

University of Washington

2006-08 General Catalog

Founded in 1861, the University of Washington is one of the oldest state-assisted institutions of higher education on the Pacific coast. From its original site on a 10-acre tract of wooded wilderness that is now located in downtown Seattle, the campus has grown to comprise 703 acres of trees, landscape, and buildings. Located between the shores of Lake Washington and Lake Union, it is in a residential section of the city that long has been considered one of the most attractive in the nation. Two additional campuses, one south of Seattle in Tacoma, and one north in Bothell, were opened in 1990.

Enrollment at the University in autumn quarter 2005 was almost 43,000, including its campuses in Bothell and Tacoma, of which 26,000 were undergraduates and the balance were in professional and graduate programs. Almost 90 percent of the undergraduates enter as freshmen from Washington high schools or as transfer students from Washington community colleges or other colleges and universities in the state. The grade-point average for the regularly admitted freshman class entering in autumn quarter 2005 was 3.69. In 2005, the full-time teaching faculty of the University numbered approximately 3,500 members.

Message from the President Mark Emmert

A university is a community of scholars and artists, a place where faculty and students communicate with each other to enrich human understanding. Universities have played an essential role in societies for hundreds of years, promoting learning and culture, generating new knowledge, and training professionals in specialized calling. The University of Washington is one of the finest universities in the world.

It is also an exciting place to be, with a lively interplay of teaching, research, and public service. Its contributions to the state, the nation, and the world will continue to grow as we face the challenges of the twenty-first century.

ACADEMIC CALENDAR

2006-2007

Autumn Quarter 2006

Classes begin September 27
Last day of instruction December 8
Final examinations December 11-15

Winter Quarter 2007

Classes begin January 3
Last day of instruction March 9
Final examinations March 12-16

Spring Quarter 2007

Classes begin March 26
Last day of instruction June 1
Final examinations June 4-8
Commencement June 9

Summer Quarter 2007

Full-term and term a classes begin June 18
Term a classes end July 18
Term b classes begin July 19
Full-term and term b classes end August 17

2007-2008

Autumn Quarter 2007

Classes begin September 26
Last day of instruction December 7
Final examinations December 10-14

Winter Quarter 2008

Classes begin January 7
Last day of instruction March 14
Final examinations March 17-21

Spring Quarter 2008

Classes begin March 31
Last day of instruction June 6
Final examinations June 9-13
Commencement June 14

Summer Quarter 2008

Full-term and term a classes begin June 23
Term a classes end July 23
Term b classes begin July 24
Full-term and term b classes end August 22

Dates in this calendar are subject to change without notice. A detailed calendar with the latest information on registration can be found online at www.washington.edu/students/

For directory assistance,
call the University switchboard, (206) 543-2100.

Address correspondence to:
University of Washington
(Name of office and box number)
Seattle, Washington 98195

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the General Catalog. Appeals may be filed with the student's dean or with the Vice President for Student Affairs in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

Role and Mission of the University

Founded 4 November 1861, the University of Washington is one of the oldest state-supported institutions of higher education on the Pacific coast. The University is comprised of three campuses: the Seattle campus is made up of seventeen schools and colleges whose faculty offer educational opportunities to students ranging from first-year undergraduates through doctoral-level candidates; the Bothell and Tacoma campuses, each developing a distinctive identity and undergoing rapid growth, offer diverse programs to upper-division undergraduates and to graduate students.

The primary mission of the University of Washington is the preservation, advancement, and dissemination of knowledge. The University preserves knowledge through its libraries and collections, its courses, and the scholarship of its faculty. It advances new knowledge through many forms of research, inquiry and discussion; and disseminates it through the classroom and the laboratory, scholarly exchanges, creative practice, international education, and public service. As one of the nation's outstanding teaching and research institutions, the University is committed to maintaining an environment for objectivity and imaginative inquiry and for the original scholarship and research that ensure the production of new knowledge in the free exchange of facts, theories, and ideas.

To promote their capacity to make humane and informed decisions, the University fosters an environment in which its students can develop mature and independent judgment and an appreciation of the range and diversity of human achievement. The University cultivates in its students both critical thinking and the effective articulation of that thinking.

As an integral part of a large and diverse community, the University seeks broad representation of and encourages sustained participation in that community by its students, its faculty, and its staff. It serves both non-traditional and traditional students. Through its three-campus system and through educational outreach, evening degree, and distance learning, it extends educational opportunities to many who would not otherwise have access to them.

The academic core of the University of Washington is its College of Arts and Sciences; the teaching and research of the University's many professional schools provide essential complements to these programs in the arts, humanities, social sciences, and natural and mathematical sciences. Programs in law, medicine, forest resources, oceanography and fisheries, library science, and aeronautics are offered exclusively (in accord with state law) by the University of Washington. In addition, the University of Washington has assumed primary responsibility for the health science fields of dentistry and public health, and offers education and training in medicine for a multi-state region of the Pacific Northwest and Alaska. The schools and colleges of architecture and urban planning, business administration, education, engineering, nursing, pharmacy, public affairs, and social work have a long tradition of educating students for service to the region and the nation. These schools and colleges make indispensable contributions to the state and, with the rest of the University, share a long tradition of educating undergraduate and graduate students toward achieving an excellence that well serves the state, the region, and the nation.

BR, February 1981; revised February 1998; December 2001

Non-Discrimination policy

The University of Washington reaffirms its policy of equal opportunity regardless of race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran. This policy applies to all programs and facilities including, but not limited to, admissions, educational programs, employment, and patient and hospital services. Any discriminatory action can be a cause for disciplinary action. Discrimination is prohibited by Presidential Executive Order 11246 as amended; Washington State Gubernatorial Executive Orders 89-01 and 93-07; Titles VI and VII of the Civil Rights Act of 1964; Washington State Law Against Discrimination RCW 49.60; Title IX of the Education Amendments of 1972; State of Washington Gender Equity in Higher Education Act of 1989; Sections 503 and 504 of the Rehabilitation Act of 1973; Americans with Disabilities Act of 1990; Age Discrimination in Employment Act of 1967 as amended; Age Discrimination Act of 1975; Vietnam Era Veterans' Readjustment Act of 1972 as amended; other federal and state statutes, regulations; and University policy. Coordination of the compliance efforts of the University of Washington with respect to all of these laws and regulations is under the direction of the Assistant Provost for Equal Opportunity, Dr. Helen Remick, University of Washington, Equal Opportunity Office, Box 354560, 4045 Brooklyn Avenue Northeast, Seattle, WA 98195, 206-685-3263/V or 543-6452/TTY.

Additional information concerning the equal opportunity and affirmative action policies and procedures, including complaint procedures, is in the Operations Manual, D46.1, D46.2, D46.3, and D46.4, and the UW Handbook, Vol. IV, p. 44.

Information on reasonable accommodation for students with disabilities is available from the following offices: for classroom and academic-related accommodation, call Disabled Student Services, 206-543-8924/V, 206-543-8925/TTY, or email at uwdss@u.washington.edu; for other non-academic related information and accommodation, call Disability Services Office, 206-543-6450/V, 206-543-6452/TTY, or email at access@u.washington.edu.

Accreditation

The University of Washington is accredited by the Northwest Association of Schools and Colleges and is a member of the Association of American Universities. Individual schools and colleges are members of the various accrediting association in their respective fields. Currently enrolled or prospective students should contact the Office of the Registrar to review accreditation documents for the University and the respective departments to review programmatic accreditation documents.

student does not officially withdraw. Grades in the range 0.6 to 0.1 may not be assigned. Grades reported in this range are converted by the Office of the Registrar to 0.0. Numerical grades may be considered equivalent to letter grades as follows:

A	4.0-3.9	
A-	3.8-3.5	
B+	3.4-3.2	
B	3.1-2.9	
B-	2.8-2.5	
C+	2.4-2.2	
C	2.1-1.9	
C-	1.8-1.5	
D+	1.4-1.2	
D	1.1-0.9	
D-	0.8-0.7	Lowest passing grade.
E	0.0	Academic failure. No credit earned.

Additional information on grades and scholarship rules may be obtained from the Graduation and Academic Records Office, 264 Schmitz.

The following letter grades also may be used:

N Indicates that the student is making satisfactory progress and a final grade will be given at the end of the quarter the work is completed. Used only for thesis, research, and hyphenated courses (courses not completed in one quarter) and courses numbered 600, 601, 700, 750, and 800. An "N" grade carries with it no credit or grade until a regular grade is assigned.

I Incomplete. An Incomplete is given only when the student has been in attendance and has done satisfactory work until within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control. A written statement of the reason for the giving of the Incomplete, listing the work which the student will need to do to remove it, must be filed by the instructor with the head of the department or the dean of the college in which the course is given.

To obtain credit for the course, an undergraduate student must convert an Incomplete into a passing grade no later than the last day of the next quarter. For Spring Quarter, the following quarter is considered to be Fall Quarter. *The student should never reregister for the course as a means of removing the Incomplete.* An Incomplete grade not made up by the end of the next quarter is converted to the grade of 0.0 by the Office of the Registrar unless the instructor has indicated, when assigning the Incomplete grade, that a grade other than 0.0 should be recorded if the incomplete work is not completed. The original Incomplete grade is not removed from the permanent record.

An instructor may approve an extension of the Incomplete removal deadline by writing to the Graduation and Academic Records Office no later than the last day of the quarter following the quarter in which the Incomplete grade was assigned. Extensions, which may be granted for up to three additional quarters, must be received by the Office of the Registrar before the Incomplete has been converted into a failing grade.

In no case can an Incomplete received by an undergraduate be converted to a passing grade after a lapse of one year.

In no case shall an Incomplete on the record at the time a degree is granted be subsequently changed to any other grade.

An Incomplete grade does not count for registered hours nor in computation of grade-point averages.

For DL-suffix courses that do not follow the quarter schedule, an Incomplete shall be given only when the student has done satisfactory work to within two weeks of the maximum term for completion of the course, as specified at the time of registration. In order to obtain credit for the course, a student must convert an Incomplete into a passing grade by the end of the quarter following the one in which the Incomplete was given. All other provisions and deadlines of subsections a. through d. shall also apply.

S Satisfactory grade for courses taken on a satisfactory/not-satisfactory basis. An S grade is automatically converted from a numerical grade of 2.0 or above for undergraduates. The grade S may not be assigned directly by the instructor, but is a grade conversion by the Office of the Registrar. Courses so graded can only be used as free electives and cannot be used to satisfy a University, college, or department course requirement. S is not computed in GPA calculations.

NS Not-satisfactory grade for courses taken on a satisfactory/not-satisfactory basis. A grade less than 2.0 for undergraduates is converted to NS. NS is not included in GPA calculations. No credit is awarded for courses in which an NS grade is received.

CR Credit awarded in a course offered on a credit/no-credit basis only or in courses numbered 600, 601, 700, 750, and 800. The minimum performance level required for a CR grade is determined, and the grade is awarded directly, by the instructor. CR is not computed in GPA calculations.

NC Credit not awarded in a course offered on a credit/no-credit basis only or in courses numbered 600, 601, 700, 750, and 800. The grade is awarded directly by the instructor and is not included in GPA calculations.

W Official withdrawal or drop from a course after the fourteenth calendar day of the quarter through the seventh week, to be followed by a number representing the week in which the course was dropped. An official withdrawal is not computed in GPA calculations. Students who do not officially drop a course(s) will receive a grade of 0.0. For DL-suffix courses that do not follow the quarter schedule, the grade W shall be assigned to any course dropped after the fourteenth calendar day after the start of the course and more than two weeks before the end of the maximum term for completion of the course, as specified at the time of registration. The date of withdrawal shall be noted on the transcript.

HW Grade assigned when a student is allowed a hardship withdrawal from a course after the fourteenth calendar day of the quarter. HW grades are not computed in GPA calculations.

Nontraditional Grading Options

Credit/No Credit—Only as a Course Option

With appropriate departmental review and approval, a course may be offered on a credit/no credit-only basis. The standard for granting credit in credit/no credit-only courses under this option is the demonstration of competence in the material of the course to the instructor's satisfaction.

Satisfactory/Not-Satisfactory Grading Option

You may elect to take certain courses on a satisfactory/not satisfactory (S/NS) basis.

When registering through Personal Services on MyUW, select the Grade Option box. The S/NS grade option can be elected through the end of the Late Course Drop Period. A \$20 fee is charged beginning the eighth calendar day of the quarter.

As an undergraduate, a course in which an "S" is earned may not be used to satisfy any department, college, or University requirement, except that the credits may be applied to the minimum of 180 credits required for graduation. Each instructor will report numerical grades to the Registrar, who will convert satisfactory grades (2.0 or greater) to "S", and unsatisfactory grades (less than 2.0) to "NS" for the student's transcript. No more than 25 S/NS credits may apply toward an undergraduate degree.

If you are a graduate student and earn grades of 2.7 or above, you will receive a grade of "S" while 2.6 or below are recorded as NS. With the approval of your graduate program adviser or the Supervisory Committee Chairperson, you may elect to take any course for which you are eligible outside of your major academic unit on an S/NS basis.

In cases of withdrawal, the "W" is recorded. Neither "S" nor "NS" is included in the grade-point average.

Grade-Point Average (GPA)

The University's cumulative GPA is based solely on courses taken in residence at the UW; this includes some, but not all, courses taken through UW Extension. The UW transcript also reflects grades for UW Extension course work that is not residence credit, and the grades for credit by examination. These latter grades do not affect the University cumulative GPA.

Computation of GPA

The GPA for graduation is computed by dividing the total cumulative grade points by the total graded credits attempted for courses taken in residence at the University. Grade points are calculated by multiplying the number of credits by the numeric value of the grade for each course. The sum of the grade points is then divided by the total graded credits attempted. Courses elected on an S/NS basis are counted as follows: Satisfactory grades are printed on the permanent record as an S and do not count in the quarterly or cumulative GPA, but they do count as credits earned toward graduation. Not-satisfactory grades, NS, do not count in the quarterly and cumulative GPA and do not count as credits earned toward graduation.

EXAMPLE 1

Course Points	Credits	Grade	Grade
CLAS 205	3	CR	
OCEAN 101	5	2.7	= 13.5
HIST 111	5	4.0	= 20.0
SCAND 100	2	3.3	= 6.6
Total credits earned toward graduation	15		
Total graded credits attempted	12		40.1

$$\text{GPA} = 40.1 \div 12 = 3.34$$

The total graded credits attempted, not the credits earned toward graduation, are used in computing the GPA.

EXAMPLE 2

Course Points	Credits	Grade	Grade
ENGL 121	5	2.3	11.5
OCEAN 101	5	0.0	= 0.0
SPHSC 100	3	2.7	= 8.1
ART 121	5	I	= 0.0
Total credits earned toward graduation	8		
Total graded credits attempted	13		19.6

$$\text{GPA} = 19.6 \div 13 = 1.51$$

The student attempted 18 credits, but only 13 are graded, because the Incomplete (I) is not computed in the GPA. The 0.0 for OCEAN 101 is computed in the GPA, but no credit is awarded toward graduation.

If the work in ART 121 is not made up by the end of the next quarter, the I is converted to a numeric grade and the GPA is recomputed.

Repeating Courses

Undergraduates

With the approval of the academic department offering the course, an undergraduate may repeat a course once. Both the original grade and the second grade are computed in the GPA but credit is allowed only once. Veterans receiving benefits must receive approval from the Office of Special Services before a course is repeated.

Graduates

Graduate students may repeat any course. Both the original grade and the second grade are computed in the GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once. Veterans receiving benefits must receive approval from the Office of Special

Services before a course is repeated.

Grading Procedures

Change of Grade

Except in case of error, no instructor may change a grade that he or she has turned in to the Registrar. Grades cannot be changed after a degree has been granted.

Grade Appeal Procedure

A student who believes he or she has been improperly graded must first discuss the matter with the instructor. If the student is not satisfied with the instructor's explanation, the student, no later than ten days after his or her discussion with the instructor, may submit a written appeal to the chair of the department, or in a nondepartmental college, to the dean, with a copy of the appeal also sent to the instructor. Within ten calendar days, the chair or dean consults with the instructor to ensure that the evaluation of the student's performance has not been arbitrary or capricious. Should the chair believe the instructor's conduct to be arbitrary or capricious and the instructor declines to revise the grade, the chair (or the dean in a nondepartmental school or college), with the approval of the voting members of his or her faculty, shall appoint an appropriate member, or members, of the faculty of that department to evaluate the performance of the student and assign a grade. The dean and Provost should be informed of this action.

Once a student submits a written appeal, this document and all subsequent actions on this appeal are recorded in written form for deposit in a department or college file.

Grade Reports

Grades are not mailed. You may display and print a grade report through MyUW.

Student Life and Student Services

Office of the Vice President for Student Affairs

The Division of Student Affairs assists the University in fulfilling its academic mission by providing a broad range of services and programs designed to further the educational and personal development of students. The Division consists of ten units: Admissions and Records, Center for Career Services, Student Counseling Center, Disabled Student Services, Housing and Food Services, Recreational Sports Programs, Student Financial Aid, Student Publications, and Student Activities and Union Facilities.

Students are encouraged to contact the Office of the Vice President for Student Affairs, (206) 543-4972, 476 Schmitz, for information concerning various aspects of extra-class life at the University.

Center for Career Services

The University's Center for Career Services, which includes a Minority Job Placement Program, offers career information and services to assist undergraduates, graduate students, and alumni (1) to make a viable connection between their academic backgrounds and their career or long-range employment objectives, (2) to develop effective job-seeking strategies, and (3) to find suitable employment upon leaving the University or to change employment thereafter.

A variety of programs are offered and include individual and group career counseling, career options and job-search seminars, employer and alumni career panels, mock interviews a résumé database, career-related internships and career fairs, credential files, online job listings, campus interviews, employee information, and student employment listings (including on-campus jobs). Students may also send questions to ccscnslr@u.washington.edu.

Students are encouraged to begin using the services of the Center early in their academic careers. This is best accomplished by visiting the Center at 134 Mary Gates Hall or calling (206) 543-0535 to make an appointment with a career counselor. The Center also maintains a Web site at depts.washington.edu/careers/.

Childcare Program

The Childcare Program provides eligible student-parents with direct financial assistance to purchase services at licensed childcare facilities in the Seattle-King County area. To apply, students must submit the Free Application for Federal Student Aid (FAFSA) to the designated processor by the end of February each year and a Childcare Request Application to the Childcare Office, 482 Schmitz, before the end of May each year. Brochures describing the program are available at the Childcare Office, (206) 543-1041.

Student Counseling Center

All currently enrolled, matriculated students at the University may make use of the services of the Student Counseling Center and its staff of psychologists and counselors to discuss educational

progress, personal concerns, or career goals. Individual, couples, and group counseling is provided for a variety of issues including academic, career, personal, and social issues. Because of the number of students seeking help, the Center offers only short-term therapy. Psychological tests, when necessary, are provided as part of the Center's counseling service. Workshops on special topics such as test anxiety, time management, test taking, note taking, and stress management are available.

There is a \$15 fee for the first assessment appointment, which is provided to determine if the Student Counseling Center's services are appropriate. Individual appointments after the first visit currently cost \$30 each. For students financially unable to pay the fee, an extended-payment plan is offered. The Center is located on the fourth floor of Schmitz Hall, (206) 543-1240. Additional information may be found at the Center's Web site.

Disabled Student Services

The University is committed to ensuring facility and program access to students with either permanent or temporary physical, sensory, or psychological disabilities through a variety of services and equipment. The Disabled Student Services (DSS) Office coordinates academic accommodations for enrolled students with documented disabilities. Accommodations are determined on a case-by-case basis and may include classroom relocation, sign language interpreters, recorded course materials, note taking, and priority registration. DSS also provides needs assessment, mediation, referrals, and advocacy as necessary and appropriate. Requests for accommodations or services must be arranged in advance and require documentation of the disability, verifying the need for such accommodation or service.

Technical and adaptive equipment is available through both DSS and Computing and Communications. Information about adaptive-technology computer software and equipment and their locations on campus may be obtained from DSS. Publications include *Access Guide for Persons with Disabilities*, (showing classroom access, elevator locations, ramps, parking, and restrooms), and the *Campus Mobility Route Map*, as well as other publications.

To the maximum extent possible, students with disabilities are integrated into the general student population and their problems are solved through the usual channels. Various other departments offer additional services: the Transportation Department provides free on-campus transportation with wheelchair lifts for students with mobility limitations through Dial-a-Ride, (206) 685-1511, and UW Night Ride, (206) 799-4151 after 6 p.m.

Additional information is available from Disabled Student Services, 448 Schmitz, Box 355839, (206) 543-8924 (Voice), (206) 543-8925 (TTY), uwdss@u.washington.edu.

Freshman Convocation

Freshman Convocation is an academic ceremony involving the President of the University, other administrators, student leaders, and members of the Board of Regents and the faculty, to welcome and honor new freshmen and their families. It is held annually on the Sunday preceding the first day of autumn quarter. The President presides over the ceremony, which features remarks by a distinguished member of the faculty. Neither tickets nor reservations are required for the Convocation. Formal invitations are mailed in mid-August. A no-host brunch, which requires tickets, is held in the Student Union Building (HUB) and precedes the Convocation.

