism (5) Barlow, Yee
Study of feminism from the 18th through the 20th centuries in the national, international, and intranational world system, with a focus on imperialism, colonialism, nationalism, and modernity. Surveys the literature in a global context, supplemented by critical essays and historiographic reviews.

WOMEN 502 Cross Disciplinary Feminist Theory (5) Barlow
Raises questions about how feminism becomes theory and what the relation of feminist theory is to conventional disciplines. Readings exemplify current crises in feminism (e.g., the emergence of neo-materialism; critical race theory; citizenship; identity; transnational and migrancy and questions of post-colonialism) to consider disciplinization.

WOMEN 503 Feminist Research and Methods of Inquiry (5) Allen
Explores appropriate research methodologies for interdisciplinary work. Asks how scholarship is related to feminism as a social movement and to the institutions in which we work. Focuses on how similar objects of study are constituted in different disciplines for feminist scholars. Offered: Sp.

WOMEN 504 Philosophies and Techniques of Teaching (5)
Acquaints students with professional and educational issues of college teaching. Students design a course, including a daily outline, reading materials, evaluation instruments, course activities, assessment plans. Includes weekly teaching exercises as well as videotaping an actual class. Prerequisite: experience as a TA or equivalent. Priority given to Women Studies graduate students.

WOMEN 505 Feminist Publishing (5) Howard
Seminar on feminist academic publishing. Students revise a scholarly paper in preparation for submission to an academic journal and provide critical commentary on other students' scholarly work. Also addresses general and specific issues related to the profession of academic publishing.

WOMEN 512 Critical and Interdisciplinary Approaches to Women's Health (3) Ensign, Schroeder
Critical examination of the historical, socio-political, and scientific influences on women’s health. Issues of sexism, racism, and heterosexism discussed from the perspective of different disciplines. Offered: jointly with NURS 512; W.

WOMEN 513 Seminar in Contemporary Women's Health Issues (1-5, max. 12)
Critical analysis of contemporary and historical literature relevant to health care for women across the life span. Synthesis of a holistic view of women’s health to guide research and practice. Offered: jointly with NURS 513.

WOMEN 534 Feminism and History of Women in China (5)
Explores historical question of gendered subjects in modern China and feminist stories of emancipation of Chinese women asking how these render invisible other kinds of history. Prerequisite: background in China studies or ability to handle Chinese primary sources.

WOMEN 539 Social Movements in Contemporary India (5) Ramanurthy, Sivaramakrishnan
Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women's movements. Includes critiques of development and conflicts over forests, dams, women's rights, religious community, ethnicity, and citizenship. Offered: jointly with SISSA 539/ANTH 539.

WOMEN 544 Criminality and “Deviance” in Native Communities (5)
Seminar based on social science writings and biographies written by and about incarcerated natives and "deviance" in Native communities in the United States and Canada.

WOMEN 546 Gender and Colonialism in Eastern Asia (5) d
Economic-political colonialization, post colonialism, and statist-
gendered citizenship; intra-Asian subimperialism structuring domestic production, family, and gendered subjectivities; humanism and the New Woman; modern contests over new masculinity and new femininity; and the effect of war, imperialist occupation and colonial modernity on interregional flows of ideas, labor, capital, and jurisprudence. Offered: jointly with HSTAS 546; AWSpS.

WOMEN 547 Gender and the New International Division of Labor in Asia Pacific (5)
Shift of the dynamic relation of gender, state, and citizens from modernization (national development) to globalization (intraregional development) strategies in Pacific Asia, 1945 to present. Consumption, service provision, migratory labor, intra-Asian investment, localization. Offered: jointly with HSTAS 547.

WOMEN 553 Discourses in Feminist Anthropology Seminar (5) Jacobs
Exploration of feminist anthropological theories and the works of their critics. Ways of using feminist anthropology in preparation for and conducting fieldwork. Topics include foundations in feminist anthropology, grand theories, variation in feminist theoretical foci within the “four fields,” responses to critics. Prerequisite: graduate standing. Offered: jointly with ANTH 555; W.

WOMEN 566 Discourse and Sex/uality (5)
Seminar-based analysis of discourse and social construction of eroticism/desire in face-to-face/mediatized talk and texts; examination of the reproduction of power, control and ideology through the linguistic and semiotic realization of sex/uality. Offered: jointly with COM 566.

WOMEN 589 Gender, Race, and Communication (5)
Analysis of the role of media in the construction of reality, production processes, and their influence on media representation of women and people of color. Offered: jointly with COM 567.

WOMEN 590 Special Topics (1-5, max. 15)
Offered by visitors or resident faculty as a one-time in-depth study of special interest.

WOMEN 596 Preceptorial for Women Studies Graduate Students (5, max. 15)
Graduate student and faculty member work collaboratively in developing or revising course content and pedagogical approach on a specialized area.

WOMEN 597 Fieldwork in Women Studies (2-5, max. 15)
Supervised ethnographic and other on-site research by women studies graduate students. Women Studies graduate students only.

WOMEN 598 Directed Readings in Women Studies (*, max. 35)
Selected topics for individualized or small group study.

WOMEN 600 Independent Study or Research (*)
Offered: AWSpS.

WOMEN 700 Master’s Thesis (*)
Credit/no credit only. Offered: AWSpS.

WOMEN 701 Master’s Practicum (*)
Offered: AWSpS.

WOMEN 800 Doctoral Dissertation (*)

Associate Dean for Academic Affairs

Men and women embarking on business careers have the opportunity to influence many of the social, political, and economic forces in today’s world. The Business School prepares students for professional careers in management and related disciplines in both the private and public sectors.

The Business School offers an undergraduate program leading to the degree of Bachelor of Arts (BA) in Business Administration and graduate programs leading to the degrees of Master of Business Administration (MBA), Executive Master of Business Administration (EMBA), Technology Management Master of Business Administration (TMMBA), Master of Professional Accounting (MPAcc), and Doctor of Philosophy (PhD). An evening MBA program is also offered. Additionally, the Business School offers a Master of Science degree in Information Systems (MSIS). Business Administration became an independent unit within the University system in 1917. It has been accredited by the American Assembly of Collegiate Schools of Business (now known as the International Association for Management Education) since 1921.

Facilities and Services
Most Business School classes and activities are in four buildings. Balmer Hall, named for Thomas Balmer, former president of the University Board of Regents, contains classrooms and computer labs. There are four computer labs in Balmer Hall that are available to Business School students. Mackenzie Hall, named in memory of Prof. Donald Mackenzie, Chair of the Department of Accounting from 1949 to 1955, contains the Dean’s Office, the Undergraduate Program Office, the Graduate Program Office, the PhD Program Office, Business Administration Computer Services (BACS), Office of Development and External Relations, faculty offices, five department offices, and other business administration program offices. Nearby Lewis Hall contains the Business Connections Center and other faculty and administrative offices. A fourth building, on the north side of Balmer, has three distinct components: the Bank of America Executive Education Center (which includes the James B. Douglas Executive Forum), the Boeing Auditorium, and the Albert O. and Evelyn Foster Business Library.

To serve the continuing education needs of middle- and senior-level managers, the Business School offers a number of certificate programs, either University-initiated or co-sponsored with various community and industry organizations. The Management Program, a nine-month, one night per week program, strengthens understanding and skills in all areas of management and provides an opportunity for successful managers to learn from a distinguished faculty and each other. Short courses and seminars are offered throughout the year, focusing on topics such as leadership, finance and accounting for non-financial executives, and negotiation skills. In addition, the School develops and runs custom programs under contract with individual companies and organizations. Information on continuing education programs may be obtained from the Office of Executive Programs, (206) 543-8560, fax (206) 685-9236, uwexp@u.washington.edu.

International Business Programs
International business programs are coordinated and developed by the School’s Global Business Center. These activities include special graduate and undergraduate certificate programs, the Global Business Program, seminars, internships, business foreign-language programs, special guest-speaker programs, and study tours. Although the Marketing and International Business Department offers a general curriculum in international business, each of the five academic departments within the School maintains faculty with special international teaching and research expertise. Internationally oriented courses are offered by each department.
At the undergraduate level, the School offers the Certificate of International Studies in Business (CISB) Program. Students in the program complete the same demanding business curriculum as other students and enhance this training with foreign language study, area studies, and an international experience. The program requires that students have a solid foundation in one of six language tracks: Chinese, French, German, Japanese, Russian, and Spanish; a seventh custom track for other languages is also an option.

At the MBA level, the Business School offers the Global Business Program (GBP) that provides opportunities for MBA students to build on the international business foundation that every MBA develops through the first year of the program. In addition to international business electives, the GBP includes overseas travel through study tours, quarter-long exchange programs, and international internships. GBP students also participate in the weekly Global Business Forum, which brings top international business leaders to campus to discuss important issues facing their companies and industries.

Questions regarding these programs may be directed to the Program Assistant, CIBER, 303 Lewis, (206) 685-3432, fax (206) 685-4079, uwciber@u.washington.edu.

Entrepreneurship Programs

The focus of the Business School’s entrepreneurship programs is on nurturing skills that create innovative ideas, new business opportunities, and new business growth. These programs are developed through special courses, research, academic certificate programs, a high-tech entrepreneurship speaker series, internships, and collaboration opportunities with local businesses.

The Center for Technology Entrepreneurship (CTE) is open to both undergraduate and graduate students from the Business School as well as other schools and colleges of the University. Undergraduates who wish to complete the option must be admitted to the Business School. Graduate students who wish to complete this specialization must participate in the CTE consulting club, attend the High-Tech Entrepreneurship Speaker Series, and participate in the Business Plan Competition. Contact CTE for more information at 206-685-9868, cte@u.washington.edu.

The Business and Economic Development Program (BEDP) matches undergraduate and graduate student consulting teams with small-business owners in Seattle’s inner city to implement business development projects. Through courses, independent study options, summer internships, and hands-on projects with inner-city entrepreneurs, students explore the challenges faced by central city businesses, while also providing valuable assistance. Questions about the Business and Economic Development Program can be directed to the program office at (206) 543-9327.

The University of Washington Retail Management Program (RMP) prepares interested students for first-line management careers in the retail industry. This interactive program includes visiting speakers, executives-in-residence, and store visits. Participating students complete a series of courses and a summer internship. The various facets of the program are designed to provide students with a comprehensive background in retail management. Questions about the Retail Management Program can be directed to the program office at (206) 685-2755.

Business Career Center

The Business Connections Center coordinates all MBA and MPAcc career services. These include career counseling and career management workshops, the administration of special career events such as career fairs, company presentations, on-campus MBA and MPAcc recruitment, and a job-listing service. The Business Connections Center also administers alumni and executive mentoring programs. Questions regarding these programs and services may be directed to the center’s office, 202 Lewis, (206) 685-2410.

Undergraduate business-career counseling and on-campus recruitment is provided by the UW Center for Career Services, 134 Mary Gates Hall, (206) 543-0535.

Instructional Resources Office

The Instructional Resources Office promotes excellence in teaching by providing resources in current practice and research in teaching and learning. The office serves faculty and teaching assistants with individual consultations, coordinates a teaching preparation program for doctoral students, and offers assistance with instructional innovations. Questions can be directed to the Instructional Resources Office, 317 Lewis, (206) 685-9608.

The Business Writing Center

The mission of the Business Writing Center is to help undergraduates develop the writing skills essential to professional success. The center offers one-on-one tutoring, workshops and peer feedback for special class projects, and opportunities for advanced students to be peer tutors. Questions can be directed to the center’s office, 337 Lewis, bwrite@u.washington.edu.

Honor Societies

Beta Gamma Sigma is the national scholastic honor society in the field of business. Election to membership is available to both undergraduate and graduate students in business. Selection is based on outstanding scholastic achievement.

Beta Alpha Psi is the accounting honor society. Membership is based primarily on scholastic achievement, but some community service is also required. Beta Alpha Psi provides a mechanism for students, professionals, and educators to meet on both formal and informal bases.

The Business School offers the following programs of study:

- The Bachelor of Arts in Business Administration degree with options in accounting, entrepreneurship, finance, human resources management, information systems, and marketing.

Bachelor of Arts in Business Administration

Suggested First- and Second-Year College Courses: English composition, calculus, ECON 200, ECON 201. In addition, classes to fulfill general education requirements which develop strong
writing and analytic skills. ACCTG 215, ACCTG 225, MGMT 200, and Q METH 201 are suggested second-year college work.

**Department Admission Requirements**

Applicants are considered in three admission groups, the Freshman Admission Program (FRAP), the Early Admission Group (EAG), and the Upper-Division Admission Group (UAG), described below. The following requirements apply to the Early Admission Group, and the Upper-Division Admission Group:

- A minimum cumulative GPA of 2.50 for all college coursework.
- A minimum cumulative GPA of 2.50 for all required business courses.
- A student who has previously attended the UW also must have GPAs of at least 2.50, both UW cumulative and in UW business courses.

Since eligible applicants exceed the space available, acceptance is competitive. Admission will be based on evaluation of five factors:

- for Early Admission Group, pre-college test scores from SAT or ACT overall scholastic record, grades in pre-business courses, described below written communication skills, evidence of leadership skills, community activities, and the promise of achievement in a business or professional career.

Consideration is also given to such factors as economic and educational disadvantage, significantly higher recent grades, rigor of courses taken, and exceptional extracurricular activities or work experience.

Admission for FRAP, EAG, and UAG is offered once a year, for autumn quarter only. A Business School application, together with all supporting materials, must be on file by April 5. Records of all course work completed by the deadline must be submitted at the time of application, regardless of admission group.

**Freshman Admission Program (FRAP)**

The Business School enrolls a small number of students each year directly out of high school, prior to necessary completion of any university-level prerequisites. Freshmen applicants to the University listing Business Administration as their intended major are automatically considered. Admission is offered to students with exceptionally competitive academic records, including but not limited to high school GPA and SAT or ACT scores.

**Early Admission Group (EAG)**

This admission path is open to students who began their studies at the UW as freshmen, have been enrolled no more than three quarters, and have completed 30 numerically graded credits at the UW. Courses completed prior to applying must include ECON 200; MATH 112, MATH 124, MATH 134, or MATH 145; an approved English composition course chosen from C LIT 240, ENGL 104-105, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281; and pre-college test scores (ACT or SAT). General education or elective courses can be taken to complete the minimum of 30 graded credits.

**Upper-Division Admission Group (UAG)**

Students must present a minimum of 60 academic credits at the time of application including the following graded credits: ACCTG 215; ECON 200 or ECON 201; MATH 112, MATH 124, MATH 134, or MATH 145; an approved English composition course, chosen from C LIT 240, ENGL 104-105, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. In addition, the following courses must be completed prior to admission in autumn quarter: ACCTG 225; ECON 200 and ECON 201; MGMT 200; QMETH 201. Applicants should take general education or elective courses to complete the minimum of 60 graded credits.

Students admitted to the UW as freshmen are expected to take ACCTG 215, ACCTG 225; MGMT 200; and QMETH 201 in residence.

Qualified applicants with at least 45 credits and a minimum 2.85 GPA who meet University admission requirements, but not Business School requirements, are eligible to be placed in the College of Arts and Sciences as pre-business majors.

The University of Washington provides equal opportunity in education without regard to race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam veteran in accordance with University of Washington policy and applicable federal and state statutes and regulations.

**Graduation Requirements**

180 credits as follows:

**General Education Requirements:** The following must be selected from the University Areas of Knowledge courses: 20 credits in Visual, Literary, & Performing Arts; 20 credits in Individuals & Societies, including 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201); 20 credits in the Natural World, including 5 credits in calculus (MATH 112, MATH 124, MATH 134, or MATH 145); most students need precalculus before taking college calculus (some precalculus courses qualify for the Natural World requirement); 5 credits in English composition.

Students from community colleges in Washington should check the Transfer Guide or consult with their community college adviser for equivalent courses. Students from other four-year schools should see an adviser at their school. Students entering the Business School under the terms of the Associate Degree Agreement may apply courses selected from the community college’s breadth list toward the general education requirements.

**Business School Requirements:** ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300; MGMT 320; MGMT 430; and 300- or 400-level business electives (or area of concentration) to bring total number of business credits to 72; two writing-intensive courses, one from B CMU 301, B CMU 302, B CMU 410, ENGL 281, ENGL 381; one from English composition, or from the remaining three courses listed immediately above, or from any W course. No more than 6 lower-division business elective credits; a minimum of 90 non-business credits, which may include up to 14 credits economics and up to 9 credits of statistics but not GEN ST 350; a cumulative GPA of at least 2.50 in all business credits earned at the UW; and a cumulative GPA of 2.50 for all UW credits. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits at the UW. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Business School Undergraduate Program Office prior to applying.

**Accounting Option:** The notation “Accounting” is indicated on the permanent record, or transcript, of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: ACCTG 301, ACCTG 302, ACCTG 303, ACCTG 311, ACCTG 320, ACCTG 411, ACCTG 421, ACCTG 440, and at least one 400-level accounting elective, excluding ACCTG 401, ACCTG 490, ACCTG 495, and ACCTG 499. Students who have completed ACCTG 505 may not apply to the Accounting Option.
Finance Option: The notation “Finance” is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: one course from FIN 450, FIN 453, or FIN 454; either FIN 460 or FIN 461; four additional courses chosen from the 400-level FIN courses, B ECON 301 or ECON 301, or the 400-level B ECON courses, excluding FIN 490, FIN 495, FIN 499, B ECON 490, and B ECON 499.

Human Resources Management Option: The notation “Human Resources Management” is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: MGMT 311, MGMT 411, MGMT 412, and two of the following courses: MGMT 323, MGMT 401, MGMT 402, MGMT 403, MGMT 404, or MGMT 413.

Information Systems Option: The notation “Information Systems” is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: I S 310, I S 320, I S 460, I S 470, and I S 480.

Marketing Option: The notation “Marketing” is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: MKTG 450, MKTG 460, and three additional MKTG electives, excluding MKTG 490, MKTG 495, and MKTG 499. It is recommended that students take MKTG 450 and MKTG 460 before they take the other electives.

Center for Technology Entrepreneurship (CTE): The notation “Entrepreneurship” is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes one of two pathways with a minimum cumulative GPA of 2.50.

All students are required to complete ENTRE 370 and two of the following three courses: MKTG 455, FIN 457, or MKTG 335. Entrepreneurship students must take MGMT 430 to complete one of the core requirements for the Business School. Students in the Business Creation pathway must complete ENTRE 472 and ENTRE 473. Students in the Business Growth pathway must complete ENTRE 475 and ENTRE 476.

Admission to the options: Students can apply to one option at the same time they apply to the Business School. Continuing Business School students can apply during publicized application periods. If demand for the option exceeds the number of spaces available, students will be considered based on the factors identified for admission to the Business School and on their grade-point average in all previous option-specific courses.

Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** A business education develops important communication and interpersonal skills. The ability to express an idea, negotiate a settlement, motivate others, manage time, and build collaborative networks distinguishes the most successful business people. UW Business School students learn to recognize and define problems, examine data, and persuasively communicate their ideas to achieve results in organizations and people's lives. Regardless of post-graduation path — be it climbing up the corporate ladder, starting a company, joining the Peace Corps, entering law school, or becoming a doctor — a business education will help immeasurably.

- **Instructional and Research Facilities:** The Foster Business Library houses an extensive collection of books, reference tools, and journals necessary to the study of business. Balmer Hall has wireless capabilities for faculty and student use and houses three computer labs with 120 workstations. The virtual NASDAQ trading room equipped with trading and analytical software allows students to simulate stock transactions using real-time market data and stock quotes so they can study diversification, hedging, and other investment strategies. The New Venture Creation Lab represents a new paradigm for integrating entrepreneurial education with technology development and hands-on experience. The lab features computer workstations, proprietary software, online technology and market assessment tools and data to assist student entrepreneurial efforts. The Business Writing Center provides free consultations on business class writing assignments, cover letters, and resumes.

- **Honors Options Available:** Honors students benefit from a sense of community generated by honors seminars, as well as from the academic challenge associated with more rigorous study. The program requirements are flexible, challenging students to explore business topics in greater depth. Students entering the Honors program become candidates for the degree “With College Honors” or “With Distinction.”

- **Research, Internships, and Service Learning:** The Business School encourages student participation in internships to supplement in-class learning experiences. For more information about internship guidelines and application procedures, visit depts.washington.edu/bschool/internships/.

- **Department Scholarships:** The Business School awards approximately 90 undergraduate scholarships. Some are general scholarships while others are specific to options or areas of concentration. Only students admitted to both the UW and the Business School are eligible to receive awards. Applicants are considered for all scholarships for which they meet the minimum qualifications and specific criteria. Although financial need is not a requirement for all business scholarships, most are awarded on the basis of need. (The FAFSA must be filed with the Office of Student Financial Aid.) The Business School scholarship application is due April 5.

- **Student Organizations/Associations:** Chapters of Alpha Kappa Psi, Association of Black Business Students, Undergraduate Entrepreneurship Club, International Association of Students in Economics and Business (AESEAC), American Marketing Association, Business Information Technology Society, Dow Dawgs Investment Club, Hispanic Business Association, Society for Human Resources Management, Business and Economic Development Program Leadership Team, Undergraduate Finance Club, Undergraduate Management Consulting Association, University Sales Club, and Undergraduate Leadership Forum provide opportunities for undergraduate students to meet informally and to participate in a variety of projects and events.

Of Special Note: **Double Baccalaureate and Second Baccalaureate**

Students who wish to earn more than one baccalaureate degree should consult an academic adviser in the Business School Undergraduate Program Office, either during or before their junior year. Persons seeking a second baccalaureate should apply at the University's Office of Undergraduate Admissions. To be considered, applicants must complete by quarter of entry the same prerequisites for admission as applicants for the first baccalaureate degree. Since the number of eligible applicants exceeds that for which space is available, acceptance will be competitive, based on the criteria listed above for selection of first baccalaureate degree applicants. The Business School will use the GPA for the last 90 credits earned.
The Graduate School of Business Administration offers programs of study leading to the advanced degrees of Master of Business Administration, Master of Professional Accounting, Master of Science in Information Systems, and Doctor of Philosophy. Four programs can lead to an MBA degree: the full-time program, the evening program, the Technology Management MBA program, and the Executive MBA program.

Master of Business Administration

Executive Director
Dan Poston
110 Mackenzie Hall, Box 353200
206-543-4661
mba@u.washington.edu

The full-time Master of Business Administration degree program has been designed for students who are preparing for a professional career in management. A period of two academic years, or 96 academic credits, is required for most students to complete the MBA program. The program consists of 48 credits of required first-year courses and 48 elective credits. The student may take no more than 24 credits in any one elective area. The evening MBA program is targeted toward fully employed college graduates who seek a management degree that can be earned outside their regular working hours. Instruction takes place two evenings per week and students typically take two courses per quarter. The program consists of 80 academic credits, with normal completion of degree requirements in ten quarters.

Special Programs

Within the MBA program, there are options for special study: Global Business Program; E-Business Program, and the Program in Entrepreneurship and Innovation. The following concurrent degree programs are also available: MBA/JD with the School of Law, MBA/MAIS with the Henry M. Jackson School of International Studies, MBA/MSE with the College of Engineering’s Program in Engineering and Manufacturing Management, and MBA/MHA with the School of Public Health and Community Medicine.

Executive Master of Business Administration

Director
Louise Kapustka
206-685-1333
emba@u.washington.edu

Since the autumn of 1983, the Executive MBA Program has provided an additional pathway to the Master of Business Administration degree. The EMBA program provides an intensive executive-development experience to a select group of midcareer managers who continue to work full-time while pursuing the MBA degree. Candidates for this two-year program should have seven or more years of increasingly successful work experience including three to four years in management, and currently hold mid- or top-level management positions. They are typically sponsored by their organizations and have been identified as employees with high potential to advance as general managers. Students are selected to ensure diversity of industry, functional areas and organizational size.

While the scope of the curriculum is comparable to that of the regular MBA program, the pace is more intense and the perspective is that of a general manager. There are 21 required courses and no electives.

Applications are accepted throughout the year, with an application deadline of April 15 for the class beginning each autumn. Late applications are handled on a space-available basis.

The Technology Management Master of Business Administration

Director
206-221-6995
tmmba@u.washington.edu

The Technology Management MBA Program is designed for professionals who are employed in technology companies or who work in technology jobs in more traditional businesses. The curriculum combines the essential components of management education with a specialized focus on high-tech industries. It is structured for individuals who want to play a broader role in management and are seeking the necessary management skills and business knowledge. The program is focused on real-world projects and analyses, collaborative learning in study groups and extensive participant interaction in the classroom. Candidates for this 18 month program have technology experience and upward career progression.

The Technology Management MBA Program provides an intensive educational experience to professionals who will continue to work full-time while pursuing their MBA degree. The TMMBA Program runs six consecutive quarters of instruction-beginning every January and ending the next year in June. Three-hour sessions are held once a week on a mid-week evening and six-hour sessions are scheduled two Saturdays per month. There are 68 required credits of which 6 are electives. Additionally, two residential sessions are offered one at
the beginning of the program and one at the end. Candidates may be sponsored by their organizations or apply on their own.

Each year approximately 50 students are accepted into the TM MBA Program. Applications are accepted throughout the year. Please contact the TM MBA office to find out the application deadlines for the upcoming class.

Master of Science in Information Systems
Director
Sherri Anderson
206-543-2446
msis@u.washington.edu

The Master of Science in Information Systems Program is designed for business and technology professionals who want to develop expertise in using information systems to solve critical business problems. The MSIS is a professional degree that integrates the use of information systems and organizational practices. It is designed for business and technology professionals who would like to enhance their information systems abilities or who desire a career change into the technology field. A graduate of this program would be prepared for positions such as Business Analyst, Functional Analyst, IS Liaison, Project Manager, or IS consultant.

Technology plays a central role in both the content and delivery of the MSIS Program. It provides students with exposure to state-of-the-art information technologies. Virtually all program courses require hands-on student work with a wide variety of IT-based systems and applications. Additionally, the curriculum focuses on key managerial issues such as project/teams management, collaboration, and the ability to justify information systems investments using financial, strategic, as well as organizational arguments. The four main components of the curriculum are foundation courses, IS core, career tracks and the career track practicum. The program requires 68 credits based on a student’s educational background and prior experience.

The program does not require specific undergraduate majors or work experience, just a strong desire to build a career around the development of IT-based solutions. Students continue to work full-time while pursuing their MSIS degree. The MSIS Program runs for a consecutive 6 quarters, spanning 18 months. It begins in January each year and ends the following year in June. Classes are held once a week on a mid-week evening for three hours and sessions are scheduled two Saturdays per month. Candidates may be sponsored by their organizations or apply on their own.

This new program will admit its first class in January, 2003 with approximately 50 students. Applications are accepted throughout the year. Please contact the MSIS office for more information.

Master of Professional Accounting
Managing Director
Francine Shafer
231 Mackenzie
206-616-4964

The Master of Professional Accounting (MPAcc) prepares students for high-level careers with major accounting and consulting firms, governmental agencies, and industry. Students with undergraduate degrees in accounting may complete the program in three quarters. Students with no prior business background must take an expanded version of the program. Enrollment is limited to 25 to 30 students in each of two tracks—Accounting and Assurance (A&A) and Taxation. MBA students with a strong interest in accounting and taxation may earn a joint MBA/MPAcc degree.

Doctor of Philosophy
Program Coordinator
Jaime Banaag
102 Mackenzie

The Ph.D. program in business administration is a research-based program designed to train scholars interested in academic careers, although this training is also useful for individuals seeking research positions in business and government, as well as in consulting firms. With the guidance of faculty members who have similar interests, Ph.D. students complete a program of formal coursework (a minimum of 18 courses) and participate in doctoral seminars, independent study, and research. A faculty supervisory committee is appointed early in the program to assist each student in constructing a course of study that fits that individual’s background and interests. Students select one major area of specialization and complete requirements in two or three additional minor areas that support their major area of specialization (including areas outside the Business School, such as economics, psychology, and mathematics). Throughout the program, doctoral students receive support and training that hone their skills as teachers and course developers. Major areas of concentration include accounting, finance, human resource management and organizational behavior, marketing, information systems, operations management, operations research, and strategic management. All doctoral students are required to have research methods as one of their minor areas.

Doctoral study is full-time and year-round, and students are admitted autumn quarter only. Most candidates will require four to five years to complete the program. The School’s goal is to make financial aid available, in the form of research and teaching assistantships, to all of its doctoral students. In addition to service appointments, fellowships are available on a competitive basis to support students engaged in their dissertation research during the final part of their programs.

Special Requirements

Applicants to graduate business programs are required to submit scores on the Graduate Management Admission Test. Those admitted to the MBA program must demonstrate understanding of the fundamental concepts of calculus.

Accounting
Faculty

Adams, Helen
Lecturer of Accounting
PhD, University of Washington, 1986; BA, Macquarie University, North Ryde, NSW Australia, (with honors) 1977

Bowen, Robert M.

Course Descriptions

ACCTG 199 Accounting for Problem Solving (2, max 4) Supplementary lectures, discussions, and problem solving sessions in introductory accounting. Enrollment priority to EOP students and others by permission. Credit may not be applied to fulfill specific program requirements. Credit/no credit only. Corequisite: ACCTG 215.

ACCTG 225 Fundamentals of Managerial Accounting (5) Analyses and evaluation of accounting information as part of the managerial process of planning, decision making, and control. Concentrates on information useful to enterprise managers. Prerequisite: either ACCTG 210, ACCTG 220, or ACCTG 215; ECON 200; may not be repeated.

ACCTG 301 Intermediate Accounting I (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 225; may not be repeated.

ACCTG 302 Intermediate Accounting II (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 301; may not be repeated.

ACCTG 303 Intermediate Accounting III (3) Concepts and principles of financial accounting. Analysis of controversies and problems related to the measurement of enterprise income and asset and liability valuation. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 311 Cost Accounting (3) Introduction to the theory of cost accounting; job order, process, and standard cost systems; overhead accounting; problems in accumulation and allocation of costs; decision making with cost data. Prerequisite: 2.0 in ACCTG 301; may not be repeated.

ACCTG 320 Introduction to Accounting Information Systems (3) Concepts of accounting information systems in organizations. Processes of analyzing and designing accounting information systems, with emphasis on those using computer facilities. Internal controls and auditing considerations. Prerequisite: 2.0 in ACCTG 225; I S 300 which may be taken concurrently; may not be repeated.

ACCTG 330 Introduction to Accounting Information Systems (3) Concepts of accounting information systems in organizations. Processes of analyzing and designing accounting information systems, with emphasis on those using computer facilities. Internal controls and auditing considerations. Prerequisite: 2.0 in ACCTG
ACCTG 375 Topics in Financial Reporting (4)
Critical examination of the uses and limitations of general purpose financial statements that have been prepared in accordance with generally accepted accounting principles. Not open for credit to accounting majors or to students who have completed 301. Prerequisite: either 2.0 in ACCTG 225 or 2.0 in ACCTG 230; may not be repeated.

ACCTG 401 Federal Income Tax Factors in Business Decisions (3)
Service course in taxation recommended for the junior year for non-accounting majors. May also be taken by MBA students for graduate credit. Not open to accounting majors. Prerequisite: either 2.0 in ACCTG 225 or 2.0 in ACCTG 230; may not be repeated.

ACCTG 411 Auditing Standards and Principles (3)
Intensive introduction to the attest function in society today. The environment, the process, and the report of the public auditor are analyzed. Potential extensions of the attest function are examined. Prerequisite: 2.0 in ACCTG 302; 2.0 in ACCTG 311; 2.0 in either ACCTG 320 or ACCTG 330; may not be repeated.

ACCTG 420 Database Management for Accounting (3)
Continuation of ACCTG 320, covering database and processing architectures, database reliability, database recovery, database security, database administration, internet and intranets, and network security. Not available for credit to information systems majors or to students who have completed I S 470 and 480. Prerequisite: 2.0 in ACCTG 320; may not be repeated.

ACCTG 421 Tax Effects of Business Decisions (3)
Issues in taxation, including tax considerations in business decision making, tax effects of business transactions, taxation of compensation, fringe benefits, capital gains, fixed asset transactions, disposition of business distribution from corporations. Prerequisite: 2.0 in ACCTG 320; may not be repeated.

ACCTG 440 Accounting and Financial Management Decisions (3)
Business financial planning with an emphasis on the role of accounting information in financial decisions. Topics include the accounting and finance aspects of business valuation, short and long term financing, short and long term investments, alternative types of debt and equity financing, and related topics. Prerequisite: 2.0 in ACCTG 302; 2.0 in ACCTG 311; FIN 350; may not be repeated.

ACCTG 450 Business Taxation (3)
Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Includes corporate distributions, liquidations, and reorganizations. Prerequisite: 2.0 in ACCTG 421; may not be repeated.

ACCTG 451 Individual Income Taxation (3)
Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual income tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees. Prerequisite: 2.0 in ACCTG 421; may not be repeated.

ACCTG 460 Advanced Cost Accounting (3)
Advanced analysis of cost and management accounting problems; special applications of cost accounting techniques for management planning and control; current developments in cost accounting. Prerequisite: 2.0 in ACCTG 311; may not be repeated.

ACCTG 470 Strategic Overview of Accounting (3)
Provides a strategic overview of accounting functions in industry, government, and public accounting. Includes comprehensive exam covering all required courses in the accounting major. Prerequisite: ACCTG 321; ACCTG 421 which may be taken concurrently; ACCTG 440 which may be taken concurrently; may not be repeated.

ACCTG 471 Internal Auditing (3)
Independent appraisal function established within an organization. Role and nature of internal auditing; intensive review of internal control; management effectiveness audits; and financial audits from the point of view of the internal auditor. Prerequisite: 2.0 in ACCTG 411; may not be repeated.

ACCTG 480 Accounting for Not-for-Profit Organizations (3)
Fund and budgetary accounting as applied to public sector organizations, such as governments, foundations, hospitals, and colleges. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 485 Advanced Financial Accounting (3)
Accounting for partnerships, accounting for business combinations, parent-subsidiary and branch relationships, foreign exchange. Prerequisite: 2.0 in ACCTG 302; may not be repeated.

ACCTG 490 Special Topics in Accounting (1-6, max. 6)
Special topics of current concern to faculty and students. Offered only when faculty is available and student interest is sufficient. Class is announced in advance of scheduled offerings.

ACCTG 495 Accounting Internship (1-4, max. 8)
One quarter’s internship with a certified public accounting firm, industrial organization, or government agency. Credit/no credit only. Prerequisite: ACCTG 301.

ACCTG 499 Undergraduate Research (1-6, max. 9)
Arranged and supervised by individual members of the faculty.

ACCTG 500 Financial Accounting (4)
Introduction to concepts and procedures underlying determination and presentation of information for financial decisions by investors and other decision makers outside the business enterprise. Study of problems of valuation, income determination, and financial reporting.

ACCTG 501 Managerial Accounting (4)
Study of the generation and the use of accounting information within the firm for purposes of planning and controlling operations. Topics covered include cost concepts, responsibility accounting systems, cost control, and the use of accounting information in short- and long-term management decision problems. Prerequisite: ACCTG 500.

ACCTG 503 Introduction to Accounting for Managers (4)
Noreen, Sundem
Provides potential managers with a basic knowledge of financial and managerial accounting. Focuses on the use, not the preparation, of accounting information. Examples presented for a variety of for-profit and nonprofit organizations.

ACCTG 505 Intensive Analysis of Accounting Principles and Practices (18)
Covers the subjects in the required core for undergraduate accounting majors: intermediate accounting, advanced accounting, cost accounting, auditing, and tax accounting. Credits will not count toward MBA degree. Prerequisite: ACCTG 215 and ACCTG 225 or equivalent, or permission of instructor.

ACCTG 510 Introduction to Financial Statement Analysis (4)
Extension of the core financial accounting material, focusing on the use of financial statements to assess the financial position and prospects of companies. Examines the critical financial reporting issues that influence interpretation of financial statements. Prerequisite: either B A 502, ACCTG 500, or permission of
instructor.

ACCTG 511 Advanced Financial Statement Analysis (4)
Covers accounting issues related to firm valuation and use of financial statement information to assess the risks and rewards of various firm strategies. Prerequisite: ACCTG 510 or permission of instructor.

ACCTG 513 Tax Effects of Business Decisions (4)
Importance of tax considerations in making business decisions. Covers regulatory and economic impacts of the U. S. tax system. Prerequisite: either B A 502, ACCTG 500, or permission of instructor.

ACCTG 515 Problems in Managerial and Cost Accounting (4)
Extension of the core management accounting material. Uses cases and discussion to analyze costing techniques, use of accounting data in planning and evaluation managerial performance, and use of accounting data in short-run and long-run decisions. Prerequisite: either B A 502, ACCTG 501, or permission of instructor.

ACCTG 517 Current Issues in Accounting (2)
Analyzes recent literature, both professional and academic, in accounting. Focuses on the impact of recent events on the accounting profession. Prerequisite: either B A 502 or ACCTG 500, ACCTG 501, or permission of instructor.

ACCTG 519 Seminar in Financial Control Systems (4)
Design and administration of formal information systems to aid the planning and control process in large organizations; formulation of divisional financial goals and control criteria; measurement of divisional performance and problems of goal congruence; administration of new investment programs. Prerequisite: B A 502 or permission of graduate office.

ACCTG 520 Information Quality and Assurance Services (4)
Introduction to assurance services with a focus on financial statement audits. Auditing concepts and procedures, and the role of audits in financial markets.

ACCTG 521 Cases and Issues in Information Quality and Assurance Services (4)
Analysis of cases and discussions of current issues dealing with assurance services. Prerequisite: ACCTG 520.

ACCTG 522 Advanced Financial Reporting (4)
Advanced problems related to the measurement of enterprise income and asset and liability valuation.

ACCTG 523 Advanced Financial Analysis (4)
Explores the use of published financial reports by decision makers external to the firm (e.g. investors and creditors). Emphasis is on traditional and statistical analyses of financial statements for the purposes of making economic decisions. Prerequisite: ACCTG 522.

ACCTG 524 Individual Taxation (4)
Political, economic, and social forces influencing federal income taxation, role of taxation in personal decisions. Coverage of individual tax matters, including business and investment income, business and personal deductions, property transactions, and tax issues of employees.

ACCTG 525 Business and International Taxation (4)
Issues of taxation for entities other than individuals, including corporations, subchapter S corporations, partnerships, estates, and trusts. Included corporate distributions, liquidations, and reorganizations. International dimensions of business taxation are introduced. Prerequisite: ACCTG 524.

ACCTG 526 Preparation for IPOs and SEC Reporting (4)
Introduces legal issues pertaining to the accounting profession. Discusses the role of operations of the SEC with an emphasis on its functions in regulating information disclosure. Prerequisite: ACCTG 522.

ACCTG 527 Communications in Professional Accounting (4)
Introduction to the communications practices of professional accountants. Development of effective written and oral skills employed in accounting presentations such as audit reports. Study of results of organizational communications research applicable to accounting firms and units within firms.

ACCTG 530 Tax Issues in Property Ownership (4)
Analysis of gain and loss realization, recognition, and characterization of such. Detailed exploration of statutory and case law regarding acquisition, ownership, and disposition of assets. Treatment of capital and ordinary gains and losses. Timing issues regarding deferral transactions and installment reporting are analyzed. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 531 Timing and Periods of Taxation (3)
Analysis of the cash and accrual methods of accounting, choice of taxable period and multi-period transaction analysis. Consideration of statute of limitations and mitigation thereof. Details of passive activity losses. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 533 Procedural and Policy Issues (3)
Analysis of the procedures of Federal taxation: assessment, collection, and refund claims. Detailed exploration of the rules governing the statute of limitations and the mitigation thereof. An introduction to tax policy considerations is given. Tax penalties are explored. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 534 Fundamentals of Corporate Taxation (3)
Detailed analysis of contribution of assets to corporations. Calculation of recognized gains and basic effects of asset contributions. Treatment of income and deduction items of corporate operations. Analysis of distribution of assets to shareholders with respect to their stock. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 535 Advanced Issues in Corporate Taxation (3)
A continuation of 534. Fundamentals of moving assets out of and within corporate solution. Basics of corporate reorganizations: acquisitive and divisive. The details of the election to obtain (or avoid) the Section 338 election are explored in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 534 or permission of instructor.

ACCTG 536 Advanced Issues in Corporate Taxation (3)
Continuation of 534 and 535. Study of complex issues in corporate taxation planning. Substantial portion of course involves resolving case studies to improve analytic skills and to interrelate disparate corporate planning opportunities. Corporate reorganizations are analyzed in detail. Prerequisite: undergraduate accounting concentration or equivalent; ACCTG 535 or permission of instructor.

ACCTG 537 Income Taxation of Conduits I (3)
Tax consequences to owners and entity from formation, operation, distributions from, and liquidation of partnerships and S corporations. Study of taxable and tax-free formations, nature of “bottom line” income and separately stated items, changes to owners’ tax basis, basics of non-liquidating and liquidating distributions. Prerequisite: undergraduate accounting concentration or equivalent. Offered: W.

ACCTG 538 Income Taxation of Conduits II (3)
A continuation of 537. Study of complex issues in partnership and S
corporation taxation. Substantial portion involves resolving case studies to improve analytic skills and interrelate partnership and S corporation planning issues. Sections 751(b) and 736 examined in detail. Prerequisite: undergraduate accounting concentration or equivalent; 537 or permission of instructor.

ACCTG 539 Tax Research and Decision Making (4)
Decision-making processes in relation to problems of taxation. Tools of tax analysis and research and the communication of conclusions flowing from professional tax work. Role of the professional accountant in client business transactions and in negotiations with taxing authorities is highlighted and simulated on the basis of actual case histories. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 540 Fundamentals of International Taxation (3)
Covers the basic tax considerations of U.S. taxation of income earned worldwide by U.S. taxpayers as well as the tax issues regarding U.S. taxation of non-resident aliens for income earned in the United States. Source rules and treaty considerations examined in detail. Locating the proper source of income and optimal tax rates analyzed.

ACCTG 541 Communications for Taxation Professionals (4)
Introduction to the communications forms and to practices professional accountants and accounting managers. Development of effective written and oral skills employed in accounting presentations, such as audit reports and consultants’ reports. Study of results of organizational communications research applicable to accounting firms and/or units within firms. Prerequisite: undergraduate accounting concentration or permission of instructor.

ACCTG 543 Income Taxation of Trusts and Estates (3)
Development of fundamental skills regarding income taxation of trusts and estates. Calculation of distributable net income and the distribution deduction for the fiduciary entity. Basic analysis of the throwback rules. Case studies. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 547 Estate and Gift Taxation (3)
Development of fundamental knowledge of the unified transfer tax on the transfer of property from one person to another. Calculation of gross estate, adjusted gross estate, and taxable estate. Calculation of gift and estate taxes owing. Discussion of estate planning concepts. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 548 State and Local Taxation (3)
Differences in definition of income at state and federal levels, treatment of state income taxes, piggyback for state income taxes, state tax rates, minimum tax, double taxation of income by home and host states, Uniform Division of Income for Tax Purposes Act, concept of nexus for taxation, multistate tax planning. Offered: S.

ACCTG 549 Employee Tax Problems and Deferred Compensation (3)
Covers the tax issues facing employees and self-employed tax payers, including deferred compensation arrangements, fringe benefit packages, restricted property, independent contractor status, achieving favorable tax treatment of retirement plans, and substantiating employee business expenses. Offered: S.

ACCTG 551 Management Information Systems (4)
Develops the professional accountant’s responsibilities in designing and operating management information systems with an emphasis on accounting systems. Data organization and management, effects on accounting functions, responsibilities for controls and security, and planning and acquisition of system resources. Prerequisite: ACCTG 330, I S 320 and B A 501 or equivalent.

ACCTG 555 Statistical Methods in Professional Auditing (4)
Comparative analysis of the methods of statistical inference used in auditing and incorporation of these methods in the auditor’s decision processes. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 558 Current Financial Accounting and Reporting Issues (4)
Develops professional-level ability to understand, analyze, and report upon selected political, economic, social, and legal dimensions of current financial accounting and reporting issues. Issues vary each year. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 559 Advanced Auditing Problems and Cases (4)
Analysis of current developments in auditing and comprehensive case studies. Designed to extend knowledge of audit decision making and advanced techniques. Topics covered vary depending upon current issues facing professional auditors. Prerequisite: undergraduate accounting concentration or equivalent.

ACCTG 560 Special Topics in Professional Accounting (1-4, max. 4)
Lectures, discussion, and case analyses dealing with special current topics relevant to professional accounting. Satisfies the professional accounting elective requirement for the M.P.Acc. degree program. Prerequisite: permission of instructor.

ACCTG 562 Accounting for Business Combinations in a Global Marketplace (4)
The examination of acquisitions and mergers in a global context. Explores the issues involved in accounting for domestic and foreign equity investments, partnerships with respect to financial statement interpretations.

ACCTG 564 Governmental Accounting (4)
Budgetary and financial accounting/reporting as applied at the state, local, and special-purpose governments; financial accounting and reporting for not-for-profit organizations.

ACCTG 566 Issues in International Accounting (4)
Insights into the conceptual, managerial, professional, and institutional issues of international accounting. Focus on current topics in international accounting and on the cultural, managerial, and governmental forces that shape both internal and external accounting in specific countries.

ACCTG 568 Advanced Management Accounting (4)
Discussion and analysis of costing techniques, use of accounting data in planning and evaluating managerial performance, and use of accounting data in short-term and long-run decisions. Special attention directed to issues in human behavior involved in cost allocation, budgeting, and performance evaluation. Prerequisite: ACCTG 502.

ACCTG 575 Internship (14)
Professional internship in graduate accounting program. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 576- Independent Research Project Proposal (2-)
Topic identification and development for research project to be completed in ACCTG 577. Prerequisite: enrollment in MPAcc program, accounting and assurances track.

ACCTG 577 Independent Research Project Proposal (-4)
Development and completion of independent research project. Topic identification and proposal approval completed in ACCTG 576. Prerequisite: enrollment in MPAcc program, accounting and assurances track; ACCTG 576.

ACCTG 580 Introduction to Accounting Research (4)
Examination of research problems and techniques in accounting. Interdisciplinary nature of accounting research emphasized. Work in finance, economics, and psychology used to develop current trends in accounting research. Prerequisite: doctoral student status.

ACCTG 581 Seminar in Managerial Accounting (4)
Critical examination of conceptual and practical issues of cost and managerial accounting. Specific topics may change from quarter to quarter, and they include application of behavioral, quantitative, and economic models to managerial accounting problems. Prerequisite: ACCTG 511 or permission of instructor.

ACCTG 596 Seminar in Financial Accounting Research (4)
Review and critical analysis of research strategies and methods applied to problems in financial reporting practice and financial accounting standard setting. Prerequisite: doctoral student status and ACCTG 580 or equivalent or permission of graduate office.

ACCTG 597 Seminar in Managerial Accounting Research (4)
Critical analysis of current managerial accounting research, both published and unpublished. Prerequisite: doctoral student status and 581 or equivalent or permission of graduate office.

ACCTG 599 Doctoral Seminar in Accounting (1, max. 12)
Study and research in advanced topics of Accounting. The seminar is generally concerned with unpublished areas of research as well as research methodology and philosophy. It is conducted by departmental faculty and occasional distinguished visiting faculty. Prerequisite: doctoral student status.

ACCTG 600 Independent Study or Research (*, max. 10)

Administration

Course Descriptions

ADMIN 510 Integrative Administration ([1-15, max. 15]-) Huber
Includes materials basic to study and analysis of administration in organizations; organization theory and administrative behavior; human resources management; resource allocation, accounting, and financial control, systems operation and analysis; marketing; governmental-societal framework; policy formulation and strategic planning. Faculty team-teaching approach. Not open to business administration majors. Credit/no credit only.

Business Administration

Course Descriptions

B A 300 Foreign Study-Business Administration (3-5, max. 15)
For participants in approved foreign-study programs where equivalent UW business administration courses are not available.

B A 390 Business Honors Seminar (2-5, max. 5)
Special topics in business. Required for honors students in Business Administration.

B A 410 Business Advantage (10)
Four-week integrative course which focuses on business basics — finance, accounting, marketing strategy and human resources. Team-taught by faculty experts using case discussions, lectures, and student presentations. Not open for credit to students pursuing a Business degree.

B A 470 Accounting and Finance for Non-business Majors (3)
QSR
Addresses economic foundations of demand, supply, and costs as basis for accounting system. Focuses on using data for evaluating performance, budgeting and financial statement analysis. Short-term and long-term decision making compared. Not open for credit to students pursuing a Business degree. Offered: A.

B A 471 Marketing Analysis and Strategy for Non-business Majors (3) I&S
Provides understanding of marketing principles and their usefulness in diverse business and organizational situations. Includes study of controllable and uncontrollable factors in making marketing decisions; developing working knowledge of marketing strategy and understanding of implications of product life cycle for decision-making. Not open for credit to students pursuing a Business degree. Offered: W.

B A 472 Managing Human Assets for Non-business Majors (3) I&S
Deals with understanding management of human resources in businesses and other organizations. Includes study of relevant theories and research, analyses of cases, and experiential exercises including overview of new work place, diversity, leading, deciding, negotiations, attracting, motivating and rewarding, and team management. Not open for credit to students pursuing a Business degree. Offered: Sp.

B A 500 Business Administration I (16)
Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

B A 501 Business Administration II (14)
Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

B A 502 Business Administration III (8)
Coordinated series consisting of accounting, business economics, business ethics, business policy, finance, information systems, international business, legal environment of business, management, and organizational behavior, marketing, operations management, and quantitative methods for management. Prerequisite: permission of the School of Business Administration.

B A 541 Environmental Management I (4)
Survey of environmental ethics, environmental laws and regulation, the economics of environmental decisions, and the relationship of business to public policy and the environment. Must be taken concurrently with B A 544. Prerequisite: permission of instructor.

B A 542 Environmental Management II (4)
Applications of the functional areas of business to environmental concerns. Major federal legislation affecting these concerns applied to business problems in the areas of accounting, finance, marketing, management information systems, and organizational behavior. Must be taken concurrently with 544. Prerequisite: B A 541 or permission of instructor.

B A 543 Environmental Management III (4)
Case studies that integrate the fundamentals of business and environmental management to address such issues as plant siting, regulatory compliance, production line changes, and innovative, proactive responses to environmental issues. Case studies include results of student consulting projects and a capstone case in environmental management. Must be taken concurrently with 544. Prerequisite: B A 542 or permission of instructor.

B A 544 Environmental Management Seminar (1, max. 3)
Guest lecturers from academia, business, government, and advocacy
groups discuss environmental science, ethics, law, regulation, economics, finance, accounting, and policy issues. Seminar topics supplement course material in 541, 542, 543 which are to be taken concurrently.

B A 545 The Global Business Forum: Current Issues in Global Business (1, max. 3)
Discussion of current trends in the global business environment and of international issues facing companies. Leaders from international businesses and other organizations, as well as faculty members from various departments and specializations, invited to share their perspectives with seminar participants. Topics change each quarter.

B A 560 Cooperative Education in Business (1)
Business practicum: internship with approved business or governmental agency. Open only to students who meet requirements of internship program. Internship credit may not be applied to fulfill specific course requirements or to credits required for graduation. Credit/no credit only. Offered: S.

B A 571 Research Reports (4-)
Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: instructor’s approval of preliminary research topic outline.

B A 572 Research Reports (4)
Independent study in business administration; critical evaluation of business analysis and research methods. Effective communication of ideas emphasized. Methods and content of independent research studies subjected to critical evaluation. Open only to MBA non-thesis students. Prerequisite: B A 571.

B A 578 Practicum in Business Management (2)
Provides an opportunity for first-year MBA students to apply the skills learned in the classroom to real world problems. Students participating in the Business Consulting Network (BCN) partner with client firms on an applied learning project that offers additional training opportunities not possible in the classroom. Credit/no credit only.

B A 580 Problems in Microeconomics (4)
Study of microeconomic intuition, directed toward Business School Ph.D. students, showing the interconnections between formal, mathematical analysis and the unstructured economic questions posed by the world. Emphasis on setting up problems and examining the intuition behind the analysis of them. Many applications to specific business issues.

B A 700 Master's Thesis (*)
B A 800 Doctoral Dissertation (*, max. 10)

Business Administration Research Methods

Course Descriptions

BA RM 580 Applied Econometrics I (4)
Emphasizes the application of econometric methods rather than the mathematical proofs of statistical procedures. Introduction to the linear regression model, interpretation of summary statistics, bias and precision of regression estimates, analysis of the residuals, and hypothesis testing. Prerequisite: STAT 342 or STAT 395 or STAT 481, or permission of instructor.

BA RM 581 Applied Econometrics II (4)
Continuation of 580. Measurement errors, distributed lags, and simultaneous equation models. Prerequisite: BA RM580.

BA RM 590 Behavioral Research Methods-Theory and Design (4)
Philosophy of science, development of scientific method, and meaning of behavioral research. Historical perspective of scientific investigation and the evaluation of research. The development of theory and its relationship to research. Various strategies and designs in behavioral research. Prerequisite: STAT 361, STAT 362, or permission of instructor.

BA RM 591 Behavioral Research Methods-Approaches and Applications (4)
Considers alternative research approaches, such as laboratory and field experimentation, simulation, and surveys, with data-gathering techniques appropriate for each approach. It is primarily concerned with developing alternative approaches to research problems and with discussing specific applications. It builds upon a background of specific statistical tools and techniques and an understanding of theory development and research design. Prerequisite: STAT 361, STAT 362, or permission of instructor.

Business Communication

Course Descriptions

B CMU 301 Basic Written Business Communications (4)
Covers internal and external, written and oral business reporting. Covers the psychology, semantics, planning, and principles of effective business writing. Practical application through messages that inform and persuade, grant and refuse; plus short business reports and applications for positions. Cannot be taken for credit if B CMU 302 already taken. Offered: AWSp.

B CMU 302 Basic Written Business Communications for Accounting Majors (4)
Covers internal and external, written and oral business reporting. Considers communications strategies within the context of rapidly changing technologies. Students learn to apply primary and secondary research to quarter-long, individual projects resulting in a variety of reports: proposals, progress reports, feasibility studies, business plans, etc. Prerequisite: ACCTG 301.

B CMU 410 Business Reports and Other Specialized Communications (4)
Covers internal and external, written and oral business reporting. Considers communications strategies within the context of rapidly changing technologies. Students learn to apply primary and secondary research to quarter-long, individual projects resulting in a variety of reports: proposals, progress reports, feasibility studies, business plans, etc. Prerequisite: B CMU 301 or B CMU 302.

B CMU 490 Special Topics in Business Communications (1-6, max. 12)
Students and faculty focus on current topics of concern. Prerequisite: either B CMU 301 or B CMU 302.

B CMU 499 Research in Business Communications (1-6, max. 9)

B CMU 509 Finding your Voice (2)
Develop a leadership communication style by discovering core values and learning how to translate those values into effective messages. Students give speeches as well as critique speeches of classmates, produce written evaluation of speeches given in class and receive instructor feedback. Prerequisite: BA 501.

B CMU 510 Business Communications for Managers (4)
Develops understanding of communication theories, describes strategies for planning managerial communications, and builds skills in oral and written reporting and persuading. Looks at how new technologies are changing the way people in business communicate,
and the implications those changes have for organizations. Prerequisite: B A 501.

B CMU 579 Special Topics in Business Communication (2/4, max. 12)
Business and managerial communication topics of current interest to faculty and students.

Business Economics

Course Descriptions

B ECON 300 Intermediate Macroeconomics (4)
Analysis of economy with attention to the business cycle, output of goods and services (GNP), inflation, unemployment, and government's fiscal and monetary policies. How the economy affects individuals and firms and how to deal effectively with the economic environment. Prerequisite: ECON 201; may not be repeated.

B ECON 301 Intermediate Macroeconomics (4)
Analysis of economic factors affecting decisions made by business firms. Demand and cost analysis, and alternative policies from the firm's point of view. Prerequisite: ACCTG 225; ECON 201; either MATH 112, MATH 124, MATH 127, MATH 134, or MATH 145, or Q SCI 291; either IND E 315, QMETH 201, W SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 311, or STAT 390; may not be repeated.

B ECON 310 Intermediate Macroeconomics (4)
Analysis of the structure and functions of the money and capital markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of Federal Reserve and Treasury in money market developments. Prerequisite: either B ECON 301 or ECON 301; may not be repeated.

B ECON 420 Financial Markets (4)
Analysis of the structure and functions of the money and capital markets; the saving-investment process and financial intermediaries; supply and demand for lendable funds and the level and structure of interest rates, role of Federal Reserve and Treasury in money market developments. Prerequisite: either B ECON 301 or ECON 301; may not be repeated.

B ECON 426 Competing in the Global Economy (4)
Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think globally — act locally." Offered: jointly with MGMT 526; WSp.

B ECON 427 International Finance (4)
Analysis of financial problems facing businesses engaged in international activities: financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: ECON 201; may not be repeated.

B ECON 428 International Financial Management (4)
Analysis of financial problems facing businesses engaged in international activities: financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: ECON 201; may not be repeated.

B ECON 429 Special Topics in Business Economics (1-6, max. 6)
Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

B ECON 499 Undergraduate Research (1-6, max. 9)
Research in selected areas of business economics. Recommended: either ECON 301 or B ECON 300 and B ECON 301.

B ECON 500 Introduction to Business Economics (4)
Factors underlying the determination of cost and prices for the industry and the firm, demand and supply analysis and firm behavior. The relation of the economic environment to the microeconomic decisions of the firm.

B ECON 501 Macroeconomics and Global Issues (4)
Analysis of real and monetary factors affecting national and international economics, supply and demand for money, interest rates and stabilization problems and policies, in relation to government policy effects on business and individual affairs. Focuses on global macroeconomic issues. Prerequisite: B ECON 500.

B ECON 520 Financial Markets (4)
Analysis of the structures and functions of financial markets and institutions; the behavior of interest rates through time; the cross-sectional structure of interest rates; and the roles of the Federal Reserve and Treasury in financial markets. Prerequisite: FIN 509.

B ECON 526 Competing in the Global Economy (4)
Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase "think globally — act locally." Offered: jointly with MGMT 526; WSp.

B ECON 527 International Finance and Investments (4)
Study of selected problems in financing, international trade, investment, and foreign business operations; international aspects of money markets; problems of evaluation of foreign investments. Prerequisite: either B A 502 or both B ECON 501 and FIN 502.

B ECON 528 International Financial Management (4)
Analysis of financial problems facing businesses engaged in international activities: financing foreign investment, financial control of foreign operations, and working capital management including foreign exchange positions using cases and readings. Prerequisite: FIN 509.

B ECON 579 Special Topics in Business Economics (2/4, max. 12)
Business economics topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offering. Prerequisite: permission of instructor.

Business Policy

Course Descriptions

B POL 482 Strategies for New Ventures (4)
Focuses on market analysis and strategy formation. Includes building an entrepreneurial firm, market opportunity analysis, product testing, developing and implementing business plans, venture financing, and managing a growing company. Prerequisite: B POL 471; MKTG 335; MKTG 455; FIN 454.

B POL 499 Undergraduate Research (1-6, max. 9)

E-Business

Course Descriptions

EBIZ 501 E-Business Marketing (4) Schlosser
Uses current strategies for Internet marketing and explores new frontiers. Topics include examining the history, culture, and design of the Internet and the resulting impact on marketing; Web-based business models; consumer demographics; Web usage behavior; privacy issues; brand loyalty; virtual communities; and commercial Web site effectiveness metrics. Offered: W.

EBIZ 502 E-Business Technology (4) Mookerjee
Examines the underlying information technologies that are driving the e-business revolution, including the overall technical infrastructure required to execute an e-business solution. Taught via lectures, projects, and hands-on sessions in the E-Business lab. Students implement and manage an e-business site. Offered: A.

EBIZ 503 E-Business Economics (4) Rice, Schall, Tarhouni
Uses economic principles to assess the implications of evolving Internet technology for business decision-making, market prices, and market structure. Develop theoretical extensions of the models covered in B A 500 to analyze the questions that the Internet poses.
Includes a group paper and a group evaluation of an Internet company. Offered: W.

EBIZ 504 E-Business Strategy (4) Kotha
Integrates issues pertaining to management of technology and entrepreneurship: the emergence of the global digital economy and its impact on commerce, business models in e-commerce, “netrepreneurship” and its place in existing corporations. Lectures and featured speakers from online Seattle firms, case discussions, and group projects. Offered: Asp.

EBIZ 509 Foundations of E-Business (2)
Examines the fundamental technologies associated with business-to-consumer and business-to-business interaction and delivery of content via the Internet. Contrasts client-server versus server-client approaches to database processing and XML, and execution of business rules and logic. Includes experience with the various technologies. Prerequisite: Permission of School of Business Administration. Offered: Sp.

EBIZ 579 Special Topics in E-Business (2-4, max. 12)
Topics vary. Offered only when faculty members are available and there is sufficient student interest.

EBIZ 600 Independent Study or Research (8, max. 10)
Entrepreneurship and Innovation

Course Descriptions

ENTRE 370 Introduction to Entrepreneurship (4)
Introduction to entrepreneurial practices with an emphasis on learning how to find business ideas, how to evaluate their potential, and how to recognize the barriers to success. Exposure to the stresses of a start-up business, the uncertainties that exist, and the behavior of entrepreneurs. Prerequisite: ACCTG 225; ECON 200, and ECON 201.

ENTRE 472 Creating a Company I (4-)
Two-course sequence with ENTRE 473. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 370. Offered: AW.

ENTRE 473 Creating a Company II (4-)
Two-course sequence with ENTRE 472. Working in teams, students develop a business plan for a new venture, present their plans to a panel of investors, obtain funding, run the business, and exit the firm at the end of the second quarter. Prerequisite: ENTRE 472. Offered: WSp.

ENTRE 475 Planning for Business Growth I (4-)
Two-course sequence with ENTRE 476. Explores the challenges/requirements of transforming an idea into a business. Emphasizes developing business concepts/strategy, marshalling resources, proving the business model, and creating strategic plans for growth. Students are required to participate in the business plan competition held the following quarter. Prerequisite: ENTRE 370.

ENTRE 476 Planning for Business Growth II (4-)
Two course sequence with ENTRE 475. Students supplement business plans with operational and financial details to demonstrate viability of the venture; learn how to present the company to corporate executives or outside investors; and enter the plan in the business plan competition. Prerequisite: ENTRE 475.

ENTRE 509 Foundations of Entrepreneurship (2)
Evaluation of new market opportunities and starting a new venture, focuses on identifying and evaluating new venture opportunities, developing and testing market strategies, evaluating test market performance, and evaluating business plans. Emphasizes the interplay between marketing, manufacturing, finance, accounting and team management. Prerequisite: Permission of School of Business Administration. Offered: Sp.

ENTRE 510 Entrepreneurial Ventures (4)
Uses the tools of competitive strategy to analyze the success and failure of entrepreneurial ventures, identifying general strategic principles that might increase the probability that an entrepreneurial venture will succeed. Draws heavily on the principles of microeconomics and strategy. Prerequisite: B A 500; B A 502.

ENTRE 511 Entrepreneurial Marketing (2)
Focuses on marketing issues related to the generation and development of innovative ideas, assessment of feasibility, implementation and execution, and valuation of business ventures, highlighting the real world applications by new ventures. Prerequisite: B A 501 and entrepreneurial bridge course.

ENTRE 530 New Venture Creation and Managing Growth (4) Song
Focuses on gaining experience in market analysis, new venture strategy formulation, and the management of a new venture. Topics include building an entrepreneurial firm, market opportunity analysis, product testing, developing and executing business plans, venture financing, and managing a growing company. Prerequisite: B POL 509; B A 501. Offered: W.

ENTRE 531 Developing Business Models for Emerging Technologies (4) Song
Focuses on the commercialization of emerging technologies. Topics include conducting feasibility assessments of intellectual property landscape, evaluating business opportunities, analyzing competition, developing business models and strategies, constructing a professional quality business plan, and presenting business plan, transforming a new technology into a market-ready technology-based business. Offered: W.

ENTRE 532 Software Entrepreneurship (4)
A case- and project-based course, focusing on starting a software or hardware company. Guest entrepreneurs, lawyers, and financiers discuss market identification and analysis, planning the business, financing, and typical operating and administrative problems.

ENTRE 540 Entrepreneurship Practicum (2, max. 4) Bigley, Sundem
Enables students interested in new venture creation to explore their entrepreneurial aptitude by competing in a Business Plan Competition offered by the Center for Technology Entrepreneurship. Requires enrollment in the CTE certificate program. Credit/no credit only.

ENTRE 557 Entrepreneurial Finance (4)
Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with FIN 557.

ENTRE 579 Special Topics in Entrepreneurship (2-4, max. 12)
Topics vary. Offered only when faculty members are available and there is sufficient student interest.

ENTRE 581 Theoretical Foundations of Entrepreneurship (4) Song
Focuses on theoretical overviews, entrepreneurs, environment and organizational founding, entrepreneurship’s links with other disciplines, venture capital and venture capitalists, new venture strategy and performance, growth processes and challenges, and entrepreneurial networks and alliances. Class sessions review and critique assigned readings associated with each topic. Offered: A.
Entrepreneurship Research Practicum (4) Kotha, Song
Exposes students to new venture creation phenomena. Teaches how to think about and understand empirical research methods such as case studies, participant-observation, and other field methods while contributing to on-going cumulative data collection process.

Entrepreneurship Independent Study or Research (*, max. 10)

Finance

Course Descriptions

FIN 350 Business Finance (4)
Sources, uses, cost, and control of funds in business enterprises. Internal management of working capital and income sources and cost of long-term funds; capital budgeting; financing of the growth and expansion of business enterprises; government regulation of the financial process. Prerequisite: ACCTG 225; ECON 201; either MATH 112, MATH 124, MATH 125, MATH 134, or MATH 145, or Q SCI 291; either IND E 315, MATH 390, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 311, or STAT 390.

FIN 423 Banking and the Financial System (4)
Role of banks and nonbank financial institutions in the financial system; asset choices of banks and nonbank financial institutions; problems in the management of financial institutions with emphasis on commercial banks. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 450 Problems in Corporate Finance (4)
Case problems in corporate financial management. Includes cases on management of current assets, obtaining short-term loans, raising long-term capital, capital budgeting, and dividend policy. The management point of view is stressed. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

FIN 451 Financial Theory and Analysis (4)
Business financial strategic planning. Topics include business valuation and financing, performance evaluation, risk analysis, capital budgeting, and inflation and taxes. Emphasizes tools with real-world applications while incorporating modern finance concepts. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 454 Business Valuation, Investment, and Financing (4)
Key issues in financial management using both analytical and case study illustrations. Valuation of public and private companies; cost of capital estimation; investment complications, such as taxes, inflation, risk, project interdependencies, and financing-investment interactions; leasing; mergers; spin-offs and carve-outs. Prerequisite: FIN 350; either B ECON 300 or ECON 300.

FIN 457 Entrepreneurial Finance (4)
Explores financial issues that face entrepreneurs, including the stages of financing, business cash flow models, and strategic positioning of the early-stage company. Examines the role of business angels, venture capital funds, institutional investors, strategic alliances, licensing agreements, and exit strategies. Prerequisite: FIN 350; either B ECON 300 or ECON 300. Offered: W.

FIN 460 Investments (4)
Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate-of-return aspects of particular securities portfolios, and total wealth. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 461 Financial Futures and Options Markets (4)
Introduction to financial futures and options markets. Institutional aspects and social functions of these markets, pricing of options and futures, and risk shifting by hedging. Prerequisite: FIN 350; either B ECON 300 or ECON 300; may not be repeated.

FIN 462 Management of Financial Risk (4)
Modern tools for managing financial risk. Fixed income securities and interest rate risk, credit risk, foreign currency risk, and insurance. Emphasis on use of futures, forwards swaps, and option contracts. Prerequisite: FIN 350; either B ECON 300 or ECON 300; FIN 461.

FIN 490 Special Topics in Finance (1-6, max. 6)
Study and research on topics of current concern to faculty and students. Only offered when allowed by faculty availability and sufficient student interest. Seminar content to be announced in advance of scheduled offerings.

FIN 495 Finance Internship (1-4, max. 4)
Internship with a private firm, nonprofit organization or government agency, where work experience involves substantial application of finance concepts learned in classroom. Credit/no credit only. Prerequisite: FIN 350. Offered: AWSpS.

FIN 499 Undergraduate Research (1-6, max. 9)
Research in selected areas of business finance, money and banking, or investments, with permission of instructor. Recommend: FIN 350; either B ECON 300 or ECON 300.

FIN 502 Business Finance (4)
Financial management of the firm, including capital budgets, working capital analysis, and financing policy. Prerequisite: ACCTG 500, B ECON 500, QMETH 500.

FIN 509 Foundations of Asset Valuation (2)
Introduction to valuation, focusing on topics in asset-pricing, fixed income, financial options, and international markets. Emphasizes both theoretical and applied concepts. Course material prepares students for advanced topics covered in the finance electives. Prerequisite: Permission of School of Business Administration. Offered: Sp.

FIN 530 Financial Management of Banks (4)
Analysis of problems in the financial management of commercial banks and other financial institutions. Loan and investment policies, liability management, capital policies, and other selected issues are discussed. Prerequisite: B ECON 520 or permission of graduate office.

FIN 550 Advanced Business Finance (4)
Systematic coverage of key theoretical issues in financial management. Application of quantitative analysis to financial problems of the firm that are important in practice, including issues related to financing and investment. Prerequisite: FIN 509.

FIN 551 Problems in Business Finance (4)
Uses case studies to examine a broad range of financial management topics, including forecasting financial statements, use of bank credit, working capital management, public and private securities issues, capital budgeting, and business valuation. Prerequisite: B A 502.

FIN 552 Problems in Corporate Planning and Financing (4)
Uses case studies to examine business financing. Topics include financial statement analysis, financial planning and forecasting, banking relationships, and financing sources, including the use of derivative securities, venture capital, and private equity. Cannot be taken for credit in combination with FIN 551. Prerequisite: FIN 509.

FIN 553 Problems in Capital Investment Planning (4)
Case discussions used to examine corporate resource allocation decisions. Topics include capital budgeting techniques, estimation of capital costs, capital budgeting systems, strategic investment...
decisions, and financial restructurings. Prerequisite: FIN 509.

FIN 555 Financing Decisions, Payout Policy, and Corporate Control (4)
Analysis of business financing methods, payout policy, management compensation, ownership structure, and the distribution of control rights. Covers the major issues critical to structuring contracts within the corporation. Prerequisite: FIN 509.

FIN 556 Business Valuation and Investment Analysis (4)

FIN 557 Entrepreneurial Finance (4)
Analyzes the unique financial issues facing entrepreneurial firms. Topics include assessing financial performance, financial forecasting and planning, financial management of rapidly growing businesses, start-up ventures, valuation, sources of financing, venture capital, initial public offerings, and the decision to harvest. Prerequisite: MBA core courses. Offered: jointly with ENRE 557.

FIN 560 Investments (4)
Introduction to the nature, problems, and process of evaluating particular securities and portfolio construction and administration. Special attention is directed to the risk and rate of return aspects of particular securities, securities portfolios, and total wealth. Prerequisite: FIN 509.

FIN 561 Financial Futures and Options Markets (4)
Overview of futures markets and options markets. Analysis of pricing of futures contracts and options; comparison of futures, forward, and options contracts; risk management with hedging; alternative investment strategies; and review of empirical evidence. Prerequisite: FIN 509.

FIN 562 Management of Financial Risk (4)
Modern tools for managing financial risk. Fixed income securities and interest rate risk, credit risk, foreign currency risk, and insurance. Emphasis on use of futures, forwards, swaps, and option contracts. Prerequisite: FIN 509.

FIN 563 Real Options (2)
Short overview of option pricing theory, followed by applications of option analysis in evaluating complex investment projects by business firms. Prerequisite: B A 502.

FIN 579 Special Topics in Finance (2/4, max. 12)
Finance topics of current concern to faculty and students. Offered only when faculty are available and sufficient student interest exists. Seminar content announced in advance of scheduled offerings. Prerequisite: permission of instructor.

FIN 580 Doctoral Seminar in Financial Economics (4)
Study of the financing of the corporation, including recent theoretical and institutional developments. Extensive reading and discussion in designated areas covering problems relating to financial management and to the social and economic implications of the financial process. Prerequisite: ECON 500 or permission of instructor.

FIN 590 Doctoral Seminar in Capital Market Theory (4)
Decision making under uncertainty, information and capital market efficiency, portfolio theory, capital asset pricing model, arbitrage pricing model, and options pricing model. Prerequisite: ECON 500 or permission of instructor.

FIN 591 Doctoral Seminar in Corporate Finance (4)
Principles of intertemporal choice, alternative valuation models, theory of investment under uncertainty, impact of dividend and financing decisions on firm valuation in perfect and imperfect markets, and theory of firm organization and agency costs. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 592 Doctoral Seminar in Financial Research (4)
Empirical research in finance with emphasis on methodology and scientific method. Empirical research in market efficiency, capital asset pricing model, options pricing model, and impact of firm's dividend and financing decisions on firm value. Prerequisite: FIN 590 and BA RM 581 or ECON 582 or permission of instructor.

FIN 599 Doctoral Seminar in Finance (1, max. 12)
Study and research in advanced topics of finance. Generally concerned with unpublished areas of research, conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

FIN 600 Independent Study or Research (*, max. 10)

Human Resource Management & Organizational Behavior

Course Descriptions

I S 300 Introduction to Information Systems (5)
Fundamentals of information systems, what they are, how they affect organizations. Technical and organizational foundations of information systems, building information systems, managing information system resources. Laboratory emphasizes using computer to analyze, coordinate, solve organizational decision-making problems. Prerequisite: ACCTG 225; ECON 200; either MATH 112, MATH 124, MATH 134, or MATH 135; either ECON 311, IND E 315, QMETH 201, Q SCI 291, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 311, or STAT 390; may not be repeated.

I S 310 Fundamentals of Business Information Technologies (4)
Exposure to fundamental programming and scripting concepts, conceptual data modeling, database management, and XML. Applying data types and control structures. Continues the concepts of I S 300 of entity-relationship diagrams and record structure diagrams. Database management component includes relational databases, basic SQL, data architecture issues. Prerequisite: I S 300.

I S 320 Fundamentals of Application Programming (4)
Fundamental programming concepts including data types, control structures, modularization, and structure programming. Developing solutions for problems in interactive business applications. Introduction to data and file structures. Extensive use of an event-driven programming language. Prerequisite: I S 300; I S 310, which may be taken concurrently; may not be repeated.

I S 410 Business Data Communications (5)
Technology and applications of business data communications including characteristics of data, fundamentals of transmission, communications hardware and software, network configurations (LAN, MAN, WAN), management, and security. Laboratory provides hands-on experience with these applications. Prerequisite: I S 300, which may be taken concurrently; may not be repeated.

I S 423 E-Business System Development (4)
Introduces key e-business enabling information technologies. Covers object-oriented principles, representing objects in software, object analysis and design, and use of modern programming language, and
advanced database technology for web-based application development. Prerequisite: I S 320; may not be repeated.

I S 445 Database Management (4)
Examines the business need for database processing. Discusses database design, development, and administration. Students practice real-world database design and implementation using SQL. Discusses issues related to transaction management, data warehouse, etc. Prerequisite: I S 310; I S 320, which may be taken concurrently; may not be repeated.

I S 460 Systems Analysis and Design (4)
Analysis and design of business information systems. Concentrates on the analysis phase of systems development. Covers systems development life cycle, feasibility studies, analysis of user requirements, and development of logical system models. Prerequisite: I S 410; I S 445, which may be taken concurrently; may not be repeated.

I S 461 Systems Implementation (4)
develops business information systems integrating knowledge gained in previous 400-level I S courses. Topics include software project management, system/database design, GUI, software testing, systems implementation/support/maintenance, user training, integrating Web, and business environments. Prerequisite: I S 445; I S 460; may not be repeated.

I S 490 Selected Topics in Information Systems (1-6, max. 20)
Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: I S 320.

I S 495 Practical Experience in Information Systems (1-4, max. 8)
Undergraduate substantive I S internship and mentorship. Internships can be repeated up to two quarters for maximum of 4 credits; grades based on weekly status reports, paper, demonstration of knowledge. Mentorship program (maximum 1 credit/quarter) allows student to be matched with I S executive; grade based on status reports, other participatory events.

I S 499 Undergraduate Research (1-6, max. 12)
Selected problems in information systems and computer applications.

I S 504 Computer-Based Information Systems for Management (4)
Introduction to information systems and computer technology. Covers concepts of information use in decision making. Use of decision-support problem-solving tools (e.g., spreadsheet, database software). Management’s responsibility in defining, developing, using information systems is focal point.

I S 530 Management of Information Systems Resources (4)
Topics include general control problem in organizations; performance evaluation of data processing managers; technology and cost trends; software cost estimation; capacity planning; short term utilization; queuing and associated externalities; issues in centralization and decentralization of the information system facilities. Prerequisite: B A 501 or I S 504 or equivalent.

I S 545 Database Systems and Applications (4)
Logical data models, relational database systems, structured query language (SQL), conceptual modeling, database design, Web-connected databases, transaction management, distributed and heterogeneous systems, data warehousing, data mining, database administration issues. Focuses on the use/management of business data in areas such as finance. Prerequisite: B A 502 or I S 504.

I S 560 Information Systems Development (4)
Offers comprehensive look at information systems development. Covers user requirements analysis, logical and physical system models, system implementation and maintenance, project valuation and management. Additional topics include object-oriented approach, systems development in online environments, and financial information systems. Prerequisite: B A 501 or permission of instructor.

I S 570 Business Data Communications and Networking (4)
Networking basics, Internet/Web-based services, client-server architecture, fundamentals of transmission, networking protocols, physical layer, data-link layer, local-area networks, backbone networks, internetworking devices, metropolitan and wide-area networks, wireless networking, network security, network analysis and management. Combines technical, operational, and management issues in data communications. Prerequisite: B A 502 or I S 504.

I S 579 Selected Topics in Information Systems (2/4, max. 12)
Topics of current concern to faculty and students. Potential topics include networks and distributed information-processing systems, office automation, artificial intelligence and knowledge-based systems, new approaches to systems development, fourth- and fifth-generation languages, economics of information systems. Prerequisite: B A 501 or I S 504 or permission of instructor.

I S 580 Advanced Research Topics in Information Systems I (4)
Overview of research problems and techniques in Information Systems. Focuses on application of microeconomic theories, mathematical, statistical, and operations research methods. Extensive reading and discussion in current and emerging research topics. Prerequisite: doctoral student or permission of instructor.

I S 581 Advanced Research Topics in Information Systems II (4)
Advanced topics of current interest of faculty in heterogeneous database, temporal database, data warehousing, data uncertainty, active and deductive database systems, database design, and formal database languages. Prerequisite: doctoral student or permission of instructor.

I S 582 Advanced Research Topics in Information Systems III (4)
Potential topics include formation systems design, software engineering, decision support and expert systems, empirical methods, optimal control theory. Prerequisite: I S 58 or doctoral student or permission of instructor.

I S 599 Doctoral Seminar (1, max. 12)
Advanced topics of information systems. Generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

I S 600 Independent Study or Research (*, max. 10)
International Business

Course Descriptions

I BUS 300 The International Environment of Business (5)
Prepares students to understand the most important aspects of the international political economy. Emphasis on the important relationships among nations and business and economic institutions that influence students’ performances as managers, consumers, and citizens. Prerequisite: ECON 200.

I BUS 330 Business Environment in Developing Nations (4)
The international environment for transnational trade, investment, and operations in the less-developed countries; survey of the
economics of underdevelopment; analysis of foreign economic, cultural, and political environments and their impact on international business; foreign investment in the development process; case studies. Prerequisite: I BUS 300; may not be repeated.

I BUS 340 Business Environment in Industrial Countries (4)
Factors and conditions affecting business operations and behavior in developed countries, international integration, business relations among nation states and integrated supranational systems, direct investment and multinational industrial activities, analysis of sources and causes of international change. Prerequisite: I BUS 300; may not be repeated.

I BUS 440 Business in Asia (4)
Major aspects of the Asian business environment and how Asian enterprises are managed. Problems and opportunities of foreign corporations in Asia. Prerequisite: I BUS 300; may not be repeated.

I BUS 461 Science, Technology, and Innovation Policies in East Asia (5)
Role of state and technological change in economic development. Analyzes state and corporate technology policies historically. Basic technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia’s rise in world of technology and explores whether conditions for its success will continue.

I BUS 462 Japanese Business and Technology (5)
Examination of Japan’s postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with SISEA 482.

I BUS 470 Management of International Trade Operations (4)
Integrated study of international trade functions, practices, concepts, management, strategy, and policy. The approach utilizes lectures, case studies, research, guest speakers, and extensive practical application. Prerequisite: I BUS 300.

I BUS 480 Multinational Operations Management (4)
Case studies in foreign operations management: planning international objectives and strategies; developing multinational company structures and executives; adapting administrative practices and operating policies to international diversities. Prerequisite: I BUS 300; may not be repeated.

I BUS 490 Special Topics in International Business (1-6, max. 12)
Students and faculty focus on current topics of concern. Offered when faculty, student interest, and availability allow. Prerequisite: I BUS 300.

I BUS 491 CISB Track Seminar (1, max. 9)
Students meet with business community leaders to discuss international aspects of their companies. Allows for networking and sharing experiences with other students as well as practicing foreign languages. Credit/no credit only.

I BUS 495 International Business Internship (1-4, max. 8)
An internship with a company, not-for-profit organization, or government agency in an international business capacity. Credit/no credit only. Prerequisite: IBUS 300. Offered: AWSpS.

I BUS 496 International Business Practicum (4)
Offers students opportunity to apply principles, concepts, and skills learned previously to actual business situation. Projects provide students an exposure to the issues and choices facing managers operating in an international business environment. Prerequisite: I BUS 300.

I BUS 499 Undergraduate Research (1-6, max. 9)
Prerequisite: I BUS 300.

I BUS 509 Foundations of International Business (2)
Introduction to governmental and organizational forces shaping international business. Considers the issues of trade, direct foreign investment, balance of payments, and comparative advantage. Looks at economic policies of governments and multilateral organizations such as WTO, IMF, and World Bank. Prerequisite: permission of School of Business Administration. Offered: Sp.

I BUS 520 International Trade Policy (4)
Examines issues important to trade policy. Topics include trade policy basics, tariffs and non-tariff barriers, safeguards, voluntary restraints, dumping, subsidies and strategic trade theory, agricultural trade, developing country rules, regionalism, and services. Prerequisite: B A 500 or course in international economics, trade, or international finance, or permission of graduate office.

I BUS 530 International Business in Less Developed Countries (4)
Understanding the economic, sociocultural, and political environment in the less developed countries. Problems of international trade and investment, north-south relations, commodities, technology transfer, foreign aid, and capital flows. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 540 International Business in Industrialized Countries (4)
Understanding the economic, sociocultural, and political environment in developed, industrialized countries. Problems of international trade and payments relations, economic integration, national policies, and supranational organizations’ impact on managerial environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 550 International Business Consulting (4)
Research, analysis, and report on a specific international business project with an existing organization involved with international trade. Possible tasks include identifying most viable foreign target markets, developing best market entry strategies, establishing international terms and conditions of sale, and completing a preliminary marketing or business plan for clients.

I BUS 560 Multinational Business Management (4)
Managerial responses to problems of international business organizations and operations. Strategy formulation in an international context; design and control of multinational organization; adaptation of management systems and policies to different economic, sociocultural, and political environments. Prerequisite: B A 500 or course in international economics or trade or international finance, or permission of graduate office.

I BUS 561 Science, Technology, and Innovation Policies in East Asia (5)
Role of state and technological change in economic development. Analyzes state and corporate policies historically. Technology concepts, institutions, and policies in Japan, South Korea, Taiwan, and China. Examines sources of Asia’s rise in world of technology and explores conditions for its successful continuation. Offered: jointly with SISEA 581.

I BUS 562 Japanese Business and Technology (5)
Examination of Japan’s postwar enterprise system in its historical context. Topics include corporate and financial structure, production and distribution, trade and investment policies, government-business relations, system of innovation, technological developments, prospects for the future. Offered: jointly with SISEA 582.
MGMT 321 Legal and Regulatory Environment of Business (4)
Responsibility, alternative corporate roles in society. Offered: AWSp.
Corporate political power, boards of directors, capitalism, industrial policy, business ethics and social issues covered in depth: investments abroad, hazardous products, bribery, industry practices, and others.

MGMT 322 Inventing Modern Capitalism (4)
Business-government relationships in American history, with aim of defining and explaining patterns in attitudes and behavior rather than detailing events. Discussions organized in terms of policy areas (e.g., national banking, transportation, agriculture, energy, industry in wartime, trade, and research).

MGMT 323 Business Ethics and Corporate Social Responsibility (4)
Philosophical and pragmatic perspectives, including values and social/ethical premises in organizational decision making. Several issues covered in depth: investments abroad, hazardous products, bribery, industry practices, and others.

MGMT 401 Leadership, Critical Thinking, and Decision Making (4)
The manager as leader and decision maker. Various leadership theories, styles, and behaviors. Decision-making models and techniques.

MGMT 402 Deal-Making and Negotiations (4)
The art and science of negotiations with the goal of making students more effective negotiators in a variety of business situations, such as budget negotiations, buying and selling, contracts, and merger negotiations. Concept and skill development.

MGMT 403 Motivating High Performance (4)
Various strategies for influencing employee motivation and performance. Reward systems, goal-setting procedures, and various techniques to enlarge and enrich one's job. Effects of these formal and informal strategies on job attitudes.

MGMT 404 Organization Development and Change (4)
Provides a conceptual understanding of organization development theory, practice, and research. Organization development is an umbrella term for a collection of behavioral science techniques for increasing individual, group, and organizational effectiveness.

MGMT 411 Recruiting and Hiring Talent (4)
Affirmative action, recruitment, testing, interviewing, placement, promotion, and overall human resource planning. Prerequisite: MGMT 311.

MGMT 412 Performance Appraisal and Compensation (4)
The various kinds of systems used by organizations to evaluate and reward employee performance. Job analysis, job evaluation, setting performance standards, giving appraisal feedback, designing incentive systems, administering a salary plan. Prerequisite: MGMT 311.

MGMT 413 Labor Law and Collective Bargaining (4)
Labor-management relations. The legal context, union organizing, grievance administration, collective bargaining. Individual and group simulations used.

MGMT 421 Commercial Law (5)
Principles of the law of contracts, agency, property, sales, negotiable instruments, and security transactions. Prerequisite: O E 200 or MGMT 200.

MGMT 422 Protecting Intellectual Property in a Global Economy (2)
Provides instruction to help people who are not lawyers and who are starting new companies recognize, protect, develop, and manage intellectual property in a global economy. Assists managers of more mature firms better understand the intellectual property protection implications of restrictions imposed by government on corporations from legal point of view. Constitutional law impacting business managers; antitrust, administrative, and regulatory issues; environmental law, product liability law, and securities law. Not a business or commercial law course.
process. Includes topics related to e-commerce.

MGMT 430 Business Policy (4)
Policy making and administration from a general management point of view. Emphasis is on problem analysis, the decision-making process, administration and control, and continuous reappraisal of policies and objectives. Integrates and builds upon the work of the core curriculum. Prerequisite: FIN 350; MKTG 301; either HRMOB 300 or MGMT 300; recommended: OPMGT 301. Offered: AWSp.

MGMT 490 Special Topics in Management (1-6, max. 6)
Topics of current interest to faculty and students. Offered when allowed by faculty availability and sufficient student interest. Content announced in advance of scheduled offerings.

MGMT 495 Management Internship (1-4, max. 8)
Internship with a private firm, nonprofit organization or government agency, where work experience involves substantial application of management concepts learned in classroom. Credit/no credit only. Prerequisite: MGMT 300.

MGMT 500 Management and Leadership (4)
Behavioral aspects of management with emphasis on leadership, motivation, and decision making. May include communication, conflict management, group dynamics, and organizational change.

MGMT 502 Business Strategy (4)
Policy decisions and strategic leadership from the general management point of view. Determination of corporate product-service objectives, development of a network of internal operating policies and methods to achieve objectives at a cost satisfactory to the consumer and to society. Prerequisite: all first-year required courses in MBA curriculum.

MGMT 505 Business Ethics (2)
Business organization's political, social and legal environments. Critical managerial issues from historical, theoretical, and social/ethical perspectives. Corporate political power, corporate boards of directors, industrial power, social responsibility, business ethics, roles of the corporation in society, themes of change.

MGMT 510 Professional Development (0-2-, max. 2)
Assessment, instruction, and coaching to develop students' professional skills. Topics include written and oral presentation skills, conflict resolution, team-building, collaboration, and intercultural communication.

MGMT 511 Leadership and Coaching Practicum (2, max. 4)
Gives Leadership Fellows a venue to analyze and assess their coaching activities with first-year MBA student teams, receive feedback from the instructor and their fellow coaches, discuss readings on leadership, coaching, collaboration, and communication, and hear guest speakers on related topics. Credit/no credit only.

MGMT 520 Designing a Corporate Strategy (4)
Addresses the broad question: what business(es) should we compete in? Focuses on decisions related to an appropriate level of diversification and the means by which that diversification is implemented. Includes the following issues: mergers and acquisitions, strategic alliances, joint ventures, LBOs, and spin-offs.

MGMT 521 Strategic Management of Technology and Innovation (4) Dooley, Steensma
Examines how innovative firms often experience rapid and disruptive levels of growth and change and how without effective management of new technologies, the boom can quickly turn to bust. Investigates the micro-economic drivers of competition in technology industries, explores how technological change affects competition, and examines the implications for competitive strategy. Offered: WSp.

MGMT 523 Business Ethics in a High Technology Environment (4)
Examines business ethics from philosophical, theoretical, and pragmatic perspectives. Explores ethical theory and values in business. Attempts to place ethical concepts into a framework useful to practicing managers. Places emphasis on the ethical implications of rapidly changing hi-tech environments such as e-commerce and biotech.

MGMT 526 Competing in the Global Economy (4) Dewenter, Steensma
Examines the global environment for business and the challenges facing managers in this environment. Explores the implications of the common phrase “think globally — act locally.” Offered: jointly with B ECON 526; WSp.

MGMT 530 Entrepreneurship (4)
Entrepreneurship, both in the form of (1) establishment of new independent businesses owned largely by those who manage them and (2) initiation of new enterprises having exceptional autonomy within larger organizations that finance and own them. Basic knowledge in accounting, marketing, and finance is assumed.

MGMT 531 Managing Intellectual Property Rights (4)
Comprehensive analysis of the issues pertinent to the various forms of intellectual property, including how to recognize, develop, maintain, and capitalize on them.

MGMT 540 Managing Human Capital (4)
Covers principles and techniques for recruiting, selecting, and developing employees, appraising their performance, and rewarding their contributions. Explores key topics primarily through case studies, readings, class discussion, and fieldwork. Reviews legal and regulatory issues that surround these methods. Intended for both general managers and human resource professionals.

MGMT 544 Managing Effectively Across Cultures (4) Chen
Examines how, with increasing globalization of business, employees at all levels of corporations often work and interact with people from different nations, cultures, and how they need an understanding of cross-cultural management and challenges of international settings. Focuses on international organizational behavior and international human resource issues, practices. Offered: W.

MGMT 545 Leading and Managing High-Performance Organizations (4)
Focuses on the nature and function of effective leadership in high-performance systems. Includes visionary and transformational leadership, decision-making and empowerment, power and influence in organizations desiring flexibility and innovation, and leading organizational change. Places emphasis on leadership of emerging forms of organization such as learning organizations, virtual organizations, and networks.

MGMT 546 High Involvement Employees (4)
Focuses on two domains: (1) how managers can lead and motivate their people; and (2) how actual organizations, particularly high technology and entrepreneurial firms, employ these strategies. Specific topics include commitment, involvement, enthusiasm, effort, participation, citizenship, and performance. Student teams investigate how local companies utilize these ideas.

MGMT 547 Successful Negotiations (2)
Focuses on a broad array of conflict resolution skills needed for effective management in a constantly changing business environment. Examines methods of conflict resolution — bargaining, distributive and integrative negotiation, mediation, and arbitration. Applies these tools to managerial challenges such as employment contracts, buyer-seller agreements, and mediated and arbitrated agreements.
MGMT 549 Dealmaking in the Global Arena (2)
For students who expect to engage in significant international business negotiations. Includes deal-structuring skills needed in a range of cross-border transactions and relationships. Individual segments develop broad analytical themes, cross-cultural dimensions, and distinctive national approaches to corporate governance and their impact on negotiating strategy. Prerequisite: MGMT 547.

MGMT 579 Special Topics in Management (2/4, max. 12)
In-depth study and research on topics of special interest to faculty members and students in the fields of human resources management, organizational behavior, and strategic management. Offered on an ad hoc basis. Content announced before scheduled offering.

MGMT 580 The Individual and the Organization (4)
Focuses on attributes the individual brings to the organization. Covers important performance-related processes such as learning, motivation, and decision-making as well as an understanding of personal attitudes and personality traits.

MGMT 581 Power, Influence, and Citizenship Behavior (4)
Focuses on ways in which the individual and the organization get things done through working with others. Includes leadership, social influence, and the use and abuse of power, with attention given to positive organizational activities such as citizenship behavior and extra role activities.

MGMT 582 Organization Entry, Training, and Exit (4)
Focuses on systems, processes, and experiences that newcomers to organizations undergo. Covers staffing, employee selection, training, socialization, and attachment.

MGMT 583 Contemporary Research in Organizational Behavior (4)
Focuses on importance of group processes for organizational effectiveness. Covers concepts of group dynamics including interpersonal communication, role and norm development, and group decision making as well as organizational processes such as team development and organizational culture.

MGMT 584 Contemporary Research in Human Resource Management (4)
Focuses on the organization’s employee performance appraisal and compensation systems. Examines effects of different practices.

MGMT 590 Economic Foundations of Strategic Management (4)
Reviews the economic theories that support strategies pursued by firms and explores the links between market processes, firm strategy, and firm performance. Topics include agency theory, transaction cost economics, resource dependence, population ecology, and neo-Austrian economics.

MGMT 591 Sociological Foundations of Strategic Management (4)
Explores the sociology of organizations from multiple perspectives while introducing fundamental sociological questions and preparing students for conducting research in organizations. Emphasis on structural contingencies, institutions, resource dependence, population ecology, negotiated order and culture, organizational learning and decision making, organizational power and politics, networks, and inter-organizational relations.

MGMT 592 Contemporary Strategic Management Research (4)
Facilitates understanding of empirical foundations of theory development and testing in contemporary strategic management research. Focuses on evaluation of ways in which the empirical tradition has evolved in the strategic management area. Attention to evaluating research methodologies used in the field.

MGMT 593 Special Topics in Strategic Management I (4)

MGMT 594 Special Topics in Strategic Management II (4)

MGMT 597. (Including established firms), and key employees. Prerequisite: MGMT 547.

MGMT 599 Doctoral Seminar in Management (1, max. 12)
Advanced topics in the fields of human resources management and organizational behavior. May be used by visiting faculty members to present topics of interest to students.

Marketing

Course Descriptions

MKTG 301 Marketing Concepts (4)
Tools, factors, and concepts used by management in planning, establishing policies, and solving marketing problems. Marketing concepts, consumer demand and behavior, location analysis, marketing, functions, institutions, channels, prices, and public policy. Prerequisite: ECON 200.

MKTG 335 Principles of Selling (4)
Focuses on selling from salesperson’s perspective, role of persuasion in professional selling and other organizational settings. In addition to coursework in such areas as consumer behavior, negotiation, and communication, students practice sales skills in role plays, presentations, and other exercises requiring practical application of selling theory. Prerequisite: MKTG 301.

MKTG 340 Advertising (4)
Management of the advertising function and its integration with other forms of promotion. Planning the program, determining the most effective approach, evaluation of media and budget, advertising research, advertising institutions, economic and social aspects. Prerequisite: MKTG 301; may not be repeated.

MKTG 370 Retailing (4)
Profit planning and business control; buying, stock control, pricing, promotion; store location, layout, organization, policies, systems; coordination of store activities. Prerequisite: MKTG 301; may not be repeated.

MKTG 410 Product Management (4)
Important aspects of product planning and development, concept testing, product-life cycle, portfolio analysis, targeting and positioning, branding issues, product-line extension, pricing policies, and implementing product decisions. Computer simulation project provides practice for implementing product strategies. Prerequisite: MKTG 301; may not be repeated.

MKTG 430 Sales Force Management (4)
Focuses on the role of the sales manager within the organization. Includes distribution planning, sales organization, management of the sales force, methods of sales, cost and financial analysis, and performance analysis. Prerequisite: MKTG 301; may not be
MKTG 445 Multicultural Marketing and Business Development (4)
Integrates tools from marketing, consulting, and multi-cultural business management to provide consulting services to small business in economically-distressed communities. Working in teams with assistance from industry mentors and alumni from the course, students gain practical experience in multi-cultural marketing, consulting, and managing a business. Prerequisite: MKTG 301.

MKTG 450 Consumer Behavior (4)
Theory and practice pertinent to marketing decisions; utilization of theories from behavioral sciences in marking research; theories of fashion, characteristics of goods, shopping behavior, product differentiation, market segmentation, and opinion leadership; application of concepts to management of advertising, personal selling, pricing, and channels of distribution. Prerequisite: MKTG 301; may not be repeated.

MKTG 455 Entrepreneurial Marketing (4)
Examines the skills and tools entrepreneurs need for bootstrap marketing in their start-up firms. Students learn to identify target market segments, position their products, estimate demand, set prices, gain access to channels, and manage the issues of rapid growth. Prerequisite: MKTG 301; may not be repeated.

MKTG 460 Marketing Research (4)
Examines marketing research process; steps of research design, questionnaire construction, sampling, data analysis, evaluation/presentation of findings, online research, and web surveys. Class project provides practical application. Prerequisite: MKTG 301; either ECON 311, QMETH 201, STAT 220, STAT 301, STAT 311, or STAT 390; may not be repeated.

MKTG 465 Marketing Data: Measurement and Analysis (4)
Tools for aiding market segmentation, positioning, product design, and demand analysis. Examines multidimensional scaling, conjoint analysis, factor analysis, cluster analysis, discriminant analysis, multiple regression, logistic regression, and decision trees. Emphasis on applications of practical marketing problems and using statistical packages. Prerequisite: MKTG 301; may not be repeated.

MKTG 470 International Marketing (4)
Focusses on assessing international marketing opportunities, formulating and implementing international marketing strategies. Examines how to use marketing analyses and deductive decision modeling in assessing international marketing opportunities. Uses marketing tools and concepts in the planning, preparation, and presentation and discussion of cases and class project. Prerequisite: MKTG 301; may not be repeated.

MKTG 475 Retail Strategy: Internet and Global Dimensions (4)
Explores how owners and top managers of retail firms analyze and solve problems, design, implement, and evaluate strategies and other wise manage for competitive advantage. Utilizes cases, readings, and writing assignments as the main tools for teaching and learning. Prerequisite: MKTG 370; may not be repeated.

MKTG 477 Merchandise Acquisition and Management (4)
Integration of summer internship experiences with discussion of merchandise acquisition. Includes retail inventory management system, processes of planning and buying merchandise, private label and imported goods, and relevant personnel management area. Centers on major project done for and with company buying staff. Prerequisite: MKTG 301; MKTG 370; MKTG 495. Offered: A.

MKTG 478 Retail Merchandising and Design Management (4)
Second of capstone seminars includes integration of summer internship experiences with customer service, customer communications, merchandise presentation, and leadership skills. Visit local retailers to observe visual presentations, prepare design plan for store, and examine management styles to determine philosophy for employees, and provide customer service. Prerequisite: MKTG 301; MKTG 370; MKTG 495. Offered: W.

MKTG 480 Advanced Marketing Management (4)
Capstone course connecting principles, tools, and elements of multiple marketing disciplines to a manager's perspective and responsibilities in today's company. Emphasizes strategy, analysis, and problem solving. Analyzes marketing problems using conceptual and quantitative tools utilized in marketing decision making. Prerequisite: MKTG 301; MKG 450; MKTG 460; may not be repeated.

MKTG 485 Strategic Market Management (4)
Utilize cases and/or projects to examine strategic market-based management. Analyze marketing situations to identify market trends and understand consumer and competitor behavior. Develop and justify appropriate course of action to address marketing problems and opportunities in terms of product planning, distribution channels, pricing, and promotion. Prerequisite: MKTG 301.

MKTG 490 Special Topics and Issues in Marketing (1-6, max. 12)
Contemporary topics and issues in marketing: marketing in nonprofit organizations, marketing of services, marketing in the public sector, and marketing in an economy of scarcity. Ordinarily only one topic area is addressed in any one quarter. Course content reflects contemporary developments and the current interests of instructors and students. Prerequisite: MKTG 301.

MKTG 495 Marketing Internship (1-4, max. 8)
An internship with a company, not for profit organization, or government agency in a marketing capacity. Prerequisite: MKTG 301.

MKTG 496 Marketing Practicum (Rhodes) (4)
Offers opportunities to apply principles, concepts, and skills learned previously to actual business situations. Participation in class part-time and in an internship with a business employer part-time. Prerequisite: MKTG 301.

MKTG 499 Undergraduate Research (1-6, max. 9)
Prerequisite: MKTG 301.

MKTG 501 Marketing Management (4)
Analysis and management of customer satisfaction in goods and services markets by profit and nonprofit organizations. Buyer behavior, market segmentation and product positioning, product policy, pricing, distribution, sales force and advertising management, and market research in the contexts of strategy development, decision making, implementation, and control.

MKTG 509 Foundations of Marketing Analysis (2)
Examines analytical and statistical methods useful in strategic decision making in marketing. A dynamic computer simulation activity allows students to develop and receive feedback on competitive marketing strategies. Prerequisite: either B A 501 or MKTG 501. Offered: Sp.

MKTG 510 New Product Development (4)
Integrates business, design, and engineering functions in the presentation and application of structures, tools, and methodologies important for successful new product development. New product development projects are accomplished with a cross-functional team emphasis. Prerequisite: B A 501.

MKTG 511 Business-to-Business Marketing (4)
Integrated approach to product marketing management in the
MKTG 512 Consumer Marketing and Brand Management (4)
Analysis of marketing strategies for consumer products and services.
Focuses on consumer satisfaction and brand management including
product line and brand developments, pricing strategies, channel and
retail relationships, and marketing communication strategies for
consumer goods and services. Prerequisite: B A 501.

MKTG 520 Marketing Channels (4)
Channels of distribution decisions for goods and services in profit
and nonprofit organizations. Considers methods of optimizing the
number, quality of institutions and activities employed in dealing
with exchange, and space and time aspects of channel management.
Relates management of marketing channels to marketing mix,
organizational objectives. Prerequisite: B A 501.

MKTG 530 Managing the Sales System (4)
Examines the revenue generation function of a firm from a system-
wide perspective. Topics include strategic and tactical considerations
related to customer acquisition and retention, end-to-end sales and
support operations, strategic partnerships, and continuous perfor-
ance monitoring. Emphasis on case studies and team projects.
Prerequisite: B A 501.

MKTG 540 Advertising and Promotion Management (4)
Management of advertising and promotional activities and their
integration with other elements of the marketing mix. Topics include:
understanding the communication process, analyzing
markets, working with suppliers, establishing objectives, determining
budgets, selecting media, measuring and evaluating effectiveness,
using publicity and promotions. Legal, social, and economic
consequences are considered. Prerequisite: B A 501.

MKTG 550 Managing Customer Relationships Through
Direct Marketing (4)
Management of customer relationships through the lens of direct
marketing. Topics include direct marketing creative activity,
strategy, and execution; media and segmentation; direct marketing
budgeting and financials; targeting, database, and predictive
modeling; catalogue marketing; relationship marketing; business-to-
business complex sales; privacy. Prerequisite: B A 501.

MKTG 555 Entrepreneurial Marketing and Management (4)
Examines the skills and tools entrepreneurs need for bootstrap
marketing in their firms. Covers how to target market segments,
position products, estimate demand, set prices, gain access to
channels, and manage issues of rapid growth. Prerequisite: B A 501.

MKTG 560 Research for Marketing Decisions (4)
Methods and applications of marketing research to solve marketing
problems. Deals with: problem definition, research design, question-
naire construction, sampling, and data analysis using SPSS.
Introduces promising new developments in online research, web
surveys, and data analysis. Class research project provides practical
application. Prerequisite: B A 501.

MKTG 565 Database Marketing and Decision Models (4)
Examines methodologies that are useful for analyzing customer
databases. Presents models that can be applied in the analysis of
marketing problems and the support of marketing decisions.
Prerequisite: B A 501.

MKTG 570 International Marketing (4)
Analysis of the marketing strategies and tactics of multinational
corporations. Choice of entry strategies for foreign markets,
analyzing international competition at home and abroad, and
developing global marketing strategies. Prerequisite: B A 501;
recommended: one I BUS course.

MKTG 575 Marketing High-Technology Products (4)
Management of the marketing requirements of high-technology
products. Examines how markets for high-tech products involve
shortened product life cycles, demand for continual product updates,
perceived risk of adoption by customers, requirements for intensive
customer service and relationships, and growing reliance on business
partners. Prerequisite: B A 501.

MKTG 579 Special Topics in Marketing (2/4, max. 12)
Marketing topics of current concern to faculty and students. Offered
only when allowed by faculty availability and sufficient student
interest. Seminar content to be announced in advance of scheduled
offerings. Prerequisite: B A 501.

MKTG 581 Doctoral Seminar in Consumer Behavior (4)
Louie, Yalch
Survey of the field of consumer behavior introduces fundamental
topics in consumer behavior including cognitive processes, emotion,
and consumer satisfaction. Provides exposure to a variety of
research methods including experiments, surveys, and phenomeno-
logical research.

MKTG 582 Doctoral Seminar in Multivariate Analysis for
Marketing Research (4) MacLachlan, Moinpour
Survey of methods useful for empirical evaluation of multivariate
marketing phenomena and relationships. Includes an overview of
measurement theory and practice; multidimensional scaling;
conjoint analysis; cluster, factor, and discriminant analyses;
multivariate analysis of variance; structural equation modeling; and
other methods commonly encountered in academic marketing
research.

MKTG 583 Doctoral Seminar in Marketing Strategy (4)
Jacobson, Song
Study of factors influencing business performance and role of
marketing in achieving competitive advantage. Analysis of
prevailing, and emerging, theories underlying strategic thinking and
competitive process. Examination of empirical research regarding
measurement, level, and persistence of business success and
implications of findings for theory and strategy development.
Prerequisite: BA RM 580.

MKTG 584 Doctoral Seminar in Research Issues in Marketing
(4)
Examination of research problems and issues in marketing. Specific
topics vary depending on the interest of faculty and students.

MKTG 591 Doctoral Seminar in Consumer Behavior
Research Topics (4) Louie, Yalch
Investigates research topics of current interest in consumer
behavior. Considers the processes used by consumers to acquire and
evaluate marketing information including advertising, publicity,
word of mouth, packaging, product description, price, and retail
outlets, and examines ways the principles in social perception
influence consumers’ individual responses to marketing-related
activities.

MKTG 593 Doctoral Seminar in Marketing Models (4)
Erickson
Focuses on modeling research efforts in various areas of marketing.
Discussion of mathematical and statistical modeling approaches
which contribute to scientific development in the marketing area
and ways in which modeling is used to characterize and summarize
the nature of general marketing situations in complex environ-
ments.

MKTG 599 Doctoral Seminar in Marketing (1, max. 12)
Study and research in advanced topics of marketing. The seminar is generally concerned with unpublished areas of research and conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

MKTG 600 Independent Study or Research (*, max. 10)

Operations Management

Course Descriptions

OPMGT 301 Principles of Operations Management (4)
Examines problems encountered in planning, operating, and controlling production of goods and services. Topics include: waiting-line management, quality assurance, production systems, project management, and inventory management. Computer and quantitative models used in formulating managerial problems. Prerequisite: ACCTG 225; ECON 200; either MATH 112, MATH 124, MATH 134, or MATH 145; either ECON 311, IND E 315, QMETH 201, Q SCI 381, PSYCH 315, PSYCH 318, STAT 220, STAT 301, STAT 311, or STAT 390.

OPMGT 402 Introduction to Logistics (4)
Logistics studies of the efficient delivery of goods and services. A total-cost approach recognizes this involves not only the obvious vehicle-routing issues but also shipment size and mix, warehouse location, product design, and customer services. Includes study of real companies’ logistics problems. Prerequisite: OPMGT 301.

OPMGT 443 Inventory and Supply Chain Management (4)
Use of material and supply chain management in manufacturing and service organizations to reduce inventory levels while providing adequate service to customers. Specific topics include forecasting, Just-in-Time production, deterministic and stochastic inventory models, and material requirements planning (MRP). Prerequisite: OPMGT 301.

OPMGT 450 Introduction to Project Management (4)
Focuses on the management of complex projects and the tools and techniques which have been developed in the past 25 years to assist managers with such projects. The course covers all elements of project planning, scheduling and control as well as implementation and organizational issues. Prerequisite: OPMGT 301.

OPMGT 461 Business of Process Design (4) Seferis
Examines systems theory, project design, and strategic decision-making in a teaming environment. Provides a unique opportunity to get involved with real-life design problems in the chemical and aeronautical industries. Prerequisite: OPMGT 301. Offered: Sp.

OPMGT 490 Special Topics in Operations Management (1-6, max. 20)
Operations management topics of current concern to faculty and students. Potential topics are: logistics management, project scheduling, manufacturing strategy, site and location analysis, management of service operations. Prerequisite: OPMGT 301.

OPMGT 495 Operations Management Internship (1-4, max. 8) McKay
Internship with a private firm, nonprofit organization, or government agency, where work experience involves substantial application of analysis techniques and management concepts learned in classroom. Credit/no credit only. Prerequisite: OPMGT 301. Offered: AWSpS.

OPMGT 499 Undergraduate Research (1-6, max. 9)

OPMGT 502 Introduction to Operations Management (4)
Managerial decision making in operations problems, including application of quantitative analysis and use of computers. Production of goods or services in any type of organization. Inventory management, scheduling, facility location, management of service systems, and quality assurance. Prerequisite: QMETH 500.

OPMGT 535 Global Logistics Management (4)
Provides an overview of the concepts and substance of trade, transportation, and logistics. Deals with management of physical, documentation, and information flows within supply chains, including purchasing, distribution, intermodal transportation, ERP, ecommerce and e-fulfillment, financial transactions, and regulations. Prerequisite: permission of instructor. Offered: jointly with GTTL 501; AW.

OPMGT 536 Seminar in Global Trade, Transportation, and Logistics (4)
Interdisciplinary seminar that brings together students with academics and practitioners at the forefront of trade, transportation, and logistics in discussions of selected topics. Additionally, students research issues of special interest. Prerequisite: OPMGT 355, GTTL 501, or permission of instructor. Offered: jointly with GTTL 502; Sp.

OPMGT 550 Project Management (4)
Management of complex projects, and tools and techniques (e.g., CPM and PERT) developed to aid the planning, scheduling, and control of projects. Includes work breakdown structures, precedence networks, Gantt charts, resource leveling and allocation, and the use of microcomputer programs. Prerequisite: B A 502 or OPMGT 502 or equivalent.

OPMGT 570 Operations Strategy (4)
Strategic management of operations and manufacturing in domestic and international companies. Developing and implementing a coherent strategy based on continuous improvement of quality, productivity, processes, and customer services. Facilities, capacity, process/force planning, organization, people, systems integration, coordination between operations, marketing, engineering, and R&D. Prerequisite: B A 502 or OPMGT 502 or equivalent.

OPMGT 579 Special Topics in Operations Management (2/4, max. 12)
Major topics in operations management and systems analysis. Emphasis on research and, where appropriate, application of quantitative analysis and computers. Topics vary, including workforce planning, project management, research and development management, quality assurance, technology planning and forecasting, systems analysis of complex organizations, and urban systems analysis. Prerequisite: B A 502.

OPMGT 584 Fundamentals of Operations Management Research (4) Klastorin
Surveys basic areas that form the foundations for much of the research in operations management today. Topics include facility location, scheduling, project management, and supply chain management. Prerequisite: QMETH 580. Offered: W.

OPMGT 587 Advanced Topics in Inventory Management (4)
Survey of literature in inventory/production control with emphasis on current research. Topics include single-echelon deterministic and probabilistic models and multi-echelon stochastic models. Prerequisite: QMETH 592 and course in probability theory and in stochastic processes.

OPMGT 599 Doctoral Seminar in Operations Management (1, max. 12)
Study and research in advanced topics of operations management. The seminar is generally concerned with unpublished areas of research and is conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status.

OPMGT 600 Independent Study or Research (*, max. 10)
Organization and Environment

Course Descriptions

O E 499 Undergraduate Research (1-6, max. 9)
Selected problem areas or issues in consultation among faculty members and students. Prerequisite: permission of the undergraduate office.

Quantitative Methods

Course Descriptions

QMETH 201 Introduction to Statistical Methods (4) NW/QSR
Survey of principles of data analysis and their applications for management problems. Elementary techniques of classification, summarization, and visual display of data. Applications of probability models for inference and decision making are illustrated through examples. Prerequisite: either MATH 112, MATH 124, MATH 134, or MATH 145.

QMETH 450 Spreadsheet Models for Managerial Decision Making (4)
Formulation and solution of business problems using operations research techniques in a spreadsheet environment. Techniques of linear and integer programming, decision analysis, network optimization, queuing, and simulation. Applications from marketing, finance, and operations. Prerequisite: I S 300.

QMETH 490 Special Problems in Quantitative Analysis (1-6, max. 20)
Specialized quantitative techniques useful for solving business problems. Topics from operation research, statistics, computer methods. Emphasis on application. Prerequisite: either ECON 311, QMETH 201, PSYCH 213, PSYCH 218, STAT 220, STAT 301, STAT 311, or STAT 390.

QMETH 499 Undergraduate Research (1-6, max. 9)
Research in selected problems in business statistics, operations research, decision theory, and computer applications.

QMETH 500 Statistical Data Analysis for Management (2)
Statistical models, techniques, and tools for aiding management decisions. Use of spreadsheets in basic business problems. Probability distributions, random sampling and standard errors, hypothesis testing, multiple regression, ANOVA, chi-square tests. Prerequisite: preparation in elementary calculus and successful completion of university-administered proficiency exam.

QMETH 501 Decision Support Models (2)
Introduction to computer-based modeling techniques for management decision making. Linear programming, decision analysis, and simulation. Formulation and interpretation. Prerequisite: QMETH 500.

QMETH 503 Practical Methods for Data Analysis (4)
Presentation of basic exploratory data analysis with business examples. Data summaries, multivariate date, time series, multivariate tables. Techniques include graphical display, transformation, outlier identification, cluster analysis, smoothing, regression, robustness. Prerequisite: B A 500 or equivalent or permission of instructor. Offered: jointly with STAT 503.

QMETH 520 Managerial Applications of Regression Models (4)
Data exploration and inference using regression models for business forecasting and management. Models include simple, multiple, logistic, and nonlinear regression, use of dummy variables, transformations, variable selection, and diagnostics. Prerequisite: QMETH 500 or B A 500.

QMETH 528 Survey Sampling Applications (4)
Introduction to design and implementation of sample surveys with emphasis on business applications. Simple random, stratified, cluster, multistage sample methods. Probability sampling, optimal allocation of sampling units. Mail, telephone, interview methods. Estimation methods, Questionnaire design. Non-response. Prerequisite: QMETH 500 or B A 500 or equivalent or permission of instructor.

QMETH 530 Forecasting Models in Business (4)
Introduction to time series analysis and forecasting. Topics include seasonal adjustment, decomposition, exponential smoothing, moving average, and autoregression as well as model identification, estimation, diagnostics, and adaptive forecasting illustrations using real data. Prerequisite: QMETH 500 or B A 500.

QMETH 551 Modeling with Spreadsheets (4)
Advanced formulation and modeling of business problems in a spreadsheet environment. Techniques of linear, integer, and nonlinear programming, multi-objective goal programming, and simulation. Applications from finance, marketing, and operations. Prerequisite: B A 502 or QMETH 501 or equivalent.

QMETH 579 Special Topics in Quantitative Methods (2/4, max. 12)
Presentation of topics of current concern to students and faculty in operations research and applied business statistics. Potential topics include applications and extensions of mathematical programming, stochastic processes, discrete programming, networks models, and the application of statistical techniques.

QMETH 580 Mathematical Programming (4)
Advanced survey of mathematical programming with applications to business problems. Includes linear, integer, stochastic, nonlinear, and dynamic programming and network optimization. Treatment includes formulation, optimality conditions, duality theory, solution algorithms. Applications to production, scheduling, marketing, finance, and equipment replacement. Prerequisite: B A 501 or equivalent and doctoral student or permission of instructor.

QMETH 592 Stochastic Models: Queuing and Simulation (4)
Application of stochastic processes to business problems. Focuses on development and application of queuing theory and discrete event simulation. Prerequisite: stochastic processes, knowledge of high level programming language, and doctoral student or permission of instructor.

QMETH 599 Doctoral Seminar in Operations Research (1, max. 12)
Study and research in advanced topics of operations research. The seminar is generally concerned with unpublished areas of research and is conducted by visiting professors and departmental faculty. Prerequisite: doctoral student status. Credit/no credit only.

QMETH 600 Independent Study or Research (*)

School of Dentistry

Dean
Martha Somerman
D322 Health Sciences

Established in 1945, the University of Washington School of Dentistry offers courses leading to a Doctor of Dental Surgery (D.D.S.) degree, and advanced education leading to a Master of Science in Dentistry degree and/or a certificate of proficiency in endodontics, oral medicine, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Residency training is available in oral and maxillofacial surgery and general practice. The Department of Oral Biology offers a Master of Science (M.S.), an M.S. non-thesis degree for dental hygiene educators, and a doctoral degree (Ph.D.). Postdoctoral study is available in various disciplines. The
The following departments participate in the curriculum for personal development, professionalism, and a strong sense of self-inquiry, and the free exchange of ideas can flourish to facilitate an environment of mutual respect where objectivity, imaginative staff, faculty, and patient populations. It seeks to foster outreach programs that are especially attentive to minority and being of the people of the community and the region through oral health. The service mission is to improve the health and well-being of the community and the region through comprehensive Center for Oral Health Research is focused on children's dental health and is one of only six such programs to be funded nationally by the National Institute of Dental and Craniofacial Research. State-of-the-art clinical research facilities are available for faculty and student use.

School of Dentistry Mission Statement: “The School of Dentistry shares the University’s overall mission to generate, disseminate, and preserve knowledge and serve the community. The School is an integral part of the Health Sciences Center and is an oral health-care center of excellence serving the people of the state of Washington and the Pacific Northwest. Our primary mission, through educational, research, and service programs, is to prepare students to be competent oral health-care professionals. The School’s research programs contribute to the fundamental understanding of biologic processes and to the behavioral, biomedical, and clinical aspects of oral health. The service mission is to improve the health and well-being of the people of the community and the region through outreach programs that are especially attentive to minority and underserved populations. The School values diversity in its students, staff, faculty, and patient populations. It seeks to foster an environment of mutual respect where objectivity, imaginative inquiry, and the free exchange of ideas can flourish to facilitate personal development, professionalism, and a strong sense of self-worth.” (August 2002)

The following departments participate in the curriculum for the School’s programs:

- Dental Public Health Sciences is concerned with the social, legal, political, economic, and psychological aspects of dental health-care delivery as well as the epidemiology of oral diseases and the application of biostatistical methods in studying them.
- Endodontics offers training in the diagnosis and treatment of diseases and injuries of the tooth pulp and periradicular tissues.
- Oral and Maxillofacial Surgery trains students in the procedures used for all types of operations in the oral cavity and all phases of dental pain control.
- Oral Biology encompasses the study of basic biological mechanisms in normal and diseased oral tissues and structures.
- Oral Medicine provides training in diagnostic techniques and nonsurgical treatments of oral disease.
- Orthodontics provides training in the prevention and correction of malocclusion of the teeth.
- Pediatric Dentistry provides students with a broad understanding of prevention, diagnosis, and treatment of most dental needs from infancy through adolescence with emphasis on the psychological and educational requirements of the patient and parent.
- Periodontics offers training relative to the periodontium and dental implants, with emphasis placed on diagnosis, prevention, treatment, and maintenance.
- Prosthodontics provides instruction in the fabrication and maintenance of removable, complete, and partial dentures, and dental implants.
- Restorative Dentistry offers training in the restoration or replacement of tooth structure and study of the form and function of the masticatory structures.

Undergraduate Program

Dental hygiene seeks to understand why some people get preventable oral diseases and why others do not. Risk factors, such as poverty, ethnicity, and education, as well as environment, contribute to perpetuation of these diseases. The dental hygienist observes and defines dental diseases, assesses potential outcomes of interventions, and manages conditions that compromise oral health. As an applied discipline, dental hygiene links its theoretical foundation to behavioral and natural sciences. Using evidence-based science, the discipline seeks to facilitate holistic assessments of individuals and communities and to find solutions to oral health problems. Students in the discipline learn to transfer learning from clinical to community contexts as a means of improving the oral health status among people.

dhy@u.washington.edu

The Dental Hygiene Degree Completion Program offers the following programs of study:
- Bachelor of Science degree with a major in dental hygiene. The UW has no prelicensure program in dental hygiene.

Bachelor of Science

Suggested First- and Second-Year Courses: Students desiring entry into the dental hygiene profession may take their first year general studies courses in chemistry, psychology, sociology, public speaking, English language composition, mathematics, nutrition, microbiology, and liberal studies at the UW, or other community, technical, or four-year institution. Having successfully completed a prelicensure dental hygiene program and obtained a license to practice dental hygiene, students are eligible to return to the UW to complete the Bachelor of Science degree with a major in dental hygiene.

Department Admission Requirements

This bachelor of science degree program is a postlicensure degree completion program. This means that the applicant must hold a certificate or diploma in dental hygiene as well as a license to practice clinical dental hygiene to apply. Admission for U.S. or Canadian Applicants
- Completion of an associate degree or certificate/diploma in dental hygiene from a program accredited by the Commission on Dental Accreditation of the American Dental Association and current Cardiopulmonary Resuscitation (CPR) credential.
- Possession of a license to practice dental hygiene in at least one state or Canadian province and current Cardiopulmonary Resuscitation (CPR) credential.
- Possession of a certificate or diploma in dental hygiene granted by an officially recognized institution.
- Verification that the practice of dental hygiene is authorized by the government of the home country.

Departmental Application Deadline: Transfer and postbaccalaureate students are admitted into the program summer and autumn quarters. The deadlines are the same for both quarters: April 15 for citizens and permanent residents, January 15 for international students.

Major Requirements

Students must complete University requirements as well as dental hygiene major requirements. University requirements include a 45-credit senior residency, English, writing, and quantitative reasoning proficiencies, and Areas of Knowledge. The dental hygiene major requirements include a sequence of three dental-hygiene core courses and a minimum of one path.
Completion of the required major and University requirements takes one to two years. Students planning to graduate in one year must have a faculty-approved plan of study within the first quarter of enrollment. Students planning a two-year program must have a faculty-approved plan of study within the first two quarters of enrollment. All students must meet with a program adviser yearly and are encouraged to meet with a program adviser quarterly.

**Core Requirement**

Students complete a year-long core requirement founded on significant oral health problems and probable solutions within the context of specific communities. Behavioral change, community development, health education models, and scientific literature provide a theoretical foundation for study in the core courses. The core curriculum focuses on real problems in real places. Using a people-places-problems approach, students use Internet and library resources to research, analyze, discuss, and make evidence-based decisions relevant to oral health promotion and dental disease prevention. Further, they explore core values, ethics, laws, and issues related to care access, health promotion/disease prevention approaches, and healthcare delivery models. Included are field activities linked to education, government, business, and health resources. Additionally, dental hygiene majors complete requirements in at least one path and may take electives of their choice to complete the senior residency requirement. All students must complete the three core courses, D HYG 465, D HYG 492, and D HYG 493 (3 credits each, total 9) in the prescribed order.

**Path Requirement**

Students must select at least one of two pathways to fulfill the path requirement. The options are:

- Dental Hygiene Care. This path is for dental hygienists who desire to work as clinicians in hospitals, clinics, long-term care facilities or other healthcare services that require advanced clinical and management skills. Students take courses in interdisciplinary health sciences, along with courses that focus on dental hygiene care and management of persons with physical, mental, developmental, and complex medical disabilities. Required courses in oral medicine augment this path. Major requirements include a minimum of 11 or 12 credits beyond the core: 10 credits in ORALM 460, or approved alternatives that focus on care of special clients; 3 credits of approved interdisciplinary health science courses; and 2 credits of approved research.

- Oral Health Promotion. This path is for dental hygienists who desire to work in multicultural and multidisciplinary settings at the local, state, national, or international levels and who require skills beyond clinical expertise. Students learn about the framework within which societies organize and manage their healthcare services and learn to link health with the environment, people’s beliefs, ways of life, and kinship. They learn about differences between Western, Eastern and Shamanistic philosophies of health as prerequisites to understanding other healthcare services that require advanced clinical and management skills. Students take courses in interdisciplinary health sciences, along with courses that focus on dental hygiene care and management of persons with physical, mental, developmental, and complex medical disabilities. Required courses in oral medicine augment this path. Major requirements include a minimum of 15 credits beyond the core: 10 credits in ORALM 460, or approved alternatives that focus on care of special clients; 3 credits of approved interdisciplinary health science courses; and 2 credits of approved research.

**Academic Standards**

The School of Dentistry requires that a minimum numerical grade of 2.5 be earned in dental hygiene courses which are to be counted toward satisfaction of graduation requirements with a dental hygiene major. Graduation with a dental hygiene major also requires a minimum cumulative GPA of 2.00 for all work done in residence at the University. A student whose cumulative GPA falls below 2.00 in any quarter will be placed on academic probation. The status of academic probation shall be removed when the cumulative GPA is 2.00 or above. While on probation, the student must attain at least a 2.50 GPA for each succeeding quarter’s work until the cumulative GPA is raised to 2.00.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The UW Dental Hygiene Completion Program emphasizes the health of populations rather than of individuals. Dental hygienists conduct community assessments; develop networks that engage community partners; set priorities; obtain baseline measures; set targets; and measure progress toward solutions to community oral health problems. Dental hygiene core skills include the ability to search and retrieve information from the Internet; use census, geographic, and demographic data; critically assess scientific literature; analyze and interpret data; and apply new scientific knowledge to solutions of health problems. In addition to the core knowledge set, dental hygienists may select from two paths of study: care of special populations and oral health promotion. Depending upon area of interest, graduates pursue careers as business managers, marketing specialists, clinic administrators, hospital and nursing home dental hygienists, public health planners, program managers, research assistants, and teachers of dental hygiene.

- **Instructional and Research Facilities:** None.

- **Honors Options Available:** None.

- **Research, Internships, and Service Learning:** Students in the undergraduate program take off-campus service-learning courses related to their path of study. Generally, sites are located in rural and underserved health provider shortage areas of Washington state, but may include regional, national, or international locations. Students are eligible for international programs and exchanges following completion of their core course requirements. An applicant who is a dental hygienist form an affiliated international institution may be eligible for a tuition waiver during one or more quarter of the regular academic year (autumn, winter, spring). Students interested in these opportunities need to contact the program’s academic advisor at least six months in advance.

- **Major Requirement:** Majors may be eligible, following the completion of prerequisite courses, to participate in study-abroad programs that focus on health care delivery, oral health promotion or dental disease prevention. The University and its affiliated sites provide the settings for fieldwork, service, and research activities, and interdisciplinary learning experiences.

- **Department Scholarships:** Students may apply for scholarships offered by the Dental Hygiene Education fund.

- **Student Organizations/Associations:** The Washington Rural Health Organization, Washington State Public Health Association, Washington State Dental Hygienists’ Association, American Dental Education Association, and International Association of Dental Research are among many from which to select.

**Academic Standards**

The School of Dentistry requires that a minimum numerical grade of 2.5 be earned in dental hygiene courses which are to be counted toward satisfaction of graduation requirements with a dental hygiene major. Graduation with a dental hygiene major also requires a minimum cumulative GPA of 2.00 for all work done in residence at the University. A student whose cumulative GPA falls below 2.00 in any quarter will be placed on academic probation. The status of academic probation shall be removed when the cumulative GPA is 2.00 or above. While on probation, the student must attain at least a 2.50 GPA for each succeeding quarter’s work until the cumulative GPA is raised to 2.00.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The UW Dental Hygiene Completion Program emphasizes the health of populations rather than of individuals. Dental hygienists conduct community assessments; develop networks that engage community partners; set priorities; obtain baseline measures; set targets; and measure progress toward solutions to community oral health problems. Dental hygiene core skills include the ability to search and retrieve information from the Internet; use census, geographic, and demographic data; critically assess scientific literature; analyze and interpret data; and apply new scientific knowledge to solutions of health problems. In addition to the core knowledge set, dental hygienists may select from two paths of study: care of special populations and oral health promotion. Depending upon area of interest, graduates pursue careers as business managers, marketing specialists, clinic administrators, hospital and nursing home dental hygienists, public health planners, program managers, research assistants, and teachers of dental hygiene.

- **Instructional and Research Facilities:** None.

- **Honors Options Available:** None.

- **Research, Internships, and Service Learning:** Students in the undergraduate program take off-campus service-learning courses related to their path of study. Generally, sites are located in rural and underserved health provider shortage areas of Washington state, but may include regional, national, or international locations. Students are eligible for international programs and exchanges following completion of their core course requirements. An applicant who is a dental hygienist form an affiliated international institution may be eligible for a tuition waiver during one or more quarter of the regular academic year (autumn, winter, spring). Students interested in these opportunities need to contact the program’s academic advisor at least six months in advance.

Major requirements include a minimum of 11 or 12 credits beyond the core: 10 credits in ORALM 460, or approved alternatives that focus on care of special clients; 3 credits of approved interdisciplinary health science courses; and 2 credits of approved research.

Oral Health Promotion. This path is for dental hygienists who desire to work in multicultural and multidisciplinary settings at the local, state, national, or international levels and who require skills beyond clinical expertise. Students learn about the framework within which societies organize and manage their healthcare services and learn to link health with the environment, people’s beliefs, ways of life, and kinship. They learn about differences between Western, Eastern and Shamanistic philosophies of health as prerequisites to developing educational strategies for oral health promotion and dental disease prevention. As students build skills essential for working with health agencies, they participate in community health projects as educators, advocates, or researchers. Activities focus on the health of children and families in rural and remote areas of Washington State. Major requirements for this path include a minimum of 15 credits beyond the core, to include 3 credits in approved interdisciplinary health sciences courses, 3 credits in healthcare delivery systems, D HYG 402 or substitute; 3 credits in health promotion strategies (D HYG 403) or approved substitute; and a minimum of 4 credits in at least 2 sections of D HYG 404 or approved substitutes.

**Academic Standards**

The School of Dentistry requires that a minimum numerical grade of 2.5 be earned in dental hygiene courses which are to be counted toward satisfaction of graduation requirements with a dental hygiene major. Graduation with a dental hygiene major also requires a minimum cumulative GPA of 2.00 for all work done in residence at the University. A student whose cumulative GPA falls below 2.00 in any quarter will be placed on academic probation. The status of academic probation shall be removed when the cumulative GPA is 2.00 or above. Graduate Programs

Through their respective departments, the graduate faculty members of the School offer programs leading to the degrees of Master of Science in Dentistry, Master of Science, and Doctor of Philosophy, as well as postgraduate certificate programs.

Master of Science in Dentistry/Postgraduate Certificates

Fields of study for the M.S.D. programs include endodontics, oral pathology, oral medicine and orofacial pain, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Although students may enroll in a graduate certificate program only, students may elect to pursue an M.S.D. The programs are planned to prepare students to think independently, to evaluate their own services and the literature of the programs, and to develop their clinical skills to a level to permit successful clinical practice, teaching, or research in their chosen specialty. Emphasis is placed on the basic principles of diagnosis and treatment. The purpose of the programs is not only to train students in their respective specialties but also to encourage preparation for academic careers or for research. Research may be undertaken in basic or applied science. Opportunities for collaborative research are available with the cooperation of other colleges, schools, or departments of the University.

Applicants for admission to the M.S.D. and certificate programs must be graduates of a school of dentistry approved by the Commission on Dental Accreditation of the American Dental Association or a university dental school located outside the North American continent whose curriculum and admission requirements are similar to those of the UW School of Dentistry. Applications must be submitted to the appropriate department on or before the following deadlines: September 1 for periodontics; September 15 for orthodontics; October 1 for endodontics, pediatric dentistry, and prosthodontics; November 1 for oral medicine and orofacial pain. A concurrent Application for Admission to the Graduate School also must be filed. International students must complete a preliminary evaluation process before the application deadline and must demonstrate competency in the English language, for which TOEFL scores are required. Applicants who have not received dental degrees from an institution within the United States will be required to supply Graduate Record Examination scores for admission to the University of Washington Graduate School (graduates of U.S. institutions are not required to submit GRE scores). Requests for information or application forms may be forwarded to the department of the specialty field, School of Dentistry, University of Washington, Seattle, WA 98195-6365, 206-543-5840.

A minimum of eight consecutive full-time quarters of residence is required except in the periodontics, orthodontics, and prosthodontics programs. Certificate training in periodontics requires a minimum of 12 consecutive full-time quarters of enrollment and may be pursued concurrently with other advanced degrees which may extend the program length. The graduate prosthodontic program requires a minimum of 12 full-time quarters of didactic, clinical care, and research activities. The graduate orthodontic program is ten consecutive full-time quarters. The M.S.D. program in endodontics requires three to six months of additional training beyond the eight quarter requirement for the certificate program only.

Postgraduate certificate programs are not administered by the Graduate School, and no thesis is required. The course content may vary somewhat from the M.S.D. program, although the same academic standards are applied in both programs. Tuition and fees are assessed at the graduate level for both programs.

Master of Science, Doctor of Philosophy

M.S. and Ph.D. programs are offered through the Department of Oral Biology. Faculty from several dental departments also participate in the Oral Biology Ph.D. program. The department and the School of Dentistry also offer a combined D.D.S./Ph.D. program.

Oral biology is concerned with the nature of the oral and paroral tissues and with the applicability of basic scientific knowledge to oral tissues in health and disease. The courses and research programs in the department deal with the origin, growth and development, structure, and functions of oral tissues, as well as with the etiology and pathogenesis of oral diseases and malfunctions. By its nature, oral biology overlaps the basic medical sciences and clinical dental sciences.

The department contains well-equipped laboratories actively engaged in research involving varied approaches. These include biochemical and molecular studies on protein synthesis and secretion; the structure of salivary macromolecules and the expression and role of cytoskeletal proteins of oral epithelial and epidermal cells; pharmacological studies of molecular mechanisms in the regulation of secretion; physiological studies on ion fluxes and their control in secretory tissues; microbiological studies on the molecular basis of bacterial colonization of oral surfaces, and the identification, taxonomy and pathogenicity of oral pathogens; and pathological studies on the growth and metastasis of oral tumors. Several programs are available through the Department of Oral Biology to accommodate students with different educational objectives.

A program of study and research leading to the Doctor of Philosophy degree is available for those students desiring extensive research training as well as in-depth course work in oral biology. In addition to the courses offered by this department, students in the Ph.D. program are expected to gain proficiency in one of the biomedical sciences.

A separate program of study and research leading to the Master of Science degree is available for those students who want less training than the Ph.D. program affords.

A non-thesis option exists in the Master of Science program for the purpose of training dental hygienists for careers in educational and instructional programs in certain basic and applied sciences. The School offers a program leading to the degree of Master of Science in Dentistry in oral pathology. Students enroll in a series of advanced courses in general and oral pathology.

D.D.S. training can be combined with Ph.D. training for students aspiring to a career in academic dentistry. In this program D.D.S. training occupies most of the first three years, with research experience during the summers and combined Ph.D. coursework, research, and clinical experiences during years four through seven. Financial support is available for eligible D.D.S./Ph.D. trainees. Applicants for all oral biology graduate programs must have either a baccalaureate or professional degree from a dental or medical school. Acceptance into the programs requires approval of both the Department of Oral Biology and the Graduate School, and the School of Dentistry for the D.D.S./Ph.D. Applicants may also apply for financial support from the Cross-Disciplinary Dental Science Research Training Grant. This training grant is administered by the School of Dentistry in association with the Department of Bioengineering and strives to apply state-of-the-art research approaches to topics in clinical dentistry and dental research. The program emphasizes molecular and cellular biology, microbiology, bioinformatics and bioengineering approaches, and supports classroom and laboratory training. Support is available for students with either a baccalaureate or professional degree. For more information or application materials, contact the Graduate Program Adviser, Department of Oral Biology, B224 Health Sciences, Box 357132, Universiy of Washington, Seattle, WA 98195-7132; (206) 543-5477; or visit the Oral Biology Web site.
Residency Training

Residency training programs are available in oral and maxillofacial surgery and the general practice of dentistry. Both programs provide for rotation through several of the University-affiliated hospitals. Each is a fully accredited program that grants a certificate upon successful completion of the training. Stipends are provided. The Oral and Maxillofacial Surgery Program is four years in duration and provides broad exposure to all aspects of the practice of oral and maxillofacial surgery. Application, selection, and administration of this training program is provided through the Department of Oral and Maxillofacial Surgery. Applicants to the program must be graduates of an accredited U.S. or Canadian Dental School, demonstrate proficiency in the English language, submit National Dental Board Examination scores for Part 1, and register and participate in the Postdoctoral Dental Matching Program. Further information can be obtained by contacting the Residency Program Coordinator, Department of Oral and Maxillofacial Surgery, Box 357134, University of Washington, Seattle, WA 98195-7134, 206-543-7722.

The General Practice Residency (GPR) is a one-year training program that emphasizes the general dentist’s role in a hospital and the management of medically, physically, and mentally compromised patients. Application, selection, and administration of the General Practice Residency is provided through the Department of Restorative Dentistry. Further information can be obtained by contacting Dr. Barton S. Johnson, Division of Hospital Dentistry, Department of Restorative Dentistry, Box 357456, School of Dentistry, University of Washington, Seattle, WA 98195-7456; (206) 543-7496; or visit the General Practice Residency Web site.

Postdoctoral Fellowships

Postdoctoral training fellowships are available in behavioral or public-health research in dentistry in addition to those in oral biology. Programs vary in duration and many accommodate degree-seeking or research fellows pursuing an academic career. NIH-sponsored partial tuition and a stipend for up to three years are provided for U.S. citizens, noncitizen nationals, and those foreign nationals with permanent-residency status in the United States. Members of ethnic minorities and women are especially invited to apply. Application, selection, and administration of the program are provided through the Departments of Dental Public Health Sciences and Oral Biology.

Graduate Training in Dental Public Health

Opportunities exist for pursuing graduate degrees in public health which emphasize applications to research in dentistry. Master of Public Health (M.P.H.) programs in the Departments of Epidemiology and Health Services of the School of Public Health and Community Medicine can be pursued in conjunction with postdoctoral training in the School of Dentistry’s Department of Dental Public Health Sciences. Didactic course work is taken in the School of Public Health and Community Medicine, augmented with independent study and thesis research on selected topics in the School of Dentistry. Similar opportunities exist for pursuing the Ph.D. in epidemiology or biostatistics with an emphasis on research in dentistry. Further information may be obtained from the Office of Academic Affairs, Box 357480, School of Dentistry, University of Washington, Seattle, WA 98195-7480, (206) 221-6887.

The Office of Continuing Dental Education, School of Dentistry, offers programs and courses throughout the year to provide dentists, auxiliary personnel, and others involved in health care with current scientific knowledge and methodology of patient treatment. Utilizing local, national, and international experts, these programs provide a broad spectrum of information relevant to the needs of dental-health professionals. The instructional program consists of lectures, clinical courses, study clubs, extended clinical training, correspondence, and participation courses, some of which are offered in the new simulated-patient laboratory. Various programs are presented throughout the year in the Pacific Northwest, Alaska, and Hawaii.

A list of courses offered may be obtained from the Office of Continuing Dental Education, Box 357137, University of Washington, School of Dentistry, Seattle, WA 98195-7137, 206-543-5444, www.uwcdce.org.

Professional Programs

Doctor of Dental Surgery

The Doctor of Dental Surgery (D.D.S.) curriculum provides students with opportunities to learn the fundamental principles significant to the entire body of oral health. Students (approximately 54-56 per class) learn the basic health sciences, attain proficiency in clinical skills, develop an understanding of professional and ethical principles, and develop reasoning and critical decision-making skills that enable implementation of the dental knowledge base. The first year is divided among lecture, laboratory, and preclinical activities in basic sciences, dental anatomy, occlusion, and dental materials. There are also early clinical experiences in preventive dentistry and periodontics. In the second year of the curriculum, students develop additional preclinical skills, learn how basic science principles are applied to the clinical setting, and begin clinical patient treatment in the school’s clinics. In the third and fourth years, students primarily concentrate on providing clinical treatment and attend lectures that refine diagnostic and technical skills. Additionally, students are required to participate in elective clinical and didactic courses. Students choose elective courses that are offered by all departments, including opportunities in independent study, research, seminars on various topics, and specialty clinical topics.

The D.D. S. curriculum extends for 42 months or 14 quarters, including two summer quarters. Twelve of the academic year quarters are ten weeks of instruction and one week of examination, while the two required summer quarters following years two and three are each nine weeks long. If needed, students may be allowed additional time to complete required course work beyond 42 months.

Admission

To be considered for admission to the predoctoral program, a student will need to have completed the required courses listed below, have taken the Dental Admission Test, and have attended a personal interview. The School does not select or give preference to a particular undergraduate major field. The Admissions Committee encourages diversity in majors. Courses in the social sciences and the humanities are also important and are reviewed by the Committee.

The School of Dentistry is a state supported institution and participates in the student exchange program provided by the Western Interstate Commission for Higher Education (WICHE) which supports students from western states without dental schools. Although all applications are carefully reviewed, preference in admission is given to residents of Washington and WICHE states, followed by residents of other states. Required courses are: general chemistry — 2 quarters or 1 semester; organic chemistry — 2 quarters or 1 semester; general biochemistry — 2 quarters or 1 semester, general physics — 3 quarters or 2 semesters; general biology or zoology — 3 quarters or 2 semesters; general microbiology — 2 quarters or 1 semester. The School enrolls a first-year class of 50-55 students.

Transfer Applicants: The School rarely, and only under exceptional circumstances, admits transfer students from other dental schools.

Foreign Applicants: The School does not provide a special program for foreign-trained dentists.

Health Sciences Minority Student Programs: To increase diversity of students, the School participates in and provides funding for the Health Sciences Minority Student Program. In addition to advising
and career counseling, this office works with Health Sciences schools to provide student development and support programs, networking opportunities, and summer research programs. The HSMSP Office activities include participation on several Health Sciences and campus-wide committees for purposes of collaborating and exchanging strategies on effective methods for recruiting and retaining a diverse student body, as well as promoting and celebrating diversity.

The School belongs to the American Association of Dental Schools Application Service (AADSAS), the national application service used by most U.S. dental schools. The School has established November 1 as its AADSAS priority filing deadline. This means that only those applications received in the AADSAS Washington, D.C. office by the priority filing date will be forwarded to the University of Washington for consideration by the Admissions Committee. There are no exceptions. AADSAS applications are available online at www.adea.org. Information regarding the Dental Admission Test may be found at http://www.ada.org/prac-careers/dat-01.html.

For information on admission to the University of Washington School of Dentistry contact either Kathleen Craig, Office of Student Admissions, School of Dentistry, University of Washington, Box 356365, Seattle, WA 98195-6365, 206-543-5840, fax 206-616-2612, askkywood@uwashington.edu, www.dental.washington.edu, or Jason Boyd, Predental Advising Office, University of Washington, 171 Mary Gates Hall, Box 353760, Seattle, WA 98195-3760.

Once the AADSAS application has been received, a preliminary screening determines if an applicant meets the Admissions Committee’s criteria to receive a supplemental application and request for the following materials:

- A supplementary application which includes a short personal statement
- A non-refundable application fee of $35.
- Three letters of recommendation. Letters of recommendation must include one from a science instructor who can evaluate the applicant’s academic and intellectual qualifications, a second from a dentist who is familiar with the applicant’s knowledge of and motivation toward the dental profession, and the third (character reference) from someone who can indicate the applicant’s contribution to fellow man, community, etc. If a predental committee exists on the applicant’s campus, a combined recommendation from that committee may be used to replace all three recommendations. The School of Dentistry will accept letters of recommendation processed by AADSAS, or directly from recommenders.
- Dental Admission Test scores. Test must be taken by October 31 of the year prior to entry.
- Transcripts from all higher education institutions attended.
- A list of current and future courses.
- Acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Dental Education at the University of Washington School of Dentistry (to be sent with the supplemental application form).
- Conviction/criminal history information. Washington state law requires that all faculty, students, and staff disclose background information concerning crimes and offenses against vulnerable populations. A complete copy of the law is available from the School’s Office of Student Services and will be forwarded upon request. Applications will not be considered until completed disclosure forms have been returned to Student Admissions.

The application will be considered complete once all materials noted above (1-8) are returned. Upon receipt of the completed application, invitations for an interview are sent to applicants based on a preliminary screening of grades, DAT scores, and noncognitive factors. The interview is an opportunity for an open and friendly discussion of the applicant’s interests, background, and reasons for selecting dentistry as a profession. The interview allows the applicant to ask questions about the School, faculty, and student life, and is conducted by members of the Admissions Committee. In addition to the interview, the applicant will have an opportunity to hear information about financial aid, meet and have lunch with enrolled students, take a tour of the School, and meet one of the School’s deans.

Following the interview, the Admissions Committee, which is composed of faculty and community dentists, will make a decision concerning admission status. The following seven areas are considered in their deliberations:

- Grades. Overall grade-point average (GPA) and GPA of predental required science courses are reviewed. College grades are an important indicator of dental school performance and success. The Committee members review these grades for a strong, consistent GPA without withdrawals, incompletes, repeated courses, or non-graded options. Grade trends are reviewed.
- DAT (Dental Admission Test). The test, sponsored by the American Dental Association, covers several areas: quantitative reasoning, survey of natural sciences (including biology, general, and organic chemistry), and perceptual ability (including form development, apertures, angles, cubes, and orthographic projections). At the University of Washington the scores are reviewed to identify an applicant’s areas of strength. The test must be taken no later than October 31, one year prior to admission.
- Level of Pre-professional Education. The majority of applicants will have a baccalaureate degree by the time of entry. Admission may be offered to applicants without a baccalaureate degree, but only to those applicants who have completed all predental requirements and have an extremely competitive academic record. A minimum of three years’ full-time coursework is required.
- Dental Knowledge. Knowledge of the field of dentistry through experience in a dental setting (dentist’s office, clinic, etc.), introductory dental coursework, and exploration of the dental literature are considered as admission factors. A qualified applicant will have a clear understanding of the profession and a demonstrated interest in the field.
- Contribution to Diversity. Diversity in the student body contributes to the development of oral health care professionals prepared to address the needs of society.
- Unique Life Experiences. Research and teaching efforts, travel, and work experience are some of the life experiences that are considered important. Such experiences demonstrate the breadth and level of maturity of a candidate.
- Personal Attributes. In addition to motivation, the applicant’s poise and communication skills are examined by the Admissions Committee. Personal attributes such as integrity, responsibility, leadership, initiative, community service, perseverance, and diversity of interests are important.

Although interviews begin in October, the earliest the Admissions Committee will notify applicants of its decision is December 1. The School uses a “rolling admission” format, so interviews and committee decisions will continue to be made between December and March. The Admissions Committee will make one of three decisions regarding all applications:

- Offer of Acceptance. Admission application has been accepted. The applicant will have a specified time to reply to reserve enrollment in the entering first-year class. In addition, enrollment will be contingent on timely submission of the following requirements: required registration deposit, transcripts showing completion of all required predental courses, registration for autumn quarter of the upcoming academic year, and completion of required immunizations.
- Alternate Status. Applicant is offered a position on the Alternate List. The applicant will have a specified time to...
should be requested from the Washington State Department of Examination. Additional information about licensure requirements and the Western Regional Examining Board completed the American Dental Association National Board from a U.S. or Canadian dental school, and have successfully Washington, the candidate for licensure must have a dental degree dental licensure requirement. In order to practice in the State of conditional upon meeting the requirements of the individual state related dental fields. For information, write to the Commission on Accreditation, the recognized accrediting body for dentistry and the contemporary biohazardous materials guidelines. Offered: S. 

Course Descriptions

DENT 520 P-Clinical Practice Management 1 (1) Designed to provide the student with the knowledge required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, authorized treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines. Offered: S. 

DENT 521 P-Oral Pathology (3) Survey of the diseases of the oral-facial regions in lecture and laboratory sessions. Among the conditions discussed are diseases of teeth and their supporting structures and diseases of the oral and paroaral soft tissues and bones. Correlations between clinical findings, etiologic factors, and histopathologic features are stressed. Attendance in the laboratory is required. Offered: A. 

DENT 522 P-Oral Pathology (3) Survey of the diseases of the oral-facial regions in lecture and laboratory sessions. Among the conditions discussed are diseases of teeth and their supporting structures and diseases of the oral and paroaral soft tissues and bones. Correlations between clinical findings, etiologic factors, and histopathologic features are stressed. Attendance in the laboratory is required. Offered: W. 

DENT 523 Medical Emergencies in the Dental Setting (1) Initial emergency training, focusing primary upon recertification in BLS. Emphasizes intellectual and psychomotor skills for universal treatment of emergencies (which includes BLS). Offered: A. 

DENT 533 Medical Emergencies in the Dental Setting II (2) Comprehensive medical emergency training, including review of BLS. Students participate in real-time simulated drills to prepare both their intellectual and psychomotor skills for emergency care situations. Credit/no credit only. Offered: A. 

DENT 534 P-Geriatric Dentistry (1, max. 2) Two-quarter sequence on special needs of older persons seeking dental care: oral health, psychology of aging, socioeconomic problems, effective communication, dental management, and special problems in long-term care settings. Offered: WSp. 

DENT 537 P-Hospital Dentistry (1) Introductory course presenting hospital procedures and protocol and the role of the dentist in the hospital. Offered: Sp.
DENT 543 Medical Emergencies in the Dental Setting III (1)
Comprehensive review/refreshment of medical emergency training, including recertification in BLS. Students participate in real-time simulated drills to prepare both intellectual and psychomotor skills for emergency care situations. Offered: S.

DENT 547 Dental Practice Administration (2)
Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: A.

DENT 548 Dental Practice Administration (2)
Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: W.

DENT 549 Dental Practice Administration (2)
Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: Sp.

DENT 550 P-Special Studies in Dentistry (*, max. 12)
Series of courses offered by the various departments from which students may elect study in areas of special interest to them. These courses include subject matter applicable to all phases of dentistry. Credit/no credit only. Offered: AWSpS.

DENT 551 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 552 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 553 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 554 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 555 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 556 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 557 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 558 Internal Medicine for Dentistry [1-3], max. 6
Review of major organ systems, including normal anatomy and physiology, common pathophysiologies, medical interventions. Details modifications necessary for dental treatment and medical emergency management. Credit/no credit only. Offered: AS.

DENT 559 Contemporary Dental Practice Management (1)
Chasteen
Didactic study designed to update dental graduate students in recent developments in the management of a modern dental practice. Focuses on the business and legal aspects of dental practice. Credit/no credit only. Offered: A.

DENT 560 P-Extramural Clinics in Geriatric Dentistry (2)
Extramural geriatric clinical experience, including three days at a nursing home or community clinic, and brief didactic component. Credit/no credit only. Offered: AWSpS.

DENT 561 P-Special Studies in Geriatric Dentistry (*, max. 12)
Series of courses offered by the various departments from which students may elect study in areas of special interest to them. These courses include subject matter applicable to all phases of dentistry. Credit/no credit only. Offered: AWSpS.

DENT 562 Elective Offering in Advanced Cardiac Life Support (2)
Introduction to airway management (masking/intubation/oropharyngeal airways/nasopharyngeal airways/cricothyrotomy), 12-lead EKG recognition and diagnosis, cardiac physiology and pathophysiology, and pharmacologic action of several different medications. Students who pass AHA guidelines for completion of an ACLS course are awarded ACLS certification. Credit/no credit only. Offered: W.

DENT 563 Elements of Conscious Sedation (1-2)
Details theory and techniques for rendering oral, inhalation, transmucosal, intramuscular, and intravenous forms of conscious sedation. Focuses on pharmacology and pharmacokinetics of nitrous oxide, benzodiazepines, narcotics, and barbiturates. Addresses usual applications, special considerations, legal issues, and proper record keeping. Emphasizes prevention and management of emergencies. Credit/no credit only. Offered: A.

DENT 564 Medical Emergencies in the Dental Setting II (1)
Review of major organ systems, including normal anatomy and physiology, common pathophysiologies, medical interventions. Details modifications necessary for dental treatment and medical emergency management. Credit/no credit only. Offered: S.

DENT 565 Dental Photography (1)
Provides student with sufficient knowledge and experience to select and use correct photographic equipment for photographing patients (facial and interoral), casts, instruments, x-rays, charts, and objects. Credit/no credit only. Offered: A.

DENT 566 Physical Diagnosis (1)
Seminar on performing complete physical examination including basic assessment of overall patient, vital signs, cardiac, pulmonary, abdominal, extremities, neurologic, and head/neck. Examination techniques include observation, auscultation, percussion. Writing fundings and interpreting physical examinations. Offered: S.

DENT 567 Dental Practice Administration (2)
Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: W.

DENT 568 Elements of Conscious Sedation (1-2)
Details theory and techniques for rendering oral, inhalation, transmucosal, intramuscular, and intravenous forms of conscious sedation. Focuses on pharmacology and pharmacokinetics of nitrous oxide, benzodiazepines, narcotics, and barbiturates. Addresses usual applications, special considerations, legal issues, and proper record keeping. Emphasizes prevention and management of emergencies. Credit/no credit only. Offered: A.

DENT 569 Contemporary Dental Practice Management (1)
Chasteen
Didactic study designed to update dental graduate students in recent developments in the management of a modern dental practice. Focuses on the business and legal aspects of dental practice. Credit/no credit only. Offered: A.

DENT 570 Introduction to Clinical Dentistry (2)
Introduction to clinical dental training including infection control, personal dental hygiene, oral anatomical landmarks, medical histories, fluoride application, fabrication on athletic mouth guards, and professional ethics. Students participate in classroom exercise followed by rotations in functioning dental clinics. Offered: W.

DENT 571 Internal Medicine for Dentistry (1-2), max. 6
Review of major organ systems, including normal anatomy and physiology, common pathophysiologies, medical interventions. Details modifications necessary for dental treatment and medical emergency management. Credit/no credit only. Offered: AS.

DENT 572 Dental Practice Administration (2)
Material essential to persons entering dentistry in a time of rapid change in health care systems, including practice management, career opportunities, and starting out in a private practice. Offered: W.

DENT 573 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 574 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 575 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 576 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 577 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 578 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 579 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 580 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.

DENT 581 P-Clinical Practice Management 2 (1)
Designed to provide the student with the experience required to manage a patient pool during the clinical program and in future dental practice including: obtaining a patient pool, treatment planning, patient management in accordance with professional codes, risk management strategies, patient financial account management, and contemporary biohazardous materials guidelines.
DENT 645 P-Hospital Rotation (2)
Clinical experience that puts into practice the material presented in 537. The student is involved in hospital procedures and protocol and in dental care of the hospital patient as well as after-hours call duty. Offered: AWSpS.

DENT 650 P-Extramurals (*, max. 12)
Extramural sites arranged to provide dental students, at varying levels of their education, with opportunities to treat a wide variety of patients in the delivery systems outside the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

DENT 651 P-Anesthesia Rotation (6)
1.5-month rotation in anesthesia at one of three local hospitals. Objectives: administration of anesthesia, management of emergency situations and airway problems, familiarization with pharmacology of anesthetic drugs; increased efficiency with venipuncture. Credit/no credit only. Offered: AWSpS.

DENT 652 P-Clinical Medicine Clerkship (4)
One-month clinical rotation in clinical medicine at a local hospital. Objective is to increase the student’s ability in physical evaluation of patients as well as to give in-depth knowledge of hospital procedures and commonly prescribed medications. Credit/no credit only. Offered: AWSpS.

DENT 655 Medical Emergency Management: Basic Life Support (1)
Review of principles and practical applications for the management of medical emergencies in dental practice in conjunction with training and certification in Basic Life Support. Offered: S.

DENT 657 Comprehensive Clinic (1-10, max. 10)
Clinical comprehensive care for patients. Offered: S.

DENT 659 Comprehensive Clinic (1-10, max. 10)
Clinical comprehensive care for patients. Offered: S.

DENT 660 Temporomandibular Joint Diagnosis and Treatment (2, max. 8)
Seminar and clinic sequence for comprehensive examination, diagnosis, and treatment of patients with temporomandibular joint problems. Includes management of dysfunction and morphologic alterations in associated muscles and occlusion. Prerequisite: permission of instructor. Offered: AW.

DENT 690 P-Extended Clinical Dentistry (1)
Educational experiences in clinical dentistry. Available to students who have successfully completed the University of Washington Doctor of Dental Surgery curriculum and seek additional supervised experience in the delivery of oral health care services within three quarters of graduation and prior to licensure. Prerequisite: permission of instructor. Offered: AWSpS.

DENT 700 Master’s Thesis (*)
Offered: AWSpS.

Dental Hygiene

Course Descriptions

D HYG 402 Global Perspectives in Oral Health (3)
Disease patterns and their impact on oral health care delivery systems. Cultural, demographic, economic, and political factors affecting the effectiveness of various systems. Offered: A.

D HYG 403 Oral Health Educational Strategies (3)
Planning, preparing, and evaluating educational strategies for oral health promotion. Assessment of needs, development of objectives, creation of communication messages, review of behavioral and educational theories, mechanisms of evaluation. Offered: W.

D HYG 404 Field Experience in Delivery of Oral Health Care (2-12, max. 12)
Focuses on healthcare delivery issues: environmental, social, educational, economic, or cultural. Students participate at approved health agencies to learn about societal, ethical, cultural, and client oral healthcare needs and demands. The 2-credit minimum includes 30 hours on-site, end-of-quarter seminar, written assignment, and weekly e-mail communication with faculty. Offered: AWSpS.

D HYG 465 Theoretical and Scientific Basis for Dental Hygiene Practice (3)
Emphasis on new or emerging oral health theory and science and its relevance to global and local unsolved preventable dental diseases in context of economic, political, cultural, social, and moral issues. Provides framework for Internet search and retrieval of information and evidence-based science decision-making. Includes technical writing and public speaking. Offered: A.

D HYG 482 Local Anesthesia for Dental Hygienists (2)
Techniques of local anesthesia and initial management of emergencies in the dental office.

D HYG 492 Principles of Scientific Investigation for Oral Health Professionals (3) QSR
Introduction to principles of scientific investigation and their application to unresolved preventable community-based oral health problems. Includes development of a research study protocol, scientific writing, and critical-thinking skill development. Offered: W.

D HYG 493 Review of Literature for Oral Health Professionals (3) QSR
Implementation and testing of a research project designed to promote oral health or prevent dental disease in a community-based setting. Includes skills for critical review of literature, technical writing, and public speaking. Offered: Sp.

D HYG 494 Principles of Teaching for Oral Health Professionals (3)
Application of principles of learning to teaching methods and techniques used in education, with opportunity for course planning, demonstration, and practice teaching. Offered: A.

D HYG 497 Directed Studies for Oral Health Professionals (*, max. 14)
Based on student interest in special areas. Independent study and tutorial student-faculty relationships. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

D HYG 565 Theoretical and Scientific Basis for Dental Hygiene Practice (3)
Emphasis on new or emerging oral health theory and science and its relevance to global and local unsolved preventable dental diseases in context of economic, political, cultural, social, and moral issues. Provides framework for Internet search and retrieval of information and evidence-based science decision-making. Includes technical writing and public speaking. Offered: A.

D HYG 595 Internship (*, max. 12)
Clinical and/or didactic teaching experience or program administration. Teaching and administration responsibilities assigned according to student’s previous experience, education needs, and interest. Seminar required. Prerequisite: D HYG 494 or D HYG 594 and permission of instructor. Offered: AWSpS.
Dental Public Health Sciences

Course Descriptions

DPHS 201 Planning a Career in Dentistry for the Future (2)
Future-oriented overview of important concepts in dental science, contemporary modes of patient treatment, and dental-care delivery systems. Provides firsthand exposure to practice of dentistry and prerequisite materials in oral anatomy, epidemiology, and other basic sciences subjects. Open to all second-, and third-year undergraduate students. Offered: Sp.

DPHS 449 P-Directed Studies in Dental Public Health Sciences (*)
Students and faculty with common academic interests pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Offered: A/WSpS.

DPHS 510 Social and Historical Perspectives in Dentistry (2)
Examines dental care problems involving biological, behavioral, and community elements and has student develop hypotheses regarding nature and complexity of problem, set objectives, seek resources and information, and contribute to development of outcomes. Credit/no credit only. Offered: Sp.

DPHS 535 P-Scientific Literature in Clinical Decision Making (1)
Introduction to critical reading of individual articles in professional journals and integrating the findings of several articles. Use of the literature to assist the practicing dentist in making clinical decisions. Offered: Sp.

DPHS 541 P-Ethics in Dentistry (1)
Seminar improving ethical reasoning skills and conveying ethical and legal standards of the profession. Credit/no credit only. Offered: A/WSpS.

DPHS 550 P-Directed Studies in Dental Public Health Sciences (*, max. 6)
Students and faculty members who have common academic interests can pursue them together within the curriculum by means of independent study and a tutorial student-faculty relationship. Credit/no credit only. Offered: A/WSpS.

DPHS 568 Biostatistics in Dentistry (3)
Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with BIOST 510.

DPHS 569 Clinical Epidemiology and Study Design in Dentistry (2)
An introduction to epidemiological methods as they relate to dental research. Topics covered include the estimation of dental disease occurrence at patient level and site level and the design and analysis of clinical trials with special emphasis on designs unique to dentistry, such as split-mouth designs. Offered: S.

DPHS 575 Behavioral Dental Research (1)
Survey of behavioral science research and methodology in dentistry and related fields. Emphasis in various quarters varies: literature review, research design, instrumentation, data analysis. Designed for advanced students who plan a research career. Credit/no credit only. Prerequisite: doctoral degree or permission of instructor. Offered: A/WSpS.

DPHS 640 P-Professional Issues: Clinical Management of the Fearful and Phobic (1)
Introduction to assessment process and treatment strategies for successful management of anxious, fearful, or phobic patient, combined with clinical observation of diagnostic and treatment appointments of active patients. Offered: A/WSpS.

DPHS 660 Dental Fear Clinic (2)
Clinical instruction in the care of the severely anxious or phobic adult or child. Strategies from behavioral and cognitive psychology. Credit/no credit only. Prerequisite: graduate standing in dentistry or permission of instructor. Offered: A/WSpS.

Oral Surgery

Course Descriptions

O S 520 P-Local Anesthesia (2)
Pharmacology, physiology, anatomy, and techniques of local anesthesia for dental students.

O S 530 Oral Surgery: Didactic (1, max. 3)
Covers the scope of oral and maxillofacial surgery as practiced in the United States today. Introductory course for predoctoral dental students.

O S 532 P-Sedation and Pain Control (2)
Techniques of sedation (oral, inhalational, intravenous) and pain control.

O S 550 P-Directed Studies in Oral Surgery (*, max. 16)
See DPHS 449 for course description and prerequisite.

O S 560 Dental Sedation (2)
For graduates of the various dental specialties on the theory, application, and techniques of dental sedation. All forms of sedation, including oral, intramuscular, intravenous, and inhalation, are covered. Clinical experience is provided in the second half of the quarter.

O S 630 P-Clinical Oral Surgery (2, max. 6)
Clinical experience in simple and complex dentoalveolar and pre-prosthetic surgery. A problem-based course using an auto-tutorial approach covering the extraction of teeth, impaction surgery, medications, surgical complications, treatment of infections, bone cysts, maxillary sinus complications, and salivary gland and mucosal pathology. Credit/no credit only.

O S 651 P-Harborview Clerkship (2-10, max. 10)
Six-week rotation at Harborview Medical Center, including intensive instruction in oral surgery procedures and observing and assisting oral and maxillofacial surgery in the operating room. Credit/no credit only. Prerequisite: permission of department chairperson.

Pediatric Dentistry

Course Descriptions

PEDO 520 P-Pediatric Dentistry (4)
Introduction to clinical pediatric dentistry, including behavior management, oral diagnosis, preventive dentistry, dental anomalies, radiography, anesthesia, restorative procedures, pulpal therapy, interceptive orthodontics, and traumatic dental injuries of the child patient. Offered: S.

PEDO 550 P-Directed Studies in Pediatric Dentistry (*, max. 6)
See DPHS 449 for course description and prerequisite. Offered: S.

PEDO 560 Fundamentals of Pediatric Dentistry (1)
Preclinical laboratory, lecture course covering fundamentals of primary care in pediatric dentistry, including behavior management, dental emergencies, prevention, diagnosis and treatment planning, and infection control Offered: S.
PEDO 570 Pediatric Dentistry Seminar I (2)
Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 571 Pediatric Dentistry Seminar II (2)
Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 572 Pediatric Dentistry Seminar III (2)

PEDO 573 Pediatric Dentistry Seminar IV (2)
Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: S.

PEDO 574 Pediatric Dentistry Seminar V (2)
Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 575 Pediatric Dentistry Seminar VI (2)
Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: A.

PEDO 576 Pediatric Dentistry Seminar VII (2)
Series of seminars covering principles and theory of child development and behavior management for pediatric patient, including sedation, general anesthesia, and principles of informed consent, pathology of oral manifestations of diseases of children and adolescents, pediatric radiology, and use of computers in didactic, clinical, and research endeavors, and the scientific basis for the prevention and treatment of dental caries, periodontal disease, and developmental anomalies. Offered: W.

PEDO 577 Pediatric Dentistry Seminar VIII (2)
Series of seminars covering principles and theory of child develop-
PEDO 666 P-Clinical Pediatric Dentistry (1-3, max. 3)
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: W.

PEDO 667 P-Clinical Pediatric Dentistry (1-3, max. 3)
Clinical experience for graduate pediatric dental students in basic through advanced pediatric dentistry. Offered: Sp.

PEDO 668 Clinical Clerkship in Pediatric Dentistry: Yakima Valley (*, max. 5)
Comprehensive dental care for economically-disadvantaged children in a rural community health center. Offered: AWSpS.

PEDO 669 Supervised Clinical Teaching (1-3, max. 4)
Graduate pediatric dental students provide clinical instruction for predoctoral dental students by supervising clinical sessions. Offered: AWSpS.

PEDO 670 Hospital Pediatric Dentistry (1-3, max. 3)
Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: S.

PEDO 671 Hospital Pediatric Dentistry (1-3, max. 3)
Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: A.

PEDO 672 Hospital Pediatric Dentistry (1-3, max. 3)
Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: W.

PEDO 673 Hospital Pediatric Dentistry (1-3, max. 3)
Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: A.

PEDO 674 Hospital Pediatric Dentistry (1-3, max. 3)
Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: S.

PEDO 675 Hospital Pediatric Dentistry (1-3, max. 3)
Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: S.

PEDO 676 Hospital Pediatric Dentistry (1-3, max. 3)
Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: W.

PEDO 677 Hospital Pediatric Dentistry (1-3, max. 3)
Diagnosis, management, and treatment of patients with disabilities in Children’s Hospital Dental Clinic. Offered: Sp.

PEDO 679 Care of the Disabled Pediatric Patient (1)
Clinical experiences in the management of disabled patients. Offered: S.

PEDO 680 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

PEDO 681 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

PEDO 682 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 683 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.

PEDO 684 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: S.

PEDO 685 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: A.

PEDO 686 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: Sp.

PEDO 687 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 688 Pediatric Dentistry under General Anesthesia (1-4, max. 4)
Clinical course involving preoperative assessment of comprehensive dental treatment under general anesthesia and follow-up care. Offered: W.

PEDO 689 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: A.

PEDO 690 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: W.

PEDO 691 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: Sp.

PEDO 692 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: Sp.

PEDO 693 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: S.

PEDO 694 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: S.

PEDO 695 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: Sp.

PEDO 696 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: S.

PEDO 697 Craniofacial Anomalies Clinic (1-4, max. 4)
Multidisciplinary clinic in which children with craniofacial anomalies are evaluated and complex treatment plans developed and assessed. Offered: S.
PEDO 699 Pediatric Orthodontic Clinic (1-4, max. 4)
Clinical orthodontic care for pediatric patients. Offered: A/W/S.

Endodontics

Course Descriptions

ENDO 521 Introduction to Clinical Endodontics (4)
Lecture component covers the biology, pathology, diagnosis, treatment, and outcome of dentin-pulp complex and pulpal-related periradicular pathology. Preclinical laboratory component covers endodontic treatment techniques on extracted teeth from different tooth groups as practice for clinical cases. Offered: Sp.

ENDO 534 P-Endodontic Clinical Procedures (1)
Lecture course dealing with clinical procedures particular to endodontics, diagnosis and treatment of endodontic emergencies, and surgical management of endodontic problems. Offered: W.

ENDO 535 P-Clinical Management of Endodontic Treatment Problems (1)
Management of a variety of technical problems frequently encountered in the treatment of endodontic cases and the diagnosis and treatment of impact injuries to teeth. Offered: Sp.

ENDO 545 Honors Endodontics (2, max. 4)
Seminar discussions of advanced endodontic diagnosis and treatment planning issues as well as clinical sessions on treatment of calcified negotiable canals, alternate instrumentation procedures and obturation systems. Credit/no credit only. Offered: W.

ENDO 550 P-Directed Studies in Endodontics (*, max. 6)
See DPHS 449 for course description and prerequisite. Credit/no credit only.

ENDO 560 Advanced Endodontic Diagnosis and Treatment (2)
Current concepts are presented and discussed relating to the diagnosis and treatment of pulpal and periradicular pathosis. Criteria for evaluation of success or failure of root canal therapy are presented. Offered: W.

ENDO 561 Anatomical Basis for Clinical Endodontics (2)
Root canal anatomy of significance in clinical endodontics is discussed in a seminar format. Offered: A.

ENDO 562 Anatomical Bases for Surgical Endodontics (2)
Diagnosis and treatment of acute symptoms of dental origin, surgical endodontic therapy, traumatic dental injuries, and the relationship between periodontal and pulpal pathosis, including differential diagnosis and appropriate treatment planning, are discussed. Offered: Sp.

ENDO 563 Radiographic Interpretation (2)
Various aspects of radiographic interpretation of particular relevance to endodontics, including interpretation of normal structures, acquired and developmental abnormalities, infections, sialoliths, dysplasias, cysts, malignant lesions, benign tumors, and various diseases other than tumors.

ENDO 568 Endodontic Practice Management (1)
Essential elements for establishing and managing a successful specialty practice in Endodontics. Prerequisite: ENDO 562. Offered: A.

ENDO 580 Endodontic Seminar (2)
Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 581 Endodontic Seminar (2)
Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 582 Endodontic Seminar (2)
Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 583 Endodontic Seminar (2)
Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 584 Endodontic Seminar (2)
Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 585 Endodontic Seminar (2)
Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 586 Endodontic Seminar (2)
Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 587 Endodontic Seminar (2)
Continuous weekly seminar devoted to review of endodontic and related literature and discussion of research methods.

ENDO 589 Treatment Planning Seminar (2, max. 16)
Weekly seminar to discuss controversial treatment problems and difficult diagnostic cases.

ENDO 593 Clinical Practice Teaching (1, max. 3)
Closely supervised experience in teaching clinical endodontics to the undergraduate dental student.

ENDO 594 Current Endodontic Literature (1)
A review and critical evaluation of the contemporary literature relative to endodontics.

ENDO 595 Endodontic Surgery (2)
Comprehensive review of biological and technical aspects of endodontic surgery with emphasis on both the classic and current scientific surgical literature. Lectures and topic seminar discussion along with laboratory demonstration of various surgical techniques.

ENDO 597 Endodontics Teaching Seminar (2)
Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching. Offered: W.

ENDO 598 Endodontics Teaching Seminar (2)
Weekly seminars devoted to an examination of general problems of teaching and learning and specific problems of endodontics teaching. Offered: Sp.

ENDO 600 Independent Study or Research (*)
Prerequisite: permission of graduate program adviser.

ENDO 630 P-Clinical Endodontics (1-7, max. 7)
Student is required to complete endodontic treatment of anterior, premolar, and molar teeth. In addition to nonsurgical treatment of several endodontic cases, the student assists with a periapical surgery. Student must complete seven quarters of 630 and all course requirements before a grade is awarded.

ENDO 658 Endodontic Emergency Rotation (1)
Clinical experience in managing and treating patients in pain. Offered: A/W/S.

ENDO 659 P-Endodontics Extended Learning (*, max. 4)
Supplemental work in endodontics to correct an area of student deficiency. Credit/no credit only.

ENDO 660 Clinical Endodontics (4, max. 32)
Clinical diagnosis and treatment of pulpal pathosis and related sequelae.

**Oral Biology**

**Course Descriptions**

**ORALB 449 Undergraduate Research Topics in Oral Biology (1)***

Individual research on topics selected in collaboration with a faculty member. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**ORALB 510 P-Development, Structure, and Function of Oral Tissues (3-)**

**ORALB 520 P-Molecular Microbiology and Oral Diseases (3)**

Lamont

Applies students’ background knowledge in basic sciences to an understanding of the molecular bases of the interactions between microorganisms and oral tissues that lead to plaque formation and dental diseases. Principles of clinical asepsis and diagnosis of caries and periodontal diseases also covered. Offered: A.

**ORALB 521 Medical Microbiology and Immunology (2)**

Bacterial structure, physiology and genetics. Viral structure and function. Bacterial and viral diseases of the respiratory tract, skin, GI tract, UG tract. Innate and adaptive immunity. Immune responses to infection, immunodeficiencies and autoimmunity.

**ORALB 540 P-Clinical Oral Pathology Conference (2)**

Morton

Seminars and discussions of current research problems by students with DDS, MD, or DVM degrees. Prerequisite: permission of instructor. Offered: AWSpS.

**ORALB 550 P-Directed Studies in Oral Biology (*, max. 12)**

Morton

Selected readings and seminars on a topic chosen by individual arrangement in collaboration with a faculty member. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**ORALB 561 Oral Tissue Development, Structure, and Function (3, max. 6)**

Lamont

Selected readings and discussions explore recent advances in cellular and molecular biology relevant to oral biology and medicine. Special emphasis on craniofacial and dental development, oral mucosa and periodontal tissues, salivary gland function, and olfaction and gustation. Prerequisite: permission of instructor. Offered: WSp.

**ORALB 562 Supervised Teaching in Oral Biology (1-5, max. 10)**

Dale

Directed and guided experience in selected topics in teaching techniques, teaching philosophy, and course design of courses given by the Department of Oral Biology. Students are required to participate in lecture and laboratory teaching under the supervision of the course director. Prerequisite: permission of instructor. Offered: WSp.

**ORALB 564 Clinical Oral Pathology (1-3, max. 10)**

Lamont

Microscopic examination of oral lesions exhibiting basic histopathologic changes with gradual transition to the presentation of interesting cases from the Oral and Maxillofacial Biopsy Service, correlating the clinical findings with morphologic and pathogenic mechanisms. Primarily designed for DDS, MD, or DVM students.

**ORALB 565 Clinical Oral Pathology (1-3, max. 10)**

Morton

Presentation of interesting oral lesions from the dental school and the University of Washington Medical Center and the correlation of the clinical findings with the underlying morphologic and biochemical changes in the tissues. The relation of these oral lesions to systemic disease is stressed. Primarily designed for students with DDS, MD, or DVM. degrees. Prerequisite: permission of instructor. Offered: AWSpS.

**ORALB 566 Surgical Oral Pathology (2-4, max. 16)**

Watson

Students are trained to interpret microscopic slides of lesions from the oral cavity and related areas, and to correlate these with the clinical findings. Each student is responsible for the grossing of specimens and the preparation of histology reports. Primarily designed for students with DDS, MD, or DVM. degrees. Prerequisite: permission of instructor. Offered: AWSpS.

**ORALB 569 Advanced Oral Microbiology (2)**

Lamont

Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial floras of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: A.

**ORALB 570 Seminar in Oral Pathology (1-3, max. 9)**

Lamont

Attendance in the laboratory is required. Offered: AW.

**ORALB 574 Clinical Stomatology (3)**

Morton

Diseases of the oral cavity and jaw are presented as the practitioner encounters them—detailed clinical pictures, laboratory tests, radiographic findings, surgical exploration for the establishment of a therapeutic diagnosis. Offered: Sp.

**ORALB 575 Oral Biology Seminar (1-3, max. 10)**

Watson

Presentation and discussion of current research problems by members of the staff, investigators from other departments in the University, visiting scientists, and trainees. Prerequisite: permission of instructor. Offered: AWSp.

**ORALB 576 Molecular Aspects of Epithelial Biology (1-2, max. 2)**

Watson

In-depth discussion of cytoskeleton, cell junctions, influence of growth factors, retinoids, and other exogenous agents on differentiation and function of normal stratified epithelia. Prerequisite: BIOC 440 (or equivalent) or permission of instructor. Offered: odd years; Sp.

**ORALB 577 Applied Therapeutics in Dentistry (2)**

Dale

Practical information about drugs included in practice of dentistry. Topics include evaluation of case histories, dental considerations pertaining to medical conditions and drug therapies, types of drugs and dosages used for common medical conditions, the pharmacology of drugs prescribed by the clinician, and the mechanisms involved in drug interactions. Offered: odd years; A.

**ORALB 578 Research Techniques in Oral Biology (2-4, max. 15)**

Watson

Introduction to biochemical, analytical, or morphological tech-
niques employed in biochemical cytology or molecular pathology as well as in vitro techniques of tissue and organ culture. Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 579 Molecular Biology (2) Presland
Applications of molecular biology and recombinant DNA methodologies to oral biology topics of interest in dental sciences. Prerequisite: BIOCHEM 405 or BIOCHEM 406 or equivalent, and permission of instructor. Offered: even years; S.

ORALB 581 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu
Biostuctural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: A.

ORALB 582 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu
Biostuctural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: W.

ORALB 583 Secretory Process in Exocrine Glands (1-3, max. 3) Izutsu
Biostuctural, physiological, and biochemical aspects of individual secretory systems as integrated units. Faculty members with appropriate expertise participate in discussions and presentations during each of the three quarters. Offered: Sp.

ORALB 591 Advanced Topics in Oral Biology and Medicine I (1-2, max. 2) Herring, Izutsu
Review of current molecular and cellular advances in developmental biology relevant to head and neck embryology, tooth development and epithelial differentiation. Credit/no credit only. Offered: jointly with ORTHO 591; A.

ORALB 592 Advanced Topics in Oral Biology and Medicine II (1-2, max. 2) Herring
Review of current scientific literature relevant to cranioskeletal development and growth, bone biology and orthodontic tooth movement. Credit/no credit only. Offered: jointly with ORTHO 592; W.

ORALB 593 Advanced Topics in Oral Biology and Medicine III (1-2, max. 2) Herring
Review of current scientific literature relevant to oral soft tissue structure and physiology, including mastication and swallowing, salivary glands, periodontium and dental pulp. Credit/no credit only Offered: jointly with ORTHO 593; Sp.

ORALB 600 Independent Study or Research (*)
Prerequisite: permission of instructor. Offered: AWSpS.

ORALB 700 Master’s Thesis (*)
Offered: AWSpS.

ORALB 800 Doctoral Dissertation (*)
Offered: AWSpS.

Oral Medicine

Course Descriptions

ORALM 404 Considerations in Care of the Patient with a Disability (*, max. 6)
Role of auxiliaries in dental treatment of the special patient, including psychosocial issues, communication techniques, wheelchair transfers; dental prevention, medical and dental management of specific disabilities; drug therapy, sedation, and anesthesia. Offered: AWSpS.

ORALM 460 Clinical Management of Patients with Disabilities (*, max. 10)
Participation in chair/bedside dental treatment of a broad range of disabled populations, including homebound and institutionalized patients. Offered: AWSpS.

ORALM 465 Dental Care of the Disabled Literature Review (1)
Review of the current scientific literature pertaining to disability issues, research, clinical management, resources, and legislation relating to oral health of persons with disabilities. Credit/no credit only. Offered: AWSpS.

ORALM 513 Communication Skills I - Techniques (1)
Different aspects of verbal and non-verbal communication, recognizing obstacles to effective communication, and developing strategies to overcome communication obstacles. Clinical interviewing exercises. 

ORALM 514 Communication Skills II - Cultural Competency (1)
Continuation of basic communication skills. Credit/no credit only. Offered: A.

ORALM 515 Communication Skills III - Interviewing and Hx-taking (1)
Provides early clinical experience, and develops skills necessary to learn from patients what the practitioner needs to know about their social, medical, and dental histories to effective understand the “whole patient” so as to diagnose, plan, and provide appropriate treatment. Credit/no credit only. Offered: A.

ORALM 516 Physical Exam I (1)
Addresses techniques of initial patient assessment including general survey of the patient and vital signs assessment. Includes development of skills through participation in clinical sessions. Credit/no credit only. Offered: W.

ORALM 517 Physical Examination II (2)
Lectures, clinical rotations, and seminars addressing techniques of patient assessment including history-taking, physical examination, and interpretation of findings. Includes development of skills through participation in clinical sessions.

ORALM 520 P-Introduction to Oral Radiology (2)

ORALM 524 Communication Skills in Dentistry — Introduction to Patient Interviewing (1)
Different aspects of verbal and non-verbal communication, recognizing obstacles to effective communication, and developing strategies to overcome communication obstacles. Clinical interviewing exercises. 

ORALM 525 Physical Examination III (1)
Intensive review and application of techniques of patient assessment including history-taking, physical examination, and interpretation of findings. Includes development of skills through participation in clinical sessions.

ORALM 526 General Medicine (2)
Addresses medical, physical, and psychological conditions that impact the practice of dentistry. Provides information regarding collection of appropriate medical and physical data and integration of information into plans and practices relevant to the routine management of patients in dental practices. Instruction occurs via lectures, videos, assigned readings, and case scenarios.
ORALM 527 Introduction to Treatment Planning (1)
Problem-oriented record system with basic concepts of treatment planning. Students prepare treatment plans in advance of seminar. Offered: Sp.

ORALM 528 Dental Education and Care of the Disabled (1)
Addresses the special needs and dental management of patients with developmental disabilities such as Down’s syndrome, cerebral palsy, mental retardation, and other conditions such as head trauma. Utilizes instructional videos.

ORALM 529 Stomatology (4)
Focuses on ability to recognize, diagnose, and treat non-dental oral diseases and conditions that are commonly encountered in clinical practice. Rotations through the oral medicine undergraduate clinic where students take history and examine patients presenting for comprehensive care or urgent care. Interpretation and management of non-dental oral pathology and medical/psychological issues. Offered: S.

ORALM 531 P-Acute and Chronic Orofacial Pain (1)
Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: A.

ORALM 532 P-Acute and Chronic Orofacial Pain (1)
Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: W.

ORALM 533 P-Acute and Chronic Orofacial Pain (2)
Essential clinical and technical information and skills for diagnosis and treatment of acute and chronic pain, including differential diagnosis, and behavioral factors. Offered: Sp.

ORALM 540 P-Oral Medicine Senior Seminar (2-, max. 4)
Clinical conference devoted to case presentations of patients with dental treatment needs and complicating medical problems. Offered: AW.

ORALM 545 P-Clinical Conference in Oral Medicine (1-, max. 2)
Clinical pathologic conference utilizing interdisciplinary approach to patient care and emphasizing basic science application. Offered: AW.

ORALM 550 P-Directed Studies in Oral Diagnosis (*, max. 12)
See DPHS 449 for course description and prerequisite. Offered: AWSpS.

ORALM 560 Advanced Diagnostic Techniques (2)
Advanced diagnostic procedures used to identify oral and perioral diseases. Included are in-depth discussions of history analysis, methods for psychologic evaluation, soft and hard tissue diagnostic procedures, neurologic, salivary gland, and other tissue analyses requiring special procedures. Offered: AWSpS.

ORALM 564 Dental Care of the Disabled 1 (*, max. 10)
Advanced topics in rehabilitation dentistry including psychosocial issues; characteristics and needs of patients with specific disabilities; patient management and use of portable equipment; drug therapy, sedation and anesthesia; dental prevention, and emergency procedures. Seminars and self-directed study. Prerequisite: permission of instructor. Offered: AWSpS.

ORALM 565 Oral Medicine Clinical Conference (*, max. 16)
Clinical conference in which diagnostic data concerning patients seen in the oral medicine clinic are presented for evaluation. When possible, the patient is present with laboratory findings, radiographs, and the results of special tests. Offered: AWSpS.

ORALM 567 Behavioral Management of Acute and Chronic Orofacial Pain (2)
Overview of adult psychopathology and illness behavior as it relates to psychosomatic concepts and chronic pain. review of assessment and behavioral management strategies for the dental practitioner. Open to graduate students, postdoctoral fellows, residents in dentistry, medicine, psychology. Offered: Sp.

ORALM 570 Oral Medicine and Therapy (2-, max. 6)
Lecture directed toward the presentation and discussion of oral diseases and oral manifestations of systemic disease. Primarily the clinical manifestations’ relationship to generalized disease processes and patient management with in-depth discussions of therapy. Offered: AWSpS.

ORALM 576 Oral Medicine Literature Review (1)
Seminar analyzes the recent literature concerning the area of oral medicine, diagnosis, and therapy for oral disease. Offered: AWSpS.

ORALM 578 Dental Care of the Disabled Literature Review (1, max. 3)
Review of the current scientific literature pertaining to disability issues, including research, clinical management, resources, and legislation pertaining to oral health of persons with disabilities. Credit/no credit only. Offered: AWSpS.

ORALM 580 Current Concepts in Oral Radiology (2)
Lecture/seminar covering current concepts in oral radiology including technical factors, radiation risks, observer characteristics and variation, radiographic localization, interpretation, and overview of current extraoral techniques. Offered: AWSpS.

ORALM 581 Advanced Seminars in Oral Radiology (2, max. 8)
Explores aspects of oral and maxillofacial radiology and related fields. Offered: AWSpS.

ORALM 584 Dental Care of the Disabled III (*, max. 10)
Field practice in community outreach to facilities and agencies serving disabled populations. Includes observation, dental screenings, patient education and in-service training of direct care staff. Prerequisite: ORALM 404 or ORALM 664. Offered: AWSpS.

ORALM 600 Independent Study or Research (*)
Credit/no credit only. Offered: AWSpS.

ORALM 601 Oral Medicine Research Seminar (1, max. 10)
Presentation and discussion of current research problems by graduate students, faculty, and investigators from other departments in the university. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

ORALM 630 P-Clinical Diagnosis and Oral Medicine ([1/2]-, max. 5)
Develops skills in assessment of patients requiring comprehensive dental care. Includes interviewing and physical examination, radiographic interpretation, problem list formation, and chart documentation. Students participate in diagnosis and treatment of patients requiring emergency and specialized dental care. Offered: AWSpS.

ORALM 640 Advanced Clinical Diagnosis and Oral Medicine ([1/2]-, max. 3)
Advanced instruction in diagnosis and management of patients requiring emergency and specialized care. Includes participation in clinical rotations to oral medicine specialty clinics. Offered: AWSpS.

ORALM 650 P-Oral Medicine Clinical Elective (1-6, max. 6)
Opportunities for students to work in various clinical activities at local hospitals or other sites outside the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.
Orthodontics

Course Descriptions

ORTH 520 P-Growth and Development of the Face and Dentition (2)
Covers basic concepts in orthodontic work. Exposes students to the growth and development of the oro-facial structures and how orthodontists can use predict and use growth to treat malocclusion. Reviews concepts from basic biology and covers specific topics related to orthodontic tooth movement and orthopedic treatment. Offered: A.

ORTH 521 Growth and Development in Ortho Dx and Tx (3)
Basic principles of pre and postnatal growth and development integrated with the recognition, analysis, and treatment of planning of problems encountered in dental and skeletal malocclusions.

ORTH 522 P-Beginning Adjunctive Orthodontics (2)
Lecture/laboratory instruction in indications for, and techniques of, simple orthodontic tipping, rotational and extrusive movements, as well as orthodontic study model fabrication. Prerequisite: ORTHO 520. Offered: S.

ORTH 550 P-Directed Studies in Orthodontics (*, max. 6)
See DPHS 449 for course description and prerequisite. Offered: AWSpS.

ORTH 551 Review of Selected Literature in Orthodontics (1)
Students select a topic for review, review appropriate literature, and prepare written critique. Offered: AWSp.

ORTH 552 Journal Club (1)
Predoctoral students join graduate students in review of current orthodontic literature. Offered: AWSp.

ORTH 560 Orthodontics Seminar (1-5, max. 25)
Methods of diagnosis, analysis, and treatment planning of malocclusion; analysis of methods and theoretical principles used in the treatment of malocclusion. The student presents a detailed case analysis and plan of treatment for each clinical patient supervised. Offered: AWSpS.

ORTH 562 Orthodontic Theory (2)
Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTH 563 Orthodontic Theory (2)
Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTH 564 Orthodontic Theory (2)
Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTH 565 Orthodontic Theory (2)
Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTH 566 Orthodontic Theory (2)
Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTH 567 Orthodontic Theory (2)
Lecture-seminar sequence dealing with interpretation and application of orthodontic principles and concepts. Pertinent literature, research findings, and current orthodontic theory are analyzed in depth. Offered: AWSpS.

ORTH 570 Rotations in Medical Disciplines (1-4, max. 24)
Clinic, oriented to the hospital practice of oral medicine, deals with examination and nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no credit only. Offered: AWSpS.

ORTH 571 Oral Medicine Clinical Teaching (3)
Clinic in treatment of systemic disease. Credit/no credit only. Offered: AWSpS.

ORTH 572 Rotations in Medical Disciplines (1-4, max. 24)
Clinic, oriented to the hospital practice of oral medicine, deals with examination and nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no credit only. Offered: AWSpS.

ORTH 573 Rotations in Medical Disciplines (1-4, max. 24)
Clinic, oriented to the hospital practice of oral medicine, deals with examination and nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no credit only. Offered: AWSpS.

ORTH 574 Rotations in Medical Disciplines (1-4, max. 24)
Clinic, oriented to the hospital practice of oral medicine, deals with examination and nonsurgical therapy of hospital patients. The conditions treated include primary oral diseases, oral manifestations of systemic diseases, and oral defects resulting from medical treatment of serious systemic disease. Credit/no credit only. Offered: AWSpS.

ORTH 575 Post-Retention Seminar (1, max. 2)
Each student is required to locate three or more former orthodontic patients who qualify as at least ten years postretention. Complete orthodontic records must be obtained, analyzed, and discussed in the seminar. Instructor critiques the presentation and offers similar or contrasting cases for comparison. Offered: WSp.

ORTH 582 Adult Orthodontics Seminar (2)
Seminar for orthodontic, periodontic, and restorative dentistry graduate students in comprehensive, integrated diagnosis and treatment planning of the dental problems of the adult patient. Offered: AWSpS.
ORTHO 584 Clinical Management of Cleft Lip and Palate and Craniofacial Anomalies (2)
Management of these complex patients involves members of a dedicated, highly specialized multidisciplinary team. Insight gained into specific evaluation and treatment modalities of each discipline through lectures, seminars, assigned readings. Integrated approach to management is illustrated by attendance at craniofacial staffing and clinics. Prerequisite: graduate students in orthodontics. Offered: AW.

ORTHO 585 Surgical Orthodontic Diagnosis and Treatment Planning (3)
Semen clinic for orthodontic graduate students and oral surgery residents in comprehensive, integrated diagnosis, and treatment planning for patients with major facial deformities. Offered: AWSpS.

ORTHO 587 Management of Debilitated Dentitions (1-2, max. 2)
Integrated diagnosis and treatment planning for patients with edentulous spaces, emphasizing use of osseointegrated implants. Offered: AW.

ORTHO 589 Applied Psychology in Orthodontics and Pediatric Dentistry (1)
Application of psychological theories, research, and intervention strategies to orthodontics and pediatric dentistry. Topics include the principles of behavior change, patient compliance with therapeutic regimens, and motivations for orthodontic treatment. Prerequisite: graduate standing in dentistry or permission of instructor. Offered: A.

ORTHO 590 Scientific Methodology in Dental Research (2)
Review of the scientific method. Evaluation of dental literature. Discussion of proposed master’s degree research projects. Formulation and discussion of hypothetical research projects related to orthodontics. Offered: W.

ORTHO 591 Advanced Topics in Oral Biology and Medicine I (1-2, max. 2) Herring, Izutsu
Review of current molecular and cellular advances in developmental biology relevant to head and neck embryology, tooth development and epithelial differentiation. Offered: jointly with ORALB 591; A.

ORTHO 592 Advanced Topics in Oral Biology and Medicine II (1-2, max. 2) Herring
Review of current scientific literature relevant to cranioskeletal development and growth, bone biology and orthodontic tooth movement. Offered: jointly with ORALB 592; W.

ORTHO 593 Advanced Topics in Oral Biology and Medicine III (1-2, max. 2) Herring
Review of current scientific literature relevant to oral soft tissue structure and physiology, including mastication and swallowing, salivary glands, periodontium and dental pulp. Offered: jointly with ORALB 593; Sp.

ORTHO 597 Preclinical Technique (1)
Techniques of construction and manipulation of the edgewise arch mechanism. Offered: AWS

ORTHO 598 Archwire Formation (1)
Principles of wire bending and the use of orthodontic pliers. Offered: AS

ORTHO 599 Biomechanics (1)
Principles of biologic reactions to application of orthodontic forces. Credit/no credit only. Offered: S.

ORTHO 600 Independent Study or Research (*)
Managing the experimental protocol. Data collection and analysis. Preparation and writing of a thesis or publishable manuscript. Prerequisite: permission of instructor. Offered: SpS.

ORTHO 630 P-Introduction to Clinical Orthodontics (1)
Direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative and/or periodontal therapy. Prerequisite: ORTHO 522. Offered: ASpS.

ORTHO 631 Minor Orthodontic Treatment (1)
Clinical treatment of minor orthodontic problems suitable for the general dentist i.e., direct clinical application of principles of orthodontic diagnosis and treatment planning for simple orthodontic appliances to modify tooth position in preparation for definitive restorative or periodontal therapy. Offered: AWSpS.

ORTHO 660 P-Clinical Orthodontics (1-6, max. 24)
Clinical application of the techniques in the treatment of malocclusion. Offered: AWSpS.

ORTHO 682 Adult Orthodontics Clinic (1)
Clinic for orthodontic graduate students in the treatment of the dental problems of the adult patient. Offered: AWSpS.

Periodontics

Course Descriptions

PERIO 449 Directed Studies in Periodontics (*)
See DPHS 449 for course description and prerequisite.

PERIO 517 Introduction to Periodontics (2)
Epidemiology, natural history, etiology, histopathology, and genetics of various periodontal diseases. Offered: Sp.

PERIO 525 P-Prevention/Periodontics (-2)
Introduction to periodontal therapy. Offered: W.

PERIO 526 P-Prevention/Periodontics (-2)
Overview of preventive dentistry, introduction to periodontal therapy. Offered: Sp.

PERIO 530 P-Introduction to Clinical Orthodontics (1)
Diagnosis of periodontal diseases and development of a treatment plan including maintenance program, rationale for non-surgical, surgical, and antibacterial management of periodontal diseases. Discussion of principles of various periodontal procedures. Prerequisite: PERIO 525-526 and PERIO 527. Offered: A.

PERIO 531 P-Principles of Periodontics (-2)
Seminar emphasizing multidisciplinary approach to comprehensive treatment planning. Offered: W.

PERIO 540 Advanced Periodontics (1)
Designed to improve the understanding of sequencing of patient care and providing periodontal therapy into the perspective of a comprehensive care system. Offered: A.

PERIO 550 P-Directed Studies in Periodontics (*, max. 6)
See DPHS 449 for course description and prerequisite.

PERIO 561 Periodontal Case Management (2-, max. 8)
Didactic presentation of clinical periodontics to provide a comprehensive view of the field and a grasp of modern therapeutics. Offered: AWSp.

PERIO 566 Practice Management (1)
Aspects of setting up and administering a private periodontal practice. Financing, insurance, office design, equipment, employees, professional forms, marketing strategies, and patient management. Prerequisite: PERIO 561. Offered: S.
PERIO 567 Oral Medicine Case Studies (1, max. 3)

PERIO 574 Periodontal Microbiology (2)
Viral, bacterial classification; physiology; toxicity mechanisms reviewed. Formation and composition of plaque and calculus, and chemical methods of control discussed. Specific microbial floras of acute and chronic gingivitis, early onset forms of periodontitis, and adult periodontitis studied. Principles of antibiotic use reviewed. Offered: jointly with ORALB 569; A.

PERIO 575 Immunologic Aspects of Oral Diseases (2)
Lecture course designed to acquaint students with basic concepts of immunology and immunopathology. Topics include cellular immunology, antibody structure and function, complement system, immunopathologic mechanisms, tumor immunology and immunologic manifestations in mucocutaneous oral lesions as well as immunology of caries and periodontal disease. Offered: W.

PERIO 576 The Molecular and Cellular Biology of the Periodontium (2)

PERIO 577 Review of Literature (2, max. 16)
Concise review of the scientific periodontal literature with specific focus on studies of periodontal diagnosis, wound healing, periodontal regeneration, microbiology, and implant procedures. Offered: AWSpS.

PERIO 582 Periodontic Treatment Planning Seminar (1-, max. 12)
Weekly seminar involved with the presentation, discussion, and tentative solution of moderate to complex problems in diagnosis and treatment. Offered: AWSpS.

PERIO 585 Periodontal Therapy Seminar (1-, max. 12)
Weekly seminar utilizing the case review method and dealing with the treatment of moderate to advanced periodontal disease. Offered: AWSpS.

PERIO 586 Longitudinal Evaluation of Periodontal Therapy (1-, max. 9)
Close examination of case progress from initial therapy to most recent maintenance visits to determine efficacy of method, demands upon patient, and temporal effect of therapy and survival. Preparation and delivery of a lecture on a therapeutic modality. Offered: AWSp.