Student Health Insurance Program

An accident and sickness insurance plan is available to matriculated University students (Seattle campus) and dependents on a voluntary basis. A student may enroll in the plan at the time of

registration through the seventh calendar day of each quarter. The appropriate premium is paid by the quarterly tuition due date. Brochures describing the insurance eligibility, coverage, and costs are available at the Student Insurance Office, 469 Schmitz, (206) 543-6202; Hall Health Primary Care Center; and the HUB.

The University also sponsors a field-trip accident insurance plan. Application forms may be requested from the Risk Management Office, 22 Gerberding, Box 351276, (206) 543-3419.

Insurance for Foreign Students

All students from foreign countries are required to have a health-and-accident insurance policy in force while registered at the University. This may be achieved by purchasing either the student accident and sickness insurance offered through the University or other coverage, proof of which must be furnished to the International Services Office and for which an insurance waiver must be obtained. To avoid cancellation of registration, international students must pay tuition and either pay for the University-sponsored insurance or have a waiver on file by the tuition due date.

International Services Office

The International Services Office provides assistance to international students, scholars, and faculty in meeting United States Immigration and Naturalization Service regulations dealing with such matters as maintaining lawful status, extensions of stay, transfers of schools/programs, and working authorizations. The Office also provides a formal orientation to the campus and community for new international students and visiting faculty; advice and counsel for educational, financial, and personal problems; and dissemination of important and timely information through newsletters and workshops. The Office is located in 459 Schmitz, (206) 543-0841.

Office of Special Services

The Office of Special Services, 460 Schmitz, assists students eligible for veterans' educational benefits, advises and monitors students who must meet English As A Second Language requirements, and administers certain tuition-reduction programs (see Procedures and Fees section).

Office of Student Financial Aid

The Office of Student Financial Aid, 105 Schmitz, administers federal, state, and private financial aid programs designed to help students pay for their education. Assistance is offered in the form of grant aid, scholarships, long-term loans that must be repaid after leaving school, and work opportunities. Information describing the different programs, eligibility criteria, and application procedures may be viewed at www.washington.edu/students/osfa or may be obtained by calling (206) 685-9535.

To be eligible for financial aid, an individual must be a citizen or permanent resident of the United States and be admitted to the University as a matriculated, degree-seeking student. Priority consideration is given to students who apply before the University's financial aid application deadline of February 28 (e.g., February 28, 2002, for the academic year beginning in September 2002).

The Office of Student Financial Aid also administers a short-term loan program for full-time students who find themselves in temporary financial difficulty. University students may take advantage of the short-term loan program without applying for financial aid.

Student Legal Services

Student Legal Services (SLS) provides legal advice, counseling, negotiating, and court representation in many civil and criminal matters. All currently enrolled undergraduate and graduate

students at UW Seattle are eligible for a free initial consultation. If additional services are needed, there is an hourly charge of \$15, plus a \$10 office supply fee. Students are responsible for court costs, if any. The office is staffed by third-year law students supervised by licensed attorneys. To make an appointment or learn more about SLS, call (206) 543-6486 or visit the office, 31 Brooklyn Building, Box 354563, 4045 Brooklyn Avenue NE. No legal advice is given over the phone.

Student Publications

Student publications at the University include *The Daily* and the *Student Directory*. *The Daily* is published Monday-Friday throughout the academic year and is distributed in the mornings on campus without charge. During summer quarter, *The Daily* is published once a week. Any student with an interest in journalism may serve on *The Daily* staff.

Student Union Facilities

The Husky Union Building (Student Union Building) and the South Campus Center are the principal centers of student activities and programs on the campus.

Husky Union Building

The Husky Union Building (HUB), located in the center of campus, houses a variety of facilities and services for students, and faculty and staff members. These include lounges, a 478-seat auditorium, a multipurpose ballroom, a barber and hair-styling shop, a branch of the University Book Store, several retail food operations, a study/music lounge with email access, a lost-and-found office, a ticket sales office, a newsstand, a self-service post office, a limited-service bank, three cash machines, a number of student-organization offices, and a games area which includes a twelve-lane bowling center. Meeting rooms accommodating from 10 to 175 persons are available for registered student organizations.

South Campus Center

The South Campus Center, located on the shore of Portage Bay, serves as the central meeting place for students and faculty on the southern end of campus. Facilities and services similar to those in the HUB are available and include meeting and conference rooms, display cases, a hair-styling shop, amusement games, a cash machine, a branch of the University Book Store, a newsstand, and lounges with beautiful views of Portage Bay.

Student Activities and Organizations

Student Activities Office

The services provided by the Student Activities Office (SAO) include assisting student organizations in understanding University policies and procedures, providing technical help in the planning and conduct of student events, and furnishing information and assistance in order that they may represent themselves and their interests in an effective manner. Advisers are available to assist students involved in group activities with budget and program planning, advertising, orientation to campus resources, and leadership and organizational skill development. Underlying the SAO service functions is a desire to provide an environment in which students can learn from their experiences in extracurricular activities as a supplement to their classroom experiences. Additional information about the services is available from the Student Activities Office, 207 HUB, (206) 543-2380.

Student Organizations

Students at the University are encouraged to become active in at least one of the campus's approximately 450 voluntary student organizations, which include honorary, professional, and social organizations; service clubs; activity groups; and religious and fraternal organizations. Voluntary student organizations that register with the University receive various benefits and services to assist their respective activities. Additional information is available from the Student Activities Office, 207 HUB, (206) 543-2380.

Associated Students of the University of Washington

The Associated Students of the University of Washington (ASUW) is a voluntary, nonprofit association of students designated by the University Board of Regents to carry out a variety of student activities and to represent student interests. In order to vote in ASUW elections, hold ASUW office, or be employed by the ASUW, a student must be a member of the ASUW. Membership is open to all students by providing an affirmative answer on the University registration form each quarter.

The ASUW has an annual budget of approximately \$1 million, supported by the services and activities fee paid as part of tuition and from program revenue. The government of the ASUW is headed by an eleven-member board of directors elected by the student body each year, and one representative from the Graduate and Professional Student Senate. The ASUW maintains agencies and service groups to provide students with a varied program of activities during the school year and nominates students for service on a number of University committees. ASUW services include the Experimental College, a bicycle repair shop, and an ongoing film and entertainment series. Questions regarding the ASUW and its services should be directed to either the ASUW Office, 204L HUB, (206) 543-1780, or the Student Activities Office, 207 HUB, (206) 543-2380.

Recreational Sports

The Department of Recreational Sports Programs provides a comprehensive program of more than seventy sports and fitness activities designed to meet the diverse needs and interests of students. To provide this service, the department manages recreation facilities that include the Intramural Activities Building (IMA), Golf Driving Range, Waterfront Activities Center (canoe rentals), outdoor facilities (Denny Field and tennis courts), Hutchinson Hall swimming pool and locker rooms, and the practice Climbing Rock. Programs and facilities are open to students with a valid student identification card (Husky card).

For additional information call the telephone numbers listed below, or visit the Recreational Sports Web site at depts.washington.edu/ima/.

Intramural Activities Building: The IMA is located north of Husky Stadium and south of parking lot E1. The IMA includes activity space for basketball, volleyball, badminton, swimming, squash, racquetball, handball, martial arts, aerobics, archery, and roller skating. The IMA has a fitness center with free weights, weight machines, and cardiovascular machines. Located near the IMA are 13 tennis courts (seven are night lit), and three multipurpose sports fields for flag football, softball, soccer, rugby, lacrosse, ultimate, and other outdoor activities. For more information, contact the IMA at (206) 543-4590 or ima@u.washington.edu.

The **fitness center** is equipped with 18 climbers, 24 treadmills, 12 recumbent cycles, 12 stationary cycles, 21 cross trainers, six

ergometers, 62 single-station weight machines, 40 strength benches, a step mill, and Olympic weights, including barbells and dumbbells.

Sports Skills Instruction: Recreational Sports offers non-credit classes in Aikido, aerobics, step aerobics, hydro-aerobics, deep-water fitness, Abs, body composition, conditioning, first aid and CPR, golf, judo, karate, kung fu, racquetball, rock climbing, rowing, scuba diving, ski conditioning, snow skiing/snowboarding (indoor), squash, swim conditioning, swimming, tae kwon do, tai chi, tennis, weight training, and yoga. For more information, call Sports Skills Instruction at (206) 543-2571.

Club Sports: Recreational Sports offers club sports, including Aikido, archery, climbing, cycling, equestrian, fencing, ice hockey, judo, karate, kayaking, kendo, kung fu, lacrosse (men's and women's), rowing, rugby, sailing, scuba diving, snow skiing, soccer, tae kwon do, ultimate Frisbee (men's and women's), volleyball (men's and women's), and water polo (men's and women's). For more information, contact Club Sports at (206) 543-9499.

Intramural Sports are offered for men, women, and men and women combined in a variety of activities, including basketball, bowling, crew, flag football, inner-tube basketball, soccer, softball, swimming, tennis, track and field, ultimate Frisbee, and volleyball, as well as special events. For more information, call Intramural Sports at (206) 543-8558.

The **Golf Driving Range** is located at the foot of the 45th Street viaduct and is the center for all golf activities on campus. The facilities include 43 hitting tees, and two putting and chipping greens, and are open seven days a week. Group lessons are available for beginning players. For more information, contact the Golf Driving Range at (206) 543-8759 or seagren@u.washington.edu.

Waterfront Activities Center (WAC): The campus center for water sports (e.g., canoe rentals, sailing, kayaking, rowing) is located at the WAC southeast of Husky Stadium. The WAC offers locker rooms with saunas, private boat storage for non-motorized craft, and group rental of the lounge and meeting rooms. The facility is open from 10 a.m. to dusk, seven days a week. For more information, contact the WAC at (206) 543-9433 or h2o@u.washington.edu.

Student Rights and Responsibilities

Student Conduct Code

The University Board of Regents has adopted a *Student Conduct Code*, which applies to both the academic and nonacademic conduct of students while they are attending the University. The *Code* specifies standards of conduct, jurisdiction for hearing disciplinary matters, and due-process procedures. Students may obtain copies of the code through either their advisers or the Office of the Vice President for Student Affairs, 476 Schmitz.

Computer Use Policy

All faculty, staff, and students who use any computer at the University are responsible for using computer resources in an ethical and legal manner. For example, it is not appropriate to share computer accounts or use them for commercial purposes, to send unwanted email, or to distribute copyrighted software, music, or images. Those who do not follow the rules could lose their UW computing privileges. For detailed information see the Web, or contact Computing and Communications Information at (206) 543-5970.

University Policy on Student Education Records

A copy of the University's policy on a student's right to inspect his or her education records and the University's responsibility to maintain the confidentiality of such records is located at each departmental reference station. The policy is filed under the Washington Administrative Code 478-140-010. Copies of the policy are available at the Registration Office, 225 Schmitz.

Sexual Harassment Complaint Procedure

Students, staff, faculty, and other users of University services who have a concern or complaint regarding sexual harassment may contact either the Ombudsman for Sexual Harassment, (206) 543-0283, or the University Complaint Investigation and Resolution Office, (206) 616-2028. Personnel in these offices provide assistance in resolving concerns and complaints. Also, University staff may contact their human resources representative about sexual harassment concerns.

Office of Minority Affairs

Fostering diversity is the ongoing work of the entire University, but it is a special responsibility of the Office of Minority Affairs (OMA). To this end, OMA provides a variety of services to undergraduates from underrepresented and economically and educationally disadvantaged backgrounds. These services include a statewide **Recruitment and Outreach Office** whose staff provides assistance with the admissions and financial aid process in high schools and community colleges throughout Washington state. Through its **Counseling Center**, OMA offers academic advising, financial aid advocacy, housing assistance, and other services related to life on campus. OMA's services are available mainly to students who, following admission, are invited to become members of the Educational Opportunity Program (EOP). Participation in EOP is limited to students who are U.S. citizens or permanent residents, with priority given to Washington state residents. OMA's other services, described below, are open to EOP participants and other students as resources permit.

OMA's Instructional Center (IC) offers wide-ranging academic assistance to students in the Educational Opportunity Program and to others as staffing, time, and space permit. The IC maintains drop-in centers for mathematics, writing, reading and study skills, physics, engineering, chemistry, biology, the natural sciences, and foreign languages. Students are assisted in a variety of settings, such as group instructional workshops, review sessions, adjunct courses, credit and non-credit classes, and one-on-one tutorials.

Student Support Services (SSS) is a counseling and instructional-assistance program for selected UW undergraduates who meet the program's economic and educational eligibility requirements. SSS helps students adjust to campus, as well as encourages and assists them in discovering and taking advantage of the UW's many academic and personal opportunities. SSS also provides tutorial and academic-support workshops to help students move successfully to upper-division courses or into the Early Identification Program's graduate-school preparation services.

The Early Identification Program (EIP) is a graduate- and professional-school preparation program for qualified students interested in earning advanced degrees. The **McNair Achievement Program** is a federally funded scholarship program designed to encourage and prepare low-income and first-generation college students and underrepresented students in graduate education, for the Ph.D. degree. Through their advising and academic-enrichment services, EIP and McNair encourage students to aim for doctoral degrees and faculty careers. These

services include an introduction to the research process, research opportunities in collaboration with faculty mentors, scholarships and internships, access to special seminars and workshops, as well as advice and assistance with the graduate school admissions and financial aid process.

The Ethnic Cultural Center (ECC) is a facility for student-organized events and activities. Twenty-two of the University's student organizations use the ECC as their center of activity. The staff of the Center offers students opportunities for the development of organization and leadership skills through the planning and implementation of cultural, social, and student-government programs. The Ethnic Cultural Center complex also maintains an outstanding theatre which provides opportunities for students interested in participating in or creating on-stage productions and other events.

Outreach to Middle and High Schools. The Office of Minority Affairs collaborates widely with other UW pre-college partnership programs to strengthen the University's diversity "pipeline" from the K-12 schools. OMA itself maintains several middle- and high-school outreach programs whose aim is to increase the number of students who are taking college-prep classes by the ninth grade, improve the academic performance and the college-going rates of underrepresented and disadvantaged students. These services offer UW students a variety of volunteer, UW-credit, or paid opportunities. **Upward Bound** provides strong academic and other college-readiness services for selected Seattle high school students from Seattle's Nathan Hale, Cleveland, and Franklin High Schools who are from low-income or first-generation college families. The Office of Minority Affairs is a partner with middle schools and community organizations in the Yakima Valley and Seattle in the management of college-readiness **Gear Up** programs. The **Early Scholars Outreach Program** helps students begin preparation for college while they are still in middle school. **Educational Talent Search** offers counseling and encouragement to middle- and high-school students in targeted western and eastern Washington schools. It focuses particularly on the transition from high school to postsecondary education. OMA, working with UW students and several Seattle high schools, provides inner-city students with tutoring, mentoring, and classroom assistance through the **OMA High School Tutor/Mentor Program**. OMA in partnership with the Seattle School District offers a **Middle College High School Program** experience on campus to a selected group of non-traditional high school students.

The office of the Vice President for Minority Affairs and many of OMA's services are located on the third floor of Schmitz Hall. For information about OMA's program locations and services, call (206) 685-0774.

Registration Policies

Full-time Requirements

You should register for 12 or more credits to be considered full-time if you are an undergraduate or professional student. If you are a graduate student, you should register for 10 or more credits. It is important to note that differing criteria and standards for full-time enrollment exist for eligibility in certain programs. Consult the Financial Aid Office for its requirements on satisfactory student progress. The tuition schedule does not reflect full-time credit requirements for loan deferments, teaching assistantships or other programs.

Class Attendance

If you do not attend regularly scheduled class meetings during the first week of the quarter, you are subject to being dropped at the discretion of the teaching department to allow enrollment space for other students. Affected courses should be identified in the Time Schedule and/or posted in departmental offices. Do not assume that departments will automatically drop you from the course if you do not attend. If you are not going to go to class, you should drop the course through the registration system. Students who are registered for a course section but do not attend will be assigned a failing grade by the instructor. You may not attend a University course in which you have not been officially registered after the first two weeks of the quarter.

An instructor may allow you to attend his or her class only if your name appears on the official class list from Office of the Registrar. A faculty member may attend informally with the approval of the instructor.

Satisfactory Progress

If you are pursuing a baccalaureate degree, you are expected to make satisfactory progress toward the attainment of that degree and are expected to enter a major and graduate after completion of a reasonable number of credits.

The 105-credit rule

Undergraduates must declare a major by the time they have earned 105 credits or a hold will be placed on their registration until they either declare a major, or meet with an adviser and receive a pre-major extension. The hold is placed on the student record when 105 or more credits have been completed. Transfer students who are admitted to the University with 105 or more credits are expected to declare a major before their second quarter at the UW, or obtain an extension from an adviser.

You will be granted a pre-major extension if your adviser decides that you are pursuing a reasonable goal, and have a good chance of gaining admission to your intended major. The extension will be granted for the number of quarters it should take you to complete the admission requirements of your major.

If your adviser feels that your choice of major is unrealistic, he or she will deny your request for an extension. You will not be allowed to register for subsequent quarters until you can present a reasonable degree plan. Since the intent of the rule is not to drop you from the University but to encourage you to meet with an adviser and plan for an attainable goal, if you need time to consider your options you will usually be given one or two quarters to do so, and then may be allowed additional time if necessary to meet the admission requirements of your new major.

You will receive a warning letter from the University as you approach 105 credits, if you have not yet declared a major. If you

complete 105 credits and are still a pre-major, the registration system will not let you register for the next quarter. To avoid registration delays, meet with the appropriate adviser at least one quarter before you complete 105 credits.

The 210-credit rule

The University's satisfactory progress policy requires students to complete their undergraduate degree programs within 30 credits beyond the minimum required for the degree. Because most degrees require 180 credits, students generally must complete their programs by the time they earn 210 credits. Undergraduates who have completed over 210 credits will be notified by email the third week of the quarter that a hold is being placed on their registration due to lack of satisfactory progress. Students ineligible to graduate will be permitted to register for succeeding quarters only if they receive approval from their department and college after filing a graduation plan. Approval to enroll beyond 210 credits may not extend beyond two additional quarters.

Students receiving satisfactory progress registration holds should immediately contact their departmental academic adviser to file a graduation application or to initiate a satisfactory progress appeal.

Postbaccalaureate students

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree, or working toward a certificate. If you are admitted as "postbaccalaureate undeclared," you must declare a major by the time you have earned 30 credits beyond your last degree. Once a degree objective has been declared, you must make progress toward that degree as evidenced by courses satisfactorily completed. College advisers may grant extensions beyond the 30-credit limit.

Excessive course repeats and/or drops

The Committee on Admissions and Academic Standards may terminate your enrollment if you have demonstrated lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. You may be reinstated with the approval of your college and the Committee. EOP students may be reinstated in consultation with the Office of Minority Affairs.

Registration Tampering

A student who tampers or attempts to tamper with the registration records of another student, including but not limited to dropping courses and adding courses, may be subject to disciplinary sanctions as defined in the Student Conduct Code (WAC 478-120).

Registration Abuse

Web Registration is a personal service. The use of robots and other automated tools to submit registration requests is expressly forbidden.

Residence Halls

Students like the convenience of living in the residence halls (being close to classes and having access to a variety of dining options), but that's just the beginning. Those who live on campus are part of a community that offers opportunities for fun, friendships, personal development and academic success.

Who lives in the residence halls? People just like you live here. But perhaps best of all are the people who live here who have ideas, attitudes and experiences different from yours.

Special Interest Houses

The UW residence halls offer several special interest houses—designated floors in certain halls where residents with common interests live. Residents are encouraged to plan and participate in activities for these houses. If you'd like to live in one of the special interest houses, indicate your preference on your housing application.

Special Interest Houses:

Outdoor House

Outdoor House offers residents the opportunity to plan, participate in and learn outdoor activities such as hiking, biking, skiing, snowshoeing, camping and canoeing. Residents of Outdoor House also share an interest in environmental issues.

International House provides a rewarding environment for those who seek opportunities to share cultural experiences with American and international students, in daily life and through participation in a variety of social and cultural activities.

SAFE House

(Substance and Alcohol Free Environment)

SAFE House offers residents the opportunity to live in a residential community where alcohol and tobacco products are not permitted by its members (regardless of a student's age). The community also features programming and activities that are specific to promoting a substance-free lifestyle. Residents work with Resident Advisers and Resident Directors to create a community that exemplifies an awareness of substance and alcohol abuse issues.

In the other residence hall communities, alcohol use is limited to those of legal age (21) and then only within the confines of a resident's room. The use of illegal substances is strictly prohibited in all residence halls. All halls are 100 percent smoke-free.