PERIO 592 Prescription Surgery (1-)
Clinical course in periodontal surgery in which surgical procedures are performed on prescription basis for patients undergoing therapy in the undergraduate dental clinic. Exposes student to a wider spectrum of patients and to stimulate an environment in which the student can encounter the problems in communication and patient management that occur in the private sector.

PERIO 600 Independent Study or Research (*)
Prerequisite: permission of graduate program adviser.

PERIO 620 P-Introduction to Clinical Periodontics (1)
Clinical periodontics, with emphasis on examination, assessment, and treatment planning. Offered: S.

PERIO 630 P-Periodontics (1-)
Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: A.

PERIO 631 P-Periodontics (-1-)
Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: W.

PERIO 632 P-Periodontics (-1)
Students diagnose periodontal disease and plan and perform periodontal therapies, treating patients in a stepwise manner, describing clinical conditions, and integrating periodontal therapy in a comprehensive plan of care. Prerequisite: PERIO 525-526 and PERIO 517. Offered: Sp.

PERIO 639 Advanced Clinical Periodontics (1-)
Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases.

PERIO 640 P-Advanced Clinical Periodontics (1-)
Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: A.

PERIO 641 P-Advanced Clinical Periodontics (-1)
Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: W.

PERIO 642 P-Advanced Clinical Periodontics (-1)
Maintenance and treatment of patients with more complex periodontal involvement. Development of skill in comprehensive treatment planning and execution by the individual student. Allowance made for surgical periodontics and experience in assisting in the treatment of advanced cases. Offered: Sp.

PERIO 659 P-Periodontics Extended Learning (*, max. 4)
Supplemental work in periodontics to correct an area of student deficiency. Credit/no credit only.

PERIO 660 Clinical Periodontics (12-6-, max. 60)
Clinical experience in diagnosis and treatment of periodontal disease.

PERIO 662 Stomatodynia Clinic (1, max. 4)
The diagnosis and treatment of oral and perioral lesions including history taking, biopsies, hematological laboratory tests and chemotherapy. Periodontal therapy in medically compromised patients in the hospital setting. Microscopic review of biopsy specimens. Offered: AWSpS.

PERIO 663 Pre-Prosthodontics Clinical Periodontics (*)
Clinical diagnosis and treatment of periodontal disease for nonperiodontics student. Prerequisite: permission of department chairperson.

PERIO 665 Clinical Practice Teaching (*)
Supervised experience in teaching clinical periodontics to under-
Prosthodontics

Course Descriptions

PROS 520 P-Introduction to Complete Dentures-Lecture (3) Didactic course in the treatment of completely edentulous patients. Instruction is provided in diagnostic procedures, complete denture construction, and maintenance care. Offered: A.

PROS 521 P-Management of Immediate Denture Patients (1) Lecture course describing and illustrating the clinical management of immediate denture patients (typical and overdenture). Offered: S.

PROS 523 P-Removable Partial Denture Design (2) Lectures in the basic principles of removable partial denture design. Practical drawings and more advanced designs are discussed in seminars. Certain technical aspects of design procedures are done in the classroom. Offered: W.

PROS 525 P-Removable Partial Denture Clinical Preparatory Course (4) Lecture-laboratory course dealing with those procedures the dentist must perform in order to fabricate a physiologically acceptable removable partial denture. The student gains experience via clinically simulated laboratory exercises prior to beginning prosthodontic treatment of a partially edentulous patient. Offered: S.

PROS 560 Complete and Immediate Dentures (2) Lecture/seminar devoted to the diagnosis and treatment of the completely edentulous patient and the immediate denture patient, with emphasis on management of patients with difficulties in treatment. Offered: A.

PROS 562 Removable Partial Dentures (2) Lecture/seminar concentrating on factors peculiar to fabrication of removable partial dentures, with emphasis on management of combined fixed and removable therapy. Offered: W.

PROS 563 Maxillofacial Prosthetics I (1) Introductory lecture/seminar series with emphasis on diagnosis and prosthodontic rehabilitative treatment of patients who have experienced trauma or have congenital or acquired defects in the oral region. Offered: S.

PROS 564 Maxillofacial Prosthetics II (1) Introductory lecture series focusing on the prosthodontic rehabilitative treatment of patients with loss and compromise of facial anatomy, i.e., ocular, orbital, nasal, auricular, combination intraoral/extraoral, and other related facial deformities.

PROS 571 Review of Literature Seminar (1, max. 12) Continuous weekly seminar devoted to the review of prosthodontic and related literature.

PROS 572 Special Topics Related to Prosthodontics (1) Lecture-seminar series focusing on relating principles of basic science to clinical application in prosthodontics. A wide and varied range of topics including surgery, psychology, speech, pharmacology, practice management, physiology, temporomandibular/myofascial joint dysfunction.

PROS 600 Independent Study or Research (*) Prerequisite: permission of graduate program adviser.

PROS 620 P-Clinical Complete Dentures (1/3, max. 3) Basic principles of complete denture fabrication and of diagnosis and treatment of completely edentulous patient. In second quarter student completes denture patient care, provides follow-up treatment, and participates in four competency examinations. Offered: A.

PROS 630 P-Clinical Prosthodontics (1-2, max. 5) Clinical course involving the diagnosis and management of completely and partially edentulous patients. Removable partial dentures and immediate dentures are fabricated. Follow-up care provided for patients previously treated.

PROS 640 P-Clinical Prosthodontic Maintenance (1-, max. 3) Clinic involving additional patient treatment with complete, partial, or immediate dentures, plus indirect relines, managing adjustment chair, peer review, recall clinic, and follow-up care for patients previously treated. Offered: AWSp.

PROS 650 P-Extramurals in Prosthodontics (*, max. 12) Elective clinical experiences or clinical practice teaching. Credit/no credit only. Prerequisite: permission of instructor.

PROS 660 Clinical Prosthodontics (1-2, max. 6) Practical application of material covered in 560 and 562.

PROS 665 Clinical Practice Teaching (1-, max. 4) Supervised experience in teaching clinical prosthodontics to the undergraduate dental student.

Restorative Dentistry

Course Descriptions

RES D 510 P-Dental Materials Science (1/2)-, max. 3) Basic concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Clinical use of restorative dental materials also presented. Offered: WSp.

RES D 515 P-Dental Anatomy (3) Lecture and laboratory on the morphology and nomenclature of individual teeth of the adult human dentition. Introduction to tooth histology and function and the influence of tooth anatomy on clinical dental procedures. Offered: A.

RES D 516 P-Introduction to Occlusion (3) Lecture/laboratory in the functional determinants of occlusal morphology. Preparation and waxing techniques for developing opposing quadrants by the additive waxing technique. Offered: W.

RES D 517 P-Functional Analysis of Occlusion (3) Clinical and laboratory experiences in examination and charting of patient’s occlusion, record-taking for analysis of occlusion on a dental articulator, and preclinical diagnostic correction of problems of occlusion on articulated clinical casts. Provides basic background or technique information relative to laboratory and clinical experiences. Offered: Sp.

RES D 520 P-Introduction to Operative Dentistry Technique (3)
Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for one-surface restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: A.

RES D 521 P-Introduction to Operative Dentistry Technique (3)
Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for multiple-surface direct filling restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: W.

RES D 522 P-Introduction to Operative Dentistry Technique (3)
Introduces processes of restoring diseased or damaged tooth structure to proper health, form, function, and esthetics. Emphasis on basic principles of cavity preparation for proper coverage cast gold and foundation buildup restorations. Other considerations include restoration design, proper selection and use of restorative materials, and clinical considerations for restorative treatment planning. Following demonstration of competence in didactic and practical aspects. Limited opportunity available for introduction to restorative care. Offered: A.

RES D 523 P-Fixed Prosthodontics (3)
Serves as introduction to area of restorative dentistry dealing with indirect partial-coverage restorations and complete coverage restorations. Preclinical experience provided in tooth preparation, provisional restoration, and fabrication for various crown designs. Projects emphasize the various designs of single-tooth preparations and restoration. Offered: A.

RES D 524 P-Fixed Prosthodontics (3)
Serves as introduction to area of fixed prosthodontics dealing with multiple-unit restorations. Preclinical experience provided with multiple tooth preparations and provisional restoration. Fabrication for various crown designs, singly and in conjunction with various pontic and connector types, to serve as fixed partial denture prostheses. Projects emphasize multiple-tooth preparation/restoration and implant-supported restorations. Offered: W.

RES D 527 P-Fixed Prosthodontics (3)
Serves as introduction to area of fixed prosthodontics dealing with esthetic veneer indirect restorations. Preclinical experience provided in tooth preparation and restoration, fabrication for various esthetic veneer crown designs, singly and in conjunction with various pontic types to serve as fixed partial denture prostheses. Projects emphasize anterior single- and multiple-tooth preparation/restoration, provisional prostheses, and esthetic veneer restorations. Offered: W.

RES D 530 P-Restorative Dentistry (2)
Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Emphasis on single-unit gold and esthetic veneer clinical procedures. Offered: A.

RES D 531 P-Restorative Dentistry (2)
Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Emphasis on multiple-unit gold and esthetic veneer clinical procedures. Offered: W.

RES D 532 P-Restorative Dentistry (2)
Lecture series related to 630 presenting restorative dentistry principles, including supportive material on clinical procedures. Offered: Sp.

RES D 535 Implant Dentistry (3) Junge
Includes: history of implantology; basic science of osseointegration; surgical, prosthetic, and restorative considerations for the partially and fully edentulous patient; occlusal considerations of implant treatment; surgical placement and restorative procedures; management of patients; surgical and prosthetic complications; developing a treatment plan on assigned case; and restoring a single tooth implant. Offered: A.

RES D 540 Implant Dentistry (2)
Introduction to dental implantology based on lectures and laboratory activities. Offered: A.

RES D 541 P-Advanced Restorative Dentistry (2)
Broadens base of restorative procedures. Introduction of new techniques and presentation of complex restorative treatment involving other specialties. Offered: W.

RES D 542 P-New Developments in Dental Materials (1)
Dental materials recently introduced to dental profession reviewed, compared to current materials, and clinically demonstrated. Offered: Sp.

RES D 550 P-Directed Studies in Restorative Dentistry (*, max. 6)
See DPHS 449 for course description and prerequisite. Offered: AWSpS.

RES D 570 Review of Literature Seminar (1, max. 6)
Continuous weekly seminar devoted to a review of restorative and related literature, and discussion of teaching methods, philosophy of teaching and treatment. Offered: AWSp.

RES D 580 Restorative Treatment Planning Seminar (1-, max. 8)
Continuous weekly seminar to discuss controversial treatment problems and difficult diagnostic cases selected for graduate students. Offered: AWSp.

RES D 585 Advanced Dental Materials Science (2)
Advanced concepts of dental materials science including physical, mechanical, chemical, and biological properties of restorative dental materials. Emphasis also on research design, testing methods, and proper selection of dental materials for clinical practice. Offered: W.

RES D 588 Masticatory Functional Analysis and Occlusal Adjustment (2)
Lecture/seminar and clinical sessions in the study of the physiology of occlusion. Pertinent literature reviewed and discussed from the multidisciplinary viewpoint. The clinical sessions include training in masticatory functional analysis and treatment of occlusally related diseases. Offered: A.

RES D 589 Review of Literature in Occlusion (2)
Seminar to review pertinent literature in occlusion. Offered: S.

RES D 590 Fundamentals of Fixed Prosthodontics (2-, max. 4)
Lecture/laboratory/clinical sessions in the study of gnathological principles and procedures as they pertain to the treatment of comprehensive cases assigned to the students. Use and application of several articulators. Offered: A.
RES D 600 Independent Study or Research (*)
Prerequisite: permission of graduate program adviser. Offered: AWSpS.

RES D 620 P-Comprehensive Treatment Planning in Restorative Dentistry (3)
Orientation to restorative clinical operations, administrative procedures associated with patient management and completion of initial treatment plans. Emphasizes problem-based learning, treatment outcomes, the sequence of clinical treatment, and the diagnosis and management of caries-susceptible patients. Offered: S.

RES D 630 P-Clinical Restorative Dentistry ([1-3]-, max. 9)
Clinical training in fundamental restorative dentistry procedures, including diagnostic, treatment planning, and therapeutic aspects of operative dentistry, fixed prosthodontics, and occlusal treatment. Offered: AWSp.

RES D 635 Clinical Restorative Dentistry (3) Verhoef
Knowledge and experience in the diagnosis and restoration of diseased, damaged, unesthetic, or missing teeth. Experience in management of complex, inter-disciplinary treatment plans. Skills in patient communication and management. Utilization of broader range of restorative materials and techniques.

RES D 640 P-Advanced Clinical Restorative Dentistry ([1-3]-, max. 12)
Clinical training in restorative dentistry procedures, including diagnostic, treatment planning, and therapeutic aspects of operative dentistry, fixed prosthodontics, and occlusal treatment. Offered: AWSp.

RES D 650 Restorative Dentistry Clinical Elective (1-6, max. 12)
Elective offering in clinical areas related to discipline. Offered: AWSpS.

RES D 659 P-Restorative Dentistry Extended Learning (*, max. 4)
Supplemental work in restorative dentistry to correct an area of student deficiency. Credit/no credit only. Offered: S.

RES D 660 Oral Rehabilitation ([1-6]-, max. 32)
Clinical course to provide experience in diagnosis and treatment of patients requiring restorative procedures from single restorations to complex oral rehabilitative methods. Special emphasis is directed toward the integration of periodontics and occlusion as they relate to restorative dentistry. Offered: AWSpS.

RES D 665 Clinical Practice Teaching (1, max. 4)
Supervised experience in teaching clinical fixed prosthodontics to undergraduate dental students. Offered: AWSpS.

College of Education

Dean
Patricia Wasley
222 Miller

Associate Deans
Stephen T. Kerr
Deborah E. McCutchen

The College of Education is a graduate and professional school dedicated to equity and excellence in education through the preparation and on-going renewal of education professionals, the promotion of social justice, the advancement of knowledge through research, and the connection of research to inform policy and improve practice. The College has four broad curricular areas: Curriculum and Instruction, Educational Leadership and Policy Studies, Educational Psychology, and Special Education. Degrees conferred are M.Ed., Ph.D., Ed.D., and M.I.T. Certificates can be earned in teaching (elementary, secondary, and special education), school administration (principals, program administrators, and superintendents), and school psychology.

The College of Education at the University of Washington believes that an effective public education system for a diverse citizenry is the cornerstone of a democratic society. To that end, the College dedicates its resources to helping make an excellent education an everyday reality for every student in every community across the state and country. As part of a major university located in a metropolitan area, the College is able to work in collaboration with a number of school districts in the area to provide teaching, research, and field experiences for its students.

Special Offices and Services

The College of Education maintains a number of specialized offices to assist in the fulfillment of its goals. Among these are the Office of Teacher Education, the Office of Admissions and Academic Support, and the Office of Minority Recruitment and Retention. In addition, the College of Education maintains formal relationships with a number of school districts in the area to provide research and field experience opportunities for students in the various programs. Individuals interested in teacher certification or in graduate degree programs may visit the College's Web site at www.educ.washington.edu or email edinfo@u.washington.edu.

Undergraduate Study

Undergraduate students can choose from courses offered to help them explore the field of education and prepare for graduate study. Students should visit the College Web site and contact the Office of Admissions and Academic Support to discuss their goals with a program-design specialist. Courses that provide field work in local schools or social service agencies give students the opportunity to make informed career and academic choices. Students may complete prerequisites for graduate programs through undergraduate work. In cooperation with academic departments, requirements to meet endorsement (subject) guidelines for secondary teaching may be completed as an undergraduate. Students should plan their coursework as early as possible during their undergraduate study.

Professional Certification

The College of Education is authorized by the State Board of Education to offer professional certificate programs in education for administrators, educational staff associates, and teachers. Program-design specialists are available to help with pre-program counseling, long-range planning, applications, registration, referrals to other campus resources, general program advising, and continuing/professional certificate requirements.

Administrator Certificates

Administrator Certificate preparation programs for superintendents, principals, and program administrators are offered through the College of Education. The following Web sites contain specific information about admissions, curriculum, faculty, and general advising:

For principals and program administrators, the Danforth Educational Leadership Program, depts.washington.edu/k12admin/principal.html.

For superintendents, the Leadership for Learning Program, depts.washington.edu/k12admin/superintendent.html.

Educational Staff Associate Certificates

Educational Staff Associate Certificate preparation programs are offered for the school psychologist and school social worker. Information concerning requirements and admission may be obtained as follows: school psychologist — Area of Educational Psychology, 312 Miller, Box 353600, University of Washington,
Seattle, Washington 98195-3600; school social worker — School of Social Work, Box 354900, University of Washington, Seattle, Washington 98195-4900.

The College of Education is authorized by the State Board of Education to prepare and recommend individuals for Residency and Professional Teaching Certificates. The Teacher Education Program is accredited by the National Council for Accreditation of Teacher Education. Graduates are qualified for certification in all states party to the Interstate Certification Compact and in other states as well. Title II of the Higher Education Act requires institutions of higher education and states that approve such programs to develop and publish an annual report on their teacher preparation programs. The University of Washington report may be viewed on the Web at www.educ.washington.edu/COEWebSite/pdf/Title2.pdf, or requested via email from edinfo@u.washington.edu.

Residency Teaching Certification Program

The College of Education offers residency teaching certification for individuals desiring careers as elementary or middle/secondary school teachers, or as special education teachers working with students with severe disabilities or emotional and behavioral disorders, and with infants, toddlers, and preschool children with disabilities. Candidates may also select a teacher education/special education option which provides initial certification in elementary education with course work in special education. All programs are offered at the master’s level. For additional information, email edinfo@u.washington.edu, or visit the College’s Web site at www.educ.washington.edu.

An undergraduate or postbaccalaureate program leading to certification in music education, grades K-12, is offered through the School of Music. For additional information contact the School of Music Advising Office, 116 Music, Box 353450, University of Washington, Seattle, WA 98195-3450.

Professional Teaching Certificates

For information on the OSPI guidelines and where programs exist, contact any Educational Service District or the Office of Professional Licensing and Certification, OSPI, Box 47200, Old Capitol Building, Olympia, Washington 98504, or visit www.k12.wa.us/cert/. For information about Professional Teacher Certificate programs at the University, contact Center Connect at 206-543-7834.

Endorsements on Teaching Certificates

Teachers holding an initial/residency or continuing/professional teaching certificate may add endorsements to their certificates which will qualify them to teach additional subjects. Information on endorsement requirements is available on the Web at www.educ.washington.edu/COEWebSite/research/profdev/endorse.htm, or contact the Office of Admissions and Academic Support, 211 Miller, Seattle, WA 98195-3600, or email edinfo@u.washington.edu.

Graduate Degree Programs

Graduate Program Coordinator
206 Miller, Box 353600
206-543-7833
edinfo@u.washington.edu

The College of Education currently offers four advanced degrees: Master in Teaching, Master of Education, Doctor of Education, and Doctor of Philosophy. The M.I.T. degree will be awarded to elementary and secondary certification students at the completion of their program. Graduate students working toward other degrees may specialize their degree studies in curriculum and instruction, educational psychology (including cognitive studies), educational leadership and policy studies, or special education. A focus on higher education leadership and policy leading to Master of Education or Doctor of Education degrees is offered through Educational Leadership and Policy Studies. Questions regarding graduate study in education should be directed via email to edinfo@u.washington.edu, or visit the College’s Web site at www.educ.washington.edu.

Master in Teaching

The Master in Teaching (M.I.T.) degree program results in a Washington residency teaching certificate for elementary or secondary (specific subjects) school teaching. The program is an integrated sequence of full-time, daytime course work and field experiences spanning five quarters. One quarter is devoted to full-time placement in a school. Field experiences are in schools in the Seattle/Puget Sound area chosen to provide a variety of situations in regard to level, school population, and location.

Master of Education

The Master of Education (M.Ed.) degree requires a minimum of 45 credits, including at least 15 credits in a specialized area of study in education; 9 credits related to, but outside of, the specialization, some course work outside education; 9 thesis credits or, for the non-thesis option, 9 credits in a field study or other approved project; and a final examination.

Doctor of Education

The Doctor of Education (Ed.D.) degree is designed to prepare professionals whose primary interest is to deal directly with problems of educational practice. The program of study leading to the Ed.D., as a professional degree, focuses on the utilization of research and practitioners’ knowledge, rather than on the production of research knowledge.

This professional degree requires at least two years of resident study, a program of specialized study with credit in education and related fields, sufficient preparation in research methodology to interpret research findings for use in practice, an internship and leadership training, a General Examination, a dissertation on a problem of educational practice, and a Final Examination.

Doctor of Philosophy

The Doctor of Philosophy (Ph.D.) in education is a research degree. It offers preparation for a career of research on issues fundamental to education — issues that range from fairly narrow questions about human learning to macroquestions regarding the form of societies’ educational institutions. The scope of the Ph.D. degree in education is broad. It is possible to pursue a degree organized around traditional study areas such as educational psychology, curriculum and instruction, special education, or educational leadership and policy. A student may develop a course of study that integrates various elements of more than one study area (e.g., multiethnic education and literacy). One of the study options in the Ph.D. program is school psychology, which prepares students for the professional practice of psychology with school-age children, as well as for research.

Degree requirements include a minimum of two years of resident study, a program of specialized study with credits both in education and in other academic units, preparation in research methodology adequate to design and assess research in the field of specialization, sufficient study in cognate fields inside and outside of education to ensure that the candidate can place the specialized research in a broader context, a General Examination, a research dissertation, and a Final Examination.

Accreditation

Within the College of Education, a number of degree programs have formal accreditation. The School Psychology Ph.D. program is accredited by the American Psychological Association (APA) and approved by the National Association of School Psychologists (NASP). The School Psychology M.Ed. program is also accredited by NASP and the Washington State Board of Education for Initial Residency and Continuing/Professional teaching Certificates and Initial/Residency certification. Graduates qualify for certification in all states party to the Interstate Certification Compact.
Admission Requirements
Applicants to the Master of Education and Master in Teaching degree programs must hold a baccalaureate degree from an accredited institution. Admission decisions are based on the applicant’s grade-point average, Graduate Record Examination general test scores (not required for those seeking admission to the M.I.T. program), goal statement, and other prerequisites stipulated by the area of specialization within the College. Application deadlines vary by program.

Consideration for admission to either doctoral program requires a master’s degree or equivalent preparation in a field appropriate to the area of specialization, a sample of scholarly writing, goal statement, and other prerequisites stipulated by the individual program of study. Graduate Record Examination general test scores are required.

Although admission is competitive, admitted students have exhibited a wide range of performance on traditional criteria such as GPA and GRE scores. The College values diversity and encourages all interested persons to seek additional information and apply. For more information email edinfo@u.washington.edu or visit the College’s Web page at www.educ.washington.edu.

Financial Aid
The College of Education offers a limited number of awards with varying stipends for graduate students in education. Primary consideration is given to doctoral students with a background of successful teaching or administrative experience. Specific information on the various types of remunerative appointments for graduate students in education, amounts of stipends, and application procedures may be obtained via email at edinfo@u.washington.edu or visit the College’s Web page at www.educ.washington.edu. The annual application deadline is March 1.

Special Research and Service Facilities
Within the College of Education opportunities exist for students to gain research and service experience.

The Center for Multicultural Education focuses on research projects and activities designed to improve practices related to equity issues, intergroup relations, and the achievement of students of color. Visit the center’s Web page at depts.washington.edu/centerme/home.htm.

The Clinical Training Laboratory, operating under the aegis of Educational Psychology, offers observation rooms equipped with video recorders where counseling and psychology trainees and clients can be observed and taped through one-way mirrors.

The world-renowned Experimental Education Unit offers an interdisciplinary approach to research, training, and service, providing integrated classes for 150-200 young children, toddlers, and infants with disabilities and their typically developing peers, and services for their families. Learn more about the EEU by visiting depts.washington.edu/eeuweb.

The Multidisciplinary Learning Disabilities Center conducts research on preventing and treating reading and writing disabilities and on the biological basis of learning disabilities. The center disseminates its findings to teachers through workshops and presentations at regional, national, and international meetings, and at a unique teacher mentoring program during the summer program for students with dyslexia and dysgraphia.

The Write Stuff investigates interventions for preventing and treating writing disabilities.

The National Center for the Study of Teaching and Policy, a consortium of five universities headed by the University of Washington, conducts a wide range of studies aimed at local, state, and national policy strategies to promote teacher excellence. For more information, visit the center’s Web page at www.ctpweb.edu, or email ctpmail@u.washington.edu. For more information, visit the center’s Web page at www.ctpweb.edu, or email ctpmail@u.washington.edu.

The Institute for the Study of Educational Policy promotes interdisciplinary studies that bring together research and practice for the benefit of children and youth, educators, policy makers, and the larger community. The institute includes

(a) The Center for Educational Renewal, which responds to a growing nationwide interest in the renewal of schools and teacher education by creating partnerships, promoting innovative programs and policies for the education of educators, and reforming leadership and governance structures;
(b) The Center for Effective Schools, which is committed to engaging in research and service activities designed to promote instructionally effective schools through collaboration and self-evaluation;
(c) The Center for the Study and Teaching of At-Risk Students, which was established to foster interprofessional projects to encourage students to stay in school; and
(d) The School Law Division, which deals with the improvement of professional practices of school administrators, including superintendents, principals, and program directors. Additionally, the institute conducts policy research pursuant to grants and contracts with school districts, state and federal agencies, and other educational organizations.

Education Curriculum & Instruction

Course Descriptions
EDC&I 324 Physical Education and Health in the Schools (2)
Techniques and procedures for teaching physical education and health in elementary and secondary schools. For students in Teacher Education Program. Credit/no credit only.

EDC&I 341 The Teaching of Art in the Secondary School (3)
For majors in secondary art education planning to teach on the junior or senior high school level.

EDC&I 353 Teaching in the Elementary School (3)
Emphasizes selected teaching modes; lesson planning; classroom management procedures; grouping to accommodate pupils with special needs; utilization of learning resources; evaluation of teaching. Attention also given to school culture.

EDC&I 354 Teaching in the Secondary School (3)
Development of basic skills in instructional methods, lesson planning, classroom management procedures, evaluation of teaching. Attention also given to school culture.

EDC&I 355 Language Arts in the Elementary School (3)
Basic course in planning and teaching elementary language arts: listening and speaking, written composition, handwriting, spelling, creative and practical writing.

EDC&I 356 The Teaching of English (3)
Combines theoretical understanding of teaching with specific techniques and materials for literature, language, composition, and mass media at the secondary level; coordinated with concurrent experience in schools.

EDC&I 357 The Teaching of Speech (3)
Special methods course in the teaching of speech communication at the elementary and secondary levels.

EDC&I 360 Reading in the Elementary School (3)
Basic course in methods, techniques, and materials used the teaching reading through decoding, comprehension, strategies, and literature in primary and intermediate grades.
EDC&I 424 Multiethnic Curriculum and Instruction (3)
Primarily for preservice and in-service teachers who have little or no previous exposure to issues related to ethnicity and schooling. Designed to help teachers better understand the school’s role in the ethnic education of students and acquire the insights, understandings, and skills needed to design and implement curricular and instructional strategies that reflect ethnic diversity.

EDC&I 425 Instructional Strategies for Minority Students (3)
Designed to equip educators with appropriate skills in effective teaching of culturally and socioeconomically different students. Attention is directed to understanding how these students differ from mainstream youth and what the implications are for instructional strategies in the classroom.

EDC&I 434 Introduction to Computers in the Classroom (3)
Overview of the uses of computers in education. Uses of computers in instruction, classroom management (gradebooks, utilities), evaluation of software, overview of programming, and word processing. Prior experience not required.

EDC&I 436 Design and Authoring of CAI (3)
Introduction to the design of computer-assisted-instructional programs. Types of learning, characteristics of effective instruction. Students design and produce CAI programs using authoring systems for computers. Offered: jointly with T C 436.

EDC&I 437 Uses of Computer Application Packages in Schools (3)
Introduction to the instructional and management uses of application programs. Topics may include: databases, spreadsheets, word processing, graphics packages, graphing utilities, telecommunication, desktop publishing. Emphasis is on K-12 setting. Prerequisite: EDC&I 434.

EDC&I 440 Gender and Education (5) I&S
Gender bias, discrimination, and gender-equity efforts in education. Includes curriculum instruction, instructional materials, testing, counseling, athletics, teacher education, educational employment issues, and sexual harassment. Relevant federal and state laws, court decisions, and strategies for promoting gender equity also addressed. Recommended: WOMEN 200 or SOC 110. Offered: jointly with WOMEN 415.

EDC&I 443 Improvement of Teaching: Elementary School Music (3)
Advanced studies in the teaching of music in the elementary school. For experienced teachers.

EDC&I 453 Teaching the Bilingual-Bicultural Student (3)
Educational needs of bilingual students: research findings, special programs, materials, and methodologies that bilingual-bicultural education can provide to meet those needs. Cultural combinations of bilingual populations in American culture; historical, social, and linguistic factors affecting their K-12 education.

EDC&I 454 Cooperative Learning in the Classroom (3)
Theory and research on cooperative learning and current practices of managing such learning. Team learning activities and opportunities to plan and try out lessons and materials using several different cooperative strategies. Credit/no credit only.

EDC&I 455 The Language Arts: Language and Learning (3)
The teaching of language arts requires research-based knowledge of language learning and its influence on listening, speaking, reading, writing, and nonverbal communication. Emphasizes techniques for building both a solid literacy curriculum and sound instructional practices.

EDC&I 456 Workshop in Instructional Improvement: Language Arts (1-6, max. 15)
Individual or group study projects on the improvement of instruction in language arts.

EDC&I 457 Methods in Teaching English as a Second Language (3)
Prepares preservice and in-service teachers to teach English as a second language and to meet the educational and linguistic needs of students who have little or no English language skills. Emphasis on a survey of first- and second-language acquisition research and its educational implications, as well as instructional strategies consistent with the audiolingual, cognitive, and creative construction approaches to second-language learning. Includes diagnostic prescriptive strategies for classroom application.

EDC&I 459 Workshop in Instructional Improvement: Reading (1-6, max. 15)
Projects on the improvement of instruction in reading. For experienced teachers and students in Teacher Education Program.

EDC&I 460 Early Literacy Instruction (3)
Theory, research, and practice in early literacy acquisition including emergent literacy, phonemic awareness, word identification, comprehension, invented spelling, and writing. Emphasis on classroom instruction strategies for first and second language learners. Offered: A.

EDC&I 461 Materials for Teaching Reading: Children’s and Young Adult’s Literature (3)
Designed to provide acquaintance with materials used in the teaching of reading. Trade books and materials from content areas are examined.

EDC&I 462 Reading Comprehension Instruction in Elementary and Secondary School (3)
Research-based practices for explicit teaching of reading comprehension of both fiction and content-area texts including issues of reading strategies, text difficulty, teacher modeling, guided reading, discussion, assessment, and adaptations for struggling students. Offered: Sp.

EDC&I 463 Hands-On Science for Elementary School Teachers (5)
Offers prospective and practicing teachers an opportunity to learn science through the hands-on teaching methods recommended for teaching science at the elementary level. Offered: jointly with MBT 463.

EDC&I 464 Educating Native-American Youth (3)
Assists students in understanding the North American Indian child from cultural, socioeconomic, and psychological points of view. Provides opportunities for the student to apply knowledge and skills gained in other courses to prepare programs and learning aids relevant to the educational situation of the Indian child.

EDC&I 465 Social Studies Education: Elementary School Programs and Practices (3)
Stresses curriculum patterns, instructional procedures, resource materials, and the selection of content in social studies. For elementary and middle school teachers and students in Teacher Education Program.

EDC&I 466 Social Studies Education: Secondary School Programs and Practices (3)
Stresses curriculum patterns, instructional procedures, resource materials, and a selection of content in social studies for middle, junior, and senior high school teachers. For experienced teachers and students in Teacher Education Program.

EDC&I 467 Geography in the Social Studies Curriculum (3)
I&S
Discussion of the concepts and content of geography essential to
effective social studies curricula. Offered: jointly with GEOG 467.

EDC&I 468 Workshop in Instructional Improvement: Social
Studies (1-6, max. 15)
Individual or group study projects on the improvement of instruc-
tion in social studies.

EDC&I 469 Teaching African American Students and Culture
(3)
Examination of sociocultural and pedagogical factors that influence
African American students' learning styles, opportunities, and
outcomes; exploration of ways to reform teaching techniques to
better accommodate cultural styles and experiences to improve the
educational achievement of African American students.

EDC&I 470 Science Education: Elementary School Programs
and Practices (3)
Designed for classroom teachers with reference to the teaching and
learning of science from kindergarten through grade 6. Emphasis is
placed on objectives, methods, and materials as related to the
concepts and processes of science.

EDC&I 471 Science Education: Secondary School Programs
and Practices (3)
Survey of the status and potential role of science in education;
trends and their implications for the teaching of both biological and
physical sciences in the junior and senior high schools; representa-
tive curricula and related teaching procedures; the psychology of
concept formation and problem solving; and organization of science
programs.

EDC&I 472 Environmental Education for Teachers (3)
Status, selected problems, and role of environmental education in
program of elementary, middle, and junior high schools. Opportu-
nity to examine and receive instruction in use of existing environ-
mental education instructional materials. Instruction is in the spirit
of inquiry/discovery.

EDC&I 473 Workshop in Instructional Improvement:
Science (1-6, max. 15)
Individual or group study projects on the improvement of instruc-
tion in science.

EDC&I 474 Multi-Ethnic Studies: Methods, Content, and
Materials (3)
Designed to help preservice and in-service teachers identify content
and materials and devise methods for implementing ethnic studies
programs and for incorporating ethnic content into regular K-12
social studies, language arts, and humanities curricula. Special
attention is given to teaching about American Indians, Mexican
Americans, African Americans, Asian Americans, Puerto Rican
Americans, and White ethnic groups.

EDC&I 475 Improvement of Teaching: Elementary School
Mathematics (3)
Designed for elementary teachers. Emphasis is placed on the
contributions of research to the improvement of the teaching of
mathematics in the elementary school. For experienced teachers.

EDC&I 476 Improvement of Teaching: Junior High School
Mathematics (5)
Exploration of mathematical concepts for the purpose of impro-
ving the teaching of middle school mathematics.

EDC&I 477 Improvement of Teaching: Secondary School
Mathematics (5)
Exploration of mathematical concepts for the purpose of impro-
ving the teaching of secondary-school mathematics. For experienced
teachers.

EDC&I 478 Special Topics in Mathematics for Teachers (2-9,
max. 9) NW
Study of selected areas of mathematics. Designed for the improve-
ment of teachers of mathematics. Offered: jointly with MATH 497.

EDC&I 479 Workshop in Instructional Improvement:
Mathematics (1-6, max. 15)
Individual or group study projects for the improvement of instruc-
tion in mathematics.

EDC&I 482 Educational Technology in Schooling (3)
Introduction to the application of technologies (computers,
telecommunications, interactive video) in schools. Designed
primarily for pre- and in-service teachers, but of interest to anyone
involved in technology in education.

EDC&I 485 Workshop in Instructional Improvement:
Educational Communication and Technology (2-6, max. 6)
Individual or group study projects on the improvement of instruc-
tion through use of educational communication and technology.

EDC&I 486 Seminar on Advanced Topics in Curriculum and
Instruction (1-3, max. 15)
Offered: jointly with CURR 566.

EDC&I 487 Seminar in Curriculum and Instruction (1-3,
max. 15)
Prerequisite: approved plan of study

EDC&I 488 Educational Technology and Learning in
Alternative Settings (3)
How educational technology can be used to encourage learning in
nonschool environments, such as museums, radio and television
broadcasts, parks and recreation centers, and distance education
programs. Students investigate one of these areas and prepare a
project.

EDC&I 494 Workshop in Improvement of Curriculum (1-6,
max. 15)
Stresses the application of procedures for curriculum development,
maintenance, and evaluation. Opportunities furnished to develop
and perfect strategies for program development with occasions
given to utilize the strategies in master plan and materials prepara-
tion for simulated or real school situations. Specific focus of
workshop is determined by instructor or by arrangement with
district.

EDC&I 495 Workshop in Improvement of Teaching: Selected
Topics, Issues, or Problems (1-6, max. 15)
Individual or group projects to help teachers adapt instruction to
selected topics, issues, or problems and to identify the approaches
and instructional resources that provide the soundest learning
experiences.

EDC&I 496 Workshop in Instructional Improvement (2-6,
max. 6)
Individual or group study projects on the improvement of instruc-
tion with attention to designing instructional plans.

EDC&I 499 Undergraduate Research (2-5, max. 5)
Students developing studies under this rubric should be advised that a
report or a paper setting forth the results of their investigations
should be regarded as a basic part of the program.

EDC&I 500 Field Study (1-10, max. 10)
Individual study of an educational problem in the field under the
direction of a faculty member. Prerequisite: approved plan of study
and permission of the instructor must be filed in the Office of
Curriculum and Instruction in the College of Education.

EDC&I 505 Seminar in Curriculum and Instruction (1-3,
max. 15)
Seminar on advanced topics in curriculum and instruction. Critical
examination of current research and practice. Content varies, check
quarterly Time Schedule for topics to be covered. Prerequisite:
permission of instructor.

EDC&I 510 History of Educational Technology (3)
Examines the role of technology in education through history. Early
systems of instruction, advent of textbooks, models for school architecture, instructional devices and teaching machines, mediated and distance learning. Focuses on the interplay between designed educational approaches and contexts in which they were implemented, and consequent success for failure.

**EDC&I 511 Current Issues in Technology and Education (3)**
Examines current genres of learning technology, novel approaches for integrating technology into curriculum and instruction, and recent theoretical perspectives that inform future work in educational technology. Prerequisite: EDC&I 510 or instructor permission.

**EDC&I 512 Survey of Educational Technology Research (2, max. 4)**
Critically examines active research projects in educational technology. Critiques of research practice. Corequisite: EDC&I 511 and EDC&I 580.

**EDC&I 524 Seminar in Teacher Education (3, max. 6)**
Focus on recent research, issues, and proposals for future development in teacher education, certification, and continuing professional growth. Alternate year offering focuses on either preservice or inservice issues. Prerequisite: permission of instructor.

**EDC&I 530 Approaches to Literacy Instruction (3)**
Designed to aid experienced teachers who possess background in the teaching of literacy, this course presents a variety of approaches and actual analysis of approaches. Prerequisite: teaching experience and a basic course in the teaching of reading.

**EDC&I 531 Seminar: Critical Review of Literacy Materials (3)**
Students formulate and apply criteria for assessing materials, with emphasis on linguistic, cultural, and psychological factors; instruction effectiveness, interest level; and educational objectives. Prerequisite: teaching experience and one basic course in the teaching of reading.

**EDC&I 532 Seminar in Literacy Research (3, max. 9)**
Primary focus on those aspects of the literacy process that are of concern in a developmental literacy program. Emphasis on research design, evaluation of research, and research findings, dealing with factors influencing literacy ability, problems in skill development, recreational reading, and writing. Prerequisite: permission of instructor.

**EDC&I 533 Seminar: Conducting Research in Reading (3, max. 6)**
Students design and conduct original research studies in the field of reading. Emphasis on research rationale, choice of productive research types, and reporting of research results and implications. Prerequisite: EDC&I 532.

**EDC&I 534 Seminar in the Reading of Literature (3)**
Reading of literature and its effect on reading skills, language development, social values, and literary judgment of children and adolescents. Emphasis on analysis of research in these areas and on the development of action research designed to study response to literature. Prerequisite: one 400- or 500-level education curriculum and instruction course in reading or language arts or one graduate course in literature for children or young adults.

**EDC&I 535 Seminar: Conducting Research in Response to Literature (3, max. 6)**
Students design, conduct, and interpret original research studies in the field of reading literature within the context of the school curriculum. Emphasis on the analysis of literary content and structure and the relationship of those qualities to the literary experience. Prerequisite: EDC&I 534.

**EDC&I 536 Inquiry and Methods in Writing Instruction (3)**
Troia
Covers methods of assessment and teaching written composition, spelling, and handwriting to children and youth with, and without, disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: jointly with EDSPE 528; Sp.

**EDC&I 541 Seminar in Bilingual Education: Organization and Structure (4)**
Study of the structure and organization of bilingual programs. Includes study of the developmental and organizational factors affecting bilingual education. Assists graduate students in reviewing the historical antecedents in bilingual education and in developing a personal philosophy about bilingual education.

**EDC&I 542 Seminar in Bilingual Education: Instructional Foundations and Issues (4)**
Study of the theoretical foundations and instructional implications of psychology and linguistics as they apply to bilingual education. Assists graduate students in exploring learning styles of bilingual children and in becoming familiar with the crucial issues in bilingual education.

**EDC&I 543 Seminar in Bilingual Education: Instructional Strategies (4)**
Study of instructional factors affecting bilingual education. Particular emphasis is given to research related to the variables involved in teaching in a bilingual environment. Assists graduate students in exploring instructional methodologies and formats as they apply to bilingual education and in becoming familiar with the current issues in bilingual education.

**EDC&I 550 Educational Technology Research (3)**
Analysis, critique, and practical experience with research studies of all types (experimental, ethnographic, evaluation) concerning questions of interest to educational technologists. Prerequisite: EDC&I 480, a research methods course, or permission of instructor.

**EDC&I 551 Introduction to Instructional Design (3)**
An experimental course in analyzing, designing, developing and formatively evaluating instructional products using the Instructional Systems Design (ISD) Mode. Also, discussion of how to successfully implement an instructional product/program within an organization using change management principles. Business and industry training focus.

**EDC&I 552 Management of Educational Technology Programs (3)**
Factors contributing to effective management of programs incorporating educational technology and microcomputers. Manager's role as agent of instructional change and processes leading to successful adoption and long-term implementation of a new instructional system. Prerequisite: EDC&I 510.

**EDC&I 553 Seminar on Instructional Systems Development (3)**
Critical analysis of processes involved in the development of instructional systems. Prerequisite: EDC&I 481 or permission of instructor.

**EDC&I 555 Educational Futures (3)**
Concept of alternative futures stressing manageability of the future. Attention is given to current and future events that can or might impact education. Basic future studies methods are considered with opportunities to apply such methods within educational arena. Prerequisite: prior graduate course work or experience in education.

**EDC&I 556 Elementary School Curriculum (3)**
Study of elementary school curriculum, its design, rationale, and delivery. Current trends and issues affecting elementary school
EDC&I 558 Secondary School Curriculum (3)
Systematic analysis of current curriculum practices, with particular emphasis on the social and historical forces affecting secondary-school curriculum.

EDC&I 559 Principles and Procedures of Curriculum Development (3)
Intensive study of basic principles and procedures utilized in development of curricula. Participants have opportunities to apply such procedures in class activities. Attention given to curriculum foundations.

EDC&I 561 Seminar in Language Arts (3)
Study of language with special attention to research pertaining to the social context of language in the classroom. Course work includes group and individual analysis of language arts studies with attention to research design and measurement. Prerequisite: EDC&I 455.

EDC&I 562 Seminar in Reading and Language Arts: Secondary Emphasis (3)
Study of recent research in listening, oral language, reading, and written language, emphasizing psychological and interrelated aspects. Prerequisite: permission of instructor.

EDC&I 563 Current Issues in Literacy Education (1-3, max. 6)
Discussion of problems and issues of current interest and importance in language arts education. Prerequisite: EDC&I 561.

EDC&I 565 Seminar in Social Studies Education: Elementary Emphasis (3)
Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 465 or equivalent.

EDC&I 566 Seminar in Social Studies Education: Secondary Emphasis (3)
Intensive study of the social studies curriculum, with particular emphasis on current literature and research. Prerequisite: EDC&I 466 or equivalent.

EDC&I 567 Current Issues in Social Studies Education (1-3, max. 6)
Discussion of problems and issues of current interest and importance in social studies education.

EDC&I 569 Educating Ethnic Minority Youths (4)
Intensive analysis and review of the research and curricular programs related to the social, psychological, and political factors that influence the school experiences of ethnic minority youths. Special attention given to instructional and curricular programs for African-American, American-Indian, Mexican-American, Puerto Rican-American, and Asian-American students. Prerequisite: graduate standing or permission of instructor.

EDC&I 570 Seminar in Science Education: Elementary Emphasis (3)
Investigation of curriculum and instruction in science at elementary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 470 or equivalent.

EDC&I 571 Seminar in Science Education: Secondary Emphasis (3)
Investigation of curriculum and instruction in science at secondary-school levels, with particular emphasis on current literature and research. Prerequisite: EDC&I 471 or equivalent.

EDC&I 572 Current Issues in Science Education (1, max. 6)
Discussion of topics and problems of current interest and importance in science education. Prerequisite: graduate standing.

EDC&I 573 School Reform and Multicultural Education (3)
Similarities and differences among the visions, goals, and strategies of proposals for school reform and multicultural education are analyzed; implications for practice in curriculum and instruction are deduced from these analyses. Prerequisite: one course in multicultural education or permission of instructor.

EDC&I 574 Race, Gender, and Knowledge Construction: Curriculum Considerations (3)
Using historical and contemporary perspectives, considers ways in which knowledge related to race and gender has been and is constructed and the implications of ways in which knowledge is constructed for curriculum reform and teaching. Prerequisite: one course in ethnic studies, multicultural education, or women studies or permission or instructor.

EDC&I 575 Seminar in Mathematics Education: Elementary Emphasis (3)
Investigation of curriculum and instruction in mathematics at the elementary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

EDC&I 576 Seminar in Mathematics Education: Secondary Emphasis (3)
Investigation of curriculum and instruction in mathematics at the secondary-school level; review of research and preparation of proposals. Prerequisite: graduate standing.

EDC&I 577 Current Issues in Mathematics Education (1, max. 6)
Discussion of problems and issues of current interest and importance in mathematics education. Prerequisite: graduate standing.

EDC&I 578 Qualitative Methods of Educational Research (5-)
Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics. Offered: jointly with EDPSY 586.

EDC&I 579 Qualitative Methods of Educational Research (-5)
Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics. Offered: jointly with EDPSY 587.

EDC&I 580 Technology in Context (3)
Focuses on development of appropriate methods and concepts for research on technology in schools, workplaces, and other naturalistic settings. Fieldwork exercises and reading exemplary studies from multiple disciplinary perspectives. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, or permission of instructor.

EDC&I 581 Cognitive Systems Design (3)
Covers the design of applied technology-based learning systems, informed by current views of learning, technology, and cognition. Emphasizes synthesizing students' knowledge of technology, learning and research in collaborative settings. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, EDC&I 580, or permission of instructor.

EDC&I 582 Design Experimentation and Implementation in Context (3)
Introduces theoretical, methodological, and practical issues involved with studying the designed use of learning technologies in real world settings. Focuses on engaging in empirical study of the designed
system through partnerships involving education researchers, educators, and technologists. Prerequisite: EDC&I 510, EDC&I 511, EDC&I 512, EDC&I 580, EDC&I 581, or permission of instructor.

EDC&I 583 Message Design (3)  
Research and theory on design of instructional messages in various modalities (visual, auditory), and in various formats (pictorial, verbal, graphic). Prerequisite: EDC&I 480 or permission of instructor.

EDC&I 584 Instructional Graphics for Microcomputers (3)  
Study of current research on instructional uses of computer graphics. Development, selection, and application of design principles for graphically-based instructional and training programs. Prerequisite: EDC&I 436, EDC&I 481.

EDC&I 585 Technology and the Culture of Education (3)  
Social impact of technology on education in the United States and elsewhere: social, political, and cultural factors affecting educational communication and technology; roles and relationships among instructors and learners; appropriate technology in developing countries; technology’s long-term influence on thought and values. Prerequisite: EDC&I 480 or permission of instructor.

EDC&I 586 Current Issues for Computers in the Classroom (1, max. 6)  
Addresses many of the current topics in computer-related education. Issues and research related to computer uses in curriculum, instruction, and management of instruction.

EDC&I 587 Design and Application of Interactive and Immersive Instructional Systems (3)  
Theoretical and empirical questions involved in design of interactive instructional systems using such technologies as virtual reality and CAI. Specific problems inherent in design of complex learning environments: immersion, control, structure, sequence of experiences, navigation, learner guidance. Educational uses of systems. Prerequisite: EDC&I 481 or EDC&I 583, EDC&I 436, or permission of instructor.

EDC&I 588 Seminar: Computers in Education (3)  
Provides opportunity for graduate students to analyze, discuss, and design research in areas of computers in education. Includes historical development of research in this area as well as a platform for the development of research proposals and refinement of ongoing research. Prerequisite: EDC&I 434 or EDC&I 436.

EDC&I 589 Current Issues in Educational Communications (1, max. 9)  
Discussion of problems and issues of current interest and importance in the field of educational communications. Serves also as a forum for discussion of doctoral research. Designed for master’s and doctoral candidates in educational communications. Credit/no credit only. Prerequisite: graduate standing.

EDC&I 590 Seminar in Elementary Education (3)  
Exploration of the philosophy, history, purposes, curriculum, methods, and school organization of elementary education. Prerequisite: elementary-school teaching experience, EDC&I 556.

EDC&I 591 Seminar in Curriculum Research (3)  
Analysis of past and current empirical, historical, ethnographic research, and philosophical analysis of the curriculum field. Studies considered include research in curriculum development, the curriculum plan, contextual characteristics, and factors related to curriculum participants. Group and individual analyses focus on theory generation and practical applications of research. Prerequisite: EDC&I 559 or permission of instructor.

EDC&I 592 Seminar in Secondary Education (3)  
Research and study of secondary education. Primary focus on factors involving change in secondary-school curriculum and organization. Prerequisite: EDC&I 558.

EDC&I 593 Seminar in Curriculum: Theory and Practice (3)  
Investigation of curriculum theory and practice. Consideration is given to theoretical writings that address the relationships between various curricular variables. Theoretical positions are related to curricular practices and innovations. Prerequisite: EDC&I 559.

EDC&I 594 Seminar in Curriculum: Issues, Systems, Models (3)  
Emphasis on the current approaches to curriculum and curriculum innovation. Attention is given to major educational issues as they affect curricular activity. Prerequisite: EDC&I 559.

EDC&I 595 Seminar in Analysis of Teaching (3)  
Investigation of the ways in which classroom teaching has been analyzed from a variety of disciplinary perspectives. Focus on methods, findings, and implications of research on teaching. Prerequisite: teaching experience.

EDC&I 596 Seminar in Strategies of Instruction (3)  
Various instructional models applicable to all levels of schooling. Theoretical and philosophical bases for these instructional models are considered.

EDC&I 597 Curriculum Evaluation Seminar (3, max. 6)  
Focuses on the evaluators’ roles, evaluation theory and models, and selected curricular evaluations. Examples are drawn from the several disciplines commonly offered in the elementary and secondary schools. Students are expected to identify an evaluation problem and to develop an evaluation design that can be implemented as a practical solution to the problem. Prerequisite: EDC&I 559 and permission of instructor.

EDC&I 599 Independent Studies in Education (*)  
Independent studies or readings of specialized aspects of education. Prerequisite: permission of instructor.

EDC&I 600 Independent Study or Research (*)  
Prerequisite: permission of instructor.

EDC&I 601 Internship (1-10, max. 10)  
Credit/no credit only. Prerequisite: graduate standing and permission based on approval of proposal submitted during quarter preceding the internship.

Education  

Course Descriptions  

EDUC 301 Introductory Practice in Community Service Activity (1-10, max. 10)  
Observation and participation in a variety of activities in a K-12 classroom. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Offered: AWSp.

EDUC 305 The Purpose of Public Schools in a Democracy (5) I&S  
Explores issues and questions pertaining to public schools in a democratic society through directed readings, dialogue, individual and group projects designed to engage students with a series of crucial issues in public schools.

EDUC 310 Current Issues in Education (5, max. 10) I&S  
Covers a current issue and provides the opportunity to read and discuss educational issues with other students and faculty and to learn of opportunities in the College of Education programs.

EDUC 401 Practicum in Community Service Activity (1-18,
Tutoring and teaching experiences in a school or community service organization. Placement made according to participant interests and needs. Participation on a predetermined schedule plus scheduled orientation and debriefing sessions are required. Offered: AWSp.

EDTEP 501 First Quarter Field Experience — Elementary (2)
Field experience and use of reflective process in small group discussions accompanying the first quarter of study in the Elementary Teacher Education Program. Field experience during the quarter in supervised school placements. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 502 Second Quarter Field Experience — Elementary (3)
Field experience and use of reflective process in small group discussions accompanying the second quarter of study in the Elementary Teacher Education Program. Field experiences during the quarter in supervised school placements. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 503 Third Quarter Field Experience — Elementary (4)
Field experience and use of reflective process in small group discussions accompanying third quarter of study in Elementary Teacher Education Program. Observe school-year opening full-time in late August through September; field experiences during the quarter in supervised school placements. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 505 Portfolio: Tool for Reflection — Elementary (2)
Group discussions fostering integration of course work and field experience through reflection. Using program goals and targets, students illustrate their learning through multiple forms of evidence. Final portfolio is presented to an audience. Related field experiences may be arranged. Credit/no credit only. Prerequisite: elementary TEP student.

EDTEP 511 School and Society (3)
Exploration of issues regarding schooling and society, such as matters of value and value tension in American schools. Consideration of social values such as equality, opportunity, pluralism, and community; historical and contemporary evidence of values in schooling; and how values can conflict in policy and practice. Prerequisite: elementary TEP student.

EDTEP 521 Teaching and Learning in Numeracy I (3)
Focus on mathematics from the perspective of the learner and on the meaning of understanding a mathematics concept. Examination of cultural aspects of the development of these concepts. Prerequisite: elementary TEP student.

EDTEP 522 Teaching and Learning in Numeracy II (3)
Focus on pedagogy of mathematics. In conjunction with field experience, students extend understanding of mathematics and successfully integrate mathematics as a tool for learning science and art. Prerequisite: elementary TEP student.

EDTEP 523 Teaching and Learning in Science (3)
Science teaching in a manner consistent with how young children learn science concepts and skills. Opportunities are provided for work on science activities similar to those used with elementary school children and to experience many of the problems and successes of preadolescents. Prerequisite: elementary TEP student.

EDTEP 531 Teaching and Learning in Literacy I (3)
Investigation of the multiple natures of literacy development. Students study the impact of culture and family on literacy development by reading and discussing a variety of texts while also experiencing the development of their own learning through literature study, the writing process, and oral presentations. Prerequisite: elementary TEP student.

EDTEP 532 Teaching and Learning in Literacy II (3)
Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 533 Teaching and Learning in Literacy III (3)
Introduces participants to the content and process of literacy learning in elementary school. Study of abilities needed for effective literacy use, instructional strategies to help children acquire these abilities, and assessment strategies to evaluate student progress. Prerequisite: elementary TEP student.

EDTEP 541 Dilemmas of Teaching and Learning in Elementary School (4)
Covers human learning in the elementary school setting with emphasis on discipline-specific cognition and cognitive development. Prerequisite: elementary TEP student.

EDTEP 542 Meeting the Needs of All Students—Elementary (3)
Overview of physical, cognitive, and social development of elementary school age children. Discussion of ways in which differences in development may affect children in school. Provides elementary teachers with understanding of how to facilitate the success of all children in general education classrooms. Prerequisite: elementary TEP student.

EDTEP 543 Teaching and Learning in Social Studies. (3)
Introduction to objectives, content, and teaching strategies of social
EDTEP 551 Multicultural Teaching (3)
Concepts, theories, and strategies that constitute major dimensions of multicultural education. Focus on racial and ethnic groups, social class, and gender. Dimensions of multicultural education examined include content integration, knowledge construction process, prejudice reduction, equity pedagogy, and empowering school culture and social structure. Prerequisite: elementary TEP student.

EDTEP 552 Assessment in Elementary Education (3)
Emphasis on methods of assessment that reinforce understanding of the various disciplines. Includes performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: elementary TEP student.

EDTEP 561 Dilemmas of Teaching and Learning (5)
Study of human learning in an educational setting, with an emphasis on learning of school subjects. Topics include nature of learning, knowledge and teaching, motivation, culture, and cognition. Prerequisite: secondary TEP student.

EDTEP 562 Adolescent Development and Education I (3-)
Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools examined with special attention to classroom management and accommodating differences. Prerequisite: secondary TEP student.

EDTEP 563 Adolescent Development and Education II (3-)
Overview of trends and issues of adolescent development and behavior in relation to contemporary secondary schooling. Psychological perspectives on adolescent identity, interpersonal relationships, academic engagement, and social deviancy in schools examined with special attention to classroom management and accommodating differences. Prerequisite: secondary TEP student.

EDTEP 564 Working in Secondary Schools (3)
Organizational, personal, and interpersonal aspects of working as a teacher in a secondary school. Preparation for membership and leadership in a learning community and for continuing professional growth. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 565 Planning and Teaching an Integrated Curriculum (3)
Introduction of models for integrating curriculum, congruent instructional and assessment strategies, and team planning skills. Provides direct and experiential learning experiences and results in production of team-planned curricular units based on two different models of curriculum integration. Prerequisite: secondary TEP student.

EDTEP 571 Topics and Tensions in School and Society (3)
Exploration of issues of value and value tension in American schools. Consideration of social values of equality, opportunity, pluralism, and community, historical and contemporary evidence of values in schooling, and how values can conflict in policy and practice. Prerequisite: secondary TEP student.

EDTEP 573 Assessment in Secondary Education (3)
Strong emphasis on methods of assessment that reinforce understanding of the various disciplines, including performance assessments, assessments of student projects and papers, traditional exams, and observational exams. Prerequisite: secondary TEP student.

EDTEP 580 Teaching English and Language Arts in Secondary School I (5-)
Teaching of English and Language Arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 581 Teaching English and Language Arts in Secondary School II (3-)
Teaching of English and Language Arts in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 582 Teaching Mathematics in the Secondary School I (5-)
Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 583 Teaching Mathematics in the Secondary School II (3-)
Teaching of mathematics in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 584 Teaching Social Studies in the Secondary School I (5-)
Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 585 Teaching Social Studies in the Secondary School II (3-)
Developing, teaching, and evaluating social studies courses on the middle, junior, and senior high school levels. Prerequisite: secondary TEP student.

EDTEP 586 Teaching Science in the Secondary School I (5-)
Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 587 Teaching Science in the Secondary School II (3-)
Teaching of science in middle, junior, or senior high school. Prerequisite: secondary TEP student.

EDTEP 588 Teaching World Languages I (5-)
Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills — reading, writing, speaking, listening — and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 589 Teaching World Languages II (3-)
Introduction to currently used foreign language teaching methods and approaches, including learning and teaching strategies and techniques for the four skills — reading, writing, speaking, listening — and culture. Current and future trends in pedagogy and technology. Prerequisite: secondary TEP student.

EDTEP 591 First Quarter Field Experience — Secondary (3)
Field experience and small group discussions accompanying the first quarter of study in the Secondary Teacher Education Program. Observe school year opening full-time for approximately one month in August and September and two weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 592 Second Quarter Field Experience — Secondary (3)
Field experience and small group discussions accompanying the second quarter of study in the Secondary Teacher Education Program. Three weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 593 Third Quarter Field Experience — Secondary (3)
Field experience and small group discussions accompanying third quarter of study in Secondary Teacher Education Program. Four weeks full-time during the quarter in supervised school placements. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 595 Portfolio: Tool for Reflection — Secondary (3)
Group discussions fostering integration of course work and field experience through reflection. Using program goals and targets, students illustrate their learning through multiple forms of evidence. Final portfolio is presented to an audience. Related field experience may be arranged. Credit/no credit only. Prerequisite: secondary TEP student.

EDTEP 600 Independent Study or Research (1, max. 6)
Registration must be accompanied by a study prospectus endorsed by the Director of Teacher Education and the faculty adviser for the work proposed. Credit/no credit only.

EDTEP 601 Fourth Quarter Field Experience (2-10, max. 15)
Field experience during the fourth quarter of study in the Teacher Education Program. Full-time student teaching in supervised school placements. Prerequisite: TEP student.

Education Leadership & Policy Studies

Course Descriptions

EDLPS 444 Constitution and American Public Education (3-6, max. 6) I&S
Emphasis on the principles, processes, and content of constitutional law in an effort to provide new insights and new tools with which school administrators and teachers may examine questions involving political and civil rights in the United States, especially as these affect the conduct of education. Specific topics on constitutional freedom include the obligation to go to school; legal controls over curriculum, teachers, and students; and racial integration and equal financing of public schools. Open to law students and to nonlaw students enrolled as graduate students or as upper-division undergraduates. Credit/no credit only. Offered: jointly with LAW 444.

EDLPS 458 History of American Education to 1865 (3) I&S
Development of American education in cultural context; colonial period, influence of Enlightenment, and common school movement. Offered: jointly with HSTAA 458.

EDLPS 459 History of American Education Since 1865 (3) I&S

EDLPS 479 Crucial Issues in Education (3)
Selected educational issues, policies, and contexts. Evolution of the American education enterprise, legal issues, professionalism, finance, and other vital educational concerns.

EDLPS 496 Workshop: Education Programs and Problems (1-6, max. 12)
Study of such topics as planning, development, supervision, organization, operation, or evaluation of current or emerging programs or problems in education.

EDLPS 499 Undergraduate Research (*)
Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program.

EDLPS 501 Introduction: Leadership Beyond the Classroom (3-6, max. 6)
First course in principal certification program; explores Washington state laws, legal principles, context of public schools, multicultural issues, changing population. Essential skills of leadership: communication, human relations, strategies for shared decision making, and dealing with conflict. (Open only to students admitted to the EDLPS Principal/Program Administrator Preparation Program.)

EDLPS 502 Leadership Core (1-3-6, max. 6)-
Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 503 Leadership Core (-[3-6, max. 6]-)
Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 504 Leadership Core (-[3-6, max. 6])
Topics include moral dimensions of leadership; modes of inquiry; organizational theory and change; history of educational reform; curriculum deliberation and instructional leadership and supervision; school-centered inquiry and decision-making; policy, planning, and program evaluation; issues on diversity and multicultural education; American and Washington State school law; school finance and resource allocation; school-community relations. Instruction occurs in units and seminar throughout the academic year. Prerequisite: admission to Principal/Program Administrator Preparation Program.

EDLPS 505 Transition to Leadership (3-6, max. 6)
Development and administration of systems for selection, evaluation and clinical supervision of certificated and classified personnel. Focuses on leadership models and transition to a leadership role, including opening a school or program and dealing with student/school crises. (Only for students admitted to the EDLPS Principal/Program Administrator Program.)

EDLPS 507 Reflective Seminar (1-6, max. 6)
Integration of theory and internship experience; group process laboratory and peer feedback and review of written work, oral presentations, and journals. Reading and discussion of crucial issues. (Only for students admitted to the EDLPS Principal/Program Administrator Preparation Program.) Credit/no credit only.

EDLPS 509 Planning, Organizing, and Decision Making (3)
Application of principles utilized in planning, organizing, and decision making in districts and schools. Formation of policy and procedures; formal and informal organization; power, authority, and responsibility; utilization of people, time, and space.

EDLPS 510 School Finance (3)
Financial practices and problems in districts and schools considered, including state and federal support plans, school plant planning, school business management, resource allocation, and budgeting and educational accountability.

EDLPS 511 School-Community Relations (3)
Examines the dynamics of the interface between the public schools and the community. Special attention is given to the findings of research in relation to school-community power, types, and organizational influences.

EDLPS 512 Seminar in Personnel Administration and Development (3)
Major emphasis on the analysis of factors to be considered in the selection and evaluation of teachers and administrators and

492
EDLPS 513 Seminar in Instructional Development and Supervision (3)
Theory of the process of supervising instructionally effective school personnel, including an analysis of the techniques of supervision, theory of leadership and group process, interpersonal relations, and evaluation of teacher effectiveness.

EDLPS 514 Washington School Law (3)
Overview of Washington State specific legal provisions affecting the operations and management of public schools, including school organization and operations, school finance, separation of church and state, school employment, student conduct, discipline and rights, equity, intergovernmental agreements, and student health and safety.

EDLPS 515 Management of Labor Relations in Education (3)
Examination of procedures and techniques pertinent to the management of organizational conflict. Among the areas covered are collective bargaining, grievance procedures, mediation, fact finding, and arbitration.

EDLPS 516 Special Education and the Law (3)
Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis upon procedural and substantive rights of children with disabling conditions. Offered: jointly with EDSP 504; W.

EDLPS 517 Seminar in Administration: Facilities (3)
Contemporary issues, problems, and techniques of educational facility administration. Emphasis placed on such factors as planning, financing, development, design, construction, operation, liabilities, property management, state regulation. Credit/no credit only.

EDLPS 518 Reflective seminar: The Superintendency (1-6, max. 6)
Integration of theory and internship experience. Readings and discussion of crucial issues, presentations by local school superintendents: district budgeting processes, personnel, staff relations and collective bargaining, superintendent-board relations, bond issues, facilities planning, superintendent as instructional leader. Credit/no credit only.

EDLPS 519 Special Topics in Educational Leadership (1-10, max. 15)
Readings, lectures and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues of particular concern to K-12 administrators and other educators in leadership roles in districts and schools. Topics vary; check Time Schedule for topic(s) to be covered.

EDLPS 520 Education as a Moral Endeavor (3)
An exploration of fundamental questions that have faced educational leaders in the past and most likely will continue to face them in the future. Foundational studies in history, philosophy, and sociology provide the basis for discussion and writing about these fundamental questions. Credit/no credit only.

EDLPS 521 Philosophy of Education (3)
Philosophy of education considered as a study of the conceptual basis for educational policy and practice. Emphasis on relationships between enduring educational problems and fundamental philosophic issues; concepts that feature centrally in educational discourse; and conceptual analysis as a means for clarifying decisions regarding educational policy and practice.

EDLPS 522 Contemporary Philosophies of Education (3)
Intensive study of the writings of selected contemporary philosophers of education.

EDLPS 523 Analysis of Educational Concepts (3)
Selected concepts central to conduct and understanding of education.

EDLPS 524 Seminar in Philosophy of Education (3, max. 6)
Philosophical examination of ways in which education might be studied. Uses and limits of conventional scientific approaches in education inquiry. Consideration of alternatives.

EDLPS 525 Educational Inquiry (3)
General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

EDLPS 526 Educational Inquiry (3)
General survey of epistemological issues underlying the several schools of thought or families of inquiry. Overview of various methods used in conduct of educational inquiry, examples of ways those methods are typically used, and exploration of strengths and weaknesses of those methods. Discussion throughout is in terms of assumptions regarding the nature of knowledge and purposes of inquiry. Must be taken in sequence. Credit/no credit only. Prerequisite: doctoral status in education.

EDLPS 530 History of Education (3)
Historical survey of education. Emphasis on relationship between idea and practice. Topics include education and colonialism, formation of state school systems, progressive education, equal educational opportunity, changes in textbooks and curricula, education and social structure, and education in the history of cultures.

EDLPS 531 History of American Higher Education (3)
Examination of the historical development of the American higher education enterprise, including pre-colonial origins. Includes attention to the colonial colleges, the rise of new institutions in the nineteenth century, and the further development of American colleges and universities in the twentieth century. Leaders in these developments are identified.

EDLPS 532 Seminar: American Education in the Twentieth Century (3, max. 6)
Selected problems in American education over the last century, with special emphasis on contemporary issues and trends.

EDLPS 533 Seminar in Educational Classics (3)
Analysis in depth and in the context of the relevant history of several major works in educational thought from Plato to Dewey.

EDLPS 534 History of the Modern University (3)
Growth of the modern university with attention to intellectual trends as well as organizational and curricular changes. Special attention is given to nine American universities in the twentieth century.

EDLPS 535 Historical Inquiry in Education Research (3, max. 6)
Methods and critique of historical research in education. Examination of landmark works in education history and historiography. Hands-on experience framing historical questions, finding historical sources, using historical evidence, substantiating historical claims, and addressing issues in the history of education.

EDLPS 536 Historical Analysis of Educational Issues (3)
Analysis and interpretation of the history of education in its broadest sense: the transfer of culture across generations. Examination of the problems of evidence and interpretation with which the
EDLPS 540 Sociology of Education (3)
Examination of education and educational institutions by using the major conceptual tools of sociology. Emphasis on sociological thought and findings that have particular bearing on the understandings and judgments of educators.

EDLPS 541 Topics in Comparative Education (3, max. 6)
International efforts in education, including the role of the United States in overseas programs. Analysis of the relation of education and society in foreign areas, stressing social change and conflict. Regions of the world considered in the course vary from one offering to another.

EDLPS 542 Seminar in Educational Sociology (3)
Application of sociological principles to school problems; individual problems and investigations. For teachers, administrators, and those using educational sociology as a field for advanced degrees.

EDLPS 543 Seminar: Research in Educational Sociology (3)
Theory, concept, and method of sociological inquiry as applied to problems in education.

EDLPS 544 Comparative Education: Introduction to Concepts and Methods (3)
Introduction to research methods used in comparative education studies. Considers ways to study familiar and unfamiliar contexts, identifies the common pitfalls of international comparisons. Reviews ethnomethodological tools of interview construction, cross-cultural observation strategies, documentary analysis. Education policy and practice is primary focus; useful for comparing other public policy issues internationally.

EDLPS 545 Knowledge and Data in Relation to Action (3)
Introduces L4L students to systematic inquiry— to fundamental ideas about knowing and knowledge, data and evidence, and to the applications of these ideas in settings that invite leadership action to address educational issues. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only.

EDLPS 546 Leadership Inquiry I: The design of research on Local Problems of Practice (3)
Examines evaluation design, action research, critical inquiry, and mixed method research. Equips L4L students to recognize and create viable, rigorous designs for action-oriented research into local problems of practice. (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 547 Leadership Inquiry II: Developing Useful Quantitative and Qualitative Evidence (3)
Helps students, in the context of action-oriented research, develop data collection tools, produce high-quality quantitative and qualitative data, and construct evidence for claims the investigator wishes to make. (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 548 Leadership Inquiry III: Refining the Design and Analysis of Research that Informs Practice (3)
Teaches how to critically evaluate and improve research designs so that they're internally consistent, fully developed, and well-anchored to both substantive and methodological literatures. Builds largely around the students' own emerging dissertation designs. (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 549 Special Topics in Educational Studies (1-6, max. 15)
Readings, lectures, and discussions pertaining to significant and enduring ideas in the philosophy, history and sociology of education. Specific topics are critically examined in light of contemporary problems in education. Topics vary; check Time Schedule for topic(s) to be covered.

EDLPS 550 The Dynamics of Educational Organizations (3)
Exploration of the literature in organizational theory and leadership, the assumptions that underlie the development of various approaches to organizational theory and how these approaches are applied, and an acquaintance with different conceptual frames that can be used to determine how to improve and change organizations. Credit/no credit only.

EDLPS 551 Foundational Studies in Complex Organizations (3)
Examination of conceptual and theoretical bases for complex organizations, characterized by problematic goals, knotty decision-making processes, and fluid participation. Impact of information, power, beliefs, resources, organizational structure, and environment. Although issues discussed are generic, examples focus on educational organizations.

EDLPS 552 Organizational Change in Education (3)
Change and innovation in educational organizations. Theoretical approaches include sociopsychological, rational planning, political perspectives, and those associated with notion of organized anarchies. Specific topics related to change and innovation (e.g., roles of beliefs, symbols and norms, diffusion of innovations, and research issues).

EDLPS 553 Human Resources in Educational Organizations (3)
Analysis of factors involved in human resource problems related to operation of educational organizations. Motivation, perception, communication, role analysis, and dynamics of groups are studied through use of cases and seminal literature.

EDLPS 554 Foundations I: Leading for Learning in Complex Educational Systems (3)
Explores (1) the conceptions of educational leadership as it manifest itself and is exercised in large-scale education systems (districts, regional entities, states); and (2) the possible connections between leadership and learning. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only.

EDLPS 555 Foundations II: Moral and Historical Contexts for the Leadership of Complex Educational Systems (2-4, max. 4)
Locates system-level educational leadership in a context of values, moral principles, and historical events and trends. Connects leadership to principles of social justice and enduring dilemmas in public education within a democratic society. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only.

EDLPS 556 Foundations III: The Dynamics of Organizations, Policy, and Systems Change (2-6, max. 6)
Considers the nature and dynamics of organizations within large educational systems. Draws on theories concerning organizations, politics, administration, systems, and innovation. Explores how organizations are designed and function, how policy works, and how systems change, adapt, and learn. (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 557 Foundations IV: Fiscal and Legal Contexts for Leadership of Complex Educational Systems (2-5, max. 5)
Considers two major challenges facing leaders of complex educational systems: (1) securing and allocating resources (especially funds, but also time and expertise); and (2) conforming to the framework of legal principles and precedents that govern public education. (Only for students admitted to the Leadership for Learning Ed. D. Program.)

EDLPS 560 Perspectives on Policy and Policy Making in
Education (3)
This course introduces a variety of theoretical perspectives that can be used to analyze policy content, processes and outcomes. Includes a consideration of the power and limits of policy and a discussion of the many ways people in different positions in organizations can influence policy. Credit/no credit only.

EDLPS 561 Education Policies and Leadership in Political Context (3)
Systematic consideration of the structure and function of educational policies and problems of research in political context.

EDLPS 562 American School Law (3)
Examination of persistent legal issues, including an analysis of how these issues are manifest in public policy debates.

EDLPS 563 Education, The Workforce, and Public Policy (3, max. 6)
Examination of policy issues involving education, training, the economy, and the development of the nation’s human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimination issues, and the role of education and training in economic development. Offered: jointly with PB AF 571.

EDLPS 564 Seminar in Economics of Education (3)
Current problems in school finance, including costs, ability to support schools, and financial implications of educational principles. The economics of public education. Problems of federal, state, and local school support. Financing capital outlay, research, and public relations.

EDLPS 565 Power and Politics in Organizational Leadership and Decisionmaking (3)
Focuses on conceptual frameworks that can be used to analyze power-influence processes in complex organizations and research methods that are well-suited to the study of these processes. Opportunities to design studies of power relations and political processes are provided.

EDLPS 566 Education Policy Serving Disenfranchised Groups (3)
This seminar examines programs and policies aimed at ameliorating conditions that face disenfranchised groups in contemporary K-12 schooling. Seminar members critically analyze the assumptions, design, and likely impact of these programs and policies on institutions and individuals. Designed for advanced doctoral students. Others admitted with permission of instructor.

EDLPS 567 Education Policy and the Improvement of Teaching and Learning (3)
Examines connections between policies and classroom practice, in P-12 and higher education settings. Of particular concern is the capacity of policy to improve the quality of curriculum and instruction. Students design and critique policies, drawing on research and feedback from policymakers.

EDLPS 568 Policy Evaluation in Education (3)
Examination of methods for evaluating educational policies across the educational continuum. Students design and conduct a policy evaluation which draws on the policy evaluation literature. Examination of the uses of policy evaluation information in shaping organization-decision making is also included.

EDLPS 569 Issues in P-12 School Reform (3, max. 12)
Copland, Knapp
Offers rigorous ways to explore the meaning and action implications of contemporary reform movements in the P-12 public school system. Examines a different topic each quarter concerning reform at school, district, state, or federal levels through readings, discussion, projects, and analytical writing assignments. Offered: AWSpS.

EDLPS 570 Critical Views on Educational Leadership (3)
Leadership theory is undergoing a wave of development influenced, in part, by critical theory and postmodern perspectives. Topics include the emerging literature on critical leadership perspectives with a particular goal of understanding how this informs leadership practice for those in educational organizations.

EDLPS 571 Instructional Renewal and the Achievement Gap (3)
Examines the meaning of the performance gap between relatively advantaged and disadvantaged students in contemporary American schools and school districts, and the possibilities for reducing and closing it. Especially within classroom instruction. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only

EDLPS 572 Teaching, Learning, and Instructional Renewal in the Context of Learner Differences (2-5, max. 5)
Examines the nature of learning and learner differences, and how educators can work productively with these differences, in relation to particular subjects (literacy, mathematics), diversity (language, culture, disability), assessment, and instructional technology. (Only for students admitted to the Leadership for Learning Ed. D. Program.) Credit/no credit only

EDLPS 573 Title (2-4, max. 4)
Text (Only for students admitted to the Leadership for Learning Ed. D. Program.

EDLPS 579 Special Topics in Organizational and Policy Analysis (1-6, max. 15)
Readings, lectures and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to the analysis of educational organizations, policies, and policy making. Topics vary; check Time Schedule for topic(s) to be covered.

EDLPS 580 The American College and University (3)
Introduction to contemporary United States higher education, with special emphasis on emerging trends, roles of the several kinds of institutions, the composition and character of student bodies and faculty, and the state coordination of colleges and universities.

EDLPS 581 Principles and Practices of Adult and Continuing Education (3)
History and development of adult and continuing education in the United States: component parts of the field; issues, theory, and research; program planning for adults; professionalism of the field.

EDLPS 582 Seminar in the History and the Organization of Higher Education (3)
Advanced seminar in the history and the organization of higher education.

EDLPS 583 Higher Education and the Law (3)
Legal implications of university operations and an explanation of the legal and constitutional rights of students, faculty, and staff within the university. Special attention given to faculty employment and termination decisions; student protections, including due process; and university liabilities.

EDLPS 584 Academic Governance and Collective Bargaining in Higher Education (3)
Explores the concept and operation of collective bargaining in higher education: its origin; the reasons for its growing popularity as a governance mechanism; the legal framework within which it operates; the rights, powers, and duties subsumed under its operation; and its relationship to the traditional form of faculty governance mechanisms.
EDLPS 585 Resource Allocation in Higher Education (3)
After attention to the basic tools of economic analysis, focus is on application of those tools to specific topics in higher education (e.g., access, budgeting, finance and policies, and funding alternatives).

EDLPS 587 Seminar in Teaching and Learning in Higher Education (3, max. 9)
Theory and practice of instruction and learning in higher education.

EDLPS 588 Seminar in Administration of Community Colleges (3)
For students preparing for administrative positions in community colleges. Principles and practices in organization and administration of community colleges.

EDLPS 589 The Community College (3)
Intensive study of the community college—its history and present and future status. Curriculum, instruction, financial, and governance issues are also discussed.

EDLPS 590 Student Populations and Experiences in Higher Education (3)
Examines foundational literature dealing with students in higher education. Primary focus is on how students change during college, how they make choices and decisions, what roles institutional climate and structure play in the students' experiences, and what impact college has on students.

EDLPS 591 Higher Education and Public Policy (3)
Covers public policy processes affecting higher education. Issues examined vary, but typically include fiscal context of higher education policy, access, equity, distance learning, and accountability policies.

EDLPS 598 Special Topics in Higher Education (1-6, max. 15)
Readings, lectures, and discussions pertaining to significant topics of special and current interest to educators. Focus is on issues related to education in community colleges, four-year colleges and universities. Topics vary; check for topic(s) to be covered.

EDLPS 599 Independent Studies in Education (1-10, max. 10)
Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and with which permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Prerequisite: permission of instructor.

EDLPS 600 Independent Study or Research (*)
Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed, and with which permission of the instructor, must be filed with the Office of Leadership and Policy Studies in the College of Education. Credit/no credit only. Prerequisite: permission of instructor.

EDLPS 601 Internship (1-4, max. 12)
Name of faculty member responsible for supervising the student should be indicated on program of studies. Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

Educational Psychology

Course Descriptions

EDPSY 228 Learning and Motivation in Contexts (5) I&S %
How people learn and remember, what motivates them to learn, and how learning and motivation are shaped by social contexts in homes, school, and communities. Cognitive and socio-cultural theories of learning and motivation (including distributed cognition, goal theories, self-determination theory, and interest theories), especially as related to college learners.

EDPSY 304 Educational Psychology (5)
Human learning in the educational setting. Cognition, development, learning, motivation, affective processes, and socialization. Emphasis on skills in influencing classroom learning and discipline. Open to students in the Music Education program or by permission of instructor. Offered: A.

EDPSY 431 Strategies for Classroom Research and Evaluation (5)
Techniques and strategies for the design and implementation of studies of classroom instruction. Directed toward classroom teachers as consumers of instructional research and as evaluators in their own classrooms. Credit/no credit only.

EDPSY 447 Principles of Guidance (3)
Study of guidance programs in elementary and secondary schools. Attention is given to the roles of specialists with emphasis on the role of the classroom teacher in school guidance programs. This course is designed for teachers, administrators, and prospective teachers.

EDPSY 449 Laboratory in Educational Psychology (2-6, max. 6)
Special studies for counselors, teachers, administrators, and others concerned with student personnel and psychological services in schools and colleges. The course focuses on special topics that have either local or contemporary significance.

EDPSY 490 Basic Educational Statistics (3)
Measures of central tendency and variability, point and interval estimation, linear correlation, hypothesis testing. Offered: AWSp.

EDPSY 495 Introduction to Educational Measurement (3)
Practical understanding of test reliability, validity, and derived scores as they apply to external educational assessments; concepts of criterion and norm-referenced testing; review of group administered norm-referenced and criterion-referenced tests and/or testing programs; test interpretation; issues and ethics in large scale assessment. Prerequisite: EDPSY 490. Offered: W.

EDPSY 499 Undergraduate Research (*)
Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSp.

EDPSY 500 Field Study (*)
Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor must be filed in the Office of Educational Psychology in the College of Education. Offered: A/WSp.

EDPSY 501 Human Learning and Educational Practice (3)

EDPSY 502 Developmental Foundations of Early Learning (3)
Perceptual-motor, language, and overall cognitive development in children from birth through primary-school age. Emphasis on Piagetian and Vygotskian approaches to development with a special focus on the connections between learning and development. Field-based course projects may be required. Prerequisite: EDPSY 501 or permission. Offered: Sp.

EDPSY 503 Theories of Intelligence (3)
Reading and discussion of theoretical and research papers from the extensive literature on Piagetian, psychometric, and information processing conceptions of intelligence. A historical approach to the
topic is followed by analysis of current writings on intelligence and its measurement. Credit/no credit only. Prerequisite: EDPSY 501 and graduate status in education or psychology. Offered: alternate years; W.

EDPSY 506 Instructional Theory (3)
Sources, current state, and utility of prescriptive instructional theories with emphasis upon theories having a potential for guiding the design of instruction. Prerequisite: EDPSY 501 or equivalent.

EDPSY 507 Reading, Writing, and Arithmetic: Educational Assessment and Consultation (5)
Students administer and interpret tests of reading, writing, arithmetic, and related developmental skills; integrate test, observational, interview, and portfolio information in staffings and written reports; and consult with teachers regarding educational interventions. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Offered: A.

EDPSY 508 Clinical Supervision-Practicum (2-6, max. 12)
Practicum in supervising counseling, group counseling, diagnostic activities, and remedial academic therapy. Prerequisite: advanced graduate standing. Offered: AWSp.

EDPSY 509 Educational Issues in Human Development (5)
Human development theories and models. Educational implications of theory, methodology, and application. Current research complements the historical antecedents of current practice. Age range covered varies as function of current issues in professional literature. Prerequisite: 15 credits in educational psychology or psychology. Offered: alternate years; W.

EDPSY 510 Cognition in the Context of the School Curriculum (3)
Contemporary issues and trends in human learning, with a focus on reasoning within subject-matter areas such as mathematics, history, and science. Prerequisite: EDPSY 501 or equivalent. Offered: alternate years.

EDPSY 511 Seminar in Applied Educational Psychology (1, max. 6)
Designed for graduate students in educational psychology. Applications of theoretical constructs to particular problems encountered in school counseling, practice.

EDPSY 512 Classroom Assessment Strategies (3)
Development and evaluation of traditional, observational, essay, performance-based, portfolio assessments and grading models as they are used in classroom assessment; some review of current research on classroom-based assessment; classroom assessment ethics.

EDPSY 513 Instrument Development (3)
Instrument development techniques including construct development, test and item specifications, item writing, planning for reliability and validity studies; ethics in test administration and interpretation. Intended for doctoral or masters students to develop instruments for their own research. Prerequisite: EDPSY 490 or equivalent.

EDPSY 518 Assessment and Diagnosis of Reading Disabilities (3)
Techniques for individual assessment of students with reading difficulties (K-12) including formal assessment using standard assessment tools and informal diagnostic teaching. Appropriate for classroom teachers, reading specialists, and school psychologists. Includes conducting and analyzing case studies. Prerequisite: EDC&I 460, EDC&I 462, other reading courses, or permission of instructor. Offered: alternate years; Sp.

EDPSY 519 Communication and Language in Young Exceptional Children (3)
Review and discussion of theories of language acquisition as they relate to communication and language in young children. Review of research of language environments that relate to early literacy and education and how to use this information to modify environments for special needs children. Offered: jointly with EDSPE 521; W.

EDPSY 520 Psychology of Reading (3)
Reviews current empirical research on cognitive processes in reading, including word and sub-word processes, syntax and comprehension, reading and perception, word recognition, concept development and meaning in reading, psychology of reading interests and skills. Prerequisite: EDPSY 501 or equivalent.

EDPSY 521 Psychology of Writing (3)
Examines writing as a cognitive process and reviews current empirical research on writing, emphasizing primarily studies from a psychological perspective. Explores both developmental differences and individual differences in writing skills, together with instructional implications. Prerequisite: EDPSY 501 or equivalent.

EDPSY 522 Reading Disability Clinic (3-5)
Supervised practicum in diagnosis and remediation of reading disabilities. Prerequisite: EDTEP 552, EDTEP 543 or equivalent; EDC&I 460 or permission of instructor.

EDPSY 524 Problem Solving and Critical Thinking in Education (3)
Study of the classic and contemporary research literature concerned with human problem solving and critical thinking with emphasis upon applications to educational practice and further research. Prerequisite: EDPSY 501 or equivalent.

EDPSY 525 Creativity and Education (3)
Study of the classic and contemporary research literature about creativity with emphasis upon applications to educational practice, evaluation of strategies to promote creativity in the schools, and further research. Prerequisite: EDPSY 501 or equivalent.

EDPSY 526 Seminar on Metacognition (3)
Students read and discuss theoretical and research papers from the extensive literature on metacognition. Focuses on defining the concept of metacognition, establishing its range of applicability to educational matters, and becoming familiar with excellent examples of metacognitive research. Prerequisite: graduate status in education or psychology and permission of instructor.

EDPSY 527 Transfer of Teaching (3)
Students read and discuss a representative sample of theoretical and research papers from extensive literature on teaching to promote transfer of what students learn to non-teaching environments. Historical approach to the topic is followed by analysis of current writings on transfer. Credit/no credit only. Prerequisite: EDPSY 501 and graduate status in education or psychology.

EDPSY 528 Achievement Motivation in Education (3)
Critical review of current research and major theories of achievement motivation in schools and other educational settings. Emphasis on the relationship of theories to the contexts and practice of education. Prerequisite: EDPSY 501 or permission of instructor. Offered: W.

EDPSY 531 Socialization of School-Age Children (3)
Study of personal social development and behavior from preschool ages through adolescence. Developmental theory and research are reviewed on the socialization influences of parents and peers and on such topics as aggression, emotional regulation, and social cognition. Prerequisite: EDPSY 501 or equivalent. Offered: W.

EDPSY 532 Adolescence and Youth (3)
Developmental processes and patterns examined with major
theoretical and current research themes from behavioral sciences as applied to middle school and senior high students. Educational issues, social problems associated with adolescence in Western culture. Prerequisite: EDPSY 501 or equivalent.

EDPSY 533 Current Research in Adolescence (3)  
Contemporary trends and patterns of adolescent research are examined with emphasis upon theoretical foundations, contrasting methodologies, and implications for further research. Exemplary studies and integrative reviews of research on adolescence are featured. Prerequisite: EDPSY 532 and EDPSY 591 or equivalents.

EDPSY 534 School Problems of Adolescence (3)  
Study of the classic, contemporary, and emerging school problems of school age youth with emphasis upon problem solving strategies for educators and associated youth service personnel. Includes problems of academic achievement, interpersonal relations, and social deviancy in the schools. Prerequisite: EDPSY 532 or equivalent.

EDPSY 535 Education and the Highly Capable Learner (3)  
Examination of major issues and problems in study and nurturance of highly capable children and youth in the educational setting. Emphasis placed on contributions of theory and research to educational problem solving for multiple aspects of advanced human capacity. Prerequisite: EDPSY 501 or equivalent.

EDPSY 536 Learning Variables of Minority Children: Instructional Implications (3)  
Provides students with data base regarding (1) four variables (language/dialect, cognitive style, locus of control, and motivational systems) that affect learning among minority students, and (2) teaching strategies appropriate for these cultural socioeconomic variables. No credit given for students who have completed EDC&I 425.

EDPSY 540 School Psychological Assessment (5)  
Study of assessment of human intelligence with supervised training in the administration, scoring, and interpretation of individual intelligence tests with emphasis on Stanford-Binet and Wechsler scales. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Offered: A.

EDPSY 541 Group Tests in Counseling (5)  
Emphasis on the utilization of objective measures in counseling. Prerequisite: EDPSY 490 or equivalent. Offered: Sp.

EDPSY 542 Career Development (3)  
Emphasis on vocational development theory and research. Psychological, social, and economic determinants of vocational development and choice are examined as a basis for vocational counseling. Prerequisite: graduate standing or permission of instructor.

EDPSY 543 Facilitating Career Development (3)  
Theory and practice in exploring, self-identified strengths, interests, resources, and other considerations when developing career plans. Emphasizes career development in the schools. Offered: Sp.

EDPSY 544 Counseling (5)  
Emphasis on the theory and practice of counseling.

EDPSY 545 Prepracticum (3)  
Competency-based skills training for beginning counseling and school psychology students. Attending, listening, focusing, and intervening behaviors for use with adults and children. Introduction to theories of helping. Prerequisite: enrolled in school counseling or school psychology or permission of instructor. Offered: A.

EDPSY 546 Counseling Practicum (3-5)  
Supervised practice in counseling. Prerequisite: EDPSY 545 or permission of instructor. Offered: WSp.

EDPSY 548 Educational Implications of Personality Theory (5)  
Study of personality development and personality theories with continuous attention to the meaning of these in educational practice, testing, and counseling. Prerequisite: 15 credits of psychology or educational psychology. Offered: A.

EDPSY 549 Seminar in Consultation Methods (3)  
Theory and practice of process consultation in educational settings. Field practice in teams with clients. Offered: W.

EDPSY 550 Family Counseling (3)  
Introduction to family counseling theory and practice, emphasizing family dynamics and communication analysis. Prerequisite: permission of instructor. Offered: W.

EDPSY 551 Group and Behavioral Intervention (3)  
Introduction to competency-based skills for beginning school psychology students. Includes basic processes of group management skills with children including group process in social skills training, problem-solving techniques, behavioral principles, and parent training. Prerequisite: EDPSY 545 or course in counseling techniques or permission of instructor. Offered: Sp.

EDPSY 552 Multicultural Issues in School Counseling and School Psychology (3)  
Examination of multicultural issues as they relate to the delivery of services provided by school counselors and school psychologists. Theoretical and applied aspects emphasized and case study format utilized. Offered: Sp.

EDPSY 555 Seminar in Counseling Specialty (1-2, max. 6)  
Oriented toward the role of a counselor as a professional worker. Credit/no credit only. Offered: Asp.

EDPSY 561 Group Process Laboratory (3)  
Explores the theoretical concepts of group process with a special emphasis in how to conduct group process in school and agency settings. Offered: A.

EDPSY 562 Group Counseling in Schools (3)  
Provides students with the opportunity to co-facilitate groups in elementary, middle, and secondary schools, supplemented by weekly didactic presentations of counseling and guidance models. Prerequisite: EDPSY 561 or permission of instructor. Offered: W.

EDPSY 564 Practicum in School Psychology (1-6, max. 6)  
Practicum in assessment and consultation, emphasizing diagnosis of behavior and learning disabilities, and focusing on techniques acquired in 507 and 540. Offered: W.

EDPSY 566 Case Study Seminar (1-6, max. 6)  
Integrating theoretical concepts with practice/service issues. Cases selected for discussion represent a wide range of problems found in schools. Activities include group supervision and peer review. Offered: AWSp.

EDPSY 568 Seminar in Professional Issues and Ethics (2)  
Professional ethics codes and cases, history of counseling or school psychology, legal problems, credentialing issues, conditions of practice, continuing education, publishing, and presenting research papers. Credit/no credit only. Offered: W.

EDPSY 569 Seminar in Counseling Psychology Research (2)  
Methodological and professional issues related to research in counseling and psychological services. Counseling psychology research literature with focus on content and methods. Prerequisite: EDPSY 591 or equivalent.
EDPSY 570 Introduction to School Psychology (2, max. 4)
Current issues in professional psychology practice and research. Limited to graduate students in school psychology. Offered: A.

EDPSY 572 Social-Emotional Assessment (3)
Techniques in social-emotional assessment of school-aged children. Diagnostic systems including DSM IV presented in conjunction with assessment techniques. Emphasis on integrative method for understanding social emotional assessment batteries and reliability and validity of their test score interpretation. Prerequisite: school psychology or counseling student or permission of instructor. Offered: A.

EDPSY 573 Psychological Assessment of Preschool Children (3)
Students learn to give and interpret tests of intellectual development to assess language, play, and social/emotional functioning, and to write psychological assessment reports for infants, toddlers, and preschoolers. Credit/no credit only. Prerequisite: graduate standing in the school psychology specialization and permission of instructor. Offered: Sp.

EDPSY 575 Structural Equation Modeling (3)
Theory and data analysis using linear structural equation models. Application to data in educational research. Prerequisite: EDPSY 594 or equivalent. Offered: alternate years.

EDPSY 576 Hierarchical Linear Models (3)
Theory and data analysis for research models where random factors are nested, such as multi-level data, growth curve analysis, and meta-analysis. Prerequisite: EDPSY 593 or equivalent. Offered: alternate years.

EDPSY 577 Neuropsychology of School Learning and Behavioral Problems (5)
The microstructure, macrostructure, and structural and functional development of the brain are reviewed with a focus on the educational relevance of developmental neuropsychology. Four areas are covered: Hemispheric differences and integration; neurological soft signs, attention deficit, and hyperactivity; language, reading, and learning disabilities; and medical syndromes. Credit/no credit only. Offered: Sp.

EDPSY 578 Educational Applications of Neuropsychology: Assessment and Intervention (5)
Students observe and administer neuropsychological tests and plan and carry out educational interventions for children with neuropsychological disorders. Content focuses on various neuropsychological disorders for which school psychologists can provide assessment and consultation. Prerequisite: EDPSY 540 or equivalent course in individual testing, and EDPSY 577 or permission of the instructor.

EDPSY 580 Seminar: The Emergence of Educational Psychology (3)
Examination of documents by selected contributors to the field of educational psychology. Special focus on period from mid-nineteenth century to the later twentieth century. Prerequisite: graduate standing.

EDPSY 581 Seminar in Educational Psychology (1-5, max. 15)
Advanced seminar on selected topics in educational psychology. A critical appraisal of current research. Prerequisite: advanced degree work in educational psychology. Offered: AWSp.

EDPSY 582 Seminar in Development and Socialization (3, max. 15)
Advanced seminar on selected topics concerned with human development and socialization processes. Emphasis placed upon empirical research and its theoretical underpinnings in such areas as cognitive development, moral development and education, self-concept development, and related concerns.

EDPSY 583 Seminar in Learning and Thinking (3, max. 15)
Seminar in the psychology of learning language and language learning. Each seminar is offered with predesignated emphasis in one of the following topics: linguistics, phonology, pragmatics, psycholinguistics, semantics.

EDPSY 584 Seminar in Quantitative Methods (3, max. 15)
Seminar on such topics as measurement techniques, research design, psychometrics, and statistics.

EDPSY 585 Qualitative Methods of Educational Research (5-)
Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: second-year doctoral standing and one course in statistics, and permission of instructor. Offered: jointly with EDC&I 578; A.

EDPSY 586 Qualitative Methods of Educational Research (5-)
Survey of various qualitative research methods from a variety of disciplinary perspectives (anthropology, sociology, applied linguistics, cognitive psychology, policy analysis, and evaluation) with intensive experience in collection, analysis, and reporting of data. Prerequisite: EDPSY 586/EDC&I 578; second-year doctoral standing and one course in statistics. Offered: jointly with EDC&I 579; Sp.

EDPSY 588 Survey Research Methodology and Theory (3)
Survey research, research, theory, and methodology. Probability theory, sampling, human subjects considerations, instrumentation, and analysis techniques. Review and critique by students of theoretical issues in survey research and development of a survey instrument. Prerequisite: EDPSY 490 or equivalent. Offered: A.

EDPSY 589 Scholarly Writing in Education and Psychology (3)
Introduction to the demands and expectations for technical writing in education and psychology, including aspects of the culture of scholarship. Designed for competent writers. Does not address basic grammar and composition. Credit/no credit only. Prerequisite: doctoral standing, and permission of instructor.

EDPSY 590 Computer Utilization in Educational Research (3)
Computer utilization in solution of research problems, data reduction to forms amenable to computer solution, appropriate framing of problems for solutions by computer. Using an interactive system, editors, and program packages. Prerequisite: EDPSY 490. Offered: A.

EDPSY 591 Methods of Educational Research (3)
Introduction to educational research. Primary focus on hypothesis development, experimental design, use of controls, data analysis and interpretation. Prerequisite: EDPSY 490. Offered: AWSp.

EDPSY 592 Advanced Educational Measurements (3)
Theory of measurement; an examination of assumptions involved in test theory, errors of measurement, factors affecting reliability and validity, and item analysis and standards for educational and psychological tests. Prerequisite: EDPSY 490. Offered: 5p.

EDPSY 593 Experimental Design and Analysis (5)
Experimental design with emphasis on the analysis of variance. Prerequisite: EDPSY 490 or equivalent. Offered: W.

EDPSY 594 Advanced Correlational Techniques (5)
Multivariate analysis, including regression and multiple correlation; matrix algebra; factor analysis. Prerequisite: EDPSY 490 or
EDPSY 595 Item Response Theory Models of Testing (3)
In depth exploration of IRT models and their roles in the development of large scale educational and psychological tests. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 594.

EDPSY 596 Program Evaluation (3)
Advanced course in evaluation research emphasizing nontraditional designs, especially those that impose severe ecological constraints on the evaluators. Prerequisite: EDPSY 593, EDPSY 594, EDCI 597, or permission of instructor.

EDPSY 597 Technical Requirements of Large Scale Tests (3)
Theoretical and practical understanding of the quantitative aspects of large-scale tests, including; scaling, norms development, and the development of derived and interpretive scores, evidence for validity and reliability. Prerequisite: EDPSY 490 or equivalent, EDPSY 592, EDPSY 595.

EDPSY 599 Independent Studies in Education (*)
Independent studies or readings of specialized aspects of education. Offered: AWSp.

EDPSY 600 Independent Study or Research (*)
Prerequisite: permission of instructor required. Offered: AWSp.

EDPSY 601 Internship (3-10, max. 10)
Offered: AWSp.

Special Education

Course Descriptions

EDSPE 404 Exceptional Children (3) Edgar, Rodríguez
Children with disabilities studied from the point of view of education. Offered: AWS.

EDSPE 414 Introduction to Early Childhood Special Education (3) Schwartz
Provides students with a comprehensive overview of major aspects of the field of early childhood special education. Theoretical foundations and program development and implementation are presented in an approach that integrates theory, research, and practice. Offered: A.

EDSPE 419 Interventions for Families of Children with Disabilities (3) Rodríguez
Upper-division course for professionals and paraprofessionals working with families of children with disabilities. Offered: SpS.

EDSPE 420 Classroom Management of the Physical Problems of Individuals with Severe or Profound Disabilities (3)
Overview of physical management of pupils with severe or profound disabilities in educational settings. Principles of normal motor development, positioning, and handling are applied to the development of classroom strategies. Effects of abnormal motor development on educational programming. Offered: WS.

EDSPE 496 Workshop in Special Education (1-10, max. 15)
Demonstration, observation, and/or participation with groups of disabled children in laboratory or controlled classroom settings. Offered: AWSpS.

EDSPE 499 Undergraduate Research (2-5, max. 5)
Students developing studies under this rubric should be advised that a report or a paper setting forth the results of their investigations should be regarded as a basic part of the program. Offered: AWSpS.

EDSPE 500 Field Study (1-6, max. 6)
Individual study of an educational problem in the field under the direction of a faculty member. Prerequisite: approved plan of study and permission of the instructor. Offered: AWSpS.

EDSPE 502 Collaboration: Working with Parents and Professionals (3) Sandall
Provides students with knowledge and skills for working collaboratively with other professionals, family members, and paraprofessionals. Focus is on the role of the special educator in forming and sustaining school, family, and community partnerships. Offered: W.

EDSPE 504 Special Education and the Law (3) Brown
Overview of major state and federal laws affecting the operation and management of special education programs in public schools. Emphasis on procedural and substantive rights of children with disabling conditions. Offered: jointly with EDLPS 516; W.

EDSPE 505 Curriculum Development of Students with Moderate to Severe Disabilities (3)
Addresses issues and practices in the development of appropriate curricula for students with moderate to severe or profound disabilities. Includes curriculum models, methods for the selection of appropriate skills for inclusion in Individualized Education Plans, and establishing priorities for instruction. Offered: A.

EDSPE 507 Instructional Methods for Students with Moderate to Severe Disabilities (3) Billingsley
Details a systematic instructional process for the education of students with moderate to severe or profound disabilities. Includes instructional methods and materials designed to promote the development of skills that are required in school, home, and community settings, and to reduce challenging behaviors. Offered: A.

EDSPE 510 Behavioral Measurement and Management in the Classroom (3) White
Response measurement in the classroom; use of data analysis for instructional decisions and behavior management for children with disabilities. Offered: A.

EDSPE 511 Methods of Applied Behavior Analysis Research (3) Billingsley, White
Characteristics of applied behavior analysis are presented: direct, daily measurement, and the systematic investigation of important variables. Representative studies from various applied situations are discussed in terms of dependent and independent variables, research design, reliability, validity, and data analysis. Prerequisite: EDSPE 510 or equivalent preparation. Offered: WS.

EDSPE 513 Principles of Clinical Appraisal for Teachers of Exceptional Children (3) Jenkins, Troia
Diagnostic instruments used in the clinical appraisal of exceptional children. Theoretical and measurement considerations are used to buttress practical experiences in appraisal related to eligibility and intervention. Offered: A.

EDSPE 514 Fundamentals of Reading for Children with Disabilities (3) Jenkins
Emphasis on basic prereading and reading skills, such as phonics and structural analysis, specifically for the disabled child. Acquisition of comprehension skills by the disabled. Diagnosis of reading problems, published materials appropriate for children with disabilities, material modification. Offered: WS.

EDSPE 515 Problems and Issues in Special Education (3, max. 9) Edgar
Intensive examination of the issues pertinent to special education, such as legislation, interdisciplinary functions, and the role of special education in general education and placement practices. Offered: Sp.

EDSPE 517 Practicum in Research Design and Analysis in
Special Education (1-4, max. 10)
Critical analysis of current research in special education and related fields serves as background for designing applied research projects. Projects are examined, evaluated, and revised in seminar discussion. Prerequisite: EDPSY 490 and EDSPE 591 or equivalent and permission of instructor. Offered: AWSp.

EDSPE 520 Seminar in Applied Special Education (1-12, max. 12) Jenkins, Rodriguez, Sandall, Schwartz, Troia
Designed for graduate students in special education. Focus on contemporary topics relating to the application of the theoretical constructs to special education. Offered: AWSp.

EDSPE 521 Communication and Language in Young Exceptional Children (3) Schwartz
Review and discussion of theories of language acquisition as they relate to communication and language in young children with special needs. Review of research of language environments that relate to early literacy and education and how to use this information to modify environments for children with special needs. Offered: jointly with EDPSY 519; W.

EDSPE 522 Seminar on the Education of Students with Severe Disabilities (3) White
Advisory seminar arranged to study and discuss the essential components of providing a comprehensive approach to the identification and education of infants, children, adolescents, and young adults with severe disabilities. Offered: Sp.

EDSPE 523 Specific Numeracy Techniques for Elementary Students with Mild Disabilities (3) Neel
Provides the teacher with specific techniques for teaching numeracy to elementary students with mild disabilities in inclusive settings. Prerequisite: EDTEP 522 or equivalent. Offered: SpS.

EDSPE 524 Functional Behavioral Assessment (3) Cheney, Neel, Schwartz
Provides a solid foundation in the theory and practice of functional behavioral assessment (FBA). FBA is a required practice under special education law and considered a best practice for students with challenging behavior. Offered: W.

EDSPE 525 Educating Students with Autism or Severe Behavior Disorders (3) Schwartz
Consideration of the identification, etiology, education, and outcomes of individuals with autism or other severe behavior-disorders. Offered: Sp.

EDSPE 526 Techniques for Instructing Social Behaviors for Elementary Students with Mild Disabilities (3) Cheney, Troia
Provides prospective and practicing teachers with foundational theory and knowledge to select specific techniques to promote social competency in elementary children with mild disabilities. Discusses research related to use of these techniques and interventions. Develops schoolwide, classroom, and individual plans for teaching social skills. Offered: ASpS.

EDSPE 528 Inquiry and Methods in Writing Instruction (3) Troia
Covers methods of assessment and teaching written composition, spelling, and handwriting to children and youth with, and without, disabilities. Particular attention is given to how to establish a strong writing program in elementary classrooms and how to teach writing strategies. Offered: jointly with EDCI 536; Sp.

EDSPE 541 Education of Children with Behavior Disorders (3) Cheney, Neel
Introductory course covering characteristics of and educational practices for children with emotional/behavioral disorders. Reviews theory, definitional issues, models, assessment, and instructional methods for educating children with emotional and behavioral disorders. Students develop a working knowledge of educational approaches for teaching students with emotional/behavioral disabilities. Offered: alternate years; W.

EDSPE 545 Instructional Modifications for the Education of Children with Mild Disabilities (3) Lovitt, Troia
In-depth analysis and application of several modifications of instructional techniques necessary for the education of students with mild disabilities. Offered: WS.

EDSPE 546 Seminar in Educating Children with Behavior Disorders (3, max. 9) Cheney, Neel
Advanced-level seminars focus on contemporary research topics relating to the effective education of children with serious behavior disorders. Students analyze and review research pertinent to the chosen topics and prepare a scholarly manuscript for dissemination. Offered: alternate years; W.

EDSPE 548 Special Topics in the Education of the Learning Disabled (3, max. 12)
In-depth analysis of empirical findings in the specialty of learning disabilities with focus on the synthesis of research findings and their application to the educational environment. A paper suitable for publication required. Prerequisite: course in learning theory, introductory course in learning disabilities, or equivalent prepara-tion.

EDSPE 561 Educational Assessment of Young Children with Special Needs (3) Sandall
Special standardized and educational measurement and evaluation procedures for use with young children with a variety of disabling conditions. Observation, ecological assessment, and programming strategies are discussed in combination with practical application of the skills within an educational framework. Offered: A.

EDSPE 562 Curricula for Preschool Children with Disabilities (3) Sandall
Basic theoretical models and approaches to curricula for preschoolers with disabilities. Promote specific preschool curricula and develop skills to assist students in critiquing and evaluating curricula. How to adapt materials for specific populations and to plan a program for exceptional preschoolers. Offered: Sp.

EDSPE 563 Issues in Working with Families of Young Children with Special Needs (3) Rodriguez
Adjustment of parents to the presence of a young child with disabilities, transactions that occur between parents and their children, procedures that facilitate the child’s development through these interactions, and strategies to promote relationships among families and professionals. Offered: W.

EDSPE 565 Seminar: Early Childhood Education for Children with Disabilities (3, max. 9) Rodriguez, Sandall, Schwartz
Advanced seminar on early childhood education for infants and young children with disabilities. Historical and current research from special education and related fields viewed with regard to their application to the education of young children with disabilities.

EDSPE 566 Current Research in Early Childhood Special Education (2, max. 6)
Introduces students to theory and current research related to early intervention with infants and toddlers and how to evaluate research articles. Selected topics cover typical and atypical development in the areas of cognitive, social communication, and social development, as well as issues in assessment, curricula, and intervention strategies.

EDSPE 599 Independent Studies in Education (*)
Independent studies or readings of specialized aspects of education. Registration must be accompanied by a study prospectus endorsed by the appropriate faculty adviser for the work proposed. Offered:
College of Engineering

Dean
Denice D. Denton
371 Loew

Associate Deans
Mary E. Lidstrom, New Initiatives
Chen-Ching Liu, Organizational Infrastructure

Engineering is the science and art of applying scientific and mathematical principles, experience, judgment, and common sense to design devices and systems that benefit society. Engineers are fascinated by questions of how and why things work. They use their training in mathematics, physics, and chemistry to understand the physical world and develop creative solutions to society's complex needs. Engineers may be designers, planners, managers, analysts, researchers, consultants, sales specialists, and more. Engineering graduates have many career possibilities open to them.

The primary goal of the College of Engineering educational programs is to prepare students for a professional career in engineering by providing the technical foundation required for success in industry, government, or academia. Other goals of the College are to instill within its students the highest ethical standards, the capability for lifelong learning, and a curiosity about the world. Excellence in undergraduate and graduate academic programs remains the College's highest priority.

For undergraduates, the College of Engineering offers a flexible curriculum that not only accommodates varied student needs, both in established departmental programs and interdisciplinary studies, but also culminates in a major and meaningful design experience. (See Interdisciplinary Engineering Studies Program for interdisciplinary undergraduate and graduate programs.)

For graduate students, the College of Engineering offers Master's and Doctoral programs in aeronautics and astronautics, bioengineering, chemical, civil and environmental, computer, electrical, industrial, materials science, mechanical, and technical communication.

The College offers active educational and research programs, both departmental and interdisciplinary, at the graduate levels. (See Interdisciplinary Engineering Studies Program for interdisciplinary undergraduate and graduate programs.)

The College of Engineering has been a major unit of the University since 1899. The first engineering degrees were authorized in mining engineering and metallurgical engineering in 1898. Degrees were added for civil engineering (1901), electrical engineering (1902), mechanical engineering (1906), chemical engineering (1907), ceramic engineering (1919), aeronautical engineering (1929), bioengineering (1983), industrial engineering (1986), and computer engineering (1987). A degree program in technical communication was implemented in 1991. In 2003, 1,669 upper-division undergraduate majors and 1,306 graduate students were enrolled in engineering programs taught by a faculty of 191 members.

College Facilities
Teaching and research activities of the College are conducted in thirteen major campus buildings (and portions of others), which contain the College's offices, classrooms, and research and teaching laboratories. The Engineering Library, a branch of the University Libraries, provides outstanding collections of books, periodicals, technical reports, and patents of interest to engineers. Computers and terminals are available in all departments and through the Student Access and Computing Group (SACG).

Student Organizations and Activities
All of the major professional engineering societies have student chapters on campus, and all engineering students are encouraged to join the chapter that represents their field of interest. The College also has student chapters of the Society of Women Engineers, American Indian Science and Engineering Society, National Society of Black Engineers, the Society of Hispanic Professional Engineers, and the Phi Sigma Rho engineering sorority. Students are encouraged to join the university-wide Science and Engineering Business Association (SEBA).

The honor society open to engineering students is Tau Beta Pi. Students serve with faculty members on engineering policy committees which make recommendations concerning instructor evaluation, curriculum revisions, advising, grading systems, and other matters of interest to students and faculty.

Undergraduate Program
Engineering Adviser
301 Loew, Box 352180
206-543-1770
engradv@engr.washington.edu

The College of Engineering provides curricula that offer a variety of educational experiences to its students. The curricula also facilitate transfer from community colleges and from other four-year colleges and universities.

Engineering Advising and Student Center
301 Loew

Students are encouraged to contact the Engineering Advising and Student Center for program, course, or career information and discussion. The center assists any student interested in planning the initial portion of an engineering degree program, and distributes information about prerequisites for application to all the departments in the College. A student interested in engineering should identify engineering as the intended major while still in the College of Arts and Sciences and seek advice in the center.

For more information, visit the Engineering Advising and Student Center web site.

Financial Aid
The College offers financial assistance to undergraduates through industrial scholarships and loan funds. Scholarship information is available at the College of Engineering Advising and Student Center (301 Loew), and at the Office of Student Financial Aid, 105 Schmitz. Most scholarships are given after a year or more in residence by the student.

Honors Program
301 Loew

The College of Engineering Honors Program offers students of outstanding performance and achievement a course of study designed to provide intellectual challenge in a stimulating learning atmosphere which draws on the resources of a large, diversified university. Students entering the Honors Program become candidates for the degree “With College Honors” or “With Distinction.”
The College Honors Degree

Students who complete this program receive a degree “With College Honors.”

The College honors degree requires that students participate in the University Honors Program while taking engineering prerequisites in the College of Arts and Sciences. When these students are admitted to engineering departments, they may be nominated to enroll in the Engineering Honors Program. Completion of the College Honors degree involves both an honors general-education component and advanced honors work completed after students have been admitted to the College of Engineering.

Admission Requirements: Minimum cumulative GPA of 3.30, minimum departmental GPA, and participation in the University Honors Program as a pre-engineer.

Graduation Requirements: The College honors curriculum consists of two parts: a general-education component and a component in the student’s major department. The general-education component is completed while the student is in the College of Arts and Sciences prior to application to the College of Engineering. Students select three sequences, each three quarters long, from honors A&S courses, the Natural World, and Mathematics (selecting at least one from each).

The second component begins when a student is admitted to an engineering department. Students then select a total of 9 credits of College honors courses with a minimum of 3 credits of departmental 499H Special Projects (or ENGR 499H). The additional honors credits can be fulfilled with either special projects or ad hoc courses.

The Departmental Honors Degree

Students who complete this program receive a degree “With Distinction.”

Admission Requirements: Minimum cumulative GPA of 3.30, minimum departmental GPA (varies from department to department).

Graduation Requirements: Students are nominated for the Departmental Honors Program when they have been in their department for a minimum of one quarter. Students select a total of 9 credits of college honors courses with a minimum of 3 credits of departmental 499H Special Projects (or ENGR 499H). The additional honors credits can be fulfilled with either special projects or ad hoc courses. Departmental honors degrees are offered in the following degree programs: Aeronautics and Astronautics, Bioengineering, Chemical Engineering, Civil and Environmental Engineering, Computer Engineering, Electrical Engineering, Industrial Engineering, Materials Science and Engineering, Mechanical Engineering, Technical Communication, and Paper Science and Engineering. The paper science and engineering major is offered in the College of Forest Resources and is a joint program with the College of Forest Resources and the College of Engineering.

International Study

Given the increased likelihood that engineering students will have overseas work experiences or will do business with international clients and competitors, the College encourages students to study foreign languages in addition to their engineering course work and to take advantage of opportunities for study at foreign universities either at the undergraduate or graduate level. The College has active exchange agreements with approximately thirty-six universities in eighteen countries. Foreign-language courses at the third-quarter level or above (e.g., GERMAN 103) may be applied toward the VPLA general education requirement. Students may contact the Engineering Advising and Student Center, 301 Loew, for information about opportunities for international study. Engineering students can also participate in the Global Engineering Education Program (through the Women in Science and Engineering Program) for opportunities to study abroad, located in 101 Wilson Annex.

Recommended High School Preparation

Substantial high school preparation in mathematics, physical science, and communication is essential for entrance to engineering studies. Required and recommended courses may be determined from the Engineering Advising and Student Center (301 Loew).

Admission

Students who indicate an interest in engineering on their University admission application are assigned pre-engineering status. Students without pre-engineering status who wish to pursue an engineering degree may have their coding changed to pre-engineering upon request at the Engineering Advising and Student Center (301 Loew) or the Undergraduate Advising Gateway Center (171 Mary Gates Hall). As a pre-engineering major, a student takes courses in mathematics, chemistry, physics, English composition, engineering fundamentals, and all other prerequisite courses for admission to the desired engineering department program. In addition, courses in Visual, Literary, & Performing Arts and Individuals & Societies are taken.

Admission requirements vary for departments or programs within the College of Engineering. Some departments or programs offer early admission, either at the point of freshman admission (Early Decision), or after the freshman year is complete and certain minimum course requirements have been met. Early Admission is for Autumn quarter only. For specific, up-to-date information regarding the admission requirements for a department or program, the applicant should contact the Engineering Advising and Student Center (301 Loew) or the undergraduate adviser for the specific department or program of interest. In addition, all departments and programs within the College provide up-to-date course and admission information on the World Wide Web.

For general upper-division admission, students must apply to the engineering department or program after completion of the prerequisite courses for the program. In general, prerequisite courses include one year of calculus, one or two quarters of general chemistry, two to three quarters of physics, English composition, and several engineering fundamentals. The Engineering Advising and Student Center or the individual department or program has a list of specific entrance requirements.

Types of Programs

The College offers three basic programs leading to Bachelor of Science degrees:

Departmental Major: This program leads to a Bachelor of Science degree in a designated field of engineering (e.g., Bachelor of Science in Civil Engineering). It is designed for students who intend to practice as professional engineers in a standard branch of engineering or who plan to undertake graduate study in that field. The curricula for these degrees are accredited by the Accreditation Board for Engineering and Technology (ABET), the principal engineering accrediting agency in the United States. Accreditation requirements stipulate certain course-distribution requirements for the undergraduate degree. A description of how each of the accredited baccalaureate programs meets the ABET requirements is available from the department office and from the College office. Accredited four-year curricula leading to baccalaureate degrees are offered in aeronautics and astronautics, chemical, civil and environmental, computer, electrical, industrial, mechanical, materials science, and paper science and engineering. (The paper science and engineering major is offered in the College of Forest Resources and is a joint program with the College of Forest Resources and the College of Engineering.)

Curricula leading to baccalaureate degrees are offered in bioengineering and technical communication. The bioengineering program is planning to apply for accreditation in 2007.
Application to a department or program at the upper-division level is made at the time lower-division requirements are satisfied. Currently, enrollment limits imposed by faculty size and available laboratory/classroom space are such that entry into a specific department or program may be competitive. In general, a student applicant must demonstrate scholastic aptitude, as evidenced by the attainment of grades averaging a minimum 2.50 or above (depending upon the program) in mathematics, the Natural World, English composition, and other courses. A 2.50 GPA is a minimum only. In reality, the GPA of those offered admission is higher. The student is urged to plan ahead by learning the intended department or program requirements and particularly noting which requirements must be fulfilled by the time application is made.

Nondepartmental Professional Program: This program leads to a Bachelor of Science in Engineering degree and is designed for students who have well-defined, special educational objectives that departmental programs do not satisfy. Graduates can practice as professional engineers in newly developing fields, or they may embark on graduate study in these or allied fields (see Interdisciplinary Engineering Studies Program).

Graduation Requirements
To graduate, students must meet or exceed the requirements of the University, the College, and their particular program or department. College requirements are listed in this section, and program or departmental requirements are given in the specific section that describes that program or department.

All departments of the College have continuation policies that specify a minimum rate of progress as well as minimum academic-performance levels. These policies may be more restrictive than those generally applied by the University and may change with time. Information on current policy is available at the departmental offices.

Selecting courses that fulfill graduation requirements is the responsibility of each student. Students are urged to check carefully the course and credit requirements of the program in which they are enrolled.

Continuation Policy
While the University has general regulations governing scholastic eligibility for continuance, departments and programs in the College of Engineering have adopted additional requirements in order to make the best use of the limited facilities and resources available and to provide reasonable assurance of academic success. The following criteria and procedures are applied to all undergraduate students for determining continuance in the major program.

Full-time students are expected to complete 12 or more credit hours per academic quarter applicable toward the degree program. (An average of 15-16 hours per quarter is required to complete the graduation requirements in 12 quarters.)

Part-time attendance may be allowed. Refer to written departmental guidelines for criteria. Written permission must be obtained from a departmental undergraduate adviser for a student to attend on a part-time basis. Students who have received permission to attend part time must complete at least one course each quarter applicable toward their degree. Application for part-time students should be made prior to the first day of the quarter in which the student wishes to attend part time.

A student who withdraws from the University without prior written approval or is dropped for non-payment of fees must obtain approval of the departmental admissions committee before registering or maintaining pre-registration for the following academic quarter. In such cases the department registration may be disallowed or canceled if the student’s academic record is not competitive with the admission requirements prevailing at the time.

All undergraduate students who have exceeded the graduation requirements of the degree program for which they have been accepted by more than 10 credits are transferred by their department to the College of Arts and Sciences.

Students are required to maintain a grade point average of 2.00 in all departmental and professional program courses. The grade point average is computed by considering all engineering college department courses of 300 level or higher, including repeated courses, but excluding Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) distribution requirements. If the grade point average in these courses does fall below 2.00, a student is placed on departmental probation and must achieve a quarterly average grade point higher than 2.00 the following quarter or be dropped from the department and transferred to the College of Arts and Sciences.

The minimum acceptable grade for any course required for each major is set by the individual department. If a grade received is less than the minimum, a student may repeat the course without loss of course entry priority. Otherwise, the decision to admit a student to a course depends upon space available.

The progress of each student is reviewed each quarter. If a student’s performance fails to meet the standards outlined above, the student is placed on probation the following quarter. The student is notified in writing of the reason for probation and is told what must be done for removal from probation. If the student does not show progress toward removing the deficiencies in the following quarter, the student is notified in writing, dropped from the department, and transferred to the College of Arts and Sciences.

The College recognizes that inequities can result from any continuation policy. If students are placed on probation or dismissed and believe that their record has been misunderstood, they may request reconsideration of the probation or dismissal by writing a letter to the department chairman. The letter should include any additional supporting or relevant material. The letter and the supporting material is transmitted to the department faculty committee. The faculty committee reviews carefully all available information and then decides whether or not academic probation shall be continued for another quarter or whether the dismissal was appropriate and valid. The student appeal must be made within 30 days of the notification of placement on probation or dismissal. The committee responds to the student appeal within 30 days.

General Education Requirements: 85 Credits
The College requires a minimum number of credits within certain areas of study and some specific courses within certain areas. All programs require the following:

- Areas of Knowledge: 49 Credits
  - Visual, Literary, & Performing Arts and Individuals & Societies: 24 credits minimum. Some programs within the College require 30-35 credits. Visual, Literary, & Performing Arts (VLPA) includes courses in literature, art, music, and drama which stress the essential qualities of individual forms of expression. First- and second-quarter language courses may not be counted toward the VLPA requirement. Individuals & Societies includes courses in history, economics, psychology, and sociology which stress the social nature of mankind, and the development and analysis of societies and
Fulfilling a commitment to lifelong learning, the College of Engineering offers courses, workshops, and conferences to respond to the professional development needs of practicing engineers and related technical professionals worldwide. Through Engineering Professional Programs (EPP) and Education at a Distance for Growth and Excellence (EDGE) thousands of practicing engineers update their technical knowledge or pursue advanced degrees each year. For more information, contact Engineering Professional Programs at 206-543-5539, or Education at a Distance for Growth and Excellence at 206-685-2242. Please consult an adviser in the Engineering Advising and Student Center (301 Loew) or the departmental adviser.

**Mathematics:** 18 Credits

Specifically required are MATH 124, MATH 125, MATH 126, and MATH 308. Additional credits may be specified or recommended by the department or program.

**Written and Oral Communication:** 12 Credits

One 5-credit English composition course from the approved University list, T C 231, Introduction to Technical Writing (3 credits), and T C 333, Advanced Technical Writing and Oral Presentations (4 credits, or department-approved alternative).

**Engineering Departmental Course of Study:** 95 Credits

Major departments or specific programs require at least 95 credits in their curricula. These course sequences were developed to culminate in a major, meaningful design experience.

**Special Programs**

Engineering Co-op Program (three to six month internships)

Program Coordinator, Dawn Wiggin

301 Loew, Box 352180

coops@engr.washington.edu

The Co-op Program provides an opportunity for pre-engineering and engineering students to combine practical, full-time, on-the-job engineering experience with full-time academic study. Students typically take a break from their studies for six months to work full-time and return to full-time academic status upon completion of the co-op assignment. In addition, students receive academic credit for the co-op experience. Advantages to participation include assistance in deciding which field of engineering to follow, additional income to help defray college expenses, relevance and motivation for study based on real engineering work, and work experience and employment contacts that may result in regular employment after graduation.

Information may be obtained from the Co-op Program Office, College of Engineering, Box 352180 (301 Loew), or by visiting the Co-op Program Web site.

**Educational Outreach**

Fulfilling a commitment to lifelong learning, the College of Engineering offers courses, workshops, and conferences to respond to the professional development needs of practicing engineers and related technical professionals worldwide. Through Engineering Professional Programs (EPP) and Education at a Distance for Growth and Excellence (EDGE) thousands of practicing engineers update their technical knowledge or pursue advanced degrees each year. For more information, contact Engineering Professional Programs at 206-543-5539, or Education at a Distance for Growth and Excellence at 206-685-2242.

For more information, see the Engineering Professional Programs and Education at a Distance for Growth and Excellence Web sites.

**Special Facilities**

Office of Engineering Research Coordinator, Mary Heusner

372 Loew, Box 352180

The Office of Engineering Research promotes, stimulates, and coordinates research in all fields of engineering. Its primary role is to coordinate interdisciplinary research programs and national research initiatives. The Office of Research also reviews grant and contract proposals, tracks awards, and provides information on funding opportunities. This office allocates limited matching funds to College units to increase the quality of research in the College of Engineering.

The College currently has the following research programs or centers: NSF ADVANCE, Center for Engineering Learning and Teaching (CELT), Center for the Advancement of Engineering Education (CAEE), UW Engineered Biomaterials Research Center (UWEB), Microscale Life Sciences Center (GenOM Project), Center for Nanotechnology, Washington State Transportation Center (TRAC), and the FAA Center of Excellence for Advanced Composites Materials.

For more information, see the Office of Engineering Research Web page.

**Interdisciplinary Engineering Studies Program**

301 Loew

The College of Engineering directly administers nondepartmental undergraduate and graduate degree programs. Some engineering fundamentals and writing courses required for admission to the departments are managed by specific engineering departments.

**Undergraduate Programs**

301 Loew

The Interdisciplinary Engineering Studies (IES) Program is intended for students whose desired course of study does not fall within one of the traditional engineering departments. An interdisciplinary program combines course work from at least one engineering department as well as other department(s) on campus (Engineering or other) to allow students to create a program of study not available through the existing undergraduate degree programs. Although course work may involve departments outside the College of Engineering, the major thrust must be in engineering. The IES Program offers a nonprofessional degree program leading to the Bachelor of Science (B.S.) and a professional degree program for the Bachelor of Science in Engineering (B.S.E.).

Due to the uniqueness of each interdisciplinary student’s program of studies, the B.S. and B.S.E. degrees are not accredited by the Accreditation Board for Engineering and Technology (ABET). The experience requirement to obtain a professional engineering license is two years longer for a B.S.E. graduate, except in surveying, than for a graduate of an accredited program. A B.S. graduate is not eligible for a professional engineering license.

Interdisciplinary students develop personal programs of study approved by a faculty adviser with similar interests. Programs are reviewed and approved by the Interdisciplinary Committee, which oversees all undergraduate interdisciplinary-study programs. Contact the Engineering Advising and Student Center, 206-543-1770, for information on established procedures and applications for entry into the B.S.E. and B.S. programs. Entrance requirements and the continuation policy for participation in these programs are consistent with those of other departments in the College.

**Bachelor of Science in Engineering**

Admission to this program (usually after completion of 90 credits) is competitive with a minimum GPA of 2.80 in technical courses required for entry. A minimum of 75 credits must be completed after entering the program before a B.S.E. degree is awarded. Detailed
information regarding the B.S.E. degree can be obtained from an adviser in the Engineering Advising and Student Center (301 Loew).

**Bachelor of Science**

The nonprofessional Bachelor of Science degree provides greater flexibility than does the Bachelor of Science in Engineering degree. It can be an excellent base for subsequent professional studies in law, medicine, or business. It may also be the primary educational objective in such fields as technical writing, engineering sales, or environmental studies. Detailed requirements are available from the adviser in the Engineering Advising and Student Center (301 Loew).

**Graduate Programs**

The College also offers graduate programs leading to the Master of Science in Engineering and Master of Science degrees, without designation of a specific major. For graduate degrees within specific majors, see the individual departmental listings.

Approved programs lead to the M.S.E. degree in civil, mechanical, electrical, chemical, and interengineering, and approved programs lead to the M.S. degree in civil engineering, interengineering, and materials science and engineering. Admission requires a B.S. degree in engineering, mathematics, or physical science, and evidence of aptitude for graduate study. Submission of scores on the Graduate Record Examination is required.

**Master of Science in Engineering**

The Interengineering Master of Science in Engineering (M.S.E.) and Master of Science (M.S.) program is intended for students whose desired course of study includes two or more engineering departments and may also include study in departments outside the College of Engineering. Applications and files of students entering the M.S./M.S.E. option are handled by the designated department. Admission to the interengineering option requires a statement describing the applicant's objectives. This statement should state why the student wants to enter the M.S./M.S.E. program rather than one of the traditional engineering graduate programs. Applicants to the M.S./M.S.E. program must have well-defined educational objectives which cannot be satisfied by established engineering programs. Graduation and entrance requirements, which differ for the various programs, may be obtained from the Engineering Advising and Student Center, 301 Loew.

**Aeronautics and Astronautics**

206 Guggenheim

Aeronautics and astronautics deals with the design and analysis of air and space vehicles and a broad spectrum of related engineering science, such as aerodynamics, structural mechanics, automatic controls, flight mechanics, space dynamics, propulsion, plasma dynamics, and related topics.

**Undergraduate Program**

Adviser
206 Guggenheim, Box 352400
206-616-1115
ugadvising@aa.washington.edu

The department offers the following programs of study:
- The Bachelor of Science in Aeronautical and Astronautical Engineering degree

**Bachelor of Science in Aeronautical and Astronautical Engineering**

*Suggested First- and Second-Year College Courses:* During the first-year, students should take the required calculus, chemistry, English composition, and computer programming. If possible, begin taking the physics sequence. It is recommended that some VLPA and I&S courses be taken to balance the course load.

**Department Admission Requirements**

Applicants are considered in two groups — Early Admission and Upper-Division Admission. Admission is competitive. Thus, completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department’s admission decision. Applications are accepted for autumn quarter only; application deadline is July 1. Early Admission (Limited number of students admitted through this process)

*Course requirements:* MATH 124, MATH 125, MATH 126; 10 credits of physical science courses plus accompanying laboratory at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142 or above; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.

Applicants must be currently enrolled at the UW and must have a minimum of 15 credits taken in residence at the UW. Early admission students may start the autumn-quarter, junior-year program after meeting the requirements and standards for upper-division admission.

**Upper-Division Admission**

*Course requirements:* MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, PHYS 121, PHYS 122, PHYS 123, CHEM 142, CSE 142, A A 210, M E 230, CHEM E 260, and 5 credits of English composition.

Of the following three courses required for admission, one may be completed the autumn quarter of admission: CEE 220, T C 231, MATH 324. At least 75 credits must be completed, with a minimum overall GPA of 2.50 and a minimum grade of 2.0 in each course required for admission.

**Graduation Requirements**

180 credits as follows:

**General Education Requirements (85 credits)**

*Areas of Knowledge:* 49 credits as follows: Visual, Literary, and Performing Arts (VLPA), and Individuals & Societies (I&S): 24 credits. Natural World: 25 credits, to include CHEM 142 (5), and PHYS 121, PHYS 122, PHYS 123 (15 credits). An additional 5 credits of natural-world courses are required. See department for a list of approved courses.

*Mathematics:* 24 credits to include MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 324 (which must be completed no later than autumn quarter of admission to the department).

*Written and Oral Communications:* 12 credits, to include one 5-credit English composition course from the University list; T C 231, which must be completed no later than the autumn quarter of admission to the department; and T C 333 (or department-approved alternative).

**Major Requirements (95 credits)**

*Mathematics Fundamentals:* 20 credits, to include CSE 142, A A 210, M E 230, and CHEM 260, all of which must be completed prior to admission; CEE 220, which must be completed no later than the autumn quarter of admission to the department (if MATH 324 has been taken prior to autumn quarter).

*Professional Courses:* 74 credits. The department program begins in the autumn quarter of the junior year. Junior-year professional program courses are all required. The senior year consists of A A 409, A A 410-A A 411 or A A 420-A A 421, A A 450, A A 498, and 15 credits of senior technical electives. With approval, 3 credits of the latter may be chosen from
another area of engineering.

Electives: 1 credit of free electives, which may be used to meet the 180 credits required for graduation.

Student Outcomes and Opportunities

• Learning Objectives and Expected Outcomes: The goals and objectives of the undergraduate program are to provide a challenging and comprehensive education, to develop necessary functional skills and an understanding of the societal context in which engineering is practiced, to provide a solid foundation in the engineering sciences related to aerospace engineering, to provide a strong systems perspective, to develop engineering creativity through design experience, and to prepare graduates to succeed in engineering careers and lifelong learning. Graduates of aeronautics and astronauts are skilled in engineering fundamentals, engineering design, laboratory skills, synthesis of various engineering disciplines, and working in a team environment. Graduates are highly regarded by employers in aeronautics, astronauts, energy systems, and related fields. They develop interpersonal skills and a desire for life-long learning that helps them succeed in their chosen careers. Graduates have been successful and valued at local, national, and international industries, as well as at government organizations and institutions of higher learning.

• Instructional and Research Facilities: Visit the department Web page to view current research activities. Undergraduates are encouraged to participate in research activities.

• Honors Options Available: With College Honors. With Distinction. See adviser for details.

• Research, Internships, and Service Learning: Internships are arranged individually. See adviser for details.

• Department Scholarships: Scholarships are limited and are usually reserved for students who have junior and senior standing in the department. Deadline for scholarship applications is April 1.

• Student Organizations/Associations: American Institute of Aeronautics and Astronautics (AIAA) student chapter. Sigma Gamma Tau

Graduate Program

Graduate Program Coordinator
206 Guggenheim, Box 352400
206-616-1113
gradadvising@aa.washington.edu

The Department of Aeronautics and Astronautics offers programs that provide a foundation in the aerospace engineering sciences and expertise in various specialized application areas. Three graduate degree options are offered: Master of Science in Aeronautics and Astronautics, Master of Aerospace Engineering, and Doctor of Philosophy.

Master of Science in Aeronautics and Astronautics (M.S.A.A.)

The M.S.A.A. is a traditional research-oriented master’s degree program intended for students who are interested in research and development careers in industry or government, or who plan to continue graduate studies toward a Ph.D.

The M.S.A.A. program of study is tailored to the needs and interests of the student. Each program must be approved by the department graduate committee and must provide breadth through a variety of subjects, depth through extensive study of a specialized field, and analytical strength. Minimum programs consist of either 13 courses, or 10 courses and a 9-credit thesis.

Master of Aerospace Engineering (M.A.E.)

The M.A.E. program is intended for recent graduates or engineers who wish to expand their knowledge in multidisciplinary areas while also learning other aspects of aerospace engineering, such as business, management, manufacturing, or technical communication. The student must complete a minimum of 37 credits of course work and 8 credits of independent or team project work in a program approved by the department graduate committee. The Master of Aerospace Engineering (M.A.E.) program is structured to permit completion of the degree requirements as a full-time or part-time student. The M.A.E. is a terminal degree and is not intended for those seeking a Ph.D.

Doctor of Philosophy (Ph.D.)

The doctoral program consists of lectures, seminars, discussions, and independent study, enabling the student to master and to make original contributions to a particular field. In addition to the formal steps for obtaining the degree listed in the Graduate School section of this catalog, the student must complete an approved program of study consisting of 30 credits of course work beyond that required for the Master of Science in Aeronautics and Astronautics.

Research Activities

Research facilities include the Kirsten 8 x 12-foot low-speed wind tunnel, a 3 x 3-foot low speed wind tunnel, two water tunnels, a small supersonic draw-down tunnel, a hypervelocity projectile accelerator (ram accelerator), material and structural test machines, a composite-material laboratory, an unmanned aerial vehicle (UAV) laboratory, an underwater vehicle laboratory, a guidance and controls laboratory, a distributed space systems laboratory, various plasma and fusion-research and engineering physics laboratories, a combustion laboratory and a Mars environmental simulation facility. A variety of computer facilities is available, including a 17-computer parallel cluster for computational fluid dynamics research. The Aerospace and Energetics Research Program, which conducts interdisciplinary research in the Aerospace and Engineering Research Building, is also part of the Department of Aeronautics and Astronautics.

Externally funded research is carried out by faculty members and students on such topics as buoyant flows, flow separation control, combustor mixing, shear layers, computational fluid dynamics, internal flows, reacting flows, ram accelerators, space energy systems, space system design, control system design and engineering, robust and optimal control, wing optimization, impact mechanics, composite material structure and fracture, plasma dynamics, space propulsion, and fusion research.

Special Facilities/Programs

Aerospace and Energetics Research Program (AERP)

120 Aerospace and Engineering Research Building
The Aerospace and Energetics Research Program is directed toward high-technology engineering research and teaching through research. The program anticipates and tries to outpace the nation’s critical technology needs. It therefore emphasizes those engineering skills that both match the requirements of the present and future, and develop in students a broad understanding of the impact of technology on society. Suitable programs are designed to develop the student’s imagination and a willingness to respond to the complex and rapidly changing future of engineering. This directs the faculty’s efforts and creates within the principal investigators, research faculty, and students the concept of engineering as an adventure.

The program covers many fields, usually centered on energy or aerospace systems. Currently the program is active in plasma engineering related to fusion power and space propulsion, ram accelerators for direct space launch, and research on new terrestrial energy conversion and vehicle propulsion technologies.
University of Washington Aeronautical Laboratory (UWAL)

Kirsten Aeronautical Laboratory
The primary facility that UWAL operates is the Kirsten Wind Tunnel, a subsonic, closed-circuit, double-return tunnel with an 8x12-foot test section. Undergraduate students, usually from the Department of Aeronautics and Astronautics, are employed at UWAL to run tests for University research, commercial customers, and for instructional uses, such as student projects. UWAL provides departmental support for research projects such as the unmanned aerial vehicle (UAV) project.

Admission
Students who have earned a baccalaureate degree in an accredited program of aeronautics and astronautics or closely related field are eligible for the M.S.A.A. and M.A.E. programs. Backgrounds in related fields require review on a case-by-case basis and may require preparatory courses, depending on the student’s educational objectives and previous studies. Admission is competitive, with the equivalent of a 3.00 GPA a minimum standard. Submission of verbal, quantitative, and analytical scores on the Graduate Record Examination is required. Entrance requirement details, application deadlines, application forms, and advising literature may be obtained from the department office or the department’s Web page.

Admission to the Doctor of Philosophy program requires a master’s degree, preferably in aerospace or mechanical engineering, with a minimum GPA of 3.35 and satisfactory performance on a departmental qualifying examination.

Additional Information
Students who intend to work toward advanced degrees must apply for admission to the Graduate School. Most students are financially supported by the department as teaching or research assistants, or by their employers. For further information on this or other aspects of department programs, contact the Graduate Program Coordinator, 206 Guggenheim, Box 352400, or visit the department’s Web site.

Course Descriptions

A A 101 Air and Space Vehicles (5) NW
Introduction to aircraft and spacecraft; how airplanes fly, how airplanes and rockets are made, how they are controlled, and how space missions are designed. Laboratory and computer simulations used as illustrations. Emphasis on conceptual, rather than mathematical, comprehension. Not recommended for upper-division students in physical sciences and engineering. Offered: AWSp.

A A 210 Engineering Statics (4) NW
Vector analysis applied to equilibrium of rigid body systems and subsystems. Force and moment resultants, free body diagrams, internal forces, and friction. Analysis of basic structural and machine systems and components. Prerequisite: either MATH 126, MATH 129, or MATH 136; PHYS 121; recommended: graphics background. Offered: AWSp.

A A 280 Introduction to System Engineering (4)
Concepts of system approach, system hierarchies, functional analysis, requirements, trade studies, and other concepts used to define and integrate complex engineering systems. Prerequisite: CSE 142. Offered: jointly with IND E 280.

A A 301 Compressible Aerodynamics (4)
Aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere. Kinematics and dynamics of flow fields. Thin airfoil theory; finite wing theory. Compressible fluids; one-dimensional compressible flow; two-dimensional supersonic flow. Prerequisite: CHEM E 260. Offered: W.

A A 302 Incompressible Aerodynamics (4)
Aerodynamics as applied to the problems of performance of flight vehicles in the atmosphere. Kinematics and dynamics of flow fields; incompressible flow about bodies. Thin airfoil theory; finite wing theory. Prerequisite: PHYS 123; either AMATH 351, MATH 136, or MATH 307. Offered: Sp.

A A 308 Computer Tools I for Aerospace Engineers (1)
Numerical solutions of mathematical problems in aerodynamics (A A 301), structural analysis (A A 331), and vibrations (A A 312), using MATLAB for numerical integration, matrix algebra, ordinary differential equations, transform methods, and 2D/3D graphs of solutions. Credit/no credit only. Offered: W.

A A 309 Computer Tools for Aerospace Engineers II (1)
Embedded programming in spreadsheets. Using symbolic math software to find polynomial properties, to perform matrix operations, and to solve equations. Numerical and symbolic differentiation and integration. Computer data acquisition. Credit/no credit only. Offered: Sp.

A A 310 Orbital and Space Flight Mechanics (4)

A A 311 Atmospheric Flight Mechanics (4)
Applied Aerodynamics, aircraft flight “envelope,” minimum and maximum speeds, climb and glide performance. Range and endurance, take-off and landing performance, using both jet and propeller power plants. Longitudinal and dynamic stability and control, wing downwash, stabilizer and elevator effectiveness, power effects. Lateral and directional stability and control. Offered: A.

A A 312 Structural Vibrations (4)

A A 320 Aerospace Instrumentation (3)
Hands-on laboratory experience in aerospace instrumentation. Students build sensors, power supplies, and circuits. Application of signal conditioning to wind tunnel data. Digital systems, A/D conversion, D/A conversion, and actuator control. Introduction to instrumentation requirements for space vehicles. Offered: A.

A A 321 Aerospace Laboratory I (3)
The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on supersonic flow, structures, vibrations, material properties, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Offered: W.

A A 322 Aerospace Laboratory II (3)
The design and conduct of experimental inquiry in the field of aeronautics and astronautics. Laboratory experiments on subsonic aerodynamics, supersonic flow, structures, propulsion, and other topics. Theory, calibration, and use of instruments, measurement techniques, analysis of data, report writing. Offered: Sp.

A A 331 Aerospace Structures I (4)
Analysis and design of aerospace structures. Review of concepts of stress, deformation, strain, and displacement and of the equations of elasticity. Applications to aerospace structural elements, including beams, torsion, plane stress and strain, thin walled structures, plates, buckling: energy principles: introduction to finite element analysis. Fatigue, yielding, and fracture. Prerequisite: CEE 220. Offered: W.
A A 332 Aerospace Structures II (4)

A A 360 Propulsion (4)

A A 400 Gas Dynamics (3)
Introduction to kinetic theory and free molecule flow. Review of thermodynamics. One-dimensional gas dynamics: one-dimensional wave motion, combustion waves. Ideal and real gas application. Prerequisite: PHYS 123; CHEM E 260. Offered: W.

A A 402 Fluid Mechanics (3)
Inviscid equations of motion, incompressible potential flows, small perturbation flows, bodies of revolution, viscous equations, exact solutions, laminar boundary-layer equations, similar solutions, integral methods. Compressibility, instability, turbulent boundary layers. Prerequisite: MATH 324; A A 301. Offered: Sp.

A A 405 Introduction to Aerospace Plasmas (3)
Development of introductory electromagnetic theory including Lorentz force and Maxwell’s equations. Plasma description. Single particle motions and drifts in magnetic and electric fields. Derivation of plasma fluid model. Introduction to plasma waves. Applications to electric propulsion, magnetic confinement, and plasmas in space and Earth’s outer atmosphere. Prerequisite: PHYS 123; MATH 324. Offered: A.

A A 406 Gas Discharges for Plasma Processing and Other Applications (3)
Lectures and demonstrations on direct-current and radio-frequency electrical discharges for sputtering, plasma etching and other plasma processing applications. Prerequisite: either MATH 136 or MATH 307; PHYS 122.

A A 409 Computer Tools for Aerospace III (2)
Computer-aided drawing basics, three-dimensional drawing, projections, views. Computer-aided design and analysis tools for stress and heat transfer calculations. Offered: A.

A A 410 Aircraft Design I (4-)
Conceptual design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Offered: W.

A A 411 Aircraft Design II (4-)
Preliminary design of a modern airplane to satisfy a given set of requirements. Estimation of size, selection of configuration, weight and balance, and performance. Satisfaction of stability, control, and handling qualities requirements. Prerequisite: A A 410. Offered: Sp.

A A 419 Aerospace Heat Transfer (3)
Fundamentals of conductive, convective, and radiative heat transfer with emphasis on applications to atmospheric and space flight. Prerequisite: PHYS 123; MATH 307. Offered: W.

A A 420 Spacecraft and Space Systems Design I (4-)
Design of space systems and spacecraft for advanced near-Earth and interplanetary missions. Astrodynamics, space environment, space systems engineering. Mission design and analysis, space vehicle propulsion, flight mechanics, atmospheric entry, aerobraking, configuration, structural design, power systems. thermal management, systems integration. Oral presentations and report writing. Design topics vary. Offered: W.

A A 421 Spacecraft and Space System Design II (4)
A continuation of 420. Course content varies from year to year and is dependent on the design topic chosen for 420. Prerequisite: A A 420. Offered: Sp.

A A 430 Finite Element Structural Analysis (3)
Introduction to the finite element method and application. One-, two-, and three-dimensional problems including trusses, beams, box beams, plane stress and plane strain analysis, and heat transfer. Use of finite element software. Prerequisite: CEE 220. Offered: A.

A A 432 Composite Materials for Aerospace Structures (3)
Introduction to analysis and design of aerospace structures utilizing filamentary composite materials. Basic elastic properties and constitutive relations of composite laminates. Failure criteria, buckling analysis, durability, and damage tolerance of composite structures. Aerospace structure design philosophy and practices. Prerequisite: A A 332. Offered: W.

A A 441 Flight Test Engineering (3)
Determination in flight of performance, stability, and control characteristics of aircraft; and comparison with predicted and wind tunnel results. Prerequisite: A A 311. Offered: Sp.

A A 447 Control in Aerospace Systems (4)

A A 448 Control Systems Sensors and Actuators (3)
Study of control systems components and mathematical models. Amplifiers, DC servomotors, reaction mass actuators. Accelerometers, potentiometers, shaft encoders and resolvers, proximity sensors, force transducers, piezoceramic materials, gyroscopes. Experimental determination of component models and model parameters. Two 3-hour laboratories per week. Prerequisite: either A A 447 or E E 447. Offered: jointly with E E 448.

A A 449 Design of Automatic Control Systems (4)
Design problems for aerospace vehicles, systems with unstable dynamics, lightly damped modes, nonminimum phase, nonlinear dynamics. Computer-aided analysis, design, and simulation, with laboratory hardware-in-the-loop testing. Team design reviews, oral presentations. Prerequisite: either A A 448 or E E 448. Offered: jointly with E E 449.

A A 461 Advanced Propulsion (3)

A A 480 Systems Dynamics (3)
Equations of motion and solutions for selected dynamic problems; natural frequencies and mode shapes; response of simple systems to applied loads. Prerequisite: A A 312. Offered: Sp.

A A 497 Aerospace Industry Tour (1, max. 2)
Tours to local aerospace facilities to see how aerospace vehicles and systems are built, designed, and tested. Credit/no credit only. Offered: W.

A A 498 Special Topics in Aeronautics and Astronautics (0-1,
Lectures and discussions on topics of current interest in aviation and space engineering. Three quarters required for credit. Offered: AWSp.

A A 499 Special Projects (1-5, max. 10)
Investigation on a special project by the student under the supervision of a faculty member. A maximum of 6 credits may be applied toward senior technical electives. Offered: AWSpS.

A A 501 Physical Gasdynamics I (3)
Equilibrium kinetic theory; chemical thermodynamics; thermodynamic properties derived from quantum statistical mechanics; reacting gas mixtures; applications to real gas flows and gas dynamics. Offered: odd years; A.

A A 502 Physical Gasdynamics II (3)
Introduction to vibrational relaxation and nonequilibrium chemistry. Nonequilibrium physics applied to flow. Brief introduction to nonequilibrium kinetic theory. Application to a variety of research and development areas such as high-temperature energy systems and gas lasers. Prerequisite: A A 501 or permission of instructor. Offered: even years; W.

A A 503 Kinetic Theory/Radiative Transfer (3)
Boltzmann and Collisionless Boltzmann (Vlasov) equations. Instabilities in homogeneous and inhomogeneous plasma, quasi-linear diffusion, wave-particle interaction, collisional (Fokker-Plank) equation. Introduction to radiative non-equilibrium, scattering and absorption processes. Integral equation of radiative transfer. Prerequisite: A A 501 or permission of instructor. Offered: even years; Sp.

A A 504 Fluid Mechanics (3)

A A 505 Fluid Mechanics of Inviscid Flow I (3)
Ideal incompressible flow; potential and stream functions. Airfoil theory and lifting line theory. Introduction to nonsteady flow; sound waves and surface waves; special topics. Offered: even years; W.

A A 506 Fluid Mechanics of Inviscid Flow II (3)
Ideal compressible flow; supersonic airfoils; shock waves; slender-body theory; lifting surface theory; approximate methods. Transonic flow; similarity; special topics. Prerequisite: A A 505. Offered: even years; Sp.

A A 507 Aerodynamics of Viscous Fluids I (3)
Introduction to viscous flow; exact solutions of the laminar equations of motion; approximate equations. Exact solutions for laminar boundary-layer equations. Approximate methods for compressible laminar boundary layers. Offered: odd years; W.

A A 508 Aerodynamics of Viscous Fluids II (3)
The phenomena of turbulence; transition prediction; Reynolds stresses; turbulent boundary-layer equations. Approximate methods for turbulent boundary layers. Prerequisite: A A 507 or permission of instructor. Offered: odd years; Sp.

A A 510 Mathematical Foundations of Systems Theory (4)
Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with CHEM E 510/E E 510/M E 510; A.

A A 513 Gas Laser Theory and Practice (3)
Physics and fluid mechanics of gas lasers, with emphasis on performance of gas dynamic lasers, flowing chemical lasers, and gaseous electric lasers. Development of laser optics, interaction of radiation and matter, laser oscillation conditions, and methods of obtaining population inversions. Applications of high-power lasers emphasized. Offered: even years; Sp.

A A 516 Stability and Control of Flight Vehicles (3)

A A 518 Automatic Control of Flight Vehicles (3)
Specifications of flight vehicle performance. Synthesis of stability augmentation systems and autopilot control laws in the frequency-domain and using multivariable control methods. Reduced-order controller synthesis, digital design, and implementation. Use of computer-aided control design packages. Prerequisite: A A 516 and A A 548. Offered: odd years; Sp.

A A 520 Seminar (1-, max. 10)
Topics of current interest in aerospace engineering. Credit/no credit only. Prerequisite: A A major. Offered: AWSp.

A A 523 Special Topics in Fluid Physics (3)
Offered: AWSp.

A A 524 Aircraft Engine Noise (3)
Description and measurement of noise, power spectra. Elementary duct acoustics, rotor-stator interaction, effect of design blade loading. Turbine noise, core noise, acoustic linings. Jet noise, Lighthill theory, scaling laws. Offered: odd years; A.

A A 525 Aerothermodynamics of Aircraft Engines Components (3)
Estimation of component performances. Inlets and nozzles. Aerodynamics of turbines and compressors. Radial equilibrium theory, through-flow theory. Offered: even years; W.

A A 526 Aerothermodynamics of Aircraft Engine Systems (3)

A A 527 Energy Conversion I (3)
Energy generation by combustion, solar collection. Analysis of power systems for space and advanced commercial power generation. High-temperature cycles. Offered: even years; A.

A A 528 Energy Conversion II (3)
Heat exchangers, energy storage. Direct conversion of heat to electricity. Electrochemical processes. Recommended: A A 527. Offered: odd years; W.

A A 529 Space Propulsion (3)
Nucleons, and heat transfer of nuclear-heated rockets. Electrothermal, electromagnetic, and electrostatic thrusters. Power propulsion systems. Prerequisite: permission. Offered: odd years; Sp.

A A 530 Mechanics of Solids (3)
A A 531 Structural Reliability and Damage (3)
Theory of plasticity, yield surfaces, flow rules, limit theorems. Concepts of failure and fatigue in aerospace structures, residual strength, cumulative damage, probability aspects and case histories. Prerequisite: A A 530 or equivalent or permission of instructor. Offered: odd years; W.

A A 532 Mechanics of Composite Materials (3)
Analysis and design of composite materials for aerospace structures. Micromechanics. Anisotropic elasticity. Laminated plate theory. Thermo-viscoelastic behavior and fracture of composites. Prerequisite: A A 530 or permission of instructor. Offered: odd years; Sp.

A A 535 Analysis of Shells I (3)
General development of the geometrically non-linear theory of thin elastic shells. Topics include an introduction to tensor analysis with applications to curved two dimensional spaces, theory of surfaces, Kirchhoff approximations, membrane theory and non-linear shallow shells. Offered: even years; Sp.

A A 540 Finite Element Analysis I (3)
Formulation of the finite element method using variational and weighted residual methods. Element types and interpolation functions. Application to elasticity problems, thermal conduction, and other problems of engineering and physics. Offered: W.

A A 541 Finite Element Analysis II (3)

A A 543 Computational Fluid Dynamics I (3)

A A 544 Computational Fluid Dynamics II (3)
Numerical approximation of equations of compressible viscous flow. Mesh requirements for resolving viscous effects in high Reynolds number flows. Analysis of numerical accuracy, stability, and efficiency. Use of explicit and implicit methods, boundary condition procedures. Applications to solution of the Navier-Stokes equations. Prerequisite: A A 543 or permission of instructor. Offered: odd years; Sp.

A A 547 Linear Systems Theory (4)
Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Prerequisite: either AA 447, EE 447 or ME 477. Offered: jointly with EE 547/M E 547; A

A A 548 Linear Multivariable Control (3)
Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: AA 547/EE 547/ME 547. Offered: jointly with M E 548/E E 548.

A A 549 Estimation and System Identification (3)

A A 550 Nonlinear Optimal Control (3)
Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisite: graduate standing; recommended: A A 548, E E 548, or M E 548. Offered: jointly with E E 550/M E 550; odd years; A.

A A 553 Vibrations of Aerospace Systems (3)
Continuous and discrete systems, natural frequencies, and modal analysis; forced vibrations and motion-dependent forces. Structural damping; control augmented structures. Measurements for structural dynamic testing. Prerequisite: A A 571 or equivalent. Offered: odd years; Sp.

A A 554 Aeroelasticity (3)
Static and dynamic aeroelasticity, unsteady aerodynamics, aeroelasticity, and active control. Offered: even years; Sp.

A A 556 Space and Laboratory Plasma Physics (3)
Discussion of waves, equilibrium and stability, diffusion and resistivity, basic plasma kinetic theory, and wave-particle interactions. Prerequisite: either A A 405, ESS 515, or GPHYS 505, or permission of instructor. Offered: jointly with ESS 576; Sp.

A A 557 Physics of Fusion Plasmas (3)
Review and comparison of single particle and fluid descriptions of plasmas. MDH equilibrium, flux surfaces, and basic toroidal description. Collisional processes including physical and velocity space diffusion. Introduction to island formation, stochasticity, and various plasma instabilities. Prerequisite: A A 405 or GPHYS 505. Offered: even years; W

A A 558 Plasma Theory (3)
Equilibrium, stability, and confinement. Classical transport, collisionless and resistive skin depths. Ideal MHD equations formally derived and properties of plasmas in the ideal limit are studied. Straight and toroidal equilibrium. Linear stability analysis with examples. Taylor minimum energy principle. Prerequisite: either A A 405, A A 556, A A 557, ESS 576, or GPHYS 537. Offered: even years; Sp.

A A 559 Plasma Science Seminar (1, max. 10)
Current topics in plasma science and controlled fusion with presentations by invited speakers, on-campus speakers, and students. Students expected to give a seminar once or twice a year with instructor reviewing the method of presentation and material used for the presentation. Credit/no credit only. Offered: AWSp.

A A 565 Fusion Reactor Fundamentals (3)
Introduction to basic engineering features of fusion power plants. Brief description of basic fusion physics and discussion of power plants for leading thermonuclear concepts. Engineering problems; blanket, shield neutronics; materials, thermal hydraulics; tritium, superconducting systems. Prerequisite: completion of or concurrent enrollment in A A 405 or permission of instructor. Offered: odd years; W.

A A 571 Principles of Dynamics I (3)
Systems of particles, rotating axes, rigid-body dynamics; calculus of variations. Lagrangian mechanics. Hamilton’s principle. Kane’s
equations. Periodic and quasiperiodic motion. Stability of dynamical systems. Offered: A.

A A 575 Continuum Mechanics (3)
General foundations of the fundamental concepts of motion, stress, energy, and electromagnetism for a continuum. General equations of conservation of mass, momentum, and energy. Linear and nonlinear elastic, viscous, and inelastic materials. Offered: jointly with CEE 508; even years; W.

A A 578 Optimization in System Sciences (3) Mesbahi
Covers convex sets, separation theorems, theorem of alternatives and their applications, convex analysis, convex functions, conjugation, subgradients, convex optimization, duality and applications, linear and semi-definite programming. Linear matrix inequalities, optimization algorithms, applications in system theory and control, bilinear, rank minimization, optimization software. Recommended: AA/ME/EE 547. Offered: jointly with EE/ME 578; W.

A A 581 Digital Control (3) Chizeck
Sampled-data systems, and z-transform. Frequency domain properties. Sampling D/A and A/D conversion. Controller design via discrete-time equivalents, direct methods, state methods, and observers. Quantization effects. LQR control and introduction to LQG optimal control. Prerequisite: either E E/A A/ or M E 548. Offered: jointly with E E/M E 581; W.

A A 582 Introduction to Discrete Event Systems (3) Berg

A A 583 Nonlinear Control Systems (3)
Analysis of nonlinear systems and nonlinear control system design. Phase plane analysis. Lyapunov stability analysis. Describing functions. Feedback linearization. Introduction to variable structure control. Prerequisite: A A/E E 447/M E 471. Offered: jointly with E E/M E 583; odd years; SP.

A A 585 System Identification and Adaptive Control (3)

A A 589 Special Topics in Solid Mechanics (3)
Offered: AWSp.

A A 590 Special Topics in Applied Analysis (3)
Offered: AWSp.

A A 591 Robotics and Control Systems Colloquium (1, max. 3)
Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with CHEM E/E E/M E 591; AWSp.

A A 593 Feedforward Control (3) Devasia
Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: ME 547. Offered: jointly with E E/ M E 593.

A A 594 Robust Control (3)
Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with E E/M E 594; odd years; W.

A A 597 Aerospace Industry Tour (1, max. 2)
Tours to local aerospace facilities to see how aerospace vehicles and systems are built, designed, and tested. Credit/no credit only. Offered: W.

A A 599 Special Projects (1-5, max. 15)
Investigation on a special project by the student under the supervision of a faculty member. Offered: AWSpS.

A A 600 Independent Study or Research (*)
Offered: AWSpS.

A A 700 Master’s Thesis (*)
Offered: AWSpS.

A A 800 Doctoral Dissertation (*)
Offered: AWSpS.

Bioengineering

309 Harris Hydraulics Laboratory
Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the health care system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as one of the finest bioengineering programs in the world. Major areas of research and education include distributed diagnosis and home healthcare (di2h2), molecular bioengineering and nanotechnology, engineered biomaterials and tissue engineering, medical imaging and image-guided therapy, and computational bioengineering.

Undergraduate Program

Adviser
309B Harris Hydraulics Lab, Box 357962
206-685-2000
bioeng@u.washington.edu

The Bioengineering Program offers the following programs of study:
- The Bachelor of Science in Bioengineering degree

The Bachelor of Science in Bioengineering bridges the gap between the engineering and biological sciences. Advanced interdisciplinary coursework builds upon a solid foundation of mathematics, computing, engineering, and physical and biological sciences. Students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department’s cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department’s goal is to prepare students to be leaders and innovators in improving human health and health care.
Bachelor of Science in Bioengineering

Suggested First- and Second-Year College Courses: CHEM 142, CHEM 152, CHEM 162, CSE 142, English Composition, MATH 124, MATH 125, MATH 126, PHYS 121.

Department Admission Requirements

Because resources are limited, students must apply for admission to the Bioengineering program. Students may be admitted at three different points. Please consult the department’s Web page for more information.

Direct Admission. The department enrolls up to 25 percent of its incoming class directly from high school. Students who are accepted to the University and who indicate Bioengineering as their preferred major on their freshman application are considered for admission. Strong applicants will have completed chemistry, biology, and calculus in high school. Admission is for Autumn quarter only.

Early Admission. Students who are enrolled at the University are eligible to apply at the end of the freshman year if they have completed and earned at least a 2.50 GPA in the following courses: MATH 124, MATH 125, MATH 126, CHEM 142, CHEM 152, CHEM 162, and 5 credits of English composition. A 2.50 GPA guarantees consideration but does not guarantee admission. The application deadline is July 1 for autumn quarter admission.

Upper Admission. Upper admission requires 64 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; PHYS 121, PHYS 122, PHYS 123; BIOL 180, BIOL 200; CSE 142; E E 215; and 5 credits of English composition. A 2.50 GPA guarantees consideration but does not guarantee admission. Application deadlines for upper admission are February 1 for spring quarter and July 1 for autumn quarter. Upper admission applicants should note that the Bioengineering major course sequence begins only in spring quarter; thus, whether applying in February or July, students should enroll in BIOEN 301 for spring. E E 215 is a prerequisite for BIOEN 301. Consult the department’s Web page or academic counselor for more details.

Graduation Requirements

Graduation requirements are subject to change. Current requirements are found on the departmental Web page. Students follow the requirements that are in effect at time of entry into the department. 180 credits as follows:

General Education Requirements (105 credits):

Areas of Knowledge: 24 total credits in Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S), with at least 10 credits in each area.

Written and Oral Communication (8 credits): 5 credits of English composition, from the approved University list; T C 231. Additional writing credits are built into the major core courses.

Mathematics (25 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; STAT 390.

Natural Science (48 credits): CHEM 142, CHEM 152, CHEM 162, and CHEM 223 or CHEM 237; PHYS 121, PHYS 122, PHYS 123; BIOL 180, BIOL 200; BIO 405.

Major Requirements (75 credits):

Engineering Fundamentals (17 credits): CHEM E 260; CSE 142, CSE 143; E E 215.

Bioengineering Core (36 credits): BIOEN 301, BIOEN 302, BIOEN 303, BIOEN 304, BIOEN 305, BIOEN 357; 12 credits of BIOEN 480.

Bioengineering Senior Electives (12 credits): Twelve credits chosen from BIOEN 420, BIOEN 436, BIOEN 440, BIOEN 455, BIOEN 457, BIOEN 470, BIOEN 485, BIOEN 490, BIOEN 491, BIOEN 492.

Approved Electives (10 credits): 10 additional credits chosen from an approved list of math, science, and engineering courses (see the department’s Web page for further information), or from the Bioengineering senior elective list.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.

- Instructional and Research Facilities: The department maintains a general computing lab for bioengineering student use as well as an advanced computing lab for class instruction and student use. Offices and laboratories are located in the College of Engineering and the School of Medicine. Construction is underway on a new bioengineering building, which will offer expanded instructional laboratories, a student workroom, a seminar room, and other amenities. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in Computational Bioengineering, Distributed Diagnosis and Home Healthcare, Engineered Biomaterials, Medical Imaging and Image-guided Therapy, and Molecular Bioengineering and Nanotechnology.

- Research, Internships, and Service Learning: Many undergraduate bioengineers are involved in internships. The department participates in the College of Engineering Co-op Program and maintains an internship website for majors. Most summers the department sponsors one or more internships available to the general campus community.

- Department Scholarships: Several scholarships are available for majors.

- Student Organizations/Associations: The Undergraduate BioEngineering Society (UBES) organizes social events as well as events that support student interest in medical school, graduate school, and industry.

Of Special Note: Courses on technology commercialization are available to seniors.

Graduate Program

Graduate Program Coordinator
Box 357962
206-685-2000
bioeng@u.washington.edu
The Department of Bioengineering offers programs of study which lead to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees.

**Master of Science**

The Master of Science degree program provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree will prepare students for careers in academic, industrial, or hospital environments. A thesis is required.

**Doctor of Philosophy**

The objective of the Ph.D. program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the Ph.D. program does not require prior completion of the M.S. degree and may be made directly after the B.S. An optional dual Ph.D. degree in bioengineering and nanotechnology is available. See [www.nano.washington.edu](http://www.nano.washington.edu) for more information.

**Medical Scientist Program**

A Medical Scientist Training Program exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the M.D. and Ph.D. degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at 206-685-0762.

**Research Facilities**

Offices and laboratories are located in the College of Engineering and the School of Medicine. Students have access to the University of Washington Medical Center, Vivarium, Primate Center, Computer Center, and libraries, as well as to all engineering and health-sciences departments and facilities. A wide range of technologies and virtually all aspects of biomedical science are available.

**Admission Requirements**

Applicants for the M.S. or Ph.D. should have a baccalaureate degree in engineering, biological science, or a related field. Preparation for both programs must include ordinary differential equations, linear algebra, instrumentation, signal processing, engineering systems analysis, thermodynamics or physical chemistry, and cellular and molecular biology. Strong students who are missing some of these background courses can be admitted but will be expected to take the appropriate courses as part of their graduate program. Admission to graduate study in bioengineering is highly selective. Successful applicants have strong academic credentials, research experience, and demonstrated potential for advanced study. The application form and further information can be found on the department’s Web page.

**Financial Aid**

Financial aid is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the Academic Counselor.

---

### Course Descriptions

**BIOEN 299 Introduction to Bioengineering (1) Verdugo**

Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no credit only. Offered: Asp.

**BIOEN 301 Bioengineering Systems Analysis (4) Speelman**

Investigates static and dynamic problems that are found in medicine and biology. Exposes students to real biomedical applications of first- and second-order differential equations. Students analyze current bioengineering and biomedical problems and make measurements of the systems that present those problems. Weekly laboratories. Prerequisite: BIOL 200 or BIOL 202; E E 215. Offered: Sp.

**BIOEN 302 Introduction to Biomedical Instrumentation (4) Folch**

Introduces students to the theory of measurement and the practicalities of measurement of biological variables. Basic amplifier theory, discussion of noise in physical systems and its reduction. Some actuators used to test biomedical systems. Prerequisite: BIOEN 301; CSE 142. Offered: A

**BIOEN 303 Bioengineering Signal Processing (4) Li, Vicini**

Introduction of signal processing techniques necessary to record and analyze medical and biological data. Students use transform calculus to analyze differential equations and develop approximations to functions. Introduces sampling and applies it to biological data. Prerequisite: BIOEN 302. Offered: W

**BIOEN 304 Introduction to the Bioengineering Analysis of Physiology I (4) Pollack**

Introduction of engineering analysis of physiological systems. Course covers cellular function through its control by the central nervous system. Prerequisite: BIOEN 301; CSE 142. Offered: A

**BIOEN 305 Introduction to the Bioengineering Analysis of Physiology II (4) Martyn**

Introduction to the cardiovascular system. Explores the cardiovascular system as an engineering system in which the heart is a pump, and the load and distribution of blood to organs on the heart depend on the demands of the system. Introduces principles of fluid transport. Prerequisite: BIOEN 302; BIOEN 304. Offered: W

**BIOEN 357 Introduction to Molecular Bioengineering (4) Vogel**

Introduces molecular bioengineering. Molecules as building blocks to engineer surfaces. Molecular therapeutics, drug delivery, diagnosis and biomaterials. Examines design principles for biomedical materials and devices. Prerequisite: either BIOL 200 or BIOL 202; PHYS 122; either CHEM 223, CHEM 237, or CHEM 335. Offered: W

**BIOEN 420 Medical Imaging (4) Kim, Yuan**

Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: BIOEN 303; MATH 308; CSE 143. Offered: A

**BIOEN 436 Medical Instrumentation (4)**

Introduction to the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For juniors, seniors, and first-year graduate students who are preparing for careers in bioengineering, both research and industrial. Offered: jointly with E E 436; Sp.
BIOEN 440 Introduction to Biomechanics (4) Sanders
Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with M E 445; Sp.

BIOEN 455 BioMEMS (4) Folch

BIOEN 457 Advanced Molecular Bioengineering (4) Stayton

BIOEN 467 Biochemical Engineering (3) Banejuy
Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: either CHEM 223 with CHEM E 340 or either CHEM 237 or CHEM 335; recommended: CHEM E 465. Offered: jointly with CHEM E 467; W.

BIOEN 470 Systems Engineering and Electronic Medicine (4) Kim
Provides students with understanding and hands-on experience in systems engineering, healthcare information systems, and core technologies for electronic medicine; including how large-scale engineering systems are defined, architected, built, and tested. Focus is on current and future medical systems. Prerequisite: BIOEN 303; MATH 308. Offered: W.

BIOEN 480 Bioengineering Research/Capstone Design (2-6, max. 12)
Students formulate a problem, develop a detailed experimental or design plan, and report results of their work in written and oral form. Prerequisite: BIOEN303; BIOEN 305; BIOEN 357. Offered: AWSpS.

BIOEN 481 Research and Design Fundamentals (4)
Engineering design, planning and managing an open-ended project, bioengineering and society. Prerequisite: BIOEN 303; BIOEN 305. Offered: AWSpS.

BIOEN 482 Bioengineering Senior Capstone Research/Design (2-6, max. 8)
Independent capstone design/research project; final paper. Prerequisite: BIOEN 303; BIOEN 305. Offered: AWSpS.

BIOEN 485 Computational Bioengineering (4) Vicini
Introduction to computational, mathematical and statistical approaches to the analysis of biological systems, including systems and control theory, molecular models and bioinformatics. Lectures and laboratory sessions emphasize practical problems in kinetics, metabolism and genomics. Prerequisite: CSE 143; BIOEN 305; MATH 308. Offered: W.

BIOEN 490 Engineering Materials for Biomedical Applications (3) Bonadio, Horbett
Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; Sp.

BIOEN 491 Controlled-Release Systems: Principles and Applications (3) Hoffman
Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Release mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; even years; W.

BIOEN 492 Surface Analysis (3) Ratner
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 458; W.

BIOEN 497 Bioengineering Education Outreach (1-2, max. 6)
Work with K-12 schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities. Offered: ASp.

BIOEN 499 Special Projects (2-6, max. 6)
Individual undergraduate bioengineering projects under the supervision of an instructor. In addition, classes on selected topics of current interests as announced. Offered: AWSpS.

BIOEN 508 Physical Aspects of Medical Imaging (4) Stewart
Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound and Doppler ultrasound. Offered: jointly with RADGY 508/ENV H 528; W.

BIOEN 510 Bioengineering Seminars (3)
Topics of current bioengineering interests presented by resident and visiting faculty members and students. Graduate students actively involved in bioengineering research are eligible to enroll for credit and can be expected to attend regularly, participate in discussions, and make presentations. Offered: A.

BIOEN 511 Biomaterials Seminar (1) Hoffman, Horbett, Ratner
Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 511; AWSp.

BIOEN 520 Orthopedic Biomechanics (4) Ching
Mechanical engineering applied to musculoskeletal system with emphasis on techniques in orthopedic surgery. Measurement of mechanical properties of tissues. Mechanics of bone, soft tissue, and muscle, mechanics of upper extremity, spine, and lower extremity. Engineering in surgery, gait analysis, joint replacement, fracture fixation. Prerequisite: BIOEN 440. Offered: odd years; W.

BIOEN 540 Biosystem Identification (4) Vicini
Fundamentals of mathematical modeling in medicine and biology. Introduction to compartmental models: a priori, a priori identifiability. Data measurement error, parameter estimation. Maximum likelihood, least squares. Introduction to tracer-tracee models, pharmacokinetics, pharmacodynamics. Models to test hypotheses. Hands-on computer experience. Prerequisite: ordinary differential equations, introductory statistics, or permission of instructor. Offered: even years; A.

BIOEN 542 Computer Simulation in Biology (3)
Introduction to mathematical modeling of biological phenomena. Tutorial text explains how to derive equations for simple models and apply them to generate simulation data. Application topics include kinetics of biomolecular reactions and enzyme saturation, membrane transport, organismal predation, competition and growth, compartmental and spatially distributed models, physiological control systems, probabilistic models. Prerequisite: P BIO 405 and P BIO 406 or equivalent or permission of instructor. Offered: even years; A.

**BIOEN 545 Fractals in Biology and Medicine (3)**

Introduction to fractal and chaos. Conceptual approaches to using fractals for characterizing structures and growth processes, describing heterogeneities, and evaluating properties of tissues. The behavior of non-linear systems, often chaotic, describes physiological homeodynamics, regulation without set points in feedback control.

**BIOEN 550 Mass Transport and Exchange in Biological Systems (3)**

Review of basic mechanisms of transport; transport through vascular system and blood-tissue exchange processes in organs; integrated system analysis of closed systems and applications to physiological regulation, medical imaging, and pharmacokinetics. Prerequisite: calculus, introduction to differential equations; cardiovascular physiology; E E network analysis or systems analysis, chemical engineering transport. Offered: Sp.

**BIOEN 555 Introduction to Biomechanics (3)**

Pollack

Mechanical properties of biological tissues, with emphasis on the underlying histological bases. Bones, joints, cartilage, blood vessels, connective tissue, muscle, heart. Many laboratory sessions. Offered: odd years; W.

**BIOEN 560 Ultrasound in Bioengineering (4)**

Vaezy

Fundamentals of ultrasonic generation, formation, reception, and treatment of absorption, scattering, and transmission. Conventional and new methodology. (A, B, T-M mode, imaging, Doppler, tissue characterization, and nonlinear effects.) Prerequisite: E E/M E 525 for nonbioengineering students or permission of instructor. Offered: odd years; Sp.

**BIOEN 561 Biomedical Optics (4)**

Advanced theories of optical and spectroscopic measurement with emphasis on biomedical laser applications. Laser principles, instrumentation, and current practice in various biomedical uses, covering such areas as medicine, surgery, and biology. Prerequisite: BIOEN 302 or equivalent, or permission of instructor. Offered: even years; Sp.

**BIOEN 565 Nuclear Magnetic Resonance in Biomedicine (2)**

Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with RADGY 550; odd years; W.

**BIOEN 568 Image-Processing Computer Systems (4)**

Kim

Components of digital processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image-processing operations. Selected advanced image-processing topics introduced. Individual student project. Prerequisite: permission of instructor. Offered: jointly with E E 568; Sp.

**BIOEN 571 Polymeric Materials (3)**

Ratner

Relationships between configuration, conformation, molecular order, microstructure, properties of polymeric materials. Concepts relevant to tailoring polymer molecules and microstructures for specific applications. Interactions between polymers and their in-service environment. Characterization and processing techniques relevant to polymeric materials. Prerequisite: one semester or two quarters of organic chemistry. Offered: jointly with MSE 571.

**BIOEN 573 Biosensors and Biomedical Sensing (3)**

Yager

In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing. Prerequisite: BIOEN 436 or permission of instructor. Offered: odd years; A.

**BIOEN 575 Molecular Modeling Methods (4)**

Beard

Introduction to theory and practice of computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Discussion of background theory, implementation details, capabilities and practical limitations of these methods. Prerequisite: previous coursework in biochemistry and physical chemistry and/or permission of instructor. Offered: jointly with CHEM 575; A.

**BIOEN 576 Laboratory Techniques in Protein Engineering (4)**

Stayton

Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or consent of instructor. Offered: W.

**BIOEN 577 Cell and Protein Reaction with Foreign Materials (3)**

Horbett

Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of the phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor. Offered: even years; A.

**BIOEN 578 Biomembranes (3)**

Yager

Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water. Offered: A.

**BIOEN 579 Host Response to Biomaterials (3)**

Giachelli

Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthesis use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently) or permission of instructor. Offered: odd years; W.

**BIOEN 584 Computational and Integrative Bioengineering (4)**

Vicini

Advanced computational, mathematical, and statistical approaches to the analysis of biological systems, including molecular models, time series, fractal systems, population kinetic analysis, and stochastic simulation. Lectures and laboratory sessions emphasize practical problems in kinetic analysis, metabolism, and genomics. Final project, written and oral reports. Prerequisite: BIOEN 485. Offered: odd years; Sp.

**BIOEN 588 Bioengineering Principles of Physiology (4)**

Bonadio, Kushmerick

Muscle exemplifies: protein-protein interactions; molecular
recognition; proteins as machines; functional scaling; computing and signaling with metabolic machines; metabolic processes as chemical networks; membrane separation into functions; channels as communication machines; neural control and function. Prerequisite: BIOL 200 or equivalent or permission of instructor; recommended: BIOE 304, P BIO 405. Offered: A.

**BIOEN 589 Integrative Physiological Systems Analysis (4)**
Bassingthwaighte
Physiological systems, emphasizing cardiovascular, pulmonary and to a lesser extent, renal, hepatic, and endocrine systems, described in quantitative terms, using model representation for examples and problems. Laboratories. Prerequisite: BIOE 588, calculus and ordinary differential equations. Offered: W.

**BIOEN 590 Advanced Topics in Biomaterials (3)**
Bonadio
Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOE 490 or CHEM E 490. Offered: jointly with CHEM E 590; odd years. Sp.

**BIOEN 592 Surface Analysis (3)**
Ratner
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558; W.

**BIOEN 599 Special Topics in Bioengineering (1-6, max. 15)**
Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisite: undergraduate or graduate courses (or equivalent) determined individually for each special topic. Offered: AW/SpS.

**BIOEN 600 Independent Study or Research (*)**
Credit/no credit only. Offered: AW/SpS.

**BIOEN 700 Master’s Thesis (*)**
Credit/no credit only. Offered: AW/SpS.

**BIOEN 800 Doctoral Dissertation (*)**
Credit/no credit only. Offered: AW/SpS.

**Chemical Engineering**
105 Benson
Chemical engineering is concerned with processes for transforming raw materials into energy and into a great variety of consumer products, such as gasoline, electronic materials, pulp and paper, fertilizers, rubber, polymers and composites, and pharmaceuticals. Chemical engineers work on research and development of these materials and on the processes for making them, as well as on the design and operation of chemical plants and equipment by which production is achieved. This must be done with efficiency, economy, and concern for society and the environment.

**Undergraduate Program**
Adviser
105 Benson, Box 351750
206-543-2252
advising@cheme.washington.edu
The Department of Chemical Engineering offers the following program of study:
- The Bachelor of Science in Chemical Engineering degree

**Bachelor of Science in Chemical Engineering**

**Suggested First- and Second-Year College Courses:**
- MATH 124, MATH 125, MATH 126, CHEM 142, CHEM 152, CHEM 162, PHYS 121, ENGL 131.

**Department Admission Requirements**
Applicants are considered in two groups — Early Admission and Upper-Division Admission. Admission is competitive. Thus, completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department’s admission decision. Applications are accepted for autumn quarter only; application deadline is July 1. See department office for application form.

**Early Admission**

**Course requirements:**
- MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; PHYS 121; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. Applicants must be completing their freshman year at the UW and must have completed a minimum of 15 credits taken in residence at the UW.

**Grade requirements:** A minimum grade of 2.0 in each prerequisite course and a minimum GPA of 2.50.

**Upper-Division Admission**

**Course requirements:**
- MATH 124, MATH 125, MATH 126, MATH 307 (18 credits); CHEM 142, CHEM 152, CHEM 162, CHEM 223 or CHEM 237, 20 credits; PHYS 121, PHYS 122, PHYS 123 (15), CSE 142, CHEM E 260 (8), and one 5-credit English composition course. All courses must be completed prior to the July 1 application deadline. In addition, it is strongly recommended that students complete CHEM 224 or CHEM 238.

75 credits completed by July 1 application deadline, with a minimum overall 2.50 GPA and minimum 2.0 in all courses required for admission.

Students with a GPA lower than 2.50 for these specified courses or an overall GPA lower than 2.50 for all courses applicable to the B.S.Ch.E. degree seldom succeed in the department. Historically, a minimum GPA of 2.80 in these categories is required for admission to and success in the department.

Factors included in the admissions decision include the course record as indicated above and qualitative considerations such as difficulty of completed courses, frequency of incomplete or withdrawal grades, number of repeated courses, applicable work experience and maturity of attitude, record of honors, a demonstrated ability to take at least 12 credits per quarter, and special circumstances disclosed by the applicant.

**Graduation Requirements**
Information on degree requirements is available in detail from the department office or at its Web site. In brief, the required 180 credits include the College of Engineering general-education requirements as specified in the College of Engineering section, 10 credits of engineering electives, 43 credits of chemical engineering, and 5 credits of electives. Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers.
(CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E 485 and 486 or 497) which involve the design of an integrated chemical system. An optional 9-credit specialty area allows each student to develop special competences in a selected subject by taking a minimum of three courses in that area. Engineering and free electives may be used for this purpose. The areas are biotechnology; fuel cells and energy; polymers, composites, colloids, and interfaces; computers applied to chemical engineering; electronic materials; environmental engineering; and nuclear engineering. A minimum GPA of 2.00 in chemical engineering courses, based on the first time each course is taken, is required for graduation.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** Chemical engineering graduates possess knowledge (including safety and environmental aspects) of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; and process design. They also gain ability to apply knowledge of mathematics, science, and engineering; ability to design and conduct experiments, as well as to analyze and interpret data; ability to design a system, component, or process to meet desired needs; ability to function on multidisciplinary teams; and ability to identify, formulate, and solve engineering problems. They also possess an understanding of professional and ethical responsibility; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; a knowledge of contemporary issues; and an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

- **Instructional and Research Facilities:** The chemical engineering building, Benson Hall, contains classrooms, offices, stockrooms, computer rooms, machine and electronics shops, and laboratories. The Unit Operations Lab holds a variety of experiments designed to give undergraduate students the experience of using real chemical process equipment and to deepen their understanding of chemical engineering fundamentals of fluid flow, heat transfer, separation processes, and reactor behavior. Departmental computer facilities include a network of PCs located in a keyed room for the exclusive use of chemical engineering students. Ten of these machines have hardware for computer data acquisition (to collect experimental data and support experiments on process automation). All have fast connections to the Internet and to larger UW computers.

- **Honors Options Available:** With College Honors. With Distinction. See adviser for details.

- **Research, Internships, and Service Learning:** Students are encouraged to participate in internships, which are generally facilitated through the Engineering Co-op Office.

- **Department Scholarships:** The department awards 25-30 full-tuition scholarships per year. Application deadline is April 1.

- **Student Organizations/Associations:** The undergraduates in the department run a dynamic chapter of the American Chemical Society and the Chemical Engineering Society. The undergraduates in the department run a dynamic chapter of the American Chemical Society.

- **Of Special Note:** Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering, paper science, and the B.S.E. program. Other students who wish to take departmental courses must meet the prerequisites and obtain instructor approval (except for CHEM E 485 and 486, which are open to majors only).

**Graduate Program**

Graduate Program Coordinator
105 Benson, Box 351750
206-543-2250

The department offers studies leading to the degrees of Doctor of Philosophy, Master of Science in Chemical Engineering, and Master of Science in Engineering. The doctoral degree is centered on the dissertation with a foundation in course work; it is generally completed in four to five years beyond the baccalaureate degree. In the master’s program primary emphasis is placed on course work, and the degree generally requires 21 months of study. Thesis and non-thesis options are available.

The program of study includes basic subjects of importance to all chemical engineers, such as thermodynamics, transport phenomena, kinetics, and applied mathematics. In addition, students are invited to take more-specialized courses in chemical engineering or in other departments. Students usually take three courses during their first quarter. In subsequent quarters, less time is spent on course work, and more on research and independent study.

The department has about seventy full-time graduate students, most of whom are working toward a doctorate. They study and collaborate with faculty members in an atmosphere that is informal, friendly, and intellectually vigorous. Faculty interests are broad, so students become familiar with a variety of areas while receiving individual guidance in a specialty.

**Research Facilities**

The department is fortunate to have outstanding facilities. Benson Hall contains classrooms, offices, stockrooms, a machine shop, laboratories, and a variety of specialized research equipment. Each graduate student is provided desk space in a small laboratory or office as well as access to larger laboratories in the building. Students also may use the services of the Academic Computer Center, instrument-making shops, research centers (e.g., biomaterials, nanotechnology, chemical analysis), and the Chemistry and Engineering Libraries.

**Admission Requirements**

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

**Financial Aid**

The department has various sources of support for qualified graduate students. Those interested in applying for admission and support should visit the department’s Web site at depts.washington.edu/chemeng/. The completed forms and reference letters should be received by the department office by January 15. Offers of admission with financial support are usually made in January through March.

**Course Descriptions**

**CHEM E 260 Thermodynamics (4) NW**

Introduction to the basic principles of thermodynamics from a macroscopic point of view. Emphasis on the First and Second Laws and the State Principle, problem solving methodology. Prerequisite: either CHEM 140, CHEM 142, or CHEM 145; either MATH 126, MATH 129, or MATH 136; PHYS 121. Offered: AWSpS.

**CHEM E 309 Creativity and Innovation (2) VLPA Allan**

Understanding creativity and creative thinking; its challenges and dynamics through knowledge, judgment, planning, and observation.

CHEM E 310 Material and Energy Balances (4)
Chemical and physical process calculations: steady- and unsteady-state material and energy balances with specific examples in vapor-liquid contact operations and multiphase extraction, and introductory thermochromy. Prerequisite: either CHEM E 260 or ENGR 260 with either ENGR 142 or CSE 142. Offered: A.

CHEM E 326 Chemical Engineering Thermodynamics (4)
Phase equilibria and chemical equilibria in multicomponent systems; theories of solution; chemical reaction analysis. Prerequisite: CHEM E 310 with either CHEM E 260 or CHEM 456. Offered: W.

CHEM E 330 Transport Processes I (4)
Diffusive transport of momentum, heat and mass; general aspects of fluid flow; the Navier-Stokes equations; one-dimensional flow with engineering applications. Prerequisite: CHEM E 310; either MATH 136 or MATH 307. Offered: W.

CHEM E 340 Transport Processes II (4)
Heat transfer, basic principles, and applications, Conduction, convection, and radiation. Prerequisite: CHEM E 330. Offered: Sp.

CHEM E 341 Energy and Environment (3) NW Malte
Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with ENVIR 341/M E 341; A.

CHEM E 345 Introduction to Fuel Cells (3) Adler, Schwartz, Stueve
Overview of fuel cells, fuel cell efficiency, types of fuel cells, applications of fuel cells, and fuels for fuel cells. Intended for students in science and engineering and fuel cell professionals desiring a technical knowledge of fuel cells. No credit available, if already given for CHEM E 445. Prerequisite: CHEM 162; PHYS 122; recommended CHEM E 260. Offered: A.

CHEM E 355 Biological Frameworks for Engineers (3)
For engineers with no prior experience in the biological sciences. Hands-on, project-based course covers fundamental concepts and language of biology, from an engineering perspective. Topics include: functions of life, information processing, proteins, DNA, genetic variability, control loops, energetics, tissues, organisms, ecosystems. Prerequisite: CHEM 142; PHYS 123; MATH 307; recommended: CHEM 220. Offered: A.

CHEM E 375 Chemical Engineering Computer Skills (2)
Finlayson
Use Excell, Matlab, and AspenPlus to solve typical chemical engineering problems. Solve realistic problems and explore alternatives that would be inaccessible for hand calculations. Includes equations of state, chemical equilibrium of simultaneous reactions, phase equilibria, plug flow reactors, heat transfer in 1-D, and time-dependent heat transfer. Credit/no credit only. Offered: W.

CHEM E 435 Transport Processes III (4)
Mass transfer, basic principles, and applications to equipment design. Physical separation processes. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

CHEM E 436 Chemical Engineering Laboratory I (3)
Lectures on experimental design, instrumentation, laboratory safety, and report writing; laboratory experiments on fluid mechanics and heat transfer. Emphasis on experimental planning, procedures, and report writing. Prerequisite: CHEM E 326; CHEM E 340 which may be taken concurrently; T C 231; recommended: T C 333. Offered: ASp.

CHEM E 437 Chemical Engineering Laboratory II (3)
Continuation of 436. Laboratory investigation of chemical engineering principles applied to equipment design with emphasis on mass transfer operations and chemical reactors. Prerequisite: CHEM E 435; CHEM E 436; CHEM E 465. Offered: W.

CHEM E 442 Renewable Energy (3) NW Malte
Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with M E 442/ENVIR 442; W.

CHEM E 445 Fuel Cell Engineering (3)
Introduction to electrochemical fuel cells for use in transportation and stationary power applications. Topics covered include types of fuel cells, single cell operation, stack engineering, overall system design, and safety, with emphasis on proton exchange membrane and solid oxide fuel cells. Prerequisite: CHEM E 330.

CHEM E 446 Fundamentals of Solid Oxide Fuel Cells (3) Adler
Prepares students with a broad technical knowledge of solid oxide fuel cells, including scientific principles, materials properties and fabrication, design and manufacture, process engineering, economics. Technical focus targeting science and engineering students, or professionals seeking broad technical knowledge. Prerequisite: CHEM 162; PHYS 122; recommended: CHEM E 340. Offered: W.

CHEM E 450 Solid State Materials and Chemical Processes (3) Serifis
Fundamentals of solid state including process analysis, mechanical properties; heterogeneity; anisotropy; liquid/solid transformations; rate processes; thermal analysis; viscoelasticity; microscopy; molecular characterization techniques. Application of fundamentals in examining polymers, metals and ceramics as used in the electronics and aviation industries. Prerequisite: CHEM E 340; CHEM E 465. Offered: W.

CHEM E 455 Surface and Colloid Science Laboratory (1/3, max. 3) Berg
Laboratory techniques, equipment, and underlying fundamentals in surface and colloid science. Experiments in the measurement of surface tension, adsorption, wetting and spreading, colloid properties, emulsion preparation and stability, electrophoresis, and interfacial hydrodynamics. Recommended: CHEM E 326; CHEM E 330; CHEM 461. Offered: Sp.

CHEM E 458 Surface Analysis (3)
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger): ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 492; W.

CHEM E 461 Electrochemical Engineering (3) Schwartz
Explores role of thermodynamics, charge transfer kinetics, and mass transfer on behavior of electrochemical systems. Includes cell thermodynamics, faradaic and non-faradaic rate processes, ionic transport, nucleation and growth theories. Applications to chemical sensors, batteries, corrosion, thin film deposition. In-class demonstrations to illustrate concepts. Offered: W.

CHEM E 462 Application of Chemical Engineering Principles to Environmental Problems (3)
Environmental problems in chemical engineering. Team taught; topics vary from year to year. Includes: geo-media, flow and dispersion through porous media water flow in dry soils, chemistry
of radioactive waste, in situ site cleanup, ex situ site cleanup, colloid and surface science. Prerequisite: CHEM E 330. Offered: Sp.

CHEM E 465 Reactor Design (4)
Application of principles of chemical kinetics to the design of commercial-scale chemical reactors; characterization of batch and flow reactors in homogeneous and heterogeneous systems. Prerequisite: CHEM E 326; CHEM E 340. Offered: A.

CHEM E 467 Biochemical Engineering (3) Baneyx
Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: CHEM E 340; either CHEM 223, CHEM 237, or CHEM 335; recommended: CHEM E 465. Offered: jointly with BIOEN 467; W.

CHEM E 468 Air-Pollution Control Equipment Design (3)
Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CEE 494/M E 468; W.

CHEM E 470 Chemistry of Wood (3)
Chemical and physical properties of cellulose, lignin, hemicellulose, and extractives; wood as a raw material for the chemical industry. Prerequisite: either CHEM 220, CHEM 238, or CHEM 336. Offered: A.

CHEM E 471 Pulping and Bleaching Processes (3)
Conversion of wood to mechanical and chemical pulps. Kraft, sulfite, and semichemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: jointly with PSE 476; W.

CHEM E 472 Papermaking Processes (3)

CHEM E 473 Pulp and Paper Laboratory (2)
Laboratory experiments in chemical and semichemical pulping of wood. Bleaching of chemical and high-yield pulps. Physical and chemical characteristics of pulp fibers. Prerequisite: PSE 476. Offered: jointly with PSE 478; Sp.

CHEM E 480 Process Dynamics and Control (4)
Analysis of the dynamics of simple chemical process units and systems; applications to stability, control, and instrumentation of such processes. Weekly two-hour laboratory included. Majors only. Prerequisite: CHEM E 435; CHEM E 465. Offered: W.

CHEM E 481 Process Optimization (3)
Concepts and techniques of optimizing chemical engineering processes and systems, including classical and direct methods of search, linear and nonlinear programming, dynamic programming, statistical experimental design, and evolutionary operation. Offered: Sp.

CHEM E 482 Advanced Topics in Process Control (3) Holt, Ricker
Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: CHEM E 480.

CHEM E 484 Electronic and Optoelectronic Polymers (3) Jenekhe
Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Offered: A.

CHEM E 485 Process Design I (4)
Applied economics in chemical engineering design and operations; market survey and plant location; introduction to plant and process design. Prerequisite: CHEM E 480 which may be taken concurrently. Offered: W.

CHEM E 486 Process Design II (5)
Comprehensive design of a specific process, including economic feasibility studies, utilization of market survey and plant location studies, process equipment design and optimization, and overall plant integration and layout. Prerequisite: CHEM E 485. Offered: Sp.

CHEM E 490 Engineering Materials for Biomedical Applications (3) Hoffman
Combined application of the principles of physical chemistry, biochemistry, materials engineering, mass transfer, and fluid mechanics to biomedical problems. Case studies include considerations of the selection of materials, the design and the operation of instruments, components of, or entire, artificial organs (heart, kidney, lung) and artificial structural elements (bone, teeth, skin), all for use in contact with body fluids. Offered: jointly with BIOEN 490; W.

CHEM E 491 Controlled Release Systems-Principles and Applications (3) Hoffman
Mechanisms or controlled release of active agents and the development of useful systems for this purpose. Release mechanisms include diffusive, convective, or erosive driving forces. Applications to the biomedical, agricultural, forestry, and oceanography fields. Some special case studies covered in detail. Offered: jointly with BIOEN 491; even years; W.

CHEM E 497 Special Projects in Chemical Engineering Design ([1-6]- max. 12)
Chemical engineering design instruction and experience in special projects, such as industrially motivated, timely, or interdisciplinary projects. Project subject and content varies. Majors only. Prerequisite: CHEM E 340.

CHEM E 498 Special Topics in Chemical Engineering ([1-4], max. 12)
Topics of current interest in the field. Subject matter changes from year to year.

CHEM E 499 Undergraduate Research ([1-6]-, max. 12)
Independent research projects in chemical engineering. Offered: AWSpS.

CHEM E 510 Mathematical Foundations of Systems Theory (4)
Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with A A 510/E E 510/M E 510; A.

CHEM E 511 Biomaterials Seminar (1) Hoffman, Horbett,
Ratner

Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with BIOEN 511; AWSp.

CHEM E 512 Methods of Engineering Analysis (3)
Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Prerequisite: MATH 205, MATH 307 or AMATH 351, MATH 324 or permission of instructor. Offered: jointly with AMATH 512; A.

CHEM E 515 Experimental Methods in Chemical Engineering Research (3) Banyas, Berg, Jiang
Lecture and laboratory studies in current research methods of chemical engineering. Includes surface science, biochemical engineering, colloid chemistry, light scattering, and nanoscience techniques.

CHEM E 523 Seminar in Chemical Engineering (1)
Topics of current interest in chemical engineering. Credit/no credit only. Offered: AWSp.

CHEM E 525 Chemical Engineering Thermodynamics (4)
Prerequisite: CHEM E 521. Review of classical thermodynamics. Applications of thermodynamics to multiphase and multicomponent systems; theories of solutions. Offered: A.

CHEM E 526 Topics in Thermodynamics (3)
Prerequisite: CHEM E 525 or permission of instructor.

CHEM E 530 Momentum, Heat, and Mass Transfer I (4)
Prerequisite: CHEM E 525 or permission of instructor. Derivation of the differential equations for mass, energy, and momentum transport. Principles of fluid mechanics; creeping flow, turbulence, boundary-layer theory. Offered: A.

CHEM E 531 Momentum, Heat, and Mass Transfer II (3)
Continuation of 530. Flows of fluid-particle systems; convective heat transfer, natural convection. Prerequisite: CHEM E 530. Offered: W.

CHEM E 554 Nanoscale Science I: Contact Mechanics and Rheology on the Nanoscale (3) Overney
Introductory nanoscale science with emphasis on contact mechanics, principle and concept of forces, scanning force microscopy, tribology (friction, wear, lubrication), rheology, ultrathin organic films, physical properties of polymers, and computer simulation.

CHEM E 555 Interfacial Phenomena (4) Berg
Surface tension, capillary statics, wetting and spreading phenomena; thermodynamics of capillary systems, adsorption, surfactant monolayers and micellar solutions; capillary hydrodynamics, interfacial turbulence and applications in distillation, absorption, and extraction. Prerequisite: CHEM E 525, CHEM E 530, or permission of instructor. Offered: even years.

CHEM E 556 Principles and Applications of Colloidal Materials (3/4) Berg, Hoffman
Preparation, stabilization, properties, and destruction of important colloidal materials. The theory and structure of the electrical double layer, electrodynamics. Includes selected case studies pertinent to air and water pollution, biological fluids, industrial processes. Offered: odd years.

CHEM E 557 Research in Interfacial and Colloid Science (1) Berg
Weekly research seminar and discussion of scientific literature pertaining to interfacial and colloid science. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

CHEM E 558 Surface Analysis (3) Ratner
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger), ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 592; W.

CHEM E 559 Thin Film Science, Engineering, and Technology (3) Stuve
The physics, chemistry, and engineering aspects of thin film deposition and technology. Vapor phase deposition emphasized. Topics include reactor types, vapor phase transport and hydrodynamics, surface and mass transport limited kinetics, nucleation and growth, homoepitaxy, heteroepitaxy, and thin film characterization. Prerequisite: permission of instructor. Offered: jointly with MSE 559.

CHEM E 560 Reactions at Solid Surfaces (3) Stuve
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger), ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 592; W.

CHEM E 561 Electrons at Surfaces (3) Finlayson, Krieger, Stuve
Properties of electrons at solid surfaces and their role in surface chemical reactions pertaining to electrochemistry, corrosion/etching, and catalysis. Topics include the jellium model of surfaces, surface electronic structure, work function, surface electric fields, reactions involving electrons, ions, and net charge transfer, and relationships between catalysis and electrochemistry.

CHEM E 562 Hazardous Air Pollution (3)
Control of emission of hazardous or toxic air pollutants. Government regulations, determination of needed control efficiency. Emission control by thermal incineration, catalytic incineration, flares, condensation, carbon adsorption, and adsorption (wet and dry). Hazardous waste incinerators. Case studies. Offered: jointly with CEE 556; W.

CHEM E 564 Applications of Chemical Kinetics (3)
Fast reactions and highly energetic reactions with applications to combustion, explosions, and lasers. Coupling of transport processes and reaction rates, photochemical kinetics, intermolecular energy transfer, free radical, and chain reaction kinetics. Rate plasmas, flames, and biological systems.

CHEM E 565 Dynamics (3) Banerjee, Krieger, Stuve
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger), ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with BIOEN 592; W.

CHEM E 566 Control of Gaseous Air Pollutants (3) Pilat
Physical and chemical processes used to control gaseous air pollutants. Absorption into liquids. Aqueous spray dryer scrubbers. Adsorption beds. Control of sulfur oxide and nitrogen oxide. Case studies of control systems. Prerequisite: CHEM E 435 or CHEM E 468 or permission of instructor. Offered: jointly with CEE 558; even years; Sp.

CHEM E 567 Control of Particulate Air Pollutants (3) Pilat
Processes used to control emissions of particulate air pollutants. Use of settling chambers, cyclones, fabric filters, wet scrubbers, and electrostatic precipitators to control aerosol particles. Case studies of particulate air-pollutant control systems. Prerequisite: CHEM E 468 or permission of instructor. Offered: jointly with CEE 559; odd years; A.
CHEM E 570 Chemistry of High Polymers (3, max. 6) Allan Fundamentals of high polymer chemistry, including kinetics of addition and condensation polymerization, the determination of average molecular weights and chain length distributions, solution properties and the relationship between molecular structure and plastic film and fiber properties of various polymers. Prerequisite: an undergraduate sequence in organic chemistry. Offered: W.

CHEM E 571 Polymer Physics and Engineering (3) Seferis Description and analysis of methods for processing polymeric materials. Introduction to solid polymer physics with emphasis on the coupling of structure morphology and properties. Development of structure-property models for quantitative description and control of properties in synthetic and natural polymers and composite materials. Offered: W.

CHEM E 572 Advanced Polymeric Composites (3) Seferis Design, manufacture, and properties of organic and inorganic particle and fiber-reinforced polymers. Advanced techniques for characterization of processing and properties, including anisotropic elasticity/viscoelasticity theory, polymerization and network formation of matrices, theory of reinforcement, environmental and chemical effects. Prerequisite: CHEM E 571 or MSE 423 or permission of instructor. Offered: W.

CHEM E 575 Nonlinear Analysis in Chemical Engineering (3) Finlayson Comparison of numerical techniques: similarity, perturbation, finite difference, Galerkin, orthogonal collocation methods as applied to nonlinear chemical engineering problems.

CHEM E 580 Topics in Chemical Engineering Design (3, max. 9) Lectures and seminars on current design methods in chemical engineering, including technical and economic feasibility of processes, design and optimization of process equipment, and environmental and social constraints. Prerequisite: undergraduate chemical engineering design, admission to chemical engineering non-thesis master’s program, or permission of instructor.

CHEM E 582 Advanced Topics in Process Control (3) Holt, Ricker Current topics in process control design and analysis. Possible topics include robustness analysis and design, time delay compensation, modern frequency response techniques, discrete control, adaptive control, model-based control, and nonlinear control. Prerequisite: undergraduate control class and graduate standing.

CHEM E 584 Electronic and Optoelectronic Polymers (3) Jenekhe Covers the chemistry, physics, materials science, and engineering applications of semiconducting and metallic conjugated polymers. Examines the structural origins of the diverse electronic and optoelectronic properties of conjugated polymers. Exemplifies applications by light-emitting diodes, lasers, solar cells, thin film transistors, electrochromic devices, biosensors, and batteries. Prerequisite: either CHEM 237, CHEM 455, CHEM E 340, or MSE 310. Offered: A.

CHEM E 588 Research in Applied Microbiology (1) Lidstrom Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with MICROM 588; AWSp.

CHEM E 590 Advanced Topics in Biomaterials (3) Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: CHEM E 490 or BIOEN 490. Offered: jointly with BIOEN 590; odd years; Sp.

CHEM E 591 Robotics and Control Systems Colloquium (1, max. 3) Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A A/E E/M E 591; AWSp.

CHEM E 598 Effective Teaching of Chemical Engineering (11/2-, max. 3) Finlayson Topics/activities include: curriculum development: outlining a course, comparing textbooks, preparing lectures, use of lectures versus quiz sections, microteaching, other modes of instruction, e.g., self-paced, use of design problems. Tests: creating and grading. Role of computers, review of engineering software, diversity, international teaching assistants, sexual harassment, assessment of teaching, resume. Offered: WSp.

CHEM E 599 Current Topics in Chemical Engineering (1-3, max. 12) Readings or lectures and discussions of topics of current interest in the field of chemical engineering. Subject matter changes from year to year. Prerequisite: permission of instructor.

CHEM E 600 Independent Study or Research (*) Offered: AWSpS.

CHEM E 700 Master’s Thesis (*) Offered: AWSpS.

CHEM E 800 Doctoral Dissertation (*) Offered: AWSpS.

Civil and Environmental Engineering

201 More

Civil and environmental engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities include all transportation modes: highways, aerospace, rivers, and harbors; water resources, hydraulics, and coastal engineering; structures, mechanics, and geotechnical engineering; surveying, mapping, and photogrammetry; urban planning and development; water supply, wastewater treatment, and water-quality management; solid- and hazardous-waste disposal; and quality control and management of the air resources.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and system analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints.

To accommodate these wide interests, the department is organized into six academic areas: construction management; transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and water resources, hydrology, and hydraulic systems.

Undergraduate Program

Adviser
201 More, Box 352700
206-543-5092
The Department of Civil and Environmental Engineering offers the following program of study:

- The Bachelor of Science in Civil Engineering degree

Bachelor of Science in Civil Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121; CSE 142; English composition.

Department Admission Requirements

Admission to the department is usually at the junior level. Admission is competitive. Thus, completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department’s admission decision. Applications are accepted for autumn quarter only; application deadline is July 1. See department office for admission application.

The primary admission criterion is probable success in the engineering degree program as evidenced by academic performance, work experience, and other factors. Completion of the following courses with a minimum grade of 2.0 in each course and a minimum cumulative GPA of 2.50: MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; CSE/ENGR 142; A A 210, CEE 220; M E 230; and 5 credits of English composition.

Prospective students should read the information on prerequisites courses and application procedures on the department Web site. Applications are accepted through the College of Engineering online application form.

Graduation Requirements

180 credits as follows:

- General Education Requirements: 105 credits.
- Major Requirements: 75 credits

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, scientific, and engineering principles in formulating and solving civil engineering problems; demonstrate sufficient mastery of core civil engineering topics suitable for entry into the profession and for graduate study; gain significant experience in designing systems and components in civil and environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.

- Instructional and Research Facilities: The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental science and hazardous waste research laboratory facilities include more than 7,000 sq. ft. of lab space, well equipped with sophisticated research instruments. The lake-stream laboratory is equipped with limnological equipment, as well as an autoanalyzer, bench-top incubators, and research microscopes. The structural research laboratory contains an earthquake simulator, a modern MTS testing system, and a 2.4 million lb. capacity Baldwin universal hydraulic testing machine. The geotechnical engineering laboratory contains soil testing equipment, including triaxial testing devices, a microcomputer-controlled GDS pressure control system, a Bishop-Wesley cell, a recently developed cuboidal shear device, a CKC cyclic triaxial device, and a SBEL (Stokoe) resonant column.

Research, Internships, and Service Learning: Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the academic year. Many companies advertise internship and job openings through the department and meet with students for on-campus recruiting sessions.

Department Scholarships: The department offers twenty or more scholarships a year. Scholarship applications are available on the College of Engineering Web site and are accepted once a year on April 1. Sophomores may apply for a scholarship before being formally admitted. In addition to departmental scholarships, several companies and private agencies advertise scholarships throughout the year.

Student Organizations/Associations: American Society of Civil Engineers. Chi Epsilon, national honor society for civil engineering undergraduate and graduate students. See adviser for details.

Graduate Program

Graduate Program Coordinator 201 More, Box 352700 206-543-2574

The Department of Civil and Environmental Engineering offers courses leading to the degrees of Master of Science in Civil Engineering and Doctor of Philosophy. The department also provides authorized options leading to the College-wide Master of Science and Master of Science in Engineering degrees.

The three master’s programs are intended to accommodate the needs of three categories of students: the M.S.C.E. degree is for those who have completed an undergraduate degree in civil engineering and plan to continue with their professional training; the College-wide M.S.E. degree is for other engineering graduates who wish to do graduate work in civil and environmental engineering; and the College-wide M.S. degree is for those whose Bachelor of Science degrees are not in engineering, but who desire to apply their training in science to the solution of problems in some specific sector related to civil and environmental engineering. The non-engineer may be required to take additional course work to obtain an M.S.E. degree.

Graduate work is offered in most fields of civil and environmental engineering, including transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and water resources, hydrology, and hydraulic systems. Priority for admission is based on an applicant’s apparent ability to progress satisfactorily in a graduate degree program. The applicant’s scholastic record is of major importance; usually, at least a “B” or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

Degree Requirements

The master’s degree requires a minimum of 42 credits. A student may choose between a thesis and a course-work-only master’s degree. The thesis option requires 30 course-work credits, 3 seminar credits, and 9 thesis credits. The course-work-only master’s degree requires 39 course-work credits and 3 seminar credits. Both master’s degrees require 3 credits outside the major field of study, 5 credits minimum of 400- and 500-level courses in Civil and Environmental Engineering, and a minimum of one-half of the course-work credits in courses numbered 500 and above. Students working for the Ph.D. degree must complete an approved program of studies and research normally requiring an additional two or three years beyond the master’s degree.
Financial Aid
Research and teaching assistantships are available on a competitive basis. The number of positions depends upon the current level of funding. Additionally, there are a limited number of fellowships, scholarships, and traineeships.

Research Facilities
More Hall has structural, concrete, bituminous materials, soil mechanics, computer, water-quality, solid-wastes, and air-quality laboratories as well as an air-monitoring station and equipment for fieldwork in the construction, water, air, and solid-waste programs. Facilities for experimental studies in hydraulics and coastal engineering and in fluid mechanics are located in the Harris Hydraulics Laboratory.

Course Descriptions

CEE 220 Introduction to Mechanics of Materials (4) NW
Introduction to the concepts of stress, deformation, and strain in solid materials. Development of basic relationships between loads, stresses, and deflections of structural and machine elements such as rods, shafts, and beams. Load-carrying capacity of these elements under tension, compression, torsion, bending, and shear forces. Prerequisite: A A 210. Offered: AWSpS.

CEE 306 Construction Engineering I (3)
Introduction to construction engineering, planning, methods, contracts, and specifications. Scheduling manually and by using computer software. Production estimates; equipment selection; ownership and operating costs; role of the engineer in construction and cost estimating.

CEE 316 Surveying Engineering (4)

CEE 320 Transportation Engineering I (3)
Study of vehicular transportation fundamentals including geometric design, pavement design, traffic flow concepts, level of service analysis, intelligent transportation systems, travel demand prediction methods, and management of transportation systems. Includes a review of relevant vehicle operating characteristics.

CEE 342 Fluid Mechanics (4)

CEE 345 Hydraulic Engineering (4)
Extension and application of fluid mechanics principles to hydraulic engineering problems. Open channel flow, pipeline systems, turbomachinery, unsteady flow in pipes, diffusion and mixing processes, groundwater, surface water hydrology. Prerequisite: CEE 342. Offered: W.

CEE 350 Environmental Engineering — Water and Air Quality (4)
Description of water and air resources and parameters that characterize their quality, how their use alters their properties. Mass and energy balances as they apply to environmental systems. Global environment change. Basics of aquatic chemistry and microbiology applied to municipal water and wastewater treatment operations. Offered: Sp.

CEE 363 Constructional Materials (4)
General treatment of physical and mechanical properties and engineering behavior of metallic and nonmetallic materials. Steel, aluminum, asphalt concrete, Portland cement concrete, wood. Laboratory testing, instrumentation, and investigation into macrobehavior. Correlation with microstructure and various aspects of materials science.

CEE 366 Basic Soil Mechanics (4)
Introduction to basic soil properties, soil classification, volumetric relationships, compaction, consolidation, soil rheology, shear strength, bearing capacity, and lateral stresses against retaining structures. Prerequisite: CEE 220. Offered: Sp.

CEE 379 Elementary Structures I (4) Eberhard, Miller, Turkiyyah
Fundamental analysis and modeling of civil structural systems (trusses, beams, and frames), including design applications. Linear equilibrium, kinematics, and constitutive relations; formal solution procedures emphasizing element-based stiffness methods; computer-based and manual techniques; verification and interpretation of results; case studies involving local structures.

CEE 380 Elementary Structures II (4) MacRae, Roeder, Stanton
Structural design concepts, approaches, procedures, and codes. Characterization and determination of leads (dead, live, seismic, wind, etc.) Structural systems and system behavior (load paths, lateral and vertical response, failure modes and limit states). Structural component behavior and design (composite action, inelastic bending, column stability, member capacities). Prerequisite: CEE 379. Offered: Sp.

CEE 390 Civil Engineering Systems (3)
Introduction to civil engineering system processes. Decision methods, economic considerations, and optimization. Examples illustrating quantitative and subjective aspects of civil engineering practice. Offered: A.

CEE 391 Graphics Communication and Computer-Aided Design (3)
Introduction to graphics communication and computer-aided design tools to manipulate drawings, data, and geometric representations in civil engineering applications.

CEE 392 Basic Civil Engineering Computing (1)
Introduction to computer-based methods in civil and environmental engineering problems using Matlab.

CEE 405 Construction Planning and Scheduling (3)
Principles of construction planning and scheduling, including network analysis of construction activities, examination of arrow and precedence diagrams, time-cost tradeoffs, resource leveling, resource allocation, PERT, integrated cost/schedule systems, computer applications, and a CPM project.

CEE 406 Construction Engineering II (3)
Heavy construction equipment. Equipment economics, contractor equipment policies, equipment specifications, selection and performance of equipment, estimating productivity of construction equipment, and engineering support for construction operating. Prerequisite: CEE 306.

CEE 407 Contracts and Specifications (3)
Construction industry, forms of organizations, real property laws, and bidding procedures. Basic elements of contracts, types of specifications, general conditions of standard construction contracts, legal disputes related to construction contract provisions, surety bonds and construction insurance. Prerequisite: CEE 306.

CEE 410 Traffic Engineering Fundamentals (3)
General review of the fundamentals of traffic engineering, including their relationship to transportation operations management and planning, with emphasis on calculations and procedures in the Highway Capacity Manual; field surveys and data analysis. Prerequisite: CEE 320.

**CEE 412 Transportation Data Management (3)** Wang
Introduction to modern concepts, theories, and tools for transportation data management and analysis. Applications of software tools for transportation data storage, information retrieval, knowledge discovery, data exchange, on-line information sharing, statistical analysis, system optimization, and decision support.

**CEE 416 Urban Transportation Planning and Design (3)**
Brief review of major issues in urban transportation planning. Planning process discussed and transportation models introduced. Uses a systems framework, including goals and objectives, evaluation, implementation, and monitoring. A design term project, individual or small groups, utilizes material presented on a contemporary problem. Prerequisite: CEE 320. Offered: A.

**CEE 418 Computer-Aided Planning of Urban Systems (3)**
Survey of on-line planning applications; use of various on-line systems to solve urban systems design problems; investigations of hardware/software tradeoffs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with URBDP 429.

**CEE 421 Pavement Design (3)**

**CEE 422 Construction Materials II (4)**
Types, sources, uses, performance behavior from construction point of view of view of aggregates; asphalt products and mixtures; Portland cement, concrete, and other materials the civil engineer is responsible for selecting and manufacturing on job site. Includes laboratory work. Prerequisite: CEE 363. Offered: A.

**CEE 423 Heritage of Civil Engineering (3/4)** I&SS
Contribution of civil engineering to civilization based on the lives and projects of prominent engineers and cultures. Incidents and individuals from prehistory to the nineteenth century give the student an awareness of the profession and its influence on society. Industrial archaeology and historic sites are considered. An additional 1 credit may be earned by participating in a special project. Emphasis on the control of elements and the methodology, planning, objectives, and reasons for the project. May be used as social science distribution. Offered: W.

**CEE 424 GIS for Civil Engineers (3)**

**CEE 425 Reinforced Concrete Construction (3)** Janssen
Processes in constructing reinforced concrete structures. Identification and development of solutions to potential constructability problems. Lectures augmented with industry speakers and a field trip to a building under construction. Requires senior or graduate standing in Civil Engineering or Construction Management and familiarity with reinforced concrete design/construction.

**CEE 431 Seismology and Earthquake Engineering (3)** NW
Presents an overview of earthquake processes and details of the characteristics of destructive ground motion; illustrates the effects of such motion on engineering structures; reviews current practice in estimating earthquake hazards for important structures such as nuclear power plants. Prerequisite: either MATH 136 or both MATH 307 and MATH 308. Offered: jointly with ESS 465.

**CEE 436 Foundation Design (3)**

**CEE 437 Engineering Geology I (3)**
General overview of engineering geology and its importance to civil engineers. Topics include geologic processes, hazards, and classification of geologic materials, data synthesis, and natural construction materials.

**CEE 440 Professional Practice Studio (2)**
Fundamentals of integrated civil engineering design, professional services marketing, project management, team dynamics, total quality management, value engineering, professional liability, and applied ethics in engineering practice. Emphasis on written and oral communications and on ethical, social, and economic factors.

**CEE 441 Transportation and Construction Capstone (4)**
Comprehensive design project focusing on planning, design and construction of transportation project such as highways, transit, and airports. Prerequisite: CEE 320; CEE 440, which may be taken concurrently.

**CEE 442 Structural Geotechnical Design Project (4)**
Comprehensive team design project focusing on structural and geotechnical engineering. Requires design drawings, written reports, and oral presentations interfacing with related fields such as aesthetics and architecture, mechanical systems, traffic, environmental planning. Prerequisite: CEE 440; two courses from CEE 436, CEE 451, CEE 452, CEE 453, CEE 454, or CEE 457.

**CEE 443 Design of Subsurface Remediation Activities (4)**
Technologies for cleaning sites with subsurface contamination, including groundwater extraction, vapor extraction, groundwater containment, and in-situ treatment. Analytical tools and methods for making design calculations are emphasized. Comprehensive design project involving design and evaluation of site remediation activities required. Prerequisite: CEE 440.

**CEE 444 Water Resources and Hydraulic Engineering Design (4)**
Opportunity to effect design solutions for projects or major project components in such representative areas as reservoirs and associated systems for flood control, water supply, irrigation, and hydroelectric power, surface water control systems, fisheries related projects, small harbors, and coastal engineering problems. Prerequisite: CEE 440.

**CEE 445 Environmental Engineering Design Project (4)**
Individual and group design studies addressing environmental engineering problems such as stormwater management, water and wastewater treatment facilities, and residual processing. Prepare proposals, engineering reports, and alternative evaluations; process equipment design, present reports on selected design projects. Prerequisite: CEE 345; either CEE 482 or CEE 483; CEE 440.

**CEE 451 Design of Metal Structures (3)**
Introduction to the design and behavior of metal structures using LRFD concepts. Application of design methods and codes to columns, beams, frames, connections, and tension members. Prerequisite: CEE 380; recommended: CEE 457, CEE 458.

**CEE 452 Design of Reinforced Concrete Structures (3)**
Introduction to sediment transport in steady flows with emphasis on applications illustrated by laboratory experiments and selected case boundary conditions, sediment motion, elementary tidal theory; Linear theory of water waves, wave transformations due to design and related case studies. Prerequisite: CEE 342; CEE 345. Mixing in reservoirs, lakes, coastal waters, and oceans; diffuser stratified flows; two-phase (bubble) flows; pollutant transport and Hydraulics related to environmental issues. Global hydrology; CEE 472 Introduction to Hydraulics in Water Resources (3) Fundamentals of design of buildings in reinforced concrete in accordance with current codes and practices. Prerequisite: CEE 380. CEE 453 Prestressed Concrete Design (3) Analysis, design, and construction of prestressed concrete structures. CEE 454 Design of Timber Structures (3) The design and construction of timber structures, using elements made of sawn wood, glued-laminated wood, and plywood. Prerequisite: CEE 380. CEE 455 Structural Unit Masonry (3) Structural behavior and design of reinforced brick, tile, and unit concrete masonry structures. Prerequisite: CEE 380. Offered: jointly with ARCH 426. CEE 457 Advanced Structures I (3) The displacement method in matrix form with programming applications. Fundamentals of modeling of various types of structures. Prerequisite: CEE 380. CEE 458 Advanced Structures II (3) Introduction to stability, including a consideration of elastic and inelastic buckling with applications to beam-columns and plates. Introduction to plastic analysis. Prerequisite: CEE 379. CEE 459 Advanced Structural Mechanics (3) Formulation of and solution of the basic equations of elasticity. Applications in 2-D stress analysis, torsion, thermal stresses, and beams on elastic foundation. Plate theory optional. Prerequisite: CEE 379. CEE 461 Biological Problems in Water Pollution (3/5) NW Ecological risk assessment of toxic chemicals and problems associated with electrical power production. Considers safety and toxicity and effects on individuals, populations, and communities. Laboratory covers simulation models of chemical exposure and community effects. Recommended: senior or graduate standing in fisheries, engineering, or related field. Offered: jointly with FISH 430. CEE 462 Applied Limnology and Pollutant Effects on Freshwater (3/5) NW Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication; acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. CEE 463 Subsurface Contaminant Transport (3) Principles of transport through porous media used to study fate and movement of subsurface contamination. Processes include aqueous phase transport, flow of immiscible fluids, vapor transport, solid-liquid-vapor interactions. Techniques for simulating transport processes presented. Effects of subsurface heterogeneities and uncertainties are emphasized. Prerequisite: CEE 342. CEE 472 Introduction to Hydraulics in Water Resources (3) Hydraulics related to environmental issues. Global hydrology; stratified flows; two-phase (bubble) flows; pollutant transport and mixing in reservoirs, lakes, coastal waters, and oceans; diffuser design and related case studies. Prerequisite: CEE 342; CEE 345. CEE 473 Coastal Engineering I (3) Linear theory of water waves, wave transformations due to boundary conditions, sediment motion, elementary tidal theory; applications illustrated by laboratory experiments and selected case histories. Prerequisite: CEE 342. CEE 474 Hydraulics of Sediment Transport (3) Introduction to sediment transport in steady flows with emphasis on physical principles governing the motion of sediment particles. Topics include sediment characteristics, initiation of particle motion, particle suspension, bedforms, streambed roughness analysis, sediment discharge formulae, and modeling of scour and deposition in rivers and channels. Prerequisite: CEE 345. CEE 475 Analysis Techniques for Groundwater Flow (3) Development of appropriate equations to describe saturated groundwater flow, and application of numerical methods for solving groundwater flow problems and flow to wells. Participants required to solve specific problems using numerical techniques developed during the course. Prerequisite: CEE 342. CEE 476 Physical Hydrology (3) Global water picture, data sources and data homogeneity, precipitation, evapotranspiration, hydrographs. Hydrologic data frequency analysis. Hydrologic design: flood mitigation, drainage. Introduction to deterministic and stochastic models. CEE 477 Open-Channel Engineering (3) Water flow in natural and constructed channels. Analysis and design of canals, transitions, energy dissipators, and similar structures. Analysis of surface profiles and effect of nonlinear alignment on flow. Introduction to river mechanics. Design-oriented problems. Prerequisite: CEE 345. CEE 480 Air-Quality Modeling (3) Evaluation of air-quality models relating air pollution emissions to environmental concentrations. Topics include meteorological dispersion models and various “receptor” models based on chemical “fingerprinting” of sources. Emphasizes current problems. Offered: jointly with ATM S 480. CEE 481 Hydraulic Design for Environmental Engineering (3) Stensel Introduction to the theory and the practice of planning and design of urban water supply distribution, pump stations, and sewage and storm-water collection systems. Evaluation of service areas and service requirements and their relationships to urban and regional planning activities. Engineering methods and computer programs for designing basic system elements. Prerequisite: CEE 345; CEE 350. CEE 482 Wastewater Treatment and Reuse (3) Introduction to wastewater treatment and systems, emphasizing fundamental biological, chemical and physical processes related to protection of public health and water pollution control. Process analysis of the configuration of sizing of major types of treatment processes for various sizes of plants and effluent requirements. Prerequisite: CEE 350. CEE 483 Drinking Water Treatment (3) Scientific and engineering principles underlying drinking water treatment; analysis of key contaminants; development of conceptual models for how and why treatment processes work and mathematical models describing their performance under various design and operating scenarios; field trips to water treatment systems. Prerequisite: CEE 350. CEE 484 On-Site Wastewater Disposal (3) Latest information on design, construction, operation, maintenance of individual and small community wastewater disposal systems. Conventional water carriage septic tank soil absorption systems considered with new alternatives, such as mounds, evapotranspiration systems, anaerobic filters, pressure drainfields, sand filters. Nonwater carriage methods studied. Pressure and vacuum sewers introduced. CEE 485 Environmental Engineering Chemistry (3) Benjamin, Korshin Fundamentals of chemical equilibrium in natural water systems.
Behavior of open and closed aqueous and multi-media (air/water/solids) systems. Chemistry of major species affecting the environment. Identification of key parameters for characterizing water quality and of chemical processes. Recommended: one year of general chemistry or equivalent.

CEE 486 Environmental Analysis Laboratory (3)
Introduction to water quality parameters; theory of instrumentation and methods used for the environmental analysis. Laboratory analysis of environmental samples using a variety of techniques including titrations, chromatography, and absorption and emission spectrophotometry. Recommended: one year of general chemistry.

CEE 487 Solid-Waste Disposal (3)
Describes sources and handling of municipal and industrial solid waste, with examination of collection, processing, recycling and resource recovery, and disposal alternatives. Public policy issues, local agencies and solid waste facilities, the legal and regulatory framework are all addressed in context of solid waste engineering.

CEE 488 Hazardous Wastes Engineering (3)
Classification of hazardous wastes; resource conservation, Recovery Act regulations; characteristics and behavior of toxic organics; superfund; groundwater contamination, solutions. Hazardous waste site remedial action; case histories; sampling; landfill design. Stabilization and processing technologies, including incineration, carbon adsorption, emerging techniques. Prerequisite: CEE 351.

CEE 489 Water and Air Quality Sampling (2)
Samples collected from lakes, streams, precipitation, and air and resulting (and supplemental) data interpreted for cause-effect and statistical inference. Design for water and air quality monitoring programs. Prerequisite: CEE 462.

CEE 490 Air-Pollution Control (4)
Fundamental concepts of air pollution. Emission sources, atmospheric dispersion, ambient concentrations, adverse effects, governmental regulations, emission standards, air-quality standards, processes and equipment for controlling emissions. Offered: jointly with ENV H 461.

CEE 491 Deterministic Systems (3)
Development of quantitative methods for mathematical problem solving with emphasis on computer applications. Linear programming, mathematics of the simplex algorithm, sensitivity analysis, dynamic programming, systems simulation, and goal programming. Class project required. Prerequisite: CEE 390.

CEE 492 Stochastic Systems (3)
Introduction to probability distributions and statistics useful in systems analysis, conditional distributions, queuing theory and applications, Monte Carlo simulation, chance-constrained mathematical programming, and stochastic dynamic programming. Emphasis on application of the techniques to civil engineering systems problems, including transportation, water resources, and structures. Prerequisite: CEE 491.

CEE 493 Air-Pollution Source Testing and Equipment Evaluation (3)
Engineering evaluation of air pollutant sources and air control equipment. Air-pollutant source testing and stack sampling. Analysis of equipollutance and source emissions in the field and in the laboratory.

CEE 494 Air-Pollution Control Equipment Design (3)
Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for absorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CHEM E/M E 468.

CEE 495 Sustainability and Design for Environment (3)
Cooper
Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/M E 415; S.

CEE 498 Special Topics (1-5, max. 5)
Special topics in civil engineering offered as course with lecture and/or laboratory. Maximum of 6 credits in combination of 498 and 499 may be applied toward an undergraduate degree.

CEE 499 Special Projects (1-5, max. 5)
Individual undergraduate research projects. Maximum of 6 credits in combination of 498 and 499 may be applied toward an undergraduate degree. Recommended: 400-level CEE course.

CEE 500 Civil and Environmental Engineering Seminars (1)
Credit/no credit only. Prerequisite: graduate standing in Civil and Environmental Engineering.

CEE 501 Structural Mechanics (6)
Elias, Miller, Turkayyyah

CEE 502 Structural Dynamics (3)
Eberhard, MacRae, Reed

CEE 503 Materials Modeling (3)
Miller, Reed, Roeder

CEE 504 Finite Element Methods in Structural Mechanics (3)
Extension of the matrix methods of structural analysis to the solution of elasticity, plate, and shell problems by use of finite element approximations. Discussion of convergence and bounding and extension to investigation of stability and finite deformations. Prerequisite: CESM 501 or permission of instructor.

CEE 508 Continuum Mechanics (3)
Elias, Miller
General foundation of fundamental concepts of motion, stress, and energy for a continuum. General equations of conservation of mass, momentum, and energy. Linear and nonlinear elastic, viscous, and inelastic materials. Prerequisite: CEE 501. Offered: jointly with A A 575.

CEE 511 Advanced Reinforced Concrete (3)
Eberhard, MacRae, Stanton
Behavior and design of reinforced concrete members and structures. Members subject to torsion and torsion combined with flexure and shear; members with small shear span/depth ratios, slabs. Offered: A.

CEE 512 Advanced Structural Systems (3)
Eberhard, Stanton
Prestress loss. Design of statically indeterminate prestressed concrete structures; continuous beam, frame, and slab structures (cast in place or assembled from precast units). Prerequisite: CEE 453 or equivalent. Offered: Sp.
CEE 513 Advanced Steel I (3) MacRae, Roeder
Factors influencing strength and serviceability of steel structures; LRFD limit state design procedures. Use of theories of plasticity and stability in development of design methods and specifications, bolted and welded connections, temperature effects, and effect of different fabrication methods on behavior of structure. Prerequisite: CEE 501, CEE 503. Offered: W.

CEE 515 Earthquake Engineering I (3)
Earthquake mechanism and ground shaking, response spectra, linear elastic methods for prediction of behavior, displacement prediction methods for inelastically behaving structures, modeling and solution schemes, earthquake design philosophy, capacity design. Reinforced concrete, steel, and base-isolated structures. Prerequisite: CEE 517.

CEE 516 Earthquake Engineering II (3)
Performance-based design, development of fragility curves, characteristics and effects of ground-shaking records, design methods, passive and active control, dynamic inelastic time history analysis, design of parts, system detailing, soil-structure interaction, repair and retrofit of structures. Prerequisite: CEE 515.

CEE 517 Wind Engineering Design (3)
Wind effects on structures, including atmospheric boundary layer flow; bluff body aerodynamics; structural dynamics and aeroelasticity; development and use of the ASCE Standards; estimation of along-wind, across-wind, and torsional response of tall buildings; design strategies for avoiding wind-induced discomfort. Fundamentals of wind tunnel testing.

CEE 518 Reliability and Design (3)
Introduction to theory of structural reliability and its application to design procedures in civil engineering, including probability theory; assessment of uncertainties; code specification (first-order, second-moment format) and the related concept of risk and the influence of socioeconomic factors; loads, load combinations, and probabilities of damage.

CEE 520 Seepage and Consolidation (3)
Confined and unconfined seepage through porous media, flow net solutions, consolidation, settlement, numerical solution of seepage, and consolidation problems. Prerequisite: CEE 366 or equivalent.

CEE 522 Shear Strength and Slope Stability (3)
Shear strength of cohesive and cohesionless soils and slope stability analysis of natural and man-made slopes. Prerequisite: CEE 366 or equivalent.

CEE 523 Advanced Foundation Engineering (3)
Design of shallow and deep foundations for bearing capacity and settlement. Construction considerations. Prerequisite: CEE 522 and CEE 527.

CEE 524 Lateral Earth Pressures and Retaining Structures (3)
Lateral earth pressure theory. Design of temporary and permanent retaining structures including in situ reinforcement. Prerequisite: CEE 522, CEE 527.

CEE 526 Geotechnical Earthquake Engineering (3)
Plate tectonics and elastic rebound theory of earthquakes and faults; characterization of ground motions; seismicity; seismic risk analysis; effect of local soil conditions on ground response; development of design ground motions; liquefaction; dynamic lateral earth pressures; seismic slope stability. Prerequisite: CEE 525 or permission of instructor.

CEE 527 Advanced Geotechnical Laboratory (4)
Soil and site investigation, classification and engineering properties of soils and rock as determined by standard and advanced test procedures and equipment. Evaluation of test data. Report writing. Prerequisite: CEE 366 or equivalent.

CEE 528 Geosynthetic Engineering (3)
Identification and testing of geosynthetics. Design of geosynthetic filters, roadway stabilization, earth reinforcement, and waste containment systems. Prerequisite: CEE 522 and CEE 523.

CEE 529 Foundation Soil Improvement (3)
Analysis and design of physical and chemical treatment techniques commonly applied to problem foundation soils for civil engineering structure. Prerequisite: CEE 523.

CEE 530 Engineering Geology II (3)
Application of engineering geology fundamentals to: location, design and maintenance of engineered structures; policy decisions related to potential geological hazards. Case histories, governmental policy discussions, interpretation of geological maps for engineering purposes. Prerequisite: graduate standing and CEE 437 or permission of instructor.

CEE 531 Rock Engineering (3)
Engineering classification, physical and mechanical properties of rocks, failure modes and initial stresses in rocks, laboratory and field testing of rocks, rock slope engineering, underground openings, foundations on rocks. Prerequisite: graduate standing and CEE 366 or permission of instructor.

CEE 540 Microbiological Process Fundamentals (3) Stensel
Fundamental concepts for microbial processes including organic chemical structure, nomenclature and environmental properties, principles of microbial metabolism, study of specific types of bacteria important to environmental engineering and their metabolism, development of microbial kinetic equations, including substrate utilization, energetics, and stoichiometry. Prerequisite: permission of instructor.

CEE 541 Biological Treatment Systems (3)
Basic reactions, design principles, current design models, and operational considerations for biological treatment systems used in environmental engineering. Applications include activated sludge design and optimization, fixed film reactors, nitrification, nitrogen removal, phosphorus removal, anaerobic treatment, and toxic organics removal. Prerequisite: CEE 540 and CEE 482 or equivalent.

CEE 542 Bioremediation of Environmental Pollutants (3) Herwig, Strand
Detailed survey of current understanding of biological pathways for transformation and degradation of toxic organic compounds, pesticides, oil, and metals. Microbial and plant transformations of pollutants and requirements for bioremediation. Requires basic understanding of metabolism and organic chemistry. Prerequisite: biological science course. Offered: jointly with ESC 518/MICROM 518; W.

CEE 543 Aquatic Chemistry (3) Benjamin, Ferguson, Murray
Principles of chemical equilibrium applicable to natural water systems and water and waste treatment processes. Chemical thermodynamics. Characteristics of acid/base, gas/liquid, solid/liquid, oxidation/reduction, and adsorption and equilibria. Computer models for chemical speciation. Offered: jointly with OCEAN 521. Prerequisite: Graduate standing or permission of instructor.

CEE 544 Physical-Chemical Treatment Processes (4)
Principles and design of major physical-chemical unit processes used in water, wastewater, and hazardous waste treatment. Processes include chemical and reactor kinetics, filtration, chemical coagulation, ion exchange, adsorption, and gas transfer. Development of mathematical models, laboratory demonstrations, and evaluation of current design practice. Prerequisite: CEE 485 or permission of instructor.
CEE 545 Advanced Environmental Chemistry (3)
Behavior of controlled chemical species (heavy metals, pesticides, disinfection by-products, and endocrine disruptors) and persistent organic pollutants in the environment. Modeling of chemical interactions pertinent to environmental technologies (ozonation, advanced oxidation, photochemical transformations, halogenation, dehalogenation, application of zero-valence metals and electrochemical controls). Prerequisite: aquatic chemistry or permission of instructor.

CEE 546 Topics in Ecological Effects of Wastewater (3)
Application of ecological concepts for analysis and interpretation of bioenvironmental problems and data (eutrophication, acid rain, and toxicity). Students participate in presentation and discussion of current research. Prerequisite: CEE 462 or BIOL 473 or permission of instructor.

CEE 547 Lake and Watershed Management (3)
Application of current techniques for lake and watershed analysis and modeling using fundamentals of limnology. Approaches to restoring eutrophic lakes, land use impacts on water quality. Practical exercises using data from real lake systems. Prerequisite: CEE 462/FISH 434, BIOL 473, or permission of instructor.

CEE 549 Advanced Topics in Environmental Engineering, Chemistry, and Biology (3)
Special topics of current importance in environmental engineering. Application of fundamental chemical and biological principles to the study of such phenomena as the behavior of aqueous colloids, corrosion processes, bacterial metabolism in chemically complex solutions, and acid precipitation. May be taken more than once for credit. Prerequisite: CEE 540, CEE 541.

CEE 550 Environmental Chemical Modeling (3) Benjamin, Murray
Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications include acid mine drainage, acid deposition, and groundwater and lake water contamination. Offered: jointly with OCEAN 524.

CEE 553 Seminar-Topics in Atmospheric Chemistry (1-3, max. 6) Charlson, Harrison
Seminar for atmospheric scientists, chemists, engineers in problems associated with the chemical composition of the atmosphere. Covers wide variety of topics, ranging from the natural system to urban pollution and global atmospheric change. Faculty lectures, student participation. Prerequisite: ATM S 301 or permission of instructor. Offered: jointly with ATM S 525.

CEE 554 Acoustics of Environmental Noise (4)
Offered: jointly with M E 528.

CEE 555 Topics in Environmental Health (3)
Introduction to human biology, including physiology, epidemiology, and toxicology. Study of contemporary environmental health problems and practices as they relate to radiological health, solid-waste disposal, occupational health, biometeorology, and bioengineering.

CEE 556 Hazardous Air Pollution (3)

CEE 557 Air Resources Management (3)
Technical, administrative, and legal aspects of air conservation. Current case studies involving engineering analysis, air-quality modeling, and regulatory aspects at local, state, and federal governmental levels.

CEE 558 Control of Gaseous Air Pollutants (3)
Physical and chemical processes used to control gaseous air pollutants. Absorption into liquids. Aqueous spray dry scrubbers. Adsorption beds. Control of sulfur oxide and nitrogen oxide. Case studies of control systems. Prerequisite: CHEM E 435 or permission of instructor. Offered: jointly with CHEM E 566; even years.

CEE 559 Control of Particulate Air Pollutants (3)
Processes used to control emissions of particulate air pollutants. Use of settling chambers, cyclones, fabric filters, wet scrubbers, and electrostatic precipitators to control aerosol particles. Case studies of particulate air-pollutant control systems. Prerequisite: CEE 468 or permission of instructor. Offered: jointly with CHEM E 567; odd years.

CEE 560 Risk Assessment for Environmental Health Hazards (3/4) Faustman
Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with ENV H 577/PB AF 589; A.

CEE 570 Hydrodynamics (4)
Applications of the equations of motion to the flow of ideal and real fluids. Fundamentals of fluid potential motion. Viscous flows; Navier-Stokes equations and some exact solutions. Boundary-layer theory. Introduction to turbulence. Two- and three-dimensional examples, including free surface flows. Applications of field equations to problems of engineering significance. Prerequisite: CEE 342 or equivalent.

CEE 571 Hydrodynamics in Water Quality (3)
Theoretical, field study, and laboratory model approaches to diffusion in transport problems of concern to water resources engineers. Prerequisite: CEE 342 or permission of instructor.

CEE 572 Water Wave Mechanics (3)

CEE 573 Advanced Computational Hydraulics (4)
Review of hydrodynamic and transport equations for hydraulic engineering application; numerical solution methods; implementation and practice with existing two- and three-dimensional numerical models; numerical model calibration and verification techniques; case studies. Theoretical and civil engineering decision makers aspects. Prerequisite: CEWA 474, CEE 570, CEE 571 or permission of instructor.

CEE 574 Advanced Hydrology (3)
Detailed treatment of statistical methods used in hydrologic analysis. Stochastic hydrology, detailed examination and use of a deterministic watershed model (e.g., Stanford Watershed Model). Prerequisite: graduate standing in civil engineering or permission of instructor.

CEE 575 Groundwater Transport Modeling (3)
Review of equations for flow and transport in porous media; techniques for simulating transport as boundary value problems;
analytical and numerical solution techniques; finite element models; field-scale applications and case histories.

CEE 576 Water Resources Planning (3) Palmer
Engineering, social, and economic factors involved in water resource development and management; water policies, programs, and administration; use relationships and conflicts; considerations for regional water resource systems. Offered: W.

CEE 577 Water-Quality Management (3)
Application of biological, ecological, and chemical processes to modeling of water quality and use of such models in appropriate management of water resource systems. Includes units on the modeling of temperature, BOD, nutrient, phytoplankton, zooplankton, and other processes in lakes, streams, and estuaries. Recommended: CEE 476, CEE 485, CEE 462/FISH 434, and CEE 491.

CEE 578 Water Resource System Management and Operations (3) Burges, Palmer
A readings course in recent literature related to the modeling and management of water resources. Topics include drought management, expansion of existing water supplies, hydropower production, streamflow forecasting, water demand forecasting, regional water planning, climate change, and other topical issues. Recommended: 557, 558. Offered: A.

CEE 579 Advanced Traffic Detection Systems (3) Wang
Introduction to advanced tracking and detection technologies in transportation engineering, including Global Positioning Systems (GPS), inductance loop detection systems, remote traffic microwave radar, computer-vision based technologies, and other emerging detection technologies with cutting-edge research in these areas.

CEE 580 Urban Transportation Planning (4) Rutherford
Introduction to transportation planning, including trends and issues, land use and transportation interaction, surveys, public involvement, demand management, technology, forecasting, impacts, and policy strategies.

CEE 581 Travel Demand Forecasting (4) Rutherford
Application of mathematical models to forecast urban travel behavior. Introduces emerging methods, land use models, travel demand models, including trip generation, trip distribution, mode choice, and network assignment. Discusses validation and ethics.

CEE 582 Intelligent Transportation Systems (3)
Application of modern computer and communication technologies to transportation systems. Benefits to public agencies, commercial companies, and travelers. Coordination between private and public sectors. Intelligent Transportation System’s (ITS) social, organizational, and operational changes.

CEE 583 Airport Engineering (3)
Definitions and terminology relating to airport engineering. Characteristics of aircraft, air traffic control, and resulting impact upon design process. Airport capacity, configuration, and planning associated with terminal design. Emphasis on geometric and structural design of pavements and airside. Design projects relating to airport engineering required. Prerequisite: permission of instructor.

CEE 584 Analytical Methods in Transportation I (3)
Application of analytical and statistical methods to transportation planning problems. Analysis of probability distributions that describe variables. Development of statistical models for predicting transportation phenomena. Elementary sampling theory hypothesis testing, regression analysis, time series analysis, applied to transportation data. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

CEE 585 Analytical Methods in Transportation II (3)
Applications of advanced econometric methods to transportation issues. Topics include, but not limited to, systems of equations, duration models, limited dependent variable approaches, and count models. Hands-on modeling, with numerous data sets, available for application. Collaborative projects. Prerequisite: CEE 584 or permission of instructor.

CEE 586 Transportation Infrastructure Management (3)
CEE 587 Transportation Networks (3) Mannering, Shankar
Traffic flow, theories of traffic, user equilibrium and system-optimal assignments, and algorithms used for network assignment. Theoretical and empirical traffic assignments, multivariate characteristics of traffic flow on networks. Interactive work with network and econometric models.

CEE 588 Land Use/Transportation Models (3)
Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with URBDP 530.

CEE 589 Transit Systems Planning (3)
Planning, operational methods for urban public transportation. Review of technological, operating characteristics of vehicles and systems; financing, management, institutional aspects. Paratransit. Short-range planning, operational strategies, revenue-fare structures. Service monitoring. Mode choice, transit demand relating to service. Computer-aided methods for planning, design of transit systems. Prerequisite: graduate standing or permission of instructor.

CEE 590 Traffic Systems Operations (3)
Operational planning, management of arterial and freeway traffic systems. Review of transportation system management strategies to achieve more efficient use of existing infrastructure, including improved and innovative traffic control systems and demand management policies, measures of effectiveness, impact assessment, traveler response. Introduction to use of relevant computer models and packages.

CEE 591 Freight Transportation (3)
Overview of the technical and institutional aspects of transporting freight. Topics include the different modes of moving freight, the technology of transferring freight between modes at ports and terminals, issues that impact freight movement such as congestion and government regulation, and the future of freight mobility.

CEE 592 Transit Systems Analysis (3)
Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with URBDP 530.

CEE 593 Construction Labor Law (3) Goldblatt
In-depth study of construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Examines importance of labor relations in construction firms, whether in a union setting or an open shop environment.

CEE 594 Construction Automation (3)
Motivations, methods, and technologies for developing automation and robotics in the construction industry. Examples range from computers to mechanical systems, from laboratory research to field applications. Topics include database management systems (DBMS), artificial intelligence, data collection and communications technologies, sensor technologies, and robotic mechanical systems.

CEE 595 Construction Productivity (3)
Work improvement techniques applied to construction operations. Review of major contributions in behavioral science that may be applicable to the construction industry. Case studies. Innovative productivity programs successfully implemented on construction projects. Safety on construction projects, especially as influenced by managerial practices.

530
Computer Science and Engineering

AC101 Paul G. Allen Center for Computer Science and Engineering

Computer science is the study of information and algorithms within the context of real and abstract computing devices. Computer scientists are interested in such topics as the representation and storage of information; algorithms to access, display, edit, and transform information; programming languages to express algorithms; and hardware and software processors to execute algorithms. These concerns lead to practical developments in computer systems software, such as operating systems and compilers; in application areas, such as artificial intelligence, computer graphics, and computational biology; and also to theoretical investigations of computers, algorithms, and data.

Computer engineering is a closely related field concerned with the design and practical application of computer hardware and software systems to the solution of technological, economic, and societal problems. The computer engineer analyzes a problem and selects from a variety of tools and technologies those most appropriate for its solution. A computer engineer can expect to be involved in hardware design, software creation, and systems integration.

Undergraduate Program

Adviser
101 Paul G. Allen Center for Computer Science and Engineering, Box 352350
206-543-1695
ugrad-advisor@cs.washington.edu

The Department of Computer Science and Engineering offers the following programs of study:
• The Bachelor of Science in Computer Engineering degree
• The Bachelor of Science degree with a major in computer science (see Computer Science section)

The core requirements of the two undergraduate majors are identical. The computer engineering major may be more appropriate for students who are interested in creating and building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints. The program includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole. The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program (for example, mathematics or economics), who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the theory, design, and implementation of software systems and applications (for example, the techniques of modern compilers or the algorithms behind computer graphics and animation).

Bachelor of Science in Computer Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CSE 142, CSE 143; English composition.

Department Admission Requirements

Applicants are considered in two groups — Direct Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

Direct Admission

Computer Science and Engineering enrolls up to 20 percent of its incoming class directly out of high school, prior to completion of university-level prerequisites. Freshman applicants to the University listing Computer Science or Computer Engineering as their intended major are automatically considered. Competitive applicants will have taken calculus and at least one year of laboratory science (preferably physics) upon entering the University. Admission is for autumn quarter only.

Upper-Division Admission

Course requirements:
• MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), PHYS 121, PHYS 122, CSE 142, CSE 143, and at least 5 credits of English composition.

Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.

Graduation Requirements

180 Credits as follows:

General Education Requirements (81-84 credits)

Written and Oral Communication (12 credits): 5-credit course in English composition from the University-approved list; T C 231; T C 333, or department-approved alternative.

Visual, Literary, and Performing Arts (VLP A) and Individuals and Societies (I&S) (30 credits): A minimum of 10 credits in each required area.

Natural World (39-42 credits):
• Mathematics (19-22 credits): MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken); MATH/STAT 390 or STAT 391.

Science (20 credits): PHYS 121, PHYS 122, and 10 additional credits from the list of approved natural science courses in the CS&E Handbook. Courses that meet the department’s science requirement include any course in biology, chemistry, physics, earth and space sciences, astronomy, or atmospheric sciences that requires PHYS 121 or CHEM 142/145 145 as a prerequisite.

Major Requirements (96-98 credits)

Required Courses (44 credits): CSE 142, CSE 143, CSE 321, CSE 322, CSE 326, CSE 341, CSE 370, CSE 378, CSE 431, CSE 461; E E 235

Hardware Specialization (27 credits): E E 233; CSE 466, CSE 467; and 9 credits from courses on the approved senior elective course list in the CS&E Handbook.

Software Specialization (25-27 credits): CSE 403; two from CSE 401, CSE 421, CSE 444, CSE 471; and 10 credits from courses on the approved senior elective course list in the CS&E Handbook.

Transfer students must earn a minimum of 24 graded credits toward the major at the UW.
Student Outcomes and Opportunities

- **Learning Objectives and Expected Outcomes:** The program provides an in-depth education in computer engineering while retaining strong foundations in traditional electrical engineering and computer science. The computer engineering program involves digital hardware, software, and architecture. Mathematics, engineering design, laboratory work, and communication-skills development are emphasized. A capstone design course applies the knowledge and skills collected during the program to a major team project.

The computer science field has a broad base of private- and public-sector jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, applications programmer, technical sales and marketing, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers. The field is also highly valued for practicing entrepreneurship and is considered one of the most vibrant in the sciences.

- **Instructional and Research Facilities:** In autumn 2003 the department moved to the new state-of-the-art • Paul G Allen Center for Computer Science and Engineering. The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

- **Honors Options Available:** With College Honors. With Distinction. See adviser for details.

- **Research, Internships, and Service Learning:** Internships and co-op opportunities are available for computer science undergraduates. See http://www.engr.washington.edu/coop and http://depts.washington.edu/careers for information.

- **Departmental Scholarships:** CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at www.cs.washington.edu/education/upradscholars/scholarships.html.

- **Student Organizations/Associations:** A student chapter of the Association for Computing Machinery (ACM) operates within CSE. The ACM helps to coordinate new active information technology industry professionals who wish to further their educational and professional goals. Courses are offered part-time in the evening to accommodate students working full-time.

To satisfy the requirements of the Professional Master’s Program, students must successfully complete eight core PMP courses and other courses providing 8 additional credits. The additional credits may be earned through participation in the department’s colloquium series, which features leading-edge researchers and developers in computer science from around the world. This series airs throughout the Puget Sound region on UWTV and through live Internet video. Students who take one course per quarter, plus 1 credit of colloquium, complete the program in two-and-a-half years.

Successful applicants to the program will have a bachelor’s degree in part-time graduate study in the evening, leading to an M.S. Programs are designed to provide considerable breadth of knowledge, as well as depth in an area of specialization.

The department has 40 faculty and is authorized to grow over the next few years. In addition, there are nearly 40 adjunct, affiliate and emeritus faculty members. The faculty is currently conducting research in the following areas: embedded systems and reconfigurable computing; computer architecture; networking; operating systems and distributed systems; programming systems; information retrieval, database systems, and intelligent Internet systems; software engineering; computer graphics, vision, and animation; human interface to computing; artificial intelligence; theory of computation; and computing and biology.

Full-Time Graduate Program

The full-time graduate program offers both M.S. and Ph.D. degrees. The M.S. degree can usually be completed in one to two years, and the Ph.D. degree can be completed in an additional three years. It is not necessary to complete an M.S. program before entering the Ph.D. program. Degree requirements are outlined in The Computer Science and Engineering Graduate Program Brochure, available from the department.

Application Requirements

Most entering graduate students are expected to have a solid background in computer science, including programming, machine theory, networking, and artificial intelligence. The field is also highly valued for practicing entrepreneurship and is considered one of the most vibrant in the sciences.

Complete applications must be received by December 15 for both U.S. and international students for autumn-quarter admission.

Assistantships

Research and teaching assistantships are available and are allocated on the basis of scholastic excellence and potential. All students accepted to the program are awarded three years of funding. Students who are applying for assistantships to start in autumn quarter should have all applications to the Graduate School and the department completed by December 15.

The application packet contains all the necessary forms for applying to the Graduate School and to the graduate program in Computer Science and Engineering and for consideration for assistantships.

Professional Master’s Program

The Professional Master’s degree program (PMP) is designed for active information technology industry professionals who wish to further their educational and professional goals. Courses are offered part-time in the evening to accommodate students working full-time.

Successful applicants to the program will have a bachelor’s degree in
computer science or a related field and professional experience in
advanced computing technology. Most incoming students will have
taken the following courses at the undergraduate level: data
structures, discrete math, machine organization, automata theory,
and programming languages, and will have extensive programming
experience.

Applications are accepted quarterly. Deadlines are July 1 for autumn
quarter; November 1 for the winter quarter; and February 1 for
spring quarter. For more information, see the department’s Web site.

Course Descriptions
CSE 100 Fluency in Information Technology (5) QSR
Introduces skills, concepts, and capabilities necessary to effectively
use information technology. Includes logical reasoning, managing
complexity, operation of computers and networks, and contempo-
rary applications such as effective Web searching and database
manipulation, ethical aspects, and social impacts of information
technology. Not available for credit to students who have completed
CSE 142 or ENGR 142. Offered: jointly with INFO 100.

CSE 142 Computer Programming I (4) NW, QSR
Basic programming-in-the-small abilities and concepts. Highlights
include procedural and functional abstraction with simple built-in
data type manipulation. Basic abilities of writing, executing, and
debugging programs. Offered: AWSpS.

CSE 143 Computer Programming II (5) NW, QSR
Continuation of 142. Concepts of modularity and encapsulation,
focusing on modules and abstract data types. Covers some basic data
structures. Prerequisite: CSE 142. Offered: AWSpS.

CSE 303 Concepts and Tools for Software Development (3)
Introduction to key concepts and tools in the development of
software not introduced in the introductory programming courses.
Includes programming with explicit memory management and
layout (e.g. C or C++), techniques for group software development,
modem design, implementation, and testing patterns and strategies,
and societal impact.

CSE 321 Discrete Structures (4)
Fundamentals of set theory, graph theory, enumeration, and
algebraic structures, with applications in computing. Prerequisite: CSE 143; either MATH 126, MATH 129, or MATH 136.

CSE 322 Introduction to Formal Models in Computer
Science (3)
Finite automata and regular expressions; context-free grammars and
pushdown automata; nondeterminism; Turing machines and the
halting problem. Emphasis on understanding models and their
applications and on rigorous use of basic techniques of analysis.
Induction proofs, simulation, diagonalization, and reduction
arguments. Prerequisite: CSE 321.

CSE 326 Data Structures (4)
Data types, abstract data types, and data structures. Efficiency of
algorithms. Sequential and linked implementation of lists. Binary
tree representations and traversals. Searching: dictionaries, priority
queues, hashing. Directed graphs, depth-first algorithms. Garbage
collection. Dynamic storage allocation. Internal and external
sorting. No credit to students who have completed CSE 373, CSE
374, or E E 374. Prerequisite: CSE 321.

CSE 341 Programming Languages (4)
Basic concepts of programming languages, including abstraction
mechanisms, types, and scoping. Detailed study of several different
programming paradigms, such as functional, object-oriented, and
logic programming. No credit if CSE 413 has been taken. Prerequi-
site: CSE 143.

CSE 370 Introduction to Digital Design (4)
Introductory course in digital logic and its specification and
simulation. Boolean algebra, combinational circuits including
arithmetic circuits and regular structures, sequential circuits including
finite-state-machines, use of programmable logic devices. Simulation
and high-level specification techniques are emphasized.

CSE 373 Data Structures and Algorithms (3)
Fundamental algorithms and data structures for implementation.
Techniques for solving problems by programming. Linked lists,
stacks, queues, directed graphs. Trees: representations, traversals.
Searching (hasing, binary search trees, multiway trees). Garbage
collection, memory management. Internal and external sorting. No
credit to students who have completed 326, 374, or E E 374.
Prerequisite: CSE 143.

CSE 378 Machine Organization and Assembly Language (4)
Differences and similarities in machine organization; central
processors; fundamentals of machine language and addressing;
assembly language programming, including macros; operating system
interfaces. No credit to students who have completed 410.
Prerequisite: CSE 143; CSE 370.

CSE 399 CSE Foreign Study (*)
Upper division computer science or computer engineering course,
taken through an approved study abroad program, which there are
no direct University of Washington equivalents. Credit/no credit
only.

CSE 401 Introduction to Compiler Construction (3)
Fundamentals of compilers and interpreters; symbol tables; lexical
analysis, syntax analysis, semantic analysis, code generation, and
optimizations for general purpose programming languages. No credit
to students who have taken 413. Prerequisite: CSE 322; CSE 326;
CSE 341; CSE 378.

CSE 403 Software Engineering (4)
Fundamentals of software engineering using a group project as the
basic vehicle. Topics covered include the software crisis, managing
complexity, requirements specification, architectural and detailed
design, testing and analysis, software process, and tools and
environments. Prerequisite: CSE 326; CSE 341; recommended:
project experience in an academic or work setting.

CSE 410 Computer Systems (3)
Structure and components of hardware and software systems.
Machine organization, including central processor and input-output
architectures; assembly language programming; operating systems,
including process, storage, and file management. No credit to
students who have completed 378 or 451. Prerequisite: CSE 373.

CSE 413 Programming Languages and Their Implementa-
tion (3)
Concepts and implementation strategies for ALGOL-class languages,
including Pascal, Modula, ALGOL 60, Ada. Compilers for ALGOL-
class languages. Languages with late binding times, including LISP,
APL, Smalltalk. No credit to students who have completed 341 or
401. Prerequisite: CSE 373.

CSE 415 Introduction to Artificial Intelligence (3) NW
Principles and programming techniques of artificial intelligence:
LISP, symbol manipulation, knowledge representation, logical and
probabilistic reasoning, learning, language understanding, vision,
expert systems, and social issues. Not open for credit to students
who have completed 473. Prerequisite: CSE 373.

CSE 417 Algorithms and Computational Complexity (3)
Design and analysis of algorithms and data structures. Efficient
algorithms for manipulating graphs and strings. Fast Fourier
Transform. Models of computation, including Turing machines.
Time and space complexity. NP-complete problems and undecidable
problems Prerequisite: CSE 373.
CSE 421 Introduction to Algorithms (3)
Techniques for design of efficient algorithms. Methods for showing lower bounds on computational complexity. Particular algorithms for sorting, searching, set manipulation, arithmetic, graph problems, pattern matching. Prerequisite: CSE 322; CSE 326.

CSE 431 Introduction to Theory of Computation (3)
Models of computation, computable and noncomputable functions, space and time complexity, tractable and intractable functions. Prerequisite: CSE 322.

CSE 444 Introduction to Database Systems (3)
Fundamental concepts, system organization, and implementation of database systems. Relational, hierarchical, and network data models; file organizations and data structures; query languages; query optimization; database design; concurrency control; security; issues involving distributed database systems. Prerequisite: CSE 326.

CSE 450 Animation Production Seminar (1)
Open to all students who have an interest in digital animation. Reviews and analyzes films, animated feature films, and television commercials. Emphasizes the technical and aesthetic basics of animation production in industry studio environments.

CSE 451 Introduction to Operating Systems (4)
Principles of operating systems. Process management, memory management, auxiliary storage management, resource allocation. No credit to students who have completed 410 or E E 474. Prerequisite: CSE 326; CSE 378.

CSE 454 Advanced Internet and Web Services (5)
Design of Internet search engines, including spider architecture, inverted indices, frequency rankings, latent semantic indexing, hyperlink analysis, and refinement interfaces. Construction of scalable and secure web services. Datamining Webserver logs to provide personalized and user-targeted services. Large project. Prerequisite: CSE 326.

CSE 455 Computer Vision (4))
Introduction to image analysis and interpreting the 3D world from image data. Topics may include feature detection, image segmentation, motion estimation, image mosaics, 3D-shape reconstruction, object recognition, and image retrieval. Prerequisite: CSE 326.

CSE 456 Story Design for Computer Animation (4)
Animation principles and production for story development and design. Design, development, and production of several storyreels, which are a tool for the pre-production of animated features and shorts. Student use authoring tools to present finished work.

CSE 457 Computer Graphics (4)
Introduction to computer image synthesis, modeling, and animation. Topics may include visual perception, color theory, displays and framebuffers, image processing, affine and projective transformations, quaternions, hierarchical modeling, hidden surface elimination, shading, ray-tracing, anti-aliasing, texture mapping, curves, surfaces, particle systems, dynamics, realistic character animation, and traditional animation principles. Prerequisite: CSE 326.

CSE 458 Computer Animation (5)
Introduction to basic principles of computer generated animation. Focus on the modeling and lighting of animated characters. Students from Art, CSE, and Music team up on projects to be built on commercially-available modeling and lighting packages. Prerequisite: either CSE 457, ART 380, or MUSIC 403.

CSE 459 Pre-Production for Collaborative Animation (5)
Pre-production of collaboratively designed animated shorts. In-depth analysis of classical and computer generated works. Character design and pre-planning, model sheets, character rigging, storyreel and animatics, character motion, design for multiple characters, and principles of animation as applied to character motion and effects. Prerequisite: CSE 458.

CSE 460 Animation Capstone (5)
Apply the knowledge gained in previous animation courses to produce a short animated film. Topics include scene planning, digital cinematography, creature and hard surface modeling, animatics and basics of character animation, and rendering techniques. Prerequisite: CSE 458, CSE 459.

CSE 461 Introduction to Computer-Communication Networks (4)

CSE 464 Advanced Topics in Digital Animation (5)
Students design individual animated works for professional quality demo reels. 2- and 3-D animatics, special effects design, advanced character animation techniques, 3-D paint techniques and integration, short design, sequence planning, non-photorealistic rendering options, interactive animation for pre-planning, and advanced production techniques and strategies. Prerequisite: CSE 458.

CSE 466 Software for Embedded Systems (4)
Software issues in the design of embedded systems. Microcontroller architectures and peripherals, embedded operating systems and device drivers, compilers and debuggers, timer and interrupt systems, interfacing of devices, communications and networking. Emphasis on practical application of development platforms. Prerequisite: CSE 326; CSE 370; CSE 378.

CSE 467 Advanced Digital Design (4)
Advanced techniques in the design of digital systems. Hardware description languages, combinational and sequential logic synthesis and optimization methods, partitioning, mapping to regular structures. Emphasis on reconfigurable logic as an implementation medium. Memory system design. Digital communication including serial/parallel and synchronous/asynchronous methods. Prerequisite: CSE 326; CSE 370.

CSE 468 Very Large Scale Integration (5)
Introduction to CMOS technology and circuit design; implementation of combinational and sequential logic; VLSI design methodologies; CAD tools for layout, simulation, and validation. Students design a VLSI chip using modern CAD tools. Prerequisite: CSE 370.

CSE 471 Computer Design and Organization (4)
CPU instruction addressing models, CPU structure and functions, computer arithmetic and logic unit, register transfer level design, hardware and microprogram control, memory hierarchy design and organization, I/O and system components interconnection. Laboratory project involves design and simulation of an instruction set processor. Prerequisite: CSE 370; CSE 378.

CSE 472 Introduction to Computational Linguistics (5) NW/ VLP Abad
Introduction to computer applications of linguistic theory, including syntactic processing, semantic and pragmatic interpretation, and natural language generation. Prerequisite: LING 200; 203; 400; and 461 or CSE 321. Offered: jointly with LING 472.

CSE 473 Introduction to Artificial Intelligence (3)
Principal ideas and developments in artificial intelligence: theorem proving, problem-solving methods, representation of knowledge, natural language analysis and synthesis, programming languages for artificial intelligence. Not open for credit to students who have
CSE 476 Embedded System Design (5)
System building course to provide students with a complete experience in embedded system design. Students will design, simulate, construct, debug, and document a substantial project of their choosing. Lectures will focus on case studies and emerging components and platforms. Prerequisite: CSE 451; CSE 466.

CSE 477 Digital System Design (5)
Capstone design experience. Prototype a substantial project mixing hardware, software, and communication components. Focuses on use of embedded processors and programmable logic in digital system design, case studies, and emerging components and platforms. Provides a complete experience in embedded system design and management. Prerequisite: CSE 451; CSE 466; CSE 467.

CSE 481 Capstone Software Design (5)
Students work in teams to design and implement a software project involving multiple areas of the CSE curriculum. Emphasis is placed on the development process itself, rather than on the product. Prerequisite: CSE major; CSE 326; CSE 341; CSE 378 and substantial programming experience, such as in CSE 451 or 457.

CSE 490 Special Topics in Computer Science and Engineering (1-5, max. 15)
Lectures, discussions, and possibly labs on topics of current interest in computer science and engineering not covered by other CSE undergraduate courses.

CSE 497 Undergraduate Research Seminar (1)
Students prepare and give a public talk on their faculty-sponsored research projects.

CSE 498 Senior Project (1-9, max. 9)
A report (and perhaps demonstration) describing a development, survey, or small research project in computer science or an application to another field. Objectives are: (1) integrating material from several courses, (2) introducing the professional literature, (3) gaining experience in writing a technical document, and (4) showing evidence of independent work. Work normally extends over more than one quarter, for a maximum of 6 credits for 498; 9 credits are required for 498H.

CSE 499 Reading and Research (1-24, max. 24)
Available in special situations for advanced computer science majors to do reading and research in field, subject to approval of undergraduate adviser and CSE faculty member. Free elective, but does not replace core course or computer science elective. Credit/no credit only.

CSE 500 Computers and Society (2)
Study of impact of computer technology on present and future society, including political, economic, cultural, social, and moral issues. Includes guest lecturers and discussion leaders. Each student is required to complete a term project. Credit/no credit only. Prerequisite: graduate standing in computer science or permission of instructor.

CSE 501 Implementation of Programming Languages (3)
Design of compilers and run-time systems for traditional and non-traditional programming languages. Intra- and interprocedural analyses and optimization. Compile-time and run-time implementation techniques for LISP-like, functional, and object-oriented languages. Students construct an optimizing compiler. Prerequisite: CSE major and CSE 401 and CSE 505.

CSE 503 Software Engineering (3)
Specification, implementation, and testing of large, multiperson, software systems. Topics include abstraction, information hiding, software development environments, and formal specifications. Prerequisite: CSE major and CSE 322, CSE 326, and CSE 378 or equivalents.

CSE 504 Advanced Topic in Software Engineering (3)
Topics vary but may include software design and evolution, formal methods, requirements specifications, software and system safety, reverse engineering, real-time software, metrics and measurement, programming environments, and verification and validation. Prerequisite: CSE major or permission of instructor.

CSE 505 Concepts of Programming Languages (3)
Data structures, types, control structures. Languages in the ALGOL family; functional, object-oriented, and logic programming languages. Prerequisite: CSE major, CSE 401 and a working knowledge of Pascal and LISP.

CSE 506 Advanced Topics in Programming Languages (3)
May include functional, object-oriented, parallel, and logic programming languages; semantics for languages of these kinds; type declaration, inference, and checking (including polymorphic types); implementation issues, such as compilation, lazy evaluation, combinators, parallelism, various optimization techniques. Implementation project required. Prerequisite: CSE major, CSE 501 which may be taken concurrently, and CSE 505.

CSE 510 Advanced Topics in Human-Computer Interaction (3)
Content varies, including interface issues for networks, embedded systems, education applications, safety and critical systems, graphics and virtual reality, databases, and computer-supported cooperative work.

CSE 515 Statistical Methods in Computer Science (3)
Introduction to the probabilistic and statistical techniques used in modern computer systems. Graphical models, probabilistic inference, statistical learning, sequential models, decision theory. Prerequisite: either STAT 341 or STAT 391, and graduate standing in computer science, or permission of instructor.

CSE 519 Current Research in Computer Science (1, max. 3)
Weekly presentations on current research activities by members of the department. Only Computer Science graduate students may register, although others are encouraged to attend. Credit/no credit only.

CSE 520 Computer Science Colloquium (1, max. 9)
Weekly public presentations on topics of current interest by visiting computer scientists. Credit/no credit only.

CSE 521 Design and Analysis of Algorithms I (3)
Principles of design of efficient algorithms: recursion, divide and conquer, balancing, dynamic programming, greedy method, data structure selection. Correctness and analysis of algorithms. Examples drawn from problems in sorting, searching, set manipulation, pattern-matching, graphs, matrices, polynomials, and integers. Prerequisite: CSE major and CSE 326 or equivalent.

CSE 522 Design and Analysis of Algorithms II (3)
Analysis of algorithms more sophisticated than those treated in 521. Content varies and may include such topics as algebraic algorithms, combinatorial algorithms, techniques for proving lower bounds on complexity, and algorithms for special computing devices such as networks or formulas. Prerequisite: CSE major and CSE 521.

CSE 523 Computational Geometry (3)
Algorithms for discrete computational geometry. Geometric computation, range searching, convex hulls, proximity, Voronoi diagrams, intersection. Application areas include VLSI design and computer graphics. Prerequisite: CSE major and CSE 521; recommended: CSE 457 or equivalent.

CSE 524 Parallel Algorithms (3)
Design and analysis of parallel algorithms: fundamental parallel algorithms for sorting, arithmetic, matrix and graph problems and additional selected topics. Emphasis on general techniques and approaches used for developing fast and efficient parallel algorithms and on limitations to their efficacy. Prerequisite: CSE major and CSE 521.

CSE 527 Computational Biology (3)
Introduces computational methods for understanding biological systems at the molecular level. Problem areas such as mapping and sequencing, sequence analysis, structure prediction, phylogenic inference, regulatory analysis. Techniques such as dynamic programming, Markov models, expectation-maximization, local search. Prerequisite: graduate standing in biological, computer, mathematical or statistical science, or permission of instructor.

CSE 528 Computational Neuroscience (3)
Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or by permission of instructor. Offered: jointly with NEURO 528.

CSE 531 Computability and Complexity (3)
Computational models including deterministic and nondeterministic Turing machines, and techniques for analyzing them. Fundamentals of computability theory and undecidability. Fundamentals of computational complexity theory and NP-completeness. Prerequisite: CSE majors only; CSE 322 or equivalent.

CSE 532 Complexity Theory (3)
Deterministic, nondeterministic, alternating, and probabilistic Turing machines. Time and space complexity, complexity classes, complexity hierarchies, and provably intractable problems. Prerequisite: CSE major and CSE 531.

CSE 533 Advanced Topics in Complexity Theory (3)
Topics in computational complexity more sophisticated than those treated in 532. Topics are expected to vary from year to year, but might typically focus on such areas as parallel complexity, probabilistic complexity, circuit- or automaton-based complexity, or logic. Prerequisite: CSE major.

CSE 536 Theory of Distributed Computing (3)
Formal approaches to distributed computing problems. Topics vary, but typically include models of distributed computing, agreement problems, impossibility results, mutual exclusion protocols, concurrent reading while writing protocols, knowledge analysis of protocols, and distributed algorithms. Prerequisite: CSE major.

CSE 540 Discrete System Simulation (3)

CSE 543 Computer System Performance (3)
Emphasizes the use of analytic models as tools for evaluating the performance of centralized, distributed, and parallel computer systems. Prerequisite: CSE major and CSE 451.

CSE 544 Principles of Database Systems (3)

CSE 546 Data Mining (3)

CSE 548 Computer Systems Architecture (3)

CSE 549 High-Performance Computer Architectures (3)
Algorithm design, software techniques, computer organizations for high-performance computing systems. Selected topics from: VLSI complexity for parallel algorithms, compiling techniques for parallel and vector machines, large MIMD machines, interconnection networks, reconfigurable systems, memory hierarchies in multiprocessors, algorithmically specialized processors, data flow architectures. Prerequisite: CSE major and CSE 548 or permission of instructor.

CSE 551 Operating Systems (3)
Operating system design and construction techniques. Concurrent programming, operating system kernels, correctness, deadlock, protection, transaction processing, design methodologies, comparative structure of different kinds of operating systems, and other topics. Prerequisite: CSE major and CSE 451.

CSE 552 Distributed and Parallel Systems (3)
Principles, techniques, and examples related to the design, implementation, and analysis of distributed and parallel computer systems. Prerequisite: CSE major and CSE 551.

CSE 553 Real-Time Systems (3)

CSE 557 Computer Graphics (3)
Introduction to image synthesis and computer modeling, emphasizing the underlying theory required for undertaking computer graphics research. Topics include color theory, image processing, affine and projective geometry, hidden-surface determination, photorealistic image synthesis, advanced curve and surface design, dynamics, realistic character animation. Prerequisite: CSE major, solid knowledge of linear algebra.

CSE 558 Special Topics in Computer Graphics (3)
Advanced topics in computer graphics not treated in CSE 557. Topics vary from year to year but typically include advanced aspects of image synthesis, animation, and 3D photography. Prerequisite: CSE major and CSE 557 or permission of instructor.

CSE 561 Computer Communication and Networks (3)
Fundamentals of data transmission: coding, message formats, and protocols. Organization of computer networks. Examples of network implementations. Prerequisite: CSE or EE major and CSE 451 or equivalent.

CSE 563 Fault Tolerant Computing (3)
Faults and their manifestation, issues, theory, and techniques of reliable systems design, testing, design for testability, self-checking and fail-safe circuits, coding techniques, system-level fault diagnosis, fault-tolerant communication, reliable software design, and
evaluation criteria. Prerequisite: basic knowledge of digital systems design or permission of instructor. Offered: jointly with E E 563.

**CSE 567 Principles of Digital Systems Design (3)**
Principles of logic design, combinational and sequential circuits, minimization techniques, structured design methods, CMOS technology, complementary and ratioed gates, delay estimation and performance analysis, arithmetic circuits, memories, clocking methodologies, synthesis and simulation tools, VLSI processor architecture. Prerequisite: CSE major and basic knowledge of logic design.

**CSE 568 Introduction to VLSI Systems (3)**
Introduction to CMOS technology and circuit design; combinational logic-design alternatives; register-design and system-clocking methodologies; datapath and subsystem design; VLSI system-design methodologies; CAD tools for synthesis, layout, simulation, and validation; design of a complex VLSI chip. Prerequisite: CSE 567 or permission of instructor. CSE majors only.

**CSE 571 AI-based Mobile Robotics (3)**
Overview of mobile robot control and sensing. Behavior-based control, world modeling, localization, navigation, and planning Probabilistic sensor interpretation, Bayers filters, particle filters. Projects: Program real robots to perform navigation tasks. Prerequisite: CSE major and CSE 473, or permission of instructor.

**CSE 573 Artificial Intelligence I (3)**
Introduction to computational models of thought and construction of intelligent information systems. Topics include search algorithms, data dependencies and truth-maintenance systems, approaches to knowledge representation, automated deduction, reasoning under uncertainty, and machine learning. Prerequisite: CSE 421 or equivalent; exposure to logic, LISP programming experience, CSE major.

**CSE 574 Artificial Intelligence II (3)**
Advanced topics in artificial intelligence. Subjects include planning, natural language understanding, qualitative physics, machine learning, and formal models of time and action. Students are required to do projects. Prerequisite: CSE major and CSE 573.

**CSE 576 Computer Vision (3)**
Overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, preattentive image processing, boundary and region representations, and case studies of vision architectures. Prerequisite: Solid knowledge of linear algebra, good programming skills, CSE or EE major or permission of instructor. Offered: jointly with E E 576.

**CSE 577 Special Topics in Computer Vision (3)**
Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE/E E 576 or permission of instructor. Offered: jointly with E E 577.

**CSE 581 Parallel Computation in Image Processing (3)**
Parallel architectures, algorithms, and languages for image processing. Cellular array, pipelined and pyramid machines, instruction sets, and design issues. Parallel implementations of filtering, edge detection, segmentation, shape, stereo, motion, relaxation algorithms, multiresolution methods, and iconic-to-symbolic transforms. Students write and debug programs for parallel computers. Prerequisite: permission of instructor.

**CSE 590 Research Seminar (*)**
Several offerings each quarter, on topics of current interest. Prerequisite: permission of instructor.

**CSE 591 Group Projects in Computer Science (1-3, max. 3)**
Focuses on specialized topics and research activities in computer science. Credit/no credit only.

**CSE 597 Performance Analysis (4)**
Broad introduction to computer system performance evaluation techniques and their application. Includes measurement/benchmarking, stochastic and trace driven simulation, stochastic queuing networks, and timed Petri nets. Applications of the techniques are studied using case study papers. CSE majors only. Not open for credit to students who have completed CSE 543.

**CSE 599 Special Topics in Computer Science (1-3, max. 3)**
Studies of emerging areas and specialized topics in computer science.

**CSE 600 Independent Study or Research (*)**
Credit/no credit only.

**CSE 700 Master’s Thesis (*)**
Credit/no credit only.

**CSE 800 Doctoral Dissertation (*)**
Credit/no credit only.

**Electrical Engineering**

AE100R Paul Allen Center

Electrical engineering is concerned with the understanding and utilization of electricity and with providing society useful, efficient, and economic products and services. It encompasses everything from batteries and power supplies to crystal fabrication, autonomous robots, and devices that can recognize human speech. Electrical engineers design, produce, study, and operate all manner of devices and systems that use electric and electromagnetic energy. They also work on systems at the macro scale of electric power grids and at the micro scale of nanotechnology.

Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical engineering. Rapid improvements in communication technologies, computer visualization, and information access continue to have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Dramatic advances in personal communication services, digital imaging, and network hardware and software are changing the texture of everyday life for an increasing portion of the world’s population.

**Undergraduate Program**

AE 100R Paul Allen Center 206-543-2142
undergrad@ee.washington.edu

The Department of Electrical Engineering offers the following program of study

- The Bachelor of Science in Electrical Engineering degree

**Bachelor of Science in Electrical Engineering**

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; CHEM 142; English composition; PHYS 121 (and beyond if possible). Students should start in math courses right away and follow with physics, chemistry, computer programming, etc. as soon as possible. The department publishes a sample four-year plan of study for fulfilling all degree requirements, including those to be taken during the first year, online at www.engr.washington.edu/score/EERPplan.pdf.

**Department Admission Requirements**

Because resources are limited, students must apply for admission to the electrical engineering program. Application forms and a comprehensive booklet, The Electrical Engineering Handbook for Undergraduates, can be obtained from the undergraduate adviser for electrical engineering. The department classifies applicants by
admission group; the specific requirements for each are described below. Admission to the department is competitive and completion of the requirements does not guarantee admission. All applicants have the right to petition and appeal the admissions decision of the department. Please see the undergraduate adviser for more information.

Applicants are considered in three groups — Early Decision, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department’s admission decision.

Early Admission
The Department of Electrical Engineering enrolls up to 10 percent of its incoming class directly out of high school, prior to the completion of University-level prerequisites. Freshman applicants to the University of Washington who list Electrical Engineering as their intended major are automatically considered. Competitive applicants will have taken or be taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

Early Decision
Applicants must be currently enrolled at the UW and must have completed a minimum of 16 credits taken in residence at the UW. Early Admission is available autumn quarter only. Application deadline is July 1.

Grade requirements: Minimum 2.50 GPA in courses required for admission, and minimum 2.50 overall GPA.

Upper-Division Admission
Applicants must be currently enrolled at the UW and must have completed a minimum of 16 credits taken in residence at the UW. Early Admission is available autumn quarter only. Application deadline is July 1.

Grade requirements: Minimum 2.50 GPA in courses required for admission, and minimum 2.50 overall GPA.

Graduation Requirements

General Education Requirements (81 credits)

Written and Oral Communications: 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).

Visual, Literary, and Performing Arts (VLP A), and Individuals & Societies (I&S) (25 credits): A minimum of 10 credits is required in each area.

Mathematics (24 credits): MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), and MATH 324.

Science (20 credits): CHEM 142, PHYS 121, PHYS 122, PHYS 123.

Major Requirements (80-81 credits)

Electrical Engineering Core (35 credits): See adviser for details.

Electrical Engineering Electives (25 credits): See adviser for list of acceptable courses.

Statistics (3-4 credits): STAT/MATH 390 or IND E 315. Grade Requirements: Minimum 2.00 GPA in all E E courses with no grade below 1.0 in any of these courses.

Electives (18-19 credits)

Approved Non-Electrical Engineering Electives (10 credits): Selected from courses listed in the departmental handbook.

Free Electives (8-9 credits)

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Graduates with a degree in electrical engineering find employment in industries such as aerospace, communications, computer manufacturing, power distribution, consumer electronics, and biomedical engineering. Positions can be found focusing on the research, design, and testing of new products; in technical sales and marketing; business consulting; and even growing areas such as intellectual property. Students who pursue graduate studies are quite successful in highly competitive national and international programs.

The BSEE program is accredited by the Accrediting Board for Engineering and Technology (ABET) and the department has adopted the following student outcomes:

ability to apply knowledge of mathematics, science, and engineering
ability to apply knowledge of probability and statistics, including applications appropriate to the program name and objectives
ability to apply knowledge of mathematics through differential and integral calculus, basic science, and engineering sciences necessary to analyze and design complex electrical and electronic devices, software, and systems containing hardware and software components
ability to apply knowledge of advanced mathematics, typically involving differential equations, linear algebra, complex variables, and discrete mathematics
ability to design and conduct experiments, as well as to analyze and interpret data
ability to design a system, component, or process to meet desired needs
ability to function on multi-disciplinary teams
ability to identify, formulate, and solve engineering problems
understanding of professional and ethical responsibility
ability to communicate effectively
the broad education necessary to understand the impact of engineering solutions in a global and societal context
recognition of the need for, and an ability to engage in, life-long learning
knowledge of contemporary issues
ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Instructional and Research Facilities: The department maintains a number of instructional and research labs to support courses and independent study activities. There are three general-purpose computing labs. Instructional labs include a large instrumentation lab supporting numerous electronics courses; individual labs for digital classes; a power lab to support the power/energy systems classes; and labs that support capstone design classes. Students participating in undergraduate research and independent study generally have access to the research labs of their supervising faculty member.

Honors Options Available: With College Honors. With Distinction. See adviser for details.

Research, Internships, and Service Learning: Many
electrical engineering students participate every year in internship and co-op (cooperative education) programs. The Engineering Co-op Office is one source for companies recruiting for internship and co-op students. The Center for Career Services also lists a variety of internship opportunities.

- **Department Scholarships:** Many scholarships specifically for electrical engineering majors and based on merit and financial need are awarded each year. Students interested in applying for these and other College of Engineering scholarships may obtain information from the Department of Electrical Engineering Scholarship Award Committee Chair.

- **Student Organizations/Associations:** The Institute of Electrical and Electronics Engineers (IEEE), UW student chapter organizes social activities, workshops, field trips and other professional development opportunities. • Eta Kappa Nu (HKN) is an invitation-only honor society for electrical engineering students. HKN organizes tutoring services, tutorial workshops, social activities, and community services projects.

*Of Special Note:* The departmental policy on continuation is consistent with the continuation policy of the College but also includes supplementary requirements specific to the department. Details may be obtained from the department advising office.

**Graduate Program**

Graduate Program Coordinator
AE100R Paul Allen Center, Box 352500
206-543-2142
grad@ee.washington.edu

The Department of Electrical Engineering offers graduate programs leading to the degrees of Master of Science in Electrical Engineering (M.S.E.E.) and Doctor of Philosophy (Ph.D.). Graduate courses and research programs are offered in biosystems, circuits and network theory, computational intelligence, computer networks and distributed systems, computer architecture, digital systems, software engineering, operating systems, microprocessors, VLSI design, control systems, electromagnetics (including optics and radio science), electronic materials (including devices and microelectronics), energy systems (including power electronics and electric drives), signal and image processing, telecommunications, and virtual reality. Numerous interdisciplinary research opportunities exist, including projects relating to bioengineering, computer engineering, and marine acoustics. The department does extensive research in coordination with the University of Washington’s Applied Physics Laboratory and Washington Technology Center.

The M.S.E.E. degree may be earned in three ways, each of which requires the accumulation of 45 credits. A student may perform research and write a thesis; a student may pursue a one-quarter project as part of their studies; or a student may simply accumulate a suitable distribution of 45 credits of course work. Course work for each of the options is developed with the advice of faculty advisers as well as through the department advising staff.

For the Ph.D. degree, students must pass the departmental qualifying examination, pass an advanced General Examination, pursue an original research problem, and report the results of that research in a dissertation that must be a contribution to knowledge. At least one year of course work beyond the M.S.E.E. degree is usually desirable.

**Research Groups**

Facilities in the Department of Electrical Engineering include research laboratories for advanced digital systems, advanced power technology, applied electromagnetics, optics, remote sensing, applied signal and image processing, mechatronics and intelligent control, modern sensors, and semiconductor technology

**Admissions Qualifications**

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required of all students. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following some additional preparation. Such applicants are strongly encouraged to contact the department for further information. For more information on admissions qualifications, visit the department’s Web site at [www.ee.washington.edu/graduate/admcriteria.html](http://www.ee.washington.edu/graduate/admcriteria.html).

**Financial Aid**

Research assistantships, teaching assistantships, scholarships, and graduate fellowships are available to qualified graduate students in all areas of electrical engineering. Most awards include a monthly stipend plus payment of tuition and fees.

**Course Descriptions**

E E 215 Fundamentals of Electrical Engineering (4) NW

E E 233 Circuit Theory (5)

E E 235 Continuous Time Linear Systems (4)
Introduction to continuous time signal analysis. Basic signals including impulses, pulses, and unit steps. Periodic signals. Convolution of signals. Fourier series and transforms in discrete and continuous time. Computer laboratory. Prerequisite: either MATH 136 or MATH 307 either of which may be taken concurrently; PHYS 122.

E E 271 Digital Circuits and Systems (5)
Overview of digital computer systems. Digital logic, Boolean algebra, combinational and sequential circuits and logic design, programmable logic devices, and the design and operation of digital computers, including ALU, memory, and I/O. Weekly laboratories. Prerequisite: CSE 142.

E E 299 Special Topics in Electrical Engineering (1-5, max. 5)
New and experimental approaches to basic electrical engineering. May include design and construction projects.

E E 331 Devices and Circuits I (5)
Physics, characteristics, applications, analysis, and design of circuits using semiconductor diodes and field-effect transistors with an emphasis on large-signal behavior and digital logic circuits. Classroom concepts are reinforced through laboratory experiments and design exercises. Prerequisite: 1.0 in E E 233.

E E 332 Devices and Circuits II (5)
Characteristics of bipolar transistors, large- and small- signal models for bipolar and field effect transistors, linear circuit applications,
including low and high frequency analysis of differential amplifiers, current sources, gain stages and output stages, internal circuitry of op-amps, op-amp configurations, op-amp stability and compensation. Weekly laboratory. Prerequisite: 1.0 in E E 331.

E E 341 Discrete Time Linear Systems (5)
Discrete time signals and systems, impulse response, convolution, Z-transforms, discrete time Fourier analysis. Computer laboratory. Prerequisite: 1.0 in E E 235.

E E 351 Energy Systems (5)
Develops understanding of modern energy systems through theory and analysis of the system and its components. Discussions of generation, transmission and utilization are complemented by environmental and energy resources topics as well as electromechanical conversion, power electronics, electric safety, renewable energy, and electricity blackouts. Prerequisite: 1.0 in E E 233.

E E 361 Applied Electromagnetics (5)
Introductory electromagnetic field theory and Maxwell’s equations in integral and differential forms; uniform plane waves in linear media; boundary conditions and reflection and transmission of waves; guided waves; transmission lines and Smith chart; electrostatics. Prerequisite: 1.0 in E E 233; MATH 324.

E E 399 Special Topics in Electrical Engineering (1-5, max. 5)
New and experimental approaches to current electrical engineering problems. May include design and construction projects.

E E 400 Advanced Topics in Electrical Engineering (1-5, max. 10)
Contemporary topics at the advanced undergraduate elective level. Faculty presents advanced elective topics not included in the established curriculum.

E E 401 Engineering Design in Large Teams (4)
Engineering design process, including project management, team formation, working with technical literature, concept development (e.g., brainstorming, morphological analysis, biomimetics, theory of inventive problem solving), intellectual property, high-tech ventures. Prerequisite: E E 215.

E E 402 Engineering Design in Large Teams: Robotics II (5)
Engineering design process applied to robot design. Involves project management, mentoring, marketing, and multi-disciplinary collaboration. The team designs, prototypes, manufactures, assembles, texts, modifies, troubleshoots, and learn to operate a system that competes in an international design contest. Prerequisite: E E 215; E E 401.

E E 411 Network Synthesis (4)
Network representation in the complex frequency domain, realizability criteria for driving-point and singly and doubly terminated transfer function, canonical forms, Butterworth and Bessel Approximation methods, and application of the digital computer in synthesis procedures. Prerequisite: 1.0 in E E 233. Offered: A.

E E 415 Computer-Aided System Analysis and Design (3)
Concepts, principles, and techniques concerned with the design, testing, and application of general-purpose problem-oriented computer programs for analyzing large-scale systems. Offered: Sp.

E E 416 Communications I: Random Signals (4)
Probability and random processes in communications. Random variables, distributions, and expectation. Statistical filter design for detection and estimation. Prerequisite: E E 341; either STAT 390 or IND E 315.

E E 417 Communications II: Modulation and Coding (4)

E E 418 Network Security and Cryptography (3)
Fundamental principles of cryptography and its application to network and communication security. An introduction to the fundamental tools in cryptography and the protocols that enable its application to network and communication security. Prerequisite: MATH 308; either MATH 390, STAT 390, or IND E 315. Offered: Sp.

E E 420 Design in Communications (4)
Design projects in communications. Frequent projects solved by student teams. Reports and presentations. Prerequisite: 1.0 in E E 417 which may be taken concurrently.

E E 433 Analog Circuit Design (5)
Design of analog circuits and systems applying modern integrated circuit technology: operational amplifiers, differential amplifiers, active filters, voltage references and regulators. Prerequisite: 1.0 in E E 332.

E E 436 Medical Instrumentation (4)
Introductory course in the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For upper-division and first-year graduate students who are preparing for careers in bioengineering—both research and industrial. Offered: jointly with BIOEN 436.

E E 440 Introduction to Digital Imaging Systems (4) Hwang
Image representation and standards, visual perception and color spaces, spatial domain image filtering and enhancement, image restoration, image transforms, image and video coding, image geometrical transformation and camera modeling. Prerequisite: E E 341.

E E 442 Digital Signals and Filtering (3)

E E 443 Design and Application of Digital Signal Processing (5)
Application of learned theories/algorithms and available computer technologies to modern image and speech processing problems. Two-dimensional signals and systems. Image transform, enhancement, restoration, coding. Characteristics of speech signals, linear predictive coding (LPC) of speech, pitch detection, and LPC speech synthesis, speech recognition, hardware designs for signal processing. Prerequisite: 1.0 in E E 442. Offered: Sp.

E E 445 Nonlinear Systems Analysis (4)
Dynamic analysis of nonlinear circuits, neural networks and of other simple systems. Exact methods, graphical methods, approximate methods, including linearization and numerical and analog computer solutions. Stability. Forced oscillations. Prerequisite: 1.0 in E E 235.

E E 447 Control System Analysis I (4)
Linear Servomechanism theory and design principles. Pole-zero analysis, stability of feedback systems by root locus and real-frequency response methods. Design methods of Bode and Nichols.
Introduction to advanced topics in automatic control theory, state variable methods. Prerequisite: E E 233; E E 235.

E E 448 Control Systems Sensors and Actuators (3)
Study of control systems components and mathematical models. Amplifiers, DC servomotors, reaction mass actuators. Accelerometers, potentiometers, shaft encoders and resolvers, proximity sensors, force transducers, piezoceramic materials, gyroscopes. Experimental determination of component models and model parameters. Two 3-hour laboratories per week. Prerequisite: either A A 447 or E E 448. Offered: jointly with A A 448.

E E 449 Design of Automatic Control Systems (4)
Design problems for aerospace vehicles, systems with unstable dynamics, lightly damped modes, nonminimum phase, nonlinear dynamics. Computer-aided analysis, design, and simulation, with laboratory hardware-in-the-loop testing. Team design reviews, oral presentations. Prerequisite: either A A 448 or E E 448. Offered: jointly with A A 449.

E E 452 Power Electronics Design (5)
Electronic conversion and control of electrical power. Includes semiconductor switching devices, power converter circuits, design of magnetics, and control of power converters. Also ac/ac, ac/dc, and dc/dc power converters; circuit simulation; extensive laboratory work a four-week power converter design project. Prerequisite: 1.0 in E E 332; 1.0 in E E 351.

E E 453 Electric Drives (5)
Elements of drive systems, speed-torque characteristics of electric motors and industrial loads, solid-state converter. Starting and braking methods of loaded motors. Speed control of electric motors. Solid-state drives. Transient analysis of loaded motors. Special forms of individual- and multimotor drives. Prerequisite: 1.0 in E E 351.

E E 454 Power System Analysis (4)
Introduction to methods of analyzing power systems. Includes symmetrical components, calculation of line parameters, representation of transmission lines and power components, and power flow control. Prerequisite: 1.0 in E E 351.

E E 455 Power System Dynamics and Protection (4)
Analysis of symmetrical and unsymmetrical power systems' networks, fault analysis, and stability studies. Prerequisite: 1.0 in E E 351.

E E 456 Computer-Aided Design in Power Systems (4)
Design-oriented course in power system engineering. Students are assigned a project concerning system operation and planning, steady-state and dynamic behaviors of power systems, or distribution systems. Each involves formulation of design criteria, development of approach, application of existing software. Prerequisite: either 1.0 in E E 454 or 1.0 in E E 455.

E E 457 Electric Energy Distribution Systems (4)
Introduction to electric utility distribution systems. Primary and secondary network analysis and design, distribution substation problems, distribution transformers, capacitor application, overcurrent and overvoltage protection. System planning and reliability. Prerequisite: 1.0 in E E 351.

E E 461 Introduction to Computer-Communication Networks (4)
Computer network architectures, protocol layers, network programming. Transmission media, encoding systems, switching, multiple access arbitration. Network routing, congestion control, flow control. Transport protocols, real-time, multicast, network security. Prerequisite: CSE 143; either MATH 390/STAT 390, STAT 391, IND E 315, or CSE 321. Offered: jointly with CSE 461.

E E 462 Principles of Mobile Robotics (4)
Design-oriented course in autonomous mobile robots. C programming, microprocessors, motors, gears, sensors, advanced sensing techniques, serial communications, PID control, algorithmic control, reactive control, multi-tasking. Laboratory exercises include design, construction, and testing of autonomous mobile robots, which compete at the end of the term.

E E 463 Autonomous Mobile Robots (4)
Design-oriented course in autonomous mobile robots. C programming, motors, sensors, IR and RF wireless communication, digital image processing, and robot motion control. Laboratory exercises include design, construction, and testing of autonomous mobile robots, which compete at the end of term. Prerequisite: E E 462.

E E 465 Fiber Optics, Devices, and Applications (4)
Wave propagation in optical waveguiding structures, signal distortion, coupling of modes, modulation, sources and detectors, fabrication and measurement methods, communication and sensor systems. Prerequisite: 1.0 in E E 332; recommended: E E 361.

E E 467 Antennas: Analysis and Design (4)
Fundamentals of antennas, analysis, synthesis and computer-aided design, and applications in communications, remote sensing, and radars. Radiation pattern, directivity, impedance, wire antennas, arrays, numerical methods for analysis, horn antennas, microstrip antennas, and reflector antennas. Prerequisite: 1.0 in E E 361.

E E 471 Computer Design and Organization (5)
Introduction to computer architecture, algorithms, hardware design for various computer subsystems, CPU control unit design, hardwired and microprogrammed control, memory organization, cache design, virtual memory, I/O organization, and I/O hardware design. Prerequisite: either E E 271 or E E 371; CSE 143.

E E 472 Microcomputer Systems (5)
Concepts of multi-level machines and computer systems organization. Utilizing microprocessors, digital computer studied at assembly- and high-language levels with emphasis on concepts of central processor architecture, memory organization, input/output and interrupts. Assembly language programming concepts applied to solution of various laboratory problems including I/O programming. Prerequisite: either E E 271 or E E 371; CSE 143.

E E 473 Linear Integrated Circuits (4)
Design of linear integrated circuits applying modern MOS and BJT integrated circuit technologies: single-stage amplifiers; current-mirror DC bias and active load circuits; stability and frequency compensation of single-stage and two-stage operational amplifiers; output stages; current and voltage reference circuits. Prerequisite: 1.0 in E E 332.

E E 476 Digital Integrated Circuit Design (5) Sechen
Comprehensive view of digital integrated circuit design. Topics to be covered include the design of inverters, static logic circuits, switch logic, and synchronous logic. Students design, simulate, and layout a complete digital IC using modern computer-aided design tools. Prerequisite: either E E 271 or E E 371; E E 331; CSE 143.

E E 477 VLSI II (5) Sechen
Provides a fairly deep understanding of how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 476.

E E 478 Design of Computer Subsystems (5)
Design of digital computer subsystems and systems, using SSI, MSI, and LSI digital components. Combinational logic, sequential logic, memory hardware designs, I/O hardware and interface design, system...
design steps, high-speed digital circuit design, noise reduction techniques, and hardware description language. One four-hour laboratory each week and design project. Prerequisite: 1.0 in E E 331; 1.0 in E E 472.

E E 480 Microwave Engineering I (4)
Analysis and design of transmission lines and matching circuits. Lossy transmission lines. Mode structures in metallic and dielectric waveguides. Microwave resonators and magnetic devices. Smith chart and matching techniques. Prerequisite: 1.0 in E E 361.

E E 481 Microwave Electronic Design (4)
Design of microwave circuits using S-parameter techniques. Measurement techniques, CAD of microwave systems. Includes design, fabrication, and evaluation of a microwave amplifier. Prerequisite: 1.0 in E E 332; 1.0 in E E 361.

E E 482 Semiconductor Devices (4)
Fundamentals of semiconductor theory: carrier diffusion and drift; concept of direct and indirect energy materials, effective mass of mobile carriers; device physics: homo- and heterojunctions, operating principles of bipolar, junction, and MOS field-effect transistors. Prerequisite: E E 332; E E 361.

E E 484 Sensors and Sensor Systems (4)
Introduction to optical and solid-state chemical and physical sensors. Topics include transduction mechanisms, design parameters, fabrication methods and applications.

E E 485 Introduction to Photonics (4)
Introduction to optical principles and phenomena. Topics include electromagnetic theory of light, interference, diffraction, coherence, light wave propagation in metals and crystals, beam optics, resonator optics, and guided-wave optics.

E E 486 Fundamentals of Integrated Circuit Technology (3)
Processing physics, chemistry and technology, including evaporation, sputtering, epitaxial growth, diffusion, ion implantation, laser annealing, oxidation, chemical vapor deposition, photoresists. Design considerations for bipolar and MOS devices, materials and process characterization. Future trends. Prerequisite: either E E 482 or MSE 351. Offered: jointly with MSE 486.

E E 489 Integrated Circuit Laboratory (1)
Hands-on experience in the building of a PMOS device, complete with oxidation, diffusion, photolithography, etching, metalization, and testing. Credit/no credit only. Prerequisite: E E 486/MSE 486, which may be taken concurrently. Offered: jointly with MSE 489.

E E 495 Electrical Engineering Design: Integrated Circuit I (4-)
Engineering design process applied to integrated circuit design implemented in a design project selected by student teams. E E 496 must be taken to receive E E 495 credit. Credit not allowed for both E E 495/496 and E E 497/498. Prerequisite: E E 332; either E E 271 or E E 371.

E E 496 Robust Electrical Engineering Design: Integrated Circuit II (-4)
Robust engineering design process applied to integrated circuit design implemented in a design project selected by student teams, including sensitivity analysis and definition of design specifications. Second course of a two-course sequence. Credit not allowed for both E E 495/496 and E E 497/498. Prerequisite: E E 495.

E E 497 Electrical Engineering Design: Consumer Electronics I (4-)
Engineering design process applied to consumer electronics design implemented in a design project selected by student teams. E E 498 must be taken to receive E E 497 credit. Credit not allowed for both E E 495/496 and E E 497/498. Prerequisite: E E 332; either E E 495/496 and E E 497/498. Prerequisite: E E 497.

E E 498 Robust Electrical Engineering Design: Consumer Electronics II (4-)
Robust engineering design process applied to consumer electronics design implemented in a design project selected by student teams, including sensitivity analysis and definition of design specifications. Credit not allowed for both E E 495/496 and E E 497/498. Prerequisite: E E 497.

E E 499 Special Projects (2-5, max. 10)
Assigned construction or design projects carried out under the supervision of the instructor.

E E 500 Graduate Seminar (1, max. 3)
Weekly seminars on current topics in electrical engineering. More than one section may be offered in a given quarter. Credit/no credit only.

E E 501 Radar Remote Sensing (3) Sahr
General introduction to radar remote sensing of geophysical targets. Fundamentals of radar systems, range-time diagram, ambiguity function, pulse compression, spectrum estimation for underspread and overspread targets; multi-antenna correlations, interferometry, closure phases; maximum entropy source imaging; Aperture Synthesis (SAR and ISAR). .

E E 502 Introduction to Microelectro Mechanical Systems (4)
Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with M E 504/MSE 504.

E E 505 Probability and Random Processes (4)
Foundations for the engineering analysis of random processes: set theoretic fundamentals, basic axioms of probability models, conditional probabilities and independence, discrete and continuous random variables, multiple random variables, sequences of random variables, limit theorems, models of stochastic processes, noise, stationarity and ergodicity, Gaussian processes, power spectral densities. Prerequisite: graduate standing and understanding of probability at the level of E E 416.

E E 506 Communication Theory I (3) Ritcey

E E 507 Communication Theory II (3) Ritcey

E E 508 Stochastic Processes (3) Ritcey

E E 510 Mathematical Foundations of Systems Theory (4)
Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear
operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with CHEM E 510/A 510/M E 510; A.

E E 511 Introduction to Statistical Learning (4)
Covers classification and estimation of vector observations, including both parametric and nonparametric approaches. Includes classification with likelihood functions and general discriminant functions, density estimation, supervised and unsupervised learning, feature reduction, model selection, and performance estimation. Prerequisite: either E E 505 or CSE 515. Offered: W.

E E 512 Graphical Models in Pattern Recognition (4)
Bayesian networks, Markov random fields, factor graphs, Markov properties, standard models as graphical models, graph theory (e.g., moralization and triangulation), probabilistic inference (including pearl’s belief propagation, Hugin, and Shafer-Shenoy), junction theses, dynamic Bayesian networks (including hidden Markov models), learning new models, models in practice. Prerequisite: E E 508; E E 511. Offered: Sp.

E E 513 Active Circuit Theory (3) Andersen
Principles of analysis and synthesis of linear active circuits. Emphasis on general principles, including conservation theorems, invariants, performance limitations in the presence of parasitic elements and realizability conditions. Illustrative applications related to negative resistance amplifiers, feedback amplifiers, and active filters. Prerequisite: E E 341 or permission of instructor.

E E 514 Information Theory I (4)
Includes entropy, mutual information, Shannon’s source coding theorem, data compression to entropy limit, method of types, Huffman coding, Kraft inequality, arithmetic coding, Kolmogorov complexity, communication at channel capacity (channel coding theory, introduction to modern statistical coding techniques, differential entropy, and Gaussian channels. Prerequisite: E E 505.

E E 515 Information Theory II (4)
Includes advanced modern statistical coding techniques (statistical coding), advanced codes n graphs, source coding with errors (rate distortion), alternating minimization principles, channel coding with errors, network information theory, multiple description coding, and information theory in other areas including pattern recognition, bio-informatics, natural language processing, and computer science. Prerequisite: E E 514.

E E 516 Computer Speech Processing (4) Bilmes, Kirchhoff, Ostendorf
Introduction to automatic speech processing. Overview of human speech production and perception. Fundamental theory in speech coding, synthesis and reproduction, as well as system design methodologies. Advanced topics include speaker and language identification and adaptation. Prerequisite: E E 505; E E 518.

E E 517 Statistical Language Processing (4) Bilmes, Kirchhoff, Ostendorf
Introduction to major issues in natural language processing and human language technology, with emphasis on statistical approaches. Addresses topics in statistical parsing and tagging, dialogue systems, information extraction, and machine translation. Prerequisite: E E 505.

E E 518 Digital Signal Processing (4) Atlas
Digital representation of analog signals. Frequency domain and Z-transforms of digital signals and systems design of digital systems; IIR and FIR filter design techniques, fast Fourier transform algorithms. Sources of error in digital systems. Analysis of noise in digital systems. Prerequisite: Knowledge of Fourier analysis techniques and graduate standing, or permission of instructor.

E E 519 Stochastic Analysis of Data From Physical Systems (4) Atlas
Computer systems for acquisition and processing of stochastic signals. Calculation of typical descriptors of such random processes as correlation functions, spectral densities, probability densities. Interpretation of statistical measurements made on a variety of physical systems (e.g., electrical, mechanical, acoustic, nuclear). Lecture plus laboratory. Prerequisite: E E 505 or equivalent.

E E 520 Spectral Analysis of Time Series (4)

E E 521 Multidimensional Signal Processing (3) Marks
Multidimensional (MD) signals and systems, MD sampling theorem, sample dependence in higher dimensions, MD FIR filter design using windows and the McClellan transform, MD IIR filter stability and design. Current topics in MD signals and systems. Prerequisite: E E 442 or E E 518 or equivalent.

E E 524 Wavelets: Data Analysis, Algorithms, and Theory (3) Sechen

E E 525 VLSI II (4) Sechen
Analyzes how IC-based memory and datapath blocks are designed using static and dynamic CMOS technologies. Gives students extensive experience with industry-standard computer-aided design tools, including Cadence (Virtuoso, DRC, LVS) and Avanti (Hspice). Credit not allowed for both E E 477 and E E 525. Prerequisite: E E 476.

E E 526 VLSI III (4) Helms, Sechen, Soma
Ultra-high speed digital logical families based on output prediction logic; high-speed division; input and output pad design; state-of-the-art latch and flip-flop design; clock distribution, including PLLs and DLLs; noise considerations in high-speed digital IC design. Prerequisite: E E 477 or E E 525.

E E 527 Solid-State Laboratory Techniques (4) Darling
Principles and laboratory techniques used in solid-state electronics research. Basic familiarity with practices and equipment used on-campus. Laboratory safety; materials handling, storage and disposal; clean room use; photosresist characteristics; mounting, bonding, and probing; wet chemical etching; vacuum evaporation; patterning of metal films using photosresist. Extensive laboratory with limited enrollment. Prerequisite: graduate standing and permission of instructor.

E E 528 Physics and Modeling I VLSI Fabrication (4)
Physics of VLSI fabrication, emphasizing processing modeling and simulation. CMOS process, sequences, point defects and diffusion, ion implantation and annealing, film growth kinetics, deposition and etching, advanced photolithography. Process interactions and process integration. Extensive use of process simulation software. Prerequisite: either E E 486/MSE 467, E E 520/M E 504/MSE 504, or E E 527. Offered: jointly with MSE 528.

E E 529 Semiconductor Optics and Optical Devices (4) Aframowitz, Yee
Perturbations of energy states in semiconductors; direct and indirect transitions; absorption processes; optical constants; absorption spectroscopy; radiative and nonradiative transitions; processes occurring at p-n junctions; junction devices; LEDs and lasers, photovoltaics; self-electro-optic effect device; modern laser structures. Prerequisite: graduate standing or permission of instructor.

E E 531 Semiconductor Devices and Device Simulation (4) Darling, Lauritzen, Yee
Physical principles in semiconductor devices. Generation, recombination, p-n junctions, MOS, metal-semiconductor and other interface structures. Carrier transport at low and high level injection levels. Device simulation used to demonstrate physical principles and basic device operation. Project using device simulation. Prerequisite: E E 482 or graduate standing.

E E 532 Device Modeling for Circuit Simulation (4) Darling
Compact modeling of semiconductor devices. Analytical models, standard SPICE models, lumped-charge models using AHDL language. Emphasis on basic diodes, MOSFET, BJTs, and other models of interest, including sensor, photonic, and power models. Compact models using AHDL language model design project. Prerequisite: E E 531 or permission of instructor.

E E 533 Photodetectors and Photodetection (4) Afromowitz, Yee
Includes both the device physics and signal processing aspects of photodetection. Photodiodes, photodiode arrays, photomultipliers, and solar cells are covered. Noise, signal to noise ratios and imaging considerations are also discussed. Prerequisite: E E 482 or graduate standing.

E E 534 Power Electronics (4)
Detailed study of DC-to-AC inverters, pulse-width modulated and resonant DC-to-DC converter topologies; drive and protection circuits for efficient switching of semiconductor devices. Includes extensive computer-aided circuit simulation and power supply control. Prerequisite: graduate standing.

E E 536 Design of Analog Integrated Circuits and Systems (4) Helms, Soma
Design of analog VLSI: specifications, design, simulation, layout. Covering CMOS and Bi CMOS technologies. Prerequisite: E E 433 or equivalent and graduate standing in electrical or computer engineering, or permission of instructor.

E E 537 Computation Methods for Circuit Analysis and Simulation (3)
Introduction to numerical algorithms and computer-aided techniques for the simulation of electronic circuits. Theoretical and practical aspects of important analyses: large-signal nonlinear DC, small-signal AC, nonlinear transients, and large-signal steady-state. Simulation concepts applied to the modeling and characterization of various electronic devices.

E E 538 Topics in Electronic Circuit Design (1-5, max. 5)
Topics of current interest in electronic circuit and system design. Course content varies from year to year, based on current professional interests of the faculty member in charge. Prerequisite: permission of instructor.

E E 539 Advanced Topics in Solid-State Electronics (1-5, max. 5)
Lectures or discussions of topics of current interest in the field of solid-state electronics for advanced graduate students having adequate preparation in solid-state theory. Subject matter may vary according to the interests of students and faculty. Prerequisite: permission of instructor.

E E 540 VLSI Testing (3) Soma
VLSI testing and design-for-test techniques. Reliability predictions and characterizations for integrated circuits and systems. Circuits fabricated in 536 are tested as laboratory work. Prerequisite: E E 535, E E 536.

E E 541 Automatic Layout of Integrated Circuits (4) Sechen
Examines the algorithms behind the following commonly used physical design automation tools: floorplanning, partitioning, placement, routing, compaction, and verification. Prerequisite: E E 271 or equivalent; experience programming in either C, C++, or Java.

E E 543 Models of Robot Manipulation (3) Hannaford
Mathematical models of arbitrary articulated robotic (or biological) arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks, the forward and inverse kinematic models, the Jacobian Matrix, and the recursive Newton-Euler dynamic model. Prerequisite: linear algebra and graduate standing or permission of instructor.

E E 544 Advanced Robot Manipulation (4) Hannaford, Meldrum
Continuation of the analysis of robot manipulation, considering kinematic redundancy, control of robot manipulators in contact with the environment, teleoperation, and grasping with multi-fingered hands. Students will perform a project and critique a research paper in the area of the project. Prerequisite: E E 543.

E E 545 Autonomous Multi-Robot Systems (4)
Design-oriented course in autonomous multi-robot systems. Wireless peer communication protocols, multi-robot control methodologies and computational issues. Laboratory exercises include design, construction, and testing of multiple autonomous mobile robots, which compete as a team at the end of the term. Prerequisite: either E E 462 or E E 463 or graduate student standing.

E E 546 Advanced Topics in Control System Theory (1-5, max. 5)
Topics of current interest in control system theory for advanced graduate students with adequate preparation in linear and nonlinear system theory. Prerequisite: permission of instructor. Offered when adequate enrollment develops prior to close of advance registration.

E E 547 Linear Systems Theory (4)
Linearity, linearization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Prerequisite: either AA 447, EE 447 or ME 447. Offered: jointly with AA 547/ME 547.

E E 548 Linear Multivariable Control (3)
Introduction to MIMO systems, successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: AA 547/EE 547/ME 547. Offered: jointly with A A 548/M E 548.

E E 549 Estimation and System Identification (3)

E E 550 Nonlinear Optimal Control (3)
Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for
optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisite: graduate standing; recommended: A A 548 or E E 548. Offered: jointly with A A 550/M E 550.

E E 551 Power System Protection (4) Liu
The protection of electric power systems from overcurrents and overvoltages. Analysis and design of overcurrents resulting from faults, lightning induced or otherwise, from excessive loads or power swings. Analysis and design of overvoltages resulting from switching transients or lightning. Principal concern is with relays and lightning arrestors as protection means. Prerequisite: E E 455 or equivalent.

E E 552 Power Systems Dynamics and Control (4) Damborg, El-Sharkawi
Advanced computer modeling and analysis of power systems. Application of modern systems and control theories. Prerequisite: E E 351 and E E 455 or permission of instructor.

E E 553 Power System Economics (4) Christie, Damborg, Liu
Economic structure of power systems. Problem formulation, optimization methods and programming for economic analysis of power system operation and planning. Economic dispatch, load forecasting, unit commitment, interchange, planning and reliability analysis. Provides background to pursue advanced work in planning and operation. Prerequisite: graduate standing or permission of instructor.

Deals with problems whose solution depends upon the inversion of sparse matrices that occur in the planning and operational studies of large interconnected energy systems. Application studies include system model development, state estimation, and load flow. Prerequisite: E E 456 or permission of instructor.

E E 555 Fundamentals of Intelligent Systems (4)
Fundamentals and applications of intelligent systems and biologically inspired algorithms such as neural networks, evolutionary computations, swarm optimization and fuzzy systems. Solving complex engineering applications with a combination of these technologies as well as with more traditional approaches such as statistical system theories.

E E 559 Special Topics in Electrical Energy Systems (1-5, max. 5)
Topics of current interest in electrical power and energy devices and systems. Content varies from year to year, based on current professional interests of faculty member in charge. Prerequisite: permission of instructor.

E E 562 Artificial Intelligence for Engineers (3) Shapiro
Covers main areas of artificial intelligence (AI) without need for extensive prerequisites. Programming languages for AI; problem solving; representations; control strategies; searching strategies; predicate calculus; rule-based deduction; goal-directed planning; knowledge-based systems. Prerequisite: CSE 373 or equivalent.

E E 563 Fault-Tolerant Computing (3) Soma
Faults and their manifestation, issues, theory, and techniques of reliable systems design, testing, design for testability, self-checking and fail-safe circuits, coding techniques, system-level fault diagnosis, fault-tolerant communication, reliable software design, and evaluation criteria. Prerequisite: basic knowledge of digital systems design or permission of instructor. Offered: jointly with CSE 563.

E E 564 Parallel Computer Systems (3) Hwang, Kim
Pipelined and vector processors; interconnection network for parallel processing, array and associative processors; multiprocessors; data-flow machines; systolic arrays and impact of the VLSI technology on parallel processors and processing. Prerequisite: E E 471, permission of instructor.

E E 565 Computer-Communication Networks I (4)
Network architectures and protocols; layered model; reliable transmission protocols at the data control layer; Transmission Control Protocols (TCP); routing algorithms; performance modeling, and analysis of packet-switched networks. Multi-access. Projects involving routing and multi-access principles. Prerequisite: E E 505 or equivalent.

E E 566 Computer-Communication Networks II (3)
Local area, metropolitan area, satellite, and packet radio networks; routing algorithms for wide area networks; optimal design of packet-switched networks; congestion and flow control; fast packet switching; gigabit networks. Prerequisite: E E 565 or permission of instructor.

E E 567 Mobile Radio Networks (3)
Wireless communication networks, including digital broadcasting, wireless LAN, wireless access networks and ultra wide band (UWB); OFDM modem design; MAC and RLP; TCP/UDP over wireless; cross-layer protocol optimization; radio network planning. Prerequisite: E E 506; E E 565.

E E 568 Image Processing Computer Systems (4) Kim
All components of digital image-processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image processing operations. Selected advanced image processing topics. Individual student project. Prerequisite: permission of instructor. Offered: jointly with BIOEN 568.

E E 571 High Frequency Circuits and Antennas: Computation of Fields and Waves (4)
Planar microstrip structures are high frequency circuits and antennas used in communication, aerospace and computer industries. Examines the computation of fields and waves in such structures. How to calculate circuit parameters and radiation characteristics. Structures studied include microstrip lines, coupled lines, antennas, resonators, and discontinuities. Prerequisite: E E 482, E E 572, or equivalent.

E E 572 Electromagnetic Theory and Applications I (4)
Electromagnetic waves in layered media; complex waves, leaky and slow waves, waves in periodic structures, optical fibers, ionosphere and other guiding structures; transients and dispersive media; waveguides and cavities; beam waves; eigenfunctions and eigenvalues. Prerequisite: graduate standing or permission of instructor.

E E 573 Electromagnetic Computations and Applications I (4) Tsang
Fundamentals of computational electromagnetics, method of moments, integral equations, basis functions, iterative methods, periodic structures and Green’s Functions finite difference time domain method, Yee’s lattice, absorbing boundary conditions, variational principles, and finite element method. Applications in antennas, waveguides, and scattering problems. Prerequisite: E E 572 or permission of instructor.

E E 574 Electromagnetic Computations and Applications II (4) Tsang
Current topics in computational electromagnetics, fast multipole multilevel method, sparse matrix canonical grid method, wavelet based methods, recursive method, spectral time domain method. Applications in large scale problems such as array antennas, radar cross section, rough surface scattering, and dense media scattering. Prerequisite: EE 573 or permission of instructor.

E E 575 Waves in Random Media (4) Tsang
Propagation and scattering of electromagnetic, optical, and acoustic waves in turbulence and random media, scattering from rough
surfaces and randomly distributed particles. Atmospheric turbulence, fog, rain, smog, clear-air turbulence detection, remote sensing, terrain scattering, scattering from blood cells and tissues, scattering by ocean waves. Applications to atmospheric sciences, bioengineering, geoscience, ocean engineering. Prerequisite: graduate standing or permission of instructor.

E E 576 Computer Vision (3)
Overview of computer vision, emphasizing the middle ground between image processing and artificial intelligence. Image formation, preattentive image processing, boundary and region representations, and case studies of vision architectures. Prerequisite: Solid knowledge of linear algebra, good programming skills, CSE or EE major or permission of instructor. Offered: jointly with CSE 576.

E E 577 Special Topics in Computer Vision (3)
Topics vary and may include vision for graphics, probabilistic vision and learning, medical imaging, content-based image and video retrieval, robot vision, or 3D object recognition. Prerequisite: CSE/E E 576 or permission of instructor. Offered: jointly with CSE 577.

E E 578 Optimization in System Sciences (3) Mesbah
Covers convex sets, separation theorems, theorem of alternatives and their applications, convex analysis, convex functions, conjugation, subgradients, convex optimization, duality and applications, linear and semi-definite programming. Linear matrix inequalities, optimization algorithms, applications in system theory and control, bilinear, rank minimization, optimization software. Recommended: A M E E 547. Offered: jointly with A A M A 578; W.

E E 579 Advanced Topics in Electromagnetics, Optics, and Acoustics (1-5, max. 5)
Topics of current interest in electromagnetics, optics, and acoustics. Content varies from year to year, based on current professional interests of faculty member in charge. Prerequisite: permission of instructor.

E E 581 Digital Control (3) Chizeck
Sampled-data systems, and z-transform. Frequency domain properties. Sampling D/A and A/D conversion. Controller design via discrete-time equivalents, direct methods, state feedback and observers. Quantization effects. LQR control and introduction to LQG optimal control. Prerequisite: either E E A A/ or M E 548. Offered: jointly with A A M A 581; W.

E E 582 Introduction to Discrete Event Systems (3) Berg

E E 583 Nonlinear Control Systems (3)

E E 585 System Identification and Adaptive Control (3)

E E 586 Digital Video Coding Systems (4) Sun
Introduction to digital video coding algorithms and systems. Theoretical and practical aspects of important topics on digital video coding algorithms, motion estimation, video coding standards, systems issues, and visual communications. Prerequisite: graduate standing or permission of instructor.

E E 587 Introduction to Statistical Learning (4)
Addresses four major components of multimedia: 1) data compression of multimedia (e.g., speech, audio, image, and video); 2) quality of service (QoS) issues for data transmission over IP; 3) multimedia streaming and conferencing applications; and 4) intellectual property management and protection (IPMP) of multimedia contents. Co-requisite: E E 518.

E E 589 Advanced Topics in Sensors and Sensor Systems (3)
Topics of current interest in sensors and sensor systems. Prerequisite: permission of instructor.

E E 590 Advanced Topics in Digital Computers (2-5, max. 15)
Lectures or discussions of topics of current interest in the field of digital systems. Subject matter may vary from year to year. Prerequisite: permission of instructor.

E E 591 Robotics and Control Systems Colloquium (1, max. 3)
Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A A/CHEM E/M E 591.

E E 592 Electrical Engineering Research Survey (1)
Weekly presentations on current research activities by members of the department. Credit/no credit only.

E E 593 Feedforward Control (3) Devasia
Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: ME 547. Offered: jointly with A A M A 593.

E E 594 Robust Control (3)
Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with AA/M E 594; odd years; W.

E E 595 Advanced Topics in Communication Theory (1-5, max. 5)
Extension of 507, 508, 518, 519, 520. Material differs each year, covering such topics as: detection theory, decision theory, game theory, adaptive communication systems, nonlinear random processes. Prerequisite: permission of instructor.

E E 596 Advanced Topics in Signal and Image Processing (2-5, max. 5)
Topics of current interest in signal and image processing. Content may vary from offering to offering. Prerequisite: permission of instructor.

E E 599 Selected Topics in Electrical Engineering (*)
Prerequisite: permission of instructor.

E E 600 Independent Study or Research (*)
ENGR 700 Master’s Thesis (*)

ENGR 800 Doctoral Dissertation (*)

Engineering

Course Descriptions

ENGR 100 Introduction to Engineering Design (5) I&S
Introduction to design and communication principles through engineering project approach, stressing teamwork, design process, specialties and tools of engineering, creative and analytical thinking, professionalism and ethics, social, economic and political context, open-ended problems. Grading based on quality of engineering projects and presentation of design through written, oral, and graphical communication. Offered: AWSp.

ENGR 101 Technology and Society (5) I&S
Examines revolutionary technologies and how they have shaped the world. Investigates how railroads, computers, automobiles, airplanes, the Internet, nanotechnology, and other innovations affect everyday life. Includes examination of how geographers, philosophers, scientists, artists, engineers, and others are involved in creation, implementation, and criticism of technology.

ENGR 197 Engineering Problem Solving (1, max. 12)
Lectures and problem sessions in mathematics, chemistry, and physics with engineering applications. Enrollment restricted to Minority Science and Engineering Program (MSEP) students. Credit/no credit only. Offered: AWSp.

ENGR 199 Special Projects (1-3, max. 3)
Students propose problems to solve to an engineering faculty member. The problems may be selected from the student’s own experiences and interests, from the interest of the faculty member, or from other sources such as faculty or graduate students doing research projects, or from personnel in the physical medicine area, occupational therapy, hospital, industry, government. Corroboration by an engineering faculty member is required. Project suggestions are available. Offered: AWSp.

ENGR 202 Special Projects (1-3, max. 3)
Projects on topics of current interest in engineering. Offered: A.

ENGR 321 Engineering Cooperative Education ([1-2]-, max. 16)
Engineering practicum; integration of classroom theory with on-the-job training. Periods of full-time work alternate with periods of full-time study. Open only to students who have been admitted to the Engineering Cooperative Education Program. Requires subsequent completion of ENGR 322 to obtain credit. Credit/no credit only. Offered: AWSp.

ENGR 322 Engineering Cooperative Education Postwork Seminar (-0)
Reporting and evaluation of co-op work experience, and discussion of current topics in engineering. To be taken during the first quarter in school following each work session. Offered: AWSp.

ENGR 360 Introductory Acoustics (3) NW
Introduction to propagation of acoustical waves; emphasis on propagation of sound waves in air, but material is applicable to propagation of sound waves in liquids, including underwater acoustics, and to propagation of stress waves in solids. Includes a historical development of acoustics, terminology, and units employed. Prerequisite: either MATH 136 or MATH 307; PHYS 123. Offered: Sp.

ENGR 498 Special Topics in Engineering (1-5, max. 6)
Offered: AWSp.

ENGR 499 Special Projects in Engineering (1-3, max. 6)

Offered: AWSp.

ENGR 598 Seminar Series in Engineering (1, max. 12)
Kalonji, Reed
Graduate seminar series on topics of interest to all engineering students.

Industrial Engineering

G-7 Mechanical Engineering Building

Industrial engineering (IE) prepares students for careers in an increasingly diverse, dynamic and technological world. Industrial engineers focus on the integration of humans, machines, materials and information to achieve optimum performance of operating systems. This focus on the “big picture” makes industrial engineering one of the most people-oriented and customer-focused of the engineering disciplines.

Industrial engineering involves the study of engineering design, system integration, optimization, quality and reliability, supply chain management, virtual reality, and manufacturing. Other engineering disciplines apply skills to very specific areas. Industrial engineers have the opportunity to work in many different kinds of businesses and nonprofit organizations. The most distinctive aspect of industrial engineering is the flexibility it offers. Many industrial engineers eventually move into supervisory or management positions where they continue to draw on their technical background. Demand for industrial engineers has grown dramatically over the past two decades.

Undergraduate Program

Adviser
G7 Mechanical Engineering, Box 352650
206-543-5041
iedvice@u.washington.edu

The Industrial Engineering program offers the following program of study:

- The Bachelor of Science in Industrial Engineering degree

Bachelor of Science in Industrial Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; English composition; courses to fulfill VLPA and I&S requirements.

Department Admission Requirements

Applicants are considered in three groups — Early Decision, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department’s admission decision.

Early Decision

The UW Industrial Engineering program enrolls up to 10 percent of its incoming class directly out of high school, prior to the completion of university-level prerequisites. Freshman applicants to the University of Washington who have listed Industrial Engineering as their intended major will be automatically considered. Competitive applicants will have taken or be taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

Early Admission

Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical-science courses plus accompanying laboratory, at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. Admission is for autumn
Quarter only.
Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.

Grade requirements: Minimum grade of 2.0 in each prerequisite course and a minimum overall GPA of 2.50.

Upper-Division Admission
Course requirements: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; and at least 5 credits of English composition.

45 credits completed by application deadline, which is July 1 for autumn admission and February 1 for spring admission.

Graduation Requirements

180 credits as follows:

General Education Requirements (91 credits)

Written and Oral Communications (12 credits): 5-credits in English composition from the University-approved list; T C 231; T C 333 (or department-approved alternative).

Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S) (30 credits): A minimum of 10 credits is required in each area.

Natural World (49 credits)

Mathematics (24 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; IND E 315

Science (25 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (89 credits)

Engineering Fundamentals (28 credits): CSE 142, MSE 170, A A 210, E E 215, CEE 220, M E 230, IND E 250

Industrial Engineering Core (24 credits): IND E 310, IND E 311, IND E 316, IND E 337, IND E 494, IND E 495

Technical Electives (37 credits): At least one class from approved courses in each of the following areas: operations research, statistics, production/operations, design, and general engineering. See adviser for list of approved technical electives.

Grade Requirements: Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Industrial engineering graduates are proficient in mathematics, sciences, engineering fundamentals, and the use of computers; use a broad knowledge of industrial engineering methods and tools associated with operations research, quality engineering, and human factors; apply engineering design methods and tools to represent, integrate and solve problems, including the ability to recognize problem context and integrate knowledge and skills from allied disciplines; communicate effectively; and possess the professional characteristics of leadership, ethics, and the ability to motivate and work with others. IE prepares students to serve as the efficiency experts of organizational change. Students are encouraged to take a systems view when solving problems, recognize the organizational and societal impact of technical decisions, develop good oral and written communication skills, participate in teams, and take initiative. Industrial engineers draw upon specialized knowledge and skills in math, the physical sciences, and social sciences together with the principles and methods of engineering analysis and design.

- Instructional and Research Facilities: Industrial Engineering provides designated computing facilities for undergraduate students. Research facilities include the Human Interface Technology Laboratory, the Production Systems Laboratory, the Manufacturing Laboratory, and The Center for Engineering Learning and Teaching.

- Honors Options Available: With College Honors. With Distinction (Departmental Honors). See adviser for requirements.

- Research, Internships, and Service Learning: Students have the opportunity to pursue cooperative and internship programs at the College level through the College’s Engineering Co-op Program (www.engr.washington.edu/coop/).

- Department Scholarships: IE offers scholarships to outstanding undergraduate students. All applicants to the BSIE program are considered for these scholarships. Awards are made based on both merit and financial need.

- Student Organizations/Associations: Students are actively involved in the UW student chapter of the Institute of Industrial Engineers (IE); the IE National Honor Society, Alpha Pi Mu; and the IE Student Advisory Board.

Graduate Program

Graduate Program Coordinator
G7 Mechanical Engineering, Box 352650
206-543-5041
ieadvise@u.washington.edu

Industrial Engineering offers graduate programs leading to the Master of Science in Industrial Engineering (M.S.I.E.) and Doctor of Philosophy (Ph.D.). Graduate courses and research programs are offered in manufacturing, operations research, large-scale assembly, experimental statistics, production planning, quality control, reliability engineering, computer-integrated manufacturing, simulation, supply chain, human factors, virtual reality, and human interface technology.

For the M.S.I.E. degree, a minimum of 41 credits is required, with both a thesis and course-work-only option. Students pursuing the thesis option must complete a minimum of 9 credits of master’s thesis (IND E 700).

For the Ph.D. degree, students must initially pass the departmental qualifying examination, followed by successful completion of an advanced General Examination and subsequent Final Examination in which the student defends his or her dissertation.

Course Descriptions

IND E 101 Introduction to Industrial Engineering (1) I&S
Examines the basic concepts and methods of industrial engineering through team-based hands-on activities. Explores the profession of industrial engineering. Discusses resources available to Industrial Engineering students at the University of Washington. Offered: Sp.

IND E 250 Fundamentals of Engineering Economy (4) NW

IND E 295 Product Dissection (3) Jorgensen, Kumar
Examination of the way products and machines work, their physical operation, the manner in which they are constructed, and the interaction between design, materials, and manufacture. Laboratories involve dissection and assembly of several common industrial and consumer products by student teams. Offered: jointly with M E 295.

IND E 310 Linear and Network Programming (4) Zahinsky
Modeling and optimization of linear network problems. Topics include: optimization of linear systems, mathematical model design, simplex method, primal-dual algorithms, parametric programming, goal programming, network problems and algorithms, and PERT/CPM. Prerequisite: either MATH 136 or MATH 308; CSE 142. Offered: ‘A.’
IND E 311 Stochastic Models and Decision Analysis (4)
Zabinsky
Stochastic systems analysis to industrial engineering problems. Topics include: Markov chains, queueing theory, queueing applications, and decision analysis. Prerequisite: IND E 315; IND E 310. Offered: W.

IND E 312 Methodology of Operations Research (4) Zabinsky
Modeling and optimization of problems and dynamic programming approach to optimization. Topics include: integer programming formulation techniques, linear and Lagrangian relaxation, branch-and-bound and cutting-plane methods, integer programming applications, and dynamic programming. Prerequisite: IND E 311. Offered: Sp.

IND E 315 Probability and Statistics for Engineers (3) NW
Application of probability theory and statistics to engineering problems, distribution theory and discussion of particular distributions of interest in engineering, statistical estimation and data analysis. Illustrative statistical applications may include quality control, linear regression, and analysis of engineering data sets. Prerequisite: either MATH 136 or MATH 307. Offered: AWSpS.

IND E 316 Design of Experiments and Regression Analysis (4) NW Kapur
Introduction to the analysis of data from planned experiments. Analysis of variance for multiple factors and applications of orthogonal arrays and linear graphs for fractional factorial designs to product and process design optimization. Regression analysis with applications in engineering. Prerequisite: IND E 315. Offered: jointly with STAT 316.

IND E 321 Statistical Quality Control (4) Kapur, Storch

IND E 337 Introduction to Manufacturing Systems (4) Storch
Description of manufacturing systems. Includes discussion of current trends in manufacturing. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification.

IND E 351 Human Factors in Design (4)
Engineering considerations of the abilities and limitations of the human aspect in the design of operational systems and components. Functional, psychological, physiological, and environmental considerations.

IND E 424 Simulation (4) Beamon
Discrete-event simulation methodology emphasizing model formulation and construction with modern simulation languages and environments, statistical basis for evaluating model results, design and management of simulation projects. Application to manufacturing, retail, and service industries. Prerequisite: IND E 237, which may be taken concurrently; IND E 325. Offered: W.

IND E 426 Reliability Engineering and System Safety (4) Kapur

IND E 430 Manufacturing Scheduling and Inventory (4)
Beamon, Storch
Manufacturing scheduling and inventory control for different work organizations. Coverage of workforce scheduling, job- and flow-shop scheduling and order release, production line balancing, MRP II, Lean Production, and data management. Particular attention to computer-based aspects of management and scheduling for manufacturing and service industries. Prerequisite: IND E 237; IND E 325.

IND E 431 Computer Integrated Manufacturing (4)
Design and control of computer-based production systems. Focus on selection and integration of flexible manufacturing technology, computer hardware, application and operating system software, data communication networks, data management systems. Laboratory assignments concentrate on programming and integration of system components. Current literature and recommended texts used as reference sources. Prerequisite: IND E 237; CSE 142.

IND E 433 Introduction to Computational Manufacturing (4) Woo
Fundamentals in computer aided design/manufacturing. Visualization, 3-D wireframes, curves and surfaces, solid modeling. Numerical control machining, robotics, and assembly. Prerequisite: IND E 237; IND E 324. Offered: W.

IND E 439 Plant Layout and Material Handling (4) Beamon, Storch
Design of new or expanding industrial facilities. Consideration of work organization and layout. Study of basic design of plant systems, including plumbing, electrical, HVAC, illumination, acoustics, and waste handling. In depth coverage of material handling system design and equipment choices. Prerequisite: IND E 310.

IND E 455 User Interface Design (4) Furness
Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with T C 455; A.

IND E 494 Design in the Manufacturing Firm (4)
Engineering design in manufacturing firms is presented. Topics include design methodology, concurrent engineering, and project management. Focus on the relationship between product design and manufacturing (design for production and assembly). Prerequisite: IND E 237; T C 333. Offered: W.

IND E 495 Industrial Engineering Design (4)
Capstone senior design project involving identification and synthesis of industrial engineering skills. Students apply their knowledge of industrial engineering to actual industrial problems. Prerequisite: IND E 494; IND E 351. Offered: Sp.

IND E 496 Technology-Based Entrepreneurship (3)
Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Prerequisite: IND E 250. Offered: jointly with M E 496.

IND E 498 Special Topics in Industrial Engineering (1-5, max. 9)
Lecture and/or laboratory.

IND E 499 Special Projects (2-5, max. 9)

IND E 513 Linear Optimization Models in Engineering (3) Zabinsky
Advanced formulation techniques to expand applications of linear
programming to large-scale models. Appreciation of role of optimization models in engineering applications through introduction of techniques such as decomposition. Individual engineering projects. Prerequisite: IND E 324 and MATH 308 or permission of instructor.

IND E 515 Fundamentals of Optimization (5)

IND E 516 Applications of Optimization in Engineering Design (3) Zabinsky
Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering optimal design. Prerequisite: AMATH/MATH/IND E 515 and MATH 328 or permission of instructor. Offered: jointly with AMATH 510.

IND E 518 Seminars on Advances in Manufacturing and Management (1) Mescher, Ramulu, Woo
Current topics and advances made in manufacturing and management. Topics presented by invited speakers from academia and industry. Emphasis on the multidisciplinary nature of manufacturing and management. Offered: jointly with M E 518 AWSp.

IND E 521 Quality Control in Manufacturing (3) Kapur, Storch
Design of quality control systems in manufacturing. Use of advanced statistical process controls, sampling inspection techniques, process capability, and other statistical tools. Also includes vendor sourcing and control tools, methods for establishing specifications and tolerances, quality function deployment, and other quality control techniques. Prerequisite: graduate standing.

IND E 524 Robust Design and Quality Engineering (3) Kapur
Introduction to robust design and quality engineering. Applications of design of experiments for product and process design optimization. Experimental design using orthogonal arrays and linear graphs. System models using Chebyshev’s orthogonal polynomials. Robustness in design and quality improvement for complex systems including Taguchi methods for quality engineering. Prerequisite: IND E 316 or equivalent.

IND E 526 Reliability in Product Design and Testing (3) Kapur
Product assurance including reliability and quality engineering. Reliability design, measurement, and optimization. Advanced topics in probabilistic design. Design of reliability test plans and analysis of test data. Design of reliability programs and their management. Prerequisite: graduate standing.

IND E 531 Computer Integrated Manufacturing (3)
Design and analysis of advanced manufacturing systems from a strategic as well as technological perspective. Focus on information generation, management, and coordination aspects of complex manufacturing organizations. Examination of system integration alternatives and consequences for relationships with customers and suppliers. Prerequisite: IND E 431 or equivalent. Offered: jointly with M E 505.

IND E 532 Geometric Modeling (3) Woo

IND E 533 Computational Methods in Design and Manufacturing (3) Woo

IND E 535 Engineering Simulation (3) Beamon
Advanced applications of discrete event, continuous, and combined discrete-continuous simulation modeling, detailed examination of fundamental computer programming concepts underlying the design and development of simulation languages, variance reduction techniques, and output analysis for various engineering, service systems, and manufacturing applications. Prerequisite: IND E 424 or equivalent.

IND E 537 Introduction to Manufacturing Systems (3) Storch
Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with ENV H 537; A.

IND E 538 Large Assembly Manufacturing Systems (3) Storch
Presents principles of group technology, zone construction, product-oriented work breakdown structure. Application to shipbuilding, aircraft, rail-car, and truck manufacture. Techniques of production planning, scheduling and control, organization, and plant layout, as well as the role of the computer, are studied in detail. Prerequisite: graduate standing.

IND E 543 Virtual Interface Technology (1/3, max. 3) Furness
Explores advanced concepts and technologies for interfacing humans to complex machines, with focus on virtual interfaces. Interface design principles reviewed from psychological and technological perspectives. Hardware, software, and mindware aspects of virtual interfaces investigated. Applications postulated and designed. Prerequisite: graduate standing in College of Engineering or permission of instructor.

IND E 544 Virtual World Development (3) Furness
Software implementation, physiological and cognitive constraints, and the mathematics and philosophy of inclusion. Development of software tools, editing and interaction techniques, disposition of virtual world entities, nature of space, situated knowledge, divergent models for multiple participants, experiential mathematics, cyberspace. Cultural, legal, moral, ethical issues. Prerequisite: IND E 543 or permission of instructor.

IND E 545 User-Centered Design (4) Turns
Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with T C 518.

IND E 551 Elements of Dynamic Enterprise Modeling (3)
Introduces practical techniques for modeling, analyzing, and implementing real-time enterprise control systems in application area such as manufacturing, supply chain flow control, and logistics decision schemas. Uses basic mathematical tools supported with a symbolic algebra software tool. Requires basic computer skills. Offered: A.

IND E 552 Introduction to Real-Time Enterprise Control (3)
Provides students with principles, designs, techniques and algorithms for synthesizing real-time control of enterprise processes, using hybrid systems theory. Application areas include supply chain flow control, logistics decision schemas, transportation systems, dynamic reconciliation procedures, minimum cost production, and maximum
IND E 553 Modeling and Automation of Enterprise Processes (3)
Third course in a three-course sequence. Provides architecture, algorithms and procedures for designing and implementing enterprise control policies for automating and enhancing enterprise functionality. Emphasis on hybrid system theories. Prerequisite: IND E 552, or permission of instructor. Offered: W.

IND E 564 Recognition of Health and Safety Problems in Industry (4)
Develops skills in occupational health and safety hazard recognition in a variety of important northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with ENV H 564.

IND E 566 Introduction to Ergonomics (3)
Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566./NSG 508.

IND E 567 Applied Industrial Hygiene, Safety, and Ergonomics (3)
Application of occupational safety and health ergonomic principles through a field project and classroom discussions. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students simulate consulting with a local company including budgeting, project reporting, and presentation. Prerequisite: ENV H 453, ENV H 562, ENV H 566, or equivalent, or permission of instructor. Offered: jointly with ENV H 559.

IND E 570 Supply Chain Systems (3) Beamon
Develops concepts related to the design, evaluation, and performance of supply chain systems through an exploration of contemporary practice and research, focusing on current issues, analytical frameworks, and case studies. Prerequisite: IND E 315 or equivalent.

IND E 591 Seminar (1)
Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor.

IND E 592 Seminar (1)
Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor.

IND E 593 Seminar (-1)
Credit/no credit only. Topics of current interest in industrial engineering. Prerequisite: graduate standing in Industrial Engineering or permission of instructor.

IND E 599 Special Topics in Industrial Engineering (1-5, max. 9)
Prerequisite: permission of supervisor.

IND E 600 Independent Study or Research (*)
IND E 700 Master's Thesis (*)
IND E 800 Doctoral Dissertation (*)

Materials Science and Engineering
302 Roberts

Materials science and engineering is an interdisciplinary field that addresses the structure, processing, and property relationships in materials for engineering applications. Basic principles of chemistry and physics are applied to provide an understanding of the structure of materials and the manner in which the structure determines the properties. Scientific processing methods are then applied to yield the necessary properties, which then can be integrated with, and designed to accommodate the needs of, modern technology.

Advances in materials enable technological progress in many fields. Historically, this connection between materials and technology has been so intimate that major periods in civilization have been named after the dominant material used in that era (e.g., Bronze Age, Iron Age). In the past few decades, at the core of the progress in such diverse fields as transportation, communication, electronics, energy and environment are significant advances in materials. Materials science and engineering is a broad and growing discipline.

Materials Science and Engineering at the University of Washington has recently experienced rapid expansion into new research areas, including polymers, hybrids, biomaterials, biomimetics, nanomaterials, photonic and magnetic materials. These areas have applications in current and emerging industries, and complement existing strength in ceramics, metals, electronic materials, and composites.

Undergraduate Program
Adviser
302A Roberts, Box 352120
206-543-2600
mse@u.washington.edu

The Department of Materials Science and Engineering offers the following programs of study:
- The Bachelor of Science in Materials Science and Engineering degree
- A minor in materials science and engineering

Bachelor of Science in Materials Science and Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; English composition; CSE 142; MSE 170; A A 210; MSE 220; T C 231.

Department Admission Requirements
Applicants are considered in two groups — Early Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to appeal the department’s admission decision. Application information is available from the department adviser.

Early Admission

Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or above; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. (T C 231 and M E 123 must be taken no later than the academic year of admission.)

Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Applications are accepted for autumn quarter only. Application deadline is July 1.

Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.
Upper-Division Admission
Course requirements: MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122; CHEM 142, CHEM 152; CSE 142; MSE 170; 5 credits of English composition.
64 credits completed by application deadline. Applications are accepted for autumn quarter (July 1 deadline) and spring quarter (February 1 deadline).

Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Graduation Requirements
180 credits as follows:

General Education Requirements (85 credits)
Written and Oral Communications: 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).

Visual, Literary, and Performing Arts (VLP A), and Individuals & Societies (I&S) (24 credits): A minimum of 10 credits is required in each area.

Natural World (53-60 credits):
Mathematics (24-25 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308 (or MATH 318); one from MATH 309, MATH 324, IND E 315, or STAT 390
Science (31-35 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; two of the following: PHYS 224, PHYS 225, CHEM 162, CHEM 223, CHEM 224, CHEM 237, CHEM 238, CHEM 455, CHEM 457

Major Requirements (89-90 credits)
Engineering Fundamentals (24 credits): CSE 142, MSE 170, A A 210, CEE 220; two of the following: E E 215, M E 123, CHEM E 260, IND E 250
Materials Science and Engineering Core (49-50 credits): 310, MSE 311, MSE 312, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499
Technical Electives (16 credits): See department advising office for list of acceptable courses.

Grade Requirement: Minimum 2.00 departmental cumulative GPA.

Minor
Minor Requirements: 30 credits as follows: MSE 170, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362. A minimum grade of 2.0 is required for each course.

Student Outcomes and Opportunities
- Learning Objectives and Expected Outcomes:
  Undergraduate students are offered both broad core and in-depth courses. The broad core provides the needed background and understanding of all types of engineering materials, including metals, ceramics, polymers, electronic materials, and composites. The curriculum provides an opportunity to use basic knowledge in science and engineering fundamentals to synthesize and design materials for engineering applications. The undergraduate curriculum emphasizes hands on experience, oral and written communication, and team-work, and encourages participation in research. Graduates with a degree in materials science and engineering find employment in a broad range of industries including aerospace, biomedical, electronic manufacturing, materials processing, and transportation.
  The degree program in materials science and engineering has the following outcomes for graduates:
  - Provides that graduates have fundamental knowledge of mathematics and science, and are able to apply them to engineering problems and to a variety of materials systems
  - Develops graduates who are skilled in engineering fundamentals
  - Ensures that graduates are knowledgeable about all classes of materials and their properties, structure, processing and applications
  - Provides specific knowledge related to structure, properties, processing, and performance specific to materials science and engineering
  - Applies advanced science (such as chemistry and physics) and engineering principles to engineering systems
  - Describes and applies the scientific and engineering principles underlying the four major elements of the field: structure, properties, processing, and performance related to material systems
  - Solves materials selection and design problems by integrating knowledge from each of the four elements of the field
  - Utilizes experimental, statistical, and computational methods for analysis and design problems
  - Uses hands-on laboratory experience to solve real engineering problems
  - Has the needed background for effective practice in industry and government
  - Has a sound, well-balanced education that prepares them to understand their professional responsibilities and the basis for a thoughtful and responsible life
  - Has experience in integrating engineering and materials design concepts with societal issues, including economics, ethics, quality, and human values
  - Is prepared to enter graduate programs, as appropriate to the student and the area of interest
  - Has the ability to communicate effectively, orally and in writing, the concepts and results of engineering investigations to both technical and non-technical audiences
- Instructional and Research Facilities:
  Facilities include equipment for electron and optical microscopy, x-ray diffraction, high-temperature heat treatment and mechanical testing, specialized processing equipment, including hot and cold isostatic presses, nitrogen reaction furnaces, and automated TGA, DTA analysis systems.
  Equipment for analyses of particle size, surface areas, and pore size is also available. Students have liberal access to University computing facilities.
- Research, Internships, and Service Learning:
  Materials Science and Engineering students interested in paid internship experiences should contact the Engineering Co-op Program, 301 Loew Hall, Box 352180, 206-543-8711, coop@engr.washington.edu.
- Department Scholarships: With need-based aid provided through the University’s Office of Student Financial Aid, companies and individuals with interest in developing materials science and engineering students have provided scholarships for students admitted to the program. Specific information and application forms are available from the academic counselor in 302 Roberts.
- Student Organizations/Associations: Keramos (materials honor society); American Ceramic Society (ACerS); ASM/TMS (the joint student chapter of ASM International and TMS); Society for the Advancement of Materials and Process Engineering (SAMPE).

Of Special Note:
Combined B.S./M.S. Degree Program

The goal of the combined B.S./M.S. program in Materials Science and Engineering is to provide a more direct route to the master’s degree for well-qualified undergraduate students who wish for more in-depth graduate-level work in preparation for work in industry or for a Ph.D. program. It creates a more efficient and continuous academic program that leads directly to the Master of Science degree. Students earn both the B.S. and M.S. degrees in five years. This program is available to students after they are admitted to the department. Information is available from the department Web site.

Graduate Program

mse@u.washington.edu

Degrees Offered

The Department of Materials Science and Engineering offers programs of study leading to the Master of Science in Materials Science and Engineering (M.S.M.S.E.) and the Doctor of Philosophy in either Materials Science and Engineering or Materials Science and Engineering/Nanotechnology.

Objectives

The primary goals of the master’s and doctoral programs are to prepare students for industrial employment and research/development careers and to generate new knowledge. The specific objectives are:

- Deepen knowledge and capabilities broadly and in a chosen specialty area: A student’s knowledge, attained through coursework and scholarly investigation of literature relevant to thesis project, should be commensurate with leading researchers in the field.
- Master and develop state-of-the-art research techniques appropriate to specialty: Analytical, computational, and experimental tools are learned via instruction by advisor(s) and peers in conjunction with maintaining currency with literature.
- Contribute new knowledge of lasting value to the field by creative and independent research: A student’s thesis research must demonstrate originality and high quality, as judged by faculty committee.
- Broaden candidate’s knowledge of field and societal issues: Through coursework, department and group seminars, and attendance at professional meetings, a student learns to appreciate context of specialty within materials science and engineering and gain ability to apply knowledge and methods to a spectrum of engineering and scientific challenges.
- Learn to work effectively with colleagues and contribute to professional community: Attained by cooperation in team research projects, presentation of research and professional meetings.

Advising and Progress to Degree

The graduate coursework is designed to provide a higher level of expertise than a BS in both core topics and specialty areas chosen by the student. This is accomplished by requiring all the students to take three required core courses (MSE 510, MSE 525, and MSE 541) and a series of elective courses. Students are also required to enroll for the department seminar series.

Graduate students are advised by their supervisory/thesis committee chair, members of the supervisory/thesis committee, and the academic counselor, each with a specific advising role. The department also maintains a Graduate Study Program book, given to each graduate student upon entry. Graduate students work closely with their committee chairs. Through this interaction, students develop a professional identity including learning how to do research, defining research problems, research supervision, data analysis and synthesis, presentation and participation in professional meetings, writing papers and reports, writing research proposals, information and advise regarding career options and help with placement.

Financial Support

Graduate students are eligible for a variety of competitive financial awards while they pursue their MSE degrees. Awards include teaching and research assistantships and a broad spectrum of internal and external fellowships. Almost all graduate students receive some financial support. Further details are on the departmental website and in the Graduate Study Program book.

Engineering Materials Option for the Master of Science

The Engineering Materials option for an M.S. in Materials Science and Engineering is a non-thesis program designed for students with substantive industrial experience who want a master’s degree to further their career goals or to meet work requirements. Students selecting this degree option should be practicing materials engineers with a Bachelor of Science degree. This program contains practice-oriented courses in addition to the usual graduate core courses. In place of a research-oriented thesis, students carry out a complete analysis and develop recommended solutions to an engineering materials problem. This project is industrially oriented, undertaken at an industrial site and supervised by an experienced engineer in industry and an MSE faculty member. Written and oral final project reports are required. The Engineering Materials option is designed to be completed in one year (four quarters) for on-campus students; it is also available for part-time students through the Education at a Distance for Growth and Excellence (EDGE) program.

Course Descriptions

MSE 170 Fundamentals of Materials Science (4) NW
Fundamental principles of structure and properties of materials utilized in practice of engineering. Properties of materials are related to atomic, molecular, crystalline structure. Metals, ceramics, multiphase systems, and polymeric materials. Relationships between structure and electrical, mechanical, thermal, chemical properties. For advanced freshmen and sophomores. Prerequisite: either CHEM 150, CHEM 152, or CHEM 155. Offered: A/WSpS.

MSE 298 Introduction to Modern Materials (1)
Materials and advances in materials are at the core of a large number of significant technological advances. Seminar format highlights processing, properties, and uses of a broad class of materials for a variety of applications, each introduced by a faculty member from the department.

MSE 310 Introduction to Materials Science and Engineering (2)
Introduces the materials field to new department majors. Examples are drawn from ceramics, metals, polymers, electronic materials and composites. Structure-properties-manufacturing-design relationships are emphasized. Materials selection design project. Introduction to research. Offered: A.
MSE 311 Integrated Junior Laboratory I (2)
Laboratory experimental techniques including writing, literature search, research planning and computer applications. Optical microscopy experiments, sample preparations, X-ray equipment, and X-ray diffraction analysis of materials. Offered: A.

MSE 312 Integrated Junior Laboratory II (2)
Materials processing related laboratory experiments, including powder synthesis, redox reactions of particulate materials, grain growth, recrystallization, phase transformation, green tape processing, particle interaction and rheology, slip and tape casting and dry processing, sol-gel processing, polymer processing, sintering behavior, metal welding, and heat treatment. Offered: W.

MSE 313 Integrated Junior Laboratory III (2)
Kinetics and phase transformation related laboratory experiments, including solidification. Mechanical properties related laboratory experiments, including stress-strain behavior of materials and elastic modulus of materials, effect of work hardening on stress strain behavior, and effect of surface condition of the strength of glass. Offered: Sp.

MSE 321 Thermodynamics and Phase Equilibrium (4)
Phase equilibria in materials systems of one, two and three components. Determination of phase diagrams. Quantitative applications of thermodynamics to systems of interest to materials scientists; detained review of thermodynamic laws and principles. Offered: A.

MSE 322 Kinetics and Microstructural Evolution (4)
Applications of thermodynamic and kinetic principles to the study of transport processes, transformations and reactions in engineering materials. Thermal activation and rates of processes, nucleation and growth, phase transformations, grain growth, sintering, among other processes. Prerequisite: MSE 321. Offered: W.

MSE 331 Crystallography and Structure (3)
Theory and practice of x-ray diffraction with applications to materials sitemaps. Principles of crystal symmetry, lattice systems, and stereographic projections. Bragg's law of diffraction, Laue conditions, diffraction by X-rays, single crystal and powder diffraction techniques and their applications to lattice, phase, strain, and texture analyses. Prerequisite: MSE 170. Offered: A.

MSE 333 Materials Characterization (3)
Principles and applications of analytical techniques, imaging, diffraction and spectroscopy for materials characterization including crystal structures, texture formation, phase analysis. Nano- and micro-structures of materials including defects and second phases, chemistry, bonding, compositions of materials. Demonstrations and lab experiments involving light scattering and diffraction techniques. Prerequisite: MSE 170; MSE 331. Offered: S.

MSE 342 Materials Processing I (3)
Provides students with the fundamentals and applications of metal and alloy processing techniques. Focuses on relationships between the processing fundamentals and practice, and between processing, microstructure, and properties. Ferrous and non-ferrous metal and alloy processing are discussed. Prerequisite: MSE 170; MSE 322. Offered: W.

MSE 351 Electron Theory of Engineering Materials (3)
Introduction to elementary solid-state concepts in materials, free electrons, and band theories. Principles to conduction in metals, insulators, semiconductors, and applications of semiconductors and devices. Prerequisite: MEE 170, MEE 331. Offered: W.

MSE 352 Functional Properties of Materials I (3)
Introduction to thermal properties, electrical (ionic and polaron) conduction and optical properties, including origins of color, interaction of light wave with materials, lasers and optoelectronics. Focuses on the relations between physical properties and chemical composition, crystal structure and microstructure. Prerequisite: MSE 351. Offered: S.

MSE 362 Mechanical Behavior of Materials I (3)
Influence of structure on the mechanical properties materials. Definition of different mechanical properties and experimental techniques to measure them. Elastic, viscoelastic and plastic deformation. Introduction to fracture. Prerequisite: MSE 170. Offered: Sp.

MSE 371 Materials Chemistry (3) NW
Overview of basic principles, techniques, and applications associated with solid materials. Description of crystals; examples of crystal structures; structural analysis; band structures of solid materials; preparation of materials; materials for microelectronics; and materials for information technology. Prerequisite: CHEM 312; either PHYS 123 or PHYS 116. Offered: jointly with CHEM 364; W.

MSE 421 Case Studies in Thermodynamics (3)

MSE 431 Physical Materials Principles (3)
Principles of relationships between processing, properties and structure of materials with emphasis on microstructures, phase compositions and physical properties of materials systems, including ceramics, metals, polymers, composites, compound semiconductors, magnetic systems, and biological hard tissues. Prerequisite: MSE 310; MSE 331; MSE 342; MSE 362. Offered: A.

MSE 442 Materials Processing II (3)
Develops a basic understanding of both engineering and science aspects of ceramic processing. Fundamentals of powder processing and characterization, green body formation, sintering, microstructural development and properties. Prerequisite: MSE 342. Offered: A.

MSE 443 Extractive Process Analysis (3)
Extractive processes analyzed by the methods of material and energy balances, computational thermodynamics, process kinetics and reactor theory. Introduction to process optimization. Prerequisite: MSE 321. Offered: S.

MSE 452 Functional Properties of Materials II (4)
Dielectric materials including ferroelectrics, piezoelectrics and pyroelectrics, magnetic properties, high temperature superconductivity, shape memory materials. Detained discussion on relations of these properties with atomic and crystal structures, and applications. Prerequisite: MSE 351, MSE 352. Offered: W.

MSE 462 Mechanical Behavior of Materials II (4)
Influence of structure on the mechanical properties of materials. Stress-strain tensors and response of materials to multiaxial loads, Effect of symmetry on elastic properties; spring dashpot analogs for viscoelasticity; strengthening mechanisms and continuum plasticity; failure probability and toughening mechanisms; creep, fatigue and stress corrosion cracking. Prerequisite: MSE 362. Offered: W.

MSE 463 Corrosion and Wear of Materials (4)
Mechanisms of corrosion, thermodynamics, kinetics of corrosion. Passivity; Pourbaix diagrams; corrosion rate testing and measurements; forms of corrosion; effects of alloy and environmental variables; corrosion testing. Wear mechanisms: adhesive, abrasive, erosive. Fretting; surface roughness, wear testing. Coatings for corrosion and wear protection. Offered: S.
MSE 471 Introduction to Polymer Science and Engineering (3)
Introduction of preparative methods of polymers; physical
chemistry of polymeric molecules in solution, liquid and solid phase;
thermodynamics of polymers; methods of characterization;
mechanical properties; fabrication techniques; properties of
commercial polymers. Recommended: one quarter of physical
chemistry and one quarter of organic chemistry. Offered: A.

MSE 473 Noncrystalline State (4)
Chemistry and physics of inorganic glass and amorphous semicon-
ductors; structure, properties, and processing of vitreous materials.
Prerequisite: MSE 170; MSE 321; MSE 331. Offered: S.

MSE 475 Introduction to Composite Materials (4)
Microstructural design and processing of composite materials;
polymeric, metallic, and ceramic matrices; fibers and fiber-
reinforced composites, thermal, mechanical, and electrical
properties. Recommended: basic background in materials science and
engineering (level of MSE 170), mechanics of materials (level of
CEE 220), and linear algebra and familiarity with matrix operations
(level of MATH 308 or 318). Offered: A.

MSE 477 High Temperature Materials (4)
Chemical and mineralogical composition; processing methods;
thermal, physical, and chemical properties and tests; application in
high-temperature processes. Prerequisite: MSE 310, MSE 321.

MSE 481 Science and Technology of Nanostructures (3)
Comprehensive introduction to the developing field of nanoscience
and nanotechnology. Includes materials properties as a function of
length-scale and dimensionality, applications in medicine/biology,
electronics, magnetism, and electro-mechanical systems. Coopera-
tive learning approaches involving student participation with team
assignments, class activities, lectures, and laboratory visits. Offered:
W.

MSE 485 Introduction to Electronic Packaging and Materials
(3)
The governing equations of transport phenomena: mechanical,
thermal, and electromagnetic behavior, thermomechanical and
electromagnetic properties of packaging materials, electromagnetic
characteristics of circuit and transmission lines, thermal manage-
ment and reliability analysis of packaging, interconnect and material
processing technology. Prerequisite: MSE 170. Offered: jointly with
M E 485; A.

MSE 486 Fundamentals of Integrated Circuit Technology (3)
Processing physics, chemistry and technology, including evapora-
tion, sputtering, epitaxial growth, diffusion, ion implantation, laser
annealing, oxidation, chemical vapor deposition, photoresists.
Design considerations for bipolar and MOS devices, materials and
process characterization. Future trends. Prerequisite: either E E 482
or MSE 351. Offered: jointly with E E 486; W.

MSE 487 Laboratory in Electronic Packaging and Materials
(1)
Laboratory course to accompany ME 485 Experiments related to
design, processing and reliability of electronic packaging used in
consumer electronics. Corequisite: MSE 485. Offered: jointly with
M E 487; A.

MSE 489 Integrated Circuit Laboratory (1)
Hands-on experience in the building of a PMOS device, complete
with oxidation, diffusion, photolithography, etching, metallization,
and testing. Prerequisite: E E 486/MSE 486, which may be taken
concurrently. Offered: jointly with E E 489; W.

MSE 491 Materials Design and Failure (1)
Develop understanding of mechanical design of all engineering
materials (metals, ceramics, polymers, glasses, elastomers,
composites); classes of engineering materials; materials, process
selection, optimization for engineering applications; statistical
quality control principles; common mechanical failure mechanisms;
lab experiments and term projects involving design, hands-on
processing, failure analysis. Offered: W.

MSE 492 Design in Materials Engineering II (3)
Materials engineering design criteria including: materials selection,
process design, and manufacturability issues; statistical methods and
quality control concepts for engineering design; engineering
economics for safety. Primary focus is on the completion of the
two-quarter team design project on materials engineering. Prerequi-

MSE 497 Undergraduate Research (1-5, max. 12)
Research in materials under faculty supervision other than the
MSE senior project. Cannot be used toward the technical elective
requirements in the MSE major. Credit/no credit only.

MSE 498 Special Topics (1-5, max. 8)
Special topics in materials science and engineering offered as a
course with lectures, conferences, or laboratory. Offered: AWSpS.

MSE 499 Special Project (*-, max. 5)
Materials science and engineering field or laboratory investigations
in group or individual setting. Written report required. Offered:
AWSpS.

MSE 501 Advanced Processing of Inorganic Materials (3)
Discusses advanced processes of inorganic materials including
metals, ceramics and electronic materials, such as high temperature
processing, sintering, solidification, single crystal growth form
liquid, and vapor phase deposition. Emphasizes both the fundamen-
tals and practical approaches of these processing techniques.
Offered: even years; A.

MSE 502 Sol-Gel Processing (3)
Fundamentals of colloid science and the physics and chemistry of
the sol-gel process. Emphasizes the synthesis and applications of
various materials, such as multi-component oxides, nano-compos-
ites, meso- and microporous materials, organic/inorganic hybrids,
and biomaterials that have important applications in both leading
technologies and modern industries. Offered: odd years; A.

MSE 504 Introduction to Microelectro Mechanical Systems
(4)
Theoretical and practical aspects in design, analysis, and fabrication
of MEMS devices. Fabrication processes, including bulk and surface
micromachining. MEMS design and layout. MEMS CAD tools.
Mechanical and electrical design. Applications such as micro sensors
and actuators, or chemical and thermal transducers, recent advances.
Offered: jointly with E E 502/M E 504; A.

MSE 510 Bonding, Crystallography, and Symmetry-Related
Properties of Materials (3)
Rigorous introduction to the fundamentals of bonding, symmetry,
crystallography, and related properties. Quantum mechanical
foundation of cohesion and properties of solids. Geometric
approach to understanding symmetry elements in 2-D and 3-D,
including point groups, space groups, stereographic projections, and
bravais lattices. Tensor properties of crystals related to crystallogra-
phy and symmetry. Offered: A.

MSE 512 Experimental Transmission Electron Microscopy (3)
Fundamentals of electron optics as applied to microscopy;
applications of contrast theories and electron diffraction with
emphasis on defects and multiphase structures in crystalline solids.
Prerequisite: MSE 510. Offered: W.

MSE 513 Transmission Electron Microscopy Laboratory (2)
One four-hour laboratory and one two-hour discussion/demonstra-
MSE 515 Advanced Transmission Electron Microscopy (3)
Principles of image formation in crystalline and amorphous materials at the atomic resolution level; high spatial resolution electron diffraction with emphasis on convergent beam electron diffraction; quantitative elemental compositional and chemical analysis with energy dispersive x-ray spectroscopy and electron energy loss spectroscopy; high voltage electron microscopy. Prerequisite: MSE 512 and MSE 513. Offered: odd years; Sp.

MSE 518 Advanced Mineralogy (3)
Crystal symmetry; point groups, space groups. Mathematical description of crystal structures; group theory and irreducible representations; tensor description of physical properties; stress, strain, piezoelectricity, elasticity; structural and magnetic phase transition, Landau theory, deformation and creep in crystals; elastoviscous properties of Earth’s mantle, crystal chemistry and solid state reactions. Offered: jointly with ESS 537; Sp.

MSE 520 Seminar (1, max. 6)
Review of research problems in recent literature. Registration required for all graduate students. Credit/no credit only. Offered: AWSp.

MSE 524 Applied Rate Phenomena (3)
Introduction to rate theory and transport processes. The principal thrust is on applications in ceramics and metallurgy. Prerequisite: basic course in transport phenomena or permission of instructor. Offered: W.

MSE 525 Kinetics and Phase Transformations (3)
Thermodynamic basis for kinetic processes, including diffusion and phase transformation kinetics. Diffusion problems and solution methodologies, statistical treatment of diffusion, solid-liquid and solid-solid transformations, ordering transitions. Special topics related to grain growth, sintering, martensitic transformations. Prerequisite: MSE 322 and MSE 421 or equivalent. Offered: Sp.

MSE 528 Physics and Modeling f VLSI Fabrication (4)
Physics of VLSI fabrication, emphasizing processing modeling and simulation. CMOS process, sequences, point defects and diffusion, ion implantation and annealing, film growth kinetics, deposition and etching, advanced photolithography. Process interactions and process integration. Extensive use of process simulation software. Prerequisite: either E E 486/MSE 467, E E 520/M E 504/MSE 504, or E E 527. Offered: jointly with E E 528.

MSE 530 Fundamentals and Applications of Metal Finishing (3)
Fundamentals and applications of corrosion to the finishing and processing of metals. Corrosion, electrochemical fundamentals, materials cleaning processes, electrodeposition, surface treatments, finishing processes. Offered: odd years; A.

MSE 541 Defects in Materials (3)
Detailed study of the general properties and effects of point, line, and planar defects in crystalline solids. Prerequisite: MSE 331 or equivalent. Offered: W.

MSE 544 Mechanical Behavior of Materials (3)
Mechanical properties of metals, ceramics, and polymers. Elasticity and viscoelasticity. Macroscopic and microscopic aspects of deformation and fracture. Continuum plasticity and microscopic hardening mechanisms. High temperature deformation. Fracture mechanics, brittle and ductile fracture. Deformation and fracture mechanisms maps. Prerequisite: MSE 510 and MSE 541 or permission of instructor.

MSE 550 Magnetism, Magnetic Materials, and Related Technologies (3)
A comprehensive introduction to magnetism, magnetic materials, and related applications. Discusses intrinsic and phenomenological concepts of magnetism, ordered magnetic materials (emphasizing their structure-sensitive properties), magnetic phenomena, small particles/thin films, and applications (magnetic recording, permanent magnets, quantitative imaging of magnetic domains, surface and interface magnetism, giant magneto-resistance). Offered: Sp.

MSE 553 Vacuum Science and Technology (3)
Fundamental theory and gas kinetics and treatment of gas flow, working principles of vacuum pumps and gauges, characteristics required of the vacuum components, material selection, fundamentals essential to vacuum system design. Covers both fundamental and practical aspects of modern vacuum science and technology.

MSE 555 Biomimetics: Bioinspired Design and Processing of Materials (4)
How biological organisms produce materials with controlled structure, chemistry and hierarchy to attain physical properties far superior to traditional engineering materials. Fundamental biological building materials, their synthesis, and their self-assembly with emphasis on examples of soft and hard tissues.

MSE 559 Thin Film Science, Engineering, and Technology (3)
The physics, chemistry, and engineering aspects of thin film deposition and technology. Vapor phase deposition emphasized. Topics include reactor types, vapor phase transport and hydrodynamics, surface and mass transport limited kinetics, nucleation and growth, homoepitaxy, heteroepitaxy, and thin film characterization. Prerequisite: permission of instructor. Offered: jointly with CHEM E 559.

MSE 560 Organic Electronic and Photonic Materials/Polymers (3)

MSE 562 Introduction to Electronic Composites (3)
Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Recommended: 475 or M E 450. Offered: jointly with M E 562; odd years; Sp.

MSE 563 Advanced Composites: Design and Manufacturing (3)
Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: MSE 475 or M E 450 or equivalent by permission of instructor. Offered: jointly with ME 563; Sp.

MSE 565 Electron Theory of Materials (3)
Solid-state concepts of materials. Atomic bonding, statistical mechanics, Brillouin zone theory. Applications to conduction, optical, and magnetic properties of metals, semiconductors, and insulators. Prerequisite: MSE 466 or equivalent. Offered: W.

MSE 590 Advanced Seminar in Materials Science and
Engineering (2)
Advanced topics in material science, led by faculty with specific expertise in the area of interest. Topics to be chosen and announced quarterly.

MSE 598 Engineering Materials Problems (4)
Involves a concentrated project which may include the design of a system or process, or analysis of a set of data related to the materials engineering area. Requires a professional quality report and an oral presentation of the results.

MSE 599 Special Topics in Materials Science (1-5, max. 5)
Studies of special advanced topics in materials science. Prerequisite: permission of instructor. Offered: AWSpS.

MSE 600 Independent Study or Research (*)
Offered: AWSpS.

MSE 700 Master’s Thesis (*)
Offered: AWSpS.

MSE 800 Doctoral Dissertation (*)
Offered: AWSpS.

Mechanical Engineering
143 Mechanical Engineering Building
Mechanical engineering is one of the broadest and oldest of the engineering disciplines and therefore provides some of the strongest interdisciplinary opportunities in the engineering profession. Power utilization (and power generation) is often used to describe the focus of mechanical engineering. Within this focus are such diverse topics as thermodynamics, heat transfer, fluid mechanics, machine design, mechanics of materials, manufacturing, stress analysis, system dynamics, numerical modeling, vibrations, turbomachinery, combustion, heating, ventilating, and air conditioning. Degrees in mechanical engineering open doors to careers not only in the engineering profession but also in business, law, medicine, finance, and other non-technical professions.

Undergraduate Program
Adviser
143 Mechanical Engineering Bldg., Box 352600
206-543-5090
meadvise@uw.washington.edu

The Department of Mechanical Engineering offers the following program of study:
- The Bachelor of Science in Mechanical Engineering (B.S.M.E.) degree

Bachelor of Science in Mechanical Engineering

Department Admission Requirements
Applicants are considered in two groups — Early Admission and Regular Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1.

Early Admission
Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or higher; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. (T C 231 and M E 123 must be taken no later than the academic year of admission.) Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.

Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Regular Admission
Course requirements: MATH 124, MATH 125, MATH 126; MATH 307; PHYS 121, PHYS 122; CHEM 142, CHEM 152; CSE 142; A A 210; CEE 220; M E 230; T C 231; 5 credits of English composition.

65 credits completed by July 1 application deadline

Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Graduation Requirements
180 credits as follows:

General Education Requirements (85 credits)
- Written and Oral Communications: 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
- Visual, Literary, and Performing Arts (VLP A), and Individuals & Society (I&S) (24 credits): A minimum of 10 credits is required in each area.

Natural World (49 credits):
- Mathematics (24 credits): MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), MATH 309 (or AMATH 353)
- Science (25 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (95 credits)
- Engineering Fundamentals (31 credits): A A 210; CEE 220; CSE 142; E E 215; IND E 315 (or MATH 390); M E 123; M E 230; MSE 170

Mechanical Engineering Option Courses (18 credits)

Student Outcomes and Opportunities
- Learning Objectives and Expected Outcomes:
  - Preparation for the profession. At the end of their undergraduate education, students should possess a tool chest of skills and knowledge that positions them for success as (1) entry-level engineers in existing firms, or (2) graduate students in any program in the country. This does not preclude other activities, such as volunteering, self-employment, or academic study in another discipline. Students succeed in this goal using fundamental science and engineering analysis to solve engineering problems; executing engineering designs; using project management tools; and performing effectively in teams through oral, written, and graphical communication.

  - Contribution to society. Students succeed in this goal by being able to think critically, in the sense of broadly educated individuals; perform independent, informed analysis on issues inside and outside of technology; and continue lifelong learning.

Each student's success is measured by demonstration of the following learning outcomes:
- (a) Background in mathematics, science and engineering principles. (b) Ability to apply this knowledge to the formulation and solution of mechanical engineering problems
- (a) Ability to design thermal and mechanical components to achieve a desired goal. (b)
Interest groups within the faculty provide instruction in four areas: design; energy and fluids; mechanics, materials and manufacturing; and systems and dynamics. Departmental thrust areas for graduate and undergraduate research include: environment; health care; information technology; and manufacturing. Several on-going senior capstone design projects provide both undergraduate and graduate students with hands-on, interdisciplinary, team-driven opportunities that encompass such diverse topics as Formula SAE car; human-powered submarine, mechatronics, and fuel cell technology.

- **Instructional and Research Facilities:** None
- **Honors Options Available:** None offered.
- **Research, Internships, and Service Learning:** None offered.
- **Department Scholarships:** None offered.
- **Student Organizations/Associations:** None.

**Graduate Program**

Graduate Program Coordinator
143 Mechanical Engineering Bldg, Box 352600
206-543-5090
megrad@u.washington.edu

The Department of Mechanical Engineering offers graduate programs leading to the degrees of Master of Science in Mechanical Engineering (M.S.M.E.) and Doctor of Philosophy (Ph.D.). The department also provides authorized options leading to the College-wide Master of Science in Engineering (M.S.E.) degree (e.g., Masters in Manufacturing Engineering, and Program in Engineering and Manufacturing Management). These degrees provide balanced combinations of formal instruction and independent research or design experience. Although there are thesis and non-thesis options for the M.S.M.E., completion of a thesis is highly recommended. Individual projects may be drawn from a wide spectrum of topics, which include mechanical and energy conservation systems, heat transfer, combustion, fluid mechanics, applied mechanics, computational mechanics, computer-aided design and manufacturing, production systems, materials behavior, robotics, controls, vibrations, and applications of mechanical engineering science to a variety of such interdisciplinary fields as bioengineering, ocean engineering, environmental engineering, nanotechnology, micro electro-mechanical systems, and acoustics. Flexible requirements for course work provide opportunities both for a broad scientific and professional background and for specialty training.

**Research Facilities**

The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems perfor-

**Financial Aid**

Financial aid is offered to full-time graduate students as funds permit. Funds, however, are limited and the assignment of assistantships and fellowships is highly competitive. This aid may be in the form of a research assistantship for sponsored programs, a fellowship provided by the University or industry, or a teaching assistantship.

**Mechanical Engineering**

**Course Descriptions**

**M E 123 Introduction to Visualization and Computer-Aided Design (4) NW/VLPA Adee**
Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional skills through freehand sketching and computer-aided design using parametric solid modeling. Offered: AWSpS.

**M E 124 Visualization and Computer-Aided Design Laboratory (2) NW/VLPA Adee**
Methods of depicting three-dimensional objects and communicating design information. Development of three-dimensional visualization skills through computer-aided design using parametric solid modeling. Offered: AWSpS.

**M E 230 Kinematics and Dynamics (4) NW Fabien**
Kinematics of particles, systems of particles, and rigid bodies; moving reference frames; kinetics of particles, systems of particles, and rigid bodies; equilibrium, energy, linear momentum, angular momentum. Prerequisite: A A 210.

**M E 295 Product Dissection (3) Kumar**
Examination of the way products and machines work, their physical operation, the manner in which they are constructed, and the interaction between design, materials, and manufacture. Laboratories involve dissection and assembly of several common industrial and consumer products by student teams. Offered: jointly with IND E 295.

**M E 323 Engineering Thermodynamics (5) Kramlich**
Engineering thermodynamics, including thermodynamic concepts and properties, the first and second laws of thermodynamics, energy conversion, refrigeration, humidification, and combustion. Engineering design applications. Prerequisite: either CHEM 142, MATH 126 or PHYS 121.

**M E 331 Introduction to Heat Transfer (4) Forster**
Study of heat transfer by conduction, radiation, and convection; elementary heat-exchanger design. Prerequisite: either M E 333 or CEE 342.

**M E 333 Introduction to Fluid Mechanics (5) Riley**
Introduction to the basic fluid laws and their application. Conservation equations, dynamic similarity, potential flow, boundary-layer concepts, effects of friction, compressible flow, fluid machinery, measurement techniques. Prerequisite: either M E 323 or CHEM E 260, either MATH 307 or AMATH 351.

**M E 341 Energy and Environment (3) NW Malte**
Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with ENVIR
M E 354 Mechanics of Materials Laboratory (5) Tuttle
Properties and behavior of engineering materials including stress-strain relations, strength, deformation mechanisms, strength, deformation, fracture, creep, and cyclic fatigue. Introduces experimental techniques common to structural engineering, interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Lecture and laboratory. Prerequisite: MSE 170, CEE 220.

M E 355 Introduction to Manufacturing Processes (4) Ramulu
Study of manufacturing processes, including interrelationships between the properties of the material, the manufacturing process and the design of components. Interpretation of experimental data, comparison of measurements to numerical/analytical predictions, and formal, engineering report writing. Prerequisite: M E 354.

M E 356 Machine Design Analysis (4) Kumar
Analysis, design, and selection of mechanical and electromechanical subsystems and elements, such as gears, linkages, cams, motors, and bearings. Lecture and laboratory. Prerequisite: M E 354.

M E 373 Introduction to System Dynamics (5) Garbini
Mathematical modeling, analysis, and design of physical dynamic systems involving energy storage and transfer by lumped-parameter linear elements. Time-domain response by analytical methods and numeric simulation. Laboratory experiments. Prerequisite: either AMATH 351 or MATH 307; either AMATH 352 or MATH 308; ENGR E 215; M E 230.

M E 374 Systems Dynamic Analysis and Design (5) Garbini
Extension of M E 373. Frequency response analysis, generalized impedance concepts and applications, Fourier series analysis and Laplace transform techniques. Modeling and analysis of electromechanical actuators and rotating machinery. Laboratory experiments and design projects. Prerequisite: M E 373.

M E 392 Concurrent Engineering (3)
Focus on the need for and the tools of concurrent engineering in all engineering disciplines. Functional and cross-function organizations, new product development, market-need identification and design for manufacturing are explored. Offered: jointly with IND E 392.

M E 395 Introduction to Mechanical Design (4) Cooper
Design process and methodology; decision making; optimization techniques; project planning; engineering economics; probabilistic and statistical aspects of mechanical design; ethical and legal issues. Lecture and laboratory. Prerequisite: M E 123; M E 323; M E 373; IND E 315.

M E 403 Material-Removal Processes (3) Ramulu
Cutting and noncutting processes for material removal in the shaping of manufactured products. Study of forces and of power consumption and relative costs in the various processes. Prerequisite: M E 355 which may be taken concurrently.

M E 406 Corrosion and Surface Treatment of Materials (3) Sandwith
Corrosion fundamentals and forms (galvanic, crevice, pitting, stress corrosion, erosion, hydrogen and leaching). Principles of design, materials selection, cathodic protection and surface treatments (coatings, carburizing, nitriding and plating) applied to reduce corrosion. Failure analysis applied to case studies.

M E 409 Introduction to Numerical Control and Computer-Aided Manufacturing (3) Ramulu
Control system fundamentals, numerical control (NC) machine control systems, and the design aspect of NC machine tools, programming methods of NC machines, computer-aided manufac-
turing, CNC, DNC, and process optimization. Prerequisite: M E 355 which may be taken concurrently.

M E 415 Sustainability and Design for Environment (3) Cooper
Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with ENVIR 415/CEE 495.

M E 424 Combustion Systems and Pollutant Formation (4) Malte
Combustion theory, including chemical thermodynamics, chemical kinetics, mixing and diffusion, and flame structure. Combustion chamber design concepts and performance. Pollutant formation and combustion methods for minimizing pollutant formation. Prerequisite: M E 323; recommended: M E 331; M E 333.

M E 425 HVAC Engineering (4) Emery
Heating, ventilating, and air conditioning of built environment. Human comfort, psychrometric processes, load computations, fluid distribution, and controls. Design analysis of HVAC system is taught in the lectures and applied in the class project. Prerequisite: M E 323; M E 331.

M E 426 Sustainable Energy Design (4) Malte
Energy systems with renewable (solar) energy and efficient use of energy. Project-based learning: analysis, systems engineering, design, component characteristics, and environmental impacts. Prerequisites: CHEM E/ENVIR/M E/PHYS 342 or M E 430; recommended: M E 331.

M E 430 Advanced Energy Conversion Systems (4) Kramlich
Advanced and renewable energy conversion systems and technologies are treated. Included are high efficiency combined cycles; renewable energy conversion involving solar, wind, and biomass; direct energy conversion and fuel cells; and nuclear energy. Environmental consequences of energy conversion and environmental control are discussed. Prerequisite: M E 323.

M E 431 Advanced Fluid Mechanics (4) Forster
Advanced topics in fluid mechanics, including kinematics, potential theory and vortex dynamics, viscous flow, turbulence, experimental and numerical methods, and design. Prerequisite: M E 333.

M E 432 Gas Dynamics (3)
Dynamic and thermodynamic relationships for the flow of a gas. Application of thermodynamic processes involving nozzles, diffusers, compressors, and turbines. Prerequisite: either M E 333 or CHEM E 342. Offered: by request only.

M E 433 Turbomachinery (4)
Thermodynamics, gas dynamics, and fluid mechanics of axial and centrifugal compressors, pumps, and turbines. Selection of components for engineering applications. Design problems and/or laboratory experiments to illustrate operating characteristics of turbomachines.

M E 436 Friction and Wear of Materials (3) Wilson
Study of principles of friction and wear behavior of materials and of those material properties that affect such behavior. Principles of lubrication. Applications to design of surfaces for wear resistance. Prerequisite: M E 333; M E 356.

M E 440 Advanced Mechanics of Materials and Solids (3) Labossiere
Study of mechanics of deformable bodies, including three-dimen-
sional stress and strain tensors and their transformations. Equations of compatibility, continuity and equilibrium. Elastic constants.
Failure criteria including fracture, yield and instability. Deflection relations for complex loading and shapes. Indeterminate problems. Design applications and numerical methods. Prerequisite: M E 354.

M E 442 Renewable Energy (3) NW Malte
Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with CHEM E 442/ENVIR 442; W.

M E 445 Introduction to Biomechanics (4) Sanders
Presents the mechanical behavior of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with BIOEN 440.

M E 450 Introduction to Composite Materials and Design (3) Tuttle
Stress and strain analysis of continuous fiber composite materials. Orthotropic elasticity, lamination theory, failure criterion, and design philosophies, as applied to structural polymeric composites. Recommended: MSE 475.

M E 459 Introduction to Fracture Mechanics (3) Ramulu
Deformation processes leading to fracture, and linear elastic fracture mechanics. Fatigue crack propagation. Fracture control and failure analysis. Prerequisite: M E 354; M E 356.

M E 460 Kinematics and Linkage Design (3) Ganter
Synthesis of linkage-type mechanisms using graphical and computer methods.

M E 468 Air-Pollution Control Equipment Design (3) Pilat
Designs to control air pollutants from stationary sources. Procedures for calculating design and operating parameters. Fundamental mechanisms and processes of gaseous and particulate control equipment for adsorption and adsorption of gaseous pollutants; electrostatic precipitation and filtration of particulate pollutants. Actual case studies. Offered: jointly with CHEM E 468/CEE 494.

M E 469 Applications of Dynamics in Engineering (4) Storti
Application of the principles of dynamics to selected engineering problems, such as suspension systems, gyroscopes, electromechanical devices. Includes introduction to energy methods, Hamilton’s principle and Lagrange equations and the design of dynamic system. Prerequisite: M E 374.

M E 470 Mechanical Vibrations (3) Reinhall

M E 471 Automatic Control (4) Berg
Dynamic system modeling; control system stability and performance analysis; compensator design by Bode and root-locus methods. Prerequisite: M E 374.

M E 473 Instrumentation (4) Garbini
Principles and practice of industrial and laboratory measurement. Dynamics of instrument response; generalized performance analysis of sensor systems; theory of transducers for motion, force, pressure, flow, and other measurements. Lecture and laboratory. Prerequisite: M E 374.

M E 474 Systems Modeling and Simulation (3) Fabien
Unified approach to modeling of systems, and computer simulation of systems behavior. Selecting system variables; writing state, loop, and node equations; modal response and state transition response; system functions and convolution; analogs. Applications to control, vibrations, and other problems. Prerequisite: M E 374.

M E 477 Embedded Computing in Mechanical Systems (4) Garbini
Analysis of electromechanical systems employing microcomputers for control or data acquisition. Microcomputer architecture, memory organization, assembly language programming, interfaces, and communications. Particular emphasis on design of hardware and software interfaces for real-time interaction with mechanical systems. Weekly laboratory. Prerequisite: M E 374.

M E 478 Finite Element Analysis (4) Labossiere, Reinhall
Development of theory and concepts of finite element analysis. Applications in all areas of mechanical engineering, including mechanics of solids, heat transfer, and design of dynamical systems. Weekly computer exercises. Prerequisite: M E 123; M E 374; either MATH 308 or AMATH 352.

M E 480 Introduction to Computer-Aided Technology (4)
Principles of computer-aided technology. Computer-aided design, engineering, drafting, and manufacturing; computer-aided design systems, geometry, computer graphics, hardware, computer-aided vehicle/system design synthesis. System demonstrations, laboratories, and site visits. Prerequisite: M E 123; CSE 142.

M E 481 Combustion Engines and Alternatives (4) Kramlich, Malte

M E 485 Introduction to Electronic Packaging and Materials (3) Taya
The governing equations of transport phenomena: mechanical, thermal, and electromagnetic behavior, thermomechanical and electromagnetic properties of packaging materials, electromagnetic characteristics of circuit and transmission lines, thermal management and reliability analysis of packaging, interconnect and material processing technology. Prerequisite: MSE 170. Offered: jointly with MSE 485.

M E 487 Laboratory in Electronic Packaging and Materials (1) Taya, Stoebbe
Laboratory course to accompany ME 485 Experiments related to design, processing and reliability of electronic packaging used in consumer electronics. Corequisite: M E 485. Offered: jointly with MSE 487.

M E 490 Naval Architecture (3) Adee
Theory of naval architecture; ship’s lines, hydrostatic curves, intact and damaged stability, launching.

M E 491 Naval Architecture (3) Adee
Theory of naval architecture; strength, ABS rules, water waves, ship and platform motions.

M E 492 Naval Architecture (3) Adee
Theory of naval architecture; dimensional analysis, resistance, model testing, propellers, steering.

M E 495 Mechanical Engineering Design (4)
Design laboratory involving the identification and synthesis of engineering factors to plan and achieve specific project goals. Current literature and prerequisite texts are used as reference sources. Lecture and laboratory. Prerequisite: M E 395.

M E 496 Technology-Based Entrepreneurship (3)
Concentrates on hands-on aspects of innovation and entrepreneurial enterprise development. Examines relationships between innovation, iterative prototyping, and marketing testing. Students identify market opportunities, create new technology-based products and services to satisfy customer needs, and construct and test prototypes. Prerequisite: IND E 250. Offered: jointly with IND E 496.

M E 498 Special Topics in Mechanical Engineering (1-5, max. 6)
Lecture and/or laboratory. Maximum of 6 credits may be applied toward an undergraduate degree.

M E 499 Special Projects (2-5, max. 6)
Written report required.

M E 501 Modern Manufacturing Processes (3) Ramulu
General survey and introduction to modern manufacturing engineering processes. Fundamental principles and practices of modern manufacturing processes. Case studies and exercises relating the course material directly to modern industrial practice. Offered: A.

M E 502 Plasticity and Metal Forming (3) Wilson
Stress-strain and stress-strain-rate relations in metal forming; plastic instability. Work of deformation. The slip-line field, load bounding, applications to frames, drawing, forging, and extrusion. Offered: odd years; Sp.

M E 504 Introduction to Microelectro Mechanical Systems (4)
Theoretical and practical aspects in design, analysis, and fabrication of MEMS devices. Fabrication processes, including bulk and surface micromachining. MEMS design and layout. MEMS CAD tools. Mechanical and electrical design. Applications such as micro sensors and actuators, or chemical and thermal transducers, recent advances. Offered: jointly with E E 502/MSE 504.

M E 505 Computer Integrated Manufacturing (3) Wilson
Design and analysis of advanced manufacturing systems from a strategic as well as technological perspective. Focus on information generation, management, and coordination aspects of complex manufacturing organizations. Examination of system integration alternatives and consequences for relationships with customers and suppliers. Offered: jointly with IND E 531; W.

M E 507 Computational Methods in Design and Manufacturing (3) Wu

M E 508 Theory and Design for Mechanical Measurements (3)
Fundamental concepts of mechanical measurements, principles of sensors and transducers, signal conditioning and data acquisition, advanced experiment planning and analysis, and applications in mechanical engineering. Offered: W.

M E 510 Mathematical Foundations of Systems Theory (4) Damborg
Mathematical foundations for system theory presented from an engineering viewpoint. Includes set theory; functions, inverse functions; metric spaces; finite dimensional linear spaces; linear operators on finite dimensional spaces; projections on Hilbert spaces. Applications to engineering systems stressed. Prerequisite: graduate standing or permission of instructor. Offered: jointly with A A 546/CHEM E 510/E E 510; A.

M E 518 Seminars on Advances in Manufacturing and Management (1) Ramulu
Current topics and advances made in manufacturing and management. Topics presented by invited speakers from academia and industry. Emphasis on the multidisciplinary nature of manufacturing and management Offered: jointly with IND E 518; AWSp.

M E 519 Seminar (0-)
Credit/no credit only. Offered: AWSp.

M E 520 Seminar (-1, max. 6)
Credit/no credit only. Offered: AWSp.

M E 521 Thermodynamics (3) Kramlich
Fundamental concepts of temperature, thermodynamic properties, and systems. The first, second, and combined laws. Development of the relations of classical thermodynamics. Introduction to statistical thermodynamics. Prerequisite: M E 323 and graduate standing in mechanical engineering or permission of instructor. Offered: A.

M E 522 Thermodynamics (3) Malte
Topics from statistical thermodynamics, including the Boltzmann, Bose-Einstein, and Fermi-Dirac statistics. Solutions of the Schrodinger wave equation and evaluation of the partition function for translation, rotation, and vibration. Prerequisite: M E 521 or permission of instructor. Offered: by request only.

M E 523 Energy and Environment Seminar (1) Malte
Student discussions of topics in combustion science and technology, alternative fuels, renewable energy, environmental consequences of energy conversion, and design for environment. Also, presentations by outside experts. May be repeated for credit. Credit/no credit only. Offered: AWSp.

M E 524 Combustion (3) Kramlich
Chemical and physical processes of combustion with applications to design of combustors, fuel selection, and consideration of environmental effects. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: odd years; Sp.

M E 525 Acoustics in Engineering I (3) Forster
Acoustic wave transmission, reflection, refraction, and diffraction. Review of continuum mechanics and examples from electromechanical systems. Prerequisite: graduate standing in mechanical or electrical engineering, or permission of instructor. Offered: W.

M E 526 Acoustics in Engineering II (3) Forster
Continuation of 525. Material differs each year, covering such topics as scattering, moving media, ultrasonics, acoustic holography, optoacoustics, transducer design, propagation in an isotropic medium. Prerequisite: M E 525 or permission of instructor. Offered: Sp.

M E 528 Acoustics of Environmental Noise (4)
Offered: jointly with CEE 554.

M E 530 Heat Conduction and Radiation (3) Mescher
Heat conduction advanced fundamentals, emphasizing microscale applications. Radiative transfer for transparent and for absorbing and scattering media, emphasizing combustion, biomedical, and atmospheric/oceanic environmental applications. Forward and inverse problems for both conduction and radiation. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: W.

M E 531 Conductive Heat Transfer (3)
Analysis of steady-state and transient heat conduction in single- and multidimensional systems by mathematical, graphical, numerical, and analogical methods. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: by request only.

M E 532 Convective Heat Transfer (3) Kramlich
Introduction to fluid flow and boundary-layer theory as applicable to forced- and natural-convection heat transfer. Condensation and boiling heat transfer. Prerequisite: graduate standing or permission of instructor. Offered: Sp.
M E 533 Fluid Mechanics I (3) Riley
Basic conservation laws and kinematics of fluid flow constitutive relationships, Newtonian fluids, dimensional analysis, vorticity dynamics, inviscid flows, applications. Offered: A.

M E 534 Fluid Mechanics II (3) Riley
Review of basic principles, some exact solutions and their interpretation, waves (water waves, sound waves, shock waves), boundary layers, jets and wakes, flow stability, turbulence, applications. Prerequisite: M E 533 or permission of instructor. Offered: W.

M E 535 Computational Techniques in Mechanical Engineering (3) Emery
Advanced heat transfer studies of interest to mechanical engineers. Subject coverage varies from year to year. Prerequisite: permission of instructor. Offered: Sp.

M E 537 Topics in Fluid Mechanics (3)
Selected fluid mechanics relevant to current advances in research and application. Topics selected vary with faculty and student interest, but have included flow stability, special topics in turbulence, and turbulent reacting flows. Offered: by request only.

M E 538 Turbulent Boundary Layer Theory (3)
Characteristic features of turbulent boundary layers; development of the turbulent boundary layer equations; equilibrium boundary layers; integral methods of solution based on power law and wall-wake velocity profiles; methods of solution based on higher order constitutive equations; application to diffuser flows and free shear flows; new developments and physical models. Offered: odd years; A.

M E 541 Fatigue of Materials (3) Ramulu
Macro and micro aspects of fatigue of metals and fatigue mechanisms. Analytical methods for fatigue and life assessment in advanced materials. Offered: W.

M E 543 Fluid Turbulence (3)
Methods of characterizing fluid turbulence; probability concepts; spatial and temporal velocity correlations; spectral energy transfer; turbulent diffusion; isotropic turbulence and Kolmogoroff’s hypothesis; Taylor’s hypothesis; hot-wire measurement techniques. Prerequisite: 3 credits of graduate level fluid mechanics or permission of instructor. Offered: even years; W.

M E 544 Advanced Turbulence Modeling Techniques (3) Riley
The Reynolds stress transport equations; plane homogeneous shear flow; modeling the pressure-strain, diffusion, and dissipation rate correlation tensors; one and two-equation turbulence models; near-wall turbulence and wall functions; limitations of length scale and eddy viscosity modeling. Prerequisite: 3 credits of turbulence related course work. Offered: even years by request only; Sp.

M E 547 Linear Systems Theory (4)
Linearity, linearityization, finite dimensionality, time-varying vs. time-invariant linear systems, interconnection of linear systems, functional/structural descriptions of linear systems, system zeros and invertibility, linear system stability, system norms, state transition, matrix exponentials, controllability and observability, realization theory. Prerequisite: either AA 447, EE 447 or ME 447. Offered: jointly with EE 547/A A 547; A

M E 548 Linear Multivariable Control (3)
Introduction to MIMO systems; successive single loop design comparison, Lyapunov stability theorem, full state feedback controller design, observer design, LQR problem statement, design, stability analysis, and tracking design. LQG design, separation principle, stability robustness. Prerequisite: AA 547/EE 547/ME 547. Offered: jointly with A A 548/E E 548.

M E 549 Estimation and System Identification (3)

M E 550 Nonlinear Optimal Control (3)
Calculus of variations for dynamical systems, definition of the dynamic optimization problem, constraints and Lagrange multipliers, the Pontryagin Maximum Principle, necessary conditions for optimality, the Hamilton-Jacobi-Bellman equation, singular arc problems, computational techniques for solution of the necessary conditions. Prerequisite: graduate standing; recommended: A A 548 or E E 548. Offered: jointly with A A 550/E E 550; odd years.

M E 551 Elasticity I: Elastostatics (3) Taya
Elastostatics, including general formulations of 2D and 3D elastostatic problems (stress function method, complex variable method, displacement potential method). Eshelby’s method is emphasized and used to solve 2D and 3D problems with special application to composite materials. Offered: W.

M E 552 Elasticity II: Viscoelasticity and Elastodynamics (3) Taya
Elastodynamics includes wave propagation in linear elastic and linear viscoelastic solids where solids are monolithic materials, composite materials. Viscoelasticity part includes the stress-strain equations in terms of convolution integral, Fourier transform and Laplace transform modes. Simple and fundamental problems are solved by several techniques as demonstration. Offered: even years; Sp.

M E 553 Adhesion Mechanics (3) Tuttle
Introduction to adhesive systems and test/evaluation techniques. Stress/strain analysis methods used with adhesive joints. Examples of practical applications. Prerequisite: graduate student status or permission of instructor. Offered: even years; Sp.

M E 554 Linear Systems Theory (4)
Basic equations of thermoelasticity for isotropic elastic solids. Analysis of disks, cylinders, spheres, beams, and plates under steady temperature and sudden and slow heating and cooling. Introduction to thermoelastic stability. Prerequisite: M E 551 or permission of instructor. Offered: by request only.

M E 556 Experimental Stress Analysis I (3) Tuttle
Theory and practice of experimental techniques including strain gages and strain gage-based devices, thermocouples, LVDTs, and transducer design. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Offered: A.

M E 557 Experimental Stress Analysis II (3) Tuttle
Theory and practice of optical mechanics, including interferometric techniques (moire and holographic), geometric moir methods, and photoelasticity. Lecture and laboratory. Prerequisite: graduate standing or permission of instructor. Offered: even years; W.

M E 559 Introduction to Fracture Mechanics (3) Ramulu
Applications of linear fracture mechanics to failure analysis and fracture control based on actual case studies. Fracture toughness and fatigue testing techniques, crack initiation and propagation fatigue life prediction of mechanical components subjected to environmental effects. Offered: W.

M E 560 Advanced Theory of Fracture (3) Ramulu
Theories of linear fracture mechanics, fracture dynamics, ductile fracture, stable crack growth and mixed mode fracture. Discussion of advanced topics from recent literature. Prerequisite: M E 559 or permission of instructor. Offered: even years; Sp.

M E 562 Introduction to Electronic Composites (3) Taya
Fundamentals of microstructure-macro-property relation of electronic composites. This course covers applications (computers, laser packages, medical devices, MEMS, avionics), functions (mechanical, thermal, electromagnetic and optical), microstructure-macro-property relations, processing issues, and modeling of electronic composites. Recommended: 450 or MSE 423. Offered: jointly with MSE 562; Sp.

**M E 563 Advanced Composites: Design and Manufacturing (3)**

Manufacturing and processing techniques of metal-, polymer-, and ceramic-matrix composites; design considerations related to manufacturing techniques; non-destructive testing of composite structures. Fiber-matrix interfacial features and interactions. Interfacial thermodynamics applied to selection of fiber-matrix combinations. Prerequisite: M E 450 or MSE 423 or equivalent by permission of instructor. Offered: jointly with MSE 563; Sp.