Residential FIG

(Freshman Interest Group)

Residential FIG is a specialized program for freshmen which combines academics and life outside class. Students enrolled in a Residential FIG take classes together autumn quarter and live together in the same residence hall for the academic year. New freshmen who have received confirmation for a space in the residence halls are eligible to register. If you are interested in a Residential FIG, visit the FIG website or contact the First Year Programs Office at 206-543-4905.

First Year Experience

First Year Experience offers an environment specifically designed to provide opportunities to assist first-year students in their adjustment to college, often through educational and social programs and floor activities.

Honors House

Honors House is an option for University of Washington Honors Program students who wish to expand their intellectual lives beyond the classroom. Students who choose Honors House have the best of both worlds: close contact with other Honors students and the diversity of the residence halls.

Safety and Security

The University of Washington is a relatively safe place; however, it can be subject to the same problems as the surrounding urban community. The following information describes programs and policies established to protect your safety and well-being.

Residence Hall Patrol

Plainclothes University Police patrol the halls each night from 7 p.m. to 5 a.m. Officers are fully commissioned and have the same authority as other law enforcement officers. RDs and RAs are on duty to handle security issues from 5 p.m. to 8 a.m. and RDs are on duty 24 hours a day on weekends and holidays.

Locked Halls

Residence halls are locked 24 hours a day, except those with food service operations, which remain open from 7 a.m. until 7 p.m. The residence hall desks are staffed from 8 a.m. to 7 p.m. Monday - Friday, 8 a.m. - 5 p.m. on Saturday and 10 a.m. to 5 p.m. on Sunday.

Fire Safety

The fire alarms for all residence halls comply with City of Seattle high-rise fire codes. The systems consist of area-sensitive and building heat and smoke detectors. Each student room contains a smoke/heat detector. Sprinkler systems exist in Terry, Lander, McCarty, McMahon, Haggett and Hansee Halls. Sprinkler systems will be added to Mercer Hall by autumn 2004. All heating and ventilating fans within a facility are interlocked with the fire alarm system for that facility. The system is hardwired directly into the University Police Department, which notifies the City of Seattle Fire Department if problems arise. The University of Washington's Environmental Health and Safety (EHS) department conducts a comprehensive annual inspection of all physical fire safety attributes. In addition, HFS is subject to random inspection by the City of Seattle Fire Department, and semiannual fire drills are conducted in every hall.

Other Safety Measures

- All residence hall rooms have peepholes.
- Women's restrooms are locked.
- Residence hall keys are high-security keys; duplicate keys can only be made using factory equipment.
- Throughout the year residents receive information about safety issues, and Resident Advisers offer programs on personal safety, property protection, emergency procedures and related topics.

Frequently Asked Questions

How do I apply for the residence halls?

The housing application is available online.

Can I apply for housing even if I haven't decided if I will attend the UW?

You are encouraged to apply for housing even if you have not yet decided to attend the University of Washington, because your

assignment will be based on the date we receive your Residence Hall Application, signed contract, and deposit. See the Residence Hall System Contract for specific details.

If you apply for a space in the residence halls and then decide not to attend the University, you will receive a full refund of your deposit if you cancel your application by the appropriate deadline. You are subject to a cancellation fee if you cancel your housing application but still attend the University. See the Residence Hall System Contract for details.

Is housing guaranteed?

We anticipate having enough space for all students who apply for autumn 2005, but cannot guarantee preference.

Who has priority for residence hall space?

The priority system for autumn 2005 is:

- 1 Students who live in the residence halls as of April 1, 2005, and who complete the housing application by April 15, 2005, based on quarters-in-residence.
- 2 New undergraduate students who apply by September 1, 2005, in order of application date.
- 3 Continuing undergraduate students, including returning residents and new undergraduates who apply after their respective deadlines, in order of application date.
- 4 Graduate and professional students, followed by non-matriculated students, in order of application date and on a space-available basis.

*If a Priority 2 waiting list is established, preference may be given to students who live outside commuting distance.

Is there a deadline to apply for housing?

Current residents have until April 15 to apply as a Priority 1. If they miss this deadline, they may still apply as a priority 3. New students may apply at any time.

To what type of room will I most likely be assigned?

New residents will typically be assigned to double or triple rooms, depending on the date their applications are received. A limited number of single rooms may be available to new residents.

Can I get a single room?

Most single rooms are currently filled by returning residents. However, a limited number of single rooms may be available to new residents.

Is my \$300 deposit refundable?

The one-time \$300 deposit is refundable when you permanently move out of the residence halls, and after deductions have been made for any room and board payments due, damage or loss to the room (or cluster in McMahon), and necessary cleaning charges.

What if I decide to cancel my housing application?

If you need to cancel your housing application you may do so in one of three ways:

- 1 Online via the housing application, <https://ucharm.hfs.washington.edu/ucharm>, or
- 2 Email hfsinfo@u.washington.edu from your UW email account, or
- 3 In writing:
University of Washington
HFS Student Services Office
301 Schmitz Hall
Box 355842
Seattle, WA 98195-5842

Please be sure to include your full name and student number in your correspondence.

If you will be attending the University of Washington but no longer need UW housing, you are subject to the cancellation fee schedule in the Residence Hall System Contract.

If you will not be attending the University of Washington and you cancel in writing or email before September 19, 2005, your deposit will be refunded and you will not be charged a cancellation fee.

What should I bring?

- Your residence hall room will be supplied with:
- one satellite TV connection
- one telephone jack
- blinds or draperies
- beds
- desks
- bookcases
- chairs
- dressers
- closets
- wastebaskets
- Ethernet connection

You should bring:

- Bedsheets
- pillows and pillowcases
- blankets/comforter
- towels
- touch-tone telephone (one per room)
- alarm clock

What appliances can I bring?

- The following appliances are allowed:
- Refrigerators under 4.1 cubic feet.
- Blenders and mixers.
- Hot air popcorn poppers.
- Hot pots and coffee pots, which must be placed on non-combustible surfaces such as ceramic tile.
- One microwave oven per room - 700-watt maximum, and no other appliance may be used at the same time.

The following appliances are prohibited:

- Halogen torchieres.
- Space heaters.
- All open-flame appliances (e.g. fondue pots).
- Open-coil appliances (e.g. toasters and toaster ovens).
- Full-size appliances, or multiple appliances that exceed the usage limits of your room.

Should I bring a refrigerator?

You may rent a small refrigerator for your room. The cost for a refrigerator will be \$45 for the academic year (\$30 if the lease is signed winter quarter, \$15 if it is signed spring quarter).

How large are the beds in the residence halls?

The beds in Terry, Lander, McCarty, Haggett, and Hansee Halls, 2104 House and Stevens Court are 36" x 78". The beds in Mercer and McMahon Halls are 33" x 78".

How do I get a parking permit?

You will receive information about parking with your checking-in materials. Please note, however, that parking is very limited and very expensive. A quarterly parking permit for the 2005-06 school year costs \$232.86. Your parking assignment may be in an area that is not close to your hall or you may be placed on a waiting list (most new students are placed on the waiting list). If you don't absolutely need a car, leave it at home. The University has a transportation program called U-PASS which, for \$41 per quarter, offers unlimited rides on buses throughout King and Snohomish counties, as well as other transportation benefits.

Do you have any graduate student housing?

There are a number of housing options available for graduate students:

- Stevens Court single student apartments for students who are 19 and older.
- Stevens Court Addition single and married student

apartments for students who are 20 and older.

- Family Housing communities.
- Private property communities for UW students:
 - Commodore-Duchess
 - Radford Court
 - Nordheim Court

I will be a student in the English Language Program (a.k.a. English as a Second Language Program). Can I live in the residence halls?

Priority for assignment in the residence halls goes first to matriculated University of Washington students. When space permits, we can offer housing to non-matriculated students, such as students in the Extension Program and students in the English Language Program (ELP).

Procedures and Fees

The University and its colleges and schools reserve the right to change the fees, the rules, and the calendar regulating admission and registration; the instruction in and the graduation from the University and its various divisions; and any other regulations affecting the student. The University also reserves the right to withdraw courses and programs at any time.

It is the University's expectation that all students follow University regulations and procedures as they are stated in the *General Catalog*. Appeals may be filed with the student's dean or with the Vice President for Student Affairs in nonacademic matters. Students are expected to observe the standards of conduct contained in the Student Conduct Code (WAC 478-120).

Registration

www.washington.edu/students/reg/regelig.html

Instructions for registration are available on MyUW (myuw.washington.edu) in the Student Personal Services menu by selecting Registration. Notification is emailed to each student quarterly with information about registration for the next quarter.

Registration Period I

www.washington.edu/students/reg/addpolicy.html

Designed to accommodate currently registered matriculated students and students eligible to register under the Quarter Off Eligibility Policy, Registration Period I occurs during the latter half of the quarter preceding the quarter for which the student is registering. However, currently enrolled students registering for autumn quarter do so in spring quarter.

Registration Period II

Registration occurs after Registration Period I closes and is intended primarily to accommodate new and returning students. Continuing students who fail to register during Registration Period I may register during this period. Students who have not completed their initial registration by the end of this period (update and selection of address information, insurance/optional charges, and ASUW membership) are charged a Late Registration Fee.

Registration Period III

All students may register or make course changes during this period. Dropped courses do not appear on the transcript. Students are charged a Change of Registration service fee for registration changes made after Period III. One fee is charged for all changes occurring during the same day. A tuition forfeiture is charged for total credit reductions after Period III if applicable. See Fee Forfeiture section.

Late Add Period

All students may register or make registration changes during this period. All added courses require an entry code or faculty number. A Change of Registration service fee is charged.

Unrestricted Drop Period

www.washington.edu/students/reg/wdpolicy.html

Courses dropped during this period will not appear on the transcript. A Change of Registration fee is charged.

Late Course Drop Period (Annual Drop)

Students may drop one course each academic year (autumn through summer quarters) after the fourteenth calendar day of the quarter through the seventh week of the quarter. A course drop will be recorded on the transcript with a W followed by the number of the week of the drop (W3-W7). A Change of Registration service fee is charged.

Credits Required for Full- or Half-Time Status Requirements

www.washington.edu/students/reg/regpol.html

Some agencies require that a student have full-time status to receive maximum benefits. To be classified as a full-time student by the University, a professional student must register for and complete at least 12 credits per quarter and a graduate student must register for and complete at least 10 credits per quarter. To be classified as a half-time student by the University, a professional student must register for at least 6 credits per quarter and a graduate student must enroll for at least 5 credits per quarter.

Restrictions on Attending Classes

www.washington.edu/students/reg/regpol.html

No person, other than a faculty member attending informally with the approval of the instructor, may attend a University course in which that person has not been registered.

An instructor may allow a student to attend his or her class only if the student's name is on the official class list from the Office of the Registrar. An unregistered student may attend through the fourteenth calendar day of the quarter if the student is on an official wait list for the course.

Adding Courses/Permission Guidelines

www.washington.edu/students/reg/regopt.html

For reasons of public safety and instructional quality, it is important to limit course enrollment to the approved classroom capacity. The Office of the Registrar monitors course enrollment and accepts student registration in fully enrolled courses according to the following guidelines:

1. Through the second week of the quarter, departments may choose to overload courses up to 115% of the room capacity to offset anticipated student course drops and withdrawals as demonstrated by past registration activity.

Students must secure entry codes from instructors or departments to add closed courses. However, if enrollment is at 115% of room capacity, registration requests are denied. Students should be informed when receiving entry codes to overload courses that registration is not guaranteed if enrollment exceeds 115% of room capacity.

If centralized room-capacity records do not correctly reflect the actual seating capacity, notification should be made to the Room Assignments/Time Schedule Office in the Office of the Registrar.

2. Students may add courses during the Late Add Period or through the twenty-first calendar day of the quarter. Adds after the seventh calendar day of the quarter require an entry code or faculty number. Departments may also add students to departmental courses during this period through departmental registration screens. To add courses after this period, students must submit a faculty-approved Late Add Petition form to the Registration Office.

3. A course may not be changed to or from an audit registration after the first two weeks of the quarter. See below for transcript entry.

Dropping a Course

www.washington.edu/students/reg/wdpolicy.html

Students dropping a course during the first two weeks of a quarter shall have no entry on their permanent academic transcript. If all courses are dropped, then a complete withdrawal date is recorded on the transcript.

A course drop made during the third through the seventh weeks of the quarter is recorded on a student's transcript with a W grade and a number designating the week of the quarter in which the course drop was transacted. Only one drop after the fourteenth day of a quarter is permitted each academic year (autumn through summer quarter).

A student who does not officially drop a course through the registration system or the offering department is given a grade of 0.0.

Students receiving or applying for financial aid should check with the Office of Student Financial Aid, 105 Schmitz, 206-543-6101, before dropping a class because it may affect their eligibility.

Students receiving veterans' benefits should contact the Office of Special Services, 460 Schmitz, when dropping courses.

Complete Withdrawal from the University for a Registered Quarter

www.washington.edu/students/reg/wdoffleave.html

Once registered, a student must officially withdraw if he or she later chooses not to attend the University for the registered quarter. Official withdrawal must be made by the fifth day of the quarter for the student to avoid further financial obligation (see Tuition, Fees, and Special Charges for refund information on withdrawals).

1. To withdraw from a quarter, students may complete a Withdrawal Card and submit it in person to the Registration Office, 225 Schmitz, or write to the Registration Office, Box 355850, Seattle, WA 98195-5850. Withdrawal forms are available

at advising offices and the Registration Office. An official withdrawal is effective the day it is received in the Registration Office, or if submitted by mail, the date of the postmark.

2. Students who drop the last course on their schedules will be considered withdrawn for the quarter. Students who drop courses beginning the eighth calendar day of the quarter are charged a Change of Registration service fee per day for any course drops.

3. Submission of a graduate On-Leave application does not constitute official withdrawal from the University.

4. Refer to the grading section in the Graduate School: Graduate Study section.

5. Students receiving veterans' benefits should immediately notify the Office of Special Services of withdrawal.

6. Students with a scholarship or loan awarded through the University should notify Student Fiscal Services.

7. Students who withdraw due to conscription into the armed forces or who are called to active duty military service may be entitled to either a full refund of tuition and fees or academic credit, depending on when in the quarter official withdrawal occurs. Students should contact the Registration Office for complete information.

Additional Information

Address Change

www.washington.edu/students/reg/address.html

Students are responsible for notifying the Office of the Registrar when their address changes. Individual addresses may be viewed and updated through MyUW. (Select Change of Address under the Student Personal Services menu.). A confirmation message will be sent to the student's email address. *The mailing of notices to the last address on record constitutes official notification.*

Residence Classification Requirements

www.washington.edu/students/reg/residency.html

Residence classification information is available from the Graduation and Academic Records Office, 264 Schmitz.

Student Identification Cards

www.washington.edu/students/reg/id.html

All new students should go to the Student ID Card Center, 225 Schmitz, to be issued a permanent student identification card. Photo identification (such as a driver's license, state ID card, or passport) is required to obtain a student ID card. Returning students who have not retained a previous ID card should obtain a new one. A quarterly validation sticker is mailed with the registration confirmation to each registered student. The student ID card with attached validation sticker is used for a variety of campus services. It is the student's means of identifying his or her status as a student at the University.

Registered students whose ID cards have been lost or stolen can have them replaced at the Student ID Card Center. Students who request such replacement are charged a nonrefundable fee. Replacement of cards made invalid by changes in a student's name or rendered unusable by normal wear and tear is provided without charge upon return of the original card to the Student ID Card Center. Two pieces of identification (one with a photo) are required to obtain a replacement card.

Cards that have been tampered with or misused may be confiscated by the University agency or department involved, and the incident may be referred to the Office of the Vice President for Student Affairs for appropriate University action.

Transcripts

www.washington.edu/students/reg/transcripts.html
Official copies of student academic records at the UW must bear the official seal of the University, the signature of the Associate Registrar, and the date of issue.

Transcript Fee

A charge of \$4, paid to the Transcript Office in advance, is required for each transcript.

Transcripts from Other Schools

A transcript covering a student's previous secondary and college education that has been submitted to the University as a requirement for admission becomes part of the official file and is not returned to the student. Any student who desires transcripts of his or her course work undertaken elsewhere must order official transcripts from the institution. The University does not issue or certify copies of transcripts from other institutions.

Veterans and Children of Totally Disabled Veterans and Personnel in the Armed Forces

Information on educational benefits and tuition reduction programs for veterans and their dependents is available from the Office of Special Services, 460 Schmitz.

Veterans and members of the armed forces who apply for admission to the University are subject to the same minimum requirements as regular students and are expected to enroll in accordance with University requirements.

The University's academic programs of study are approved by the Washington State Higher Education Coordinating Board's State Approving Agency (HECB/SAA) for enrollment of persons eligible to receive educational benefits under Title 38 and Title 10 USC.

Tuition, Fees, and Special Charges

Estimated Expenses

The cost of a student's education at the University varies, the amount depending on his or her classification, status as resident or nonresident, and field of study. In computing college costs, a student should consider such additional expenses as insurance coverage, books, and laboratory supplies. Personal expenses (e.g., clothing, laundry, recreation, and transportation), which vary with each individual, as well as between-quarter expenses, should not be overlooked.

Definitions

Lives Away from Home - All single undergraduate students without dependents (spouse or children) who are living away

from parents' home; undergraduate married students without children, whose spouses are also students.

Non-Traditional - Undergraduates who have children; married students whose spouses are not also enrolled students.

Tuition and Fees - Figures presented here are for full-time enrollment, i.e., 10-18 credits per quarter; *however, for purposes of financial aid eligibility, full-time is defined as 12 or more credits.*

Tuition is due quarterly by Friday of the third week of the quarter.

The following figures are prepared and updated each year by the Office of Student Financial Aid and reflect modest, but adequate, probable costs for students attending the University during the nine-month academic year. They should be used only as a guide in determining the year's expenses.

Room and Board - The Office of Student Financial Aid uses a figure of \$7,017 in determining students' financial need. This figure includes food, utilities, and housing. It is higher than the figure of \$6,663 charged by Housing & Food Services (for double-room occupancy and preferred dining allowance) because it includes the cost of meals not covered in the campus dining plan.

For students living on campus, room and board is paid quarterly. The first payment, approximately \$2,200, is due on September 1 for autumn quarter, except for financial aid recipients, who pay after aid is dispersed.

New Undergraduates - New Student Enrollment and Orientation Fee

As a new undergraduate, you must return the *Enrollment Confirmation Form* and the \$250 nonrefundable New Student Enrollment and Orientation Fee (NSEOF) to confirm your intention to enroll at the University of Washington.

If you have applied for financial aid and you and your family cannot afford the \$250 NSEOF, you may apply for a fee deferral. Write to the Office of Admissions; include your name, Student Number, phone number, and reason for the deferral. Send your letter, along with the *Enrollment Confirmation Form*. Any deferral will be conditional on the verification of your financial aid status.

Returning Undergraduates, Graduates and Professional Students - \$100 Enrollment Confirmation Deposit

Returning undergraduates, new graduate students, and new students in a professional program are required to confirm his or her intention to enroll by paying a nonrefundable \$100 Enrollment Confirmation Deposit (not required of students admitted summer quarter). The \$100 is applied toward tuition and fees assessed for the quarter for which the student is determined to be admissible and subsequently enrolls. A student who pays the fee for a give quarter but does not register in that quarter is not entitled to a refund except by petition in the situation listed below.

2005-2006 Student Budget Nine-Month Living Expenses					
Budget Items	Lives with Parents Undergrad.	Lives with Parents Graduate	Traditional Undergrad.	Non-Traditional Undergrad.	Non-Traditional Graduate
Books	\$ 900	\$ 1,050	\$ 900	\$ 900	\$ 1,050
Room/Board	\$ 2,613	\$ 2,613	\$ 7,164	\$ 10,338	\$ 10,338
Personal	\$ 2,265	\$ 2,265	\$ 2,265	\$ 2,265	\$ 2,265
Transportation	\$ 396	\$ 1,260	\$ 396	\$ 1,260	\$ 1,260
TOTALS	\$6,174	\$7,188	\$10,725	\$14,763	\$14,913

1. A new or returning matriculated student who is unable to obtain courses required for the completion of the degree or certificate program, or courses which are determined by an appropriate academic adviser to be acceptable alternate courses. A written verification from the appropriate academic adviser must be attached to this petition. Such requests for refund must be submitted by Friday of the second week of the quarter. A new or returning matriculated student who, after meeting with an appropriate academic adviser, determines that the program for which admission was granted differs substantially from what the student was led to expect based upon earlier available information. This petition for refund must be submitted before the student registers for courses and in no case later than the first day of the quarter for which admission has been granted. A written verification from the appropriate academic adviser must be included.
2. A new or returning student who applies by the prescribed deadline for financial aid administered by the University's Office of Student Financial Aid, and who cannot be awarded financial aid adequate to his or her needs as determined by that office, and who is therefore unable to attend the University. This petition and a copy of the Notice of Award and Acceptance must be submitted no later than two weeks after receipt of notice of the financial aid award.
3. A new or returning student who is unable to attend the University because of pregnancy, disability, or death, or because of being called involuntarily into the military service of the United States or into civil duty. Documentation is required.