**M E 564 Mechanical Engineering Analysis (3) Storti**

Application of mathematical methods to the description and analysis of systems in mechanical engineering. Analogies in heat transfer, fluid flow, stress distribution, dynamics, and feedback control. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: A.

**M E 565 Mechanical Engineering Analysis (3) Storti**

Applications of vectors, matrices, and partial differential equations to mechanical engineering systems, including computational techniques and analogies. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: W.

**M E 566 Introduction to Random Processes (3) Kosaly**

**M E 572 Methodologies for Engineering Design: Conceptual Design (3) Kumar**

Methodologies particularly useful in the conceptual or preliminary phase of a design. The design process. Impact of formulating independent functional requirements. Physical and functional coupling in design. Case studies in conceptual design of products and processes. Prerequisite: graduate standing or permission of instructor. Offered: even years; W.

**M E 573 Methodologies for Engineering Design: Probabilistic Mechanical Design (3) Ramulu**

Study, implementation of probabilistic methods to design. Loading, geometry, stress, strain/deflection described as random variables, compared to material properties/behavior in terms of random variables. Design, analysis, reliability, risk analyses conducted on common structures with results compared to conventional deterministic approaches. Projects using probabilistic methods to optimize selected component designs. Offered: even years; Sp.

**M E 578 Optimization in System Sciences (3) Mesbahi**

Covers convex sets, separation theorems, theorem of alternatives and their applications, convex analysis, convex functions, conjugation, subgradients, convex optimization, duality and applications, linear and semi-definite programming. Linear matrix inequalities, optimization algorithms, applications in system theory and control, bilinear, rank minimization, optimization software. Recommended: A A/M E/E 547. Offered: jointly with A A/E E 578; W.

**M E 579 Fluid Power Systems (3)**

Design, analysis, and control of fluid power systems. Steady-state analysis of valves, actuators, and transmissions. Dynamic modeling, response, stability, and control analysis via linear element representation and computer simulation. Prerequisite: graduate standing in mechanical engineering or permission of instructor. Offered: Sp.

**M E 581 Digital Control (3) Chizeck**

Sampled-data systems, and z-transform. Frequency domain properties. Sampling D/A and A/D conversion. Controller design via discrete-time equivalents, direct methods, state feedback and observers. Quantization effects. LQR control and introduction to LQG optimal control. Prerequisite: either E E/A A or M E 548. Offered: jointly with A A/E E 581; W.

**M E 582 Introduction to Discrete Event Systems (3) Berg**

**M E 583 Nonlinear Control Systems (3)**

**M E 584 Combustion in Airbreathing Propulsion (3)**

Fundamentals of gasdynamics, mixing, and thermodynamics applied to the analysis and design of gas turbine, ramjet and scramjet engine combustors, with treatment of computer simulation. Offered: by request only.

**M E 585 System Identification and Adaptive Control (3)**

**M E 588 Dynamics and Vibrations (3) Shen**

Variational techniques, Hamilton’s principle, Lagrange’s equations applied to dynamics of particles and rigid bodies. Vibration analysis of multi-degree-of-freedom and continuous systems. Prerequisite: graduate standing in engineering or permission of instructor. Offered: A.

**M E 589 Vibrations (3) Storti**

Study of systems with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Nonlinear systems are emphasized. Prerequisite: M E 588 or permission of instructor. Offered: even years; W.

**M E 590 Vibrations (3) Reinhall**

Study of systems with nonlinear damping and restoring forces excited by deterministic or random inputs. Applications in measurement, testing, and design of mechanical systems. Random inputs are emphasized. Prerequisite: M E 588 or permission of instructor. Offered: even years; Sp.

**M E 591 Robotics and Control Systems Colloquium (1, max. 3) Berg**

Colloquium on current topics in robotics and control systems analysis and design. Topics presented by invited speakers as well as on-campus speakers. Emphasis on the cross-disciplinary nature of robotics and control systems. Credit/no credit only. Offered: jointly with A A/CHM E/E E 591; AWSp.
M E 593 Feedforward Control (3) Devasia
Design feedforward controllers for precision output tracking; inversion-based control of non-minimum-phase systems; effect of plant uncertainty on feedforward control; design of feedforward controllers for applications such as vertical take off and landing aircraft, flexible structures and piezo-actuators. Prerequisite: ME 547. Offered: jointly with A A/ E E 593.

M E 594 Robust Control (3)
Basic foundations of linear analysis and control theory, model realization and reduction, balanced realization and truncation, stabilization problem, coprime factorizations, Youla parameterization, matrix inequalities, H-infinity and H2 control, KYP lemma, uncertain systems, robust H2, integral quadratic constraints, linear parameter varying synthesis, applications of robust control. Offered: jointly with AA/E E 594; odd years; W.

M E 598 Topics in Research (1)
Doctoral seminar. Credit/no credit only. Offered: AWSp.

M E 599 Special Projects (1-5, max. 9)
Written report required. Prerequisite: permission of department Chairperson. Offered: AWSpS.

M E 600 Independent Study or Research (*)
Written report required. Offered: AWSpS.

M E 700 Master's Thesis (*)
Offered: AWSpS.

M E 800 Doctoral Dissertation (*)
Offered: AWSpS.

Mechanical/Industrial Engineering

Course Descriptions

MEIE 516 Advanced Topics in Engineering Statistics (3) Roberts, Zahinsky
Topics are flexible and tailored to the needs of the particular student group involved. Topics usually considered: regression, correlation, experimental design, Monte Carlo techniques, Markov processes, extreme value theory, time-series analysis. Prerequisite: graduate standing or permission of instructor.

MEIE 599 Special Projects in Industrial Engineering (1-5, max. 9)
Prerequisite: permission of industrial engineering program director. Offered: AWSp.

Technical Communication

14 Loew
Technical communicators use their language, visual, and analytical skills, as well as training and research in electronic and other media, to create and enhance communication in scientific and technical environments. Technical communication prepares students to design, create, edit, and evaluate technical and scientific discourse. The department provides coursework in the development of online help systems and in the design of general-audience content for delivery by means of advanced communication technologies such as the Web.

The complexities of modern life have greatly increased the number of people who need to communicate about technical and other specialized topics. Scientific journal articles, manuals, proposals, and other genres are important for a vast array of readers. With the Information Age, gaining and sharing technological understanding and capability has become a crucial human activity. We communicate in more genres, address broader (often global) audiences, and face more complex rhetorical problems than ever before.

To achieve success in their communication activities, progressive organizations are employing sophisticated planning and development methods, including user-centered design and evaluation, content management, and systems-based analyses. In addition, they undertake research projects and apply existing research to their own needs. Contemporary research in technical communication ranges from controlled empirical research on the processing of text, graphics, and multimedia content to observational research on how meaning is created and negotiated in business environments and virtual communities.

Other major interests include the human-computer interface, hypermedia, communications technology, the rhetoric of technical discourse, international communication, visual communication, publications and communications management, policy analysis of technological systems, and research and testing.

Undergraduate Program

tcadviser@u.washington.edu

The Department of Technical Communication offers the following programs of study:

- The Bachelor of Science in Technical Communication degree
- A minor in technical Japanese

Bachelor of Science in Technical Communication

Suggested First-Year College Courses: T C 231, approved math or statistics (see list on T C Web site), approved science (see list on T C Web site)

Department Admission Requirements

Applicants are considered in two groups — Early Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department’s admission decision.

Early Admission

Course requirements: 38 credits to include 10 credits of approved mathematics or statistics; 15 credits of approved natural science; and 13 credits of approved written and oral communication (including T C 231). All courses must be completed prior to the July 1 application deadline.

Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Application deadline is July 1 for autumn quarter only.

Grade requirements: Minimum 3.00 GPA in written and oral communications courses and minimum 2.00 cumulative GPA.

Upper-Division Admission

Course requirements: 10 credits of approved mathematics or statistics; 15 credits of approved natural science; and 13 credits of approved written and oral communication (including T C 231). All courses must be completed prior to the July 1 application deadline.

60 credits completed by application deadline, which is July 1 for autumn quarter and February 1 for spring quarter.

Students applying in the senior year must spend a minimum of four quarters in the program.

Grade requirements: Minimum 3.00 GPA in written and oral communications courses and minimum 2.00 cumulative GPA.

Graduation Requirements

180 credits as follows:
General Education Requirements (93 credits)
- Written and Oral Communications (13 credits): 5 credits of English composition from the University list; T C 231; 5 credits of oral/written communication from T C list (see adviser).
- Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (30 credits): A minimum of 10 credits is required in each area.
- Math and Natural Science (50 credits):
  - Mathematics (minimum 15 credits; see list of qualifying courses on T C Web site)
  - Science (minimum 15 credits; see list of qualifying courses on T C Web site)

Major Requirements (82 credits)
- Technical Communication Core (51 credits):
  - T C 310, T C 400, T C 401, T C 402, T C 403, T C 407, T C 411, T C 412, T C 437, T C 493, T C 495
- Technical-Analytical (12 credits): Must include either CSE 142 or PHIL 120.
- Approved Electives (19 credits): Must demonstrate a coherent and relevant area of specialization.

Free Electives (5 credits)

Minor
- Minor Requirements: Technical Japanese: Minimum of 27 credits to include T C 461 (3), T C 462 (3), T C 463 (3), T C 471 (3), T C 472 (3), and T C 473 (3), plus 9 credits from the approved list of elective courses. For more information, contact the Technical Japanese Office, 13 Engineering Library.

Student Outcomes and Opportunities
- Learning Objectives and Expected Outcomes: The department has identified several areas of competency for students. By achieving mastery in all these areas, upon graduation TC students are well prepared to advance to careers in technical communication, apply to top graduate programs, and conduct research in the field.
  - Understand the TC field
  - Write and edit at a professional level
  - Analyze communication situations and problems in scientific and technical settings
  - Identify and work with the major genres of technical communication
  - Use appropriate tools and technologies to develop communication solutions
  - Understand and use principles for effective display of information
  - Understand and practice effective content development
  - Manage TC projects effectively
  - Work effectively on teams
  - Be sensitive to relevant larger contexts and environments

The Department of Technical Communication prepares students to assume positions of intellectual leadership in industry, government, and non-profit organizations. Students also specialize in science writing or Web site design. The Technical Japanese program provides a unique opportunity to develop cross-cultural experience and expertise.

Whatever their professional direction, technical communication students learn the newest communication technologies and practices, the most effective information-design strategies, and the research skills appropriate to their interests. They also learn the enduring theory and principles that enable them to understand the constant changes they will encounter throughout their careers. Finally, their coursework takes place in the context of social and political issues and human needs.

- Instructional and Research Facilities: Department facilities include the T C Computer Lab, Technical Japanese Computer Lab, Laboratory for Usability Testing and Evaluation (LUTE), and the Engineering/iSchool Writing Center (EiWC).
- Research, Internships, and Service Learning: All Technical Communication undergraduates are required to complete at least one 3-credit internship. The supervised internship in a publications organization must be approved by the faculty advisor. As an internship substitution, students may elect to take part in a six-month co-op, sponsored by the Engineering Co-op program. Additionally, undergraduates are invited to work in research groups with TC grad students and faculty.
- Department Scholarships: Annually, T C selects one recipient of a College of Engineering Scholarship. The criteria for this scholarship are the applicant’s prior academic history and likelihood for success in the technical communication field. Additionally, the Society for Technical Communication (STC) offers annual scholarships open to all students enrolled in a T C-related program.
- Student Organizations/Associations: Students in the Technical Communication degree program often participate in the Student Chapter of the Society for Technical Communication (STC), the Minority Science and Engineering Program (MSEP), and Women in Science and Engineering (WISE).

Of Special Note: The T C department is a small, academic community. Students generally call their professors by their first name and have the opportunity to work individually on projects and research supervised by T C faculty. Undergraduate students are encouraged to work in research groups and to attend conferences and professional meetings.

Master of Science in Technical Communication
Technical Communication offers a Master of Science in Technical Communication (M.S.T.C.). (An evening program is offered through UW Educational Outreach.) A total of 41 credits is required for the M.S.T.C. degree, which includes 29 credits of required T C graduate courses and 11 credits of approved electives. M.S.T.C. students may elect to pursue a master’s thesis or project report with the approval of their supervisory committee.

In making recommendations for admission, the faculty consider the following from an applicant’s record: (1) undergraduate GPA; (2) undergraduate degree program and work experience; (3) the Graduate Record Examination (GRE) Verbal score; (4) the Test of English as a Foreign Language (TOEFL) score (if applicable); (5) letters of recommendation; and (6) Statement of Goals and Career Objectives.

A limited number of prerequisite undergraduate courses may be required.

Ph.D. in Technical Communication
The Ph.D. in Technical Communication consists of core courses, electives, directed research, and dissertation work. Ph.D. students generally work as teaching or research assistants in the department. Core coursework is distributed across four thematic areas: theory, research methods, media design and applications, and society and systems. Students use elective credits to explore disciplines closely related to T C such as human-computer interaction, psychology, rhetoric, information science, and education.
The directed research requirement gives Ph.D. students experience in group research, and it allows students to achieve greater depth of knowledge in diverse topic areas. As part of their research group activity, students may conduct experiments, write articles, and present findings at national conferences. The dissertation provides the opportunity for extended inquiry into a specific area.

Research Facilities

The Department of Technical Communication has a well-equipped computer laboratory that effectively supports its courses and research projects. In addition, there are two specialized departmental research laboratories: the Technical Japanese Lab and the Laboratory for Usability Testing and Evaluation (LUTE). An award-winning magazine, Northwest Science and Technology, is produced in the department and serves as a laboratory for science-writing students. Finally, technical communication graduate students can utilize significant College of Engineering and University-level research facilities.

Financial Aid

A limited number of teaching and research assistantships and scholarships are available for the financial support of graduate students in technical communication. More information and application forms can be obtained by contacting the department.

Master of Science in Engineering — Technical Japanese Program

The Technical Japanese Master’s Program, within the College of Engineering Interengineering Program, offers a range of classes in advanced, practical Japanese for both master’s and non-master’s track students. Master’s track students follow a two-year, 54-credit program which combines graduate work in an engineering specialty with advanced instruction in technical Japanese language. Non-master’s track students may take any combination of technical Japanese oral communication or reading classes. These courses equip students with the skills necessary to read business/technical literature in Japanese and to work effectively with Japanese engineers, scientists, and business people in research and business environments. The complete program includes an internship in Japan in an industrial or research setting.

Master’s track students are admitted to the program autumn quarter only, and the application deadline is February 28, although late applications will be considered. Other students may begin autumn or winter quarter or during spring quarter with instructor’s permission. To be admitted, master’s track applicants must have a bachelor’s degree in engineering or applicable science field, a minimum undergraduate GPA of 3.0, three years of college-level Japanese or equivalent training, satisfactory scores on the GRE, and satisfactory scores on the Japanese Proficiency Test (administered by the Technical Japanese Program).

Applications with a bachelor’s degree in areas other than engineering or science can also earn a master’s degree through the Technical Japanese Master’s Program by specializing in technical communication as their inter-engineering track.

Course Descriptions

T C 100 Introduction to Technical Communication (5)
Topics may include: virtual communities, human-computer interaction, web design, usability testing, visual design, and others. Explores course content through individual and group hands-on projects. Offered: A.

T C 231 Introduction to Technical Writing (3)
Principles of organizing, developing, and writing technical information. Report forms and rhetorical patterns common to scientific and technical disciplines. Technical writing conventions such as headings, illustrations, style, and tone. Numerous written assignments required. Required for all engineering majors. Prerequisite: either C LIT 240, both ENGL 104 and ENGL 105, ENGL 111, ENGL 121, ENGL 131, ENGL 182, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. Offered: AWSpS.

T C 300 Practice in Technical Reporting (1-2, max. 2)
Application of the fundamentals of technical reporting to the specific reporting activity of students who are enrolled in a jointly designated engineering, scientific, or technical course. Offered: A.

T C 310 Introduction to Communication Design (5)
Turns Functions of, and relationships among, major software tools in the context of common technical communication design problems. Students practice explaining and justifying design solutions in terms of key features and user characteristics. Offered: Asp.

T C 317 Survey of Usability Research Techniques (5)
Introduces usability research methods used in the product-development process; contextual inquiry, surveys and interviews, focus groups, user profiling, usability testing, cognitive walkthroughs, heuristics, and others. Offered: Sp.

T C 318 Survey of User Experience Design (5)
Provides a project-based introduction to the user interface design process and is oriented toward practical methods for approaching a design problem. Focuses on developing conceptual designs based on user need. Offered: Sp.

T C 319 Survey of Concepts in Human-Computer Interaction (5)
Studies the social, cognitive, behavioral and contextual aspects of information systems and informational dimensions of the human-computer interface, and other user-centered design concepts. Surveys research literature of human information behavior, as well as ethical standards. Offered: Sp.

T C 333 Advanced Technical Writing and Oral Presentation (4)
Emphasis on the presentation of technical information to various audiences. Style of writing required for proposals, reports, and journal articles. Oral presentation principles, including use of visuals, as well as organizing and presenting an effective talk. For engineering majors. Prerequisite: T C 231. Offered: AWSpS.

T C 400 Scientific and Technical Communication (5) Kasonic, Kolko
Principles and practices of writing to communicate scientific and technical information to a variety of readers, including the expert, general scientific and technical reader, manager, and general public. Examines research and issues in the TC field including social contexts and environments (legal, ethical, cultural). Required of technical communication majors. Prerequisite: T C 231. Offered: Asp.

T C 401 Style in Scientific and Technical Writing (5) Coney, Spyridakis
Grammatical structures and stylistic strategies within specific professional contexts. Achieving clarity and conciseness through word choice and placement, using a variety of sentence structures for appropriate emphasis, handling details, establishing effective tone. Required of technical communication majors. Prerequisite: T C 231. Offered: Asp.

T C 402 Scientific and Technical Editing (5) Farkas, Kolko
Editorial responsibilities and practice in the communication of scientific and technical information; the editor’s role both as editor and as supervisor of publication groups. Addresses managing collaborative teams and basic SML concepts and metadata. Required of technical communication majors. Prerequisite: T C 400 with a minimum grade of 3.0; T C 401 with a minimum grade of 3.0. Offered: W.

T C 403 Publication Project Management (3) Plumb

566
Responsibilities and practice in managing publication projects in scientific and technical organizations. Project design, coordination, production, and evaluation, including planning, organizing, staffing, and directing. Required of technical communication majors. Offered: W.Sp.

T C 406 Understanding Research in Technical Communication (3) Spyridakis
Provides a basis for integrating knowledge acquired in other technical communication courses. Students relate the research literature of various disciplines that impact technical writing. Structured around theoretical and empirical literature as it relates to different textual issues in technical writing. Offered: W.

T C 407 Software User Assistance (5) Farkas
Concepts and skills for preparing manuals, online help systems, performance-support systems, and other forms of locally stored and Web-based software user assistance. Includes principles of human-computer interaction, usability evaluation, and the software-development process. Students create both end-user and developer documentation. Prerequisite: T C 310. Offered: W.

T C 408 Public Documents: Proposals, EISs, Assessments (3) Bereano
Analyzing special documents of public character: proposals, EISs, questionnaires, technology assessments. Understanding socio-political milieu in which they are planned, organized, written; the specialized audiences (e.g., agencies with their missions, guidelines, constituencies; citizen groups; commercial interests) they serve. Documents, the decision-making process. Offered: odd years; Sp.

T C 409 Writing for Publication (3) Coney
Writing for professional and trade periodicals in science, engineering, and technology; examination of the publication process, including the roles of author, editor, and reviewer; selecting the appropriate periodical; organizing and writing the article. Prerequisite: T C 400; T C 401. Offered: W.

T C 410 Advanced Style in Technical Discourse (3)
Examines writing style for technical communicators, requiring syntactical and semantic choices to produce technical prose suitable for any purpose, audience, and type of document in professional/industrial settings. Learn and practice a variety of styles, with emphasis on short, frequent assignments based on technical and scientific topics. Prerequisite: T C 401. Offered: W.Sp.

T C 411 Visual Media in Technical Communication (5) I&S/ VLPA Williams
Use of visuals in print and electronic communication. Topics include vision, perception, comparison of text and visual media principles for the selection and use of visual media, information graphics icons, page and screen design typography, and color. Offered: ASp.

T C 412 Print Production (5) Sauers, Williams
Introduction to print production for technical communicators. Topics include digital pre-press, printing, binding, and finishing. Prerequisite: T C 411. Offered: W.

T C 415 Production Editing (4) Williams
The editorial role in the preparation of text and visual materials for production. The editor’s responsibilities and prerogatives as they relate to those of other professionals in the production phase of the publications field.

T C 420 Introduction to Technology as a Social and Political Phenomenon (5) I&S Bereano
Introductory survey presenting some of the issues pertaining to technology and social change, technology and values. Emphasis on the social, political, and economic aspects of current problems that have important technological components. Prior technical background not required; readings from diverse sources. Offered: A.

T C 425 Technology Assessment (5) I&S Bereano
In-depth analysis of the concept, practice, and methods of technology assessment (policy analysis that concentrates on social consequences of technological development): social, political, economic, and environmental impacts of new technologies; options for channeling these developments; and relevant decision-making processes and institutions. Offered: W.

T C 428 Policy Dimensions of Genetic Engineering (3) I&S Bereano
Explores technological discourse in public policy formation and decision-making regarding genetic engineering, analyzing a variety of media and formats to explore the contending ideological paradigms, imagery, and argumentation used by the major policy actors. No prerequisite, although prior work in biology, communication, or policy sciences is useful. Offered: Sp.

T C 435 Introduction to Content Management (3)
Principles and practices of building, managing and using content management systems in the technical communication workplace. Examines both the intricacies of collaborative workflow technologies and the organizational contexts that surround them.

T C 436 Design and Authoring of CAI (3) Winn
Introduction to the design of computer-assisted-instructional programs. Types of learning, characteristics of effective instruction. Students design and produce CAI programs using authoring systems for computers. Offered: jointly with EDCI 436; A.

T C 437 Web Design and Web Publishing (5) I&S/VLPA Farkas
Design principles and skills including navigation, functional design, visual design, and content development. Includes the ongoing process of Web publishing. Addresses societal issues pertaining to the Web and Internet. Students build a website and plan for ongoing Web publishing. Prerequisite: T C 310; T C 411. Offered: Sp.

T C 438 Web Technologies (5)
Markup languages and styles, JavaScript, Flash, Photoshop, and the fundamentals of digital sound and video. Includes an introduction to server-side technologies. Students expand their existing design skills to encompass the use of these Web technologies. Prerequisite: T C 310; T C 437.

T C 440 Science and Engineering News Writing (5) Illman
Explores the science news publishing process, from researching topics and interviewing sources to the structure of news articles and production. Writing assignments address the press release, news brief, and news articles. Offered: A.

T C 454 Alternative Technology (3) I&S Bereano
Exploration of the evolution of technological forms that are small-scaled, decentralized, emphasizing the public policy aspects of these developments. Topics include the relationship between alternative technologies and worker-controlled enterprises, community planning, the politics of technological change, the Third World, and decentralized development. Background in engineering or technical design is not required. Offered: A.

T C 455 User Interface Design (4) Furness
Design oriented to cover fundamentals of user interface design; models on human computer interaction, software psychology, input devices, usability, cognitive and perceptual aspects of human-computer interaction, advanced interface, and research methodologies are discussed. Offered: jointly with IND E 455; A.

T C 461 Reading in Technical Japanese I (3) VLPA Kato
Students review and strengthen their basic knowledge of grammar, vocabulary, and kanji and apply this in reading authentic materials on technology related topics. Skills to analyze sentence structures
for accurate interpretation are taught. Prerequisite: JAPAN 423. Offered: A.

T C 462 Reading in Technical Japanese II (3) VLPA Kato
Students improve skills for analyzing complex sentence structures, and learn skills (such as predictions) for more effective reading. Additional grammar, vocabulary, and kanji necessary for reading technology-related materials are introduced. Prerequisite: T C 461. Offered: W.

T C 463 Reading in Technical Japanese III (3) VLPA Kato
Students further improve skills introduced in previous courses. Covers the skills for understanding inter-sentential and paragraph structure. Additional grammar, vocabulary, and kanji necessary for reading technology-related materials are introduced. Prerequisite: T C 462. Offered: Sp.

T C 471 Oral Communication in Japanese in Technical and Business Settings I (3) VLPA Kato
Students review and strengthen their knowledge of grammar, vocabulary and apply this to basic technical and business communication situations. Covers the cultural concepts underlying these situations. Lab work is required for conversation practice and listening comprehension. Prerequisite: JAPAN 423. Offered: A.

T C 472 Oral Communication in Japanese in Technical and Business Settings II (3) VLPA Kato
Students learn the functional and situational skills necessary to communicate in technical and business settings. Covers the cultural concepts underlying these situations. Lab work is required for conversation practice and listening comprehension. Prerequisite: T C 471. Offered: W.

T C 473 Oral Communication in Japanese in Technical and Business Settings III (3) VLPA Kato
Students learn the functional and situational skills necessary to communicate in more complex technical and business settings. Covers the cultural concepts underlying these situations. Lab work is required for conversation practice and listening comprehension. Prerequisite: T C 472. Offered: Sp.

T C 493 Senior Study (5)
Integration of knowledge and skills acquired during major program into one paper or project. Offered: AWSpS.

T C 495 Professional Practice (3-10, max. 10) Williams
Supervised internship in a publications organization approved by the faculty adviser. A minimum of one internship is required of students majoring in technical communication. Credit/no credit only. Offered: AWSpS.

T C 496 Directed Research in Technical Communication (1-3, max. 10)
Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Credit/no credit only. Offered: AWSpS.

T C 497 Study Abroad: Technical Communication (3-5, max. 15)
Upper-division technical communication courses, for which there are no direct University of Washington equivalents, taken through the Department of Technical Communication’s Study Abroad Program. Offered: S.

T C 498 Special Topics (1-5, max. 15)
Special topics in technical communication to be offered occasionally by permanent or visiting faculty members.

T C 499 Special Projects (1-5, max. 10)
Individual undergraduate projects in technical communication. Offered: AWSpS.

T C 501 Theoretical Dimensions of Technical Communication (4) Coney, Sauer
Theories and research drawn from a variety of fields that inform such topics as the historical and social context of technical communication, the aims of technical discourse, readability, invention and audience, audience analysis, technical style, and graphics. Prerequisite: admission to an engineering master’s program or permission of instructor. Offered: A.

T C 502 Empirical Traditions in Technical Communication (4) Williams
Introduction to empirical traditions that inform research and practice in field of technical communication. Topics include epistemological assumptions underlying empirical research, empirical methods, and survey of results of empirical research on effects of text and visual media on comprehension, recall, and performance. Prerequisite: graduate standing or permission of instructor. Offered: W.

T C 505 Computer-Assisted Communication (4) Kolko
Explores computer-assisted communication from three perspectives: (1) cultural roles of communication technologies; (2) relationships between communication and information including information technologies in the workplace, academe, and other settings; and (3) application to design including models for audience analysis, task analysis, and cognitive systems engineering. Prerequisite: graduate standing or permission of instructor. Offered: Sp.

T C 509 Writing the Scientific Article (3) Haselkorn, Illman
Examination of principles and practice of writing research manuscripts, articles, abstracts, and oral presentations. Detailed examination of scientific publication process includes issues of style, organization, and ethics. Students draft, critique, and revise their own manuscripts and learn to review the manuscripts of others. Offered: Sp.

T C 510 Information Design (4) Farkas
Examination of the design principles and procedures underlying the creation of both print and electronic information presentations. Topics include: print vs. electronic media, designing for the page and screen, information topologies, and hypermedia. Seminar includes a design project. Prerequisite: T C 501 or permission of instructor. Offered: Sp.

T C 511 Visual Media in Technical Communication (5) Williams
Use of visuals in print and electronic media. Topics include vision, attention and perception, semiotics, depiction, information graphics, icons, typography, and principles of page and screen design.

T C 512 International Technical Communication (4) Spyridakis
Examines theory, research, and practice in the internationalization and localization of paper and electronic documents. Topics include cultural models and schemata, contrastive rhetoric, controlled languages, translation, visuals, and usability testing. Prerequisite: graduate standing or permission of instructor. Offered: W.

T C 515 Ecological Information Systems (4)
Introduction to cognitive work analysis framework. Prepares for active role in design and evaluation of information systems. Familiarization with basic concepts of cognitive systems engineering and practice in field study, data analysis, and transforming field findings into requirements for the design of an information system. Offered: jointly with LIS 515.

T C 516 Research Theory and Application in Technical
T C 517 Usability Testing (4) 
Ramey
Discusses the human-computer interface (HCI) as the communicative aspect of a computer system. Analyzes usability issues in HCI design, explores design-phase methods of predictability, and introduces evaluative methods of usability testing. Prerequisite: substantial experience with computers and graduate standing, or permission of instructor. Offered: Sp.

T C 518 User-Centered Design (4) 
Turns
Explores the user-centered design paradigm from a broad perspective, emphasizing how user research and prototype assessment can be integrated into different phases of the design process. Students learn to think like a user-centered designer and carry out activities that are key to user-centered design. Offered: jointly with IND E 545.

T C 520 Technical Communication Systems (4) 
Haselkorn
Emphasizes the role and function of communication as a key to understanding organizational frameworks and managerial practices. Traditional and innovative approaches to viewing and managing technical communication. Roles, responsibilities, impact of technology. Offered: Sp.

T C 521 Seminar: Current Issues in Technical Communication (1-2, max. 3)
Presentations on current issues in technical communication. Credit/no credit only. Prerequisite: T C graduate student status or permission of instructor. Offered: AWSp.

T C 523 Seminar: Issues in TC Scholarship and Professional Activity (1, max. 3)
Exploration of advanced issues in technical communication scholarship and practice. Credit/no credit only. Prerequisite: TC PhD student status or permission of instructor. Offered: AWSp.

T C 525 Assessing Communications Technologies (4) 
Bereano
Analysis of development, deployment of new communication technologies; emphasis on public policy issues they present (e.g., videotelephone, mobile telephoning, hypermedia, electronic message transfer, virtual reality). Impacts explored include access, privacy, civil liberties; power of elites; changes in social organization. Prerequisite: T C 425 or other background in policy analysis, technology, and society. Offered: Sp.

T C 535 Content Management (4) 
Kasonic
Principles and practices of building, managing, and analyzing content management systems in the technical communication workplace. Collaborative workflow technologies and organizational contexts that surround them.

T C 537 User-Centered Web Design (5) 
Farkas
Theory and practice of the user-centered web development process. Principles and processes for documenting and implementing various development stages, including requirements analysis, user needs analysis, information architecture, prototyping, mockups, and production.

T C 540 SciTech Writing Practicum I (4) 
Illman
An advanced experience in science and engineering news writing for graduate students and upper division undergraduates. Participants serve as science writing interns on the staff of Northwest Science & Technology magazine and develop a portfolio of professional quality science/technology news articles which may be eligible for publication in the magazine. Prerequisite: T C 498 or permission of instructor. Offered: W.

T C 541 SciTech Writing Practicum II (4) 
Illman
Advanced science writing, focusing on the narrative feature and other forms of creative non-fiction used to present technical content to general audiences. Participants develop a portfolio of professional quality science/technology news articles which may be eligible for publication in Northwest Science and Technology magazine. Prerequisite: T C 540 or permission of instructor. Offered: Sp.

T C 561 Advanced Japanese for Technical and Business Professions 1 (3) 
Tsutsui
Focuses on reading skills (e.g., sight reading, vocabulary, grasping main ideas) and familiarizes students with Japanese news media sites and Web reading tools. Students also develop the oral communication skills necessary for giving technical and business reports and the writing skills for business emails. Prerequisite: T C 463 and T C 473. Offered: A.

T C 562 Advanced Japanese for Technical and Business Professions 2 (3) 
Tsutsui
Focuses on developing reading speed. Students read more extensively, expand their technical/business vocabulary, and further improve skills for grasping main ideas quickly. Students also improve oral skills for report-giving and discussion and writing skills for business emails and reports. Prerequisite: either T C 561 or T C 463; and T C 473 and T C 601. Offered: W.

T C 563 Advanced Japanese for Technical and Business Professions 3 (3) 
Tsutsui
Integrates the reading, oral, and writing skills acquired through the first-year and second-year technical/business Japanese sequences. Students work on research projects, give formal presentations, and submit project reports. Substantial individual readings are involved as well as individual conferences with the instructor on readings and report drafts. Prerequisite: T C 562. Offered: Sp.

T C 596 Directed Research in Technical Communication (1-3, max. 10)
Students, working in teams under the supervision of individual faculty members, review relevant literature, pose research questions, design and conduct studies, and present the results in papers prepared either for submission to a professional journal or for presentation at a professional conference. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

T C 597 Approaches to Teaching Technical Communication (1-2, max. 2)
Plumb
Readings in pedagogical theory of technical communication and discussion of practical applications. Credit/no credit only. Prerequisite: concurrent teaching appointment or permission of instructor. Offered: AWSp.

T C 598 Special Topics (1-5, max. 6)
Prerequisite: permission of instructor.

T C 599 Special Projects (1-5, max. 5)
Written report required. Prerequisite: permission of graduate adviser or committee chair. Offered: AWSp.

T C 600 Independent Study or Research (*)
Written report required. Prerequisite: permission of committee chair. Offered: AWSp.

T C 601 Internship (2-10, max. 10)
Written report required. Prerequisite: permission of committee chair. Offered: AWSp.

T C 700 Master's Thesis (*)
Prerequisite: permission of thesis adviser. Offered: AWSp.
College of Forest Resources

Dean
B. Bruce Bare
107 Anderson

Associate Dean for Academic Affairs
Stephen West
123 Anderson

The College of Forest Resources, through teaching, research, and outreach, generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues.

Founded in 1907, when forestry education was in its infancy, the College holds a position of national and international leadership in both instruction and research. Its location in one of the world’s largest forest regions provides students access to a unique urban-to-wild world-class laboratory in which to study the multiple dimensions of natural resource science and management. Approximately 250 undergraduate and 175 graduate students are enrolled, taught by more than 50 faculty members. Students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large research university.

The College’s programs focus on the sustainability and functionality of complex natural resource and environmental systems using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world. Interdisciplinary research and outreach centers and cooperatives include the Center for International Trade in Forest Products (CINTRAFOR), the Center for Water and Watershed Studies (CWWS), the Center for Urban Horticulture (CUH), the Olympic National Resources Center (ONRC), the Rural Technology Initiative (RTI), Stand Management Cooperative (SMC), Precision Forestry Cooperative, and Urban Ecology Interdisciplinary graduate program. For current information on all these centers and cooperatives, please visit www.cfr.washington.edu/research/index.html.

Facilities

The College occupies three central Seattle campus buildings: Alfred H. Anderson Hall, the Hugo Winkenwerder Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture is located near the Union Bay natural area. The Center for Urban Horticulture maintains a library that serves students, faculty, landscape professionals, and the public. The Center’s herbarium supports fieldwork in urban horticulture, restoration ecology, and dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Another herbarium, complete in plants native to the Pacific Northwest and maintained by the Department of Biology, is available for use by the College’s students.

The College’s laboratory facilities represent an extensive array of modern equipment for research, including optical equipment, electronic instrumentation for a wide variety of uses, gas chromato-graphs, spectrophotometers, and physical-test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, tree physiology, genetics, wood and extractives chemistry, physics of fibrous composites, applied mechanics, wood process technology, silviculture, ecology, paleoecology, pathology, entomology, wildlife, landscape management systems, horticultural physiology, and horticultural plant materials.

The College computing facilities include computer systems dedicated to specific research areas, a computer student laboratory, a geographical information systems (GIS) laboratory, and a local-area network with several servers offering access to the Internet and printers.

Office of Student and Academic Services

Michelle M. Trudeau
cfradv@u.washington.edu

The Office of Student and Academic Services in the College of Forest Resources assists prospective students with admission to the College and advises current students, including interpretation of College and University requirements and assistance in course planning. Faculty advisers assist students in choosing elective courses to help build an appropriate academic background for their chosen specialty.

The office keeps job listings and employer resources to help students obtain summer employment and internships while in school and permanent employment upon graduation. The office also sponsors a career fair every January. Although field experience is not required for graduation, students are strongly urged to seek summer employment or field experience relevant to their career goals.

Research Programs

Areas of research are closely tied to the College’s graduate programs. These include forest policy analysis; stand management; streamside and riparian zone management; forest ecosystem analysis; international trade in forest products; business, economics, and quantitative management; forest biotechnology; wildlife science; forest soils; urban and environmental horticulture; forest engineering; hydrology; and paper science and engineering.

Outreach Programs

The College, through its interdisciplinary centers and through collaboration with Cooperative Extension of Washington State University, undertakes and promotes continuing public and professional education for citizens of the state.

Field Facilities

College field facilities include two major forested areas covering more than 4,000 acres, an arboretum, a natural area, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a natural-science laboratory for the many disciplines in the College concerned with the research and teaching of natural resources science and management.

The 4,200-acre Charles Lathrop Pack Experimental Forest is located 65 miles south of the University, near Eatonville, Washing-ton. Broad forest and soil diversity in this area has led to extensive biological, management, and engineering research. A full-time resident staff manages this facility, harmonizing its public-education objectives with academic and research objectives. Rustic but comfortable facilities which provide housing and support to research programs are also used extensively for conferences both within and outside the University. The College is establishing a new Center for Sustainable Forestry at Pack Forest to be charged with discovering, teaching, and demonstrating the concepts of sustainable forestry, with special emphasis on the College’s strategic themes of sustain-
able forest enterprise and sustainable land and ecosystem management in an urbanizing world.

The Olympic Natural Resources Center (ONRC) is a 19,000-square-foot research and education facility located on the west side of the Olympic Peninsula. The mission of the center is to conduct research and education on natural-resources management practices which integrate ecological and economic values. Innovative management methods that integrate environmental and economic interests into pragmatic management of forest and ocean resources are demonstrated. A forest management program as well as a marine program are in place to study the relationship between the terrestrial and marine environment.

The Wind River Canopy Crane is a 250-foot research crane set in old-growth forest canopy in southwestern Washington state. It is the largest canopy crane in the world and the first in a temperate forest. A research partnership between the College of Forest Resources and the U.S. Forest Service, it provides graduate students and faculty opportunities for on-site research and field trip opportunities for undergraduates.

The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are utilized by the College in cooperation with Seattle Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about study principles and practices of restoration ecology. The Douglas Hyde Hortorium is an herbarium dedicated to plants of naturalistic setting on the south shore of Lake Washington. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former dumpsite now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Hortorium is an herbarium dedicated to plants of urban horticultural significance. The Miller Seed Vault stores seeds of urbanized and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Horticultural Library is the Northwest’s foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center also conducts courses, lectures, and special events for the public and professionals as part of the College’s outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the Center.

The Center for Urban Horticulture has offices, laboratories, public-education resources, and field sites for teaching and experimentation along the shore of Union Bay. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former dumpsite now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Hortorium is an herbarium dedicated to plants of urban horticultural significance. The Miller Seed Vault stores seeds of Washington’s rare and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Horticultural Library is the Northwest’s foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center also conducts courses, lectures, and special events for the public and professionals as part of the College’s outreach program. The Miller Seed Vault stores seeds of urbanized and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Horticultural Library is the Northwest’s foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center also conducts courses, lectures, and special events for the public and professionals as part of the College’s outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the Center.

The Wind River Canopy Crane is a 250-foot research crane set in old-growth forest canopy in southwestern Washington state. It is the largest canopy crane in the world and the first in a temperate forest. A research partnership between the College of Forest Resources and the U.S. Forest Service, it provides graduate students and faculty opportunities for on-site research and field trip opportunities for undergraduates.

The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are utilized by the College in cooperation with Seattle Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about study principles and practices of restoration ecology. The Douglas Hyde Hortorium is an herbarium dedicated to plants of urban horticultural significance. The Miller Seed Vault stores seeds of urbanized and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Horticultural Library is the Northwest’s foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center also conducts courses, lectures, and special events for the public and professionals as part of the College’s outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the Center.

The Center for Urban Horticulture’s largest facility is the Washington Park Arboretum, a 230-acre collection of trees and shrubs in a naturalistic setting on the south shore of Lake Washington. Managed in cooperation with the City of Seattle Department of Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about woody plants’ diversity, natural ecology, and urban landscape use, as well as conserving endangered natural and cultivated plants. Classes in botany, dendrology, horticulture, wildlife, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and various research projects, including many independent student projects. The arboretum, established in 1934, also serves as an important public-service area to the University, offering numerous formal and informal classes for the general public and, in addition, serving the community as a public park and open space.

Undergraduate Program
Adviser
116 Anderson
206-543-3077
cfrady@u.washington.edu

The College of Forest Resources offers the following programs of study:

- The Bachelor of Science in Forest Resources degree with a major in environmental science and resource management.
- The Bachelor of Science in Forest Resources degree with a major in paper science and engineering. Paper science and engineering has ABET accreditation which is recognized by the Council on Postsecondary Accreditation and the U.S. Department of Education as the accrediting agency for engineering in the United States.
- Minors in environmental science and resource management; and streamside studies.

Bachelor of Science in Forest Resources

Suggested First- and Second-Year College Courses:

- Environmental Science and Resource Management: T C 231, ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 161-BIOL 162; CHEM 120, CHEM 220; any 5-credit VLPA course; MATH 120 or Q SCI 291; ESRM 210.
- Paper Science and Engineering: CHEM 142, CHEM 152, CHEM 237, CHEM 238; ECON 200; ENGL 131 (or 5-credit English composition course); CHEM E 260; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; Q SCI 381; PSE 201, PSE 202, and PSE 450.

Department Admission Requirements

- Environmental Science and Resource Management: Students in good academic standing may declare this major at any time.
- Paper Science and Engineering: Students may apply for freshman admission or upper-division admission.

Applications are available in Student and Academic Services, 116 Anderson, or through the College of Engineering, 356 Loew, or by visiting the College Web site. Departmental deadlines are July 1 for autumn quarter, October 15 for winter quarter, and January 15 for spring quarter. Admission is competitive; completion of requirements does not guarantee admission.

Graduation Requirements

Environmental Science and Resource Management
180 credits as follows:

General Education Requirements (65-66 credits)
Written Communication (12 credits): 5 credits
English composition (ENGL 131 preferred); minimum 7 additional credits of writing-intensive coursework to include T C 231; and T C 333 (or equivalent).
Quantitative and Symbolic Reasoning (20 credits): Q SCI 291, Q SCI 292, and Q SCI 381; ESRM 250.
Natural World (23-24 credits): BIOL 161 and BIOL 162, or BIOL 180 and BIOL 200; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESC 210 or ESC 311.
Visual, Literary, & Performing Arts (VLPA) (10 credits)
Minimum 28 credits with a grade of at least 2.0 in each course:

Individuals & Societies (I&S): 10 credits required, all of which are satisfied by core courses shown below.

Major Requirements (55 credits)
Core Courses (20 credits): ESRM 301, ESRM 302, ESRM 303, ESRM 304.
Restricted Electives (35 credits): 300- or 400-level courses from within the College of Forest Resources. 15 of the 35 credits must be at the 400 level. See College Web site for possible pathways.

Free electives: As needed to bring minimum total to 180 credits.

Paper Science and Engineering
General Education Requirements (92 credits)
Written Communication (5 credits): 12 credits required, including 5 credits of English composition (ENGL 131 preferred); additional 7 credits satisfied by PSE courses shown below.
Mathematics, Statistics, and Computer Programming (27 credits): MATH 124, MATH 125, MATH 126, MATH 307; Q SCI 381 or STAT 311; CSE 142.
Supporting Sciences: (43 credits): CHEM 142, CHEM 152, and CHEM 162; CHEM 237 and CHEM 238; CHEM E 260; PHYS 121, PHYS 122, and PHYS 123.
Visual, Literary, & Performing Arts (VLPA) (10 credits): Chosen from the University VLPA list.
Individuals & Societies (10 credits): ECON 200; 2 credits from the University I&S list; 3 additional credits are satisfied by required PSE courses.

Major Requirements (64-65 credits)
Chemistry and Chemical Engineering (18 credits): CHEM 455; CHEM E 310, CHEM E 330, CHEM E 340, CHEM E 436.

Electives
Technical Electives or Business Option (12 credits minimum).
Free electives to bring minimum total to 180 credits.

Minors

Environmental Science and Resource Management
Minor Requirements: Minimum 25 ESRM credits, 20 of which must be upper division. A maximum of 5 credits from PSE courses allowed.

Streamside Studies
Minor Requirements: Minimum 28 credits with a grade of at least 2.0 in each course:
Core courses: ESS 101, ESS 210, ESS 230, ESS 326 or ESS 401; ESRM 303 or BIOL 356; F E 425 or CEE 476; and FISH 312 or FISH 450
3 credits of ESRM/FISH 429
10 credits from one of the following thematic areas:

Student Outcomes and Opportunities

• Learning Objectives and Expected Outcomes: Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.

The goal of the paper science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the pulp, paper, and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world’s complex society.

The goal of the environmental science and resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields such as wildlife conservation, wildlife ecology, urban ecology, sustainable forest management, wildland ecosystem conservation and management, restoration ecology, and environmental horticulture, or to construct a broader educational package to fit their educational goals. Career opportunities abound in the area of environmental science and resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.

• Instructional and Research Facilities: See the main College page for details.

• Honors Options Available: With College Honors; With Distinction (Departmental Honors). See adviser for requirements, or link to www.cfr.washington.edu/acad/undergrad/honors.htm

Research, Internships, and Service Learning: The Office of Student and Academic Services regularly receives internship announcements, which are forwarded on to all CFR students via email and placed in the office’s Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.

Undergraduate research opportunities are available to students. Please contact faculty members in your area of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.

• Department Scholarships: The College of Forest
Resources has a strong scholarship program for majors which provides in-state tuition to students, based on merit or need. Application information can be found at [www.cfr.washington.edu/Acad/Scholarship.htm](http://www.cfr.washington.edu/Acad/Scholarship.htm). The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the Paper Science and Engineering curriculum. For information about these scholarships, contact Professor William McKean, 318 Bloedel.

- **Student Organizations/Associations:** The College has student organizations which organize student symposia, field trips, parties, slide shows and talks, public service projects, and other social activities. Current CFR student organizations can be found at [www.cfr.washington.edu/Acad/clubs.htm](http://www.cfr.washington.edu/Acad/clubs.htm).

**Of Special Note:** Some college classes include field trips or require laboratory supplies or material duplication at student expense.

### Graduate Programs

Graduate Program Coordinator

116 Anderson, Box 352100

206-543-7081

cfradv@u.washington.edu

Graduate programs in forest resources are designed to accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of forest-related science. Graduate programs offered in forest resources lead to the degrees of Master of Forestry, Master of Environmental Horticulture, Master of Science, and Doctor of Philosophy. Graduate students may center their graduate study in one of the special fields of study within the College divisions.

### Master of Forestry

The Master of Forestry degree is a proposed professional degree offered for students who wish to acquire specific professional education related to forest management and silviculture. Still under development at the time of publication, the M.F. program is designed to be a non-thesis degree for students with a forest resources background.

### Master of Science

The Master of Science degree is a learned degree, often precursory to the Doctor of Philosophy degree. Some areas of study allow non-thesis work while most areas of study require the completion of a thesis. Students must complete coursework in interdisciplinary knowledge, research design and quantitative analysis, social and natural sciences applied to natural resource and environmental issues, current topics, and thesis or project research.

### Doctor of Philosophy

The Doctor of Philosophy degree may be preceded by education in either forest resources or another discipline. The program comprises additional coursework in the same categories as the M.S. degree, except dissertation research replaces the thesis or project. The program requires passage of the General Examination in forest resources; research, analysis, and interpretation; and completion of a dissertation. A minimum of two years of residence at the UW also is required. Reading proficiency in one foreign language may be required by the supervisory committee when the language is essential to the student’s program of study.

### Graduate Study

Major areas of study and research include paper science and engineering (wood chemistry, polymer and fiber science); forest engineering/hydrology; forest ecosystem analysis (forest ecosystems, forest ecology, forest genetics, biotechnology, streamsides/riparian management, tree physiology, and forest soils); business, economics, and quantitative methods (biometry, quantitative management, aerial photogrammetry/remote sensing, forest products); silviculture and forest protection (silviculture, forest entomology, fire management, forest pathology); social sciences (forest land use planning, forest policy and law, forest sociology and leisure studies); wildlife science; and urban horticulture (environmental horticulture, horticultural taxonomy, horticultural physiology, wetlands management).

In all areas of study, the College maintains a close working relationship with faculties of other colleges and schools throughout the University, including service on graduate committees. Faculty advisers assist graduate students in determining those courses in other departments on campus which will lend to students’ intended areas of expertise.

### Admission Qualifications, Background

A student who intends to work toward an advanced degree must apply for admission to the Graduate School and must meet the requirements set forth by the Graduate School and by the College of Forest Resources.

Basic requirements for admission to the Graduate School are a baccalaureate degree from an institution of recognized standing, a minimum GPA of 3.00 in the junior and senior years of college work, approval of the Dean of the Graduate School, and approval of the faculty of the College. An applicant may obtain a graduate admission form and supplemental admission and reference forms from the College of Forest Resources Office of Student Services, 116 Anderson, 206-543-7081, cfradv@u.washington.edu.

The Graduate Record Examination (GRE) general test is required, and test scores must be submitted to the College by the applicant. Students interested in studies related to forest-products marketing may take the Graduate Management Admission Test (GMAT) or the GRE.

In addition, international students are required to take the Test of English as a Foreign Language (TOEFL). International students hoping to obtain teaching assistantships must also complete the Test of Spoken English (TSE). Please refer to the Graduate School section for minimum scores and exceptions.

Upon enrollment, the student is assigned a temporary graduate program committee that is responsible for guidance in the early stages of the graduate program, to be followed by more formal committees as the student’s program develops.

Applicants for the College are considered annually on January 15, within the enrollment limitations for the College and the available faculty and workload limitations within the specific research area. Students with both undergraduate forestry degrees and other related fields are considered, although a prior forestry degree is normally expected of applicants for the professional Master of Forestry.

### Financial Assistance

The College has a limited number of appointments for teaching and research assistantships that provide a stipend, tuition waiver, and benefits. Teaching and research responsibilities are half-time, allowing time to pursue a full academic load. Students may contact faculty about research assistantships.

Fellowships without teaching or research obligations are also available. Requests for consideration must be submitted by January 15 for the following academic year. Applications are in the College’s admissions packet which may be requested from the Office of Student and Academic Services.
College of Forest Resources

Course Descriptions

CFR 181 Wilderness (5) I&S/NW
A survey of the history and stewardship of wilderness, its historical roots and values, managing fire, ecosystems, wildlife, visitors, and the ecological impacts of use. Introduces the challenges of maintaining natural systems and opportunities for solitude amid growing pressures for alternative uses of such lands. Offered: Sp.

CFR 500 Graduate Orientation Seminar (1)
Introduction to graduate study. Presentations on College resources and services and current research in each College division. Division chairs share teaching responsibilities. Offered: ASp.

CFR 501 Forest Ecosystems-Community Ecology (5) Brubaker
Community ecology of forest ecosystems. Quantitative methods of community description. Role of limiting factors, competition and disturbance in determining community composition, structure and stability. Introduction to forest ecosystem productivity. History and application of successional theory. Prerequisite: basic ecology course or permission of instructor. Offered: A.

CFR 502 Data Collection, Analysis, and Presentation (3) Ewing
Design of scientific experiments, collection of data, and use of computers to store, analyze and present data. Limited by equipment availability to 8 students; UH students have priority. Offered: Sp.

CFR 503 Current Issues in Urban Horticulture (1, max. 10)
Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Offered: AWSp.

CFR 504 Research Processes in Forest Resources (4) Lee
Comprehensive survey of research processes for entering graduate students. Diagnostic and prescriptive evaluation of student research capabilities. Problem and hypothesis formulation, study design, multi-method strategies for gathering and analyzing data, and interpretation and presentation of results. Prerequisite: graduate standing. Offered: A.

CFR 505 Introduction to Pulp and Paper Technology (3) Hodgson, McKeen, Gustafson
Introduction to pulp and paper technology for PSE graduate students who do not have a prior background in pulp and paper. Broad overview of pulp and paper technology and the pulp and paper industry. Offered: concurrently with PSE 201; A.

CFR 507 Soils and Land Use Problems (4) Harrison
Environmental concerns of soils; how soil properties control potential and reasonable possibilities of land use. Includes factors controlling soil stability, hydrology, fertility, and movement of pollutants. Field trip oriented with weekly activity summaries. Students also conduct field trips to soil-use problem sites. Offered: odd years; W.

CFR 509 Natural Resource Issues: Unspoken Basics (3)
Natural resource issues emerge from interactions between humans and their biophysical world. Understanding resource problems and solutions requires integration of numerous areas of knowledge and methods of discovery. Objectives include exposure to, and development of, fundamental issues and skills essential for natural resource professionals. Offered: A.

CFR 511 Advanced Forest Soil Microbiology (5) Edmonds
Detailed examination of microbial processes in forest ecosystems; types of organisms, biomass, decomposition and nutrient cycling, microbial transformations of N, impacts of management-clear-cutting, fertilization, pesticide addition. Graduate project required. Prerequisite: general biology, basic soils or permission of instructor. Offered: even years; A.

CFR 512 Biogeochemical Cycling in Soils and Forest Ecosystems (3) Zabowski
Elemental cycles in forests and soils. Fundamentals of processes involved in cycling are addressed along with alterations resulting from environment, vegetation, and soil types. Consideration of cycles of nutrients, metals, and other elements. Weekly discussion section reviews literature on biogeochemical cycling. Prerequisite: one soils course or permission of instructor. Offered: even years; W.

CFR 513 Advanced Soil Genesis and Classification (5) Zabowski
Soil formation, morphology, classification, and relationship to the environment. Labs and field trips illustrate properties and processes of forest and grassland soils in Washington. Requires two weekend field trips and a graduate project. Prerequisite: ESC 210 or permission of instructor. Offered: even years; Sp.

CFR 514 Advanced Forest Soil Fertility and Chemistry (4) Harrison
Chemical properties of soil, nutrient and toxic elements; supply, retention, and loss of nutrients in soils; utilization of geochemical and ecosystem models such as GEOCHEM, MAGIC, TRICLEDOWN, and ILWAS in developing a quantitative understanding of the chemical function of forest ecosystems. Prerequisite: general chemistry and geology of soils. Offered: odd years; Sp.

CFR 515 Advanced Soil and Plant Analysis (3) Harrison
Plants and animals must acquire nutrient elements from their environment. Quantifying the composition of samples is the first step in understanding the processes in natural and manmade systems. Sampling, handling, preparation, storage, and analysis stressed. Prerequisite: one botany or plant science course, instrumental analysis, soils. Offered: even years; Sp.

CFR 519 Conducting and Publishing an Industry Performance Review (3, max. 12) Paun
Focuses on the concepts of accounting, finance, and financial statement analysis; techniques for analyzing firm performance; and conducting competitor analyses. Conduct in-depth, comparative performance analyses of U.S. and Canadian paper firms and publish the findings as a peer-reviewed manuscript in a journal. Offered: WSp.

CFR 520 Current Topics in Forest Resources (2-5, max. 10)
Critical evaluation and discussion of published research in the broad field of forest resources. Topics and requirements vary. Offered: AWSp.

CFR 525 Advanced Wildland Hydrology (4) Bolton
Advanced treatment of hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Graduate focus on a detailed field or modeling hydrologic analysis. Offered: W.

CFR 527 Ecosystems Seminar (1) Sprague
Discussion by invited speakers on current research related to ecosystems. Credit/no credit only. Offered: A.

CFR 528 International Forestry (3) Gara, Greulich
Discussion on biological, social, and economic basis linked with forest practices in the world. Focuses on examples of how forests and renewable resources are both exploited and managed, with thoughts on how these resources can be sustainability managed. Emphasizes group presentations and seminar style discussion. Offered: even years; W.

CFR 529 Topics in Streamside Studies (1)
Discussion by invited speakers on current research related to streamside studies. Offered: jointly with FISH 529; AWSp.

CFR 535 Fire Ecology (3) Agee
Fire regime concept as applied to fire ecology. Methodology for fire history research. History and function of forest fire in western United States with emphasis on Pacific Northwest. One weekend field trip. Prerequisite: permission of instructor. Offered: A.

CFR 545 Principles of Forest Entomology (3) Gara
Historical perspective of the discipline, introduction to general entomology and taxonomy, forest insect ecology, integrated pest management concepts for defoliators, bark beetles, wood borers, and urban forestry pests. Prerequisite: general biology, botany, zoology or permission of instructor. Offered: A.

CFR 547 Stream and River Ecology (5) Naiman
Characterizations of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and dynamics of aquatic communities and the riparian zone. Resource conflicts, new technologies, field trips, and class projects. Recommended: general ecology, forestry-fisheries interactions. Offered: jointly with FISH 547; Sp.

CFR 549 Urban Horticulture Seminar (1, max. 6)
Discussion by invited speakers on current topics in urban horticulture. Credit/no credit only. Offered: A.

CFR 550 Graduate Seminar (2-5, max. 10) Eastin, Paun
Graduate seminar to evaluate and discuss current research topics in forest resources. Topics and requirements vary. Offered: AWSp.

CFR 554 Wildlife Seminar (1-2, max. 10) Manawal, West
Discussion of current research and application in wildlife biology and conservation. Prerequisite: permission of instructor. Offered: AW.

CFR 561 Public Presentation in Urban Horticulture (2) Wott
Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisals and graphics are discussed. Offered: W.

CFR 564 Advanced Forest Biometry (3/5) Turnblom
Classical problems in analysis of forest populations and growth theory, and principles of parametric analysis and estimation processes in forest biometry. Offered: odd years; A.

CFR 570 Seminar on Environmental Sociology (3) Lee
Perspectives on environmental sociology, with emphasis on the social construction of environmental problems. European and American schools of thought and their implications for environmental policy. Examination of global and regional issues in the context of risk society. Offered: jointly with SOC 570; A.

CFR 571 Resource Policy and Administration (5)
Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with PB AF 592.

CFR 573 Forest Environmental Resource Planning (3) Bradley
Origins and evolution of environmental planning in the forest environment. Discussion of the planning process and methodologies for environmental management and planning; selected case studies of environmental resource plans. Prerequisite: graduate standing. Offered: even years; A.

CFR 574 Problem Analysis in Urban Ecology (5) Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: A.

Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for selected urban ecology problem that critiques different methodological approaches and review/synthesizes literature. Prerequisites: CFR 574 or permission of instructor. Offered: W.

Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised Objectives and Methods sections of interdisciplinary project and present a draft Results section. Prerequisites: CFR 574, 575. Offered: S.

CFR 577 Global Forest Resource and Environmental Markets (3) Perez-Garcia
Economic analysis of global forest resource markets. Models of timber supply and international trade. Linkages to environmental resources including carbon, biodiversity, and climate change. Offered: Sp.

CFR 578 Paper Science and Engineering Seminar (1, max. 6)
Discussion of current topics in the science and technology of pulp and paper production, including wood and polymer chemistry. Offered: ASp.

Discussion of current and important theoretical and empirical papers in urban ecology. Students continue to research interdisciplinary urban ecology projects while developing publishable manuscripts and oral presentations. Offered: jointly with GEOG 588. Offered: AWSp.

CFR 590 Graduate Studies (1-5, max. 5)
Study in fields for which there is not sufficient demand to warrant the organization of regular courses. Offered: AWSpS.

CFR 591 Seminar in Resource Policy and Management (1) Ryan
Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the College of Forest Resources. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with PB AF 591; A.

CFR 592 Environmental Policy Processes (3) Cullen
Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with PB AF 590.

CFR 595 Graduate Teaching Practicum (1-5, max. 5)
Principles of teaching and learning applied to undergraduate instruction in Ecosystem Science and Conservation. Development, delivery, and evaluation of lectures and homework assignments. Graduate teaching experience for ESC students only. Credit/no credit only. Offered: AWSp.
Covered the role of farming, forestry, grazing, dams, water extraction, fishing, and their ecological and environmental impacts, and the remediation and restoration of their impacts. Utilizes field trips, studios, and problem-solving exercises to understand, integrate, and generalize processes and issues across diverse production systems. Prerequisite: either BIOL 162 or BIOL 200.

ESRM 303 Preserving and Conserving Wildlands (5) I&S/NW
The stewardship of pristine terrestrial environments is of great importance and contention. Teams of students work with stakeholders and experts on real Pacific Northwest issues (e.g., pollution, invasive organisms, mining, burning, grazing, logging, hunting, skiing) to understand patterns, structure, processes, and drivers of these environments. Prerequisite: either BIOL 162 or BIOL 200.

ESRM 304 Environmental and Resource Assessment (5) I&S/NW, QSR
The processes of measuring, monitoring, and assessing; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental design, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: either Q SCI 381 or STAT 311. Offered: ASp.

ESRM 310 Trees in Our Environment (5) NW Brubaker
Explores tree form and function from perspectives of dendrology, ecology, and adaptation in wildland and urban environments. Lectures, projects, and field investigations introduce 50-60 trees of the Pacific Northwest. Acquire skills to increase knowledge of trees. Prerequisite: either BIOL 162 or BIOL 220. Offered: Sp.

ESRM 311 Soils and Land Use (3) NW Harrison
Intended for students concerned with environmental problems in the Puget Sound basin; also for those who intend to become professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions. Offered: W.

ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) I&S/NW Franklin
Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, including analysis of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.

ESRM 320 Marketing and Human Resource Management from an Environmental Perspective (5) I&S/NW Paun
Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in the context of environmental resource management. Offered: A, S.

ESRM 321 Finance and Accounting from an Environmental Perspective (5) I&S/NW Paun
Introduction to business concepts relating to finance, accounting, and international business in the context of environmental resource management. Offered: W.

ESRM 322 Silviculture (5) NW
Silviculture techniques, including nursery practices, clear-cutting, seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Taught at Pack Forest. Multiple-use field trips. Offered: Sp.

ESRM 324 Forest Protection (5) NW Agee, Edmonds, Gara
Effects of fire, diseases, and insects on forest ecosystems, fire ecology and management, abiotic and biotic diseases, disease management, effects of defoliators, bark beetles and wood boring insects, pests of intensive forest management and principles of insect management. Offered: even years; Sp.

ESRM 326 Wildlife Habitat and Silviculture (3) NW Agee Principles of wildlife habitat in forest and range ecosystems. Silvicultural principles applicable to wildlife conservation and management. Prerequisite: either ESRM 302 or ESRM 303. Offered: Sp.

ESRM 328 Forestry-Fisheries Interactions (4) NW Characteristics of forestry-fisheries interactions in terrestrial and aquatic landscapes. Effects of changes in landforms on forest and aquatic communities. River basin and watershed features. Forest stand dynamics, forest hydrology, fish and wildlife histories and behavior. Resource conflicts and resolution. Offered: jointly with FISH 328; W.

ESRM 331 Landscape Plant Recognition (3) NW Reichard Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Recommended: either BIOL 117 or BOTANY 113. Offered: jointly with BIOL 331; SpS.

ESRM 341 Timber Harvesting (4) Schiesse Timber harvesting methods and planning procedures. Logging cost and production control. Environmental and safety considerations as related to logging and road construction. Prerequisite: ESRM 368. Offered: A.

ESRM 350 Wildlife Biology and Conservation (5) NW Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Open to nonmajors. Prerequisite: either BIOL 102, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: W.

ESRM 351 Wildlife Research Techniques (8) NW Agee, Manwell, West Scientific approaches to the field study of wildlife populations and habitat, including basic considerations in experimental design and development of scientific papers. Emphasis is on direct experience with current field techniques used in the study of vertebrate populations and habitat. Prerequisite: either ESC 350, ESC 450, or ESRM 303. Offered: Sp.

ESRM 362 Introduction to Restoration Ecology (5) I&S/NW Gold An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: jointly with ENVIR 362; A.

ESRM 368 Natural Resource Measurements (4) NW Turnholum Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315 or Q SCI 381; recommended ESRM 304. Offered: W.

ESRM 371 Environmental Sociology (5) I&S/NW Lee Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with SOC 379/ENVIR 379; WS

ESRM 381 Management of Wildland Recreation and Amenities (3) NW Lee Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: W.

ESRM 399 Undergraduate Internship (1-5, max. 15) Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSpS.

ESRM 400 Natural Resource Conflict Management (3) I&S/NW Ryan Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.

ESRM 401 Spring Comes to the Cascades (3) NW Examine the interaction between forests, environment and growth at three locations in the Cascades, from lowlands to alpine. Field trips and associate observations are linked to classroom or group project activities and are used to understand a number of ecological, physiological and meteorological concepts.

ESRM 402 Curation and Education in Public Gardens (3) NW Wott Techniques of curatorial practice relevant to living collections of plants, including documentation, policies, conservation, and display. Aspects of establishing and implementation of a public horticulture program including assessment, program tools and methods, and funding in a public environment. Offered: even years; A.

ESRM 403 Forest and Economic Development in the Developing World (4) Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions.

ESRM 404 Forest Science Inquiry for Teachers (5) Lee Inquiry-based scientific methods for K-12 instruction; asking how and why questions; stating answerable questions; forming hypothesis to answer questions; testing hypothesis by making observations, making measurements, and conducting experiments; displaying results. Writing curriculum plans to implement district and state requirements. Offered: S.

ESRM 409 Forest Soil Microbiology (4) NW Edmonds Soil organisms in forest ecosystems, decomposition, nutrient cycling. N transformation, mycorrhizae, effects of forest management. Recommended: ESC 210. Offered: even years; A.

ESRM 410 Forest Soils and Site Productivity (5) NW Harrison Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest
and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required.
Recommended: ESC 210. Offered: odd years; A.

ESRM 411 Plant Propagation: Principles, and Practice (3) NW Watt
Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises.
Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Recommended: 10 credits of introductory biology or botany, or equivalent. Offered: Sp.

ESRM 412 Native Plant Production (3) NW Chalker-Scott, Reichard, Watt
Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Prerequisite: ESRM 411, which may be taken concurrently.

ESRM 413 Soil Genesis and Classification (5) NW Zabowski
Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Recommended: ESC 210. Offered: even years; Sp.

ESRM 414 Forest Soil Fertility and Chemistry (3) NW Harrison
Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Recommended: ESC 210. Offered: even years; Sp.

ESRM 415 Biology, Ecology, and Management of Plant Invasions (5)
Explores how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches.
Prerequisite: one of the following: BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 401, ESRM 472, or ESRM 473. Offered: A, odd years.

ESRM 416 Field Survey of Wildland Soils (3) NW Harrison, Henry, Zabowski
Study of soils in remote sites about which little information is available. Focus is field trip in Cascade Mountains just north of Glacier Peak with prior study of hiking area, soil and ecosystem changes, and wilderness use. Offered: S.

ESRM 420 Wildland Fire Management (5) NW Agee
Principles of wildland fire behavior, ecology, and management.
Weather, fuels, and topography effects on fire behavior. Forest structure influence on historical and current fire ecology. Principles of firesafe forests. Management issues of fire control and use in wilderness, multiple-use forest, and the wildland-urban interface.

ESRM 422 Marketing of Forest Products (3) I&S/NW Eastin
Introduction to forest products marketing in North America.
Examines products marketing, industry structure, and strategic management issues utilizing marketing concepts. Topics include product management, distribution channels, strategic industry analysis, and marketing research techniques. Case studies used to understand forest products industry decision making. Offered: W.

ESRM 423 International Marketing of Forest Products (3)
I&S/NW Eastin
Introduction to international marketing concepts and their application to forest products. Analysis of forest products trade patterns, resource base changes, policy, industrial policies, and environmental concerns. Discussion of market distorting practices including log export bans and tariff and non-tariff barriers. Offered: Sp.

ESRM 424 Forest Stand Dynamics (3) NW
Forest stand development and manipulation response. Forest stand dynamics and stand structure in pure and mixed species forests, response to minor and major disturbances, interactive changes with time, and patterns and response to manipulation. Offered: A.

ESRM 425 Ecosystem Management (5) NW Franklin
Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.

ESRM 426 Wildland Hydrology (4) NW Bolton
Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.

ESRM 429 Seminar in Streamside Studies (1, max. 6) NW Steinemann
Discussion by invited speakers on current research and issues related to streamside studies. Speakers are a mix of on-campus and off-campus experts. Credit/ no credit only. Offered: jointly with FISH 429; AWSp.

ESRM 430 Aerial Photos/Remote Sensing Natural Resources (3) NW Schreuder
Principles of photogrammetry, interpretation, and remote sensing; and their application to management of natural resources and wildlands. Uses for watersheds, forest resources, wildlife, point and nonpoint pollution, land-use planning, and outdoor recreation. Offered: Sp.

ESRM 432 Forest Pathology (4) NW Edmonds
Ecology and management of forest diseases. Abiotic diseases caused by air pollution, adverse weather, and biotic diseases caused by bacteria, fungi, viruses, parasitic plants, and nematodes.
Forest health. Disease management including silvicultural, chemical, and biological control. Disease modeling. Offered: odd years; A.

ESRM 435 Forest Entomology (3) NW Gara
Introduction to general entomology, characteristics, life histories, ecological relations, prevention, and control of forest insects. Offered: A.

ESRM 436 Laboratory in Forest Entomology (2) NW Gara
Introduction to the insect orders; identification of forest insects and their damage. One field trip to study insect problems required. Offered: A.

ESRM 441 Landscape Ecology (5) NW Franklin
Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning). Recommended: ESC 326. Offered: W.

ESRM 450 Wildlife Ecology and Conservation (5) NW West
Covers advanced principles of wildlife ecology such as habitat selection, population viability, and landscape ecology, and illustrates how they apply to wildlife conservation problems with terrestrial,
ESRM 451 Urban Plant Protection (5) NW Gara
Working knowledge on insects and diseases of plants growing in the urban environment. Emphasis placed on pest and damage recognition, control methods, and integrated pest management systems. Offered: odd years; Sp.

ESRM 452 Field Ornithology (3) NW Manuwal
Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: either BIOL 102, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

ESRM 453 Biology and Conservation of Mammals (3) NW West
Introduction to mammals of the world: mammalian evolution, taxonomy, morphology, reproduction, population biology, ecology, and conservation. Prerequisite: ESC 350; recommended: concurrent registration in ESC 454. Offered: even years; A.

ESRM 454 Biology and Conservation of Mammals Laboratory (3) West
Identification and natural history of mammals of the Pacific Northwest. Laboratory work on morphology, taxonomy, and natural history; fieldwork on natural history and sampling methods. Two weekend field trips required; students share travel costs. Prerequisite: ESC 350; recommended: concurrent registration in ESC 453.

ESRM 455 Wildlife Seminar (1, max. 4) NW Manuwal
West
Discussion of current research and application in wildlife biology and conservation. Credit/no credit only. Offered: AW.

ESRM 456 Biology and Conservation of Birds (3) NW Manuwal
Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and unhunted birds. Emphasis on western United States. Prerequisite: either BIOL 102, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

ESRM 457 Fish and Wildlife Toxicology (3/5) NW
Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.

ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW Marzluff
Biological underpinnings and political realities of endangered species management, including: legal issues, recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: A.

ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW Agee, Manuwal, West
Extended field course offers Wildlife Science students personal interactions with wildlife managers and wildlife populations in strategic public and private lands in the northwestern United States and southern Canada. Students will share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESC 350; may not be repeated. Offered: Sp.

ESRM 460 Institutionalizing Sustainable Ecological Practices. (5) I&S/NW Lee
Introduction to how sustainability and conservation are possible. Case studies of successful institutionalization of sustainable ecological functions, including curbside and biosolids recycling, ecological restoration, bioremediation, sustainable wood production, and product certification. Emphasis on individual student projects. Offered: jointly with ENVIR 460; Sp.

ESRM 461 Forest Management and Economics II (4) I&S/NW Bare
Basic concepts of timber harvest scheduling, sustained-yield models, contemporary analytical techniques, timber supply, and forest product markets. Offered: W.

ESRM 462 Restoration Ecology Capstone: Introduction (2) NW
First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with ENVIR/TESC/BES 462.

ESRM 463 Restoration Ecology Capstone: Proposal and Plan (3) NW
Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462.

ESRM 464 Restoration Ecology Capstone: Field Site Restoration (5) NW
Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with BES 464/TESC 464; Sp.

ESRM 465 Economics of Conservation (3) I&S/NW
Economic principles and their use in the analysis of contemporary conservation problems. Particular emphasis directed toward the conservation of forest resources in the Pacific Northwest and related policy issues.

ESRM 470 Natural Resource Policy and Planning (5) I&S/NW Ryan
Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A.

ESRM 471 Urban Forest Landscapes (5) NW Bradley, Wagar, Wolf
Comprehensive view of urban forest and urban forest landscapes. Includes close examination of factors that differentiate urban forest landscapes along the urban to wildland gradient. Compare legal, social, political, administrative, physical, and biological variations. Offered: Sp.

ESRM 472 Wetland Ecology and Management (5) NW Ewing, Harrison
Wetland types and functions, global and North American distribution, wetland plant types, soil chemistry. The influence of stresses on wetland composition and form. Autecology of wetland plants; response to and detection of stresses. Impacts of urbanization; management techniques. Recommended: either BIOL 471, BIOL 472, BOTANY 354, or BOTANY 371. Offered: A.

ESRM 473 Principles of Ecological Restoration (5) NW Ewing
Philosophy of restoration, structural components of ecosystem degradation, analysis of restoration projects and methods, and an ecosystem by ecosystem review of how systems are restored. An ecology courses that emphasizes applied scientific knowledge of ecosystems. Recommended: either BIOL 471, BIOL 472, BOTANY 354, or BOTANY 371. Offered: W.

ESRM 474 Problem Analysis in Urban Ecology (5) NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with GEOG 486. A.

Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and syntheses literature. Prerequisite: CFR 474/ENVR 496/GEOG 486. Offered: jointly with ENVIR 487/GEOG 487. Offered: W.

ESRM 476 Research in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present results section. Prerequisite: CFR 475/GEOG 487/ENVIR 487. Offered: jointly with GEOG 488/ENVIR 488; Sp.

ESRM 477 Wetland Restoration (5) Ewing
A Web-delivered, self-paced course covering wetland science, restoration ecology, freshwater restoration, coastal restoration, monitoring/maintenance, and case histories. Completion of extensive readings, assignment and test required for each module. Prerequisite: either BIOL 102, BIOL 180, or BIOL 203; recommended: either ESRM 473, ESRM 472, BOTANY 354, BOTANY 456, or BIOL 472. Offered: A/W.

ESRM 478 Plant Eco-Physiology (5) NW Chalker-Scott
Impact of environmental stresses (e.g., temperature, light, moisture, nutrients, allelopathy, salt) on the performance of woody and herbaceous plant species and their subsequent physiological responses. Emphasizes problems common in urban and restored ecosystems (e.g., pollution, soil compaction, heat). Individual projects. Prerequisite: either BOTANY 371 or BIOL 325 or CHEM 120; BIOL 102 or BIOL 162. Offered: W.

ESRM 480 Selection and Management of Landscape Plant (5) NW Chalker-Scott
Principles of plant selection and management in urban and modified environments. Site analysis and preparation; physiological basis for plant selection; techniques for successful plant installation and aftercare; plant performance evaluation; long-term management and plant health care. Group and individual projects. Prerequisite: either ESC 210 or ESC 311; recommended: either BIOL 116 or BIOL 117. Offered: A.

ESRM 481 Field Practicum in Plant Selection and Management (2) NW Chalker-Scott
Practical application of plant selection and management in urban and modified environments. Site analysis and preparation; evaluation of nurseries; techniques for successful plant installation and aftercare; plant performance evaluation; plant health care assessment. Group project. Prerequisite: ESRM 480, which may be taken concurrently. Offered: A.

ESRM 489 Foreign Study (1-5, max. 15)
Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 490 Special Topics (1-5, max. 15)
Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

ESRM 494 Senior Thesis Proposal (5)
Selection of a thesis topic, literature review, and preparation of a formal senior thesis proposal. Students select a faculty advisor to assist them in the proposal writing process. Regular or Honors credit.

ESRM 495 Senior Project (5)
Individual study of an environmental science and resource management problem under direction of a faculty member. Requires a written project report. Generally taken in last year of residence. Offered: AWSpS.

ESRM 496 Senior Thesis (5)
Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Offered: AWSpS.

ESRM 499 Undergraduate Research (1-5, max. 15)
Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Credit/no credit only. Offered: AWSpS.

Environmental Horticulture & Urban Forestry

Course Descriptions

EHUF 201 Ecology of Urban Environments (3) I&S/NW
Biological, chemical, and physical processes and components of urban environments, plus human impacts. Each urban environment, from city cores to naturalized open space, is discussed for above-and below-ground conditions, key plant and animal species, and biological implications of management practices. Offered: A.

EHUF 331 Landscape Plant Recognition (3) NW Reichard
Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Recommended: either BIOL 117 orBOTANY 113. Offered: jointly with BIOL 331; SpS.

EHUF 362 Introduction to Restoration Ecology (5) I&S/NW
Gold
An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: A.

EHUF 401 Urban Forest Management (3) I&S
Explores issues of urban forest benefits, planning, administration, public policy, and career opportunities, utilizing Urban Forestry faculty and leaders of city, county, and state agencies. Emphasizes the urban forest’s diverse managers and constituents and their varied responsibilities, values, and resources.

EHUF 402 Curation and Education in Public Gardens (3) I&S/NW Wott
Techniques of curatorial practice relevant to living collections of plants, including documentation, policies, conservation, and display. Aspects of establishing and implementation of a public horticulture program including assessment, program tools and methods, and
funding in a public environment. Offered: odd years; W.

EHUF 411 Plant Propagation: Principles, and Practice (3) NW Watt
Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Recommended: 10 credits of introductory biology or botany, or equivalent. Offered: Sp.

EHUF 451 Urban Plant Protection (5) NW Gara
Working knowledge on insects and diseases of plants growing in the urban environment. Emphasis placed on pest and damage recognition, control methods, and integrated pest management systems. Offered: Sp.

EHUF 462 Restoration Ecology Capstone: Introduction (2) NW
First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects.

EHUF 463 Restoration Ecology Capstone: Proposal and Plan (3) NW
Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: EHUF 462.

EHUF 464 Restoration Ecology Capstone: Field Site Restoration (5) NW
Teams take a restoration plan developed in EHUF 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: EHUF 463. Offered: jointly with BES 464/TESC 464; Sp.

EHUF 470 Urban Forest Landscapes (5) NW Bradley, Wagar, Wolf
Comprehensive view of urban forest and urban forest landscapes. Includes close examination of factors that differentiate urban forest landscapes along the urban to wildland gradient. Compare legal, social, political, administrative, physical, and biological variations. Offered: SpS.

EHUF 473 Principles of Ecological Restoration (5) NW Ewing
Philosophy of restoration, structural components of ecosystem degradation, analysis of restoration projects and methods, and an ecosystem by ecosystem review of how systems are restored. An ecology courses that emphasizes applied scientific knowledge of ecosystems. Recommended: either BIOL 471, BIOL 472, BOTANY 354, or BOTANY 371. Offered: W.

EHUF 475 Wetland Ecology and Management (5) NW Ewing, Harrison
Wetland types and functions, global and North American distribution, wetland plant types, soil chemistry. The influence of stresses on wetland composition and form. Autecology of wetland plants; response to and detection of stresses. Impacts of urbanization; management techniques. Recommended: either BIOL 471, BIOL 472, BOTANY 354, or BOTANY 371. Offered: A.

EHUF 477 Wetland Restoration (5) Ewing
A web-delivered, self-paced course covering wetland science, restoration ecology, freshwater restoration, coastal restoration, monitoring/maintenance, and case histories. Completion of extensive readings, assignment and test required for each module. Prerequisite: either BIOL 102, BIOL 180, or BIOL 203; recommended: either EHUF 473, EHUF 475, BOTANY 354, BOTANY 456, BIOL 471, or BIOL 472. Offered: AWSp.

EHUF 478 Horticultural Stress Physiology (5) NW Chalker-Scott
Impact of environmental stresses (e.g., temperature, light, moisture, nutrients, allelopathy, salt) on the performance of woody and herbaceous plant species and their subsequent physiological responses. Emphasizes problems common in urban and restored environments (e.g., pollution, soil compaction, heat). Individual projects. Prerequisite: either BOTANY 371 or BIOL 325 or CHEM 120; BIOL 102 or BIOL 162. Offered: W.

EHUF 480 Selection and Management of Landscape Plant (5) NW Chalker-Scott
Principles of plant selection and management in urban and modified environments. Site analysis and preparation; physiological basis for plant selection; techniques for successful plant installation and aftercare; plant performance evaluation; long-term management and plant health care. Group and individual projects. Prerequisite: ESC 210; recommended: either BIOL 116 or BOTANY 110. Offered: A.

EHUF 481 Field Practicum in Plant Selection and Management (2) NW Chalker-Scott
Practical application of plant selection and management in urban and modified environments. Site analysis and preparation; evaluation of nurseries; techniques for successful plant installation and aftercare; plant performance evaluation; plant health care assessment. Group project. Prerequisite: EHUF 480, which may be taken concurrently. Offered: A.

EHUF 482 Field Practicum in Plant Selection and Management (2) NW Chalker-Scott
Practical application of plant selection and management in urban and modified environments. Site analysis and preparation; evaluation of nurseries; techniques for successful plant installation and aftercare; plant performance evaluation; plant health care assessment. Group project. Prerequisite: EHUF 480, which may be taken concurrently. Offered: Sp.

EHUF 490 Undergraduate Studies in Environmental Horticulture and Urban Forestry (1-5, max. 5) NW Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

EHUF 491 Undergraduate Studies in Environmental Horticulture and Urban Forestry (1-5, max. 5) NW Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

EHUF 492 Undergraduate Studies in Environmental Horticulture and Urban Forestry (1-5, max. 5) NW Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

EHUF 495 Senior Project in Urban Forestry (5) NW Individual study of an urban forestry problem under direction of a faculty member. Offered: AWSpS.

EHUF 499 Undergraduate Research (1-5, max. 15) NW Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Credit/no credit only. Offered: AWSpS.

EHUF 502 Data Collection, Analysis, and Presentation (3) Ewing
Design of scientific experiments, collection of data, and use of computers to store, analyze and present data. Limited by equipment
EHUF 503 Current Issues in Urban Horticulture (1)
Critical evaluation and discussion of published research in urban horticulture and restoration. Students and faculty present and discuss research methods and questions from current literature. Offered: AWSp.

EHUF 549 Urban Horticulture Seminar (1, max. 6)
Discussion by invited speakers on current topics in urban horticulture. Credit/no credit only. Offered: A.

EHUF 561 Public Presentation in Urban Horticulture (2) Wott
Students learn to make public presentations in scientific, professional, and popular contexts and to interpret technical information for professional and lay audiences. Support materials, such as audiovisuals and graphics are discussed. Offered: W.

EHUF 601 Internship in Urban Horticulture (1-9, max. 9)
Credit/no credit only. Prerequisite: permission of graduate program adviser. Offered: AWSpS.

Environmental Science & Resource Management

Course Descriptions

ESRM 100 Introduction to Environmental Science (5) I&S/NW Harrison
Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Offered: jointly with ENVIR 110; AWSpS.

ESRM 101 Forests and Society (5) I&S/NW Bare, Edmonds, Gara
Survey course covering forest ecosystems of the world, history of forestry and forest conservation, how forest ecosystems function, wildlife in forests, environmental issues in forestry, forest management, economics and products, and new approaches to forest management. Open to majors and nonmajors. Offered: AWSpS.

ESRM 150 Wildlife in the Modern World (5) I&S/NW Manuwal
Covers major wildlife conservation issues in North America. Some global issues are also treated. Examples of topics include the conservation of large predators, effects of toxic chemicals on wildlife, old-growth wildlife, conservation of marine wildlife, recovery of the bald eagle, and gray wolf. Offered: A.

ESRM 210 Introductory Soils (4) NW Harrison, Zabowski
Physical, chemical, and biological properties that affect distribution and use patterns of this important ecosystem component. Includes soil morphology and genesis, plant nutrition and nutrient cycling, soil water, microbiology, and application of soil properties to environmental concerns. One Saturday field trip. Offered: A.

ESRM 250 Introduction to Geographic Information Systems in Forest Resources (5) NW, QSR Hurvitz
Applications of GIS technology to forest science and management. Fundamentals of GIS systems: data sources, preprocessing, map analysis, output; remote sensing as a source of GIS data, image analysis, and classification. Emphasis on GIS as a source of management and technical information requests. Offered: AW.

ESRM 255 Wildlife and Society (5) I&S/NW Manuwal
Covers ecological processes, wildlife habitats, conservation theory, and historical as well as contemporary issues in wildlife conservation. Offered: W.

ESRM 301 Maintaining Nature in an Urban and Urbanizing World (5) I&S/NW
The conservation, restoration, and management of nature in highly human impacted environments present unique challenges. Teams of students work on real Pacific Northwest problems, with stakeholders and experts to understand patterns, processes, and drivers of these systems. Prerequisite: either BIOL 162 or BIOL 200.

ESRM 302 Sustainability in Production Lands (5) I&S/NW
Covers the role of farming, forestry, grazing, dams, water extraction, fishing, and their ecological and environmental impacts, and the remediation and restoration of their impacts. Utilizes field trips, studios, and problem-solving exercises to understand, integrate, and generalize processes and issues across diverse production systems. Prerequisite: either BIOL 162 or BIOL 200.

ESRM 303 Preserving and Conserving Wildlands (5) I&S/NW
The stewardship of pristine terrestrial environments is of great importance and contention. Teams of students work with stakeholders and experts on real Pacific Northwest issues (e.g., pollution, invasive organisms, mining, burning, grazing, logging, hunting, skiing) to understand patterns, structure, processes, and drivers of these environments. Prerequisite: either BIOL 162 or BIOL 200.

ESRM 304 Environmental and Resource Assessment (5) I&S/NW, QSR
The processes of measuring, monitoring, and assessment; illustrated in diverse environmental and resource case studies. Explores the scientific method, hypothesis testing, sampling, and experimental designs, the role of questionnaires and polling techniques, remote sensing techniques, and population measurements. Prerequisite: either Q SCI 381 or STAT 311. Offered: ASp.

ESRM 310 Trees in Our Environment (5) NW Brubaker
Explores tree form and function from perspectives of dendrology, ecology, and adaptation in wildland and urban environments. Lectures, projects, and field investigations introduce 50-60 trees of the Pacific Northwest. Acquire skills to increase knowledge of trees. Prerequisite: either BIOL 162 or BIOL 220. Offered: Sp.

ESRM 311 Soils and Land Use (3) NW Harrison
Intended for students concerned with environmental problems in the Puget Sound area; also for those who intend to become professionally involved in land-planning decisions. Focus is on the significance of soils in understanding environmental problems and in promoting intelligent land-use decisions. Basic concepts of soil systems are presented, stressing those aspects important in making land-planning decisions. Offered: W.

ESRM 315 Natural Resource Issues: Old-Growth and Forest Management (5) I&S/NW Franklin
Biological and social elements of current conflicts, especially those associated with old-growth and its disposition. Ecology of Pacific Northwest forests and landscapes, history of forest practices, application of emerging science, proposed alternative practices and policies, including analysis of current proposal and its predecessors and successors. Open to majors and nonmajors. Offered: Sp.

ESRM 320 Marketing and Human Resource Management from an Environmental Perspective (5) I&S/NW Paun
Introduction to business concepts relating to marketing, human resource management, small businesses and entrepreneurship, and economics in the context of environmental resource management. Offered: A, S.

ESRM 321 Finance and Accounting from An Environmental Perspective (5) I&S/NW Paun
Introduction to business concepts relating to finance, accounting, and international business in the context of environmental resource management. Offered: W.

ESRM 323 Silviculture (5) NW
Silviculture techniques, including nursery practices, clear-cutting,
seed trees, shelterwood, selection cutting, site preparation, regeneration methods, thinning, fertilization, chemicals, and regional silviculture in the Northeast, Southeast, Midwest, Rocky Mountains, California, Pacific Northwest, and Alaska. Taught at Pack Forest. Multiple-use field trips. Offered: Sp.

ESRM 324 Forest Protection (5) NW Agee, Edmonds, Gara
Effects of fire, diseases, and insects on forest ecosystems, fire ecology and management, abiotic and biotic diseases, disease management, effects of defoliators, bark beetles and wood boring insects, pests of intensive forest management and principles of insect management. Offered: even years; Sp.

ESRM 326 Wildlife Habitat and Silviculture (3) NW Agee
Principles of wildlife habitat in forest and range ecosystems. Silvicultural principles applicable to wildlife conservation and management. Prerequisite: either ESRM 302 or ESRM 303. Offered: Sp.

ESRM 328 Forestry-Fisheries Interactions (4) NW
Characteristics of forestry-fishery interactions in terrestrial and aquatic landscapes. Effects of changes in landforms on forest and aquatic communities. River basin and watershed features. Forest stand dynamics, forest hydrology, fish and wildlife histories and behavior. Resource conflicts and resolution. Offered: jointly with FISH 328; W.

ESRM 331 Landscape Plant Recognition (3) NW Reichard
Field recognition of important groups of woody landscape plants, emphasizing diversity at the genus and family levels. Cultivated plant nomenclature. Plant descriptive characters evident in the field with eye and hand lens. Hardiness and landscape applications. Recommended: either BIOL 117 or BOTANY 113. Offered: jointly with BIOL 331; SpS.

ESRM 341 Timber Harvesting (4) Schiess
Timber harvesting methods and planning procedures. Logging cost and production control. Environmental and safety considerations as related to logging and road construction. Prerequisite: ESRM 368. Offered: A.

ESRM 350 Wildlife Biology and Conservation (5) NW
Wildlife ecology and population biology, and interrelationships between wild animals and humans, including encouragement of wildlife population growth and productivity, control of pest populations, and preservation of endangered species with emphasis on forest environments and forest faunas. Open to nonmajors. Prerequisite: either BIOL 102, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: W.

ESRM 351 Wildlife Research Techniques (8) NW Agee, Manuwal, West
Scientific approaches to the field study of wildlife populations and habitat, including basic considerations in experimental design and development of scientific papers. Emphasis is on direct experience with current field techniques used in the study of vertebrate populations and habitat. Prerequisite: either ESC 350, ESC 450, or ESRM 303. Offered: Sp.

ESRM 362 Introduction to Restoration Ecology (5) I&S/NW Gold
An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: jointly with ENVIR 362; A.

ESRM 368 Natural Resource Measurements (4) NW Turnblom
Introduction to principles of measurement, basic field measurement skills, measurement of vegetation, including stand examination, timber cruising, size, weight, volume and biomass of trees, and stream flow. Laboratories include field exercises on sampling techniques for trees and lesser vegetation and linear regression modeling to predict quantities from basic measurements. Prerequisite: either IND E 315 or Q SCI 381; recommended ESRM 304. Offered: W.

ESRM 371 Environmental Sociology (5) I&S/NW Lee
Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with SOC 379/ENVIR 379; WS

ESRM 381 Management of Wildland Recreation and Amenities (3) NW Lee
Introduction and overview of wildland recreation and amenities management. Agency history and objectives explored along with integration of recreation with other land uses. Water, forestry, wildlife, and wilderness resources for recreational uses discussed along with role of private enterprise in recreation and amenities. Topics of current and local interest. Offered: W.

ESRM 399 Undergraduate Internship (1-5, max. 15)
Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSpS.

ESRM 400 Natural Resource Conflict Management (3) I&S/NW Ryan
Introduction to the causes, dynamics, and consequences of natural resource conflicts as well as the range of procedural interventions used to manage conflict. Specific cases of environmental conflict and alternative dispute resolution procedures are examined. Emphasis on developing skills to effectively analyze, manage, and resolve natural resource conflicts. Offered: W.

ESRM 401 Spring Comes to the Cascades (3) NW
Examines the interaction between forests, environment and growth at three locations in the Cascades, from lowlands to alpine. Field trips and informal instruction are linked to classroom or group project activities and are used to understand a number of ecological, physiological and meteorological concepts.

ESRM 402 Curation and Education in Public Gardens (3) I&S/NW Watt
Techniques of curatorial practice relevant to living collections of plants, including documentation, policies, conservation, and display. Aspects of establishing and implementation of a public horticulture program including assessment, program tools and methods, and funding in a public environment. Offered: even years; A.

ESRM 403 Forest and Economic Development in the Developing World (4)
Examines the relationship between forests and economic development in tropical countries. Topics include the role of population growth, poverty, land tenure, and international trade on forest use as well as theories of economic development. Case examples of forest-based economic development in different countries and regions.

ESRM 404 Forest Science Inquiry for Teachers (5) Lee
Inquiry-based scientific methods for K-12 instruction; asking how and why questions; stating answerable questions; forming hypothesis to answer questions; testing hypothesis by making observations, making measurements, and conducting experiments; displaying results. Writing curriculum plans to implement district and state requirements. Offered: S.
ESRM 409 Forest Soil Microbiology (4) NW Edmonds
Soil organisms in forest ecosystems, decomposition, nutrient cycling. N transformation, mycorrhizae, effects of forest management. Recommended: ESC 210. Offered: even years; A.

ESRM 410 Forest Soils and Site Productivity (5) NW Harrison
Considers unique properties and processes occurring in forest soils throughout the world with emphasis on soils of Pacific Northwest and aspects of forest soils that affect productivity. Two all-day Saturday field trips and one Saturday-Sunday field trip required. Recommended: ESC 210. Offered: odd years; A.

ESRM 411 Plant Propagation: Principles, and Practice (3) NW Watt
Science and practice of plant propagation including sexual (seed) and asexual (cutting, layering, grafting) propagation. Includes discussion of physiological effects, methodology and laboratory exercises. Wide variety of plants covered. Intended for majors in urban horticulture and urban forestry and others interested in reproducing landscape plants. Recommended: 10 credits of introductory biology or botany, or equivalent. Offered: Sp.

ESRM 412 Native Plant Production (3) NW Chalker-Scott, Reichard, Watt
Advanced plant propagation techniques, emphasizing native plants, propagation for restoration projects, and unique problems associated with providing appropriate plant material for restoration or conservation purposes. Emphasizes greenhouse and fieldwork, and includes lectures, field trips, and a class project. Prerequisite: ESRM 411, which may be taken concurrently.

ESRM 413 Soil Genesis and Classification (5) NW Zabowski
Soil formation, morphology, classification, and relationship to the environment. Labs and weekend field trips illustrate properties and processes of forest and grassland soils in Washington. Recommended: ESC 210. Offered: even years; Sp.

ESRM 414 Forest Soil Fertility and Chemistry (3) NW Harrison
Tree growth depends, in part, on the interaction between chemical and biological activities within a given soil: the biological and chemical parameters that influence the growth; soil solution chemistry and surface reactions; reactions and processes that control essential plant nutrient levels and forms in soil solutions. Recommended: ESC 210. Offered: even years; Sp.

ESRM 415 Biology, Ecology, and Management of Plant Invasions (5)
Explores how biological invasions are one of the most serious threats to the preservation of biodiversity worldwide. Explores the vectors which move plants and their pests, the biology and impacts of the invasive species, and management and policy approaches. Prerequisite: one of the following: BIOL 162, BIOL 220, BIOL 333, BIOL 471, BIOL 472, ESRM 401, ESRM 472, or ESRM 473. Offered: A, odd years.

ESRM 416 Field Survey of Wildland Soils (3) NW Harrison, Henry, Zabowski
Study of soils in remote sites about which little information is available. Focus is field trip in Cascade Mountains just north of Glacier Peak with prior study of hiking area, soil and ecosystem changes, and wilderness use. Offered: S.

ESRM 420 Wildland Fire Management (5) NW Agee

ESRM 422 Marketing of Forest Products (3) I&S/NW Eastin
Introduction to forest products marketing in North America. Examines products marketing, industry structure, and strategic management issues utilizing marketing concepts. Topics include product management, distribution channels, strategic industry analysis, and marketing research techniques. Case studies used to understand forest products industry decision making. Offered: W.

ESRM 423 International Marketing of Forest Products (3) I&S/NW Eastin
Introduction to international marketing concepts and their application to forest products. Analysis of forest products trade patterns, resource base changes, policy, industrial policies, and environmental concerns. Discussion of market distorting practices including log export bans and tariff and non-tariff barriers. Offered: Sp.

ESRM 424 Forest Stand Dynamics (3) NW
Forest stand development and manipulation response. Forest stand dynamics and stand structure in pure and mixed species forests, response to minor and major disturbances, interactive changes with time, and patterns and response to manipulation. Offered: A.

ESRM 425 Ecosystem Management (5) NW Franklin
Scientific and social basis for ecological forestry. Forest practices to achieve integrated environmental and economic goals based upon material models of disturbance and stand development including alternative harvesting methods; adaptive management and monitoring; certification and global issues. Offered: A.

ESRM 426 Wildland Hydrology (4) NW Bolton
Introduction to the hydrologic cycle and basic hydrologic methods as applied to wildlands. Effects of forest management activities on hydrologic processes. Offered: W.

ESRM 429 Seminar in Streamside Studies (1, max. 6) NW Steinemann
Discussion by invited speakers on current research and issues related to streamside studies. Speakers are a mix of on-campus and off-campus experts. Credit/ no credit only. Offered: jointly with FISH 429; AWSp.

ESRM 430 Aerial Photos/Remote Sensing Natural Resources (3) NW Schreuder
Principles of photogrammetry, interpretation, and remote sensing; and their application to management of natural resources and wildlands. Uses for watersheds, forest resources, wildlife, point and nonpoint pollution, land-use planning, and outdoor recreation. Offered: Sp.

ESRM 432 Forest Pathology (4) NW Edmonds
Ecology and management of forest diseases. Abiotic diseases caused by air pollution, adverse weather, and biotic diseases caused by bacteria, fungi, viruses, parasitic plants, and nematodes. Forest health. Disease management including silvicultural, chemical, and biological control. Disease modeling. Offered: odd years; A.

ESRM 435 Forest Entomology (5) NW Franklin
Introduction to general entomology, characteristics, life histories, ecological relations, prevention, and control of forest insects. Offered: A.

ESRM 436 Laboratory in Forest Entomology (2) NW Gara
Introduction to the insect orders; identification of forest insects and their damage. One field trip to study insect problems required. Offered: A.

ESRM 441 Landscape Ecology (5) NW Franklin
Basic landscape ecology concepts, including patches, corridors, networks, spatial dynamics; island biogeographic principles; landscape analysis methods; landscape models. Applications of landscape ecology in resources management (e.g., cumulative
effects, cutting, patterns, anadromous fisheries, management of wildlife populations, and open-space planning). Recommended: ESC 326. Offered: W.

ESRM 450 Wildlife Ecology and Conservation (5) NW West
Covers advanced principles of wildlife ecology such as habitat selection, population viability, and landscape ecology, and illustrates how they apply to wildlife conservation problems with terrestrial, aquatic, and marine wildlife. Students must share costs of field trips. Prerequisite: either ESC 350 or ESRM 350; either CFR 250 or ESRM 250; recommended: introductory statistics. Offered: W.

ESRM 451 Urban Plant Protection (5) NW Gara
Working knowledge on insects and diseases of plants growing in the urban environment. Emphasis placed on pest and damage recognition, control methods, and integrated pest management systems. Offered: odd years; Sp.

ESRM 452 Field Ornithology (3) NW Manuwal
Students learn field identification skills and are introduced to field methodologies through required indoor labs, field trips, and field exercises. Exercises include study of survey techniques, feeding ecology, and behavior. Students are required to share field trip costs. Prerequisite: either BIOL 102, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

ESRM 453 Biology and Conservation of Mammals (3) NW West
Introduction to mammals of the world: mammalian evolution, taxonomy, morphology, reproduction, population biology, ecology, and conservation. Prerequisite: ESC 350; recommended: concurrent registration in ESC 454. Offered: even years; A.

ESRM 454 Biology and Conservation of Mammals Laboratory (3) West
Identification and natural history of mammals of the Pacific Northwest. Laboratory work on morphology, taxonomy, and natural history; fieldwork on natural history and sampling methods. Two weekend field trips required; students share travel costs. Prerequisite: ESC 350; recommended: concurrent registration in ESC 453.

ESRM 455 Wildlife Seminar (1, max. 4) NW Manuwal, West
Discussion of current research and application in wildlife biology and conservation. Credit/no credit only. Offered: AW.

ESRM 456 Biology and Conservation of Birds (3) NW Manuwal
Major principles of natural history, avian reproductive biology, population ecology, and national and international conservation strategies for both hunted and unhunted birds. Emphasis on western United States. Prerequisite: either BIOL 102, BIOL 180, BIOL 202, BIOL 203, or BIOL 220, any of which may be taken concurrently. Offered: odd years; A.

ESRM 457 Fish and Wildlife Toxicology (3/5) NW
Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assess risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with FISH 455; W.

ESRM 458 Management of Endangered, Threatened, and Sensitive Species (5) NW Marzluff
Biological underpinnings and political realities of endangered species management, including: legal issues, recovery teams, citizen rights, extinction, rarity, proactive management, captive propagation, reintroduction, species endangered in the Pacific Northwest. Students revise endangered species recovery plans. Offered: A.

ESRM 459 Wildlife Conservation in Northwest Ecosystems (3) NW Agee, Manuwal, West
Extended field course offers Wildlife Science students personal interactions with wildlife managers and wildlife populations in strategic private and public lands in the northwestern United States and southern Canada. Students will share costs of trip. Offered when there is sufficient student demand. Prerequisite: ESC 350; may not be repeated. Offered: Sp.

ESRM 460 Institutionalizing Sustainable Ecological Practices. (5) I&S/NW Lee
Introduction to how sustainability and conservation are possible. Case studies of successful institutionalization of sustainable ecological functions, including curbside and biosolids recycling, ecological restoration, bioremediation, sustainable wood production, and product certification. Emphasis on individual student projects. Offered: jointly with ENVR 460; Sp.

ESRM 461 Forest Management and Economics II (4) I&S/NW Bare
Basic concepts of timber harvest scheduling, sustained-yield models, contemporary analytical techniques, timber supply, and forest product markets. Offered: W.

ESRM 462 Restoration Ecology Capstone: Introduction (2) NW
First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with ENVR/TESC/BES 462.

ESRM 463 Restoration Ecology Capstone: Proposal and Plan (3) NW
Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ESRM 462.

ESRM 464 Restoration Ecology Capstone: Field Site Restoration (5) NW
Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ESRM 463. Offered: jointly with BES 464/TESC 464; Sp.

ESRM 465 Economics of Conservation (3) I&S/NW
Economic principles and their use in the analysis of contemporary conservation problems. Particular emphasis directed toward the conservation of forest resources in the Pacific Northwest and related policy issues.

ESRM 470 Natural Resource Policy and Planning (5) I&S/ NW Ryan
Introduction to and analysis of environmental policy-making processes, with a focus on forest and land policy and law. Use of policy models to examine the interaction of agencies, interest groups, Congress, and the courts in the legislative process. Policy implementation, evaluation, and change are also addressed. Offered: A

ESRM 471 Urban Forest Landscapes (5) NW Bradley, Wagar, Wolf
Comprehensive view of urban forest and urban forest landscapes. Includes close examination of factors that differentiate urban forest landscapes along the urban to wildland gradient. Compare legal, social, political, administrative, physical, and biological variations. Offered: SpS.

ESRM 472 Wetland Ecology and Management (5) NW Ewing, Harrison

585
Wetland types and functions, global and North American distribution, wetland plant types, soil chemistry. The influence of stresses on wetland composition and form. Autecology of wetland plants; response to and detection of stresses. Impacts of urbanization; management techniques. Recommended: either BIOL 471, BIOL 472, BOTANY 354, or BOTANY 371. Offered: A.

ESRM 473 Principles of Ecological Restoration (5) NW Ewing
Philosophy of restoration, structural components of ecosystem degradation, analysis of restoration projects and methods, and an ecosystem by ecosystem review of how systems are restored. An ecology courses that emphasizes applied scientific knowledge of ecosystems. Recommended: either BIOL 471, BIOL 472, BOTANY 354, or BOTANY 371. Offered: W.

ESRM 474 Problem Analysis in Urban Ecology (5) NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with GEOG 486. A.

Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: CFR 474/ENVIR 496/GEOG 486. Offered: jointly with ENVIR 487/GEOG 487. Offered: W.

ESRM 476 Research in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present results section. Prerequisite: CFR 475/GEOG 487/ENVIR 487. Offered: jointly with GEOG 488/ENVIR 488; Sp.

ESRM 477 Wetland Restoration (5) Ewing
A Web-delivered, self-paced course covering wetland science, restoration ecology, freshwater restoration, coastal restoration, monitoring/maintenance, and case histories. Completion of extensive readings, assignment and test required for each module. Prerequisite: either BIOL 102, BIOL 180, or BIOL 203; recommended: either ESRM 473, ESRM 472, BOTANY 354, BOTANY 456, BIOL 471, or BIOL 472. Offered: A.

ESRM 478 Plant Eco-Physiology (5) NW Chalker-Scott
Impact of environmental stresses (e.g., temperature, light, moisture, nutrients, allelopathy, salt) on the performance of woody and herbaceous plant species and their subsequent physiological responses. Emphasizes problems common in urban and restored environments (e.g., pollution, soil compaction, heat). Individual projects. Prerequisite: either BOTANY 371 or BIOL 325 or CHEM 120; BIOL 102 or BIOL 162. Offered: W.

ESRM 480 Selection and Management of Landscape Plant (5) NW Chalker-Scott
Principles of plant selection and management in urban and modified environments. Site analysis and preparation; physiological basis for plant selection; techniques for successful plant installation and aftercare; plant performance evaluation; long-term management and plant health care. Group and individual projects. Prerequisite: either ESC 210 or ESC 311; recommended: either BIOL 116 or BIOL 117. Offered: A.

ESRM 481 Field Practicum in Plant Selection and Management (2) NW Chalker-Scott
Practical application of plant selection and management in urban and modified environments. Site analysis and preparation; evaluation of nurseries; techniques for successful plant installation and aftercare; plant performance evaluation; plant health care assessment. Group project. Prerequisite: ESRM 480, which may be taken concurrently. Offered: A.

ESRM 489 Foreign Study (1-5, max. 15)
Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

ESRM 490 Special Topics (1-5, max. 15)
Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

ESRM 494 Senior Thesis Proposal (5)
Selection of a thesis topic, literature review, and preparation of a formal senior thesis proposal. Students select a faculty advisor to assist them in the proposal writing process. Regular or Honors credit.

ESRM 495 Senior Project (5)

ESRM 499 Undergraduate Research (1-5, max. 15)
Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Credit/no credit only. Offered: AWSp.

Paper Science & Engineering

Course Descriptions

PSE 102 Paper, Society, and the Environment (5) I&S/NW McKean
Types of products and patterns of use. Overview of manufacturing processes in terms of raw material, costs, world trade and consumer requirements. Environmental implications of manufacturing, recycling, and disposal of paper and its byproducts. Societal and environmental costs of substituting petroleum-based or nonwood raw materials in paper products. Offered: A.

PSE 104 Products and Energy from Renewable Resources (5) I&S/NW Northey
Introduction to the structure, composition, and availability of renewable resources. Conversion of these materials into solid products, energy, and useful chemicals. Particular attention to the production of fiber (paper/board), fuels (ethanol/aromatics), and specialty chemicals (biopolymers, medicines, etc.). Includes weekly laboratory session.

PSE 201 Introduction to Pulp and Paper Technology (3) NW Gustafson, Hodgson, McKeen
Broad overview of the science and technology of producing pulp and paper. Introduction of the PSE major course sequence and various career options. Examination of Pacific Northwest pulp and paper production facilities. Offered: A.

PSE 202 Pulp and Paper Lab and Field Studies (1) NW Gustafson, Hodgson, McKeen
Laboratory and field trip studies in pulp and paper technology. Visits to local forest product manufacturing facilities. Required for PSE majors. Credit/no credit only. Offered: A.

PSE 248 Paper Properties (4) NW Briggs, Hodgson, Johnson, McKean
Acquaints students with raw material characteristics, physical and mechanical concepts, nomenclature, and procedures related to evaluating paper and pulpboard product properties. Emphasizes structural, optical, mechanical, and moisture related properties. Offered: W.

PSE 309 Creativity and Innovation (2) VLPA Allan

PSE 399 Undergraduate Internship (1-5, max. 15)
Internship experience with a public agency or private company, supervised and approved by a faculty member. Preparation of professional report reflecting on the experience is required. Credit/no credit only. Offered: AWSpS.

PSE 402 Paper Physics (3) NW McKean
Exploration of paper product behavior from a materials science perspective. Fundamental laws of physics, both deterministic and statistical, will be used to explain experimental results. Discusses and analyzes theoretical models to explain paper behavior. Prerequisite: PSE 248; PHYS 121, 122, 123. Offered: A.

PSE 404 Raw Materials for Papermaking (3) NW McKeen, Hodgson

PSE 406 Wood Chemistry I (3) NW
Chemistry of cellulose, hemicellulose, and lignin. Pulping and bleaching chemistry of wood. Prerequisite: either CHEM 237 or CHEM 335. Offered: A.

PSE 409 Wood Extractives Chemistry (2) NW Northey
Nature, origin, and occurrence of the extraneous components of wood, their influence on pulp and paper preparation, and their utilization. Prerequisite: either CHEM 237 or CHEM 335. Offered: even years; Sp.

PSE 450 Paper Science and Engineering Seminar (1, max. 4)
Discussion of current topics in the science and technology of pulp and paper production. Emphasis on employer expectations of students in the paper science industry. Credit/no credit only. Offered: Sp.

PSE 475 Microtechnique (3) Breitsprecher
Covers the principles and the practice of specimen preparation for light and electron microscopy. Tailored to meet the research interests of the participants. Students prepare mounts by several techniques and examine them with the appropriate instrumentation. Offered: odd years; Sp.

PSE 476 Pulping and Bleaching Processes (3) Gustafson
Conversion of wood to mechanical and chemical pulps. Kraft, sulfate, and semi-chemical pulping processes. Chemical recovery systems. Bleaching of mechanical and chemical pulps. Offered: jointly with CHEM E 471; W.

PSE 477 Papermaking Processes (3) McKean

PSE 478 Pulp and Paper Laboratory (2) Jacobs-Young
Laboratory experiments in chemical and semi-chemical pulping of wood. Bleaching of chemical and high-yield pulps. Physical and chemical characteristics of pulp fibers. Prerequisite: PSE 476. Offered: jointly with CHEM E 473; Sp.

PSE 479 Pulp and Paper Laboratory II (3) McKean
Paper testing, paper additives, flocculation, drainage, retention, heat transfer, and fluid dynamics in papermaking from virgin and recycled raw materials. Prerequisite: PSE 402; PSE 477. Offered: W.

PSE 480 Pulp and Paper Process Control (3) Gustafson
Control of pulp and paper processes. Sensors, actuators, interface equipment, and computer control strategies common to this industry. Prerequisite: PSE 476; PSE 477. Offered: W.

PSE 481 Pulp and Paper Unit Operation (3)
Unit operations of particular interest in the pulp and paper industry in addition to those covered in CHEM E 330 and 340. Prerequisite: CHEM E 340. Offered: W.

PSE 482 Paper Science and Engineering Design I (3) &S/NW Briggs, Gustafson
Basic engineering economics applied to design of pulp and paper facilities. Analysis of engineering alternatives based on use cost analysis and accounting tools. Introduction to process and mill design. Prerequisite: 2.0 in PSE 406; 2.0 in PSE 476; 2.0 in PSE 477. Offered: Sp.

PSE 483 Paper Coating and Converting (3) Barlow
Coatings and their preparation, rheology, process equipment, drying, and product evaluation. Prerequisite: PSE 477. Offered: A.

PSE 484 Secondary Fiber (3) Hodgson

PSE 485 Undergraduate Research (1-, max. 3) Johnson
Undergraduate research or independent study project under the supervision of the faculty; usually one credit per quarter. Offered: AWSp.

PSE 487 Paper Science and Engineering Design II (5)
Comprehensive design of pulp and paper processes, including: economic feasibility studies; process equipment design, optimization, and control; and overall process integration and layout. Safety and ethics in the design process. Prerequisite: PSE 482, which may be taken concurrently. Offered: Sp.

PSE 488 Polymer Chemistry (3) Allan
Fundamental review of synthetic and natural polymers, including kinetics of formation, molecular weight distributions, and solid-state and solution properties. Prerequisite: either CHEM 237 or CHEM 335. Offered: W.

PSE 489 Foreign Study (1-5, max. 15)
Individual foreign study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSpS.

PSE 490 Special Topics (1-5, max. 15)
Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

PSE 491 Undergraduate Studies (1-5, max. 5)
Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

PSE 492 Undergraduate Studies (1-5, max. 5)
Individual tutorial study of topics for which there is not sufficient demand to warrant the organization of regular classes. Offered: AWSp.

PSE 494 Senior Thesis Proposal (5)
Selection of a thesis topic, literature review, and preparation of a formal senior thesis proposal. Students select a faculty advisor to assist them in the proposal writing process. Regular or Honors credit.

PSE 495 Senior Project (5)

PSE 496 Senior Thesis (5)
Statistical analysis and presentation of research results and discussion of results in a thesis paper. Students work with faculty advisors to complete field or laboratory research and then prepare the senior thesis. Offered: AWSp.

PSE 497 Pulp and Paper Internship (1-2, max. 3)

PSE 499 Undergraduate Research (1-5, max. 15)
Individual research supervised by a faculty member. For advanced students desiring to extend their educational experience. Credit/no credit only. Offered: AWSp.

The Information School
370 Mary Gates Hall
Box 352840

Dean
Michael Eisenberg

Associate Deans
Harry Bruce
Joseph Janes

The Information School is dedicated to preparing individuals for professional careers and leadership roles in the information professions. The School embraces a wide range of academic interests reflected in its main academic degree areas: information science, library science, information management, and informatics. Graduates of the School assume a variety of professional roles in the public and private sectors, with positions that span from information architects to children’s librarians, from Web developers to information technology (IT) managers.

The signature of the School is its “human-centered” approach to information studies and technology. This focus holds the human perspective as a critical and integral component in the study of information and technology; it encourages increasing understanding of human involvement with information and its social and technological ramifications.

Through its specific goals and objectives in instruction, research, service, and outreach, the School creates and continues to foster a dynamic learning environment dedicated to preparing its students for emerging opportunities and challenges of the twenty-first century.

The School offers four degree programs leading to the Bachelor of Science in Informatics, the Master of Library and Information Science (MLIS), the Master of Science in Information Management (MSIM), and the Doctor of Philosophy in Information Science. The School also provides certificate programs, continuing education opportunities for professionals as well as service courses for undergraduates in information fluency, research strategies, and technology.

History
Originally established in 1911, the Information School has the oldest library and information program west of the Mississippi, and continues to offer the most extensive American Library Association-accredited library and information science degree in the Northwest region of the United States.

In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, an esteemed faculty, and state of the art facilities, the Information School became the University’s sixteenth independently organized schoolcollege in 2001.

The School seeks to explore the theoretical and applied cutting edges of the information field and to nurture the best of both worlds: traditional library values and ever-changing information frontiers. The vision statement adopted by the School is “People and Knowledge: Building Information Connections. The faculty, staff, students and alumni of the Information School believe that connecting people with knowledge is of fundamental individual and societal importance; further, we believe access to information is a basic human right. We commit ourselves to sustain this vision.”

Undergraduate Program
Informatics refers to the study of information systems and technology from a human perspective. It features the Information School’s emphasis on a human-centered approach to systems design. Informatics students study a range of information constructs, from simple systems that support personal information management to complex systems that involve vast databases of distributed information manipulated in real-time by high-speed computer technologies. They analyze national and global information policy, the management of formal information systems in organizations, and the subtleties of everyday information behavior. Also, they invent methods for representing, classifying, and retrieving information and design new information systems responsive to people’s needs and values.

470 Mary Gates Hall
Box 352840
206-543-1794
informatics@ischool.washington.edu

Bachelor of Science
Suggested First- and Second-Year College Courses: INFO 100, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 311, courses that develop strong analytical, qualitative and quantitative reasoning, and written and oral communication skills as well as courses that provide exposure to a variety of social science fields.

Program Admission Requirements
Regular Admission
INFO 100 (5 credits), CSE 142 (4) and CSE 143 (5), STAT 311 (5); one English composition course selected from
the University list (5), with a minimum grade of 2.0 in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses. (Students may not receive credit for INFO 100 taken after CSE 142. Therefore, INFO 100 will be waived for students who have already completed CSE 142 or equivalent. If INFO 100 is waived, students make up the 5 credits by taking additional elective credits in the major.)

Minimum 2.00 cumulative college GPA.

Admission is competitive, based on the following criteria:
- Overall academic performance
- Grades in courses required for admission to the major
- Personal statement reflecting an interest in and commitment to becoming a major in this field
- Other evidence of interest and commitment to the field (e.g., work experience, internships)

Meeting the above criteria does not guarantee admission.

Application deadline is April 15. Students apply online at www.ischool.washington.edu between February 1 and April 15. Admission is for autumn quarter only.

Transfer students should contact the Information School as soon as they become interested in the informatics major. The School will consider courses equivalent to CSE 143 and may allow a student to be admitted provisionally on the condition that the student completes CSE 143 or equivalent with a minimum grade of 2.0 during the summer before matriculating in the program.

Freshman Direct Admission Program (FDAP)

Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.

The number of early admission (FDAP) students will not exceed 10% of the number of majors admitted each year. FDAP students must earn a minimum 3.00 cumulative GPA for courses required for regular admission: INFO 100, CSE 142, CSE 143, STAT 311, and five credits of English composition (chosen from the University list). Any student who fails to meet this standard may appeal through the department adviser for possible retention in the Information major.

Major Requirements

92 credits as follows:

- Courses required for admission to the program (24 credits, as shown above)
  - Human Centered Strand (20 credits): INFO 310, INFO 311, INFO 320, and INFO 380
  - Technical Strand (13 credits): CSE 373, INFO 340, and INFO 341
  - Integrated Strand (23 credits): INFO 300, INFO 370, INFO 440, and INFO 490 or INFO 491
  - Major Electives (12 credits minimum) selected from upper-division electives from the Information School and approved courses from outside departments.

General Education: Beyond the 92 credits required for the major, students must also satisfy the following:

- English composition (5 credits)
- Quantitative/Symbolic Reasoning (5 credits)
- Writing courses (10 credits)
- Natural World (20 credits)

Individuals & Societies (20 credits)

Visual, Literary, & Performing Arts (20 credits)

With courses required for the major, students automatically satisfy requirements for English composition (pre-admission English composition requirement), Quantitative/Symbolic Reasoning (STAT 311), Writing (INFO 310, INFO 311, and INFO 320), and Natural World (CSE 142, CSE 143, and INFO 340, INFO 341, and INFO 440). In addition, students satisfy a good portion of the requirements for Individuals & Societies (INFO 310, INFO 311, and possible electives). They satisfy requirements for Visual, Literary, and Performing Arts by taking courses outside the major. (INFO 424, an elective in the major, also counts towards the VLPA requirement.)

Minimum 2.0 grade required in each class used to meet major requirements. Minimum 180 credits total required to graduate.

Continuation Policy

Students are expected to make satisfactory progress towards attainment of the Bachelor of Science in Informatics degree. Under normal circumstances, an informatics major attending full-time would make satisfactory progress by completing the major requirements in approximately two years after admission to the major, or within three years for students admitted to the major as sophomores. Lack of academic progress may be evidenced by low scholarship as well as excessive course repeats, course drops, or University withdrawals and cancellations. For more details, see adviser.

Student Outcomes

- Learning Objectives and Expected Outcomes: The Informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.

Graduates of the Informatics program are qualified for jobs in the information and technology industry and in business, public service, and other various professions. Possible job titles include security and performance analyst, web developer, information management specialist, network administrator, product developer, business analyst, usability engineers, and many others.

The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management science, information science, biomedical informatics, business and accounting, and information technology.

Informatics student learning outcomes include the ability to assess people’s information needs and behavior; ability to design information systems to meet people’s information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively in writing and speaking; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All Informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- Instructional and Research Facilities: Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management,
programming, graphics, web page creation, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services. The TE Lab is a unique facility that includes twenty-four student stations and thirty-two servers on a “server wall.” The lab is designed to promote exploration of a variety of technologies. Students can install alternative operating systems, set up their own file, Web, or database server, and become the system administrator of their machines.

To promote strong academic and professional writing skills, the School hosts the Engineering iSchool Writing Center (EiWC) in collaboration with the College of Engineering. The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 10,000 square feet of offices, workstations, research labs, and meeting spaces.

- **Honors Options Available:** None offered.
- **Research, Internships, and Service Learning:** Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.

Informatics students are extensively engaged in faculty research and internships. Over half of all informatics students participate in the University’s Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).

- **Departmental Scholarships:** The Henry Scholarships, in the amount of approximately $1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.
- **Student Organizations/Associations:** Undergraduates participate in a number of the School’s many student organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technology (ASIST).

Of Special Note:

**Capstone Projects:** Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. The capstone projects, with titles such as “Making Environmental Policy: Human Centered Analysis of Knowledge Sharing Between Cross-Functional Groups” and “Project Management in an Open Source Developing Community,” encompass a wide range of topics. Through capstone projects, students demonstrate the skills, understandings, and competencies they can successfully use to prepare for employment and graduate studies.

**Information Sessions:** Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the Web at www.ischool.washington.edu/informatics/infosessions.htm.

**Graduate Programs**

Graduate Program Coordinator
370 Mary Gates Hall, Box 352840

206-543-1794
info@ischool.washington.edu

The School offers graduate programs leading to the Master of Library and Information Science (M.L.I.S.), the Master of Science in Information Management (M.S.I.M.), and the Doctor of Philosophy in Information Science.

**Admission Requirements**

Qualified students who are graduates of the University of Washington or other accredited colleges or universities with a GPA of 3.00 in the last two years of college work and approval of the School and the UW Graduate School may be admitted to graduate degree programs. Students enter the School from many varied disciplines. A complete application file includes the copy of the UW Graduate School application for admission; official transcripts; Graduate Record Examination (GRE) general test scores (Graduate Management Admission Test — GMAT — scores are acceptable for M.S.I.M. applicants only); three letters of recommendation; a curriculum vitae or resume, and a personal statement. The M.L.I.S. application requires responses to several supplemental questions. International applicants must also meet requirements outlined by the UW Graduate Admissions for international students, including requirements for the Test of English as a Foreign Language (TOEFL). For additional information, see www.grad.washington.edu/admissions/index.htm.

Deadlines for admission vary by program. M.L.I.S. deadline is January 15; for the distance M.L.I.S. the deadline is March 15. The Ph.D. deadline is January 15. The M.S.I.M. deadline is May 1. All international student applications are due November 1, the year prior. For more information and to request application materials, visit the School’s Web site.

**Financial Aid**

The University of Washington Financial Aid Office administers a variety of government and University funded financial aid programs for which applicants must submit the Free Application for Federal Aid form (FAFSA). For more information, contact the UW Financial Aid Office, 105 Schmitz Hall. Information on the FAFSA is also available online.

**Graduate Assistantships and Scholarships**

Financial aid options for full-time students may include graduate assistantship and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical benefits. To apply for a M.L.I.S. Graduate Assistantship, prospective students should complete the application form at www.ischool.washington.edu/resources/finaid/mlis.aspx and submit the form with their resume to the Assistant to the Associate Dean for Academics by February 1. Ph.D. students are automatically considered for graduate student service appointments.

M.L.I.S. scholarships are awarded on a basis of financial need, based on information from the Free Application for Federal Student Aid (FAFSA), and academic merit.

Information regarding additional sources of financial aid, from sources outside the Information School, is available at the Information School Financial Aid Resources Web page.

**Special Research Facilities**

Located on the third and fourth floors of Mary Gates Hall, one of the University’s flagship high-technology buildings, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, Web page creation, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial...
information services.

The TE Lab is a unique facility that includes twenty-four student stations and thirty-two servers on a "server wall." The lab is designed to promote exploration of a variety of technologies. Students can install alternative operating systems such as Linux, setup their own file, Web, or database server, and become the system administrator of their machines. Each machine includes a removable hard drive so that students can use either a "production setup" with all software previously installed and configured, or an "experimental setup" where students are free largely to do as they desire.

To promote strong academic and professional writing skills, the School hosts the Engineering iSchool Writing Center (EiWC) in collaboration with the College of Engineering, as a resource for students.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 10,000 square feet of offices, workstations, research labs, and meeting spaces.

For more information, please visit the School’s Web site at www.ischool.washington.edu/technology/.

Continuing and Professional Education

The Information School works with University of Washington Educational Outreach to offer classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include Web Technology Essentials, Data Resource Management, Electronic Information and Records Management; Web Administration, and Small Business Web Master. Those interested in continuing education or certificate programs should contact UW Educational Outreach, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: 206-543-2320 or see www.extension.washington.edu/ext/.

Master of Library and Information Science

Professor Karen Fisher
370 Mary Gates Hall
206-543-1794
mlis@ischool.washington.edu (M.L.I.S. program)
dmlis@ischool.washington.edu (Distance M.L.I.S.)

The M.L.I.S. program prepares graduates for an ever-expanding variety of information professions including information architecture, school library media, knowledge management, librarianship, and other information-related positions. The degree is accredited by the American Library Association.

The 63-credit M.L.I.S. degree includes two program options: full-time (day) and a part-time (distance) program. In addition, the Information School offers a 45-credit law librarianship program for individuals who have earned a J.D. degree.

The curriculum includes nine core courses, which cover theoretical and applied aspects of the information life cycle. The remaining 29 elective credits allow students to pursue their preferred areas of interest or emphasis.

The Distance M.L.I.S. is a part-time program that generally requires three years to complete. The delivery of instruction is primarily Internet-based with a brief, quarterly, on-campus residency. Students must attend course meetings in-residence at the University of Washington’s Seattle campus for two to five days each quarter, excluding summer quarter.

Law Librarianship Program

The law librarianship program is designed to prepare lawyers to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms. Attorneys enrolled in the program earn the Master of Library and Information Science degree after successful completion of 45 quarter credits. The highly structured law librarianship program includes seven M.L.I.S. core course, five law librarianship courses and a directed fieldwork experience. Law M.L.I.S. applicants, who must hold a degree from an accredited U.S. law school or from a law program in one of the common-law countries, are encouraged to submit LSAT rather than GRE scores.

The law librarianship program begins in the autumn quarter and is sequential, ending with the following summer quarter. Please contact Professor Penny Hazelton 206-543-4089; or at pennyh@u.washington.edu for further information.

School Library Media Specialist

Requirements for the Washington State Library Media endorsement may be pursued concurrently with the M.L.I.S. degree. Individuals interested in earning a Library Media endorsement without pursuing the M.L.I.S. should contact University of Washington Educational Outreach at 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105; 206-543-2320; or www.extension.washington.edu/ext/. In Washington, Library Media Specialists working in public schools must hold a current state teaching certificate.

Master of Science in Information Management

Professor Michael Eisenberg
370 Mary Gates Hall
206-543-1794
msim@ischool.washington.edu

The Master of Science in Information Management is a part-time degree program that integrates information management and information technology with a focus on the user perspective. Prospective students are professionals in management, information technology and library and information science, from both the public and private sectors, who wish to deepen their understanding of information technology, further their education, and advance professionally. The Friday-evening and Saturday course scheduling enables students to maintain full-time workloads.

M.S.I.M. students must complete 47-credits of graduate coursework to obtain the degree. Degree requirements feature foundation, core, and capstone coursework. Students generally take two courses each quarter during autumn, winter and spring to graduate in two years. M.S.I.M. degree requirements include the following components:

- **Foundation (4 credits):** Students begin with IMT 510, a signature course that introduces user-centered concerns. Basic concepts and core areas covered throughout the curriculum are introduced.
- **Information Management and Technology Core (35 credits):** The core coursework provides students with a concrete understanding of the relationship between the technical and organizational aspects of information management. Information Technology core courses: IMT 530, IMT 532, IMT 540, IMT 546, and IMT 548. Information Management core courses: IMT 551, IMT 580, IMT 581, IMT 582, and IMT 598.
- **Integration (5 credits):** The M.S.I.M. curriculum requires a capstone experience, IMT 595. The capstone addresses the increasing demand for the application of IT to the information needs of diverse user groups. Integration offers students the opportunity to synthesize the ideas presented earlier in the program and to help implement comprehensive information systems within an organization.

Admission to the M.S.I.M. program is for autumn quarter only. The application deadline for autumn admission is May 1.

Doctor of Philosophy in Information Science

Professor Wanda Pratt
370 Mary Gates Hall
206-543-1794
phd@i.school.washington.edu
The Ph.D. in Information Science is a theoretical, research-based doctorate that focuses on creating and advancing new knowledge that makes a difference. The program provides research education and scholarly mentoring for doctoral students who have an interest in the issues and concerns that are central to the domain of the discipline of information science. Students are selected on their ability to engage in theoretical discourse and to conduct empirical investigation.

The areas of inquiry for doctoral research in the Information School are aimed at increasing our understanding of how humans interact with information, how technology can improve those interactions and what the social ramifications could be. It addresses those issue that affect the transfer and use of information by people in social, organizational and individual contexts. This may include areas such as information technology literacy, access to information, human-computer interaction, information organization and knowledge management, information systems design, information retrieval, information policy, social aspects of information technology, and information behavior.

Many of these issues are associated with information and communication technologies and for this reason students are highly competent and creative users or developers of technology. Admission to the doctoral program is for autumn quarter only. The application deadline is January 15 for U.S. citizens and eligible residents. International applicants must submit their application by November 1.

Degree Requirements: To be awarded a Ph.D. in Information Science, the following requirements must be met:

- Pass a Preliminary Review determined by a school-based advisory committee at the end of the required first-year of full-time study.
- Successfully complete (minimum GPA of 3.25) all course requirements as stipulated by the School.
- Complete the School’s requirement for teaching and research practice.
- Pass the General Examination upon completion of coursework and practica components to attain formal candidacy for the Ph.D. program (candidate’s certificate).
- Successfully defend a dissertation proposal before a Supervisory Committee.
- Successfully defend a dissertation before a Reading Committee (Final Exam).

Informatics

Course Descriptions

INFO 100 Fluency in Information Technology (5) QSR
Introduces skills, concepts, and capabilities necessary to effectively use information technology. Includes logical reasoning, managing complexity, operation of computers and networks, and contemporary applications such as effective Web searching and database manipulation, ethical aspects, and social impacts of information technology. Not available for credit to students who have completed CSE 142 or ENGR 142. Offered: jointly with CSE 100.

INFO 198 Introductory Seminars in Informatics (1-5, max. 13)
Selected introductory topics in informatics oriented toward freshman and non-major undergraduates and presented in a seminar format. Topics and content vary to represent the interests of the Information School faculty. Credits do not automatically apply to major/minor requirements.

INFO 220 Information Research Strategies (5) I&S
Use information technology for research and information problem-solving. Create web sites or other presentations, as well as find, manage, and evaluate information, and learn the ethical and legal constraints on information use. AWSp.

INFO 221 Information Research Strategies in History (3) I&S
Information research and problem solving in the context of history. Focuses on identifying information, need, information seeking, evaluation and presentation, and selection of the appropriate sources. Offered: jointly with HIST 221.

INFO 299 Study Abroad - Informatics (1-5, max. 15)
For participants in study abroad program. Specific course content varies. Credits do not automatically apply to major requirements.

INFO 300 Intellectual Foundations of Informatics (5)
Information as an object of study, including theories, concepts, and principles of information, information seeking, cognitive processing, knowledge representation and restructuring, and their relationships to physical and intellectual access to information. Development of information systems for storage, organization, and retrieval. Experience in the application of theories, concepts, and principles.

INFO 310 Individual Perspectives on Information Systems (5) I&S
Social, cognitive, behavioral, and contextual aspects of information systems, including human information behavior, interpersonal interaction, and social responses to information technology. Emphasis on well-being and information exchanges as a communicative event. Exposure to experimental and naturalistic methodologies through laboratory assignments and field work.

INFO 311 Organizational, Societal, and Global Perspectives on Information Systems (5) I&S
Social, ethical, economic, political, and cross-cultural implications of current and future information systems. Information transfer and use within groups, organizations, and cultures. Focus on organizations as information processors, the new knowledge economy, and national and international information policy, intellectual property, privacy, censorship, and freedom of information.

INFO 320 Information Needs, Searching, and Presentation (5)
Introduction to information needs, database and information organization and structure, Web and database searching and browsing, and information presentation. Examination of underlying principles in knowledge representation, indexing, record structures, online search process, search strategies and tactics, assessment of user needs, reference interviewing, post-processing, organization and presentation of information.

INFO 340 Database Management and Information Retrieval (5) NW
Theories and models in system-centered approaches to information retrieval and database management. Information retrieval and database management systems include text and multimedia databases, web search engines and digital libraries. Issues in system design, development and evaluation, and tools for searching, retrieval, user interfaces, and usability. Prerequisite: CSE 373.

INFO 341 Computer Networks and Distributed Applications (5) NW
Basic concepts of local and wide area computer networking including an overview of services provided by networks, network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Also addresses management, security, authentication, and policy issues associated with distributed systems. Prerequisite: CSE 143.

INFO 344 Web Tools and Development (5)
Introduction to fundamental web technologies with an emphasis on scripting and programming. Includes both client and server
technologies. Examines effective information architecture for Web sites, information presentation on Web pages, privacy policies, and Web security. Prerequisite: CSE 142.

INFO 380 Information Systems Analysis and Management (5)
Examines the evolution of how information is defined and managed in order to add value to organizations. Views information management and the CIO as key facilitators in creating or improving relationships, processes, competitiveness, products, and services.

INFO 414 Information Behavior (5)
Advanced study of information behavior. Focus on the user-centered approach and the research literature of human information behavior. Introduces methods for evaluating and translating the results of user behavior studies into the design of information services and systems. Prerequisite: INFO 310.

INFO 419 Special Topics in Social Aspects of Information (1-5, max. 10)
Various topics in the social aspects of information. Offered by visitors or resident faculty.

INFO 424 Information Visualization and Aesthetics (5) VLPA
Examines the visualization of information: the effects of human perception, the aesthetics of information design, the mechanics of visual display, and the semiotics of iconography. Examples may include census, epidemiological, crime, earth satellite, and medical data in the contexts of special computer applications, user populations, and cultures. Prerequisite: CSE 143.

INFO 430 Knowledge Organization and Representation (5)
Advanced study of knowledge organization using classificatory structures and creation of metadata element sets for representation. Conceptual and practical foundations for creating systems for information organization and representation. The creation, application, and use of a variety of systems and techniques for information organization and representation. Prerequisite: INFO 300; INFO 320.

INFO 440 Design Methods for Interaction and Systems (5) NW
Theoretical and practical examination of the information systems design process. Techniques for assessing the need for technology, specifying the system design, and involving users in the design process are explored. Design methods include social impact statements, future scenarios, mock-ups, rapid prototyping, field-testing, heuristic evaluation. Prerequisite: CSE 373.

INFO 444 Value-Sensitive Design (5)
Introduction to value-sensitive design (VSD), information system design that accounts for human values in a principled and comprehensive manner. Examination of existing systems from a VSD perspective. Explores VSD research methods including conceptual, technical, empirical investigations. Key values include accountability, autonomy, consent, privacy, property, trust, sustainability. Prerequisite: CSE 373.

INFO 445 Advanced Database Design, Management, and Maintenance (5)

INFO 446 Advanced Search Engine Systems (5)
Focus on design, development and evaluation of search engines. Theories and models in information retrieval for text and multimedia databases, Web search engines, recommendation systems, and digital libraries. Topics include language issues, data-mining, machine learning, user-profiling, visualization, user interfaces, usability. Coursework involves analytical comparisons of search engines. Prerequisite INFO 340.

INFO 447 Computer Supported Cooperative Work (5)
Focuses on design and use of collaboration technologies to communicate, share information, and coordinate activity. Emphasis on behavioral and social aspects of adopting and using these technologies. Topics include the history of work in this and related fields, collaboration support for teams, organizations, and communities. Prerequisite: INFO 310.

INFO 449 Special Topics in Information Technology (1-5, max. 10)
Various topics in information technology. Offered by visitors or resident faculty.

INFO 454 Information Policy: Domestic and Global (5)
National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries. Prerequisite: INFO 311.

INFO 458 Reading Seminar in Social Aspects of Information Systems (2, max. 12)
Addresses foundational issues in social aspects of information systems. Introduction to the intellectual traditions that underlie fields such as computer ethics, social informatics, and value sensitive design. Format entails in-depth discussions based on careful reading of primary source texts selected by seminar participants.

INFO 459 Special Topics in Information Policy (1-5, max. 10)
Various topics in information policy. Offered by visitors or resident faculty.

INFO 470 Research Methods in Informatics (5)
Introduction to the research process investigating information needs, creation, organization, flow, retrieval, and use. Stages include: research definition, questions, objectives, data collection and management, data analysis, and data interpretation. Techniques include: observation, interviews, questionnaires, and transaction-log analysis. Prerequisite: STAT 220 or STAT 311.

INFO 484 Information Entrepreneurship (5)
Investigates the development of innovative human-centered informatics products, with emphasis on the unique challenges and opportunities in high-value information products. Includes competition, strategic planning, tactical marketing, informatics product launches, and applied informatics. Teamwork to create and present plans for innovative informatics products/services. Prerequisite: either INFO 300, INFO 310, or INFO 311.

INFO 489 Special Topics in Information Management (1-5, max. 10)
Various topics in information management, offered by visitors or resident faculty.

INFO 490 Design and Development of Interactive Systems (4-8, max. 8)
Design and formative evaluation of an interactive information system to solve a real problem. Student-organized team projects are encouraged. Must be taken for a minimum of 5 credits. Prerequisite: INFO 340; INFO 341; INFO 380; INFO 440.

INFO 491 Research in Informatics (4-8, max. 8)
Provides hands-on experience conducting a research project related to information behavior and technology. This project may be
carried out in a natural setting or in the laboratory by preparing students to carry out similar research projects in their professional work. Prerequisite: INFO 310; INFO 380; INFO 440; INFO 470.

INFO 495 Internship in Informatics (1-5, max. 12)
Internship in the private or public sector, as approved by faculty member. Work jointly supervised by faculty member (or approved academic sponsor) and an on-site work supervisor.

INFO 498 Special Topics in Informatics (1-5, max. 15)
Various topics in informatics. Offered by visitors or resident faculty. Topics vary.

INFO 499 Independent Study (1-5, max. 15)
Readings, design projects, or research under faculty supervision.

Course Descriptions

IMT 500 The Information Management Framework (1)
Overview of the major concepts in the MSIM curriculum. Includes an introduction to the concept of information as well as its relation to organizational management, technology, and design and culture.

IMT 501 Management Foundations for Information Professionals (1-5, max. 5)
Introduction to selected topics in information management including organizational theory, learning, change, planning, organizing, leading, and controlling. Covers communication skill building topics as well, including presentation, written communication, and collaboration.

IMT 502 Technology Foundations for Information Professionals (1-5, max. 5)
Introduction to selected topics in information technology including computer architecture, computer network communication, discrete mathematics, algorithms and data structures, imperative programming, markup languages, and end-user programming tools.

IMT 510 Human Aspects of Information Systems (4)
Social, organizational, cognitive, behavioral and contextual aspects of information, including basic concepts in human information behavior, conceptual and practical frameworks used to study human-information interaction, and social responses to information technology. User-based and work-based evaluation and design of information systems. Exposure to experimental and interview methodologies.

IMT 520 Information Services and Resources (4)
Concepts, processes, and skills of information involving creation, production, distribution, selection, collection, and services to facilitate access. Analysis of the information mediation process, including determining information needs; searching for, evaluation and presentation of appropriate results; and modalities for delivery of services.

IMT 530 Organization of Information Resources (4)
Introduction to issues in organization of information and information objects including analysis of intellectual and physical characteristics of information objects; use of metadata and metadata standards for information systems; theory of classification, including semantic relationships and facet analysis; creation of controlled vocabularies; and display and arrangement.

IMT 540 Design methods for Interaction and Systems (4)
Introduction to the theory and practice of user-centered design. Examines design methods for identifying and describing user needs, specifying and prototyping new systems, and evaluating the usability of systems. Examines design methodologies such as contextual design and value-sensitive design, giving specific emphasis to human-information interaction. Prerequisite: permission of instructor.

IMT 541 Principles of Database and Semi-Structured Data Systems (5)
Introduction of database management systems for the storage and access of structured and semi-structured information. Examines the relational model, Structured Query Language (SQL), Entity-Relationship modeling, database design methodology, conceptual, logical, and physical design, and Extensible Markup Language (XML) for storage, retrieval, and interchange. Prerequisite: IMT 540.

IMT 542 Principles of Information Retrieval Systems (3)
Introduction to information systems for the storage and retrieval of unstructured information. Examines information retrieval architectures, processes, retrieval models, query languages, and methods of system evaluation. Gives emphasis to Internet-based services for storing and accessing information to be used in integrated application development. Prerequisite: IMT 541.

IMT 546 Data Communications and Networking (4)
Local and wide area computer networking including network topologies and hardware, packet switching, client/server architectures, network protocols, and network servers and applications. Addresses server operating systems, management, security, authentication, and policy issues associated with distributed networks. Prerequisite: IMT 510.

IMT 548 Information System Design (5)
Theoretical and practical examination of information systems analysis and design processes as they apply in the workplace. Explores techniques for assessing the need for technology, defining specifications, and involving users in the design process. Design methods include social impact statements, future scenarios, mock-ups, rapid prototyping, and field-testing. Prerequisite: IMT 540.

IMT 550 Policy, Law, and Ethics in Information Management (3)
Select concepts, processes, and issues related to the organizational contexts within which information professionals practice. Topics include information as public/private good, intellectual property, privacy, confidentiality, information liability, and information policy. Focus on contemporary issues affecting the role of the information manager.

IMT 580 Management of Information Systems (4)
Survey of leadership competencies in business information, social process, human factors, and Information Technology (IT) contexts. Examines manager and director level leadership activities in conveying the relevance of IT, managing critical relationships, and implementing IT-based solutions, in an effort to ensure information resource initiatives are aligned with organizational objectives.

IMT 581 Information and the Management of Change (3)
Practical application of the critical roles and aspects of information and information processes in the management of organizational change. Topics include organization learning, knowledge management as a process, business process change, change project management, business/competitive intelligence, benchmarking, and best practices. Prerequisite: IMT 580.

IMT 582 Strategic Information Initiatives (4)
Studies and applies strategic information initiatives within an organization, including: readiness assessment; organizational mandates, information inventories, content management, information audits, and information architecture initiatives. Focuses on building business cases for and leading information initiatives in organizations. Prerequisite: IMT 581.

IMT 583 Finance and Accounting Foundations for Information Professionals (3)
Introduction to financial accounting, including the principles of double-entry accounting, balance sheets, income, and cash flow statements. Covers key financial ratios and their use for various analytical purposes, along with the elements of a financial plan or budget. Prerequisite: IMT 510; IMT 580.

**IMT 584 Marketing Foundations for Information Professionals (3)**
Introduction to the principles of marketing. Looks at how to assess an environment from a marketing perspective, consumer and business behavior, market segmentation, product/service strategies, new product development processes, pricing, channels, retail/wholesale, marketing communication, and direct selling. Prerequisite: IMT 510; IMT 580.

**IMT 585 Human Resource Management Foundations for Information Professionals (3)**
Introduction to human resource management for information professionals. Covers the principles of job analysis, employee selection, interviewing, training, and appraisal. Prerequisite: IMT 510; IMT 580.

**IMT 586 Information Dynamics I (4)**
Introduction to the concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft” operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics).

**IMT 587 Information Dynamics II (4)**
Advanced concepts and methods of information feedback, systems thinking, soft systems methodology (SSM), and “soft” operations research,” as well as the quantitative modeling of complex dynamic systems by means of differential and integral equations (system dynamics), including model building, testing, and validating. Prerequisite: IMT 586.

**IMT 589 Special Topics in Information Management (1-4, max. 12)**
Special study and research in topics of current concern to faculty and students.

**IMT 590 Fieldwork in Information Management (1-4, max. 12)**
Supervised fieldwork. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program.

**IMT 595 Stakeholders, Information, and Technology (3-5, max. 5)**
Capstone experience. Addresses system integration and the increasing demand to apply a broad range of technologies to the information needs of diverse user groups during the implementation of comprehensive information systems across an organization. Encourages student-organized individual/team projects. Prerequisite: completion of IMT core courses 510 through 592.

**IMT 598 Emerging Trends in Information Management and Technology (3)**
Focus on emerging trends in information management and information technology. Attention given to their impact on the functions of the chief information officer and others managing the acquisition, retention, use and disposition of information and the enabling technologies. Exploration of methods and resources for trend discovery and tracking. Prerequisite: IMT 510.

**IMT 600 Independent Study or Research in Information Management (1-4, max. 12)**
Supervised independent study or research. May be taken in as many as six consecutive quarters. Prerequisite: enrollment in the MSIM program.

---

**Information Science**

**Course Descriptions**

**INSC 500 Faculty Seminar (2)**
Presentations by faculty concerning research projects in which they are involved.

**INSC 501 Theoretical Foundations for Information Science (3)**
In-depth exploration of the philosophical, theoretical, methodological, and historical foundation of information science and the study of information.

**INSC 510 Theoretical Foundations of Human Information Behavior (4)**
Study of constructs, concepts, models, and theories information scientists use in studying human information behavior. Sociocognitive aspects of individuals needing, seeking, giving, and using information. Models of information behavior, conceptual frameworks, assumptions, analytical tools, and the factors that differentiate groupings of information users and predict or influence information behavior.

**INSC 530 Knowledge Representation (2/4)**
In-depth survey of the various approaches to knowledge representations in areas such as taxonomy, library classification, anthropology, cognitive psychology, linguistics, and artificial intelligence.

**INSC 540 User-Centered Information System Design (4)**
Seminar in theories and methods for user-centered and system-centered approaches to information system design. Research and issues in the design process, development, and evaluation of information systems. Technical context typically includes one or more of the following: information retrieval, human-computer interaction, or computer-supported cooperative work. Prerequisite: permission of instructor.

**INSC 550 Information Policy (4)**
Doctoral seminar in the foundations of information policy including intellectual freedom/public/private good, intellectual property, privacy, and digital convergence, and the reshaping of information practices and information industries. Prerequisite: Permission of instructor.

**INSC 565 Teaching Practicum I (3)**
Doctoral student participation in teaching in a faculty-taught course. Credit/no credit only.

**INSC 566 Teaching Practicum II (3)**
Doctoral student takes primary teaching responsibility for a course under supervision of a faculty liaison. Credit/no credit only. Prerequisite: INSC 565.

**INSC 570 Research Design (4)**
Introduction to empirical research, basics of theory construction and research design, types of research, ethical issues, instruments and techniques for descriptive research, measures of association. Employs an integrated (qualitative and quantitative) and focused approach.

**INSC 571 Quantitative Methods in Information Science (5)**
Describes uses, characteristics, and theoretical bases of research methods and data analysis techniques used in quantitative research, emphasizing uses in information and library science. Topics include experimental design, descriptive and inferential statistics, the normal distribution, elementary probability, nonparametric statistics, and exploratory data analysis techniques. Prerequisite: INSC 570.

**INSC 572 Qualitative Methods in Information Science (5)**
Principles and approaches to conducting qualitative research in information science, including how to design a qualitative study, role of context, methods of data collection and analysis, increasing the trustworthiness of data, minimizing observer effect, how to incorporate and build theory. Exposure to field research and data analysis. Prerequisite: INSC 570.

INSC 575 Research Practicum I (3)
Students work with a researcher from the Information School as an active member of a research team. Credit/no credit only.

INSC 576 Research Practicum II (3)
Students will work with an approved researcher as an active member of a research team. Credit/no credit only. Prerequisite: INSC 575 or permission of instructor.

INSC 598 Special Topics in Information Science (3, max. 12)

INSC 599 Independent Study in Information Science (1-5, max. 15)
Readings, design projects, or research under faculty supervision. Prerequisite: permission of instructor and Ph.D. program chair.

INSC 600 Independent Study or Research (*)
Credit/no credit only.

INSC 800 Doctoral Dissertation (*)
Credit/no credit only.

Library and Information Science

Course Descriptions
LIS 462 Skills Approach to Information, Communications, and Technology (ICT) Literacy (3)
Introduction to the Big6 TM Skills approach to information, communications, and technology (ICT) literacy for personal, school, district, or higher education settings. Includes technology within the Big6 framework, connection to standards, instructional design, assessment, curriculum mapping, peer collaboration, the parent connection, program planning, and implementation

LIS 498 Special Topics (1-5, max. 15)
Library service and information science subject matter in seminars, workshops, or other appropriate formats. Topics vary and may be repeated for credit.

LIS 500 The Life Cycle of Information (2)
Overview of the major concepts, processes and systems, actors, and operations in the life cycle of information. Introduction to the creation, publishing and distribution, evaluation and selection, organization, access, retrieval, and use of information. Exploration of the social context in which these processes and their stakeholders interact. Credit/no credit only.

LIS 505 Archival and Manuscript Services (3)
Selection, organization, and uses of archival and manuscript collections. Emphasis on the principles and techniques; some attention to the administration of state archival and historical institutions’ collections. Lecture, demonstration, and laboratory.

LIS 507 Preservation and Conservation of Library Materials (3)
Consideration of the many factors contributing to the physical vulnerability of library materials of all kinds and an overview of resources and strategies for those who determine preservation policy or manage the application of such policy. No technical background necessary.

LIS 508 History of Recorded Information (4)
Exploration of the history and ongoing transformation of recorded information within three broad spheres of human life: public communication, administrative and commercial operation, and personal communication.

LIS 510 Information Behavior (4)
Introduction to the user-centered approach to information behavior. Theoretical foundations of various information behaviors such as information need, utilizing, gathering, seeking, and evaluating. Synthesis of user studies, construction of user profiles, performance of gap analysis, and application of the results of user studies to improve services and system design. Prerequisite: LIS 500.

LIS 511 Systems Analysis (4)
Introduction to the systems approach including basic concepts in the approach, dimensions of systems and steps in systems design. Emphasis is on the analysis, evaluation and design of information systems and services. Prerequisite: LIS 500.

LIS 512 Community Analysis (4)
Key concepts of community in its broadest sense, methodological approaches for analyzing information needs and available resources, how to design information services in response to identified needs, and service evaluation. Facilitating the information behavior of all groups within a community and identifying how their needs interconnect. Prerequisite: LIS 510.

LIS 515 Ecological Information Systems (4)
Introduction to cognitive work analysis framework. Prepares for active role in design and evaluation of information systems. Familiarization with basic concepts of cognitive systems engineering and practice in field study, data analysis, and transforming field findings into requirements for the design of an information system. Prerequisite: LIS 510.

LIS 519 Special Topics in Information Behavior (1-4, max. 18)
Introduction to innovative and specialized topics in information behavior. Course may be offered irregularly and may be repeated for credit. Prerequisite: LIS 510; others as determined by the specific topics covered.

LIS 520 Information Resources, Services, and Collections (4)
Concepts, processes, and skills related to parts of the life cycle of knowledge involving creation, production, distribution, selection, collection, and services to facilitate access. Specific discussion topics include characteristics of recorded knowledge; organizations and services devoted to managing access to recorded knowledge; principles associated with development of recorded knowledge and collections. Prerequisite: LIS 500.

LIS 521 Principles of Information Services (4)
Analysis of the information mediation process, including determination and analysis of information needs; searching for, evaluation, and presentation of appropriate results; modalities for delivery of services; and current and future techniques. Prerequisite: LIS 520.

LIS 522 Collection Development (3)
Access to materials as context for development and management of library collections in academic, public, school libraries. Community analysis, library mission; collection development policies, criteria, levels, responsibilities; aids to selection; collection evaluation, use studies; controversial materials.

LIS 523 Advanced Information Services (4)
Investigation of the development, administration, and evaluation of information services for supporting the research process both within and across organizations. Prerequisite: LIS 521 or permission of instructor.

LIS 526 Government Publications (3)
Introduction to government publications of the United States and

596
their acquisition, organization, and use. Other topics covered include
the public’s right to know, the Federal Depository Library Program,
government influences in our daily lives, and future directions in
government information. Credit/no credit only.

LIS 527 Business Information Resources (3)
Survey of the extent and nature of business information and its
sources, and of business information producers and consumers. Study
and use of both print and on-line sources.

LIS 528 Health Sciences Information Needs, Resources, and
Environment (3)
Characteristics of users of health sciences information; health
professionals, researchers, consumers and patients; environments
(academic health sciences centers, hospitals, clinics, and public
libraries); evaluation of information resources in health care; types
and uses of health information management systems; policy issues,
professional standards, education, and certification. Offered: jointly
with MEDED 570.

LIS 529 Special Topics in Information Resources, Services
and Collections (1-5, max. 18)
Introduction to innovation and specialized topics in information
resources, services and collections. Prerequisite: LIS 500, LIS 520;
others as determined by the specific topic covered.

LIS 530 Organization of Information and Resources (4)
Introduction to issues in organization of information and documents
including: analysis of intellectual and physical characteristics of
documents; principles and practice in surrogate creation, including
standards and selection of metadata elements; theory of classifica-
tion, including semantic relationships and facet analysis; creation of
controlled vocabularies; and display and arrangement. Prerequisite:
LIS 500, which may be taken concurrently.

LIS 531 Catalogs, Cataloging, and Classification (4)
Develops an understanding of library catalogs as information
retrieval systems. Introduces library cataloging and classification.
Focus on principles and standards in the creation of catalogs and
cataloging records. Includes practice in descriptive and subject
cataloging and classification. User perspective emphasized
throughout. Prerequisite: LIS 500, LIS 530.

LIS 533 Advanced Cataloging and Classification (4)
In-depth theory and practice in library cataloging and classification.
Includes introduction to cataloging materials in a variety of formats.
Prerequisite: LIS 500, LIS 530, and LIS 531.

LIS 535 Classification Theory (3)
Survey of classificatory principles from bibliographic, philosophical,
socio-cognitive, and linguistic perspectives. Overview of history of
bibliographic classification and exploration of some existing
bibliographic classification systems. Ramification of theoretical
approach for classification practice. Prerequisite: LIS 530.

LIS 536 Indexing and Abstracting (3)
Exploration of issues in subject representation. Survey of different
approaches, techniques, and methods for representing the subject
matter of documents, including an evaluation of the role of users
and context in subject representation. Formulation of policies for
indexing and abstracting services. Prerequisite: LIS 530.

LIS 537 Construction of Indexing Languages (4)
Exploration of the design, construction, evaluation, and mainte-
nance of controlled indexing languages, including studies of how
users are integrated into the design process. Through completion of
thesaurus construction project, prepares students to design index
languages, plan and implement a design project, and evaluate
indexing languages. Credit/no credit only. Prerequisite: LIS 530.

LIS 539 Special Topics in Organization of Information and
Resources (1-4, max. 18)
Introduction to innovative and specialized topics in the organiza-
tion of information and resources. Prerequisite: LIS 500, LIS 530;
others as determined by the specific topic covered.

LIS 540 Information Systems, Architectures and Retrieval
(5)
Introduction and overview of information systems, system
architectures, and retrieval models. Emphasis given to the role of
users in the design, development, and evaluation of information
retrieval and database management systems. Prerequisite: LIS 500,
which may be taken concurrently.

LIS 541 Internet Technologies and Applications (3)
Overview of Internet technologies including networking hardware,
the TCP/IP protocol suite, addressing, packets and routing, the
client/server model. End-user applications for communication and
collaboration such as telnet, FTP, email, conferencing, and
streaming media. Web site creation, development, and management.
Credit/no credit only.

LIS 542 Conceptual Database Design (5)
Introduction to relational database theory and technology from an
information science perspective. Focuses on traditional transac-
tional database theory, architecture and implementation in a user-
centered systems context. Introduces set and graph theory,
relational algebra, and data warehouses. Credit/no credit only.
Prerequisite: LIS 511 or LIS 540.

LIS 543 Design of Information Systems (3)
Discusses how theories of conceptual data modeling affect design of
database and information systems, examines relationships between
modeling and implementation, and bridges gaps between theoretical
understanding of database design and implementation issues.
Implements conceptual schemata development in 542.

LIS 544 Information Retrieval System (3)
Covers theories and models in information retrieval (IR) and
reviews user-centered and system-centered approaches. Issues
involved in the design, development and evaluation of IR systems
are examined including: methods and tools for document analysis,
retrieval techniques, search engines, interfaces, usability, evaluation.

LIS 545 Programming for Information Systems (5)
Introduction to structured object-oriented programming for
information systems. Focus on fundamental principles of program-
ming with attention to elementary algorithms and data structures,
interface design, user testing, and knowledge representation.
Prerequisite: LIS 540 or permission of instructor.

LIS 546 Network System Administration (4)
Introduction to local area network hardware, topologies, operating
systems, and applications. Covers aspects of network setup and
management including network and application protocols, system
configuration, security and Internet connectivity. Hands-on
experience with network applications and operating systems.
Prerequisite: LIS 500.

LIS 549 Special Topics in Information Systems, Architec-
tures, and Retrieval (1-4, max. 18)
Introduction to innovative and specialized topics in information
systems, architectures, and retrieval. Prerequisite: LIS 540, plus
others as determined by topic.

LIS 550 Information in Social Context (4)
Concepts, processes, and issues related to the larger social context
within which the life cycle of knowledge is played out. Discussion
topics include intellectual freedom, information as public/private
good, intellectual property, privacy, confidentiality, information
liability, information and telecommunications policy, the economics
of information, and other professional values. Prerequisite: LIS 500, which may be taken concurrently.

LIS 551 Intellectual Freedom in Libraries (3)
Analysis of issues related to intellectual freedom, particularly to implications for libraries and librarians. Consideration of current legal climate, conformity versus freedom in modern world, librarian as censor, social responsibility and individual freedom, intellectual freedom of children, prospects for future. Credit/no credit only.

LIS 554 Information Policy: Domestic and Global (5)
National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries; digital convergence and the emerging mega-industries. Prerequisite: LIS 550 or permission of instructor.

LIS 558 Reading Seminar in Social Aspects of Information Systems (2)
Addresses foundational issues in social aspects of information systems. Introduces students to the intellectual traditions that underlie fields such as computer ethics, social informatics, and value sensitive design. Format entails in-depth discussions based on careful reading of primary source texts selected by seminar participants. Prerequisite: permission of instructor.

LIS 559 Special Topics in the Social Context of Information (1-4, max. 18)
Introduction to innovative and specialized topics in the social context of information. Course may be offered irregularly and may be repeated for credit. Prerequisite: LIS 550 and others as determined by the specific topic covered.

LIS 560 Instructional and Training Strategies for Information Professionals (3)
Develops knowledge and skills in instruction and training functions for library and information settings. Issues and strategies for learning and teaching. Design, development, and evaluation of information and technology literacy programs. Addresses the needs of users when designing and delivering instruction. Prerequisite: LIS 500, which may be taken concurrently.

LIS 561 Storytelling: Art and Techniques (3)
Storytelling, past and present, noting its development as an art form. Analyzing storytellers materials (folk literature and literary forms) throughout historical periods. Essential techniques necessary to this artistic skill. Planning storytelling programs for various ages, interest groups, and situations, utilizing folk, classic, and contemporary literature.

LIS 565 Children’s Materials: Evaluation and Use (4)
Library materials for children from infancy through elementary grades. Focus on resources in all media that serve informational, educational, cultural, and recreational needs of the young. Focuses on standard bibliographies and other resources designed to meet informational needs of adults serving children. Prerequisite: LIS 500, LIS 510, LIS 520, or permission of instructor.

LIS 566 Young Adult Materials: Evaluation and Use (4)
An overview of materials reflecting adolescents’ interest in media and addressing their educational, cultural, and recreational needs. Students evaluate print literature, electronic ad other non-print media for young adults. Content also designed to assist adult caregivers of adolescents. Prerequisite: LIS 500, LIS 510, and LIS 520 or permission of instructor.

LIS 567 Public Library Services for Youth (3)
Administration of youth departments in public libraries; planning and promoting programs and services; evaluation of library collections; community and professional roles of the youth librarian. Prerequisite: LIS 500 or permission of instructor.

LIS 568 Information Literacy for Teaching and Learning (5)
Theories, process, and practical applications of information literacy. Development of information literacy programs for libraries, community agencies, business, education or other information settings. Intrinsic themes include the integral relationship between technology and information literacy, and continual evaluation.

LIS 569 Special Topics in Instructional and Training Strategies for Information Professionals (1-5, max. 18)
Introduction to innovative and specialized topics in instructional and training strategies for information professionals. Prerequisite: LIS 560 and others as determined by the specific topic covered.

LIS 570 Research Methods (4)
Research as a process from problem definition and formulation of questions to design, data collection, analysis, and reporting. Students recognize research opportunities, translate them into researchable frameworks, design research projects, and implement results in libraries and other information agencies. Prerequisite: LIS 500, which may be taken concurrently.

LIS 579 Special Topics in Research Methods (1-4, max. 18)
Introduction to innovative and specialized topics in research methods. Prerequisite: LIS 500, LIS 570; others as determined by specific topic covered.

LIS 580 Management for Information Organizations (4)
Introduction to internal and external management issues and practices in information organizations. Internal issues include organizational behavior, organizational theory, personnel, budgeting, planning. External issues include organizational environments, politics, marketing, strategic planning, funding sources. Prerequisite: LIS 500, which may be taken concurrently.

LIS 581 Marketing and Planning for Libraries (3)
Approaches to planning and marketing library products/services. Examines partnerships that can be forged between elements of marketing and appropriate futures strategies for libraries. Discusses marketing and planning as integrated processes with attention to short- and long-term goals and objectives. No particular library institutional setting is assumed. Prerequisite: LIS 500, which may be taken concurrently.

LIS 582 Strategic Planning and Management of Information Technology (3)
Exploration of methods of strategic planning for managing information resources and technology to support online information services and the role of the systems librarian and CIO. Topics include mission and goals, strategic planning, the information technology function within organizations, and the desirable abilities of managers and leaders. Prerequisite: LIS 580.

LIS 583 Staffing Information and Information Technology Positions (3)
Staffing and human resources related to information organizations and the information technology unit. Examination of demand for and supply of information and information technology workers, recruitment, training, and retention. Prerequisite: LIS 580.

LIS 584 Knowledge Management (3)
Introduction to contemporary topics in management of knowledge creation and use in organizations. Discussion topics include knowledge generation, knowledge taxonomy, knowledge transfer, organizational knowledge management practice, and knowledge management systems. Prerequisite: LIS 500; LIS 580, or permission of instructor.

LIS 585 Administration of the School Library Media Program (3)
Develops competency in administering materials, equipment, and services of library media program as integral part of educational process of school. Focuses on developing skills in acquiring, organizing, and managing full range of learning resources for access and use, and communicating the program to users. Required for school library media specialists. Prerequisite: LIS 580.

LIS 586 Public Libraries and Advocacy (3)
Examines the purpose and role of public libraries in an information society. Includes governance, services, and planning with special emphasis on advocacy for the library and community.

LIS 587 Library Technology Systems (4)
Developing criteria for selection and design of information technology systems for libraries and information centers. Applying criteria in evaluation of hardware and software. Examining related management challenges, such as vendor relations, financing options, personnel requirements, and design of auxiliary activities. Prerequisite: LIS 540, LIS 580, or permission of instructor.

LIS 588 Special Librarianship (3)
Seminar in the practice of special librarianship in business and industrial firms, government agencies, and the free-lance sector. User services and information resources. Credit/no credit only. Prerequisite: LIS 580.

LIS 589 Special Topics in Management of Information Organization (1-4, max. 18)
LIS 590 Directed Fieldwork (2-4, max. 8)
Minimum of 100 hours, maximum of 200 hours of professional, supervised fieldwork in a library or professional information setting. Fieldwork is a one-quarter experience; however, this may be repeated in a different setting with a different set of learning objectives for a subsequent quarter. Library and Information Science majors only. Credit/no credit only. Prerequisite: 30 credits in Library and Information Science program.

LIS 591 Legal Research I (3)

LIS 592 Legal Research II (3/4)
Legal tools that answer more complex legal research problems, such as federal legislative histories, sources of administrative law, specialized subject research. Federal emphasis. Builds on skills and techniques taught in LIS 591/LAW A 598. Extensive work with online resources. Prerequisite: LIS 591 or permission of instructor. Offered: jointly with LAW A 599.

LIS 593 Selection and Processing of Law Library Materials (3)
Study of tools for collection development and collection development plans in law libraries. All law library technical processes, including acquisitions, budgeting, cataloging, and serials. Prerequisite: LIS 591 or permission of instructor.

LIS 594 Law Library Administration (4)
Administration in law libraries, including organization, personnel, and management issues (e.g., interviewing, hiring, firing), communications, library planning, and bookkeeping. Credit/no credit only. Prerequisite: LIS 591 or permission of instructor.

LIS 595 Current Issues in Law Librarianship (3-, max. 3)
From a list of current topics in law librarianship, students select a topic, research it fully, write a major paper, and present their paper. Topics may include citation reform, ethics, and publisher practices. Credit/no credit only. Prerequisite: Law Librarianship majors or permission of instructor.

LIS 598 Special Topics in Information and Library Science (1-6, max. 18)
Seminar dealing with various topics in information and library science. Offered by visitors or resident faculty. Topics are changed from quarter to quarter. May not be offered every quarter. Prerequisite: determined by specific course.

LIS 600 Independent Study or Research (*)
Credit/no credit only.

LIS 700 Master's Thesis (*)
Credit/no credit only.

Interdisciplinary Graduate Degree Programs

These programs are administered by interdisciplinary groups of the Graduate School. Certain courses carrying the particular program prefix appear below; other courses with the same prefix appear elsewhere as indicated. Other courses included in these programs are selected from many disciplines throughout the University and carry the prefix of the respective discipline.

Biomolecular Structure and Design

Course Descriptions

BMSD 520 Research Seminar (0.5, max. 9)
Group conferences on graduate student research. Prerequisite: BMSD graduate student or permission of instructor. Offered: AWSp.

BMSD 540 Literature Review (2)
Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Concurrent registration in BIOC 530 required. Prerequisite: first-year BMSD student or permission of instructor. Offered: A.

BMSD 541 Literature Review in Biomolecular Structure and Design (2)
Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: W.

BMSD 542 Literature Review in Biomolecular Structure and Design (2)
Emphasizes critical evaluation of original articles in literature from all fields relevant to Biomolecular Structure and Design. Scientific writing and oral presentations emphasized. Prerequisite: first-year BMSD student or permission of instructor. Offered: Sp.

BMSD 599 Introduction to Research in Biomolecular Structure and Design (3-6, max. 24)
Student works with one of the research groups within the Biomolecular Structure and Design Program for one quarter and then rotates to another laboratory for one additional quarter. Minimum two quarters, maximum four. Prerequisite: BMSD student or permission of instructor. Offered: AWSp.

Biology Teaching

Graduate Program Coordinator
222 Hitchcock, Box 355320
206-543-1689

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Science in biology for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. The program emphasizes
broadening the student’s understanding of the various fields of biological science, with the improvement of the student’s effectiveness as a teacher as the primary goal. Opportunities for course work within the departments of the University in biological science and science education are provided. Each student is asked to perform an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments of the University.

Special Requirements
Prospective candidates for the degree should have an initial or continuing certificate for teaching biology at the secondary level, or be able to demonstrate professional commitment in the area of biology education. Assistantships and fellowships are generally not provided under the aegis of this program.

Environmental Management
274 Mary Gates Hall

The graduate certificate in environmental management (EM) is an interdisciplinary program designed to prepare students to contribute to sustainable utilization and enhancement of the natural and human environment. Through coursework, seminars, and a capstone consulting project, students acquire the tools to solve real-world environmental problems via the three avenues of science, policy, and business. The program provides an excellent education and training opportunity for a diverse array of graduate students preparing for careers in the broad field of environmental affairs. Key benefits of the program are:

- Students participate in a community of faculty and students from a multitude of departments who share the common goal of environmental stewardship and sustainability.
- Students explore environmental problems, and develop solutions, in a multidisciplinary environment, incorporating a wide range of perspectives and priorities.
- Students receive a printed certificate and record in their transcript from the Graduate School to document completion of the interdisciplinary program in Environmental Management.

The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public health, and political science, to name a few.

There is no other such interdisciplinary educational experience available to graduate students at the University of Washington at this time.

Eligibility
All students enrolled in graduate and professional degree programs in any school of the University of Washington are eligible to apply. Prior to admission, students must have completed a one-quarter upper-level or graduate-level course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); and social or natural science.

Facility with written argument and communication is a prerequisite. This requirement is demonstrated in the letter of application.

Steering Committee
The program is governed by the Steering Committee for Environmental Management.

Graduate Program
Graduate Program Coordinator
274 Mary Gates Hall
Box 352802
206-221-6129
envirmgt@u.washington.edu

The certificate’s courses and projects have been chosen to prepare students to contribute legal, scientific, social science, and technical expertise to environmental decision making at the local, national, and international scales. Students are required to broaden their knowledge and skills base beyond their home discipline; to read material from other fields with critical facility; to understand and appreciate the goals and analysis methods common to other fields; and, perhaps most importantly, to appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

Program Requirements: Three core courses (10-12 credits); a capstone consulting project; a one-quarter seminar series (1 or 2 credits); and 6 credits of electives. Award of the certificate is contingent on completion of the student’s graduate degree. Further details on these requirements can be found by visiting the Environmental Management homepage.

Global Trade, Transportation, and Logistics Studies
313 Loew

The aim of the graduate certificate program in Global Trade, Transportation, and Logistics (GTTL) is to enable graduate students to augment their degree programs in preparation for careers that demand the combined knowledge of trade, transportation, and logistics. Particular attention is directed to the study of activities involved in the flow of goods from point of origin to point of consumption on a global scale. The wide range of issues addressed include the management of the intermodal connections among maritime, aviation, and overland modes of transport; environmental and energy concerns; advancements in telecommunications; and the legal, regulatory, and technological infrastructures that facilitate global commerce and transportation.

The GTTL graduate certificate program is responsive to the needs of government and industry for trained university graduates. The program is overseen by the Interdisciplinary Committee on Global Trade, Transportation, and Logistics. Members come from the University and the private and public sectors. GTTL works with leaders in business and government organizations to develop internships and jobs, in addition to offering a number of scholarship opportunities for graduate students. The GTTL certificate is based on a set of course requirements to be fulfilled in conjunction with the student’s existing graduate degree program.

Interdisciplinary Committee
The Interdisciplinary Committee periodically reviews the content of the core courses, recommends instructors, maintains the list of eligible electives, and coordinates with course instructors regarding scheduling and prerequisites. The committee is assisted in these tasks by the lead core-course instructor, the program director, the program assistant director, and the Graduate School staff, as appropriate. The committee also oversees the policy on admission to the graduate certificate program.

Graduate Program
Graduate Program Coordinator
313 Loew, Box 352193
206-616-5778
gttl@u.washington.edu

Students associated with GTTL receive the Graduate Certificate
upon completing the program’s requirements and obtain their degrees through cooperating academic units. Students admitted into graduate degree programs in the following units are eligible for the GTTL graduate certificate: Aeronautics and Astronautics, Business Administration, Civil and Environmental Engineering, Communications, Economics, Education, Forest Resources, Geography, International Studies, Law, Marine Affairs, Political Science, Public Affairs, Technical Communication, and Urban Design and Planning. Graduate students from other departments may be admitted on an ad hoc basis. GTTL prepares students for careers in international trade, transportation, and logistics by offering a comprehensive program encompassing selected courses from the aforementioned separate disciplines. Those students completing the graduate certificate receive an appropriate notation on their transcript and a Letter of Achievement, signed by the head of the student's academic unit and the Dean of the Graduate School.

Certificate Requirements
The requirements consist of a minimum of 20 credits: two core courses (8 credits) and four elective courses (at least 12 credits). The core courses — GTTL 501 and 502 — provide a basic overview of the academic theories, political-economic structures, industrial dynamics, public policies, and strategic issues concerning the study, business, and regulation of global trade, transportation, and logistics. Students select electives from a continually updated list. Most electives (and core courses) may also satisfy a student’s home department requirements. At least one elective must come from outside the home department to reinforce the interdisciplinary objective of the certificate program. A substitution policy developed by the committee assures that an appropriate mix of electives can be found for each student. GTTL 600 (Independent Study) and GTTL 601 (Internship) provide an alternative means to gain elective credits.

Course Descriptions

GTTL 501 Global Logistics Management (4)
Provides an overview of the concepts and substance of trade, transportation, and logistics. Deals with management of physical, documentation, and information flows within supply chains, including purchasing, distribution, intermodal transportation, ERP, ecommerce and e-fulfillment, financial transactions, and regulations. Prerequisite: permission of instructor. Offered: jointly with OPMGT 535; AW.

GTTL 502 Seminar in Global Trade, Transportation, and Logistics (4)
Interdisciplinary seminar that brings together students with academics and practitioners at the forefront of trade, transportation, and logistics in discussions of selected topics. Additionally, students research issues of special interest. Prerequisite: OPMGT 535, GTTL 501, or permission of instructor. Offered: jointly with OPMGT 536; Sp.

GTTL 599 Special Topics in Global Trade, Transportation, and Logistics Studies (1-5, max. 15)
Selected topics with special emphasis on issues of pressing importance to the world trading community. Topics vary with departmental discretion. Prerequisite: Graduate students or permission of instructor.

GTTL 600 Independent GTTL Studies (*, max. 30)
Opportunity to pursue GTTL-related issues that may not be explored in established UW courses. May involve projects undertaken in conjunction with entities beyond the University, subject to instructor approval.

GTTL 601 Internship in GTTL Studies (3-5, max. 9)
Opportunity to pursue relevant research or to gain practice experience in the employment of a department-approved public or private entity.

Graduate School

Course Descriptions

GRDSCH 610 Teaching Mentorship (3, max. 6)
Individualized project, under the direction of a faculty member, focused on issues of teaching and learning at the college/university level and designed to enhance the student’s ability to make innovative contributions in teaching. Credit/no credit only. Prerequisite: permission of graduate program coordinator and the Associate Dean of the Graduate School.

GRDSCH 615 Teaching/Research Assistant Training (1-6, max. 6)
Department or University-wide training for teaching and research assistants. Credit/no credit only.

GRDSCH 616 Research Assistant Preparation (1-6, max. 6)
Department or University-wide training for research assistants. Credit/no credit only.

GRDSCH 620 Teaching Mentorship Seminar (2)
Interdisciplinary seminar. Individual mentorship projects are presented and discussed, as are more general topics related to the teaching mentorship experience. Credit/no credit only. Prerequisite: GRDSCH 610 which may be taken concurrently or permission of the Associate Dean of the Graduate School.

GRDSCH 630 Special Topics in College/University Teaching (2, max. 6)
Interdisciplinary discussion of a variety of topics related to college/university teaching with an emphasis on innovation in teaching. Topics of broad campus interest complement similar offerings in individual disciplines. Credit/no credit only.

Health Services Administration

Graduate Program Coordinator — In-Residence and Executive Programs
H660 Health Sciences, Box 357660
206-543-8778
mhap@u.washington.edu

The Health Services Administration Group offers two programs of study leading to the Master of Health Administration (M.H.A.) degree: an in-residence program and an executive program. The M.H.A. degree is fully accredited by the Accrediting Commission for Education in Health Services Administration. It provides the educational foundation for careers in management, planning, consulting and policy-making in ambulatory care organizations, hospitals, long-term care facilities, mental health care organizations, government agencies, planning agencies, and other organizational settings in the health field. The curriculum is designed to be interdisciplinary with a faculty drawn from the Graduate Schools of Public Health and Community Medicine, Business Administration, Public Affairs, Nursing, Medicine, and Law. Concentrations of study may vary according to the student’s academic interests and career objectives. In addition to academic work, in-residence M.H.A. students are strongly encouraged to participate in an internship experience in a health facility or agency typically under the preceptorship of the administrator or director of that organization. Concurrent degree programs combining health administration with business administration, medicine, nursing, or public administration are also offered. These curricula (with the exception of the M.H.A./M.D.) typically require three years of intensive academic study and culminate in joint degrees (M.H.A./M.B.A., M.H.A./M.D., M.H.A./M.N., M.H.A./M.P.A.).

The Executive Master of Health Administration program, launched in January 1998, is designed primarily for mid-career physicians and other clinical practitioners, as well as experienced health services
managers, who have demonstrated interest or competency in administration or management. It offers advanced curriculum in planning, organizing, and implementing programs that improve the cost-effectiveness and quality of patient care. Courses meet once each month for three-day sessions (typically Thursday through Saturday) for 24 months (October to September). This program structure allows practicing professionals to continue their careers while gaining a graduate degree.

Course listings may be found under the School of Public Health and Community Medicine, Department of Health Services section of this catalog.

Special Requirements

Applicants to the in-residence program must submit, in addition to Graduate School admission requirements, a narrative statement of objectives, a resume, three letters of recommendation, and scores from either the GRE or the GMAT. Informational interviews with members of the program faculty may be requested but are not part of the formal admission review process. Relevant health services experience is preferred. Applicants are accepted only for autumn quarter of each year. The application deadline is January 15. Applications received after this date (U.S. and Canadian only) will be considered on a space-available basis.

Applicants to the executive program must submit, in addition to Graduate School admission requirements, a narrative statement of objectives, a resume, three letters of recommendation, and either GRE or GMAT scores (excluding applicants with doctoral-level degrees from U.S.-accredited institutions). Priority of admission is given to applicants with medical/clinical training and professional experience. Applicants are accepted only for autumn quarter of each year. Applications are reviewed following the preferred deadline of April 30. Applications received after this date (U.S. and Canadian only) are reviewed on a space-available basis.

Applicants can expect to hear about the status of their application within four to six weeks of submission. Those interested in applying should contact the program office as soon as possible to inquire about availability and the application process.

Earlier application deadlines and additional documentation are required for international applicants.

Financial Aid

Financial support for current M.H.A. students may be available from several areas: loans, work study positions, internships, possible outside fellowships, and possible teaching or research assistantships outside the program. For more information on financial aid, contact the UW Office of Student Financial Aid (105 Schmitz Hall, Box 355880, 206-543-6101, osfa@u.washington.edu) or the M.H.A. program office.

Research Facilities

In addition to its University facilities, the program makes extensive use of community health facilities and agencies for research and training.

Individual PhD Program

Course Descriptions

IPHD 600 Independent Study (*)

IPHD 800 Independent Study (*)

Molecular and Cellular Biology

Graduate Program

Graduate Program Coordinator
T466 Health Sciences, Box 357275

206-543-0253
mcb@u.washington.edu

The Molecular and Cellular Biology Program (MCB) is a leader in applying the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The goal of the doctoral program is to broadly train students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.

Thirteen departments across three schools have faculty members actively pursuing research in molecular and cellular biology. The departments participating in the program include Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genome Sciences, Immunology, Microbiology, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics.

At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of Basic Sciences and Molecular Medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support for the research effort.

Faculty Interests

Over 160 faculty members from the UW and FHCRC are researching molecular and cellular biology and are skilled in the training of graduate students. Faculty research interests encompass both prokaryotic and eukaryotic cells in the following general areas: genetics, cell biology, neurobiology, immunology, virology, molecular structure, developmental biology, cancer biology, plant biology, genomics/proteomics, and microbiology.

Admission

The Molecular and Cellular Biology Program is a highly competitive interdisciplinary program which receives applications from outstanding students nationwide. MCB Program information and requirements are listed at its Web site. Applications are due January 2 each year and are available on-line via a link from the program homepage (depts.washington.edu/mcb/). Applications can also be requested by email (mcb@u.washington.edu) or by calling 206-543-0253. Applicants may apply both to the MCB Program and to any of the thirteen participating UW departments. Since application requirements or deadlines may differ, applicants should contact the participating departments for information.

In addition to the Graduate School application requirements, prospective students must submit an MCB Program application form, a personal statement of research interests and career goals, three letters of recommendation, and Graduate Record Examination scores with a subject test.

Financial Aid

The MCB Program provides a stipend plus tuition for the first year of study. At the end of the first year of study, students choose a doctoral committee, and subsequent years of support are provided by the department of the committee chair. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

Ph.D. Requirements

The program, which culminates in the Ph.D. degree, includes training in laboratory research, supervised teaching experience,
lectures and seminars on current research topics, rigorous course work in molecular and cellular biology, and graduate-level electives in the student’s area of interest. During the first year, students participate in research rotations in three laboratories. Lab rotations offer students an opportunity to learn basic research techniques and to become familiar with the various research areas in molecular and cellular biology of participating faculty members. First-year course work includes a three-quarter series of modular courses in molecular and cellular biology and a three-quarter literature review course. Selection from a large list of elective courses is based on the student’s background and interests. During the summer of the first year, students choose their permanent advisor and form their Doctoral Supervisory Committee. Students may also elect to participate in a summer biotechnology externship course during their first summer.

During the second year, students generally complete their supervised teaching experience and their elective course work. Autumn quarter of the third year, students take the General Examination. Formal course work is usually completed by this time, although students may take elective courses of interest. Students continue to participate in various department seminar courses and journal clubs. After completing their course work and General Exam during autumn quarter of the third year, students work full-time on the dissertation research project. The final requirements for the Ph.D. degree include a written dissertation and an oral dissertation defense. MCB Program students participate in a monthly seminar program which involves student and faculty presentations. The purpose of these seminars is to acquaint students with the research carried on in many laboratories involved in the program and to give students practical experience in making presentations before their peers. In addition, MCB Program students are invited to seminar programs in the participating departments and the Fred Hutchinson Cancer Research Center.

Course Descriptions

**MCB 511 Cell Cycle Control (3)** Breeden, Roberts, Edgar
Studies recent advances in understanding cell-cycle control, arising from genetics and biochemical studies of fission and budding yeasts., marine invertebrates, Drosophila, amphibians, and cultured cells. Addresses the biochemical processes and molecular interactions and the rate-limiting events in the cell cycle, and the coupling of those events to physiological signals. Offered: A.

**MCB 513 Development Journal Seminar (1, max. 12)** Moens, Soriano, Swalla
Examines current literature about specific topics in developmental biology. The seminar chooses current monthly topics and the group meets weekly to discuss published research papers. Topics may include: germ cell specification; cell migration and morphogenesis; axis formation; somitogenesis and stem cells. Offered: AWSp.

**MCB 514 Molecular and Cellular Biology Literature Review (2)** Roelink
Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program.

**MCB 515 Molecular and Cellular Biology Literature Review (2)** Stoddard
Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: W.

**MCB 516 Molecular and Cellular Biology Literature Review (2)** Stoddard
Emphasizes critical evaluation of the original literature orally and in writing. Open only to first-year students in the Molecular and Cellular Biology Program. Offered: S.

**MCB 517 Topics in Molecular and Cellular Biology (1-5, max. 12)**
Advanced in-depth coverage of specific areas of molecular and cellular biology of current interest. Lectures by University of Washington faculty and invited speakers involved in research in this area. A basic knowledge of principles of molecular and cellular biology assumed.

**MCB 519 Topics in Cancer (1, max. 6)**
Examination of ways to integrate basic, clinical, and public health sciences to increase understanding of human biology and disease. Seminars in introduction to cancer research as viewed by basic, clinical, and public health sciences, origins of cancer, cancer prevention, cancer progression, and therapies for cancer. Credit/no credit only.

**MCB 520 Tutorial in Molecular and Cellular Biology (1-2, max. 2)** Stoddard

**MCB 521 Embryos, Genes and Development (4)** Parkhurst, Priess, Soriano
Introduction to vertebrate and invertebrate development emphasizing cellular, genetic, and molecular mechanisms. Focuses on development of fruit flies, nematodes, and mice. Emphasizes embryological processes including induction, determination, pattern formation. Relationship between development and evolution. Technologies include transgenic animals, genetics, mosaic analysis, homologous recombination, somatic cell genetics, embryonic manipulations. Offered: W.

**MCB 532 Human Pathogenic Viruses (3)** Galloway, Linail
Replication, regulation, and pathogenesis of several groups of human viruses, including human immunodeficiency virus and papillomaviruses. Emphasis on the unique aspects of the viral-like cycles as they relate to effects on infected cells and organisms. Guest lecturers focus on viral immunology, measles. herpes simplex virus and HHV-8. Offered: W.

**MCB 542 Structural Molecular Biology (3)** Strong, Stoddard
Overview of structure/function studies and methods, and current results in key areas of molecular biology. Introduction to the methods of structural biology, with emphasis on how to read and assess a structural paper. Analysis and discussion of recently published studies of macromolecular structure/function relationships. Extensive, interactive computer modeling and graphics tutorials. Offered: A.

**MCB 550 Biotechnology Externship (2-12, max. 12)** Moon
Supervised research in a biotechnology company. Prerequisite: permission of instructor and doctoral candidacy. Offered: AWSpS.

**MCB 562 Cell Signaling and Oncogenesis (3)** Cooper, Tappcott

**MCB 580 Teaching Practicum in Molecular and Cellular Biology (3, max. 6)**
Supervised training in the teaching of molecular and cellular biology. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**MCB 599 Introduction to Research in Molecular and Cellular Biology (*, max. 20)**
The student rotates through one research laboratory involved in the Molecular and Cellular Biology Program per quarter. Open only to first-year students in the Molecular and Cellular Biology Program.
The Museology Program is designed to provide the generalized training, knowledge, and skills necessary to pursue a professional career in museum work. The program is directed toward the training of a broad range of museum professionals interested in curation and management of collections in anthropology, art, botany, geology, history, and zoology as well as in interpretive programs and museum administration.

Courses include required core museology subjects as well as a range of classes offering students the chance to specialize in interest areas. Course work is divided between the theoretical and practical aspects of museum operations. Classes take the form of lecture courses, seminars, special lectures by guest speakers, field trips, laboratory and collection management courses, practicums and internships. Since admission to the program is highly selective, classes are small and students have close contact with faculty.

Practical experience, an essential component of the program, is provided by several museological institutions at the University of Washington, including the Thomas Burke Memorial Washington State Museum, the Henry Art Gallery, the Herbarium, the Arboretum, the Fish Collection, and the University Libraries. The Burke Museum acts as the coordinating unit of the program. Located on the campus of the University of Washington, the Burke Museum is Washington state’s natural-history and anthropology museum, and is the oldest and largest natural-history museum in the Northwest. It has nationally and internationally ranked collections focusing on the anthropology, geology, and zoology of the Pacific region and Pacific Rim.

Program Requirements

The graduate program in museology is designed to take two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and 15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll for part-time study, but this is discouraged during the first year.

Requirements for successful completion of the Master of Arts degree include:

- Completion of a minimum of 36 quarter credits, including 27 course credits and 9 thesis or thesis-project credits, with at least 18 credits of course work numbered 500 or above, including a thesis or thesis project.
- A minimum of three quarters of full-time residence credit or part-time equivalent.
- Demonstration of reading competence in one foreign language, if required by the student’s supervisory committee due to the student’s area of specialization.
- Completion of an internship in an off-campus museum or related agency approved by the supervisory committee prior to submission of the student’s thesis or thesis project.
- Presentation of a thesis proposal by the beginning of the fourth quarter of study.

Successful completion of an oral examination, covering both the thesis topic and the field of museology in general, following submission of the thesis or thesis project. Completion of all degree requirements within six years.

The following courses are required of all students unless exempted by petition to the Program Coordinating Committee or credited for relevant course work completed at other universities: MUSEUM 480, 481 or 490 or 491, 482, 483, 498, 590, 591, 592, 593 or 594, 595, 600, 700 or 710. In addition, two or more courses are required in an academic discipline relevant to the area of specialization.

The Museology Program also offers a Graduate Certificate in Museum Studies as an option for graduate students in other degree programs at the University. To qualify, students must take a specified minimum set of four key courses in areas that emphasize either collection research and management, or museum administration and interpretation, and that include hands-on work experience. Information and application materials for the certificate can be obtained from the Museology Program office.

Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications completed and postmarked on or before this date will be reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

Course Descriptions

MUSEUM 480 Introduction to Museology (3) I&S

Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics. Offered: jointly with ANTH 480.

MUSEUM 481 Museum Collection Management: Ethnology (3) I&S

Lecture and work experience in museum collection management in the ethnology collections of the Burke Memorial Washington State Museum, including identification, cataloging, fumigation, storage, cleaning, inventory, and specimen preparation for exhibition of archival and nonarchival museum specimens from North America, the Pacific, and Pacific Rim areas. Offered: jointly with ANTH 481.

MUSEUM 482 Museum Conservation (3) I&S

Lecture and demonstrations in the recognition and treatment of museum conservation problems for specimens of all types. Application of basic principles to specific preventive and active conservation and restoration problems encountered by curatorial personnel. Offered: jointly with ANTH 482.

MUSEUM 483 Museum Operations Practicum (3, max. 9)

Provides students with the opportunity to apply their general museological training in one or more areas of supervised museum operation areas, e.g., registration, education, or exhibition through project-oriented work in the Burke Museum.

MUSEUM 488 Special Topics in Museology (3-5)

In-depth examination of selected current issues within the field of museology.

MUSEUM 490 Museum Curation Practicum (1-5, max. 15)

Application of museological training in curation of ethnographic, archeological, geological, or zoological collection materials in the Burke Museum. Supervised work ranges from fundamental collection documentation and research to preventive conservation, storage, and other special curation projects. Offered: jointly with ARCHY 490.

MUSEUM 491 Museum Curation Practicum: General Collections (1-5, max. 15)

The application of museological training in the curation of art,
courses offered in the Department of Near Eastern Languages and Graduate School faculty group. The program of studies includes sciences. The program is administered by an interdisciplinary comparative religion: Judaism, Christianity, and Islam; and Asian Turkic languages; Near Eastern linguistics; Islamic topics, Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.

Degree Requirements and Satisfactory Progress

Specific course work and areas of concentration will be determined by the student’s interests within the framework of the degree and satisfactory progress requirements listed below.

Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.

Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which must be in the Department of History. These courses are in addition to work the student may have done at the B.A. and M.A. level.

Within three years of admission, completion of a graduate seminar. Two graduate seminars are required if none was taken at the M.A. level.

A student will be expected to have studied three languages, two of which must be regional languages and one of which must be a “Western” European language other than English, such as French, German, Italian, Russian, or Spanish. The student’s Supervisory Committee will decide whether a fourth language will be required and whether the fourth required language will be European or regional.

Students pursuing language-related work may anticipate a fourth required language, whereas those pursuing social-science-related studies may not. Before the General Exam listed below may be taken, the student must complete the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.

Disciplinary Method and Theory Requirements. For all students conducting field work or working with documents, whether social science or humanities focused, and for all social science-oriented students, the following courses are strongly encouraged: (a) ANTH 550, Field Techniques of Anthropology, and (b) POL S 491, Political Research Design and Analysis; or (c) their equivalents in appropriate disciplines.

For those students doing both humanities-oriented research and not conducting field work, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy) are required.

Disciplinary Core Courses. Each student is required to take two disciplinary core courses in the appropriate fields. Core courses (or field courses) survey the literature, methods, and theoretical issues involved in a broad field of inquiry, as opposed to elective topical courses, which cover a much smaller area. Core courses should be chosen according to the anticipated research interests and fields for preliminary examination of each student. For example, these core disciplinary courses might focus on comparative politics, comparative religion, feminist theory, ethnicity and nationalism, analysis of linguistic structures, seminar in cognitive anthropology, comparative legal institutions, or international political economy. Courses on a narrow field of inquiry (such as Arab-Israeli conflict) do not constitute field or core courses, though they may contribute to a student’s general field.

Annual Review

A subcommittee of the Near and Middle Eastern Studies program faculty will meet each spring to review the progress of all students in
the Ph.D. program. Either the chair of the student’s committee, the program’s graduate adviser, or the program’s director will inform students of the results of this annual review.

Ph.D. Examinations and Dissertation
The student will be expected to take the following examinations: (1) preliminary exams consisting of an area of specialization exam and a theory and discipline exam; (2) a General Examination, consisting of a take-home part and an oral part; and (3) a Final Examination, which is the Ph.D. thesis defense.

Students must meet the general University requirements concerning admission to candidacy for the doctoral degree, the dissertation, and final examinations, including an oral examination.

A student’s Ph.D. supervisory committee shall consist of no less than three members of the University of Washington’s Graduate School faculty as well as a representative of the Graduate School (GSR). The chair of the committee must be an active member of the Graduate School faculty. At least two members of the committee must be members of the Near and Middle Eastern Studies faculty group. Additional members may be asked to join the committee. Students will write a dissertation as the final requirement for the Ph.D. degree. The topic of the dissertation will be set in consultation with the Ph.D. candidate’s supervisory committee.

Admission Deadline
The application deadline for autumn quarter admission is February 1. Applications which are completed and postmarked on or before this date will be reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

N&MES 800 Doctoral Dissertation (*)

Neurobiology and Behavior
Graduate Program
Graduate Program Coordinator
T471 Health Sciences, Box 357270
206-685-1647
neubehav@u.washington.edu

Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, biochemistry, molecular biology, physiology, pharmacology, and the behavioral sciences. Neuroscientists and their students must use these different approaches in their research and training if they are to make inroads to solving the major questions in neuroscience.

The University of Washington has met this challenge by establishing the interdisciplinary graduate program in Neurobiology and Behavior. The laboratories of more than 90 faculty members in 15 departments have combined efforts to form the doctoral training program, continuing a long history of collaborative efforts that cross both departmental and University boundaries.

The program is designed to allow students to obtain both broad training in the neurosciences and more intensive course work in specific areas of interest. The program emphasizes flexibility and encourages students to take responsibility in the design of their own curriculum. Students have the opportunity to work with faculty whose interests span the breadth of neuroscience research. Graduates of the program are well prepared for a variety of careers involving academic, research, industrial, and public policy positions. Key aspects of the graduate program that are common to all students include:

(1) a year-long course which provides a core of knowledge in the neurosciences,
(2) quarterly first-year laboratory rotations and rotation talks attended by all students in the program,
(3) a biweekly seminar series featuring both visiting and local scientists,
(4) a biweekly journal club designed to provide students with an introduction to the subsequent week’s seminar, and
(5) a program-wide retreat, combined with a campus-wide poster session where students and postdoctoral candidates can present their Society for Neuroscience Annual Meeting posters. Thus, the program exposes students throughout their graduate career to the most exciting and current research and concepts covering all areas of neuroscience.

Application Process
Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record; GRE scores, including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology; and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

Research Facilities
Participating departments are located in the Health Sciences Center and in the College of Arts and Sciences. Extensive research facilities in all areas of neurosciences are available to the student. The University maintains two major natural and health-sciences libraries in addition to individual departmental libraries. Facilities in the participating departments include electronics and machine shops, instrumentation for synthesis and sequence determination of nucleic acids and proteins, calcium imaging, confocal microscopy, and computer facilities. Equipment for ultrastructural studies is readily available. The resources of the Regional Primate Research Center, the W. M. Keck Center for Advanced Studies in Neural Signaling, and the Friday Harbor Laboratories are also available to the student.

Financial Aid
The program offers full stipend and tuition support to students through traineeships derived from NIH training grants and private foundation support and through research assistantships supported by the University or research grant funds. Students with satisfactory academic progress can anticipate that funding will continue for the duration of their program.

Course Descriptions
NEUBEH 501 Introduction to Neurobiology (3)
Survey of all aspects of neuroscience, including molecular and cellular neurobiology. Lecture and laboratory discussion of original literature, observation of demonstrations, and examination of macroscopic and microscopic neural tissue. Offered: A.

NEUBEH 502 Introduction to Neurobiology (4)
Survey of all aspects of neuroscience, including an introduction to neuroanatomy and modules on sensory and motor systems. Lecture and laboratory discussion of original literature, observation of demonstrations, and examination of macroscopic and microscopic neural tissue. Offered: W.

NEUBEH 503 Cognitive and Integrative Neurobiology (4)
Survey of all aspects of neuroscience, including a discussion of higher neural processes like learning, memory, and neuroendocrinology. Lecture and laboratory discussion of original literature, observation of demonstrations, and examination of macroscopic and microscopic neural tissue. Offered: Sp.

NEUBEH 510 Seminar in Neurobiology and Behavior (0.5)
Biweekly seminar on current topics. Required for students in the Graduate Program in Neurobiology and Behavior and for students supported on Graduate Neuroscience Program Training Grant. Credit/no credit only. Offered: AWSp.

NEUBEH 526 Introduction to Laboratory Research in Neurobiology (4)
Students become familiar with, and assist in, the performance of research on ongoing projects in designated laboratories. Emphasis on employed methodology and techniques. Credit/no credit only. Prerequisite: first-year graduate students in neurobiology. Offered: AWSpS.

NEUBEH 527 Current Topics in Neurobiology and Behavior (1)
Presentation and discussion of current research provides exposure to diverse areas of neurobiology and behavior research. Credit/no credit only. Prerequisite: graduate student in neurobiology and behavior program or permission of instructor. Offered: AWSp.

NEUBEH 528 Computational Neuroscience (3)
Introduction to computational methods for understanding nervous systems and the principles governing their operation. Topics include representation of information by spiking neurons, information processing in neural circuits, and algorithms for adaptation and learning. Prerequisite: elementary calculus, linear algebra, and statistics, or by permission of instructor. Offered: jointly with CSE 528.

NEUBEH 532 Discussion in Cell Signaling and Molecular Physiology (2)
Discusses fundamental issues in cell excitability and molecular and cellular physiology. Focuses on problem solving and reading from original literature. Emphasizes student participation. Prerequisite: first-year graduate students in neurobiology or physiology and biophysics. Offered: jointly with P BIO 532; A.

NEUBEH 541 Neuroendocrinology (3) Steiner
Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptid gene regulation, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOC 440, BIOC 441, BIOC 442 or permission of instructor. Offered: jointly with P BIO 599; W.

NEUBEH 545 Quantitative Methods in Neuroscience (3) Rieke, Shadlen
Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection and information theory. Prerequisite: NEUBEH 501, 502, 503, or by permission of instructor. Offered: jointly with P BIO 545; W.

NEUBEH 549 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Pollack
Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with Genome 549/PHCOL 549; W.

NEUBEH 550 Biophysics of Calcium Signaling (1) Hille, Santana
Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531 Offered: jointly with P BIO 550; odd years; Sp.