Fee Payment

www.washington.edu/students/sfs/sao/ttnrates.html

An obligation to pay tuition and fees in U.S. dollars is incurred when a student registers. A fee statement is mailed to the student's address on file with the Office of the Registrar.

Payment of this obligation is due by Friday of the third week of the quarter. Nonpayment of tuition and fees by the due date results in a charge of \$120 for late payment. For balances under \$150, the late fee is \$50. There is no late fee for balances under \$50. One-half of tuition is assessed when registration is canceled for nonpayment of tuition and fees. The Summer Quarter Bulletin and *Time Schedule* should be consulted for fees and fee payment schedule applicable to summer quarter only.

When the payment is not in conformance with the tuition and fee billing, specific instructions on how the payment is to be applied must accompany the payment. In the absence of instructions, the University makes a reasoned interpretation of the student's intent and accounts for the funds accordingly. The student number must be specified on all payments.

Fees listed above do not apply to students registered through UW Extension. See the UW Extension Bulletin for their fee structure.

Special Course and Laboratory Fees

The amounts listed above cover normal University charges for course registration. Some courses, however, have extraordinary expenses associated with them, and in such cases the University may charge additional fees in amounts that approximate the added instructional or laboratory costs.

Other Fees

Auditors: There is no reduction in fees for auditors.

Admission Application Fees: Graduate, \$45(online); Medicine, Dentistry, \$35; Law, \$50. Former students returning in the same classification, \$38.

On-Leave Registration Fee: This fee of \$35, charged to graduate students only, provides for a maximum on-leave period of four successive academic quarters or any part thereof and is not refundable.

Late Registration/Reregistration Fees: A late registration service charge of \$25 is assessed when a student registers after the last scheduled day of Period II registration and through the fourteenth day of the quarter. Students registering after the fourteenth day pay a \$75 Late Registration Fee. Waiver or refund of the Late Registration Fee may be petitioned in the Registration Office. Waiver or refund of the \$75 reregistration fee may be petitioned in the Student Fiscal Services Office.

Change of Registration Service Fee: A charge of \$20 is made for any number of add, drop, or change transactions processed during a given day beginning the eighth calendar day of the quarter.

Transcript Fees: A charge of \$4, paid to the Transcript Office in advance, is required for each transcript.

Thesis and Dissertation Fees: Publication binding fee, \$25; dissertation microfilming fee, \$60*; Microfilming for either the entire dissertation, or the abstract only; \$35 Optional copyright fee (*Not available to those microfilming only the abstract.*)

* Part of the obligation of research is publication. In the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to any previous or planned publication of any or all the dissertation. Microfilming allows worldwide distribution of your work. More information about microfilming is provided in the Step 4 section of this manual.

Replacement Fees: Duplicate diploma, \$20; student identification card, \$10.

U-PASS Fee: A U-PASS validation sticker is mailed quarterly with a student's registration confirmation. The U-PASS is valid on all Metro and Community Transit routes at all times and provides parking privileges to carpoolers, riding privileges to vanpool and Night Ride passengers, and merchant discounts. The quarterly fee of \$41 (subject to change) is included on the tuition bill. Students who do not wish to participate in the U-PASS program must return the validation sticker to the University by the tuition payment deadline. The sticker can be returned by mail in the return envelope provided, mailed with the tuition payment, or returned in person to Student Fiscal Services.

All fees are subject to change without notice.

Cancellation of Tuition

Registered students must pay full tuition and fees. Tuition may be canceled or reduced if a student makes an official withdrawal or drops a course during the period specified by state statute. Refunds are given when a cancellation or reduction results in an overpayment.

Continuing Students

1. A student who withdraws on or before the seventh calendar day of the quarter does not pay tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition.
3. A student who withdraws after the thirtieth calendar day must pay full tuition.

New and Returning Students

1. A student who withdraws on or before the seventh calendar day forfeits the \$250 New Student Enrollment and Orientation fee or the \$100 Enrollment Confirmation Deposit but does not pay the regular tuition.
2. A student who withdraws after the seventh calendar day through the thirtieth calendar day of the quarter must pay one-half tuition. The \$100 Enrollment Confirmation Deposit is applied toward payment of tuition.
3. A student who withdraws after the thirtieth calendar day of the quarter must pay full tuition. The \$100 Enrollment Confirmation Deposit is applied toward payment of tuition.

Fee Forfeiture

A student who does not completely withdraw but drops one or more courses may be eligible for lower tuition, depending on the total number of credits remaining after the course drop and on the time period when the drop was made. Tuition for students making a course drop on or before the seventh calendar day of the quarter is determined by the total credits remaining. Tuition for students making a course drop after the seventh calendar day through the thirtieth calendar day of the quarter is computed on the total credits remaining plus one-half the difference between the old tuition and the new tuition. There is no cancellation or reduction in tuition for courses dropped after the thirtieth calendar day of the quarter.

Fee Refund

When a fee payment is made by check, a waiting period is required before a refund can be authorized. An application for refund may be refused, unless it is made during the quarter in which the fees apply. A student who withdraws for disciplinary reasons forfeits all rights to refund or cancellation of any portion of his or her fees.

Financial Obligations

The Comptroller is authorized to place a hold (administrative) on the records of any student who fails to pay amounts due the University.

Until this hold is cleared, the University (1) does not release the student's record or any information based upon the record, (2) does not prepare transcripts or certified statements, and (3) denies registration.

In cases of serious financial delinquency, the Comptroller, with the consent of the Associate Registrar, may order that a student's registration be canceled and that privileges of attendance be withdrawn.

An administrative hold or cancellation also may occur when a student has not complied with other University rules, procedures, or obligations. The hold may be placed on the student's record by the authorized University office responsible for enforcement of the rule, procedure, or obligation involved. The student is not permitted to register for any subsequent quarter or to obtain a transcript of his or her record or a certified statement except on the written release of the office that placed the hold.

Tuition Exemptions and Reductions

www.washington.edu/students/reg/tuition_exempt.html

Faculty/Staff, Washington State Employee, and Washington National Guard Member Tuition Exemption Programs

Eligible faculty, staff, state employees, and Washington National Guard members admitted to the University may request an exemption for a maximum of 6 credits each quarter under these tuition exemption programs. Applicable tuition will be charged for

credits that exceed the 6-credit limit. Because such students are registered on a space-available basis, they must register after other students. The quarterly *Time Schedule* lists registration dates when students enrolling under these exemption programs may register. Eligibility information may be obtained from either the Staff Training and Development Office, or the Registration Office.

"Access" Program for Older Adults

www.washington.edu/students/reg/access.html

The UW allows Washington residents who are 60 years of age or older to audit certain courses on a space-available basis. Students who attend the University under the Access Program are limited to two courses per quarter. There is a nominal registration fee. As auditors, students do not receive credit, participate in discussions, complete laboratory work, or take examinations.

Tuition Reductions

The following categories of students may be eligible for reduced tuition and fees. Students in these categories may contact the offices shown for information or to obtain an application. The reductions are established by legislative mandate and may be revoked by the legislature at any time.

UNDERGRADUATE STUDY

Office of Undergraduate Education

www.washington.edu/oue/

The University of Washington established the Office of Undergraduate Education (OUE) in 1992 in order to make undergraduate education a more visible and central part of the University's work and purpose. OUE offers opportunities and resources for students and their families, faculty members, and academic departments and programs. OUE's unique mission of ensuring excellence in undergraduate teaching and learning is critical to the University's commitment to providing students a rich academic experience.

Intercollege Programs

The following programs, described in detail in other sections of the catalog, are administered by the Office of Undergraduate Education.

General Studies

www.washington.edu/students/genecat/academic/gen_studies.html

General Studies provides students an opportunity to obtain an individually designed interdisciplinary degree through the College of Arts and Sciences. Students may also pursue a major in one of several existing interdisciplinary programs. Requirements for the Bachelor of Arts or Bachelor of Science degree are shown in the Arts and Sciences section of this catalog.

Center for Quantitative Science

depts.washington.edu/cqs/

The Center for Quantitative Science in Forestry, Fisheries, and Wildlife is an intercollege academic unit sponsored by the Office of Undergraduate Education, the College of Ocean and Fishery Sciences, and the College of Forest Resources. The Center offers courses in mathematics and statistical methods as applied to problems in biology, ecology, the environment, and renewable-resource management for undergraduate students. The faculty of the Center includes members of the College of Forest Resources and the School of Aquatic and Fishery Sciences, as well as other units. The quantitative science minor is designed to give undergraduates majoring in biology, ecology, the environment, and renewable-resource management programs a thorough grounding in relevant statistical and mathematical modeling methodology.

Program on Africa

depts.washington.edu/poa/

The Program on Africa (PoA) develops, co-ordinates, and disseminates information about inter-disciplinary, cross-college, Africa-related courses and activities at the UW. It aims to foster an interest in the African continent and its Diaspora, with the ultimate goal of involving knowledgeable, well-trained, and committed students and graduates in Africa's political, cultural, medical, technological, and economic future. PoA offers undergraduate students a minor in African Studies with courses drawn from disciplines as varied as fisheries, anthropology, social work, history, public health, art, and music.

Program on the Environment

depts.washington.edu/poeweb/

The Program on the Environment (PoE) fosters and promotes interdisciplinary environmental education at the UW by linking scholars active in environmental fields from across the University

to build a trans-disciplinary network of educators, students, and researchers. PoE offers an undergraduate degree in Environmental Studies, a minor in Environmental Studies, and three graduate certificate programs. The program provides students knowledge in four domains of inquiry: natural sciences; social sciences; law, policy, and management; and ethics, values, and culture. PoE merges these fields through rigorous coursework and hands-on learning to provide a unique opportunity for students and faculty to explore complex environmental issues from multiple perspectives.

Undergraduate Majors

www.washington.edu/students/ugrad/advising/majmenu.html

To graduate from the UW, students must complete one of the majors listed below. In many cases, the student need not make a final choice until the beginning of the junior year, although programs with considerable mathematics and science (e.g., engineering and premedicine) include lock-step requirements that must be started early on if the student expects to finish in four years.

Students can enter some majors directly (e.g., those in Ocean and Fishery Sciences, most in Forest Resources, and some in Arts and Sciences), but most students start out as premajors. As premajors, they take courses to fulfill general requirements and admission requirements for the major. Many majors require one or two years of pre-admission course work, although a few require more. Admission to many majors is competitive, which means students may not be accepted even if they complete all the prerequisite course work, depending on their grades and other factors.

The *General Catalog* shows requirements for all majors, but students should see an adviser to ask about changes, course sequences, or new options.

Satisfactory Progress

www.washington.edu/students/reg/satprog.html

Students admitted to the University to pursue baccalaureate degrees are expected to make satisfactory progress toward the attainment of the degree and are expected to enter a major and to graduate after completion of a reasonable number of credits.

By the time undergraduate students have completed 105 credits, they must either be accepted in their major or have their premajor status extended temporarily by an adviser. Extensions are normally granted only to students who are in the final phases of completing admission requirements for a major to which they have a reasonable chance of acceptance.

Students who do not either declare a major or have their premajor status extended by the time they have earned 105 credits will have a "hold" placed against registration for the following quarter.

Students must normally graduate with their first baccalaureate degree by the time they have completed 30 credits beyond the credits required for the first degree or concurrent degrees. Departmental advisers may grant extensions beyond the 30-credit limit.

Postbaccalaureate students are expected to be either preparing for admission into a degree program, seeking an additional baccalaureate degree. Students admitted as "postbaccalaureate undeclared" must declare a major by the time they have earned 30 credits beyond their last degree, and once a degree objective has been declared, must make progress toward that degree as evidenced by the courses they have completed satisfactorily. Advisers may grant extensions beyond the 30-credit limit.

The Faculty Council on Academic Standards may terminate a student's enrollment if the student demonstrates lack of academic progress as evidenced by excessive course repeats, course drops, or University withdrawals and cancellations. The student may be reinstated with the approval of the student's college and the council. EOP students may be reinstated in consultation with the Office of Minority Affairs.

Undergraduate Minors

Undergraduate students have the option of completing a minor. Minors require the completion of at least 25 credits, 15 of which must be taken in residence at the UW. There are no departmental admission requirements for minors. Students may declare an approved minor when they have earned 90 credits or more. A cumulative GPA of 2.00 is required for courses within the minor. Some departments do not offer minors. Requirements for minors established as of spring 2002 are shown in the academic programs section of this catalog. A list of currently offered minors is available at the Undergraduate Gateway Center, 171 Mary Gates Hall.

Undergraduate Degrees

The UW grants the following degrees upon satisfactory completion of appropriate programs of study in the departments, schools, and colleges:

Bachelor of Arts	B.A.
Bachelor of Arts in Business Administration	B.A.B.A.
Bachelor of Clinical Health Services	B.C.H.S.
Bachelor of Fine Arts	B.F.A.
Bachelor of Landscape Architecture	B.L.Arch.
Bachelor of Music	B.Mus.
Bachelor of Science	B.S.
Bachelor of Science in Aeronautical and Astronautical Engineering	B.S.A&A.
Bachelor of Science in Aquatic and Fishery Sciences	B.S.AFS.
Bachelor of Science in Bioengineering	B.S.Bio.E.
Bachelor of Science in Chemical Engineering	B.S.Ch.E.
Bachelor of Science in Civil Engineering	B.S.C.E.
Bachelor of Science in Computer Engineering	B.S.Comp.E.
Bachelor of Science in Construction Management	B.S.C.M.
Bachelor of Science in Electrical Engineering	B.S.E.E.
Bachelor of Science in Engineering	B.S.E.
Bachelor of Science in Forest Resources	B.S.F.
Bachelor of Science in Health Information Administration	B.S.H.I.A.
Bachelor of Science in Industrial Engineering	B.S.I.E.
Bachelor of Science in Informatics	B.S.Info.
Bachelor of Science in Materials Science and Engineering	B.S.M.S.E.
Bachelor of Science in Mechanical Engineering	B.S.M.E.
Bachelor of Science in Medical Technology	B.S.Med.Tech.
Bachelor of Science in Nursing	B.S.Nurs.
Bachelor of Science in Technical Communication	B.S.T.C.

THE GRADUATE SCHOOL: GRADUATE STUDY

www.grad.washington.edu

The University of Washington awarded its first graduate degree, a Master of Arts in classical languages, in 1885 and its first Doctor of Philosophy degree, in chemistry, in 1914. Since those beginnings, the University has conferred more than 65,000 master's degrees and 14,000 doctoral degrees, exclusive of medical, dental, and first legal doctorates.

Through its graduate programs, the University fulfills several functions vital to a healthy society: the advancement of human knowledge is facilitated through the development and conduct of scientific research; the education of scholars, teachers and a multitude of professionals in areas that cut across the academic spectrum insure that knowledge and information are communicated to the general public for the use and benefit of all. These functions ensure that some of the problems and needs confronting society are resolved.

To manage its developing graduate programs, the Graduate School was created as a temporary entity in 1899 and was permanently established in 1910. The purpose of the Graduate School is to define and support excellence in graduate education and the research and scholarly activities associated with it. Graduate study is guided by the Dean of the Graduate School and an ever-changing graduate faculty of more than 3,000 members who are selected for their interest in and concern for graduate education at the University of Washington. There are now more than 8,000 graduate students working toward master's or doctoral degrees in 100 separate University programs. A growing number of interdisciplinary graduate degree and graduate certificate programs that have been established through the efforts of interested faculty members.

Graduate School policy is enacted through an elected council of ten graduate-faculty members who are chosen from among the graduate-faculty population and who advise the Dean on matters of policy and procedure. Complementary to that input, each degree-offering unit within the University appoints a graduate program coordinator who serves as an important link between the unit and the Graduate School, advising students on questions concerning Graduate School and departmental degree requirements.

The Graduate School also has a number of responsibilities that relate to its primary ones, such as graduate program review, Graduate Opportunities and Minority Achievement Program, the administration of the Graduate School Fund and certain fellowship programs, as well as such central facilities as the University of Washington Press, and the Walker-Ames and the Jessie and John Danz distinguished visiting professorships.

As part of its commitment to excellence, the University is committed to providing opportunities for students to learn and grow through experiences rich in cultural, ethnic, and racial diversity. Within the Graduate School, the Graduate Opportunities and Minority Achievement Program (GO-MAP) works with the University to provide an innovative and inclusive graduate student community and experience. GO-MAP takes a leadership role in the recruitment and retention of ethnic and racial minority and underrepresented students, building community on and off campus, improving campus climate, and enhancing scholarship and research.

In addition, GO-MAP administers several scholarships and assistantships aimed at increasing diversity in the University's graduate programs.

Graduate Degree Programs

The Office of Academic Programs in the Graduate School contributes to the University's educational and research mission by conducting quality assessment of proposed and continuing education programs at the graduate and undergraduate level as well as research institutes and centers. Through program review, it ensures academic program quality, including all aspects of an academic unit, and promotes communication among academic units throughout the three-campus system. The principle mechanism by which this is achieved is through a process of peer review. Reviews of degree programs are conducted on a ten-year cycle, or at predetermined shorter intervals. For further information, see Graduate School Memorandum No. 7: Periodic Review of Existing Degree Programs at www.grad.washington.edu and the schedule of program reviews at www.grad.washington.edu/Acad/Academicprograms.htm, or contact the Office of Academic Programs in the Graduate School at 206-685-3519.

College of Architecture and Urban Planning

Architecture & Urban Planning	M.S.P.C.I., M.U.P.
Architecture	M.Arch., M.S.
Built Environment	Ph.D.

School of Social Work M.S.W., Ph.D.

Because the following professional doctoral degrees offered by
 the
 University are not considered to be graduate degrees, they are
 not
 administered through the Graduate School.

Dentistry D.D.S.
 School of Law J.D.
 School of Medicine M.D.
 School of Pharmacy Pharm.D.

Graduate Admissions

Additional program information is available on the World Wide
 Web at www.grad.washington.edu.

The University of Washington reaffirms its policy of equal
 opportunity regardless of race, color, creed, religion, national
 origin, sex, sexual orientation, age, marital status, disability, or
 status as a disabled veteran or Vietnam-era veteran in accor-
 dance with University policy and applicable federal and state
 statutes and regulations.

Application to the UW through the Office of Graduate Admissions
 is available for three types of students. It is important to under-
 stand the distinctions between the categories.

A **graduate student** is a person working toward a master's or
 doctoral degree or earning a school administrator's credential.
 Students must be admitted to this status in order to earn a
 degree. Information about the Application for Admission to the
 Graduate School is obtained from the program to which you wish
 to apply.

A **visiting graduate student** is a person who plans to transfer
 a limited number of graduate credits earned at the UW to another
 institution where he or she is actively pursuing a graduate
 degree. Admission is based in part on availability of resources.

Visiting graduate applicants must have been admitted to another recognized graduate school, be currently pursuing a graduate degree there, and be in good standing. A Certificate of Status signed by the home institution is required. The Application and Certificate are available online at <https://www.grad.washington.edu/application/>. Individual departments may require additional materials, such as transcripts, GRE/GMAT scores, a statement of purpose, or a list of desired course work.

Some graduate programs have chosen to offer admission to **graduate nonmatriculated students**. These students are not presently seeking a graduate degree but may apply a maximum of 12 credits earned in this category to degree requirements should they later be accepted into a graduate program. Applicants should meet minimum Graduate School admission requirements but *admission as a graduate nonmatriculated student does not imply admission to a graduate degree program*. The Application to Graduate Nonmatriculated Status must be obtained from the program to which you wish to apply. Official sealed transcripts from all collegiate institutions previously attended must be sent to the Graduate Nonmatriculated Office, Box 84808, University of Washington, Seattle, WA 98124-6108. (Refer to Graduate School Memorandum No. 37 for further information.)

Admission to the UW is necessarily a selective process. The prospective student must hold a baccalaureate degree from an accredited college or university in this country or an equivalent degree from a foreign institution. The student's record should be a strong one with an average grade of "B" or a 3.00 grade-point, or better. The primary criterion and the priority for admission of new applicants into a graduate program is the applicant's ability, as decided by the appropriate faculty, to complete the graduate program expeditiously with a high level of achievement. One aspect of meeting this criterion is the matching of interests between applicants and faculty. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

1. Priority for admission of applicants into a graduate degree program based upon the applicant's apparent ability, as determined by the University, to complete the program with a high level of achievement.
2. No practice may discriminate against an individual because of race, color, creed, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam era veteran.
3. Sustained efforts shall be made to recruit qualified applicants who are members of groups that are underrepresented in certain disciplines.
4. All applicants to a degree-offering unit shall be processed through the same set of procedures to assure that all applicants are evaluated on their individual merits.
5. Tests and criteria for admission should relate to the actual requirements of the graduate program. Reasonable accommodation for testing conditions may be made to compensate for relevant disabilities.
6. Additional factors may be used in developing a pool of qualified applicants for admission to the Graduate School. Weights given these and other factors may vary among graduate degree programs. No factor will confer admission on an academically unqualified applicant. These factors include, but are not limited to, the following:

a. Grades earned, especially for subjects in or closely related to the field of the applicant's proposed graduate work.

b. Scores on the Graduate Record Examination (GRE) Verbal, Quantitative, and Analytical Tests, on the GRE Advanced Test, on other tests related to the applicant's field, and on other aptitude tests which may be required.

c. Personal interviews of the applicant by the department admissions committee.

d. The career objectives of the applicant and the extent to which the graduate degree program may be expected to prepare the applicant for those objectives.

e. Written and oral recommendations from persons who are qualified to evaluate the applicant's academic record and promise.

f. The applicant's degree objective (i.e., master's degree, doctoral degree, or a master's followed by a doctoral degree).

g. Activities or accomplishments; educational goals; prior employment experience; living experiences, such as growing up in a disadvantaged or unusual environment; special talents.

h. Academic accomplishments in light of the applicant's life experiences and special circumstances.. These experiences and circumstances may include, but are not limited to disabilities, low family income, first generation to attend college, need to work during college, disadvantaged social or educational environment, difficult personal and family situation or circumstances, and refugee status or veteran status.

Importance given to these factors will vary among degree programs.

Most Graduate School admissions are for summer or autumn quarters. Admissions for winter and spring quarters may be severely restricted due to considerations of space.

Each academic program at the UW has a graduate program coordinator who is responsible for providing advice, guidance, and assistance to applicants as well as to students working toward graduate degrees. Prospective graduate students are urged to contact the graduate program coordinator in their program of interest for information about any aspect of graduate study, including research, curriculum, faculty, and financial support in the form of teaching and research assistantships, grants, and scholarships. Information about graduate programs is available at www.grad.washington.edu.

Admission Process

Information about the application process for both graduate and graduate nonmatriculated status must be obtained directly from the department. Visiting graduate applicants should go to <https://www.grad.washington.edu/application/> for application information. *It is very important to submit all application documents in time to meet departmental deadlines as these will supersede graduate admissions deadlines.*

Registration

After successful applicants have been offered admission, the Registration Office sends a request for a \$100 Enrollment Confirmation Deposit to indicate the intent to register. This nonrefundable deposit will apply toward the first quarter's tuition.

Once admitted, graduate students are expected to maintain registered or on-leave status until the degree is conferred. (See section on Continuous Enrollment.)

Financial Aid for Graduate Students

Students applying for fellowships, traineeships, and assistantships or associateships must make certain that complete transcripts and other credentials are on file by February 15 (earlier submission of applications and supporting documents is urged by all departments and required by some). Awards and appointments are usually made about April 1. Application forms may be obtained by writing to the graduate program coordinator of the appropriate department.

Fellowships, Traineeships, and Scholarships

A limited number of fellowships, traineeships, and scholarships is available through individual departments to outstanding students in fields of study leading to advanced degrees. Application forms may be obtained from the graduate program coordinators in the departments.

The Graduate School and the University of Washington Libraries have collaborated to provide the Grants and Funding Information Services (GFIS) for University of Washington graduate students (and faculty) who are seeking any type of general research funding for use at the University of Washington. GFIS promotes awareness of external funding information resources by providing drop-in educational consultations, maintaining a print collection for grant seekers, and offering quarterly seminars highlighting Web-based grant-seeking tools. GFIS works with students and faculty to devise a search strategy, helping to focus efforts and locate available resources. GFIS also will demonstrate searching on several online databases and how to use its print collection of funding resource books so that students can perform future searches based on changing funding needs. GFIS also maintains resources to assist in the proposal-writing process, including grant-writing handbooks and links to online resources.

To set up a consultation, email gfis@u.washington.edu, call 206-616-3084, or submit a research profile using GFIS's online form. For funding seminar schedules, check the Web at www.lib.washington.edu/gfis/events.html.

Work Study Graduate Assistantships

Graduate students who are eligible for the need-based college work-study program may qualify for work study graduate assistantships in teaching or research. Students must submit financial aid applications to the Office of Student Financial Aid by the February 28 deadline to be considered for these positions. Information is available from the Office of Student Financial Aid.

Employment Opportunities

The campus offers other job opportunities for graduate students. Students may apply directly to the chair of the department in which they hope to work or to the Student Employment Office. Students seeking part-time employment must be enrolled and on campus before they may obtain jobs.

Advisory positions in University residence halls paying room and board are available for single graduate students, both men and women. Additional information may be obtained from the Director of Residence Halls Programs, 301 Schmitz.

Spouses of students also may apply for regular full- and part-time University employment. These positions cover a wide range of occupations and offer pay comparable to the prevailing salaries in the community. Some carry such fringe benefits as vacations, sick leave, and opportunities to enroll in University courses. Inquiries may be directed to the Staff Employment Office, 1320 Northeast Campus Parkway.

Loans

Long-term educational loans are available to graduate students through the Federal Perkins Student Loan, the Federal Direct Stafford Loan, and the Federal Direct Unsubsidized Stafford Loan programs. An application form for these programs (the Free Application for Federal Student Aid, or FAFSA) is available in the office of Student Financial Aid, Box 355880, 105 Schmitz Hall, 206-685-9395, or from the U.S. Department of Education Web site at www.ed.gov/offices/OPE/express.html. The Office of Student Financial Aid may also be reached by email (osfa@u.washington.edu) or on the Web at www.washington.edu/students/osfa/. The application deadline is February 28 for the following autumn quarter.

Students should meet the application deadline even if they have not yet been admitted to the Graduate School.

The Federal Perkins Student Loan and the subsidized Federal Direct Stafford Loan are awarded to students who demonstrate financial need. Students who do not qualify for need-based assistance may qualify for Federal Direct Unsubsidized Stafford Loans. For more detailed information on these loan programs, visit the Office of Student Financial Aid Web site at www.washington.edu/students/osfa/.

Short-term emergency loan funds also are available through the Office of Student Financial Aid. Several different types of short-term loans are possible. More information is available from the Office of Student Financial Aid, Short-Term Loans, 172 Schmitz, 206-685-1282. The Graduate School also has a short-term emergency loan available. For more information, call 206-543-5900.

Graduate Opportunities and Minority Achievement Program

The Graduate Opportunities and Minority Achievement Program (GOMAP) works to develop and maintain a diverse and welcoming climate from which all students may benefit. As part of its duties, GOMAP oversees the Graduate School Fund for Excellence and Innovation (see Special Programs and Facilities) and assists University of Washington graduate programs in developing and maintaining efforts designed to increase the enrollment of students from ethnic minority groups that have been historically underrepresented in graduate programs.

Recognizing that financial aid in the form of scholarships, grants, and fellowships is important in achieving and maintaining diversity, the GOMAP administers a variety of need- and merit-based fellowships. Merit-based awards are generally made through the nomination and support of the department in which the student is enrolled. Need-based awards are based upon an evaluation of the student's need as established by the Free Application for Federal Student Aid (FAFSA) and the Office of Student Financial Aid. Students who have varied cultural experiences or educationally or economically disadvantaged backgrounds and who will therefore contribute to the intellectual and social enrichment of the University, are encouraged to apply. Students must be U.S. citizens or permanent residents to be eligible.

Financial assistance from individual departments may also be available. Students should apply directly to the chair of their department. Students are also encouraged to make use of the University's Grants and Funding Information Service located in Suzzallo Library.

Further information on fellowships administered by GOMAP may be obtained by writing to the University of Washington, Graduate School, Graduate Opportunities and Minority Achievement Program, Box 351240, Seattle WA 98195-1240, or emailing

All awards are contingent upon the student's admission to the UW Graduate School.

Graduate Degree Policies

Usually focused on a specific field of knowledge, graduate study is conducted through a variety of means, including lectures, seminars, independent advanced study, special reading courses, internships, and participation in research. Graduate programs leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees emphasize the development of the student's ability for independent scholarly work and the creation of new knowledge through research. Practice-oriented programs, which ordinarily lead to the degree of master or doctor in a particular professional field, emphasize preparation of the student for professional practice at the frontiers of existing knowledge.

Many master's and all doctoral programs culminate in the presentation of a thesis or dissertation conveying the results of the independent study and research carried out by the student. A master's thesis contributes to knowledge, reviews or critiques the state of knowledge in a field, creates a new design or composition, or represents some other appropriate kind of independent contribution. A doctoral dissertation must set forth a significant contribution to knowledge or understanding in the student's field, be presented in scholarly form, and demonstrate that the student is competent to engage independently in the pursuit of solutions to important problems. The student must defend the doctoral dissertation in a Final Examination conducted by a faculty committee and open to all other graduate-faculty members. A member of the graduate faculty from some other discipline participates as an official representative of the Graduate School, including various major evaluations such as the General Examination and Final Examination.

Graduate Program Coordinator

The graduate student's initial work at the University is guided by the graduate program coordinator in his or her field. The coordinator must be a senior tenured member of the graduate faculty and is the official representative of the academic unit that offers the graduate degree program. The graduate program coordinator maintains familiarity with policies and procedures of the Graduate School and provides overall coordination of graduate activities within the unit.

Graduate Courses

Graduate courses are intended for, and ordinarily restricted to, either students enrolled in the Graduate School or graduate nonmatriculated students, and are given numbers from 500 through 800. Some courses at the 300 and 400 levels are open both to graduates and to upper-division undergraduates. Such courses, when acceptable to the supervisory committee, may be part of the graduate program. The Graduate School accepts credit in approved 300-level courses for the minor or supporting fields only. Courses at the 300 level are not included in the calculation of grade-point average (GPA) and will not apply toward the minimum Graduate School requirement of 18 graded credits for the master's or doctoral degree. Approved 400-level courses are accepted as part of the major as well as minor or supporting fields. Courses numbered 498 and entitled Special Topics or Special Projects normally are not applicable to a graduate degree program if addressed primarily to introductory content and undergraduate students. Undergraduate research (499) is not accepted as part of the graduate program. Graduate School Memorandum No. 36 offers additional information on graduate courses. With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of any combination of courses numbered 600, 700, or 800.

Repeating Courses

Graduate students may repeat any course. Both the first and second grades will be included in the cumulative GPA. Subsequent grades will not be included, but will appear on the permanent record. The number of credits earned in the course will apply toward degree requirements only once.

Grading System for Graduate Students

In reporting grades for graduate students, units that offer graduate degrees use the system described herein. Grades are entered as numbers, the possible values beginning at 4.0 and decreasing by one-tenth increments until 1.7 is reached. Grades below 1.7 are recorded as 0.0 by the Registrar. A minimum grade of 2.7 is required in each course that is counted toward a graduate degree. A minimum GPA of 3.00 is required for graduation.

Correspondence between number grades and letter grades is as follows:

Numeric grade-point equivalent	Letter grade	Numeric grade-point equivalent	Letter grade
4.0	A	2.8	B–
3.9		2.7	
3.8	A–	2.6	
3.7		2.5	
3.6		2.4	C+
3.5		2.3	
3.4	B+	2.2	
3.3		2.1	
3.2		2.0	C
3.1		1.9	
3.0	B	1.8	
2.9		1.7	
		1.6-0.0	E

The following letter grades also may be used:

I Incomplete. An incomplete may be given only when the student has been in attendance and has done satisfactory work to within two weeks of the end of the quarter and has furnished proof satisfactory to the instructor that the work cannot be completed because of illness or other circumstances beyond the student's control.

To obtain credit for the course, a student must successfully complete the work and the instructor must submit a grade. In no case may an incomplete be converted into a passing grade after a lapse of two years or more. An incomplete received by a graduate student does not automatically convert to a grade of 0.0 but will remain a permanent part of the student's record.

N No grade. Used only for hyphenated courses and courses numbered 600 (Independent Study or Research), 601 (Internship), 700 (Master's Thesis), 750 (Internship), or 800 (Doctoral Dissertation). An *N* grade indicates that satisfactory progress is being made, but evaluation depends on completion of the research, thesis, internship, or dissertation, at which time the instructor or supervisory committee chair should change the *N* grade(s) to one reflecting the final evaluation.

S/NS Satisfactory/not satisfactory. A graduate student, with the approval of the graduate program coordinator or supervisory committee chair, may elect to be graded S/NS in any numerically graded course for which he or she is eligible. If a student does not so elect, then the student is graded on a numerical basis. If approval is granted, the student must elect the S/NS option either when registering or no later than the end of the seventh week of the quarter.

CR/NC Credit/no credit. With the approval of the faculty in the academic unit, any course may be designated for grading on the credit/no-credit basis by notice in the appropriate *Time Schedule*. For such courses, the instructor submits a grade of *CR* or *NC* to be recorded by the Registrar's Office for each student in the course at the end of the quarter. All courses numbered 600, 601, 700, 750, and 800 may be graded with a decimal grade, *CR/NC*, or *N* at the instructor's option.

W Course Withdrawal.

HW Hardship Withdrawal. Refer to the University of Washington *Time Schedule* for procedures and dates, or visit the Web at www.washington.edu/students/reg/wdoffleave.html#Q3.

Of the minimum number of credits required for a graduate degree, a graduate student must show numerical grades in at least 18 quarter hours of course work taken at the UW. These numerical grades may be earned in approved 400-level courses and 500-level courses.

The student may petition the Dean of the Graduate School to modify the procedures described above. The petition should be accompanied by comments and recommendations from the graduate program coordinator.

Scholarship

A cumulative GPA of 3.00 or above is required to receive a degree from the Graduate School. A graduate student's GPA is calculated entirely on the basis of numeric grades in 400- and 500-level courses. The grades of *S*, *NS*, *CR*, *NC*, and *N* are excluded, as are all grades in courses numbered 600, 601, 700, 750, and 800, and in courses at the 100, 200, and 300 levels.

Failure to maintain a 3.00 GPA, either cumulative or for a given quarter, constitutes low scholarship and may lead to a change-in-status action by the Graduate School. Failure to maintain satisfactory performance and progress toward a degree may also result in a change-in-status action by the Graduate School.

(See Graduate School Memorandum No. 16 for additional information.)

Withdrawal Policy

Refer to the University of Washington *Time Schedule* for procedures and dates, or look on the Web at www.washington.edu/students/reg/wdoffleave.html

Language Competency Requirements and Examinations

Competence in one or more languages in addition to English is desirable for all fields of advanced study and is often required, especially in the scholarly and research-oriented programs leading to the degrees of Master of Arts, Master of Science, and Doctor of Philosophy.

Requirements for foreign-language competence are established by the graduate faculty in the unit offering the graduate program. Language competence in certain languages other than English (i.e., languages that may have special significance to the field) may be specified as helpful or desirable or may be required. Students should consult the graduate program coordinator for information and advice about desirable or required competence in foreign languages.

When appropriate, students are urged to establish foreign-language competence as undergraduates before entering the Graduate School or as early as possible in their graduate careers. The University's language-competence requirements in French, German, and Spanish may be satisfied by successful

completion of the standardized examinations given by the Educational Assessment Office. Other foreign language examinations are also given at the UW.

It is assumed that citizens of certain English-speaking countries who are admitted to the Graduate School are competent in the English language; citizens of non-English-speaking countries must demonstrate a satisfactory command of English, both for admission and for appointment as teaching assistants.

Refer to Graduate School Memorandum No. 8, *English Language Competence for Admission to the Graduate School* (www.grad.washington.edu/Acad/gsmemos/gsmemo08.htm) for more information.

Enrollment Requirement

The enrollment requirement for the master's degree is 30 credits at the University of Washington

For the doctoral degree, the enrollment requirement is 90 credits, 60 of which must be taken at the University of Washington. With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment. Doctoral study requires an immersion in an academic field and its intellectual community. Degree-granting units may require a period of full-time or on-site study.

Only courses at the 400-, 500-, 600-, 700-, and 800-levels can be applied to enrollment or course credit in the major field for advanced degrees (please see Graduate Courses earlier in this section regarding courses numbered 498 and 499). Courses at the 300-level are not applicable to enrollment or course credit toward advanced degrees except when applied by permission of the graduate program coordinator or supervisory committee toward the graduate minor or supporting courses. Courses numbered below 300 are not applicable to enrollment or course credit for advanced degrees.

Final Quarter Registration

A student must maintain registration as a full- or part-time graduate student at the University for the quarter the master's degree, the Candidate certificate, or the doctoral degree is conferred.

A student who does not complete all degree requirements by the last day of exam week must be registered for the following quarter.

Continuous Enrollment and Official On-Leave Requirement

Policy

To maintain graduate status, a student must be enrolled on a full-time, part-time, or On-Leave basis from the time of first enrollment in the Graduate School until completion of all requirements for the graduate degree. The student must be registered when applying for the master's degree, the passing of the master's final examination, or doctoral General or Final Examinations, the filing of the thesis or dissertation, and the receiving of the degree. Summer quarter On-Leave enrollment is automatic for all graduate students who were either registered or on-leave the prior spring quarter. Failure to maintain continuous enrollment constitutes evidence that the student has resigned from the Graduate School.

A student's petition for On-Leave status must be approved by the departmental graduate program coordinator or alternate and submitted to the Registration Office no later than the fifth day of

the quarter. To be eligible for On-Leave status, the student must have registered for, and completed, at least one quarter at the UW and have been registered and completed the previous quarter, or have been officially On-Leave (except summer quarter). An On-Leave student is entitled to use the University Libraries and to sit for foreign-language competence examinations, but is not entitled to any of the other University privileges of a regularly enrolled and registered full- or part-time student. The student pays a nonrefundable fee to obtain On-Leave student status covering four successive academic quarters or any part thereof. An On-Leave student returning to the University on or before the termination of the period of the leave must file a Returning Student Reenrollment Application (available at 225 Schmitz) by the deadline stated on the form and register in the usual way as a full- or part-time student (see Graduate School Memorandum No. 9 for procedures). A student who returns before the termination of the On-Leave period and maintains registration for any part of a quarter cancels On-Leave status. Please note: Periods spent On-Leave are included as part of the maximum time periods allowed for completion of a graduate degree.

Readmission

A student previously registered in the Graduate School who has failed to maintain graduate student status but who wishes to resume studies must file an application in person or by mail for readmission to the Graduate School by the regularly published closing dates. If the student is readmitted, registration will occur during the usual registration period. If the student has attended any other institution during the period when not registered at the UW, official transcripts in duplicate of the student's work must be submitted. An application for readmission carries no preference and is treated in the same manner as an application for initial admission, including the requirement of payment of the application fee.

The Graduate School normally allows six years to complete requirements for a master's degree and ten years for a doctoral degree. Periods spent On-Leave or out of status are included.

Concurrent Degree Programs

Formal Concurrent Degree Programs

Concurrent programs are defined as a pair of programs that may be taken at the UW by a postbaccalaureate student resulting in the satisfaction of the requirements for either two graduate degrees or a graduate and a professional degree. Rather than sequentially completing first one degree and then the other, the student's time and the University's resources may sometimes be conserved by providing arrangements that permit the student to proceed in a coordinated way toward completion of the degree objectives.

These specific programs have been formally approved and students are coded with the concurrent codes.

To earn two master's degrees, a student must complete two separate sets of minimum Graduate School degree requirements of 36 credits each for a total of 72 credits. If a program requires more than 36 credits for the master's degree, a graduate student, with prior approval of both graduate programs, may apply a maximum of 12 credits beyond 36 earned in one program toward the master's degree in the second program. Thus, the minimum number of additional credits for the second degree, with these 12 approved credits, is 24. Up to 12 credits earned toward a Ph.D. degree may be counted toward a master's degree in another program with the approval of both degree-granting units.

Informal Concurrent Degree Programs

Students in these programs pursue two degrees from different departments simultaneously. These programs have not been approved as formal concurrent programs, but students complete the same requirements as in the formal concurrent programs.

Students choosing this option must complete an Informal Concurrent Degree Application, which may be obtained from the Graduate Student Services Office, 229 Gerberding.

Graduate School Memorandum No. 35: Concurrent Degree Programs contains additional information and is available from the Academic Programs office in the Graduate School or may be found through the Graduate School homepage at www.grad.washington.edu.

Master's Degree

Summary of Requirements

It is the responsibility of each master's candidate to meet the following Graduate School minimum requirements:

1. Under a thesis program, a minimum of 36 or more quarter credits (27 course credits and a minimum of 9 credits of thesis) must be earned. Under a non-thesis program, a minimum of 36 or more quarter credits of course work must be earned.
2. At least 18 of the minimum 36 quarter credits for the master's degree must be for work numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be for 700, Master's Thesis.)
3. Numerical grades must be received in at least 18 quarter credits of course work taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
4. A minimum of 30 credits must be earned at the University of Washington.
5. In a thesis degree program, a thesis, approved by the supervisory committee, must be submitted to the Graduate School. A student must register for a minimum of 9 credits of thesis (700). With the exception of summer, students are limited to a maximum of 10 credits per quarter of thesis (700).
6. A final master's examination, either oral or written, as determined by the student's supervisory committee, must be passed, if it is a departmental requirement.
7. Any additional requirements imposed by the graduate program coordinator in the student's major department or by the student's supervisory committee must be satisfied. A master's degree student usually takes some work outside the major department. The graduate program coordinator in the major department or the student's supervisory committee determines the requirements for the minor or supporting courses.
8. Students may now apply for the master's degree on the Web at www.grad.washington.edu/stsv/mastapp.htm. The online application period commences Monday, the third week of each quarter and closes Friday (midnight Pacific Time), the second week of the subsequent quarter (the quarter the student intends to graduate). For example, if competing in winter quarter, the earliest an online request can be submitted is the third week of autumn quarter and the latest is Friday of the second week of winter quarter. If degree requirements are not met in the requested quarter, students must complete another degree

request for the quarter in which they expect to complete requirements. Students will receive an email confirming receipt of their Master's Degree Request.