NEUBEH 551 Mouse Models (1)
Illustrates the use of transgenic and targeted-gene disruption technologies for developing mouse models of the disease. Introduces the methodology of producing transgenic and knock out mice. Discusses several examples of disease models using the most recent primary literature as a source. Offered: jointly with P BIO 551.

NEUBEH 552 Synaptic Integration (1) Binder, Powers
Discussion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma, and transformation of currents into spike train outputs. Offered: jointly with P BIO 552.

NEUBEH 553 Learning and Memory: Synapses and Systems (1) Jagadeesh, Sullivan
Five-week mini-course evaluates the current state of knowledge on the mechanisms that allow people to learn and remember. After introductory overviews of the cellular and molecular mechanisms underlying long-term synaptic plasticity and the multiple systems existing for learning and memory, students choose specific topics for discussion. Offered: jointly with P BIO 553.

NEUBEH 554 Motor Learning: Cellular and Network Mechanisms (1) Feizi, Perlmutter
Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with P BIO 554.

NEUBEH 555 Sensory Receptors (1) Detwiler, Rieke
Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with P BIO 555.

NEUBEH 556 Axon Pathfinding Mechanisms (1) Bothwell
Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with P BIO 556.

NEUBEH 557 Ion Channel Gating (1) Gordon, Zagotta
Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with P BIO 557.

NEUBEH 600 Independent Study or Research (*, max. 10)
Credit/no credit only. Offered: AWSpS.

NEUBEH 700 Master’s Thesis (*, max. 10)
Offered: AWSpS.

NEUBEH 800 Doctoral Dissertation (*, max. 10)
Offered: AWSpS.

Nutritional Sciences
Graduate Program Coordinator
305 Raft, Box 353410
206-543-1730
nutr@u.washington.edu

The Interdisciplinary Graduate Program in Nutritional Sciences offers programs of study leading to Master of Science (M.S.), Doctor of Philosophy (Ph.D.), and Master of Public Health Nutrition (M.P.H.) degrees. The graduate program is designed for
the needs of students with a strong science background who wish to pursue (1) advanced training in nutritional science or clinical research, (2) advanced training in nutritional epidemiology and diet-disease interactions, or (3) training in public health nutrition practice. Additional training in clinical and community nutrition is provided to those students who wish to satisfy the didactic and internship requirements of the American Dietetic Association, prior to obtaining Registered Dietitian (R.D.) status.

The principal areas of study are biochemical and molecular nutrition, clinical nutrition, and community or public health nutrition. Members of the core faculty represent the School of Public Health and Community Medicine, the Fred Hutchinson Cancer Research Center, and the University of Washington Medical Center. The program also draws on a larger group of interdisciplinary faculty from the College of Arts and Sciences, Schools of Medicine and Nursing, other units on campus, and from affiliated institutions in the Seattle area.

Each program of study is designed by the student in consultation with, and with the approval of, a supervisory committee. All students begin working on a research project under the supervision of an appropriate faculty member in the early stages of their graduate experience. Public health field placements, which follow the first year of required coursework, are an integral part of the M.P.H. curriculum. Students complete field work in a variety of governmental and non-governmental settings including state and local health departments, social service agencies, and advocacy and policy-making organizations.

The research environment at the University of Washington is exceptional. Research facilities in Raitt Hall include modern laboratories, computer facilities, and a vivarium. Students also have access to faculty mentors and research facilities through the Medical Center, the Fred Hutchinson CRC, the Clinical Research Center, and the Clinical Nutrition Research Unit. Additional clinical facilities include Harborview Medical Center, Northwest Kidney Center, Children’s Hospital and Regional Medical Center, Pacific Medical Center, the Cancer Care Alliance, and the Center for Human Development and Disabilities.

Students may enter the graduate degree program after completing a bachelor’s or a master’s degree. Previous coursework in chemistry, biochemistry, and human physiology is required. Students who wish to supplement their degree program with ADA-approved training leading to R.D. status must complete all didactic requirements before applying to the supervised dietetic internship.

The internship specialty areas are clinical and community nutrition. Applicants should contact the Dietetic Internship Director for detailed admission requirements.

Course Descriptions

**NUTR 300 Nutrition for Today (3)** Brummer
Science of nutrition as it relates to individual food choices, health behaviors, public health. Health topics include wellness, obesity, eating disorders, sports nutrition, prevention of chronic disease. Nutrients and nutritional needs across the lifespan. Issues facing society including food safety, biotechnology, use of supplements and botanicals. Offered: A.

**NUTR 441 Chemistry of Foods (3)** Brummer
Principles of food science integrated with laboratory sessions that observe the effects of various parameters of food composition, and applied sensory evaluation. Explores current trends in the culinary sciences to promote pleasurable eating. Recommended: general and organic chemistry. Offered: odd years; S.

**NUTR 445 Food Policy and Food Safety (3-5)** Brummer
Presentation of emerging issues in food safety, food policy, including food and nutrition regulatory and legal issues, labeling; sanitation; biotechnology; and consumer perception of nutritional risk. Lab element examines objectives of management in the delivery of safe food; receiving systems; inventory control, menu planning, and cost control. Recommended: microbiology. Offered: even years; S.

**NUTR 462 Medical Nutrition Therapy I (2)** Peck
Intervention strategies, counseling skills, and diet modifications that pertain to chronic disease prevention and management. Corequisite: NUTR 562. Offered: Sp

**NUTR 463 Medical Nutrition Therapy II (2)** Peck
Didactic training in nutrition support theories and skill development for interpretation of laboratory values. Management of fluids and electrolytes, and nutrition interventions in acute care. Prerequisite: .NUTR 462; corequisite: 563. Offered: S.

**NUTR 465 Nutritional Anthropology (3)** Shell-Duncan
Concerns interrelationships between biomedical, sociocultural, and ecological factors, and their influence on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with BIO A 465.

**NUTR 499 Undergraduate Research (1-5, max. 10)**
Independent study and research supervised by a faculty member with appropriate academic interest. Offered: AWSpS.

**NUTR 500 Graduate Seminar: Current Issues in Nutrition (1, max. 4)**
A review of current topics in nutritional science and public health nutrition. Provides a forum for student and faculty presentation, and review of current research efforts. Prerequisite: graduate student in nutrition. Offered: AWSp.

**NUTR 520 Nutrition and Metabolism I (4)** Kirk, Rosenfeld
Metabolic/physiologic concepts related to energy balance, carbohydrate, and protein nutrition. Addresses energy producing pathways, as well as food sources, digestion, absorption, and utilization of carbohydrates, protein, and various micronutrients. Additional topics include low carbohydrate diets, vegetarianism, protein deficiency, and inborn errors in carbohydrate, and protein metabolism. Prerequisite: biochemistry. Offered: A.

**NUTR 521 Nutrition and Metabolism II (4)** Kirk, Rosenfeld
Discussion of normal lipid components of animal tissues, with review of their metabolism and physiological functions. Topics include digestion, absorption, transport, and utilization of dietary fats, cholesterol, and fat-soluble vitamins. Discusses in depth the roles played by lipids and various micronutrients in altering risk of atherosclerosis. Prerequisite: biochemistry. Offered: W.

**NUTR 522 Vitamin and Mineral Nutrition (4)** Kirk, Rosenfeld
Advanced study of biologically essential minerals and vitamins. To include absorption, transport, function, storage, excretion; imbalance, deficiency and toxicity; dietary sources; role of these nutrients in prevention diseases directly on indirectly (such as cancer, dental caries); role of modern food technology on availability of these nutrients in our food supply. Prerequisite: biochemistry. Offered: Sp.

**NUTR 526 Maternal and Infant Nutrition (3)** Johnson
Influence of maternal and infant nutrition on the health of populations. Nutrition-related physiological, psychological, and social factors in pregnancy, lactation, and infancy. Application of evidence-based approaches to maternal and infant nutrition recommendations and interventions for populations and high-risk individuals. Prerequisite: human nutrition and human physiology. Offered: A.
NUTR 527 Nutrition: Childhood Through Adolescence (3)  
Rees, Trahms  
Interactions of nourishment with behavior, growth, and development of children, from infancy through adolescence. Critical evaluation of normative data and special problems, as well as strategies for individual and public health interventions. Prerequisite: graduate student in nutritional sciences or permission of instructor. Offered: even years; Sp.

NUTR 528 Nutrition in Aging (3)  
Drewnowski  
Physiological, psychological, social, cultural, and economic factors affecting nutrition in the middle and later years. Prerequisite: human nutrition and human physiology. Offered: odd years; Sp.

NUTR 529 Nutrition Research Design (3)  
Duncan  
Critical review of selected nutrition literature. Evaluation of experimental design, research protocols, data analyses, and application in nutritional science. Prerequisite: BIOST 511. Offered: even years; AWSpS.

NUTR 530 Nutrition for Children with Special Health Care Needs (3)  
Lucas  
Principles of nutrition screening and assessment, clinical nutritional care, family-centered care, and health services as applied to meeting nutritional needs of children with special health care needs. Both population-based and individual care concepts are explored for children with a variety of chronic conditions. Offered: odd years; Sp.

NUTR 531 Community Nutrition (3)  
Johnson  
The functions of public health as applied to nutrition: nutrition monitoring and assessment, assuring access to food and a safe food supply, and national nutrition policy. The practice of public health nutrition: the nutrition environment, program planning, implementation, and evaluation. Offered: Sp.

NUTR 532 Fieldwork in Public Health Nutrition (1-12, max. 12)  
Peck  
Experience and service learning in organizations that plan, deliver, and promote population-based nutrition education and nutrition services. Prerequisite: Nutritional Sciences graduate student and permission of instructor. Offered: AWSpS.

NUTR 537 Laboratory Rotation (1-4, max. 6)  
Peck  
Experience to research being conducted in the laboratories of the graduate nutrition faculty. Provides hands-on experience in laboratory research. Introduces the student to on-going research for preparation of dissertation topics. Prerequisite: permission of instructor. Offered: AWSpS.

NUTR 538 Nutritional Epidemiology (3)  
Beresford, Drewnowski  
Application of epidemiological methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enable students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 and BIOST 511 or permission of instructors. Offered: jointly with EPI 538; A.

NUTR 539 Nutrition Journal Club (1-3, max. 9)  
Duncan  
Critical evaluation of research on selected topics in the field of nutrition. Credit/no credit only. Prerequisite: graduate student in nutrition.

NUTR 551 Nutrition and Gene Expression (3)  
Rosenfeld  
Lectures, student presentations, and discussions of current research on nutrient-gene interactions. Focus on how dietary factors act both directly as transcriptional regulators or indirectly as inducers of signal transduction cascades leading to alterations in expression of proteins associated with cellular nutrient metabolism. Prerequisite: NUTR 520, NUTR 521, NUTR 522, or permission of instructor. Offered: odd years; W.

NUTR 561 Dietetics Internship (6-10, max. 30)  
Drewnowski  
Focuses on the competencies for entry-level practice in dietetics. Autumn and winter quarters include core experiences in wellness, public health, food service, ambulatory care, home health, and clinical services. Spring quarter activities are devoted to either nutrition therapy or public health, depending on student’s career goals. Prerequisite: clinical students only. Offered: Sp.

NUTR 562 Nutrition and Chronic Disease (4)  
Brewmer, Drewnowski  
Epidemiology/pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes). Examines nutritional risk/protective factors in relation to public health, individual nutrition, and clinical intervention. Prerequisite: physiology, biochemistry. Offered: W.

NUTR 563 Nutrition in Acute Care (4)  
Brewmer, Peck  
Assessment of the nutritional demands and hypermetabolic response of trauma, surgery, organ failure, burns, AIDS, and neoplastic disease. Examines specialized nutritional support and substrate requirements in the acute care setting. Prerequisite: NUTR 562, or permission of instructor. Offered: S.

NUTR 564 Management of Nutrition Services (4)  
Brewmer  
Policy and administrative issues that impact delivery of nutrition services in health care environments. Topics include organization behavior, productivity, financial environments, clinical management, and human resources. Offered: even years; S.

NUTR 581 Strategies of Health Promotion (4)  
Bowen  
Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Offered jointly with HSERV 581. Prerequisite: HSERV 511. Offered: Sp.

NUTR 595 Nutritional Sciences Master’s Practicum (1-12, max. 12)  
Peck  
Supervised practice experience providing students an opportunity to learn how nutritional sciences are applied to public health settings and in the formulation and application of public health policy. Credit/no credit only. Prerequisite: HSERV 511; NUTR 531; EPI 511; NUTR 520; 521; 522. Offered: AWSpS.

NUTR 600 Independent Study or Research (*)  
Offered: AWSpS.

NUTR 700 Master’s Thesis (*)  
Offered: AWSpS.

NUTR 800 Doctoral Dissertation (*)  
Credit/no credit only. Offered: AWSpS.

Quantitative Ecology and Resource Management  
Graduate Program Coordinator  
304 Loew Hall, Box 352182  
206-616-9571  
qerm@u.washington.edu  
The Interdisciplinary Graduate Program in Quantitative Ecology and Resource Management (QERM) provides a unique opportunity for students to study the application of statistical, mathematical, and decision sciences to a broad array of terrestrial and marine ecology, natural resource management, biometrical, and mathematical biology problems. It is designed to attract mathematically trained students interested in working on contemporary ecological or resource management problems from a quantitative perspective. QERM offers programs of study leading to Master of Science and Doctor of Philosophy degrees.
Faculty associated with the QERM program come from several campus units, including Statistics, Applied Mathematics, Forest Resources, Aquatic and Fishery Sciences, Marine Affairs, Biology, Biostatistics, Genetics, Economics and Public Affairs. This pool of faculty talent is available to enrich the academic experience of all QERM students.

Admission Requirements

Applicants are expected to possess an awareness and keen interest in applying quantitative methods to natural resource management, marine or terrestrial ecology, or mathematical biology problems. Minimum requirements for admission to the graduate program include a baccalaureate degree from an accredited institution, a GPA of 3.00 in the last two years of college work, and approval of the program and the Graduate School. Applicants should have either a strong mathematical or biological (ecological) background and must perform well on the quantitative and analytical sections of the Graduate Record Examination. Applicants to the program must submit a completed QERM program application, UW Graduate Admissions application (and required fee), transcripts of all previous college course work, Graduate Record Examination scores (general test only is required), TOEFL score (only for applicants who are non-native English speakers), three letters of recommendation, a brief narrative statement of objectives and curriculum vitae. Admission is also dependent upon program resources and fit between student and program. Admissions are limited to autumn quarter. The application deadline is January 15.

Program Requirements

The core course work for the Master of Science degree reflects the expectation that the student has a fundamental understanding of the principles of statistical inference and ecological modeling. Course electives should further this understanding in an area of emphasis selected by the student from among biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology is expected to give students greater insight into the environmental systems in which they expect to apply their quantitative training. Requirements for successful completion of the Master of Science and degree include:

Completion of a minimum of 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of course work numbered 500 or above, including a thesis. Numerical grades must be received in at least 18 quarter credits of course work taken at the University of Washington. Successful completion of qualifying examinations in statistical theory and applied methods at the completion of the first year of study. A seminar on results of the research and oral defense of the thesis are required for graduation. Each student also must meet the general University requirements for graduation.

The following courses are required of all students unless exempted by petition to the Graduate Program Coordinator: STAT 512 and STAT 513 (statistical inference), QERM 550 (ecological modeling), AMATH 422 (mathematical biology), QERM 514 (analysis of ecological and environmental data), QERM 597 (seminar) and QERM 700 (master’s thesis credits, minimum of 9 credits).

Students entering the program with little or no statistical background are advised to take one or more of the following courses in their first year for preparation in this area: STAT 421 (applied statistics and experimental design), STAT 394 and STAT 395 (probability I and II) and possibly STAT 341-342 (introduction to probability and statistical inference) or STAT 481 (introduction to mathematical statistics). These students then take STAT 512 and STAT 513 (statistical inference) in the following academic year and the statistics theory qualifying examination given that year. These students will take the applied methods qualifying examination at the end of their first year of study.

For students pursuing the Doctor of Philosophy degree, both the applied methods and statistical theory qualifying examinations must be passed at the doctoral level. Students are allowed two attempts to successfully pass each component at the doctoral level. Students must complete at least three years of graduate study (90 credits) and complete a dissertation to earn the Doctor of Philosophy degree. Completion of a master’s degree program may be applied toward one year of the doctoral program. The core QERM courses must be taken if the student has obtained a master’s degree from another program. Preparation for a Ph.D. dissertation requires registration for 27 credits of QERM 800 (dissertation research).

Each student also must meet the general University requirements for graduation.

Financial Aid

Fellowships, teaching assistantships, and research assistantships are available each year. This assistance is from either the Graduate School or one of the campus units contributing faculty to the QERM program. They generally cover the nine-month academic year, although provisions may be made for summer support. Tuition is normally included as part of the financial package. Funding decisions are made yearly; attempts are made to continue support for students making satisfactory progress.

Course Descriptions

QERM 502 Statistical Consulting for the Life Sciences (1-4)

Conquest

Consulting experience in data analysis, applied statistics, experimental design, parameter estimation, and sampling. Student provides consultation services to students and faculty. Students spend one classroom hour per week under faculty supervision discussing problems encountered. Prerequisite: QERM 482, QERM 483, STAT 421, STAT 423, or BIOST 514, BIOST 515, or equivalents, and permission of instructor. Offered: W.

QERM 514 Analysis of Ecological and Environmental Data I (4)

Conquest

Overview of generalized linear models (GLMs), their use in forestry, fisheries, wildlife ecology, and environmental monitoring. Analysis of the statistical tests that fall under GLMS: chi-square tests on contingency tables, t-tests, analysis of variances, etc. Statistical software S+/R used throughout. Offered: Sp.

QERM 521 Scientific Method in Resource Management (4)

Ford

Describes process of scientific discovery and strategies used for problems in ecology and natural resources management. Relationships between growth and use of objective knowledge in natural resources management is explored through case studies.

QERM 550 Ecological Modeling and Spatial Analysis (5)

Ford

Describes the principles of ecological modeling, and theoretical and methodological issues involved in their design and implementation. Emphasizes the analysis of spatial processes and how such analyses are used in developing ecological models. Students make and analyze a spatial process and/or construct a model of their own choice. Offered: W.

QERM 551 Modeling Organism Dynamics (3)

Anderson

Application of techniques of stochastic differential equations, time series analysis, and simulating dynamic processes to plant and animal growth.

QERM 597 Seminar in Quantitative Ecology (2)

Current topics in quantitative ecology and resource management. Fisheries, forestry, and marine resources. Offered: ASP.

QERM 598 Special Topics in Quantitative Resource Management (1-3, max. 12)
Population and community ecology, systems ecology, and physical processes in ecosystems. Prerequisite: permission of instructor.

QERM 599 Research in Quantitative Resource Management and Ecology (*, max. 12)
Topics can be theoretical in nature or combined theory and experiment. Research might be a prelude to thesis or dissertation research. Credit/no credit only.

QERM 600 Independent Study or Research (*)

QERM 700 Master’s Thesis (*)

QERM 800 Doctoral Dissertation (*)

Quaternary Research Center
19 Johnson

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has the following goals:
To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.
To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.
To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.
To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.
To seek applications of Quaternary studies to modern environmental problems that will help predict consequences of policy decisions.

Graduate Program
Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.

Research Facilities
The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems. QRC Resource Center. This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection. Searches for library material can be conducted via the QRC Web page.

Cosmogenic Nuclide Laboratory
John Stone, Director

The UW Cosmogenic Nuclide Laboratory analyses rare radionuclides produced by cosmic ray bombardment of the Earth’s surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean labs for extraction of Al-26, Be-10, and Cl-36. For additional information, visit the laboratory’s Web site.

Geochemistry Library
Ronald S. Sletten, director

The Geochemistry Library conducts analyses of natural waters, soil, and sediment. Instrumentation includes ICP-OES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural organic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. The primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physicochemical soil processes in Antarctica and Alaska.

Periglacial Laboratory
Bernard Hallet, Director

Research in the Periglacial Laboratory focuses on diverse processes at the interface between glaciology and geomorphology that are fundamental to understanding landscapes and soils in alpine and polar regions. Founded by Link Washburn, the laboratory has a long history of experimental research on periglacial processes with special attention given to the complex phenomena associated with freezing soils and rocks. Recently the lab has also served as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

Stable Isotope Laboratory
Eric J. Steig, Director

The Stable Isotope Laboratory is the main center for stable isotope studies for the QRC. The current emphasis in the laboratory is the development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities in the laboratory (now undergoing renovation) include off-line and online preparation systems for D/H and 18/O on water 13C12C on carbonates and organic materials, and 15N/14N on nitrate and organics. Additional information, data, and other resources are available via the laboratory’s Web site.

Course Descriptions

QUAT 417 Environmental Change in the Glacial Ages (3)
NW Porter

QUAT 501 Seminar/Conference in Quaternary Environments (1, max. 6)
Interdisciplinary seminar or conference in the changing natural environments of the Quaternary Period, with emphasis on climatic changes and their effects. Speakers from the University and elsewhere present lectures on their specialties, followed by discussion. Credit/no credit only.

QUAT 502 Interdisciplinary Quaternary Investigations (2, max. 6)
Research course for interdisciplinary investigation of Quaternary problems. Student attends sessions of QUAT 501 and pursues a problem-oriented case study concurrently under faculty direction. Required paper on case study. Credit/no credit only. Prerequisite:
QUAT 504 Special Topics in Quaternary Sciences (1-3, max. 3)
Environments and climate changes of past two million years (Quaternary Period) in context of modern surface processes, including historical changes, prehistorical environments of postglacial period, and Ice Age events. Provides scientific perspective on scale of modern and man-made environmental changes, including those of climate, in context of recent earth history. Credit/no credit only. Prerequisite: background courses in earth sciences and ecology.

Urban Design and Planning
Graduate Program Coordinator
311 Loew, Box 352192
206-543-6398

The Interdisciplinary Group for Urban Design and Planning offers the Doctor of Philosophy degree. The program seeks to prepare scholars who can advance the state of research, practice, and education related to the built environment and its relationship to society and nature in metropolitan regions throughout the world. The program provides a strong interdisciplinary educational experience that draws on the resources of the entire university, and the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners and educators who focus on improving the quality of life and environment in metropolitan regions.

The intellectual focus of the Ph.D. program is unique in bringing together interdisciplinary perspectives from the social and natural sciences, humanities, and design and planning disciplines, and applying them to the formation and evaluation of urban and environmental plans and policies. It seeks to explore interactions among built urban form; urban markets for real estate, labor, public services and infrastructure; urban social and political institutions and processes; and urban ecological patterns and processes. Study of these interactions draws on the disciplines of economics, geography, history, sociology, political science, and ecology, among others. The program of study is divided into three phases.

Phase one — the core curriculum — defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within the broad umbrella of urban and environmental planning and policy, it provides a common foundation for all students to build upon. The core curriculum consists of required classes and a phase one portfolio examination. Upon passing to phase two, the student forms a supervisory committee to oversee progress through the rest of the academic program. The committee must consist of at least three faculty members in the interdisciplinary group representing at least two academic departments. Students develop with their supervisory committee a description of their proposed areas of study. These define an area of scholarship that must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy.

Phase three focuses on original work which is presented as a dissertation.

Admission Criteria
Admission to the Ph.D. program is based on evidence of promise of high scholarly achievement and research orientation. The applicant’s statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admissions evaluation. Further, to ensure the highest level of faculty support and proper level of faculty guidance, the program accepts those students whose research interests match areas of specialized faculty competence. Students are encouraged to identify faculty whose interests coincide with theirs in their statement of purpose.

Applicants typically have a master’s degree in fields ranging from planning and public affairs to natural and social sciences. In some cases, students can be admitted to the program on the condition that certain master’s-level core courses are completed during the first year of study. Students interested in a professional degree in urban design and planning should apply to the master’s program in Urban Design and Planning (www.caup.washington.edu/html/URBDP/ or jcbrooks@u.washington.edu). The application deadline is February 1, for entry into the program autumn quarter.

Financial Aid
The Interdisciplinary Ph.D. Program in Urban Design and Planning attempts to provide funding for doctoral program applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

Interschool or Intercollege Programs
Advanced Materials & Manufacturing Processes
AMMAP 500 Advanced Teaming Fundamentals (1-9, max. 9)
Project team, consisting of a member each from a supplier, a manufacturer, a customer, and academia, begins to define personal and team objective in accordance with team norms using several organizational team skills, including Meyers-Briggs analysis and team counseling.

AMMAP 550 Team Network Development (1-9, max. 9)
Project teams working at respective supplier, manufacturer, customer, and university home locations. At approximately mid-point, a progress report and short team presentation made to selected members from advisory committee.

AMMAP 571 Team Management of Technology Through the Value Chain (1-9, max. 9)
Covers a new model for managing technology innovation among several organizations and different industries. Includes lectures in macro and micro level focus of management of technology, complexity of technological innovation, industrial dynamics, technology in business, and technology strategy.

AMMAP 572 Team Project Management (1-9, max. 9)
Provides fundamentals for understanding the managing of projects with teams. Includes a systemic view of project management, project management methods and toolbox, human resource management, planning methodology, scenario-based thinking, and risk management.

AMMAP 586 Team Business Process Design (1-9, max. 9)
Critical examination of process dynamics in business and the various aspects of design, while working in a team environment. Emphasizes systems theory, teaming processes, aesthetics of design, project development and experiential learning, strategic decision making, and business planning.

AMMAP 600 Team Level Integration (1-10, max. 10)
Personal/team objectives accomplished at end of course. Teams participate in seminars to gain a deeper understanding of the dynamics of managing value chain relationship in a global business
environment. Final report written and team presentation made to advisory committee. Recommendations regarding continuation of team project for two years with a new team.

Bioengineering
309 Harris Hydraulics Laboratory

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the health care system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as one of the finest bioengineering programs in the world. Major areas of research and education include distributed diagnosis and home healthcare (d2h2), molecular bioengineering and nanotechnology, engineered biomaterials and tissue engineering, medical imaging and image-guided therapy, and computational bioengineering.

Undergraduate Program
Adviser
309B Harris Hydraulics Lab, Box 357962
206-685-2000
bioeng@u.washington.edu

The Bioengineering Program offers the following programs of study:

- The Bachelor of Science in Bioengineering degree

The Bachelor of Science in Bioengineering bridges the gap between the engineering and biological sciences. Advanced interdisciplinary coursework builds upon a solid foundation of mathematics, computing, engineering, and physical and biological sciences. Students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials.

A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department’s cutting-edge research.

Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department’s goal is to prepare students to be leaders and innovators in improving human health and health care.

Bachelor of Science in Bioengineering

Suggested First- and Second-Year College Courses: CHEM 142, CHEM 152, CHEM 162, CSE 142, English Composition, MATH 124, MATH 125, MATH 126, PHYS 121.

Department Admission Requirements

Because resources are limited, students must apply for admission to the Bioengineering program. Students may be admitted at three different points. Please consult the department’s Web page for more information.

Direct Admission. The department enrolls up to 25 percent of its incoming class directly from high school. Students who are accepted to the University and who indicate Bioengineering as their preferred major on their freshman application are considered for admission. Strong applicants will have completed chemistry, biology, and calculus in high school. Admission is for Autumn quarter only.

Early Admission. Students who are enrolled at the University are eligible to apply at the end of the freshman year if they have completed and earned at least a 2.50 GPA in the following courses: MATH 124, MATH 125, MATH 126, CHEM 142, CHEM 152, CHEM 162, and 5 credits of English composition. A 2.50 GPA guarantees consideration but does not guarantee admission. The application deadline is July 1 for autumn quarter admission.

Upper Admission. Upper admission requires 64 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, MATH 126, CHEM 142, CHEM 152, CHEM 162; PHYS 121, PHYS 122, PHYS 123; BIOL 180, BIOL 200; CSE 142; E E 215; and 5 credits of English composition. A 2.50 GPA guarantees consideration but does not guarantee admission. Application deadlines for upper admission are February 1 for spring quarter and July 1 for autumn quarter. Upper admission applicants should note that the Bioengineering major course sequence begins only in spring quarter; thus, whether applying in February or July, students should enroll in BIOEN 301 for spring. E E 215 is a prerequisite for BIOEN 301. Consult the department’s Web page or academic counselor for more details.

Graduation Requirements

Graduation requirements are subject to change. Current requirements are found on the departmental Web page. Students follow the requirements that are in effect at time of entry into the department. 180 credits as follows:

General Education Requirements (105 credits):
Areas of Knowledge: 24 total credits in Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S), with at least 10 credits in each area.
Written and Oral Communication (8 credits): 5 credits of English composition, from the approved University list; T C 231. Additional writing credits are built into the major core courses.
Mathematics (25 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; STAT 390.
Natural Science (48 credits): CHEM 142, CHEM 152, CHEM 162, and CHEM 223 or CHEM 237; PHYS 121, PHYS 122, PHYS 123; BIOL 180, BIOL 200; BIO 405.
Major Requirements (75 credits):
Engineering Fundamentals (17 credits): CHEM E 260; CSE 142, CSE 143; E E 215.
Bioengineering Core (36 credits): BIOEN 301, BIOEN 302, BIOEN 303, BIOEN 304, BIOEN 305, BIOEN 357; 12 credits of BIOEN 480.
Bioengineering Senior Electives (12 credits): Twelve credits chosen from BIOEN 420, BIOEN 436, BIOEN 440, BIOEN 455, BIOEN 457, BIOEN 467, BIOEN 470, BIOEN 485, BIOEN 490, BIOEN 491, BIOEN 492.
Approved Electives (10 credits): 10 additional credits chosen from an approved list of math, science, and engineering courses (see the department’s Web page for further information), or from the Bioengineering senior elective list.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and
The Department of Bioengineering offers programs of study which lead to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees.

**Master of Science**

The Master of Science degree program provides breadth of knowledge in engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree will prepare students for careers in academic, industrial, or hospital environments. A thesis is required.

**Doctor of Philosophy**

The objective of the Ph.D. program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the Ph.D. program does not require prior completion of the M.S. degree and may be made directly after the B.S. An optional dual Ph.D. degree in bioengineering and nanotechnology is available. See www.nano.washington.edu for more information.

**Medical Scientist Program**

A Medical Scientist Training Program exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the M.D. and Ph.D. degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at 206-685-0762.

**Research Facilities**

Offices and laboratories are located in the College of Engineering and the School of Medicine. Students have access to the University of Washington Medical Center, Vivarium, Primate Center, Computer Center, and libraries, as well as to all engineering and health-sciences departments and facilities. A wide range of technologies and virtually all aspects of biomedical science are available.

**Admission Requirements**

Applicants for the M.S. or Ph.D. should have a baccalaureate degree in engineering, biological science, or a related field. Preparation for both programs must include ordinary differential equations, linear algebra, instrumentation, signal processing, engineering systems analysis, thermodynamics or physical chemistry, and cellular and molecular biology. Strong students who are missing some of these background courses can be admitted but will be expected to take the appropriate courses as part of their graduate program. Admission to graduate study in bioengineering is highly selective. Successful applicants have strong academic credentials, research experience, and demonstrated potential for advanced study. The application form and further information can be found on the department’s Web page.

**Financial Aid**

Financial aid is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the Academic Counselor.

**Course Descriptions**

**BIOEN 299 Introduction to Bioengineering (1) Verdugo**

Lectures on the various aspects of bioengineering; orientation in bioengineering studies and practice. Credit/no credit only. Offered: Asp.

**BIOEN 301 Bioengineering Systems Analysis (4) Spelman**

Investigates static and dynamic problems that are found in medicine and biology. Exposes students to real biomedical applications of first- and second-order differential equations. Students analyze current bioengineering and biomedical problems and make measurements of the systems that present those problems. Weekly laboratories. Prerequisite: BIOL 200 or BIOL 202; E E 215. Offered: Sp.

**BIOEN 302 Introduction to Biomedical Instrumentation (4) Polch**

Introduces students to the theory of measurement and the practicalities of measurement of biological variables. Basic amplifier theory, discussion of noise in physical systems and its reduction. Some actuators used to test biomedical systems. Prerequisite: BIOEN 301; CSE 142. Offered: A

**BIOEN 303 Bioengineering Signal Processing (4) Li, Vicini**

Introduction of signal processing techniques necessary to record and analyze medical and biological data. Students use transform calculus
to analyze differential equations and develop approximations to functions. Introduces sampling and applies it to biological data. Prerequisite: BIOEN 302. Offered: W

**BIOEN 304 Introduction to the Bioengineering Analysis of Physiology I (4) Pollack**
Introduction of engineering analysis of physiological systems. Course covers cellular function through its control by the central nervous system. Prerequisite: BIOEN 301; CSE 142. Offered: A

**BIOEN 305 Introduction to the Bioengineering Analysis of Physiology II (4) Martyn**
Introduction to the cardiovascular system. Explores the cardiovascular system as an engineering system in which the heart is a pump, and the load and distribution of blood to organs on the heart depend on the demands of the system. Introduces principles of fluid transport. Prerequisite: BIOEN 302; BIOEN 304. Offered: W

**BIOEN 357 Introduction to Molecular Bioengineering (4) Vogel**
Introduces molecular bioengineering. Molecules as building blocks to engineer surfaces. Molecular therapeutics, drug delivery, diagnosis and biomaterials. Examines design principles for biomedical materials and devices. Prerequisite: either BIOL 200 or BIOL 202; PHYS 122; either CHEM 223, CHEM 237, or CHEM 335. Offered: W.

**BIOEN 420 Medical Imaging (4) Kim, Yuan**
Various medical imaging modalities (x-rays, CT, MRI, ultrasound, PET, SPECT, etc.) and their applications in medicine and biology. Extends basic concepts of signal processing (BIOEN 303) to the two and three dimensions relevant to imaging physics, image reconstruction, image processing, and visualization. Prerequisite: BIOEN 303; MATH 308; CSE 143. Offered: A.

**BIOEN 436 Medical Instrumentation (4)**
Introduction to the application of instrumentation to medicine. Topics include transducers, signal-conditioning amplifiers, electrodes and electrochemistry, ultrasound systems, electrical safety, and the design of clinical electronics. Laboratory included. For juniors, seniors, and first-year graduate students who are preparing for careers in bioengineering, both research and industrial. Offered: jointly with E E 436; Sp.

**BIOEN 439 Introduction to Biomechanics (4) Sanders**
Introduces fundamental mechanical properties of tissues in the body and the application to design of prostheses. Tissues studies include bone, skin, fascia, ligaments, tendons, heart valves, and blood vessels. Discussion of the structure of these tissues and their mechanical response to different loading configurations. An important part of the class is a final project. Offered: jointly with M E 445; Sp.

**BIOEN 440 Introduction to Molecular Bioengineering (4) Stayton**

**BIOEN 457 Advanced Molecular Bioengineering (4) Folch**

**BIOEN 467 Biochemical Engineering (3) Baneyx**
Application of basic chemical engineering principles to biochemical and biological process industries such as fermentation, enzyme technology, and biological waste treatment. Rapid overview of relevant microbiology, biochemistry, and molecular genetics. Design and analysis of biological reactors and product recovery operations. Prerequisite: either CHEM 223 with CHEM E 340 or either CHEM 237 or CHEM 335; recommended: CHEM E 465. Offered: jointly with CHEM E 467; W.

**BIOEN 470 Systems Engineering and Electronic Medicine (4) Kim**
Provides students with understanding and hands-on experience in systems engineering, healthcare information systems, and core technologies for electronic medicine; including how large-scale engineering systems are defined, architected, built, and tested. Focus is on current and future medical systems. Prerequisite: BIOEN 303; MATH 308. Offered: W.

**BIOEN 480 Bioengineering Research/Capstone Design (2-6, max. 12)**
Students formulate a problem, develop a detailed experimental or design plan, and report results of their work in written and oral form. Prerequisite: BIOEN303; BIOEN 305; BIOEN 357. Offered: AWSPS.

**BIOEN 481 Research and Design Fundamentals (4)**
Engineering design, planning and managing an open-ended project, bioengineering and society. Prerequisite: BIOEN 303; BIOEN 305. Offered: AWSPS

**BIOEN 482 Bioengineering Senior Capstone Research/Design (12-6, max. 8)**
Independent capstone design/research project; final paper. Prerequisite: BIOEN 303; BIOEN 305. Offered: AWSPS

**BIOEN 485 Computational Bioengineering (4) Vicini**
Introduction to computational, mathematical and statistical approaches to the analysis of biological systems, including systems and control theory, molecular models and bioinformatics. Lectures and laboratory sessions emphasize practical problems in kinetics, metabolism and genomics. Prerequisite: CSE 143; BIOEN 305; MATH 308. Offered: W.

**BIOEN 490 Engineering Materials for Biomedical Applications (3) Bonadio, Harnett**
Combined application of principles of physical chemistry and biochemistry, materials engineering, to biomedical problems and products. Applications include implants and medical devices, drug delivery systems, cell culture processes, diagnostics, and bioseparations. Offered: jointly with CHEM E 490; Sp.

**BIOEN 491 Controlled-Release Systems: Principles and Applications (3) Hoffman**
Mechanisms for controlled release of active agents and the development of useful drug delivery systems for this purpose. Releases mechanisms considered include diffusive, convective, and erosive driving forces. Delivery routes include topical, oral and in vivo. Some special case studies covered in detail. Offered: jointly with CHEM E 491; even years; W.

**BIOEN 492 Surface Analysis (3) Ratner**
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials, science wear, and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger) ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 458; W.

**BIOEN 497 Bioengineering Education Outreach (1-2, max. 6)**
Work with K-12 schools or community organizations. Current science education research and instructional techniques. May involve presentations or instruction in hands-on activities. Offered: AWSPS.
BIOEN 499 Special Projects (2-6, max. 6)
Individual undergraduate bioengineering projects under the supervision of an instructor. In addition, classes on selected topics of current interests as announced. Offered: AWSpS.

BIOEN 508 Physical Aspects of Medical Imaging (4) Stewart
Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound and Doppler ultrasound. Offered: jointly with RADGY 508/ENV H 528; W.

BIOEN 510 Bioengineering Seminars (3)
Topics of current bioengineering interests presented by resident and visiting faculty members and students. Graduate students actively involved in bioengineering research are eligible to enroll for credit and can be expected to attend regularly, participate in discussions, and make presentations. Offered: A.

BIOEN 511 Biomaterials Seminar (1) Hoffman, Horbett, Ratner
Presentation of student research results. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 511; AWSp.

BIOEN 520 Orthopedic Biomechanics (4) Ching
Mechanical engineering applied to musculoskeletal system with emphasis on techniques in orthopedic surgery. Measurement of mechanical properties of tissues, mechanics of bone, soft tissue, and muscle, mechanics of upper extremity, spine, and lower extremity. Engineering in surgery, gait analysis, joint replacement, fracture fixation. Prerequisite: BIOEN 440. Offered: odd years; W.

BIOEN 540 Biosystem Identification (4) Vicini
Fundamentals of mathematical modeling in medicine and biology, Introduction to compartmental models: a priori, a priori identifiability, Data measurement error, parameter estimation. Maximum likelihood, least squares. Introduction to tracer-tracee models, pharmacokinetics, pharmacodynamics. Models to test hypotheses. Hands-on computer experience. Prerequisite: ordinary differential equations, introductory statistics, or permission of instructor. Offered: even years; A.

BIOEN 542 Computer Simulation in Biology (3)
Bassingthwaighte, Graham
Introduction to mathematical modeling of biological phenomena. Tutorial text explains how to derive equations for simple models and apply them to generate simulation data. Application topics include kinetics of biomolecular reactions and enzyme saturation, membrane transport, organismal predation, competition and growth, compartmental and spatially distributed models, physiological control systems, probabilistic models. Prerequisite: P BIO 405 and P BIO 406 or equivalent or permission of instructor. Offered: even years; A.

BIOEN 545 Fractals in Biology and Medicine (3)
Bassingthwaighte
Introduction to fractal and chaos. Conceptual approaches to using fractals for characterizing structures and growth processes, describing heterogeneities, and evaluating properties of tissues. The behavior of non-linear systems, often chaotic, describes physiological homeodynamics, regulation without set points in feedback control.

BIOEN 550 Mass Transport and Exchange in Biological Systems (3)
Bassingthwaighte
Review of basic mechanisms of transport; transport through vascular system and blood-tissue exchange processes in organs; integrated system analysis of closed systems and applications to physiological regulation, medical imaging, and pharmacokinetics. Prerequisite: calculus, introduction to differential equations; cardiovascular physiology; E E network analysis or systems analysis, chemical engineering transport. Offered: Sp.

BIOEN 555 Introduction to Biomechanics (3) Pollack
Mechanical properties of biological tissues, with emphasis on the underlying histological bases. Bones, joints, cartilage, blood vessels, connective tissue, muscle, heart. Many laboratory sessions. Offered: odd years; W.

BIOEN 560 Ultrasound in Bioengineering (4) Yaezy
Fundamentals of ultrasonic generation, formation, reception, and treatment of absorption, scattering, and transmission. Conventional and new methodology. (A, B, T-M mode, imaging, Doppler, tissue characterization, and nonlinear effects.) Prerequisite: E E/M E 525 for nonbioengineering students or permission of instructor. Offered: odd years; Sp.

BIOEN 561 Biomedical Optics (4)
Advanced theories of optical and spectroscopic measurement with emphasis on biomedical laser applications. Laser principles, instrumentation, and current practice in various biomedical uses, covering such areas as medicine, surgery, and biology. Prerequisite: BIOEN 302 or equivalent, or permission of instructor. Offered: even years; Sp.

BIOEN 565 Nuclear Magnetic Resonance in Biomedicine (2)
Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with RADGY 550; odd years; W.

BIOEN 568 Image-Processing Computer Systems (4) Kim
Components of digital processing computer systems. Two-dimensional filtering and optimal filter design as well as basic image-processing operations. Selected advanced image-processing topics introduced. Individual student project. Prerequisite: permission of instructor. Offered: jointly with E E 568; Sp.

BIOEN 571 Polymeric Materials (3) Ratner
Relationships between configuration, conformation, molecular order, microstructure, properties of polymeric materials. Concepts relevant to tailoring polymer molecules and microstructures for specific applications. Interactions between polymers and their in-service environment. Characterization and processing techniques relevant to polymeric materials. Prerequisite: one semester or two quarters of organic chemistry. Offered: jointly with MSE 571.

BIOEN 573 Biosensors and Biomedical Sensing (3) Yager
In-depth overview of the principal types of biosensors. Topics include: how biological molecules are used in sensing, how the sensors operate, how different sensors compare, under what circumstances sensors can be useful, and the applicability of sensors to biomedical sensing. Prerequisite: BIOEN 436 or permission of instructor. Offered: odd years; A.

BIOEN 575 Molecular Modeling Methods (4) Beard
Introduction to theory and practice of computer simulation studies of molecules with emphasis on applications to biological molecules and complexes. Discussion of background theory, implementation details, capabilities and practical limitations of these methods. Prerequisite: previous coursework in biochemistry and physical chemistry and/or permission of instructor. Offered: jointly with CHEM 575; A.

BIOEN 576 Laboratory Techniques in Protein Engineering (4) Stayton
Practical introduction to fundamentals of recombinant DNA technology and protein engineering. Gene design, bacterial molecular biology, genetic engineering strategy. Laboratory project focused on making site-directed protein mutations. Techniques
include the Polymerase Chain Reaction, DNA sequencing, DNA cutting/splicing, protein expression. Prerequisite: background in biochemistry or molecular biology or consent of instructor. Offered: W.

BIOEN 577 Cell and Protein Reaction with Foreign Materials (3) Horbett
Study of ways in which cell and protein interactions with foreign materials affect the biocompatibility of biomaterials. Description of the phenomenology and mechanisms of protein adsorption, mammalian cell adhesion, and cell receptor biology and of methods used to study these phenomena. Surface properties of materials discussed in context of the course. Prerequisite: permission of instructor. Offered: even years; A.

BIOEN 578 Biomembranes (3) Yager
Develops an understanding of the molecular principles that underlie the self-assembly of surfactants into natural and model membranes; in particular, on the relationship between the chemical structure of lipid molecules and the three-dimensional aggregates that they form in water. Offered: A.

BIOEN 579 Host Response to Biomaterials (3) Giachelli
Basic cell and molecular biology of the pathologies associated with biomaterial implantation that limit bioprosthetic use, including hemostasis, infection, acute and chronic inflammation, wound healing and fibrosis, and structural alterations. Major methods for histological analysis of retrieved implants. Prerequisite: general biology, BIOEN 490 (may be taken concurrently) or permission of instructor. Offered: odd years; W.

BIOEN 584 Computational and Integrative Bioengineering (4) Vicini
Advanced computational, mathematical, and statistical approaches to the analysis of biological systems, including molecular models, time series, fractal systems, population kinetic analysis, and stochastic simulation. Lectures and laboratory sessions emphasize practical problems in kinetic analysis, metabolism, and genomics. Final project, written and oral reports. Prerequisite: BIOEN 485. Offered: odd years; Sp.

BIOEN 588 Bioengineering Principles of Physiology (4) Bonadio, Kashnerick
Muscle exemplifies: protein-protein interactions; molecular recognition; proteins as machines; functional scaling; computing and signaling with metabolic machines; metabolic processes as chemical networks; membrane separation into functions; channels as communication machines; neural control and function. Prerequisite: BIOL 200 or equivalent or permission of instructor; recommended: BIOEN 304, P BIO 405. Offered: A.

BIOEN 589 Integrative Physiological Systems Analysis (4) Bussinghthaighe
Physiological systems, emphasizing cardiovascular, pulmonary and to a lesser extent, renal, hepatic, and endocrine systems, described in quantitative terms, using model representation for examples and problems. Laboratories. Prerequisite: BIOEN 588, calculus and ordinary differential equations. Offered: W.

BIOEN 590 Advanced Topics in Biomaterials (3) Bonadio
Major, controversial issues in application of synthetic materials to medical problems. Blood compatibility, bioadhesion, intraocular lenses, contact lenses, polyurethanes, biodegradation, protein adsorption, corrosion, bone fixation, new materials, artificial heart, medical device regulation. Prerequisite: BIOEN 490 or CHEM E 490. Offered: jointly with CHEM E 590; odd years; Sp.

BIOEN 592 Surface Analysis (3) Ratner
Understanding of solid surfaces for research and development in microelectronics, catalysis, adhesion, biomaterials science, wear and corrosion science. Newer methods available to study surfaces of materials. Electron emission spectroscopies (ESCA, Auger); ion scattering, ion spectroscopic, photon spectroscopic, and thermodynamic methods. Offered: jointly with CHEM E 558; W.

BIOEN 599 Special Topics in Bioengineering (1-6, max. 15)
Offered at a graduate level periodically by faculty members within the Department of Bioengineering; concerns areas of research activities with current and topical interest to bioengineers. Prerequisite: undergraduate or graduate courses (or equivalent) determined individually for each special topic. Offered: AWSpS.

BIOEN 600 Independent Study or Research (*)
Credit/no credit only. Offered: AWSpS.

BIOEN 700 Master's Thesis (*)
Credit/no credit only. Offered: AWSpS.

BIOEN 800 Doctoral Dissertation (*)
Credit/no credit only. Offered: AWSpS.

Program on the Environment
274 Mary Gates Hall, Box 352802
The Program on the Environment (PoE) fosters and promotes interdisciplinary environmental education at the UW. As an interdisciplinary program merging multiple fields of study, PoE draws faculty from a wide array of disciplines, providing a unique opportunity for students and faculty to explore complex environmental issues from multiple perspectives.

Undergraduate Program

poeadv@u.washington.edu

The program on the Environment offers the following programs of study:
- The Bachelor of Arts degree with a major in environmental studies
- A minor in environmental studies

Bachelor of Arts

Suggested First and Second-Year College Courses: Major requirements 1-5 as listed below.

Department Admission Requirements
Students in good academic standing can declare this major at any time.

General Education Requirements
All majors must satisfy the College of Arts and Sciences general education requirements.

Major Requirements
85-90 credits as follows:
One course (5 credits) from MATH 112, MATH 124, MATH 145, Q SCI 110, or Q SCI 291.
One course (5 credits) from STAT 220, STAT 301, STAT 311, QMETH 201, or Q SCI 381.
One course (5 credits) from CHEM 120 or CHEM 142.
One of the following (5 to 10 credits): BIOL 116, or BIOL 161 and BIOL 162, or BIOL 180 and BIOL 200 (or BIOL 201 and BIOL 203).

Core Courses (15 credits): ENVR 201, ENVR 202, ENVR 203.

Matrix Courses (40 credits): Choose all courses from one of five options: ecology and conservation, population and health, resources, international perspectives, or an approved individualized curriculum. (The international
Completion of requirements 1-5 above during freshman or sophomore years (or pre-transfer) is highly recommended.

Minor

Minor Requirements: 30 credits, including 15 credits from ENVIR 201, 202, 203; an additional 15 credits drawn from a list of program "matrix" courses and/or the capstone experience. 10 credits of the additional 15 credits may overlap with the student's major. A minimum of 5 credits must be taken from the program "matrix" outside the general discipline of the student's major. See adviser for list of matrix courses.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The Environmental Studies major offers an interdisciplinary approach to environmental problems and develops the following broad skill sets: taking an integrated approach to environmental issues; recognizing that dealing with the scientific aspect of environmental issues requires grappling with the cumulative nature of scientific disciplines; appreciating that some of the most profound differences in perspective are related to cultural and economic setting; understanding the difference between stating a viewpoint and marshalling evidence to make a compelling argument; being able to find relevant data and evaluate its quality; being able to distinguish between data and interpretation and being able to handle data in a quantitatively appropriate way; being able to present one's viewpoint and/or findings both in writing and orally in a public setting.

Because the degree culminates with a senior capstone experience that requires 210 hours of fieldwork or independent research, all PoE undergraduates develop professional skills specific to their capstone project, and many prepare for the experience by taking suites of courses to develop specific areas of expertise. Graduates have pursued careers or graduate studies in policy, law, environmental planning, community organizing, environmental health, nonprofit administration, and environmental education.

- Instructional and Research Facilities: The Program on the Environment Multipurpose Room, centrally located in 258 Mary Gates Hall, houses a small library of environmental resources, contains computer workstations for students, and serves as a meeting and study space. Because PoE is an interdisciplinary program, its students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.

- Honors Options Available: Departmental Honors. See adviser for details.

- Research, Internships, and Service Learning: All environmental studies majors complete a senior capstone experience, which includes an internship with a community-based organization or government agency, an undergraduate research project, and/or international fieldwork or study abroad. Program on the Environment students receive a weekly email listing of internship and career opportunities. For information on identifying internship, research, and career opportunities, see the "Undergraduate Resources" section of the department's Web page.

- Department Scholarships: None offered.

- Student Organizations/Associations: The UW Earth Club organizes the annual UW Earth Week events and year-round activities such as public-service projects, panel discussions, and social gatherings.

Of Special Note: Many students majoring in environmental studies also pursue a complementary Bachelor of Arts degree in humanities or social science or a complementary Bachelor of Science degree in physical or natural sciences, engineering, forestry, or fisheries.

Students electing to pursue either a double major or a double degree are limited to 15 credits of overlap between the two major/degree programs.

Course Descriptions

ENVIR 101 The Living Aquatic World (5) I&S/NW

ENVIR 103 Society and the Oceans (5) I&S/NW
Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as “tragedy of the commons”. Offered: jointly with SIS/SMA 103

ENVIR 110 Introduction to Environmental Science (5) I&S/NW Harrison
Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Offered: jointly with ESRM 100; AWSpS.

ENVIR 150 Orientation to Environmental Studies (2)
Broad overview of environmental studies. Faculty members and professionals from outside the University identify opportunities for study and work in the field and offer suggestions for optimal academic preparation. Strong emphasis on class participation and experiential learning.

ENVIR 201 Environmental Case Studies: Ecology and Conservation (5, max. 10) I&S/NW
Exploration of ecology and conservation case studies from natural science, historical, socioeconomic, legal, political, and ethical perspectives. Involves gathering information, analyzing data, applying mathematical and statistical reasoning and decision-making schemes, evaluating conflicting views based on cultural and philosophical frames of reference, and developing communications and research skills.

ENVIR 202 Environmental Case Studies: Population and Health (5, max. 10) I&S/NW
Exploration of population and health issues or case studies from natural science, historical, socioeconomic, legal, political, and ethical cultural perspectives. Involves gathering information, analyzing data, applying mathematical and statistical reasoning and decision-making schemes, evaluating conflicting views based on cultural and philosophical frames of reference, and developing communications and research skills.

ENVIR 203 Environmental Case Studies: Resources (5, max. 10) I&S/NW
ENVIR 313 Environmental Earth Science (5) NW
Rhines
Lab-based introduction to Earth’s environment, primarily for non-scientists: energy, atmosphere, ocean, and biosphere stability. Beginning from basic science, growing toward impacts and applications; e.g., study of the sun’s energy spectrum and greenhouse effect, construction of solar box cookers, study of energy profiles of developing countries. Offered: Sp.

ENVIR 215 Earth, Air, Water: The Human Context (5) NW
Rhines
Lab-based introduction to Earth’s environment, primarily for non-scientists: energy, atmosphere, ocean, and biosphere stability. Beginning from basic science, growing toward impacts and applications; e.g., study of the sun’s energy spectrum and greenhouse effect, construction of solar box cookers, study of energy profiles of developing countries. Offered: Sp.

ENVIR 220 Urban Ecology (5) I&S/NW
Examines nature-society interactions in urban settings. Drivers, patterns, processes, impacts and consequences of urban and urbanizing ecosystems. Presents the state of our knowledge of urban ecology in its interdisciplinary format. Offered: W.

ENVIR 235 Introduction to Environmental Economics (5) I&S/NW
Introduces non-economics majors to environmental and natural resource economics. Discussion of fundamental economic concepts, including markets and private property. Students learn basic tools used in the economic assessment of environmental problems and apply these methods to key environmental issues. Offered: jointly with ECON 235.

ENVIR 313 Environmental Earth Science (5) NW
Swanson
Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 210, ESS 211, GEOL 101, GEOL 201, or GEOL 205. Offered: jointly with ESS 315; A.

ENVIR 341 Energy and Environment (3) NW Malte
Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with M E 341/CHM E 341; A.

ENVIR 350 Independent Fieldwork (1-3, max. 5)
Fieldwork, coursework, or other learning experience conducted off-campus, but supervised by UW faculty. 1 academic credit for 30 hours of environment-related work per quarter. Credit/no credit only.

ENVIR 360 Environmental Norms in International Politics (5) I&S Ingebritsen
Surveys development of international environmental consciousness from 1960s to present. Models of “green development”; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with SCAND 350/SIS 350.

ENVIR 362 Introduction to Restoration Ecology (5) I&S/NW Gold
An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: jointly with ESRM 362; A.

ENVIR 371 Anthropology of Development (5) I&S Sivaramakrishnan
Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 371.

ENVIR 379 Environmental Sociology (5) I&S/NW Lee
Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/SOC 379; WS

ENVIR 380 Study Abroad: Comparative International Perspectives on Cities and the Environment (15) I&S/NW
Interdisciplinary approach to integrating urban and environmental issues in two or more world cities. Includes site visits and interactions with foreign scholars and practitioners. Topics may include coastal development, transportation, parks, marine conservation, indigenous cultures, environmental planning, gentrification, urban governance, and watershed management. Offered: jointly with TEST/T URB 380

ENVIR 415 Sustainability and Design for Environment (3) Cooper
Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of design for environment, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/M E 415; S.

ENVIR 418 Communications and the Environment (5) I&S
Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with COM 418.

ENVIR 433 Environmental Degradation in the Tropics (5) I&S/NW
Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast Asian coral reefs, and implications of environmental management techniques. Offered: jointly with SIS 433/SMA 433.

ENVIR 439 Attaining a Sustainable Society (1/3, max. 3) I&S/Karr
Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: jointly with FISH 439; A.

ENVIR 442 Renewable Energy (3) NW Malte
Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with CHEM E 442/ M E 442; W.

ENVIR 450 Special Topics in Environmental Studies (1-5, max. 15)
Format may range from seminar/discussion to formal lectures to
ENVR 451 Comparative Historical and Social Ecology of the Tropics (5) I&S Sivaramakrishnan
Historical and social aspects of tropical environmental change. Comparative analysis of resource management, conservation, and environmental regulation issues in Asia, Africa, and Latin America from cultural and political economic perspectives. Special focus on issues of state policy, expert knowledge, social conflict, and international politics. Prerequisite: ANTH 210. Offered: jointly with ANTH 451.

ENVR 459 Culture, Ecology and Politics (5) I&S Pena
Critical studies of class, gender and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecoculturalism, environmental justice, and social ecology. Offered: jointly with ANTH 459.

ENVR 460 Institutionalizing Sustainable Ecological Practices. (5) I&S/NW Lee
Introduction to how sustainability and conservation are possible. Case studies of successful institutionalization of sustainable ecological practices, including curbside and biosolids recycling, ecological restoration, bioremediation, sustainable wood production, and product certification. Emphasis on individual student projects. Offered: jointly with ESC 460; Sp.

ENVR 462 Restoration Ecology Capstone: Introduction (2)
First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with ESRM/TESC/BES 462

ENVR 474 Problem Analysis in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with GEOG 476/CFR 474; A.

ENVR 475 Environmental Impacts of Small Scale Societies (5) I&S/NW Grayson, Smith
Examines the environmental impacts (positive and negative) among prehistoric and historic/ethnographic small-scale (hunter-gatherer and horticultural) societies worldwide, and debates these impacts, within a theoretical framework provided by evolutionary ecology and biogeography. Offered: jointly with BIO A 475.

ENVR 476 Introduction to Environmental Law and Process (3) I&S Bryant, Hershman
Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with SMA 476; A.

ENVR 477 Marine Conservation (3) NW Parrish
Terrestrially based concepts of conservation biology applied to marine systems: human activities affecting the marine environment including fishing and pollution, influence of legal and cultural frameworks, and ecosystem management. Offered: jointly with BIOL 477; W.

ENVR 478 Topics in Sustainable Fisheries (3, max. 9) Parrish
Seminar series featuring local, national and internationally known speakers in fisheries management and conservation. Case studies. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Final paper. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with FISH 478/BIOL 478; odd years; W.

ENVR 480 Marine Resource Conservation and Management (3) I&S/NW Gallucci, Miller
Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/technology, public policy, and business. Format emphasizes interactive, hands-on approaches to problem solving, with visiting lecturers by academic and/or external practitioners.

ENVR 484 Research in Urban Ecology (5) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present results section. Prerequisite: either ENVR 486, CFR 474, or GEOG 486. Offered: jointly with CFR 475/GEOG 487; W.

ENVR 485 Independent Study (1-3, max. 5)
Independent reading and/or research. Limited to majors and minors in Environmental Studies.

ENVR 486 Marine Resource Conservation and Management (3) I&S/NW Gallucci, Miller
Techniques and philosophy for conservation, management and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480/SM 480.

Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: either ENVR 486, CFR 474, or GEOG 486. Offered: jointly with CFR 475/GEOG 487; W.

ENVR 488 Graduate Seminar in Urban Ecology (3) I&S/NW Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen
Focuses on urban ecological concepts and provides an in-depth understanding of urban ecology. Students analyze, present, and begin to interpret data that is relevant to addressing urban ecological problems. Credit/no credit only. Offered: jointly with ENVIR 487; W.

ENVR 489 Capstone Experience (2-8, max. 8)
Capstone experiences, arranged during ENVR 490, may include internships and other applied environmental work, directed research on environmental topics, or team efforts. Credit/no credit only. Prerequisite: ENVR 490. Offered: AWSp.

ENVR 490 Pre-Capstone Seminar (2)
Critique readings on environmental education and applied environmental work. Define a capstone experience based on personal interests and skills and complete a learning contract and a contextual bibliography for ENVR 491. Recommended: 15 credits of ENVR 201/202/203. Offered: ASp.

ENVR 492 Post-Capstone Seminar (3)
Build writing skills around course readings and discussion. Complete three final products: a capstone analysis paper summarizing and contextualizing work in ENVR 491; an integrative essay reflecting on personal education; and a formal capstone presentation. Prerequisite: ENVR 491. Offered: ASp.

ENVR 498 Independent Study (1-3, max. 5)
Independent reading and/or research. Limited to majors and minors in Environmental Studies.

ENVR 500 Graduate Seminar in Environmental Studies (1-5, max. 15)
Exploration of multidisciplinary themes in environmental studies. Topics vary.

ENVR 501 Graduate Seminar in Environmental Management (1-5, max. 15)
Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/technology, public policy, and business. Format emphasizes interactive, hands-on approaches to problem solving, with visiting lecturers by academic and/or external practitioners.
Applies economic and business principles (marketing, accounting, operations) to understand interactions between business and the natural environment and how environmental issues influence business strategy. Theory and case studies explore strategies that both respond to and seek competitive advantage from firms' interactions with the environment.

**ENVIR 535 Foresight in Science and Technology: Choices and Consequences (3)**
Examination of the foresight (or lack of it) with which we practice science and use technology. Contrasts potential risks of various choices with potential benefits. Credit/no credit only. Offered: jointly with PHYS 535/PHIL 501/ZOOL 523.

**ENVIR 550 Global Commercialization of Environmental Technologies (4)**
Students work on faculty-supervised interdisciplinary teams (with students from business, sciences/engineering, and public policy) developing business plans for commercializing environmentally friendly technologies around the world. The projects involve collaborating with the EPA's Environmental Technology Commercialization Center, with Battelle Labs, and with Puget Sound businesses. Offered: jointly with BUS 550.

**ENVIR 585 Climate Impacts on the Pacific Northwest (4)**
*Mantua, Snover*
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include: the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S/ESS/SMA 585; Sp.

**Quantitative Science**
Adviser
171 Mary Gates Hall, Box 352803 206-543-2550
cqs@u.washington.edu

The Center for Quantitative Science is an interdisciplinary program administered by the Office of Undergraduate Education. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resource management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the College of Forest Resources and the School of Aquatic and Fishery Sciences.

Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

**Minor**

*Minor Requirements: A 26-30 credits, as follows:*

- **Core courses (20 credits):** Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482
- **Electives (6-10 credits):** Two Q SCI courses at the 300 or 400 level to include one course from Q SCI 480, Q SCI 483, Q SCI 486
- A minimum grade of 2.0 is required in each course taken as part of the minor

**Course Descriptions**

Q SCI 110 Introduction to Environmental Modeling (5) NW, QSR Gredlich, Bare, Francis
Introduction to the development and use of system models for studying the dynamics of natural and managed systems. Examines modeling process using natural resource management, environmental science, and biological examples. Uses STELLA software to illustrate systems concepts and to design, build, and explore model behavior.

Q SCI 291 Analysis for Biologists I (5) NW, QSR Briggs, Greulich, Johnson
Introduction to differential calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include optimization and curve analysis. Prerequisite: either MATH 120, a minimum score of 2 on advanced placement test, or a minimum score of 67% on MATHPC placement test. Offered: AWS.

Q SCI 292 Analysis for Biologists II (5) NW, QSR Gallucci, Greulich, Johnson
Introduction to integral calculus, emphasizing development of basic skills. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include areas under curves, volumes, and differential equations. Prerequisite: Q SCI 291. Offered: WSpS.

Q SCI 293 Analysis for Biologists III (5) NW, QSR Gallucci, Johnson
Additional topics in calculus and matrix algebra. Examples promote understanding of mathematics and applications to modeling and solving biological problems. Topics include infinite series, differential equations, vectors, functions of several variables, partial derivatives, and use of computer software. Prerequisite: Q SCI 292.

Q SCI 381 Introduction to Probability and Statistics (5) NW, QSR
Applications to biological and natural resource problems stressing the formulation and interpretation of statistical tests. Random variables, expectations, variances, binomial, hypergeometric, Poisson, normal, chi-square, “t” and “F” distributions. Prerequisite: either MATH 120, a minimum score of 2 on advanced placement test, or a minimum score of 67% on MATHPC placement test. Offered: AWSpS.

Q SCI 392 Techniques of Applied Mathematics in Biology I (3) NW
Ordinary differential equations-linear and nonlinear; systems of differential equations; approximation techniques, numerical solution techniques; applications to biological processes. Prerequisite: Q SCI 292.

Q SCI 393 Techniques of Applied Mathematics in Biology II (3) NW
Applications of advanced ordinary differential equations, special functions, and partial differential equations to descriptions of biological phenomena. Particular emphasis on transport in biological systems, including diffusion and fluid flow. Prerequisite: Q SCI 392.

Q SCI 456 Introduction to Quantitative Fishery Science (5) NW
Conveys fundamental concepts of fish population dynamics and fishery management within context of real-world fisheries problems. Lectures discuss notation, terminology, mathematical models, fisheries principles, and case studies. Laboratory time devoted to practical applications, problems. Recommended: either MATH 125, MATH 135, or Q SCI 292; Q SCI 381. Offered: jointly with FISH 456; A.

Q SCI 458 Fisheries Stock Assessment (4) NW Francis
Emphasizes quantitative analysis of fisheries data to determine how the fishery would respond to alternative management actions. Major topics include production models, stocks and recruitment, catch at age analysis, and formulation of harvest strategies. Recommended: either Q SCI 456 or FISH 456. Offered: jointly with FISH 458; Sp.
Q SCI 477 Quantitative Wildlife Assessment (5) NW Skalski
Focuses on wildlife sampling techniques for estimating animal abundance, home range, and survival rates in terrestrial populations. The design of wildlife investigations for the purposes of impact assessment, research, and resource management is integrated with estimation schemes and demographic models in a quantitative framework. Prerequisite: Q SCI 292; Q SCI 482.

Q SCI 480 Sampling Theory for Biologists (3) NW Gallucci, Rustagi
Theory and applications of sampling finite populations including: simple random sampling, stratified random sampling, ratio estimates, regression estimates, systematic sampling, cluster sampling, sample size determinations, applications in fisheries and forestry. Other topics include sampling plant and animal populations, sampling distributions, estimation of parameters and statistical treatment of data. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 480; even years.

Q SCI 482 Statistical Inference in Applied Research (5) NW Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either STAT 311 or Q SCI 381. Offered: AWS.

Q SCI 483 Statistical Inference in Applied Research (5) NW Analysis of variance and covariance; chi square tests; nonparametric procedures multiple and curvilinear regression; experimental design and power of tests. Application to biological problems. Use of computer programs in standard statistical problems. Prerequisite: either Q SCI 381 or Q SCI 482. Offered: W.

Q SCI 486 Experimental Design (3) NW Topics in analysis of variance and experimental designs: choice of designs, comparison of efficiency, power, sample size, pseudoreplication, factor structure. Prerequisite: Q SCI 482; recommended: Q SCI 483. Offered: jointly with STAT 486.

Q SCI 499 Undergraduate Research (1-5, max. 5)
Special studies in quantitative ecology and resource management for which there is not sufficient demand to warrant the organization of regular courses. Credit/no credit only.

University Conjoint

Course Descriptions

UCONJ 100 Introduction to Health Professions (1) Garcia
Opportunities in health professions. Information on educational requirements, professional/patient interaction, licensing, registering for practice in profession, salaries, and career opportunities.

UCONJ 290 Diversity Issues in the Health Care Environment (1-2, max. 2) I&S
Introduction to the complexity of the issues surrounding culture and health, the interrelatedness of ethic and cultural characteristics and health care access, health and health care concerns of specific communities, traditional and alternative health care practices, and community-based promotion and disease prevention programs.

UCONJ 411 Psychology of Aging (3) Kiyak
Focuses on developing the skills necessary for critically evaluating current psychological theories of aging, research findings in this area, and the implications of findings on the aging person. Special consideration given to the effects of socioeconomic, sex, and ethnic differences in the psychology of aging. Open to upper-division undergraduates and beginning graduate students interested in the field of gerontology.

UCONJ 412 The Family in Later Life (3)
Focuses on issues affecting older persons and their families. Addresses demographic influences on families; roles, rules for and function of family members; inter-generational relationships; economics, political, and social policy affecting family life; and cultural variations and supportive resources for older persons and their families.

UCONJ 413 Current Issues in Aging (3)
Describes the population trends at work in the United States and other developed nations with significant societal implications for care and management of elders. Evaluates selected public policies related to aging. Gives students proficiency in using resources related to aging on the Internet. Evaluates alternative long-term care models.

UCONJ 420 Biological Safety Practices (1) Kenny
General introduction to appropriate laboratory procedures used for handling potentially hazardous biological agents. Particular focus on laboratory safety and appropriate protocols that should be employed by those engaged in infectious disease and recombinant DNA research. Credit/no credit only.

UCONJ 422 Sexually Transmitted Diseases: An Overview (2) Gardner
Clinically oriented course designed to provide a knowledge base for upper division health science students to participate effectively in community outreach programs for the prevention of sexually-transmitted diseases. Offered cooperatively by the departments of Pharmacy and Medicine.

UCONJ 440 Biological Aspects of Aging (3)
Introductory course on aspects of the biology of human aging and of functional changes associated with normal aging and with those illnesses that may be present in the elderly. Focus on the relationship between changes in physical function, environment, and quality of life. Includes theoretical perspective on aging as well as the aging process in specific physiological systems. Designed for upper-level undergraduate students with an interest in aging.

UCONJ 442 Social and Cultural Aspects of Aging (3)
Involves faculty members from the various social science fields examining the range and variation of relationships among age-linked attitudes and cultural values related to aging; the social and economic factors that influence the elderly in contemporary society; the effects of ethnic and sex differences in sociocultural aging. Open to upper-division undergraduates and beginning graduate students interested in gerontology.

UCONJ 443 Interdisciplinary Seminar on Aging (1-6, max. 15) Borgatta
Interdisciplinary examination of the contemporary theoretical literature on gerontology and long-term care. For upper-level undergraduate and graduate students with an interest in aging. Quarterly offerings available from the Institute on Aging.

UCONJ 444 Interdisciplinary Collaborative Teams in Health Care (1-5, max. 10)
Course open to students in UW Health Sciences schools. Students function as an interdisciplinary learning group within a problem based learning framework. The primary goal of the course is to promote the development of interdisciplinary practice in the care of urban and rural underserved patient populations. Credit/no credit only.

UCONJ 445 Bioterrorism Awareness for Health Professionals (1)
Provides content in bioterrorism awareness for students in the health professions. First in a two-course interdisciplinary sequence focusing on awareness level training designed to enhance recognition of an injury of illness potentially arising as a result of exposure to
select chemical and biological agents. Credit/no credit.

UCONJ 446 Bioterrorism Preparedness and Response for Health Professionals (2, max. 6)
Focuses on bioterrorism preparedness and response for health professionals. Includes planning, system, and policy issues with an emphasis on clinical relevance. Content compliments UCONJ 445 (not a prerequisite).

UCONJ 450 Health Care in the Underserved Community (1)

UCONJ 490 Social Sensitivity in Health Care (3) I&S Multidisciplinary course for health professions students. Health professionals’ roles in dealing with social, cultural, and physical barriers to health care of low-income groups and ethnic people of color. Personal involvement through field experiences and faculty drawn from affected communities as well as health sciences, social work schools. Credit/no credit only.

UCONJ 497 Health Care in a Rural Community (3)
Critical analysis built upon concepts relative to interdisciplinary health-care delivery in a rural community. Students develop an organizational model for rural health care and study innovative ways of mobilizing community resources and support for a comprehensive rural health-care system. Pharmacy students, nurses, and other health professionals study application of theory in an appropriate clinical setting within the conceptual framework of each student’s professional field.

UCONJ 500 Seminar in Interprofessional Collaboration (1-3), max. 7 Interdisciplinary teams composed of students and community members placed in diverse urban settings to address an identified community need by developing and implementing collaborative, community-based projects. Seminars emphasize interprofessional collaborative practice, intrapersonal understanding, interpersonal group process skills, organizational savvy, community awareness, and sociocultural sensitivity. Graduate School of Public Affairs. Offered: AWSp.

UCONJ 501 International Health (1) Hunt Weekly seminar introduces students to issues and opportunities of participating in health care systems in other countries. Guest speakers bring many perspectives of international health care experiences. Class discussions help prepare students for international placements.

UCONJ 502 International Health (1) Hunt Weekly seminar introduces students to issues and opportunities of participating in health care systems in other countries. Guest speakers bring many perspectives of international health care experiences. Class discussions help prepare students for international placements.

UCONJ 503 International Health (1) Hunt Weekly seminar introduces students to issues and opportunities of participating in health care systems in other countries. Guest speakers bring many perspectives of international health care experiences. Class discussions help prepare students for international placements.

UCONJ 505 Professional Interpersonal Styles of Communication with Families to Enhance Health Outcomes (3)
Complex communication processes evaluated and applied to the family as unit of interaction within interdisciplinary context. Empirical based communication practices analyzed considering family variables adherence, satisfaction, health outcomes, and cost effectiveness. Engagement in experiential learning through challenging clinical scenarios. Emphasizes cultural competencies. Prerequisite: professional student or permission of instructor.

UCONJ 511 Issues in Home Health Care Delivery (3)
Service delivery issues relevant to provision of health care services across the life span in the home setting. Home health care as an important component in health care system. Individual and multidisciplinary practice of health care disciplines. Emphasis on research literature. Prerequisite: graduate student standing, upper division with permission of instructor.

UCONJ 513 Dynamics of Patient Management: Diabetes Mellitus (2)
Analysis of advanced knowledge related to interdisciplinary management of diabetes. Commonalities and differences in provider approaches, recent research and its effect on management practices, collaborative communication, knowledge application. Brief interactive presentations, decision-making opportunities, discussion. Credit/no credit only. Prerequisite: graduate standing in pharmacy, dietetics, nursing; third- or fourth-year medical student; or permission of instructor.

UCONJ 515 Promoting Health Behavior for Individuals and Families (2/4, max. 4) Brandt, Jordan, Kieckhefer, Lewis, Solchaney, Spiker Practice-focused, evidence-based, theory-driven intervention strategies to promote healing and health behavior at selected points from birth to death. Relevant for clinicians from diverse health settings. Emphasis on clinical skill development including decision-making and outcome management applicable for individuals and families. Prerequisite: permission of instructor. Offered: Sp.

UCONJ 520 Molecular Biophysics Research Seminar (1) Parson A series of research seminars for faculty and students involved with the molecular biophysics program. Credit/no credit only.

UCONJ 524 Developmental Neurobiology (3) Raible, Reb, Roelink, Rabel Survey of contemporary issues in developmental neurobiology, including neurogenesis and differentiation; electrophysiological, morphological, and neurochemical regulation of cellular phenotype; neuronal pathways and synaptic contacts; cellular and synaptic plasticity; and behavior. Examination of molecular biological, morphological, electrophysiological, and behavioral approaches. Prerequisite: background in neurophysiology, neuroanatomy, molecular neurobiology. Offered: Sp.

UCONJ 525 Overview of Faculty Research in Neurobiology (1)
Reviews research topics currently being studied in neurobiology. Student preparation consists of reading pertinent articles published on each topic. Credit/no credit only. Prerequisite: first-year graduate student in neurobiology.

UCONJ 530 Issues in Indian Health (3)
Survey of historical and contemporary issues in Indian Health. Covers Indian contributions to health, traditional Indian Medicine, current disease epidemiology, development of Federal Indian Health policy, the Indian Health Service, tribal health programs, and consequences of major legislation on Indian Health. Prerequisite: current health science student or permission of instructor.

UCONJ 532 Introduction to Mind Body Medicine-An Experiential Elective (2)
Sessions contain a didactic component followed by an experiential component and cover a variety of self-care techniques including meditation, exercise, and nutrition. The goals are to promote personal well being, a healthy lifestyle, reduce burnout, and reduce academic difficulties. Credit/no credit only.

UCONJ 540 Environmental Change and Human Health: The Role of the Health Professional (2) Oberle, Rosenblatt Explores the effect of environmental deterioration on human
health, and presents tools to address the problem. Offered: Sp.

UCONJ 548 Current Issues in First Nations Behavioral Health: Mental Health and Substance Abuse (3)
Historical and intergenerational antecedents of tribal psychiatric and substance abuse disorders. Oppression, economic circumstances, and family functioning as shaping mechanisms for attachment. Implications of insufficient attachment for neuro-development and developmental psychopathology. Traditional vs. mental health and substance abuse assessment and treatment. Self as provider to tribal clients, communities, systems.

UCONJ 555 Principles of STD/HIV Research (3)
Provides MD and PhD fellows and graduate students with a comprehensive overview of the current state of knowledge in specific areas of STD/HIV research, including study design, laboratory methods, production of instruments for data collection, and methods for data analysis. Credit/no credit only.

UCONJ 584 Plant Tumors (1, max. 9) Gordon
Discussion of the literature of plant tumors and current research work being carried on in this area at the University. Offered cooperatively by the departments of Biochemistry, Botany, and Microbiology and Immunology. Credit/no credit only. Prerequisite: offered only to persons actively pursuing work in this area.

School of Law
Dean
W.H. (Joe) Knight, Jr.

Associate Deans
Penny A. Hazelton
Patricia C. Kuszler

Assistant Deans
Dexter Bailey
Mary A. Hotchkiss
Sandra E. Madrid

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association’s list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States.

Additional information about the School is contained in the current School of Law catalog.

Facilities and Services
The School of Law is housed in the new William Gates Hall. It is equipped with classroom, library, lounge, and office facilities. The Marian Gould Gallagher Law Library is one of the finest law libraries in the country. Its collection, among the largest university law collections on the West Coast, currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. An experienced audiovisual staff directs the use of video equipment in the trial advocacy and moot court programs. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.

Juris Doctor Program
The Juris Doctor degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.

Exception for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. J.D. candidates are required to perform 60 hours of public-service legal work during the second or third year.

Admission
New students may enter the School of Law only in autumn quarter. Instruction begins for first-year students a few days earlier than the time set for upper-class students. Beginning students must have received a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data Assembly Service (LSDAS). Registration packets and test information are available at all law schools and from Law School Admission Council, Box 2000, 661 Penn Street, Newtown, PA 18940-0998. Email: lsacinfo@lsac.org.

No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in The Official Guide to U.S. Law Schools (2000 Edition). Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration for admission, an applicant must have complete credentials, including the LSDAS report, filed in the School of Law by February 1. An application fee (at this writing, $50) also is required.

Transfer Applicants
Students who have completed at least one year at a member school of the Association of American Law Schools may apply to this school for admission with advanced standing with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a non-degree candidate.

Applications should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 7.

Applications are considered only if vacancies exist. Selection of the applicant is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body. Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

Financial Aid
Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all of these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, 206-543-6101, offa@u.washington.edu. Applicants for admission should not wait until they have been admitted before
School of Law grants are awarded primarily on the basis of financial need, although scholarship, or other factors may be considered with regard to certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; uwlawaid@u.washington.edu.

Inquiries
A more detailed statement on admission policy and application procedure is available in the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-4617; admissions@law.washington.edu; 206-543-4078.

Graduate Program
Graduate Program Coordinator
William Gates Hall, Box 353020
206-543-4937
gradlaw@u.washington.edu

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LL.M.) in law and marine affairs, Asian and comparative law, the law of sustainable international development, and taxation. The School of Law offers the Doctor of Philosophy (Ph.D.) degree in Asian and comparative law only. The requirements for each program are as follows:

Asian Law Program
The Master of Laws degree program in Asian and comparative law is designed for students with career and research interests in one or more of the legal systems of East Asia, with particular emphasis on that of Japan, as well as for lawyers from East Asia seeking advanced comparative study of American law. The Asian law program is structured around extensive course offerings involving comparative study of basic areas of United States and East Asian law and tutorials in areas of special interest to each student.

Admission to the LL.M. degree program in Asian and comparative law is limited to language-qualified applicants who have received the first degree in law and who have a record of superior academic achievement. Graduates of American law schools must have a degree from an ABA-accredited institution. The applicant must be competent in an East Asian language (or, in the case of foreign students, in English). Students without the required competence may be admitted to the program, but must successfully complete an approved program of intensive study of an East Asian language before beginning their studies. The program contemplates one year in residence, at least 36 credits, and an acceptable major research undertaking.

Admission to the Ph.D. program in law is limited to exceptional scholar-lawyers who are fluent in English and in either Japanese, Chinese, or Korean. Prospective Ph.D. students must normally complete the LL.M. program before being accepted as Ph.D. students. The core of the program is a major creative research project using Asian-language sources as well as English-language sources. At least two, and usually three, years in residence are necessary in order to accomplish the work that must be done in order to pass the General Examination that precedes candidacy for the doctoral degree. An acceptable dissertation must thereafter be submitted to complete the requirements for the degree. The Candidate may spend a year abroad while working on the dissertation but must be in residence during the quarter in which the degree is to be conferred.

Law and Marine Affairs Emphasis
Students who have acquired a first degree in law can become prospective candidates for the LL.M. degree in law and marine affairs. Graduates of American law schools must have a degree from an ABA-accredited school. Particular emphasis is placed on interdisciplinary aspects of marine affairs and coastal zone management. Attainment of the LL.M. degree with specialization in law and marine affairs requires satisfactory completion of 40 credits of course and research work, at least 15 of which must be in the School of Law. In the School of Law, courses include U.S. Coastal and Ocean Law, International Law of the Sea, Marine Law and Policy, and Admiralty and Maritime Law. Pertinent courses are also offered in the Schools of Aquatic and Fishery Sciences, Marine Affairs, and Oceanography, the Graduate School of Public Affairs, the College of Engineering, and the Departments of Economics and Geography.

Law of Sustainable International Development Emphasis
Students may earn an LL.M. degree in the law of sustainable international development. This LL.M. degree option is open to students with a first degree in law. Graduates of American law schools must have a degree from an ABA-accredited school. Emphasis is placed on the interdisciplinary study of sustainable international development, and students may earn more than half their credits in courses outside the School of Law, including courses offered by the Schools of International Studies and Public Health, and the Departments of Economics, Political Science, and Sociology. In the School of Law, courses offered include Legal Problems of Economic Development (required); International Environmental Law (required); Public Land Law; International Commercial Law; and Land, American Culture, and the Law. Attainment of the LL.M. degree with specialization in the law of sustainable international development requires satisfactory completion of 40 credits of course and research work, at least 15 of which must be in the School of Law, and the taking of courses in at least three other departments other than law. As part of their work, students must write one substantial paper.

Taxation
Students may earn an LL.M. degree in taxation. This LL.M. degree option is open to students with a first degree in law. Graduates of American law schools must have a degree from an ABA-accredited school. International students must have a first degree in law or equivalent and may be admitted by the permission of the director. A candidate for the LL.M. degree must successfully complete 36 quarter hours of course work. Students who qualify may be enrolled either on a full-time or a part-time basis. Full-time students can complete the course of study within one nine-month academic year, while those participating on a part-time basis are allowed six academic years to complete the degree. Generally all courses must be taken from the Graduate Tax curriculum, although candidates for the LL.M. may, with the permission of the director, take up to 6 credits of course work in the Law School’s J.D. curriculum. Certain core courses are required: Federal Tax Controversies and Procedure, Taxation of Corporations and Shareholders, Tax Accounting, Property Dispositions and Transactions, and Taxation of Partners and Partnerships. The remainder of the curriculum is elective.

Financial Aid
Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; gradlaw@u.washington.edu; 206-543-4937.

Inquiries
Requests for applications and program brochures for all School of Law LL.M. programs except the LL.M. in taxation, as well as information regarding application procedures, should be addressed to
Presidential powers. Open to law and nonlaw students. Protection clause, the Religion clauses, freedom of speech, and Supreme Court’s recognition of fundamental rights, the Equal judicial review, application of the Bill of Rights to the states, Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court’s recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and Presidential powers. Open to law and nonlaw students.

Course Descriptions

LAW 300 Introduction to Law (3-6, max. 5) I&S
Understanding the legal system, its functions in the social-economic order, legal reasoning, and the world of legal education and the legal profession. Open to nonlaw students only.

LAW 410 Problems in Professional Responsibility (4) I&S
LAW 415 Criminal Justice (3) I&S
Examines pre-trial rights of persons suspected or accused of crime, primarily those rights covered by the Fourth, Fifth, Sixth, and Fourteenth Amendments of the U.S. Constitution.

LAW 416 International Contracting: Negotiation and Drafting (3) I&S
Skills course designed to introduce process and problems of negotiating and drafting international agreements. Client interviewing and counseling and negotiation and drafting of a contract between parties in the United States and Japan. Credit/no credit only. Open to nonlaw students only.

LAW 422 Copyright (3) I&S
LAW 429 Public Land Law (3) I&S
LAW 440 Legal Issues of Internet Law (3) I&S
Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, property rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

LAW 442 Land Law and the Urban Environment (3) I&S
Examination of the major legal tools available to shape the urban environment by controlling the use of land. Considers zoning, subdivision controls, urban renewal, private land-use restrictions, and the rules of nuisance law. Credit/no credit only. Open to law and nonlaw students.

LAW 443 The Legal Process I (3/5) I&S
The system of law and its functions rather than substantive law pertaining to any particular subject or discipline. Open only to nonlaw students. Credit/no credit only.

LAW 444 Constitution and American Public Education (3-6, max. 6) I&S
Examines the relationships between the Constitution of the United States and the American system of public education, excluding higher education, in areas of constitutional freedom and legal controls, racial desegregation, and equal educational opportunity, including equal financing of the public schools. Credit/no credit only. Offered: jointly with EDLPS 444.

LAW 445 Major Issues in American Constitutional Law (3) I&S
Significant themes in American constitutional law. Doctrine of judicial review, application of the Bill of Rights to the states, Supreme Court’s recognition of fundamental rights, the Equal Protection clause, the Religion clauses, freedom of speech, and Presidential powers. Open to law and nonlaw students.

LAW 447 Critical Perspectives in Law (3) I&S
Examination of modern critical legal thought and critics views regarding proposed alternative forms of social ordering.

LAW 467 American Law and the American Indian (3) I&S
Relationship between Indians and the United States from 1789 to the present. Significant constitutional, legislative, and judicial actions. Legal events explored within their political, military, social, and cultural contexts. Comparisons with other minority-group experiences. Offered: jointly with HSTAA 416.

LAW 476 International Economic Relations and Trade Policy (3) I&S
Consideration of international control of national trade policies and permissible transnational reach of national trade or other regulation. The General Agreement on Tariffs and Trade (GATT) and the international monetary system examined from legal and economic perspective. Examination and comparison of prescriptive jurisdiction to public international law.

LAW 477 Law Literature and Film (2-4, max. 4) I&S/VLPA
An examination of literary and cinematic portrayals of and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a “better world.”.

LAW 481 Land, American Culture and the Law: Perspectives on the Use and Ownership of the Natural Environment (1-6, max. 6) I&S
LAW 489 Law and Aging (3) I&S
Survey of principal areas of law of special concern to aging population, considering health care and health care decision-making, public and private income maintenance programs, taxation, guardianships, conservatorships and other methods of protecting the property of the elderly, counseling, and professional responsibility.

LAW B 553 Chinese Legal Tradition (3)
Offered: jointly with SISEA 553.

LAW B 555 Roman Law (3)

LAW B 556 Islamic Law (3)
Selected topics in Islamic law that highlight major aspects of Islamic civilization. Offered: jointly with NEAR E 524.

LAW B 557 Southeast Asian Law (2-4, max. 4)
Two or three countries in Southeast Asia are selected as case studies. Examines their legal and political histories; legal institutions and legal professions; commercial and investment laws; and compliance questions relating to labor standards, corruption, and human rights.

LAW B 558 Doctoral Thesis Seminar (2)
Students draft thesis abstracts, tables of contents, preliminary chapters, and presents arguments orally to identify core theories and applied studies to incorporate in their work. Read a selection of published work and indicative articles drawn from the list of relevant sources for individual thesis-in-development.

LAW B 559 Comparative Law: Europe, Latin America, and East Asia (4)

LAW B 560 Criminal Justice Externship (1-15, max. 15)
Credit/no credit only.

LAW B 561 International Law of the Sea (3)
Offered: jointly with SMA 506.

LAW B 562 Quantitative Methods (4)

LAW B 563 Ocean Policy and Resources Seminar (3-)
Study and research in selected legal problems relating to ocean and coastal law, marine trade and transportation, marine resources, and protection of the marine environment. Students prepare and present a research paper and critique papers prepared by other students. Prerequisite: LAW B 561, LAW B 565.

LAW B 565 U.S. Coastal and Ocean Law (4) Allen
Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation. Offered: jointly with SMA 515.

LAW B 567 General Externship Perspectives Seminar (2)
Credit/no credit only.

LAW B 573 Supreme Court Decision Making (2-4, max. 4)
Examines Supreme Court decision making from both a theoretical and practical perspective. Surveys representative cases on the Court’s current docket. Extensive preparation required of participants, who play the roles of lawyers, justices, and commentators. Emphasis on developing appellate advocacy skills.

LAW B 577 Law, Literature and Film ([2-4]-, max. 4)
An examination of literary and cinematic portrayals of, and issues important to law, lawyers, and the legal system. Considers both portrayals purporting to depict the legal system as well as works envisioning lawyers and the legal system in a “better world.”

LAW B 578 Seminar on Legal Problems of Economic Development ([1-6]-, max. 6)

LAW B 580 Externship Tutorial (2)
Credit/no credit only.

LAW B 581 Land, American Culture, and the Law: Perspectives on the Use and Ownership of the Natural Environment ([1-6]-, max. 6)

LAW B 584 Indian Law Seminar ([2-6]-, max. 6)

LAW B 589 Intellectual Property Law Seminar ([1-4]-, max. 4)

LAW B 590 The United States Constitution: Past, Present, and Future (2)

LAW B 593 Natural Resources Commons Property (3)
A review of the different forms of natural resources and an exploration of the desirability of managing certain resources as commons or private property. Covers a review of the successes and failures by various groups in setting policy in this area.

LAW B 596 International Protection of Human Rights ([2-4]-, max. 6) Stilt

LAW B 597 History of the Formation of the United States Constitution Seminar ([2-6]-, max. 6)

LAW B 598 Advanced Research and Writing in Property Seminar ([1-4]-, max. 4)

LAW B 599 Special Topics (1-12, max. 12)

LAW E 500 Advanced Writing Project (1-3, max. 3)
Independent research and writing project supervised by a faculty member. Projects are structured to develop skills in research, analysis, and writing. Offered: AWSpS.

LAW E 502 White Collar Crime (4)

LAW E 503 Analytic Writing (3)

LAW E 504 Emerging Issues in Urban Government Seminar (6)
Focuses on currently emerging issues in local government, such as municipal regulation of land use, the initiative process, technology and privacy, governmental responses to urban social problems and regional challenges. Production of publishable paper by student satisfies the advanced writing project requirement.

LAW E 505 Frontiers of Tort Law (3)

LAW E 506 Asian Contract Law and Practice (3)
Examines how economic deregulation, financial restructuring and technological change affect contracts in Asia. Topics include licensing, franchise and e-commerce contract in Japan, China, and
Taiwan; contract law and practice in Vietnam and Indonesia; cultural norms in contracting; convergence toward “global standards;” and the role of lawyers and other agents.

**LAW E 507 Access to Justice Seminar (2)**
Explores the legal, ethical, and financial issues involved in providing legal services to moderate income persons. Uses a combination of lectures and interactive discussion. Credit/no credit only.

**LAW E 509 European Union Law (3)**
Survey of the legal origins of the European Union and the synthesis of the major European legal traditions achieved. Focus on the process of harmonizing national laws of the member states and economic integration in the area of competition law and free movement of goods and services.

**LAW E 512 Law, Globalization, and Multinational Corporations (3)**
An interdisciplinary workshop that examines the role of multinational corporations in a global society. Topics include the legal construct of the multinational corporation, the multinational and the state, the multinational and human rights, and the multinational in the international arena. Offered: jointly with SIS 562.

**LAW E 514 The Law of Nonprofit Organizations (2-4, max. 4)**
Examines laws generally applicable to nonprofit corporations and legal issues relating to cooperatives, credit unions, and thrift/mutual associations. Attention given to the Washington Nonprofit Corporations Act with comparable statutes and model legislation.

**LAW E 515 Criminal Justice (3)**

**LAW E 516 Advanced Criminal Procedure (5)**
Covers the formal charging, trial, and appellate stages of criminal proceedings, including grand jury proceedings, prosecutorial discretion in charging, pretrial release and detention, charging and venue joinder and severance, double jeopardy assistance of counsel, discovery, and disclosure, criminal trials appeals, and collateral post conviction remedies. Prerequisite: LAW A 505; LAW B 515.

**LAW E 517 Foreign Trade and Investment Law of the People’s Republic of China (1-4, max. 4)**
Introduction to the regulatory regime governing foreign trade and investment in China and in-depth coverage of key aspects of the regime, with focus on issues faced by U.S. businesses. Covers specific regulations, their implementation in practice, as well as the political and economic background. Offered: jointly with SISEA 517.

**LAW E 519 Philosophy of Law (4)**
Explores jurisprudence as “the jurist’s quest for a systematic vision that will order and illuminate the realities of the law” and legal philosophy as “the philosopher’s effort to understand the legal order and its role in human life.” Examines various texts, emphasizing works of one or more proponents and critics of liberalism.

**LAW E 520 Advanced Trial Advocacy (3)**

**LAW E 521 Sexual Orientation, Gender Identity, and the Law Seminar (1-4, max. 4) Nicolas**
Examines questions regarding sexual orientation and gender identity as they relate to the areas of criminal, constitutional, employment, tort, and family law. Topics include equal protection, freedom of association, public and private employment discrimination, same-sex marriage and non-marital alternative to marriage, parenting, hate crimes legislation, sodomy laws, and the legal profession. Offered: S.

**LAW E 522 Intellectual Property Law Clinic (3)**
Clinical training in intellectual property law. Prerequisite: LAW A 526, LAW E 547, or LAW A 546. Offered: S.

**LAW E 523 Intellectual Property Law Clinic (3)**
Clinical training in intellectual property law. Prerequisite: LAW A 526, LAW E 547, or LAW A 546. Offered: S.

**LAW E 524 Child Advocacy Clinic (4-12), max. 12**
Credit/no credit only.

**LAW E 525 Poverty Law (4)**
Overview of legal issues affecting poor people, including relevant background readings on poverty and access to justice, and selection problems such as housing and homelessness, education, employment issues of low-wage workers, income support and welfare reform, consumer law, family law, and child care.

**LAW E 526 Law Reform in Transition Economies Seminar (2-, max. 6) Clarke, Ramasastry, Taylor**
Using interdisciplinary perspectives and case studies, this seminar probes the assumptions, methods and outcomes of commercial law reform in transition economies. Also highlights and critiques the role of international lawyers in this important, emerging area of practice.

**LAW E 527 Automobile Impoundment Defense Clinic (3/4)**
Clinical training protecting rights of low-income people who stand to lose their vehicles under Seattle’s Driving While License Suspended (DWLS) car impoundment law (akin to a forfeiture program) without having been convicted of DWLS. Counsel walk-up clients at Seattle Municipal Court, conduct legal research on possible challenges to vehicle seizure.

**LAW E 528 Appellate Advocacy Clinic (2-, max. 4)**
Clinical training in appellate litigation with both seminar and practical components dealing with appellate procedure, strategy, and applicable substantive law. Students represent clients in state appellate court, writing at least one appellate brief and participating in oral argument.

**LAW E 529 Tribal Court Criminal Defense Clinic (4-, max. 12)**

**LAW E 530 Sports Law (3/4)**
Analyzes sports cases and materials that cover multiple disciplines, including contracts, torts, constitutional, antitrust, labor and employment, intellectual property, and criminal law. Participation in problem solving exercises and drafting and negotiations sessions, which explore areas like player and coaching contracts, investigation of NCAA rules infractions, and possible sanctions against universities.

**LAW E 531 Basic Income Tax Concepts (3)**
Basic federal income tax principles, how the tax law impacts a wide variety of business and personal transactions and decisions, and what a reformed tax law might look like.

**LAW E 532 Sports Law (3/4)**
Analyzes sports cases and materials that cover multiple disciplines, including contracts, torts, constitutional, antitrust, labor and employment, intellectual property, and criminal law. Participation in problem solving exercises and drafting and negotiations sessions, which explore areas like player and coaching contracts, investigation of NCAA rules infractions, and possible sanctions against universities.

**LAW E 536 Practical and Professional Responsibility Issues in the Small or Solo Law Practice (3-4, max. 4)**
Credit/no credit only.

**LAW E 537 Refugee Law (2)**
Examines the processes in the United States for the admission of refugees and for the adjudication of asylum claims. Explores international refugee policy and evolving legal norms concerning asylum, temporary protection, repatriation, resettlement and internal displacement.

**LAW E 538 International Civil Litigation in U.S. Courts (4)**
Examines the special procedural and substantive law governing both private as well as semi-public disputes in U.S. Courts and arising out of transnational transactions. Explores international arbitration and considers comparative aspects.
LAW E 539 Workshop on E.U., U.K. and U.S. Regulation of E-Commerce and Information Society (2/3)
Compares the different attitudes to regulation of e-commerce and the information society in the U.S. and the European Union. Topics may include: an introduction to European Union institutions, regulatory, cultural themes in the Internet; e-society and e-commerce in Europe; regulation of illegal, harmful content, and Internet Service Provider liability, etc.

LAW E 540 Legal Issues of Internet Law (3)
Introduces the basic legal issues raised by networked digital technologies, such as the Internet. Covers jurisdiction, speech, privacy/access, propriety rights (copyrights, domain names), emerging law, leading policy debates, as well as fundamental Internet technical skills. Offered: S.

LAW E 541 Electronic Commerce and Information Technology (3)
Introduction to legal and policy issues raised by electronic commerce and other emerging information technologies. Topics vary and may include intellectual property and contract issues raised by establishing an online commercial presence, rights and obligations of users of network services including constitutional rights, information privacy, electronic contracts, electronic payments, etc.

LAW E 543 Crime, Privacy, and Accountability on the Internet (2)
An exploration of criminal activity on the Internet and issues that arise in investigating it. Examines the tension between privacy rights and the need for accountability. Includes substantive criminal statutes, constitutional rights and procedural laws that implement privacy and protections, and the practicalities of Internet crime investigations.

LAW E 544 Privacy Law (2)
Examines the legal doctrines of privacy and confidentiality used to protect personal information. Aims to understand how courts and legislatures seek to protect information as new technologies and institutional practices emerge. Studies scope and implications of federal statutes that attempt to establish fair information practices with respect to electronic personal information.

LAW E 547 Legal Protection for Computer Software (3)

LAW E 548 Litigation Strategies in Technology Protection (3)
Deals with procedural and substantive legal issues in enforcement of patents. Proceeds through a litigation in the order that parties normally would. Substantive legal issues will be taught in conjunction with procedural and strategic considerations. Prerequisite: LAW A 546.

LAW E 550 Patent Prosecution (4)
Addresses fundamentals of patent application drafting, through a combination of lectures and assignments. Addresses all aspects of proceedings before the U.S. Patent and Trademark Office, including preparing new applications, and examiner interviews. Recommended: engineering or science background. Prerequisite: LAW A 546.

LAW E 551 Representing Start-ups (4)
Planning-oriented course uses the problem method to explore the corporate tax, and securities law, general business and financial considerations related to small business formation and financing. Prerequisite: LAW A 515; LAW A 530.

LAW E 552 Strategic Technology Licensing (3)
Comprehensive coverage of issues related to exploitation of intellectual property rights as a business asset for new companies, or as a source of income for existing businesses.

LAW E 553 Technology Law and Public Policy (2)
Survey of the domains of public policies that have been affected by the information revolution. Examines issues from Internet taxation, to personal data privacy, information warfare. Discusses the implications of the new public policies and whether it is feasible for states to enact different information policies.

LAW E 554 Technology Law and Public Policy Clinic (2-4), max. 10
Clinical training in legislative and public policy advocacy under supervision of law school faculty. Examines legislative process, drafting, commentary and advocacy, appellate advocacy, and professional responsibility concerns. Supervised practice experience representing public interest with respect to law and technology. Credit/no credit only. Prerequisite: LAW E 553, which may be taken concurrently.

LAW E 555 Advising Privately-Owned Businesses (3)
The role of lawyers as advisors to privately-owned businesses. Uses case studies to examine a broad range of structural planning issues, with emphasis on tax and business considerations, tax traps, and creative planning strategies. Analyzes, compares, and contrasts different business types. Prerequisite: LAW A 530.

Examines the law that governs the American system of democracy and considers the legality and desirability of competing models for structural reform. Considers various methods of voting and representation, the right to vote, and the Voting Rights Act.

LAW E 566 Innocence Project Northwest Clinic (3-4, max. 10)
Offers students clinical training investigating and litigating claims of actual innocence on behalf of prisoners serving lengthy sentences for serious crimes. Open to second- and third-year students in the JD program.

LAW E 567 Survey of Intellectual Property (2-4, max. 4)
O'Connor
Intended for both law students who are only interested in a general overview of intellectual property and non-law students who are seeking a certificate in intellectual property law and policy. Designed as an alternative to Patents, Trademark and Unfair Competition Law, and Copyrights. Offered: W.

LAW E 568 Indian Law Clinic (4, max. 12)
Supervised practice component on Indian law practice and procedure and advocacy skills. Provide legal advice, brief services and representation to low income Indian clients under the direct supervision of a practicing attorney. Client counseling research, negotiation, and community education. Offered: AWSp.

LAW E 569 Advanced Mediation Practicum (3) Ewalt
Advanced clinical practicum in mediation under the supervision of the faculty and experienced mediators. Students convene and mediate cases referred to the Mediation Clinic from government agencies and other sources. Only for students who have successfully completed the Mediation Clinic LAW B 526, or have other comparable experience. Offered: A.

LAW E 575 Telecommunications Law and Policy (2)
Survey basic policy principles underlying our nation’s telecommunications laws. Focus on administrative and statutory law, paying special attention to the design and implementation of the Telecommunications Act of 1996. Addresses the role played by antitrust, economic regulation and constitutional law (particularly the First Amendment) in shaping our nation’s telecommunications landscape.

LAW E 577 Drafting Technology Contracts (3)
An advanced course in drafting and negotiating representative technology business agreements. Surveys such documents as a
technology development agreement, a technology license agreement, an employee agreement, a web site development, a web commerce agreement, a source code agreement, and a technology evaluation agreement.

LAW E 579 International and Foreign Law Research (2)
Overview of international law materials. Examine primary materials in the vernacular and in translations: constitutions, charters, codes, administrative rules, cases, treaties and other international agreements. Focuses on practice tools such as directories, guides, digests, and proceedings. Prerequisite: LAW A 506 or permission of instructor.

LAW E 582 Information Policy: Domestic and Global (5)
National and international information policy: public and private sector policy in terms of privacy, access, and exploitation; technology infrastructures and policies supporting the information industries. Coverage includes freedom of information privacy, copyright, telecommunications, and emerging technologies.

LAW E 588 Trademark and Unfair Competition Law (3)
Hoffmann
Provides a comprehensive review of issues relating to protection of trademarks and other trade identity symbols under the common law and the Federal Lanham Act. Offered: A.

LAW E 589 IP Innovations in Science and Technology (2-, max. 6) Takenaka
Covers controversial intellectual property law and policy questions arising from evolving science, technology and e-commerce, and addresses cutting edge issues from a multidisciplinary perspective. Examines the current legal regimes and research environment and explores innovative methods for maximizing the exploitation of advanced science and technology. Offered: AWSp.

LAW E 592 Federal Appellate Advocacy (1-6, max. 6)
Representations of an otherwise pro se litigant in an appeal in the Ninth Circuit. Preparation of the opening and reply brief and conduct the oral argument. Requires substantial research, multiple drafts, and painstaking familiarity with the record. Prerequisite: permission of the instructor. Credit/no credit only.

LAW E 593 Environmental Law Litigation and Practice (4-, max. 12)
Survey of environmental litigation and practice regarding various environmental issues. Examines information-gathering (Freedom of Information Act), formal discovery, case selection, document control, and presentation in complex litigation, representation of groups, professional responsibility issues, working with scientists/presenting scientific evidence, and trial techniques. Prerequisite: LAW A 527, which may be taken concurrently.

LAW E 594 Environmental Law Clinic (4-, max 12)
Examines applicable environmental law and procedure, skills training, and professional responsibility concerns. Participation in a carefully supervised practice experience representing clients in cases involving environmental issues. Students must be Rule 9 qualified. Credit/no credit only. Prerequisite: LAW A 527; LAW E 593, which may be taken concurrently.

Health Law

Course Descriptions

LAW H 501 Fundamentals of Health Law (4)

LAW H 502 Medical Malpractice (3)

LAW H 503 Medical Ethics and Jurisprudence (3-)

LAW H 504 Legal, Ethical, and Social Issues in Public Health Genetics (3) Kuszler, Mastroianni
Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private health care delivery efforts. Prerequisite: GENET 371 or equivalent. Offered: jointly with PHG 512/MHE 514.

LAW H 507 Law, Medicine, and Ethics in the Context of Pain Management (2)
Reviews the problem of physicians failing to relieve pain of the patients in the dying process and the legal and ethical issues they face as well as the cultural sources of the problem.

LAW H 510 Topics in Law and Medicine ([1-4]-, max. 4)

LAW H 520 Genetics and the Law (2) Kuszler
Considers the legal issues arising from new genetic technologies and information. Statutes, regulations, and cases used to demonstrate the constitutional, contract, and tort law complications resulting from dissemination of these technological advances. Prerequisite: LAW E 562/MHE 514/PHG 512 or permission of instructor. Offered: jointly with PHG 523.

LAW H 524 Forensic Evidence (3)
Examines the application of the rules of evidence in cases that involve forensic evidence. Examines paradigmatic cases involving homicide and physical or sexual assault, although the principles examined are applicable generally in civil and criminal cases.

LAW H 525 Criminal Law and Procedure (3)
Provides an understanding of U.S. criminal law and criminal procedure. Explores basic principles of liability, defenses, and basic constitutional principles governing interactions between police and suspects. Open to forensic nursing students and graduate law students, but not JD students.

LAW H 530 Disability Law (3)
Considers the definition of disability as defined by statute (ADA, FRA), case law, and social perception. Focuses on education law and entitlements, assess to and discrimination in employment, housing, public transportation, and health care.

LAW H 531 Disability Clinic (4-, max. 12)
Clinical training in disability law issues, including access to Medicaid and other public benefits, assistive technology issues, transit accessibility, and low-wage worker accommodation issues, among other possible issues. Students represent clients at Columbia Legal Services under supervision of CLS attorneys. Prerequisite: LAW A 567.

LAW H 534 Mental Health and the Law (3)
Covers medical and legal definitional issues as well as major civil and criminal law issues, including standards and procedures for involuntary commitment; consent for, and informed refusal of, treatment; de-institutionalization/community-based treatment; the insanity defense; competency to stand trial; and punishment of the mentally ill convict.

LAW H 536 Research Ethics and Regulation (3) Mastroianni
Explores the ethical principles and concepts and U.S. laws related to (1) research conducted with animals, (2) research on humans, and (3) the responsible conduct of research Required for graduate students in the Department of Medical History and Ethics, School of Medicine. Offered: jointly with MHE 536. W.

LAW H 540 Health and Human Rights (3)
Examines the basic concepts in the fields of human rights law and public health, and uses those concepts to examine the interdependence and tensions between the two fields. Introduction to the fields of public health and human rights law, examining the impact of health policies and programs on human rights.
LAW H 570 Biotechnology and the Law (3)

LAW H 580 Advanced Health Law (3)
Considers the impact of antitrust law, fraud, and abuse prohibitions, the corporate practice of medicine doctrine, tax law and other state and federal laws upon emerging health care entities. Focuses on integrated health care delivery systems. Prerequisite: LAW A 597.

LAW H 593 Environmental Health Regulation (3)
Introduction to administrative regulation and process. Authority, jurisdiction, and structure of environmental control programs and agencies; the regulatory process; agency acquisition and retention of information; administrative actions; enforcement of environmental health laws; major statues and cases affecting programs.

Intellectual Property Law

Course Descriptions

LAW P 501 Intellectual Property Law Core (8)
Intensive study of intellectual property law core subjects: patents, copyrights, trade secrets, and trademarks. Examines fundamental principles their underlying policies, and how the laws inter-relate. Open to J.D students with permission of instructor. Not open to students who have taken LAW A 522, Law A 546, or Law E 588.

LAW P 528 LL.M. Intellectual Property Law Practicum (1-4, max. 6)
Experience with an approved non-profit organization, judicial or legislative body, or governmental agency on issues related to intellectual property law and policy. Students work under the guidance of experienced practitioners; both student and field supervisor provide the supervising law faculty member with a final written evaluation. Credit/no credit only.

LAW P 545 Advanced Patent Law Seminar (3) Taylor
Study of public policy and practice considerations relating to patenting research results in high technology. Examines the most up-to-date issues in legal protection of technology from the comparative law perspective. Students write and present a research paper on a topic related to patent law and policy. Prerequisite: LAW A 546. Offered: W.

LAW P 590 Graduate Intellectual Property Law Tutorial (1-4, max. 4)
Focuses on a specialized area of intellectual property law. Limited to students in the Graduate Program in Intellectual Property Law and Policy. Tutorial must be approved by the program director.

Law Taxation

Course Descriptions

LAW T 502 Federal Tax Controversies and Procedures (3)

LAW T 503 Problems of Timing (2-3, max. 3)

LAW T 504 Property Dispositions and Transactions (3)

LAW T 505 Introduction to Income Taxation (2)
Addresses a number of fundamental income tax concepts, including the computation of individual tax liability, statutory exclusions, deductions, and gains. Also deals with issues related to character and timing.

LAW T 506 Tax Practice and Skills (1)
Orientation to core concepts of tax practice, including administrative structure and nature of tax law, nuances of statutory interpretation, and the relative authority of statutory, administrative, and judicial sources. Includes overview of print and online tools for federal tax research.

LAW T 507 Federal Tax Policy Seminar (2-, max. 4)
Examines the theoretical and policy considerations applied in assessing existing and proposed federal tax regimes. Topics include: the nature of the income tax as a tax on saving and consumption; consumption taxes as alternatives to taxes on income; tax policy and charitable giving; taxes and the poor; and more.

LAW T 510 Estate and Gift Taxation (3)

LAW T 511 Taxation of Partners and Partnerships ([1-4]-, max. 4)

LAW T 512 Exempt Organizations ([2-4]-, max. 4)

LAW T 513 Estate Planning (3)

LAW T 515 International Taxation I (3)

LAW T 516 International Taxation II (3)

LAW T 517 Estate and Gift Taxation II (2)

LAW T 518 Taxation of S Corporations (2)

LAW T 519 Canadian-United States Tax Issues (2) Ko
Overview to various cross-border issues, including the Canadian income tax (and its GST tax), residency for Canadian tax purposes, principles relating to operation of Canadian business in the United States and profit repatriation and U.S. investment in Canada and similar repatriation issues.

LAW T 520 Tax Ethics (2)
Considers the role of ethics in tax practice and its application to specific problems faced by tax professionals. Explores substantive rules governing tax. Addresses ethical problems of tax professionals in connection with structuring transactions, resolving tax controversies with and presenting cases to the IRS, and representing litigants in tax controversies.

LAW T 521 Compensation and Benefits I (3)

LAW T 522 Compensation and Benefits II (2)

LAW T 523 International Estate Planning (2)

LAW T 524 Transfer Pricing Seminar (2) Andrade
Reviews section 482 of U.S. Internal Revenue Code and the Treasury regulations thereunder with a focus on multinational corporations (MNCs) and their related party transactions that are subject to the arm’s length standard. Application of U.S. transfer pricing regulations to related party transactions involving MNCs.

LAW T 525 Advising Privately-Owned Businesses (3)
Explores the role of the lawyer as an advisor through case studies examining a range of structural planning issues and the practical and analytical challenges of the planning process. Emphasizes tax and business considerations, and creative planning strategies. Prerequisite: LAW A 530; LAW A 515, which may be taken concurrently.

LAW T 526 Low-Income Tax Payer Clinic (2/3-, max. 9)
Clinical training in federal tax litigation under the supervision of members of the law school faculty.

LAW T 528 Graduate Tax Practicum (2)
Field-based experience in a department-approved public or private entity, of eight hours per week minimum under the guidance of experienced practitioners. The student and practitioner produce a final report summarizing the practicum experience to the supervising faculty member, who decides whether to award academic credit.
Credit/no credit only.

LAW T 530 Corporate Reorganizations and Acquisitions (3)
Examines the federal income taxation of business entities and their owners. Limited to coverage of the fundamental concepts of corporate and partnership taxation.

LAW T 531 Advanced Corporate Tax Problems (2)
Examination (through case studies) of consolidated tax returns, limits on the use of tax benefits, carryover of tax attributes, classifications of debt versus equity, and corporate penalty taxes.

LAW T 532 Taxation of Estates, Trusts, and Beneficiaries (2-3, max. 3)

LAW T 534 State and Local Taxation (4)

LAW T 536 Taxation of Trans-Pacific Transactions (2)

LAW T 537 Business Planning ([2-6]-, max. 6)

LAW T 538 Estate Planning for Business Interests (2-3)
Business succession and estate planning issues for the owners of closely held business, including shareholder agreements, recapitalizations, family limited partnerships and limited liability companies, taxable acquisitions, split dollar agreements, redemptions to pay death taxes, electing small business trusts and more. Prerequisite: LAW T 510

LAW T 539 Matrimonial Tax (2)
Covers tax aspects of married relationships and the tax impact of the dissolution of a marriage. Includes joint returns, the marriage tax penalty, innocent spouse relief from joint return liability, pre-nuptial agreements, transfer tax effects of inter-spousal transfers, alimony, child support, and marital property transfers incident to divorce.

LAW T 541 Limited Liability Companies (2)

LAW T 543 Advanced Partnership Tax (2)
Builds on the material covered in the basic course, Taxation of Partners and Partnership. It covers more sophisticated aspects of partnership allocations; transactions between partners and partnerships; and sale or exchange of partnership interests. Prerequisite: LAW T 511

LAW T 544 Tax Aspects of Charitable Giving (20)
Examines income, gift and estate tax consequences of charitable gifts of cash and property. Includes: theoretical and policy bases of charitable deduction; technical requirements; effect of receipt of benefits; percentage limitations based on donee and type of property; application of carryover rules; effect of partial cash or cash equivalent consideration.

LAW T 545 International Taxation of Intellectual Property (2) Smith
Overview of the tax consequences of various types of common commercial arrangements that involve the development, ownership, and use of intangible property within multinational groups. Explores tax efficient arrangements such as contract research and licensing arrangement, cost-sharing arrangement, and the use of intangible holding companies.

LAW T 546 Taxation of Real Estate Interests (2)
An in-depth study and analysis of the tax consequences of acquiring, developing, operating, and disposing of interests in real property. Focuses on practical approaches to restructuring sale-leaseback transactions, syndications, installment sales, and like-kind exchanges. Considers the application of the passive activity loss rules in real estate.

LAW T 547 International Taxation of Electronic Commerce (2-, max. 4)
Electronic commerce is defined as the exchange of digital information in connection with the purchases and sale of goods and services. Seminar and discussion format. Explores the potential methods and approaches for the taxation of earnings associated with electronic commerce.

LAW T 548 Tax Writing (2)
Designed to improve writing skills as they relate to practice of tax law. Students draft many types of tax documents. Also considers professional responsibility aspects of tax practice. Recommended: LAW T 506.

Dwight E. Phillips, Montana State University (interim)

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School’s basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Children’s Hospital and Regional Medical Center, and the Veterans Affairs Puget Sound Health Care System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits 178 medical students to its first-year class and has a total enrollment of about 750 students pursuing the Doctor of Medicine degree. The full-time faculty numbers approximately 1,700 members. The affiliated University residency-training network enrolls approximately 900 house officers. Enrollment in the graduate programs in the basic sciences exceeds 500 students, and approximately 800 postdoctoral fellows are enrolled in various advanced training programs. The School has baccalaureate and graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professions.
professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

**Academic Programs**

**Doctor of Medicine**

Upon completion of the curriculum of the School of Medicine, the M.D. degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

**Bachelor of Clinical Health Services**

Candidates for the Bachelor of Clinical Health Services degree are admitted to the University of Washington at the junior-year level. They pursue an eight-quarter sequence of prescribed studies in the MEDEX Northwest Physician Assistant Training Program. Admission to the professional training program is competitive, administered by MEDEX Northwest within the School of Medicine. Because of the program’s emphasis on prior medical experience, the great majority of applicants are working adults who have completed their pre-professional undergraduate course work at other colleges and universities.

Matriculation in the Bachelor of Clinical Health Services degree option is dependent upon both admission to the University and acceptance by MEDEX Northwest. Students who are accepted by MEDEX Northwest but who are not admissible to the University are classified as nonmatriculated students. They earn official University credits and receive a certificate upon completion of the program. For additional information, contact MEDEX Northwest Physician Assistant Program, Box 354725, 206-598-2600.

**Bachelor of Science**

A program leading to a baccalaureate degree with a major in microbiology is offered through the College of Arts and Sciences.

**Bachelor of Science in Medical Technology**

A curriculum in medical technology is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists for a variety of employment opportunities. Information concerning admission to the medical technology program appears under Laboratory Medicine in this catalog.

**Bachelor of Science in Prosthetics and Orthotics**

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and in the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to the curriculum in prosthetics and orthotics may be found under Rehabilitation Medicine in this catalog.

**MEDEX Northwest Certificate Program**

MEDEX Northwest is a program designed to train physician assistants. It provides primary-care, midlevel practitioners by training medical personnel with prior clinical experience. The program is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX Northwest places 70 to 75 students annually in a variety of sites in Alaska, Idaho, Montana, Nevada, Oregon, Washington, and Wyoming. Successful completion of the program culminates in the award of a Bachelor of Clinical Health Services degree and in a certificate.

MEDEX Northwest is an eight-quarter program. The first four quarters consist of intense clinical and didactic instruction at one of three training locations: Seattle, Spokane, or Yakima. The final four quarters are spent in clinical experiences throughout the WWAMI region. The first five months are spent in a variety of inpatient and outpatient clinical rotations and the last five months are spent in a family-practice preceptorship. The preceptorship is an on-the-job experience tailored to the practice of individual primary-care physicians and emphasizes diagnosis and treatment. At the completion of the program, students are eligible to sit for the national certifying examination for physician assistants.

**Special Requirements**

Applicants must have a minimum of two years of recent, full-time, hands-on experience in the direct delivery of medical care to patients, or current professional credentials and at least two years of recent experience in an allied health field. Applicants must have completed two college-level English courses (at least one must be in composition), human anatomy and physiology course work totaling at least 10 quarter-credit hours, and at least one science course in a discipline relevant to medicine, such as biology or chemistry. English prerequisite courses must have been taken in a college or university in the United States, Canada, the United Kingdom, Australia, New Zealand, or Ireland. All academic prerequisites must have been awarded with college-level credit with grades of 2.7 (B-) or better.

For additional information, contact MEDEX Northwest Physician Assistant Program, Box 354725; 206-598-2600. Web site: www.washington.edu/medical/som/depts/medex/. Email: medex@u.washington.edu.

**Master of Occupational Therapy**

The Department of Rehabilitation Medicine offers graduate degrees in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under Rehabilitation Medicine in this catalog.

**Master of Physical Therapy**

The Department of Rehabilitation Medicine offers graduate degrees in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under Rehabilitation Medicine in this catalog.

**Master of Science and Doctor of Philosophy**

Work leading to master’s and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of Biochemistry, Biomedical Engineering, Biological Structure, Immunology, Microbiology, Pathology, Pharmacology, and Physiology and Biophysics. Master’s degree programs are offered by the departments of Laboratory Medicine, Medical History and Ethics, and Rehabilitation Medicine. Students may work toward these degrees concurrently with the M.D. degree, taking additional years beyond the typical four-year medical curriculum.

Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health and Community Medicine. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show
Doctor of Medicine

Admissions

(These procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine Admissions Office.)

Selection Factors

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of healthcare delivery issues are desired. Extenuating circumstances in an applicant’s background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This exam must be taken no later than autumn of the year before matriculation and cannot be more than three years old at the time of matriculation. MCAT registration blanks are available through premedical advisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admissions process; however, if accepted, the applicant will be required to take the MCAT prior to matriculation.

The following science course requirements must be completed before matriculation but preferably should be completed by the time of application: A total of 32 semester hours or 48 quarter hours of undergraduate courses divided into (a) Chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic or organic chemistry, biochemistry, or molecular biology courses; (b) Physics, 4 semester/6 quarter hours; (c) Biology, 8 semester/12 quarter hours; and (d) Other (“open”) science subjects, 8 semester/12 quarter hours, which can be met by taking other courses in any of the three categories above.

Although a biochemistry course is not absolutely required for admission to the medical school, it is very strongly suggested for entering students. The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and it is taught with the presumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism. A comprehensive undergraduate biochemistry course is the most expedient way to gain this knowledge.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies.

Those students who entered in the fall of 2003 had a mean GPA of 3.69 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.3; Biological Science, 10.8; and a median Writing Sample of P.

Completion of three years of course work at an accredited college or university is the minimum required before possible matriculation; however, all entrants in recent years have earned bachelor’s degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1 and no waivers are granted. After receiving the application from AMCAS, the School of Medicine will ask qualified individuals to submit a $35 application fee and supplemental application materials. Every attempt will be made to notify applicants of the final action by the end of March of the year of matriculation.

Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Individuals with a demonstrated interest in research may apply for the M.D./Ph.D. program (MSTP) regardless of residency. Applicants from outside this five-state region who come from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations will be considered. Foreign applicants, in addition to the above requirements, must also have a permanent-resident visa. Applications will not be considered from persons who have failed to meet minimum standards at another medical or dental school.

The deadline for submitting the additional application materials is January 15. These supplemental materials include:

A supplemental application form. This will be sent to qualified applicants after the School of Medicine has received the AMCAS application.

A 300-word autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician and any other issues of importance to the candidate. The applicant may request that the Personal Comments section of the AMCAS application be used to fulfill this requirement.

A concise statement, not exceeding 200 words, as to why the candidate wants to attend the University of Washington School of Medicine.

A premedical-committee letter of recommendation or three letters from instructors from whom the candidate has taken courses. These letters should be critical evaluations of the candidate’s academic ability, strengths and weaknesses, the difficulty of course work undertaken, motivation for medicine, personal maturity, and special attributes and assets.

A $35 fee. This will automatically be waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Admissions Office.

Acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the University of Washington School of Medicine: Admission, Retention and Graduation Standards to be sent with the supplemental application form.

Conviction/Criminal History Information Form. Washington state law requires that all individuals who have access to children under 16 years of age, developmentally disabled people, and other vulnerable persons, disclose background information concerning crimes and offenses against these populations.

Candidates from Wyoming, Alaska, Montana, and Idaho will be required to submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at the time of application. Those who enter as residents of Wyoming, Alaska, Montana, and Idaho are expected to spend their first year at the university site in their particular state. Twenty Washington students begin their medical education by spending the first year at Washington State University in Pullman. Offers of acceptance, therefore, are conditional upon agreement to participate in the WWAMI Program.
Inquiries, address changes, or other information regarding the application should be transmitted in writing and directed to the Committee on Admissions, Office of Admissions, Box 356340, School of Medicine, University of Washington, Seattle, Washington 98195-6340; or email askwsom@u.washington.edu.

Office of Multicultural Affairs

The Office of Multicultural Affairs assists students from disadvantaged backgrounds who are pursuing M.D. or M.D.-Ph.D. degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment, education, admission, retention, and professional development. The School considers applicants from disadvantaged backgrounds or those who have a demonstrated commitment to work with underserved populations. Students should contact the Office of Multicultural Affairs for assistance during the application process. The program offers counseling and advocacy, referrals to University and community resources, tutoring, financial-aid information, and numerous opportunities to interact with other minority health-care professionals within the community. Various student organizations also provide minority medical students a means to interact socially and pursue shared interests, to offer peer support, and to assist with community-outreach activities.

U-DOC is a high-school summer-enrichment program offered by the Office of Multicultural Affairs. It is a six-week program for students who have completed their junior year in high school. U-DOC’s goal is to foster, affirm, and encourage high school students’ interest in the medical profession by allowing them to further explore medical careers and to obtain a valuable introduction to college life. U-DOC is offered in each of the five WWAMI states.

The Western Consortium Summer Medical Education Program (SMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academic-enrichment program that includes biology, chemistry, physics, communications, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.

A Prematriculation Program for entering minority or disadvantaged medical students is offered for six weeks during the summer. The program is designed to facilitate students’ entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.

During the regular school year, the Office of Multicultural Affairs serves as a support network for both the academic and nonacademic needs of students, and facilitates students’ access to the multiple resources in the School of Medicine, the WWAMI region, and the community.

The Native American Center of Excellence was established in 1992 as part of the Office of Multicultural Affairs to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.

Inquiries and requests for additional information may be obtained from the Office of Multicultural Affairs, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; 206-685-2489.

Medical Scientist Training (M.D.-Ph.D.) Program

A limited number of highly qualified candidates who wish to pursue both the M.D. and Ph.D. degrees are considered annually. M.D./Ph.D. students are permitted a wide choice of research specializations from among numerous disciplines and interdisciplinary areas of biomedical sciences. The program emphasizes continuity of both clinical and basic sciences exposure. Among participating graduate departments and interdepartmental disciplines are biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, physiology and biophysics, and zoology. The participating interdepartmental and affiliate programs are neurobiology and behavior, molecular and cellular biology. Students can also conduct their research at the Fred Hutchinson Cancer Research Center.

Applicants who wish to be considered for the M.D./Ph.D. program must submit the Medical Scientist Training Program application as soon as possible. Both the application and any supplemental material requested must be completed by January 15. Serious consideration is rarely given to applicants with minimal research experience and/or a cumulative GPA of less than 3.50 or MCAT scores of less than 10 in each category.

Applicants should correspond directly with the administrator of the Medical Scientist Training Program: MSTP University of Washington Health Sciences Building, Room 1264 Box 357470 Seattle WA 98195-7470 206-685-0762 mstp@pathology.washington.edu www.pathology.washington.edu/mstp/

Financial Information

Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Resident tuition for 2003-2004 is $4,149 per quarter; nonresident tuition is $9,796 per quarter.

Financial Assistance

Financial aid awards are based on the demonstrated need of the students. All applicants for aid must submit the Free Application for Federal Student Aid (FAFSA). This requires disclosure of financial information from the student and the student’s parents. Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited amounts of grant funds are available to Washington state residents who meet specific funding criteria. Parental information is not required for grant funds, the Stafford Loan, or the Perkins Loan.

Scholarships are available through the School of Medicine scholarship fund. These awards vary in amount and require financial information from the student and the student’s parents. There is a separate application for the School of Medicine scholarship, which has a May 31 due date.

Financial aid information is distributed to all accepted applicants. The FAFSA form may be obtained at www.fafsa.ed.gov or from the UW Office of Student Financial Aid or the School of Medicine Financial Aid Office. The deadline for receipt of the financial-aid application by the processor is February 28. Applicants must meet this deadline to be considered for all available aid sources regardless of the status of their admission file. Late applicants are awarded only Stafford and Unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical-school course work.
Medical Curriculum

Basic Science Curriculum (148 Credits)
The first two years of the medical-student curriculum is identified as the Basic Science Curriculum. It consists of three phases, or groups, of courses in the human biology series: courses in the sciences basic to medicine, organ systems courses taught by basic and clinical disciplines, and introduction to clinical medicine. The first phase is designed to provide the background in basic disciplines required for the organ-system courses. In the second phase, emphasis is placed upon learning the normal and pathophysiologic properties of several human organ systems, and upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the Introduction to Clinical Medicine course throughout the first two years, learning to interview patients, obtain a medical history, and perform the physical examination.

Students pursue the Basic Science Curriculum during their first two years in the School of Medicine. The academic demands of the Basic Science Curriculum are scaled so that most students also will be able to take elective courses that will broaden the student's background.

First-Year Required Courses
Microscopic Anatomy (Histology)  
Gross Anatomy and Embryology (including trunk and head and neck anatomy)  
Mechanisms in Cell Physiology  
Biochemistry  
Systems of Human Behavior I  
Cell and Tissue Response to Injury (Pathology)  
Microbiology and Infectious Disease  
Introduction to Immunology  
Nervous System  
Critical Reading and Evaluation of Medical Literature  
Introduction to Clinical Medicine

Second-Year Required Courses
Cardiovascular System  
Respiratory System  
Principles of Pharmacology I  
Endocrine System  
Systemic Pathology  
Genetics  
Skin System  
Gastrointestinal System  
Epidemiology  
Hematology  
Musculoskeletal System  
Medicine, Health, and Society  
Urinary System  
Systems of Human Behavior II  
Principles of Pharmacology II  
Reproduction  
Nutrition for Physicians  
Introduction to Clinical Medicine

Clinical Curriculum (148 Credits)
The clinical curriculum is pursued in the third and fourth years of medical school. It includes prescribed clerkships to be completed by all students (84 credits or 42 weeks) in family medicine, internal medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery, plus clinical electives (32 credits or 16 weeks) in four clinical areas including clerkships in rehabilitation medicine/chronic care, emergency care/trauma, neurology, and surgery electives. Additional clinical or non-clinical electives (a minimum of 32 credits or 16 weeks) are also required.

During the clinical curriculum, students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of the medical-care team. Each team is headed by a faculty clinician working in one of the medical school-affiliated hospitals, clinics, or practices.

Independent Investigative Inquiry
In addition to the basic and clinical curricula, each student must complete 8 credits in independent study and investigation in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. The purpose of this requirement is for the student to gain an understanding of the philosophy and methods of scientific investigation.

WWAMI Program
The WWAMI Program was initiated in 1971 as an effort to decentralize medical education to provide a broader range of educational opportunities for students, and to address the need for primary-care physicians oriented toward rural practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI Program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI Program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

First-Year Training
In the first year of the WWAMI Program, approximately 40 percent of the students admitted to the University’s School of Medicine receive the first year of medical school training at Washington State University, the University of Wyoming, the University of Alaska, Montana State University, or the University of Idaho. Washington State University positions not filled by volunteers are assigned by lottery. Every Washington-resident applicant should recognize the opportunity of assignment to Washington State University during the first year. Students from Wyoming, Alaska, Montana, and Idaho attend their home-state institutions. While at these institutions, they enroll in prescribed one-year medical school basic-science courses taught by on-site science faculty and are provided supplemental resources from the University of Washington’s School of Medicine faculty. These students join their classmates at the University of Washington’s campus in Seattle for their second year of medical studies.

Third- and Fourth-Year Training
At the conclusion of the second year, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described above. As part of the clinical training, students complete clerkships at the University of Washington, at its affiliated hospitals, or at community clinical units located in the five-state region. During the third and fourth year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships throughout the WWAMI region.

Enrichment Opportunities
Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research projects, or participating in an international exchange program with a developing country. Brief descriptions of three of the more formally structured programs follow.

Rural/Underserved Opportunities Program (RUOP)
This program exposes students to rural medicine and utilizes clinical training sites in all five states. For one month during the summer between the first and second years, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported by the Family Health Foundation, the Academy of Family Physicians, Area Health Education Centers, and the School
Medical Student Research Training Program

Summer research opportunities are offered to UW medical students interested in gaining valuable experience from training in medical research. This research is planned and carried out under the supervision of a faculty sponsor and is undertaken during the summer between the first and second years. Student trainees in the program receive a stipend supported largely by gifts given by donors specifically to fund student research. The project is ten weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time. At the conclusion of the summer, the students prepare posters that are presented as part of the Medical Student Research Forum.

Student Evaluation and Promotion

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and noncognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the School’s professional standards and the oath that all students take at the time of graduation. As such, student evaluation is based upon observations by the faculty and others involved in teaching of the student’s behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, all University of Washington examinations, and complete an approved Independent Investigative Inquiry project before receiving the Doctor of Medicine degree. Periodic reviews of student performance are conducted by the School’s Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic directives provided by the School’s committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine.

The Faculty Council on Academic Affairs reviews the Student Progress Committee’s actions, and the Dean of the School of Medicine has final approval of the committee’s and council’s recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, the student may petition for reinstatement through the Faculty Council on Academic Affairs. Reinstatement will not be considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one reinstatement petition through the Faculty Council on Academic Affairs is allowed. If more than one year elapses after the withdrawal or dismissal, the individual may be required to apply for readmission through the admissions process. If a reinstatement petition is denied by the Faculty Council, the decision is final with no further avenue for review. Subsequent requests for admission must be directed through the standard admissions procedures.

Honor Society

Alpha Omega Alpha (AOA) is a national honor medical society. A charter as Alpha of Washington was granted to the School of Medicine in 1950 by Alpha Omega Alpha. Members are elected by the membership of Alpha Omega Alpha on the basis of high scholarship and good moral character. The purpose of AOA is to recognize and perpetuate excellence in the medical profession. Its goals are to promote scholarship and research in medical school, to encourage high standards and conduct, and to recognize high attainment in medical science, practice, and related fields. Its motto is “Worthy to serve the suffering.

Grading System

For students entering in 2002 and subsequent years, the grades awarded in each course in the M.D. curriculum are Pass or Fail in the first-year basic-science curriculum; Honors, Pass, or Fail in the applied-science curriculum; and Honors, High Pass, Pass, or Fail in the clinical curriculum. The School’s goal is to provide a curriculum that defines the competencies to be achieved by the student at each level. However, a pattern of documented evaluator concerns about a student’s performance may indicate unsatisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system precludes the ranking of students and no class standing is assigned.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

Graduation with Honors

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the departments each year and are selected on the basis of a review of their academic records by the Honors and Awards Committee.

Graduate Medical Education and Postdoctoral Training

The University of Washington School of Medicine offers a broad array of residency and fellowship programs. Training occurs at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Children’s Hospital and Regional Medical Center, and other affiliated training sites in Seattle and throughout the WWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

Continuing Medical Education

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of courses for physicians and health-care professionals in the Pacific Northwest and throughout the nation. Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the WWAMI region. Information on offerings is available from its Web site at www.uwcmo.org. All physicians also are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician’s Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Brochures and calendars for courses are available for more detailed information. For information concerning Continuing Medical Education programs, contact:

University of Washington School of Medicine

Email: cme@u.washington.edu
Web site: www.uwcmo.org
The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at 206-231-2847 or bramhall@u.washington.edu. Other training questions may be directed to the Residency Coordinator at 206-543-2773 or lf@u.washington.edu.

**Course Descriptions**

**ANEST 498 Undergraduate Thesis (*) Sivarajan**
By special arrangement. Time and credit to be arranged. Offered: AWSpS.

**ANEST 499 Undergraduate Research (*) Sivarajan**
Specific research problems relating to pulmonary, cardiovascular, renal, obstetric, and central nervous system functions, and their alteration by anesthetic techniques and agents. (Six weeks, full-time. Limit: two students.) Offered: AWSpS.

**ANEST 501 P-Preceptorship in Anesthesiology (1) Sivarajan**
An opportunity for first- and second-year medical students to gain experience with medical practice situations by observing clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: AWSpS.

**ANEST 680 P-Basic Anesthesia Clerkship (4) Sivarajan**
Introduction to the principles of airway management, ventilatory support, use of local anesthetics, techniques of patient monitoring and fluid therapy. Skills taught include airway management, venipuncture, lumbar puncture and endotracheal intubation. Prerequisite: third- or fourth-year student. (Two weeks, full-time. Limit: three to five students each two-week period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 681 P-Advanced Clerkship in Anesthesiology (8) Sivarajan**
Clerkship for students desiring greater exposure to anesthesiology as a specialty. Individual programs can be arranged in the following areas: surgical anesthesia, obstetrical anesthesia, and pain clinic. Prerequisite: Third- or fourth-year student. (Four weeks, full-time. Limit: two students per period.) Affiliated hospitals. Offered: AWSpS.

**ANEST 697 P-Anesthesiology Special Electives (*, max. 24) Sivarajan**
Special clerkships, externships, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain a special assignment form from the Dean’s office at least one month before advance registration. Prerequisite: permission of instructor. (Four to twelve weeks, full-time.) Offered: AWSpS.

**ANEST 699 P-WWAMI Anesthesiology Special Electives (*)**
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

**Biochemistry**

**109 Bagley**
Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes.

**Undergraduate Program**

**Adviser**
109 Bagley, Box 351700

advisers@chem.washington.edu

The Biochemistry Program offers the following programs of study:
- The Bachelor of Science degree with a major in biochemistry

**Bachelor of Science**

**Suggested First and Second-Year Courses:** BIOL 180, BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 with one physics lab course strongly recommended).

**Department Admission Requirements**

Students in good academic standing may declare this major at any time.

**Major Requirements**

106 credits as follows:
- MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
- PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116), with the PHYS 121 sequence recommended
- CHEM 142, CHEM 152, CHEM 162, (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); CHEM 452, CHEM 453 (or CHEM 455, CHEM 456, CHEM 457 or CHEM 475, CHEM 476, CHEM 477)
- BIOL 180, BIOL 200 (or BIOL 201, BIOL 202)
- GENOME 371
- BIO 426, BIO 440, BIO 441, BIO 442

11 credits chosen from a current department list (available in 109 Bagley) of upper-division science classes including math, biology, microbiology, chemistry, genome sciences, zoology. Up to 9 credits of approved advanced-level undergraduate research may also be applied to this requirement. For all chemistry, biology, and biochemistry courses required by the major program, a minimum grade of 1.7 and a GPA of 2.80 is required. For the BIO 440, BIO 441, and BIO 442 sequence, a minimum GPA of 2.20 is required. Overall cumulative GPA of 2.80 is also required to graduate.

**Student Outcomes and Opportunities**

- Learning Objectives and Expected Outcomes: At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumenta-
tion, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors.

Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

- **Instructional and Research Facilities:** Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology and molecular and cellular biology, with which the department has common research interests. The laboratories are equipped with modern research equipment and are supported by external, centralized research facilities. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine.

- **Honors Options Available:** With College Honors. With Distinction. See adviser for details.

- **Research, Internships, and Service Learning:** No formal internship program. Students are encouraged to pursue national and regional internships. See advisers for more information.

- **Department Scholarships:** Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department advisers for more information.

- **Student Organizations/Associations:**
  - Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
  - Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
  - The Free Radicals: a general undergraduate club for chemistry and biochemistry majors.

*Of Special Note:*
  - This degree requires a minimum of 196 credits.
  - Students are strongly encouraged to participate in undergraduate research.

**Course Descriptions**

**BIOC 396 Research in Chemistry and the Chemical Sciences (1) NW**
Presentations by researchers in academia and industry describing the opportunities for research chemistry and biochemistry. Credit does not count toward chemistry major requirements. Credit/no credit only. Prerequisite: CHEM 337. Offered: jointly with CHEM 396; A.

**BIOC 405 Introduction to Biochemistry (3) NW Daum, Teller, Wiseman**
Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: either BIOL 200, BIOL 201, or both BIOL 101 and GENET 371; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

**BIOC 406 Introduction to Biochemistry (3) NW Hurley, Petra**
Survey of basic principles of biochemistry and molecular biology, emphasizing broad understanding of chemical events in living systems in terms of metabolism and structure-function relationships of biologically important molecules. Suitable for pre-majors, for students interested in careers in medicine, dentistry, pharmacy, medical technology. Prerequisite: BIOC 405. Offered: W.

**BIOC 426 Basic Techniques in Biochemistry (4) NW Chung, Petra**
Introduction to basic biochemistry experiments. Acquaints students (largely Biochemistry majors) with basic biochemical laboratory techniques. Prerequisite: BIOC 440, which may be taken concurrently. Offered: ASp.

**BIOC 440 Biochemistry (4) NW Davis, Klevit**
Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 2.5 in either BIOL 201 or BIOL 200; 2.5 in either CHEM 224, CHEM 239, or CHEM 337; 2.0 in either MATH 124 or MATH 134. Offered: A.

**BIOC 441 Biochemistry (4) NW Young**
Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: 1.7 in BIOC 440. Offered: W.

**BIOC 442 Biochemistry (4) NW Kinzelman, Palmiter**
Biochemistry and molecular biology (with quiz sections) for undergraduate students in molecular and cellular biology, for biochemistry majors, and graduate students in other science departments. Prerequisite: either 1.7 in BIOC 406 or 1.7 in BIOC 441. Offered: Sp.

**BIOC 496 Research Seminar for Undergraduates (1, max. 2) NW**
Formal presentations of student research. One credit applies to research component of a relevant major. Credit/no credit only. Offered: jointly with CHEM 496; Sp.

**BIOC 498 Undergraduate Thesis (*)**
For senior medical students. Offered: AWSpS.

**BIOC 499 Undergraduate Research (*)**
Investigative work on enzymes, proteins, lipids, molecular biology, developmental biology, intermediary metabolism, physical biochemistry, and related fields. Credit/no credit only. Offered: AWSpS.

**BIOC 515 Matrix Macromolecules in Morphogenesis and Development (1, max. 30) Bornstein**
Offered: AWSp.

**BIOC 516 Molecular Mechanisms of Blood Clotting (1, max. 30) Davie**
Offered: AWSp.

**BIOC 517 Protein Structure (1, max. 30) Baker**
Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**BIOC 518 Signaling in Development (1, max. 30) Ruohola-Baker**
BIOC 520 Seminar (1)
Seminar dealing with timely topics in the field of biochemistry. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 525 Phytoremediation (1, max. 4)
Literature survey of phytoremediation topics. Discussion of latest techniques for the use of plants to concentrate heavy metals in the soil and of plants and plant-bacteria combinations to detoxify various organic contaminants. Credit/no credit only. Offered: AWSpS.

BIOC 526 Control of Growth and Differentiation During Development (1, max. 30) Hauschka
Credit/no credit only. Offered: AWSpS.

BIOC 528 Signal Transduction (1, max. 30) Hurley
Credit/no credit only. Offered: A.

BIOC 529 Molecular Biology of Early Development (1, max. 30) Kimelman
Offered: AWSpS.

BIOC 530 Advanced Biochemistry (3) Baker, Gelb, Hol, Klevit, Stenkamp, Stoddard
Graduate-level discussion of the structure, function, and chemistry of proteins, control of enzymatic reactions. Prerequisite: a comprehensive course in biochemistry and permission. Offered: A.

BIOC 533 Topics In Biochemistry (1, max. 30) Daum, Davie, Fischer
Provides in-depth examination of current topics in biochemistry, molecular biology, and structural biology. Designed to help participants in basic science departments become acquainted with latest ideas on selected topics. Emphasis on analysis of key concepts in the field with reference to classical papers and recent literature. Prerequisite: permission of instructor. Offered: A.

BIOC 534 Topics In Molecular Biophysics (1.5) Parson
Emphasis on methods used to study macromolecular structure and dynamics, including x-ray crystallography, NMR, optical spectroscopy, computer modeling, protein folding and ligand binding. Two topics covered each quarter; students may register for one or both. Prerequisite: permission of instructor. Offered: A.

BIOC 535 Macromolecular Structure (1, max. 30) Klevit
Offered: AWSp.

BIOC 536 Control of Cell Growth (1, max. 30) Morris
Offered: AWSp.

BIOC 537 Regulation of Gene Expression (1, max. 30) Palmiter
Offered: AWSpS.

BIOC 540 Literature Review (2) Parson
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: jointly with BMSD 540 A.

BIOC 541 Literature Review (2) Palmiter
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: W.

BIOC 542 Literature Review (2) Morris
Emphasizes critical evaluation of original articles in the literature. For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: Sp.

For first-year graduate students in biochemistry and students of other science departments, with permission. Offered: Sp.

BIOC 555 Cell and Molecular Biology of Connective Tissue Proteins (1, max. 30) Bornstein
Offered: AWSpS.

BIOC 556 Enzymatic and Genetic Aspects of Blood Clotting (1, max. 30) Davie
Offered: AWSp.

BIOC 557 Growth Regulation by Calcium Binding Proteins (1, max. 30) Davis
Offered: AWSpS.

BIOC 559 Membrane Biochemistry and Cell Growth (1, max. 30) Glomset
Offered: AWSpS.

BIOC 560 Protein Folding (1, max. 30) Baker
Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

BIOC 561 Origin of Polarity (1, max. 30) Ruohola-Baker
Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

BIOC 565 Plant Molecular Genetics (1, max. 30)
Offered: AWSpS.

BIOC 566 Growth and Differentiation of Skeletal and Cardiac Muscle (1, max. 30) Hauschka
Offered: AWSpS.

BIOC 568 Molecular and Genetic Aspects of G Protein Signal Transduction (1, max. 30) Hurley
Offered: AWSpS.

BIOC 569 Inductive Events in Early Development (1, max. 30) Kimelman
Offered: AWSpS.

BIOC 575 NMR Analysis of Proteins and Nucleic Acids (1, max. 30) Klevit
Offered: AWSp.

BIOC 576 Sequential Analysis of Growth Regulation (1, max. 30) Morris
Offered: AWSpS.

BIOC 577 Gene Regulation in Transgenic Mice (1, max. 30) Palmiter
Offered: AWSpS.

BIOC 578 Electron Transport in Photosynthesis (1, max. 30) Parson
Offered: AWSp.

BIOC 581 Introduction to Biochemical Research (4, max. 16)
Student works with one of the research groups within the department for one quarter and then rotates to other laboratories for second and third quarters. Credit/no credit only. Prerequisite: graduate standing in biochemistry or permission of instructor. Offered: AWSpS.

BIOC 588 Molecular Biology of Yeast Gene Regulation (1, max. 30) Young
Offered: AWSpS.

BIOC 600 Independent Study or Research (*)
Survey of systemic human anatomy, including human skeletal positions and from research funds. The department offers financial support through training-grant further information, contact the graduate program coordinator. Sponsor students for application to the departmental program. Alternatively, some faculty Neurobiology and Behavior, Biomolecular Structure and Design, or one of the following programs: Molecular and Cellular Biology, departmental faculty members should apply for admission through the basic-science interdisciplinary processes through the study and analysis of structure-function relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures. This diversity creates a lively atmosphere in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.

The department’s graduate program is directed toward the education of doctoral students who anticipate careers that will involve teaching or research in the biomedical sciences. Graduates from the program have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with a major emphasis on the cellular level.

Graduate students select research and teaching options in their program. The research options are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical subdisciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

Special Requirements

Applicants should have completed an undergraduate major in an appropriate field, such as anthropology, biochemistry, biology, chemistry, physics, psychology, or zoology.

The department is currently recruiting students into its labs and graduate programs principally through the basic-science interdisciplinary programs. Students interested in working with particular departmental faculty members should apply for admission through one of the following programs: Molecular and Cellular Biology, Neurobiology and Behavior, Biomolecular Structure and Design, or the Medical Scientist Training Program. Alternatively, some faculty sponsor students for application to the departmental program. For further information, contact the graduate program coordinator.

Financial Aid

The department offers financial support through training-grant positions and from research funds.

Course Descriptions

**B STR 301 General Anatomy (4) NW Pittack**
Survey of systemic human anatomy, including human skeletal system, muscular system, respiratory system, circulatory system, nervous system, digestive system, endocrine system, urinary system, and reproductive system. For second-, third-, and fourth-year undergraduates. Offered: Sp.

**B STR 431 Introduction to Neuroanatomy (4) NW Broderson, Mulligan, Westrum**
Survey of the anatomy and functional organization of the human central nervous system, with clinical applications. Prerequisite: admission to the School of Dentistry. Offered: W.

**B STR 498 Undergraduate Thesis (*)**
Individual research projects under the supervision of an instructor. For senior medical students. Offered: AWSpS.

**B STR 499 Undergraduate Research (*)**
Individual research projects in cellular and developmental biology, experimental immunology, reproductive biology, neurobiology, molecular structure, morphometrics, computer modeling, and related fields under the supervision of an instructor. Offered: AWSpS.

**B STR 501 Gross Anatomy and Embryology (8/13, max. 13) Clark**
Lecture and laboratory dissection course in regional anatomy: thorax, abdomen, pelvis, perineum. Prerequisite: permission of instructor. Offered: A.

**B STR 502 Gross Anatomy (1-5, max. 5) Graney**
Lecture and laboratory dissection course in regional anatomy: upper and lower extremities. Prerequisite: permission of instructor. Offered: W.

**B STR 503 Gross Anatomy (1-5, max. 5) Graney**
Lecture and laboratory dissection course in regional human anatomy; head and neck. Prerequisite: permission of instructor. Offered: Sp.

**B STR 510 Seminar in Anatomy (1) Graney**
Scientific and historical basis of selected studies in biological structure, anatomy, and human development. Original literature used as basis for textbook descriptions is reviewed. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

**B STR 512 Human Microanatomy (4)**
Lectures and laboratory treating the specialized tissues and organs of the body from the microscopic and ultramicroscopic points of view. Prerequisite: permission of instructor. Offered: A.

**B STR 515 Biological X-Ray Structure Analysis (3) Stenkamp**
Theory of x-ray diffraction, with emphasis on applications to biological systems. Prerequisite: permission of instructor. Offered: W.

**B STR 517 Embryology/Developmental Biology Seminar (1) Farr**
Embryology of a region or organ. Topics vary. Emphasis on original literature and developmental principles. Prerequisite: permission of instructor. Offered: AWSp.

**B STR 519 Current Problems in Macromolecular Structure (2, max. 10) Hol**
A discussion of macromolecular structures related to specific areas of biological research. Emphasis on discussion of relevant research papers and use of computer graphics to visualize the molecular structures. Offered: AWSpS.

**B STR 520 Structure Based Design of Drugs and Vaccines (3) Hol**
Lecture and discussion on research papers illustrating protein structure based design of new drugs and vaccines. Review of methods of structure-based drug design and problem of drug resistance. Discussion on importance of adjuvants, protein engineering
B STR 521 Advanced Biomacromolecular Crystallography (3) Hol, Merritt, Stenkamp
Aspects of protein crystallography ranging from crystal growth, phase determination methods, density averaging to refinement, fiber diffraction of DNA and proteins. Offered: odd years; Sp.

B STR 530 P-Gross Anatomy and Embryology for Dental Students (8/13, max. 13) Broderson, Clark
Normal anatomy of the thorax, abdomen, pelvis, and perineum are discussed and dissected employing cadavers. The development of the organ systems is presented and related to definitive adult structure. Developmental anomalies and diagnostic anatomy are also discussed. Prerequisite: admission to School of Dentistry. Offered: A.

B STR 540 Special Problems in Anatomy (1-6, max. 6)
Special projects in anatomy under sponsorship of faculty member. Prerequisite: graduate, medical, or dental student standing and permission of instructor. Offered: AWSpS.

B STR 541 P-Microscopic Anatomy for Dental Students (4)
Introduction to experimental design, research methods, and scientific thought in laboratories of faculty members. Provides hands-on experience, an entrance into the literature of the field, and opportunities for discussion with all members of the laboratory. First-year dental students only. Prerequisite: B STR 530. Offered: Sp.

B STR 550 P-Head and Neck Anatomy for Dental Students (4)
Broderson, Clark, Graney
Normal anatomy of the head is discussed and dissected, employing human cadavers. The fundamentals of diagnostic anatomy are also discussed. Restricted to first-year dental students. Prerequisite: B STR 530. Offered: Sp.

B STR 555 Laboratory Rotation in Biological Structure (*, max. 5)
Weekly discussion of current problems, methods and future directions by reading and discussing research and review papers. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

B STR 556 Topics in Developmental and Systemic Cell Biology (1-3, max. 3)
Recent advances in molecular and developmental aspects of cell biology. Emphasis on specific organ systems. Differentiation of lymphocytes, germ cells, muscle, epidermis; cell biology of lens, vessel wall, visual cortex; computer modeling; cell-cell and cell-matrix interactions. Prerequisite: undergraduate biochemistry and/or molecular biology and general cell biology or permission of instructor. Offered: AWSpS.

B STR 557 Biomolecular Structure Seminar (1) Hol
Literature review of key research in Biomolecular Structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Credit/no credit only. Prerequisite: graduate standing in biological structure or biochemistry and permission of instructor. Offered: AWSp.

B STR 559 Developing Research Proposals (2)
Developing research proposals in cellular, molecular, and developmental biology; neurobiology; morphometrics and computer modeling; experimental immunology and hemopoiesis; reproductive biology; molecular structure. Weekly seminars by faculty and written proposals by students to include background and significance of projects’ specific hypotheses and aims, methodology, analyses of possible outcomes. Prerequisite: permission of instructor. Offered: even years; Sp.

B STR 580 P-Anatomy Teaching Practicum (*, max. 8) Dacey, Graney, Mulligan
Opportunity for medical student (or other professional student) to gain teaching experience in biological structure and human biology courses, including gross anatomy, histology, and neuroanatomy. May include lecture, laboratory, conference, depending on student interest, experience. Credit based on course credit in which student is assisting. Prerequisite: permission of course chairperson. Offered: AWSp.

B STR 584 Seminar in Neurogenesis (1) Reh
Discussion of current research on process by which neurons are generated in the nervous system. Offered: AWSpS.

B STR 591 X-Ray and NMR Analysis of Macromolecular Structure (1, max. 9) Hol
Weekly discussion of current topics in research on molecular structure, usually emphasizing techniques of x-ray crystallography. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

B STR 594 Clinical Pathology Seminar (1, max. 5) Smith
Recent advances in clinical pathology with emphasis on laboratory diagnosis and management strategy. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

B STR 595 Skin Biology Seminar (1, max. 5)
Recent advances in skin biology and animal models of gene therapy. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

B STR 597 Topics in Neurobiology (1, max. 5) Harris
Presentations by participants of topics in neuroanatomy, neurophysiology, and other areas relating to the nervous system. Prerequisite: permission of instructor. Offered: A.

B STR 599 Reading in Biological Structure (2)
Literature review of key research in Biomolecular Structure in the form of short presentations by participants followed by discussion. Critical evaluation of methods and results regarding properties and protein structure determination. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

B STR 600 Independent Study or Research (*)
Offered: AWSpS.

B STR 700 Master's Thesis (*)
Offered: AWSpS.

B STR 800 Doctoral Dissertation (*)
Offered: AWSpS.

Comparative Medicine
T142 Health Sciences

The Department of Comparative Medicine provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a Master of Science degree program in comparative medicine. Areas of current research interests include enteric disease, lymphocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

Graduate Program Coordinator
T136 Health Sciences, Box 351790
206-685-3261

Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of course work, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided.

A detailed description of the postdoctoral program is available on the department’s Web site at dept.s.washington.edu/compmed/department/.

Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department’s Postdoctoral Training Program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

Predoctoral Program

This program is designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.

Course Descriptions

C MED 407 Principles of Animal Experimentation: The Mouse (3) Dennis, VanHoosier
Focus on biology and care of mice used in medical research, and the experimental design and ethics of animal research. Includes lectures and problem-based learning. For graduate and advanced undergraduate students. Prerequisite: permission of instructor. Offered: A.

C MED 499 Undergraduate Laboratory Research (1-6, max. 6) Van Hoosier
Specific problems in comparative medicine. Credit/no credit only. Offered: AWSpS.

C MED 512 Introduction to the Anatomical Analysis of Animal Disease (2) Liggitt
Use of animals in experimental study of disease; techniques of animal necropsy, characterization, interpretation of gross and microscopic lesions, correlation of lesions with altered physiological processes, differentiation between naturally occurring and experimentally induced lesions. Prerequisite: PATH 444, PATH 445, or equivalent, and permission of instructor. Enrollment limited: two students per quarter. Offered: AWSpS.

C MED 514 Comparative Pathology Conference (1, max. 6) Liggitt
Focus on histopathology of naturally occurring and experimentally induced lesions of primates, laboratory and domestic animals, fish, wildlife, and birds. Participants discuss the lesions and the basic pathogenetic mechanisms that underlie them. Prerequisite: PATH 500 or equivalent and permission of instructor. Credit/no credit only. Offered: AWSpS.

C MED 516 Current Literature in Laboratory Animal Medicine (1, max. 12) VanHoosier
Critical evaluation of recent articles on laboratory animal medicine and science. Emphasis on literature dealing with spontaneous diseases of laboratory animals, biology and husbandry, zoonotic diseases, and animal models of human disease. Experimental design, use of animals in research, and methods of reviewing manuscripts. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

C MED 518 Clinical Conference Seminar (1, max. 12) Price
Clinical reports of cases of spontaneous and induced diseases, animal models of human disease, and zoonotic diseases discussed. Disease prevalence and preventive medicine measures. Diagnostic exercises. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

C MED 520 Biology of Laboratory Animals (1) Pekow, VanHoosier
Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including man. Husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: A.

C MED 521 Biology of Laboratory Animals (1) Pekow, VanHoosier
Fundamentals of the morphological, functional, and applied aspects of anatomy, physiology, pharmacology, biochemistry, and immunology of the commonly used laboratory animal species. Similarities and differences within, and between, species, including man. Husbandry, genetics, behavior, and nutrition. Prerequisite: permission of instructor. Offered: W.

C MED 526 Epidemiology of Diseases Communicable from Nature (3) DiGiacomo, Rausch
Explores the public health aspects of zoonotic diseases, their epidemiology and approaches to control. Focuses on the major viral, rickettsial, bacterial, protozoal, helminthic, and fungal diseases transmitted from wild and domesticated animals to humans. Prerequisite: C MED 511, C MED 512, or C MED 520 or permission of instructor. Offered: jointly with EPI 526; S.

C MED 530 Diseases of Laboratory Animals (1) VanHoosier
Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: A.

C MED 531 Diseases of Laboratory Animals (1) VanHoosier
Analysis of etiology, pathogenesis, pathology, and disease processes in rodents, lagomorphs, carnivores, and nonhuman primates. Prerequisite: permission of instructor. Offered: W.

C MED 540 Animal Models (1) Dennis
Naturally occurring and experimentally induced analogs of human diseases in animals with emphasis on diseases in search of animal models, and approaches to identifying new models. Animal models of categorical disease (e.g., cancer, atherosclerosis, gerontology) discussed. Prerequisite: permission of instructor. Offered: Sp.

C MED 590 Selected Topics in Animal Medicine (2-5, max. 10) Dennis, VanHoosier
Radiation biology, genetics, anesthesiology and experimental surgery, preventive medicine, and ethical aspects of use of animals in biomedical teaching and research. Specific topics vary from year to year, depending on the expertise of the annual visiting professor. Prerequisite: permission of instructor. Offered: AWSpS.

C MED 600 Independent Study or Research (*)
Credit/no credit only. Offered: AWSpS.

C MED 601 Internship Rotation — Laboratory Animal Medicine (1-)
Credit/no credit only. Prerequisite: DVM degree. Offered: AWSpS.
Family Medicine
C408 Health Sciences

Family medicine is the discipline concerned with the continuing and comprehensive care of individuals and their families. The prime instructional goal of the department is the education and training of physicians who will apply the knowledge and skills of this and other medical disciplines in family practice. Implicit in this goal is the necessity for continual development of new knowledge and its application in the clinical activities of the department.

The Department of Family Medicine was founded in 1971 and is involved with instruction of medical students in several ways. These include presentations in the basic curriculum of the first two years, clinical clerkships as part of the clinical core curriculum, and other elective courses open to all medical students. A graduate residency program in family medicine provides clinical training meeting the standards of the American Board of Family Practice and the Council on Graduate Medical Education of the American Medical Association. Active affiliations are maintained throughout the WWAMI region in predoctoral, residency, fellowship, and continuing medical education in clinical care, teaching, and research.

Course Descriptions

FAMED 499 Undergraduate Research (*)
Research activities arranged with University-based or community physicians in diversified areas relating to family medicine. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 501 P-Introduction to Family Medicine:
Preceptorship (2.5)
Students spend one morning per week for one or more quarters working with a practicing community family physician. Prerequisite: first- and second-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 505 P-Rural/Urban Preceptorship (*, max. 12)
Opportunity to work in a variety of underserved medical settings in rural and urban areas of Washington, Wyoming, Alaska, Idaho, and Montana. Prerequisite: permission of course coordinator. Offered: AWSpS.

FAMED 545 Preclinical Geriatric Elective (2)
Covers disease and disability prevention, health promotion, and positive attitudes that can contribute to successful aging. Emphasis on optimum aging, site visits, and extensive contact with diverse older people.

FAMED 546 Preclinical Hospice Volunteer Training Elective (3)
Using lectures, small groups, role play, and readings, covers the basic knowledge, skills and attitudes that need to be mastered as a hospice volunteer. Students participate as hospice volunteers as part of their field experience. Offered: jointly with MHE 517.

FAMED 547 Spirituality in Medicine (2)
Examination of the beliefs, values, meaning, and spirituality of health professionals for the well-being of their patients as well as for themselves. Offered: jointly with MHE 518.

FAMED 555 P-Wilderness Medicine (1/2)
Elective provides didactic and field experience for third-year medical students in types of medical emergencies and clinical problems unique to rural and wilderness communities, including trauma, survival hypothermia, altitude, frostbite, heat illness, lightning, and river rescue. Credit/no credit only. Prerequisite: permission of course coordinator.

FAMED 556 Spanish for Health Professionals (1)
Instruction in interviewing Spanish-speaking patient. Credit/no credit only. Prerequisite: health professions student.

FAMED 560 P-Indian Health Problem-Based Learning Cases (1)
For second-year medical students. Presents common Indian health problems via problem-based learning cases over two to three days per case. Offered: A.

FAMED 630 P-WRITE Family Medicine Clinical Clerkship (*, max. 24)
Basic clinical clerkship for students enrolled in the WRITE Program.

FAMED 640 P-Clinical Clerkship in Family Medicine —
Boise (12)
Stresses ambulatory primary care with emphasis on comprehensive, integrated care to patients of both genders and all ages. Student functions as clerk in community/residency site. Participates in care of assigned patients, using office, hospital, home, community resources. Prerequisite: third- or fourth-year medical students. Offered: AWSpS.

FAMED 641 P-Clinical Clerkship in Family Medicine —
Spokane (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 642 P-Clinical Clerkship in Family Medicine —
Madigan (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 643 P-Clinical Clerkship in Family Medicine —
Tacoma (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 644 P-Clinical Clerkship in Family Medicine —
University of Washington Medical Center (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 645 P-Clinical Clerkship in Family Medicine —
Group Health (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 646 P-Clinical Clerkship in Family Medicine —
Swedish (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 647 P-Clinical Clerkship in Family Medicine —
Providence (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 648 P-Clinical Clerkship in Family Medicine —
Renton Valley (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 649 P-Clinical Clerkship in Family Medicine —
Olympia (12)
For description and prerequisites, see 640. Offered: AWSpS.

FAMED 650 P-Clinical Clerkship in Family Medicine —
Anacortes (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 651 P-Clinical Clerkship in Family Medicine —
Omak (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 652 P-Clinical Clerkship in Family Medicine —
Spokane Valley (12)
For description and prerequisite, see 640. Offered: AWSpS.
FAMED 653 P-Clinical Clerkship in Family Medicine — Anchorage (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 655 P-Clinical Clerkship in Family Medicine — Havre (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 656 P-Clinical Clerkship in Family Medicine — Whitefish (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 657 P-Clinical Clerkship in Family Medicine — Pocatello (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 658 P-Clinical Clerkship in Family Medicine — Sea Mar Clinic (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 659 P-Clinical Clerkship in Family Medicine — Country Doctor (12)
For description and prerequisite, see 640. Offered: AWSpS.

FAMED 660 P-Clinical Clerkship in Family Medicine — Yakima (12)
For description and prerequisites, see 640. Offered: AWSpS.

FAMED 661 P-Clinical Clerkship in Family Medicine — Bremerton (12)
For description and prerequisites, see 640. Offered: AWSpS.

FAMED 670 P-Advanced Preceptorship in Underserved WWAMI Area (*, max. 24)
Students gain experience, knowledge, and skills needed to care for rural, specific ethnic or underserved populations in Washington, Wyoming, Alaska, Montana, and Idaho. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 671 P-Advanced Preceptorship in United States (*, max. 24)
Supplemental experience in rural/urban practice or a family medicine department in a setting not already established through the family medicine curriculum. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 672 P-Advanced Preceptorship International (*, max. 24)
For medical students desiring primary care experience abroad. Special project deals with influences of social, cultural, educational, and economic forces on health care delivery. Prerequisite: third- or fourth-year medical students, permission of course coordinator. Offered: AWSpS.

FAMED 673 P-Advanced Preceptorship at WWAMI Clinical Centers (*, max. 12)
Supplemental experience in Family Medicine at one of the WWAMI clinical centers. Prerequisite: completion of basic 6-week clerkship in Family Medicine. Offered: AWSpS.

FAMED 674 Advanced Interviewing in Primary Care (8)
Emphasizes the learning of patient-centered interviewing and counseling skills necessary for effective practice of primary care medicine. Prerequisite: permission of course coordinator.

FAMED 675 P-Clinical Elective in Complementary and Alternative Medicine (8)
Clinical elective for students interested in a better understanding of CAM. Includes four different weekly clinical placements with selected CAM providers in the community: naturopathic physician, chiropractor, acupuncturist, and massage therapist. Also includes a weekly two-hour seminar discussing the evidence supporting the use of alternative treatments.

FAMED 680 P-Traditional Indian Medicine Clerkship in Primary Care Setting (*, max. 16)
Students learn how Western physicians collaborate with traditional Indian healers in the provision of health care to an urban Indian population. Prerequisite: completion of required third-year clerkship, UCONJ 530 or permission of instructor. Offered: AWSpS.

FAMED 681 P-Indian Health Care Clerkship (*, max. 16)
Individually designed learning experience allows student to choose training opportunities, including Indian IHS Clinics, Tribal 638 Health Programs, IHS Public Health Program, Urban Indian Health programs, Tribal Council Health activities, and Tribal/IHS Alcoholism Treatment programs. Prerequisite: completion of required third-year clerkships, UCONJ 530, and permission of instructor. Offered: AWSpS.

FAMED 688 P-Family Medicine Subinternship (8)
Students serve as interns for Family Medicine services associated with residency programs under the supervision of family medicine residents and attending physicians. Schedules mix inpatient and ambulatory experiences as determined by the site and the student has the same call as R-1 on service.

FAMED 698 P-Clinical Clerkship in Family Medicine, Away (12)
For description and prerequisites, see 640. Offered: AWSpS.

FAMED 699 P-WWAMI Family Medicine Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of course coordinator. Offered: AWSpS.

Genome Sciences
K328B Health Sciences Building
The Department of Genome Sciences was created in 2001 with the merge of the Department of Genetics and the Department of Molecular Biotechnology.

Graduate Program
Graduate Program Coordinator
K336 Health Sciences, Box 357730
206-616-7297
gensci@u.washington.edu

The Department of Genome Sciences offers a graduate program leading to the degrees of Master of Science and Doctor of Philosophy. Students are admitted only to the doctoral program and may be granted the Master of Science in lieu of the Ph.D.

The faculty and students of the Department of Genome Sciences study a broad range of topics, including the genetics of E. coli, yeast, C. elegans, Drosophila, and mouse; human and medical genetics; mathematical, statistical and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions. Successful completion of the graduate program, generally over a period of five years, leads to the Ph.D. in Genome Sciences.

The department’s goal is to address leading edge questions in biology and medicine by developing and applying genetic, genomic and
computational approaches that take advantage of genomic information now available for humans, model organisms and a host of other species.

**Admission**

Applicants must have completed a baccalaureate or advanced degree at the time of matriculation. Degrees should be in either a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. An ideal candidate will have experience in both areas. The most competitive applicants will have excellent GRE scores as well as extensive laboratory research experience.

Students are chosen from a very competitive pool and come from a wide variety of backgrounds. Admission depends less on specific coursework taken than on general academic excellence.

**Program Requirements**

Students complete a core series of courses during their first year in the program, covering such topics as gene regulation, genomics, genetic analysis, genomic informatics, computational biology, proteomics, and population genetics, as well as a literature review course. Students also rotate through a minimum of three laboratories before selecting a thesis lab at the end of the first year.

In addition to the core course series, students choose electives focused on their specific areas of interest, offered by a variety of UW departments. Students have the option of selecting mentors from core faculty members in the Department of Genome Sciences as well as from adjunct and affiliate faculty members from several UW departments and the Fred Hutchinson Cancer Research Center. A student’s second year in the program is spent working on thesis research while continuing to take elective courses of interest. At the end of the second year, the student takes the General Exam for Ph.D. Candidacy. During the third year, students serve as teaching assistants for two undergraduate courses. Most students complete their research and defend their dissertations during their fifth year in the program.

During all years in the program, students participate in the departmental Journal Club and Research Reports functions, and attend the presentations of well-known researchers via the departmental seminar series.

**Financial Aid**

Genome Sciences provides full funding, including a competitive twelve-month salary, tuition waiver, and health insurance. Support is contingent upon satisfactory academic progress.

**Research Facilities**

The department is currently housed primarily within the J & K Wings of the Health Sciences Complex but will move in spring 2006 to the new Genome Sciences/Bioengineering building currently under construction. Students in the department are assigned space in the laboratories of faculty members with whom they do their rotations or dissertation research. State-of-the-art research facilities are available in the department for cellular, protein, and DNA analysis. Extensive computer and library resources are available to students.

**Course Descriptions**

**GENOME 261 Genomes and Society (4) NW Schivell**

Explores current technological advances in genome research and how these advances are impacting society. Topics include sequencing of the human genome, stem cell research, cloning, genetically modified foods, immunizations/public health, and genetic therapy. Appropriate for non-science majors. Offered: Sp.

**GENOME 351 Human Genetics: The Individual and Society (4) NW**

Principles of Mendelian inheritance as illustrated by human traits and diseases; chromosomes and sex determination; distribution of genes in populations; natural selection and evolution; counseling and genetic engineering; ethical issues. Appropriate for non-science majors. Offered: W.

**GENOME 371 Introductory Genetics (5) NW**

COVERS gene transmission, including chromosome mapping, genetic pathways; mutational analysis biological processes emphasizing mutations affecting chromosome transmission. Introduction to genomics—cloning and sequence analysis of whole genomes. Emphasizes formal genetic mechanisms, molecular techniques. For biological sciences majors. Prerequisite: minimum 1.5 in either BIOL 200 or BIOL 201; may not be repeated. Offered: AWSpS.

**GENOME 372 Gene Structure and Function (5) NW**

Explores the structure of genes and genomes, the mechanism and control of transcription and translation, the molecular mechanisms of mutation, transposition and cancer, and the identification of human disease genes. Prerequisite: GENOME 371. Offered: W.

**GENOME 373 Genomic Informatics (4) NW**

Focuses on methods for analyzing large genetic data sets and their application to biological problems, including sequence alignment and search methods, gene prediction, phylogenetic trees, and microarray analysis. Requires basic programming skills.

**GENOME 411 Gene Action (5) NW**

Molecular genetics: description of fundamental genetics processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focus is on prokaryotic organisms. Prerequisite: BIOL 201; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with MICROM 411; W.

**GENOME 414 Molecular Evolution (5) NW**

Survey of empirical approaches to the study of molecular evolution and ecology, drawing on examples from a variety of taxa and the recent literature. Topics include DNA sequencing and systematics, fingerprinting approaches in behavioral ecology, and adaptive evolution at the molecular level. Prerequisite: BIOL 354. Offered: jointly with BIOL 414.

**GENOME 453 Genetics of the Evolutionary Process (3) NW**

Contributions of genetics to the understanding of evolution. Processes of mutation, selection, and random genetic events as they affect the genetic architecture of natural populations and the process of speciation. Emphasis on experimental data and observation, rather than mathematical theory. Prerequisite: either GENOME 371 or GENOME 372.

**GENOME 454 The Origins of Genetics (4) NW**

Discovery and eventual triumph of Mendelism in the early twentieth century. Concepts of heredity from ancient times to the nineteenth century. Mendel’s work and its rediscovery. Evidence contributing to cornerstone of classical genetics — the chromosome theory of heredity. Prerequisite: either GENOME 351, GENOME 371, or GENOME 372. Offered: A.

**GENOME 465 Advanced Human Genetics (4) NW King, Olson**

Explores genetic analysis of naturally occurring variation in humans; origins and consequences of mutation, as mediated by selection, migration, population structure and drift; approaches to finding human disease genes and characterizing them at the molecular level; relevance of to other species to analysis of human genes. Prerequisite: GENOME 371; either GENOME 372 or BIOC 440. Offered: W.

**GENOME 466 Cancer Genetics (3) NW**

Focuses on three types of cancer-related genetics. DNA repair,
mitotic recombination, chromosome loss and imbalance, and other aspects of genomic instability. Metastatic cancer as an example of natural selection and evolution. Yeast and nematodes as models for the study of cancer genetics. Prerequisite: either GENOME 371 or GENOME 372.

GENOME 475 Debates in Genetics (3)
Utilizes the original scientific literature as the basis for discussion of a range of genetic issues that impact society. Discussions are student-led; evaluations are based on participation in class and on a research paper. Prerequisite: BIOL 200; either GENET 371 or GENOME 371.

GENOME 490 Undergraduate Seminar (2, max. 6) NW
Seminar for advanced undergraduate students engaged in individual research projects or those who wish to gain an understanding of genetic research by analysis of the primary literature. Assignments emphasize the rationale for research projects and the presentation and interpretation of research findings. Offered: AWSp.

GENOME 496 Peer Teaching Assistants in Genome Sciences (1-5, max. 5)
Direct experience in the classroom teaching a discussion section for non-majors in genome sciences courses. Peer teaching assistants attend lectures and weekly preparation meetings and gain in-depth background on the subject material. In addition, peer TAs are given training in teaching techniques and course preparation. Credit/no credit only. Prerequisite: GENOME 371.

GENOME 499 Undergraduate Research (*, max. 30)
Credit/no credit only. Offered: AWSpS.

GENOME 501 Introduction to Research Materials (1-10)
The student undertakes a research project in one of the research groups within the department for a quarter at a time. Credit/no credit only. Prerequisite: graduate standing in the Department of Genome Sciences or permission of graduate program coordinator. Offered: AWSpS.

GENOME 503 An Inquiry Approach to Teaching Genetics at the Introductory High School Level (2, max. 6)
Provides advanced science content on topics in genetics and bioethics that are taught in secondary biology classrooms, as well as pedagogical strategies for conveying concepts to pre-college students. Workshop participation required.

GENOME 504 StarNet: Research Experiences for Students and Teachers (3, max. 9)
Explores the scientific knowledge, technical skills, and pedagogical strategies related to teaching DNA sequencing and bioethics in a high school classroom. Workshop participation required.

GENOME 505 StarNet: Teacher Research Experience (9)
Participating teachers carry out an independent research project in a University of Washington laboratory. Teachers, scientists, and StarNet staff meet weekly for an informal research talk.

GENOME 506 The Science Education Partnership (5, max. 15)
Provides secondary school teachers training in molecular biology, genetics and biotechnology, as well as resources and ongoing support designed to enhance biology instruction. Workshop participation required.

GENOME 520 Seminar (1, max. 15)
Credit/no credit only. Prerequisite: graduate standing in the Department of Genome Sciences or permission of graduate program coordinator. Offered: AWSp.

GENOME 525 Current Literature in Human Genetics (1)
Topics from current literature in human genetics. Students and faculty each present one topic per quarter. Credit/no credit only. Prerequisite: graduate or postdoctoral status. Offered: AWSp.

GENOME 531 Genetics of Human Disease (3)
Modern approaches to the identification of human disease genes permitted by their isolation. Functional conservation of proteins throughout eukaryotic evolution as an approach to their function in model systems such as somatic cell culture, transgenic mice, nematodes, Drosophila, and yeast. Offered: Sp.

GENOME 540 Introduction to Computational Molecular Biology: Genome and Protein Sequence Analysis (3)
Algorithmic and probabilistic methods for analysis of DNA and protein analysis. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: permission of instructor. Offered: W.

GENOME 541 Introduction to Computational Molecular Biology: Molecular Evolution (3)
Computational methods for studying molecular evolution. Students must be able to write computer programs for data analysis. Prior coursework in biology and probability highly desirable. Prerequisite: MBT/GENOME 540 or permission of instructor. Offered: Sp.

GENOME 547 Scientific Writing (1.5)
For graduate students principally in their second and third year. Focuses on the preparation of research manuscripts for publication. Also considers other scientific writing such as thesis proposals and fellowship and grant applications.

GENOME 549 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Pallanck
Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with NEUBEH 549/PHCOL 549; W.

GENOME 550 Methods and Logic in Genetics (3)
Critical reading and detailed discussion of genetics-related scientific research papers. Material emphasizes methodological and logical themes of importance in modern genetics, for example: origin of mutants, genetic epistasis, pulse labeling, and in vivo gene function. Prerequisite: first-year genetics graduate students only. Offered: A

GENOME 551 Mechanisms of Gene Regulation in Prokaryotes and Eukaryotes (1.5) I&S
A detailed examination of the mechanisms of transcription and translation in prokaryotes and eukaryotes as determined by experimental genetics, molecular biology and biochemistry.

GENOME 552 Technologies for Genome Analysis (1.5)
Discussion of current and newly-emerging technologies in genome analysis with regard to applications in biology and medicine and to potential advantages and limitations. Prerequisite: permission of instructor. Offered: A.

GENOME 553 Advanced Genetic Analysis (1.5)
Classical genetic analysis is a powerful approach to dissect complex biological processes. Selective removal, addition, or alteration of specific proteins to identify and order genes in a pathway, define protein function, determine tissue and temporal requirements for gene function, and distinguish among competing hypotheses to explain biological phenomena.

GENOME 554 Genomic Informatics (1.5)
Many complete genome sequences are known. Each of these encodes the instructions for making an entire organism, but how can we hope to decipher the code? Focuses on methods for analyzing genome sequences, ranging from large-scale organizational pattern to gene prediction and detailed local alignment methods.
GENOME 555 Protein Technology (1.5)
Focuses on current and emerging technologies and approaches in protein analysis, and considers applications of these technologies in biology, biotechnology and medicine. Prerequisite: BIOC 440; GENOME 551; GENOME 552; GENOME 553; GENOME 554.

GENOME 556 Developmental Genetics (1.5)
Genetic control of early development in a range of organisms, emphasizing systems in which cellular, genetic, and molecular approaches have combined to make significant contributions to understanding. Prerequisite: permission of instructor. Offered: W.

GENOME 557 Meiosis (1.5)
A comprehensive consideration of meiotic mechanisms emerging from genetic and molecular analysis of model organisms focuses on the molecular basis of chromosomal synapsis, homologous recombination, and meiotic disjunction. The relationship of these mechanisms to the structure of the human genome and the analysis of complex traits are also considered.

GENOME 559 Introduction to Statistical and Computational Genomics (1.5)
Rudiments of statistical and computational genomics. Emphasis on basic probability and statistics, introduction to computer programming, and relevant Web databases.

GENOME 561 Molecular Population Genetics and Evolution (1.5)
Surveys recent literature to gain an understanding of the basic principles of molecular population genetics and evolution as applied to analysis of genome data. Requires some computer analysis of genome data.

GENOME 562 Population Genetics (4) Felsenstein
Mathematical and experimental approaches to the genetics of natural populations, especially as they relate to evolution. Emphasis on theoretical population genetics. Prerequisite: permission of instructor. Offered: Sp.

GENOME 570 Phylogenetic Inference (3) Felsenstein
Methods for inferring phylogenies (evolutionary trees) — biological assumptions, statistical foundations, and computational methods. A comprehensive introduction for graduate students in the biological sciences to phylogenetic methods using data from molecular sequences, continuous and discrete characters, and gene frequencies. Prerequisite: introductory courses in evolution and in statistics. Offered: alternate years; Sp.

GENOME 576 Genetic and Genomic Analysis of Bacteria (1.5)
In-depth coverage of genetic and genomic strategies used to analyze complex biological processes in bacteria. Focuses on general approaches, with examples drawn from studies of pathogenic organisms where possible. A combination of lectures and seminar-style discussions of primary literature.

GENOME 580 Ethics in Biomedical Research and Teaching (1)
Explores ethical issues in research and teaching and discusses avenues of responsible conduct.

GENOME 581 Seminar in Drosophila Genetics (1) Berg

GENOME 582 Seminar in Mouse Genetics (1) Braun
Discussion of contemporary research in and novel methods for genetic, cellular, and molecular analysis of mammalian development, with utilization of transgenic techniques. Credit/no credit only. Offered: AWSp.

GENOME 583 Seminar in Molecular Cytology (1) Byers
Discussions of contemporary research in and novel methods for genetic, cellular, and molecular biological analysis of spindle behavior in the mitotic cell cycle of budding yeast. Credit/no credit only. Offered: AWSp.

GENOME 584 Seminar in DNA Replication (1) Brewer, Fangman
Discussions of contemporary research in and novel methods for genetic, cellular, and molecular biological analysis of budding yeast, with emphasis on the mechanisms and control of DNA replication. Credit/no credit only. Offered: AWSp.

GENOME 585 Seminar in Bacterial Genetics (1) Manoil
Discussions of contemporary research in and novel methods for genetic, cellular, and molecular biological analysis of bacterial assembly mechanisms, with emphasis on the topogenesis of membrane proteins. Credit/no credit only. Offered: AWSp.

GENOME 586 Seminar in Mammalian Genetics (1) Sibley
Discussions of contemporary research in and novel methods for genetic, cellular, and molecular biological analysis of mammalian genetics, with emphasis on lymphoblast development. Credit/no credit only. Offered: AWSp.

GENOME 587 Seminar in Nematode Genetics (1) Thomas
Discussions of contemporary research in and novel methods for genetic, cellular, and molecular biological analysis of nematode development, with emphasis on neurogenesis and other developmental processes. Credit/no credit only. Offered: AWSp.

GENOME 590 Population Genetics Seminar (1) Felsenstein
Weekly presentation by participants of current literature and ongoing research in evolution, molecular evolution, evolutionary genetics of natural populations, human population genetics, and quantitative genetics applied to animal and plant breeding. Credit/no credit only. Prerequisite: GENOME 562 or permission of instructor.

GENOME 599 Special Topics in Molecular Biotechnology (*, max. 12)
Prerequisite: permission of instructor. Offered: AWSp.

GENOME 600 Independent Study or Research (*)
Credit/no credit only. Offered: AWSpS.

GENOME 700 Master's Thesis (*)
Offered: AWSpS.

GENOME 800 Doctoral Dissertation (*)
Offered: AWSpS.

Human Biology

Course Descriptions

HUBIO 500 P-Medical Practice Preceptorship at WWAMI Sites (1, max. 3)
Personal experience with, and insight into, medical practice situations. Student is stationed with carefully selected clinical faculty members in their offices in accordance with the student’s preference of discipline at the WWAMI sites. Registration limited to first-year medical students at WWAMI sites. Offered: AWSpS.

HUBIO 501 P-Human Biology Special Projects (*) Hunt, MacLaren
Designed for medical students electing a special study project related to the Introduction to Clinical Medicine or other human biology courses, which are offered during the first and second years in the School of Medicine. Primarily intended for students in remedial or extended programs. Prerequisite: permission of assistant dean for curriculum. Offered: AWSpS.

</table>
HUBIO 544 P-Endocrine System (3) Weigle
Normal, gross, and microscopic anatomy and physiology of the endocrine system. Illustrations examining the clinical relevance of homeostasis, feedback, and other controlling mechanisms previously learned. Endocrine integration of metabolism. Clinically important endocrine pathophysiology. Offered: A.

HUBIO 546 P-Systemic Pathology (4) Schmidt
Multidisciplinary approach to some diseases that affect more than one organ system (nervous, cardiovascular, respiratory) and that are caused by different mechanisms (congenital, inflammatory, vascular, traumatic, metabolic, neoplastic). Offered: Sp.

HUBIO 550 P-Introduction to Clinical Medicine (-4-) Goldstein
Advanced instruction in interview technique, history taking, and physical examination, with emphasis on identification of problems and correlation of findings with pathophysiological mechanisms. Offered: W.

HUBIO 551 P-Gastro-Intestinal System (4) Saunders
Anatomy of the gastrointestinal system; physiology and pathology of digestion and hepatic function; and physical and laboratory examination. Offered: W.

HUBIO 552 P-Hematology (3) Gersheinher
Familiarizes students with the basic pathophysiologic mechanisms leading to disturbances of red cell, white cell, and platelet production, as well as abnormalities of hemostasis presenting clinical problems. Pathophysiology, rather than minute details of individual disease, is stressed. Offered: W.

HUBIO 553 P-Musculoskeletal System (4) Teitz
Gross, surface, applied, and radiographic anatomy. Clinical manifestations in the musculoskeletal system and pathophysiology of trauma, aging, infection, and inflammation, as well as congenital and metabolic disorders. Dissections, physical examinations, and problem based learning. Offered: W.

HUBIO 554 P-Genetics (2) Horwitz
Review of basic genetic principles and their applications in clinical medicine. Includes human chromosomal disorders; patterns of inheritance, genetic counseling, amniocentesis; pathogenesis of hereditary diseases, monogenic and multifactorial; role of genetics in common diseases; behavioral genetics; drug-gene interactions; and prevention and treatment of genetic diseases, including prenatal diagnosis and population screening. Offered: A.

HUBIO 555 P-Medicine, Health, and Society (3) Lafferty
Interdisciplinary introduction to health services designed for future health care practitioners. Examines the history, organization, and effectiveness of the U.S. health care system. Stresses the student’s ability to adopt a broad perspective across health care disciplines and traditional boundaries. Offered: W.

HUBIO 559 P-Problem Based Learning (3) Teitz
Teaches students to methodically solve medical problems by gathering, sorting, and interpreting data. Students learn life-long self-education and self-evaluation skills. Provides practice working as a health care team by including medical, nursing, and physician assistant students in each group. Offered: W.

HUBIO 560 P-Introduction to Clinical Medicine (-5) Goldstein
Introduction to clinical and laboratory diagnosis. Offered: Sp.

HUBIO 562 P-Urinary System (4) Ryan
Anatomy, physiology, and pathology of the kidney, ureter, bladder, and prostate; pathophysiology and treatment of common fluid and electrolyte problems; renal pharmacology; major clinical urinary system syndromes, with current diagnostic approaches and therapy. Offered: Sp.

HUBIO 563 P-Brain and Behavior (3) Pascualy
Major psychiatric disorders are defined and described, and a systematic approach to differential diagnosis is presented. Conceptual development, pathogenesis, epidemiology, nomenclature, and the terminology used in psychiatry are discussed. Offered: Sp.

HUBIO 564 P-Principles of Pharmacology II (3) Chavkin
Lectures and conferences on drugs that act on the central nervous system. Emphasis on physiological and biochemical mechanisms, with consideration of therapeutic and adverse effects. Offered: Sp.

HUBIO 565 P-Reproduction (4) Steiner
Normal development of the human reproductive system. Sexual differentiation, puberty, endocrine control of testicular and ovarian function, gamete biology, fertilization, implantation, immunology and endocrinology of pregnancy, labor and delivery, pathology of the male and female reproductive organs, contraception, prolactin and lactation, aging and infertility. Offered: Sp.

HUBIO 567 P-Skin System (2) Colven
Gross and microscopic anatomy. Physiology, protection, temperature control, pigmentation, and photosensitivity. Pathology and genetics of skin abnormalities, including tumors. Introduction to clinical evaluation, including physical examination and illustrating examples of inflammatory, vascular, immunological (including drug hypersensitivity), and neoplastic diseases. Offered: A.

HUBIO 568 Clinical Nutrition (1) Lipkin
Principles and practice of clinical nutrition, including role of nutrients in normal growth and development, pathogenesis of chronic disease, and nutrition in the management of certain disease states. Offered: Sp.

HUBIO 590 P-Introduction to Critical Reading and Evaluation of the Medical Literature (1) Wolf
An introduction to methods for identifying and retrieving Web-based high quality, relevant evidence, and to methods for describing and applying rigorous criteria when reading primary research studies or reviews of primary studies that report on the effectiveness of therapeutic or preventive interventions. Prerequisite: first-year medical student standing. Offered: W.

HUBIO 596 P-WWAMI Non-Clinical Selectives II (*)

HUBIO 597 P-Independent investigative Inquiry (8)
Independent research with faculty sponsor and completion of paper in fulfillment of the independent investigative inquiry graduation requirement. Offered: Sp.

HUBIO 598 P-WWAMI Non-Clinical Selectives (*)
Courses offered at WWAMI university sites designed to satisfy the non-clinical selective graduation requirement for medical students. Offered: AWSp.

HUBIO 599 P-Independent Study in Medical Science (6) Marshall
Independent research with faculty sponsor and completion of paper as partial fulfillment of non-clinical selective graduation requirement. Offered: Sp.

HUBIO 600 PA-Capstone Course: Preparation for Residency (1) Norris, Ziskind
A combination of large group lectures and small group discussions and workshops reviewing clinical skills in history-taking and physical examinations, imaging studies, common and emergency drugs, ACLS, infectious disease control, common clinical problems, and other topics that are encountered in residency training. Offered: Sp.
Immunology

H564 Health Sciences

For those contemplating careers in biomedical research, immunology provides challenging and exciting intellectual opportunities. Progress in the discipline in the past decade has been extraordinary, a fact that is nowhere more visible than at the University of Washington. The Department of Immunology, launched in 1989, now boasts more than 200 scientists, students, and technicians, all engaged in elucidating mechanisms underlying immune recognition and responsiveness. Current members of the department have distinguished records in the area of lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.

Consider for a moment the fundamental processes that underlie immune function. First, millions of potentially injurious macromolecules must somehow be recognized. Second, recognition of these macromolecules, generally structures associated with potential pathogens, must trigger powerful effector mechanisms that permit elimination of the offending microorganisms. Finally, these recognition and effector systems must somehow distinguish the universe of potentially harmful molecules from an equally diverse repertoire of structurally similar "self" components. How is such exquisitely specific molecular recognition achieved? How do the cells responsible for mediating host defense develop, and what signaling systems direct their responses? These questions can now be productively addressed using biochemical, genetic, and cell biological techniques.

Graduate Program Coordinator
H564 Health Sciences, Box 357650
206-685-3955, fax 206-543-1013

The Department of Immunology continues to grow and includes more than 25,000 square feet of laboratory space housed on three floors of the H and W wings of the Health Sciences Center. Joint faculty members (those holding primary appointments in other departments) have laboratory facilities in adjacent buildings. Individual laboratories are well equipped for modern biomedical research, and there are central departmental facilities for fluorescence-activated cell sorting, confocal microscopy, and the production of transgenic animals. Students have access to all the instruments and to state-of-the-art microcomputer-based data manipulation. The departmental library maintains recent copies of all major immunology journals and many more are available online or in the nearby University of Washington Health Sciences Library, which is one of the premier scientific libraries in the United States, and consisting of literature research and intensive in-depth study of important and timely topics. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

IMMUN 499 Undergraduate Research (*, max. 24) Investigative work on a variety of topics, including mechanisms of antigen recognition, T-cell development and differentiation, immunogenetics, lymphocyte activation, MHC gene structure and function, retrovirology, and the pathogenesis of autoimmune diseases, among others. Prerequisite: permission of instructor. Offered: AWSp.

IMMUN 532 Advanced Immunology (4) Examines the molecular and cellular basis of immune function. Students must have completed a baccalaureate degree in a biological specialty and be conversant with molecular genetics. Topics include: hematopoiesis, antigen receptor structure, lymphocyte development, antigen presentation, and cytokines. Offered: W.

IMMUN 533 Host Defense to Cancer and Infection (2) Clark Addresses the mechanisms of cellular homeostasis, balancing cells of immune system, programmed cell death, immune surveillance, cancer immunotherapy. Held in conjunction with IMMUN 533, SPR, Weeks 1-5, ODD years. Companion course with IMMUN 535, SPR, Weeks 1-5, EVEN years. Prerequisite: graduate standing in immunology; other graduate students with permission of instructor.

IMMUN 534 Central Issues in Immunology (2, max. 4) Presentations by participants of topics relating to the broad study of immunology. Prerequisite: graduate standing in Immunology. Offered: Sp.

IMMUN 550 Selected Topics in Immunology (1, max. 30) Formal seminar-discussion course for advanced students focused on recent developments in the field and consisting of literature research and intensive in-depth study of important and timely topics. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

IMMUN 551 Regulation of T Cell-Dependent B Cell Maturation (1, max. 30) Clark Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 552 Immunogenetics and Autoimmunity (1, max. 30) Concannon Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 553 Recombination and Repair in B Cell Development (1, max. 30) Maizels Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 554 Immunogenetic Aspects of Human Autoimmunity (1, max. 30) Nepom Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 555 Model of Autoimmune Disease and Their Regulation (1, max. 30) Goverman Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSp.

IMMUN 556 Research in Conference in Regulation of Autoimmunity and Allergic Inflammation (1, max. 30) Ziegler Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

IMMUN 557 Thymic Environment (1, max. 30) Farr
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 558 Research Conference in Apoptosis and Autoimmunity (1, max. 30) Elkon**
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

**IMMUN 559 Cytokine Gene Regulation (1, max. 30) Bix**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 560 Progress in T Cell Research (1, max. 30) Bevan, Fink, Rudensky**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 561 Mechanisms of Peripheral Tolerance (1, max. 30) Fink**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 562 Developmental Regulation of T Cell Function (1, max. 30) Wilson**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 563 Macrophage Biology: Signaling and Phagocytosis (1, max. 30) Aderem**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 564 Cellular/Molecular Regulation of T Cell Responses (1, max. 30) Greenberg**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 565 Signaling and Co-stimulatory Regulation of T Cell Function (1, max. 30) Dong**
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**IMMUN 566 Role of Innate Mechanisms in Generation and Maintenance of Protective Immune Memory (1, max. 30) Kaja**
Weekly group conferences concerning ongoing graduate students and postdoctoral research in immunology. Credit/no credit only. Offered: AWSpS.

**IMMUN 567 Antigen Processing and Presentation (1, max. 30) Rudensky**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 568 Antibody Structure and Function (1, max. 30) Foote**
Credit/no credit only. Prerequisite: graduate standing in Immunology.

**IMMUN 569 Genetics of Diabetes (1, max. 30) Lernmark**
Credit/no credit only. Prerequisite: graduate standing in Immunology.

**IMMUN 570 Cytokine Signaling in Lymphocytes (1, max. 30) Nelson**
Credit/no credit only. Prerequisite: graduate standing in Immunology.

**IMMUN 571 Research Conference in Development and Activation of B Cells (1, max. 30) Rawlings**
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

**IMMUN 572 Research Conference in Signal Transduction in B-Cells (1 max. 30) Scharenberg**
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

**IMMUN 573 Immunology Seminar Series (1, max. 30)**
Weekly discussion in which original research results are presented and discussed. Emphasis is on new and original contributions to field of immunology and related areas; occasional seminars are concerned with review of important topics. Credit/no credit only. Prerequisite: firm background in immunology, permission of instructor. Offered: AWSp.

**IMMUN 574 Research Conference in Kaposi’s Sarcoma-Associated Herpesvirus: Interactions with B-Cells and Endothelial Cells (1, max. 30) Lagunoff**
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

**IMMUN 575 Research Conference in Infection and Immunity (1, max. 30) Bevan**
Weekly group conferences concerning ongoing graduate student and postdoctoral research in immunology. Students may register for more than one conference each quarter Credit/no credit only. Prerequisite: immunology graduate students only; permission of instructor. Offered: AWSpS.

**IMMUN 576 Transcriptional Regulation in the Immune System (1, max. 30) Weinmann**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 577 Lymphocyte Homing and Function (1, max. 30) Campbell**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 578 Immunology and the Pathogenesis of Tuberculosis (1, max. 30) Ramakrishnan**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 579 Costimulation and Autoimmune Disease (1, max. 30) Latchan**
Credit/no credit only. Prerequisite: graduate standing in Immunology. Offered: AWSpS.

**IMMUN 599 Introduction to Immunology Research (1-7, max. 7)**
Current problems in immunological research. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

**IMMUN 600 Independent Study or Research (*)**
Credit/no credit only. Offered: AWSpS.

**IMMUN 700 Master’s Thesis (*)**
Credit/no credit only. Offered: AWSpS.

**IMMUN 800 Doctoral Dissertation (*)**
Credit/no credit only. Offered: AWSpS.

Laboratory Medicine
NW 120, UW Medical Center

Medical technology, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of health care, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

Undergraduate Program
Adviser
NW 120, UW Medical Center
206-598-6131 medtech@u.washington.edu

The Department of Laboratory Medicine offers the following programs of study:

- Bachelor of Science degree with a major in medical technology

Bachelor of Science

Pre-professional Phase. During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.

Professional Phase. The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

Suggested First- and Second-Year College Work: Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include:
CHEM 321, MICROM 301, GENET 351, 371, B STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420.

Begin taking admission requirements, shown below.

Department Admission Requirements

BIOL 180, BIOL 200 and BIOL 220; CHEM 142, CHEM 152 and CHEM 162; CHEM 223 and CHEM 224 (or CHEM 237, CHEM 238 and CHEM 239); MATH 124 or MATH 144 or STAT 220.

BIOL 118 is recommended, but not required.

Complete all general education requirements including 10 credits of Individuals and Societies, and 10 credits of Visual, Literary, and Performing Arts, as well as all required English and writing courses.

Application Procedure: See program adviser for application form.

Application deadline is April 15, to begin the following autumn quarter.

Major requirements

142-146 credits as follows:

Courses Required for Admission (44-47 credits): See list above.

Didactic Courses (52-53 credits): BIOC 405, BIOC 406; MICROM 440, MICROM 441, MICROM 442, MICROM 443, MICROM 444, MICROM 445; LAB M 321, LAB M 322, LAB M 418, LAB M 419, LAB M 420, LAB M 421.

Clinical Rotations (46 credits): LAB M 423, LAB M 424, LAB M 425, LAB M 426, LAB M 427.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: Graduates of the Medical Technology Program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical technologists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical technologist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical technologists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- Instructional and Research Facilities: The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Children’s Hospital and Regional Medical Center, Dynacare Northwest, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans’ Affairs Puget Sound Health Care System, and Virginia Mason Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialities in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.

- Honors Options Available: None offered.
- Internship Opportunities: One or two internships per year in Japan available to graduates of the Medical Technology Program.
- Department Scholarships: None offered.
- Student Organizations/Associations: None currently active.

Of Special Note: The Medical Technology Program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 8410 W. Bryn Mawr Avenue, #670, Chicago, Illinois 60631-3415, (312) 714-8880. Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.
Course Descriptions

LAB M 321 Medical Technology: Introductory Clinical Hematology (6) McDonnel
Lecture and laboratory coverage of theoretical and practical aspects important in the evaluation of blood cells, to include their production, morphology, function, and associated pathology. Instrumentation used in testing included, as well as quality control and quality assurance issues. Offered: W.