9. The graduate student must maintain registration as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).

10. All work for the master's degree must be completed within six years. This includes quarters spent On-Leave or out of status and applicable work transferred from other institutions (see detailed information under Transfer Credit).

11. A student must satisfy the requirements for the degree that are in force at the time the degree is to be awarded.

Second Master's Degree Requirement

A second master's degree may be earned at the UW by completing an additional separate set of requirements. Please refer to Concurrent Degree Programs earlier in this section and to Graduate School Memorandum No. 35 for more specific information.

Transfer Credit

A student working toward the master's degree may petition the Dean of the Graduate School for permission to transfer to the UW the equivalent of a maximum of 6 quarter credits of *graduate level* course work taken at another recognized graduate school. These credits may not have been used to satisfy requirements for another degree. The petition must include a written recommendation from the graduate program coordinator and an *official* transcript indicating completion of the course work. Transfer credits are not entered on the UW transcript.

Approved transfer credits are applied toward the total credit count for the master's degree only. (Transfer credits are not applicable toward a doctoral degree.) The 18 quarter credits of numerically graded course work, and the 18 quarter credits of 500-level-and-above course work may not be reduced by transfer credit.

UW students who are within 6 credits of completing their undergraduate degree and who have met the requirements for admission to the Graduate School may register the quarter immediately preceding admission to Graduate School for up to 6 credits in 500-level courses in addition to the last 6 credits they require of undergraduate work. The graduate program which has admitted the student must approve registration for the courses. The student, after admission to the Graduate School, must file a petition with the Dean of the Graduate School to transfer the 6 credits.

The student must also provide a letter from the Office of Graduations and Academic Records stating that these credits have not been applied toward his or her undergraduate degree.

Credit taken as a nonmatriculated student or postbaccalaureate student at the UW may not be transferred into a graduate program. Credit by either independent study through correspondence or advanced credit examinations is not transferable.

Thesis Program

The master's thesis should be evidence of the graduate student's ability to carry out independent investigation and to present the results in clear and systematic form. Two copies of the thesis, normally written in the English language, along with the appropriate forms signed by the members of the supervisory committee from the student's graduate program, must be submitted to the Graduate School by the last day of the quarter (last day of exam week) in which degree requirements are completed. The faculty

in the graduate program may require that the student present an additional copy for its own use. The Graduate School publishes a booklet, *Style and Policy Manual for Theses and Dissertations*, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly *before* the student begins writing the thesis. The thesis must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School for consultation during the thesis preparation process.

A \$25 binding fee is payable at 129 Schmitz before the thesis is submitted to the Graduate School.

Non-thesis Programs

The faculty in some graduate programs have arranged programs of study for the master's degree that do not require the preparation of a thesis. These non-thesis programs normally include a more comprehensive plan of course work for more extensive examinations than are required in thesis programs, or they may include some approved research activity in lieu of a thesis.

Final Examination for Master's Degree

As soon as is appropriate, the graduate faculty in the student's graduate program appoints a supervisory committee, consisting of two to four members. The chair and at least one-half of the total membership must be members of the graduate faculty (see Graduate School Memorandum No. 13). The committee chair arranges the time and place of the final examination, the results of which must be reported to the Graduate School by the last day of the quarter (last day of exam week) in which degree requirements are met. At least two graduate-faculty members of the committee, including the chair, must sign the Master's Application (warrant). If the exam is not satisfactory, the committee may recommend to the Dean of the Graduate School that the student be allowed to take another examination after a further period of study.

Application for Master's Degree

Students may now apply for the master's degree on the Web at www.grad.washington.edu/stsv/mastapp.htm. The online application period commences Monday, the third week of each quarter and closes Friday (midnight Pacific Time), the second week of the subsequent quarter (the quarter the student intends to graduate). For example, if competing in winter quarter, the earliest an online request can be submitted is the third week of autumn quarter and the latest is Friday of the second week of winter quarter. If degree requirements are not met in the requested quarter, students must complete another degree request for the quarter in which they expect to complete requirements. Students will receive an email confirming receipt of their Master's Degree Request. The filing of the application is the responsibility *solely of the student*. When the application is received, the student's record is reviewed in the Graduate School. All requirements for the degree must be met by the end of the current quarter if the application is to be approved. If this is not possible, the applicant is notified of deficiencies by the Graduate School. Once approved, the application is forwarded to the appropriate graduate program. Registration must be maintained for the entire quarter in which application for the degree is made. If a student should withdraw during the quarter, the application becomes void and a new one must be submitted at the appropriate time.

Upon completion of departmental requirements, the master's degree application is signed by the supervisory committee and returned to the Graduate School. It must be received by the last day of the quarter (last day of exam week) if the degree is to be conferred that quarter. If all requirements are completed after this deadline, registration for the following quarter is required.

The student and the graduate program coordinator should be

thoroughly acquainted with the requirements for the particular degree.

Master of Arts for Teachers

Master's degree programs for experienced teachers, which focus upon the fields of knowledge normally taught in the common school and the community college, have been established at the University. These programs provide alternatives to the research-oriented Master of Arts and Master of Science degree programs, which emphasize particular fields of knowledge. Programs leading to the M.A.T. degree are offered in Biology Teaching and English.

Doctoral Degree

The doctoral degree is by nature and tradition the highest certificate of membership in the academic community. As such, it is meant to indicate the presence of superior qualities of mind and intellectual interests and of high attainments in a chosen field. It is not conferred merely as a certificate to a prescribed course of study and research, no matter how long or how faithfully pursued. All requirements and regulations leading to the doctoral degree are devices whereby the student may demonstrate present capacities and future promise for scholarly work.

Summary of Requirements

In order to qualify for the doctoral degree, it is the responsibility of the student to meet the following Graduate School *minimum* requirements:

1. Completion of a program of study and research as planned by the graduate program coordinator in the student's major department or college and the Supervisory Committee. Half of the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the General Examination.
2. Presentation of 90 credits, 60 of which must be taken at the University of Washington.
With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may substitute for 30 credits of enrollment.
3. Numerical grades must be received in at least 18 quarter credits of course work taken at the UW prior to scheduling the General Examination. The Graduate School accepts numerical grades in approved 400-level courses accepted as part of the major, and in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
4. Creditable passage of the General Examination. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.
5. Preparation of and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. *The Candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters.* At least one quarter must come after the student passes the General Examination. With the exception of summer quarter, students are limited to a *maximum* of 10 credits per quarter of dissertation (800).
6. Creditable passage of a Final Examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The General and Final Examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the exam is taken and the degree is conferred.
7. Completion of all work for the doctoral degree within ten years. This includes quarters spent On-Leave or out of status as well as applicable work from the master's degree from the UW or a master's degree from another institution, if applied toward one year of resident study.

8. Registration maintained as a full- or part-time graduate student at the University for the quarter in which the degree is conferred (see detailed information under Final Quarter Registration).
9. A student must satisfy the requirements that are in force at the time the degree is to be awarded.

Appointment of Doctoral Supervisory Committee

A *Supervisory Committee* is appointed by the Dean of the Graduate School to guide and assist a graduate student working toward an advanced degree and is expected to evaluate the student's performance throughout the program. The supervisory committee should be appointed no later than four months prior to the General Examination. Appointment of the supervisory committee indicates that the graduate faculty in the student's field finds the student's background and achievement sufficient for admission into a program of doctoral study and research. "Preliminary" examinations, if required, should be completed prior to the request for appointment of the supervisory committee (see Graduate School Memorandum No. 13: Supervisory Committees for Graduate Students).

Admission to Candidacy for Doctoral Degree

At the end of *two years of graduate study*, the chair of the supervisory committee may present to the Dean of the Graduate School, for approval, a Request for General Examination (signed by all supervisory committee members including the Graduate School Representative) permitting the student to take the General Examination for admission to candidacy for the doctoral degree. This means that, in the opinion of the committee, the student's background of study and preparation is sufficient to justify the undertaking of the examination. A warrant is issued to the department if the Graduate School requirements have been met. The Request for General Examination must be received at least three weeks prior to the proposed examination date. Written and other examinations prior to the oral are the responsibility of the graduate program and do not need Graduate School approval. At least four members of the committee (including the chair, GSR, and one additional graduate faculty member) must be present at both the General and Final Examinations. Registration as a graduate student is required the quarter the exam is taken and candidacy is conferred.

If the student's performance is judged by the supervisory committee to be satisfactory, the signed warrant certifying successful completion of the General Examination is filed in the Graduate School. If the General Examination is unsatisfactory, the supervisory committee may recommend that the Dean of the Graduate School permit up to a maximum of two additional re-examinations, after a further period of study. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School.

Thereafter, the student is identified and designated as a *Candidate* for the appropriate doctoral degree and is awarded the Candidate's certificate. After achieving Candidate status, the student ordinarily devotes his or her time primarily to the completion of research, writing of the dissertation, and preparation for the Final Examination.

The Candidate's certificate and the doctoral degree may not be awarded in the same quarter.

Candidate's Certificate

The Candidate's certificate gives formal recognition of the successful completion of a very significant step toward the doctoral degrees awarded through the Graduate School: Doctor of Philosophy, Doctor of Education, and Doctor of Musical Arts. Students who have passed the Graduate School General Examination and who have completed all requirements for the

degree except the dissertation and the Final Examination are awarded the Candidate certificate.

Dissertation and Final Examination

The Candidate must present a dissertation demonstrating original and independent investigation and achievement. The dissertation should reflect not only mastery of research techniques but also ability to select an important problem for investigation and to deal with it competently. Normally the dissertation is written in the English language. However, if there are circumstances that warrant the dissertation be written in a foreign language, approval must be received from the Dean of the Graduate School. The Graduate School publishes a booklet, *Style and Policy Manual for Theses and Dissertations*, which outlines format requirements. This manual should be obtained from the Graduate School and read thoroughly *before* the student begins writing the dissertation. The dissertation must meet all format requirements before being accepted by the Graduate School. Thesis advisers are available in the Graduate School, and students are encouraged to consult with them throughout the dissertation preparation process.

When the supervisory committee agrees that the doctoral Candidate is prepared to take the Final Examination, the Dean of the Graduate School should be informed of the decision and asked to designate a reading committee consisting of at least three voting members of the supervisory committee.

Once the reading committee is established officially with the Graduate School, a Request for Final Examination (signed by all members of the supervisory committee including the Graduate School Representative) is presented to the Graduate School three weeks prior to the Final Examination date, and if the Candidate has met all other requirements, a warrant authorizing the Final Examination is issued by the Graduate School. At least four members of the committee (including the chair, GSR, and one additional graduate faculty member) must be present at both the General and Final Examinations.

If the Final Examination is satisfactory, the supervisory committee signs the warrant and returns it to the Graduate School by the last day of the quarter in which the degree requirements are completed. Any members of the committee who do not agree with the majority opinion are encouraged to submit a minority report to the Dean of the Graduate School. If the examination is unsatisfactory, the supervisory committee may recommend that the Dean of the Graduate School permit a second examination after a period of additional study.

After the Final Examination, the doctoral Candidate has 60 days in which to submit the dissertation to the Graduate School. Registration as a graduate student is required the quarter the dissertation is submitted and the degree is conferred.

Publication of Doctoral Dissertations

Part of the obligation of research is publication of the results, and in the case of doctoral research, this means microfilm publication of the dissertation and/or abstract. This is a Graduate School requirement in addition to any previous or planned publication of any or all of the dissertation and provides worldwide distribution of the work. The Candidate submits the publication agreement when the dissertation is presented to the Graduate School. Publication in microfilm does not preclude other forms of publication.

The following fees for microfilming the doctoral dissertation are paid at the Cashier's Office, 129 Schmitz (all fees are subject to change): microfilming the entire dissertation, \$60; *optional* copyright fee (applicable only when the entire dissertation is microfilmed), \$45; or microfilming of only the abstract, \$60. *These fees are in addition to the \$25 binding fee.*

Individual Ph.D. Program

The Graduate School maintains the Individual Ph.D. (IPh.D.) Program for exceptionally able students whose objectives for study are of an interdisciplinary nature that cannot be met within one of the University units authorized to grant the Ph.D. degree. The program is intended for dissertation topics that require supervision from two or more of the disciplines in which the University offers the Ph.D. degree. It is not intended as a mechanism for offering the Ph.D. degree within units that do not have their own authorized Ph.D. programs.

A graduate student may apply to the IPh.D. Program when he or she has completed the master's degree, or has been admitted to the Graduate School and has completed at least three quarters of full-time work at the UW, and has carefully planned an appropriate program of studies.

Proposals, including GRE scores, are due by December 15 of each year, and decisions on admission are made by May 31 of the following year. Information and application materials for the Individual Ph.D. Program are available at www.grad.washington.edu/inter/iphd.htm.

Program Descriptions

College of Architecture and Urban Planning

224 Gould

Dean

Robert Mugerauer

Associate Deans

Katrina Deines

Steven Goldblatt

The College of Architecture and Urban Planning (CAUP) comprises four departments that are directly concerned with the design and development of the physical environment: Architecture, Construction Management, Landscape Architecture, and Urban Design and Planning.

The College offers a variety of programs and degrees focusing on the environmental design disciplines within a liberal arts education. The undergraduate programs of the departments of Construction Management and Landscape Architecture lead to professional degrees that serve as the educational credentials for careers in their respective fields. The pre-professional undergraduate degree in architectural studies prepares students for professional programs as well as related roles in society. Master's degrees are also offered in the College: Master of Architecture, Master of Science in Architectural Studies, Master of Science in Construction Management (evening degree), Master of Urban Planning, and Master of Landscape Architecture. Master's students may elect to work toward the Certificate in Urban Design or the Certificate in Preservation Planning and Design. A new Ph.D. program in built environment is offered as well as an interdisciplinary Ph.D. in urban design and planning that is available through the Graduate School. All curricula encompass an appropriate level of design and technical understanding and include broader social, economic, and cultural issues fundamental to understanding, preserving, and enriching our built and natural environments.

As part of a major university and metropolis in the Pacific Northwest, the College is able to reinforce its program by using its setting as a laboratory for study. It works closely with its various professional communities to build curricula and a faculty attuned to the understanding and creation of an appropriate physical environment.

Research centers include:

- * Runstad Center for Real Estate and Community Development
- * Center for Environment, Education, and Design Studies
- * Institute for Hazard Mitigation Planning and Research
- * Urban Ecology Research Laboratory
- * Institute for Collaborative Building
- * Northwest Center for Livable Communities

Educational programs include:

- * Certificate programs
- * Urban design
- * Preservation planning and design
- * Continuing education/extension programs
- * Architecture
- * Facilities management
- * Real estate

Institute for Hazard Mitigation Planning and Research

Robert Freitag, Director

The Institute for Hazard Mitigation Planning and Research was established in 1999 as a vehicle for research, teaching, and public service that address the mitigation of natural and man-made hazards through planning and design, and through the integration of mitigation principles into a wide range of disaster and risk-management opportunities. The institute's approach is interdisciplinary, with close links to other academic research units in the University and to risk management organizations in government and industry.

The research agenda is aimed at developing practical mitigation solutions that can be incorporated into local government land-use planning,

development regulation, infrastructure, and emergency management; state and federal response to disasters; planning for business continuity; and planning for post-disaster recovery and reconstruction.

The institute is also pursuing curriculum development to incorporate mitigation principles and methods into existing and new courses in the College's degree programs.

Urban Design Certificate Program

410 Gould

Jeffrey Ochsner, Director

Neile Graham, Program Coordinator

The College of Architecture and Urban Planning administers a special graduate-level program that leads to the Certificate of Achievement in Urban Design. Since 1968, this interdisciplinary program has provided a collective framework that allows students to specialize in the study and design of the urban environment as part of their professional education.

The 14-member faculty offers backgrounds in urban design as well as in architecture, landscape architecture, and urban planning. In addition, the communities of the Puget Sound region provide a unique learning laboratory for students to experience the issues and professional activities of urban design. A core curriculum and mandatory course work in four substantive areas provide the student with a firm grounding in theory, methods, and practical skills. The program is normally seven quarters in length, concurrent with the master's program.

Students accepted for graduate work by the departments of Architecture, Landscape Architecture, or Urban Design and Planning are eligible for the program if they possess the necessary design abilities prior to enrollment in advanced studios.

International Programs

224 Gould

The departments of the College offer many opportunities for foreign study in which participants earn academic credit while studying abroad. Programs in Rome and Mexico are sponsored on a regular basis. In addition, various study and exchange opportunities exist in such locations as Germany, the Scandinavian countries, Colombia, Mexico, India, and Japan. Faculty exchanges with foreign institutions occur regularly.

University of Washington Rome Center

95 Piazza del Biscione, Rome, Italy

Katrina Deines, Director

The College maintains a permanent year-round facility in Rome. Studio and classroom spaces, a library, administrative offices, and housing accommodations for faculty are located in the Palazzo Pio on the Campo de Fiori. The Rome Center is used by UW programs in classics, Romance languages, art, art history, English, creative writing, and comparative history of ideas, as well as by the departments of the College of Architecture and Urban Planning. The Rome Center fosters interaction among students from the University and other institutions, together with practicing professionals residing in or visiting Rome. Several major universities regularly share studio critics and lecturers.

Remote Sensing Applications Laboratory

12 Gould

Frank Westerlund, Director

The Remote Sensing Applications Laboratory (RSAL) is a facility for teaching, research, and public service applications of remote sensing and geographic information technologies in environmental planning and design. Remote sensing includes aerial photography and satellite systems that

record earth-surface data in image or digital form for subsequent interpretation by visual or computer techniques and incorporation into geographic information systems. Research applications have included land-use mapping, urban form analyses, growth-management studies, development siting, natural-resource inventories, and environmental analysis. RSAL houses an extensive collection of air photo, satellite data, map, and documentary resources. In addition to optical photo interpretation equipment, the laboratory utilizes UNIX and NT workstation-based software systems such as ERDAS image processing and ArcInfo GIS.

Facilities

Computing

Mark Baratta, Director

The CAUP Office of Computing provides a wide variety of specialized computing resources and support services for the College's students, faculty, and staff. These resources include the following:

- * several networked Windows and Macintosh computing labs with a wealth of software, including CAD, GIS, multimedia, 2D/3D graphics, rendering, animation, scheduling, estimating, bid analysis, project management, modeling, design, spreadsheet, and document preparation packages;
- * slide and document scanning facilities;
- * printing and large-format color plotting;
- * digital still and video cameras and processing software;
- * Student Computing Loaner Program, which provides checkout of laptop computers, digital still and video cameras, and video/computer projectors to CAUP students;
- * consulting office for in-person support, along with support via phone and email.

Additionally, students receive UWNelID computing accounts from the University's central computing organization, Computing and Communications. The UWNelID allows attachment to the campus network (either locally or via dial-up) and access to email, disk space for file storage and Web pages, and many computing, course scheduling, bibliographic, and library resources.

Lighting Applications Laboratory

The Lighting Applications Laboratory includes a variety of facilities for use by students and faculty members in conjunction with lighting classes, design-studio courses, and research work. Equipment in the lighting workshop includes lamps and lighting fixtures, sample models and model-building materials, a mirror-box artificial sky, a direct-beam sunlight simulator, assorted light meters and data loggers, cameras, and demonstration displays.

The Department of Architecture is a co-sponsor of the Lighting Design Lab. This lab, a 10,000-square-foot, half-million-dollar facility, was designed to demonstrate the energy conservation potential of state-of-the-art architectural lighting technology. It is operated by Seattle City Light in downtown Seattle. Students can take various positions in the lab as interns. It is also available to assist in their lighting design and testing, as it does with regional architectural offices.

Photography Laboratory

A large photography laboratory is provided with studio and darkroom facilities for use by photography classes, design-studio classes, special instruction, and independent activity.

Shop

A fully staffed and equipped wood-, plastic-, and metal-working shop provides students an opportunity to design and build selected projects. The shop is used as an instructional facility in conjunction with studio, structures, and materials classes. Thesis and other individual activity also can be accommodated.

Library

The Architecture-Urban Planning Library, 334 Gould, is the primary location for materials on architecture, landscape architecture, construction management, and urban design and planning. The collection contains 42,500 volumes, 7,500 microforms, and 300 currently received serial subscriptions. Access to its collection is provided through the UW Libraries

Information Gateway, a single World Wide Web location which encompasses all the library's print and electronic resources as well as tools, services, and the ability to search the library's catalog and a wide range of Internet resources. The Gateway is available in all UW libraries and on the Web at www.lib.washington.edu.

Slide Collection

Heather Seneff, Director

The slide collection consists of approximately 100,000 images covering architectural, landscape, design and planning, and construction subject matter, supporting the curricular and research needs of the College. New materials for lectures and projects are continually added.

Student Organizations

Chapters of American Institute of Architects Students, American Society of Landscape Architects, Associated General Contractors, Planning Students Association, and the Historic Preservation Association provide opportunities for undergraduate and graduate students to meet informally and to participate in a variety of projects and events.

College Bachelor of Arts Programs

Bachelor of Arts in Architectural Studies, see Architecture.

Bachelor of Arts in Community and Environmental Planning, see below.

Community and Environmental Planning

208Q Gould

Community and Environmental Planning (CEP) is an award-winning, interdisciplinary Bachelor of Arts degree program offered through the College as one of the University's interdisciplinary undergraduate programs. CEP has gained distinction as a model for a highly personalized, active, and relevant educational experience within a large research institution. Housed in the Department of Urban Design and Planning, CEP students draw liberally upon the entire range of courses, faculty, and programs at the UW.

Undergraduate Program

Adviser
410 Gould, Box 355740
206-543-4191

The Community and Environmental Planning program offers the following programs of study:

- * The Bachelor of Arts degree with a major in community and environmental planning

Bachelor of Arts

Suggested First- and Second-Year College Courses: See adviser.

Department Admission Requirements

See adviser.

Major Requirements

Students design two-year-long individual study plans with faculty. Each builds a unique, strong degree experience with intellectual integrity, combining the quarterly CEP core seminars with a self-selected set of rigorous courses -- including 25 credits of methods -- and outside experiences.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* The problems we face in this world are simply too great to be met without active engagement from all perspectives and knowledge. To this end, a CEP education is founded on the following: start where you are; articulate and embrace a vision of how you intend to make a difference in the world; construct a plan, with guidance from faculty and peers, of CEP seminars, cross-disciplinary courses, and field experiences; move deliberately with it in the final two years of

undergraduate education; through first-hand experience and in the context of the CEP community of learners, become acquainted with effective ways for working constructively together to anticipate and address critical issues facing the complex communities and world we inhabit.

A CEP education is fully lived, not passively taken. CEP students actively make their education in community with others. Students learn from learning groups of seventeen. Each group comprises a community of mutual learning that requires commitment, personal investment, and strong teamwork strategies for two years. Through six interconnected, quarterly seminars students engage the core content of the major: community, environment, and planning. These contemporary academic fields and areas of research include the study of community as subject and practice, exploration of the ecological context of all societal life, and an investigation of the potentials of planning for developing strategies for positive change.

CEP students have gone on to careers in a variety of interdisciplinary fields such as community planning and organization, urban development, communications, work in the for-profit and nonprofit sectors, public administration, education, community and environmental activism, ecology, and government/community relations.

* *Instructional and Research Facilities:* See above.

* *Honors Options Available:* None offered.

* *Research, Internships, and Service Learning:* See above.

* *Department Scholarships:* None offered.

* *Student Organizations/Associations:* None offered.

Course Descriptions

See page 263.

Preservation and Planning Certificate

The College of Architecture and Urban Planning offers education in preservation planning and design. This reflects a conscious choice to emphasize preservation within the context of individual design professions. The curriculum offers an awareness and familiarity with issues involved in identification, designation, interpretation, and preservation of historic places, as well as restoration, adaptive reuse, and design of sympathetic new construction in historic contexts.

Program Coordinator
Box 355740
206-543-5996

Admission Requirements

Open to students accepted into a graduate program in the College of Architecture and Urban Planning. Application is made first for admission to a degree program within the college. Once accepted, a separate "Statement of Interest" form is required. Application is made within the first two weeks of classes for two-year degree programs, and by the end of the first year for three-year programs.

Certificate Requirements

12-15 credits, as follows:

- * **Track I: Requirements for Students in the M.Arch. Degree Program**
 - o *Required courses:* ARCH 500 (6), ARCH 582 (3), ARCH 590 (3); either ARCH 457 (3) or ARCH 488 (3); URBDP 587 (3); either URBDP 585 (3) or URBDP 586 (4); an advanced studio on preservation design or design in an historic context
 - o *Elective courses:* Two additional electives in areas related to preservation in architecture, planning, or related design.
 - o *Thesis:* Thesis topic with content in the area of preservation design or related issues in historic preservation. Thesis committee chaired by a member of the Preservation Planning and Design faculty.
- * **Track II: Requirements for Students in the M.L.A., M.U.P., and Ph.D. Degree Programs**
 - o *Core courses:* URBDP 585 (3), URBDP 586 (4), one graduate seminar in preservation planning, URBDP 512 (3)
 - o *Mandatory course areas:* either one graduate course in each of the following areas or a three-quarter sequence in one area: U.S. history; urban history/history of city planning; architectural history
 - o *Preservation planning and design:* 5 credits of a preservation studio or some combination of design-related courses
 - o *Optional internship (5 credits)*

- o *Thesis:* Thesis topic with content in the area of preservation planning and design or related issues in historic preservation. Thesis must be chaired by a member of the Preservation Planning and Design faculty.

Architecture

208 Gould

Architecture includes the study of design, graphics, computing, building structures, construction materials, environmental control systems, history, theory, and professional practice. It also draws from a broad range of fields including ecology, sociology, psychology, cultural studies, and law.

Undergraduate Program

Adviser
208 Gould Hall, Box 355720
206-543-3043
bainfo@u.washington.edu

Advising for the first two years of the program is done through the Undergraduate Gateway Center, 171 Mary Gates Hall.

The Department of Architecture offers the following programs of study:

- * The Bachelor of Arts degree with a major in architectural studies
- * A minor in architecture

The B.A. in architectural studies is a pre-professional degree that prepares candidates for admission with advanced standing to professional architectural programs. It is also good preparation for other roles in society, government, development, management, planning, art, graphic design, digital arts, and the like. These benefit from an understanding of and exposure to architectural design and problem solving.

Students may also choose a dual major in both Architecture and Construction Management and can receive both the B.A. with a major in Architectural Studies and the B.S. in Construction Management. Five years of study is usually the minimum necessary to complete the requirements for both degree programs.

Bachelor of Arts

Suggested First- and Second-Year College Courses: See Department Admission Requirements below.

Department Admission Requirements

1. 90 credits to include the following:
 - a. Preparatory Architectural Course Work (17 credits): ARCH 350, ARCH 351, ARCH 352 (9 credits); ARCH 210, ARCH 211 (8 credits). Note: These courses can be taken through UW Extension on a nonmatriculated basis, prior to admission to the UW, or they can be taken in the sophomore year on campus.
 - b. General Education Requirements (70 credits): English composition (5 credits); Visual, Literary, and Performing Arts (VLPA) (20 credits); Individuals and Societies (I&S) (20 credits); Natural World (NW) (20 credits, including MATH 112, MATH 124, or MATH 145); additional Areas of Knowledge (5 credits).
 - c. Electives (3 credits)
2. While the cumulative GPA is an important factor in the admission evaluation, the committee places emphasis on the evaluation of performance in the preparatory architectural course work the student has completed. It is to the student's advantage to take as many of these courses as possible before applying.
3. Application deadline: May 15 for autumn quarter only. Prerequisite courses must be completed by the time the student enters the program in autumn quarter.

Major Requirements

90 credits as follows:

1. 66 credits of pre-professional course work
2. 24 credits of approved upper-division electives
3. The final 45 credits must be completed as a matriculated student in residence at the UW.
4. Minimum 2.50 cumulative GPA for all work done in residence.

Minor

Minor Requirements: 25 credits to include a minimum of 20 credits in ARCH courses (at least 9 credits at the upper-division level) and 5 additional upper-division credits from courses in the College.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The architectural studies program emphasizes a broad liberal arts foundation followed by a focus on entry-level courses in architectural design, theory, the technology of building, and materials. Specific goals for student learning include an understanding of the organization of three-dimensional space in response to specific human needs; the sequences and history of human building activities; various architectural theories and current thought about the aesthetics of design; construction materials and their properties; building systems and their integration for human comfort; structural principles, relationships of buildings to their sites; social, political, legal, and economic influences of design and construction. Specific goals in the area of personal development include an ability to visualize three dimensions and think spatially; graphic, verbal, and written communication skills for design development and presentation; an ability to think critically and exercise self-criticism.
- * *Instructional and Research Facilities:* Departmental and College facilities include the following:
 - o Design Machine Group, a collaborative design and computing research lab and studio aimed at fostering and developing ideas that will shape the future of design and information technology.
 - o UW Rome Center, housed in the Palazzo Pio on the Campo de' Fiori of Rome, provides studio and classroom spaces for students participating in Italian studies programs.
 - o The Lighting Applications Laboratory is operated by the department for use by students and faculty in conjunction with lighting classes, design studio, courses, and research work.
 - o Photography Laboratory: A large and well-equipped laboratory for black-and-white photography operated by the department for the College provides studio and darkroom facilities for use by photography classes, design studio classes, special instruction, and independent activity.
 - o Wood and Metal Shop: Large and well-equipped wood and metal working shops are available for student and class projects.
- * *Honors Options Available:* None offered
- * *Research, Internships, and Service Learning:* Internships are available and vary according to individual interests within the program. See adviser for details.
- * *Department Scholarships:* A limited number of department scholarships are available to eligible students entering their final year of the major.
- * *Student Organizations/Associations:* AIAS (American Institute of Architectural Students)

Of Special Note:

Most states require that an individual intending to become an architect hold an accredited degree. Two types of degrees are accredited by the National Architectural Accrediting Board (NAAB): (1) the Bachelor of Architecture, which requires a minimum of five years of architectural study (this degree is not offered at the University of Washington), and (2) the Master of Architecture, which requires a minimum of three years of study following an unrelated bachelor's degree or two years following a related pre-professional bachelor's degree. These professional degrees are structured to educate those who aspire to registration and licensure to practice as architects.

The UW's four-year, pre-professional degree is not accredited by NAAB. The pre-professional degree is useful to those desiring a foundation in the field of architecture as preparation for either continued education in a professional degree program or for employment options in fields related to architecture.

Architectural education at the University of Washington requires a minimum of six years of higher education to attain the first professional degree, the Master of Architecture. The curriculum is divided into three two-year segments of course work with a pre-professional Bachelor of Arts degree (with a major in Architectural Studies) awarded at the completion of the second two-year segment. The professional degree, Master of Architecture, is awarded only upon completion of the third segment. (Students with bachelor's degrees in unrelated fields take an additional year of course work.)

Graduate Program

Graduate Program Coordinator
208 Gould, Box 355720
206-543-4180
archinfo@u.washington.edu

The Department of Architecture offers two graduate level degrees: the Master of Architecture (M.Arch.) degree, a professionally accredited architecture degree; and the Master of Science (M.S.) degree in Design Computing, an advanced research-oriented degree for those who already hold a professional or pre-professional degree in architecture or an allied design discipline (or can show evidence of equivalent preparation for work in design computing). Those interested in professional careers in architecture should apply to the Master of Architecture program.

Master of Architecture

The Master of Architecture degree is the only professional degree offered by the Department of Architecture. Completion of the requirements of this nationally accredited degree program satisfies the educational requirement for licensing (registration) as an architect. The accredited M.Arch. program accommodates two groups of undergraduate degree holders: (1) persons holding a pre-professional four-year degree, such as a Bachelor of Arts in Architecture (or equivalent), who normally will require seven or eight quarters of study; (2) persons with an undergraduate degree in an unrelated field, who normally will require ten or eleven quarters, over a period of at least three years, to complete the requirements for the degree. This three-year program may vary somewhat in duration and specific course work required, depending on selection of concentration/study areas and prior academic and professional experience.

Candidates with a pre-professional four-year degree, such as Bachelor of Arts (in architecture) or the equivalent, usually undertake six full-time quarters of study including completion of a thesis for the M.Arch. degree. This program typically requires 91 credits of course work, including 30 credits of design studio, 30 credits of approved core courses, 9 credits of thesis, and 15 credits of electives. Special interests and certificate programs often can be accommodated within the 15 credits of electives and design-studio options.

Persons holding degrees in other fields normally take three quarters of preparatory course work to develop knowledge and skills equivalent to those of students who enter the program from undergraduate architecture programs. Upon completion of preparatory course work, the students merge with students in the two-year program described above.

The department offers an advanced M.Arch. degree program for persons holding an accredited professional five-year Bachelor of Architecture degree (and those already holding an accredited Master of Architecture degree). For these candidates the program represents a specialization or in-depth study of a specific area or interest in the field. Each student's program is developed on an individual basis in consultation with faculty advisers. The approved program of study becomes the student's curriculum, which must be completed for award of the degree. Typically this program involves a minimum of 45 credits of required course work, including a thesis, and can be completed in four or five quarters. Those seeking advanced study of design computing should apply to the Master of Science (M.S.) in Architecture degree program, not the post-professional M.Arch.

Admission Requirements

- * Scholastic record and aptitude as evidenced by transcripts from baccalaureate (or higher) degree and GRE test scores, to be taken within the last five years. Primary emphasis is placed on more recent and architecturally-related coursework.
- * Minimum grade point average of 3.00 (B) or better in the last 90 graded quarter hours or last 60 semester hours.
- * A portfolio of work in visual arts and/or design. The portfolio is of primary significance for candidates from design backgrounds who desire advanced standing; however, applicants from other fields must show some graphic evidence of interest and aptitude in the design arts as well.
- * The applicant's Statement of Purpose for clarity, purpose and the extent to which the program can be expected to prepare him/her for those objectives.

The Statement of Purpose is particularly significant for those applying for the post-professional M.Arch. program. Where appropriate the candidate should include a proposed schedule of coursework and identify faculty that will be involved in the study.

- * The applicant's background and experience in architecture and related fields.
- * Written recommendations from three persons who can evaluate the applicant's past record and future promise of success in the program.

Degree Requirements

91-145 credits, as follows:

- * *For students without an architecture background a preparatory year is required (54 credits):* ARCH 303 (6), ARCH 304 (6), ARCH 305 (6), ARCH 310 (3), ARCH 311 (3), ARCH 312 (3), ARCH 320 (3), ARCH 321 (3), ARCH 322 (3), ARCH 331 (3), ARCH 332 (3), ARCH 350 (3), ARCH 351 (3), ARCH 352 (3), ARCH 360 (3)
- * *First-year requirements:* ARCH 420 (4), ARCH 432 (3), ARCH 433 (3), ARCH 500 (6), ARCH 501 (6), ARCH 502 (6), ARCH 530 (3), ARCH 570 (3), ARCH 590 (3), ARCH 591 (3), electives (6)
- * *Second-year requirements:* ARCH 503 (6), ARCH 504 (6), ARCH 595/599 (3), ARCH 700 (9), professional practicum selectives (6), graduate seminar selectives (6), electives (9)

Master of Science

The Master of Science (M.S.) in Architecture program offers an advanced and specialized graduate degree in architecture. The M.S. in Architecture is currently offered with a single area of specialization, design computing. Applicants should hold a degree in architecture or an allied design discipline. Candidates from a wide range of disciplinary backgrounds who are interested in pursuing education in research and applications of design computing that include design methods, cognition and computation, design collaborations, human/computer interface in design, visual architecture, physical computing, and related areas are encouraged to apply.

Admission Requirements

- * Scholastic record and aptitude as evidenced by transcripts from baccalaureate (or higher) degree and GRE test scores (Graduate Record Examination) taken within the last five years
- * A baccalaureate degree from an accredited United States college or university (or its equivalent in a foreign institution)
- * Minimum grade point average of 3.00 (B) or better in the last 90 graded quarter hours or last 60 semester hours
- * A portfolio of work in design in architecture or an allied discipline (or similar work appropriate to the program). The portfolio should include evidence of the applicant's preparation for the study in design computing.
- * The applicant's Statement of Purpose for clarity, purpose and the extent to which the M.S. in Design Computing program can be expected to prepare him/her for those objectives
- * The applicant's background and experience in architecture or an allied discipline (or related experience appropriate to the program), as well as preparation for advanced work in design computing, information technology, digital media or the like.
- * Written recommendations from three persons who can evaluate the applicant's past record and future promise of success in the M.S. in Design Computing program

Degree Requirements

45 credits, as follows:

- * *Core Curriculum:* ARCH 587 (3), ARCH 588 (3), ARCH 599 (3)
- * *Required Coursework:* One of the following: ARCH 402 (6), ARCH 403 (6), ARCH 503 (6), ARCH 504 (6), ARCH 505 (6); ARCH 481 (3); ARCH 484 (3); ARCH 486 (3); either ARCH 482 (3) or ARCH 483 (3)
- * *Electives:* 9 credits to be chosen from Design Computing courses, or any other relevant courses.
- * *Thesis:* 9 credits of ARCH 700

Certificate Programs

Graduate students may elect to participate in the College-wide certificate programs in urban design and preservation planning and design. (See

program descriptions in the preceding College section.) The department also offers a certificate program in lighting design. International Studies

The department offers the Architecture in Rome program at the University of Washington Rome Center, and the Design/Build Mexico program in Cuernavaca, Mexico. Other programs have included summer study of the Italian Hill Towns and in Portugal and Scandinavia, and numerous exchanges including Scandinavia, England, Germany, Hong Kong, Colombia, Japan, and Australia.

Financial Aid

Each spring quarter the department awards scholarships and assistantships for the following academic year. These are more typically available to students already enrolled in the architecture program at the time of the awarding, although some financial aid is offered to newly entering students. Other financial aid and assistantship possibilities may be found through the Graduate School Fellowship Division and the Office of Student Financial Aid in Schmitz Hall.

Course Descriptions

See page 258.

Built Environment

410 Gould Hall

The Ph.D. in the Built Environment is a new (2003) college-wide, interdisciplinary degree program housed within the College of Architecture and Urban Planning. The Ph.D. program provides students with a common core of substantial, integrated knowledge concerning the multi-faceted built environment and then offers areas of specialization in three discrete fields of knowledge and practice:

- * Sustainable Systems and Prototypes (across a range of scales, from building elements & assemblages, to buildings, site & neighborhood context, city, and region)
- * Computational Design and Research (covering the spectrum of design, planning, and construction processes, practices, and pedagogy)
- * History, Theory, and Representation studies (focusing on issues of regional-global modernity)

Graduate Program

Graduate Program Coordinator
410 Gould Hall, Box 355740
206-543-5996

Doctor of Philosophy

Admission Requirements

- * Three letters of recommendation (Please use this downloadable form.)
- * Curriculum vitae
- * An exhibit of work which best illustrates the applicant's interests and abilities in areas related to the built environment must be submitted. This can be an essay, a paper, a publication, a report, or a project for which the applicant has had major responsibility. The exhibit will not be returned and should fit in letter-size files.
- * Statement of Purpose
- * Graduate Record Exam (GRE) scores
- * Prospective international, immigrant and permanent resident students whose native language is other than English and who have not received a bachelor's or master's degree from an accredited institution where the native language is English must submit a satisfactory TOEFL score (Test of English as a Foreign Language). The minimum allowable TOEFL score is 500. Students admitted with scores below 580 will be tested for English proficiency upon arrival and will be required to complete any assigned ESL courses along with their regular academic program.

Program Requirements

90 credits minimum, as follows:

- * **Core courses (21 credits):**

- o B E 551 (3), B E 552 (3), B E 553 (3)
- o B E 550 (6 quarters at 1 credit each)
- o *Research methods and design*: choice of 6 credits from list, including both qualitative and quantitative coursework
- * **Specialization (minimum 30 credits)**: The specialization is in one of three fundamental areas (sustainable systems and prototypes; computational design and research; history, theory, and representation). Each student selects one of these areas, within which she or he takes their advanced and specialized coursework and, eventually, conduct their dissertation research project. Each student must take 30 credits in the chosen area of specialization during the first several years in the program, before undertaking the qualifying examinations. A broad selection of courses, both within the College of Architecture and Urban Planning and in other University of Washington units, is available to provide the content of the three areas of specialization.
- * **Examinations**: The qualifying examination consists of written responses to three questions, followed by an oral examination on the material. The written and oral examinations are composed, conducted, and evaluated by the student's formally appointed dissertation committee.
- * **Dissertation (30 credits)**: Dissertation involves 30 credits and concludes with a final oral defense.

Course Descriptions

See page 262.

Construction Management

116 Architecture

Construction management is a diverse discipline focused on the delivery of projects that compose the world's built environment. Included are the determination of project requirements, management of design, procurement of materials, and management of the construction of the project within cost, time, and design parameters. In terms of dollar value output, the construction industry is the largest single production activity in the U. S. economy -- accounting for almost 10 percent of the gross national product. The construction industry is heterogeneous and enormously complex. The major classifications of construction differ markedly from one another: residential, commercial, industrial, and infrastructure, as well as specialties such as electrical, mechanical, framing, excavation, and roofing. Construction Management is the study of how projects are conceived, designed and built; the types of materials and methods used; techniques for estimating the cost of construction; design and contract law; construction accounting; oral and written communications; safety requirements; project planning, and project management.