LAB M 322 Medical Technology: Introductory Clinical Chemistry (5) Chen-Levy
Lecture and laboratory covering the theoretical and practical concepts associated with testing procedures performed in clinical chemistry. Offered: A.

LAB M 418 Topics in Clinical Chemistry (5) Chen-Levy
Continuation of LAB M 322. Lecture and laboratory exercises covering fundamentals of instrumentation and methodology in the clinical chemistry laboratory. Offered: Sp.

LAB M 419 Clinical Coagulation (4) McDonnel
Lecture and laboratory covering the theory of the hemostatic system, to include tests used in the diagnosis/monitoring of patients with abnormal bleeding and/or thrombosis. Instrumentation as appropriate for testing included. Quality control and quality assurance discussed. Offered: S.

LAB M 420 Laboratory Analysis of Urine and Body Fluids (3) Wilcock
Lecture and laboratory covering urinalysis testing procedures and associated disease entities. Analysis of other body fluids. Methods of microscopic examination by use of bright-field, phase, and polarizing microscopy. Offered: S.

LAB M 421 Medical Microbiology (1/6, max. 6) Goodyear
Lecture and laboratory coverage of human infections and diagnostic procedures used for isolation, identification, and antimicrobial susceptibility testing of the microorganisms associated with disease. Offered: S.

LAB M 423 Clinical Chemistry (*-, max. 24) Wilcock

LAB M 424 Clinical Microbiology (*-, max. 24) Goodyear
Techniques used in the diagnostic microbiology laboratory, including quality control, specimen evaluation, identification of pathogenic microorganisms, and antimicrobial susceptibility testing. Offered: AWSp.

LAB M 425 Clinical Hematology (*-, max. 24) McDonnel
Clinical study of techniques used in the diagnostic evaluation of blood cells, including production, proliferation, survival, morphology, and functional features. Assessment of proteins and cells important in hemostasis included. Quality control and quality assurance issues considered. Biomolecular techniques appropriate for evaluation of the hematologic and hemostatic systems discussed. Offered: AWSp.

LAB M 426 Clinical Immunohematology (1-7, max. 7) Nestor
Lecture and laboratory covering theory of transfusion medicine and serological procedures used in the evaluation of cellular antigen systems. Principles of immunology and genetics included as appropriate for the techniques performed; screening of donor units to provide a safe product discussed. Quality control and quality assurance issues considered. Offered: W.

LAB M 427 Selected Studies in Laboratory Medicine (*-,
LAB M 699 P-WWAMI Laboratory Medicine Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

LAB M 700 Master's Thesis (*)
Credit/no credit only. Offered: AWSpS.

Medical Education and Biomedical Informatics
E312 Health Sciences

The Department of Medical Education and Biomedical Informatics (MEBI) is comprised of three units: the Division of General Medical Education, the Division of Biomedical and Health Informatics, and MEDEX Northwest—the Division of Physician Assistant Studies. The Division of General Medical Education serves the medical school and health sciences community through program support, evaluation, and research in the field of medical education (www.dme.washington.edu). The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics with a view toward making a difference in people’s lives through interdisciplinary collaboration between faculty and students (www.bhi.washington.edu). MEDEX Northwest is a regional program that selects experienced health care providers for training as physician assistants and is dedicated to improving access to medical care and emphasizes delivery of health care services to medically underserved populations in the Northwest (www.medex.washington.edu).

The Department of Medical Education and Biomedical Informatics offers courses in the theory and application of medical education and biomedical and health informatics. Courses are designed for faculty, graduate and undergraduate students, postgraduates and fellows in the health sciences who desire further training in the methods, issues, research, and technology of medical education and biomedical informatics. MEBI offers masters and doctoral degrees, as well as certificates and fellowship training, in biomedical and health informatics. MEDEX Northwest offers a program of study leading to a certificate with an optional degree available (a Bachelor of Clinical Health Services). MEDEX also offers an optional masters degree pathway link with the Extended Degree Program in Public Health. MEDEX provides full-time training in three sites (Seattle, Spokane, and Yakima) and offers part-time training in Seattle and Spokane.

Course Descriptions

MEBI 499 Undergraduate Research (*, max. 12)
Investigative research or directed readings in medical education and in biomedical and health informatics. Prerequisite: permission of instructor.

MEBI 510 Topics in Medical Education Research (1/3, max. 12)
Selected research topics in medical education. Development of skills in critical analysis and production of original research. Optional: 1 additional credit for seminar focusing on application of issues in education practice. Credit/no credit only. Offered: AWSp.

MEBI 511 Current Issues in Medical Education (2) Dohner, Robins, Scott, Wolf
Addresses current issues in medical education in the context of historic and contemporary developments. Topics include curriculum development, teaching, and learning, clinical knowledge and reasoning, assessment, professional development, program evaluation, and certification. Offered: A.

MEBI 512 Leadership in Academic Medicine (1) Dohner, Robins, Scott, Wolf
Explores the theoretical and practical aspects of leadership in academic medicine. Topics include qualities of effective leadership, leadership styles, and impact of institutional organization and culture on leadership. Prerequisite: permission of instructor. Offered: S.

MEBI 520 Teaching Methods in Medical Education (2) Ambrozy
Empirical and theoretical merits of different teaching methods as applied to medical education. Structuring and leading group discussions, using questions, organizing and delivering lectures, identifying styles of clinical supervision, providing constructive feedback, and presenting effective clinical demonstrations. Offered: W.

MEBI 521 Evaluation of Learning in the Health Sciences (3) Carline
Basic issues and methods for evaluation of learning: cognitive performance, psychomotor skills, and reasoning abilities in classroom, laboratory, and clinical settings. Practical applications of instruments such as multiple-choice questions, essays, oral examinations, checklists, rating scales, simulations, and patient management problems. Recommended: 520. Offered: Sp.

MEBI 522 Research in Medical Education (2) Scott
Individualized, problem-based overviews of research methods and research design pertinent to research and scholarship in medical education. Development and sequencing of research projects from conceptualization through literature review, including proposal development, project implementation, data management, analysis, and write-up. Assessment and critical reading of related literature stressed. Offered: A.

MEBI 530 Medical Informatics (3) Masuda
Overview of biomedical and health informatics concepts, theories, and applications, including the historical evolution and the current and future research directions within the context of information flow in health care settings. Offered: A.

MEBI 531 Computing Concepts for Medical Informatics (3) Kalet
Introduction to computing concepts underlying the solution of problems in medical information management, medical problem solving and medical informatics research. Algorithms, data structures, programming languages, object-oriented programming. Prerequisite: some prior experience with computer programming and application computers in medical care. Offered: A.

MEBI 532 Computing Concepts for Medical Informatics II (3) Kalet
Continuation of topics begun in MEBI 531: multiprogramming and operating system principles, client-server, network programming with sockets, macros, higher level languages, software engineering. Prerequisite: MEBI 531 or equivalent. Offered: W.

MEBI 534 Biology and Informatics (3) Brinkley
A computing and information oriented treatment of the core concepts of human biology, addressing structure and function at three levels or organization: organism, cell, and gene. Each level includes examples of key anatomic and physiologic concepts, presented from a computational perspective and with the use of electronic resources. Offered: A.

MEBI 535 Clinical Topics for Informaticists (3) Karras
Builds on Biology for Informaticists and introduces the student to a variety of clinical disciplines, representative clinical problems from these disciplines, and informatics issues and applications within these disciplines. Lecturers include faculty from the Schools of Medicine, Nursing, Pharmacy, and Dentistry. Prerequisite: MEBI 530, MEBI 531, MEBI 534. Offered: W.
MEBI 536 Bioinformatics and Gene Sequence Analysis (3) Rose
Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with PABIO 536; W.

MEBI 537 Informatics Research and Evaluation Methods (4) Carline, Brock
Introduces the many facets of evaluation and research for Biomedical and Health Informatics projects. Focuses on formal studies of the application of information technology in medicine, conducted while an information resource is under development and after the resource is in routine service. Offered: W.

MEBI 540 Critically Appraising and Applying Evidence in Health Care (3) Pinksy, Wolf
Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient’s problem. Prerequisite: permission of instructor. Offered: jointly with HSERV 528; W.

MEBI 541 Introduction to Systematic Reviews and Meta-analysis of Evidence (2) Wolf
Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory level courses in statistics, epidemiology or biostatistics. Prerequisite: permission of instructor. Offered: jointly with HSERV 529; Sp.

MEBI 550 Knowledge Representation and Applications (3) A readings class in knowledge representation, as described in the primary artificial intelligence and biomedical informatics literature. Topics may include: frame-based systems, description logics, theorem proving, complexity vs. tractability, ontologies, rule-based systems, and biomedical domain applications. Prerequisite: any artificial intelligence course (e.g., CSE 415 or better), or permission of instructor.

MEBI 552 Clinical Decision Support (3) Doctor Provides foundation in clinical decision making and support (including decision analysis, Bayesian analysis, belief networks, artificial intelligence, neural networks) presented in the context of local and national decision support systems and the movement to decrease errors in healthcare. Prerequisite: MED 530, MED 531, MED 535, MED 537, CSE 415 or permission of instructor. Offered: A.

MEBI 570 Health Sciences Information Needs, Resources, and Environment (3) Characteristics of users of health sciences information; health professionals, researchers, consumers and patients; environments (academic health sciences centers, hospitals, clinics, and public libraries); evaluation of information resources in health care; types and uses of health information management systems; policy issues, professional standards, education, and certification. Offered: jointly with LIS 528.

MEBI 580 Computing Fundamentals for Health Providers (3) Enables health professionals to solve work/practice challenges using existing features of desktop computers. Emphasizes productivity concepts. Introduces extended features of common software packages, as well as basic concepts/methods of small system management and support. Prerequisite: admission to Health Informatics Certificate Program or by instructor permission. Offered: jointly with NURS 521; W.

MEBI 590 Selected Topics in Health Informatics (1-3, max. 12) Computers and information technology are improving and changing healthcare education, research, and clinical practice. Informatics faculty and researchers from the UW and affiliated institutions present their research findings as well as discuss their views of national developments in their respective disciplines. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.W.Sp.

MEBI 591 Biomedical Health Informatics Research Colloquium (1) Provides forum for extensive interactive research discussions. Format is round table with short presentations and long facilitated discussion amongst students and core BHI faculty. Both students and faculty present. Topics primarily research focused (ongoing and proposed research), but also journal articles, current topics of debate, and other. Credit/no credit only.

MEBI 598 Special Topics in Biomedical and Health Informatics (1-4, max. 12) Readings, lectures, and discussions pertaining to a significant biomedical and health informatics problem or an emerging issue. Topics vary. Offered: A.W.Sp.

MEBI 599 Independent Study or Research (*, max. 12) MEBI 600 Independent Study/Research (1-10, max. 10) Individual readings or study, including independent study in preparation for doctoral examinations, research, etc. Prerequisite: permission of instructor.

MEBI 700 Master's Thesis (1-15, max. 15) Prerequisite: permission of instructor. Offered: A.W.Sp.

MEBI 800 Doctoral Dissertation (1-10, max. 10) Medical History and Ethics A204 Health Sciences Building
The Department of Medical History and Ethics offers a program of study leading to a Master of Arts in Bioethics which provides competencies in ethical theory, clinical ethics, and research ethics and methods, along with the historical foundations of bioethics.

Undergraduate Program Adviser A204 Health Sciences Building, Box 357120 206-543-5145 mheinfo@u.washington.edu
The Department of Medical History and Ethics offers the following programs of study:
- A minor in medical history and ethics

Minor
Minor Requirements: 25 credits of medical history and ethics and related courses, including MHE 401 or MHE 417; one of MHE 411, MHE 474, PHIL 240, or PHIL 242; plus an additional 14 credits selected from MHE 402/PHIL 342, MHE 413, MHE 422, MHE 424, MHE 440/PHIL 459, MHE 474/PHIL 411, MHE 481, MHE 483, MHE 485, MHE 497, MHE 498, MHE 499, ANTH 322/RELG 320, ANTH 375, ANTH/HSERV 475, ANTH 476, 477, ENGL 364, GEOG 280, HIST 311, HIST 312, PHIL 102, PHIL 160, PHIL 345, PHIL 410, and PHIL 440. Minimum grade of 2.0 required in each course presented for the minor. See the department’s Web site for periodic updates of acceptable electives.
The Department of Medical History and Ethics offers a program of study leading to a Master of Arts in Bioethics which provides competencies in ethical theory, clinical ethics, and research ethics and methods, along with the historical foundations of bioethics. Students develop skills in research, writing, and public speaking about bioethics, as well as the ability to communicate about and frame ethical issues in health care and biomedical research from a multidisciplinary perspective.

The Master of Arts program brings together students from diverse backgrounds: those with a bachelor of arts in philosophy, or equivalent, who plan to pursue a Ph.D. in bioethics or a related humanities discipline, and those with a professional or master’s degree in a health care or health policy field who wish to incorporate bioethics into their professional activities. Applicants with a B.A. must take the GRE. The GRE is not required of applicants with a professional or master’s degree.

The program of study includes 45 to 56 credits, comprised of required courses, elective courses that enhance multidisciplinary understanding of ethical issues, and practicum experiences in the University’s affiliated hospitals, ethics committees, and institutional review boards. All students complete a master’s project in an area of personal scholarly interest.

While the program is designed to be completed in two years (six quarters), a very focused student might complete the program in five quarters. Options of earning a concurrent M.A. in bioethics are available for students enrolled in M.D. or J.D. programs at the University of Washington.

Course Descriptions

MHE 401 History of Modern Medicine (3) I&S Whorton
Survey of evolution of medical theory, practice, and institutions in European and American society from the late 18th century present. Medical background not required. Recommended: prior courses in sciences and/or history.

MHE 402 Ethical Theory (5) I&S Jecker
Review of principal theories for normative ethical discourse, such as utilitarianism and deontology, and major metaethical commentary on those theories. Illustrated by classical and modern authors. Recommended: one basic course in ethics.

MHE 404 Metaethical Theory (5) I&S Jecker
Study of major ethical writings in the twentieth century, with principal emphasis on the Anglo-American tradition. Recommended: one introductory philosophy course.

MHE 411 Introduction to Bioethics (3) I&S
Basic concepts, principles, and methods of analysis, with application to some major issues in the field of bioethics. Case studies utilized to illustrate nature of questions arising in bioethics and to provide students with opportunity to develop skills in ethical analysis.

MHE 413 History of Alternative Healing (3) I&S Whorton
Analysis of historical development of alternative healing in American society over last two centuries. Emphasis on evolution of theory, practice, and professional institutions for major alternative systems and interactions of alternative modalities with conventional medicine. Medical background not required.

MHE 417 Disease in History (3) I&S Whorton
Study of Western civilization’s experience with epidemic disease, the growth of understanding of the causes of disease, the formation of a philosophy of prevention, and the development of programs to protect the public health. Emphasis on the last two centuries. Medical background not required.

MHE 440 Philosophy of Medicine (5) I&S Jecker
Familiarizes students with central issues in the philosophy of medicine. Focuses on the nature of medical knowledge, the connection between theory and observation, the meaning of medical concepts, and the relationship between theories and the world. Recommended: prior courses in philosophy, history of science, or history of medicine. Offered: jointly with PHIL 459.

MHE 474 Justice in Health Care (5) I&S/VLPA Jecker
Examination of the ethical problem of allocating scarce medical resources. Emphasis on fundamental principles of justice that support alternative health policies. Recommended: prior courses in philosophy or medical ethics. Offered: jointly with PHIL 411.

MHE 481 The Pursuit of Health in American Society (3) I&S Berryman
Evolution of medical thought related to exercise for good health, training for sport participation, and treatment of sport-related injuries. Begins with ancient period, concludes with present. Development of specialization in sports medicine, sport team physicians, preventive medicine, concepts of fitness and wellness as related to exercise prescription, and sports medicine clinics.

MHE 483 The Rise and Development of Sports Medicine (3)
I&S Berryman
Evolution of medical thought related to exercise for good health, training for sport participation, and treatment of sport-related injuries. Begins with ancient period, concludes with present. Development of specialization in sports medicine, sport team physicians, preventive medicine, concepts of fitness and wellness as related to exercise prescription, and sports medicine clinics.

MHE 485 Concepts of the Body in Nineteenth- and Twentieth-Century America (3) I&S Berryman
Investigation of ideas relating to corporeal self in nineteenth- and twentieth-century America. Evolution of physical ideals of manliness/femininity, how ideals related to surrounding culture, how different bodily activities developed to realize ideals. Athleticism, physiognomy, body contests, body building, decorations, cosmetics, anthropometry, artificial parts.

MHE 497 Medical History and Ethics Special Electives (*-)

MHE 498 Undergraduate Thesis (*)

MHE 499 Undergraduate Research (*, max. 5)
Investigative work in biomedical ethics or history of the biomedical sciences.

MHE 501 Alternative Approaches to Healing (2) Whorton
Philosophies and practices of the major alternative approaches to healing. Historical characterization of alternative medicine accompanied by presentations by practitioners of chiropractic, naturopathic, homeopathic, and traditional Chinese medicine. Credit/no credit only.

MHE 503 The Historical Background of Modern Medicine (1) Whorton
Major elements of thought, practice, and values that have directed the evolution of medicine in Western civilization. Medical culture examined as both an expression and modifier of the culture of its ambient society. Limited to: medical students and others in health professional schools. Credit/no credit only.

MHE 505 Professional Seminar I (3)
Methods for identifying a bioethics research question and developing
a systematic approach to investigating it, including utilization of
bibliographic sources in bioethics, philosophy, history. Prerequisite:
permission of instructor.

MHE 506 Professional Seminar II (2)
Capstone course for M.A. in Bioethics. Includes conducting research
in ethics, writing, giving oral presentations, facilitating seminars,
developing curriculum vitae, and career planning.

MHE 511 P-Medical Ethics (2)
Ethics course designed especially for first-and second-year medical
students. Study of ethical problems arising in clinical setting of
medicine, introducing students to philosophical analysis and
argument in practical contexts. Seminar-discussion format with
readings from contemporary authors. Credit/no credit only.

MHE 512 P-The Human Face of Medicine (2)
Foundation of human values undergirding medical practice. Images
of physician — motivations for medicine, empathy versus
detachment in doctor-patient relationship, health for the health-
professional — the art of coping, limits of power — when medicine
fails to cure, uses/abuses of technology, physician’s role in public
health issues, the healing process.

MHE 513 P-Ethical Responsibilities of Medical Practice (2)
Provides intensive and practical guidance about management of
principal ethical and legal problems that arise in clinical practice:
informed consent, confidentiality, decisions regarding life-support,
advance directives and surrogate decision-makers, duty to care for
indigent and risky patients. Offered: one-week intensive; S.

MHE 514 Legal, Ethical, and Social Issues in Public Health
Genetics (3) Kaszler, Mastroianni
Equips the student to anticipate and assess potential legal, ethical,
and social barriers complicating the incursion of new genetic
advances, information, and technologies into public and private
health care delivery efforts. Prerequisite: GENET 371 or equivalent.
Offered: jointly with LAW H 504/PHG 512.

MHE 515 Public Commentary on Ethical Issues in Health
Genetics (3) Burke
Explores issues in public health genetics through academic commen-
tary, personal narratives, science fiction, and film using ethical
frameworks from narrative ethics, feminist ethics, and principlism.
Includes cloning, assisted reproduction, prenatal genetic testing,
presymptomatic genetic testing, gene therapies, scientific responsi-
bility, and GMOs. Graduate students only. Offered: jointly with PHG
525.

MHE 516 Ethical Frameworks for Public Health Genetics (2)
Mastroianni
Case-based application of ethical principles in genetic medicine to
range of problems arising in genetics practice, policy, research.
Examination of traditional problems including eugenics and testing/
screening for genetic disease, as well as emerging problems in
population and environmental genetics. Prerequisite: MHE 514/
PHG 512. Offered: jointly with PHG 522.

MHE 517 Preclinical Hospice Volunteer Training Elective (3)
Farber, McCormick
Using lectures, small groups, role play, and readings, covers the basic
knowledge, skills and attitudes that need to be mastered as a hospice
volunteer. Students participate as hospice volunteers as part of their
field experience. Offered: jointly with FAMED 546; WSp.

MHE 518 Spirituality in Medicine (2) Farber, McCormick
Examination of the beliefs, values, meaning, and spirituality of
health professionals for the well-being of their patients as well as for
themselves. Offered: jointly with FAMED 547.

MHE 520 Seminar in the History and Philosophy of Medi-
cine (3)
Origins and philosophical foundations of medical sciences. Critical
analysis of processes of evaluation and explanation in biomedical
sciences. Consideration of evolution and nature of modern
biomedical investigation; concepts of life/death, health/disease;
philosophical dimensions of clinical medicine. Open to majors,
medical students, arts and sciences graduate students, and others.

MHE 521 The Ethical Challenges of Modern Medicine (3)
McCormick
Case-study approach to contemporary ethical issues in medicine,
utilizing techniques of ethical analysis and argument in examining
actual cases arising in our pluralistic culture, where values are often
in conflict. Open to graduate and professional students and others
with appropriate background.

MHE 522 Ethical Problems Surrounding Death (3) McCormick
Issues arising in care and treatment of dying patients and their
families, including truthful disclosure, use of life-supports, “euthana-
sia,” coping with death and grief. Intersection of patient and
professional values related to care in terminal phase of illness. Open
to graduate and professional students and others with appropriate
background.

MHE 523 Biomedical Ethics (3) McCormick
Selected topics in medical ethics emphasizing methods of ethical
reasoning about moral dilemmas and contributions of philosophical
theories and principles to practical problems of medicine. Students
provided with opportunities to test their value assumptions and
analytical skills. Open to graduate and professional students and
others with appropriate background.

MHE 530 Genetic Discovery in Medicine and Public Health
(3) Burke
Addresses the clinical and societal implications of genetic knowl-
edge, with an emphasis on the ethical and policy issues surrounding
the use of genetic technology in medicine and public health from
1900 to the present. Offered: jointly with PHG 542; W.

MHE 535 Medical Ethics and Jurisprudence (3) Jonsen
Relationship between bioethics and law. Review of basic concepts of
both disciplines; their theoretical and practical connections.
Analysis of principal legal cases and statutes illustrating such issues
as informed consent to treatment, foregoing life support, research
with human subjects, confidentiality, allocation of health care
resources. For graduate and professional students.

MHE 536 Research Ethics and Regulation (3) Mastroianni
Explores the ethical principles and concepts and U.S. laws related to
(1) research conducted with animals, (2) research on humans, and
(3) the responsible conduct of research. Required for graduate
students in the Department of Medical History and Ethics, School
of Medicine. Offered: jointly with LAW H 536; W.

MHE 540 Seminar in the History of Health and Physical
Exercise (3)
Selected topics in the development of medical thought as it relates
to exercise, sport, and overall well-being. Open to majors and
graduate students in medicine, the arts and sciences, and others with
appropriate background and interest. Prerequisite: permission of
instructor.

MHE 541 Exercise in Modern Medicine (1) Berryman
Survey of role and place of exercise in modern medicine. Historical
and contemporary analysis of physical activity and sports medicine
in the American health system. Presentations by clinicians about
their experiences in: orthopaedics, exercise physiology, sports
nutrition, sports psychology, pediatric sports medicine, special issues
of female athletes, environmental medicine.

MHE 548 Introduction to Clinical Ethics (5) Burke
Introduction to history, practice, and research methods in clinical ethics. Case-based examination of methods including principality, casuistry, narrative methods, virtue ethics. Prerequisite: permission of instructor.

MHE 549 Current Topics in Clinical Ethics I (3) Dudzinski
Analysis of complex ethical cases from UWSOM clinical departments, literature, and media. Case discussion focuses on implications for delivery of medical care. Prerequisite: MHE 548 or permission of instructor.

MHE 550 Current Topics in Clinical Ethics II (3) Freyer-Edwards
Analysis of complex ethical cases from UWSOM clinical departments, literature, and media. Case discussion focuses on public policy implications. Prerequisite: MHE 548 or permission of instructor.

MHE 595 Ethics Practicum (1-6, max. 6)
Students participate in clinical ethics rounds, case discussions, review of research protocols, or other professional activities related to bioethics. Credit/no credit only. Prerequisite: by permission of instructor.

MHE 596 Masters Research Project (1-12, max. 12)
Research project culminating in a scholarly paper suitable for publication in a peer-reviewed journal. Credit/no credit only. Majors only.

MHE 600 Independent Study or Research (*)

Medicine

MENGERT

MED 500 Undergraduate Thesis (*) Paeuw
Offered: AWSpS.

MED 501 Undergraduate Research (*) Paeuw
Case studies, with laboratory research. Available to undergraduates and medical students. Offered: AWSpS.

MED 505 P-Preceptorship in Medicine (1) Paeuw
To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations by being stationed with carefully selected clinical faculty members in their offices. Credit/no credit only. Prerequisite: permission of department. Offered: AWSpS.

MED 510 Health Issues of Sexual Minorities (1) Greenberg
Introduction to the special health care issues and barriers confronting persons identified as bisexual, gay, lesbian, or transgendered. Includes lectures, panels, and case presentations by faculty and community experts. Offered: Sp.

MED 530 AIDS: A Multidisciplinary Approach (2) Hawes
Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of (HIV) infections. The impact of HIV/AIDS on community and global health care and prospects for prevention and control. Credit/no credit only. Offered: jointly with EPI 530; A.

MED 531 P-Human Genetics (*) Stamatoyannopoulos
Weekly seminar dealing with a variety of topics in medical genetics given by faculty of the Division of Medical Genetics and related departments and divisions. Open to medical students with a good foundation in genetics. Offered: AWSp.

MED 532 Statistical Methods in Medical Genetics (2) Wijsman
Theory and application of statistical techniques used in medical genetics. In-depth discussion of linkage and segregation analysis and ascertainment problems. Applications stressed with reference to assumptions and limitations. Data sets analyzed with current computer programs. Prerequisite: knowledge of genetics or permission of instructor. Offered: jointly with BIOST/PHG 532; Sp.

MED 533 P-Clinical Endocrinology (2) Cummings
Emphasis on the most major and dependable symptoms, signs, laboratory tests, and therapy for clinical endocrinopathies. Patient illustrated. Limited to second-year medical students. Offered: W.

MED 540 P-Advanced Global Health (2)
Prepares health profession students for work in developing countries. Includes health care delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: Sp.

MED 546 Clinical Applications of Gene Therapy (2) Lieber
Overview of the current status of gene therapy. Discusses its role in the future practice of medicine. Lecture and literature reviews. Offered: S.

MED 547 Quantitative Methods in Medical Genetics (2)
Computational methods of use for medical genetics. Review of problem sets. Topics range from basic probability to linkage analysis. Prerequisite: genetics and permission of instructor.

MED 549 Clinical Medical Genetics (1)
Review of current clinical advances in medical genetics. Includes lectures and discussion of cases from medical genetics clinic. Prerequisite: genetics or human genetics and permission of instructor. Offered: AWSp.

MED 550 P-An Introduction to Emergency Medicine (1) Mengert
Presentation of common medical and surgical emergencies and their urgent management, especially within the framework of rapid patient assessment and stabilization. Lecture topics include chest pain and myocardial infarction, basic arrhythmia management, and burn and wound care. Offered: Sp.

MED 555 P-Mind, Body, and Pen: Writing and the Art of Becoming a Physician (1)
Provides forum for medical students to write about issues in medicine and medical education. Focuses on writing as a process for giving voice to the conflicting demands and dilemmas of becoming a physician. Explores personal narratives, dreams and disappointments, chronic illness and death, empathy and revulsion, authenticity and power. Offered: W.

MED 560 P-Advanced Global Health (2) Kimball
Prepares health profession students for work in developing countries. Includes health care delivery systems, political, social, and economic determinants of health, major global health issues, and personal well-being while abroad. Lecture and seminar format with guest speakers, student presentations, and discussion. Offered: Sp.

MED 561 Tropical Medicine (1)
Intended for professional health science students interested in learning the pathophysiology, epidemiology, and clinical presenta-
tion of disease conditions that are more commonly seen in less-developed countries, resource-limited settings, or tropical climates, and how to diagnose, treat, and follow the resolution of these diseases with commonly limited resources. Credit/no credit only.

MED 565 P- The Healer's Art: Awakening the Heart of Medicine (1) Wicks  
Encourages cultivation of human dimensions in practice of medicine while strengthening personal commitment to medicine as a life’s work. Facilitates student recognition of commonality of personal concerns among peers and student response to the dimension of mystery in the experience of illness as well as development of the capacity for awe. Offered: W

MED 599 P-Transfusion Machine (3) Reiner  
Group discussions and didactic sessions cover broad category of transfusion medicine. Hands-on laboratory experience in red cell serology/compatibility, coagulation, and histocompatibility with emphasis on diagnosis and management of clinical problems. Based at Puget Sound Blood Center. Prerequisite: fourth-year medical student standing; third-year student standing with permission of instructor.

MED 604 P- Clinical Preceptorship in Internal Medicine (8) Shima (Forks)  
Working closely with primary-care physicians, the student is exposed to the private practice of internal medicine in a small community. Operating on a one-to-one basis with an internist, the student evaluates and manages inpatients and outpatients on a primary care, consultative, and emergency basis. Prerequisite: MED 665. (Four weeks, full-time.) Offered: AWSpS.

MED 630 P- WRITE Medicine Clinical Clerkship (*, max. 24)  
Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

MED 640 P- Dermatology Clinic (*, max. 5) Olerud  
Students attend dermatology clinic on Monday mornings and Thursday afternoons for twelve weeks. Two half-days per week. Prerequisite: MED 665. Offered: AWSpS.

MED 642 P- Clinical Oncology (8) Stewart (Fred Hutchinson Cancer Research Center)  
Students functioning as primary physicians are responsible for the workups and daily care of patients receiving marrow transplants, high-dose chemotherapy or immunotherapy on an intensive-care research ward. Emphasis is on the management and supportive care of patients with pancytopenia and immunosuppression, transplantation biology, cancer chemotherapy, and infectious disease problems. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 644 P- Management of Sexually Transmitted Diseases (2) Golden, Handsfield  
Instruction and clinical experience in diagnosis, treatment, management, and patient counseling of sexually transmitted diseases. Instruction in genitourinary physical examination skills; relevant laboratory techniques and management of patients with STDs. Prior to the elective, each student must review a packet of didactic materials. Prerequisite: MED 665, SURG 665, and OB GYN 665. Offered: AWSpS.

MED 650 P- Advanced Medical Genetics (*, max. 5) Jarvik, Horwitz, Stamatoypannopoulous  
Summer course intended for third-year students who would like to increase their background in specific areas of medical genetics. Involves seeing patients with the instructor, reviewing the literature, analyzing clinical information, and writing a review on a selected topic. Prerequisite: HUBIO 554. Offered: S.

MED 655 P- Clinical HIV Care (8) Harrington  
Full-time outpatient and inpatient elective in HIV care for senior medical students. Students see patients for routine care and acute medical problems that do not require hospitalization, as well as provide inpatient consults. Prerequisite: MED 665.

MED 656 P- Clinical Nutrition (8) Bruemmer, Parnell, Weigle  
Instruction in nutritional assessment and care of both inpatients and outpatients. Students work with preceptors at a variety of hospital and clinic teaching sites, attend nutrition-related seminars, and practice interview skills on standardized patients. Prerequisite: HUBIO 568; MED 665.

MED 665 P- Clinical Clerkship (*, max. 24) Paauw  
Third-year medical students assume increasing responsibility for care of hospitalized patients in a teaching-hospital setting and participate in a four-week outpatient experience emphasizing continuity of care. Daily rounds with resident and attending physicians, with lectures and conferences. Progress evaluated by supervising physicians and a written examination. (Twelve weeks, full-time.) Offered: AWSpS.

MED 666 P- Advanced Clinical Clerkship in Internal Medicine-WWAMI (12) Paauw  
Advanced clinical clerkship in internal medicine in three small urban communities. Supervised, structured experience in dealing with situations commonly encountered by the practicing internist. Continuity of care and the relationship between care given in the ambulatory setting and in the hospital, as well as by other community health services, is emphasized. Prerequisite: MED 665. (Six weeks, full time. Limit: six students.) Offered: AWSpS.

MED 678 P- Dermatologic Surgery (8) Olerud  
Participation in dermatology clinics and inpatient consultations at University of Washington Medical Center; Harborview Medical Center; Children's Hospital Medical Center; Seattle V.A. Hospital; Meridian, Idaho; Casper, Wyoming; and Bellingham, Washington. Journal club and clinical conferences each week with entire staff. A continuing series of teaching seminars and weekly dermatopathology conferences. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 679 P- Gastroenterology (8) Lee, Novan (Sacred Heart Spokane)  
Participation in consulting ward rounds, procedures, conferences, and selected clinics with full-time divisional staff at University and Veterans Administration hospitals, and at Pacific and Harborview medical centers, plus directed tutorial work. Prerequisite: MED 665. (Four weeks, full-time.) Offered: AWSpS.

MED 680 P- Rheumatology (8) Etlon  
Full-time inpatient-outpatient clerkship in rheumatology. Clinical experience provided in diagnosis and treatment of rheumatic diseases, utilizing outpatient clinics and hospitalized patients at the University of Washington Medical Center, Harborview Medical Center, or VAMC. Emphasis on concepts in pathophysiology, diagnosis, and treatment of these diseases. In addition to patient contact, reading, seminars, and preceptorial sessions are the methods of instruction. Prerequisite: MED 665. Offered: AWSpS.

MED 681 P- Dermatologic Surgery (8)  
Dermatologic surgery elective for senior medical students. Instruction in Mohs surgery, conventional skin surgery, cosmetic procedures, wound healing and closure, and intraoperative and postoperative patient management. Prerequisite: MED 665.

MED 682 P- Cardiology and Electrocardiography (8) Caldwell (Seattle V.A. Hospital), Corson (Harborview Medical Center), Herzog (Anchorage Veterans Administration Hospital Clerkship in clinical cardiology-combined inpatient-outpatient assignments, ECG interpretation. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.
MED 683 P-Clinical Respiratory Disease and Critical Care Medicine (8) Lakshminahrayan (Seattle V.A. Hospital), Pierson (Harborview Medical Center), Roth (Madigan) Thompson (Boise Veterans Ad
Training in respiratory disease diagnosis and pulmonary therapy, with special emphasis on cardiopulmonary function testing and interpretation. Inpatient and outpatient teaching rounds, conferences, and basic science integration. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 684 P-Clinical Hematology/Oncology (8) Abkowitz (University of Washington Medical Center), Broudy (Harborview Medical Center), Collins (Boise Veterans Administ
Outpatient and inpatient experience with hematologic/oncologic disorders. The elective includes teaching rounds, conferences, and evaluation of laboratory work. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 685 P-Clinical Genetics (*, max. 24) Bird, Byers, Motulsky, Stamatoyannopoulos
Full-time clinical clerkship in medical genetics. Provides extensive exposure to variety of genetic diseases and genetic counseling. Students work in three clinics (Monday, Tuesday, Thursday), response to in-house consultation requests, attend rounds at Children’s Hospital and Medical Center and University of Washington Medical Center and seminars at University of Washington Medical Center (Wednesday, Friday). Prerequisite: MED 665. Offered: AWSpS.

MED 686 Medical Consultation (8) Hamlin
Full-time outpatient and inpatient elective in peri-operative medical consultation for senior medical students. Students see patients in the medical consultation clinic, then follow them daily when they come in for surgery. Prerequisite: MED 665. Offered: AWSpS.

MED 688 P-Ward Medicine Subinternship (*, max. 24) Harvey (Anchorage), R. Jones (Madigan Hospital Medical Center), McGee (Veterans Administration Medical Center), Paauw (U
Students act in the capacity of interns on the medical wards under supervision of house staff and visiting physicians. They attend all regular medicine rounds and conferences as their schedules permit. Prerequisite: MED 665. (Four or six weeks.) Offered: AWSpS.

MED 689 P-Clinical Infectious Diseases (8) Stamm (University of Washington Medical Center)
Students participate in the consulting service throughout the hospital, attend daily plate rounds, conferences, and seminars. (Four weeks.) Corey (Fred Hutchinson Cancer Research Center), Holmes (Harborview Medical Center), Miller (Seattle V.A. Hospital), Morris (Madigan Army Medical Center), Novan (Spokane), Stevens (Boise Veterans Administration Hospital). Participate in consulting service throughout hospital to learn microbiological aspects of infectious diseases through the clinical laboratories. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 690 P-Cardiology Subinternship (8) Otto (University of Washington Medical Center)
Students act in the capacity of interns on the cardiology service under the supervision of house officer. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 691 P-Primary Care (8/12) Paauw
Six-week, full-time ambulatory care block in primary care internal medicine. Students participate in several clinics at University of Washington Medical Center following a panel of patients in medicine, rheumatology, and virology clinics. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

MED 692 P-Clinical Endocrinology and Metabolism (*, max. 12) Weigle (Seattle-based program); Bunner (Madigan)
Clerkship in clinical endocrinology and metabolism combined inpatient and outpatient assignments at selected hospitals. Prerequisite: MED 665. Offered: AWSpS.

MED 693 P-Nephrology and Fluid Balance (8) Couser (University of Washington Medical Center), Narasimhan (Boise Veterans Administration Hospital), Novan (Spokane)
Students see clinical nephrologic problems under close supervision, participate in nephrology and transplant rounds, see consults with renal fellow and attending, and work up patients in renal clinics, participate in seminars with clerks from all three hospitals. Prerequisite: MED 665. (Four weeks.) Offered: AWSpS.

MED 694 P-Harborview Evening Clinic (2) Assefi
A longitudinal elective for senior medical students who assume primary responsibility for a panel of medical patients in an outpatient clinic. Direct care of patients is supplemented by didactic sessions dealing with issues in ambulatory care. Students are strongly encouraged to participate for four quarters. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

MED 695 P-Clinical Aspects of Aging (8) Abrass, Hazzard (Harborview Long Term Care Service, Harborview Medical Center, and Seattle V.A. Medical Center), Cusak (Harbor
Work with elderly patients as subintern with Senior Care Program. Inpatient and ambulatory setting in nursing homes and patients’ homes. Interdisciplinary approach. Prerequisite: MED 665. Offered: AWSpS.

MED 697 P-Medicine Special Electives (*, max. 24) Paauw
Special clerkship, externship, or research opportunities that can at times be made available at institutions other than University of Washington. Faculty can advise students of opportunities. Students wishing to elect this course should obtain from Dean’s office a special assignment form at least three months before preregistration. Prerequisite: permission of department. (Two, four, six, or twelve weeks.) Offered: AWSpS.

MED 699 P-WWAMI Medicine Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Conjoint

Course Descriptions

CONJ 401 Human Anatomy and Physiology (4) Linder, Melby
An integrated course on the structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: either BIOL 201, BIOL 202, and BIOL 203, or BIOL 220; either CHEM 155, CHEM 160, or CHEM 162. Offered: A.

CONJ 402 Human Anatomy and Physiology (4) Linder, Melby
An integrated course on the structure and function of the human body with laboratory work in gross anatomy, histology, and physiology. Primarily for pharmacy doctoral students. Others by special permission of instructors. Prerequisite: CONJ 401. Offered: W.

CONJ 403 Human Anatomy and Physiology (4) Linder, Melby

CONJ 475 Alcoholism: A Course for Medical Students and Students in the Allied Health Sciences (2) Kivlahan, Samson
A lecture course for medical students in the allied health sciences in
any year that will cover an introduction to the epidemiology, diagnostic strategies, natural history, physiologic effects, and treatment of alcohol-related disorders. Offered: Sp.

CONJ 480 Neuroscience for Rehabilitation Professionals (5) Anderson, Mulligan, Slimp
Survey of the structure and function of the central nervous system, emphasizing sensorimotor systems and higher integrative functions, coupled with clinical correlations. Required for occupational therapy, physical therapy, and prosthetic/orthotic students. Others by permission.

CONJ 505 P-Pain Clinic Preceptorship (1)
One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: Pain Center.

CONJ 514 Molecular Medicine (3) Rosen
Graduate-level introduction to the interplay of basic science and clinical medicine. Covers inflammation, vascular disease, metabolic disorders, cancer biology, and molecular-, gene-, and cell-based therapies. Each topic introduced with a patient history. Offered: jointly with PATH 514; W.

CONJ 515 Interdisciplinary Health and Human Services Delivery in Rural Communities (1) House
Provides opportunities for students in health and human services to explore current trends and issues of service delivery in rural communities. Demographics, economics, community structure, culture, and professional/personal issues are addressed. Prerequisite: major standing in a health or human services profession. Credit/no credit only. Offered: W.

CONJ 516 What Every Physician Should Know About Oral Health (1) Lewis, Mouradian, Slayton
Didactic elective for students interested in understanding oral health and its relationship to systemic health. Special interest to students planning careers in primary care, public health, or who are likely to practice in rural or underserved communities. Includes weekly seminars and clinical demonstrations. Credit/no credit only. Offered: Sp.

CONJ 520 Anatomy and Autopsy (1/2, max. 2) Fligner
Students attend autopsies at UWMC affiliated hospitals for demonstration of normal anatomic relationships and gross pathological changes in various diseases. Offered as elective concurrent with HUBIO 520P. Prerequisite: HUBIO 510P or equivalent, permission of instructor, and orientation. Offered: WSp.

CONJ 524 Structural Basis of Signal Transduction (1.5) Xu
Focuses on the structure-function relationship of key enzymes in signal transduction (protein/lipid kinases; phosphatases etc.) and the structural consequences of protein phosphorylation. Teaches students to look into critical structural details using PC or Mac. Prerequisite: undergraduate course in biochemistry and basic cell biology, or permission of instructor. Offered: W.

CONJ 531 Signaling Mechanisms in Excitable Cells (1.5) Hille
Membrane electricity. Structure and roles of voltage-gated and ligand-gated ion channels in electrical signaling. Calcium as a second messenger. Exocytosis and its regulation. Phototransduction in photoreceptors. Prerequisite: comprehensive undergraduate course in general biochemistry and molecular biology, or permission of instructor. Offered: A.

CONJ 532 Signal Transduction from the Cell Membrane to the Nucleus (1.5) Beavo, Moon, Storm
Intracellular signaling pathways leading from cell membrane receptors to nucleus. Pathways activated by seven transmembrane receptors and G-proteins, insulin/Pi3 kinase, nitric oxide and WNTs and mechanisms of signal termination. Cytokine/Jak/Stat signaling and role of subcellular localization in signal transduction. Prerequisite: basic knowledge of biochemistry. Offered: A.

CONJ 533 The Dynamic Chromosome (1.5) Henikoff, Roth
The chromosome viewed as the ultimate organelle. How chromosomes are maintained and propagated. Epigenetic regulation of genes. Genetic, biochemical, and cytologic methods for understanding chromosome functions. Prerequisite: cell biology, biochemistry, and genetics. Offered: A.

CONJ 534 Selected Problems in Nervous System Development (1.5)
Introduces students to current issues in developmental neurobiology. Topics include regionalization of the neuroectoderm, mechanisms of neurogenesis, axon patterning and plasticity, and cell death. Not intended to be comprehensive; examines the experimental basis for current views in the field of a few topical issues.

CONJ 535 RNA Structure and Biological Function (1.5) Ferre-D’Amare, Stoddard
Survey of the diversity of cell-biological roles played by RNA with emphasis on structural principles and structure-function relationships. Readings from the current literature to cover both, methods for the study of RNA, and examples of the function of this nucleic acid as part of the machinery for gene expression. Offered: W.

CONJ 536 Experimental Design in Cell Biology (1.5) Wakimoto, Wright, Hille, Cooper
Focuses on experimental design in cell biology. A topic of current research interest is covered in depth in order to follow a line of investigation and critically evaluate the strengths and limitations of various experimental strategies. Offered: jointly with BIOL 546; W.

CONJ 537 Mechanism of Transcriptional Regulations (1.5) Tsukiyama
Focuses on biochemical mechanisms of gene transcription covering a broad range of transcriptional regulation, including mechanisms of transcriptional initiation, elongation and termination. Discusses regulation of transcription by chromatin. Includes a special lecture regarding regulation of transcription in cell growth and differentiation. Offered: A.

CONJ 538 Genetic Instability and Cancer (1/1.5) Maizels, Monnat
Seminar focusing on molecular pathways that maintain genomic stability in all cells and that carry out programmed changes in genomic structure in the immune system. Special attention devoted to understanding how failure in these pathways leads to genomic instability and malignancy. Prerequisite: permission of instructor.

CONJ 539 Biological Basis of Neoplasia (1.5) Kemp, Zarbl
Lecture/discussion on cellular and molecular mechanisms underlying phenotypes associated with cancer, including genetic pre-disposition, injury, and instability; alteration in control of cell division and cell death; failure of differentiation; tumor angiogenesis and metastasis. Molecular biology of tractable model systems is emphasized. Prerequisite: introductory biochemistry and cell biology. Offered: S.

CONJ 541 Molecular Biology of Cellular Processes (1.5) Bornstein
Translational control; cytoskeleton and molecular motors; protein targeting, sorting and secretion; apoptosis; regulation of cell function by extracellular matrix. Prerequisite: comprehensive undergraduate course in biochemistry and molecular biology or permission of instructor. Offered: Sp.

CONJ 542 Development (1.5) Raible, Roelink
Molecular mechanisms of development; molecules and pathways used for the patterning of developing organisms. Similarities and differences in the making of plants, invertebrates, and vertebrates. Prerequisite: Comprehensive undergraduate courses in Biology, Molecular Biology, or permission of instructor. Offered: W.

CONJ 544 Protein Structure, Modification and Regulation (1.5) Stoddard, Strong
Overview of general principles of protein structure, including forces that contribute to folding and stabilization, followed by an extended coverage of the means by which protein structure and function are modified and regulated. Examples from recent developments in protein folding, processing, and allosteric regulation. Prerequisite: introductory biochemistry and cell biology.

CONJ 545 Molecular Interactions and Medicine (1.5) Verlinde
Forces governing molecular interactions in biology; with a focus on medicine. Principles of computer modeling techniques in use for predicting the molecular behavior of proteins, ligands and their complexes. In computer ligand discovery; drug design, and the understanding at the atomic level of some genetic diseases. Two computer lab sessions. Offered: Sp.

CONJ 546 Survey of Technologies for Molecular Biology (1.5) Bumgarner
Provides a broad overview of modern technologies used in molecular biology with particular emphasis on DNA sequencing and gene expression. In addition to methods and applications for the technologies, examines the theoretical basis and underlying instrumentation through which these technologies are implemented. Offered: A.

CONJ 547 Molecular Evolution of Viral-Host Interactions (1.5) Katz
Focuses on the interactions between viruses and the cells they infect, with special emphasis on evolutionary battle that occurs between the invading virus and its host. Examines new technologies being used to molecularly dissect virus-host interactions. Offered: Sp.

CONJ 548 Modeling Proteins and Proteomes (1.5) Samudrala
Provides hands-on experience for modeling protein structures, using the models to predict function, and applying the prediction methods to all proteins encoded by an organismal genome. Provides an overview of protein structure, how it mediates function, and its importance for understanding protein interaction networks. Offered: W.

CONJ 549 Microbial Population Biology (1.5) Mittler
Principles of ecology and evolution as they apply to microorganisms. Prerequisite: advanced undergraduates with permission of instructor. Offered: even years; Sp.

CONJ 550 P-Clinical Infectious Diseases (3) Spach
Lecture series by faculty members from various departments, authorities in the field of clinically important infectious diseases. Lectures, reading assignments, and handouts emphasize epidemiology, clinical manifestations, laboratory findings, diagnosis, treatment, and prevention. Oriented for second-year medical students. Credit/no credit only. Prerequisite: HUBIO 521 or permission of coordinator, Department of Medicine. Offered: W.

CONJ 551 Immunity (1.5) Strong
Provides an understanding of the central cellular and molecular players in the mammalian immune system at a level appropriate for the non-specializing graduate student. Selected topics include the molecular basis of B and T cell activation and effector functions and the mechanisms of innate immunity. Offered: Sp.

CONJ 585 Surgical Anatomy (1-3, max. 12) Graney
Guided dissection of selected regions, supplemented by conferences.
The Department of Microbiology offers a graduate program leading to the Doctor of Philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

The choice of an adviser and research problem are matters of mutual consent between the student and a faculty member. The course work taken by a graduate student depends to a certain extent upon the student’s background and chosen area of specialization, but in general, courses are chosen from the fields of microbiology, immunology, biochemistry, genetics, and cell biology. A master’s degree program either with or without thesis is available on a very limited basis. An M.S. degree is not necessarily a prerequisite for the Ph.D. degree.

Applicants are evaluated by a committee that considers the student’s grades, scores on the Graduate Record Examination, research experience, letters of recommendation, and any other data that might provide an indication of the student’s capabilities for success in a career in science.

Students are normally admitted into the graduate program only in autumn quarter, and all application materials should be received by the department no later than the preceding December 15. Graduate Record Examination aptitude scores are required as part of the application, and the examination should be taken no later than October. Three letters of recommendation must also be sent directly to the department.

Students with a variety of academic backgrounds are accepted for graduate study in microbiology, but it is highly desirable that their undergraduate preparation include at least a year of general chemistry and a year of college physics, courses in organic chemistry and quantitative analysis, calculus, one year of biology, and courses in genetics, biochemistry, and microbiology. Students in the Ph.D. program are usually supported by funds from training grants, research grants, or teaching assistantships.

Course Descriptions

**MICROM 101 Microbes and Us (5) NW Anderson, Brill**
Intended for liberal arts majors and students not majoring in the biological sciences. Focuses on the activities of bacteria, viruses, and other microorganisms, and their influence on humans. Microbe-related topics include disease, bioterrorism, food, biotechnology, and ecology. Examines the nature of scientific inquiry, along with major biological concepts. Offered: W.

**MICROM 301 General Microbiology (3) NW Anderson, Lara, Nester**
Acquaints students with microorganisms and their activities. Topics include microbial cell structure and function, metabolism, microbial genetics, and the role of microorganisms in disease, immunity, and other selected applied areas. Prerequisite: either CHEM 120, CHEM 140, CHEM 142, or CHEM 145; recommended: biology; organic chemistry. Offered: AsSp.

**MICROM 302 General Microbiology Laboratory (2) NW Anderson, Chandler, Gray**
Laboratory course primarily for students taking 301. Covers a variety of microbiological techniques, with experiments designed to illustrate major concepts of bacteriology, virology, and immunology. No auditors. Recommended: MICROM 301 which may be taken concurrently. Offered: AsSp.

**MICROM 322 Applied Clinical Microbiology (5) NW Cookson, Fritsche**
Practical experience in a clinical or public health laboratory; fifteen hours per week. For students majoring in medical microbiology. Three quarters advance sign-up in G315 Health Sciences recommended. Applicants are selected by interview. Credit/no credit only. Prerequisite: MICROM 443. Offered: A/WSp.

**MICROM 402 Fundamentals of General Microbiology Laboratory (3) NW Fulton, Gray**
Isolation of a broad range of nonpathogenic bacteria from natural sources, using selective and enrichment techniques, with microscopic, biochemical, and molecular identification. Related exercises include genetics, physiology, quantitation, and growth energetics. Prerequisite: either BIOL 200 or BIOL 201; recommended: MICROM 410 which may be taken concurrently. Offered: AsSp.

**MICROM 410 Fundamentals of General Microbiology I (3) NW Lara, Traxler**
Survey of the microbial world, metabolism, biosynthesis, regulation, growth, structure, and function. Required for students majoring in microbiology; recommended for students majoring in biology. Prerequisite: either BIOL 200 or BIOL 201; either CHEM 223, CHEM 237, or CHEM 335. Offered: A.

**MICROM 411 Gene Action (5) NW Gray, Hughes, Manoil**
Molecular genetics: description of fundamental genetic processes such as mutation, repair, genetic exchange, recombination, and gene expression. Use of genetic strategies to analyze complex biological processes. Focuses on prokaryotic organisms. Prerequisite: either BIOL 200 or BIOL 201; either CHEM 223, CHEM 237, or CHEM 335. Offered: jointly with GENOME 411; W.

**MICROM 412 Fundamentals of General Microbiology III (3) NW Leigh**
Structure, biochemical properties, and genetics of the major groups of prokaryotes. Prerequisite: either BIOL 200, BIOL 201, or BIOL 203; recommended: either CHEM 223, CHEM 237, or CHEM 335; MICROM 410. Offered: Sp.

**MICROM 431 Prokaryotic Recombinant DNA Techniques (3) NW Anderson, Chandler**
Laboratory course emphasizing concepts and techniques/methodologies in recombinant DNA research employing bacteria and their viruses. Topics and experiments/demonstrations include genomic and plasmid DNA isolation, restriction mapping, cloning, transposon mutagenesis, sequencing, and Western and Southern blotting. No auditors. Prerequisite: either BIOL 200, BIOL 201, or MICROM 301. Offered: W.

**MICROM 435 Microbial Ecology (3) NW Staley**
Consideration of the various roles that microorganisms, particularly bacteria and cyanobacteria, play in environmental processes. The interrelationships among microorganisms and the effects of the physical, chemical, and biological properties of their environment are discussed and assessed. Prerequisite: either BIOL 180, BIOL 201, or BIOL 203. Offered: even years; Sp.

**MICROM 440 Introductory Bacteriology for Medical Technologists (1) NW Anderson**
Limited introduction to basic microbiology, with focus on structure, metabolism, and genetics of medically important organisms. Open only to medical technology students. Credit/no credit only. Offered: A.

**MICROM 441 Introduction to Immunology (4) NW**
General properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms; immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Prerequisite: either BIOL 220 or BIOL 202; recommended: either GENET 371, GENET 372,
MICROM 442 Medical Bacteriology (3) NW Cookson, Fulton
Medically important bacterial pathogens are discussed in terms of the clinical, therapeutic, and epidemiological aspects of diseases caused by them, molecular mechanisms of pathogenesis and their identification in the clinical laboratory. Laboratory course 443 coordinates. Prerequisite: either BIOL 200 or BIOL 201; recommended: MICROM 410; MICROM 441. Offered: W.

MICROM 443 Medical Microbiology Laboratory (3) NW Anderson, Chandler, Fritsche, Fulton
Required for medical technology students, microbiology majors; elective for medical students. Procedures for isolation and identification of pathogenic bacteria, testing their susceptibility to antibiotics. No auditors. Prerequisite: either BIOL 200 or BIOL 201; recommended: MICROM 410. Offered: AW.

MICROM 444 Medical Mycology and Parasitology (4) NW Anderson, Fritsche, Fulton, Novicki
Consideration of medically important fungi and parasites, with emphasis on their biology in relation to disease and its laboratory diagnosis. For medical technology students, microbiology majors, and medical students as an elective. Prerequisite: either BIOL 200 or BIOL 201; recommended: immunology. Offered: Sp.

MICROM 445 Medical Virology (2) NW Thouless, Wong
An introductory course emphasizing basic understanding of medical virology and viral pathogenesis. The biochemical, replication, host-parasite relationships and pathogenesis of animal viruses are examined. Prerequisite: either BIOL 180, BIOL 200, or BIOL 201; Sp.

MICROM 447 Immunity, Disease and Society (2) Clark
Impact and controversies associated with breakthroughs in immunology and infectious diseases. Topics include vaccines, complementary medicine (herbal boosts of the immune system), the mind and the immune system, allergies (asthma), cancer immunotherapy, genetic screening and autoimmune disease and natural history of infectious disease. Prerequisite: MICROM 441. Offered: jointly with IMMUN 447.

MICROM 450 Molecular Biology of Viruses (3) NW Champoux
Introduction to the molecular biology of viruses and virus-host relationships. Designed for advanced undergraduates and graduate students in the biological sciences. Coverage includes bacterial and animal viruses, with an emphasis on the molecular mechanisms of viral gene expression and regulation. Prerequisite: either BIOL 200 or BIOL 201; recommended: MICROM 410, MICROM 411, GENET 371, or GENET 372. Offered: W.

MICROM 490 Aquatic Microbiology (3/5) NW Herwig
Basic principles of aquatic microbiology and aquatic microbial ecology: role and identity of aquatic microorganisms; introduction to modern methodologies for research. Laboratory work with local freshwater and marine samples for those enrolled in the five-credit section. Recommended: 15 credits of biological science, 10 credits of chemistry. Offered: jointly with FISH 490; A.

MICROM 495 Honors Undergraduate Research (*-max. 20)
Specific problems in microbiology or immunology. Credit/no credit only. Offered: AWPSP.

MICROM 496 Undergraduate Library Research (2)
An introduction to library research techniques and to microbiological literature. Staff assign a topic and supervise the project. Offered: AWPSP.

MICROM 499 Undergraduate Laboratory Research (2)
Specific problems in microbiology or immunology. Credit/no credit only. Offered: AWPSP.

MICROM 500 Introduction to Research (*, max. 20)
Introduction to research areas of the faculty and the techniques employed in their investigations. Credit/no credit only. Prerequisite: graduate standing in microbiology or permission of instructor. Offered: AWPSP.

MICROM 501 Physiology of Bacteria (3) Traxler
Topics of current interest concerning the molecular biology and physiology of bacteria. Prerequisite: MICROM 410 and BIOC 440, 441, and 442, or permission of instructor. Offered: odd years; W.

MICROM 518 Bioremediation of Environmental Pollutants
Detailed survey of current understanding of biological pathways for transformation and degradation of toxic organic compounds, pesticides, oil, and metals. Microbial and plant transformations of pollutants and requirements for bioremediation. Requires basic understanding of metabolism and organic chemistry. Prerequisite: biological science course. Offered: jointly with CEE 542/ESC 518; W.

MICROM 520 Seminar (1) Leigh
Credit/no credit only. Offered: AWPSP.

MICROM 522 Current Research in Microbiology (1) Hughes
Weekly student and faculty seminar presentations based on the current literature. Credit/no credit only. Prerequisite: graduate standing in microbiology. Offered: AWPSP.

MICROM 525 Cell Surface Membrane in Cell Sociology and Immunology (2) Carter, Hakomori
Structure and function of cell surface membranes in relation to development of various diseases, particularly infection, cancer, and inflammation. Examines how specific cell surface molecules are targets of recognition by microbes, tumor cells, and recruited inflammatory cells. Prerequisite: BIOC 440, BIOC 441, BIOC 442, and permission of instructor. Offered: jointly with PABIO 525.

MICROM 526 Research of Cell Surface Problems (1) Traxler
Weekly research seminar and discussion of scientific literature pertaining to the process of membrane protein biogenesis. Credit/no credit only. Prerequisite: permission of instructor.

MICROM 527 Genetic Approach to Complex Biological Processes (1) Hughes
Current research as it applies to genetic approaches to complex biological processes in the area of microbiology. Offered: AWPSP.

MICROM 528 Salmonella Genetics (1) Hughes
Review current literature in the area of gene regulation in Salmonella typhimurium and related studies in Escherichia coli. Prerequisite: graduate student standing; advanced undergraduates by permission of instructor. Offered: AWPSP.

MICROM 529 Mechanisms of Bacterial Pathogenesis (1) Fang
Student and faculty seminar presentations based on current research pertaining to mechanisms of bacterial pathogenesis at the molecular and cellular levels. Credit/no credit only. Prerequisite: graduate standing in microbiology. Offered: AWPSP.

MICROM 530 Evolution of Prokaryotic Diversity (3) Leigh
Evolution, diversity, and genomics of prokaryotic microorganisms. Lectures, discussions, and reading of current literature. Open to graduate students in the biological sciences and advanced undergraduates with permission of instructor. Offered: odd years; A.

MICROM 531 Prokaryotic Diversity and Evolution Laboratory (2) Leigh
Enrichment, isolation, and molecular phylogenetic characterization of selected prokaryotic organisms. Prerequisite: permission of
instructor. Offered: odd years; A.

MICROM 532 Seminar in General Microbiology (1, max. 15)  
Leigh  
Weekly seminar concerning research topics in the genetics and biochemistry of selected bacteria. Credit/no credit only. Prerequisite: MICROM 410, permission of instructor. Offered: AWSpS.

MICROM 533 Herpesvirus Research Meeting (1)  
Lagunoff  
Weekly research seminar and discussion of scientific literature pertaining to the study of molecular virology of Kapozi’s Sarcoma-associated herpesvirus. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MICROM 534 Research Seminar in Salmonella Pathogenesis (1)  
Fang  
Provides a formal group setting for discussion and evaluation of a student’s research progress. Credit/no credit only. Offered: AWSpS.

MICROM 540 Virology (3)  
Katze  
Lecture-seminar course concerning host-viral interactions. Prerequisite: permission of instructor. Offered: even years; W.

MICROM 553 Molecular Mechanisms of Bacterial Pathogenesis (3)  
Hughes, Moseley, Rubens  
Mechanisms of bacterial pathogenesis explored at the molecular, genetic, and cellular levels through selected models as presented in the current scientific literature. Prerequisite: MICROM 411 or equivalent. Offered: even years; A.

MICROM 554 Seminar in Molecular and Medical Microbiology (1, max. 15)  
Hughes  
Weekly one-hour seminar in which recent advances in molecular biology of microbial pathogenesis or the current research of the participants is presented and discussed critically. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSp.

MICROM 555 Advanced Clinical Microbiology (2.5)  
Cookson, Fritsche, Limaye  
Attendance at daily plate rounds of the Division of Clinical Microbiology. Designed to increase understanding of clinical microbiological work and its application to the care of the patient. Credit/no credit only. Prerequisite: MICROM 443 and permission of instructor. Offered: AWSp.

MICROM 556 Clinical Microbiology Training and Research (*) (max. 12)  
Fritsche  
Training in clinical microbiology and applied research. Attendance at daily laboratory rounds in addition to bench-side training and research. For medical students and microbiology graduate students only. Credit/no credit only. Prerequisite: MICROM 443 and permission of instructor.

MICROM 560 Research and Journal Club in Retrovirology (1)  
Linial  
Weekly research seminar and discussion of literature in areas of retroviral replication and transformation. Prerequisite: graduate or permission of instructor. Offered: AWSp.

MICROM 562 Oncogene and Retrovirus Research Seminar (1)  
Linial, Overbaugh  
Weekly discussions of ongoing research related to retroviral replication, retroviral oncogenes and pathology. Prerequisite: graduate standing or permission of instructor. Offered: AWSp.

MICROM 563 Research Seminar in Mycobacterial Pathogenesis (1)  
Ramakrishnan  

MICROM 580 Teaching Practicum in Microbiology (2-3, max. 3)  
Direct experience in teaching microbiology laboratory courses.

Training in teaching techniques and approaches. Credit/no credit only. Prerequisite: graduate standing in Microbiology Program and permission of instructor. Offered: AWSpS.

MICROM 585 Research in Cell and Molecular Biology (1, max. 15)  
Champoux  
Weekly research seminar. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MICROM 588 Research in Applied Microbiology (1)  
Lidstrom  
Weekly research seminar and discussion of scientific literature pertaining to applied microbiology. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with CHEM E 588, AWSp.

MICROM 599 Research Presentations (2)  
Current research review. Credit/no credit only.

MICROM 600 Independent Study or Research (*) (max. 15)  
Credit/no credit only. Offered: AWSpS.

MICROM 700 Master’s Thesis (*)  
Credit/no credit only.

MICROM 800 Doctoral Dissertation (*)  
Credit/no credit only. Offered: AWSp.

Neurological Surgery  
700 9th Avenue, Harborview Medical Center  
askuwns@u.washington.edu  
The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department’s medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Puget Sound Health Care Center, and Children’s Hospital and Regional Medical Center. The department also has several course offerings correlating research and clinical problems of the nervous system, including the research seminars in neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Research and Training Building, and at Veterans Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

Course Descriptions

NEUR S 498 Undergraduate Thesis (*)  
Bobola, D’Ambrosio, Horner, Silber  
Offered: AWSpS.

NEUR S 499 Undergraduate Research (*)  
Bobola, D’Ambrosio,
Investigation of special problems as an intimate member of the research team in the neurological surgery laboratories. Research to lead to a thesis, if desired. List of projects available on request. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 505 P-Preceptorship in Academic Neurosurgery (1) Ellenbogen, Goodkin, Kliot, Newell, Ojemann, Rostomily, Shaffney, Silbergeld, West, Winn
Opportunity for first- and second-year medical students to observe the research, teaching, and patient-care activities of academic neurosurgery. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 542 Clinical and Basic Research Correlates of Epilepsy (2) G. Ojemann, Westrum
Clinical symptoms and treatment of epilepsy; related basic research in neuroanatomy, neurophysiology, neuropyschology, and neuropsycharmacology of epilepsy. Prerequisite: HUBIO 532 for medical students; permission of instructor for others.

NEUR S 680 P-Neurological Surgery Clerkship (*, max. 8) Newell, Silbergeld
Student serves clinical clerkship as an intimate member of the staff, participating in inpatient and outpatient care, both preoperative and postoperative, involving neurological surgery patients. University of Washington Medical Center or a University-affiliated hospital may be selected, subject to approval of the department. Prerequisite: HUBIO 563. (Four weeks.) Offered: AWSpS.

NEUR S 697 P-Neurological Surgery Special Electives (*, max. 24) Ellenbogen, Goodkin, Kliot, Newell, Ojemann, Rostomily, Shaffney, Silbergeld, West, Winn
By specific arrangement, for qualified students, special clerkships or externships may be available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean’s office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

NEUR S 699 P-WWAMI Neurological Surgery Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Neurology
RR650 University of Washington Medical Center
neurolog@u.washington.edu

Neurology, previously a division of the Department of Medicine, became an independent department at the University of Washington School of Medicine in autumn of 1995. The four-year residency program (including an internship) offers superb training in all facets of neurology in a setting of great institutional strength in fundamental neuroscience research. In addition, the Department of Neurology offers exceptional training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical- clerkship program provides basic training in neurology patient care. The Neurology Department is active in teaching, research, and patient care at the University of Washington Medical Center, Seattle Veterans Affairs Medical Center, Harborview Medical Center, Children’s Hospital and Medical Center, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

Course Descriptions

NEURL 495 Community Rehabilitation of the Neurologically Impaired: Internship (*, max. 5) Fraser, Clemmons
Supervised work with a neurologically disabled vocational rehabilitation population within a multidisciplinary vocational rehabilitation unit. Offered: AWSpS.

NEURL 499 Undergraduate Research (*, max. 25)
Provides an opportunity to gain research experience and direct participation in clinical or basic science investigation in neurological topics. Offered: AWSpS.

NEURL 505 P-Preceptorship in Neurology (1) Kraus
Provides an opportunity for first and second-year medical students to gain personal experience with neurology practice situations by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Offered: Sp.

NEURL 536 Topics in Clinical Neurology (1) Spain
Lectures on epilepsy, stroke, coma, drug overdose, dementia, headache, myelopathies, infectious disease. Offered: S.

NEURL 555 Frontiers in Neuroimmunology (1) Moeller
Current concepts and developments in neuroimmunology. Credit/no credit only. Prerequisite: either NBIO 301 or IMMUN 441. Offered: AWSpS.

NEURL 646 P-Clinical Electroencephalography (*, max. 12) Farrell, Holmes
For third- and fourth-year medical students. Clinical applications of electroencephalography long-term EEG-video-audio monitoring, computer-averaged evoked potentials. Prerequisite: completion of Human Biology series. Offered: AWSpS.

NEURL 665 P-Introduction to Neurology (8) Kraus
Provides the medical student with a general understanding of basic clinical neurology, at sites in Seattle and the WWAMI region. For fourth-year students. Prerequisite: medicine, or family medicine, or surgery, or pediatrics for third-year students. Offered: AWSpS.

NEURL 681 P-Seizure Clinic Clerkship (2.5) A. Wilensky
Evaluation and follow-up of patients with seizure disorders. Limited contact with inpatients. Prerequisite: MED 665 and permission of instructor. Offered: AWSpS.

NEURL 686 P-Clinical Neurology (8) Swanson
Clerkship including both inpatient and outpatient experiences and didactic sessions on neurological subjects. Student assigned to one of the affiliated hospitals and supervised by neurology residents and full-time staff. Offered: AWSpS.

NEURL 687 P-Advanced Clinical Clerkship in Child Neurology (*, max. 8) Gospe
Advanced course in neurology dealing with neurological disease in children. Supervision by child neurology residents and attending. Prerequisite: NEURL 665, third- and fourth-year medical students. (Limit: one student.) Offered: AWSpS.

NEURL 697 P-Neurology Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions outside the WWAMI region. Students should obtain special assignment form from the Dean’s Office at least one month prior to preregistration. Prerequisite: permission of department advisor. Offered: AWSpS.

NEURL 699 P-WWAMI Neurology Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region.
Course Descriptions

OB GYN 498 Undergraduate Thesis (*) Vontver
By arrangement.

OB GYN 499 Undergraduate Research (*) Vontver

OB GYN 550 P-Voluntary Pregnancy Termination: An Overview of Medical and Social Issues (2) Easterling, Miller
A flexible curriculum which allows the medical student to observe in an abortion clinic, read articles and a textbook on abortion. Can be used by medical students as elective credit.

OB GYN 551 Perinatal Care Elective (1)
Provide an introduction and overview of perinatal care for first- or second-year medical students with emphasis on the third trimester, labor and delivery, and postpartum. Opportunity to observe the patient-provider relationships. Optional labor and delivery observation. Offered: AWSp.

OB GYN 579 P-Obstetric and Gynecologic Investigation (*) Vontver
The investigation may cover any one of the following fields: normal and complicated pregnancy, hormone assays in obstetrics and endocrinology, obstetric and gynecologic oncology, genetics. By arrangement.

OB GYN 665 P-Introduction to Obstetrics and Gynecology, UH-HMC (*, max. 12) Vontver
Introductory clerkship providing comprehensive medical care and counseling to female patients. Includes management and delivery of obstetrical patients, diagnosis and management of gynecologic diseases, hospital rounds, outpatient clinics, seminars, tutorial, and community health-care agencies for women. Rotations occur at UWMC and Harborview Medical Center. Prerequisite: HUBIO 565. (Six weeks. Limit: six students.)

OB GYN 666 P-Introduction to Obstetrics and Gynecology, Boise (*, max. 12) Vontver
Clerkship equivalent to 665 offered at Boise, Idaho (WWAMI). Includes experience in several private physician offices. Prerequisite: HUBIO 565. (Six weeks. Limit: two students. Not offered summer quarter.)

OB GYN 667 P-Introduction to Obstetrics and Gynecology, Madigan (*, max. 12) Vontver
Clerkship equivalent to 665 offered at Madigan Army Medical Center, Tacoma. Prerequisite: HUBIO 565. (Six weeks. Limit: three students.)

OB GYN 668 P-Introduction to Obstetrics and Gynecology, Spokane (12) Vontver
Clerkship equivalent to 665 offered at Spokane (WWAMI). Includes experience in several private physicians' offices. Prerequisite: HUBIO 565. (Six weeks. Limit: three students.)

OB GYN 669 P-Introduction to Obstetrics and Gynecology, Swedish (12) Vontver
Clerkship equivalent to 665 offered at Swedish Hospital Medical Center. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.) Not offered summer quarter.

OB GYN 670 P-Introduction to Obstetrics and Gynecology, GH-Central (12) Vontver
Clerkship equivalent to 665 offered at the Central facility of Group Health Cooperative of Puget Sound in Seattle. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.)

OB GYN 671 P-Introduction to Obstetrics and Gynecology, Anchorage (12) Vontver
Clerkship equivalent to 665 offered at Anchorage, Alaska (WWAMI). Includes experience in several private physicians' offices as well as Providence Hospital. Prerequisite: HUBIO 565. (Six weeks. Limit: three students.)

OB GYN 672 P-Introduction to Obstetrics and Gynecology, GH-East (12) Vontver
Clerkship equivalent to 665 offered at the Eastside facility of Group Health Cooperative of Puget Sound in Redmond. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

OB GYN 673 P-Introduction to Obstetrics and Gynecology, Military, Madigan (12) Vontver
Clerkship equivalent to 665 offered at Madigan Army Medical Center. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: two students.)

OB GYN 675 P-Introduction to Obstetrics and Gynecology, Highline (12)
Clerkship equivalent to 665 offered at Highline Community Hospital. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

OB GYN 676 P-Introduction to Obstetrics and Gynecology, Missoula (12)
Clerkship equivalent to 665 offered in Missoula, Montana. Students spend time in delivery room, surgery, and clinic, and have a specific preceptor assigned. Prerequisite: HUBIO 565. (Six weeks. Limit: one student.)

OB GYN 677 P-Introduction to Obstetrics and Gynecology, Rock Springs (12)
Equivalent of OB GYN 665, offered in Rock Springs, Wyoming. Student rotates among outpatient clinic, labor and delivery, operating suites, and medical/surgical inpatient areas. (Limit: two students.) Offered: AWSpS.

OB GYN 681 P-Gynecological Oncology Subspecialty (8)
Vontver
Experience in reproductive tract malignancy, chemotherapy, and radiation therapy. Student follows selected patients through primary surgery, recovery, and initial adjuvant treatment, as well as continuing treatment in both clinic and inpatient settings. Prerequisite: basic OB GYN Clerkship. (Limit: two students each four weeks.)

OB GYN 682 P-Antenatal High-Risk Obstetrics (8) Vontver
Four weeks on high-risk antenatal obstetrics ward and clinic. Students responsible for initial workups, daily laboratory evaluations, continuing care of high-risk antepartum patients. Weekly conference with obstetrics attending; presentation of one or more topics per rotation. Excellent coordination with resident and attending staff required to maintain patient-care continuity. (Limit: two students each four weeks.)
OB GYN 684 P-Endocrinology of Reproduction (*, max. 12) Vontver
The biochemistry of steroids. Steroid metabolism as related to clinical problems. Diagnosis and treatment of endocrine disorders. Case studies with special emphasis on modern methods of investigation and assisted reproductive technology. (Limit: one student each four weeks.)

OB GYN 685 P-Obstetrics and Gynecology Elective (*, max. 8)
Close working relationship with a physician or physicians in the practice of obstetrics and gynecology. May include clinics, hospital rounds, surgery, deliveries, and business aspects of practice

OB GYN 697 P-Obstetrics and Gynecology Special Electives (*, max. 24) Vontver
By arrangement, for qualified students, special clerkship or research opportunities can sometimes be made available at other institutions. Students wishing this course should obtain special assignment form one month before preregistration. Department evaluates student performance. Prerequisite: permission of instructor.

OB GYN 698 P-Introduction to Obstetrics and Gynecology, Away (*, max. 12) Vontver
Clerkship equivalent to 665 at sites being evaluated as permanent WWAMI sites (currently includes Silverdale, Evergreen, Fairbanks, Sandpoint, Cheyenne, and Billings). By arrangement. Subject to Dean’s Office approval. Department evaluates student performance. Prerequisite: HUBIO 565; permission of instructor.

OB GYN 699 P-WWAMI Obstetrics and Gynecology Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located outside the WWAMI region. A special assignment form must be obtained one month in advance of preregistration. Prerequisite: permission of department.

Occupational Therapy
See Rehabilitation Medicine

Ophthalmology
RR801 University of Washington Medical Center
The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and visual system and its adnexae.

Medical-student instruction is provided, including multiple electives in the clinical years. Graduate physicians are provided with three years of residency training at the affiliated hospitals. An optional internship is available in ophthalmology. A two-year ophthalmic plastics and orbit fellowship, and a two-year surgical retina fellowship are offered. Patient care is provided under the supervision of full- and part-time faculty physicians at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Medical Center, and Children’s Hospital and Regional Medical Center.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact Ingrid Noe at ingrid@u.washington.edu. For more information on medical student clerkships, contact Dorrie Quirante at dorrieq@u.washington.edu.

Course Descriptions

OPHTH 498 Undergraduate Thesis (*) Kinyoun (University of Washington Medical Center)
Thesis-based research in vision and ophthalmology. Elective. Offered: AWSpS.

OPHTH 499 Undergraduate Research (*) Kinyoun (University of Washington Medical Center)
Laboratory or clinical research in morphology, biochemistry, immunology, experimental pathology, or clinical studies of the eye and visual system. Offered: AWSpS.

OPHTH 501 P-Ophthalmology Preceptorship (1) Kinyoun
Individualized experiences with one or more of the full-time faculty members of the department covering research, teaching, and patient care. Student observes activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- and second-year medical student standing and permission of instructor. Offered: AWSpS.

OPHTH 681 P-Ophthalmology Clerkship (4) Sires (Harborview Medical Center)
Students gain experience in the diagnosis and treatment of common ocular disorders. Basic examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. (Limit: one student.) Offered: AWSpS.

OPHTH 683 P-Pediatric Ophthalmology Clerkship (4) Weiss (Children’s Hospital and Regional Medical Center)
Student examines and observes treatment of children with ocular diseases and learns to differentiate trivial from potentially blinding disorders. Programmed text in general ophthalmology furnished. Prerequisite: University of Washington student and completion of human biology series. (Two weeks, full-time. Limit: one student.) Offered: WS.

OPHTH 685 P-Ophthalmology Clerkship (4) Orcutt (VA. Puget Sound Health Care System)
Participation in diagnosis and treatment of medical and surgical ocular disease. Outpatient examinations, inpatient surgery, as well as neuro-ophthalmologic, retinal, and glaucoma consultations. Basic techniques involved in tonometry, ophthalmoscopy, and biomicroscopy of eye. Prerequisite: completion of human biology series. (Limit: one student.) Offered: AWSpS.

OPHTH 686 P-Ophthalmology Clerkship (4) Gorman (Group Health Central)
Diagnosis and treatment of ocular diseases in outpatients. Weekly assignment to Group Health ophthalmologist responsible for the care of walk-in and urgent patients, which may demonstrate findings pertinent to the future practice of primary-care physicians. Examination techniques, including tonometry, ophthalmoscopy, and biomicroscopy. Prerequisite: completion of human biology series. (Limit: one student.) Offered: AWSp.

OPHTH 687 P-Ophthalmology Clerkship (4) Kinyoun (University of Washington Medical Center)
Diagnosis and management of commonly seen eye diseases. Subspecialty clinics include cornea, retina, neuro-ophthalmology, glaucoma, contact lenses, and strabismus. Student attends regularly scheduled conferences in ophthalmic basic and clinical science. Prerequisite: completion of human biology series. (Limit: one student.) Offered: AWSpS.

OPHTH 688 P-Ophthalmology Clerkship (8) Kinyoun, Werner
Four-week externship at Alaska Native Medical Center in Anchorage. Opportunity to learn and practice common eye examination techniques, including slit-lamp biomicroscopy, tonometry, and funduscopy. Patients seen three days a week; two days spent in the operating room. Prerequisite: completion of human biology series,
Offered: AWSpS.

**OPHTH 697 P-Ophthalmology Special Electives (*, max. 24)**

*Kinseyon*

By specific arrangement, for qualified students, special clerkship, externship, or research opportunities can at times be made available at institutions or clinics other than the UW. Students wishing to elect this course should obtain from the Dean’s office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. Offered: AWSpS.

**OPHTH 699 P-WWAMI Ophthalmology Special Electives (*, max. 24)**

By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department. Offered: AWSpS.

**Orthopaedics**

**BB1043 University of Washington Medical Center**

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors. In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

**Course Descriptions**

**ORTH 498 Undergraduate Thesis (*) Eyre**

Student works directly with a preceptor in selecting a suitable area for laboratory or clinical research in the area of orthopaedics, and develops a thesis for recognition. Offered: AWSpS.

**ORTH 499 Undergraduate Research (*) Eyre**

Investigation of pertinent musculoskeletal problems in the orthopaedic laboratories as part of the research group. Offered: AWSpS.

**ORTH 505 P-Preceptorship in Orthopaedic Surgery (1)**

Opportunity for first- and second-year medical students to gain experience with clinical faculty members in the community. Students observe general aspects of private practice from a longitudinal perspective. Prerequisite: permission of department. Offered: AWSpS.

**ORTH 585 P-Sports Medicine (2) O’Kane**

Lectures, patient problem presentations, and seminar discussions to explore impact of exercise and sport participation on various body systems. Includes nutritional concerns, biomechanics of certain sports injuries and cardiovascular, pulmonary, and musculoskeletal concerns. Prerequisite: second-year medical student standing. Offered: Sp.

**ORTH 675 P-Preceptorship in Orthopaedics (*, max. 4) Simonian**

Student spends full time with the preceptor during all his or her working day in order to gain a better understanding of the diagnosis and the management of problems of the musculoskeletal system as seen in the private orthopaedic practice. Prerequisite: SURG 665 or HUBIO 553 and permission of department. (Two weeks, full-time.) Offered: AWSpS.

**ORTH 676 P-Pediatric Orthopaedics (*, max. 8) Diab, Masca, Song**

Acquaints students with all aspects of musculoskeletal problems in childhood. Didactic conferences and seminars, and opportunities for active participation in both inpatient and outpatient care at Children’s Hospital and Medical Center, and correlated anatomy and pathology. Prerequisite: SURG 665 or HUBIO 553. (Four weeks, full-time.) Offered: AWSpS.

**ORTH 677 P-Musculoskeletal Trauma (*, max. 8) Benirschke, Chapman, Hanel, Hansen, Henley, Mills, Mirza, Nork, Routt, Sangeorzan, Smith**

Harborview Medical Center. Emergency room, wards, operating room, and outpatient clinics. Instruction in general and special clinics, including hand, hip, foot, and fracture, with emphasis placed on physical examination of the patient. Students take correlative anatomy and pathology. Prerequisite: SURG 665, HUBIO 553. (Four weeks, full-time.) Offered: AWSpS.

**ORTH 678 P-Musculoskeletal Oncology (8/12) Conrad**

In-depth experience on musculoskeletal oncology service with primary involvement in initial evaluation, staging, treatment, and postoperative follow-up of patients with various musculoskeletal malignancies. Elective involves experience in surgical, oncologic, radiologic, and pathologic principles of managing sarcomas. Prerequisite: basic orthopaedic elective or permission of instructor. Offered: AWSpS.

**ORTH 680 P-General Orthopaedic Clerkship (*, max. 8) Chansky**

Veteran’s Administration Hospital: structured to provide a basic education in the fundamentals of the musculoskeletal system. Heavy emphasis is placed on the reconstructive alternatives in the treatment of degenerative joint diseases. Prerequisite: completion of HUBIO series; third- and fourth-year students. Enrollment limited to three. Offered: AWSpS.

**ORTH 681 P-Sports Medicine Orthopaedic Clerkship (8) Allan, Bigos, Bruckner, Clark, Conrad, Larson, Matsen, Mirza, Simonian, Smith, Teitz, Trumble**

Orthopaedic subspecialty clerkship at University of Washington Medical Center. Preceptor-based outpatient, inpatient, emergency, or operative orthopaedic care. Students work primarily in one subspecialty area and in one general orthopaedic clinic. For students who plan careers in orthopaedic surgery. Prerequisite: completion of HUBIO series, third- and fourth-year medical students. Offered: AWSpS.

**ORTH 682 P-Outpatient Orthopaedics (8)**

Outpatient orthopaedic experience at University of Washington Medical Center. Emphasis on physical exam, diagnosis, radiographic evaluation, and non-operative treatment. Rotation through general orthopaedics as well as all subspecialty areas. For students who plan careers in primary care. Prerequisite: completion of HUBIO series. Offered: AWSpS.

Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with faculty specializing in adult reconstructive spine surgery, with a goal to maintain the highest standards of care in the evaluation and management of all patients with spinal disorders. Opportunities to participate in each aspect of this mission. Offered: AWSpS.

**ORTH 685 P-Adult Reconstruction: Total Joint Service (8) Clark**

Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Students work with faculty in the Total Joint Service which specializes in lower extremity adult reconstructive surgery, including: complex primary hip/knee arthroplasty; less
invasive approaches to hip/knee arthroplasty; revision hip/knee arthroplasty; periacetabular and proximal femoral osteotomy; osteotomy about the knee; and hip arthroscopy. Offered: AWSpS.

ORTHP 687 P-Shoulder and Elbow (8) Matsen, K. Smith
Preceptor-based outpatient, inpatient, emergency, and operative orthopaedic care. Work with the faculty in the Shoulder and Elbow Service, which provides comprehensive evaluation and management for a wide range of shoulder and elbow problems, including: arthritis, dislocation or instability, fractures, rotator cuff/tendon tears, joint stiffness, and unsuccessful previous surgery. Offered: AWSpS.

ORTHP 697 P-Orthopaedic External Elective (*, max. 12) Simionian
Special arrangements can be made for students desiring to take orthopaedic electives at other institutions. Programs generally approved include orthopaedic clerkships at other universities or at large orthopaedic institutes. Prerequisite: HUBIO 553 and permission of department. Offered: AWSpS.

ORTHP 699 P-WWAMI Orthopedics Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Otolaryngology — Head and Neck Surgery
BB1165 University of Washington Medical Center

The Department of Otolaryngology — Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

Course Descriptions

OTOHN 498 Undergraduate Thesis (*) Rubel, Weymuller
Student works directly with department faculty in selecting a suitable area for laboratory or clinical research in the area of otolaryngology, and develops a thesis for recognition. Offered: AWSpS.

OTOHN 499 Undergraduate Research (*) Rubel, Weymuller
Research opportunities offered under direction in the area of otolaryngology. (Twelve weeks.) Offered: AWSpS.

OTOHN 501 P-Preceptorship in Otolaryngology — Head and Neck Surgery (1) Hillel
One morning a week for a total of 30 hours per quarter spent observing patient care in either inpatient or outpatient settings at the University of Washington Medical Center; associated readings. Prerequisite: first- or second-year medical student standing. Coordinator: OTOHNS office. Offered: AWSpS.

OTOHN 680 Otolaryngology — Head and Neck Surgery Clerkship UW (4/8, max. 24) Hillel, Makielski, Manning, Weymuller
Introduction to surgical subspecialty of otolaryngology-head and neck surgery. Structured to allow broad introduction to breadth of specialty. Students see patients in clinic, join inpatient rounds, have opportunity to go to operating room. Rotations at UWMC, VAH, HMC, CHMC, Swedish. Prerequisite: human biology series; recommended: MED 665 or SURG 665. Offered: AWSpS.

OTOHN 683 P-Otolaryngology — Head and Neck Surgery

Clerkship Madigan (*, max. 8) (Madigan Army Medical Center)
Individual externship training at outpatient clinic, where visits average twelve hundred per month, supplemented by inpatient assignments. Students may reside at the hospital during externship, using facilities of bachelor officer quarters and hospital mess. Prerequisite: completion of human biology series. (Two or four weeks, full-time); recommended: MED or SURG 665. Offered: AWSpS.

OTOHN 686 P-Otolaryngology — Head and Neck Surgery Clerkship Greater Seattle Private Practice (*, max. 4) Weymuller
Clinical in-depth study for the student whose interest lies in pathology of the head and neck. Reasonable flexibility to arrange course content that provides exposure to all aspects of patient care. Prerequisite: permission of chairman; recommended: MED 665 or SURG 665. Offered: AWSpS.

OTOHN 697 P-Otolaryngology — Head and Neck Surgery Away Externship (8) Weymuller
By specific arrangement. Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean’s office a special assignment form at least one month before preregistration. Prerequisite: permission of chairman. Offered: AWSpS.

OTOHN 699 P-Otolaryngology — Head and Neck Surgery Clerkship WWAMI (4/8, max. 8)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Pathology
CS16 Health Sciences

Pathology is the study of disease; its causes, mechanisms, and effects on the body. Pathology is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by M.D.s, it includes the laboratory evaluation of organs, tissues and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by Ph.D.s, pathology focuses on the experimental investigation of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

Graduate Program
Graduate Program Coordinator
CS16 Health Sciences, Box 357470
206-616-7551

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in cellular and molecular pathology. The primary goal of the graduate program is to train individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. The emphasis of the program is on development of skills in hypothesis generation and testing, including the design, accomplishment and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to attempt to elucidate the mechanisms underlying human disease. Graduates of the program usually continue research careers at biotechnology companies or universities/research institutes.

Students in the program are expected to fulfill course-work requirements during the first two years. Course requirements are
kept to a minimum to provide students with maximum flexibility within the graduate faculty’s wide range of research interests. The program encompasses students and faculty members with diverse interests, ranging from investigation of the causes and outcomes of specific diseases to the molecular basis of regulation of cell function and of gene expression. Faculty members’ interests include the normal and pathological aspects of cardiovascular biology, stem cell function, tumor biology, environmental effects on normal processes, biology of aging, neurobiology, immune response, inflammation and repair, immunopathology and biology of extracellular matrix, as well as fundamental processes that underlie disease, such as regulation of gene expression and protein synthesis, structure and function of oncogenes, viral and nonviral transformation, chromatin structure, mutagenesis and DNA repair, and genetic recombination. The department’s graduate faculty comprises 40 members, who are located at the Health Sciences Center, Veterans Affairs Medical Center, Harborview Medical Center, Children’s Hospital and Medical Center, Hope Heart Institute, the Fred Hutchinson Cancer Research Center, and the Seattle Cancer Care Alliance. Approximately 20 full-time students are pursuing the Ph.D. degree.

Special Requirements
Prospective candidates should have taken undergraduate courses in the sciences, and have acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Some experience in a research laboratory is strongly recommended. Those wishing to matriculate toward both the M.D. and Ph.D. degrees must gain admission to both the Graduate School and the School of Medicine.

Financial Aid
Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

Research Facilities
The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology.

Residency Training Program
The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also available through clinical fellowships. Persons who complete the residency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100 or visit the Residency Program Web site.

Course Descriptions

**PATH 410 Introduction to Pathology (3)** Narayanan
Basic pathologic processes, including cell and tissue involvement in degenerative processes, cell death, inflammation and repair, immunopathologies, cell cycle events, carcinogenesis, and responses to alterations in hormone and growth factor levels. Illustrative disease conditions are reviewed. Required for physical therapy students. Others with suitable biology background by permission of instructor. Offered: A.

**PATH 444 General and Systemic Pathology (2-3)-, max. 5** Narayanan
Basic pathologic processes that underlie disease, including cell alterations, genetic and developmental pathology, environmental pathology, neoplasia, immunopathology, inflammation, infection, and systemic diseases. Correlates gross, functional, and biochemical alterations. For first-year dental students and graduate students. Requires reasonable grounding in biological and chemical sciences. Prerequisite for nondental students: permission of instructor.

**PATH 450 Cell Biology of Aging (3)** Martin, Rabinovitch, Wolf
Pathophysiology of aging at cell and tissue levels (cell replication limits, telomere shortening, accrual of oxidative damage, caloric restriction effects, loss of postreplicative cells, longevity assurance genes). Proseminar based on student participation. Undergraduate honors students, graduate students with biology, zoology, genetics or medical sciences back grounds. Prerequisite: permission of instructor. Offered: W.

**PATH 498 Undergraduate Thesis (*)&nbsp;**
Elective.

**PATH 499 Undergraduate Research (*)&nbsp;**
Elective.

**PATH 500 Molecular Basis of Disease (3)** Parks
Designed for first and second-year graduate students to introduce the concepts of general pathology at the cellular and molecular levels.

**PATH 501 Pathology Proseminars (1)**
Small group discussions and presentations by students based on critical reading of original papers, or on concurrent seminars, in many areas of experimental pathology and medicine. Topic varies by quarter. Prerequisite: permission of instructor. Offered: AWSpS.

**PATH 502 Inflammation and Repair (2)**
Lecture-seminar; a seminar course dealing with an in-depth examination of the processes involved in inflammation and repair. Credit/no credit only. Prerequisite: permission of instructor. Offered: even years.

**PATH 507 Introduction to Pathology Research (2)** Bornfeldt, Swisshelm
Current developments and approaches to investigation of the molecular and cellular basis of disease. Members of the Pathology faculty present and discuss their own research projects. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

**PATH 510 Introduction to Pathology Methods (3)** Bowen-Pope
Laboratory course designed to introduce graduate students to the fundamentals of image analysis, histology, histopathology, post mortem evaluation, surgical pathology, and other methods used to investigate disease etiology, progression, and manifestation in humans and in animal models. Prerequisite: permission of instructor. Offered: Sp.

**PATH 511 Topics in Experimental Pathology (1-2, max. 10)** Bornfeldt
Focus on areas of research relevant to experimental pathology. Prerequisite: permission of instructor. Offered: AWSpS.

**PATH 512 Molecular Basis of Disease: Death and Repair (1.5)**
First in a series designed to introduce students to medically important diseases and physiologic processes and experimental approaches to elucidating the cellular processes underlying these diseases. Covers basic cell/tissue processes that underlie normal homeostasis and most disease and, including apoptosis, necrosis, stem cells, inflammation, granulation tissue, tissue regeneration, repair and fibrosis.

**PATH 513 Mechanisms of Neurodegeneration (1.5)**
Introduction to the cellular and molecular mechanisms that underlie neurodegenerative diseases, including introduction to the normal development and anatomy of the central nervous system, a review of epidemiologic, genetic, and clinical research tools used in the investigation of these diseases, and a systematic review of the major neurodegenerative diseases.
PATH 514 Molecular Medicine (3) Rosen
Graduate-level introduction to the interplay of basic science and clinical medicine. Covers inflammation, vascular disease, metabolic disorders, cancer biology, and molecular-, gene-, and cell-based therapies. Each topic introduced with a patient history. Offered: jointly with CONJ 514; W.

PATH 516 Molecular Basis of Human Genetic Disease (3)
Introduces the underlying mechanisms in human genetic disorders, ranging from the single nucleotide, through genomic instability, and chromosomal rearrangements. Includes tissue and organ specific examples of the manner in which these disorders provide insights into human biology. Offered: Sp.

PATH 520 Experimental Pathology Seminar (1)
Review of current research in various areas of experimental pathology by members of the department and visiting scientists. Credit/no credit only.

PATH 522 Hematopathology Seminar (2) Sabath
Identification of normal lymphocyte and bone marrow subpopulations, diagnosis of leukemias, lymphomas, and benign conditions that resemble them. Emphasis on histopathology, cytochemical, immunological, and molecular markers. Clinopathologic correlation. Offered: jointly with LAB M 522; even years.

PATH 530 Human Cytogenetics (*, max. 4) Disteche
Sources and methods of preparation and identification of human chromosomes. Molecular structure and mapping of chromosomes. Human cytogenetic pathology: karyotype-phenotype interactions, chromosome breakage, and cancer cytogenetics. Prerequisite: permission of instructor. Offered: even years.

PATH 535 Fundamentals of Human Disease (*, max. 20)
Students study human pathology through participation in the autopsy service under direct supervision of a faculty member. They analyze the histologic, cellular, and biochemical aspects of selected cases, and present their observations in weekly seminars. Prerequisite: PATH 444 or PATH 555 and permission of course director: graduate students only.

PATH 551 Experimental and Molecular Pathology (2-5, max. 20)
Introduction to experimental pathology. A tutorial course designed to introduce a graduate student (medical, dental) or senior undergraduate to selected methods and problems through literature surveys and/or laboratory experience. Exploration of causes at the cellular and molecular levels in the study of disease is emphasized. Prerequisite: permission of instructor.

PATH 552 Contemporary Anatomic Pathology (2-5, max. 30) Schwartz
Study of recent developments in anatomic pathology. Subject includes areas of basic science and review of systemic pathology. Recent developments and interpretation of these findings are stressed. For pathology residents, fellows, and trainees. Credit/no credit only. Prerequisite: permission of instructor.

PATH 555 Environmental Pathology (3) Monnat, Rhim
Modern morphologic, cell biological, and molecular approaches to environmental disease associated with exposure/predisposition. Lectures, seminar discussion, and student presentations. Prerequisite: PATH 410 or PATH 444 or HUBIO 520; recommended: ENV H 514 and ENV H 515. Offered: alternate years.

PATH 560 Molecular Analysis of Human Disease (*, max. 10)
Review and discussion of contemporary research on molecular basis of human disease. Focus on mutational mechanisms, genetic instability, AIDS, and cancer. Students participate in weekly group discussion and work with faculty to select, develop, and present discussion topic. Prerequisite: medical, graduate, or professional standing and permission of instructor. Offered: AWSp.

PATH 562 P-Cardiovascular Pathology Conference (*)
Reichenbach
Course consists of two parts: a laboratory review of gross and microscopic cardiovascular pathology of selected autopsied cases followed by a combined clinical (medical and/or surgical) and pathology conference discussing these cases. Prerequisite: HUBIO 540 and permission of instructor.

PATH 563 Neopathology (*) Alvord, Shaw, Sumi
Course consists of ten parts. Conferences on gross neopathology (brain cutting and clinicopathologic correlations) held at six hospitals. Weekly neurology or surgical neopathology conferences, neopathology slide show, and neopathology laboratory case studies. Prerequisite: permission of instructor.

PATH 564 Neopathology Brain Modeling (4) Alvord
Designed along clinically important, functional, neuroanatomic lines, generally based first on the embryologic development of the most primitive segmental elements (sensory, motor and association cells, and simple reflexes), followed by the more elaborate suprasegmental elements (cerebellum, colliculi, and forebrain).

PATH 571 Neuroanatomic Pathology (*) Alvord, Shaw, Sumi
The particular diseases occurring in specific parts of the nervous system are considered in terms of the segmental, intersegmental, and suprasegmental components. Clinicopathologic correlations are emphasized. Prerequisite: permission of instructor; recommended as concurrent course: 563.

PATH 572 Neuropathologic Reactions (*) Alvord, Shaw, Sumi
The reactions of the nervous system, considered in terms of congenital malformations, inflammations, vascular, traumatic, metabolic-toxic, degenerative, and neoplastic diseases peculiar to the nervous system as a whole. Clinicopathologic correlations are emphasized. Prerequisite: permission of instructor; recommended as concurrent course: PATH 563.

PATH 576 Systemic Pathology II (3)
Case examples of gastrointestinal, hematopoietic, lymphoreticular, musculoskeletal, urinary, skin systems, and forensic pathology discussed by students. Relevant laboratory interpretations. Student presentations. Prerequisite: HUBIO 520 or equivalent general pathology course, and permission of instructor.

PATH 584 Neopathology Brain Modeling Laboratory (4) Alvord
Clinically important, functional neuroanatomic study based on embryologic motor, sensory, and association cells and simple reflexes, followed by the more elaborate suprasegmental elements (cerebellum, colliculi, forebrain). Three-dimensional neuroanatomic relationships, critical for understanding neopathology, can best be obtained in constructing a brain model. Prerequisite: PATH 564, which may be taken concurrently.

PATH 600 Independent Study or Research (*)
Credit/no credit only.

PATH 665 P-Surgical Pathology (*)
Study of fresh current gross surgical specimens and autopsy specimens and their correlation to a patient's clinical course through observation of pathologists working in a large hospital setting. Prerequisite: permission of instructor.

PATH 666 P-Renal Pathology Conference (1)
Conference-seminar on the histopathologic aspects of renal disease. May be taken concurrently with MED 693. For third- and fourth-year students. Prerequisite: permission of instructor.

PATH 667 P-Renal Pathology Laboratory (*, max. 6)
Laboratory elective for third- and fourth-year medical students. Read current literature, review various renal biopsies and urine sediments, and read standard texts prior to a weekly topic-oriented conference. All students earn 1 credit for one-hour seminar per week. May be taken concurrently with MED 693. Prerequisite: permission of instructor.

PATH 668 P-Skin Pathology (*)
Histopathological aspects of skin diseases are presented and discussed in a group-conference type of seminar. Current dermatologic cases also are discussed. Prerequisite: dermatology elective and permission of instructor.

PATH 673 P-Cardiovascular Pathology (*) Reichenbach
Spectrum of cardiovascular pathology covered in depth by case studies and gross and microscopic material. Case analysis for presentation, including clinical and gross and microscopic material, prepared outside of class time. Clinicopathologic correlation is emphasized. Prerequisite: HUBIO 540 and completion of first year of medical school.

PATH 679 P-Pathology Summer Clerkship (*, max. 24)
Dissection, writeup, and literature review of autopsy. Emphasis on etiology and pathogenesis of disease as a biological process. Designed for students who have not completed organ systems as covered in Human Biology courses. Prerequisite: HUBIO 520 and completion of first year of medical school.

PATH 680 P-Diagnostic Pathology Clerkship — University of Washington Medical Center (*, max. 24) Swanson
Medical student participation in dissection and study of autopsy and surgical pathology cases. Cases worked up under senior staff, including dissection, microscopic examination, and literature review. Attendance at pathology conferences and seminars expected. Prerequisite: third- or fourth-year student standing.

PATH 681 P-Diagnostic Pathology Clerkship — Harborview Medical Center (*, max. 24) Deubner

PATH 682 P-Diagnostic Pathology Clerkship — Veterans Administration Hospital (*, max. 24) Thorning

PATH 683 P-Diagnostic Pathology Clerkship — Medical Examiner’s Office (*, max. 24) Raven

PATH 685 P-Diagnostic Pathology Clerkship — Sacred Heart Hospital, Spokane (*, max. 24) Williamson

PATH 686 P-Diagnostic Pathology Clerkship — Overlake Medical Center (*, max. 24)

PATH 687 P-Diagnostic Pathology Clerkship — Children’s Hospital and Medical Center (*, max. 24) Patterson

PATH 688 P-Diagnostic Pathology Clerkship — Madigan Army Medical Center (*, max. 24)

PATH 689 P-Diagnostic Pathology Clerkship — Valley Medical Center (*, max. 24)

PATH 690 P-Diagnostic Pathology Clerkship — Northwest Medical Center (*, max. 24) Patton

PATH 691 P-Diagnostic Pathology Clerkship — General Hospital of Everett (*, max. 24)

PATH 692 P-Diagnostic Pathology Clerkship — Group Health Cooperative (*, max. 24)

PATH 697 P-Pathology Special Electives (*, max. 24)
By specific arrangement, students can have clerkships, externships, or research opportunities at institutions other than the University of Washington. Students who wish to elect this course should obtain Special Assignment forms from the Dean’s office at least one month before advance registration. Prerequisite: permission of instructor.

PATH 699 P-WWAMI Pathology Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

PATH 700 Master’s Thesis (*)

PATH 800 Doctoral Dissertation (*)

Pediatrics

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 24 electives, including the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives in addition to traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Children’s Hospital and Regional Medical Center, University of Washington Medical Center, and Harborview Medical Center.

Course Descriptions

PEDS 498 Undergraduate Thesis (*) Bennett
For medical students. Offered: AWSpS.

PEDS 499 Undergraduate Research (*) Bennett
Participation in various clinical or basic research programs in progress, specifically: child development, developmental biology, human embryology and teratology, medical genetics, infectious diseases, neonatology, neuroembryology, cardiology, endocrinology and metabolism, immunology, respiratory disease. Offered: AWSpS.

PEDS 505 P-Preceptorship in Pediatrics (1) Bennett
To provide opportunity for first- and second-year medical students to gain personal experience with medical practice situations for pediatricians by being stationed with carefully selected clinical faculty members in their offices. Prerequisite: permission of instructor. Enrollment limited. Coordinator: Department of Pediatrics. Credit/no credit only. Offered: AWSpS.

PEDS 506 Interdisciplinary Seminars in Adolescent Health (1)
Focus on interviewing adolescents, health problems, public health issues, and health care policy. Prerequisite: graduate or professional student status.

PEDS 512 P-Seminars in Human Embryology and Teratology (3) Chance, Mirkes
Presents in depth discussions of human embryonic-fetal development and malformations that arise, correlations with experimental studies and molecular embryology are included. A laboratory experience is optional. Prerequisite: permission of instructor. Offered: AWSp.

PEDS 530 P- Homeless Youth and Their Medical Care (1)
Deisher, Smith
Clinic-based setting for seminar and interview practice with
adolescents; students learn how to deal with special health problems and other related problems of “street kids” through interviews and observations. Credit/no credit only. Offered: W.

**PEDS 551 P-Pediatric Electrocardiography (2)** Guntheroth

Brief review of the physiology and physics pertinent to clinical electrocardiography is followed by a presentation of terminology and methods in clinical use. Normal electrocardiograms are studied, followed by abnormal tracings, with emphasis on pediatric material, but including adult material such as myocardial infarction. Prerequisite: HUBIO 540. Offered: W.

**PEDS 611 City Doc FREE-TEEN Clinic (*, max. 24) Breuner, Giesel**

Participation in a free clinic for out-of-home youth, either Monday or Tuesday evenings. Clinical services include general medical care, with a focus on reproductive health, STD evaluations/treatment, and the impact of a homeless lifestyle on general health. Offered: AWSpS.

**PEDS 630 P-WRITE Pediatrics Clinical Clerkship (*, max. 24)**

Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

**PEDS 661 P-Pediatric General Clerkship, Anchorage (*, max. 24) Lyon**

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 662 P-Pediatric General Clerkship (*, max. 24) Newman**

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 663 P-Pediatric General Clerkship (*, max. 24) Schweich**

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Location preferences are considered. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 664 P-Pediatric General Clerkship (*, max. 24) Bradford**

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 665 P-Pediatric General Clerkship (*, max. 24) Bennett**

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department or clinic. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 666 P-Pediatric General Clerkship (*, max. 24) Marron**

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 667 P-Pediatric General Clerkship (*, max. 24) Newman**

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 668 P-Pediatric General Clerkship (*, max. 24) Stucky**

General introductory pediatric clerkship. One-half in hospital setting; one-half in outpatient department, clinic, or private office. Open to all third- and fourth-year medical students. Prerequisite: HUBIO 563. (Six weeks, full time. Limit: twenty-four students.) Offered: AWSpS.

**PEDS 669 P-Pediatric General Clerkship (*, max. 24) Gleason**

Participation in the activities in the newborn and premature divisions; ward rounds, seminars, conferences, and familiarization with certain laboratory techniques, particularly those relating to acid-base balance. Prerequisite: PEDS 665. (Limit: two students.) Offered: AWSpS.

**PEDS 670 P-Pediatric Infectious Diseases (*, max. 24) Rubens**

Students see and work up clinic consultations and present in detail to attending physician. Daily rounds include problem-solving discussions and didactic presentations in broad category of infectious diseases. Opportunity for experience in clinical research and laboratory techniques. Prerequisite: PEDS 665 or permission; third- or fourth-year medical student standing. (Limit: one student.) Offered: AWSpS.

**PEDS 673 P-Office Practice (*, max. 12) Bennett**

Opportunity to observe and function in the private office settings of a number of clinical pediatric faculty and to accompany pediatricians as they pursue their daily activities in the community. Prerequisite: PEDS 665. Offered: AWSpS.

**PEDS 676 P-Pediatric Clerkship with the Mentally Handicapped (*, max. 12) Dahl (Fircrest School), Ruvalcaba (Rainier School)**

Total care involvement with mentally handicapped patients, incorporating general pediatric knowledge of mental retardation and neurology, plus other specialties related to mental deficiencies. Prerequisite: PEDS 665. (Four or six weeks, full-time.) Offered: AWSpS.

**PEDS 679 P-Clinical Problems in Developmental Disabilities (*, max. 12) Bennett**

Experience in multidisciplinary evaluation and management of the handicapped child. Student performs pediatric evaluations, obtains appropriate consultations, observes additional professional assessments (e.g., psychological testing), and plans rehabilitation program. Opportunity to provide parent counseling. Prerequisite: PEDS 665. (Limit: one student.) Offered: AWSpS.

**PEDS 680 P-Pediatric Clinics (*, max. 24) Bennett**

One to ten half-day sessions may be elected each week for four weeks in the following areas: general pediatrics, endocrinology, neurology, immunology, arthritis, cardiology, congenital defects and retardation, well-child, teratology, adolescent medicine, allergy, cystic fibrosis, hematology, prematurity, neonatology, and poison control. Enrollment limited. Prerequisite: PEDS 665.

**PEDS 681 P-Pediatric Genetics (*, max. 24) Pagon**

Clinical focus on evaluation and management of children with genetic disorders. Exposure to genetic counseling, the evaluation of children with hereditary structural defects, and diagnosis and management of children with inborn errors of metabolism. Emphasis on genetic mechanisms that cause human disease. Prerequisite: PEDS 665. (Two, four, six, or twelve weeks. Limit: one
Pharmacology

E401 Health Sciences

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program

Graduate Program Coordinator
E-417 Health Sciences, Box 357280
206-543-9280
phcoladm@u.washington.edu

The Department of Pharmacology offers the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirement: A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

Graduation Requirements: PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 (2 credits each) with a grade of 2.7 or above for each class. Enrollment in PHCOL 507 throughout graduate school. PHCOL 514 in the first, second, and third years of graduate study. PHCOL 519 (lab) for fall, winter, and spring of the first year with the purpose of acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student gives a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL 519. Students entering into the Ph.D. program with an M.S. degree or equivalent may petition to be allowed to enroll in only one quarter of PHCOL 519 before selecting a lab. Rotations may occur outside the department by special permission only.

Four advanced 2-3 credit graded elective courses in pharmacology in addition to the 510-513 series are required. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas are required. The courses should strengthen the foundation of the student's thesis proposal.

Creditable passage of a comprehensive written exam on general pharmacology, to be taken during the summer quarter of the second year, is required. During the first quarter of the third year of study, students take the oral General Exam. This examination is given by the supervisory committee. The examination is based in part on an evaluation of the student's proposed research for the dissertation and on his or her knowledge of the major disciplines important to the research. As a result of the examination, the committee may recommend termination, further work and subsequent reexamination, or approval of the student's performance and candidacy for the Ph.D. degree.

After successful completion of the General Exam, the student devotes most of his or her time to thesis research in the third and subsequent years of study. The research project for the Ph.D. dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's supervisory committee. The research must represent a worthy and fundamental contribution showing originality in concept and implementation.
When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor will obtain approval of the Graduate School and set a date for the Final Examination. The Final Examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

**Financial Aid**

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.

**Course Descriptions**

**PHCOL 401 General Pharmacology I (2-4, max. 4)**  
Wang  
Principles governing drug-receptor interactions, dose-response relationships, desensitization, and tolerance. Drug toxicity, allergy, mutagenesis, and carcinogenesis. Pharmacogenomics and DNA/RNA therapies. General pharmacology of drugs acting on the endocrine and vascular systems. For pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Offered: A.

**PHCOL 402 General Pharmacology II (3/4)**  
Storm  
General pharmacology of drugs acting on the autonomic, cardiovascular, and central nervous systems. For Pharmacy students and other undergraduates. Prerequisite: PHCOL 401. Offered: W.

**PHCOL 434 General Pharmacology (2)**  
Halpern, Watson  
Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: A.

**PHCOL 435 General Pharmacology (2)**  
Halpern, Watson  
Lectures concerning the action of drugs on physiological and pathological processes with special emphasis on agents of special importance in the practice of dentistry. For dental students. Offered: W.

**PHCOL 498 Undergraduate Thesis (*)**  
Offered: A.

**PHCOL 499 Undergraduate Research (*)**  
Participation in departmental research projects. Offered: AWSp.

**PHCOL 507 Pharmacology Seminar (1)**  
Presentation of comprehensive reports on recent medical and scientific literature in fields of current importance. Research progress reports, and reports on results of completed research. Prerequisite: permission of instructor. Offered: AWSp.

**PHCOL 510 Drug Discovery and Emerging Therapeutics (2)**  
Zheng  
Consideration of the general principles and current approaches involved in modern drug discovery and development, with an emphasis on basic concepts in drug action, delivery, and metabolism. Discussion of novel drug discovery techniques and emerging non-standard therapeutics. Prerequisite: organic chemistry, biochemistry, and introductory anatomy and physiology. Offered: W.

**PHCOL 511 General Pharmacology I (2)**  
Nathanson  
Consideration of the pharmacology of the cardiovascular and autonomic nervous systems. Emphasizes the mechanisms of neurotransmitter, hormone, drug action at autonomic synapses, and the molecular basis for physiology and pathophysiology of the cardiovascular system. Lectures, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: W.

**PHCOL 512 General Pharmacology II (1-5, max. 5)**  
Bajjalieh  
Consideration of the neurobiological basis of drug action on the central nervous system, including mechanism of action and therapeutic use in psychiatric disorders; neurodegeneration/neuroinflammation; control of neuronal excitability and pain; and drug abuse and addition. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: Sp.

**PHCOL 513 Endocrine Pharmacology and Chemotherapeutics (2)**  
McKnight  
Consideration of the pharmacology of endocrine systems including the hypothalamic/pituitary regulatory peptides, glycoprotein hormones/growth factors, peptide and steroid hormones. Basic principles of chemotherapy of endocrine and other cancers, as well as viral and microbial diseases. Lecture, group discussion, and analysis of recent research. Prerequisite: organic chemistry, biochemistry, introductory anatomy, and physiology. Offered: Sp.

**PHCOL 514 Current Topics in Pharmacology (1)**  
McKnight  
Current research related to the mechanisms of drug action presented in a seminar format. Presentations include relevant background material as well as detailed experimental results taken from current research articles. Prerequisite: permission of instructor. Offered: AWSp.

**PHCOL 515 General Pharmacology Laboratory (*) (max. 9)**  
Laboratory course for professional and graduate students who wish to do independent laboratory research under the direction of a specific faculty member. Prerequisite: permission of instructor. Offered: AWSp.

**PHCOL 519 Introduction to Laboratory Research in Pharmacology (4)**  
Storm  
On a rotation basis students carry out individual research projects in the laboratories of different faculty members. At the end of each quarter students make formal presentations of their work. For first-year graduate students in pharmacology. Offered: AWSp.

**PHCOL 527 Drug Metabolism (4)**  
Rettie  
Considerations of the biochemical mechanisms for the biotransformation of drugs and foreign compounds. Open to medical and graduate students. Prerequisite: one year graduate, medical, or dental biochemistry, or permission of instructor. Offered: jointly with MEDCH 527; odd years; W.

**PHCOL 529 Ion Channel Pharmacology (2)**  
Catterall, Tempel  
Current topics in ion channel structure, function, genetics, and pharmacology, including consideration of role in electrical signaling in cell membranes and information transfer and processing in nervous system, inherited diseases of ion channels, and sites and mechanisms of action of drugs and toxins. Prerequisite: CONJ 532 and CONJ 536 or permission of instructor. Offered: odd years; A.

**PHCOL 530 Neuronal Signaling Pathways (2)**  
Beavo, Pham, Storm, Xia  
Advanced consideration of the molecular events between drug or hormone binding to receptors and the resulting responses. Emphasizes roles played by signal transduction pathways in regulation of synaptic plasticity, memory formation, neuronal apoptosis and developmental neurobiology. Prerequisite: UCONJ 532 or permission of instructor. Offered: even years; W.

**PHCOL 531 Genetic Analysis of Signaling Systems (3)**  
McKnight, Moon  
Current topics involving signal transduction are discussed with an emphasis on genetic analysis of multicellular systems and creative experimental design. Prerequisite: 9 credits of graduate-level courses in molecular and cellular biology, biochemistry, or genetics, or
PHCOL 534 Molecular Basis of Addictive Drug Action (2)
Chavkin, Mackie, Stella
Advanced consideration and discussion of current literature addressing the basis of opiate, phychostimulant, and cannabinoid effects on signal transduction events, electrical activity of neurons, and drip-motivated behaviors in animal models of human drug abuse. Prerequisite: PHCOL 512 or permission of instructor. Offered: even years; A.

PHCOL 535 Transcriptional Control in Human Disease (3)
Bomszyk, Wang
Advanced consideration and discussion of the mechanisms regulating transcription/gene expression and of aberrant transcription factors which disrupt this process found in cancer and other human diseases. Prerequisite: PHCOL 512 or permission of instructor. Offered: even years; Sp.

PHCOL 536 Free Radicals in Health and Disease: A Pharmacological Perspective (2) Hinds, Vincenzi
Exploration of chemistry and properties of free radicals and related reactive-oxygen and nitrogen species. Review of biological effects of free radicals and reactive oxygen and nitrogen species with a view toward pharmacological intervention. Analysis of literature implicating free radicals in disease processes. Prerequisite: permission of instructor. Offered: odd years; Sp.

PHCOL 549 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Fallanck
Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with GENOME 549/NEUBEH 549.

PHCOL 550 An Overview of Faculty Research (1) Wang
Reviews research topics currently being studied in pharmacology. Student reads articles published on each topic. Credit/no credit only. Prerequisite: first-year student standing in pharmacology. Offered: A.

PHCOL 551 Molecular Properties of Ion Channels (1) Catterall
Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of sodium and calcium channels and the mechanism of action of drugs on them. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

PHCOL 552 Regulation of Synaptic Physiology (1) Chavkin
Discussion of research strategies and methodologies involved in the regulation of signal transduction and synaptic physiology. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

PHCOL 553 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1) Storm
Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 554 Cellular Regulation by Protein Kinases (1)
Beavo
Analysis of research problems, techniques, and emerging concepts in the study of the function of protein kinases. Emphasis on critical evaluation of research and development of presentation skills. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 555 Intercellular Signaling in Development (1)
Moon
Molecular genetic approaches to dissecting the roles and mechanisms of intracellular signaling during development. Emphasis on vertebrate genes related to Drosophilas segment polarity genes. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 556 Molecular Pharmacology of Neurotransmitter and Neurokine Receptors (1) Nathanson
Discussion of research strategies and methodologies in the areas of molecular neurobiology and signal transduction of muscarinic receptors, G-proteins, and neurokine receptors. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 557 Mechanisms of Carcinogenesis (3) Xia
Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with ENV H 567; A.

PHCOL 558 Pharmacology of Free Radicals (1) Vincenzi
Advanced considerations of current literature and experimental design, implementation and interpretation of research dealing with the effects of reactive oxygen species and free radicals on cell membranes and cells. Discussion of the relationships of such phenomena to human disease and the effects of drugs thereon. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 559 Molecular Genetics of Potassium Channel Function (1) Tempel
Discussion of research strategies, methodologies, and literature concerning the structure, function, and regulation of potassium channel genes and their role in behavior as studied in mutant mice. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 560 Regulation of Cell Function by Cyclic Nucleotide Phosphodiesterases (1) Beavo
Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on practical problem solving, data analysis, and presentation of methods important to understanding published data and designing new experiments in this area of research. Credit/no credit only. Prerequisite: permission of instructor. Offered: A.

PHCOL 561 Molecular Basis of Neurodegenerative Disease (2) La Spada, Muchowski, Fallanck
Introduces a broad range of neurodegenerative diseases, focusing upon the approaches that have led to recent discoveries and emphasizing the elucidation of mechanisms and pathways of disease pathogenesis. Offered: jointly with GENOME 549/NEUBEH 549.

PHCOL 562 Molecular Mechanisms of Neurosecretion (1) Bajjalieh
Discussion of research strategies, methodologies, and literature relating to regulation of cyclic nucleotide levels in the cell. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor.

PHCOL 563 Signal Transduction Mechanisms in Neuroplasticity and Neuron Growth (1) Storm
Discussion of research strategies, methodologies, and literature relating to signal transduction mechanisms important for neuroplasticity and regulation of neuron growth in the central nervous system. Emphasis on practical problem solving, data analysis, and presentation methods important to modern scientific work. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.
permission of instructor.

PHCOL 573 Signaling Systems Linked to Neuroinflammation (1) Stella
Discussion of research strategies, methodologies and literature related to neuroinflammation, microglial cell activation, and the cannabinoid signaling pathway. Emphasis on solving practical problem, data analysis, and presentation. Prerequisite: permission of instructor. Offered: A, W, Sp, S.

PHCOL 574 Molecular and Cellular Bsis of Chaperone Function and Protein Misfolding Diseases (1) Muchowski
Analysis of research problems, techniques and emerging concepts in the study of the molecular chaperones and protein misfolding diseases. Emphasizes experimental problem solving, data analysis, and development of presentation skills. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 575 Structural Biology of Ubiquitination (1) Zheng
Discussion of research strategies, methodologies and literature concerning the structure, function, and regulation of ubiquitin-protein ligases and the mechanism underlying ubiquitination and ubiquitin-dependent proteolysis. Emphasis on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

PHCOL 600 Independent Study or Research (*)
Pharmacology graduate students only. Offered: AWSpS.

PHCOL 700 Master’s Thesis (*)
Pharmacology graduate students only. Offered: AWSpS.

PHCOL 800 Doctoral Dissertation (*)
Pharmacology graduate students only. Offered: AWSpS.

Physical Therapy

Physiology and Biophysics
G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences-anatomy, molecular biology, immunology, biochemistry, pharmacology, and pathology-and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program
Graduate Program Coordinator
G424 Health Sciences, Box 357290
206-685-0519
phbio@u.washington.edu

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a Ph.D. degree in physiology and biophysics may emphasize molecular and cellular physiology, biophysics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter year is spent pursuing the area in depth and completing an original-research project.

Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. With additional training, graduates have been successful in medicine, law, creative writing, and high-level computer programming.

The department participates in interdisciplinary Ph.D. degree programs in Neurobiology and Behavior, and in Molecular and Cellular Biology.

Special Requirements
Admission to the physiology program normally requires a baccalaureate degree in biochemistry, biology, chemistry, engineering, genetics, mathematics, molecular biology, neuroscience, physics, or psychology.

Graduate Record Examination scores are required as part of the application. No subject tests are required.

Students are normally admitted to the graduate program in the autumn quarter. Applications and all relevant material should be submitted by January 15.

Research Facilities
The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

Course Descriptions

P BIO 405 Human Physiology (4-) Wordersman
Intensive coverage of physiology through lectures, conference. Autumn Quarter: excitable tissue, skeletal muscle; spinal reflex; cardiovascular, respiratory physiology; acid base balance; autonomic nervous system; temperature regulation. Winter Quarter: renal, body fluids; neuroendocrinology; reproductive, gastrointestinal, neuro-physiology. Required for dental, graduate nursing, and bioengineering students. Also offered for graduate students. Offered: A.

P BIO 406 Human Physiology (4-) Hlastala
Intensive coverage of physiology through lectures, conference. Autumn Quarter: excitable tissue, skeletal muscle; spinal reflex; cardiovascular, respiratory physiology; acid base balance; autonomic nervous system; temperature regulation. Winter Quarter: renal, body fluids; neuroendocrinology; reproductive, gastrointestinal, neuro-physiology. Required for dental, graduate nursing, and bioengineering students. Also offered for graduate students. Offered: W.

P BIO 424 Vision and Its Physiological Basis (5) NW Teller
Behavioral neurobiology of human vision: color vision, acuity and spatial vision, light and dark adaptation, visual development. Correlation of visual functioning with known optical, biochemical, physiological, and anatomical substrates. Prerequisite: 2.0 in either PSYCH 333, NBIO 302, or PHIL 160. Offered: jointly with PSYCH 424; W.

P BIO 498 Undergraduate Thesis (*)
Offered: AWSpS.

P BIO 499 Undergraduate Research (*)
Offered: AWSpS.

P BIO 505 Topics in Physiology (0.5)
Topics include excitation-contraction coupling, muscle structure, and molecular basis of contraction, regulation of contraction,
muscle mechanisms, energetics, and adaptation. Emphasis on skeletal muscle with some discussion of cardiac and smooth muscle. Series of six lecture discussions. Prerequisite: first-year P BIO graduate student. Offered: A.

P BIO 507 Cardiovascular and Respiratory Physiology (3)
Cardiovascular physiology: the heart, microcirculation, hemodynamics, regional circulation, and reflex integration. Respiratory physiology: the lung, pulmonary circulation, alveolar ventilation, gas exchange, control of breathing, acid-base regulation, exercise. Offered: W.

P BIO 508 Introduction to Laboratory Research in Physiology (2-5)
Students participate in the performance of ongoing projects in designated research laboratories. Emphasis is on experimental design, methodology and techniques. For first- and second-year graduate students in physiology and biophysics to provide a basis for future independent research. Offered: AWSpS.

P BIO 509 Neuroendocrinology (3) Steiner
Emphasizes the cellular and molecular aspects of several topics in neuroendocrinology, including neuropeptide genes, reproduction, steroid hormone regulation of gene expression, mechanisms of hormone action, endocrine rhythms, and neural oscillations. Prerequisite: either BIOL 201, BIOL 202, or BIOL 203, or BIOL 180, BIOL 200, and BIOL 220; BIOL 440, BIOL 441, BIOL 442 or permission of instructor. Offered: jointly with NEUBEH 541; W.

P BIO 510 Physiology Survey (2)
Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: A.

P BIO 511 Physiology Survey (2)
Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: W.

P BIO 512 Physiology Survey (2)
Reading and discussion of the research literature in cellular, molecular, and systems physiology. Students write a critical evaluation of each paper in the manner of a peer review. All three quarters are required for second-year P BIO students. Prerequisite: completion of one year of P BIO graduate study. Offered: A.

P BIO 513 Practicum in Teaching Physiology and Biophysics (4)
Students undertake instructional material development, presentation of materials and develop problem-solving techniques. Credit/no credit only. Offered: AW.

P BIO 516 Physiological Proseminar (7) Hlastala
Guided survey of the experimental literature in cardiovascular and respiratory physiology. Course conducted as seminar with oral analysis of assigned papers and topics. Prerequisite: permission of instructor. Offered: A.

P BIO 518 Research Topics in Cardiovascular Physiology (1) Feigl
Graduate students and faculty members present and discuss current literature and research. Prerequisite: permission of instructor.

P BIO 519 Membrane and Muscle Biophysics Seminar (1) Hille
Lectures on current research topics in cell membrane function and muscle contraction. Credit/no credit only. Prerequisite: permission of instructor. Offered: Sp.

P BIO 520 Physiology Seminar (*)
Selected topics in physiology. Prerequisite: permission of instructor.

P BIO 521 Biophysics Seminar (*)
Selected topics in biophysics. Prerequisite: permission of instructor.

P BIO 522 Selected Topics in Respiratory Physiology (1-3, max. 3) Hildebrandt
Advanced seminar on selected topics, including pulmonary mechanics, gas exchange, lung fluid balance, regulation of breathing, pulmonary circulation, respiration in the neonate, liquid breathing, airway dynamics, lung structure and development, cardiopulmonary interactions, exercise physiology. Prerequisite: permission of instructor. Offered: AWSpS.

P BIO 523 Heat Transfer and Temperature Regulation (2-5, max. 5) Brengelmann
Thermal exchange between the body surface and the environment. Heat production and distribution within the body. Properties of cutaneous and deep temperature receptors. Neural integration and homeothermy. Prerequisite: permission of instructor.

P BIO 525 Readings in Advanced Physiology and Biophysics (*)
Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: A.

P BIO 526 Readings in Advanced Physiology and Biophysics (*)
Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: W.

P BIO 527 Readings in Advanced Physiology and Biophysics (*)
Guided study of the experimental literature of physiology and biophysics. Essays are written and discussed with the staff. Emphasis is placed on critical analysis, accuracy of expression, bibliographical technique, and other factors of good scholarship. Prerequisite: permission of instructor. Offered: SpS.

P BIO 532 Discussion in Cell Signaling and Molecular Physiology (2)
Discusses fundamental issues in cell excitability and molecular and cellular physiology. Focuses on problem solving and reading from original literature. Emphasizes student participation. Prerequisite: first-year graduate students in neurobiology or physiology and biophysics. Offered: jointly with NEUBEH 532; A.

P BIO 541 Motor Systems I: Peripheral, Spinal, and Cortical Mechanisms (3) Binder, Fetz
Discussion of research papers on the physiology of the motor unit and the spinal and cortical neurons that control motor unit activity. Prerequisite: NEUBEH 501-503 or permission of instructor.

P BIO 542 Motor Systems II: Brainstem Mechanisms (3) Anderson, Fuchs
Critical discussion of research papers and resulting concepts regarding the roles of various brainstem systems in controlling somatic and ocular movements. Each student is responsible for leading the discussion of one topic. Prerequisite: NEUBEH 502 and NEUBEH 503 or equivalent and permission of instructor.
Critical reading and discussion of papers on passive, active, and integrative properties of single invertebrate and mammalian neurons. Provides understanding of how a variety of cellular mechanisms contribute to neuronal discharge patterns. Prerequisite: CONJ 501, CONJ 502, CONJ 503 and NEUBEH 501, NEUBEH 502, NEUBEH 503 or equivalent and permission of instructor. Offered: even years; A.

P BIO 545 Quantitative Methods in Neuroscience (3) Rieke, Shadlen
Discusses quantitative methods applicable to the study of the nervous system. Revolves around computer exercises/discussion of journal papers. May include linear systems theory, Fourier analysis, ordinary differential equations, stochastic processes, signal detection and information theory. Prerequisite: NEUBEH 501, 502, 503, or by permission of instructor. Offered: jointly with NEUBEH 545; W.

P BIO 547 Readings in Cell Physiology (2/3, max. 15) Hille
Reading and discussion of research literature on excitable cells. Emphasis on membrane excitability, transport, contractility, growth factors, and extracellular matrix. Topics vary. Prerequisite: CONJ 501 or equivalent. Offered: W.

P BIO 549 Plasticity in the Vertebrate Nervous System (2)
Emphasis on mammalian CNS. Examples of anatomical, pharmacological plasticity chosen from literature. Structure changes during development and in adult (hippocampus, spinal cord, nerve-muscle) studied and as correlates of learning. Students responsible for leading class discussion of one topic. Credit/no credit only. Prerequisite: graduate-level courses in neurophysiology and neuroanatomy; understanding of basic neuronal mechanisms. Offered: ever years; Sp.

P BIO 550 Biophysics of Calcium Signaling (1) Hille, Santana
Introduction to cellular calcium signaling including theoretical and technical issues of calcium signal detection and biological conclusions. Prerequisite: CONJ 531 Offered: jointly with NEUBEH 550; odd years; Sp.

P BIO 551 Mouse Models (1)
Illustrates the use of transgenic and targeted-gene disruption technologies for developing mouse models of the disease. Introduces the methodology of producing transgenic and knock out mice. Discusses several examples of disease models using the most recent primary literature as a source. Offered: jointly with NEUBEH 551.

P BIO 552 Synaptic Integration (1) Binder, Powers
Discussion of recent papers on how neurons in the central nervous system integrate concurrent synaptic inputs. Includes: effects of driving force on synaptic currents, effects of conductances on dendritic properties, transfer of currents from dendrites to soma, and transformation of currents into spike train outputs. Offered: jointly with NEUBEH 552.

P BIO 553 Learning and Memory: Synapses and Systems (1)
Jagadeesh, Sullivan
Five-week mini-course evaluates the current state of knowledge on the mechanisms that allow people to learn and remember. After introductory overviews of the cellular and molecular mechanisms underlying long-term synaptic plasticity and the multiple systems existing for learning and memory, students choose specific topics for discussion. Offered: jointly with NEUBEH 553.

P BIO 554 Motor Learning: Cellular and Network Mechanisms (1) Fetz, Perlmutter
Five-week mini-course reviews the current state of research on cellular and network mechanisms of motor learning. After an introductory overview of behavioral and physiological examples of motor learning in various species and systems, students choose specific topics for discussion, using the primary literature as a source. Offered: jointly with NEUBEH 554.

P BIO 555 Sensory Receptors (1) Detwiler, Rieke
Five-lecture mini-course examines how different kinds of sensory receptors detect and respond to different modalities of sensory stimuli. Discussion focuses on the cellular and molecular mechanisms of the underlying transduction processes and the experimental evidence that they are based on. Offered: jointly with NEUBEH 555.

P BIO 556 Axon Pathfinding Mechanisms (1) Bothwell
Examines mechanisms governing axon growth cone behavior during embryonic development and during regeneration in the injured adult. Discusses approaches employing both invertebrate and vertebrate model systems. Offered: jointly with NEUBEH 556.

P BIO 557 Ion Channel Gating (1) Gordon, Zagotta
Compares and contrasts mechanisms of gating in ligand-gated and voltage-gated ion channels. Covers basics of ligand gating and voltage gating, kinetic schemes, inactivation and desensitization, gating currents and partial agonists, and ion channel structure. Offered: jointly with NEUBEH 557.

P BIO 560 Muscle and Cell Motility (*)
Selected topics in muscle contraction and cell motility. Reading of original papers. Presentations by students and faculty. Topics vary. Prerequisite: permission of instructor.

P BIO 594 Neurological Study Unit (0.5)
Faculty and student discussion of neurological topics illustrated with clinical cases or demonstrations include the following: physiology, neuroanatomy, neurology, neuropathology, neurosurgery, and psychiatry. Credit/no credit only. Prerequisite for medical students: HUBIO 532. Offered: AW.

P BIO 600 Independent Study or Research (*)
Offered: AWSp.

P BIO 700 Master's Thesis (*)
Offered: AWSpS.

P BIO 800 Doctoral Dissertation (*)
Offered: AWSpS.

Psychiatry and Behavioral Sciences
BB1644 Health Sciences
pbsci@u.washington.edu

The department offers course work, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

Graduate Program

The medical school curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neuroparmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsy-
chiary and behavioral medicine, as well as training in interviewing
skills and assessment techniques. Its elective program includes a
variety of clinical experiences and advanced didactics and seminars
designed to further the knowledge and skills developed within the
basic curriculum. In addition, the department encourages research
and other scholarly pursuits by students in areas of interest to them.
Stipends are available for research studies.

Residency Training in Psychiatry
Contact: Deborah Cowley
A four-year residency for medical school graduates and a three-year
post-internship residency prepares physicians for Specialty Board
Certification in Psychiatry. Clinical rotations on inpatient, outpatient,
emergency, and consultation/ liaison services are augmented by individual supervision and didactic lectures. With the
program’s integrative orientation, residents become proficient in
psychotherapy, psychopharmacology, and community liaison with
patients of all ages. Fellowships in child, geriatric, addiction,
community, forensic and consultation-liaison psychiatry, and
psychiatric neuroscience are available.

Clinical Psychology Internship Program
Contact: Joan Romano
The one-year internship in clinical psychology, accredited by the
American Psychological Association, offers advanced clinical
training to candidates for the doctoral in clinical psychology from
graduate programs accredited by the American Psychological
Association. Training tracks with the internship in general adult,
general child, rehabilitation and health psychology, and public
behavioral health and justice policy (adult and child). Advanced
research skills training is also available as part of an INH-funded
training grant for selected internship participants.

Postdoctoral Fellowship Training
Contact: Richard Veith
Postdoctoral fellowships for advanced clinical and research training
in behavioral medicine, broadly construed, are also offered.

Course Descriptions

PBSCI 498 Undergraduate Thesis (*)
Opportunity to complete work on psychiatric research projects or
to pursue a specific psychiatric topic in depth, for instance, through
library research.

PBSCI 499 Undergraduate Research (*, max. 15)
Opportunities are available for participation in a wide variety of
ongoing research in the behavioral sciences and clinical psychiatry,
or for the development of an individual investigative project under
the supervision of a faculty sponsor.

PBSCI 525 P-Psychiatry and the Law (3) Goldenberg
Concentration on major issues in psychiatry and law. Outside
speakers from legal, judicial, and psychiatric communities. Lectures
on assessment in forensic settings, competence to stand trial, and
criminal responsibility. Discussions on personality disorders and
correctional environments. For psychiatric residents and graduate
psychology, psychosocial nursing, social work, and law students.

PBSCI 530 P-Developmental Psychoanalytic Psychotherapy
(2) Schimmelbusch
Examines how failures of psychological development lead to
disorders of regulation of affects and cognition, and how psychoana-
litic treatment reinstitutes normal development. Treatment process
viewed from a psychoanalytic and psychobiological perspective. Clinical case discussion integrates theoretical concepts.

PBSCI 535 Modern Concepts of Psychoanalysis (2)
Schimmelbusch
Examines childhood developmental stages in light of inborn and
environmental determinants. Correlates developmental phases with
adult personality functioning. Views emotional development from a
psychoanalytic and psychobiological point of view. Clinical case
discussion integrates theoretical concepts.

PBSCI 546 Psychosocial Epidemiology (3) Vander Stoep
Application of epidemiological methods to the study of mental
illnesses. Topics include occurrence and distribution of mental
illness, classification of psychiatric disorders; treatment-based vs.
community-based studies; epidemiology of depression and schizo-
phrenia; familial transmission; developmental epidemiology; mental
illness and violence. Prerequisite: one course in epidemiology or
permission of instructor. Offered: jointly with EPI 546; Sp.

PBSCI 548 P-Aging and Adult Development (1-3, max. 3)
Aging in Western technologically advanced societies frequently
involves losses in status, stamina, and economic and social supports.
Consideration given to losses among the aged. Students select
projects in the area of aging and work at their own levels of
expertise and sophistication. Seminar format with guided reading.

PBSCI 560 P-Psychological Interventions for Primary Care
Physicians (1) Kent
Focuses on the integration of primary care and mental health issues.
Reading, lectures, videos, and role plays are utilized to review
evidenced-based psychological interventions which can be employed
in an outpatient primary care setting. Emphasizes issues of
somatization, depression, anxiety, and health behavior change.

PBSCI 591 P-Seminars and Conferences in Psychiatry:
Seminar in Clinical Neuropsychology (*)
Introduction to neuropsychological studies of brain-behavior
relationships. Exposure to neuropsychological assessment proce-
dures and manifestation of neurocognitive deficits in selected mental
and medical disorders, e.g., epilepsy, AIDS, sleep disorders, trauma,
toxin exposure, vascular disorders, psychiatric disorders. Develop
knowledge of neuropsychological assessment procedures and
applications to diverse medical conditions. Prerequisite: psychologi-
cal assessment experience.

PBSCI 600 Research in Psychiatry (1-15, max. 15) GE
Independent laboratory research under the guidance and supervision
of research scientists in the Psychiatry Department. Faculty
permission required. Offered: .

PBSCI 630 P-WRITE Psychiatry Clinical Clerkship (*, max.
24)
Basic clinical clerkship for students enrolled in the WRITE
Program. Prerequisite: completion of basic curriculum; third- and
fourth-year students; acceptance in the WRITE program.

PBSCI 665 P-Basic Clinical Clerkship (12) Dagadakis,
McCreery, Mehta
Inpatient clerkship in psychiatry. Students have primary responsi-

bility under the direction of attending psychiatrists and residents for
diagnosis and care of patients at University of Washington Medical
Center, Harborview Medical Center, or Veterans Administration
Hospital. Emergency room, crisis intervention, consultation to
patients with psychiatric dysfunction. Familiarity with psychophar-
macology and short-term hospitalization emphasized. (Six weeks,
full-time.)

PBSCI 666 P-WWAMI Psychiatry and Behavioral Sciences
Clerkship (12) Kletti
Rotation aims to increase student’s skills in basic psychiatry, social
psychiatry, transcultural psychiatry, and community psychiatry.
Orientation is around the diagnosis, treatment, and clinical
management of White, Aleut, Indian, and Eskimo children and
adults in outpatient, inpatient, and community settings. Third-,
fourth-year medical students. Prerequisite: HUBIO 563. (Limit: three students.)
PBSCI 667 P-Basic Psychiatry Clerkship, Boise (12) Hines
Basic psychiatry clerkship at Veterans Administration Medical Center in Boise, Idaho. Fulfills graduation requirement for clerkship in Psychiatry.

PBSCI 668 P-Psychiatry Clerkship, Spokane (12) Bakker
Students work on adult, geriatric, and adolescent inpatient psychiatric units of Sacred Heart Medical Center, following patients after transfer to partial hospitalization or outpatient clinic. Didactics include basic psychiatric diagnosis, treatment, and pharmacotherapy. Prerequisite: completion of HUBIO series; third and fourth-year medical students.

PBSCI 669 Basic Psychiatry Clerkship, Wyoming (12)
Students work in the Wyoming Behavioral Institute with adult, adolescent, and child inpatients. Students have some outpatient experience and emergent care assessment experience at the Wyoming Medical Center. Didactics and discussion include topics such as psychopharmacology, emergent care and assessment, diagnosis, and substance abuse issues.

PBSCI 670 P-Clerkship in Consultation/Liaison Psychiatry UWMC (*, max. 24) Walker
Assessment of patients with major psychosocial problems associated with physical disease, including: problems stemming from the way the illness is perceived and experienced, liaison with other clinical disciplines on complex diagnosis and treatment of problems. (Limit: one student; four weeks.) Prerequisite: HUBIO 563; either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668.

PBSCI 671 P-Clerkship in Consultation/Liaison Psychiatry HMC (*, max. 24) Elliott
Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Limit: two students.)

PBSCI 672 P-Elective Clerkship in Primary Care Psychiatry at Boise VAMC (8/12) Blackburn, Leone, Marsh
Assessment and treatment of patients with acute psychiatric problems in a primary care/rural setting. Consultation work on general medicine and surgery; assessment and dealing with outpatient psychiatric problems as they initially present. Evaluations, crisis intervention strategies, and brief therapies stressed. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four to six weeks; UW students only.)

PBSCI 673 P-Outpatient Psychiatry Elective (*, max. 24) Foster
Offered at Harborview Outpatient Center. Students function as subinterns, conducting diagnostic interviews, initiating and managing pharmacotherapeutic treatment regimens, and providing crisis intervention, under the supervision of the full-time attending at Psychopharmacology Clinic. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four to six weeks, full-time.)

PBSCI 676 P-Inpatient Clerkship in Psychiatry at American Lake VA (8/12) Chandran
For medical students with a defined interest in psychiatry who wish to develop their knowledge and skills in the evaluation, management, and treatment of a wide range of acute and chronic psychiatric conditions requiring inpatient hospital treatment. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four to six weeks, full-time.)

PBSCI 677 P-Alcohol and Drug Treatment Clerkship at American Lake VA (8/12) Lim
Student assists in every phase of the substance-abuse treatment, including admission interviews, patient evaluation, problem identification, group and individual psychotherapy, assertiveness training, anger control, human sexuality, medical evaluation and treatment, couples therapy, discharge and aftercare planning.

Experience primarily clinical. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four to six weeks, full-time.)

PBSCI 678 P-Clerkship in Psychiatric Long-Term Care and Rehabilitation (*, max. 12) Chandran
Two- to six-week clerkship provides learning experiences in rehabilitation of long-term psychiatric patients with medical illness. Multidisciplinary team approach, working with homeless mentally ill. Diagnostic skills emphasized. Spectrum of diseases (cardiovascular, Huntington’s, organic brain syndrome) is such that physical rehabilitation is not an emphasis. Prerequisite: HUBIO 563; either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668.

PBSCI 680 P-Clerkship in Emergency Psychiatry (*, max. 24) Gardiner
Emphasis on clinical evaluation, acute management, and treatment planning for individual patients. Experience in coordinating these activities with other emergency room personnel, and various hospital and community resources. Emphasis on skills useful to physicians in any specialty. Third- and fourth-year medical students only. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four or six weeks, full-time.)

PBSCI 685 P-Geriatric Psychiatry Clerkship (*, max. 12) Pascualy
Two- to six-week elective (four weeks highly recommended). Participation in the evaluation and care of older persons with psychopathology, such as intellectual impairment and depression, in a variety of settings. Emphasis on improving clinical skills regarding diagnosis and treatment of common behavioral problems in the elderly. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668.

PBSCI 688 P-Subinternship in General Psychiatry (*, max. 16)
Students function as interns under the supervision of house staff and attending psychiatrists. Further development of their diagnostic and therapeutic skills emphasized. Special areas of interest, such as family intervention, substance abuse, psychoses, neuropsychiatry, community psychiatry, administration, research pursued. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668; permission of instructor. (Four or six weeks, full-time.)

PBSCI 696 P-Advanced Clerkship in Child Psychiatry (*, max. 24) Varley
Provides students an opportunity to participate in evaluation and treatment. Experiences in specialized clinics are also available. It is suggested that the student contact the instructor prior to enrollment. Prerequisite: either PBSCI 665, PBSCI 666, PBSCI 667, or PBSCI 668. (Four or six weeks, full-time. Limit: two students.)

PBSCI 697 P-Psychiatry Special Electives (*, max. 24)
By special arrangement, clerkships, externships, and research opportunities can be made available at the University and other institutions. Students obtain permission from Dr. Hunt before obtaining a special assignment form from the Dean’s office one month before advance registration. Students contact affiliating institutions. Does not fulfill the requirement for a basic clerkship in psychiatry.

PBSCI 699 P-WWAMI Psychiatry and Behavioral Sciences Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Radiation Oncology

NN106 University of Washington Medical Center
Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

**Course Descriptions**

**R ONC 499 Undergraduate Research (*, max. 24)** Austin-Seymour, Cho, Douglas, Einck, Kalet, Koh, Laramore, Lindsey, Ling, Phillips, Rosey, Russell, Schwartz, Selzer; Opportunities in clinical or laboratory investigation in radiology, radiation physics, or computer-related research. Student participation in ongoing or new projects. Open to students in the biological or physical sciences.

**R ONC 695 P-Clinical Cancer Management (*, max. 8)** Koh Participation in the clinical management of patients with cancer, emphasizing a multi-modality approach. Includes clinical assessment, planning of radiation treatment, and follow-up evaluation of patients. Special procedures include three-dimensional treatment planning, implant brachytherapy and intraoperative radiation. Daily teaching conferences with faculty and residents. Prerequisite: MED 665 or permission of instructor.

**R ONC 697 P-Radiation Oncology Special Elective (*, max. 24)** Koh By specific arrangement for qualified students, special clerkship, externship or research opportunities can be made at institutions other than the University of Washington. Students should obtain a “Special Assignment” form from the Dean’s Office at least one month before advance registration. Prerequisite: permission of instructor.

**R ONC 699 P-WWAMI Radiation Oncology Special Electives (*, max. 24)** By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

**Radiology**

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that specializes in the interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology’s major subspecialties, radionuclides are employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The Department of Radiology consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both divisions are ably supported by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.

**Course Descriptions**

**RADGY 498 Undergraduate Thesis (†)** Supervised clinical and/or laboratory research in the broad field of medical imaging, culminating in a thesis. Offered: AWSpS.

**RADGY 499 Undergraduate Research (†)** Opportunity to gain research experience and direct participation in either clinical or basic sciences investigation in diagnostic and/or nuclear medicine. Offered: AWSpS.

**RADGY 505 P-Preceptorship in Nuclear Medicine (1, max. 24)** Eary (University of Washington Medical Center) Opportunity for first- and second-year medical students to gain experience with faculty in clinical and academic environments. Students observe general aspects of the Nuclear Medicine Division, including clinical problems, the different relationships in the clinic between physician and patient, and several research aspects of the division. Prerequisite: permission of instructor. Offered: AWSpS.

**RADGY 508 Physical Aspects of Medical Imaging (4)** Stewart Quantitative physical principles of medical imaging are presented for electromagnetic and sonic radiation. Methods of image formation and analysis are discussed for conventional film radiography, CT, DSA, PET, B-mode ultrasound and Doppler ultrasound. Offered: jointly with BIOEN 508/ENV H 528.

**RADGY 550 Nuclear Magnetic Resonance in Biomedicine (2)** Hayes, Kashmerick, Richards, Yuan Basic physics of nuclear magnetic resonance (NMR) imaging and spectroscopy are presented. Research applications of NMR in physiology and biochemistry are reviewed with emphasis on the brain. Grade based on written tests and small research paper. Prerequisite: permission of instructor. Offered: jointly with BIOEN 565; odd years; Sp.

**RADGY 580 P-Nuclear Medicine Technique, Physics, and Instrumentation (2.5)** Lewellen Provides familiarization with basic nuclear phenomena and with the instrumentation used in the practice of nuclear medicine. There are discussions and laboratory exercises. Practical experience in instrument operation and sample counting are provided. Prerequisite: permission of instructor. Offered: S.

**RADGY 693 P-Introduction to Diagnostic Radiology (4)** Schulte Half-time clerkship in the field of medical imaging. Lectures, case discussions, film reading, and independent study provide an overview of the subspecialty areas of diagnostic radiology and nuclear medicine. Emphasis on utilization and selection of imaging tests, radiologic anatomy, and interpretation of commonly encountered studies. Offered: AWSpS.

**RADGY 694 P-Advanced Clinical Clerkship (8)** Schulte Full-time clerkship provides a more in depth experience in diagnostic radiology and nuclear medicine. Required rotations in the subspecialty areas of radiology augment the basic lecture series and case discussions of Radiology 693. For those with a special interest in diagnostic radiology. Prerequisite: permission of instructor and departmental education coordinator. Offered: AWSpSs.

**RADGY 695 P-Radiology Sub-specialty Elective (*, max. 8)** Schulte Clinical rotation in one of the sub-specialty areas of radiology at the University of Washington and affiliated hospitals. Requires special arrangements and permission from a preceptor and the education
Coordinator in Radiology. Two or four weeks. Offered: AWSpS.

RADGY 696 P-Nuclear Medicine Clerkship (*, max. 12) Early
Daily participation at University of Washington Medical Center nuclear medicine clinic emphasizing technical performance, diagnostic interpretation, and clinical relevance of nuclear imaging. Daily clinical teaching conferences of the division. Four- and six-week clerkships can be preplanned in areas such as pulmonary, cardiovascular, renal, bone, computer analysis. Prerequisite: permission of instructor. Offered: AWSpS.

RADGY 697 P-Radiology Special Electives (*, max. 24) Schulte
Radiologic training in a nonaffiliated institution. Permission and arrangements must be made at the time of registration through direct communication between the student and the education coordinator in Radiology. A written outline from a preceptor at the intended site required. Prerequisite: permission of radiology education coordinator. Offered: AWSpS.

RADGY 699 P-WWAMI Radiology Special Electives (*, max. 24) By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Rehabilitation Medicine

BB919 Health Sciences

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, and a Bachelor of Science in the field of prosthetics and orthotics. The department also offers a Master of Science degree in rehabilitation medicine with options for occupational therapists, physical therapists, and residents in physical medicine and rehabilitation who wish to pursue academic or research careers.

Occupational Therapy

Head

Elizabeth M. Kanny

Occupational therapists provide services related to occupational performance in everyday life in the areas of self-care, work and productive activities, and play/leisure. Occupational therapists work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies that promote well being. They work with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.

Occupational therapists help people with impairments or limitations to live as productive a life as possible. They work with people to increase independent function in life activities, enhance development, and to minimize or prevent disability. They use a variety of therapeutic methods including training in self-care activities; design, fabrication, and application of splints; sensorimotor activities; therapeutic group activities; selection and use of adaptive equip-

ment; adaptation of physical environments in the home, school, work, or community; activities to enhance functional performance in everyday life; and work evaluation, work hardening, and workplace adaptations.

Today’s occupational therapists work in clinical and community practice, administration, education, and research. Work settings include rehabilitation centers and hospitals; public and private schools; home health agencies; mental health centers and psychiatric hospitals; private practice; vocational rehabilitation centers and industrial clinics; private industry, wellness and prevention programs; and hospices.

The curriculum is designed to link theoretical and technical knowledge in occupational therapy with professional values, attitudes, and skills. The education of each student is based on the philosophy that “occupational performance” (including self-care, work, and leisure/play) is central and provides a purpose and meaning to one’s life. Professional standards of practice, ethics, and continued professional growth are emphasized throughout the program. Program requirements include seven quarters of professional course work and six months of full-time fieldwork training. Fieldwork training must be completed within 24 months after completion of professional course work. Completion of all program requirements leads to a Master of Occupational Therapy degree awarded by the School of Medicine, Department of Rehabilitation Medicine.

The Occupational Therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220, phone 301-652-2682. Graduates of the program are eligible to sit for the national certification examination for the occupational therapist. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for the development and implementation of this exam. Most states, including Washington, require state licensure in order to practice.

Admission Requirements: Applicants must have completed a bachelor’s degree in any major and taken the Graduate Record Exam (GRE) within the past five years. In addition, there are eight prerequisite courses that must be completed prior to being admitted to the program. The admission process occurs once a year for entry to the program in autumn of each year; applications are evaluated starting January 15 of each year. Specific prerequisite courses at the UW include the following. For students who have attended schools outside of the UW, comparable courses must be taken:

- **Natural Sciences:** Survey of Physiology (ZOOL 118), 5 credits; General Anatomy (B STR 301), 4 credits; Introduction to General Chemistry, (CHEM 120), 5 credits; General Physics (PHYS 114), 4 credits; General Physics Laboratory (PHYS 117), 1 credit; Basic Educational Statistics (EDPSY 490), 3 credits
- **Social Sciences:** Abnormal Psychology (PSYCH 305), 5 credits; Developmental Psychology (PSYCH 306), 5 credits; Survey of Sociology (SOC 200), 5 credits or Principles of Sociocultural Anthropology (ANTH 202), 5 credits.

To apply, students must have completed five of the prerequisite courses, with three courses in the natural sciences. They must have earned a minimum GPA of 3.0 in the prerequisite courses with no single course graded less than 2.0, and have a GPA of 3.0 on the most recent 60 semester or 90 quarter credits. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information may be obtained by calling 206-598-5392, from the program’s Web page, or by sending an email to oti@u.washington.edu.
Graduation Requirements: The following courses must be completed satisfactorily in the schedule sequence, beginning autumn quarter only, at the UW: REHAB 400, REHAB 401, REHAB 403, REHAB 414, REHAB 442, REHAB 444, REHAB 445, REHAB 448, REHAB 451, REHAB 452, REHAB 570, REHAB 571, REHAB 572, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 587, REHAB 591, REHAB 594, CONJ 480, and HUBIO 563.

Student Evaluation: The University grade-point system is used in student evaluation. A student must maintain a cumulative GPA of 3.0 in all required professional course work to maintain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program’s Web page.

If at any point the OT curriculum cumulative GPA falls below 3.0, the student is placed on academic probation and the student must raise it to 3.0 by the end of two subsequent quarters. If a student is unable to remove his/her probation status, he/she is subject to dismissal from the program.

The student must satisfactorily complete all academic course work before taking the two required Level II Fieldwork placements (REHAB 594). Both of the two required Level II Fieldwork placements must be satisfactorily completed within two years after the completion of the academic portion of the program in order to graduate from the program.

For more information on the Master of Occupational Therapy program, visit the department’s Web site.

Physical Therapy

Head
Mark Guthrie

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular problems.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is a rebuilding of self-confidence and the creation of a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics, rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality health care is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient’s problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensation and sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Some of the procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and training in the use of orthotic, prosthetic, and other assistive devices, such as crutches, canes, and wheelchairs.

As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formalized mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University of Washington program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education.

Doctor of Physical Therapy

Admission Requirements: Applicants are required to complete a bachelor’s degree in another field prior to enrollment in the physical therapy curriculum. For current admission requirements, applicants should request detailed program information (which is updated annually and available after September 1 each year) from the Physical Therapy Curriculum Office, Box 356490, University of Washington, Seattle, Washington 98195-6490; 206-598-5333; or view the information online. Students are urged to request or check these materials early, since the deadline for receipt of applications is January 15. At the time of entrance to the program (autumn quarter), applicants must be U.S. citizens or permanent residents.

Prosthetics and Orthotics

Head
John Fergason

The prosthetist-orthotist is a member of the rehabilitation health care team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. Team members work together with physically challenged individuals to enhance their daily life and increase their functional abilities.

The two groups of prosthetic-orthotic devices which can potentially enter into the rehabilitation of an individual are (1) prosthetic devices, which replace or substitute for a missing limb or part of a limb, and (2) orthotic devices, which help with the control of motion and the support of a weakened body segment.

Practitioners provide direct patient care and management. Practitioners work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. They design the appropriate device, supervise technicians who fabricate them, and evaluate the fit and functional use for each patient. To evaluate function, the prosthetist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength and human locomotion.

Before designing a prosthesis or orthosis, the prosthetist-orthotist examines a patient to find any conditions that will affect the future success of the orthosis or prosthesis. Following the evaluation, the prosthetist-orthotist will obtain an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthetist-orthotist fits the patient and makes changes as necessary.

Adviser
BB919 Health Sciences Center
206-616-8586

688
The prosthetics and orthotics division offers the following programs of study:

- The Bachelor of Science degree with a major in prosthetics and orthotics

Bachelor of Science

Suggested First- and Second-Year Courses: Courses fulfilling the general education requirements including proficiency and areas of knowledge (20 VLPA, 20 I & S) should be completed during the first two years prior to entry into the program. Prerequisite coursework (general biology, general physics, human anatomy and physiology, general chemistry, psychology) is also completed during this time.

Suggested courses include: statistics (STAT 220), interpersonal communication (COM 103), introduction to public speaking (COM 220), personality and individual differences (PSYCH 265), and developmental psychology (PSYCH 306).

Department Admission Requirements

Minimum 2.70 cumulative GPA

Prior to admission to the program, students must complete the following prerequisites with a minimum combined GPA of 2.70: general biology (BIOL 161, BIOL 162) or microbiology (MICROM 301, MICROM 302), general physics (PHYS 114, PHYS 117, PHYS 115, PHYS 118), general psychology (PSYCH 101), general chemistry (CHEM 120), human anatomy (B STR 301), physiology (BIOL 118).

Completion of the University writing and reasoning requirements (5 credits of English composition and 5 credits of quantitative and symbolic reasoning with a minimum grade of 2.0; two additional writing courses totaling a minimum of 10 credits with a minimum grade of 0.7; and the College of Arts and Sciences Areas of Knowledge requirements (20 credits in Visual, Literary & Performing Arts, 20 credits in Individuals and Societies, and 20 credits in the Natural World). Courses listed above may apply to Areas of Knowledge requirements.

Postbaccalaureate (fifth-year) students are exempt from the writing and reasoning requirements but not from the Areas of Knowledge requirements.

Admission to the program is competitive based on scholastic achievement, written skills, references and involvement in activities or work related to the health professions.

Departmental Application Deadline: February 15 for entry Autumn quarter.

Major Requirements

90 credits as follows:

Courses: The following courses must be taken in the scheduled sequence beginning autumn quarter only at the University of Washington: REHAB 340, REHAB 341, REHAB 342, REHAB 343, REHAB 400, REHAB 401, REHAB 402, REHAB 403, REHAB 414, REHAB 420, REHAB 421, REHAB 423, REHAB 424, REHAB 427, REHAB 428, REHAB 430, REHAB 442, REHAB 444, REHAB 445, REHAB 451, REHAB 452, REHAB 448, REHAB 499; CONJ 480.

Grade Requirements: A student must maintain a minimum cumulative program GPA of 2.50, and “credit” grades in all courses that are graded credit/no credit, to maintain good standing in the program and be eligible for graduation. A minimum grade of 2.0 is required in each course. A grade below 2.0 in a required course must be repeated at the next offering with a minimum grade of 2.0 received in the repeated course.

Continuation Policy: If at any point the cumulative grade point in the curriculum courses falls below 2.50, the student is placed on academic probation. In order to be taken off probation, the student must achieve a cumulative grade point average of 2.50 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his/her probation status, he/she is subject to dismissal from the program.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The prosthetics-orthotics degree is recognized as a broad, undifferentiated degree requiring the acquisition of general knowledge and basic skills in applicable domains of medicine. The educational process of a prosthetist-orthotist includes the assimilation of knowledge, acquisition of technical skills, and development of judgment through patient care experiences in preparation for independent analysis and problem solving required in clinical practice. Prosthetists and orthotists are employed in private practices and hospitals. There are also a limited number of opportunities in research positions throughout the country.

Upon successful completion of the prosthetics and orthotics program, the student will have learned the skills necessary to function as an entry-level resident in prosthetics-orthotics, and is awarded a Bachelor of Science degree by the University of Washington School of Medicine. The practitioner program is accredited through the Commission on Accreditation of Allied Health Education Programs (CAAAHEP).

The degree in prosthetics-orthotics gives the student eligibility to enter a one-year clinical residency for each discipline at a National Commission on Orthotics and Prosthetics Education (NCOPE) approved site. This residency requirement must be completed for eligibility to apply for the National Certification Boards administered by the American Board for Certification in Orthotics and Prosthetics, Inc.

- Instructional and Research Facilities: Much of the didactic and patient clinical instruction occurs in the ninth-floor classroom areas in the “BB” wing of the Health Sciences Building. A student fabrication laboratory on the eighth floor of the Health Sciences Building accommodates the technical laboratory components of the curriculum.

Students are placed throughout the curriculum in eighteen facilities in the surrounding Seattle area for their required 500 hours of clinical experience.

- Honors Options Available: None
- Research, Internships, and Service Learning: None available
- Department Scholarships: None offered
- Student Organizations/Associations: None

Post-Professional Programs

The Master of Science in Rehabilitation Medicine has three primary pathways: occupational therapy, physical therapy, and rehabilitation medicine. This program is designed for rehabilitation practitioners who want to pursue a program of coursework and research to enhance their professional growth. Additional information may be found at the program’s Web site (depts.washington.edu/rehab/education).

Master of Science, Rehabilitation Medicine (Occupational Therapy Pathway)

This degree program is designed to prepare occupational therapists to discuss rehabilitation science, models of disability, and/or theory and frames of reference relating to occupational therapy; to design and conduct research; to provide instruction, and to administer occupational therapy services or provide a higher level of clinical service. Independent-study options and electives offer flexibility,
allowing the student to meet individual objectives. Completion of a data-based thesis is required. Full-time students generally complete the course work in four quarters. The additional time to complete the thesis requirement varies.

Admission Requirements: An applicant for admission must be a graduate of an approved occupational therapy program and must be certified to practice by the American Occupational Therapy Certification Board. A minimum of one year of professional experience is desirable. Detailed information about the program is available from the Division of Occupational Therapy Curriculum Office at 206-598-5392 or from the Web site (depts.washington.edu/rehab/education/ot.shtml).

Graduation Requirements: All students must satisfactorily complete: (1) a minimum of 36 credits, including specific core courses; (2) all Graduate School requirements for a master’s degree; and (3) a data-based thesis contributing to the knowledge base in occupational therapy.

Master of Science, Rehabilitation Medicine (Physical Therapy Pathway)

This degree program is designed to prepare physical therapists to advance to a career in teaching and administration within the field. The curriculum emphasizes preparation for research and contribution to the professional literature; therefore, a thesis is a requirement of this plan. Opportunities are provided to enhance specialized knowledge and skill in selected content areas of physical-therapy practice. Depending upon the student’s educational goals and prior accomplishments, the program should require one to two calendar years for completion.

Admission Requirements: Selection for admission to the Master of Science degree program (physical-therapy pathway) is based on an assessment of intellectual capacity, basic professional competence, promise for future contributions to the field, and availability of the program (due to funding limitations, the program is not offered every year). Students must have completed a baccalaureate degree and an accredited physical-therapy program with a minimum cumulative GPA of 3.00, based on a four-point scale, in all college work. Detailed information on program and admission requirements is available from the Division of Physical Therapy Curriculum Office, 206-598-5333; or email gleep@u.washington.edu.

Graduation Requirements: All students must satisfactorily complete (1) a minimum of 36 credits, including specified core courses; (2) all Graduate School requirements for a master’s degree; and (3) a data-based thesis contributing to the knowledge base in physical therapy.

Master of Science, Rehabilitation Medicine (Rehabilitation Medicine Pathway)

This degree program is designed to prepare physicians, specifically physiatrists, as academicians in the field of physical medicine and rehabilitation. In addition to core course work in relevant medical sciences, an emphasis is placed on developing skills toward the goal of conducting independent or collaborative research projects.

Admission Requirements: An applicant for admission must be a physician from an approved medical school and must be concurrently enrolled, or have completed, an approved residency program in physical medicine and rehabilitation.

Graduation Requirements: All students must complete (1) a minimum of 36 credits, including specific core courses; (2) all Graduate School requirements for a master’s degree; and (3) a data-based thesis contributing to the knowledge base in physical medicine and rehabilitation.

Course Descriptions

REHAB 300 Introduction to Occupational Therapy (1)
Introduction to occupational therapy profession. Provides historical perspectives, theoretical foundations, and clinical case studies in various practice arenas. Credit/no credit only. Offered: Asp.

REHAB 340 Spinal Orthotics (5) Yamane
Instruction and review of anatomy and biomechanics of the spine, patient evaluation, and prescription considerations as related to spinal orthotics. Lectures provide background knowledge of orthotic treatment principles for spinal pathologies. Laboratory experience includes patient evaluation, impression and measurement techniques, fabrication methods, and fitting criteria. Required for prosthetics and orthotics majors.

REHAB 341 Upper Extremity Prosthetics I (4) Okumura
Principles of upper extremity prosthetic management and prescription considerations: functional evaluation, preprosthetic care, use of prosthetic components and materials, fabrication, harnessing, prosthetic training, documentation, and billing. Incorporates anatomy, biomechanics, and patomechanics with clinical experience as they pertain to upper extremity prosthetics. Required for prosthetics and orthotics majors.

REHAB 342 Upper Extremity Prosthetics II (4) Okumura
Principles of upper extremity prosthetic management and prescription considerations: functional evaluation, preprosthetic care, use of prosthetic components and materials, fabrication, harnessing, prosthetic training, documentation, and billing. Incorporates anatomy, biomechanics, and patomechanics as they pertain to upper extremity prosthetics. Required for prosthetics and orthotics majors. Prerequisite: REHAB 341.

REHAB 343 Upper Extremity Orthotics (2-4, max. 4) Okumura, Yamane
Lecture and laboratory instruction in patient evaluation, prescription considerations, componentry, and fabrication procedures for upper extremity orthoses. Required for prosthetics and orthotics majors.

REHAB 400 Medical Science (4) Kanny, Powell
Lectures in fields related to: general surgery, obstetrics and gynecology, internal medicine, neurology, rehabilitation medicine, orthopaedics, psychiatry and behavioral sciences, rheumatology, and pediatrics. Required for occupational therapy, prosthetics and orthotics, and physical therapy students. Credit/no credit only.

REHAB 401 Medical Science (4) Ferguson, Powell
Lectures in fields related to: general surgery, obstetrics and gynecology, internal medicine, neurology, rehabilitation medicine, orthopaedics, psychiatry and behavioral sciences, rheumatology, and pediatrics. Required for occupational therapy, prosthetics and orthotics, and physical therapy students. Credit/no credit only.

REHAB 402 Medical Science Laboratory (1, max. 2)
To introduce students to the role of allied health professionals in the treatment of pathologies presented in 400, 401 lectures. Credit/no credit only.

REHAB 403 Exercise Physiology for Rehabilitation Professionals (2) Anderson, Slimp
Normal and pathological physiology of the cardiovascular, respiratory, and musculoskeletal systems as a basis for evaluation and intervention in occupational therapy, physical therapy, and prosthetics/orthotics. Required for majors.

REHAB 413 Special Studies in Physical Therapy (1-15, max. 24)
Theory and practice in specialized areas of physical therapy. Credit/no credit only.

REHAB 414 Psychological Aspects of Rehabilitation (2) I&K Patterson
Psychological processes underlying adjustment to disability;
application of behavioral/analysis systems in patient therapy management; effects of cognitive or personality deficits on patient performance and treatment strategies. Credit/no credit only.

REHAB 416 Principles of Physical Therapy Administration
(2, max. 4) Guthrie, Jackins
The nature of administration, economic trends, operational policy, aspects of supervision, ethical and legal influences applicable to a physical therapy department. Required for physical therapy students. Credit/no credit only.

REHAB 420 Lower Extremity Prosthetics I (8) Ferguson
Instruction in patient evaluation, casting, cast modification, socket fabrication, static and dynamic alignment, alignment duplication, suspension systems, and documentation for transtibial amputation. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 421 Lower Extremity Prosthetics II (11) Ferguson
Instruction in transfemoral patient evaluation, casting, cast modification, socket fabrication, static and dynamic alignment, alignment duplication, suspension systems, and documentation. Methods of fitting through knee and hip disarticulation levels demonstrated. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 422 Lower Extremity Orthotics I (6) Yamane
Patient evaluation and prescription considerations for orthotic management of the lower extremity. Lectures provide instruction in the biomechanics of the lower extremity during ambulation, clinical indications and fitting criteria for a variety of orthotic devices. Laboratory sessions provide experience in fabrication principles, and impression and measurement techniques. Required for prosthetics and orthotics majors.

REHAB 423 Lower Extremity Orthotics II (8) Yamane
Orthotic treatment of pathological conditions that affect the knee and hip addressed. Focus is placed on development of prescription recommendation, fabrication, fitting, and follow-up of orthoses that support, assist, or stabilize the knee and hip. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 424 Lower Extremity Orthotics II (8) Yamane
Instruction in mechanical component substitution for functional motion. Anatomy of peripheral-vascular and peripheral-nervous systems. Required for prosthetics and orthotics majors; others by permission of instructor.

REHAB 425 Undergraduate Research (*)
Guided opportunity for in-depth study in specific areas of rehabilitation. Topics vary.

REHAB 426 Functional Musculoskeletal Anatomy (4) Guthrie
Functions of musculoskeletal system as applied to patterns of motion. Anatomy of peripheral-vascular and peripheral-nervous systems. Required for occupational therapy students, prosthetics and orthotics students, and physical therapy students; others by permission of instructor.

REHAB 427 Applied Prosthetics and Orthotics I (1-, max. 4) Guthrie
Patient evaluation and prescription considerations for orthotic management of the lower extremity. Lectures provide instruction in the biomechanics of the lower extremity during ambulation, clinical indications and fitting criteria for a variety of orthotic devices. Laboratory sessions provide experience in fabrication principles, and impression and measurement techniques. Required for prosthetics and orthotics majors.

REHAB 428 Applied Prosthetics and Orthotics II (1-4, max. 13)
Experience in patient management under the preceptorship of certified practitioners at clinical affiliation sites. Required for prosthetics and orthotics majors.

REHAB 429 Immediate Post-Operative and Early Fitting (2) Ferguson
Lecture and laboratory designed to introduce the student to the principles of immediate postsurgical prosthetic fitting, including patient management.

REHAB 430 Engineering Concepts (2)
Principles of mechanics and strength of materials, force analysis, and hydraulic control in relationship to orthotics and prosthetics design. Required for prosthetics and orthotics majors.

REHAB 442 Applied Kinesiology (4) Guthrie, Shumway-Cook
Study of joint motion and muscle function in relation to both the normal and abnormal state, emphasizing gait. Specific techniques employed in the field of rehabilitation medicine are analyzed. Required for Department of Rehabilitation Medicine students; others by permission.

REHAB 444 Functional Musculoskeletal Anatomy (4) Guthrie
Functions of musculoskeletal system as applied to patterns of motion. Anatomy of peripheral-vascular and peripheral-nervous system. Required for occupational therapy students, prosthetics and orthotics students, and physical therapy students; others by permission of instructor.

REHAB 445 Functional Musculoskeletal Anatomy (4) Guthrie
Functions of musculoskeletal system as applied to patterns of motion. Anatomy of peripheral-vascular and peripheral-nervous system. Required for occupational therapy students, prosthetics and orthotics students, and physical therapy students; others by permission of instructor.

REHAB 448 Applied Kinesiology Laboratory (1) Guthrie, Okumura, Powell, Yamane
Instruction and laboratory focus on practical experience and clinical problem solving in kinesiology. Potential topics include muscle and joint motion testing, sensory/perceptual assessment, prosthetic and orthotic devices, wheelchair use, gait training.

REHAB 451 Functional Anatomy Laboratory (1)
Study of musculoskeletal, peripheral-vascular, and peripheral-nervous systems from prospected material. Required for physical therapy, occupational therapy, and prosthetic/orthotic students.

REHAB 452 Functional Anatomy Laboratory (1)
Study of musculoskeletal, peripheral-vascular, and peripheral-nervous systems from prospected material. Required for physical therapy, occupational therapy, and prosthetic/orthotic students.

REHAB 458 Augmentative and Alternative Communication: Implementation Strategies (2-3) NW
Communication needs of nonspeaking individuals. Interdisciplinary approaches to the evaluation, selection, and implementation of aided and unaided communication augmentation systems. Recommended: basic course work in either SPHSC, OT, PT, or ENGR. Offered: jointly with SPHSC 453; irregularly, S.

REHAB 459 Augmentative and Alternative Communication: Access for Technology (3) NW
Communication technology and motor evaluation of augmentative and alternative users. Issues related to hardware, software, switch placement and access, with opportunities for clinical trials. Recommended: SPHSC 453 or REHAB 458. Offered: jointly with SPHSC 454.

REHAB 476 Prosthetic and Orthotic Evaluation and Use (2) Okumura
Instruction in mechanical component substitution for functional losses. Emphasis is on biomechanical principles, prosthetic-orthotic components, and alignment and fitting techniques. Credit/no credit only. Required for physical therapy students.

REHAB 496 Undergraduate Research (*)
Opportunity to design, perform, and analyze research investigation in problem areas in rehabilitation medicine. These include clinical and basic research problems in, for example, head and spinal injury, chronic disease, pain neurophysiology, electrodiagnosis, communication, and bioengineering.

REHAB 500 Clinical Clerkships in Physical Therapy (2, max. 8) Robinson
Observation, instruction, and supervised practice in treatment of
patients in diverse clinical settings. Emphasis is given to the application of previously learned material and skills to specific clinical problems. Required for physical therapy students. Credit/no credit only.

REHAB 501 Lifespan I: General Lifespan Development (2) Hicks
Provides professional physical therapy students an overview of typical human development across the lifespan, with particular emphasis on motor development. Serves as framework for understanding atypical development and the effects of disease and disability across the lifespan.

Provides an overview of pediatric physical therapy practices for children with atypical development. Assessment, development of physical therapy plans of care for children with various disabilities will be presented within the frameworks of family-centered-care and disablement models.

REHAB 503 Lifespan III: Geriatric Physical Therapy (3)
Theory and principles of exercise procedures used when treating the geriatric patient. Includes a discussion of age related changes in the systems essential to movement control; factors contributing to physical disability and frailty with aging; adaptation of assessment and treatment procedures to the geriatric patient. Lectures and laboratories.

REHAB 504 Physical Therapy Procedures I: Assessment (3)
McGough
Development of clinical competence in patient assessment techniques from a neuromusculoskeletal perspective. Discussion of normal and pathological findings. Lecture and laboratory format. Special emphasis on upper quadrant anatomy, posture evaluation, functional assessment, patient handling skills, and medical record documentation.

REHAB 505 Introduction to Pharmacology (2) Guthrie
Pharmacological survey of drugs commonly prescribed for clients seen in a physical therapy practice setting. Presentations on basic principles. Additional data search and group reports. Overview of medical emergencies. Credit/no credit only.

REHAB 506 Physical Therapy Procedures II: Assessment (2)
McGough
Development of clinical competence in patient assessment techniques from a neuromusculoskeletal perspective. Discussion of normal and pathological findings. Special emphasis on lower quadrant anatomy, posture evaluation, and medical record documentation skills. Lecture and laboratory format.

REHAB 507 Physical Therapy Procedures III: Modalities (3-4) McGough
Principles and practice of physical therapy clinical treatment procedures utilizing therapeutic modalities. Lecture and laboratory format.

REHAB 508 Physical Therapy Procedures IV: Therapeutic Exercise (5) Hicks
Theory, principles and practice of exercise procedures used for treatment purposes in physical therapy, including motor learning, variables of motor performance, and exercise prescription. Lectures and laboratories. Simulated patient problems.

Development of physical therapy treatment skills used in rehabilitation of severe neuromusculoskeletal dysfunction. Lecture and laboratory format.

REHAB 510 Rehabilitation Psychology (2) Jensen
Processes and management methods for assimilation of disability, enhancing patient participation in rehabilitation process, and for helping in maintenance of performance; behavioral management and case conference strategies; rehearsal of contingency management techniques. Required for residents; others by permission of instructor.

REHAB 511 Musculoskeletal IV: Clinical Management (5) VanBuuren
Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on upper quadrant anatomy. Lecture and laboratory format.

REHAB 512 Musculoskeletal V: Clinical Management (4) VanBuuren
Physical therapy clinical evaluation and management of patients with musculoskeletal dysfunction. Special emphasis on lower quadrant anatomy. Lecture and laboratory format.

REHAB 513 Special Studies in Physical Therapy (1-5, max. 15)
Theory and practice in specialized areas of physical therapy. Includes organization and administration of specialized programs, advanced evaluation and treatment techniques, role of the consultant. Credit/no credit only.

REHAB 514 Musculoskeletal VII: Advanced Assessment in Physical Therapy (3)
Development of advanced physical assessment skills to provide students with the ability to determine if a patient’s disorder is within the scope of practice for physical therapy or requires referral to another healthcare provider. Lectures and laboratory format, with an emphasis on the lab component. Credit/no credit only.

REHAB 515 Medical Information for Rehabilitation Counselors (3) Johnson
Lectures in medical science field regarding the etiology, prognosis, and physical restoration of common disabling conditions. Case studies are used extensively, and major emphasis is placed on vocational implications of physical disability. Prerequisite: permission of instructor.

REHAB 517 Physical Therapy Seminar (2-3, max. 21) Kartin
Group seminar format focused on physical therapy topics pertaining to transcurricular and professional practice issues. Credit/no credit only.

REHAB 518 Infants and Young Children: Current Research (3) Deitz, Swanson
Introduces students to recent research relating to assessment and intervention with infants and young children who are “at risk” or who are disabled. Critical evaluation of the current research emphasized. Prerequisite: clinical experience or coursework related to infants and young children with disabilities and permission of instructor.

REHAB 519 P-Preceptorship in Rehab Medicine (1)
Explores the field of physical medicine and rehabilitation. Students observe a physiatrist one half day each week, and gain understanding of the management of acute injuries, chronic disease, and disabilities. Offered: AWSpS.

REHAB 520 Seminar (1-5, max. 5)
Conferences, seminars, discussions of advanced physical medicine and rehabilitation topics for graduate students, residents and postdoctoral fellows in rehabilitation medicine. Lectures, discussion, and laboratory work in selected aspects appropriate to elected area of study for applicants for master-level degree.

REHAB 522 Neurophysiological Topics in Rehabilitation
REHAB 523 Neuroscience III: Applied Neurology (4)

Shumway-Cook

Theory and principles of advanced exercise procedures used when treating patients with neurologic pathology. Includes the application of principles of motor learning and control; facilitation and inhibition of variables affecting functional motor performance; adaptation of assessment and treatment procedures to patients with different types of neurologic impairments. Lectures and laboratories.

REHAB 527 Neuroscience IV: Physical Rehabilitation of Adult Neurological Disorders (2)

Hicks

Critical analysis and application of physical therapy assessment and treatment techniques to problems related to specific adult neurological disorders. Neurological disorders to be covered include stroke, spinal cord injury, traumatic brain injury, and multiple sclerosis.

REHAB 528 International Clinical Clerkship (2)

Short-term clinical education experience outside the United States. Participants work in a mentored relationship as part of a multidisciplinary rehabilitation team providing direct clinical services and consultation to patients and their care-givers. Sponsored sites selected and screened by Clinical Coordinator. Students may choose area of clinical focus. Credit/no credit only.

REHAB 529 Professional and Practice Issues in Physical Therapy (2)

Augments the student’s understanding of the profession and current issues in healthcare. Includes healthcare delivery, scope of practice, professional organization, political activism, specialist certification, licensure, collaboration, therapeutic relationships, disclosure, privacy, and informed consent. Credit/no credit only.

REHAB 530 Medical Aspects of Vocational Counseling (2-3)

Johnson

Introduction to vocational implications of physical and emotional disabilities. Methods, counseling techniques, therapeutic modalities, community resources used in producing vocational assistance for persons with disabilities. Prerequisite: resident standing in rehabilitation medicine or permission of instructor.

REHAB 532 Clinical Affiliation for Rehabilitation Counselors (5-6)

Johnson

Under preceptorship of rehabilitation counseling staff, students counsel and evaluate patients with severe physical, emotional, or social problems; administer vocational testing; obtain placement on job stations; work with community resources for vocational/educational placement; and develop activity-oriented schedules. Prerequisite: permission of instructor.

REHAB 536 Patient Evaluation and Clinical Decision Making (1)

McGough, Robinson

General principles and practice of physical therapy patient evaluation and use of the clinical decision-making models. The application of patient management principles through examination techniques and documentation strategies. Lecture and laboratory format.

REHAB 537 Functional Mobility Skills (2)

McGough, Robinson

Principles and practice of physical therapy interventions related to functional mobility skills, including transfer training, wheelchair fitting, wheelchair mobility, gait training, and caregiver training. Lecture and laboratory format.

REHAB 538 Integumentary, Edema Management, and Circulatory Screening for PT (2)

McGough, Robinson

Principles and practice of physical therapy evaluation and interventions related to wound care, burn care, edema management, circulatory screening, and splinting applications. Lecture and laboratory format.

REHAB 539 Communication Disorders in Rehabilitation Medicine (1)

Yorkston

Overview of communication disorders secondary to central and peripheral nervous system impairment. Emphasis on facilitating identification of speech/language disorders with discussion of implications for rehabilitation.

REHAB 544 Functional Anatomy for Physiatrists (2)

Goldstein

Lectures and demonstrations to illustrate functional anatomy as applied by physicians in the practice of clinical rehabilitation. Intended to enhance functional assessments and to improve neuro/musculo/skeletal diagnosis and treatment through greater understanding of the underlying anatomy. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 545 Functional Anatomy for Physiatrists (-2)

Goldstein

Lectures and demonstrations to illustrate functional anatomy as applied by physicians in the practice of clinical rehabilitation. Intended to enhance functional assessments and to improve neuro/musculo/skeletal diagnosis and treatment through greater understanding of the underlying anatomy. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 546 Teaching Practicum in Occupational and Physical Therapy (1-3, max. 3)

Integration of knowledge and skills in teaching through teaching in the classroom or presentation of a minicourse, workshop, or in-service training series. Prerequisite: MEDED 520 and permission of instructor.

REHAB 550 Neuropsychology in Rehabilitation (2)

Bobardier, Ehde

Examination and management of patients with brain lesions, as well as an understanding of the consequences of such conditions. Prerequisite: graduate standing in rehabilitation medicine.

REHAB 555 P-Neuromuscular Electrodagnosis (2.5)

Kraft

Demonstration of fundamentals of electromyography and peripheral nerve stimulation followed by participation in clinical electrodagnosis examinations. Develops awareness of knowing when such procedures are indicated for patients and interpreting results rather than developing proficiency in performing these examinations. Prerequisite: HUBIO 560 and permission of instructor.

REHAB 565 Assistive Technology in Rehabilitation and School System Practice (3)

Introduction to the use of assistive technology in rehabilitation and special education. Content includes set-up and use of alternative input systems on microcomputers and applications of technology to neuromuscular retraining, augmentative communication, and facilitation of learning in the classroom. Prerequisite: familiarity with basic computer operations and permission of instructor.

REHAB 566 Special Topics in Rehabilitation (1-9, max. 14)

Philosophy and concepts in the interdisciplinary rehabilitation of persons with major disabilities, including advanced content in the rehabilitation theory and process of selected categories.

REHAB 567 Practicum in Rehabilitation (1-12, max. 24)

Specialized practicum experience in environment providing rehabilitation services. Practicum arrangements and permission by instructor.
REHAB 568 Biophysics as Applied to Physical Medicine (2)  
*Esselman*

Propagation and absorption characteristics of physical forms of energy used for treatment in physical medicine. Physiologic effects basic to prescription of the physical therapy modalities. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 570 Foundations of Occupational Therapy (5)  
*Powell*

An overview of the practice of occupational therapy, emphasizing the role of occupational performance in context, frames of reference, clinical reasoning, and purposeful activity. Introduces the diversity of occupational therapy practice environments through didactic and clinical experiences. Offered: A.

REHAB 571 Occupational Performance through the Life Span (4)  

Overview of human development as it relates to occupational performance and functional adaptation in the ages and stages of life from infancy through old-old age. Emphasis will be placed on environmental influences, activity, and occupational roles, tasks, and component behaviors as they relate to individuals in different ages and stages. Offered: W.

REHAB 572 Occupational Therapy Theory and Practice in Psychosocial Dysfunction I (5)  
*Engel-Knowles*

An overview of bodies of knowledge in psychosocial practice as related to occupational performance. Learning topics include major frames of reference, effects of psychosocial disorders on occupational performance (life activities), and occupational therapy evaluation and intervention skills. Lectures, reading, class discussions, role-playing, problem-based learning, and fieldwork comprise the learning experiences. Offered: S.

REHAB 573 Occupational Therapy in Community Practice (4)  
*Engel-Knowles*

Bodies of knowledge in occupational performance as they relate to the emerging area of community-based practice. Includes traditional and evidence based practice in the realms of health promotion, prevention, evaluation, and intervention. Lectures, assigned readings, class discussions, role playing, site visits, films, laboratory exercises, and problem-based learning tutorials. Offered: Sp.

REHAB 574 Occupational Therapy Theory and Practice in Physical Disabilities I (6)  
*Dudgeon*

Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches. Offered: A.

REHAB 575 Occupational Therapy Theory and Practice in Physical Disabilities II (5)  
*Powell*

Provides theoretical bases and clinical practice skills used in evaluation and intervention of occupational performance (life activities). Focus is on individuals with sensorimotor (physical) and/or cognitive impairments. Practical applications of theory occur through lecture, laboratory, and problem-based learning approaches. Offered: W.

REHAB 576 Occupational Therapy Theory and Practice in Pediatrics (1-7, max. 7)  
*Dietsch*

Provides knowledge and skills necessary for providing occupational therapy evaluation, intervention, and transition services focused on occupational performance (life activities) for children and teens with disabilities and their families. Offered: W.

REHAB 577 Occupational Therapy Theory and Practice in Geriatrics (5)  
*Powell*

Occupational therapy evaluation and intervention with older adults.

Covers psychology, physiology, and socio-demographics of aging. Emphasis on interaction skills with the elderly and occupational performance (life activities). Laboratory experiences and fieldwork in the practice setting enhance didactic coursework. Offered: Sp.

REHAB 578 Occupational Performance Analysis (3)  
*Dudgeon*

Skills in the analysis, adaptation, and sequencing of therapeutic and functional activities as they apply to occupational performance. Analysis focuses on performance components (sensorimotor, cognitive, psychosocial, psychosocial, psychological), temporal aspects (chronological, developmental), and environmental aspects (physical, social, cultural). Offered: S.

REHAB 579 Therapeutic Communication (3)  
*Engel-Knowles*

Introduces basic principles and skills of effective interpersonal communication in dyadic interactions and in groups. Emphasis on effective listening, interviewing, and principles and concepts of occupational therapy groups. Lectures, readings, class discussions, role playing, and in-class exercises comprise the learning experiences. Offered: Sp.

REHAB 580 Introduction to Research in Rehabilitation (3)  
*Deitz*

Evaluation of rehabilitation research literature and design of research studies relevant to rehabilitation. Offered: S.

REHAB 581 Application of Measurement Systems (3)  
*Deitz*

Provides basis for critically evaluating and using tests and measurements in occupational therapy evaluation. Focus on reliability, validity, norms, test development process, statistics relevant to tests and measurement, and ethical implications of testing. Critical evaluation of selected standardized test used in occupational therapy. Offered: A.

REHAB 582 Assistive Technology in Rehabilitation (3)  
*Dudgeon*

Overview of the field of assistive technology as it impacts occupational performance in self-care, work, and leisure activities. Covers interface devices, computer applications, environmental controls, augmentative communications, power mobility, seating and positioning systems, and sensory enhancements. Offered: W.

REHAB 584 Health-Care Trends and Issues (3)  
*Kanny*

Overview of the health services system in the United States and current trends and issues facing occupational therapists within this system. Content includes: health service providers, reimbursement of health care services, regulation, personnel and role delineation, and health policy and advocacy. Offered: A.

REHAB 585 Leadership: Administration and Management (4)  
*Kanny*

Provides student with knowledge and skills needed for leadership positions in occupational therapy practice. Focuses on administration and management functions including strategic planning, program planning, marketing, fiscal management, program evaluation, and personnel management. Offered: W.

REHAB 587 Industrial Rehabilitation (3)  
*Dudgeon*

Provides knowledge and skills related to vocational assessment and industrial rehabilitation for individuals with medical or psychosocial problems. Emphasizes worker characteristics, job analysis, and accommodation in business and industrial settings. Clinical simulation components provide applications to specific diagnostic, impairment, or disability conditions. Offered: Sp.

REHAB 591 Master’s Project (1-4, max. 7)  

Graduate project focused on research, administration, education, practice, policy, or other scholarly or creative work. Required of graduate, entry-level occupational therapy and physical therapy students. Offered: AWSpS.
REHAB 592 Principles of Orthotic Use in Rehabilitation (2) Chang
General principles and clinical applications of orthoses in patient management, with exposure to research issues in orthotic design.

REHAB 593 Principles of Prosthetic Use in Rehabilitation (1) Czerniecki
General principles of prevention of amputation, prosthetic design, biomechanics, and clinical applications of upper and lower extremity prostheses.

REHAB 594 Clinical Fieldwork in Occupational Therapy (10, max. 20) Rollinger
Six months of supervised fieldwork education. Experience in delivering occupational therapy services to clients focusing on application of purposeful and meaningful occupation. Exposure to a variety of clients across the lifespan and in a variety of settings reflective of current practice in the profession. Credit/no credit only. Offered: AWSpS.

REHAB 595 Clinical Affiliation in Physical Therapy ((2-10)-, max. 30) Robinson
Clinical practice of physical therapy techniques under supervision in community-based clinics. Credit/no credit only.

REHAB 596 Electromyography and Clinical Neurophysiology (4) Kraft
Didactic course covering electromyography and clinical neurophysiology. First part covers basic neurophysiology and second covers electromyography, nerve conduction studies, somatosensory-evoked potentials, residual- and auditory-evoked potentials, single fiber EMG, late response, quantitative analysis, and macro EMG. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 597 Electromyography and Electrodiagnosis Laboratory (1-) Kraft
Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 598 Electromyography and Electrodiagnosis Laboratory (-1-) Kraft
Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 599 Electromyography and Electrodiagnosis Laboratory (-1-) Kraft
Elective work in clinical electromyography and other electrodiagnostic methods. Prerequisite: resident standing in rehabilitation medicine; others by permission of instructor.

REHAB 600 Independent Study or Research (*) Credit/no credit only.

REHAB 685 P-Chronic Disease and Disability (4) Cox, Hays
Meets chronic-care requirement for medical students. Structured clinical experience on rehabilitation medicine services. Differences between acute and chronic medicine, identification of disability problems, and therapeutic techniques for removing disability. Hospitals are within University system, local area, and WWAMI area. Prerequisite: third-year medical student standing.

REHAB 686 P-Rehabilitation Medicine Clerkship — Pediatrics (8/12) Hays, Jaffe, Massagli
Meets chronic-care requirement for medical students. Incorporates material of 685 and expands into disabling pediatric disease. School planning, family counseling, community support services included. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for students contemplating pediatrics. Prerequisite: third-year medical student standing.

REHAB 687 P-Rehabilitation Medicine Clerkship (8/12) Hays
Meets chronic-care requirement for medical students. Incorporates material of 685 and expands into disability problems. Four- or six-week package permits inpatient, outpatient, and consultation experience. Recommended for careers in family medicine, internal medicine, rheumatology, cardiology, neurology, geriatrics, orthopedic surgery, neurosurgery, and cardiovascular surgery. Prerequisite: third-year medical student standing.

REHAB 689 P-Spinal Cord Injury (8/12) Little
Introduction to diagnosis, management, rehabilitation of patients with spinal-cord injuries. Interaction with rehabilitation team, psychologists, and subspecialists in urology, neurosurgery, and plastic surgery. Performance at subintern level expected. Veterans Administration Medical Center only. Prerequisite: MED 665, SURG 665.

REHAB 695 P-Rural Rehabilitation Medicine Clerkship (8) Hays
Structured clinical experience in identification and treatment of disability problems in rural (nonmajor urban) communities. Satisfies chronic care/rehabilitation medical graduation requirements. Prerequisite: completion of at least six months of clinical clerkships, permission of instructor.

REHAB 697 P-Rehabilitation Medicine Special Elective (*, max. 24)
Equivalent to 686, 687, or 688. Satisfies requirements in rehabilitation medicine/chronic care. Student arranges with another university, using the “Special Assignment Form.” Students can qualify after review, similar experience at another university. Prerequisite: permission of instructor.

REHAB 699 P-WWAMI Rehabilitation Medicine Special Electives (*, max. 24)
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

REHAB 700 Master’s Thesis (*) Credit/no credit only.

Surgery
BB487 University of Washington Medical Center

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department’s clinical activities, including but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients.

Course Descriptions

SURG 498 Undergraduate Thesis (*) Langdale
Offered to those students who have engaged in undergraduate research in general surgery. (Full- or part-time.)

SURG 499 Undergraduate Research (*) Langdale
Provides an opportunity to participate in ongoing research projects or carry out an independent research project under supervision of Department of Surgery faculty. Practical experience in experimental design and execution is provided under direct supervision of selected
Surgical conditions peculiar to the particular age group with a preference for certain age groups. Prerequisite: SURG 665. (Four or six weeks. Limit: two students.)

SURG 600 Independent Study or Research (*) Langdale

SURG 630 P-WRITE Surgery Clinical Clerkship (*, max. 24)
Basic clinical clerkship for students enrolled in the WRITE Program. Prerequisite: completion of basic curriculum; third- and fourth-year students; acceptance in the WRITE program.

SURG 665 P-Clinical Clerkship (*, max. 12) Langdale
(St. Joseph’s Hospital, Providence Medical Center, University of Washington Medical Center, Veterans Affairs Medical Center, Harborview Medical Center, Providence Medical Center, University of Washington Medical Center, Veterans Affairs Medical Center)
Diagnosis and management of problems amenable to surgical therapy. Physiological basis of surgical care, differential diagnosis and decision making, and the basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Prerequisite: HUBIO 563. (Six weeks. Limit: twenty students.)

SURG 666 P-Clinical Clerkship Boise (12)
Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery. Prerequisite: completion of HUBIO series. (Six weeks. Limit: two students.)

SURG 667 P-Clinical Clerkship Spokane (12)
Diagnosis and management of surgical problems. Physiological basis of surgical care, differential diagnosis and decision-making, and basic principles of surgical management. Care of inpatients and outpatients, including participation in the operating rooms. Fulfills graduation requirement for Surgery. Prerequisite: completion of HUBIO series.

SURG 680 Emergency Medicine Elective (8)
Basics of emergency medicine, including the primary survey, secondary survey, and approach to the critically ill patient. Students supervised by emergency boarded staff physicians at Madigan Army Medical Center Emergency Department. Prerequisite: basic clerkship in medicine, surgery, obstetrics, or pediatrics.

SURG 681 P-Peripheral Vascular Disease (4/8, max. 8) Clowes
(Veterans Affairs Medical Center)
Peripheral arterial and venous problems, including methods of clinical evaluation; new diagnostic procedures; and the available methods of treatment. Patient workup, performance of diagnostic studies, and presentation of case material to the staff. Prerequisite: SURG 665, HUBIO 563. (Two or four weeks. Limit: one student.)

SURG 682 P-Clinical Burn Care (*, max. 12) Heimbach
(Harborview Medical Center)
Offered on the burn unit of Harborview Medical Center. Exposure to the care of patients with thermal injury, including management of severe metabolic and septic problems and opportunity to participate in surgical procedures. Exposure to plastic and reconstructive surgery. Prerequisite: SURG 665. (Four or six weeks. Limit: two students.)

SURG 683 P-Pediatric Surgery Externship (8/12) Tapper
(Children’s Hospital and Regional Medical Center)
Surgical conditions peculiar to the particular age group with a preponderance of congenital and neoplastic conditions that are amenable to surgical treatment. A reasonable background of knowledge in human embryology and genetics is recommended. Prerequisite: SURG 665. (Four or six weeks. Limit: two students.)

SURG 684 P-Trauma and Emergency Care (*, max. 16)
Copass, Eisenberg (Harborview Medical Center, University of Washington Medical Center)
Register for one or both segments of this course. Segment 1: emergency medicine and trauma at Harborview Medical Center with assignment to the emergency department. Emphasis on management of severely injured and critically ill patients. Segment 2: acute medicine at University of Washington Medical Center. Evaluate and treat ambulatory emergencies. Prerequisite: SURG 665, MED 665. (Four weeks, third-year and fourth-year students. Limit: twelve students at Harborview Medical Center; three students at University of Washington Medical Center.)

SURG 685 P-Cardiothoracic Surgery Externship (*, max. 12)
Verrier (University of Washington Medical Center)
Serve as subintern, participate in patient care while learning cardiopulmonary hemodynamics of cardiac and thoracic surgery. Observe a wide variety of both cardiac and thoracic disease entities. Participate in the open-heart procedures in the operating room. Opportunity to gain additional understanding of physiology of cardiopulmonary bypass. (Four or six weeks. Limit: two students.)

SURG 686 P-Plastic Surgery Clerkship and Preceptorship (*, max. 12)
Vedder (University of Washington affiliated hospitals)
Introduces fundamental techniques and enhances knowledge of plastic surgery, wounds, trauma, burns, cancers, and pediatric and adult cosmetic and reconstructive surgery. Participate in all surgery-related activities. Prerequisite: SURG 665; MED 665. MS III only, two weeks, 4 credits, limit 2; MS III/IV four/six weeks (recommended), 8/12 credits, limit 4.

SURG 687 P-Transplantation Surgery Clerkship (8) Perkins
(University of Washington Medical Center)
Clerkship is in the University regional multi-organ transplantation center. Student participates fully in the care of all transplant patients, on twice daily multidisciplinary rounds, in pre-operative conference, and in the operating room and on the donor harvest team. Weekly didactic teaching sessions. Prerequisite: SURG 665 and MED 665. (Four weeks. Limit: two students.)

SURG 688 P-Subinternship in General Surgery (*, max. 16)
Langdale (Veterans Affairs Medical Center, Harborview Medical Center, Providence Medical Center, University of Washington Medical Center)
Offered on the general surgery wards of the University-affiliated hospitals. Diagnosis, preoperative care, and postoperative care; management of surgical emergencies, the ICU patient, and outpatient follow-up of discharged patients. Students function at the intern level under close supervision of the staff and house staff. Prerequisite: SURG 665. (Four or six weeks. Limit: six students.)

SURG 689 P-Community Surgery Clerkship (8) Langdale
Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a group practice in a smaller city. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department. (Four weeks. Longview. Limit: one student. Coeur d’Alene. Limit: one student.)

SURG 690 P-Alaska Native Medical Center Surgery Sub-Internship (8/12) Langdale
Designed to supplement basics learned in 665. Excellent opportunity to participate in general, thoracic, vascular, and plastic surgery in a specialized population of patients. Recommended for students entering primary care. Prerequisite: SURG 665 and permission of department. (Four or six weeks. Alaska Native Medical Center, Anchorage. Limit: one student.)
SURG 691 P-Surgical Intensive Care Unit Sub-Internship (8)  
Langdale  
Designed to augment experience gained in 665. Excellent opportunity to participate in the management of critically ill patients under the close supervision of the staff/ house staff. Recommended for students entering surgery or primary care. Prerequisite: SURG 665. (Harborview Medical Center. Limit: two students. Veterans’ Affairs Medical Center. Limit: one student.)

SURG 692 P-Ambulatory Surgery Clerkship (4)  
Waldhausen  
Rotation focuses on increasing the student’s ability as a primary care physician to recognize and form an initial plan of management for common surgical problems seen in the outpatient setting. Offered: AWSpS.

SURG 697 P-Surgery Special Electives (*, max. 24)  
Langdale  
Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean’s office a special assignment form at least one month before preregistration. Prerequisite: SURG 665 and departmental permission. (Four, six, or twelve weeks.)

SURG 698 P-Clinical Clerkship Away (*, max. 24)  
Clerkship equivalent to SURG 665, at sites outside the Seattle metropolitan area.

SURG 699 P-WWAMI Surgery Special Electives (*, max. 24)  
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

Urology  
BB1115 Health Sciences  
Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically, the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics, and open surgery. Medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at 206-731-3205 for further information.

Course Descriptions

UROL 498 Undergraduate Thesis (*)  
Provides an opportunity for medical students to write in the area of urology.

UROL 499 Undergraduate Research (*)  
The student participates in current urologic research projects under supervision of full-time staff. Certain specific problems may be elected by the student. Elective for medical students.

UROL 501 P-Urology Preceptorship (1)  
Individual experiences with one or more of the full-time department faculty members covering research, teaching, and patient care.

Students observe activities in the clinic, hospital ward, operating room, and research laboratories. Prerequisite: first- or second-year medical student standing; permission of instructor.

UROL 675 P-Urology Preceptorship (*, max. 8)  
Student follows a private practice preceptor in all of his or her work. Becomes acquainted with the office management of urological problems. Prerequisite: UROL 680, HUBIO 562. (Two or four weeks.)

UROL 680 P-Urology Clerkship (*, max. 8)  
Berger, Ellis, Grady, Krieger, Lange, Mayo, J. Miller, L. Miller, Mitchell, Penson, Porter, Takayama, Wessells  
Full activities of clinical service. Basic principles of urology emphasized. Prerequisite: HUBIO 562. (Two or four weeks.)

UROL 681 P-Female Urology (4)  
J. Miller, L. Miller  
Observation of cases of lower urinary tract disorders specific to women, emphasizing behavioral management and multidisciplinary care. Ninety-five percent of cases observed are women. Not intended as the only exposure to urology for students considering urology as career choice. Prerequisite: third- or fourth-year standing and permission of instructor.

UROL 685 P-Urology Subinternship (*, max. 12)  
Berger, Ellis, Grady, Krieger, Lange, Mayo, J. Miller, L. Miller, Mitchell, Penson, Porter, Takayama, Wessells  
Subintern is responsible for patient workups and for preoperative and postoperative care and participates in the operating room. Prerequisite: MED 665 or pediatrics basic clerkship, or permission of instructor.

UROL 690 P-Urology Specialties (*, max. 8)  
For those who wish further exposure to a specific aspect of urology. Students can spend time with one attending at University of Washington Medical Center, Harborview Medical Center, Children’s Hospital and Medical Center, or Veterans Administration Hospital studying oncology, infections, infertility, stone disease, impotence, or other aspects of urology. Prerequisite: UROL 680 and permission of instructor.

UROL 697 P-Urology Special Electives (*, max. 24)  
Special clerkship, externship, or research opportunities can at times be made available at institutions other than the University of Washington. Students wishing to elect this course should obtain from the Dean’s office a special assignment form at least one month before preregistration. Prerequisite: permission of instructor. (Six or twelve weeks.)

UROL 699 P-WWAMI Urology Special Electives (*, max. 24)  
By special arrangement for qualified students, special clerkships or externships may be available at institutions other than the University of Washington located within the WWAMI region. Prerequisite: permission of department.

School of Nursing

T310 Health Sciences  
Dean  
Nancy F. Woods

T318 Health Sciences  
Associate Deans  
Ruth F. Craven, Educational Outreach
Pamela H. Mitchell, Research
Susan L. Woods, Academic Services

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve
the highest level of wellness possible. Nurse practitioners fill critical health care needs in both urban and rural settings, often for portions of the population who have not received adequate health care. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

Undergraduate Program

Adviser
T310 Health Sciences, Box 357260
206-543-8736
sonas@u.washington.edu

The School of Nursing offers the following programs of study:
- Bachelor of Science in Nursing degree with eligibility to take the licensure examination to become a registered nurse.
- A four-quarter modification of the basic curriculum is available for the registered nurse who is able to validate selected nursing courses through written examination and who intends to complete a master’s degree program. This B.S.N. completion program is available at UW Bothell and UW Tacoma.

Bachelor of Science in Nursing

Suggested First- and Second-Year College Courses: See below, under Admission Requirements.

Admission Requirements

Admission to the nursing major occurs once a year, for autumn quarter, with an application deadline of January 15. Selection is competitive.

Application

To be considered for admission, applicants must satisfy one of the following requirements at time of application.

- Three out of six prerequisite science courses completed with a minimum GPA in these three courses of 3.00
- Four out of six prerequisite science courses with a minimum GPA in these four courses of 2.80.

These six prerequisite courses are CHEM 120, CHEM 220, BIOL 118/BIOL 119, B STR 301, MICROM 301, and NUTR 300.

Together with the application and college transcript(s), applicants submit a personal statement; a resume outlining volunteer/paid health-care experience, community service, and cultural awareness; and a recommendation from a health care provider (employer or volunteer coordinator).

Applicants are expected to have 100 hours of health care experience in a paid or volunteer position in one setting for three months or more. The majority of applicants present health care experiences of several hundred hours for nine months or more.

After an initial review of all applications, some applicants are asked to attend a proctored essay session. The proctored essay dates are published in the admissions publication.

Eligible applicants are invited via email.

Entrance Requirements: Prior to beginning the nursing program in the autumn, students must meet the following requirements:

A minimum of 90 credits to include the following courses:

- Written communication (10 credits): English composition and W-courses.
- Problem-solving (8 credits): one QSR course, chosen from MATH 107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
- Visual, Literary, & Performing Arts (VLPA) (15 credits).
- Individuals & Societies (I&S) (15 credits): to include CHEM 120, CHEM 220, BIOL 118, BIOL 119, B STR 301, MICROM 301, and NUTR 300.
- Electives to complete 90 credits.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, contact the Office of Academic Services, School of Nursing, (206) 543-8736 or 1-800-759-NURS. Monthly information sessions are offered in the School of Nursing, Health Sciences Building T310, on the first Tuesday of each month from noon to 1 p.m. as well as evening sessions from 5:30 to 6:30 p.m. on the first Tuesday of January, May, September, and November.

Major Requirements

Students need a minimum of 180 credits to graduate with a bachelor’s degree from the University of Washington. The required credits in the nursing curriculum total 89; thus 91 credits must be earned through general education, nursing prerequisite, and elective courses.

Year One of Program

- Quarter 1 — Autumn
  - NCLIN 302 Practicum: Health Assessment (3 credits)
  - NCLIN 306 Practicum: Basic Skills of Nursing Practice (4)
  - NURS 304 Human Responses I (3)
  - NURS 301 Clinical Applications of Anatomy and Physiology (3)
  - NURS 309 Pharmacotherapeutics in Nursing Practice I (2)
  - TOTAL CREDITS: 15
- Quarter 2 — Winter
  - NURS 401 Care in Illness I (4)
  - NCLIN 402 Practicum: Care in Illness II (4)
  - NURS 308 Human Responses II (3)
  - NURS 310 Pharmacotherapeutics in Nursing Practice II (2)
  - NURS 313 Introduction to Nursing Informatics (1)
  - TOTAL CREDITS: 14
- Quarter 3 — Spring
  - NURS 405 Care in Illness II (5)
  - NCLIN 406 Practicum Care in Illness II (4)
  - NURS 303 Foundations of Professional Nursing (3)
  - NURS 407 Cultural Variation and Nursing Practice (3)
  - TOTAL CREDITS: 15

Year Two of Program

- Quarter 4/5* — Autumn
  - NURS 410 Legal and Ethical Issues in Clinical Practice (3)
  - NURS 415 Nursing of Families: Childbearing and Childrearing (5)
  - NCLIN 416 Practicum: Nursing of Families (4)
  - NMETH 403 Introduction to Research in Nursing (3)
  - NURS 410 Legal and Ethical Issues in Clinical Practice (3)
  - TOTAL CREDITS: 15

*Half of senior class completes courses listed
The School of Nursing offers graduate study leading to the degrees of Master of Nursing, Master of Science, and Doctor of Philosophy in nursing science. At the master’s level, programs are designed to meet the many needs of a diverse student body by providing opportunities for advanced study, practice, and research in nursing.

The Masters Entry Program in Nursing (M.E.P.N.) is a Master of Nursing (M.N.) option for students without previous nursing preparation who have a baccalaureate degree in a non-nursing field, and who wish to earn a Master of Nursing degree. It is a two part program. The first five quarters of M.E.P.N. are full time, provide a generalist foundation in nursing, and qualify the student to take the state RN licensure (NCLEX) examination. Once students have completed the first five quarters of M.E.P.N., they begin regular graduate course work in one of 18 M.N. focal areas (see below).

The Master of Nursing program develops increased competence in selected areas of advanced practice nursing. The following focus areas are available: adult acute-care nurse practitioner (cardiovascular/AIDS/oncology), adult/older adult nurse practitioner, advanced practice community-health systems nursing (cross-cultural nursing/occupational health nursing/healthy aging/communities for youth, rural health), advanced practice in care systems management, advanced practice forensic nurse specialist, adult nurse practitioner and home care, advanced practice genetics nursing, advanced practice options in bio-behavioral nursing, family-centered pediatric nursing, infectious disease nurse practitioner, nurse midwifery, perinatal nursing/neonatal nurse practitioner, psychiatric-mental health nurse practitioner, family nurse practitioner, pediatric nurse practitioner, adult and women’s health nurse practitioner, rural adult nurse practitioner, and an independent M.N. Research is an integral part of all programs. A thesis is required in the Master of Science program. The Master of Nursing program provides the option of a thesis or non-thesis project. The School of Nursing offers two formal concurrent graduate degree program with the School of Public Health and Community Medicine: The M.N./M.P.H. and the M.N./M.H.A.

Part-time study is available in most focus areas of the M.N. program. Course work may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM). GNM status allows the student to earn up to 12 graduate-level credits which may be applied to a graduate program if the student is later admitted. Time limits for acceptance of courses taken as a GNM student are six years for a master’s degree and ten years for a doctoral degree from the first course to completion of the degree.

The Doctor of Philosophy in Nursing Science program prepares scientists capable of advancing nursing practice and education through research and scholarly activity. The program provides for rigorous research training designed for individuals interested in careers in academia or for other types of leadership positions in health-service agencies in which the ability to design, plan, and implement research in nursing is a significant expectation.

**Special Requirements**

In addition to the basic requirements for graduate status in the University, admission to MEPN, MN, or MS programs in the School of Nursing requires baccalaureate preparation either in nursing or in another major, a basic course in statistics, Graduate Record Examination scores, a criminal history background check clearance, a resume, an admissions essay, and three references. Licensure as a registered nurse is required for application to the M.N. program. At least one year of practice is recommended for most clinical focal areas of the M.N. program.

Admission requirements for the doctoral program include Graduate Record Examination scores, a criminal history background check clearance, three references, a statement of goals for doctoral study which includes a description of area-of-research interest, and an example of scholarly work.

Admission is usually for autumn quarter. The application deadline for MEPN is October 15. The application deadline for the M.N., M.S., and Ph.D. programs is February 1. Early application is
Financial Aid
A limited number of nurse traineeships are available for premaster’s study. Other financial aid is available on a limited basis. Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to predoctoral students.

Contact the Academic Services Office, School of Nursing, for current information.

Nursing

Course Descriptions

NSG 501 Teacher Practice Essentials-Models of Teaching & Learning (3)
Integrative approach to understanding teaching learning that explores how various educational models and principles frame the processes of teaching and learning. Focus toward advanced practice nurses interested in teaching. Prerequisite: permission of instructor and graduate student status.

NSG 502 Advanced Teacher Practice Essentials-Expertise in Teaching (3)
Critical analysis of how educational models and principles frame teaching to promote expertise in practice. Aimed toward advanced practice nurses interested in teaching. Builds and expands content of NSG 501. Prerequisite: NSG 501 and graduate student status.

NSG 503 Advanced Teacher Practice Essentials-Diverse Learners (3)
Focus on relevance and inclusiveness of addressing diversity of learners within teaching and learning activities. Aimed toward advance practice nurses interested in teaching. Further expands content of NSG 501 and NSG 502. Prerequisite: NURS 501 and graduate student status.

NSG 504 Advanced Teacher Practice-Challenges in Teaching (3)
Focus on challenges facing educator during teaching encounters. Addresses influence of belief structures on learner’s motivation for change. For advance practice nurses interested in teaching. Prerequisite: NSG 501 and graduate student status.

NSG 506 Organizing and Administering Industrial Safety and Health Programs (4)
Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with ENV H 560; A.

NSG 507 Technical Aspects of Safety and Health (3)
Explores specific hazards associated with major industries, as well as hazards common to all industries. Covers machine guarding, electrical safety, systems safety analysis, materials handling, and working at heights. Offered: jointly with ENV H 562; W.

NSG 508 Introduction to Ergonomics (3)
Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with ENV H 566/IND E 566; W.

NSG 509 Pathophysiology for Advanced Practice Nursing (1)
Synchronous Web pathophysiology class addresses immune and inflammatory responses with related content on infections and atherosclerosis. Focus on understanding the physiologic/pathophysiologic basis for disease processes and the relationship of various treatment modalities to these concepts. Prerequisite: Recent (within 5 yrs.) upper division anatomy/physiology course or permission of instructor.

NSG 510 Assessment and Management of Neonatal Problems (5)
Focus on pathophysiology of disease processes, assessment, diagnosis, and management of common health problems experienced by term and preterm neonates in neonatal intensive care settings. Includes foundations for clinical decision making for neonatal nurse practitioners and examination of interdisciplinary roles. Prerequisite: NURS 514.

Nursing

Course Descriptions

NURS 200 Critical Approach to Women’s Health (3)
Interdisciplinary examination of women’s health from a critical social-political approach. Discusses issues of gender, race, class, heterosexism, etc. in relation to women’s health policies.

NURS 201 Growth and Development Through the Life Span (5)
Focuses on processes of human growth and development from prenatal life to old age. Emphasizes influence of growth and development on achievement of health, and how awareness of growth and development theory and research helps guide health promotional efforts directed toward persons of various ages and life styles. Open to nonmajors.

NURS 202 Difference and Identity on University Campus (5)
Allen
Novels, autobiographies, films, and music are used to explore how American who are seen as white are characterized by people who are seen as non-white. Since many freshmen find campus life more socially diverse than their home communities, the focus is on young adults and college environments.

NURS 301 Clinical Applications of Anatomy and Physiology (3)
Application of anatomic and physiologic concepts to selected clinical phenomena. Focuses on integrated responses and functional health patterns. Exemplars of developmental and lifespan factors are identified. Includes experiential activities to enhance integration of content. Offered: A5.

NURS 303 Foundations of Professional Nursing (2-3)
Exploration of the profession of nursing, including past and present work of nurses, the experience of being ill and seeking health care, and the U.S. health care system. Offered: Sp.

NURS 304 Human Responses I (3)
Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these concepts in the assessment and management of patient problems. Offered: A.

NURS 308 Human Responses II (3)
Examines normal and pathophysiological responses to states of health and illness. Examines internal and external defense systems, balance and regulation of body systems, and integration of these
NURS 309 Pharmacotherapeutics in Nursing Practice I (2-)
Emphasizes the principles of pharmacology, drug therapy, pharma- 
cologic-therapeutic classes of drugs, clinically important prototype 
drugs, and drug information resources. Nursing issues related to drug 
adминистration are also discussed. First of a 2-quarter sequence. 
Offered: A.

NURS 310 Pharmacotherapeutics in Nursing Practice II (2-)
Emphasizes the principles of pharmacology, drug therapy, pharma- 
cologic-therapeutic classes of drugs, clinically important prototype 
drugs, and drug information resources. Nursing issues related to drug 
adминистration are also discussed. Second of a two-quarter sequence. 
Offered: W.

NURS 313 Introduction to Nursing Informatics (1)
Combines understanding of computers, information literacy, and 
nursing science into a field that assists health care professionals to 
provide quality care. Provides an introductory overview. Emphasizes 
development of computer skills and impact of informatics on the 
clinical arena. Credit/no credit only. Offered: WS.

NURS 401 Care in Illness I (5)
Selected psychopathologic and pathophysiologic health alterations 
and therapies across life span. Assesses human functioning, 
pathophysiology, pharmacology, psychosocial, cultural variation, 
health care resources, and person-environment relationships to 
select nursing strategies for acutely and chronically ill individuals 
of all ages. First of a two-quarter sequence. Offered: W.

NURS 405 Care in Illness II (5)
Continuation of 401; further examining selected psychopathologic 
and pathophysiologic alterations in health of individuals in context 
of families across life span. Emphasizes assessing functioning in 
psychosocial, cultural, person-environment relationships, and health 
care resources to plan nursing strategies for acutely/chronically ill 
individuals of all ages.

NURS 407 Cultural Variation and Nursing Practice (3)
Analyzes the impact of cultural, social, and global factors on the 
health of multicultural and diverse groups at the individual, 
population, and systems levels. Students gain knowledge and skills to 
effectively respond to the health care needs of multicultural 
societies through non-discriminatory and culturally appropriate 

NURS 408 Nursing Care with Families in the Community 
(3)
Application of biopsychosocial and social environmental theories 
and assessments to diagnose alterations in health/mental health of 
families, small groups in community settings. Emphasizes interper- 
sonal and clinical therapies; coordination of community resources, 
evaluating effectiveness of changes; characteristics of nursing care 
in home visiting.

NURS 410 Legal and Ethical Issues in Clinical Practice (3)
Identification of ethical and legal issues and the ensuing dilemmas 
relevant to the profession of nursing and nurses as health profes- 
sionals and citizens. Selected problems and dilemmas affecting 
nurses, nursing, and the delivery of health care analyzed using 
specific moral-ethical perspectives. Offered: AW.

NURS 412 Health Care Systems (3)
Introduction to analysis of health care systems with emphasis on 
political economy of health, access and utilization, disparities in 
health, public and private health insurance and reimbursement issues. 
Comparison of U.S. and other national health care systems. Offered: Sp.

NURS 415 Nursing of Families: Childbearing and 
Childrearing (5)
Applies family concepts to nursing of childbearing and childrearing 
families. Focuses on family as context for care of individuals. 
Emphasizes use of physiological, psychological, developmental, 
cultural, and environmental theories for health promotion, disease 
prevention, and nursing therapeutics. Offered: AW.

NURS 417 Psychosocial Nursing in Health and Illness (3)
Examines psychosocial disorders/issues of life transitions from 
integrated perspective of biological, social sciences, nursing, and 
humanities. Emphasizes utilizing psychosocial nursing and interper- 
sional therapeutics for assessment, intervention, health promotion 
with individuals/families/groups at risk for experiencing psychosocial 
disorders. Prerequisite: NCLIN 418, which may be taken concur- ently. Offered: AW.

NURS 430 Interpersonal Relationships in Nursing (3)
Theory, current research, and practice in communication to develop 
and maintain interpersonal relationships with clients and health care 
colleagues. Lecture/discussion and laboratory learning opportunities 
include concepts of relationship development and disorder, 
interpersonal and group therapeutic communication processes, 
health care interviewing, and social support.

NURS 445 Topics in Nursing (1-10, max. 10)
Guided survey and discussion of current literature on major topics in 
physiological nursing. Seminar/lecture with analysis and discussion of 
selected topics and readings. May have clinical component. 
Implications for nursing practice and health care emphasized.

NURS 466 Continuing Education in Nursing (3)
Planning, developing, and evaluating continuing education programs 
in various institutions and agencies. Includes the application of adult 
learning principles to a variety of situations, such as workshops, in- 
service and staff development programs.

NURS 488 Youth at High Risk for Drug Abuse, Suicide 
Behaviors, Aggression, and Depression (3)
Study of adolescent problem behaviors: causes, connections, and 
contexts. Two central themes are understanding vulnerability to drug 
abuse, suicide behaviors, and other related behaviors within social 
network contexts and exploring implications for prevention and 
early intervention programming.

NURS 489 Alcohol Problems in Family and Society (3)
Analysis of family problems associated with alcoholism. Emphasis 
on psychological, cultural, and social implications; examination of 
various counseling practices employed and theories of prevention.

NURS 492 Anthropology of Refugees (3) I&S
The refugee phenomenon, its emergence in postcolonial world, and 
structure of life history of refugees. Ethnic change, involuntary 
deculturation, and acculturation as they occur in refugee life 
histories. Prerequisite: one 200-level ANTH course or LING 203. 
Offered: jointly with ANTH 492.

NURS 495 Child Rearing, Culture, and Health (3) I&S
Cross-cultural study of the child-rearing practices, cultural norms, 
and health behavior of children and adolescents in different 
societies. Comparative approaches, diverse theoretical postures, and 
empirical research findings are used. Offered: jointly with ANTH 
440.

NURS 499 Special Electives (1-4, max. 15)
Seminars on selected nursing issues of clinical problems, with 
independent study option, under supervision of nursing faculty. 
Offered: AWSpS.

NURS 500 Children and Adolescents with Special Health 
Needs, Their Families and Communities (3/4, max. 4)
Advanced practice with infants, children, and adolescents at risk for
or with chronic physical, neurobiological, developmental, or psychosocial problems. Focus on assessment and referral with select management strategies relevant for primary and specialty health care. Includes care coordination, multidisciplinary, culturally competent, and family centered approaches. Prerequisite: permission of instructor. Offered: A.

NURS 501 Advanced Mental Health Interventions with Children (3)
Developmentally based assessment and therapeutic approaches relevant for children with psychosocial health problems. Consideration to matching therapeutic approaches with specific nature of symptomatology and other child, family, cultural, and environmental characteristics, including social and educational systems. Individual and group evaluation research emphasized. Prerequisite: NURS 500.

NURS 502 Human Responses in Health and Illness I (3)
Survey of selected human responses to environmental demands in health and illness as expressed at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as host defenses, ventilation, circulation, elimination, and nutrition are discussed. Prerequisite: graduate standing.

NURS 503 Human Responses in Health and Illness II (3)
Survey of selected human responses to environmental demands in health and illness at physiologic, pathophysiologic, experiential, and behavioral levels. Such concepts as immune response, stress response, circadian rhythms, pain, sleep, cognition, and consciousness. Prerequisite: graduate standing.

NURS 504 Clinical Nursing Therapeutics (1-6, max. 6)
Critical analysis of therapeutic modalities to assist patients with a variety of responses to health problems. Includes selected therapies such as suction/drainage, positioning to address responses in critical, life threatening, and chronic/continuing health states. Varying credits assigned for modules covering particular therapies. Prerequisite: NURS 502, NURS 503, or permission of instructor.

NURS 505 Selected Topics in Psychosocial and Community Health Nursing (2-10, max. 10)
In-depth exploration of the major theoretical issues in psychosocial nursing. Seminar with analysis and discussion of selected topics and readings and implications for research and health care.

NURS 506 Role and Context of Advanced Practice Psychiatric Mental Health Nursing (3)
Introduction to advanced practice roles in Psychiatric Mental Health Nursing. Diverse populations, practice settings, health care systems, standards of practice, certification, and licensing criteria relevant to the advanced practice role examined within the context of a broad range of ethical, clinical, and educational issues. Examines future directions. Credit/no credit only.

NURS 507 Mental Health of Older Adults (3)
Examines the dynamics of mental health research and practice in normal, optimal and pathological aging. Focuses on psychosocial and environmental influences on mental health of older adults. Topics include: models of aging, cognitive impairment, depression, severe mental illness, and successful strategies to enhance mental health in older adults.

NURS 508 Seminar in Group Treatment (2)
Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

NURS 509 Issues in Violence and Aggression for Health Professionals (3)
Focuses on research and theory of violent/aggressive behavior.

NURS 510 Primary Care Foundations: Diagnosis and Management of Common Health Concerns (1-3, max. 9)
Focus on diagnosis and management of common primary care problems of adolescents and adults, including older adults, within advanced nursing practice. Emphasizes individual and family responses and nursing strategies including differential diagnosis, treatment, patient education, and follow-up. Content focus changes each quarter. Prerequisite: permission of instructor; recommended: concurrent field work.

NURS 511 Seminar in Neonatal Nursing (3)
Neonatal neurobehavioral and physiologic adaptation within context of physical and social environment. Neonatal responses to alterations in growth and illness. Assessment modalities and therapeutic strategies used during the neonatal period. Prerequisite: NURS 514 or permission of instructor.

NURS 512 Critical and Interdisciplinary Approaches to Women's Health (3)
Critical examination of the historical, socio-political, and scientific influences on women's health. Issues of sexism, racism, and heterosexism discussed from the perspective of different disciplines. Offered: jointly with WOMEN 512.

NURS 513 Seminar in Contemporary Women's Health Issues (1-5, max. 12)
Critical analysis of contemporary and historical literature relevant to health care for women across the life span. Synthesis of a holistic view of women's health to guide research and practice. Offered: jointly with WOMEN 513.

NURS 514 Critical and Interdisciplinary Approaches to Adolescents' Health (3)
Focuses on assessment, clinical decision making, and management of common adolescent problems. Concepts and theories of health promotion, adolescent development, and intervention strategies are explored to provide a broad framework for caring for adolescents in primary settings.

NURS 516 Pediatric Pulmonary Anatomy and Physiology: Clinical Applications (2)
Lung development, anatomy, and physiology; clinical application when caring for children with acute and chronic lung disease. Prerequisite: permission of instructor.

NURS 517 Pediatric Pulmonary Pathophysiology: Clinical Applications (2)
Applies knowledge of pediatric anatomy and physiology to assessment and treatment of pulmonary pathophysiology in children. Nursing issues in caring for children and families with acute and chronic lung disease. Prerequisite: permission of instructor.

NURS 518 Advanced Practice Pediatric Primary Care Management (3)
Focuses on use of clinical decision making framework to develop theoretically and empirically sound individualized comprehensive management plans for the young child who presents with common physical and behavioral symptoms in the primary care setting. Prerequisite: permission of instructor.

NURS 519 Curriculum Development in Nursing Education (3)
Theoretical rationale for curriculum development, study of curricular problems in nursing in relation to the elements of the curriculum as described in a curricular design. Prerequisite: graduate standing.
NURS 520 Evaluation of Clinical Performance in Nursing (3)
For graduate students preparing for faculty or staff development positions in nursing. Theory and principles of evaluation. Instruments to appraise clinical nursing performance developed as part of course requirements. Prerequisite: graduate standing or permission of instructor.

NURS 521 Computing Fundamentals for Health Providers (3)
Enables health professionals to solve work/practice challenges using existing features of desktop computers. Emphasizes productivity concepts. Introduces extended features of common software packages, as well as basic concepts/methods of small system management and support. Prerequisite: admission to Health Informatics Certificate Program or by instructor permission. Offered: jointly with MEDED 580/W.

NURS 523 Communities, Populations, and Systems: Theoretical Foundations (3)
Focus on construction and analysis of research-based philosophies and theories related to nursing practice at the community, population, and systems levels. Synthesize and apply knowledge about social and environmental justice, determinants of health, and human health responses to populations and communities. Examine and evaluate leadership roles for nurses in community settings.

NURS 524 Conceptual Foundations for Care Systems Management (3)
Critical analysis of nature and theoretical bases of care systems management practice. Concepts of nursing and organization science foundations to person-provider transaction management and leadership in context of economic, political, and social environments and health outcomes. Prerequisite: graduate standing.

NURS 525 Managing Clinical Effectiveness Within Care Systems (3)
Optimizing person-provider clinical therapeutic transactions at multiple levels of care systems complexity and population aggregation. Emphasis on designing, managing and evaluating clinical effectiveness and efficiency within care systems. Prerequisite: NURS 524 or permission of instructor.

NURS 526 Managing Organizational Effectiveness Within Care Systems (3)
Analysis of management strategies for attaining effective and efficient organizational structures and processes within health care systems. Prerequisite: NURS 524 or permission of instructor.

NURS 527 Managing Effective Access and Utilization Within Care Systems (3-4)
In-depth inquiry into health care access and resource utilization patterns among diverse populations, with emphasis on management strategies for establishing effective population-system fit. Additional credit for exploring access and utilization patterns within specific populations.

NURS 528 Implications of Human Embryology and Genetics for Clinical Practice (3)
Normal development of the human embryo and fetus and principles of human genetics. Alterations in development leading to common anomalies and implications for clinical practice. Prerequisite: graduate standing or permission of instructor.

NURS 529 Childhood Common Developmental and Behavior Issues (2)
Focus on common developmental and behavioral issues presented by children and their families in primary care setting. Emphasis on the developmental, family, and cultural aspects of assessment and management of the common issues.

NURS 530 Conceptual Frameworks for Parent-Child Nursing (3)
Designed to assist graduate students in exploration, criticism, and analysis of selected concepts, frameworks, and models relevant to parent-child nursing practice. Group seminar work focuses on the discussion of issues influencing the roles and practice of clinical nurse specialists in parent-child nursing. Skills necessary for developing a conceptual framework for practice.

NURS 531 Selected Topics in Family and Child Nursing (1-6, max. 12)
In-depth examination of the literature pertinent to major theoretical issues in parent and child nursing. Seminar with analysis and discussion of selected topics and readings. Implications for research, prevention, and health care stressed. Prerequisite: permission of instructor.

NURS 532 Professional Issues in Advanced Parent and Child Nursing (2-5, max. 5)
History and current issues in advanced parent and child nursing practice and interface with health care systems. Advanced practice roles in provision, implementation, and evaluation of health care services for women, children, and families. Opportunity for application to specific advanced practice roles. Prerequisite: permission of instructor.

NURS 533 Healthcare of Cancer Survivors (2)
Focuses on teaching the health science graduate students about cancer survivorship issues. Discusses the health concerns of those who have been cured of their initial malignancy but are still at risk of long-term effects of chemotherapy, radiation, and surgery. Prerequisite: PHARM 560 (PHARM D students only). Offered: jointly with PHARM 568.

NURS 534 Seminar in Nursing in Gerontology (3)
Gerontological research findings applied to complex nursing problems in maintenance of health and maximum functioning in the aged.

NURS 535 Seminar in Neuroscience Nursing (3)
Guided survey of clinical and experimental literatures regarding selected concepts of human functioning mediated by the nervous system: consciousness, mentation, movement, sensation, integrated regulation, coping with disability. Clinical and research measurement, current research and implications for further research, clinical applications.

NURS 536 Biological Aspects of Cancer: Implications for Care (3)
Survey of major concepts from tumor biology and implications for advanced oncology nursing practice. Areas covered include carcinogenesis, cancer epidemiology, pathology, metastasis, treatments (chemotherapy, radiation, surgery, immunotherapy), and cancer detection and prevention. Discussion of role of advance nurse clinician and complex patient responses are incorporated into discussion of basic biological concepts.

NURS 537 Symptom Management in Cancer Care and Serious Illness (3)
Berry, Nguyen
Focuses on assessment, integration of research findings into clinical decision-making, diagnostic reasoning, and management of common symptoms experienced by adult patients with cancer and/or serious illness. Explores individual and family responses to serious illness and malignant processes. Emphasizes concepts of prevention, tailored patient/family education, management and evaluation strategies. Offered: Sp.

NURS 538 Management of Adults with Respiratory Dysfunction (3)
In-depth examination of problems such as abnormal secretions and shortness of breath associated with respiratory dysfunction due to
pulmonary diseases and other pathophysiological states.

NURS 539 Seminar in Critical-Care Nursing (3, max. 9)
Systematic inquiry into pathophysiology, initial nursing management, and systems of care for the critically ill adult or child.

NURS 540 Special Topics in Biobehavioral Nursing and Health Systems (3-6, max. 9)
Guided survey of the experimental literature of major topics in physiological nursing, including cardiopulmonary, biology of aging, neuromuscular, cancer, and endocrine. Course conducted as a seminar with analysis and discussion of selected topics and readings. Implications for future research and health care are emphasized.

NURS 541 Care of Well Women (4)
Examines components of advanced nursing/midwifery care of well women. Emphasis on assessment, diagnosis, and management of common health issues and problems of women across the life span. Prerequisite: permission of instructor.

NURS 542 Care During Childbearing I (4)
Advanced nursing/midwifery care and management of the low-risk childbearing woman and fetus through preconception, prenatal, intrapartum, and postpartum periods. Prerequisite: NURS 514.

NURS 543 Advanced Practice Childbearing and Women’s Health Care (1-4, max. 4)
Assessment and management related to advanced nursing/midwifery perinatal care and women’s health care problems. Topics covered are ambulatory antepartum and postpartum care, intrapartum care, and advanced women’s health care and adolescents at risk. Module(s) selected depends on program requirements or student elective. Offered: W.

NURS 544 Psychosocial Adaptations of Individuals and Families during the Perinatal Period (3)
Adaptation of individuals and families during the perinatal period, with emphasis on psychosocial adaptation, consumer education, transition to parenthood, parent-infant interaction and community based support. Prerequisite: permission of instructor.

NURS 545 Care of the Neonate and Infant (2-3, max. 3)
Adaptation of neonate to the extrauterine environment and continuum of care to promote the health of infants within the context of family, community, and other environments. Prerequisite: NURS 514, NURS 528, or permission of instructor.

NURS 546 Interpersonal Aspects of Behavior (3)
Selected theories in relation to psychosocial development and adaptation across life span for individuals, families, and small groups and as explanatory models of major psychosocial disabilities. General and psychosocial nursing models evaluated for heuristic value for research and practice. Prerequisite: graduate standing or permission of instructor.

NURS 547 Biologic Aspects of Psychosocial Disabilities (3)
Analysis of biological processes influencing psychosocial behavior in response to internal and external stimuli. Research and theory of neuroendocrine mechanisms in psychosocial disabilities. Analysis of nursing management and evaluation of biopsychosocial modalities used in modification of behavior. Prerequisite: graduate standing in nursing or permission of instructor.

NURS 548 Seminar in Infant Mental Health (1-, max. 3)
Reviews four aspects of infant mental health: early development, prevention, multigenerational phenomena, and multidisciplinary perspectives. Includes presentations by faculty, visiting scholars, practitioners, and students. Exposes students to leading theories, major developmental issues, prevention models, and the long-term consequences of risk and protective factors. Credit/no credit only.

NURS 549 Assessment in Psychosocial Nursing (3)
Conceptual and clinical approaches to advanced-level data collection and diagnostic reasoning in psychiatric/psychosocial disorders. Synthesizes knowledge from psychosocial nursing and multiple allied fields to enhance learners’ cognizance of principles for establishing accurate and comprehensive data bases and sound multifaceted diagnostic formulations. Emphasizes DSM diagnostic scheme.

NURS 550 White Privilege and Racism in Health and Human Services (3)
Explores relationships among the psychosocial health of people of color, American cultural patterns of intersecting forms of oppression (e.g., gender, race, and class) and the role of health professionals in defining, ameliorating and/or aggravating psychosocial distress. Credit/no credit only.

NURS 551 Theoretical Foundations of Primary Care (1-3, max. 3)
Presentation and interpretation of theoretical basis of advanced nursing practice in primary care. Provides students with conceptual foundation upon which to base their development as nurse practitioners. Prerequisite: graduate standing; permission of instructor.

NURS 552 Health Promotion (2-3)
Emphasis on health promotion, screening, and disease prevention in primary care. Examination of individual and family wellness, models of risk assessment and behavior change, health promotion strategies, and barriers to achieving health. Opportunity to explore age-related health risks. Prerequisite: graduate standing and permission of instructor; recommended: nurse practitioner students take fieldwork concurrently.

NURS 553 The Mentally Ill Offender in Correctional and Community Settings (3)
Survey of social, political, economic, legal, and moral problems posed by individuals with mental disorders who commit crimes. Covers historical antecedents and current responses of correctional and mental health systems to mentally ill offenders, prevalence and correlates of incarceration, and roles of professionals in correctional mental health field. Credit/no credit only. Offered: W.

NURS 554 Psychosocial Interventions in Nursing (3)
Course focuses on conceptual foundations and interpersonal skills for therapeutic interventions to promote personal change and effective adaptation. Emphasizes forming and maintaining a therapeutic alliance and utilizing a client-centered approach to define problems and select appropriate therapeutic interventions. Examines traditional, non-traditional, and multicultural therapeutic perspectives.

NURS 555 Psychopathology, Assessment, and Diagnostics of Children 3 and Under (2-, max. 4)
Psychopathology, mental health assessment, and diagnostics in children aged 3 and under, framed by the Diagnostic Classification for Developmental and Mental Health Disorders (DC:0-3). Develops skills and techniques necessary in infant mental health. Prerequisite: acceptance into Infant Mental Health Certificate program or permission of instructor. Offered: WSp.

NURS 556 Biopsychosocial Perspectives on Addictions (3)
Psychosocial and pathophysiological aspects of substance use examined for their effects on individuals and families throughout life span. Theories and empirical findings serve as basis for evaluating preventive and therapeutic nursing approaches to substance use disorders, including those related to target populations. Prerequisite: basic course in biological sciences.

NURS 557 Health, Culture, and Community (3)
A theory and skills class concerning development of personal and organizational cultural competence in community-based participa-
and stress responses in various occupations. Explores elements of
Investigates similarities, differences between job-related stressors
well-being, productivity. Analyzes models of occupational stress.
Relationships between occupational stressors and worker’s health,
NURS 566 Occupational Stress and Stress Management (3)

NURS 565 Observation and Assessment of Relationships (2-4, max. 4)
Classification of attachment behaviors in infancy and preschool
years according to systems developed by Ainsworth, Main and
Solomon, Cassidy, Marvin et al., and Crittenden. Extensive first-hand
experience in conducting and coding Strange Situation
attachment assessments. Standardized national tests in attachment

NURS 564 Biopharmacological Management in Psychosocial
Nursing (3)
Biological and pharmacological interventions pertinent to practice
of psychosocial nursing, including psychopharmacology, electrocon-
vulsive therapy, and phototherapy. Emphasis on empirical
neuroendocrine bases and then nursing management issues pertaining
to these interventions. Legal and ethical issues pertaining to
advanced practice and putative neurological mechanism are examined.
Prerequisite: NURS 547 or permission of instructor.

NURS 563 Advanced Community Health Nursing (3)
Systematic inquiry into the nature and foundations of community
health nursing. Analytic and theoretical perspectives on health risk
assessment and nursing interventions in the community. Implica-
tions for community health nursing services. Prerequisite: permis-
sion of instructor and graduate standing.

NURS 562 Clinically Applied Anthropology (3)
Anthropology as it relates to interdisciplinary delivery of culturally
relevant health care. Cultural variation in illness beliefs and
behavior, types of healing practices, illness prevention, social
support networks. Prerequisite: graduate standing, permission of
instructor. Offered: jointly with ANTH 562.

NURS 561 Advanced Community Health Practice (3/5)
Examination of and experience with principles of clinical practice
in community settings. Included are family as community constitu-
ent, populations at risk, community assessment, and community
development. Prerequisite: graduate standing or permission. Offered:
jointly with HSERV 508.

NURS 560 Dynamics of Community Health Practice (3/5)
In-depth examination of the literature pertinent to major theoreti-
cal issues in cross-cultural nursing and health-care systems. Seminar
with analysis and discussion of selected topics and readings.
Implications for research and health care stressed.

NURS 559 Theories of Psychiatric Disabilities (3)
Theories from psychosocial nursing, psychiatry, and behavioral
sciences explanatory of psychiatric disabilities provide basis for
identifying psychosocial problems. Structure and functions of
mental health organizations and social networks analyzed.
Prerequisite: NURS 547 or permission of instructor.

NURS 558 Infancy: The Context of Relationships (4)
Comprehensive overview of infancy. Topics include caregiving-child
interaction, attachment, mental health diagnostic classifications,
ecological aspects of the caregiving environment. The NCAST
Parent-Child Interactive Scales and the Zero to Three Diagnostic
Classification are presented.

NURS 557 Observations and Research in Comparative and
Integrative Therapies (3)
Behavioral models of health-related behavior analyzed to develop
therapeutic programs and services for families experiencing health-
related concerns or disruptions. Seminars introduce didactic material
and laboratory assignments facilitate development of therapeutic
and programmatic content. Prerequisite: permission of instructor.

NURS 556 Occupational Stress and Stress Management (3)
Relationships between occupational stressors and worker’s health,
well-being, productivity. Analyzes models of occupational stress.
Investigates similarities, differences between job-related stressors
and stress responses in various occupations. Explores elements of
worksite stress management programs. Prerequisite: graduate
standing in nursing or allied health discipline; advanced undergradu-
ates with permission of instructor. Offered: jointly with ENVH 565.

NURS 555 Theoretical Basis of Management of Stress
Response (3)
Theories of physiologic responses linked to theories of cognitive/
affective and behavioral responses to stressors. Conceptual basis of
self-management techniques. Research findings relevant to these
theories and techniques examined and analyzed. Prerequisite: course
in human physiology or physiologic psychology, permission of
instructor.

NURS 554 Family Nursing Therapeutics: Behavioral Models
(3)
Behavioral models of health-related behavior analyzed to develop
therapeutic programs and services for families experiencing health-
related concerns or disruptions. Seminars introduce didactic material
and laboratory assignments facilitate development of therapeutic
and programmatic content. Prerequisite: permission of instructor.

NURS 553 Professional Issues for Nurse Practitioners (2)
Presentation and analysis of current health care trends and key
professional issues influencing nurse practitioner practice. The NP’s
leadership role, role in influencing health policy, accountability to
the profession/public, marketability, and legal dimensions of practice
are stressed. Prerequisite: NP student nearing program completion
or permission.

NURS 552 Family Concepts: Health and Illness (3)
Models and research on therapeutic relationships and interpersonal
processes evaluated and applied to group interactions among family
members, among professionals, and between the family, profession-
als, and macrosystems. Partnership building emphasized. Individual
and group characteristics examined across the life span in social,
cultural, and health contexts. Prerequisite: permission of instructor.

NURS 551 Selected Topics in Comparative Nursing Care Systems
(2-3, max. 10)
In-depth examination of the literature pertinent to major theoreti-
cal issues in cross-cultural nursing and health-care systems. Seminar
with analysis and discussion of selected topics and readings.
Implications for research and health care stressed.

NURS 547 Advanced Psychiatric Disabilities (3)
Theories from psychosocial nursing, psychiatry, and behavioral
sciences explanatory of psychiatric disabilities provide basis for
identifying psychosocial problems. Structure and functions of
mental health organizations and social networks analyzed.
Prerequisite: NURS 547 or permission of instructor.

NURS 546 Psychosocial Nursing (3)
Biological and pharmacological interventions pertinent to practice
of psychosocial nursing, including psychopharmacology, electrocon-
vulsive therapy, and phototherapy. Emphasis on empirical
neuroendocrine bases and then nursing management issues pertaining
to these interventions. Legal and ethical issues pertaining to
advanced practice and putative neurological mechanism are examined.
Prerequisite: NURS 547 or permission of instructor.

NURS 545 One Family at a Time: Family Models (3)
Examines interpretation and management of disordered behavior
from the perspective of families — intergenerational and across
cultures. Critically reviews selected theoretical frameworks for
understanding families. Emphasizes theory, cultural perspective, and
family assessment skills to plan relevant family interventions to
assist families in managing disordered behaviors of family members.

NURS 544 Psychosocial Nursing (3)
Analysis and study of social, cultural, and psychological conditions
that influence human loss, grief, and death in modern society.
Research findings, selected readings, and direct experience provide direction for examination of philosophic, theoretical, and pragmatic issues underlying choices and decisions in clinical practice. Open to graduate students with permission of instructor. (Limit: sixteen students.)

NURS 576 Assessment and Collaboration with Communities and Systems (3) Examine, critique and apply theory and practice in assessing and collaborating with communities, populations and systems cross-culturally. Develop techniques for working with communities and systems, including using multiple data sources, performance indicators, community mobilization, capacity building, and coalition development. Graduate level. BSN senior with permission.

NURS 577 Seminar in Infant Mental Health Intervention Models, Consultation, and Leadership (1-3, max. 3) Capstone course in Infant Mental Health Certificate Program. Explores intervention models, role of consultation and leadership in the field. Field work in Infant Mental Health Program serves as context for exploring consultation and leadership roles. Synthesis and reflection of personal preparation and role encouraged. Offered: AWS.

NURS 578 Social Determinants of Health (3) Analyze the distribution and causes of health disparities in populations and communities, including but not limited to social, psychological, biological and environmental factors, to assess social determinants of health problems and their remedies. BSN senior with permission of instructor.

NURS 579 Transcultural Nursing Practices (3) Seminars examine four decades of nursing practice literature and other disciplines related to appropriate and competent care of diverse and multicultural populations. Concepts and methods from anthropology and other behavior sciences are considered in relationship with current health practice guidelines. Graduate standing or instructor permission.

NURS 580 Current Issues in Occupational and Environmental Medicine (2-3) Kaufman Interdisciplinary seminar on current and emerging topics in the practice of environmental and occupational health. Faculty- and student-led presentations with an interdisciplinary focus, including occupational hygiene, nursing, and medical issues. Prerequisite: environmental health graduate student, occupational health nursing student, or permission of instructor. Offered: jointly with ENV H 596; AWSp.

NURS 581 Study of International Health (2-3) Hegyvary International health based on the concept of health ecology. Assigned readings, discussions, and analyses include different perspectives, strategies, systems, and the wide range of conditions and forces that affect global and local health and illness. Emphasizes roles of health care providers. Credit/no credit only.

NURS 582 Socio-Cultural Perspectives of Public Health Genetics (3) Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with ANTH 574/PHG 521.

NURS 583 Emotions and Mental Health: From Adversity to Adaptation (3) Betrus, Elmore Provides an understanding of nature and function of emotions as well as relationship of emotion to mental health/illness. Emphasizes adversity arising from individual and community sources and its impact on emotional health. Addresses implications for interpersonal and social policy interventions.

NURS 584 Critical and Interdisciplinary Approach to Health Policy (3) Advanced seminar to critically analyze various public health policies from a social justice framework.

NURS 587 Role Transition Seminar (2) Emphasis on transition to doctoral study and eventual post-graduate roles. Includes information to clarify expectations and skills to facilitate success: various forms of scholarly and interpersonal communication, principles of scholarly collaboration, giving and receiving critiques, and other topics developed by participants. Credit/no credit only.

NURS 588 Philosophical Basis of Nursing Inquiry (3) Overview and critical analysis of historical and contemporary views of knowledge development and of science, with particular emphasis on the ways these views influence approaches to nursing inquiry. Emphasis on analyzing the underlying epistemological and ontological assumptions and implications of diverse approaches to knowledge generation in nursing.

NURS 589 Theoretical Perspectives in Nursing (3) Critical analysis of theory development, including evaluation of relationships among theories, evidence, and explanation. Diverse approaches used to appraise historical and contemporary milestones in the development and evaluation of nursing knowledge. Emphasis on process and implications of theory development for nursing research, practice, education, and systems. Prerequisite: NURS 588. Offered: W.

NURS 590 Ecology of Human Health (5) Focus on the pluralistic constructions of health as related to different environments. Personal and biological characteristics vary, interact with, and transform the person and the environment. Emphasis on nursing as a social construction which is interactive with the human’s experience of health and healing.

NURS 591 Advanced Seminar in Nursing Science (3, max. 15) In-depth analysis and evaluation of literature in focused areas of research. Synthesis of literature related to selected fields of nursing science. Oral analysis of assigned papers and topics. Prerequisite: graduate standing or permission of instructor.

NURS 592 The Science of Nursing Therapeutics (4) Addresses the state of the science of nursing therapeutics. Students examine the practices of nursing to promote, maintain, and restore human health from an ecological perspective. Therapeutics considered from the perspectives of the individual, family, and community systems.

NURS 593 Preventive Therapeutics (3) Examines literature in the field of health promotion and illness prevention with the purpose of students developing their individual model of health promotion and illness prevention in their own focus of interest considering the social and political forces prevailing.

NURS 594 Advanced Seminar on Healing (3) Advanced seminar to critically analyze current thinking and practice applications that fall under the heading of “healing.”

NURS 595 Synthesis of Nursing Science (3) Provides a forum for critical analysis, integration, and synthesis of core content provided during the initial year of the Ph.D. in Nurse Scientist Program and further planning of program of study. Prerequisite: completion of first year required courses of doctoral program. Credit/no credit only.

NURS 596 Colloquium, Scientific Conduct, and Dissertation Seminar (2, max. 12) Focuses on group discussion of issues pertinent to research conduct.
Scientific conduct issues include guidelines relevant to designing, conducting, and disseminating research; risk management in reference to scientific misconduct and negligence; and collaborative and peer-review skills relevant to intra- and interdisciplinary research.

NURS 599 Selected Readings in Nursing Science (1-3, max. 18)
Analysis of synthesis of selected readings with faculty mentor. Credit/no credit only. Prerequisite: permission of instructor.

Nursing Clinical

Course Descriptions

NCLIN 302 Practicum: Health Assessment (1-5, max. 5)
Lecture and lab emphasize nursing skills in communication, interviewing, functional and physical health assessment. Includes: basic communication skills, beginning physical and psychosocial assessment of the individual across the lifespan, and family assessment. Credit/no credit only. Offered: AS.

NCLIN 306 Practicum: Basic Skills of Nursing Practice (4)
Practicum in communication, interviewing, health assessment, identification of threats to health in clinical settings. Explores risk, vulnerability identification, communication, physical/psychosocial assessment of individuals across lifespan, nursing care planning, documentation, psychomotor skills development. Credit/no credit only. Prerequisite: NCLIN 302, which may be taken concurrently.

NCLIN 402 Practicum: Care in Illness I (4)
Provides supervised nursing care to individuals/families with acute/chronic illness across the lifespan. Emphasizes beginning skills in systematic assessment, including person/environment fit, developing competency in selected nursing therapies, and developing role as care agent for persons of all ages. Credit/no credit only. Prerequisite: NCLIN 401, which may be taken concurrently.

NCLIN 406 Practicum: Care in Illness II (1-10, max. 10)
Provides supervised nursing care to individuals and families with acute and chronic illness. Emphasis on increasing skill in systematic assessment, developing competency in selected nursing therapies, and developing role as caring agent for persons of all ages. Credit/no credit only.

NCLIN 409 Partnerships in Community Health (6)

NCLIN 411 Transition to Professional Practice (12-20)
Emphasis on mastering theoretical concepts, applying theory and research findings, improving skill competency, and developing leadership capabilities. Recommended: completion of first five quarters in the BSN program.

NCLIN 416 Practicum: Nursing of Families: Childbearing and Childrearing (4)
Provides the opportunity for supervised nursing of childbearing and childrearing families and individuals. Emphasizes expanding nursing process skills, especially health promotion, with individuals and families during childbearing and childrearing. Credit/no credit only. Prerequisite: NURS 415, which may be taken concurrently. Offered: AW.

NCLIN 418 Practicum: Psychosocial Nursing (4)
Provides supervised psychosocial nursing care to individuals/families/groups/communities with threats to or alterations in psychosocial health. Emphasizes increasing skill in systematic assessment, developing competency in selected psychosocial nursing interventions, and evaluation of treatment outcomes. Prerequisite: NURS 417, which may be taken concurrently. Offered: AW.

NCLIN 500 Comprehensive Health Assessment (3)
Provides framework for systematic collection, interpretation, and communication of data to determine health status of individuals. Develops beginning advanced practice competence in history-taking and screening physical examination of adolescents and adults. Analysis of multiple health indicators to determine health status. Credit/no credit only. Prerequisite: permission of instructor.

NCLIN 501 Diagnostic Health Assessment (1-5, max. 5)
Provides framework for learning symptom analysis, selection/performance of examination techniques, and selection/interpretation of common diagnostic procedures. Develops beginning competence in focused history-taking and directed physical exam to evaluate common health problems in adolescents and adults. Credit/no credit only. Prerequisite: NCLIN 500, which may be taken concurrently.

NCLIN 502 Pediatric Health Assessment and Promotion (1-5, max. 5)
Gives experience in obtaining a health history and performing a physical assessment of infants, children, and adolescents. Interviewing techniques, problem-oriented charting, and a systems approach to the physical examination. Emphasis on screening principles, health promotion, and wellness care for children/families. Credit/no credit only. Prerequisite: permission of instructor.

NCLIN 503 Advanced Fieldwork Community Health Nursing (2-6, max. 12)
Guided experience in delineating nursing roles in community settings. Development of a philosophy of community health nursing. Application of core concepts pertaining to health, ethics, care, and community. A minimum of four hours of guided experience weekly. Prerequisite: graduate standing and permission of instructor.

NCLIN 505 Diagnostic Testing and Monitoring in Serious Illness (2)
Lecture, discussion, and laboratory sessions to develop students’ assessment, diagnostic, and monitoring expertise in the care of acutely ill individuals. Students refine clinical decision-making skills, apply specialized assessments, gain insight into clinical experts’ critical thinking, and refine assessment knowledge for a specific patient population. Prerequisite: NCLIN 501 or equivalent.

NCLIN 508 Seminar in Group Treatment (1)
Seminar on the theoretical basis for working with various treatment groups. Analysis of selected approaches to group treatment. Analysis of leader responsibilities and functions in the development of therapeutic group experiences.

NCLIN 509 Teaching Methods and Practicum in Nursing Education (2-10, max. 10)
Guided experience in selected teaching-learning situations in nursing, in both classroom and clinical situations. Identification, analysis, and solution of teaching-learning problems in clinical nursing. Minimum of seven hours of guided experience weekly.

NCLIN 510 Group Work with High-Risk Youth (3-6, max. 6)
Theory and application course in group counseling for high-risk youth. Central theme is group leader effectiveness in helping young people increase school performance, decrease drug involvement, and increase emotional well-being. Open to graduate students in nursing, education, and related human services professions.

NCLIN 512 Advanced Practicum in Parent and Child Nursing I (2-12, max. 25)
Clinical seminar and practicum provide opportunities to develop
advanced nursing practice competencies in the care of women, parents, children, and/or adolescents. Application of theory and principles to direct care, consultation, education and/or care coordinator roles with individuals and/or groups.

NCLIN 514 Seminar in Home Care for Chronic Illness (3)
Home-care services as component of community health nursing. Understanding effects of direct nursing functions on care of chronically ill persons and their families. Selected field study experiences in community health settings. Prerequisite: NURS 563, graduate standing, and permission of instructor.

NCLIN 525 Managing Clinical Effectiveness Within Care Systems (1)
Optimizes person-provider clinical therapeutic transactions at multiple levels of care systems complexity and population aggregation. Emphasis on designing, managing and evaluating clinical effectiveness and efficiency within care systems. Prerequisite: NURS 524 or permission of instructor.

NCLIN 526 Managing Organizational Effectiveness Within Care Systems (1)
Analysis of management strategies for attaining effective and efficient organizational structures and processes within health care systems. Prerequisite: NURS 524 or permission of instructor.

NCLIN 531 Nursing Process in Parent-Child Nursing (4)
Includes lecture, seminar, and laboratory instruction designed to assist the student with knowledge and skill acquisition related to nursing care of individuals and families with regard to childbearing and childrearing. Prerequisite: NURS 530.

NCLIN 540 Relationship Development and Intervention (3-, max. 15)
Clinical work with infant and toddlers and their parents in relation to infant disorders of affect, self-regulation, attachment trauma, and stress disorders. Reflective supervision in groups and individually required. Restricted to candidates in the Infant Mental Health Certificate Program. Credit/no credit only. Offered: AWSpS.

NCLIN 541 Specialization in Clinical Practice (1-10, max. 10)
Clinical fieldwork and seminar opportunities to synthesize, apply, evaluate, and communicate knowledge about a specific domain of advanced clinical practice. Clinical fieldwork emphasizes the refinement of assessment and diagnostic skills. Seminars focus on critical analysis of clinical issues. Students develop a professional portfolio to highlight their expertise.

NCLIN 542 Advanced Practice Specialist Clinical Practicum II (1-10, max. 10)
Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Fieldwork emphasizes greater depth/complexity/independence in specialization and role development. Seminars emphasize critical analysis of role-related issues. Capstone experience for clinical practicum. Credit/no credit only. Prerequisite: NCLIN 541.

NCLIN 543 Advanced Practice Specialist Clinical Practicum III (1-10, max. 10)
Apply, synthesize, evaluate, and communicate knowledge about a specific domain of advanced medical/surgical or forensics nursing practice. Role development within specialty context. Emphasis is on critical analysis of leadership-related issues. For students in final clinical, serves as capstone. Credit/no credit only. Prerequisite: NCLIN 542.

NCLIN 544 Roles in Clinical Practice (1-10, max. 20)
Clinical fieldwork emphasizes analytical skills in the implementation of intervention and evaluation strategies for practice, education, and/or administration. Seminars focus on critical analysis of role-related issues. Students refine their professional portfolio of expertise. Credit/no credit only. Prerequisite: NCLIN 541.

NCLIN 546 Management of Acute and Chronic Wounds (2-3)
Evaluation and treatment of acute and chronic wounds. Includes wound and healing physiology, pathophysiology, patient evaluation, evaluation of environmental and systemic factors related to risk of impaired healing, methods for assessing wound progress, and evidenced based treatment options. Optional one credit clinical and lab experience. Prerequisite: graduate standing or permission of instructor.

NCLIN 549 Nurse Practitioner Clinical Practicum I: Adults/Older Adults (1-10, max. 10)
Clinical fieldwork and seminar in advanced nursing practice with individual/groups. Students practice under clinical preceptor supervision. Focuses on data collection/critical thinking related to health status and threats to health, incorporating knowledge from the biological, behavioral, and social sciences. Credit/no credit only. Prerequisite: permission of instructor, or NCLIN 501 or equivalent.

NCLIN 550 Nurse Practitioner Clinical Practicum II: Adults/Older Adults (1-10, max. 10)
Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 549, emphasizing critical thinking related to the differential diagnosis/management of health problems and human responses. Students practice under clinical preceptor supervision. Addresses selected role issues in advanced practice nursing. Credit/no credit only. Prerequisite: NCLIN 549 or permission of instructor.

NCLIN 551 Advanced Practice Nursing Clinical Practicum III: Adults/Older Adults (1-10, max. 10)
Clinical fieldwork and seminar in advanced practice nursing. Builds on NCLIN 550, emphasizing the integration and application of previous learning in the care of people with multiple health problems. Students practice under preceptor supervision. Addresses selected role issues in advanced practice nursing. Credit/no credit only. Prerequisite: NCLIN 550 or permission of instructor.

NCLIN 552 Nurse Practitioner Clinical Practicum IV: Adults/Older Adults (1-10, max. 10)
Intensive clinical experience in which students integrate previous learning to assume responsibility for care of older adults and/or adults with multiple health problems. Students practice as an advanced practice nurse supervised by a preceptor, assuming increasing responsibility for planning/implementing therapies and for documenting/evaluating outcomes. Credit/no credit only. Prerequisite: NCLIN 551.

NCLIN 553 Seminar in Primary Care I: Health Promotion (2)
Weekly seminars with supervised field study within selected primary-care and wellness settings. Emphasis on health assessment and strategies related to improving health in people of all ages. Analysis of, and counseling on, life-styles, nutrition, physical fitness, stress management, self-care, and prevention. Credit/no credit only. Prerequisite: graduate standing, permission of instructor.

NCLIN 554 Occupational Health Nursing: Practice Issues (2-6, max. 6)
In-depth overview of occupational health and safety. Includes discussion of American workforce, work environments, regulations, and political issues; identifies trends which affect practice; introduces prevalent health disorders which result from occupational exposure; examines and applies nursing theory to the prevention and control of occupational injuries and illnesses.

NCLIN 556 Seminar in Primary Care II: Management of Common Health Concerns (3)
Focus on research questions, patient presentations, and group discussions drawn from field study. Supervised clinical field study
within selected primary health-care settings and weekly seminar discussions related to theory presented in NURS 510. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

NCLIN 557 Seminar in Primary Care III: Management of Common Health Concerns (3)
Focus on research questions, patient presentations, and group discussions drawn from field study. Supervised clinical field study within selected primary care settings and weekly seminar discussions related to theory presented in NURS 510. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

NCLIN 558 Occupational Health Nursing: Program Development (2-6, max. 6)
In-depth examination of occupational health and safety programs including organizational analyses, budgeting, marketing, case management, and workers’ compensation; also political, economic, legal, and ethical issues. Focuses on development, implementation, and evaluation of programs including health promotion, EAP, and health surveillance. Applies public health and nursing sciences to selected work-related problems.

NCLIN 559 Seminar in Primary Care IV: Management of Common Health Concerns (3-5)
Focus on research questions, patient presentations, and group discussions drawn from field study. Supervised clinical field study within selected primary care settings and weekly seminar discussions related to theory presented in NURS 510. Credit/no credit only. Prerequisite: permission of instructor; nurse practitioner students register for NURS 510 concurrently.

NCLIN 560 Seminar in Primary Care V: Complex Clinical Decision Making ([1-11]-, max. 11)
Seminar with associated field study. Synthesis of advanced knowledge base and clinical family nurse practitioner skills with effective management of complex clinical problems. No grade given until 11 total credits completed. Credit/no credit only. Prerequisite: graduate standing and permission of instructor.

NCLIN 566 Advanced Clinical Practicum in Psychosocial Nursing (1-9, max. 20)
Seminar and practicum focus on development of advanced clinical and role-function skills. Practicum in settings with select populations under supervision of expert clinicians. Seminars use evidenced-based practice criteria to integrate cases into discussion. Credit/no credit only. Prerequisite: NURS 570, NURS 564, one theory course, or permission of instructor.

NCLIN 569 Practicum in Biopsychosocial Assessment (2/4, max. 4)
Practicum in either physical health assessment with opportunity to refine skills in taking health history and performing physical examinations or psychosocial assessment with opportunity to refine skills in psychosocial assessment interview, mental status examination, standardized clinical assessment instruments. Credit/no credit only. Prerequisite: NCLIN 500 and NCLIN 501, NURS 549 which may be taken concurrently.

NCLIN 570 Practicum in Adult Psychosocial Assessment (2)
Under supervision of faculty/preceptors from clinical agencies, students use evidence-based practice criteria to assess individuals, groups, and families. Students gain skills in psychosocial interviewing, mental status examinations, and assessing psychosocial variables by standardized instruments and clinical interview. Credit/no credit only. Prerequisite: NURS 549 or permission of instructor.

NCLIN 572 Practicum in Physical Assessment (2)
Physical health assessment in practicum with the opportunity to refine skills in taking a complete health history and in performing physical examinations in a clinical setting. Credit/no credit only. Prerequisite: either NURS 510 modules ABC, or NURS 510 modules HI; NCLIN 500; 501, or permission of instructor.

NCLIN 573 Advanced Field Study in Family Nursing (2-9, max. 9)
Advanced practice development in direct care, consultation, and/or care coordination with individual families or groups of families across the life span. Opportunities provided to strengthen interpersonal therapeutic process skills, family nursing approaches relevant to family health promotion, problematic family health patterns. Prerequisite: concurrent registration in NURS 572, NCLIN 574; recommended: NURS 571.

NCLIN 599 Independent Study Clinical Practicum (1-12, max. 25)
Clinical practicum to develop advanced-practice nursing skills in care of individuals, groups, communities, or care systems. Individually arranged with faculty member for application of theory and principles to direct care, consultation, education or care coordinator roles. Prerequisite: matriculated MN student or post-masters student, and permission of academic adviser and instructor. Offered: AWSpS.

Nursing Methods

Course Descriptions

NMETH 403 Introduction to Research in Nursing (3)
Organization of the structure of nursing knowledge through research. Concepts and processes of research utilized in the investigation of nursing science.

NMETH 499 Undergraduate Research (1-5, max. 12)
Supervised individual scholarly inquiry on a specific nursing problem.

NMETH 520 Methods of Research in Nursing (2)
Research process as it applies to nursing. Use of the literature in building theoretical rationale. Selection of appropriate methods. Presentation of findings. Minimum of two laboratory hours weekly. Prerequisite: a course in statistics.

NMETH 521 Methods of Research in Nursing (2)
Continuation of 520, with emphasis on methods of research applied to the solution of problems in all fields of nursing.

NMETH 522 Data Management for Research Professionals (4)
Surveys industrial strength data management, using techniques applicable to multi-center, longitudinal research trials with survey instruments. Involves challenges research professionals face as they graduate from a student project to a study with hundreds of cases, variables, multiple survey instruments and a staggered, repeated sampling protocol. Credit/no credit only.

NMETH 523 Project Management in Health Care Systems (3)
Provides an overview of project management principles. Focuses on principles that are applied in health informatics. Opportunity to define, plan, implement, and evaluate a real project. Emphasis on teamwork and total systems approach to planning and implementation.

NMETH 524 Analysis and Design of Information Systems in Health Care (3)
Introduction to systems analysis and design. Topics include analyzing the business case, requirements modeling, enterprise modeling, and development strategies. Also covers data design, the user interface, input and output design, system architecture, systems implementation and systems operations and support.

NMETH 526 Patient-Centered Interactive Health Communication Technologies (3)
Overview of current and emerging consumer-centric eHealth tools
and technologies. Researchers and practitioners from multiple disciplines present theories, concepts, and principles from health, information, cognition, and human-factors sciences as they relate to clinical development and use of these tools and technologies.

NMETH 570 Seminar in Clinical Research in Nursing (3)
Philosophy, problems of design; use of criterion measures in terms of patient care.

NMETH 575 Methodological Issues in Family Research (3)
Emphasizes research with the family as unit of analysis. Examines patterns of family functioning in relation to responses to health situations. Reviews family units from generational and intergenerational perspectives. Critiques methods assessing dyadic and triadic relationships and therapeutic interventions on family outcomes. Prerequisite: permission of instructor.

NMETH 580 Methodological Perspectives in Nursing Inquiry (5)
Allows students to translate philosophical and theoretical perspectives into research methodologies. Foci will include: the relationship of theoretical perspectives to methodologies; the methodological issues among and between varying schools of thought (including contemporary empiricist, interpretive, and critical/postmodern); and how the methodologies influence choices of research design and methods.

NMETH 581 Observational Research Methods (2-6, max. 6)
Examines observational methods for conducting verbal and nonverbal behavioral research. Emphasizes critical analysis and rigor in research question formulation, measurement decisions, coding scheme development, data collection, and analysis and interpretation of data. In-depth application of observational method optional. Prerequisite: graduate standing and basic research methods course or permission of instructor. Offered: W.

NMETH 582 Interpretative Methods in Nursing Research (4-)
Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of Instructor.

NMETH 583 Interpretative Methods in Nursing Research (4-)
Seminar and field practicum for interpretative research methods. Study on health-related issues using a selected tradition in interpretative methods. Prerequisite: permission of Instructor.

NMETH 584 Methods: Physiologic Measures (4)
Exploration of the measurement of physiologic functioning in human and animal models. Examples include biochemical and biophysical measure. Students develop beginning skills with one physiologic measure. Prerequisite: physiology and chemistry and permission of instructor.

NMETH 585 Meta-Analysis (4)
Meta-analysis examined as a method to synthesize research. Overview of meta-analytic methods; description of the collection, analysis, synthesis, and reporting of studies; explanation of statistical calculations; and discussion of reliability and validity measures incorporated into meta-analytic design. Prerequisite: permission of instructor.

NMETH 586 Instrument Development and Testing (4)
Includes measurement theory, reliability, validity, level of measurement, and the process of scale development, modification, or translation. Students learn to evaluate, develop, modify, translate, and test instruments for use in research. Prerequisite: student in health science discipline and permission of instructor.

NMETH 587 Methods of Theory Testing: Causal Modeling with Path Analysis and Structural Equation Modeling (4)
Includes causal inferencing and theory testing through causal modeling with path analysis and structural equations modeling. Students learn to evaluate theory models and to apply the content by developing and testing models. Prerequisite: student in health science discipline and permission of instructor.

NMETH 590 Special Topics in Nursing Research (2-3, max. 9)
Examination of a specific research method, with evaluation of appropriateness, efficiency, rigor of measurement, and potential for inference for nursing research. Prerequisite: minimum of 5 credits of basic nursing research methodology at graduate level and permission of instructor.

NMETH 591 Clinical Outcome Research I (4)
Examination of philosophical, analytical, and methodological designs and processes in evaluating the effectiveness of interventions and programs designed to enhance health outcomes. Alternative designs are addressed in consideration of underlying assumptions about prevention/causation research; clinical human phenomena; design sensitivity; and threats to validity. Theory development emphasized. Prerequisite: permission of instructor.

NMETH 592 Clinical Outcome Research II (2-4, max. 4)
Application and evaluation of philosophical, methodological, and analytical concepts and issues examined in 591. Two modules are offered: a) case study and small-n studies and b) large-n studies. Students demonstrate application of decision-making process involved in development of clinical outcome study. Prerequisite: permission of instructor.

NMETH 593 Time Series and Sequential Analysis (4)
Basic introduction to terminology and methods of time series and sequential analysis as applicable to nursing-relevant processes in the form of samples of interval and categorical data collected over time; autocorrelation, autoregression, spectrum, sincor, Markovian, lag sequential, and log-linear analyses. Development of practical analysis skills on real data sets. Prerequisite: permission of instructor. Credit/no credit only.

NMETH 598 Special Projects ([1-12]-, max. 12)
Fulfills the requirements of the non-thesis option for Master’s students in nursing. Projects involve scholarly inquiry with in-depth focused analysis, culminating in a written product/report for dissemination. Credit/no credit only. Prerequisite: NMETH 520 and NMETH 521 or permission of instructor.

NMETH 600 Independent Study or Research (*)
Credit/no credit only.

NMETH 700 Master's Thesis (*)
Credit/no credit only.

NMETH 800 Doctoral Dissertation (*)
Credit/no credit only. Prerequisite: permission of Supervisory Committee chairperson or graduate program adviser.

College of Ocean and Fishery Sciences

Dean
Arthur R.M. Nowell
207 Ocean Sciences

Associate Dean
Ken Chew

The marine environment has been a dominant factor in the history of the Pacific Northwest from the time of the first Native American settlements to the modern days of aquaculture, container ships, and waterfront condominiums. It is not surprising, therefore, that the University of Washington has a long tradition of commitment to...
teaching, research, and public service in subjects related to marine and freshwater activities.

The College of Ocean and Fishery Sciences comprises five major units of the University in the marine and freshwater sciences: the Applied Physics Laboratory; the Schools of Aquatic and Fishery Sciences, Marine Affairs, and Oceanography; and the Office of Marine Environmental and Resource Programs, which includes the Washington Sea Grant Program. Each of the units of the College focuses on a different aspect of the aquatic environment, but there is much overlap of interests.

The College offers both undergraduate and graduate instructional programs in fisheries and oceanography, and graduate programs in marine affairs. Undergraduates may pursue complementary joint undergraduate degrees with departments such as Biology, Chemistry, and Earth and Space Sciences in the College of Arts and Sciences. College faculty, staff, and students carry out research in oceans, estuaries, and freshwater lakes and rivers all over the world. Facilities for research and teaching range from ocean-going vessels to well-equipped laboratories and classrooms.

The College also supports career-oriented resources for students to complement traditional course work and research. An annual Career Fair, held each February, brings more than 30 potential employers to campus to meet with students and discuss career possibilities and employment opportunities. A well-equipped Career Center is available for students, providing information about career planning and job opportunities in the marine and freshwater sciences. Northwest WaterWork, a publication of current employment opportunities and internships available in water-related areas, is published by the College as a service to students. Internships are encouraged as a way to help students bridge the transition from the classroom to employment after graduation. The College also supports educational outreach activities and innovative learning technologies.

In 2003, the College had 200 undergraduate and 250 graduate students enrolled, a faculty of 198 members, and a total budget of $60 million, making it one of the largest institutions of its kind in the nation.

The School of Aquatic and Fishery Sciences provides nationally recognized learning experiences in applied aquatic sciences, with an emphasis on fisheries management and conservation. Faculty, staff, and students have access to the region's wealth of aquatic habitats and living resources as well as synergistic partnerships with other academic programs throughout the nation and the world. Critical program areas in aquatic sciences include aquaculture, physiology and genetics, habitat and species ecology, and quantitative fisheries analyses, management, conservation, and restoration.

The School of Oceanography was established in 1930 for teaching and research focused on coastal and blue-water oceanography. Faculty, staff, and students explore ocean-climate interactions, biological, chemical, and geophysical aspects of deep-sea hydrothermal systems, the oceanography of coastal ecosystems, and other interdisciplinary topics. The School offers graduate degrees and is the only leading oceanography program to offer a bachelor's degree, with approximately 100 undergraduate majors currently enrolled.

The School of Marine Affairs fosters comprehensive, long-term, and anticipatory approaches to marine policy and ocean and coastal management. An interdisciplinary curriculum and interactions with public and private organizations, environmental groups, and regulatory agencies enrich student understanding of contemporary issues in ocean and coastal management. The school provides guidance to all levels of government in the U.S. and abroad; to nongovernmental organizations that promote resolution of ocean and coastal issues; and to the marine trades, shipping, and transportation industries.

The Applied Physics Laboratory (APL) is a self-sustaining research center within the College established in 1943 at the request of the U.S. government to address urgent wartime problems. Today, as one of only four Navy University Affiliated Research Centers in the country, it is a premier center for research, development, and advanced education in science and engineering. About half of APL's programs are devoted to developing innovative solutions to complex technical problems, primarily related to naval operations. The remaining programs are committed to fundamental research in ocean physics, ocean acoustics, polar science, remote sensing, and medical and industrial ultrasound.

The Washington Sea Grant Program (WSGP) supports a broad range of research, education, outreach, and technology transfer activities on coastal and marine issues, placing particular emphasis on those situations where resources, the environment, and people interact. It works extensively with university and external partners to identify needs and opportunities in the marine environment and to develop projects and partnership programs that address them. WSGP is nationally recognized for its quality, innovation, and positive impact.

Aquatic and Fishery Sciences
116 Fishery Sciences

The School of Aquatic and Fishery Sciences (SAFS) encompasses multi-disciplinary programs at the interface between the traditional fields of biology, oceanography, and natural resource management. Primary focus is on aquatic ecology and natural history, conservation, and management of fishery resources and habitats. The scope of aquatic systems ranges from watersheds, rivers and lakes, to estuarine and near-shore shelf systems and biotic communities therein. Core sciences in disease, physiology and genetics have application to fish and invertebrate culture and production. Faculty and student research draws heavily on physical system processes, mathematical and statistical models, species life histories, and community ecology, with frequent relevance and application to critical issues of policy and management. The School's diverse research activities include field programs in behavior, ecology, and conservation, an internationally recognized quantitative science program, and traditional wet-lab sciences including aquatic microbiology, diseases, genetics, reproduction, and endocrinology. SAFS is a vibrant academic program presently composed of 28 faculty, 120 graduate and 115 undergraduate majors, and skilled support staff. The School is at the center of many societal controversies related to aquatic systems and resources linked to the Endangered Species Act, to requirements for protecting essential fish habitat, and to statutes in the Magnuson-Stevens Fishery Conservation and Management Act. The faculty serve on numerous national and international committees and panels in influential roles that shape and guide decisions affecting most aspects of aquatic sciences.

Undergraduate Program
Adviser
116 Fishery Sciences, Box 355020

safs@u.washington.edu

The School of Aquatic and Fishery Sciences (SAFS) offers the following programs of study:
- The Bachelor of Science in Aquatic and Fishery Sciences
- A minor in aquatic and fishery sciences

The School's undergraduate program has been substantially modified in recent years to reflect student and faculty interests in ecology and conservation biology, as well as more traditional fields such as stock assessment and fishery management. Faculty dedication to teaching, substantial benefit gained in close faculty contact with a relatively small program, and significant experiential training and research have made SAFS an appealing major that has doubled in recent years.
years. The Bachelor of Science degree provides an underpinning in sciences such as biology, chemistry and math/stats, then adds a core curriculum within aquatic sciences. Students study within areas of individual interest, grouped in three primary areas: aquatic ecology, conservation and management of aquatic resources, and biology and culture of aquatic animals.

**Bachelor of Science**

*Suggested First- and Second-Year College Courses:* Calculus and either the chemistry or biology series the first year, followed by the other series immediately following. English composition, public speaking, and FISH 250 or FISH 101.

**Department Admission Requirements**

Students in good academic standing may declare this major at any time, including on their application for admission to the UW. After notification of admission and before registration, new students should visit or email the Student Services Office for help in planning their programs.

**Graduation Requirements**

180 credits, to include 44 credits in FISH-prefix courses; 44 credits of Natural World; 15 credits of mathematics; 10 credits each of Individuals & Societies and Visual, Literary, & Performing Arts; 12 credits of Writing; and 45 credits of free electives.

**The Natural World**

Minimum of 44 credits, to include:

- **Biological Sciences:** BIOL 180, BIOL 200, BIOL 220 (5, 5, 5); or BIOL 201, BIOL 202, BIOL 203 (5,5,5); or BIOL 101-BIOL 102 or BIOL 161-BIOL 162 and GENOME 371 or FISH 340/BIOL 340 (5-5, 5). One of BIOL 356 (3), FISH 447 (3), or BIOL 473 and BIOL 474 (3,2).

- **Physical Sciences:** PHYS 114, PHYS 115 (4,4), OCEAN 210 (3).  
  Option A: CHEM 142, CHEM 152, CHEM 162 (5,5,6), and CHEM 220 (5) or CHEM 223 and CHEM 224 (4, 4); Option B: CHEM 120, CHEM 220, CHEM 221 (5, 5, 5).

**Mathematics and Statistics**

Minimum of 15 credits beyond MATH 120, to include Q SCI 291, Q SCI 292 (5, 5) or MATH 124, MATH 125 (5, 5) or MATH 144, MATH 145 (5,5). Q SCI 381 (5).

**General Education**

*Individuals & Societies (IDS):* Minimum of 10 credits to include one course (3 credits minimum) in economics and one course (3 credits minimum) in law, policy, or ethics. See adviser for list of acceptable courses.

*Visual, Literary, & Performing Arts (VLP A):* Minimum of 10 credits.  
*Writing Proficiency:* Minimum of 12 credits, to include 5 credits of English composition drawn from the University list, and at least 7 additional credits of writing-intensive (W) courses.

**Major Requirements**

Minimum of 44 credits to include FISH 210, FISH 310, and FISH 311 (5,5,5); one from FISH 312 (5), FISH 323 (5), or FISH 324 (5); 18 additional credits of upper-division FISH courses, including 12 credits in the student’s chosen focus area; FISH 494 and FISH 495 (3-9,3).

**Minor**

*Minor Requirements:* Minimum of 28 credits to include FISH 210 (5); two from FISH 310 (5), FISH 311 (5), FISH 312 (5), FISH 323 (5) and FISH 324 (5); Q SCI 381 (5) or Q SCI 482 (5); minimum of two upper-division FISH courses totaling at least 8 credits.

**Student Outcomes and Opportunities**

- **Learning Objectives and Expected Outcomes:** The study of aquatic and fishery sciences emphasizes a variety of analytical, quantitative, communication, and technical skills. Coursework provides rigorous undergraduate training and experience in both laboratory and field sciences. The School emphasizes skills in the scientific method of inquiry, data analysis, and written/oral presentation of scientific results. Many students are involved in research projects while enrolled, and all students must complete a research-based capstone project under faculty supervision as a degree requirement. The capstone process leads to synthesis of the student’s scientific results and other knowledge as experience is gained in data analysis and writing. Results from the capstone research are presented by students in a public forum, such as the UW Undergraduate Research Symposium or the SAFS Undergraduate Research Symposium. Each year, some undergraduates have their capstone projects published. SAFS graduates pursue careers in the private sector (environmental consulting firms, private companies), the public sector (state and federal agencies, non-profit organizations, non-governmental agencies, education), and many continue into graduate programs either in research or policy. The undergraduate degree prepares students for either direct employment in a number of fields within public and private sectors, or ensures they are competitive for entry into applicable graduate programs worldwide.

- **Instructional and Research Facilities:** The School of Aquatic and Fishery Sciences is housed in several buildings on the University of Washington campus. In addition, the School maintains various facilities on campus, including field research stations in Washington State and Alaska.

- **Buildings:** The Fishery Sciences Building, housing most of the School’s faculty, staff, and graduate students, was completed in autumn 2000, and contains numerous laboratories, offices, and classrooms. Teaching facilities include a large auditorium, several classrooms with state-of-the-art audiovisual equipment, extensive laboratories, and two computer classrooms/labs. The PC Lab is open for general student use when not being used as a classroom. The GIS Lab is mostly used for mathematical/statistical applications and Geographic Information Systems.

The Marine Studies Building is home to the Marine Molecular Biotechnology Laboratory, containing extensive facilities for molecular genetic research.

The Fisheries Teaching and Research building is connected by walkways to the adjacent Marine Studies Building, and houses faculty, staff, and graduate students in laboratory-based disciplines. The Pacific Northwest Regional Fish Collection and its affiliated ichthyological faculty, staff, and students are also housed in the building. Facilities include several new classrooms and teaching laboratories, environmental chambers, and research laboratories.

- **Other Facilities:**
  - **Marine Molecular Biotechnology Laboratory (MMBL):** Located in the Marine Studies Building, the MMBL was established in 1993 as a joint facility of the School of Aquatic and Fishery Sciences and the School of Oceanography. It is directed by four faculty who carry out research projects in conservation genetics, molecular ecology, environmental genomics, and phytoplankton ecology. The MMBL is equipped for most types of research in molecular biology, including DNA sequencing and
other types of nucleic acid and protein analysis, molecular cloning, and tissue culture. Laboratory facilities include two computerized, laser-based fluorescent imaging systems for DNA sequencing and other forms of genetic analysis, a fluorescence microscope, thermal cyclers, and protein purification equipment.

- **Research and Teaching Hatchery:** A salmon return pond and large outdoor raceways are located just south of the Fisheries Center. In the late fall, adult Chinook and Coho salmon return to the pond to complete their life cycle and replenish the natural living resource. The School also maintains a field station at Big Beef Creek on Hood Canal. This station has a native salmon stream plus abundant well water, pristine tidallands, and access to seawater in Hood Canal. Laboratory and housing facilities are available to researchers.

- **University of Washington Fish Collection:** The School’s Fish Collection, constituting one of five major permanent facilities on the West Coast, includes an extensive array of preserved fishes. Presently, the collection contains more than 230,000 juvenile and adult specimens, and well over 3.3 million eggs and larvae, representing about 3,778 species in 1,419 genera and 310 families. About 25% of the material consists of freshwater species, primarily from Washington, Oregon, and Alaska. The remainder are marine fishes and invertebrates collected mainly in the eastern North Pacific Ocean, from the Aleutian Islands to Baja California, and in the western tropical Pacific, from Christmas Island to Guam and the Philippines. Curators of the collection make specimens available upon request to researchers within and outside SAFS, and provide ichthyological information to the public.

- **Alaska Field Stations:** The School maintains six field stations in the Bristol Bay region of Alaska. Two field camps are located at Lake Iliamna (Iliamna, Porcupine Island), one at Chigik Lake, and three on the Wood River Lakes (Aleknagik, Nerka, Kulik). Each field station features cabins, boats, laboratory space, and equipment to support research activities. The stations are occupied primarily during summer months in support of various types of studies on salmon. The quality of the habitats surrounding the stations ranges from excellent to nearly pristine, and the sites are either within or adjacent to state or national parks. Unlike the habitats in the lower 48 states, the fish communities have not been influenced by species introductions, the genetic composition of the populations has not been affected by hatcheries or transplants, and the habitats have experienced no logging or agriculture. The field stations are therefore a unique opportunity to carry out research on relatively undisturbed populations. The School offers a course at these field stations, with the goal to provide a small number of students with direct, hands-on training in the theories and techniques of research in aquatic ecology.

- **Vessels:** The School uses various small vessels for instructional and research work, including tow-netting, purse seining, and trawling. Training cruises introduce students to shipboard operations.

- **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See **www.cofs.washington.edu/people/honors.html** for requirements.

- **Research, Internships, and Service Learning:** SAFS scientists work closely with employers in both the public and private sectors, leading to opportunities for undergraduates to receive both internship and research experience. Scientists from area agencies come to the School to attend weekly SAFS departmental seminars. Undergraduates are encouraged to attend. Recently these connections have resulted in research and internship opportunities for SAFS undergraduates at NOAA, National Marine Fisheries, Alaska Fisheries Sciences Center, National Marine Mammal Lab, the U.S. Forest Service, the Student Conservation Association, and the Seattle Aquarium. The College of Ocean and Fishery Sciences is second only to the UW Medical School in federal research dollars brought to the UW campus, providing many paid hourly student positions within the department.

- **Department Scholarships:** Scholarships are awarded on the basis of academic merit and other factors. The annual application process for continuing students begins in spring; check with the Office of Student Services for applications and deadlines.

- **Student Organizations/Associations:** SURF (Society for Undergraduate Resources in Fisheries) organizes social, career, and educational activities for undergraduates in Aquatic and Fishery Sciences. SURF also prints t-shirts, welcomes new students to the program, represents the program at events, and collaborates with student groups in other related departments on events.

**Of Special Note:**

- The College of Ocean and Fishery Sciences has its own career coordinator who organizes quarterly workshops, an annual career fair, an email list of openings related to the aquatic sciences, and who meets individually with both current students and alumni.

- Since 1999, the School of Aquatic and Fishery Sciences has sent six students and three faculty members to two Alaska Salmon Field Stations for a six-week course in aquatic ecology. These students receive education in ecology, limnology, population modeling, field techniques, scientific writing, and presentation skills.

**Graduate Program**

Graduate Program Coordinator
116 Fishery Sciences, Box 355020
206-616-5893
safs@u.washington.edu

The School offers programs leading to the Master of Science and Doctor of Philosophy degrees.

**Admission Requirements**

Minimum requirements for admission to the graduate program in the School are a bachelor’s degree from an institution of recognized standing, a GPA of 3.00 in the last two years of college work, and approval of the School and the Graduate School. Students enter the School from varied disciplines at many universities. All have in common a strong background in the sciences and mathematics. Previous training in fisheries is not required.

Applicants for the graduate program must submit a completed application form and description of their interests and objectives, GRE scores (general test only is required), transcripts of all previous college course work, three letters of recommendation, and a TOEFL score (only for applicants who are non-native English speakers). Admission is also dependent upon program resources and fit between student and program. Admissions are limited to autumn quarter. Applicants should review complete application materials, including a list of faculty and their research interests, on the School’s Web page.
Master of Science
Applicants without a master’s degree from a recognized school are expected to start at the master’s level. A minimum of 45 quarter credits, including completion of a thesis research project, leads to the Master of Science degree. A minimum of 45 400-level or graduate credits must be earned, including successful completion of the School of Aquatic and Fishery Sciences core curriculum plus 18 credits of FISH 700 (Thesis Research). A seminar on results of the research and oral defense of the thesis are required for graduation. The degree must be completed within six years of initial enrollment.

Doctor of Philosophy
The student must complete at least three years of graduate study (90 credits) and complete a dissertation to earn the Ph.D. Completion of a master’s degree program may be applied toward one year of the doctoral program. The core classes must be taken if the student has obtained a master’s degree from another program or received a master’s degree from the School of Aquatic and Fishery Sciences under a different set of requirements than those outlined here. In some instances, students who have initially been accepted into a master’s program will be allowed to proceed directly to the Ph.D. by applying to bypass the master’s degree, but that is done after the student is in the program at least one year. Preparation for a Ph.D. dissertation requires registration for 27 credits of FISH 800 (Dissertation Research). Requirements must be completed within 10 years.

Financial Aid
General information on graduate student support is available from the Office of Student Financial Aid, 105 Schmitz. The majority of first-year graduate students are offered research assistantships by appropriate faculty members, depending on the availability of research funding. The School of Aquatic and Fishery Sciences also has a limited number of fellowship opportunities for outstanding entering students. Other students may have their studies supported by the agency for which they work or they may be international students with scholarships from their home countries.

Graduate applicants are urged to discuss their financial needs with professors in their potential major fields during the early stages of the graduate application process. The graduate applicant will automatically be considered for any fellowships, research assistantships, or teaching assistantships available from the School of Aquatic and Fishery Sciences when the admissions application is submitted.

Fisheries
Course Descriptions

FISH 101 The Living Aquatic World (5) I&S/NW

FISH 210 Methods in Fisheries and Aquatic Sciences: Theory and Applications (5) NW
Comprehensive survey of the theory and techniques of field research in aquatic sciences. Topics emphasize sampling design, data collection, and interpretation across a broad suite of topics and approaches. Field trips and laboratory sections are mandatory. Recommended: 10 credits in biology.

FISH 250 Marine Biology (3/5) I&S, NW
Lecture-laboratory course in Marine Biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Evening marine biology movies and weekend field trip. Honors section research project. Offered: jointly with BIOL/OCEAN 250.

FISH 296 Study Abroad: Aquatic and Fishery Sciences (0) NW
For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit not does not apply to major requirements without approval.

FISH 297 Special Topics in Fisheries (1-5, max. 5) NW
Selected topics in aquatic science and fisheries.

FISH 310 Biology of Shellfishes (5) NW
Commercially important mollusks, crustaceans, and other harvested invertebrates highlighted with respect to systematics, anatomy, reproductive strategies, feeding, and growth. Examples of species that demonstrate variability in recruitment and complex life cycles. Laboratories, field trips. Recommended: 10 credits biological science.

FISH 311 Biology of Fishes (3/5) NW
Lecture and laboratory, of the morphological, physiological, behavioral, and ecological diversity of fishes of the world; designed to provide a basic foundation for advanced courses in all areas of fish fisheries. 3-credit option does not include laboratory. Recommended: 10 credits biological science. Offered: jointly with BIOL 311; W.

FISH 312 Fisheries Ecology (3/5) NW
Ecological characteristics of fishes and shellfishes in the important freshwater and marine habitats of North America. Relationship between physical aspects of the habitats and community structure. Impacts of human activities on diversity and abundance. Prerequisite: either BIOL 162 or 220; recommended: FISH 210; FISH 311. Offered: Sp.

FISH 323 Conservation and Management of Aquatic Resources (5) NW
Topics include population growth rates, extinction risk, dynamics of populations at low densities, meta-populations, marine reserves, endangered species classification, sustainable harvesting and management institutions. Examines case studies such as salmon, albatross and whales as representative of conservation issues in aquatic sciences. Sampling, experimental design, computer skills and research writing.

FISH 324 Biology and Culture of Aquatic Organisms: Sustainability and the Environment (5) NW
Explores sustainability of the environment and culture of aquatic animal and plant species. Key issues covered include aquatic and near-shore ecosystem conservation, relationship with fisheries, species selection, culture practices, animal health, water quality, transfer regulations, and human health and safety. Extended polyculture project and term paper. Recommended: 10 credits of biology.

FISH 328 Forestry-Fisheries Interactions (4) NW
Characteristics of forestry-fisheries interactions in terrestrial and aquatic landscapes. Effects of changes in landforms on forest and aquatic communities. River basin and watershed features. Forest stand dynamics, forest hydrology, fish and wildlife histories and behavior. Resource conflicts and resolution. Offered: jointly with ESRM 328; W.

FISH 340 Genetics and Molecular Ecology (5) NW
Application of molecular markers to ecology, evolution, and the management of living resources. Emphasis on understanding the strengths and weaknesses of the approach based on case studies. Offered: jointly with BIOL 340. Prerequisite: either BIOL 102 or BIOL 200.

FISH 350 Structure and Process in Marine Organisms (3)
Explores the biological structure and ecological relationships of marine organisms. Emphasizes the role of benthic organisms in nearshore systems, physical forces that shape these systems, and the impacts of environmental change. Recommended: BIOL 250/FISH 250/OCEAN 250. Offered: jointly with OCEAN 350; W.

FISH 351 Field Investigations in Marine Biology (5) Evaluates the relationships between man and marine systems in a field-oriented class. Case studies directly investigate marine biology. Studies include human activities and our effects on marine species and communities. Multiple field trips, lectures, and labs. Prerequisite: FISH 350/OCEAN 350. Offered: jointly with OCEAN 351; Sp.

FISH 401 Systematics, Zoogeography, and Evolution of Fishes (5) NW Advanced course in ichthyology with emphasis on living bony fishes of the world; past and present biodiversity, evolutionary history, classification, comparative morphology, geographic distribution, and historical zoogeography. Recommended: 10 credits biological science.

FISH 404 Diseases of Aquatic Animals (5) NW Overview of communicable and noncommunicable diseases that affect fish and shellfish. Major pathogens of free-ranging as well as captive animals discussed. Students learn to recognize, prevent, and control economically and ecologically important disease syndromes. Recommended: 10 credits biological science.

FISH 405 Molluscan Aquaculture and Fisheries (5) NW Biology, ecology, management, and economic importance of oysters, clams, scallops, mussels, abalones, cephalopods, and other mollusks. Emphasis on techniques for production through aquaculture as well as harvest strategies for wild stocks. Field trips. Recommended: 10 credits biological science.

FISH 406 Crustacean Fisheries and Aquaculture (4) NW Biology, ecology, management, and economic importance of shellfish, emphasizing crustaceans. Wild populations and aquaculture production of important phyla discussed. Field trips. Recommended: 10 credits biological science.

FISH 415 Fish Physiology (5) NW Examines physiological principles and adaptations of fish for growth, metabolism, salt and water balance, digestion, locomotion, special senses, stress, reproduction, and neural and endocrine control mechanisms. Emphasis on environmental physiology and evolution. A nine-week laboratory component involves original experiments with juvenile salmon in hatchery on campus.

FISH 420 Ecology of Marine Fishes (4) NW Focuses on the unique ecological challenges facing marine fishes, including individual, population, community, and ecosystem-scale processes. Prerequisite: either FISH 311 or FISH 312.

FISH 428 Restoration of Fish Communities and Habitats in River Ecosystems (5) NW Examines opportunities to encourage recovery through natural developmental processes that enhance the complexity of habitats and connectivity between habitats in the river basin. Class discussion and participation on field trips focuses on current restoration concepts for ecosystems, designs of projects, and case studies. Recommended: fish ecology and hydrology courses. Offered: odd years; Sp.

FISH 429 Seminar in Streamside Studies (1, max. 6) Discussion by invited speakers on current research and issues related to streamside studies. Speakers are a mix of on-campus and off-campus experts. Credit/no credit only. Offered: jointly with CFR 429; AWSp.

FISH 430 Biological Problems in Water Pollution (3/5) NW Ecological risk assessment of toxic chemicals and problems associated with electrical power production. Considers safety and toxicity and effects on individuals, populations, and communities. Laboratory covers simulation models of chemical exposure and community effects. Recommended: senior or graduate standing in fisheries, engineering, or related field. Offered: jointly with CEE 461.

FISH 434 Applied Limnology and Pollutant Effects on Freshwater (3/5) NW Principles of aquatic ecology that relate to causes and effects of water quality problems in lakes and streams. Population growth kinetics, nutrient cycling, eutrophication; acidification, oxygen/temperature requirements, and effects of various wastes on aquatic animals. Offered: jointly with CEE 462.

FISH 438 Biological Monitoring and Assessment (5) NW Explores the technical questions (conceptual, sampling, and analytical), the rationale, policy relevance, and legal basis for tools — existing and needed — to assess ecological health. Prepares students to see the biological components of ecological systems in diverse ways. Offered: jointly with BIOL 438.

FISH 439 Attaining a Sustainable Society (1/3, max. 3) I&S/ NW Karr Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: jointly with ENVIR 439.

FISH 444 Conservation Genetics (5) NW Advanced genetic concepts and methods related to aquatic species’ conservation and management. Includes genetic diversity, small populations and fragmentation, genetic viability, management of wild and captive populations (including aquaculture), reintroductions, hatchery-wild interactions and forensics. Labs include molecular techniques. Recommended: GENET 371.

FISH 447 Watershed Ecology and Management (3) NW Explores fundamental ecological processes at the watershed scale, identifies human-induced changes to ecological systems, and discusses approaches to improve watershed management. Includes lectures, field trips, and discussions with organizations and agencies about how they are addressing ways to improve watershed management. Offered: W.

FISH 450 Salmonid Behavior and Life History (3/5) NW Marine distribution, homing migration, and spawning behavior of adult salmon: incubation, emergence, migration, and residence of fry; fingerling distribution and residence with reference to species interaction and population evolution. Recommended: FISH 311. Offered: A.

FISH 451 Reproduction and Early Development of Fishes (4) NW Reproductive development, sexual maturation, spawning and incubation in selected fish species; embryology and developmental traits of different salmonid and non-salmonid species; practical experience in artificial spawning techniques, egg handling and care, incubation techniques and the handling of newly-hatched alevins. Recommended: FISH 310; FISH 311.

FISH 452 Aquatic Animal Nutrition (5) NW Nutritional requirements, nutrient interactions of aquatic animals in the wild or raised in captivity for purposes such as stock enhancement, food production, the aquarium/ornamental fish industry. Nutritional needs of marine mammals. Feed ingredients, formulation techniques, environmental impacts. Experimental design, completion of laboratory nutritional study. Recommended: 10 credits biological science.
FISH 453 Spatial Information Technologies in Ecosystem Sciences (3) NW Logsdon
Introduction to the use of GPS, GIS, and Remote Sensing in the ecosystem sciences. Integrates these technologies in an applied research setting. Two overnight weekend field trips required. Offered: jointly with OCEAN 452.

FISH 454 Ecological Modeling (4)
Key concepts in ecological modeling and quantitative methods, focusing on the rational, interpretation, and motivation for modeling in ecological sciences. Individual-based, population matrix, and ecosystem models. Excel and Matlab-based computer exercises, simple model building, readings.

FISH 455 Fish and Wildlife Toxicology (3/5) NW
Overview of fish/wildlife toxicology: history of the field; regulations; methods used to assesses risks contaminants pose to fish/wildlife; classes of contaminants and their direct, sublethal and indirect effects; and contemporary threats of contaminants to fish/wildlife, their habitats and prey. Includes laboratory. Offered: jointly with ESC 457; W.

FISH 456 Introduction to Quantitative Fishery Science (5) NW
Conveys fundamental concepts of fish population dynamics and fishery management within context of real-world fisheries problems. Lectures discuss notation, terminology, mathematical models, fisheries principles, and case studies. Laboratory time devoted to practical applications, problems. Recommended: either MATH 125, MATH 135, or Q SCI 292; Q SCI 381. Offered: jointly with Q SCI 456; A.

FISH 457 Design and Evaluation of Marine Protected Areas (4) NW
Ecological basis for designing and implementing Marine Protected Areas (MPA) as part of a conservation or management program, and techniques used to evaluate effectiveness of MPA networks. Metapopulation and community structure, landscape ecology, spatial analysis, geographic information systems (GIS), sampling design, mapping, and monitoring methods. Recommended: Q SCI 381.

FISH 458 Fisheries Stock Assessment (4) NW Francis
Emphasizes quantitative analysis of fisheries data to determine how the fishery would respond to alternative management actions. Major topics include production models, stock and recruitment, catch at age analysis, and formulation of harvest strategies. Recommended: either Q SCI 456 or FISH 456. Offered: jointly with Q SCI 458; Sp.

FISH 473 Limnology (3) NW
Ecology, conservation, and management of inland aquatic ecosystems. Explores interactions among biological, chemical, and physical features of lakes and other aquatic habitats. Prerequisite: either BIOL 102, BIOL 162, BIOL 18 0, or BIOL 203. Offered: jointly with BIOL 473.

FISH 474 Limnology Laboratory (2) NW
Examination of biota of fresh waters, survey of limnological methods, analysis of data, and writing of scientific papers. Prerequisite: BIOL/FISH 473, which may be taken concurrently. Offered: jointly with BIOL 474; A.

FISH 475 Marine Mammalogy (3/5) NW
Evolution, taxonomy, physiology, life history, and behavior of marine mammals; the techniques of studying and the management and conservation of them. Recommended: 15 credits of biological science, vertebrate anatomy, and physiology, for laboratory sections.

FISH 478 Topics in Sustainable Fisheries (3, max. 9) Parrish

FISH 480 Marine Resource Conservation and Management (3) I&S/NW Gallucci, Miller
Techniques and philosophy for conservation, management and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with ENVIR 480/SMA 480.

FISH 490 Aquatic Microbiology (3/5) NW
Basic principles of aquatic microbiology and aquatic microbial ecology: role and identity of aquatic microorganisms; introduction to modern methodologies for research. Laboratory work with local freshwater and marine samples for those enrolled in 5-credit section. Offered: jointly with MICROM 490; recommended 15 credits of biological science, 10 credits of chemistry.

FISH 491 Aquatic Ecological Research in Alaska (12) NW
Intensive, full-time research training experience where a team of students works on focused research problems guided by a group of faculty, postdoctoral, and graduate student mentors. Examines behavioral ecology, limnology, and population dynamics. Students also choose specific research questions for their own exploration. Course location: Alaska. Offered: S.

FISH 492 Friday Harbor Labs Apprenticeship (9/15) NW
Intensive, full-time research training experience where teams of students work on focused research problems guided by a group of faculty, postdoctoral and graduate student mentors. Research questions vary. Course location: Friday Harbor Laboratories.

FISH 494 Capstone Project I (3-12, max. 24)
Self-directed research or project under direction of a faculty member. Typically includes defining research question, determining methodology, data collection and analysis, writing a paper, and presenting findings. Course is first of two-quarter requirement for graduation for majors. May be taken concurrently with FISH 495, if approved.

FISH 495 Capstone Project II (3)
Self-directed research project under direction of a faculty member. Typically includes defining a research question, determining methodology, data collection and analysis, writing a paper, and presenting findings. May be taken concurrently with FISH 494 with permission of instructor.

FISH 496 Study Abroad: Aquatic and Fishery Sciences (1-15, max. 30) NW
For participants in UW study abroad program. Specific content varies and must be individually evaluated. Credit not does not apply to major requirements without approval.

FISH 497 Special Topics in Fisheries (1-5, max. 5) NW
One-time offerings of topics in fisheries by resident or visiting faculty.

FISH 498 Internship/Experiential Learning (1-15, max. 15)
Structured, practical training in the fishing industry, government agencies and other areas utilizing fisheries, food science, or quantitative science expertise. Experiences are supervised and evaluated. Written reports required. Credit/no credit only. Offered: AWSpS.

FISH 499 Undergraduate Research (1-15, max. 15)
Individual research within the School of Aquatic and Fishery Sciences. Requires one-time offerings of topics in fisheries by resident or visiting faculty.

716
FISH 527 Aquatic Community Responses to Chemical Stress

FISH 504 Fish and Shellfish Pathology (5)
Pathological effects of infectious and non-infectious diseases in fish and shellfish. Emphasis on immunological responses, contemporary diagnostic methods, control strategies, and environmental factors that influence disease transmission.

FISH 507 Special Topics in Fisheries (1-5, max. 15)
Recommended: permission of instructor.

FISH 510 Current Topics in Genetics and Physiology (2, max. 8)
Contemporary problems and issues in genetics and physiology as they relate to fisheries and aquatic sciences. Topics vary. Credit/no credit only.

FISH 511 Current Topics in Evolution, Ecology, and Behavior (2, max. 8)
Contemporary problems and issues in evolution, ecology and behavior as they relate to fisheries and aquatic sciences. Topics vary. Credit/no credit only.

FISH 512 Current Topics in Quantitative Science (2, max. 8)
Contemporary problems and issues in quantitative science as they relate to fisheries and aquatic sciences. Topics vary. Credit/no credit only.

FISH 513 Current Topics in Management, Conservation, and Restoration (2, max. 8)
Contemporary problems and issues in management, conservation, and restoration as they relate to fisheries and aquatic sciences. Topics vary. Credit/no credit only.

FISH 514 Current Topics Aquaculture, Utilization, and Pathology (2, max. 8)
Contemporary problems and issues in aquaculture, utilization, and pathology as they relate to fisheries and aquatic sciences. Topic varies. Credit/no credit only.

FISH 521 Research Proposal Writing for Graduate Students (4)
Practice in reading, writing, critiquing, and evaluating research grant and contract proposals. Lecture and discussion of funding resources, structure of proposals, proposal review, evaluation criteria, and agency feedback. Examples of successful and unsuccessful grant applications. Preparing proposals and critiquing other’s efforts.

FISH 522 Classical Literature of Fisheries Science and Aquaculture (2)
Discussion of the classic literature of aquatic and fishery sciences. Both oral and written communication skills stressed. Credit/no credit only. Offered: A.

FISH 525 Ecology and Behavior of Fishes (3)
Basic principles of ecology and behavior (e.g., habitat associations, competition and predation, migrations and movements, reproductive patterns) as applied to fishes. Critical evaluation of current literature and fieldwork required. Recommended: 311 or equivalent or permission of instructor.

FISH 526 Advanced Fisheries Ecology II: Populations, Communities, and Ecosystems (5)
Recent advances in the study of aquatic communities and ecosystems in relation to a number of contemporary issues in fisheries science and management. Focus on case histories drawn from freshwater, estuarine, and marine ecosystems. Emphasis on relationships between science and public policy in attempting to resolve these issues.

FISH 527 Aquatic Community Responses to Chemical Stress (3)
Aquatic ecotoxicology; bridging the gap between physiological and ecosystem responses to toxic chemicals. Detecting effects against natural variability; altered species abundances and dominance, counter-intuitive responses. Case histories, controversies on data interpretation. Recommended: at least one course in ecology, limnology, oceanography or permission of instructor.

FISH 529 Topics in Streamside Studies (1)
Discussion by invited speakers on current research related to streamside studies. Offered: jointly with CFR 529; AWSp.

FISH 530 Application of Bioenergetics Models to Aquatic Food Webs (4)
Modeling framework quantifying bioenergetics, including consumption, growth, nutrient recycling and contaminant bioaccumulation; links physiology and behavior of individual organisms to ecological processes within populations and aquatic food webs. Common applications include estimating predation, carrying capacity, or growth potential in different habitats. Recommended: regression course.

FISH 535 Aquatic Toxicology (3)
Principles of toxicology applied to aquatic organisms. Recognition of physiological and biochemical responses of organisms to toxins and practical application of toxicity testing methods to identification of pollution and toxins in aquatic environment. Toxicity test design, interpretation, and data analysis. Recommended: organic or biochemistry and physiology or equivalent or permission of instructor.

FISH 539 Forestry-Fisheries Interactions: Case Studies (3)
Case studies of streamside management situation at the watershed and basin level. Topics include resource conflict resolution, current and future management alternatives, landscape dynamics, role of disturbance, and policy options. Prerequisite: graduate standing in forestry, fisheries, or related field; undergraduates by permission of instructor. Offered: jointly with ESC 539.

FISH 542 Principles and Applications of Molecular Methods (3)
Techniques of molecular analysis with emphasis on DNA methods, including PCR, DNA sequencing, RFLP, RAPD and VNTR analysis and cloning. Applications of these techniques to fisheries, aquaculture, oceanography, population and evolutionary studies, and other areas of science. Prerequisite: permission of instructor. Offered: jointly with OCEAN 574; A.

FISH 543 Molecular Techniques (4)
Laboratory on DNA methods. Experiments analyzing genetic variation at the intra- and interspecific level, including one experiment of student’s own design. Techniques include DNA extraction and quantitation, PCR, DNA sequencing, RFLP analysis and cloning. Prerequisite: FISH 542 or OCEAN 574 or permission of instructor. Offered: jointly with OCEAN 575.

FISH 547 Stream and River Ecology (5)
Characterizations of stream and river ecosystems from a watershed perspective. Emphasis on fundamental processes affecting the structure and dynamics of aquatic communities and the riparian zone. Resource conflicts, new technologies, field trips, and class projects. Offered: jointly with CFR 547; Sp.

FISH 548 Special Topics in Streamside Studies (2, max. 6)
Contemporary problems and issues in forestry, fisheries, and wildlife management in watersheds. Topics vary, yet focus on interactions of land and water resources in the forests of the Pacific Northwest. Recommended: permission of instructor. Offered: jointly with ESC 548.

FISH 552 Current Topics in Aquatic Animal Nutrition (5)
Nutrient requirements of finfish, shellfish, ornamental fish, and marine mammals for growth, development, and reproduction. Fish feed formulation techniques. Critical review of historical papers and current literature in aquatic animal nutrition. Offered: Sp.

FISH 556 Mathematical Analysis in Fisheries Stock Assessment (3)
Analytic approaches to stock assessment and population management applications of parent-progeny models and logistic models; biological and economic yields of natural populations; analysis of population data on computers. Recommended: Q SCI 292, 392, 456, and 483 or permission of instructor.

FISH 557 Estimation of Population Parameters (4)
Statistical analysis of population data; design and analysis of mark-recapture experiments on natural populations; laboratory work on computers. Recommended: probability theory and Q SCI 292 and 483.

FISH 558 Advanced Analysis in Fisheries Stock Assessment (3)
Deterministic and stochastic representations of age-dependent and size-dependent models for stock assessment; analysis of multi-species models; risk analysis and uncertainty in fisheries management strategies; analysis of population data on computers. Recommended: 456, 458, 557, or permission of instructor.

FISH 559 Marine Fish Biology (9)
Taxonomy, ecology, and life history of the fishes of the San Juan Islands and northeast Pacific Ocean. Prerequisite: permission of instructor. Offered: Friday Harbor Laboratories.

FISH 578 Graduate Topics in Sustainable Fisheries (2, max. 6)

FISH 581 Fishery Management: Case Studies (3)
Examination of historical case studies chosen to illustrate specific fishery management problem areas. Faculty presentations occupy first half of quarter, student presentations the second half. Prerequisite: FISH 580. Offered: jointly with SMA 581.

FISH 582 Fishery Management: Contemporary Issues (5)
Focuses on multi-disciplinary, in-depth analysis of specific problems, including biological and economic assessments, evaluation of alternative management systems, and formulation of specific research, data collection, and management recommendations. Prerequisite: FISH 581. Offered: jointly with SMA 582.

FISH 600 Independent Study or Research (*)
Credit/no credit only.

FISH 700 Master’s Thesis (*)
Credit/no credit only.

FISH 800 Doctoral Dissertation (*)
Credit/no credit only.

uwsm@u.washington.edu

Master of Marine Affairs
The School of Marine Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses from marine affairs, economics, law, marine sciences, and public affairs.

The School of Marine Affairs offers an internationally recognized master’s degree program for launching careers in marine policy and administration. Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences. In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the M.M.A. program normally requires two academic years for students who have received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special competence is developed in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and a thesis is prepared and presented under the guidance of a faculty supervisory committee. Individual courses of study may be adjusted to accommodate prior experience and academic background. Mid-career and other qualifying students can apply to follow a non-thesis track emphasizing additional coursework and a degree project.

Admission Requirements
Admission to the School of Marine Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general-test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. Applicants must apply directly to, and be accepted by, the University’s Graduate School. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

Financial Aid
The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.

Course Descriptions
SMA 103 Society and the Oceans (5) I&S/SNW
Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons". Offered: jointly with ENVIR/SIS 103

SMA 433 Environmental Degradation in the Tropics (5) I&S/
SMA 455 Marine Business Environment in Russia and Eastern Europe (3) I&S Kaczynski
International marine business environment of Russia and the maritime nations of East Europe; their transition process from communist to free market economic systems. Covers aspects of doing business in marine-related fields such as shipping, fisheries, shipbuilding, ports, and land infrastructures, marine tourism, and water sports. Offered: jointly with SIS 433/SMA 433.

SMA 476 Introduction to Environmental Law and Process (3) I&S Bryant, Hershman
Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with ENVIR 476; A.

SMA 480 Marine Resource Conservation and Management (3) I&S/NW Gallucci, Miller
Techniques and philosophy for conservation, management and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480/ENVIR 480.

SMA 485 Pacific Recreation and Tourism Issues (3) I&S/NW Miller
Examines how marine tourism links people to one another and to the environment. Utilizes concepts from cultural anthropology, sociology, political science, geography, ecology, conservation biology, and planning. Topics include: ecotourism, ethnic tourism, marine parks and protected area, fisheries, sustainable development, tourism ethics, and marine environmental education.

SMA 499 Undergraduate Research (1-15, max. 15)
Research on assigned topics under the supervision of faculty members. Prerequisite: permission of instructor.

SMA 500 Marine Affairs (5) Hershman
Surveys a wide range of academic disciplines and substantive problems pertinent to interaction of human beings and the world’s oceans and coasts. Management of living/nonliving resources, shipping, scientific research, pollution, recreation, and others. Lecture and discussion by invited specialists.

SMA 501 Integrated Marine Affairs Practice (3)
Introduction to the practice of integrated assessment in marine affairs through the use of case studies and group analysis projects. Prerequisite: SMA 500 plus two of the following: SMA 519, SMA 536, SMA 591, or permission of instructor. Offered: A.

SMA 506 International Law of the Sea (3)
Offered: jointly with LAW B 561.

SMA 507 International Organizations and Ocean Management (3) Miles
Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and of processes that support or constrain these organizations. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with PB AF 538.

SMA 508 National Marine Policy Processes (3) Miles
Comparative institutional dimensions of marine policy processes. Marine policy context at the national level and the dynamics that drive policy formulation and policy implementation.

SMA 509 Integrated Coastal Management (3) Christie, Hershman
Managing multiple uses of coastal waters and the adjacent land; conflicts arising from competition for space and resources; organization, scientific, and economic problems associated with coastal management; planning and management experience in the United States and Southeast Asia. Prerequisite: SMA 500 or permission of instructor.

SMA 510 Topics in Marine Ecology (3) Klinger
Study of ecological principles as they apply to marine species, populations, and ecosystems, using current examples from the primary literature, including contemporary issues such as species declines, species additions, pollution, and global change. Offered: W.

SMA 512 Interviewing Methods and Environmental Topics (3) Miller
Focuses on qualitative techniques employed by social scientists and other researchers (e.g., sociologists, cultural anthropologists, political scientists, journalists, reporters) in interview situations. Students conduct interviews and limited participant observation with people in public, private, and activist sectors. Relevant to students with interests in marine affairs, forestry, fisheries, and environmental studies.

SMA 514 Marine Pollution Management Issues (3) Leschine
Management and policy aspects of marine environmental protection, emphasizing the two-way interaction between environmental managers and environmental and policy scientists which shapes policy.

SMA 515 U.S. Coastal and Ocean Law (4) Hershman
Study of the legal framework in the United States controlling allocation and use of coastal and marine resources. Topics include coastal zone management, fisheries management, protection of marine mammals and endangered species, marine pollution, offshore oil and gas development, and marine transportation. Offered: jointly with LAW B 565.

SMA 516 Seaport Management (3)
Role of port and harbor agencies in management of marine uses: cargo and trade, economic development, tourism and recreation, fisheries, environmental protection. Management functions of planning, marketing, finance, engineering, environmental assessment. Examples and guest speakers from Port of Seattle and other Puget Sound ports. Prerequisite: SMA 500 or permission of instructor.

SMA 517 Marine Uses: Transportation and Commerce (3) Hershman
Role of the oceans in the transportation of people and materials, character and trends in vessel design and terminal facilities, pattern and nature of industry organization, regulations, economics of the shipping industry, management of fleets and vessels, individuals at sea and ashore, national policies affecting the merchant marine and port facilities. Prerequisite: SMA 500 or permission of instructor.

SMA 519 Marine Policy Analysis (3) Leschine
Goal is appreciation for and basic working knowledge of techniques used in policy analysis. Techniques are explored in both quasi-realistic settings and in application to real world problems of marine policy.

SMA 521 Governmental Responses to Global Climate Change (3) Miles
Exploration of major scientific, policy and legal issues pertaining to problems of global climate change including regime design, use of
climate models, impact on hydrology water resources, and forests.

**SMA 523 International Science and Technology Policy (3)**  
*Miles*  
Analyzes the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries. Deals with international implications as countries make policies in regional and global organizations. Examples chosen from space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploration.

**SMA 525 Marine Protected Area Management and Science (3)**  
*Fluharty, Klinger*  
Examines management and scientific issues involved with the design, establishment, operation, and maintenance of MPAs. Offered: Sp.

**SMA 536 Applied Microeconomics for Marine Affairs (3)**  
*Huppert*  
Acquaints students with microeconomic tools commonly employed in policy analysis. Emphasis is placed on mastery of basic concepts, definitions, and models useful to marine policy, including determinants of price and outputs in competitive markets, effects of other market structures, market failure, and applied welfare economics.

**SMA 537 Economic Aspects of Marine Policy (3)**  
*Huppert*  
Development of pertinent economic concepts and their application to selected topics in marine policy decision making, including maritime policy, OCS oil and gas development, and wetlands management. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with ECON 537; W.

**SMA 538 Economics of Living Marine Resources (3)**  
*Huppert*  
Develops pertinent economic concepts and applications for conservation, regulation, and restoration of fisheries and other living resources. Gives special attention to fishery management, including harvest regulation and enforcement, recreational fisheries evaluation, property rights regimes, contemporary issues, and marine protected area management. Offered: jointly with ECON 538; Sp.

**SMA 540 International Strategic Planning for Marine Resources (3)**  
*Kaczynski*  
Marine economies are affected by shrinking resources, population pressure, expanding economic globalization. Case studies from the third world and economies in transition illustrate strategic economic planning. Students research selected topics. Prerequisite: SMA 500 or permission of instructor. Offered: A.

**SMA 555 Russian Ocean Policy (3)**  
*Kaczynski*  
Russian ocean policy following Perestroika and disintegration of Soviet empire. Discusses Russian navy, fishery industry, merchant marine, ocean research fleet in light of international agreements and joint ventures and new politic, economic, and social environments. Prerequisite: knowledge of Soviet/Russian socio-economic problems or permission of instructor. Offered: jointly with SISRE 555.

**SMA 570 Thesis Presentation (1)**  
*Fluharty*  
Completion of the thesis requirement for SMA. Prepare a professional presentation to a peer audience. Offered: AWSpS.

**SMA 581 Fishery Management: Case Studies (3)**  
*Huppert*  
Examination of historical case studies chosen to illustrate specific fishery management problem areas. Faculty presentations occupy first half of quarter, student presentations the second half. Prerequisite: SMA 580 or permission of instructor. Offered: jointly with FISH 581.

**SMA 585 Climate Impacts on the Pacific Northwest (4)**  
*Mantua, Snover*  
Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S/ESS/ENVIR 585; Sp.

**SMA 591 Marine Science in the Coastal Zone (3)**  
*Klinger*  
Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with OCEAN 591; A.

**SMA 600 Independent Study or Research (*)**

**SMA 700 Master’s Thesis (*)**

---

**Oceanography**

108 Oceanography Teaching Building

Oceanography is the study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere. The study is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean’s resources for the benefit of humanity. It is an interdisciplinary science integrating the basic principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

**Biological Oceanography**

Examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms. Studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.

**Physical Oceanography**

Endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

**Undergraduate Program**

student@ocean.washington.edu

The School of Oceanography offers the following programs of
study:
- The Bachelor of Science degree with a major in oceanography
- The Bachelor of Arts degree with a major in oceanography
- Specializations include biological, chemical, or physical oceanography, or marine geology and geophysics
- A minor in oceanography

Bachelor of Arts

Suggested Pre-College Courses: A high school student considering oceanography as a career should be guided by an interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, and physics recommended.

Suggested First- and Second-Year College Courses: BIOL 161-BIOL 162 or BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152; ESS 101 or ESS 210; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123. Students should complete the calculus, general chemistry, and either the biology or physics sequences before autumn quarter of the junior year.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Same as for the Bachelor of Science degree (see below), except only 10 credits of upper-division science, mathematics, or engineering courses are required.

Bachelor of Science

Suggested Pre-College and First- and Second-Year College Courses: Same as for Bachelor of Arts degree (shown above).

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Graduation Requirements

Minimum 180 credits, to include the following:
- MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; ESS 101 or 210; and BIOL 161-BIOL 162 or BIOL 180, BIOL 200, BIOL 220 (55-60 credits)
- OCEAN 200, OCEAN 210, OCEAN 220 (taken for writing credit), OCEAN 400, OCEAN 410, OCEAN 420, OCEAN 430, OCEAN 442, OCEAN 444 (taken for writing credit), and one from the following: OCEAN 401, OCEAN 411, OCEAN 421, OCEAN 431 (39 credits)
- 20 credits of upper-division science, mathematics, or engineering to be selected in the student’s area of specialization in consultation with a faculty adviser (20 credits)
- 20 credits of Visual, Literary, & Performing Arts and 20 credits of Individuals & Societies from the University Areas of Knowledge lists (40 credits)
- 5 credits of English composition and 10 credits of W (writing) courses. 8 of the 10 credits of University-approved W (writing) courses are included within the curriculum. (7 credits)
- Free electives to bring credit total to minimum 180.

Minor

Minor Requirements: 25 credits as follows:
- OCEAN 200, OCEAN 210, OCEAN 220
- One of the following: OCEAN 400, OCEAN 410, OCEAN 420, or OCEAN 430
- OCEAN 442
- 9 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes: The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation. Students engage in field work and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally, students acquire familiarity with the specialized instruments of oceanographic research. The program is designed to prepare students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.
- Instructional and Research Facilities: The School has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The School operates two research vessels: the 274 foot R/V Thomas G. Thompson, used chiefly for open ocean research throughout the world, and the 65 foot R/V clifford A. Barnes, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.
- Honors Options Available: With College Honors; With Distinction (School Honors). See adviser for requirements.
- Research, Internships, and Service Learning: Special opportunities for Oceanography majors are provided by the School’s large research program by involving students in undergraduate research projects and part-time employment.
- Department Scholarships: See adviser for availability.
- Student Organizations/Associations: The Student Oceanographic Society (SOS) provides peer advising, organizes field trips, sponsors alumni career panels, and holds social gatherings.

Of Special Note: OCEAN 101 and other transferable lower-division oceanography courses will count as electives and not as part of the major.

Graduate Program

Graduate Student Services
108 Ocean Teaching, Box 357940
206-543-5039
student@ocean.washington.edu

The School of Oceanography provides excellent instruction and research opportunities at the graduate level in all areas: biological, chemical, and physical oceanography, and marine geology and
geophysics. The program of study emphasizes independent research in conjunction with basic and specialized courses. Interdisciplinary research is encouraged, and students enjoy the opportunity to work across the usual scientific boundaries. Course work during the first two years is required in each option; specialized course work is structured to fit the student’s background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

Admission
Students enter the School from varied undergraduate disciplines at many universities. All have in common a strong background in the sciences and mathematics; most have never taken courses in oceanography. Evaluation of candidates is based on Graduate Record Examination scores, the undergraduate transcript (scholarship and depth), three letters of recommendation, and the applicant’s statement of objectives and interests. Admission can be accommodated at the beginning of any quarter except winter, although autumn entry is most common.

Master of Science
The program of study includes course work in the student’s area of interest and the other oceanography options, and the completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

Doctor of Philosophy
The degree program places a strong emphasis on research following completion of course requirements and General Examination. Upon successful completion of the General Examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the Final Examination.

Financial Aid
Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.

Course Descriptions
OCEAN 101 Survey of Oceanography (5) NW Holistic view of fundamental principles of ocean science; the geography and geology of ocean basins; chemistry of sea water; physical dynamics of currents, waves, and tides; coastal processes; and the biology of diverse ecosystems such as deep sea vents, coral reefs, and estuaries. Intended for nonmajors. Offered: AWSpS.

OCEAN 200 Introduction to Oceanography (3) NW Description of the oceans. Emphasis on relationships of biology, chemistry, geology, and physics in marine environments. Examination of relationships and interactions at macro-, meso-, and microscales in the ocean. Intended for science majors. Offered: A.

OCEAN 210 Ocean Circulation (3) NW The large-scale circulation of the ocean. Topics include temperature-salinity analysis; water mass identification; water, salt, and heat budgets; chemical tracer distributions; advection and diffusion. Prerequisite: either Ocean 101 or Ocean 200; either PHYS 114 or PHYS 121. Offered: W.

OCEAN 220 Introduction to Field Oceanography (3/5) NW Design and conduct a field study in oceanography. Field trip required (usually during Spring break). Focus on active learning, deployment of instruments, data collection, interpretation, and presentation. Honors section incorporates additional field experimentation and study in marine biology. Writing class. Prerequisite: either OCEAN 210 or OCEAN/FISH 250, BIOL 250. Offered: Sp.

OCEAN 230 Rivers and Beaches (3/5) Montgomery, Nittrouer
Introduction to Earth surface environments, the processes that shape them, how humans affect them and are affected by them. Weekend field trips examine mountains, rivers, deltas/estuaries, beaches, and environments beyond. Focus on linkages between these environments to illustrate coupling between landscapes and seascapes. Offered: jointly with ESS 230.

OCEAN 240 Contemporary Issues in Oceanography (1-5, max. 9) NW Selected topics of contemporary interest in oceanography such as hydrothermal vents, planetary volcanism, biogeochemical cycling, the ecology of Puget Sound, and the ocean’s role in climate.

OCEAN 250 Marine Biology (3/5) I&S, NW Lecture-laboratory course in Marine Biology focusing on physical, biological, and social aspects of the marine environment. Topics include oceanography, ecology, physiology, behavior, conservation, fisheries, exploration, and activism. Evening marine biology movies and weekend field trip. Honors section research project. Offered: jointly with BIOL/FISH 250.

OCEAN 300 Study Abroad Marine Sciences (1-12, max. 12) Robigou
For participants of Marine Language Exchange Scholarship Program. Specific content varies and must be individually evaluated. Credit does not apply to major requirements without approval. Offered: AWSp.

OCEAN 310 The Puget Sound Nearshore: Processes and Problems (3) I&S/NW An introduction to the geology, ecology, and politics of Puget Sound beaches. Content focuses on beach formation and sediment dynamics, with application to nearshore ecology and shoreline management. Three field trips to local beaches complement topics discussed in class.

OCEAN 350 Structure and Process in Marine Organisms (3) Explores the biological structure and ecological relationships of marine organisms. Emphasizes the role of benthic organisms in nearshore systems, physical forces that shape these systems, and the impacts of environmental change. Recommended: BIOL 250/FISH 250/OCEAN 250. Offered: jointly with FISH 350; W.

OCEAN 351 Field Investigations in Marine Biology (5) Evaluates the relationships between man and marine systems in a field-oriented class. Case studies directly investigate marine biology. Studies include human activities and their effects on marine species and communities. Multiple field trips, lectures, and labs. Prerequisite: FISH 350/OCEAN 350. Offered: jointly with FISH 351; Sp.

OCEAN 400 Chemical Oceanography (4) NW Physical and chemical properties of seawater and marine products; processes determining the chemical makeup of the oceans. Prerequisite: either CHEM 150, CHEM 152, or CHEM 155; either OCEAN 202 or OCEAN 210. Offered: A.

OCEAN 401 Special Topics in Chemical Oceanography (3)
OCEAN 410 Marine Geology and Geophysics (4) NW
Sedimentological and petrologic processes that determine the geologic record. Prerequisite: either ESS 101, ESS 101, ESS 210, GEOL 101, or GEOL 205. Offered: A.

OCEAN 411 Special Topics in Marine Geology and Geophysics (3) NW

OCEAN 420 Physical Processes in the Ocean (4) NW
Physical properties and processes of the ocean: methods of describing ocean currents, waves, tides and mixing and their effect on movement of water parcels. Prerequisite: either PHYS 116 or PHYS 123; either MATH 126, MATH 129, MATH 146, or Q SCI 293; either OCEAN 202 or OCEAN 210. Offered: W.

OCEAN 421 Special Topics in Physical Oceanography (3) NW

OCEAN 422 Ocean Dynamics (3) NW

OCEAN 423 Ocean Circulation and Climate (3) NW
Quantitative treatment of ocean basin to global scale ocean circulation systems and their interaction with climate variability. Prerequisite: PHYS 123; either MATH 126 or MATH 129; OCEAN 401.

OCEAN 430 Biological Oceanography (4) NW
Marine organisms, their quantitative distribution in time and space and their interactions with the ocean. Prerequisite: either BIOL 102, BIOL 203, or BIOL 220; either OCEAN 202 or OCEAN 210. Offered: W.

OCEAN 431 Special Topics in Biological Oceanography (3) NW

OCEAN 442 Oceanography of the Puget Sound (3) NW
Explores the role of oceanography in regional issues. Field opportunities and active investigation of applied oceanographic problems. Lectures, research trip, student co-teaching, discussion. Prerequisite: either CHEM 221, BIOL 203, BIOL 220, ESS 210, or GEOL 205; either OCEAN 430 or OCEAN 433. Offered: A.

OCEAN 443 Design of Oceanographic Field Experiments (3) NW
Case histories, presentations, and class exercises used to teach methods of formulating a research problem and proposal writing. Methods of data analysis, presentation, error estimation, library resource and data base use; web page implementation and design. Principles of cruise planning. Prerequisite: OCEAN 400; OCEAN 410; OCEAN 420; OCEAN 430; OCEAN 442. Offered: W.

OCEAN 444 Advanced Field Oceanography (5) NW
Conduct field experiment (designed in OCEAN 443) during a week-long cruise aboard a research vessel. Analyze samples data and present results in a series of drafts and a final term paper. Results are presented at a two-day-long public research symposium and on the students’ individual Web sites. Prerequisite: OCEAN 443. Offered: Sp.

OCEAN 450 Climatic Extremes (4) NW
Course examines earth history for extreme climatic conditions to predict future climate changes. Numerical climate models use PC-based computer programs to identify processes and feedbacks that control climate. Prerequisite: MATH 125, MATH 145, or Q SCI 292; and PHYS 115 or PHYS 122.

OCEAN 451 Fluid Dynamics Laboratory (4) NW
Individual projects in experimental fluid dynamics with applications to practical problems. Experimental design, visualization, and measurement techniques applied to a problem selected by each student. Prerequisite: PHYS 123.

OCEAN 452 Spatial information Technologies in Ecosystem Sciences (3) NW Logsdon
Introduction to the use of GPS, GIS, and Remote Sensing in the ecosystem sciences. Integrates these technologies in an applied research setting. Two overnight weekend field trips required. Offered: jointly with FISH 455; A.

OCEAN 499 Undergraduate Research (1-15, max. 24)
Research on assigned topics that may involve laboratory work, fieldwork, or literature surveys. Offered: AWSp.

OCEAN 500 Current Problems in Oceanography (1)
Discussion of research topics that are currently being investigated within the school. Credit/no credit only. Prerequisite: permission of instructor. Offered: AW.

OCEAN 501 Estuarine Circulation and Mixing (3)
Observed patterns of currents, mixing, and stratification from deep fjords to shallow coastal plain estuaries. Physical understanding of basic processes, such as tides, wind stress, topographic effects on turbulence, sill hydraulics, and exchange flow. Vertical mixing and residence times important to biological and pollution studies. Prerequisite: permission of instructor.

OCEAN 506 Interdisciplinary Seminar in Oceanography (1-3, max. 12)
Lectures, discussions, and work on selected problems of an interdisciplinary nature. Prerequisite: permission of instructor.

OCEAN 509 Seminar (1)
Introduction to current research topics for beginning graduate students. Credit/no credit only. Offered: AWSp.

OCEAN 510 Physics of Ocean Circulation (3)
Structure of ocean basins; physical properties of seawater and the equation of state; heat, salt, fresh water budgets; tidal potential; Coriolis effect and geostrophic balance; major current systems and water masses; mixing, stirring in the ocean; simple waves; modern experimental methods in physical oceanography. Prerequisite: permission of instructor. Offered: A.

OCEAN 511 Introduction to Fluid Dynamics (4)
Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin’s theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with AMATH/ATM S 505; A.

OCEAN 512 Geophysical Fluid Dynamics 1 (4)

OCEAN 513 Geophysical Fluid Dynamics 2 (3)
Theories, models of large-scale dynamics of oceans, atmospheres. Potential vorticity, Q principles; Rossby waves, ray tracing, Green’s
function, setup of general circulation; atmospheric “channels” versus ocean “basins”; wave-mean flow interaction, mountain drag, internal momentum flux; “Lagrangian” motion of particles, tracers; cascades, eddy flux of heat, moisture, Q. Prerequisite: OCEAN 512. Offered: Sp.

OCEAN 514 Waves (3)
Application of marine hydrodynamics principles to wave motion in oceans. Offered: W.

OCEAN 515 Ocean Circulation: Observations (3)
Modern large- and mesoscale ocean observations, interpreted in terms of contemporary circulation theories. Spectrum of temporal variability; eddies and eddy fluxes; ventilation; advection and diffusion in the abyss; transports of heat and salt; climatic scale of variability; modern methods for determining circulation. Prerequisite: OCEAN 510 or permission of instructor. Offered: Sp.

OCEAN 516 Ocean Circulation: Theories (3)
Hydrodynamic theories concerning origin and characteristics of major ocean currents. Prerequisite: OCEAN 512 or permission of instructor.

OCEAN 517 Methods and Measurements in Physical Oceanography (2)
Principal instruments and experimental methods of physical oceanography. Devices and systems that measure pressure, temperature, electrical conductivity, sea state, and velocity. Prerequisite: permission of instructor. Offered: alternate years.

OCEAN 519 Seminar in Physical Oceanography (1, max. 9)
Discussion of selected problems of current interest in physical oceanography. Prerequisite: OCEAN 510 or permission of instructor.

OCEAN 520 Marine Chemistry (3)
Processes controlling the chemical composition of seawater. Chemical distributions in the ocean, marine physical chemistry, chemical equilibrium, and concepts of mass balance. Mechanisms and models used to explain distributions of stable and radioactive isotopes, gases, trace metals, and biochemicals in the world’s oceans. Offered: A.

OCEAN 521 Aquatic Chemistry (3)
Application of physical chemistry and thermodynamics to processes that control chemical composition of natural waters. Equilibrium approach. Acid/base chemistry, the carbonate system, dissolution and precipitation, metal ions in solution, oxidation-reduction chemistry, silicate mineral reactions. Prerequisite: OCEAN 520 or permission of instructor. Offered: A.

OCEAN 522 Marine Organic Geochemistry (3)
Sources, reactions, and fates of organic molecules in the marine environment along with the stable isotope geochemistry of marine organic substances. Prerequisite: CHEM 237 and CHEM 239 or permission of instructor.

OCEAN 523 Geochemical Cycles (4)
Descriptive, quantitative aspects of earth as biogeochemical system. Study of equilibria, transport processes, chemical kinetics, biological processes; their application to carbon, sulfur, nitrogen, phosphorus, other elemental cycles. Stability of biogeochemical systems; nature of human perturbations of their dynamics. Prerequisite: permission of instructor. Offered: jointly with CHEM 523 and ATM S 508.

OCEAN 524 Environmental Chemical Modeling (3)
Benjamin, Murray
Physical/chemical principles controlling the fate and distribution of environmental pollutants, and use of models to apply those principles. Includes modeling of physical transport in conjunction with chemical equilibrium and reaction kinetics. Applications include acid mine drainage, acid deposition, and groundwater and lake water contamination. Offered: jointly with CEE 550.

OCEAN 529 Seminar on Chemical Oceanography (*, max. 9)
Lectures, discussions, and readings on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 530 Biological Oceanography: Bacteria and Protozoa (3)
Bacteria in the marine environment; fate of organic carbon in the ocean and the interrelationship of the carbon cycle with other biogeochemical cycles. Prerequisite: permission of instructor. Offered: W.

OCEAN 531 Biological Oceanography: Phytoplankton (3)
Phytoplankton in the marine environment: ecology, primary productivity, and physiology. Phytoplankton growth and photosynthetic patterns; spatial and temporal distributions of phytoplankton; methods for determining distributions and rates of production and growth. Prerequisite: permission of instructor. Offered: W.

OCEAN 532 Biological Oceanography: Zooplankton (3)
Distribution and abundance of pelagic animals in space and time; analysis of their interactions. Small-scale distributions and behavior, population dynamics and energetics, trophic structure and dynamics, pelagic community structure, models of populations and food chains, secondary production and biogeography. Prerequisite: permission of instructor. Offered: Sp.

OCEAN 533 Biological Oceanography: Benthos (3)
Analysis of marine benthic communities; new research questions and methods; ecologically important physics of benthic boundary layer; theories, mechanics, and observations of deposit feeding; succession as consequence of physical processes and biological interactions. Environments include deep-sea, continental shelves, estuaries, and intertidal, focusing on soft substrata. Prerequisite: permission of instructor. Offered: Sp.

OCEAN 534 Methods and Measurements in Biological Oceanography (2)
Methods for bacteria, phytoplankton, and zooplankton population assessment. Rate measurements of phytoplankton, zooplankton, and bacterial production. Benthos measurements, including deep-sea environments. Prerequisite: permission of instructor.

OCEAN 535 Biological Oceanography: An Overview (3)
Principles and practice of biological oceanography for students with strong background in physical sciences but little recent exposure to biology. Ecological principles at individual, population, and community levels; overview of discipline of biological oceanography; case studies of interdisciplinary problems shared with the physical sciences. Offered: W.

OCEAN 536 Seminar in Geostatistics (1-3, max. 3)
Lectures and discussions on selected problems in the applications of statistics in earth science.

OCEAN 539 Seminar in Biological Oceanography (*, max. 9)
Lectures, discussions, and work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

OCEAN 540 Marine Geological Processes (3)
McDuff, Russ
Principles of thermodynamics, heat and mass transfer, fluid mechanics, continuum mechanics, and time-series analysis applied to marine geological and geophysical data with special applications to thermal balance of the oceanic lithosphere. Offered: W.

OCEAN 541 Marine Sedimentary Processes (3)
Investigates fundamental process of marine sedimentation, including equations characterizing boundary-shear flows, initiation of grain motion, bedload and suspended-load transport, and sediment
accumulation. Applies concepts to sediment dispersal in rivers, deltas, estuaries, beaches, continental shelves, slopes, and rises, with emphasis on the relationships between active processes and resulting deposits.

**OCEAN 542 Sediment Dynamics and Boundary-Layer Physics (4)** Parsons
Theoretical descriptions of sediment transport processes constrained by laboratory demonstrations. The physics of boundary layers, initiation of motion, suspended load, bedload, bedforms, and continua transport (turbidity currents, debris flows, and suspensions) and its application to the geological record. Offered: jointly with ESS 526; W.

**OCEAN 545 Physics of the Oceanic Lithosphere (3)**
Basic principles of elasticity, fluid flow, and heat transport with specific applications to the formation and evolution of the oceanic lithosphere. Includes deformation of the earth, flow in porous media, heat transport, and marine seismological and potential field techniques. Prerequisite: OCEAN 540. Offered: jointly with ESS 568.

**OCEAN 549 Seminar in Geological and Geophysical Oceanography (*, max. 9)**
Lectures, discussions, and field and laboratory work on selected problems of current interest. Prerequisite: permission of instructor. Offered: AWSp.

**OCEAN 550 Geochemistry and Geophysics of Melt Generation (3)**
Mantle flow beneath mid-ocean ridges and hotspots, major element systematics, constraints from trace elements and isotopes on melting and mantle reservoirs, melt extraction, and crustal thickness and axial topography. Prerequisite: OCEAN 544 or permission of instructor. Offered: alternate years.

**OCEAN 551 Marine Seismology (3)**
Practical application of seismic techniques to the study of the ocean basins. Analysis of refraction data, multichannel reflection profiling, surface wave studies, and earthquake analysis. Prerequisite: GPHYS 502 or permission of instructor. Offered: jointly with GPHYS 551.

**OCEAN 552 Seminar in Geophysics and Geological Data Analysis (1)**
Practical geophysical data analysis, map projections, gridding multibeam bathymetry processing, gravity and magnetic anomalies, downward continuation, magnetic inversion, seismic refraction and reflection, and microearthquake locations. Prerequisite: permission of instructor.

**OCEAN 559 Advanced Seminar on Mid-Ocean Ridge Processes (*, max. 9)**
Lectures, discussions, and practical work on selected topics of current interest in mid-ocean ridge research. Prerequisite: permission of instructor.

**OCEAN 560 Atmosphere/Ocean Interactions (3)**
Observations and theory of phenomena of the coupled atmosphere-ocean system. El Nino/Southern Oscillation; decadal tropical variability; atmospheric teleconnections; midlatitude atmosphere-ocean variability. Overview of essential ocean and atmospheric dynamics, where appropriate. Credit/no credit only. Prerequisite: ATM S 509 or OCEAN 512. Offered: jointly with ATM S 560; alternate years; Sp.

**OCEAN 569 Topics in Physical Oceanography (1-4, max. 9)**
Lecture series on topics of major importance in physical oceanography. Offered: AWSp.

**OCEAN 570 Marine Microbial Interactions (1-3, max. 9)**
Structure, function, and dynamics of natural mixed-species populations of marine bacteria and their interactions with higher organisms; mixed-species culture methods; synecological field methods; species assemblages in specialized environments; mutualisms; sites and patterns of genetic exchange. Prerequisite: OCEAN 530 or permission of instructor. Offered: alternate years.

**OCEAN 571 Marine Primary Productivity (1-3, max. 9)**
Patterns and mechanisms of marine phytoplankton primary production. Small-to-global-scale patterns of production; environmental regulation of production; absorption of electromagnetic radiation; fluorescence; carbon fixation; trophic interactions; remote sensing and other optical methods. Prerequisite: OCEAN 531 or permission of instructor. Offered: alternate years.

**OCEAN 572 Zooplankton Ecology (1-3, max. 9)**
Life history strategies, dynamics and production of populations, vertical migration, interspecific interactions and community structure, models of complex assemblages of zooplankton, sampling methods and analysis, spatial heterogeneity. Prerequisite: OCEAN 532 or permission of instructor. Offered: alternate years.

**OCEAN 573 Benthic Biological Processes (1-3, max. 9)**
Processes characteristic of soft-bottom benthic environments; areas and methods of rapid current progress; open research questions; deposit feeding; passive larval recruitment; physical, chemical, geological, and biological feedbacks in ecological succession; scaling of laboratory systems. Prerequisite: OCEAN 533 or permission of instructor. Offered: alternate years.

**OCEAN 574 Principles and Applications of Molecular Methods (3)**
Techniques of molecular analysis with emphasis on DNA methods, including PCR, DNA sequencing, RFLP, RAPD and VNTR analysis and cloning. Applications of these techniques to fisheries, aquaculture, oceanography; population and evolutionary studies, and other areas of science. Prerequisite: permission of instructor. Offered: jointly with FISH 542; A.

**OCEAN 575 Molecular Techniques (4)**
Laboratory on DNA methods. Experiments analyzing genetic variation at the intra- and interspecific level, including one experiment of student’s own design. Techniques include DNA extraction and quantitation, PCR, DNA sequencing, RFLP and VNTR analysis and cloning. Offered: jointly with FISH 542 or OCEAN 574 or permission of instructor. Offered: jointly with FISH 543; W.

**OCEAN 578 Advanced Topics in Biological Oceanography (*, max. 18)**
Specialized research areas. Topic varies each year. Offered at Friday Harbor Laboratories. Prerequisite: permission of director of Friday Harbor Laboratories. Offered: S.

**OCEAN 580 Aquatic Kinetics (3)**
Reaction rates and mass transport in water. Theories of chemical kinetics; experimental results from: CO₂ hydrolysis, Fe, Mn, and H₂S oxidation, stable isotope fractionation, mineral dissolution; homogeneous, heterogeneous, microbial catalysis; reaction and transport at air-water, sediment-water, and O₂/H₂S interfaces. Prerequisite: permission of instructor.

**OCEAN 581 Geochemical Modeling (3)**
Background to modeling concepts frequently encountered in chemical oceanography: box models, advection-diffusion problems, sediment diagenesis equations, and boundary layer (air-water and sediment-water interface) models. Problems requiring application of the models to chemical distributions in the ocean. Prerequisite: permission of instructor.

**OCEAN 582 River Basin Biogeochemistry (3)**
The function of rivers and river basins in transporting materials to the oceans and their importance in biogeochemical cycles. Origin of
water and water routing within drainage basins, sources and modification of dissolved and particulate materials in transport, ecological theory, and estuarine mixing zone transformations. Prerequisite: permission of instructor.

OCEAN 583 Isotope Biogeochemistry (3)
The use of stable isotopes to study biogeochemical cycles in the oceans and atmosphere; specifically carbon, nitrogen, and sulfur cycles. Isotopic effects during photosynthesis, respiration, organic matter degradation. CaCO3 dissolution, methanogenesis, nitrification/denitrification, and sulfate reduction. Prerequisite: permission of instructor.

OCEAN 584 Radiochemical Tracers and Ocean Mixing (3)
Distribution of natural and bomb-produced radioactive tracers in the ocean. Application of models used to derive information concerning time scales of (1) gas transfer at the water atmosphere interface; (2) whole ocean, thermocline, and deep-ocean water circulation; and (3) particulate settling in the marine environment. Knowledge of elementary differential equations suggested. Prerequisite: permission of instructor.

OCEAN 585 Paleooceanography (3)
History of environmental changes on earth over the past 100 million years as reconstructed from records in deep-sea sediments, ice sheets, and other ocean/terrestrial substrates. Examination of isotopic, geochemical, micropaleontological, and dating techniques. Role of the ocean in climate change. Prerequisite: permission of instructor.

OCEAN 586 Current Research in Climate Change (2, max. 20)
Weekly lectures focusing on a particular aspect of climate (topic to change each year) from invited speakers (both UW and outside), plus one or two keynote speakers, followed by class discussion. Offered: jointly with ATM S 586/ESS 586.

OCEAN 587 Climate Dynamics (3) Hartman, Thompson
Examines Earth’s climate system; distribution of temperature, precipitation, wind ice, salinity, and ocean currents; fundamental processes determining Earth’s climate; energy and constituent transport mechanisms; climate sensitivity; natural climate variability on interannual to decadal time scales; global climate models; predicting future climate. Offered: jointly with ATM S 587/ESS 587. Offered: A

OCEAN 588 The Global Carbon Cycle and Climate (3) Quay
Oceanic and terrestrial biogeochemical processes controlling atmospheric CO2 and other greenhouse gases. Records of past changes in the earth’s carbon cycle from geological, oceanographic and terrestrial archives. Anthropogenic perturbations to cycles. Develop simple box models, discuss results of complex models. Offered: jointly with ATM S 588/ESS 588. Offered: W.

OCEAN 589 Paleoclimatology: Data, Modeling and Theory (3) Battisti, Emerson, Steig

OCEAN 590 Advanced Topics in Oceanography (9-18, max. 18)
Advanced topics examining specialized and interdisciplinary areas of oceanographic research. Offered at Friday Harbor Laboratories. Prerequisite: permission of Director of Friday Harbor Laboratories. Offered: S.

OCEAN 591 Marine Science in the Coastal Zone (3) Klinger
Presentation and analysis of the marine science of estuarine, coastal, and open ocean systems, including evaluation and interpretation of scientific information necessary for management. Lectures, discussions, and readings emphasize the relevance of natural processes to marine environmental management and decision-making. Offered: jointly with SMA 591; A.

OCEAN 600 Independent Study or Research (*)
Offered: AWSpS.

OCEAN 700 Master’s Thesis (*)
Offered: AWSpS.

OCEAN 800 Doctoral Dissertation (*)
Offered: AWSpS.

School of Pharmacy
Dean
Sidney D. Nelson

Associate Deans
Nanci L. Murphy
Kenneth E. Thummel
Stanley S. Weber

Established in 1894, the University of Washington School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty and graduates for their outstanding educational, research, and service activities. The School’s Dean’s Office and three departments — Medicinal Chemistry, Pharmaceutics, and Pharmacy — are located in the H-Wing of the Health Sciences Building.

The School of Pharmacy offers a four-year professional program leading to the Doctor of Pharmacy (Pharm.D.) degree. The curriculum is designed to provide students with the scientific background and clinical skills necessary to render pharmaceutical care in a changing health care system. Instructional methods strive to enhance the critical-thinking and problem-solving skills necessary to provide rational drug therapy, promote healthy lifestyles and disease prevention, enhance patient compliance, reduce medication-related problems, and improve health outcomes. The School aspires to foster a commitment to life-long learning and provide an environment where students develop the knowledge, attitudes, and skills consistent with the profession’s high standards. Students have the opportunity to pursue elective choices to design a program compatible with individual areas of interest. Dual degree options include the Pharm.D./Ph.D. programs in Pharmaceutics and Medicinal Chemistry, the Pharm.D./M.S. program in Pharmaceutical Outcomes Research and Policy, and the Pharm.D./Physician Assistant program. Students also have the option of earning the Geriatric Certificate in Pharmacy Practice, the Pharmacy Management Certificate, and the Biomedical Regulatory Affairs Certificate concurrently with their degree. In the final year of the program students complete experiential training at a variety of practice settings. The School of Pharmacy is a member of the American Association of the Colleges of Pharmacy and its programs are accredited by the American Council on Pharmaceutical Education (www.acpe-accredit.org).

Consideration for admission to the professional program requires a minimum of two years of prepharmacy training. An applicant who is admissible to the University is not assured admission to the School of Pharmacy. Admission is competitive and based on a number of factors. Academic preparedness, motivation, oral and written communication skills, critical-thinking ability, and decision-making skills are among the criteria used to determine a candidate’s aptitude for the pharmacy program. Following a preliminary assessment of the applicant pool, the most-qualified applicants are selected for an
interview in Seattle. A writing assessment is also conducted at that time. Further details on admission requirements, application procedures, and program content may be obtained from the School’s Office of Academic and Student Programs or its Web site.

The School also seeks to promote the life-long learning of pharmacists by offering opportunities for post-graduate education and continuing-education seminars. An external Pharm.D. program is available for those pharmacists who would like to pursue an advanced degree beyond the baccalaureate degree. Continuing-education programs are provided throughout the year to meet the needs of the community.

To foster the interests of students who seek to engage in creative discovery and research, the School also offers graduate education leading to the M.S. and/or Ph.D. degrees in medicinal chemistry, pharmacaceutics, or pharmaceutical outcomes research and policy.

Medicinal Chemistry

Graduate Program
Graduate Program Coordinator
H164 Health Sciences, Box 357610
206-543-2224
medchem@u.washington.edu

The Department of Medicinal Chemistry offers programs of graduate study leading to the degrees of Master of Science and Doctor of Philosophy. The primary mission of the program is to train versatile scientists for careers in the pharmaceutical and medical sciences. To this end, graduates of the program acquire a broad knowledge base in medicinal chemistry, pharmacology, and biochemistry, which is important in the rapidly evolving, multidisciplinary biomedical arena. The department further offers diverse opportunities for research at the interface between biology and chemistry, with emphasis on issues of biomedical importance.

Graduates of the program acquire the skills necessary to develop quantitative and qualitative methodologies necessary for the study of biochemical processes that occur at the cellular and subcellular levels. These include the elucidation of biochemical transformations and interactions using techniques such as protein engineering, molecular modeling and dynamics as well as a broad array of supportive spectroscopic techniques including mass spectrometry and NMR.

One major area of research interest is the role of biotransformation processes in the toxification and detoxification of drugs and environmental contaminants. A second area of interest is the determination of protein and small ligand structure and function using computational methods, NMR, mass spectroscopy, and other biophysical techniques. Issues of biomedical importance include elucidation of mechanisms of drug-induced cell toxicity, drug-drug and drug-herbal interactions, identification of enzyme attributes that dictate substrate specificity and catalytic mechanism, pharmacogenetics, structural immunology in vaccine design, biotherapeutics, proteomics, and protein folding in disease states.

Most students proceed directly to the doctoral degree program. Successful completion of a series of cumulative examinations and at least two quarters of teaching experience are among the requirements for completion of the doctoral program.

Admission Requirements
Students who intend to work toward the Doctor of Philosophy degree must apply for admission to the Graduate School and meet the requirements outlined in the Graduate Study section of this catalog. Graduate students must satisfy the requirements for an advanced degree in force at the time the degree is to be awarded. Graduate study requires approval of the Graduate School and the Department of Medicinal Chemistry.

Special Requirements
Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in medicinal chemistry. Undergraduates who plan to pursue graduate study are encouraged to expedite their programs by selection of pertinent electives. Although the choice of electives varies with the student’s ultimate goals, graduate study in medicinal chemistry requires an adequate background in biological and physical sciences.

Master of Science
A student in the master’s degree program must present at least 27 credits of course work, inclusive of thesis and non-thesis research. The student also must complete a research project, prepare an acceptable thesis, and pass a final examination.

Doctor of Philosophy
A student in the doctoral program must present a minimum of 45 credits of course work, inclusive of dissertation and non-thesis research. Credits earned for the master’s degree may be applied toward the doctoral degree. The student must pass a General Examination for admission to candidacy for the doctoral degree. Satisfactory completion of departmental cumulative examinations precedes scheduling of the General Examination. The student must complete a research project, prepare an acceptable dissertation and pass a Final Examination. Research for the doctoral degree must be done at the UW.

Financial Aid
Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the graduate program coordinator for additional information.

Course Descriptions

MEDCH 400 Fundamental Concepts in Medicinal Chemistry (3) W. Nelson
Principles of physical organic chemistry; chemical bonding, stereochemistry, acids/bases, and reaction mechanisms relevant to processes such as drug distribution, specificity, and metabolism. Prerequisite: either CHEM 239 or CHEM 337. Offered: A.

MEDCH 401 Immunizing and Antimicrobial Agents (4) Daggett, Elmer
Chemical and biologic properties of agents used to prevent or treat infectious diseases, including diagnostic, prophylactic, and therapeutic uses of immunizing biologicals and spectrum, action mechanisms, resistance patterns, toxicity, and therapeutic applications of antibiotics, antifungals, and antivirals. Prerequisite: MICROM 301, MICROM 302, MEDCH 450, or equivalent, PharmD major, or permission of instructor. Offered: Sp.

MEDCH 402 Medicinal Chemistry (3) S. Nelson
Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: A.

MEDCH 403 Medicinal Chemistry (3) W. Nelson, Rettie
Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: W.

MEDCH 404 Medicinal Chemistry (3) Atkins, W. Nelson
Study of the various classes of medicinal compounds with particular emphasis on biological activity, mechanism of action, biotransformation, and the structural and physical properties governing
absorption, distribution, and excretion. Prerequisite: MEDCH 400 or satisfactory completion of qualifying exam. Offered: Sp.

MEDCH 420 Alternative and Complementary Medicines (2)

Elmer

Study of popular alternative and complementary medicines used in the United States. Focus on herbal products with some coverage of homeopathic and other non-nutritional dietary supplements. Demonstration of resources for current objective information on these controversial medicines. Credit/no credit only. Offered: A.

MEDCH 435 Diagnostic Medicinal Chemistry (3) S. Nelson

Examination of clinical diagnostic tests with regard to the chemical or biochemical rationale of the testing method, interpretation of test results, and major factors influencing test values with special emphasis on the effects of medications. Clinical laboratory data from patients considered in light of these factors. Prerequisite: MEDCH 451 or BIOC 406 or equivalent, or permission of instructor. Offered: W.

MEDCH 450 Medicinal Biochemistry I (3) Campbell, Kunze

Introduction to biochemistry for Pharm.D. students with an emphasis on those aspects of biochemistry which are particularly relevant to understanding human disease and therapeutic intervention strategies. Offered: W.

MEDCH 451 Medicinal Biochemistry II (3) Campbell, Kunze

Continuation of discussions of those aspects of biochemistry which are particularly relevant to understanding human disease and therapeutic intervention strategies. Offered: W.

MEDCH 452 Medicinal Chemistry Aspects of Drug Action and Drug Metabolism (1)

Discussion of research strategies, methodologies and literature concerning the mechanisms of drug action and drug metabolism, particularly as these apply to opiate drugs and beta blockers. Emphasis placed on experimental problem solving, data analysis, and presentation. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 453 Structure and Function of Macromolecular Protein Assemblies (1) Atkins

Discussion of research strategies, methods, and current literature concerning macromolecular self-assembly processes and protein-protein interactions as they relate to biological specificity.
Emphasis on experimental approaches used in current literature. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 554 The Mechanism of Action and Pharmacokinetics of Biotherapeutic Agents and Other Natural Products (1)
Elmer
Discussion of the literature, research possibilities, and questions that need to be addressed in the area of the application of microorganisms and other natural products for therapeutic purposes. Emphases on problem solving, research strategies, literature evaluation, and data analysis. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 555 Current Topics in Biological Mass Spectrometry (1) Goodlett
Emphasis on applications in the area of protein toxins, bioactive peptides, and microbial diseases and on current developments in the use of small scale separations with mass spectrometry. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 556 Mechanistic Aspects of Drug Metabolism (1)
Kunze
Discussion of research strategies methodologies and new approaches with regard to elucidating the chemical mechanisms and enzymology of metabolic reactions catalyzed by cytochrome P-450. Emphasis on trying to develop in vitro techniques which are predictive of in vivo drug behavior. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 557 Molecular Modeling Studies of Medicinal Chemistry (1) Daggett
Discussion of research strategies, simulation methodologies, and literature concerning protein and peptide structure, function, dynamics, and folding. Credit/no credit only. Prerequisite: permission of instructor. Offered: AWSpS.

MEDCH 558 Human Cytochrome P-450 Biochemistry (1)
Kunze
Presentation and discussion of research strategies and methodologies related to current problems in human drug metabolism by cytochrome P-450 enzymes. Emphasis on hypothesis testing and experimental problem solving in the areas of enzyme kinetics and mechanism. Credit/no credit only. Prerequisite: permission of instructor. Offered: even years; AWSpS.

MEDCH 559 Protein NMR Spectroscopy (1) Campbell
Combines a comprehensive theoretical treatment of high resolution NMR spectroscopy with a practical description of the experimental techniques applicable to proteins and other biological macromolecules. Offered: AWSpS.

MEDCH 582 Topics in Medicinal Chemistry (1, max. 10) Dean
Discussion of pertinent articles from current literature. Offered: AWSp.

MEDCH 590 Doctor of Pharmacy Thesis (1)
Writing intensive course in which students develop a high quality scientific paper that demonstrates grammatical and organizational excellence and the ability to critically evaluate biomedical literature. Credit/no credit only.

MEDCH 599 Cumulative Exams for Medicinal Chemistry (1)
Quarterly cumulative examinations for graduate students. Credit/no credit only. Offered: AWSpS.

MEDCH 600 Independent Study or Research (*)
Credit/no credit only. Offered: AWSpS.

MEDCH 700 Master’s Thesis (*)
Credit/no credit only. Offered: AWSpS.

MEDCH 800 Doctoral Dissertation (*)
Credit/no credit only. Offered: AWSpS.

Pharmaceutics

Graduate Program

Graduate Program Coordinator
H272 Health Sciences, Box 357610
206-543-9434
pceut@u.washington.edu

The Department of Pharmaceutics offers programs of graduate study leading to the degrees of Master of Science and Doctor of Philosophy.

Program Description

The program provides research training in the fundamental aspects of drug disposition, drug delivery, and drug action in animals and man. Drug disposition includes the phenomena of absorption, distribution, and elimination. Pharmacokinetics is the study of the time course of these processes and the time course of pharmacological effects. Drug delivery includes targeting of drugs to tissues or specific cells to improve their therapeutic effect. These areas of research have a wide range of applications, particularly in the pharmacological characterization of new drug molecules in pharmaceutical development. Graduates of this program possess expertise in a variety of analytical techniques and the elaboration of mathematical models to describe drug disposition and pharmacological processes.

During the first two years of study, students take courses in medicinal chemistry, pharmacology, physiology, biochemistry, mathematics, computer science, biostatistics, and pharmacokinetics. The department’s research program includes seven NIH-funded laboratories addressing a variety of fundamental and clinical problems pertaining to drug transport, metabolism, and toxicity associated with several diseases (AIDS, cystic fibrosis, leukemia, epilepsy), as well as pain management and transplantation. Most projects involve collaborative arrangements with investigators from other departments in the University or at the Fred Hutchinson Cancer Research Center. The collaborative relationship of the faculty of the Departments of Pharmaceutics and Medicinal Chemistry in the field of drug metabolism has received worldwide recognition.

Thesis research can involve experimental animal work, in vitro studies, clinical investigation, or a combination of approaches. Graduate students are given the opportunity to participate in interdisciplinary research, providing an added dimension to their training.

A wide range of career paths are available to graduates of this program. Opportunities include research in the pharmaceutical industry; research in hospitals, institutes, and foundations; teaching and research in academic institutions; and positions with government regulatory agencies.

Admission Qualifications

Students with undergraduate degrees in pharmacy, chemistry, or in the biological sciences are accepted for graduate study in pharmaceutics. Undergraduates who plan to pursue graduate study may expedite their programs by selection of pertinent electives. This information can be obtained from the graduate program coordinator.

Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships and other fellowships such as the William E. Bradley Graduate Fellowship and those from the American Foundation for Pharmaceutical Education and from several pharmaceutical companies.
Course Descriptions

PCEUT 331 Pharmaceutical Formulation: Principles and Dosage Forms (4) Bloedow, Lee, Mao, Unadkat, Wang
Physiochemical principles involved in formulating stable dosage forms suitable for human administration. Hands-on laboratory experience with formulating extemporaneous preparations routinely encountered in community and hospital pharmacies. Offered: A.

PCEUT 405 Clinical Pharmacokinetics (5) Anderson, Levy
Basic principles of pharmacokinetics and their application to the clinical setting, including: single-dose intravenous and oral kinetics, multiple dosing, nonlinear pharmacokinetics, metabolite kinetics, pharmacogenetics, and the role of disease in drug clearance and dose requirements, and kinetics of drug-drug interactions. Prerequisite: PCEUT 331. Offered: W.

PCEUT 406 Biopharmaceutics and Drug Delivery (3) Ho, Levy, Shen, Thummel
Basic principles of biopharmaceutics and drug delivery, and their application to therapeutics including oral and non-oral route of drug administration for traditional and biotechnology drugs. Fundamental principles related to assessment of bioavailability and bioequivalence, drug-drug and food-drug interactions for orally administered drugs. Prerequisite: PCEUT 405. Offered: Sp.

PCEUT 495 Special Studies in Pharmaceutics (*, max. 6)
Opportunity to expand the breadth and depth of understanding in specific areas. Credit/no credit only. Prerequisite: Permission of instructor. Offered: AWSpS.

PCEUT 499 Undergraduate Research (1-6, max. 12)
Research problems in drug disposition, drug targeting, and drug development. Prerequisite: Cumulative GPA of 2.5 and permission of the instructor. Offered: AWSpS.

PCEUT 501 Advanced Pharmacokinetics I (5) Ho, Shen, Unadkat
Drug absorption, distribution, excretion, metabolism, and effects in mammalian systems. Compartmental model and model-independent approaches examined. Drug disposition studied in a physiologically realistic context taking nonlinear events into account. Aimed at development of innovative methods for data analysis and evaluation in biological systems. Prerequisite: PCEUT 405 or PCEUT 506, or permission of instructor. Offered: Sp.

PCEUT 502 Pharmacokinetics of Drug Metabolism (4) Kunze, Levy, Thummel
Advanced study of drug metabolism pharmacokinetics. Topics emphasize linear and nonlinear metabolic clearance kinetics, metabolite kinetics, in vitro-in vivo predictions, and drug-drug interaction kinetics. Prerequisite: PCEUT 506. Offered: odd years; A.

PCEUT 503 Drug Transport and Delivery (4) Ho, Hu, Mao, Shen, Unadkat, Wang
Provides advance knowledge of the physico-chemical and biological concepts underlying in vivo transport and delivery of drugs. Prerequisite: PCEUT 506. Offered: odd years; Sp.

PCEUT 506 Pharmacokinetic Principles (2) Thummel
Advanced study of pharmacokinetic concepts. Topics emphasize the physiological basis for mathematical models of drug distribution, clearance, and effect. Material presented in a didactic format with additional interactive discussions. Offered: W.

PCEUT 508 Drug Discovery and Development (2) Gardner, W. Nelson, Shen
Overview of steps that lead to the introduction of new pharmacologic agents for the treatment of disease. Included are the scientific underpinnings of drug discovery, preclinical evaluation, clinical trials, regulatory considerations, and outcomes research. Credit/no credit only. Prerequisite: Pharm D. student, graduate student, or permission of instructor.

PCEUT 510 Pharmacokinetics of Drug Interactions (3) Levy, Shen, Thummel, Unadkat
Common pharmacokinetic mechanisms underlying the clinically important interactions between drugs. Interactions involving gastrointestinal absorption, serum drug protein binding, excretory and metabolic clearance processes are discussed. Prerequisite: PCEUT 405 or equivalent. Offered: A.

PCEUT 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Eaton, Thummel
Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of "gene-environment interactions" that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Prerequisite: GENET 372 or equivalent. Offered: jointly with ENV H 513/PHG 513; A.

PCEUT 520 Seminar (1, max. 15) Wang
Graduate students attend seminars and make one formal presentation per year while in residence; maximum of three presentations. Credit/no credit only. Offered: jointly with MEDCH 520; AWSpS.

PCEUT 534 Pharmaceutical Analysis (3) Kalhorn
Methods of drug and metabolite analysis from biologic matrices. Emphasis on practical aspects of assay design, optimization, and validation. Approaches to troubleshooting both assay methodology and instrumentation problems are also covered. Credit/no credit only. Offered: W.

PCEUT 583 Topics in Pharmaceutics (1, max. 15) Ho
Discussion of pertinent articles from current literature and recent laboratory results. Credit/no credit only. Offered: AWSp.

PCEUT 584 Pharmacokinetic Discussion Group (2)
Student initiated discussions of pharmacokinetics concepts in relation to current literature. Preparatory to departmental cumulative examinations. Credit/no credit only. Offered: S.

PCEUT 586 Pharmaceutical Biotechnology (2/3, max. 3) Ho, Thummel
Current topics in pharmaceuticals and biotechnology focusing on transforming small molecules, proteins, and genes into therapeutic products. Includes new drug therapies, drug design, pharmacogenomics, molecular modeling, high throughput screen, production and stability considerations, and delivery systems of protein and gene therapeutics in relation to pharmacokinetic and therapeutic responses. Offered: Sp.

PCEUT 590 Doctor of Pharmacy Thesis (1)
Writing intensive course in which students develop a high quality scientific paper that demonstrates grammatical and organizational excellence and the ability to critically evaluate biomedical literature. Credit/no credit only.

PCEUT 598 Independent Research (*, max. 24)
Basic and clinical research problems in drug disposition and effect. Prerequisite: 2.5 GPA and permission of instructor. Offered: AWSpS.

PCEUT 599 Cumulative Exams for Pharmaceutics (1)
Quarterly cumulative examinations for graduate students. Credit/no credit only. Offered: AWSpS.

PCEUT 600 Independent Study or Research (*)
Credit/no credit only. Offered: AWSpS.

PCEUT 700 Master’s Thesis (*)
Financial support. Contact the graduate program coordinator for more information on assistantships, and fellowships may be available to prospective and continuing students. Prospective students should apply to the Graduate School section of this catalog. Applications materials can be obtained by contacting the graduate program coordinator in the Department of Pharmacy or by visiting the graduate program Web page.

Pharmacy

Graduate Program

Graduate Program Coordinator
H375 Health Sciences, Box 357630
206-543-6788

The Department of Pharmacy offers graduate training leading to either the Master of Science or Doctor of Philosophy degree.

Program Description

The graduate program in pharmaceutical outcomes research in the Department of Pharmacy provides M.S.- and Ph.D.-level training with a focus on economic evaluation of pharmaceuticals, pharmacoepidemiology, and drug-policy evaluation. Pharmaceutical outcomes research is the study of the health and cost consequences of pharmaceuticals and pharmaceutical-related policies on individuals and populations. Graduates of this program are trained to assess the use, outcomes, and cost of pharmaceuticals and pharmaceutical policies and practices. Students are prepared for careers in (1) teaching and research in colleges and universities; (2) pre- and post-marketing efficacy and safety; (3) policy analysis for industry, health insurance, and governmental agencies; and (4) drug-use management and evaluation within managed health-care organizations.

For the Ph.D. program, successful completion of a doctoral preliminary examination, comprehensive examination, teaching assistantships, and research experience are necessary requirements prior to advancement to candidacy.

Admission Requirements

Students with undergraduate or graduate degrees in a health-science discipline or those with sufficient experience in pharmaceutical outcomes and policy research will be considered for admission. Applicants must apply to the Graduate School and the Department of Pharmacy and meet the admission criteria outlined in the Graduate School section of this catalog. Applications materials can be obtained by contacting the graduate program coordinator in the Department of Pharmacy or by visiting the graduate program Web page.

Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be available to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the graduate program coordinator for more information on financial support.

Course Descriptions

PHARM 301 Self-Care Products and Practices (2) Dawson, Murphy
Addresses a broad range of health concerns including how to identify common conditions amenable to self-care, select appropriate treatment options ranging from non-prescription to non-drug therapies, prevent adverse effects from the use of medications, adopt strategies encouraging healthier lifestyle habits, and learn the rationale behind conventional and alternative/complementary therapies.

PHARM 304 Profession of Pharmacy (3) Pelham
Overview of the profession of pharmacy emphasizing practice opportunities and specialization. Introduction to clinical and ethics case evaluation techniques using the Pharmacist’s Workup of Drug Therapy format. Off-site pharmacy visitation required. Credit/no credit only. Prerequisite: PHARM 309.

PHARM 305 Introductory Pharmacy Practicum (3) O’Sullivan
Preparation and dispensing of prescriptions at Rubenstein Memorial Pharmacy. Designed for Pharm.D. students with little or no experience in pharmacy. Under direct supervision of clinical faculty and other licensed pharmacy preceptors. Credit/no credit only.

PHARM 309 Quantitative Methods I (3) O’Sullivan
Instruction in methods essential for conducting pharmacy calculations, interpreting and evaluating data and literature related to pharmacy, and responding to drug information inquiries from health professionals and patients. Introduction to statistical concepts necessary for pharmacy course work.

PHARM 334 Pharmacy Practice (3) Hammer
Introduces students to principles of contemporary pharmacy practice and pharmaceutical care. Lecture topics include pharmacy practice issues and general knowledge of common medications. Laboratory activities include prescription processing and problem solving, patient education, sterile produce preparation, physical assessment, and other patient care activities. Prerequisite: PHARM 309, PCEUT 331.

PHARM 335 Dispensing Practicum (4) O’Sullivan
Under preceptor supervision, students master competencies necessary for distributional responsibilities in the institutional and ambulatory care pharmacy practice settings. Credit/no credit only.

PHARM 402 Drug Therapy and the Media (2)
Review of media to provide a perspective on disease and drug therapy. Elements include drug discovery and development, clinical trials, the pharmaceutical industry, regulatory agencies, and socioeconomic considerations. Preparation of written and oral summaries of media reports. Offered: jointly with PCEUT 402.

PHARM 403 Chemical Dependency Concepts (2) Kedzierski
Genesis of addiction: harm reduction strategies, legal and ethical considerations, medication management in the substance-abusing population, impaired pharmacist rehabilitation, community resources. Course offered to Pharm.D. professional students. Credit/no credit only.

PHARM 405 The Nature of Scientific Truth (2) Hansten
Drawing on the wisdom of scientists and philosophers, discussion of the nature and limitations of scientific truth, using examples from the practice of pharmacy whenever possible. Emphasizes reasoning errors that are common in science, particularly those that involve the application of scientific information to clinical practice. Credit/no credit only.

PHARM 408 Managed Care Pharmacy: Principles and Practice (3) Fullerton, Penna
Surveys the activities, tactics, and strategies used by managed care to deliver pharmacy services to their members. Includes: formulary development, clinical improvement programs, quality improvement measures, regulatory activities, contracting with pharmaceutical manufacturers, network management, financial issues, sales and market, and provider relations. Open to 2nd-, 3rd-, and 4th-year Pharm D students.

PHARM 409 Applied Pharmacokinetics (2) Anderson, Bauer
Pharmacokinetics of specific drugs. Influence of age, weight, sex, and disease states on patient-specific dosage regimens emphasized. Advanced kinetic concepts are discussed and put into applied context. Prerequisite: PCEUT 405.

PHARM 410 Pharmacy and Women’s Health (2) Anderson, Gardner
Participants gain an overview of the specific up-to-date knowledge of gender-based medicine; an understanding of the implications of gender-based biology and the opportunity to evaluate new research that has implications for the prevention and management of diseases and conditions in women. Credit/no credit only.

PHARM 411 Medical Devices for Home Health Care (3)
Downing
Study of medical devices commonly provided by pharmacists to their patients, including their selection and adaptation for specific patient needs. Lectures include display and demonstration of actual devices.

PHARM 412 Nonprescription Drug Therapeutics (3) Ellsworth

PHARM 413 Foundations and Principles of Pharmacy Education (2) Dawson, Hamer
Teaches principles of education that student educators and pharmacists can use in a multitude of educational environments. Focuses on pharmacy education in general as well as instructional methods and teaching principles. Open to 2nd-4th-year PharmD students. Offered: A.

PHARM 414 Advanced Compounding Skills (1) Hammer, Needham
Prepares the student to create unique, patient-specific pharmaceutical dosage forms used in contemporary pharmacy practice. Includes pre-readings and assignments, a didactic session and a laboratory session, and is offered over a weekend. Credit/no credit only. Prerequisite: PCEUT 331.

PHARM 415 Pharmacoeconomics, Genetics, and Healthcare (2) Ramsey, Veenstra
Provides an introduction to outcomes research and economic evaluation related to pharmaceuticals and genetic technologies. Covers cost-effectiveness analysis and quality of life evaluation. Discusses the use of economic evaluation in healthcare to affect policy decisions.

PHARM 416 Chemical Dependency Issues in Practice (3) Kedzierski
Emphasis on drug classes, pharmacologic management of abstinence and withdrawal, drug testing, drug use in pregnancy, treatment options and recovery, codependency and legal and ethical considerations. Credit/no credit only. Prerequisite: PHARM 403.

PHARM 417 Gerontological Communication Skills Seminar (2) Dawson
Addresses special communication needs of the elderly, ranging from individualized patient counseling to patient advocacy through development and provision of pharmacy services. Communication techniques applicable to teaching, developing innovative services, supervising, motivating, conflict resolution, and interdisciplinary interactions are explored in lecture and laboratory. Credit/no credit only.

PHARM 418 Community Outreach Service (2) Dawson
Work in assigned community services setting for a minimum of two hours per week to explore root causes of disability, cultural differences, professional values, community resources, and quality of life issues. Weekly seminars assist students in applying observations and experiences to pharmaceutical care.

PHARM 419 Pharmaceutical Care Systems I (3) Dawson
Focuses on how human behavior and communication influence the pharmacist’s activities in designing, delivering, and managing patient-focused pharmaceutical care. Writing, listening, interviewing, teaching, and critical thinking as applied to pharmacy practice are emphasized.

PHARM 420 Pharmacy Teaching Practicum (2) Dawson, Hammer
Allows students opportunity to apply learning about education in a mentored experiences. Students serve as assistant instructors in existing pharmacy courses or engage in other approved educational experiences. Prerequisite: PHARM 421. Offered: AWSpS.

PHARM 421 Pharmacy-Based Immunization Programs (1) Hagel
Practical training in cholesterol, hypetension, bone density, and wellness assessment techniques, vaccine administration and management, and implementation of community-based public health programs. Following didactic and laboratory sessions students conduct screening and administer vaccines a community locations. Offered following the first professional year. Credit/no credit only. Prerequisite: MEDCH 401.

PHARM 422 Overview of Contraceptive Management (2) Gardiner
Didactic overview of contraceptive methods, fertility interventions, and medical abortions. Establishes forum for interactive discussion. Includes patient screening criteria and selection and monitoring outcomes of currently available barrier and hormonal methods of contraception and medical abortions. Open to all PharmD students, as well as other health science professional students.

PHARM 423 Contemporary Problems (1)
Discussion of current trends affecting the role of pharmacy in health-care delivery. Credit/no credit only.

PHARM 424 Principles of Professional Practice Management (2) Downing
Emphasizes the major issues and barriers of providing pharmaceutical care in institutional and community pharmacies. Topics include evaluating workflow and facility design, complying with legal and safety standards, managing drug distribution services, payment for pharmacist services, human resource management and marketing pharmaceutical care services.

PHARM 425 Case Studies in Pharmaceutical Care (3, max. 9) Dawson
Small groups of students work with an instructor to review cases illustrating various aspects of specific diseases: pathophysiology, clinical features, psychosocial factors, therapeutic interventions with emphasis on drug therapies, and community resources. Analytic reasoning, self-study skills, and knowledge are emphasized.

PHARM 426 Case Studies in Pharmaceutical Care (3, max. 9) Dawson
Small groups of students work with an instructor to review cases illustrating various aspects of specific diseases: pathophysiology, clinical features, psychosocial factors, therapeutic interventions with emphasis on drug therapies, and community resources. Analytic reasoning, self-study skills, and knowledge are emphasized.

PHARM 460 Principles of Professional Practice Management (2) Downing
Emphasizes the major issues and barriers of providing pharmaceutical care in institutional and community pharmacies. Topics include evaluating workflow and facility design, complying with legal and safety standards, managing drug distribution services, payment for pharmacist services, human resource management and marketing pharmaceutical care services.

PHARM 461 Case Studies in Pharmaceutical Care (3, max. 9) Dawson
Small groups of students work with an instructor to review cases illustrating various aspects of specific diseases: pathophysiology, clinical features, psychosocial factors, therapeutic interventions with emphasis on drug therapies, and community resources. Analytic reasoning, self-study skills, and knowledge are emphasized.

PHARM 462 Experiential Learning (1-6, max. 6) O’Sullivan
Under faculty supervision, pharmacy students gain experience in providing pharmacy-related services, prior to the final year of the pharmacy program. Credit/no credit only. Prerequisite: satisfactory completion of the first quarter of pharmacy school.

PHARM 463 Pharmacoeconomics, Genetics, and Healthcare (2) Ramsey, Veenstra
Provides an introduction to outcomes research and economic evaluation related to pharmaceuticals and genetic technologies. Covers cost-effectiveness analysis and quality of life evaluation. Discusses the use of economic evaluation in healthcare to affect policy decisions.

PHARM 464 Chemical Dependency Issues in Practice (3) Kedzierski
Emphasis on drug classes, pharmacologic management of abstinence and withdrawal, drug testing, drug use in pregnancy, treatment options and recovery, codependency and legal and ethical considerations. Credit/no credit only. Prerequisite: PHARM 403.

PHARM 465 Gerontological Communication Skills Seminar (2) Dawson
Addresses special communication needs of the elderly, ranging from individualized patient counseling to patient advocacy through development and provision of pharmacy services. Communication techniques applicable to teaching, developing innovative services, supervising, motivating, conflict resolution, and interdisciplinary interactions are explored in lecture and laboratory. Credit/no credit only.

PHARM 466 Community Outreach Service (2) Dawson
Work in assigned community services setting for a minimum of two hours per week to explore root causes of disability, cultural differences, professional values, community resources, and quality of life issues. Weekly seminars assist students in applying observations and experiences to pharmaceutical care.

PHARM 467 Pharmaceutical Care Systems I (3) Dawson
Focuses on how human behavior and communication influence the pharmacist’s activities in designing, delivering, and managing patient-focused pharmaceutical care. Writing, listening, interviewing, teaching, and critical thinking as applied to pharmacy practice are emphasized.

PHARM 468 Case Studies in Pharmaceutical Care (3, max. 9) Dawson
Small groups of students work with an instructor to review cases illustrating various aspects of specific diseases: pathophysiology, clinical features, psychosocial factors, therapeutic interventions with emphasis on drug therapies, and community resources. Analytic reasoning, self-study skills, and knowledge are emphasized.

PHARM 469 Experiential Learning (1-6, max. 6) O’Sullivan
Under faculty supervision, pharmacy students gain experience in providing pharmacy-related services, prior to the final year of the pharmacy program. Credit/no credit only. Prerequisite: satisfactory completion of the first quarter of pharmacy school.

PHARM 470 Pharmacoeconomics, Genetics, and Healthcare (2) Ramsey, Veenstra
Provides an introduction to outcomes research and economic evaluation related to pharmaceuticals and genetic technologies. Covers cost-effectiveness analysis and quality of life evaluation. Discusses the use of economic evaluation in healthcare to affect policy decisions.

PHARM 471 Chemical Dependency Issues in Practice (3) Kedzierski
Emphasis on drug classes, pharmacologic management of abstinence and withdrawal, drug testing, drug use in pregnancy, treatment options and recovery, codependency and legal and ethical considerations. Credit/no credit only. Prerequisite: PHARM 403.

PHARM 472 Gerontological Communication Skills Seminar (2) Dawson
Addresses special communication needs of the elderly, ranging from individualized patient counseling to patient advocacy through development and provision of pharmacy services. Communication techniques applicable to teaching, developing innovative services, supervising, motivating, conflict resolution, and interdisciplinary interactions are explored in lecture and laboratory. Credit/no credit only.

PHARM 473 Community Outreach Service (2) Dawson
Work in assigned community services setting for a minimum of two hours per week to explore root causes of disability, cultural differences, professional values, community resources, and quality of life issues. Weekly seminars assist students in applying observations and experiences to pharmaceutical care.

PHARM 474 Pharmaceutical Care Systems I (3) Dawson
Focuses on how human behavior and communication influence the pharmacist’s activities in designing, delivering, and managing patient-focused pharmaceutical care. Writing, listening, interviewing, teaching, and critical thinking as applied to pharmacy practice are emphasized.
Advanced-level geriatric clinical pharmacy experience in institutional (hospital, nursing home, long-term-care facility) and ambulatory patient-care facilities under direct supervision of a clinical preceptor.

**PHARM 490 Fluid and Electrolytes and Parenteral Nutrition (2)** Edwards
Principles of fluid and electrolyte therapy, including saline, water, and acid-base balance, carbohydrate, protein, lipid, vitamin, and mineral requirements in parenteral nutrition. Nutritional assessment, complications of parenteral nutrition, stability and compatibility of intravenous solutions, modifications of parenteral nutrition in pediatrics and specific disease states are also covered.

**PHARM 491 Cancer Pharmacotherapeutics (2)** Kwok
Pharmacotherapy of cancer, covering supportive care (antibiotics, antineoplastics, analgesics, nutrition) to the antineoplastic agents themselves. Specialists in each area serve as guest lecturers.

**PHARM 492 Pharmaceutical Services for Long-Term Care (2)** Lam
Scope of pharmaceutical services for long-term care (LTC) and systems for services. Responsibilities of the pharmacist for distributive, administrative, and clinical pharmacy services for nursing homes and other long-term-care facilities. Economic considerations in provision of LTC pharmaceutical services, role of the consultant pharmacist for home-health-care organizations. Pharmaceutical services for independently living elderly.

**PHARM 495 Special Studies in Pharmacy (*, max. 6)**
Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific areas. Students undertake independent study under the individual direction of a faculty member.

**PHARM 497 Drug Therapy for the Elderly (3)** Gray, Christiansen
Clinical application of drug knowledge in the treatment of disease in older adults with multiple comorbidities. Application of age-related changes in pharmacokinetics and pharmacodynamics in the selection and monitoring of drug regimes of older adults. Emphasis on problem solving, using case examples. Prerequisite: nurse practitioner students or permission of instructor.

**PHARM 499 Independent Study/Research (*, max. 6)**
Applied pharmaceutical research problems. Credit/no credit only.

**PHARM 502 Neonatal Drug Therapy (3)** Blackburn
Clinical applications of drugs used with acute and chronically ill preterm and term neonates. Review of neonatal pharmacotherapeutics. Examination of selected therapeutic agents in relation to indications, efficacy, therapeutic and adverse effects, monitoring parameters, and dosing principles in the neonate.

**PHARM 503 Critical Care Pharmacotherapeutics (2)** Rohrs
Introduction to the application of critical care pharmacotherapy topics to patient care. Covers: hemodynamic principles, vasoactive medications, sedation/analgesia, acute respiratory failure, ACLS, shock, fluid management, acute renal failure, severe infections, ACS/AMI. Prerequisite: 3rd-year PharmD student, or approval by instructor.

**PHARM 504 Topics in Drug Safety (1)** Gardner, Hazlet
Introduces current policy issues in the area of safety of marketed pharmaceutical products and medical devices. Examines contemporary controversies and drug safety problems being addressed by regulatory agencies, pharmaceutical and medical device industries, academicians, policy makers, researchers, health care providers, consumers, and consumer advocates.

**PHARM 506 Seminar in Pharmacy Education I (1)** Murphy
Discussion of scholarship and teaching in pharmacy education, focusing on the critical evaluation of educational research. Designed in a journal-club format, students participate in small group discussions and write an analysis paper. Prerequisite: PHARM 421 or permission of instructor. Credit/no credit only. Offered: W.

**PHARM 507 Seminar in Pharmacy Education II (1)** Hammer, O’Sullivan
Students lead discussion about current issues in pharmacy and higher education as well as critically evaluate educational research. Weekly seminar includes small group discussions and journal-club methods. Prerequisite: PHARM 506 or permission of instructor. Credit/no credit only. Offered: Sp.

**PHARM 509 Medical Literature Evaluation (2)** O’Sullivan
Introduction to the processes involved in the assessment of primary and tertiary medical literature. Students are required to read and critique medical literature. Classes are conducted in a journal club format.

**PHARM 510 Current Topics in Immunology and Immunotherapeutics (2)** Hebert
Overview of the immune system and pharmacologic agents which modulate the immune response. Credit/no credit only. Prerequisite: second-, third-, or fourth-year Pharm.D. student or permission of instructor.

**PHARM 511 Current Topics in Immunology and Immunotherapeutics (2)** Hebert
Overview of the immune system and pharmacologic agents which modulate the immune response. Credit/no credit only. Prerequisite: second-, third-, or fourth-year Pharm.D. student or permission of instructor.

**PHARM 515 Pharmacotherapeutics for Acute/Critical Illness (3)** Horn
Discussion of the clinical evaluation and management of drug-drug interactions using patient situations. Focus on patient- and drug-related factors that predispose patients to adverse drug interactions, as well as clinical management of patients found to be at risk. Credit/no credit only. Prerequisite: third- or fourth-year Pharm.D. student.

**PHARM 514 Primary Care Pharmacotherapeutics (3-4, max. 4)** Kirkness
Explores clinical applications and therapeutic issues for selected drug categories commonly used in primary care settings and across age groups. Selected drug categories defined by pharmacokinetics, indications for use, efficacy, therapeutic and adverse effects, monitoring parameters, dosing principles, common drug interactions. Patient education, socioeconomic, and behavioral factors emphasized.

**PHARM 515 Pharmacotherapeutics for Acute/Critical Illness (3)** Landis
Analysis of issues that impact the assessment, prescription, and evaluation of pharmacotherapeutic regimes for patients who are acutely or critically ill. Current research, clinical contextual considerations, and pharmacotherapeutic principles are emphasized as the basis for decisions relevant to the management of pharmacotherapy in acute care clinical practice.

**PHARM 516 Certificate Program in Biomedical Regulatory Affairs (3)** Hazlet
Comprehensive overview of the knowledge and skills necessary to be an effective regulatory affairs and compliance specialist overseeing the design, development, testing, and production of drugs, biotechnology-derived therapeutics, and medical devices. Credit/no credit only.

**PHARM 517 Certificate Program in Biomedical Regulatory Affairs (3)** Hazlet
Comprehensive overview of the knowledge and skills necessary to be an effective regulatory affairs and compliance specialist overseeing the design, development, testing, and production of drugs, biotechnology-derived therapeutics, and medical devices. Credit/no credit only.
PHARM 518 Certificate Program in Biomedical Regulatory Affairs (3) Hazlet
Comprehensive overview of the knowledge and skills necessary to be an effective regulatory affairs and compliance specialist overseeing the design, development, testing, and production of drugs, biotechnology-derived therapeutics, and medical devices. Credit/no credit only.

PHARM 519 Pharmacotherapeutics for Infectious Disease and Infection (2) Black
Analysis of pharmacotherapeutics to control infection and manage infectious disease through seminar discussion of cases, critical analysis of a pharmacotherapeutic regimen, and development of references to enhance students' clinical expertise. Emphasis on principles of anti-infective therapy, problem solving clinical cases with complex medication regimes, and identifying judicious pharmacotherapeutic plans.

PHARM 523 Survey of Biomedical Regulatory Affairs (3) Hazlet
Overview of the knowledge, terminology, and skills necessary to be an effective regulatory affairs or compliance specialist in the design, development, testing and production of drugs, biotechnology-derived therapeutics, and medical devices. A class project is required. Offered: even years.

PHARM 524 Methods in Pharmaceutical Policy Analysis (4) Hazlet
Introduction to the tools used in and the framework and dominant contexts for pharmaceuticals policy development and analysis. Methods reviewed in a series of sessions presenting a specific method and case analyses involving pharmaceuticals development. Project and in-class presentation required. Prerequisite: graduate standing in pharmacy or permission of instructor.

PHARM 533 Pharmacoepidemiology (3) Gardner, Heckbert
Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: Graduate student or with permission. Offered: jointly with EPI 533.

PHARM 534 Economic Evaluation in Health and Medicine (3) Patrick, Sullivan
Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with HSERV 583.

PHARM 535 Evaluating Cost and Outcomes in Health and Medicine 2 (3) Patrick, Sullivan
Concepts and methods for evaluating cost and outcomes of health and medical interventions with a focus on cost-effectiveness analysis, pharmacoeconomics, health and quality of life assessment, resource allocation, and medical decision-making. Prerequisite: permission of instructor. Offered: jointly with HSERV 584.

PHARM 536 Principles of Publishing Clinical Evidence (2) Cummings, Johnson, Olson
Explains advanced methodologic principles for improving the clarity of published clinical evidence. Students prepare and revise a 1000-word research letter for The Lancet using their own clinical evidence. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with EPI 534.

PHARM 541 Health Care and Society (3)
Introduction to health services and pharmacy practice designed for future health-care practitioners. Examines the history, organization, and effectiveness of the U.S. health-care system. Stresses the student's ability to adopt a broad perspective across health-care disciplines and traditional boundaries.

PHARM 543 Pharmacy Laws and Ethics (4) Hazlet
Study of the laws regulating the practice of pharmacy. Professional liability, warranties, and contracts are discussed. Case studies of ethical considerations of pharmacy practice.

PHARM 544 Survey of Pharmacy Laws (1) Hazlet
Prepare, discuss, present responses to assigned questions developed by faculty regarding laws governing pharmacy practice in the course of reviewing for the Multistate Pharmacy Jurisprudence Examination. Class meets for two consecutive Saturdays in March. E-mail and web-access required. Non-matriculated students by permission only. Credit/no credit only.

PHARM 549 Pharmacotherapeutics for Older Adults (3) Gray
Clinical application of drug knowledge in the treatment of disease in older adults with multiple comorbidities. Application of age-related changes in pharmacokinetics and pharmacodynamics in the selection and monitoring of drug regimens of older adults. Emphasis on problem solving, using case examples. Prerequisite: PHARM 560; PHARM 561 or permission of instructor.

PHARM 550 Current Topics in Geriatric Pharmacotherapy (1) Gray
Review primary medical literature to discuss contemporary issues related to geriatric pharmacotherapy. Credit/no credit only. Prerequisite: PHARM 549 or permission of instructor.

PHARM 560 Therapeutics I (10)

PHARM 561 Therapeutics II (9) Bauer, Horn

PHARM 562 Therapeutics III (9)

PHARM 568 Healthcare of Cancer Survivors (2) Barry, McCune
Focuses on teaching the health science students about cancer survivorship issues. Discusses the health concerns of those who have been cured of their initial malignancy but are still at risk of long-term effects of chemotherapy, radiation, and surgery. Prerequisite: PHARM 560. Offered: jointly NURS 533; odd years, Sp.

PHARM 573 Laboratory and Functional Assessment: Geriatrics (1) Lan
Application of laboratory data and functional assessment in planning care for older adults. Case study/seminar format in which students recommend appropriate tests, interpret test results, and gain experience in performing tests of function. Recommended: MEDCH 435 or permission of instructor.

PHARM 574 Clinical Introductory Practicum (1) O'Sullivan
Students spend three days in a patient care setting, under the guidance of preceptors or advanced students, as an introduction to the practicum experience. Credit/no credit only.

PHARM 575 Institutional Clinical Practicum (5, max. 15) O'Sullivan
Under faculty supervision, fourth-year students provide pharmaceutical care in an inpatient environment. Credit/no credit only.
PHARM 576 Ambulatory Care Clinical Practicum (5, max. 15) O’Sullivan
Under faculty supervision, fourth-year students provide pharmaceutical care in an outpatient environment. Credit/no credit only.

PHARM 577 Advanced Practicum (5, max. 40) O’Sullivan
Under faculty supervision, fourth-year students gain experience in practice settings of their choice. Credit/no credit only.

PHARM 578 Advanced Elective Practicum (1-10, max. 20) O’Sullivan
Faculty-supervised practica either in areas of traditional practice or in innovative practice plans designed by faculty and student. Objectives, activities, schedules, and lengths are site- and preceptor-specific. Credit/no credit only.

PHARM 579 Senior Care Practicum (1-6, max. 12)
Under faculty supervision, fourth-year pharmacy students gain experience working with drug therapy regimens in the elderly. Prerequisite: acceptance to the pharmacy school’s Geriatric Certificate program. Offered: AWS/PS.

PHARM 586 Clinical Case Conference (2) Bauer, Horn
Weekly pharmacotherapy case conference emphasizing current therapeutics and clinical decision making. Credit/no credit only.

PHARM 590 Doctor of Pharmacy Thesis (1)
Writing intensive course in which students develop a high quality scientific paper that demonstrates grammatical and organizational excellence and the ability to critically evaluate biomedical literature. Credit/no credit only.

PHARM 595 Special Studies in Pharmacy (1-6, max. 24)
Special studies of professional topics in pharmacy. An opportunity to expand the breadth and depth of understanding in specific pharmaceutical areas. Students may undertake independent study under the individual direction of a faculty member. Credit/no credit only.

PHARM 596 Seminars in Pediatric Pharmacotherapy (2) Weber, Sawyer
Overview of drug disposition and medication utilization as it applies to the pediatric patient. Specific emphasis on neonatology and ambulatory pediatrics. Credit/no credit only. Prerequisite: third-year Pharm.D. student or permission of instructor.

PHARM 597 Graduate Seminar (1) Blough, Gardner, Hazlet, Sullivan, Veenstra
Interactive discussion of topical issues, methods, or analytic techniques. Topics vary. Credit/no credit only. Prerequisite: graduate program student.

PHARM 598 Case Conference: Geriatrics (1) Plein
Students taking geriatric pharmacy clerkships in various clinical settings meet with faculty to present case studies of elderly patients requiring complex drug therapies. Credit/no credit only. Prerequisite: Pharm.D. fourth-year practicum in geriatrics or general medicine.

PHARM 599 Independent Study/Research (1-6, max. 24)
Applied pharmaceutical research problems. Credit/no credit only.

PHARM 600 Independent Study or Research (*) Credit/no credit only.

PHARM 700 Master’s Thesis (*) Credit/no credit only.

PHARM 800 Doctoral Dissertation (*) Credit/no credit only.

Daniel J. Evans School of Public Affairs

Acting Dean
Sandra O. Archibald
208E Parrington Hall

Associate Dean
William M. Zumeta
231 Parrington Hall

The Daniel J. Evans School of Public Affairs is a graduate professional school providing education and research for the public service. The school confers the Master of Public Administration (M.P.A.) degree with day, Peace Corps Master’s International, and evening program options. The Evans School’s program of study is designed to train highly skilled managerial leaders and policy analysts for a wide range of careers in the public and nonprofit sectors. The academic and professional orientation of the degree program gives Evans School students the knowledge and skills necessary to make significant contributions to regional, national and international policy.

Graduates hold leadership positions such as mayors and city managers; local and regional government administrators; foreign service officers; senior military and public safety positions; assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; leaders and staff of nonprofit organizations and administrators of arts organizations. In addition, a number of alumni are employed in private sector positions involving substantial contact with public agencies.

Master of Public Administration

Day Program

The M.P.A. program is designed for present and future leaders of the public and nonprofit sectors. The program emphasizes broad-based public policy analysis and management knowledge, while students pursue one or more specialized policy fields known as Gateways. The core devotes considerable time to mastering the basic analytic and managerial skills needed by good analysts and managers. The curriculum draws upon the wide range of academic disciplines throughout the University of Washington.

Full-time day students complete 60 credit hours of course work, encompassing the core requirements, an internship and a degree project. They generally take two academic years (six quarters) to complete the degree program. Part-time and Evening Degree students typically take three or more academic years to complete the M.P.A.

The M.P.A. program has five major components:

- the Required Core Curriculum;
- concentrated study in the three curricular areas of study: Economics, Analysis, and Values; *
- specialized plan of study chosen from one or more of the following gateways: Education and Social Policy, Environmental Policy, International Affairs, Nonprofit Management, or Urban and Regional Affairs; *
- a final degree project; and *
- an internship.
**Concurrent Degree Programs**

In addition to the day M.P.A. program, the Evans School offers five concurrent M.P.A. degree programs: Master of Arts in International Studies (M.A.I.S.), Master of Urban Planning (M.U.P.), Master of Science in Forest Resources (M.S.), Juris Doctor (J.D.), and Master of Public Health (M.P.H.).

**Peace Corps Master's International**

Peace Corps Master’s International (PCMI) students undertake a concentrated 51-credit curriculum, including a full tour of Peace Corps service. The required course work can be completed in a total of four or five quarters. One year of course work must be completed prior to leaving for Peace Corps service. While on assignment overseas, students remain in touch with their faculty adviser and a returned volunteer from the Evans School. PCMI participants return to the Evans School for one term at the end of their international service to complete their course work and final project report.

**Mid-career Evening Degree Program**

Mid-career professionals with seven to ten years of progressively responsible work experience in the public, nonprofit or private sectors are offered the Master of Public Administration degree through the Evening Degree Program. This program enables these students, typically midlevel managers, to work full-time while developing the leadership and analytic tools needed to attain higher leadership positions within their organization or field. The Evening Degree Program blends academic and professional perspectives to engender a practical orientation to the theories, values and managerial skills critical to success in public life.

Mid-career students must successfully complete 54 credits of graduate coursework to receive the M.P.A. degree. Degree requirements are divided between the integrated core sequence, electives, and leadership seminars. Students usually take two evening courses each quarter and graduate in three years. Mid-career students do not have an internship or degree project requirement. Although summer attendance is not required, some students take electives during the summer quarter to reduce academic year course loads.

The Evening Degree Program features three distinct components:

**Core Sequence (21 credits)**

The core sequence is a series of integrated management and analysis courses required of all students. Since the materials in these courses build upon each other, these classes must be taken in sequence. The integrated core curriculum is designed by a team of Evans School faculty and distinguished practitioners. Important core concepts (e.g., human resource management, microeconomics, policy analysis, political management) are presented in an integrated way that best reflects the actual practice of public management and policy analysis.

**Electives (26 credits)**

Mid-career students have great flexibility in designing a course of study that best suits their professional needs and interests. Students may mix their elective courses in substantive policy areas such as environmental or social welfare policy with more practice-based management courses. Students may choose their elective courses from any department within the University in consultation with their advisor. One elective must be a course on ethics or values.

**Leadership Seminar (7 credits)**

Mid-career students take three leadership seminars during their program. The Evening Degree Program places special emphasis upon the development of managerial leadership. The seminars create a forum in which professionals can relate their workplace roles and challenges to the theories and skills examined in the M.P.A. curriculum. In an effort to foster a professional and academic support network among mid-career students, the seminar is open only to evening degree candidates.

The first leadership seminar focuses upon the personal aspects of leadership, the second focuses on analysis skills and abilities needed by leaders. The final leadership seminar integrates the lessons of the previous seminars and is taken during the third year of study. These seminars replace the degree project requirement of full-time day students.

**Admission Requirements**

The Daniel J. Evans School of Public Affairs admits students on an annual basis, for summer or autumn quarter only. The application deadline for either quarter is February 1.

The prospective student must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution. The student's academic record should be a strong one, with a minimum GPA of 3.00 on the last 90 (quarter) or 60 (semester) credits of undergraduate work. Scores on the Graduate Record Examination (GRE) general test are also required for admission. GRE and TOEFL scores are required for international students only.

The primary criterion for admission to the school is the applicant’s demonstrated ability to complete the graduate program while sustaining a high level of achievement. The Evans School’s admissions committee considers grades and test scores, and gives considerable weight to professional experience, volunteer work, letters of recommendation and the applicant’s writing skills as demonstrated in a personal essay.

Applicants for the Evening Degree Program must demonstrate seven to ten years of progressively responsible administrative experience. If prospective students have spent most of their careers in the private sector, they will need to demonstrate an active interest in, and contact with, public issues. Concurrent degree applicants must apply through and be accepted into both respective programs.

Although the Evans School requires no specific prerequisite courses for admission, the school’s core courses in economics and quantitative methods assume that entering students have been exposed to these subjects at the undergraduate level. Ideally new students will possess an academic or professional background in governmental processes, excellent writing skills and academic preparation in microeconomics and statistics. Students lacking sufficient preparation in these areas may be required to demonstrate aptitude prior to admission, or may be asked to take preparatory course work in addition to the basic M.P.A. degree requirements.

**Financial Aid**

**Evans School Scholarships**

The Evans School offers several scholarships to entering students each year from the school’s endowed fellowship funds. These typically consist of $4000-$5000 stipends awarded primarily on the basis of academic achievement and/or excellence in public service. The Daniel J. and Nancy Evans Fellowship honors former U.S. Senator, Washington State Governor, and current University Regent Daniel J. Evans and his wife Nancy. The fellowship supports students who aspire to excellence in public service.

The Henry M. Jackson Fellowship, given in honor of the late U.S. Senator Henry M. “Scoop” Jackson, supports students pursuing careers in environmental policy and natural resources management.

The Brewster C. Denny Fellowship, named for former Dean Brewster Denny, supports students who are committed to excellence in public service.

The Robert J. Lavoie Fellowship provides funds to outstanding students who are preparing to work in public service. Mr. Lavoie served as a Deputy Mayor of Seattle.

The Hubert G. Locke Fellowship, established in honor of former
Dean Hubert Locke, provides support for students pursuing internships in nonprofit organizations devoted to social justice issues.

The William Shelton Fellowship is funded by the Scottish Rite Foundation of Washington and supports students with a demonstrated commitment to the values of public service. The George A. Shipman Fellowship offers support to outstanding students pursuing careers in public service. Professor George Shipman was the founder of public administration education at the University of Washington.

Applicants interested in departmental scholarships must submit the Evans School Financial Aid Form with their Evans School application.

Assistantships

The Evans School offers approximately 20 to 30 research, teaching, and staff assistantships positions each year. These positions are typically 10 to 20 hours per week and may include tuition waivers. Hiring for assistantships is a competitive process. Announcements are posted as the positions become available. Research assistantships are open to first and second year students. First year students are eligible upon their arrival at the school.

Teaching and staff assistantships are reserved for second year students only. Teaching assistants are hired for the Evans School’s core courses and computer lab. Staff assistantships include such positions as Hubert Humphrey Fellows Coordinator, Peer Advisor, Evening Degree Program Recruitment Coordinator and Internship Coordinator.

Work-Study Status

When hiring research assistants, preference is often given to students possessing work-study status. Work-study status is one of several forms of aid granted by the University of Washington Financial Aid Office based on information provided in a student’s FAFSA. Financial aid applicants should highlight any financial change expected on the FAFSA.

Research Facilities

The culture of the Evans School promotes the integration of extensive applied research into the academic program. Students participate in independent research work related to their degree projects. In addition to supporting the independent research of its faculty members, the school houses the Forum at the Evans School and several research and policy centers.

The Forum at the Evans School

The Forum was established in the fall of 1998 under a three-year grant from the Henry M. Jackson Foundation. As the outreach arm of the Evans School, the Forum brings combined strength in its capacity for civic engagement and the depth and breadth of policy research at the school and throughout the University. The Forum draws on the expertise of faculty, research staff, and students, focusing on three program areas: Leadership and the New Governance, Engaged Citizens and Engaged Communities, and Meeting the Challenges of Growth and Change.

Guests of the Forum address the process of change, the role of institutions in influencing change, and the importance of targeting policies and programs. In each of these areas, the Forum promotes diverse, credible, and reasoned discussions between and among citizens and leaders from the public, private, and nonprofit sectors. Through partnerships with print and broadcast media organizations, the Forum seeks to expand resources for broad public discussion of critical policy issues.

Cascade Center for Public Service

The Cascade Center for Public Service is the executive education arm of the Evans School. Established in 1984, the center offers two-, three-, and five-day courses as well as two-week advanced programs for leaders and managers in the public and nonprofit sectors. Cascade courses are held in Everett, Leavenworth, Olympia, Seattle, the Tri-Cities, Vancouver, and Wenatchee, and can count as credit toward an M.P.A. degree.

Electronic Hallway

The Electronic Hallway, www.hallway.org, is an internationally recognized resource for public affairs teaching and curriculum development. It supports the Evans School teaching mission and distributes cases and skill exercises to educators in public policy and management worldwide.

Human Services Policy Center

The mission of the Human Services Policy Center (HSPC) is to foster effective, integrated services to children and families, based upon the collaborative efforts of faculty in professional schools of the University of Washington. Achieving this mission entails supporting communication among policy analysts (academic, public, and private), policymakers, practitioners, community/civic leaders, and the media. Combining interdisciplinary applied research with effective communication allows HSPC to help focus and add depth to consideration of critical policy issues in the state of Washington. The center conducts most of its applied research in partnership with organizations engaged in direct services, governance, or policy advocacy in order to achieve direct applicability of research efforts. HSPC’s current areas of focus are financing early childhood care and education, communications and public policy, comprehensive community initiatives, statistical monitoring of child and family well-being, and program evaluation and outcomes-based planning.

Center on Reinventing Public Education

The Center on Reinventing Public Education seeks to develop and evaluate methods of public oversight that can allow schools to be focused, effective and accountable. The center, established in 1993, pursues a national program of research and development on proposals such as charter schools, school contracting choice and school system decentralization. It also conducts research into reform initiatives in Washington and the Seattle public schools. The center seeks to inform community leaders, policy makers, school and school system leaders, and the research community.

Northwest Policy Center

The Northwest Policy Center (NPC) is dedicated to enhancing opportunities for people in need, fostering community well-being, improving the vitality of key sectors in a changing economy, and advancing equitable budget policies. NPC conducts research on the regional economy; works with policy makers and practitioners to develop and implement innovative economic, workforce, and community development strategies; and evaluates and shares lessons learned.

Urban Health Initiative

The purpose of the Urban Health Initiative (UHI) is to work closely for a period of up to ten years with five U.S. cities-Baltimore, Detroit, Oakland, Philadelphia and Richmond-to improve the health and safety of children living in these areas. Because each city is encouraged to try innovative approaches, a major responsibility of UHI is to document and share strategies that work over time, as well as those that prove less fruitful. UHI’s National Program Office is a joint program of the Evans School and the School of Public Health.
and Community Medicine (SPHCM). UHI’s National Program Director, Charles Royer, is the former mayor of Seattle (1978-1990). Mr. Royer and Deputy Director Cynthia Currier have taught and lectured in both the Evans School and SPHCM.

Course Descriptions

PB AF 499 Topics in Public Policy (3-5, max. 6) I&S
Examines selected issues of importance in all areas of public policy. Focus on in-depth analysis of vital public policy issues and the integration of economic, political, and administrative perspectives on them. Offered: jointly with POL S 404.

PB AF 500 General Seminar (1, max. 9)

PB AF 501 Legislative Relations (3)
Studies role of legislative bodies in American public policy making. Builds on case studies and focuses on tactics, constraints, and options involved in working within a legislative process to achieve public policy goals.

PB AF 502 Political Management of Policy Process (3)
Analyzes the issues which public managers address when they seek to make and implement public policy and programs. Pays particular attention to the institutional and political constraints on policy making and the skills needed to address them.

PB AF 503 Administrative and Executive Leadership (3)
Nature of executive life in the public sector, the function of leadership in implementing, making, and changing policy. Leadership styles, the relation of leadership to its constituencies and communities. Offered: jointly with POL S 572.

PB AF 504 Leadership Ethics (3)
Addresses the moral challenges facing leaders in the public and nonprofit sectors. Examines the values and virtues important to sustained ethical leadership as well as strategies to build strong institutional cultures and support ethical practices in institutions.

PB AF 505 The Law of Public Administration (3)
Legal framework of public administrative action in the United States, emphasizing constitutional requirements; operation of the administrative process; management of personnel, funds, and contracts; and judicial review of administrative activity.

PB AF 506 Ethics and Public Policy (3)
Teaches students to identify moral issues in public life. Special focus on the integration of moral concerns into public discussion in a manner which contributes to good policy and does not polarize issues. Discusses moral and political theory by focusing on contemporary cases and issues.

PB AF 507 Mediation and Negotiation as Instruments of Public Management and Policy-Making (3)
Possibilities offered by mediation and negotiation methods using a mixture of cases, readings, discussions, lectures, and guest speakers. Use of negotiation and mediation techniques to resolve disputes and disagreements over public-policy issues.

PB AF 508 Management Approaches to Service Delivery (3)
Examines how services can be delivered in a way that is responsive to the needs of those being served and maximizes the effective utilization of resources. Topics addressed include: needs assessment, process analysis, service strategy, sustaining the service organization, case management, and services integration.

PB AF 509 Managing People in Public and Nonprofit Agencies (3)
Emphasizes the role of the program manager rather than that of the personnel officer. Managing people within a variety of programmatic, bureaucratic, and political settings. Case studies form basis of class discussion, assignments.

PB AF 510 Foundations of American Democracy (1)
Discusses the role of public service in the United States through examination of historical and institutional foundations of the U.S. political regime. Pays special attention to the structures of government and constitutional values and conflicts at the heart of the political system. Offered: A.

PB AF 511 Public Management I (3)
Examines broad aspects of organizational life and orient students to key internal and external challenges and opportunities of managing public and nonprofit organizations. Main topics include organizational mission, values, communication, culture, organizational environment and the policy process, legislative-executive relations, interest group advocacy, and media relations. Offered: A.

PB AF 512 Public Management II (3)
Addresses questions of organizational design, personnel, and operations management to equip students with skills to perform effectively in mission-driven organizations. Core topics include organizational design, inter-organizational networks, human resources and staff management, improving service delivery and production flows, measuring and managing for performance, and ethical leadership. Offered: A.

PB AF 513 Public Policy Analysis (3)
Production and use of analysis to support public policy decisions. Defining problems, devising alternative solutions, clarifying stakes in choices, predicting impacts of choices. Skills developed by working on specific policy problems. Assumes familiarity with statistics, microeconomic theory, and institutions and processes of American government. Prerequisite: PB AF 516 or permission of instructor. Offered: A.

PB AF 514 Policy Implementation (3)
Presents set of analytic skills for anticipating and diagnosing implementation problems. Primarily for students who plan to become public-sector policy analysts or managers. Mastery of basic literature and its application to solving problems of public policy, including estimating feasibility of policy alternatives and identifying sources of implementation failure, is expected.

PB AF 515 Decision Making for Public Managers (3)
Considers decision making from normative, prescriptive, and descriptive perspectives. Emphasizes individual decision making, with some discussion of organizational decision practice. Focuses on decision analysis; presents tools for structuring decisions; and considers the role of analysis as a basis for negotiation.

PB AF 516 Microeconomic Policy Analysis (3)
Ways in which microeconomic analysis can contribute to the analysis of public sector issues. Supply and demand, consumer and firm behavior, competitive and monopoly markets, income distribution, market failure, government intervention. Policy applications of theory. Prerequisite: elementary economics. Offered: A.

PB AF 517 Economics of the Public Sector (3)
Methods of analyzing effects of public expenditures and taxes on behavior of individuals and firms, on economic efficiency, and on equity and distribution of income. Theory and practice of intergovernmental fiscal relations. Application of theory to formulation of public policy. Prerequisite: PB AF 516.

PB AF 519 Law and Economics (4)
Offered: jointly with LAW A 561.

PB AF 520 Intergovernmental Relations (3)
Comparative study of the issues involved in implementing
government programs across multiple jurisdictions. Issues of accountability, feasibility, politics, and constitutional limits are examined by focusing upon various methods used to implement programs across federal, state, regional, and international jurisdictions.

PB AF 522 Public Management: Budgeting (3)
Budgeting as a management process. Study of formulation and administration of government budgets, including role of budgeting in policy processes, approaches to budget formulation and analysis, development of the PPB approach, and aspects of budget administration, such as revenue estimating, allotment control, cost accounting. Prerequisite: PB AF 516 or permission of instructor. Offered: W.

PB AF 523 Financial Management in the Public Sector (3)
Exploration of the managerial uses of accounting and other processes of financial management in the public sector. Topics covered include: financial planning and control, fund accounting, cost accounting, asset accounting, internal controls, auditing, financial analysis, and financial reporting. Prerequisite: permission of instructor.

PB AF 525 Organizational Development in Public Agencies (3)
Philosophies, theories, and models of behavioral science interventions in organizational diagnosis and development (OD). In addition to a review of the basic literature dealing with the OD approach, emphasis is placed on examination of case studies and class experience in OD applications, including organizational diagnosis, problem confrontation, and team building. Prerequisite: permission of instructor.

PB AF 526 Program Evaluation (3)
Theory, practice, and politics of evaluation, from simple feedback mechanisms to evaluation of large-scale ongoing programs and social experiments. Emphasis on applications of experimental and quasi-experimental evaluation. Case studies illustrate various types of evaluation. Prerequisite: background in quantitative methods.

PB AF 527 Quantitative Analysis; Quantitative Analysis for Public Managers (3)
Two-quarter sequence explores how to formulate research questions, gain experience with conducting research, and learn how to assess which statistical tools or research methods are appropriate to answer different types of policy or management questions. Covers probability, descriptive statistics, hypothesis testing, and confidence intervals. Prerequisite: graduate status in School of Public Affairs or permission of instructor. Offered: W.

PB AF 528 Quantitative Analysis; Quantitative Analysis for Public Managers (3)
Second quarter of a two-quarter sequence aimed at helping students become informed users and critical consumers of research and statistical analysis. Combines material on research design and data collection methods with tools for multivariate analysis. The multivariate analysis methods include correlation and an introduction to multivariate regression. Prerequisite: PB AF 527. Offered: Sp.

PB AF 529 Quantitative Applications in Public Affairs (3)

PB AF 530 International Affairs (3)
Provides a broad understanding of international issues and United States policy. Students explore U.S. foreign policy and theories of major international actors in international trade, security, and strategic concerns, refugee policy, conflict resolution, development assistance, and the environment. Offered: jointly with POL S/SIS 534.

PB AF 531 Development Management in the 21st Century (3)
Addresses organization, administration and evaluation in governmental and non-governmental agencies involved in development efforts. Students examine development strategies, alternative management approaches, and management skills such as budgeting, finance, human resource development and program evaluation. Other topics include communication, expatriate/local power imbalances, decentralization, community involvement, culture, and personnel issues.

PB AF 532 Managing Policy in a Global Context (3)
Examines different policy environments leaders must address to achieve policy in comparative and international settings. Includes strategies, tactics, and frameworks needed to initiate and sustain policy dealing with authoritarian, democratic, liberal, and one-party states. Focuses on pressures from the international system and issues such as globalization.

PB AF 533 Economics of International Development (3)
Introduction to sustainable international development and its physical, human, social, and natural capital components. Students examine the new growth theories and evidence, and their relationship to democracy, trade, and other policies and institutions. Topics include income distribution, poverty, and the environment.

PB AF 537 Topics in International Affairs (3, max. 12)
Examines topics of interest and import in foreign policy and international affairs. Focuses on the in-depth analysis of issues and the integration of economic, institutional, and political dimensions.

PB AF 538 International Organizations and Ocean Management (3)
Survey of the manner in which international regimes and organizations attempt to manage and regulate the uses of the ocean. Primary emphasis is on the analysis of the effectiveness of regimes and processes that support or constrain these organizations. Prerequisite: SMA 500 or permission of instructor. Offered: jointly with SMA 507.

PB AF 540 Integrated Public Management Sequence (3)
Analyzes the institutional and political context of modern public management. Cases, readings, and discussion provide an integrated introduction to the major skills needed to successfully lead and manage government and nonprofit organizations. Offered: A.

PB AF 541 Integrated Public Management Sequence (3)
Analyzes the institutional and political context of modern public management. Cases, readings, and discussion provide an integrated introduction to the major skills needed to successfully lead and manage government and nonprofit organizations. Prerequisite: PB AF 540. Offered: W.

PB AF 542 Integrated Public Management Sequence (3)
Analyzes the institutional and political context of modern public management. Cases, readings, and discussion provide an integrated introduction to the major skills needed to successfully lead and manage government and nonprofit organizations. Prerequisite: 541. Offered: Sp.

PB AF 543 Public Leadership Seminar (3)
Focus on the societal context of managerial life. Credit/no credit only. Prerequisite: permission of instructor. Prerequisite: graduate standing in Public Affairs Evening Degree Program. Offered: A.

PB AF 544 Public Leadership Seminar (1-3, max. 3)
Integrated use of analytic and management concepts in the making of policy. Prerequisite: PB AF 543. Offered: W.

PB AF 545 Public Leadership Seminars (3)
Provides a forum to reflect on the major dimensions of modern managerial leadership at the end of the program. Includes a team project working with outside clients or organizations. Prerequisite:
PB AF 544

PB AF 550 Management of Not-for-Profit Organizations (3)
Focuses upon the roles played by not-for-profit organizations in meeting the public good. Examines internal management issues such as structure, budget, and operations; and external issues such as board functions, legal status, marketing, media relations, and fund-raising.

PB AF 551 Public Management: Program Planning and Design (3)
Policy context of planning and programming, the institutionalization of purpose, the planning process, activity design, work scheduling and measurement, and program evaluation.

PB AF 552 Public Arts Policy and Management (3)
Role of government in arts. Range of public support at federal, state, and local levels; reasons for its development and viability. Nature, evolution, functions of public arts agencies in implementing arts policy; relation of such agencies to their constituencies. Seattle, King County, and Washington State serve as case studies.

PB AF 554 Nonprofit Organizations and Public Policy (3)
Examines the changing role of nonprofit organizations in American society. Selected policy topics include privatization, for-profit/nonprofit competition, public-private partnerships, tax policy, and new sources of revenues.

PB AF 555 Topics in Nonprofit Management (3, max. 12)
Examines various topics of public importance in nonprofit management. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 560 Urban Affairs (3)
Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with URBDP 560.

PB AF 561 Urban Economics and Public Policy (3)
Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with URBDP 561.

PB AF 562 Introduction to Neighborhood Planning and Community Development (3)
Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle’s experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with URBDP 562.

PB AF 563 Seminar in Urban Planning and Policy (1)
Seminar for students in the MPA/MUP concurrent degree program. Explores topics that intersect urban planning and policy, through exchange with faculty and professionals working in this arena. Focuses on developing thesis topics that explore this intersection. Offered: jointly with URBDP 563.

PB AF 565 Topics in Urban Affairs (3, max. 12)
Examines various topics of public importance in urban policy. Integrates the political, managerial, and economic dimensions of these issues.

PB AF 568 Seminar in Law and Justice (3)
The current volatility in American law enforcement revolves around a number of policy issues that have emerged in the past decade and are considered crucial to the future role, organization, and function of urban policing. These issues are explored, with emphasis on their historic settings, the “actors” who shape their articulation, the parameters of the debate, effects of legal constraints and sociopolitical factors on the development of policy alternatives, and emerging patterns of resolution.

PB AF 569 Race and Public Policy (3)
Analyzes the way in which the persistent problem of race is expressed in the formation and implementation of social and public policy.

PB AF 570 Social Policy Analysis and Management (3)
Examines major institutions and programs in the human resources policy area: education, regulation of labor market, health care, income maintenance, social services. Discusses alternative policy instruments, analytic perspectives, intergovernmental issues, and management issues arising across policy areas. Explores challenges of linking services and clients across separate agencies.

PB AF 571 Education, The Workforce, and Public Policy (3, max. 6)
Examination of policy issues involving education, training, the economy, and the development of the nation’s human resources. Relationship between education, training, and work, underutilized workers, race and gender discrimination issues, and the role of education and training in economic development. Offered: jointly with EDLPS 563.

PB AF 573 Topics in Education and Social Policy (3, max. 12)
Examines various issues of public importance in the areas of education and social policy. Focuses on in-depth analysis of relevant issues and the integration of the economic, administrative, and political dimensions of these issues.

PB AF 575 Public Policy Processes (5)
Political science frameworks, approaches, and theories concerning development and implementation of public policies within American political systems. Governmental behaviors and processes, including rational, political, and bureaucratic models of governmental decision making; agenda-building processes; and normative perspectives concerning role of governmental entities.

PB AF 581 Information Technology and the Policy-Making Process (3)
Demystifies information base for policy making in democracies. Examines theoretical and practical issues associated with information processing in the public sector. Considers role of new technologies in collecting, analyzing, and disseminating information with special attention to the relationship between these technologies and effective government service, public participation, and organizational accountability.

PB AF 582 News Media and Public Policy (3)
Explores impacts of news coverage on public policy. Exposure to journalists’ approaches to coverage of public affairs, as well as to strategies used by leaders of public/non-profit agencies to attract favorable coverage and minimize damaging coverage. Students learn techniques for assessing impacts of news coverage.

PB AF 583 Seminar in Science and Public Policy (3)
Issues and problems relating to the interaction of science and scientists with the public policy-making process. Science versus the nature and values of political processes, and the continuing tensions between the two. The evolving interaction between scientific and technical knowledge and political power; scientific versus ethical judgments. Role of science in the establishment of national goals. Plans and proposals for increasing governmental competence to
deal with public policy issues involving science and technology.

**PB AF 584 Seminar in Science and Public Policy (3)**
Issues and problems relating to the interaction of science and scientists with the public policy-making process. Science versus the nature and values of political processes, and the continuing tensions between the two. The evolving interaction between scientific and technical knowledge and political power; scientific versus ethical judgments. Role of science in the establishment of national goals. Plans and proposals for increasing governmental competence to deal with public policy issues involving science and technology.

**PB AF 585 Topics in Science, Technology, and Public Policy (3)**
Examines relationship between advancement of technical knowledge and pace of technological change, and public policies to induce or respond to these trends. Generic issues of government research, development, and personnel training programs are addressed. Applications of policy issues involving biomedical, communications, energy, environmental, transportation, and weapons technologies.

**PB AF 586 International Science and Technology Policy (3)**
Seminar is designed: first, to analyze the relationships between research and development policy, capabilities, and national technological strategies for advanced industrial and less-developed countries; second, to deal with the international implications of particular technologies as countries try to make policy for them in regional and global organizations. Examples of specific technologies are chosen from such fields as space telecommunication, weather and climate modification, airline transportation, nuclear energy, and seabed exploitation.

**PB AF 589 Risk Assessment for Environmental Health Hazards (3/4)**
Context, methodologies, types of data, uncertainties and institutional arrangements for risk assessment. Both qualitative and quantitative approaches to the identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Offered: jointly with CEE 560/ENV H 577.

**PB AF 590 Environmental Policy Processes (3)**
Presents background to establish the need for environmental policy. Explores in a comparative manner, examining both successes and failures, various strategies that have been used or proposed to protect the environment. Offered: jointly with CFR 592.

**PB AF 591 Seminar in Resource Policy and Management (1)**
Introduction and orientation for concurrent degree program between the Evans School of Public Affairs and the College of Forest Resources. Examines research and literature on contemporary issues related to the integration of natural resource science, policy, and management, through discussion among faculty, students, and invited speakers. Offered: jointly with CFR 591.

**PB AF 592 Resource Policy and Administration (5)**
Study based on understanding of the actors, arenas, issues, and policy communities that form the context for policy development and implementation. Exploration of approaches to policy inquiry. Consideration of implications for both policy and management. Students develop a study design for course project. Offered: jointly with CFR 571.

**PB AF 593 United States Energy Policy (3)**
Energy policy formulation and implementation with emphasis on post-1973 developments. Energy conservation programs; changing roles of oil, coal, gas, nuclear, and solar energy; institutional, environmental and equity considerations; government research and development programs.

**PB AF 594 Environmental Policy Analysis: Risks and Values (3)**
Emphasizes institutions involved in environmental policy including the government, environmental organizations, and private business. Examines ways in which the nature of these institutions affects the substance and ultimate effect of the environmental policy implemented.

**PB AF 595 Topics in Environmental Policy and Management (1-3, max. 12)**
Examines various topics of public importance in environmental policy and management. Integrates the political, managerial, and economic dimensions of these issues.

**PB AF 596 Ethics and Values in Environmental and Natural Resource Policy (3) Zerbe**
Examines environmental values and ethics and their relationship to the policy process. Includes content on value foundation of economic efficiency and its relationship to fairness, legal entitlements, duty to other creatures, and incommensurabilities in valuing goods. Current policy controversies are addressed.

**PB AF 598 Administrative and Policy Skills Workshop (1-3, max. 3)**
Teaches practical administrative, leadership, and analytic skills commonly required of managers and analysts in the public and nonprofit sector. The workshops emphasize hands-on problem resolution, simulations, and actual practice.

**PB AF 599 Special Topics (1-6, max. 6)**
Study and analysis of special topics in public affairs. Topics vary each quarter depending on curricular needs and interests of students and faculty. Prerequisite: permission of instructor.

**PB AF 600 Independent Study or Research (*)**

**PB AF 605 Degree Project ([1-6]-, max. 6)**

**PB AF 606 Public Service Clinic (3-) Carlson, Madison, Page**
Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

**PB AF 607 Public Service Clinic (3-) Carlson, Madison, Page**
Serves to meet the degree project requirement as part of the Evans School curriculum. Students work in a supportive environment facilitated by peer and faculty to connect the research, organizational change, and capacity-building needs of community organizations and public agencies.

**School of Public Health and Community Medicine**

Dean
Patricia W. Wahl
F350 Health Sciences

The School of Public Health and Community Medicine (SPHCM) is composed of five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Health Services, and Pathobiology. A Bachelor of Science degree and an undergraduate minor are offered in the Department of Environmental and Occupational Health Sciences. The Department of Health Services offers a Bachelor of Science degree in health information administration through the UW Evening Degree Program. Students may pursue a general studies Bachelor’s degree with an emphasis in public health by working with faculty in SPHCM and the College of Arts and Sciences, UW General Studies Office. The SPHCM also offers a school-wide public health minor.
The SPHCM offers graduate programs leading to the degrees of Master of Public Health (M.P.H.), Master of Health Administration (M.H.A.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). Admission requirements vary by degree and field and are described in the sections of each department.

**Graduate Programs**

**Master of Public Health Degree:** The M.P.H. is a professional degree that provides broad training in public health. Each track or program provides additional training in a particular area. Graduates pursue careers in public health practice settings, academia, or research. The M.P.H. degree is offered in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, and Health Services. Students earning the M.P.H. may choose from several areas including biostatistics, community oriented public health practice, environmental and occupational health, epidemiology, health and policy research, international health (in Epidemiology or Health Services), maternal and child health (in Epidemiology or Health Services), occupational and environmental medicine, public health genetics, public health nutrition, or social and behavioral sciences. The M.P.H. degree in public health nutrition is offered through the Nutritional Sciences Interdisciplinary Graduate Program and the M.P.H. in public health genetics is a multidisciplinary program that involves faculty from throughout the University. The Extended M.P.H. Program is a three-year, part-time program that allows mid-career public health professionals to pursue the M.P.H. degree in community practice, health education, maternal and child health, or oral health while continuing their employment.

**Master of Health Administration Degree:** The M.H.A. degree is offered by the interdisciplinary Health Services Administration Group in the Department of Health Services under the auspices of the Graduate School. The program prepares students for careers in management, planning, and policy analysis in a variety of settings in the health care field. The purpose of the M.H.A. curriculum is to integrate the knowledge, skills, and experience that encompass health services management, planning, and policy analysis. Students develop knowledge and skills that enable them to better understand and manage change, analyze information and make decisions, and manage organizations and the people in them. The Executive M.H.A. Program is a part-time program designed for mid-career health services professionals, including physicians and other experienced clinicians, who wish to continue their employment while pursuing the M.H.A. degree. The program provides a balance of theory and practical management skills.

**Master of Science and Doctor of Philosophy Degrees:** The M.S. and Ph.D. programs in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Health Services, and Pathobiology prepare students for academic or research careers. The M.S. and Ph.D. programs in the Nutritional Sciences program, and the Ph.D. program in the Institute for Public Health Genetics are administered in SPHCM, although the degrees are awarded through the Graduate School’s interdisciplinary group structure. The M.S. programs in biostatistics, environmental health, epidemiology, genetic epidemiology, health and policy research, industrial hygiene and safety, nutritional sciences, pathobiology, statistical genetics, and toxicology offer focused research training in specific disciplines. Graduates of these programs often assume positions as senior technical staff in laboratories or other organizations and as research project coordinators, or pursue further graduate training. The M.S. program differs from the Ph.D. program in that more of the courses emphasize the concepts underlying methodological approaches rather than the ability to independently design a major research program.

The Ph.D. programs in biostatistics, environmental and occupational hygiene, epidemiology, health services, pathobiology, statistical genetics, toxicology, and the interdisciplinary Ph.D. programs in nutritional sciences and public health genetics, train future academicians as highly qualified independent investigators and teachers, and as well-trained practitioners. The doctoral programs are distinct from the M.S. programs by the addition of advanced coursework and the nature and scope of the dissertation research project.

**Concurrent Degree Programs:** The SPHCM has concurrent degree programs with the School of Business Administration, the Daniel J. Evans School of Public Affairs, and the School of Nursing that lead to concurrent M.H.A.-M.B.A., M.H.A.-M.P.A., and M.H.A.-M.N. degrees, respectively. The SPHCM and the schools of Business Administration and Public Affairs offer these degree programs during both day and evening times. The SPHCM has concurrent degree programs with the Henry M. Jackson School of International Studies, the School of Social Work, the School of Nursing, and the School of Public Affairs that lead to the M.P.H.-M.A.I.S., M.P.H.-M.S.W., M.P.H.-M.N., and MPH-MPA and MS-MPA degrees, respectively. The M.P.H.-M.N. concurrent degree program provides students opportunities to study the areas of community health care nursing and child nursing. The School of Medicine and SPHCM have a concurrent degree programs that lead to the M.P.H.-M.D., M.H.A.-M.D. and Ph.D.-MD degrees. In the autumn of 2003 the concurrent degree program with the School of Dentistry that leads to the M.P.H.-M.S.D. degrees was approved, and the concurrent M.P.H.-J.D. degree program with the School of Law is expected to be approved during the 2004-2005 year.

**Residency Programs:** The SPHCM offers a residency in occupational and environmental medicine. Physicians are also welcome to apply to any of the School’s graduate programs.

**Certificate and Graduate Certificate Programs:** The SPHCM offers several graduate certificate programs including a joint program with the School of Medicine in Biomedical and Health Informatics. The Department of Biostatistics offers a graduate certificate program in statistical genetics; the Department of Health Services in health behavior and health promotion, health policy, international health, and maternal and child health; the Extended Degree Program in public health; and the Institute of Public Health Genetics in public health genetics. The Department of Health Services also offers certificate programs in health information administration (HIA) and medical management.

**Biostatistics**

Graduate Program Coordinator
F664 Health Sciences, Box 357232
206-543-1044
bioadmit@u.washington.edu

The Department of Biostatistics offers Master of Science, Master of Public Health, and Doctor of Philosophy degrees in quantitative methods applied to the medical and biological sciences. Biology, medicine, and health services are undergoing major changes in their development as quantitative sciences. As technological advances find expression in new research tools, new theoretical concepts are being employed in the analysis of quantitative data. The techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are now woven into the fabric of the life sciences, thereby providing exciting new opportunities in research and teaching.

Many universities have instituted programs relating mathematics or statistics to particular biological field. The goal of the biostatistics graduate program is to equip students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine, biology, and health services. Because of the quality of the faculty and their involvement in a diversity of statistical applications, as well as the quality of the students, students receive an excellent education. Students are recruited from undergraduate programs in mathematics, statistics,
and biology and are selected on the basis of outstanding quantitative ability.

Admission Requirements

Students may enter the program from an undergraduate major in mathematics, statistics, or a biological field. Applicants from other fields with the prerequisites will also be considered. An applicant must have completed or be in the process of completing two years of calculus (to include one year of advanced calculus), one course in linear algebra, and one course in probability theory.

In addition to fulfilling graduate admission requirements, an applicant must submit all transcripts of prior, post-secondary education; three letters of recommendation from persons competent to evaluate the applicant’s abilities; a narrative statement concerning the applicant’s purpose and interest in entering the program; and official Graduate Record Examination, TOEFL, and TSE score reports, as applicable. Recommendation for selection of candidates is made by a faculty admissions committee, with review of applicants beginning in January for autumn-quarter admission. Early application for financial aid is advantageous; support is offered throughout the process and may not be available for late applicants. The application deadline for both admission and financial aid is the first week of January; please visit the Web site for specific dates each year.

Master of Science

Students working for the Master of Science degree must complete required course work, demonstrate proficiency in a computer language, write a thesis, take a consulting class, and pass the first-year theory examination. This examination is offered at the conclusion of a student’s first year, and, if a student does not pass, it can be retaken the next year. A Ph.D. student may receive a non-thesis Master of Science degree by successfully passing the first- and second-year qualifying examinations and all of the second-year course work.

Students completing an M.S. in Biostatistics will have learned a variety of statistical methods and applications useful to a career as a data analyst in biomedical or public health research or practice. The degree also provides preparation for individuals who plan doctoral work in a biomedical field but who want more methodological training.

Master of Public Health

The M.P.H. program provides quantitative research training to persons holding a doctoral-level degree in another field (M.D., Ph.D. J.D.). Program requirements include credits from Biostatistics, Epidemiology, Pathobiology, Health Services, and Environmental Health courses to provide both breadth and depth. Additional requirements include a consulting class, a practicing experience, and a thesis.

Students obtaining an M.P.H. in Biostatistics will receive broad training in public health with specific training in biostatistics, learning a range of statistical methods and applications. The degree is designed for individuals who have a doctorate in another field who seek more methodological training.

Doctor of Philosophy

Students earning the Ph.D. degree develop statistical theory and applications particular to the health sciences. Students in the Ph.D. program must complete required course work, write a dissertation, complete a consulting class, and demonstrate proficiency in a computer language. Students must also pass the Ph.D. statistical theory and applied theory qualifying examinations, a biology project, and pass the General and Final Examinations. A graduate of the Biostatistics doctoral program will be able to use appropriate statistical techniques to analyze a wide variety of data, provide rigorous proofs characterizing the properties of standard statistical methods, develop expertise in an area of biostatistical methodology, read and provide critical summaries of biomedical literature, and design and carry out biostatistical research studies that propose new biostatistical methods or provide new information about the properties of existing methods. This program trains future academicians, highly qualified as independent investigators and teachers, and well-trained practitioners of biostatistics.

Course Descriptions

BIOST 111 Lectures in Applied Statistics (1) NW
Weekly lectures illustrating the importance of statisticians in a variety of fields, including medicine and the biological, physical, and social sciences. Contact instructor for information on which fields of applications emphasized. Credit/no credit only. Offered: jointly with STAT 111; Sp.

BIOST 290 Introduction to Biomedical Research: Study Design and Interpretation (3) NW
Biostatistical concepts necessary for the interpretation, evaluation, and communication of biomedical research are introduced. Course topics include biomedical study design, randomization, graphical data displays, control of bias, variability, confounding, interaction, and ethics of human experimentation. Students participate in group and individual projects, group discussions, and oral presentations.

BIOST 499 Undergraduate Research (*)
Supervised reading programs; library and field research; special projects. Credit/no credit only.

BIOST 502 Introduction to Statistics in Health Sciences (4)
Description and examples of common concepts in biostatistics. Probability, point and confidence interval estimation, hypothesis testing including two-sample and paired t and chi-square tests, introduction to simple linear regression. Examples in health sciences stressed. Offered: S.

BIOST 503 Application of Statistics to Health Sciences (4)
Standard statistical techniques presented with examples drawn from the health sciences literature. Critical interpretation of research results, and introduction to the computer for data processing and statistical analysis. Prerequisite: BIOST 502 or equivalent. Offered: S.

BIOST 509 Special Emphases in Biostatistics (3-5, max. 5)
Introduction to concepts and methods of descriptive and inferential statistics, with applications in specific disciplines emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression and correlation. Different sections target specific student populations.

BIOST 510 Biostatistics in Dentistry (3)
Introduction to concepts and methods of descriptive and inferential statistics with applications in dentistry emphasized. Topics include comparison of means and proportions, hypothesis testing, confidence intervals, non-parametric methods, linear regression, and correlation. Prerequisite: enrollment in School of Dentistry or permission of instructor. Offered: jointly with DPHS 568.

BIOST 511 Medical Biometry I (4)
Presentation of the principles and methods of data description and elementary parametric and nonparametric statistical analysis. Examples are drawn from the biomedical literature, and real data sets are analyzed by the students after a brief introduction to the use of standard statistical computer packages. Statistical techniques covered include description of samples, comparison of two sample means and proportions, simple linear regression and correlation. Offered: AS.

BIOST 512 Medical Biometry II (4)
Multiple regression, analysis of covariance, and an introduction to one-way and two-way analyses of variance: including assumptions,
transformation, outlier detection, dummy variables, and variable selection procedures. Examples drawn from the biomedical literature with computer assignments using standard statistical computer packages. Prerequisite: either BIOST 511 or BIOST 517, or equivalent. Offered: W.

**BIOST 513 Medical Biometry III (4)**
Analysis of categorical data including two sample methods, sets of 2 x 2 tables, R x C tables, and logistic regression. Classification and discrimination techniques. Survival analysis including product limit estimates and the Cox proportional hazards model. Prerequisite: BIOST 512 or permission of instructor. Offered: Sp.

**BIOST 514 Biostatistics I (4)**
Mathematically sophisticated presentation of principles and methods of data description; graphics; point, confidence interval estimation; hypothesis testing; relative risk; odds ratio; Mantel-Haenszel; chi-square test (matrix algebra required). Examples drawn from biomedical literature; real-data sets analyzed using statistical computer packages. Prerequisite: biostatistics majors or permission of instructor. Offered: A.

**BIOST 515 Biostatistics II (4)**
Mathematically sophisticated introduction to linear models; multiple regression, correlation; residual analysis; dummy variables: analysis of covariance; one-, two-way analysis of variance; randomized blocks; fixed, random effects (repeated measure, factorial designs); multiple comparisons (matrix algebra required). Real biometrical data sets analyzed. Prerequisite: BIOST 514, biostatistics major, or permission of instructor. Offered: W.

**BIOST 516 Statistical Methods in Genetic Epidemiology (3)**
Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517, or permission of instructor. Offered: jointly with EPI 516/PHG 519.

**BIOST 517 Applied Biostatistics I (4)**
Introduction to the analysis of biomedical data. Descriptive and inferential statistical analysis for discrete, continuous, and right censored random variables. Analytic methods based on elementary parametric and non-parametric models for one sample; two sample (independent and paired), stratified sample, and simple regression problems. Offered: A.

**BIOST 518 Applied Biostatistics II (4)**
Multiple regression for continuous, discrete, and right censored response variables, including dummy variables, transformations, and interactions. Introduction to regression with correlated outcome data. Model and case diagnostics. Computer assignments using real data and standard statistical computer packages. Prerequisite: BIOST 517 or permission of instructor. Offered: W.

**BIOST 519 Topics in Epidemiologic Methods (3)**
Introduction to advanced epidemiologic methods, including recursive partitioning, developing clinical prediction rules, analyses of community-level associations or interventions, case-crossover and case-only designs, propensity scores, two-stage sampling, and missing data imputation. Prerequisite: EPI 512; EPI 513. Offered: jointly with EPI 515. A.

**BIOST 520 Biostatistics for Experimentalists (4)**
Statistical aspects of design, data analytic models appropriate to classes of experiments most commonly employed in biomedical sciences. One-, two-way analyses of variance; factorial, crossed, nested, repeated measures designs. Clean, messy real-data sets analyzed using standard statistical computer packages. Prerequisite: either BIOST 511 and BIOST 512, or BIOST 517 and BIOST 518, or equivalent. Offered: alternate years; Sp.

**BIOST 524 Design of Medical Studies (3)**
Design of medical studies, with emphasis on randomized controlled clinical trials. Bias elimination, controls, treatment assignment and randomization, precision, replication, power and sample size calculations, stratification, and ethics. Suitable for graduate students in biostatistics and for research-oriented graduate students in other scientific fields. Prerequisite: BIOST 511 or equivalent, and one of BIOST 513, BIOST 518, STAT 421, STAT 423, STAT 512, or EPI 512; or permission of instructor. Offered: jointly with STAT 524; Sp.

**BIOST 529 Sample Survey Techniques (3)**
Design and implementation of selection and estimation procedures. Emphasis on human populations. Simple, stratified, and cluster sampling; multistage and two-phase procedures; optimal allocation of resources; estimation theory; replicated designs; variance estimation; national samples and census materials. Prerequisite: either STAT 421, STAT 423, STAT 504, QMETH 500, BIOST 511, or BIOST 517, or equivalent or permission of instructor. Offered: jointly with CS&SS 529/STAT 529.

**BIOST 533 Classical Theory of Linear Models (3)**
Introduction to one-, two-way analysis of variance; randomized blocks; fixed, random effects, multiple comparisons. Statistical distribution theory for quadratic forms of normal variables. Fitting of the general linear model by least squares. Prerequisite: BIOST 515, STAT 421 or STAT 423; and STAT 513; and a course in matrix algebra. Offered: jointly with STAT 533; Sp.

**BIOST 534 Statistical Computing (3)**
Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 534; Sp.

**BIOST 535 Statistical Computing (3)**
Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 535; A.

**BIOST 536 Categorical Data Analysis in Epidemiology (4)**
Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic data using multiplicative models. Experience at interpretation; familiarity with available programs gained by analysis of bona fide data, critiques of analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with EPI 536; A.

**BIOST 537 Survival Data Analysis in Epidemiology (4)**
Introduction to multivariate analysis of survival data using multiplicative models. Application to epidemiologic studies. Familiarity with interpretation and available computer programs gained by analysis of bona fide sets of data and critiques of analyses appearing in the literature. Prerequisite: BIOST 536 or permission of instructor. Offered: jointly with EPI 537; W.

**BIOST 538 Statistical Computing (3)**
Introduction to scientific computing. Includes programming tools, modern programming methodologies, (modularization, object oriented design), design of data structures and algorithms, numerical computing and graphics. Uses C++ for several substantial scientific programming projects. Prerequisite: experience with programming in a high level language. Offered: jointly with STAT 538; W.

**BIOST 540 Correlated Data Regression (3)**
Introduction to regression modeling of longitudinal and clustered data from epidemiology and health sciences. Interpretation and familiarity with available programs gained by analysis of bona fide data; critiques of analyses appearing in literature. Prerequisite: Either BIOST 513, BIOST 515, BIOST 518, BIOST 536, or permission of instructor. Offered: Sp.

BIOST 550 Statistical Genetics I: Mendelian Traits (3)
Thompson

BIOST 551 Statistical Genetics II: Quantitative Traits (3)
Monks
Statistical basis for describing variation in quantitative traits. Decomposition of trait variation into components representing genes, environment and gene-environment interaction. Methods of mapping and characterizing quantitative trait loci. Prerequisite: STAT/BIOST 550, STAT 423 or BIOST 515, or permission of instructor. Offered: jointly with STAT 551; W.

BIOST 552 Statistical Genetics III: Design and Analysis (3)
Wijmstra
Overview of probability models, inheritance models, penetrance. Association and linkage. The lod score method. Affect ed sib method. Fitting complex inheritance models. Design mapping studies; multipoint, disequilibrium, and fine-scale mapping. Ascertainment. Prerequisite: STAT/BIOST 551; GENET 371; or permission of instructor. Offered: jointly with STAT 552; Sp.

BIOST 570 Advanced Applied Statistics and Linear Models (3)
Generalized linear models, REML in mixed models for randomized blocks, split plots, longitudinal data. Generalized estimating equations, empirical model building, cross validation, recursive partitioning, generalized additive models, projection pursuit. Prerequisite: STAT 512, 513; BIOST/STAT 533 or STAT 421 and STAT 423, and a course in matrix algebra. Offered: jointly with STAT 570.

BIOST 571 Advanced Applied Statistics and Linear Models (3)

BIOST 572 Advanced Applied Statistics and Linear Models (3)

BIOST 573 Statistical Methods for Categorical Data (3)
Advanced topics in generalized linear models and the analysis of categorical data: overdispersion, quasi-likelihood, parameters in link and variance functions, exact conditional inference, random effects, saddlepoint approximations. Credit/no credit only. Prerequisite: BIOST 571 and STAT 582. Offered: jointly with STAT 573; alternate years; Sp.

BIOST 574 Multivariate Statistical Methods (3)
Use of multivariate normal sampling theory, linear transformations of random variables, one- and two-sample tests, profile analysis, partial and multiple correlation, multivariate ANOVA and least squares, discriminant analysis, principal components, factor analysis, robustness, and some special topics. Some computer use included. Prerequisite: BIOST 570 or permission of instructor. Offered: jointly with STAT 574; alternate years.

BIOST 576 Statistical Methods for Survival Data (3)
Statistical methods for censored survival data arising from follow-up studies on human or animal populations. Parametric and nonparametric methods, Kaplan-Meier survival curve estimator, comparison of survival curves, log-rank test, regression models including the Cox proportional hazards model, competing risks. Prerequisite: STAT 581 and either BIOST 515, STAT 473, or equivalent. Offered: jointly with STAT 576.

BIOST 577 Advanced Design and Analysis of Experiments (3)
Concepts important in experimental design: randomization, blocking, confounding. Application and analysis of data from randomized blocks designs, Latin and Graeco-Latin squares, incomplete blocks designs, split-plot and repeated measures, factorial and fractional replicates, response surface experiments. Prerequisite: BIOST 570 or STAT 421 (minimum 3.0) or permission of instructor. Offered: jointly with STAT 577.

BIOST 578 Special Topics in Advanced Biostatistics (*, max. 3)
Advanced-level topics in biostatistics offered by regular and visiting faculty. Prerequisite: permission of instructor. Offered: jointly with STAT 578; AWSpS.

BIOST 579 Data Analysis and Reporting (2)
Analysis of real data to answer scientific questions. Common data-analytic problems. Sensible approaches to complex data. Graphical and tabular presentation of results. Writing reports for scientific journals, research collaborators, consulting clients. Graduate standing in statistics or biostatistics or permission of instructor. Offered: jointly with STAT 579; %-AWSp.

BIOST 580 Seminar in Biostatistics (*, max. 9)
Presentation and discussion of special topics and research results in biostatistics. Speakers include resident faculty, visiting scientists, and advanced graduate students. Offered: AWSp.

BIOST 586 Martingales: Survival Analysis (3)
Theory of counting processes and martingales to provide unified study of survival analysis methods. Focus on survival distribution estimators, censored data rank statistics, regression methods with censored survival data. Development of small samples moments, asymptotic distributions, and efficiencies. Prerequisite: STAT 521 or STAT 583 or permission of instructor; recommended: STAT 576. Offered: jointly with STAT 586; alternate years; W.

BIOST 590 Biostatistical Consulting (*)
Training in consulting on the biostatistical aspect of research problems arising in the biomedical field. Students, initially under the close supervision of a faculty member, participate in discussions with investigators leading to the design and/or the analysis of a quantitative investigation of a problem. With experience, independent associations of student and research worker are encouraged, with subsequent review by faculty of resulting design and analysis. Prerequisite: permission of instructor. Offered: AWSpS.

BIOST 593 Cancer Prevention Research Laboratory (3)
White
Research experience for pre- and postdoctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no credit only. Offered: jointly with EPI 593; AWSpS.

BIOST 595 Biostatistics Master’s Practicum (1-12, max. 12)
Supervised practice experience providing students an opportunity to learn how biostatistics is applied in a public health setting and in the formation of public health policy. Prerequisite: 514; 515; 536; 537.
BIOST 598 Techniques of Statistical Consulting (1)
Seminar series covering technical and non-technical aspects of statistical consulting, including skills for effective communication with clients, report writing, statistical tips and rules of thumb, issues in survey sampling, and issues in working as a statistical consultant in academic, industrial, and private-practice settings. Prerequisite: entry code. Offered: jointly with STAT 598; ASp.

BIOST 600 Independent Study or Research (*)
Offered: AWSpS.

BIOST 700 Master's Thesis (*)
Offered: AWSpS.

BIOST 800 Doctoral Dissertation (*)
Offered: AWSpS.

Environmental and Occupational Health Sciences
F461 Health Sciences Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of problem areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodent-borne illness, proper selection and use of pesticides, and understanding the effects of global changes in climate and the atmosphere on human health.

Undergraduate Program
Adviser
F461D Health Sciences, Box 357234
206-543-4207

The Department of Environmental and Occupational Health Sciences offers the following programs of study:

- The Bachelor of Science degree with a major in environmental health
- A minor in environmental health

Bachelor of Science

Suggested First- and Second-Year College Courses: ECON 200; POL S 202; COM 220; STAT 220 or STAT 311.

Department Admission Requirements
90 credits with a minimum cumulative GPA of 2.50.
Completion of the following courses: 5 credits in English composition; BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239); MATH 124 or MATH 144 or Q SCI 291.
Applications are accepted for each quarter. Application deadlines are April 15 for autumn quarter, November 15 for winter quarter, and February 15 for spring quarter. After the deadline has passed, applications are accepted on a space-available basis. Applicants are considered for admission when they are within one quarter of completing the admission requirements.

Additional Information: Students are encouraged to apply to the program during their sophomore year so they may begin the upper-division courses in their junior year.

Major Requirements

General Education and Basic Skills: Completion of 10 credits in VLPA-designated courses and 10 credits in I&S-designated courses (of which 6 credits are specified under requirement 3), plus 7 credits in W-designated courses (of which 4 credits are specified under requirement 4).

PHYS 114, PHYS 115, PHYS 117, PHYS 118. Completion of these courses prior to entering the program is recommended. Physics is a prerequisite for some upper-division ENV H courses.

ENV H 311, ENV H 405, ENV H 431, ENV H 432, ENV H 433, ENV H 472, ENV H 482, and two of the following: ENV H 440, ENV H 441, ENV H 445 (or ENV H 446), ENV H 490.

EPI 420, STAT 311 (or STAT 220 or Q SCI 381), T C 333, MICROM 301, MICROM 302.

30 additional credits of approved electives.
Sufficient elective credits to reach a total of 180 credits.

Minor

Minor Requirements: 29 credits as follows:

- Core Courses: 14 credits of the following: ENV H 311, ENV H 405, EPI 420; STAT 200 or STAT 311.
- Approved Electives: 15 credits of electives from the approved departmental list. See Web page or adviser for details.

Student Outcomes and Opportunities

- Instructional and Research Facilities: The department houses thirteen centers and institutes and twenty labs.
- Honors Options Available: None offered.
- Research, Internships, and Service Learning: The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.
- Department Scholarships: None offered.
- Student Organizations/Associations: UW Student Environmental Health Association

Graduate Program

Graduate Program Coordinator
F461 Health Sciences, Box 357234
206-543-3199

The Department of Environmental Health offers three graduate degrees: Master of Science, Master of Public Health, and Doctor of Philosophy. The areas of emphasis are environmental and occupational hygiene (Ph.D.) industrial hygiene and safety (M.S.), toxicology (Ph.D./M.S.), environmental health (M.S.), and occupational and environmental medicine or environmental and occupational health (M.P.H.).

The Ph.D. in Environmental and Occupational Hygiene option focuses on the assessment of exposures, health effects, and control strategies in community and work environments. The program emphasizes expertise in exposure assessment to evaluate human health risks from chemical, physical, and biological agents. Research opportunities include: laboratory and field investigations of environmental exposures and health outcomes; air, soil and water pollution monitoring; ambient, indoor, and personal exposure modeling; evaluation of biomechanical stress factors and organization of the work environment; development of new instruments, biomarkers, and novel methods for assessing human exposures; and evaluation of effective control strategies for the prevention or reduction of illness and injury.

The M.S. in Industrial Hygiene and Safety option focuses on the recognition, evaluation and control of workplace hazards that cause occupational illness and injury. Research opportunities include laboratory and field investigations of exposure to health and safety hazards such as toxic chemicals, radiation, and biomechanical stress. Students may elect one of two program options: industrial hygiene, emphasizing assessment of exposures to chemical and physical...
agents; or safety/ergonomics, emphasizing assessment, evaluation and design of the work environment and the tools used.

The M.S. and Ph.D. in Toxicology focus on research and application of basic scientific principles toward a better understanding of the health effects of toxic substances in the workplace and general environment. Students who select the toxicology option participate in laboratory research investigating molecular and biochemical processes involved in regulating chemically induced toxic responses such as soft-tissue (e.g., lung, heart, kidney, and liver) damage, reproductive and developmental defects, cancer, and nervous-system impairment.

The M.S. in Environmental Health focuses on community exposures to biological and chemical agents in commonly encountered environmental media including air, water, food, and soil. Research involves environmental sampling and analysis, assessment of pathways and routes of exposure, and evaluation of the significance of particular environmental agents in a regulatory context. Student thesis projects may encompass one or more of these areas of investigation and involve field or laboratory activities or both.

The M.P.H. in Environmental and Occupational Health provides an opportunity for students to focus on the recognition, assessment, and control of environmental and occupational hazards, the impact of these hazards on health and society, and approaches to regulations, enforcement, and policy development. It emphasizes development of skills essential to science-based public health practice. In addition to coursework, students complete a field practicum and research in any of the department’s research facilities or in a field setting.

The M.P.H. in Occupational and Environmental Medicine is for individuals with an earned doctorate. The goal of the program is to provide training in the public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on understanding, preventing, and managing environmental and occupational disease, injury, and disability. Physicians also have the option of applying for a concurrent fellowship or residency in occupational and environmental medicine.

The concurrent M.P.H./M.P.A. or M.S./M.P.A. degree programs with the Daniel J. Evans School of Public Affairs seek to educate students who will bring substantive public health knowledge and a strong policy and management orientation to their professional careers. With several courses that satisfy degree requirements in both programs, students are able to earn the two degrees in a shorter period of time than if the degrees were taken separately. Applicants must apply to both programs.

Admission Requirements

Prerequisites for admission to the M.S. industrial hygiene and safety, toxicology, and environmental health programs and the M.P.H. environmental and occupational health program include a bachelor’s degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors will be considered if the prerequisite courses have been completed. Competitive applicants typically have strong grades and Graduate Record Examination scores, a statement of personal goals consistent with the program, and supportive letters of reference.

Prerequisites for admission to the M.P.H. Occupational and Environmental Medicine program include a doctorate degree (M.D., D.O. or equivalent) with prior coursework in physics, chemistry, calculus, and biology. Concurrent residency applicants must satisfy additional prerequisites including graduation from a Class A medical school (U.S., Canada, or equivalent) and completion of one year of approved internship. Three years in primary care specialty is also encouraged.

Prerequisites for admission to the Ph.D. environmental and occupational hygiene and toxicology programs include a bachelor’s degree in science or engineering with coursework in biology, chemistry, calculus, and physics. A master’s degree in a related field is recommended for Ph.D. environmental and occupational hygiene applicants. Selection of an applicant will also be based upon an honors-level GPA, a statement of personal goals consistent with the program, supportive letters of reference, and high scores on the Graduate Record Examination.

International applicants are also required to submit official scores for the Test of English as a Foreign Language (TOEFL). TOEFL scores of 580 (237 computer) or higher are required for admission to the M.S., M.P.H., and Ph.D. programs.

Graduation Requirements

The M.S. and M.P.H. graduate programs are designed for seven quarters of study, including field applications and research, and require completion of departmental and program-specific courses, and submission of an acceptable thesis.

The Ph.D. program has a strong research focus, and requires completion of departmental and program-specific courses. A dissertation of original research suitable for publication in an appropriate peer-reviewed journal is required. For an entering student with a Bachelor of Science or engineering degree, the program of study can be expected to take approximately four to five years. A student entering with a Master of Science degree in a relevant area may complete the degree in less time.

Financial Aid

Support is available for many students in the form of traineeships or research assistantships, which include tuition. This support comes from federal and private sources awarded to the department or School.

Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, optical remote sensing of chemicals, industrial ventilation, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental agents, and toxicology (including toxicogenomics and analytical cytology). Field research is facilitated through an extensive consultation-service program conducted by this department for labor and industry in Washington state.

Course Descriptions

ENV H 111 Exploring Environment and Health Connections (3) I&S Camp, Keifer
Introduction to environmental health concepts. Examines current events to illustrate and better appreciate the relationship between environment and health and to explore whether an environmental condition is or is not an important threat to health. Emphasizes the roles of environmental scientists and related professionals. Offered: A.

ENV H 205 Environmental Health in Film (2) I&S Fenske, Luchtel
Viewing and discussion of popular films that explore issues in environmental health. After viewing films, a discussion follows focusing on the ethical, legal, social, and scientific issues raised by the films. Intended for UW freshmen and sophomores from all backgrounds who may have an interest in majoring in Environmental Health. Credit/no credit only. Offered: W.

ENV H 311 Introduction to Environmental Health (3) NW Treier
Relationship of people to their environment, how it affects their physical well-being and what they can do to influence the quality of the environment and to enhance the protection of their health. Emphasis on environmental factors involved in transmission of
communicable diseases and hazards due to exposure to chemical and physical materials in our environment. Offered: ASp.

ENV H 405 Toxic Chemicals and Human Health (3) Gallagher, Kavanaugh
Basic principles governing the behavior and effects of toxic chemicals released into the environment; sources, distribution, and fate of toxic chemicals in the environment; chemicals and cancer; chemicals and birth defects; government regulation of chemical hazards. Focus on human health impacts of chemicals found in the workplace and general environment. Prerequisite: 2.0 in BIOL 220; and 2.0 in CHEM 224 or 2.0 in CHEM 337. Offered: Sp.

ENV H 417 Non-Ionizing Radiation and Electrical Safety (2) Yost
Introduction to health hazards from UV, optical laser hazards, infrared radiation, radio-frequency radiation, heat stress, electrical shock, electric and magnetic fields. Application of current standards for these physical agents. Emphasis on occupational hazards with additional discussion of environmental exposures where appropriate. Offered: odd years; W.

ENV H 431 Environmental and Occupational Sampling and Analysis I (4) NW Fenske, Yost
Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: CHEM 162; PHYS 116/119; ENV H 311. Offered: A.

ENV H 432 Environmental and Occupational Sampling and Analysis II (4) NW Simpson
Laboratory and lecture on sampling. Field and laboratory analysis of chemical and physical agents found in the occupational and ambient environments. Prerequisite: ENV H 431. Offered: W.

ENV H 433 Environmental and Occupational Sampling and Analysis III (4) NW Butterfield, Meschke
Laboratory and lecture related to the evaluation of water quality. The identification and analysis of microorganisms in water, food, and air. Prerequisite: ENV H 431; MICROM 301. Offered: Sp.

ENV H 440 Water, Wastewater and Health (3) Butterfield, Meschke
Review of water supply, water quality, and water/wastewater treatment as they relate to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Prerequisite: ENV H 311. Offered: A.

ENV H 441 Food Protection (3) Easterberg
Study of identification and characteristics of chemicals and biological agents implicated in foodborne disease outbreaks and conditions or circumstances by which food contamination occurs. Examination of food protection activities conducted by local and state government at the retail level. Prerequisite: either 2.0 in CHEM 155 or 2.0 in both CHEM 160 and CHEM 161, or 2.0 in CHEM 162; 2.0 in MICROM 302. Offered: W.

ENV H 442 Vector Control (3) Treser
Study of the impact and control of rodents and arthropod vectors of disease, including consideration of economic poisons used, their regulation, and safety measures. Prerequisite: 2.0 in BIOL 203. Offered: Sp.

ENV H 445 Solid Waste Management (3) Busch
Examination of the public health, environmental, economic, and materials conservation aspects of solid wastes management; amounts and sources of solid wastes, waste reduction and recycling, methods of storage, transportation and disposal, integrated waste management, identification of present problems and future needs. Prerequisite: 2.0 in CHEM 155, 2.0 in CHEM 160, or 2.0 in CHEM 162; either 2.0 in MATH 124, 2.0 in MATH 127, 2.0 in MATH 134, or 2.0 in MATH 144; recommended: PHYS 115. Offered: Sp.

ENV H 446 Hazardous Waste Management (3) Kissel
Characterization of hazardous wastes and introduction to pertinent federal and state regulations. Discussion of exposure pathways and description of management options at pre-generation, pre-release, and post-release stages. Emphasis on public health significance. Supplemented with case studies. Prerequisite: either 2.0 in CHEM 155, 2.0 in CHEM 160, 2.0 in CHEM 162; either 2.0 in MATH 112, 2.0 in MATH 124, 2.0 in MATH 127, 2.0 in MATH 234, or 2.0 in MATH 144; recommended: MATH 125, CHEM 224, PHYS 115. Offered: W.

ENV H 449 Health Effects of Air Pollution (2) Koenig
Structure and function of the respiratory system and the changes that may be produced by specific air pollutants, such as ozone, SO2 and fine particles. Air quality criteria and the economic costs of disease are discussed. Several classroom demonstrations. Offered: even years; W.

ENV H 451 Ecology of Environmentally Transmitted Microbiological Hazards (3) Butterfield, Meschke, Shin
Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

ENV H 452 Detection and Control of Environmentally Transmitted Microbiological Hazards (3) Butterfield, Meschke, Shin
Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing and detection for infectious microorganisms. Provide coverage of engineered controls and disinfection/decontamination processes for infectious microorganisms. Recommended: ENV H 451. Offered: W.

ENV H 453 Industrial Hygiene (3) Morgan
Introduction to the principles and scientific foundation of industrial hygiene. Examines the anticipation, recognition, evaluation, and control of work place hazards to health and safety. Focuses on the first three functions, but includes some consideration of control methods. Prerequisite: either BIOL 200 or BIOL 202; CHEM 224; either PHYS 116 or PHYS 123. Offered: A.

ENV H 457 Industrial and Environmental Noise (3) Neitzel, Seixas
Survey of industrial and community noise problems, including sources, effects, measurement, control, and legislation. Prerequisite: 2.0 in PHYS 115. Offered: Even years, Sp.

ENV H 461 Air Pollution Control (4) Pilat
Fundamental concepts of air pollution. Emission sources, atmospheric dispersion, ambient concentrations, adverse effects, governmental regulations, emission standards, air-quality standards, processes and equipment for controlling emissions. Offered: jointly with CEE 490; A.Sp

ENV H 470 Environmental Health Practice: Administration and Management (2) Osaki, Treser
Explores selected aspects of the management of environmental health programs in the community, including organization theory and practice, budgeting, personnel management, program planning and evaluation, and community relations. Prerequisite: ENV H 482. Offered: A.

ENV H 471 Environmental Health Regulation (3) Treser
Introduction to administrative regulation and process. Authority,
jurisdiction, and structure of environmental control programs and agencies; the regulatory process; agency acquisition and retention of information; administrative actions; enforcement of environmental health laws; major statutes and cases affecting programs. Prerequisite: ENV H 482. Offered: W.

ENV H 472 Environmental Risk and Society (3) Fenske
Examines scientific determinations of environmental risks and explores how such determinations are evaluated by affected communities and society. Employs risk analysis to integrate technical knowledge in hazard identification and exposure assessment to provide a more rational basis for environmental policies. Role of public participation in risk-based decision making discussed. Offered: A.

ENV H 480 Environmental Health Problems (*, max. 6) Treser
Individual projects involving library, laboratory, or field study of a specific environmental health problem. Offered: AWSpS.

ENV H 482 Environmental Health Internship (2-15, max. 15) Treser
Assignment to an environmental health or environmental protection agency for supervised observation and experience in environmental health technology, program planning and utilization of community resources. Prerequisite: 2.5 in ENV H 311. Credit/no credit only. Offered: AWSpS.

ENV H 490 Community Air Pollution (3) NW Liu
Fundamental concepts of ambient and indoor air pollution, focusing on air quality issues affecting public health. Discusses sources of air pollution, building dynamics, microenvironments and activity patterns, biological air contaminants, community air pollution issues, management strategies, and monitoring and modeling skills. Offered: Sp.

ENV H 497 Environmental Health Special Electives (*)
Offered: AWSpS.

ENV H 499 Undergraduate Research (*)
Individual research on a specific topic in environmental health upon which specific conclusions, judgments, or evaluation can be made or upon which facts can be presented. Offered: AWSpS.

ENV H 511 Environmental and Occupational Health (1-3, max. 3) Daniell
Effects of exposure to chemical, physical, and biological agents, embracing the community and workplace environments. Current issues, using specific cases from recent literature as basis for classroom discussion and written assignments. Offered: W.

ENV H 512 Waste Management, Recycling, and Pollution Control (3) De Walle
Survey of selected technological components of environmental health infrastructure via lecture and weekly field trips to full facilities. Sites visited vary year to year, but may include paper and steel plants using reclaimed feedstock, cement kiln using waste as supplemental fuel, municipal wastewater treatment facility, and steam generation plant.

ENV H 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3) Eaton, Thummel
Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of “gene-environment interactions” that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Prerequisite: GENET 372 or equivalent. Offered: jointly with ENV H/PCEUT 513.

ENV H 514 Environmental and Occupational Toxicology I (3) Xia
Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisite: BIOL 212, BIOC 440, or permission of instructor. Offered: A.

ENV H 515 Environmental and Occupational Toxicology II (3) Luchtel
Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisite: BIOL 212, BIOC 440, or permission of instructor. Offered: W.

ENV H 516 Environmental and Occupational Toxicology III (3) Costa
Major topical areas in human and environmental toxicology, including the biochemical, cellular, and physiological mechanisms by which chemicals produce toxic responses; the toxicology of the major classes of chemicals; principles of toxicity testing; interpretation of toxicological data. Prerequisite: BIOL 212, BIOC 440, or permission of instructor. Offered: Sp.

ENV H 517 Children’s Environmental Health (3) Burbacher
Discussion of environmental health issues as they pertain to children’s health. Includes historical perspective of public health research and policies directed at protecting children’s health and emerging scientific and public health issues such as childhood exposure to mercury and pesticides, childhood asthma, cancer, and environmental justice. Offered: Sp.

ENV H 531 Neurotoxicology (3) Costa
Advanced discussions of the principles and methodological approaches to neurotoxicology (including behavioral toxicology), classes of neurotoxic agents, types and mechanisms of neurotoxic effects, as well as the role of neurotoxicology in toxicology and public health. Prerequisite: ENV H 514, ENV H 515, ENV H 516 or ENV H 405 or permission of instructor. Offered: even years; W.

ENV H 532 Reproductive and Developmental Toxicology (2) Faustman
Investigates chemicals that can induce adverse reproductive and developmental outcomes. Discussion topics include identification and characterization of specific classes of toxic agents, mechanisms of action of these agents at the molecular and cellular level, and risk assessment and regulatory issues. Prerequisite: ENV H 514 and ENV H 515 or ENV H 405 or permission of instructor. Offered: even years; S.

ENV H 533 Molecular Toxicology (2) Gallagher
Advanced discussion of molecular mechanisms whereby chemical, physical, and biological agents produce their harmful effects on biological tissues. Prerequisite: permission of instructor. Offered: jointly with PHCOL 533; odd years; W.

ENV H 535 Inhalation Toxicology (3) Koenig, Luchtel
Advanced course on the toxicology of air pollutants and the response of the respiratory system to inhaled gaseous and particulate toxicants. Issues and concepts covered include biology of the respiratory system, exposure technology, experimental design and methodological issues, health effects of air pollutants, and regulatory aspects. Prerequisite: ENV H 514-516, or ENV H 405 or permission of instructor. Offered: even years; A.

ENV H 537 Introduction to Manufacturing Systems (3) Storch
Description of manufacturing systems. Includes discussion of current trends in manufacturing, especially lean principles. Introduces process flow analysis, manufacturing organizations including job-shop, assembly lines, and group technology, manufacturing
inventory philosophies (just-in-time, MRP, OPT), work environment, and work simplification. Offered: jointly with IND E 537; A.

ENV H 541 Ecology of Environmentally Transmitted Microbial Hazards (3)
Focuses on the transmission of infectious microorganisms by air, food, water, and other environmental media. Provides an introduction to environmentally transmitted pathogens, and discusses factors affecting their environmental fate, transport, and persistence. Offered: A.

ENV H 542 Detection and Control of Environmentally Transmitted Microbial Hazards (3)
Focuses on the detection and control of infectious microorganisms in air, food, water, and other environmental media. Provides a discussion on sample collection, processing, and diction for infectious microorganisms. Provides coverage of engineered controls and disinfection/decontamination processes for infectious organisms. Offered: W.

ENV H 543 Quantitative Microbial Risk Assessment (3)

ENV H 545 Water, Wastewater and Health (4) Butterfield, Meschke
Review of water supply water quality, and water/wastewater treatment as they related to human health. Includes water law and regulations, source water protection, basic treatment technologies for water and waste, chemical and microbial contaminants, and recreational water. Offered: A.

ENV H 546 Pesticides and Public Health (3) Fenske, Keifer
Examines health risks and benefits associated with pesticide use in the United States and internationally; reviews exposure, toxicity, epidemiology, and regulation of pesticides, focusing on populations such as workers and children; discusses benefits derived from vector control, food production, and food preservation. Offered: odd years; W.

ENV H 550 Microscopy: Image Acquisition and Analysis (2) Luchtel
Sample preparation methods, principles and practical aspects of light microscopy (bright-field, phase, differential interference, polarizing, and confocal), electron microscopy (transmission, scanning, electron diffraction, and energy dispersive x-ray analysis), photographic and digital imaging, computerized image analysis techniques. Student research project required. Prerequisite: permission of instructor.

ENV H 552 Environmental Chemistry of Pollution (3) Kalman, Liu
Chemical and physical processes determining distribution and fate of chemical hazards, detection of low levels of hazardous compounds, and environmental evaluation and prediction. Fundamental chemical concepts and measurable properties of individual compounds to interpret and relate measurements. Prerequisite: admission to graduate program or permission of instructor. Offered: W.

ENV H 553 Instrumental Methods for Industrial Hygiene Measurement: Lecture (3) Morgan
Strategy, methods, instrumentation, and theory of atmospheric sampling and analysis, emphasizing evaluation of potential occupational hazards and exposures to chemical agents. Prerequisite: ENV H 453 or permission of instructor. Offered: W.

ENV H 555 Instrumental Methods for Industrial Hygiene Measurement: Laboratory (3) Monteith, Simpson, Yost
Utilizes typical instrumental techniques and analytical methods for the evaluation of potential occupational exposures. Prerequisite: ENV H 453 and ENV H 553 or permission of instructor. Offered: Sp.

ENV H 556 Quantitative Occupational Exposure Analysis (3) Seixas
Exploration of industrial hygiene data to understand nature of airborne exposures in the occupational environment, and their interpretation for human health. Focus on reading and discussion of primary exposure assessment literature and statistical analysis of real dataset. Prerequisite: one quarter of statistics or biostatistics and basic industrial hygiene. Offered: W.

ENV H 557 Workplace Exposure Controls (4) Yost
Principles of engineering controls and protective equipment needed to prevent or exposures to workplace contaminants, including design of industrial exposure systems, general building ventilation and indoor air quality, respiratory protection, and protective clothing. Offered: even years, W.

ENV H 559 Applied Industrial Hygiene, Safety, & Ergonomics (3) Camp, Gleason, Johnson
Application of occupational safety and health ergonomic principles through a field project and classroom discussions. Student teams perform evaluations, assess production methods/processes and exposures, health and safety procedures and programs, and develop engineering and administrative controls. Students simulate consulting with a local company including budgeting, project reporting, and presentation. Prerequisite: ENV H 453, ENV H 562, ENV H 566, or equivalent, or permission of instructor. Offered: jointly with IND E 567; Sp.

ENV H 560 Organizing and Administering Industrial Safety and Health Programs (4) Gleason
Explores industrial organization and methods of integrating safety and industrial hygiene programs with industrial operations. Investigates philosophic issues related to industrial safety and health such as responsibility for safety, dependency on safe practice, and hierarchy of prevention. Contains numerous case problems and student involvement opportunities. Offered: jointly with NSG 506; A.

ENV H 562 Technical Aspects of Safety and Health (3) Gleason
Explores specific hazards associated with major industries, as well as hazards common to all industries. Covers machine guarding, electrical safety, systems safety analysis, materials handling, and working at heights. Offered: jointly with NSG 507; W.

ENV H 564 Recognition of Health and Safety Problems in Industry (4) Camp, Seixas
Develops skills in occupational health and safety hazard recognition in a variety of important northwest industries. Focuses on process understanding and hazard recognition skills during walk-through inspections of several local facilities, stressing a multidisciplinary approach. Offered: jointly with IND E 564; A.

ENV H 565 Occupational Stress and Management (3) Beaton
Relationships between occupational stressors and worker’s health, well-being, productivity. Analyzes models of occupational stress. Investigates similarities, differences between job-related stressors and stress responses in various occupations. Explores elements of worksite stress management programs. Prerequisite: graduate standing in nursing or allied health discipline. Offered: jointly with NURS 566; even years; A.

ENV H 566 Introduction to Ergonomics (3) Johnson, Stewart
Basic principles of ergonomics in work environment applied to problems of worker and management. Topics include measurement of physical work capacity, problems of fatigue and heat stress, applied biomechanics, worker-machine interactions and communication, design of displays and controls. Prerequisite: basic human physiology or permission of instructor. Offered: jointly with IND E
ENV H 567 Mechanisms of Carcinogenesis (3) Xia
Lectures/presentations of biochemical and molecular basis of carcinogenesis induced by environmental agents, including approaches to identification of carcinogens. Role of cell proliferation and cell death (apoptosis) in cancer formation and cancer treatment. Molecular mechanisms that regulate proliferation and apoptosis. Prerequisite: ENV H 516, ENV H 405, or permission of instructor. Offered: jointly with PHCOL 567; even years, A.

ENV H 568 Molecular Epidemiology of Infectious Diseases (2)
Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: ENV H 511 or ENV H 512 or permission of instructor. Offered: jointly with EPI 568/PABIO 568; W.

ENV H 569 Occupational Biomechanics (4) Johnson
Lectures and laboratories address human occupational biomechanical and physiological limits and measurement, analysis, and modeling techniques that are used by ergonomists for design of safe, healthful, and productive physical work. Prerequisite: ENV H 566 or permission of instructor. Offered: jointly with IND E 569; W.

ENV H 570 Occupational and Environmental Epidemiology (3) Checkoway, Daniell
Research in occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with EPI 570; Sp.

ENV H 571 Neuroepidemiology and Environmental Risk Factors (3)
Focus on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson's disease, Alzheimer's disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Recommended: EPI 511 or equivalent. Offered: jointly with EPI 571; odd years; W.

ENV H 572 Clinical Occupational Medicine (2) Shusterman
For clinicians in training, comprehensive overview of occupational disease principles, occupational history-taking, and the provider's role in workers' compensation. Epidemiologic evidence and pathophysiologic basis for occupational diseases reviewed, emphasizing organ system approach to diagnosis and management. Prerequisite: occupational medicine or preventive medicine residents/fellows, nursing students, or permission of instructor. Offered: S.

ENV H 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3)
Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered: jointly with EPI 573; W.

ENV H 574 Quantitative Methods for Environmental Exposure Assessment (3) Kissel
Examination of probabilistic (in contrast to deterministic) approaches to prediction of human exposure to environmental contaminants including explicit separation of population variability from uncertainty due to ignorance. Discussion of data needs, pitfalls, policy ramifications, and current state of development and regulatory acceptance. Examples from real world. Offered: Sp.

ENV H 577 Risk Assessment for Environmental Health Hazards (3/4) Faustman
Examines context, methodologies, data, uncertainties, and institutional arrangements for risk assessment. Qualitative and quantitative approaches to identification, characterization, and control of environmental hazards to health emphasized through didactic and case studies. Prerequisite: ENV H 515 and BIOST 511 or permission of instructor. Offered: jointly with CEE 560/EB AF 589; A.

ENV H 580 Environmental Health and Occupational Health Sciences Seminar (1, max. 6)
Presentation of current environmental and occupational health research and issues. Credit/no credit only. Offered: AWSp.

ENV H 581 Environmental Health Reading I (1)
Critical reading of selected basic and applied research publications on environmental health problems and programs. Offered: A.

ENV H 582 Environmental Health Reading II (1)
Discussion of controversial and current issues facing public health and the environmental health professional. Offered: Sp.

ENV H 583 Environmental Health Reading III (1)
Preparation and presentation of master's thesis proposal. Offered: Sp.

ENV H 584 Occupational Health and Safety: Policy and Politics (3) Camp, Morris
Designed to provide a better understanding of the historical, political, and policy issues in occupational health and safety through selected readings and discussion with experts in the field. Particular emphasis on the Occupational Safety and Health Act. Students present testimony in a mock congressional hearing on a health and safety issue. Offered: Sp.

ENV H 590 Selected Topics (1-6, max. 6)
In-depth study of a current environmental health topic. For more information and permission, consult department program adviser. Offered: AWSp.

ENV H 591 Current Topics in Toxicology (1, max. 6) Kavanagh, Xia
Provides in-depth examination of current topics in environmental and occupational toxicology taken from recently published journal articles. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Assigned weekly readings given according to the schedule of speakers and topics. Credit/no credit only. Offered: AWSp.

ENV H 592 Current Topics in Occupational Health Sciences (1/3)
Weekly discussion of current research on a broad range of topics relevant to occupational and environmental health including exposure assessment, occupational epidemiology, occupational hygiene, and control of environmental hazards. Presentation and discussion sessions designed to help students organize and prepare a critical analysis of research findings. Credit/no credit only. Offered: A.

ENV H 593 Current Topics in Risk Assessment (1, max. 6) Faustman
Examines current topics in risk assessment and risk communication with a focus on issues in environmental health. Consists of presentations led by students, postdoctoral fellows, and faculty. Students expected to participate actively in discussion. Credit/no
The Department of Epidemiology offers three graduate degrees in the field of epidemiology for individuals intending to become academicians, highly-qualified research specialists, or well-trained public health practitioners. The Master of Public Health degree requires course work in health services and environmental health, in addition to epidemiology and biostatistics, a thesis and a practicum. Three tracks are available: the General Track, which is selected by most students; the Maternal and Child Health Track (MCH); and the International Health Track (IHP). The MCH and IHP tracks require work experience in the respective fields. M.S. applications are welcomed from outstanding bachelor-level graduates, physicians, and other health professionals. Ph.D. applicants must have prior master- or doctoral-level training from a U.S. university in a health-related field, equivalent post baccalaureate experience, or anticipate earning a joint M.D./Ph.D.

Financial Aid

Research training stipends with partial tuition support are available on a limited basis. Opportunities for work on various research projects may provide a stipend and support for the majority of tuition.

Research Facilities

University facilities include well-equipped laboratories, an excellent library system, and access to computers. Various opportunities for field research are provided in Seattle and elsewhere in the state, including the Fred Hutchinson Cancer Research Center, Group Health Cooperative’s Center for Health Studies, the Harborview Injury Prevention and Research Center, Public Health: Seattle-King County, and several other local health institutions.

Course Descriptions

EPI 101 Public Health Issues in the Media (5) I&S DeRoos
Reviews epidemiologic studies and popular media to compare original research results with the message disseminated to the public, and to analyze how and why data from public health research can sometimes be misleading to the public.

EPI 420 Introduction to Epidemiology (3) NW Goldberg
For the undergraduate student wishing to devote only one quarter to a course in epidemiologic methods. Description of ways in which variation in disease occurrence is documented and how that variation is studied to understand causes of disease. Offered: Sp.

EPI 497 Epidemiology Special Electives (*)
Off-campus course for medical students. Offered: AWSpS.

EPI 499 Undergraduate Research (*)
Offered: AWSpS.

EPI 503 Public Health Informatics and Surveillance (3)
Covers collection and use of public health surveillance data in formulating policy and managing programs through lectures and real-world interactive exercises. Discusses surveillance for birth defects, environmental exposures, and hospital-acquired infections, and use of tools such as small area analysis and geographic information systems. Offered: jointly with HSERV 503.

EPI 510 Epidemiologic Data Analysis (2) Hawes
Intended for students planning to take 514. Introduces skills and concepts to effectively analyze large data sets for case-control and cohort studies. A beyond-theory approach provides students hands-on experience in using epidemiologic data sets for stratified or multivariate analyses with SAS. Credit/no credit only. Prerequisite: EPI 511 or EPI 512. Offered: W.

EPI 511 Introduction to Epidemiology (3-4, max. 4) Kukull
Epidemiologic methods for non-epidemiology majors. Focuses on research designs and methods to describe disease occurrence and risk factor associations; uses quantitative and biomedical information to
infer whether causal relationships exist between potential causes and disease in populations. Offered: A.

EPI 512 Epidemiologic Methods I (4) Koepsell, Weiss
Principles and methods of epidemiology. Covers measures of disease frequency, measures of effect, causal inferences, descriptive epidemiology, study types, misclassification, and effect modification. Designed for students who want to take 513. Prerequisite: prior or concurrent enrollment in BIOST 511 or equivalent. Offered: A.

EPI 513 Epidemiologic Methods II (4) Koepsell, Weiss
Continuation of 512. Considers how designs of epidemiologic studies may be constructed to maximize etiologic inferences. Covers confounding, randomized trials, cohort studies, case-control studies, and selected topics. Prerequisite: EPI 512. Offered: W.

EPI 514 Application of Epidemiologic Methods (4) Hawes, Mueller, Schiff
Practical experience in analysis of data. Students analyze data sets currently on file using contemporary epidemiologic methods as taught in 512 and 513. Prerequisite: EPI 510 or experience in statistical programming; EPI 512, EPI 513 and epidemiology major. Offered: Sp.

EPI 515 Topics in Epidemiologic Methods (3)
Introduces advanced methodological methods, including recursive partitioning, developing clinical prediction rules, analyses of community-level associations or interventions, case-crossover and case-only designs, propensity scores, two-stage sampling, and missing data imputation. Prerequisite: EPI 512; EPI 513. Offered: jointly with BIOST 519; A; odd years.

EPI 516 Statistical Methods in Genetic Epidemiology (3) Monks
Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST 516/PHG 519.

EPI 517 Genetic Epidemiology (3) Austin
Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENET 371, or equivalent. Offered: jointly with PHG 511.

EPI 518 Computer Demonstrations in Genetic Epidemiology (2-4, max. 4) Edwards
Demonstrations and use of computer programs designed specifically for analysis of genetic epidemiologic data, including heritability, segregation, and sib-pair linkage analysis. Discussions focus on interpretation of results. Laboratory sections apply methods to data provided by instructor. Corequisite: EPI 517/PHG 511 or permission of instructor. Offered: jointly with PHG 518.

EPI 519 Epidemiology of Cardiovascular Disease (3) Psaty, Siscovick
Principles, methods, and issues in the epidemiology of cardiovascular disease. Focuses on coronary heart disease and its major risk factors; also covers other topics such as stroke and sudden death. The format includes informal lectures and discussions of the current literature. Prerequisite: EPI 511 or EPI 512, EPI 513. Offered: A.

EPI 520 Epidemiology of Infectious Diseases (3) DiGiacamo
Infectious diseases from a public health perspective. Topics include analytic methods, study design, outbreak investigations, surveillance, vaccine evaluations, global eradication, screening, modeling, and infectious causes of chronic diseases. Homework and discussion based on current examples from the published literature. Prerequisite: EPI 511, EPI 512, or permission of instructor. Offered: W.

EPI 521 Epidemiology of Maternal and Child Health Problems (3-4), max. 4) Schiff, Williams
Contributions to understanding and prevention of major maternal and child health problems, including pregnancy outcome, infant and child morbidity and mortality, maternal morbidity and mortality, abnormal child growth and development, and early-life factors in adult health problems. Prerequisite: graduate, medical, or dental school standing and EPI 511 or EPI 512 or permission of instructor. Offered: jointly with HSERV 542; W.

EPI 522 Reproductive Epidemiology (3) Holt
Focus on conditions and diseases of the female reproductive system, as well as pregnancy outcomes other than birth. Presentation of current epidemiologic knowledge and discussion of issues on topics including contraception; infertility; spontaneous abortion; induced abortion; breast, uterine, and ovarian disease; and menopause. Prerequisite: EPI 511 or EPI 512-513. Offered: odd years; A.

EPI 523 Injury Epidemiology (3)
Discussion of research methods which are useful in studying the causes of injury and outcomes after injury. Information regarding the impact of injuries on health and known or suspected risk factors for some injuries. Assigned readings from literature in the field. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: Sp.

EPI 524 Epidemiologic Studies of Cancer Etiology and Prevention (3) Deroos, Li
Current knowledge of the role of environmental factors (e.g., smoking, hormonal, nutrition, viral, radiation) and genetic susceptibility in the etiology of several major cancers. Illustrates principles and conduct of research in cancer etiology and cancer prevention. Prerequisite: EPI 511 or EPI 513. Offered: W.

EPI 526 Epidemiology of Diseases Communicable from Nature (3) DiGiacomo, Rausch, Weigler
Explores the public health aspects of zoonotic diseases, their epidemiology and approaches to control. Focuses on the major viral, rickettsial, bacterial, protozoal, helminthic, and fungal diseases transmitted from wild and domesticated animals to humans. Prerequisite: EPI 511, EPI 512; or EPI 520 or permission of instructor. Offered: jointly with C MED 526; Sp.

EPI 528 Exposure Measurement in Epidemiology (3) White
Principles and methods of measuring exposures and covariates in epidemiological studies. Validity and reliability of measures, questionnaire design, effects of measurement error, maximizing response rates, quality-control procedures, measurement of specific exposures. Credit/no credit only. Prerequisite: EPI 513. Offered: Sp.

EPI 529 Emerging Infections of International Public Health Importance (3-4, max. 3) Kimball
Overview of current emerging infections worldwide and contributing factors. Design of a surveillance and prevention strategy required. Offered: jointly with HSERV 536; in residence, even years; online, odd years; W.

EPI 530 AIDS: A Multidisciplinary Approach (2) Farquhar, Hawes
Comprehensive overview of the public health, clinical, and laboratory aspects of human immunodeficiency virus (HIV) infection and disease. Topics include the pathogenesis, natural history, and management of HIV infections. The impact of HIV/AIDS on community and global health care and prospects for prevention and control. Credit/no credit only. Offered: jointly with MED 530; A.

EPI 531 Problems in International Health (4) Gloyd
Explores social, political, economic, environmental determinants of developing countries’ health; traces development of societal responses to problems. Includes: origins of primary health care; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in a developing country. Offered: jointly with HSERV 531; A.

EPI 532 Epidemiology of Infectious Diseases in Resource-Limited Countries (3) McLellan
A review of major infectious disease problems of the developing world, including AIDS, malaria, tuberculosis, measles, and diarrheal, with an emphasis on public health control strategies.

EPI 533 Pharmacoepidemiology (3) Hechkbert, Johnson Overview of pharmacoepidemiology including drug development and approval; application of epidemiologic methods to study drug safety and effectiveness; exploration of the interplay between research and public policy; introduction to resources for information about drugs; introduction to pharmacology principles pertinent to pharmacoepidemiology. Prerequisite: health sciences graduate student or with permission. Offered: jointly with PHARM 533; even years; Sp.

EPI 534 Principles of Publishing Clinical Evidence (2) Johnson, Olson Explains advanced methodologic principles for improving the clarity of published clinical evidence. Students prepare and revise a 1000-word research letter for The Lancet using their own clinical evidence. Credit/no credit only. Prerequisite: permission of instructor. Offered: jointly with PHARM 536; Sp.

EPI 536 Categorical Data Analysis in Epidemiology (4) Summary of univariate categorical data analysis; introduction to multivariate analysis of categorical epidemiologic data using multiplicative models. Experience at interpretation; familiarity with available programs gained by analysis of bona fide data, critiques of analyses appearing in literature. Prerequisite: BIOST 515; EPI 513 and either BIOST 513 or BIOST 518; or permission of instructor. Offered: jointly with BIOST 536; A.

EPI 537 Survival Data Analysis in Epidemiology (4) Introduction to the multivariate analysis of survival data using multiplicative models. Application to epidemicologic studies. Familiarity with interpretation and available computer programs gained by analysis of bona fide sets of data and critiques of analyses appearing in the literature. Prerequisite: EPI 536 or permission of instructor. Offered: jointly with BIOST 537; W.

EPI 538 Nutritional Epidemiology (3) Beresford, Drewnowski Application of epidemiologic methods to current studies of diet, nutrition, and chronic disease. A discussion of current issues and controversies enable students to plan studies in nutritional epidemiology and disease prevention. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with NUTR 538; A.

EPI 539 Research Methods in Developing Countries (3/4) Gloyd, Mock Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropometry, and qualitative methods discussed. Lectures, computer lab, and student participation in community-based survey. Offered: jointly with HSERV 539; W.

EPI 540 Introduction to Cancer Biology (3) Ulrich Provides a general understanding of cancer biology, covering the carcinogenic process and various biological causes of cancer. Integrates knowledge from different fields of cancer research, guiding students through diverse literature on cancer and carcinogenesis. Prerequisite: GENOME 372, or permission of instructor. Offered: even years; Sp.

EPI 542 Clinical Epidemiology (2) Weiss Principles and methods involved in studying outcome of illness. Prerequisite: EPI 511, or EPI 512 and EPI 513. Offered: S.

EPI 544 Maternal and Child Health in Developing Countries (3) Mercer Emphasizes critical health problems of women and children in developing countries in social, economic, and cultural contexts. Practical approaches to developing MCH programs shared via lecture/discussions, exercises, and small group work. Students acquire skills in baseline assessment, setting objectives, planning and evaluating interventions, and involving communities. Offered: jointly with HSERV 544; Sp.

EPI 546 Psychosocial Epidemiology (3) Vander Stoep Application of epidemiological methods to the study of mental illnesses. Topics include occurrence and distribution of mental illness, classification of psychiatric disorders; treatment-based vs. community-based studies; epidemiology of depression and schizophrenia; familial transmission; developmental epidemiology; mental illness and violence. Prerequisite: one course in epidemiology or permission of instructor. Offered: jointly with PBSCI 546; Sp.

EPI 548 Social Determinants of Health Research Methods (3) Beresford, Smith Explores study design, measurement and analytic issues applicable to research into the social determinants of health. Semi-weekly graduate-level seminar offered to students with a basic knowledge of epidemiological and biostatistical principles. Prerequisite: either EPI 511 or EPI 512/EPI 513; BIOST 511/BIOST 512 or BIOST 517/BIOST 518. Offered: jointly with HSERV 548; W.

EPI 568 Molecular Epidemiology of Infectious Diseases (2) DiGiacomo, Samadpour, Roberts Application of molecular typing techniques to study of microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: EPI 511 or EPI 512 or permission of instructor. Offered: jointly with ENV H 568/PABIO 568. Offered: W.

EPI 570 Occupational and Environmental Epidemiology (3) Checkoway Research methods for studying occupational and environmental determinants of disease. Defining exposed populations, characterizing exposure levels, estimating disease risks relative to exposure. Cohort, case-control, cross-sectional designs for various health outcomes. Applications to exposure standard setting and risk assessment. Prerequisite: EPI 511 or EPI 512, EPI 513 or permission of instructor. Offered: jointly with ENV H 570; Sp.

EPI 571 Neuroepidemiology and Environmental Risk Factors (3) Kukull Focus on neurologic diseases and etiology. Presentation of descriptive epidemiology, clinical features, and risk factors, including stroke, Parkinson’s disease, Alzheimer’s disease, multiple sclerosis, and other disorders. Discussion of NIH grantsmanship. Guest experts present some topics. Recommended: EPI 511 or equivalent. Offered: jointly with ENV H 571; odd years; W.

EPI 573 Methods and Issues in Using Biological Measurements in Epidemiologic Research (3) Schwartz Introduction to use of measurements from biological specimens in epidemiologic studies. Prepares epidemiology and laboratory science students for conduct of interdisciplinary human studies. Evaluation of biomarkers, preliminary studies, methodologic issues, quality control. Brief review of molecular biology. Applications and current literature discussed. Prerequisite: EPI 511 or EPI 512. Offered:
EPI 583 Epidemiology Seminar (1, max. 3)
Presentation of current epidemiologic research and application of epidemiologic research in the practice of public health. Offered: AWSp.

EPI 588 Preparing and Writing Research Proposals (2)
Krisil, Reiber
Experience in preparing, organizing, and writing research proposals, following NIH and AHRQ guidelines. Includes weekly assignments and didactic exercises, leading to final research proposal. All students participate in mock study section to review and critique proposals. Credit/no credit only. Prerequisite: second-year graduate student (PhD recommended), or PhD or MD in health-related field. Offered: odd years; A.

EPI 589 Epidemiologic Research in Aging Populations (3)
LaCroix
Emphasizes application of epidemiologic methods to the study of older populations. Topics include: compression of morbidity; successful aging; methodological challenges in studying older populations; physical, cognitive and social function as epidemiological endpoints; chronic conditions of the aging (heart disease, cancer, Alzheimer’s disease, dementia, osteoporosis, fractures); health promotion strategies. Prerequisite: EPI 511 or EPI 513. Offered: jointly with HSERV 589.

EPI 590 Selected Topics in Epidemiology or International Health (1-6, max. 6)
Tutorials are arranged for a small number of students for in-depth examination of an area of epidemiology or international health, usually of current nature. Seminar format. Prerequisite: EPI 511. Also a special summer format presenting introductory material. May be offered with ENV H 590 and/or HSERV 590. For more information and permission, consult the department program adviser. Offered: AWSpS.

EPI 591 Current Literature in Epidemiology (1)
Articles pertaining to epidemiology and related subjects selected from the current literature to be distributed and read by all participants. Faculty members and enrolled students alternate being responsible for conducting sessions and choosing articles to read. Credit/no credit only. Prerequisite: EPI 513. Offered: AWSpS.

EPI 592 Program Seminars (1-6, max. 6)
Graduate seminars organized to address specific educational needs of students in various specialized programs within the Department of Epidemiology (i.e., Maternal and Child Health). Prerequisite: permission of instructor. Offered: AWSpS.

EPI 593 Cancer Prevention Research Laboratory (3)
White
Research experience for pre- and postdoctoral students working on cancer prevention projects at the Fred Hutchinson Cancer Research Center. Credit/no credit only. Offered: jointly with BIOST 593; AWSpS.

EPI 595 Epidemiology Master’s Practicum (1-6, max. 6)
Supervised practice experience providing students an opportunity to learn how epidemiology is applied in a public health setting and in the formulation and application of public health policy. Credit/no credit only. Prerequisite: EPI 512 and BIOST 511 or equivalent and permission of instructor. Offered: AWSpS.

EPI 600 Independent Study or Research (*)
Credit/no credit only. Prerequisite: permission of departmental adviser and independent study supervisor. Offered: AWSpS.

EPI 700 Master’s Thesis (*)
Credit/no credit only. Prerequisite: permission of thesis chair. Offered: AWSpS.

EPI 800 Doctoral Dissertation (*)
Credit/no credit only. Prerequisite: permission of dissertation chair. Offered: AWSpS.

Public Health Genetics

PHG 509 Multidisciplinary Communication in Public Health Genetics (2)
Watts
Focuses on effective communication in a multi-disciplinary context. Students will read and critique published public health genetics literature, and learn and apply principles of effective written and oral communication to public health genetics topics of their choice. Credit/no credit only. Offered: jointly with HSERV 509.

PHG 510 Genetic Principles for Public Health (3)
Austin, Doyle, Leboeuf
Basic principles of human genetics in a public health context; the molecular components of life, organization of the genome, gene expression, recombinant DNA technology, gene regulation, Mendelian inheritance, quantitative genetics, nutrition and gene expression, mitochondrial inheritance, gene mapping, gene-environment interactions, Human Genome Project, and genetic service in public health.

PHG 511 Genetic Epidemiology (3)
Austin, Edwards
Research methods for evaluating genetic influences on disease and risk factors and genetic-environmental interactions. Study designs and statistical methods include twin studies, family studies, population-based association studies, segregation analysis, and linkage analysis. Prerequisite: EPI 511, BIOST 511, and GENET 371, or equivalent. Offered: jointly with EPI 517.

PHG 512 Legal, Ethical, and Social Issues in Public Health Genetics (3)
Kuzel, Mastroianni
Equips the student to anticipate and assess potential legal, ethical, and social barriers complicating the incursion of new genetic advances, information, and technologies into public and private health care delivery efforts. Prerequisite: GENET 371 or equivalent. Offered: jointly with LAW H 504/MHE 514.

PHG 513 Basic Concepts in Pharmacogenetics and Toxicogenomics (3)
Eaton, Thummel
Addresses current DNA sequencing and genotyping approaches, and basic concepts of pharmacogenetics and toxicogenomics. Emphasis placed on applications of genomic technologies to the understanding of “gene-environment interactions” that cause diseases of public health importance, including cancer, chronic neurological diseases, and adverse drug reactions. Prerequisite: GENET 372 or equivalent. Offered: jointly with ENV H 513/PCEUT 513.

PHG 518 Computer Demonstrations in Genetic Epidemiology (2-4, max. 4)
Edwards
Demonstrations and use of computer programs designed specifically for analysis of genetic epidemiologic data, including heritability, segregation, and sib-pair linkage analysis. Discussions focus on interpretation of results. Laboratory sections apply methods to data provided by instructor. Corequisite: EPI 517/PHG 511 or permission of instructor. Offered: jointly with EPI 518.

PHG 519 Statistical Methods in Genetic Epidemiology (3)
Theory and application of statistical techniques used in genetic epidemiology. Includes discussion of association studies, linkages and segregation analyses. Examples stressed with reference to assumptions and limitations. Prerequisite: either BIOST 513 or BIOST 518; PHG 511/EPI 517; or permission of instructor. Offered: jointly with BIOST/EPI 516.

PHG 521 Socio-Cultural Perspectives of Public Health
Genetics (3) McGrath
Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with NURS 582/ANTH 574.

PHG 522 Ethical Frameworks for Public Health Genetics (2) Mastroianni
Case-based application of ethical principles in genetic medicine to range of problems arising in genetics practice, policy, research. Examination of traditional problems including eugenics and testing/screening for genetic disease, as well as emerging problems in population and environmental genetics. Prerequisite: LAW E 562/MHE 514/PHG 512 or permission of instructor. Offered: jointly with MHE 516.

PHG 523 Genetics and the Law (2) Kuszler
Considers the legal issues arising from new genetic technologies and information. Statutes, regulations, and cases used to demonstrate the constitutional, contract, and tort law complications resulting from dissemination of these technological advances. Prerequisite: LAW E 562/MHE 514/PHG 512 or permission of instructor. Offered: jointly with LAW H 520.

PHG 525 Public Commentary on Ethical Issues in Health Genetics (3)
Explores issues in public health genetics through academic commentary, personal narratives, science fiction, and film using ethical frameworks from narrative ethics, feminist ethics, and principlism. Includes cloning, assisted reproduction, prenatal genetic testing, presymptomatic genetic testing, gene therapies, scientific responsibility, and GMOs. Graduate students only. Offered: jointly with MHE 515.

PHG 532 Statistical Methods in Medical Genetics (2) Wijssman
Theory and application of statistical techniques used in medical genetics. In-depth discussion of linkage and segregation analysis and ascertainment problems. Applications with reference to assumptions and limitations. Data sets analyzed with current computer programs. Offered: jointly with BIOST/MED 532.

PHG 537 Pharmacoeconomics, Genetics, and Health Care (2) Ramsey, Veenstra
Introduction to outcomes research and economic evaluation related to pharmaceuticals and genetic technologies. Covers cost-effective analysis and quality of life evaluation. Discusses the use of economic evaluation in healthcare to affect policy decisions.

PHG 541 Economic and Policy Issues for Genetic Technologies and Services (3) Ramsey, Watts
Introduction to economic evaluation in healthcare. Students learn and apply economic principles to the political and policy issues surrounding genetic technologies and services. Focuses on formulation of facts and policy alternatives in several areas of public controversy with regard to genetic testing and treatment.

PHG 542 Genetic Discovery in Medicine and Public Health (3) Burke
Addresses the clinical and societal implications of genetic knowledge, with an emphasis on the ethical and policy issues surrounding the use of genetic technology in medicine and public health from 1900 to the present. Offered: jointly with MHE 530; W.

PHG 543 Social and Behavioral Research Methods in Public Health Genetics (3) Bowen, McGrath
Provides an overview of social and behavioral research and theory used in the study of public health genetics. Examples are from a range of disciplines, using a variety of methodologies. Prerequisite: graduate standing in Public Health Genetics, or permission of instructor.

PHG 580 Interactive Seminar (1, max. 6) Veenstra
Seminar series on topics related to public health genetics, including current bioethical, legal, medical, biotechnology, and public policy issues.

PHG 581 Introduction to Bioinformatics and Genetics Services in Public Health Genetics (1) Austin, Doyle, Rose
Introduction to bioinformatics computer skills and genetic services related to public health genetics. Credit/no credit only.

PHG 590 Selected Topics in Public Health Genetics (1-6, max. 6)
Tutorials are arranged for a small number of students for in-depth examination of an area of public health genetics, usually of a current nature.

PHG 595 Master's Practicum (1-12, max. 12)
Supervised practice experience providing students an opportunity to learn how genetics is applied in a public health setting and in the formulation and application of public health policy. Prerequisite: EPI 517/PHG 511, LAW E 562/MHE 514/PHG 512, ENV H/PABIO/PCEUT/PHG 513, or permission of instructor.

PHG 600 Independent Study or Research (*)
Credit/no credit only.

PHG 700 Master's Thesis (*)
Credit/no credit only.

PHG 800 Doctoral Dissertation (*)
Credit/no credit only.

Health Services
H668 Health Sciences

Health information management professionals serve the healthcare industry and the public by managing, analyzing, and utilizing data vital for patient care. From paper and electronic health records to healthcare industry and the public by managing, analyzing, and utilizing data vital for patient care. From paper and electronic health records to health informatics, maintaining access, quality and privacy of patients' test results, diagnoses, prescriptions, and treatments is care to this discipline. Information management standards and policies also assure data is accessible for accurate patient billing and reimbursement, optimal health services utilization, public health reporting, and research.

Undergraduate Program

Health Information Administration Postbaccalaureate Certificate and Bachelor of Science Degree Program

Adviser
1107 NE 45th Street, Suite 355, Box 354800
206-543-8810
hsinfo@u.washington.edu

The program in Health Information Administration offers both a post baccalaureate certificate and a Bachelor of Science degree (Evening Degree Program).

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), or its successor, in cooperation with the American Health Information Management Association (AHIMA).

Special Requirements

Applicants for the certificate need a baccalaureate degree from an accredited college or university with a minimum GPA of 2.50. They must also have taken courses in, or have the requisite knowledge and skills pertaining to, the following: human anatomy and physiology (laboratory course); patho-physiology; introduction to basic
The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health degree. The M.P.H. degree prepares future health practitioners, managers, and researchers to conduct the unfinished work of improving the well-being of communities in the United States and throughout the world. Graduates take jobs in health system management, health program design and evaluation, health promotion, public health practice, and policy analysis. Beginning autumn 2002, the department will offer an M.P.H. in community-oriented public health practice. This new degree program will use problem-based learning methods, and will integrate classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the M.P.H. specialty options. The department also offers a three-year extended degree program in community-health management, leading to the M.P.H. degree for employed professionals working full-time.

The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition, an executive version of the traditional M.H.A. degree, designed for mid-career health care professionals, was established in winter 1998. The M.H.A. degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans and other types of health care organizations.

The department offers a Ph.D. in health services and participates in the training of doctoral students from other departments on campus by offering a specialization in health services under the Doctoral Studies Program.

Master of Public Health and Master of Science

The M.P.H. and M.S. programs in health services give priority to individuals who have completed their professional training in fields such as medicine, dentistry, or nursing, or who have had substantial experience in the health field. The M.P.H. program provides broad-based public health skills, while the M.S. provides more focused health services research skills. These programs offer a general curriculum that includes introduction to health systems, epidemiology, current issues regarding the provision of medical care, methodological training for research and program evaluation, and preparation of a thesis. In addition, the M.P.H. program requires a practicum experience, an introductory course in environmental health, and a social and behavioral science course. Examples of areas of concentration include studies of patient and provider behavior; evaluation of local, state, and federal health programs; and the impact of technology on medical-care costs and benefits. The programs are organized into four tracks: community medicine, public health practice, and policy analysis. Beginning autumn 2002, the department will offer an M.P.H. in community-oriented public health practice. This new degree program will use problem-based learning methods, and will integrate classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the M.P.H. specialty options. The department also offers a three-year extended degree program in community-health management, leading to the M.P.H. degree for employed professionals working full-time.

The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition, an executive version of the traditional M.H.A. degree, designed for mid-career health care professionals, was established in winter 1998. The M.H.A. degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans and other types of health care organizations.

The department offers a Ph.D. in health services and participates in the training of doctoral students from other departments on campus by offering a specialization in health services under the Doctoral Studies Program.

Master of Public Health and Master of Science

The M.P.H. and M.S. programs in health services give priority to individuals who have completed their professional training in fields such as medicine, dentistry, or nursing, or who have had substantial experience in the health field. The M.P.H. program provides broad-based public health skills, while the M.S. provides more focused health services research skills. These programs offer a general curriculum that includes introduction to health systems, epidemiology, current issues regarding the provision of medical care, methodological training for research and program evaluation, and preparation of a thesis. In addition, the M.P.H. program requires a practicum experience, an introductory course in environmental health, and a social and behavioral science course. Examples of areas of concentration include studies of patient and provider behavior; evaluation of local, state, and federal health programs; and the impact of technology on medical-care costs and benefits. The programs are organized into four tracks: community medicine, international health, maternal and child health, and social and behavioral sciences. International health, and maternal and child health are offered jointly with the Department of Epidemiology.

The M.P.H. in Community-Oriented Public Health Practice (CO/PHP) offers an innovative method of public health training that prepares students to be effective problem-solvers, innovators, advocates, and leaders in addressing community health problems. Graduates are prepared to work in such varied settings as community and public health agencies, managed care organizations, federal programs, and advocacy and philanthropic associations. The CO/PHP program combines problem-based learning and experiential learning, approaches that are especially effective for adult learners who are seeking to integrate rigorous academic training and practice. During the first year, students select from a range of community-based field placements that help them acquire practical skills. In the second year, students select a community-based setting for a final degree (capstone) project.

The Health and Policy Research M.P.H. option provides a generalist approach to public health. Students take the core courses for the M.P.H., then tailor their programs to their own career goals. Because there are fewer specific course requirements for this track, applicants must have well-defined goals that are compatible with the areas of expertise represented on the faculty. This track is best
suited for fellows and scholars pursuing studies after receiving an M.D., R.N., or other health degree.

The Maternal and Child Health M.P.H. option provides an interdisciplinary approach to the wide variety of factors that influence the health and health care of women and children. It is an interdepartmental program offered jointly by the Departments of Health Services and Epidemiology. Students must choose to major in one of these departments; however, all students are exposed to a core content that includes basic epidemiological, behavioral, sociological, political, and economic aspects of maternal and child health. The MCH program combines practical and classroom experience to give students an in-depth understanding of the behavioral, biological, social, and environmental factors that influence health and illness in maternal and child populations; competency in public health research, analytic methods, and core functions; skills in program management; and supervised experience in applying science and management tools to the planning, development and evaluation of health programs and policy. The MCH program is designed primarily for individuals with clinical or public health experience who seek advanced training to assume increased responsibility for program management, policy formation, assessment, evaluation and research.

The International Health M.P.H. option is offered jointly in the Departments of Health Services and Epidemiology. The International Health Program (IHP) promotes understanding of the determinants of population health, and teaches skills necessary for planning, implementation, and evaluation of health programs for developing countries and other marginalized populations. The program’s goal is to balance teaching, research, and service to contribute to improvements in health at home and worldwide. The program focuses on community health and primary health-care systems, employing epidemiological and qualitative research skills to bear. The curriculum addresses the social, political, economic, environmental, geographical, and health-systems factors that have an impact on health. Requirements include completion of core M.P.H. courses, IHP elective coursework, a public health practicum, and a thesis project on a topic related to health in developing countries. Students are encouraged to carry out their thesis projects in an international setting. Substantial health-related experience in a developing country setting is generally required for admission.

The Social and Behavioral Sciences M.P.H. option focuses the study, thought, and practice of public health on the cultural, social, political, economic, and behavioral determinants of population health and the promotion of health through community action, health communications, group-level interventions, and individual behavior change. Students may plan a course of study concentrating on health behavior and health promotion or social determinants of health and community intervention. Both research and practice emphases can be applied to many different areas of public health. Students may pursue concurrent degrees with other schools and departments of the University.

Students in the academic options in Health Services may take courses in other departments of the University. Community agencies and resources are used extensively. Students with a background in medicine may qualify to receive concurrent credit for residency training in preventive medicine.

**Admission Requirements for M.P.H. and M.S.**

In addition to completing Graduate School admission requirements, applicants to the M.P.H. and M.S. programs must submit at least three letters of recommendation, Graduate Record Examination scores, and a goal statement. At least three years of medical or health care experience are usually required. Applicants are accepted only for summer and autumn quarters of each year. The application deadline is January 15.

**Doctor of Philosophy**

The overall goal of the doctoral program in Health Services is to train health services researchers and health policy analysts for careers in academic institutions, health delivery systems, public health departments, government agencies, and the private sector. This in-residence program prepares students to conduct high quality independent, collaborative research and policy analysis by offering applied research opportunities on a wide variety of topics under the mentorship of faculty. In addition, students obtain advanced knowledge of population health and health care, theoretical frameworks, and extensive research skills to identify and critically analyze social, behavioral, and health care system effects on health; and the organization, delivery, financing, and management of health services.

**Doctoral Studies Program**

Doctoral study in health services is available to qualified students on campus who are enrolled in the doctoral programs of other departments (e.g., anthropology, biostatistics, economics, epidemiology, geography, medicine, nursing, operations research, organizational theory, political science, psychology, social work, or sociology). Students in the Doctoral Studies program take four courses in health services and focus their dissertation on original research that relates the basic discipline to a specific health services issue (e.g., health behavior, health care organizations, costs, or quality and utilization of health care services).

**Financial Aid**

Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies due to inadequate finances. Some fellowships, assistantships, scholarships, and loans are available each year. However, students should be prepared to use their own resources to finance their graduate education.

**Research Facilities**

In addition to using University facilities, the program has extensive links with community health-care delivery systems and agencies for research and training.

**Extended M.P.H.**

Graduate Program Coordinator
H685 Health Sciences, Box 357660
206-685-7580

The Extended M.P.H. Degree Program is a part-time, partial distance learning program delivered through a combination of intensive four-week summer sessions on the University campus, directed independent study, and four intensive weekend seminars during the academic year. The program is designed for mid-career public and community health professionals with three or more years of experience related to public health. The program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in health services, epidemiology, biostatistics, and environmental health, the prescribed course work includes a broad exposure to the health-care system plus specific management training in budgets, finance, personnel management, economics, organization theory, and program planning and evaluation. Pathways are available in health education, maternal and child health, public health practice, and oral health.

The Extended M.P.H. Degree Program provides training in developing skills in the scientific base of public health, analytic methods, management and communication, and policy and advocacy, as well as training in cross-cutting issues. Graduates apply their skills directly to their careers.

**Admission Requirements**

In addition to Graduate School admission requirements, applicants must submit a program application, at least three letters of recommendation, a goal statement, Graduate Record Examination scores (applicants with doctoral degrees may waive this requirement).
ment), transcripts from all college-level courses completed, a statistics self-test, and a computer literacy self-test. A minimum of three years work experience in public health or a related field is required. Applicants are accepted to begin the program summer quarter. The deadline for priority consideration is December 1. Applications are accepted through February 15 and considered on a space-available basis.

Course Descriptions

HSERV 475 Perspectives in Medical Anthropology (5) Rhodes
Introduction to medical anthropology. Explores the relationship among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with ANTH 475.

HSERV 480 Issues in Public Health (1-3, max. 6) Bezruchka, Sappington, Wing
Problems and issues in epidemiology, health services delivery and administration, environmental health, pathobiology, biostatistics, and related fields.

HSERV 499 Independent Study in Health Services (1-12, max. 12)
Individual library or field study project selected in consultation with a faculty adviser.

HSERV 501 Public Health Practice at the Local Level (3) Thompson
Basic overview of state and local public health practice with leaders in the field and case studies focusing on rural and urban public health challenges. Offers preparation for practice in public health agencies. Prerequisite: HSERV 511 or permission of instructor. Offered: jointly with EPI 501; Sp.

HSERV 503 Public Health Informatics and Surveillance (3)
Covers collection and use of public health surveillance data in formulating policy and managing programs through lectures and real-world interactive exercises. Discusses surveillance for birth defects, environmental exposures, and hospital-acquired infections, and use of tools such as small area analysis and geographic information systems. Offered: jointly with EPI 503.

HSERV 504 Health Communication (1-3, max. 3) Downer
Overview of the theory and practice of designing, producing, and evaluating public health communication campaigns, including the use of mass media. Develops greater capacity for critical judgment about the use of communication strategies for achieving public health goals.

HSERV 505 Topics in Preventive Medicine (2) Goldbaum
Examines current scientific knowledge and state of the art of preventive medical interventions. Discusses and considers options for current practice. Recommended for MDs, RNs, and others with a clinical background. Credit/no credit only. Offered: jointly with EPI 525.

HSERV 507 Communication for Health Promotion: Theory and Application (3) Meischke
Discuss and evaluate health communications theories and applications at the individual level (i.e., persuasion), interpersonal level (i.e. doctor/patient communication), and societal level (i.e., mass media). Investigate intercultural communication cutting across all levels of health communication. Examines the steps involved in the design of a health communication intervention.

HSERV 508 Dynamics of Community Health Practice (3-5, max. 5) Chrisman
Examination of and experience with basic principles of clinical practice in community settings. Includes family as community constituent, populations at risk, community assessment, and community development. Prerequisite: Graduate standing or permission of course faculty. Offered: jointly with NURS 560.

HSERV 509 Multidisciplinary Communication in Public Health Genetics (2) Watts
Focuses on effective communication in a multi-disciplinary context. Students will read and critique published public health genetics literature, and learn and apply principles of effective written and oral communication to public health genetics topics of their choice. Credit/no credit only. Offered: jointly with PHG 509.

HSERV 510 Society and Health (3) Spigner
Analysis of social inequalities in health and service use by class, gender, and the social construction of race. Examines biological, cultural, social, political, and economic determinants which consistently put certain minority groups within Eurocentric societies at higher risk for inequitable health status and provision. Prerequisite: HSERV 511 or equivalent or permission of instructor.

HSERV 511 Introduction to Health Services and Public Health (3-4) Thompson
History, organization, and effectiveness of United States health care and public health systems. Determinants of health, need, and utilization. Public and private financing. Supply and provision of personal and public health services. Managed care. Government and private sector roles. Prerequisite: graduate standing or permission of instructor.

HSERV 512 U.S. Health and Health Care I-Organization, Financing, and Delivery (3) Dowling, Wickizer
Students review and examine selected topics from literature. Includes: need and access to care; theory and effects of health insurance; private and public insurance programs; managed care; costs/expenditures; availability and organization of health resources; and quality assessment and improvement. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511. Offered: A.

HSERV 513 U.S. Health and Health Care II-Population Health, Social Determinants, and Health Disparities (3) Patrick
Explores the elements and actions of a population health approach, including conceptualizing the determinants of health, synthesizing knowledge about major social determinants, and applying knowledge to improve population health and reduce health disparities. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, and permission of instructor; recommended: HSERV 512. Offered: W.

HSERV 514 U.S. Health and Health Care III-Health Policy Research (3) Watts
Extends students’ understanding of the nature of health policy and health policy development in the context of a market-based economy. Enrollment priority for Health Services PhD students. Prerequisite: HSERV 511, and permission of instructor; recommended: HSERV 512/513. Offered: Sp.

HSERV 516 Introduction to Health Services — Extended Degree (4) Wickizer
Provides overview of health care system, exposes students to current issues and developments affecting organization and delivery of health services, helps students develop ability to frame and analyze questions and issues related to health services. Prerequisite: registration in Extended Degree program. Offered: A.

HSERV 517 Provision of Health Services — Extended Degree (2) Baesler
Builds on material covered in 516 and provides students with tools used to evaluate alternative health delivery systems; exposes students to various international health delivery systems; encourages students to decide how to organize such a system. Prerequisite: HSERV 516, registration in Extended M.P.H. Degree program.
HSERV 518 Social and Ethical Issues (2-4, max. 4) Mastroianni
Presents introduction to ethical issues in public health policy and practice. Additional one credit option focuses on health administration/managed care. Coursework designed to train students in basic skills of ethical analysis and increase competency in recognizing, researching, and analyzing issues arising in public health and health services delivery.

HSERV 520 Methods in Applied Community Research (1-3, max 3) Astley
Skills/knowledge necessary to conduct orderly investigation of specific problems in preparation for M.P.H. thesis or project. Includes problem identification, posing research questions, literature review, consideration of theoretical/practical context, choosing study design, data collection, protection of human subjects, and recognizing potential errors. Credit/no credit only. Prerequisite: registration in Extended M.P.H. Degree program.

HSERV 522 Health Program Evaluation (1-4, max. 4) Grembowski
Politics, theory, methods of evaluation, from simple health programs to evaluation of large-scale interventions. Emphasizes experimental and quasi-experimental designs to estimate program impacts, as well as evaluation of program implementation. Case studies drawn from health field illustrate various types of evaluations. Prerequisite: background in introductory statistics.

HSERV 523 Advanced Health Services Research Methods I (4) Diehr, Maciejewski
Examines how to apply research methods and addresses recurring issues in health services research. Covers statistical theory that motivates the methods and empirical work that demonstrates a method’s use. Enrollment priority for Health Services PhD. students. Prerequisite: either HSERV 511, BIOST 511/512/513, BIOST 517/518, or EPI 511/512, and permission of instructor. Offered: A.

HSERV 524 Advanced Health Services Research Methods II (4) Zimmerman
Emphasizes the application of advanced biostatistical/econometric techniques in applied research. Examines a wide variety of posed research questions and demonstrates how to best obtain answers. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/512/513, BIOST 517/518, or EPI 511/512, and permission of instructor. Offered: W.

HSERV 525 Advanced Health Services Research Methods III (4) Sales
Introduction to methods of handling data and conducting basic analyses in the broad and heterogeneous field of health services research. Examines concepts and conduct hands-on research using large, public use data. Enrollment priority for Health Services PhD students. Prerequisite: either HSERV 511, BIOST 511/512/513, BIOST 517/518, or EPI 511/512, and permission of instructor. Offered: Sp.

HSERV 526 Qualitative Research Methods for Public Health (4) Bezruchka
Covers a range of qualitative, ethnographic tools for practical applications in public health. Methods covered include direct observation, informant interviews, focus groups, and formal methods. Covers Rapid Assessment Procedures and Participatory Action Research. Student teams investigate research questions using these techniques. Offered: Sp.

HSERV 528 Critically Appraising and Applying Evidence in Health Care (3) Pinsky, Wolf
Literature appraisal skills for various articles (therapy effectiveness, diagnostic tests, literature reviews, clinical measurement, prognosis, quality of care, decision analysis, causation/etiology, guidelines, and economic evaluation). Appraisal of clinical information from literature, strengths/weaknesses of data, analyses, study design/applicability to a current patient’s problem. Prerequisite: permission of instructor. Offered: jointly with MEDED 540; W.

HSERV 529 Introduction to Systematic Reviews and Meta-analysis of Evidence (2) Wolf
Conceptual understanding of the quantitative methods used to synthesize evidence. Methods for pooling evidence across independent studies, pooling binary/continuous outcomes, differences between fixed and random effects models, and guidelines for appraising published systematic reviews/meta-analyses. Prerequisite: introductory-level courses in statistics, epidemiology, or biostatistics. Offered: jointly with MEDED 541; Sp.

HSERV 531 Problems in International Health (4) Gloyd
Explores social, political, economic, environmental determinants of developing countries’ health; traces development of societal responses to problems. Includes: origins of primary health care; child survival; traditional systems; population; water; sanitation; international agencies; impact of economic policies. Case study formulating pharmaceutical policy in a developing country. Offered: jointly with EPI 531; A.

HSERV 532 International Health-Introduction and Topics (4-, max. 8)
Encourages students to demonstrate their facility with concepts and readings by creating short essays on selected topics. Overview emphasizing assessment, assurance, policy development, and the future of global health.

HSERV 533 Population, Health, and Development (2) Povey
Provides students with an introduction to demographic conditions in Third World countries and an understanding of the consequences of rapid population growth on health and the environment. The context and effectiveness of family planning programs is a major focus.

HSERV 534 Global Population Health and Development (3) Bezruchka
Looks at determinants of population health in different countries, to learn about the constraints of typical public health and development paradigms. Topics include colonialism, development and underdevelopment, political economy, culture, health behaviors, hierarchy, health care and medical harm. Prerequisite: experience working in a health program.

HSERV 536 Emerging Infections of International Public Health Importance (3-, max. 3) Kimball
Overview of current emerging infections worldwide and contributing factors. Design of a surveillance and prevention strategy required. Offered: jointly with EPI 529; in residence, odd years; online, even years; W.

HSERV 537 Economic Development and Health (1, max. 3) Gish
Discusses issues of broad interest in the areas of economics, development, and health. Credit/no credit only. Offered: AWSp.

HSERV 539 Research Methods in Developing Countries (3/4)
Gloyd, Mock
Simple, practical methodologies to obtain and validate information regarding health status and health services in developing countries. Usefulness, validity, limitation of vital records, health reports, household (and cluster) surveys, nutritional anthropometry, and qualitative methods discussed. Lectures, computer lab, and student participation in community-based survey. Offered: jointly with EPI 539; W.

HSERV 541 Topics in Maternal and Child Health I (3-, max.
HSERV 543 Topics in Maternal and Child Health III (3) 
Huebner
Provides an overview of contextually based frameworks for understanding growth and development. Identifies and describes the conceptual basis and theory of change that underlie successful preventive intervention efforts to promote the well being of children and reduce common MCH problems.

HSERV 550 Policy and Economics: Fundamentals and Applications (3) 
Katz, Watts
Explores how values drive the structure of societies, economic systems, public policies, and ultimately, allocation and distribution of resources. Explores how science and community values intertwine in the development of health policy, and how ideology, culture, and history influence structure and change a nation’s health system. Offered: W.

HSERV 551 Health Law (2)
Analysis of law, the legal system and current legal problems as they relate to the financing and delivery of health care services. Offered: Sp.

HSERV 552 Health Policy Development (3-, max. 3) 
Katz, Watts
Focuses on development of public policy concerning medical care and public health and the relationship between public decisions and the market place. Using contemporary policy issues as case studies, examines the role science, ideology, culture, and history play in influencing the structure of and changes to a nation’s health system.

HSERV 553 Politics of Health Care (3) 
Hagens
Understanding of health policy making within the context of American politics. Health policy making is examined in light of political leadership, the legislature, the initiative process, rule making, interest groups, and lobbying. Prerequisite: HSERV 551, a basic understanding of the American health care system, or permission of instructor.

HSERV 554 Health Legislation Seminar (1) 
Beyer, Seib
Discussion of current state of health policy, topics with legislative staff and others involved with state health policy. In addition to four sessions on campus, course meets once in Olympia during legislative session. Credit/no credit only.

HSERV 560 Adult Learning: Theory and Practice (3) 
Downer
Designed to help students apply Popular Education theory and practice to preparation, presentation, and evaluation of health education. Students design, teach, and evaluate four separate teaching sessions (one between each seminar) using theory and principles of Popular Education learned to date. Prerequisite: graduate standing or permission of instructor.

HSERV 561 Introduction to Health Promotion and Planning (3) 
Downer
Overview of behavior change theory and comprehensive approach to planning, implementing, and evaluating health promotion interventions. Links theory to practice. Uses PRECEDE/PROCEED planning model by Green and Kreuter as framework.

HSERV 570 Seminar on Issues in Social Medicine (3) 
Rhodes
Qualitative research organized around selected works in sociology, anthropology, and public health. Readings and discussion of literature, individual class presentations. Addresses fellowship programs and student research projects.

HSERV 571 Cultural Competency for Public Health Practice (1-4, max. 4) 
Thornton
Application of cultural competency to clinical practice, health care management, and health services research when working with culturally diverse populations. Methodological orientation is qualitative, historical, and ethnographic. Lecture, narratives, discussions, guest presentations, film, video. Interdisciplinary perspective appropriate for graduate students in public health, health administration, nursing, social work, and anthropology. Offered: Sp.

HSERV 572 Community Development for Health (4) 
Hagopian, House
Learn the literature, theory, history, and accepted knowledge in the fields of community development, activism, and community organizing within a health systems context. Provides a forum for exploring approaches to community development and organizing. Gain specific skills and master techniques. Offered: W.

HSERV 573 Community Development for Health Seminar (1)
Explores the importance of community as a determinant of health, and how public health workers can help strengthen communities. Companion course to HSERV 572. Meets Friday afternoons to hear community organizers and leaders in community development.

HSERV 574 Seminar in Biobehavioral Interventions, Communications, and Cancer Outcomes I (3)
An intensive, case-focused review of methods for conducting research in cancer prevention and control, covering areas related to epidemiology, genetic epidemiology, clinical trials, and translational research as it applies to cancer. Includes faculty lectures, discussions of new proposals, and trainee presentations of research ideas.

HSERV 575 Seminar in Biobehavioral Interventions, Communications, and Cancer Outcomes II (3) 
Bowen
Provides an overview of research in cancer prevention and control for students training for a career in this field. Students identify major areas of prevention and control research, conduct an analysis of data in cancer prevention and control, and learn to prepare a research project grant. Prerequisite: permission of instructor.

HSERV 576 Health, Culture, and Community (3)
A theory and skills class concerning development of personal and organizational cultural competence in community-based participatory research. Core concepts of cultural competence are considered as they are practiced in community settings. Fieldwork required. Offered: jointly with NURS 557.
HSERV 580 Society, Chronic Illness, and Disability (3)

Heidrick

Definition and assessment of chronic illness, disability, and health status. Analysis of chronic illness and disability using frameworks from social sciences and public health. Dimensions of disablement as they affect provision of health services. Research on effectiveness of services and approaches to improvement. Prerequisite: HSERV 511 or permission of instructor.

HSERV 581 Strategies of Health Promotion (4)

Bowen, Drewowski

Assessment of health promotion planning, implementation, and evaluation strategies for their strengths, weaknesses, and effectiveness. Students critique strategies to modify behavioral factors that influence lifestyles of individuals, including decisions influencing their reciprocal relationship with environmental factors affecting the health of individuals, organizations, and communities. Offered: jointly with NUTR 581. Prerequisite: HSERV 511.

HSERV 582 Theoretical Perspectives on Health Behavior Change (3-4, max. 4)-

Meischke

Overview of theoretical perspectives in health behavior at the individual, interpersonal, and community level. Focuses on increasing skills in describing, applying, and integrating these frameworks in the design and evaluation of health promotion interventions. Prerequisite: HSERV 511 or permission of instructor.

HSERV 583 Economic Evaluation in Health and Medicine (3)

Sullivan, Veenstra

Methods and techniques for evaluating costs and cost-effectiveness of health, medical, and pharmaceutical interventions. Emphasis on economic evaluation, decision analysis, and modeling techniques for resource allocation and decision making. Applications to technology assessment, health policy, clinical practice, and resource allocation. Prerequisite: permission of instructor. Offered: jointly with PHARM 534; A.

HSERV 584 Evaluating Cost and Outcomes in Health and Medicine 2 (3)

Patrick, Sullivan, Veenstra

Concepts and methods for evaluating cost and outcomes of health and medical interventions with a focus on cost-effectiveness analysis, pharmacoeconomics, health and quality of life assessment, resource allocation, and medical decision-making. Prerequisite: permission of instructor. Offered: jointly with PHARM 535.

HSERV 585 Seminar in Medical Geography (5, max. 10)

Intensive research seminar dealing with new and promising research themes in medical geography and public health. Offered: jointly with GEOG 581; A.

HSERV 586 Medical Geography (3)

Mayer

Geography of disease, consideration to health systems planning. Distributions, diffusion models, migration studies. Application of distance, optimal location models to health systems planning; emergency medical services, distribution of health professionals; cultural variations in health behavior. Prerequisite: familiarity with social science research, health-related issues. Offered: jointly with GEOG 580.

HSERV 587 Health Policy Economics (3)

Watts

Applies economic theory to selected topics in health care, including information, risk and insurance, industry organization, government regulation, and public health issues. Emphasizes policy implications of these applications.

HSERV 588 Community Approaches to Health Promotion (3)

Thompson

Provides opportunities to critically examine community-based health promotion interventions and the design, evaluation, and implementation issues they raise. A wide range of disciplinary perspectives is presented. Case studies and class projects are designed to give students the skills needed to critically assess community projects around health promotion.

HSERV 589 Epidemiologic Research in Aging Populations (3)

LaCroix

Emphasizes application of epidemiologic methods to the study of older populations. Topics include: compression of morbidity; successful aging; methodological challenges in studying older populations; physical, cognitive and social function as epidemiological endpoints; chronic conditions of the aging (heart disease, cancer, Alzheimer’s disease, dementia, osteoporosis, fractures); health promotion strategies. Prerequisite: EPI 511 or EPI 513. Offered: jointly with EPI 589.

HSERV 590 Selected Topics in Health Services (*-)

By individual arrangement, the student and faculty member(s) develop a program of reading and conference appropriate to the topic selected by the student. The topic chosen will be within the special competence of the faculty participating in the course, in the areas of health-care delivery and health-care administration. Also special summer format presenting introductory material may be taken with ENV H 590 and/or EPI 590. For more information and permission, consult department program adviser.

HSERV 591 Community Oriented Public Health Practice (1-6, max. 42)

Seven-quarter integrated sequence covers public health aspects of community assessment, biostatistics, epidemiology, health promotion/disease prevention, behavior change, environmental health, community development, policy development and analysis, and program planning and management. It is taught in a problem-based format. Prerequisite: enrollment in the COPHP program.

HSERV 592 Program Seminars (1-6, max. 6)

Graduate seminars organized to address specific educational needs of students in various fellowships, residencies, and other specialized programs within the Department of Health Sciences (i.e., maternal and child health, international health, preventive medicine, social and behavioral sciences). Prerequisite: permission of instructor.

HSERV 595 Practicum/Field Work in Community Medicine (1-12, max. 12)

Experience in variable time blocks in community health activities in agencies delivering and planning health services. Sites include neighborhood clinics, health planning bodies, medical practice settings, public health agencies, special problem clinics and facilities, environmental programs and services. Prerequisite: master’s student in health services and permission of instructor.

HSERV 598 Extended Degree Program Project Option (*, max. 9)

Supervised project work on a selected topic related to student’s concentration in graduate study. Includes survey of literature, development of approach, and written paper on conclusions. Prerequisite: registration in extended MPH degree program and satisfactory completion of the first summer’s course work.

HSERV 600 Independent Study or Research (*)

Prerequisite: permission of instructor.

HSERV 700 Master’s Thesis (*)

Prerequisite: permission of instructor.

HSERV 800 Doctoral Dissertation (*)

Health Services Management

Course Descriptions

HSMGMT 500 Seminar in Managed Care (2)

Dowling

Examination of the organization and management of managed-care health plans and delivery systems. Focuses on features that influence
the effectiveness of such organizations. Goals, functions, organization, and technology of the internal systems common to managed care are discussed with executives from health plans and delivery systems. Credit/no credit only. Offered: Sp.

HSMGMT 501 Epidemiology/Critical Evidence Appraisal (3-4)
Kopjar
Basic knowledge about methods used in epidemiology and their application to critical appraisal of clinical, epidemiological, and health administration literature for evidence-based management of healthcare organizations, improvement of delivery of health services, and for creating health policies. Offered: W.

HSMGMT 502 Evidence-Based Health Care Planning (3-4)
Kopjar, Richardson
Applies the techniques of statistics, epidemiology, and critical evidence appraisal to the design and evaluation of population-based health care programs. It is the third course in a three-course sequence. Offered: Sp.

HSMGMT 512 Introduction to Management in Health Services (3) Dowling
Overview of managerial roles, such as supervising and motivating, approaches to organizational and environmental assessment and change, and development of systems analysis skills. For students pursuing careers in research and teaching who are likely to have management responsibilities.

HSMGMT 513 Allocating Health Care Resources: A Population Based Perspective (4) Conrad
Analysis of health services financing in the United States, with comparison to systems of other developed countries. Develops analytic and normative frameworks for examining public and private health insurance. Study of pricing, underwriting, benefit design, and delivery system; financing integration issues. Prerequisite: HSERV 511 or equivalent or permission of instructor. Offered: Sp.

HSMGMT 514 Health Economics (3) Wickizer
Uses economic concepts and tools to examine range of issues pertaining to health care, delivery of health care services. Includes demand analysis, production of health services, expenditure growth, markets for hospital and physician services, externalities. Emphasis on using economics to examine issues and solve problems. Prior economics courses not required. Offered: W.

HSMGMT 522 Applied Data Analysis (3) Cheadle, Connell
Practical experience in quantitative research, using a data set of their choosing to formulate a research question, clean and edit the data, and do the analysis. For second-year students in the School of Public Health who plan to do quantitative analysis for their thesis or project. Credit/no credit only. Offered: W.

HSMGMT 523 Informatics in Health Care Management (3)
Masuda
Medical informatics concerns the representation, organization, and manipulation of biomedical information and knowledge. Exposes students to a high-level understanding of informatics and its health care applications. Discussion of successes and failures in implementing information technology focuses on gaining leadership and management knowledge that embraces informatics. Offered: W.

HSMGMT 543 Social and Behavioral Strategies for Improving Health (3) Sloma
Explores social dimensions of health and medical care. Learn to identify key social and cultural principles that guide appropriateness in health care. Introduced to tools used to influence social expectations and personal behavior in relation to illness, health, and demand for medical treatments. Offered: S.

HSMGMT 545 Capstone Integrative Seminar (4) Scott
Designed to assist students in the transition from theory to practice. Emphasis on sharpening analytical and intuitive leadership practices through the use of interactive case studies and team building exercises and field projects. Prerequisite: second-year MHA students. Offered: Sp.

HSMGMT 546 Long-Term Care (3) Hawley
Learning experience for graduate students in health services administration, planning, other graduate students to increase their ability to identify and solve problems related to long-term care they confront in their employment. Students are exposed to available knowledge in the field; effective problem-solving attitudes and techniques for organizing information and/or developing strategies, and agencies in the field. Prerequisite: HSERV 511 or permission of instructor.

HSMGMT 560 Management Practice in Health Care and Public Health Organization (1-3, max. 3) Richardson, Sappington
Introduction to leadership and management, focusing on effective strategies for creating a productive work environment. Organizational structure and strategy introduced. Case studies and other problem-solving methods, using health services applications are utilized in order to apply theoretical material. Prerequisite: graduate student. Offered: Sp.

HSMGMT 561 Health Planning: The Management of Change (3-4) Erbstoeszer
Designing realistic implementation strategies at beginning of planning process to optimize impact of planning on real problems. Discussion of ways in which change is brought about and decisions are made and implemented. Includes managing planning process, work plans, stakeholders, negotiation, and working with groups. Prerequisite: HSERV 511 or permission of instructor. Offered: A.

HSMGMT 562 Strategic Management of Health Care Organizations (3-4, max. 4) Dowling
Management of goals, strategy, and structure in health care organizations. Design of external relationships and internal structures., strategy-formulation, decision-making, and change. Integration of professional, social, and organizational values. Theory, student and practitioner experience, and case studies used to enhance repertoire of management approaches and skills. Prerequisite: HSERV 511 and HSMGMT 560 or equivalent.

HSMGMT 563 Personnel Management for Health Professionals (3) Kienast
Designed for midcareer health services professionals developing strategies and skills in human resource management. Focuses on policy and practice issues important to handling day-to-day personnel problems—selection, promotion, performance appraisal, discipline, grievances. Prerequisite: registration in Extended M.P.H. Degree program or permission of instructor; non-business majors.

HSMGMT 565 Quantitative Decision Making for Health Services Management (3) Pilcher
Applications of various quantitative techniques for problem solving, monitoring, controlling, decision making in health services. Identifying problem area, communications with consultant, evaluation to the quality and applicability of analyst's work. Statistical, mathematical, operations research, industrial engineering techniques. Prerequisite: QMETH 500 or BIST 509 or permission of instructor.

HSMGMT 566 Decision Support Models for Health Services (3) Pilcher
Management science and approaches developed as applied to problems in public health. Emphasizes conceptual understanding of processes/application of systematic, and rational approach to managerial problem solving, including cost-benefit, cost effectiveness analysis. Prerequisite: BIST 502 and 503, or BIST 511; registration in Extended M.P.H. Degree program; non-business
ties to develop skills in communicating research findings through
analyze, interpret, and use data for solving problems; and opportun-
ity to develop skills in communicating research findings through
fundamental understanding of basic cellular and molecular processes
application of basic biomedical research to diseases of public health
The Pathobiology graduate program offers graduate training in the
of reading and conference appropriate to the selected topic. The
topic chosen is within the special competence of the faculty
members participating in the course in the area of health services
management.

HSMGMT 592 Health Management Program Seminar (1-6,
max. 6)
Pathobiology

Graduate Program Coordinator
F161F Health Sciences, Box 357238
206-543-4338
pathobio@u.washington.edu

The Pathobiology graduate program offers graduate training in the
application of basic biomedical research to diseases of public health
interest. The program of study involves core courses to develop a
fundamental understanding of basic cellular and molecular processes
and techniques important in the application of basic biomedical
research to diseases; laboratory experience to learn how to collect,
analyze, interpret, and use data for solving problems; and opportuni-
ties to develop skills in communicating research findings through
oral and written presentations.

The doctoral program lasts four to five years and is designed for
students to become capable of conducting independent research
leading to the expansion of knowledge by developing skills to
approach unfamiliar experimental systems and identify and explore
important questions concerning pathogenesis and infection. Students
develop familiarity with the paradigms for control, prevention, and
treatment; develop an understanding of epidemiology and disease
processes; learn basic methodologies used in this research including
relevant areas of molecular biology, bacteriology, cell biology,
virology, epidemiology, and biostatistics; and develop familiarity
with the major classes of pathogens.

In the first year, students rotate through three laboratories to
become acquainted with faculty research programs and complete the
preliminary examination. Subsequently, each student selects a track
based on research interests (eukaryotic, bacterial, viral) and
identifies a mentor to precept the student’s research. During the
first two years students are expected to fulfill core course require-
ments and take the general examination. Students then complete
their research project, dissertation, and defense of their dissertation.
The master’s program is designed for students to develop an
understanding of the applications of molecular biology to public
health, epidemiology, and cellular or antigenic analysis, and
microbiology or immunology. The focus in this two-year program is
developing basic research skills and understanding the scientific
method. Students are expected to fulfill their course requirements
during the first year. Under the guidance of a faculty research
mentor, students propose and complete a thesis that includes an
original research project.

Research Facilities

Research facilities are geographically dispersed and located in the
Health Science Center of the School of Medicine, Fred Hutchinson
Cancer Research Center, and Seattle Biomedical Research Institute.
External support includes computer facilities and the Health
Sciences Library with access to more than 345,000 volumes, 4,000
periodicals, and online bibliographic services for all national libraries
of medicine and most commercial databases.

The Fred Hutchinson Cancer Research Center is a world-renowned
research institution. Its mission for more than 20 years has been to
eliminate cancer. Shared facilities are available, including electron
microscopy, flow cytometry, tissue culture, image analysis, and
biotechnology center for DNA and protein synthesis and sequencing,
animal facilities, biological production facility focused on mono-
clonal antibody production, extensive libraries, and a biocomputing
center.

The Seattle Biomedical Research Institute is an independent
nonprofit organization studying causes and interventions to
infectious diseases of worldwide impact, including targeted research
producing leading edge findings and applied research creating
diagnostic tests and treatments.

Financial Aid

The department offers a twelve-month competitive salary, as well as
paying tuition and health insurance, which includes medical,
dental, and vision benefits. Students with satisfactory academic
progress can anticipate funding for the duration of their studies.

Course Descriptions

PABIO 201 Newly Emerging Diseases in Public Health (2)
NW Kenny

Newly recognized and emerging disease pose a major problem for
public health. AIDS, hantavirus infections, Ebola virus infections,
and the role of bacterial infection in the causation of stomach ulcers
are examples of problems to be studied. Other timely diseases are
presented in this lecture discussion course. Offered: W.

**PABIO 301 Prevention of Infectious Diseases (3) NW Kenny**
Consideration of means of prevention of major classes of infectious diseases from the public-health viewpoint. Classes of diseases are defined by site of infection (e.g., respiratory) or common mechanisms of spreading. Respiratory, sexually transmitted, water-borne, and tropical diseases. Prerequisite: either MICROM 301 or BIOL 201. Offered: Sp.

**PABIO 498 Undergraduate Thesis (*)**

**PABIO 499 Undergraduate Research (*)**

**PABIO 500 Introduction to Pathobiology Research (3-9, max. 9)**
Rotation through research laboratory. Credit/no credit only.

**PABIO 511 Pathobiological Frontiers (2) Kenny**
Molecular and immunological concepts of infectious and non-infectious diseases presented in format suitable for graduate students knowledgeable in health-related areas who are not in biology-oriented programs. Allergy, immune responses, nature of infectious agents, prevention of disease with emphasis on newly defined diseases and disease agents. Prerequisite: permission of instructor.

**PABIO 525 Cell Surface Membrane in Cell Sociology and Immunology (2) Carter, Hakomori**
Structure and function of cell surface membranes in relation to development of various diseases, particularly infection, cancer, and inflammation. Examines how specific cell surface molecules are targets of recognition by microbes, tumor cells, and recruited inflammatory cells. Prerequisite: BIOC 440, BIOC 441, BIOC 442, and permission of instructor. Offered: jointly with MICROM 525.

**PABIO 536 Bioinformatics and Gene Sequence Analysis (3) Rose**
Nature and relevance of molecular sequence information, computer-based protein, and DNA sequence analysis, molecular sequence and genomic databases, and methods for database accession and interrogation. Prerequisite: background in molecular biology and permission of instructor. Offered: jointly with MEDED 536; ASp.

**PABIO 540 Antibiotic Resistance Mechanisms and Their Impact on Public Health (3) Roberts**
Lectures covering resistance mechanisms against bacterial antibiotics, antiviral, antiparasitic, and cancer drugs. Topics also include the effects that resistant microorganisms have on therapy and cancer treatment and their impact on public health. Prerequisite: permission of instructor.

**PABIO 548 Molecular and Cellular Parasitology (3) Feagin**
Molecular and cellular biology of parasites of health-related significance, emphasizing current research topics unique to parasites, particularly well-suited for study in parasites, and especially important to study in host-parasite systems. Prerequisite: familiarity with molecular and cellular biology and permission of instructor. Offered: even years; Sp.

**PABIO 550 Diseases of Public Health Importance and Strategies for their Control (3)**
Public health perspective of major disease of national and global importance. Discussion of origins, establishment, progression, and pathogenesis of diseases. Importance of immunological, intercellular and external factors, and strategies of disease prevention. Requires a grounding in cellular and molecular biology, microbiology, and immunology. Prerequisite: permission of instructor.

**PABIO 551 Biochemistry and Genetics of Pathogens and Their Hosts (4)**
Provides a strong foundation in biochemistry, molecular biology, and genetics for students interested in disease. Principles will be illustrated through examples focusing on pathogens, and infectious and non-infectious disease. Prerequisite: undergraduate level course work in molecular biology or biochemistry or permission of instructor.

**PABIO 552 Cell Biology of Human Pathogens and Disease (4)**
Cell biology and immunology explored through diseases of public health importance with examples of pathogen interaction with host cell biology and immune systems, unique aspects of the cell biology of pathogen, perturbations of these systems in non-infectious diseases and design of therapeutics and vaccines to combat diseases of public health importance. Prerequisite: undergraduate level coursework in biology or molecular biology or permission of instructor.

**PABIO 553 Survival Skills for Scientific Research (2)**
Lukehart, Parsons
Focuses on skills needed for scientific career: writing abstracts, curriculum vitae, research proposals; preparing for oral presentations; lab management skills; discussion of mentorship/trainee relationships; case-based discussions of various topics in ethics and scientific misconduct. Credit/no credit only. Offered: Sp.

**PABIO 568 Molecular Epidemiology of Infectious Diseases (2)**
Application of molecular typing techniques to study microbial pathogens to increase understanding of epidemiology of infectious diseases. Brief review of molecular biology. Evaluation of methods used in outbreaks and epidemics reported in literature. Prerequisite: PABIO 511 or PABIO 512 or permission of instructor. Offered: jointly with ENV H 568/EPI 568; W.

**PABIO 580 Pathobiology Seminar (1, max. 15)**
Research from students, faculty members, and invited speakers is presented and discussed. Topics include immunochemistry, viruses, membranes, infectious diseases, immune response and other related topics.

**PABIO 581 Current Literature in Pathobiology (1, max. 15)**
Develops skills in analyzing data and assessing conclusions through an analysis of current literature in Pathobiology. Focuses on breadth and analytical skills. Prerequisite: enrollment in the pathobiology graduate program.

**PABIO 582 Critical Thinking and Research Design in Pathobiology (1.5) Lingappa**
Analysis of issues, hypothesis and experimental design and testing. Credit/no credit only. Prerequisite: graduate standing in pathobiology. Offered: W.

**PABIO 590 Selected Topics (1-20, max. 20)**
Individual offerings focusing on topics such as pathogenesis, immunology, virology, disease agents, bioinformatics and grant writing. Small lecture format. Credit/no credit only. Prerequisite: permission of instructor.

**PABIO 598 Didactic Pathobiology (*, max. 12)**
Supervised teaching experience in pathobiology courses for Ph.D. candidates. Prerequisite: permission of instructor.

**PABIO 600 Independent Study or Research (*)**
Credit/no credit only. Prerequisite: permission of graduate program adviser.

**PABIO 700 Master’s Thesis (*)**
Credit/no credit only. Prerequisite: permission of graduate program adviser.

**PABIO 800 Doctoral Dissertation (*)**
The Air Force Reserve Officer Training Corps program (AFROTC) is designed to motivate, educate, and commission highly qualified students for active duty as officers in the U.S. Air Force. The curriculum provides the opportunity for students in any major to gain military knowledge and to become effective Air Force officers and leaders in the aerospace environment.

**Financial Assistance**

The Air Force offers one-, two-, and three-year scholarships to college students. AFROTC scholarships pay tuition, certain fees, and textbook reimbursement. In addition, scholarship winners receive a monthly subsistence allowance. To apply for one of these scholarships, students should contact the Unit Admissions Officer in the Department of Aerospace Studies (AFROTC), 206-543-2360 or at afrotc@u.washington.edu.

**Two-Year Program**

To provide for those students wishing to join AFROTC but unable to take the general military courses, a two-year professional officer course is available on a competitive basis. This program is open to graduate students and full-time undergraduate students in select majors who will complete a bachelor’s degree in two years. Students in this program are required to attend a six-week field-training course at an Air Force base during the summer preceding program entry. The student is paid during the six-week period. Upon return to the campus, students enter the professional officer course. Uniform, texts, and a monthly subsistence are provided. Students interested in this program should contact the AFROTC department by February prior to the autumn quarter they desire to enter, at 206-543-2360 or at afrotc@u.washington.edu.

**Course Descriptions**

A S 101 Aerospace Studies 100 (1)

Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

A S 102 Aerospace Studies 100 (1)

Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

A S 103 Aerospace Studies 100 (1)

Focuses on the basic characteristics of air doctrine; US Air Force mission and organization; functions of United States strategic offensive and defensive, general-purpose, and aerospace support forces; officership/professionalism and an introduction to communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.

A S 211 Aerospace Studies 200 (1)

Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: A.

A S 212 Aerospace Studies 200 (1)

Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: W.

A S 213 Aerospace Studies 200 (1)

Factors contributing to the development of air power from its beginnings to the present, and the evolution of air power concepts and doctrine. History of air power employment in military and nonmilitary operations in support of national objectives. Assessment of communicative skills. Additional one-hour leadership laboratory is mandatory for cadets, but not special students. Offered: Sp.

A S 331 Aerospace Studies 300 (3)
Emphasis on leadership and management fundamentals, professional knowledge, leadership ethics, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Offered: A.

A S 332 Aerospace Studies 300 (3) Emphasis on leadership and management fundamentals, professional knowledge, leadership ethics, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Offered: W.

A S 333 Aerospace Studies 300 (3) Emphasis on leadership and management fundamentals, professional knowledge, leadership ethics, and communicative skills required of an Air Force officer. Case studies used to examine leadership and management situations. An additional leadership laboratory (mandatory for cadets but not special students) provides leadership experiences, giving students the opportunity to apply learned principles. Offered: Sp.

A S 431 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy and policy, methods for managing conflict, alliances and regional security to preserve American interests. Arms control and terrorism. The military as a profession, officer, the military justice system, current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: A.

A S 432 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy and policy, methods for managing conflict, alliances and regional security to preserve American interests. Arms control and terrorism. The military as a profession, officer, the military justice system, current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: W.

A S 433 Aerospace Studies 400 (3) I&S Needs for national security, evolution of American defense strategy and policy, methods for managing conflict, alliances and regional security to preserve American interests. Arms control and terrorism. The military as a profession, officer, the military justice system, current military issues; refinement of communicative skills. A one-hour leadership laboratory is also required for cadets, but not special students. Offered: Sp.

Military Science

104 Clark Hall

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing that there is a great difference between cognition and volition, the program is structured in such a way as to give the student practical experience in leading and managing resources.

The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. The courses enable such knowledge to be acquired on the campus without serving in the military forces. The Army ROTC electives enrich the student’s course of study. Taking these courses also opens up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

Army ROTC provides the student membership in a close-knit fraternal organization. ROTC programs on college campuses are the nation’s way of ensuring that the influences of higher education are transferred into the military services—a mandatory requirement in a democracy. Enrollment and Scholarship Officer 105 Clark, Box 353820 206-543-9010

Traditional Four-Year Program

Open to freshman and sophomore men and women. Academic studies include courses in military history, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military law. Extracurricular activities include such options as Ranger Company, color guard, training exercises, field trips, and related activities. A non-scholarship student incurs no obligation of any kind during the first two years of the four-year AROT. Placement credit toward completion of AROT courses may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROT and may enter the advanced course when they are academic juniors. All military textbooks and uniform items are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of $350 per month as an academic junior and $400 per month as an academic senior. In the advanced course, cadets are required to participate in the leadership-development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a five-week summer camp during which they receive varied and challenging training and for which they are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course, students agree to complete the course, accept a commission upon graduation, and serve a minimum of four years if scholarship (three years if non-scholarship) and be on active-duty commitment. If the cadet chooses to go in the Reserves or National Guard, then he or she will serve a minimum of eight years.

Four-Year Scholarship Program

Application to this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Active Army, the Army Reserve, or the Army National Guard. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus monthly tax-free stipends, is provided by the Army. The program requires four years of academic study on campus, as well as a five-week advanced camp training period between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract wherein the student agrees to complete this program, along with a chosen academic program, to accept a commission, and to serve on active duty or in the reserve forces after commissioning.

Three-Year Scholarship Program

This program is open to qualified students on campus. The scholarship provides financial assistance during the remaining years of the student’s enrollment. Each scholarship pays for tuition and a flat rate for books and laboratory expenses and provides tax-free monthly stipends of $350 for academic juniors and $400 for academic seniors. All other advantages and obligations are the same as those of the four-year scholarship program.

Two-Year or Lateral Entry Program

This program is open to qualified undergraduate and graduate students who have at least two years remaining in school and who have completed 81 credits. Students may qualify for entrance into the advanced course under this program in two ways. First, they may participate as qualified veterans who receive placement credit for the first two years of AROT. Veterans are
also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserves and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.

The second alternative under this program requires attendance at the Leader’s Trainers Course for five weeks at Fort Knox, Kentucky. Completion of this training also qualifies students for direct entry into the advanced course. While at camp, students receive pay plus travel expenses to and from the camp location, and they may compete for two-year scholarships, provided scholarships are available.

Course Descriptions

M SCI 101 Military Science I: Basic (2)
History, organization, and mission of the United States Army and the Reserve Officer Training Corps. Relationship to the citizen’s military and civilian obligations. Functions and organization of the United States defense establishment. Fundamentals of leadership and management. Leadership laboratories and two field training exercises conducted during the year encompass training in field craft, survival, and small unit tactics. Offered: AWSp.

M SCI 102 Military Science I: Basic (2)
History, organization, and mission of the United States Army and the Reserve Officer Training Corps. Relationship to the citizen’s military and civilian obligations. Functions and organization of the United States defense establishment. Fundamentals of leadership and management. Leadership laboratories and two field training exercises conducted during the year encompass training in field craft, survival, and small unit tactics. Offered: AWSp.

M SCI 103 Military Science I: Basic (2)
History, organization, and mission of the United States Army and the Reserve Officer Training Corps. Relationship to the citizen’s military and civilian obligations. Functions and organization of the United States defense establishment. Fundamentals of leadership and management. Leadership laboratories and two field training exercises conducted during the year encompass training in field craft, survival, and small unit tactics. Offered: AWSp.

M SCI 201 Military Science II: Basic (2)
Develops proficiency in oral and written communications. Presents a perspective on the world wide military threat; an evaluation of tactical methodologies of the hostile nations to include conventional weapon systems employment. Control, prevention, and treatment of combat or emergency medical situations. Fundamentals of military map reading, compass and field navigation, are taught and applied. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 202 Military Science II: Basic (2)
Develops proficiency in oral and written communications. Presents a perspective on the world wide military threat; an evaluation of tactical methodologies of the hostile nations to include conventional weapon systems employment. Control, prevention, and treatment of combat or emergency medical situations. Fundamentals of military map reading, compass and field navigation, are taught and applied. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 203 Military Science II: Basic (2)
Develops proficiency in oral and written communications. Presents a perspective on the world wide military threat; an evaluation of tactical methodologies of the hostile nations to include conventional weapon systems employment. Control, prevention, and treatment of combat or emergency medical situations. Fundamentals of military map reading, compass and field navigation, are taught and applied. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 301 Military Science III: Advanced (3)
Small-unit tactics, emphasizing the importance of firepower, movement, and communications. Duties, responsibilities, and methods of employment of basic military units. Leader’s role in directing and coordinating individuals and military units from squad to company level. Students are introduced to the planning and conduct of individual and group physical conditioning activities, stressing positive motivation to establish high standards of morale and esprit. Principles and techniques of command, control, military management, and leadership are taught and practiced throughout the academic year. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 302 Military Science III: Advanced (3)
Small-unit tactics, emphasizing the importance of firepower, movement, and communications. Duties, responsibilities, and methods of employment of basic military units. Leader’s role in directing and coordinating individuals and military units from squad to company level. Students are introduced to the planning and conduct of individual and group physical conditioning activities, stressing positive motivation to establish high standards of morale and esprit. Principles and techniques of command, control, military management, and leadership are taught and practiced throughout the academic year. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 303 Military Science III: Advanced (3)
Small-unit tactics, emphasizing the importance of firepower, movement, and communications. Duties, responsibilities, and methods of employment of basic military units. Leader’s role in directing and coordinating individuals and military units from squad to company level. Students are introduced to the planning and conduct of individual and group physical conditioning activities, stressing positive motivation to establish high standards of morale and esprit. Principles and techniques of command, control, military management, and leadership are taught and practiced throughout the academic year. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 304 Practicum-Techniques of Military Instructions (1-3, max. 3)
Analysis, review of techniques used in military training and instructions. Students plan, rehearse, deliver, provide written critique on block of military instruction from the Military Qualification Skills Manual.

M SCI 401 Military Science IV: Advanced (3) I&S
The Army officer’s position in contemporary world and impact on problems within the military service. Use of a developmental study to provide awareness of personal responsibilities and official relationships of an Army officer. Organization and functions of command and staff positions. Coordination of administration, logistics, and planning for military operations. Basic concepts of legislative and executive authority for the Uniform Code of Military Justice (to include a study of the officer’s authority and responsibility within the military justice system). Problem-solving techniques used by small-unit leaders, emphasizing coordination and planning by the junior officer. Leadership laboratories and two field training exercises during the year. Offered: AWSp.

M SCI 402 Military Science IV: Advanced (3) I&S
The Army officer’s position in contemporary world and impact on problems within the military service. Use of a developmental study to provide awareness of personal responsibilities and official relationships of an Army officer. Organization and functions of command and staff positions. Coordination of administration, logistics, and planning for military operations. Basic concepts of legislative and executive authority for the Uniform Code of Military Justice (to include a study of the officer’s authority and responsibility within the military justice system). Problem-solving techniques used by small-unit leaders, emphasizing coordination and planning by the junior officer. Leadership laboratories and two field training exercises.
exercises during the year. Offered: AWSp.

Problem-solving techniques used by small-unit leaders, emphasizing coordination and planning by the junior officer. Leadership laboratories and two field training exercises during the year. Offered: AWSp

Naval Science
305 Clark
The Department of Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) Unit functions in conjunction with the Department of Naval Science. An NROTC student may select an academic major within certain limitations (e.g., some programs that normally lead to immediate graduate education, such as architecture, are not consistent with the mission of the NROTC program). In addition to their University curricula, NROTC students take naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership management. In addition, each student must attend one naval science laboratory session and one physical training session per week. During the summer, students may have a four-to-six-week training cruise to put into practice their earlier classroom training. Any University student may take a naval science course without enrolling in the NROTC Program. Two programs are offered. Adviser
305 Clark, Box 353840
206-543-0170
nrotc@u.washington.edu

Navy-Marine Scholarship Program
Each year students are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as midshipman. Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, and uniforms. In addition, there is a textbook stipend each quarter and a monthly subsistence pay which ranges between $250 and $400. For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies these students for enrollment in the advanced course in the NROTC program. All scholarship students are appointed as midshipmen, USNR-R, and upon graduation are commissioned as officers in the Navy or Marine Corps Reserve, after which they serve on active duty for a minimum of four years.

Navy-Marine College Program
Each year, men and women are accepted for four- and two-year nonscholarship college programs. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program). Those students selected for the two-year program attend a six-week course of instruction at NSI during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive monthly subsistence pay during their junior and senior years. The Navy furnishes all uniforms and textbooks used in naval science courses. All college-program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation within the midshipman battalion. The two-year college-program students also may win a scholarship for superior performance at NSI. Upon graduation, college-program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

Course Descriptions
N SCI 111 The Naval Service (3) Brye
General introduction to the Navy, its organization, missions, roles, tasks, and operating methods. The relationship to the other services within the Department of Defense is emphasized. Offered: A.

N SCI 112 History of U.S. Sea Power I (2) Gile
A comprehensive study of the role of sea power in the history of the United States, the current status of the various elements of the nation's sea power as they influence the development and implementation of national security policy. Offered: W.

N SCI 113 History of U.S. Sea Power II (2) Gile
A comprehensive study of the role of sea power in the history of the United States, the current status of the various elements of the nation’s sea power as they influence the development and implementation of national security policy. Offered: Sp.

N SCI 211 Naval Weapon Systems (3) Gile, Juzwiak
Study of fundamental principles of sensor, tracking, weapon delivery subsystems, and current naval weapons. Includes techniques of linear analysis of ballistics and weapons, and dynamics of basic components of weapon-control systems. Offered: A.

N SCI 212 Naval Ship Systems I (3) Brye
Study of fundamental principles of energy transfer and thermodynamics. An introduction to nuclear propulsion, gas turbines, and auxiliary power systems. Offered: Sp.

N SCI 213 Naval Ship Systems II (3) Brye
Study of ship characteristics, ship design, hydrodynamic forces, stability, damage control, and shipboard electrical systems. Includes introduction to engineering documentation, electrical safety, preventative maintenance, and personnel qualifications. Offered: Sp.

N SCI 311 Navigation (3) NW Wise
The science and practice of maritime coastal navigation, including visual fixing, dead reckoning, and piloting methods. Computation of tides and currents and nautical rules of the road. Offered: A.

N SCI 312 Navigation (3) NW Wise
Basic theory and practice of celestial and electronic navigation. Relative motion theory and contact coordination practice in a multiple ship environment. Offered: W.

N SCI 313 Naval Operations (3) Wirtz
Introduction to naval operations, the employment of naval forces, naval tactics, formulation of operations plans and orders, employment of detection equipment, and meteorology. Offered: Sp.

N SCI 321 Evolution of Warfare I (3) Breithaupt
Introduction to the art of war, the evolution of warfare from the earliest recorded battles to the present day. Offered: A.

N SCI 322 Evolution of Warfare II (3) Breithaupt
Introduction to the art of war, the evolution of warfare from the earliest recorded battles to the present day. Prerequisite: N SCI 321.
For the three programs, no credit is granted on the basis of life experience. The School also offers a Doctor of Philosophy degree in social welfare. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both professional programs are accredited by the Council on Social Work Education.

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a Bachelor of Arts in Social Welfare degree. The undergraduate program prepares students for entry-level generalist practice; students earn the Bachelor of Arts in Social Welfare degree. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both professional programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education. For the three programs, no credit is granted on the basis of life experience or previous employment. All three programs are housed in the Social Work/Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast, Seattle, WA 98105-6299. In addition, the School offers a concurrent degree program with the School of Public Health and Community Medicine leading to the M.S.W. and M.P.H. degrees.

Undergraduate Program

Adviser
23D Social Work, Box 354900
206-543-8617
sswstsv@u.washington.edu

The School of Social Work offers the following programs of study:

- The Bachelor of Arts in Social Welfare degree

The program includes upper-division courses in social welfare, with prerequisites in human biology, economics, psychology, statistics, and sociology. Students enter the major at the start of their junior year after completing most of the liberal arts requirements established by the College of Arts and Sciences. Social welfare courses during a student’s junior and senior years include content on social welfare history, policy and services, human behavior and the social environment, social welfare practice, social welfare research, and cultural diversity. These academic courses prepare students for the senior year’s three-quarter practicum experience, which involves a total of 400 hours of direct social services under the supervision of a practicum instructor approved by the School.

Bachelor of Arts

Bachelor of Arts in Social Welfare

Suggested First- and Second-Year College Courses:
SOC WF 101, SOC WF 200; PSYCH 101; SOC 110; BIOL 100 or BIOL 118; ECON 200 or ECON 201; and courses in American ethnic studies, sociology, psychology, and women studies.

Department Admission Requirements

Approximately 60 juniors are admitted to the social welfare major each academic year. Admission, which is for autumn quarter only, is competitive and completion of the requirements listed below does not guarantee acceptance. May 1 is the application deadline. To be considered for admission to the program applicants must meet the following criteria by the time of application:

- Completion of a minimum of 65 credits.
- Completion of the following courses: PSYCH 101 (or PSYCH 102); introductory sociology; ECON 100, ECON 200, or ECON 201; and BIOL 100 or BIOL 118, with a minimum grade of 2.0 in each course.
- A minimum 2.00 cumulative GPA.
- Have some paid or volunteer social service experience.
- Applicants must submit a completed application, admissions essay, résumé, and provide copies of their college transcripts.

Application forms and a more-detailed description of the social welfare major are available at the School’s admissions office, 23C Social Work/Speech and Hearing Sciences (SWS). Admission application forms also can be mailed upon request, 206-543-5676. A student may discuss the program in person by contacting the Director of Admissions, 206-543-5676, swadmis@u.washington.edu. Students accepted to the major must complete a change-of-college form and transfer their academic file to the School’s Student Services Office. Social Welfare majors are advised by the academic adviser, located in the Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

Major Requirements

87 credits as follows:

- Junior year — SOC WF 300 (3 credits), SOC WF 320 (3); SOC WF 310, SOC WF 311, SOC WF 312, SOC WF 402 (3), SOC WF 403 (3), and SOC WF 404 (5).
- Senior year — SOC WF 390 (5), SOC WF 415 (12), SOC 770
Social Work.

 direct to the Chair of the Scholarship Committee, School of Free Application for Federal Student Aid (FAFSA) is required for Office of Student Financial Aid by February 15. Completion of the students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.

Student Organizations/Associations: Organization of Student Social Workers (OSSW)

Graduate Program

Graduate Program Coordinator
Box 354900
206-543-8617
sswstsvr@u.washington.edu

Master of Social Work

The School of Social Work offers a Master of Social Work degree with four options for completion: a two-year full-time program; a one-year Advanced Standing program for qualified students with a degree in social work/social welfare from an accredited undergraduate program; a three-year Evening Degree program; and a three-year MSW Outreach program.

All program options prepare students for advanced professional practice with a culturally diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods. The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history. The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. At the time of publication, the advanced curriculum is being revised. Please check the School’s Web page (depts.washington.edu/sswweb/) for the most current information.

Students in the Evening Degree and Outreach options may also select from courses in advanced policy services and methods. Elective offerings are determined by a vote of students in the cohort.

Admission Qualifications

Admission to the M.S.W. program requires formal admission to the Graduate School as well as to the School of Social Work. Applicants are required to have a bachelor’s degree, a strong academic background, and social-service experience. Applicants must submit official transcripts from all colleges and universities attended, references, application forms, Graduate Record Examination scores, résumé, and an admission essay to be considered for autumn-quarter entry. January 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant’s submitted materials. Current application materials can be obtained from the School’s Admissions Office, 23 Social Work/Speech and Hearing Sciences Building, or by calling 206-543-5676 in Seattle or 1-800-558-8703.

Financial Aid

A limited number of financial-aid opportunities are available to students. Applicants to the M.S.W. program are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Departmental funding is limited. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.

Master of Social Work-Master of Public Health Concurrent Degree Program

The School of Social Work participates with the School of Public Health and Community Medicine in a concurrent degree program leading to the M.P.H. and M.S.W. degrees. The program offers interdisciplinary preparation in the fields of public health and social work. Historically, public health and social work have shared an interest in a preventive approach to health and social problems, a community perspective, and a focus on vulnerable populations. Both fields recognize the interrelationship of the health, social, and behavioral components of contemporary problems and the need for interventions and research that address all three components. The concurrent degree program prepares professionals to function at the interface of both fields, in practice, research, planning, administration, and policy development.

Additional information concerning the concurrent degree program may be obtained from either the School of Social Work’s Admissions
Office or the School of Public Health.

**Doctor of Philosophy in Social Welfare**

The Ph.D. program in social welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work for the promotion of social justice. The program builds on the premise that social welfare scholarship must be scientifically based, responsive to service and practice needs, and informed of developments in related fields and disciplines.

After the first year of required courses, each student’s program of study is individually designed and focuses on well-defined substantive and intervention areas of research relevant to the field of social welfare. In the basic core of required courses, which include teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.

During the first two years, students are expected to define and develop the specialized areas that will be the focus of their General Examination and, typically, their subsequent dissertation research.

The selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare. The General Examination for advancement to candidacy generally occurs at the end of the second year or early in the third year. After advancement to candidacy, students devote themselves full time to completion of their dissertation research. The last step before award of the degree is the Final Examination, which serves as the defense of the dissertation. Students are strongly encouraged to remain in residence at the University until the dissertation is accepted. The Ph.D. program is designed to take approximately four years, although academic excellence in learning and performance is always the first criterion for degree progress.

**Admission**

Admission is highly selective and students are admitted for autumn-quarter entry only. Applicants should have a master’s degree in social work or comparable preparation in a closely related field.

The Council on Social Work Education requires that faculty who teach practice courses in accredited programs have two years of supervised practice experience. Thus, obtaining such experience is highly important for those who seek academic positions following graduation.

Applicants selected for admission are those whose scholastic achievements, previous experience, and aptitude for social welfare research, scholarship, and teaching indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social welfare and of faculty resources. The deadline for receipt of admission material is January 2. For more information, call 206-685-1680, or email phdmhpr@u.washington.edu.

**Financial Aid**

Stipends, scholarships, teaching and research assistantships, and tuition waivers are available. Every effort is made to provide aid to each student who requires it, and research and teaching assistant positions are provided to all Ph.D. students for at least the first three years. The financial assistance provided is not usually adequate to cover all educational and living expenses. Financial-aid forms required for financial assistance must be submitted by February 15 by completing the Free Application for Federal Student Aid (FAFSA).

**Social Welfare (BASW)**

**Course Descriptions**

**SOC WF 101 Social Work in Action: Bridging the Gap From Science to Service (5)** I&S

Explores current social work practice and research applied to major societal problems. Lectures and discussions by leading faculty introduce students to the evidence-based perspective underlying program planning and practice innovation. Topics include: juvenile delinquency, child maltreatment, domestic violence, foster care reform, mental health, school violence, substance abuse, and poverty. Offered: A.

**SOC WF 200 Introduction to Social Work Practice (5) I&S**

Introduction to the practice of social work including the theoretical concepts and institutional framework that guide practice and the conceptual organization of the discipline. Three weekly lectures and two hours per week in field observation sessions. Lectures supplemented by audiovisual aids and by special guest practitioners. Offered: A.

**SOC WF 300 Historical Approaches to Social Welfare (3)** I&S *Duplicata*

Stresses the origins and development of social welfare policy and programs, starting with the Elizabethan Poor Law (1601) and ending with the Social Security Act of 1935. The issue of poverty and the development of publicly funded income maintenance programs are central concerns. Required of social welfare majors. Open to nonmajors. Offered: AW.

**SOC WF 310 Social Welfare Practice I (3)** *Whittaker*

Provides an introduction to the roles, tasks, and functions of the social welfare practitioner and to theories and methods of intervention; a conceptual framework for social work practice with individuals, families, and small groups; and an opportunity to develop skills in problem assessment, intervention, termination, and evaluation. Offered: A.

**SOC WF 311 Social Welfare Practice II (3)** *Whittaker*

Focus on macro systems in a diverse society using the generalist perspective. The implications of system resources and configurations for meeting human needs are considered. The role and function of generalist social workers to understand and advocate for system development and change is emphasized. Prerequisite: SOC WF 310. Offered: W.

**SOC WF 312 Social Welfare Practice III (3)** *Duplica, Whittaker*

Policy and program developments in the social welfare field since 1935. Typical topics include current income maintenance proposals, the emergence of programs to treat specific social dysfunctioning (mental health services) and the growth of a service-oriented society. Required of social welfare majors. Open to nonmajors. Prerequisite: SOC WF 312. Offered: Sp.

**SOC WF 320 Contemporary Approaches to Social Welfare (3)** I&S *Duplica*

Introduction to the logic of the scientific method as applied to social work and social welfare practice, to the design and conduct of a research study, and to data collection and summarization. Skill development in critical consumption of social welfare research. Prerequisite: either STAT 220 or QMETH 201. Offered: A.

**SOC WF 402 Human Behavior and Social Environment I (3)** I&S

Focuses on person-in-the-environment for individuals and family development across diverse backgrounds. Addresses dynamics and processes of families, small groups, organizations, and community systems.
SOC WF 403 Human Behavior and Social Environment II (3) I&S
Focuses on person-in-the-environment for small groups, organizations, community, and society as systems. Utilizes developmental and social systems perspectives in seeking to understand and influence human behavior across diverse backgrounds. Prerequisite: SOC WF 402.

SOC WF 404 Cultural Diversity and Justice (5) I&S Duplica, Sohng
History and culture of disadvantaged and oppressed groups served by Social Welfare generalist practitioners. Offered: Sp.

SOC WF 405 Fieldwork Seminar (2-4, max. 9) Balassone
Integrates social work practicum experiences with prior and concurrent course work in social sciences, social work, and research. Includes discussion of class presentations and simulations or practice situations that combine knowledge and skill utilization. Student logs provide a basis for individual goal identification and achievement. Required of social welfare seniors. Prerequisite: SOC WF 312. Offered: AWSp.

SOC WF 409 Readings in Social Welfare (1-5, max. 15)

SOC WF 415 Beginning Field Instruction (4-6, max. 12)
Students are placed in selected social service agencies and accept beginning social service assignments under the supervision of competent agency personnel. Credit/no credit only. Prerequisite: SOC WF 312. Offered: AWSp.

SOC WF 419 Adult Development and Aging (3) I&S
Whittaker
Introduces the field of adult development. Interdisciplinary perspective stressing the interaction of psychological, social, and physiological factors affecting the aging process. Goals are to help the student understand the processes and diversity in the aging process that can assist one's own aging and help the learner work with older adults. Offered: Sp.

SOC WF 421 Methods of Child Care and Treatment (3) Whittaker
Focuses on an introduction to the continuum of child welfare services and presents practical approaches to working with children and adolescents in a wide variety of practice settings. Offered: alternate years; A.

SOC WF 430 Child Care Work Practice (3) Whittaker
Specialized practice with emotionally disturbed and delinquent children in group-care settings with focus on providing child-care staff with specific tools for teaching alternative behavior. Major topics include: etiology and diagnosis, observing and recording children's behavior, special problems of group living, life-space interviewing, token economies, activity programming, group interventions, parental involvement, organizational requisites and community linkages. Offered: alternate years; A.

SOC WF 442 Building Competencies for Intergroup Dialogue Facilitation (3)
Whittaker
Focuses on both knowledge and skills development for peer facilitators. Topics include philosophy and principles of dialogic education and dialogic communication; intergroup communication; social identity development; principles of working with conflict; group dynamics, observation, and facilitation; team building among co-facilitators; and creating a support system among instructors and facilitators. Credit/no credit only.

SOC WF 443 Facilitating Intergroup Dialogue (3)
Practicum seminar providing instruction, consultation, and supervision of peer group facilitators. Focuses on comparison of facilitation experiences and consultations, trouble-shooting with other facilitators, co-facilitator team building, and planning for dialogues. Exploration of specific, current intergroup issues, such as affirmative action and immigration. Continuation of team-building work begun in 452. Credit/no credit only.

SOC WF 450 Research in Social Welfare (1-3, max. 10)
Individual work with faculty member to assist with current research project(s). Students trained and supervised in some or all of the following research tasks: literature review, data analysis, record-keeping, interviewing, report writing, data entry and coding, data collection, and other tasks commonly found in research problems in social welfare. Credit/no credit only.

SOC WF 495 Special Topics in Generalist Social Welfare (1-5, max. 5)
Readings, lectures, and discussions pertaining to significant topics of special and current interest to social workers

Social Welfare

Course Descriptions

SOC WL 552 Analytical Perspectives on Social Welfare Policy (3)
Broad overview of the social welfare policy process, including epistemological issues, content on social problem construction and definition, policy agendas and case study methodology. Introduction to analytical tools and concepts needed to take a proactive role in policy development, advocacy, implementation, and policy research. Offered: Sp.

SOC WL 553 Seminar in Contemporary Social Welfare Policy (3)
Critical review of contemporary American income maintenance and related social welfare policies, and the economic, political, and social factors that affect their development, implementation, and effectiveness. Evaluation of their effects on poverty, income inequality, and related social outcomes, including international comparisons. Assessment of proposals for reform. Closely linked to 552. Offered: Sp.

SOC WL 558 Integrative Seminar (1-2, max. 2)
Topic-driven seminar that targets professional development of the first and second years (scholarship, research, teaching). Active participation expected in discussions and reflective papers. May require preparation for presentation or demonstration. Offered: A.

SOC WL 559 Doctoral Seminar in Teaching Preparation (3)
Focus on teaching content and issues integral to being a skillful instructor. Issues and related skills generalized to range of post-graduate positions. Promote understanding of pedagogical issues and development of specific teaching skills. Credit/no credit only. Prerequisite: doctoral student. Offered: A.

SOC WL 578 Seminar in Special Topics for NIMH Prevention Research Trainees (1, max. 9)
Interdisciplinary overview of major concepts in promotion of mental health and prevention of mental distress with prevention science as framework. Provides conceptual foundations for advanced study in specialized aspects of mental health prevention research. Prerequisite: enrollment in Social Welfare Predoctoral Training Program in Prevention of Mental Health Problems and Disorders. Credit/no credit only. Offered: AWSp.

SOC WL 579 Interdisciplinary Approaches to Prevention Science: Children and Adolescents (3)
Overview of theory, research, and practice in prevention science. Developmental perspective examining factors that promote or inhibit health development at different stages and during transitions (focus on birth through age 21). Designed for interdisciplinary dialogue, and includes guest faculty from around the University who are specialists in course topics. Credit/no credit only. Offered: A.

Instructor Course Description: John D Hawkins
SOC WL 580 Introduction to Advanced Research Method and Design (3)
Introduction to the broad scientific issues and the specific methodological strategies used in formulating and answering research questions within the field of social welfare. Offered: A.

SOC WL 581 Introduction to Advanced Research Method and Design (3)
Introduction to the broad scientific issues and the specific methodological strategies used in formulating and answering research questions within the field of social welfare. Offered: W.

SOC WL 582 Research Practicum (3-)
Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no credit only. Offered: ASpS.

SOC WL 583 Research Practicum (3-)
Development of specific methodological skills in social welfare research through participation in an ongoing research project. Learning contract used to target specific research competencies. Credit/no credit only. Offered: ASpS.

SOC WL 584 Teaching Practicum (3)
Supervised teaching of a required course or teaching as a co-instructor with a faculty member. Learning contract used to target specific teaching competencies, e.g., assessing and evaluating student outcomes, identifying class session goals and objectives, tailoring instruction methods to diverse learning styles. Offered: AWSpS.

SOC WL 585 Qualitative Methods in Social Work Research I (3)
The first in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 586 Qualitative Methods in Social Work Research II (3)
The second in a two-quarter sequence offering intensive experience in the theory and application of qualitative and ethnographic research methods. Prepares students for conducting qualitative studies and for combining qualitative and quantitative research methods. Focuses on applications especially relevant to social welfare.

SOC WL 587 Fundamentals of Social Work Statistics I (4)
Descriptive and inferential statistics. Underlying logic of statistical inference. Statistical issues of special relevance in social work, including measurement, research design, and ethics in research. Prerequisite: concurrent registration in SOC WL 580. Offered: A.

SOC WL 588 Fundamentals of Social Work Statistics II (4)
Issues in the use of descriptive and inferential statistics, especially the statistical control of extraneous variables. Applications of statistical inference in factorial design, and correlation and regression. Statistical issues of special relevance in social work. Ethics in the use of statistics. Prerequisite: concurrent registration in SOC WL 581. Offered: W.

SOC WL 589 Multivariate Data Analysis for the Social Sciences (3, max. 6) Erosheva
Provides social scientists with an introduction to multivariate analysis techniques and the knowledge to carry them out. Focuses on statistical methods that explore relationships between observed variables. Topics include principal components, cluster, factor, latent class analysis. Prerequisite: SOC WL 587, 588, or equivalent. Offered: jointly with CS&SS 589; A.

SOC WL 598 Research Problems and Priorities in Social Work and Social Welfare (3-)
Provides students with foundations in the definitions of theory; the socially constructed nature of theory and definition of social "problems"; conceptual and theoretical perspectives on human society, interaction, and change; and analysis of current conceptual models in social welfare literature. Prerequisite: admission to social welfare Ph.D. program or permission of instructor. Offered: A.

SOC WL 599 Research Problems and Priorities in Social Work and Social Welfare (3-)
Assists students in applying theory in building an original conceptual model. Emphasizes critical thinking, including ideological, political, methodological, and ethical contexts/implications of ideas, theories, and models that shape social welfare scholarship and its application to social practice. Prerequisite: admission to social welfare Ph.D. program or permission of instructor. Offered: W.

SOC WL 600 Independent Study or Research (*)
Prerequisite: approval of a well-specified plan by the instructor and program director. Includes a written product. Offered: AWSpS.

SOC WL 800 Doctoral Dissertation (*)
Offered: AWSpS

Social Work (MSW)

Course Descriptions

SOC W 500 Intellectual and Historical Foundations of Professional Social Work Practice (3)
Intellectual, historical, and ethical foundations of the social work profession. Engagement with crucial aspects of the profession's history; contemporary issues, problematics, and directions; and key concepts and theoretical frameworks. Students develop personal, professional, and intellectual foundations for practicing social work built on the central values of plurality and social justice.

SOC W 501 Poverty and Inequality (3)
Analysis of poverty and inequality in United States. Analytic and descriptive focus on measurement, processes of production and perpetuation, and public policy responses. Examines causes of poverty, the role of policy, and socioeconomic dimensions of stratification, including race, ethnicity, class, gender, immigration status, disability, age, sexual orientation, and family structure.

SOC W 503 Social Work for Social Justice: Developing a Personal-Professional Stance I (1-3-, max. 3)
Focuses on personal and professional development toward social work practice for social justice. Employs critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globalization.

SOC W 504 Social Work for Social Justice: Developing a Personal-Professional Stance II (1-3, max. 3)
Focuses on personal and professional development toward social work practice for social justice. Employs critically self-reflective, experiential, and dialogic learning processes to engage students to explore personal meaning systems and narratives in the context of professional values of social justice, multiculturalism, empowerment, and globalization.

SOC W 505 Foundations of Social Welfare Research (3)
Amigren, Balassone, Ereira, Roffman
Overview of research process/methods in social work, with focus on consuming and performing practice-related research and evaluating one's own practice. Emphasis on critical understanding of empirical literature, development of useful and appropriate questions about social work practice, and strategies and techniques for doing research and applying findings to practice. Offered: Sp.
SOC W 506 Social Welfare Research and Evaluation (3)
Second of a two-quarter research sequence. Introduces a range of methods for informing evidenced-based social work practice. Emphasizes critical appraisal of the literature, development of research questions, and strategies and techniques for conducting practice-relevant research, including data collection and analysis.

SOC W 510 Practice I: Introduction to Social Work Practice (3) Kemp, Marcenko, Richey, Roffman
Foundation knowledge and skills for direct practice with individuals, families, and groups. Assists students toward mastery of interviewing and relationship building skills and knowledge of cross-cultural communication and practice issues and of social work values and ethics. Provides opportunity to develop beginning level skills in assessment. Offered: ASp.

SOC W 511 Practice II: Intermediate Direct Service Practice (3) Kemp, Marcenko, Richey, Roffman
Foundation knowledge and skills for direct practice with individuals, families, and groups. Course assists students toward mastery in assessment, development of treatment plans based on theory and assessment information, goal-setting skills, and selection of appropriate interventions. Offered: AW.

SOC W 512 Practice III: Organizational Practice (3) Fredriksen, Kruzich, Uehara
Focuses on ways in which management activities contribute to service effectiveness for clients and quality of conditions for staff. Various managerial roles, functions, and skills examined. Impact of agency structure, culture, and mission on staff, clients, and organizational outcomes discussed with emphasis on ways social work managers influence change. Offered: W.

SOC W 513 Practice IV: Community Change Practice (3) Weatherley
Provides frame of reference and skills for community-based social work practice. Theories of social change are examined with examples drawn from community organizing and policy advocacy. Offered: Sp.

SOC W 514 Foundation Practice Skills (3)
Focus on the teaching of practice skills (micro, mezzo, and/or macro) associated with key contemporary themes in social work. Possible topics include social work with American Indian communities, adult interpersonal violence, and assessment and brief intervention in substance abuse and dependence. Offered: SpS.

SOC W 523 Introduction to Practicum (1) DeLong, Rivara, Roberts, Wollin
Workshops for preparation for agency-based placement Interviewing and orientations occur at agencies. Credit/no credit only.

SOC W 524 Foundation Practicum (1-8, max. 12) DeLong, Rivara, Roberts
Agency-based practicum with emphasis on development of knowledge, perspectives, and skills needed for practice with individuals, families, groups, organizations, and communities. Credit/no credit only. Prerequisite: social work major. Offered: AWSp.

SOC W 525 Advanced Practicum (2-10, max. 24) DeLong, Rivara, Roberts
Agency-based advanced practicum. Credit/no credit only. Prerequisite: SOC W 515 and foundation courses. Offered: AWSp.

SOC W 531 Child and Family Policy and Services (3) Pecora, Whittaker
Examines selected areas of child and family services policy in terms of historical antecedents, expressed values, practice implications, and potential for policy reform. Representative topical areas include: foster care; family preservation and support; residential services; services to prevent and ameliorate child maltreatment. Offered: A.

SOC W 532 Children, Youth, and Family Practice I (3) Kemp, Marcenko, Teather
Builds on foundation practice methods sequence to deepen individual, family, and community level assessment and intervention skills relevant for work with children, youth, and families. Offered: ASp.

SOC W 533 Children, Youth, and Family Practice II (3) Kemp, Marcenko, Teather
Builds on 532 and focuses on the values, knowledge, and skills used in intensive case management and intensive family preservation services. Offered: A.

SOC W 535 Advanced Social Work Research: Children, Youth, and Families Practice (3) Richey
Principles and procedures for evaluation of direct practice interventions, research methods involved in community-needs assessment, program evaluation, and management-information systems. For Children, Youth, and Families (CYF) concentration. Offered: W.

SOC W 536 Children, Youth, and Family Methods (3, max. 9) Cook, Dear, Kemp, Marcenko, Pecora, Roffman, Teather, Whittaker
Focuses on child welfare and family services intervention methods, including social work in schools, services for early intervention, prevention and family support, child and adolescent mental health services, work with families of developmentally disabled, permanency planning, group work, family violence and child maltreatment, and intensive family preservation services. Offered: AWSp.

SOC W 541 Policy Perspectives on Multi-Ethnic Practice (1-3, max. 3)
Presentation of social welfare policies and services that meet societal problems, needs of specific client groups, and tools for evaluating various policies in the multi-ethnic area. Facilitates understanding of network of institutions that employ social workers. Offered: A.

SOC W 543 Praxis of Intergroup Dialogue (3)
Students design, plan, implement, and evaluate intergroup dialogue sessions as peer facilitators. Students facilitate intergroup dialogue in conjunction with SOC W 544. Focuses on intensive in-vivo instruction, consultation and supervision of facilitators.

SOC W 545 Advanced Social Work Research: Participatory Action Research for Multi-Ethnic Practice (1-3, max. 3) Sohng
Principles and procedures for the evaluation of direct practice interventions, research methods involved in community-needs assessment, program evaluation, and management-information systems. For Multi-Ethnic Practice (MEP) concentration. Offered: W.

SOC W 546 Multi-Ethnic Practice Methods (1-3, max. 12)
Focus on specialized knowledge and skills necessary for effective social work with American-Indian, African-American, Asian-American, and Latino or Hispanic individuals, groups, and communities and for work in a variety of settings and fields of practice. Offered: AWSp.

SOC W 552 Planning and Program Development (3) Fredriksen, Kruzich
Introduces the practice skills and knowledge required for specialized practice in agency management. Offered: W.

SOC W 553 Supervisory Leadership (3) Kruzich, Pecora
Presents critical skills for major phases of the personnel process including recruiting, supervising, and supporting employees. Offered: A.
SOC W 554 Financial Management in Human Services (3)
Focus on key budgeting concepts and techniques common to human service agencies including budget development, resource allocation, problems of fiscal control, fiscal record keeping, and cost analysis. Offered: W.

SOC W 555 Advanced Social Work Research: Using information to Improve Agency Performance for Administration (3) Uehara
Principles and procedures for the evaluation of direct practice interventions, research methods involved in community-needs assessment, program evaluation, and management-information systems. For Administration (ADM) concentration. Offered: W.

SOC W 556 Social Work Administration Methods (3, max. 9)
Fredriksen, Kreidich, Pecora, Uehara
Focus on relevant skills for social work administrators, including such topics as fundraising, grantwriting, and advocacy. Offered: WSp.

SOC W 560 Adult Psychopathology (1) Roffman
Introduction to major categories of adult psychopathology, differential diagnosis, applying diagnostic criteria to case examples, and use of DSM-IV in social work practice settings, including strengths and weaknesses of DSM-IV. Offered: A.

SOC W 561 Health and Mental Health Policy (3) Almgren
Review of trends in the development of health and mental health policies and services in the United States, the linkage between key policies and care, initiatives for reform in policy and health/mental health care models, and social work roles. Offered: A.

SOC W 562 Chemical Dependency (2) Roffman

SOC W 563 Advanced Health and Mental Health Practice I (3) Almgren, Conte, Levy, Rivara
Emphasizes advanced social work practice skills in health and/or mental health settings. Attention is given to key theoretical bases for assessment and intervention with clients and client systems. Offered: A.

SOC W 564 Advanced Health and Mental Health Practice II (3) Almgren, Conte, Levy, Rivara
Emphasizes advanced social work practice skills in health and/or mental health settings. Attention is given to key theoretical bases for assessment and intervention with clients and client systems. Offered: W.

SOC W 565 Advanced Social Work Research: Health and Mental Health (3) Levy
Covers methods of measurement, direct practice evaluation, ethical issues, and research methodology of special interest in health and mental health settings. Additional topics may include grant writing, community needs assessment, and management information systems. Offered: W.

SOC W 566 Health and Mental Health Methods (3, max. 9) Roffman
Focus on a variety of specialized social work practice roles in such health and mental health fields as addiction and grief and loss. Emphasis is given to advanced skills and knowledge for specialized expertise. Offered: WSp.

SOC W 592 Social Problems and Social Welfare (3, max. 9)
Analysis of major social problems and social welfare service systems providing a systematic approach to assessing the scope, causes, social cost, and public policy alternatives in the provision of services related to such problems. Selected social problems are studied and related to the student's field.

CASTERAS, SUSAN P .................. Professor ................... Art ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 1977 ...... Yale University
CASTNER, DAVID G .................. Professor ................... Chemical Engineering ...... College of Engineering .... Doctor of Philosophy ... 1979 ...... University of California (BERKELEY)
CATALANO, RICHARD F ............. Professor ................... School of Social Work ...... School of Social Work ...... Doctor of Philosophy ... 1982 ...... University of Washington
CATTERALL, WILLIAM .............. Professor ................... Pharmacology ................... School of Medicine ...... Doctor of Philosophy ... 1972 ...... Johns Hopkins University
CATTOLOIO, ROSE A. ............. Professor ................... Biology ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 1973 ...... State Univ of New York (STONY BROOK)
CELIN, CONNIE L .................... Professor Without Tenure ...... Department of Medicine ...... School of Medicine ...... MD .................... 1984 ...... University of California (SAN FRANCISCO)
CHARA, SHIFLI ...................... Assoc Professor Without Tenure ...... Pediatrics ............... College of Medicine ...... MD .................... 1989 ...... Bombay University (INDIA)
CHADWICK, HEATHCLIFF S. ...... Assoc Professor Without Tenure ...... Anesthesiology ...... School of Medicine ...... MD .................... 1976 ...... University of Oregon
CHAIT, ALAN ......................... Professor ................... Department of Medicine ...... School of Medicine ...... MD .................... 1974 ...... University of Capetown (South Africa)
CHALOUPA, VLADIMIR ............ Professor ................... Physics ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 1975 ...... University of Geneva (SWITZERLAND)
CHAMBERLAIN, JEFFREY S. ....... Professor ................... Neurology ................... School of Medicine ...... Doctor of Philosophy ... 1985 ...... University of Washington
CHAMBERS, CRAIG D .............. Professor ................... Computer Science & Eng ...... College of Engineering .... Doctor of Philosophy ... 1992 ...... Stanford University
CHAPOUX, JAMES J ............... Professor ................... Microbiology ................... School of Medicine ...... Doctor of Philosophy ... 1970 ...... Stanford University
CHAN, ANTHONY B. ............... Associate Professor ................ Communication ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 1980 ...... York University (CANADA)
CHAN, KAM WING .................. Professor ................... Geography ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 1988 ...... University of Toronto (CANADA)
CHAN, LEIGHTON .................... Assoc Professor Without Tenure ...... Rehabilitation Medicine ...... School of Medicine ...... MD .................... 1990 ...... University of California (LOS ANGELES)
CHAN, PHILLIP F. ................. Professor ................... Pediatrics ................... School of Medicine ...... MD .................... 1978 ...... University of Tennessee
CHANDLER, MARK S .............. Senior Lecturer ................... Microbiology ................... School of Medicine ...... Doctor of Philosophy ... 1998 ...... University of Illinois
CHANDLER, WAYNE L ............ Professor Without Tenure ...... Lab Medicine ................... School of Medicine ...... MD .................... 1982 ...... St Louis University
CHAREY, EDMUND ................. Assoc Professor Without Tenure ...... Psychiatry ............... School of Medicine ...... Doctor of Philosophy ... 1976 ...... University of Washington
CHANG, MARY Y. ................... Research Assistant Professor .... Department of Medicine ...... School of Medicine ...... Doctor of Philosophy ... 1991 ...... Massachusetts Institute of Technology
CHANG, MICHAEL MEI ............ Assoc Professor Without Tenure ...... Rehabilitation Medicine ...... School of Medicine ...... MD .................... 1988 ...... University of Texas (GALVESTON)
CHANCY, HOWARD ALAN ........ Professor Without Tenure ...... Orthopedics ................... School of Medicine ...... MD .................... 1987 ...... University of Pennsylvania
CHARKO, MICHAEL K ............. Research Professor ................... Health Services ................... Sch Pub Hlth/Comm Med .. Doctor of Philosophy ... 1972 ...... City University of New York
CHAPMAN, JENS R. ............... Professor Without Tenure ...... Orthopedics ................... School of Medicine ...... MD .................... 1983 ...... Technical University of Munich (Germain)
CHAPMAN, RACHEL R. ............ Assistant Professor ................... Anthropology ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 1998 ...... University of California (LOS ANGELES)
CHASAN, NIRMAL B .............. Professor Without Tenure ...... Department of Medicine ...... School of Medicine ...... MBBS .................. 1968 ...... Christian Medical College of LUDHIANA
CHASTEN, JOSEPH R. ............ Associate Professor ................... Oral Medicine ................... School of Dentistry ...... Master of Arts ............. 1976 ...... University of Michigan
CHAUDHARY, ZAMIR R ............. Assistant Professor ................... English ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 2004 ...... Cornell University
CHAUCHEY, THOMAS R. ......... Assoc Professor Without Tenure ...... Department of Medicine ...... School of Medicine ...... MD .................... 1985 ...... Rush Medical College
CHAVKIN, CHARLES ............... Professor ................... Pharmacology ................... School of Medicine ...... Doctor of Philosophy ... 1982 ...... Stanford University
CHRANDLE, ALLEN D. .......... Research Professor ................... Health Services ................... Sch Pub Hlth/Comm Med .. Doctor of Philosophy ... 1987 ...... University of California (BERKELEY)
CHECKOWAY, HARVEY ............ Professor ................... Enviro & Comp Health .... Sch Pub Hlth/Comm Med .. Doctor of Philosophy ... 1978 ...... University of North Carolina
CHEN, HUI-PING .................... Assoc Professor Without Tenure ...... Orthopedology ...... School of Medicine ...... MD .................... 1991 ...... Yale University
CHEN, SHI-HAN ................. Research Professor ................... Pediatrics ................... School of Medicine ...... Doctor of Philosophy ... 1968 ...... University of Texas (AUSTIN)
CHEN, SHUPING .................... Assistant Professor ................... Accounting ................... Business School ...... Doctor of Philosophy ... 2003 ...... University of Southern California
CHEN, XIAO-QING ................. Professor ................... Management/Organizatn. ...... Business School ...... Doctor of Philosophy ... 1998 ...... University of Illinois
CHEN, YU-ChIN ................. Assistant Professor ................... Economics ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 2002 ...... Harvard University
CHEN, ZHENG-QING .............. Professor ................... Mathematics ................... Coll Arts & Sciences ...... Doctor of Philosophy ... 1992 ...... Washington University
CHEN, DOUGLAS A. .............. Associate Professor ................... Dept of Education ...... College of Education ...... Doctor of Philosophy ... 1992 ...... University of Washington
CHEN, FREDERICK W ............. Professor ................... Anesthesiology ................... School of Medicine ...... MD .................... 1960 ...... Tufts University
CHENG, EDITH Y. ................. Assoc Professor Without Tenure ...... Obgyn/Admin .......... School of Medicine ...... MD .................... 1987 ...... University of Washington
CHENG, ZHONG .................... Associate Professor ................... Art ................... Coll Arts & Sciences ...... MA of Design .................. 1996 ...... University of Cincinnati
CHIN-LEVIS, ZEICHA . .......... Lecturer Full-time ................... Lab Medicine ................... School of Medicine ...... Doctor of Philosophy ... 1986 ...... Tel-Aviv University
CHERRICOFF, STANLEY B ........ Senior Lecturer ................... Earth & Space Sciences .... Coll Arts & Sciences ...... Doctor of Philosophy ... 1980 ...... University of Minnesota
CHERRIER, MONIQUE M ........ Research Assistant Professor .... Psychiatry ................... School of Medicine ...... Doctor of Philosophy ... 1994 ...... University of British Columbia