Undergraduate Program

Adviser
116 Architecture, Box 351610
206-543-6377
uwcm@u.washington.edu

The Department of Construction Management offers the following program of study:

- * The Bachelor of Science in Construction Management degree

Students complete the first two years of study as an undeclared major in the College of Arts and Sciences or a community college. During these two years, students complete program prerequisite requirements. Upon admission to the major, students take the prescribed curriculum shown below.

Bachelor of Science

Suggested First-and Second-Year Courses: M E 123; PHYS 114, PHYS 115, PHYS 117, and PHYS 118; CHEM 120; ECON 100; ENGL 131, ENGL 281; ESS 101; MATH 112, MATH 124, or MATH 145; ACCTG 215 and ACCTG 225, CM 250, COM 220, MGMT 200, QMETH 201.

Department Admission Requirements

1. Completion of a minimum of 90 credits in the following categories (courses must be completed by the beginning of autumn quarter to be eligible for admission that quarter):

- a. *Construction Science*: M E 123.
 - b. *Business and Management*: ACCTG 215 and 225; MGMT 200.
 - c. *Individuals & Societies (I & S)*: ECON 100, 200, or 201; 10 additional I & S credits from UW Areas of Knowledge list (CM 250 recommended).
 - d. *Natural World (NW)*: PHYS 114, PHYS 115, PHYS 117, and PHYS 118; MATH 112, MATH 124, or MATH 145 or Q SCI 291; ESS 101; QMETH 201; 10 additional NW credits from UW Areas of Knowledge list (CHEM 120 or ENV S recommended).
 - e. *Language Skills*: 5 credits from English composition list; 5 credits from "W" courses or English composition list (ENGL 131 and ENGL 281 recommended).
 - f. *Visual, Literary & Performing Arts (VLPA)*: COM 220; 5 additional VLPA credits (from UW Areas of Knowledge list).
2. Preference is given to applicants who have successfully completed lower-division prerequisite requirements. Admission decisions are based on an applicant's academic performance and potential, extent and quality of relevant experience, apparent attitude, and personal motivation. Completion of prerequisite requirements does not guarantee admission.
 3. *Departmental application deadline*: April 1, for the following autumn quarter. Selection for acceptance into the program, which begins autumn quarter, is made by early May, and all applicants are notified of the admission committee's decision shortly thereafter. Because each application is valid only once, a student whose application for admission is denied must reapply if consideration is desired in any subsequent year.

Major Requirements

91 credits as follows:

- * *Foundation Courses (69 credits)*: ARCH 320, ARCH 321, ARCH 322; CM 310, CM 312, CM 313, CM 321, CM 322, CM 323, CM 331, CM 332, CM 333, CM 334, CM 410, CM 411, CM 412, CM 421, CM 423, CM 432, and CM 433.
- * *Construction/Construction Science Electives (6 credits)*: Two of the following: CM 415, CM 420, CM 425 or ARCH 420
- * *Business Electives (12 credits)*: Upper division real estate or business courses offered by the College of Architecture and Urban Planning or by the School of Business. (CM 413 recommended.)
- * *Capstone Experience (4 credits)*: CM 431
- * *Additional Degree Requirement*: A minimum of 2.5 cumulative GPA in upper-division college courses.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes*: The study of construction management requires an interdisciplinary curriculum that contains a mix of technical, managerial, and business courses to provide graduates with the essential skills needed to be successful in the construction industry. Oral and written communication skills are strengthened through written requirements and oral presentations. Construction management skill sets include the ability to read and interpret construction contract documents; the ability to determine appropriate methods for project construction and the proper sequence for each associated construction task; the ability to estimate project costs and time requirements; the ability to evaluate project site safety hazards and take action to minimize the potential for accidents occurring; an understanding of the legal framework associated with contract construction; and the ability to manage the myriad activities associated with constructing a project. Graduates pursue careers with construction companies, design firms, public agencies, homebuilders, consulting firms, real estate developers, and construction material suppliers.
- * *Instructional and Research Facilities*: The Architecture-Urban Planning Library (located on the third floor of Gould Hall) houses construction management books and periodicals. Additional materials are located in the Engineering Library and the Foster Library (Business School). College resources include a 30-work-station computer laboratory on the second floor of Gould Hall. Departmental resources include a student lounge in Room 242, Gould Hall. The lounge contains four computers and space for student collaboration.
- * *Honors Options Available*: None offered.
- * *Research, Internships, and Service Learning*: An internship is required for completion of the degree program. Every student is encouraged to seek summer employment in the construction industry, to provide a taste of real-world experience and an opportunity to work for a construction firm. While the department seeks to identify opportunities for internship positions, the responsibility for securing a position rests with each student.
- * *Department Scholarships*: None offered.

* *Student Organizations/Associations:*

- o Sigma Lambda Chi is a national student honor society for recognition of outstanding students majoring in construction management. Membership is offered only to those students who are in the top twentieth percentile of their class. Each year the student chapter conducts community service activities.
- o Associated Students in Construction (ASIC) is an umbrella organization for several student chapters of national organizations: Associated General Contractors of America, National Association of Home Builders, and Mechanical Contractors of America. Activities include professional guest lectures, field trips, attendance at professional meetings and seminars, and community service.

Of Special Note:

Dual-Degree Program: The Department of Construction Management, in conjunction with the Department of Architecture, offers a five-year dual-degree program to provide students education in both the design and construction disciplines. Students must consult an adviser and apply to the Department of Architecture upon completion of their Architecture program prerequisites. To be admitted to the Construction Management program, students apply at the beginning of the spring quarter of the first year in the Architecture program. The five-year curriculum is a blending of the Architecture and Construction Management programs. Graduates of the dual-degree program receive both a Bachelor of Science in Construction Management and a Bachelor of Arts in Architectural Studies. Students interested in the dual-degree program are encouraged to consult undergraduate advisers in both departments.

Graduate Program

Master of Science in Construction Management

Admission Requirements

- * Baccalaureate degree (B.S. or B.A.) in civil engineering, construction management, building technology, architecture, or similar field from an accredited college or university in the United States, or its equivalent from a foreign institution. Students with undergraduate degrees in an area other than construction management or building technology must demonstrate an understanding of estimating, project planning and control, and project management either by transcript, validation examination, or successful completion of the following courses: CM 410 (5); CM 411 (3); CM 421 (3); CM 422 (2).
- * Minimum GPA of 3.00, based on the last 60 graded semester hours or last 90 graded quarter hours of undergraduate and graduate study.
- * Graduate Record Examination (GRE) scores
- * Statement of goals and objectives
- * Letters of recommendation
- * International applicants whose first language is not English must submit a valid Test of English as a Foreign Language (TOEFL) or Michigan Language Test (MLT) score. A minimum score of 580 (TOEFL) or 237 (TOEFLC), or 90 on the MLT, is required for admission.

Degree Requirements

45 credits, as follows:

- * *Core courses (15 credits):* CM 500 (3), CM 510 (3), CM 515 (3), CM 520 (3), CM 525 (3)
- * *Elective courses (21 or 24 credits):* 21 to 24 credits of the following: CM 505 (3), CM 545 (3), CM 550 (3), CM 555 (3), CM 565 (3), CM 570 (3), CM 593 (3), CEE 598, B E 551 (3), B E 552 (3), B E 553 (3), or other graduate-levels courses approved by adviser
- * *Thesis or project (6 or 9 credits):* Project -- CM 600 (6), or thesis -- CM 700 (9)

Course Descriptions

See page 263.

Landscape Architecture

348 Gould

Landscape architecture is a professional design discipline that addresses both the built and natural environments. It focuses on the design, analysis, and planning of outdoor spaces across a wide range of scales, with the intent of creating places that are both meaningful and functional. Landscape architects design everything from infrastructure elements, such as roadways, drainage systems, and parks, to prominent cultural monuments and gardens for public and private housing units. The education of a landscape architect includes aesthetic design skills, the development of social and environmental ethics, technical design skills, knowledge of a wide range of natural processes, an awareness of design history, and skills for working with other people. At the University of Washington, the focus is on urban ecological design education, which allows students to make a difference in the future of cities and urban regions all over the world.

Undergraduate Program

Adviser
348 Gould, Box 355734
206-543-9240, 206-685-4006

The Department of Landscape Architecture offers the following programs of study:

- * The Bachelor of Landscape Architecture (B.L.A) degree
- * A minor in landscape architecture

Bachelor of Landscape Architecture

Department Admission Requirements

1. Completion of 90 credits to include the following:
 - * Departmental Pre-professional Requirements: L ARCH 300* (usually offered autumn and summer quarters). One of the following courses (two recommended): L ARCH 352*, L ARCH 353*, L ARCH 450/L ARCH 451*. A drawing or painting course in art is also recommended. (*Transfer students: These courses are offered through UW Extension.)
 - * General Education Requirements: Skills Requirements: English Composition, 5 credits; Areas of Knowledge: Visual, Literary, & Performing Arts (20 credits); Individuals and Societies (20 credits); Natural World (20 credits to include ESS 101 and BIOL 113); W courses (10 credits, may also count toward any other requirement except the 5-credit English composition requirement).
 - * Electives to bring the total to 90 credits.
2. Undergraduate students currently enrolled at the UW may apply for admission to the department after completion of a minimum of 60 general education credits. Major status is normally granted upon completion of 90 credits and requires formal application and admission to the department.
3. Admission to the BLA program is competitive. Completion of the above requirements does not guarantee admission. Admission is based on academic record, a portfolio of creative work, three letters of recommendation, and other application materials. Contact the department for application materials and detailed information on admission, prerequisites, and required course work.
4. Application Deadline: February 15 for the following autumn quarter. Students are not admitted to the program at other times. Applications must include the BLA application forms. Students should apply during their second year with the expectation that they will have completed six quarters of General Education requirements by autumn quarter.

Major Requirements

Minimum 135 credits

- * *Studio Classes:* L ARCH 301, L ARCH 302, L ARCH 303, L ARCH 402, L ARCH 403, L ARCH 474, L ARCH 475, L ARCH 406, L ARCH 476
- * *History:* L ARCH 352 and L ARCH 353; and one course of environmental history
- * *Theory:* L ARCH 322, L ARCH 341, L ARCH 361, L ARCH 362, L ARCH 363
- * *Graphics:* L ARCH 411, L ARCH 412
- * *Professional Practice:* L ARCH 473
- * *Construction:* L ARCH 331, L ARCH 332, L ARCH 433
- * *Directed Electives* in computer, urban design and planning, ecology,

environmental legislation, environmental geology, soils, environmental horticulture, forest resources, and plant identification courses to bring the minimum total for the major to 135 credits.

Minor

Minor Requirements: Minimum 25 credits, including 6 studio credits (L ARCH 300); 6 landscape architecture history credits, chosen from L ARCH 352, L ARCH 353, L ARCH 450, L ARCH 451, L ARCH 498; 3 credits in theory and practice, chosen from L ARCH 322, L ARCH 341, L ARCH 361, L ARCH 362, L ARCH 462; 5 credits in any L ARCH or EHUF prefixed courses, including all L ARCH summer offerings and up to 6 credits of L ARCH foreign study courses; 5 credits of courses with the prefix ARCH, CM, or URBDP. Minimum GPA of 2.00 in courses counted toward minor.

Student Outcomes and Opportunities

- * **Learning Objectives and Expected Outcomes:** The B.L.A. program provides a professional, accredited degree which enables graduates to practice successfully in design firms, nonprofit organizations, and public agencies. Building from a liberal arts foundation, the B.L.A. program focuses on developing design knowledge, skills, and abilities through a series of nine environmental- and community-based design studios.

The goals of the program are to provide students with a broad academic and professional exposure to landscape architecture and design so that their creative potential and professional growth are realized, and so that they may become leaders in the field. The education includes learning to conceptualize and design through practice on studio projects, fostering creativity, developing graphic and verbal communication skills, facilitating cognitive abilities, and developing applicable computer skills in the design process. Studios use individual, team-oriented, and interdisciplinary projects to develop strong interactive and evaluative skills. Studio education applies knowledge gained in lecture courses which include historic and contemporary concepts in landscape architecture, design theory, site planning, construction, and communications, as well as elective courses in allied disciplines. The studio sequence addresses projects from detailed to regional scales, rural and urban contexts, and diverse cultures.

- * **Instructional and Research Facilities:** The five-year, 225-credit degree is structured around nine studios augmented by lecture courses. The program includes some opportunities for independent studies and work in professional settings. Departmental courses are complemented by elective courses from other departments, including architecture, urban horticulture, soils, geology, urban design and planning, botany, and ecology.

Landscape architecture studios are led by departmental faculty or members of the professional community. Several studios are taught jointly with faculty from other disciplines. Studios address specific areas of inquiry including basic design principles and processes, planting design, materials and craftsmanship, landscape planning for parks or natural areas, neighborhood and housing design, urban landscape design, ecological restoration, and design for ethnic cultures. A capstone pair of studios requires students to integrate their experience of design theory, practice, and construction in a resolved design and set of construction drawings.

- * **Honors Options Available:** None offered.
- * **Research, Internships, and Service Learning:** Departmental lecture courses address the functioning of natural systems, site planning issues, computer applications, and cultural and sociological forces that influence the profession's work. Students are encouraged to gain real-world experience through professional experience "practica" with professional firms, organizations, or agencies.

Students enter the three-year program in the department following completion of departmental prerequisites and two years of University requirements. In addition to required course work, the program encourages students to pursue personal interests through directed and independent study within and beyond the department.

- * **Department Scholarships:** None offered.
- * **Student Organizations/Associations:** None.

Graduate Program

cauplarc@u.washington.edu

Master of Landscape Architecture

The Master of Landscape Architecture program, accredited by the American Society of Landscape Architects, is a professional program that offers training in design and inquiry. The design studios form the core of this program, which is supported by rigorous independent investigation in seminars and in a thesis project. Students are expected to develop a specialty within the discipline, under the professional guidance of the faculty. The curriculum emphasizes the following:

- * **Urban Ecology.** The rapidly changing environment of the Pacific Northwest offers an excellent opportunity for courses and thesis projects to explore the connections between culture and nature and to test ideas for how social and spatial conflicts between development and conservation might be addressed. The faculty are particularly interested in the changing roles of familiar urban and suburban landscapes, as these areas are increasingly expected to function as part of an ecological infrastructure. At the same time, diverse human cultural communities have developed with differing perceptions of and values for these changing landscapes. This department offers students the opportunity to study the rich cultural resources of these human communities as they develop new relationships to their environments, and to participate in this overlap between natural and cultural processes. The department currently offers students exposure to the social, cultural, and natural environment of central Mexico as an international example of community development and design.
- * **Design Leadership.** The faculty is committed to training students to be leaders in design practice and education. This includes the education of both children and adults to understand the consequences of human transactions with the natural environment. Courses are offered and research is being conducted on designing outdoor educational environments. Graduate students are also encouraged to develop independent leadership skills which will provide them with self-confidence and adaptability in a rapidly changing professional world. The primary areas in which students are encouraged to develop leadership abilities are in the definition and practice of design as a basis for interdisciplinary work, environmental education and the application of ecological concepts to urban design, the use of communication technology to develop creative solutions to cultural and environmental conflicts, and international design-build projects in which students confront the global nature of contemporary development issues.

The graduate program considers applicants with and without previous design education, and encourages applications from persons with diverse academic and professional backgrounds. The faculty is experienced in teaching mature students and seeks to admit students with a range of ages, backgrounds, and interests. Students are encouraged to benefit from the location of the department within a broad and excellent research university by adding elective courses in other disciplines to their core curriculum. In addition, graduate students may elect to participate in College-wide certificate programs in Urban Design, and Preservation Planning and Design. See program descriptions in the preceding College section.

Program Requirements

Specific program requirements are arranged to fit each student's individual background. Seminar and field courses are selected to help students achieve their educational goals and develop a credible specialty area within landscape architecture. Students with a previous degree in landscape architecture begin course work with the Required Graduate Curriculum studios, while students from other educational backgrounds begin with the Basic Core design studios. The Required Graduate Curriculum sets the academic work required for the degree at 72 approved credits. In addition, a specialization must be developed in the area of a student's individual interests, which is worth 12 credits. This encourages students to deepen their knowledge in a particular area, while maintaining substantial flexibility for each individual.

A thesis is required of all master's students. This independent project is advised by a committee of faculty, but allows the student to develop greater intellectual maturity and satisfaction by pursuing a topic she or he has selected out of personal interest. The thesis also allows students to

demonstrate a professional level of mastery of a specialized subject area. Students complete either a written and graphic product or a purely written product for the thesis, depending on the thesis model they choose to follow. Four models are available: the professional project thesis, the design critique thesis, the research thesis, and the design thesis. Students make choices about the type of thesis and the methods they will use in conjunction with their faculty adviser and committee members.

Admission Requirements

Candidates applying to the Master of Landscape Architecture program must apply both to the Graduate Admissions Office and to the Department of Landscape Architecture by January 15 to be considered for admission the following autumn quarter.

Admission to the Graduate School requires (1) a baccalaureate degree from an accredited U.S. college or university, or its equivalent in a foreign institution; (2) a GPA of 3.00 or higher in the last 90 graded quarter hours or the last 60 graded semester hours; and (3) a Graduate Record Examination (GRE) score taken within the past three years.

Admission to the Master of Landscape Architecture program is a competitive process with priority given to applicants whose abilities, as determined by the department's admissions committee, will enable them to complete the program expeditiously and with a high level of achievement. Please contact the department for additional information.

Course Descriptions

See page 265.

Urban Design and Planning

410 Gould

Urban design and planning deals with critical issues of human settlement and urban development. It provides communities with an informed basis for coordinated public- and private-sector action. Urban design and planning constitutes a professional field of growing complexity, responding to the urban complexities of this century. The Department of Urban Design and Planning fosters an integrative approach to education and research in planning the physical environment. The academic program includes the social, behavioral, and cultural relationships between people and the form and quality of their built and natural environment; the financial, administrative, political, and participatory dimensions of planning, design, and development; and the informational base for making deliberate decisions to shape urban areas and regions, bringing analysis together with vision.

Departmental faculty are active participants in interdisciplinary research units of the College of Architecture and Urban Planning, including the Center for Community Development and Real Estate and the Institute for Hazard Mitigation Planning and Research. Faculty also participate in the Puget Sound Regional Synthesis Model (PRISM) University Initiative Fund program. The department also administers the Remote Sensing Applications Laboratory, concerned with applications in urban planning of remote sensing and geographic information systems (GIS) technology and the Urban Ecology Research Laboratory. In addition, the College has a wide array of facilities for computer-based instruction related to design, including CAD, GIS, and visualization technology, and runs a joint program in advanced computer technology and virtual reality with the Human Interface Technology Laboratory of the Washington Technology Center.

Undergraduate Program

Urban Design and Planning offers the following programs of study:

* A minor in urban design and planning

Minor

Minor Requirements: 30 credits to include URBDP 300 (5 credits); 3 credits chosen from URBDP 460, URBDP 461, or URBDP 471; minimum 10 additional credits in URBDP-prefix courses; and 12 additional credits in planning-related courses with Urban Design and Planning adviser approval. A 2.0 minimum grade is required for each course counted toward the minor. See departmental adviser for recommended courses.

Graduate Program

Graduate Program Coordinator
410 Gould, Box 355740
206-543-4190

The department offers the Master of Urban Planning (M.U.P.) degree and its faculty participate in the interdisciplinary Doctor of Philosophy (Ph.D.) in Urban Design and Planning. The M.U.P. is the professional degree, while the Ph.D. is primarily for students planning to enter research and teaching positions in urban planning and design.

The graduate program focuses on planning the physical environment and its socioeconomic and political determinants. Advanced students are encouraged to conduct research and studies in one of the following specializations:

- * urban design dealing with physical form, character, and quality issues
- * community development and real estate including public/private development processes
- * preservation planning and design
- * land-use planning, including its environmental, socioeconomic, legal, information systems, and administrative aspects.

Graduate students may elect to participate in the College-wide Certificate Programs in Urban Design, and Preservation Planning and Design. See program descriptions in the preceding College section.

Master of Urban Planning

The Master of Urban Planning degree is the usual educational qualification for professional practice of city and regional planning, including generalist planning, research, urban design, and administrative positions in a wide variety of public agencies and private consulting firms. It is a two-year, or six-quarter, program requiring a minimum of 72 credits.

Requirements for graduate-level study include a satisfactory academic record and undergraduate training in one of a variety of disciplines, including urban planning and environmental design or in other appropriate fields, such as geography, economics, or other social sciences; English and other humanities; civil engineering and environmental studies; or architecture and landscape architecture. Students planning to enter the program should have completed at least one college-level course in each of the following areas: economics, mathematics, statistics, American government, environmental systems, and cultural diversity. Students without sufficient background must take these prerequisite courses concurrently with their graduate studies.

The primary objective is to educate professional planners with a broad range of competence in planning and design; a second objective is to provide opportunities for individual studies in selected professional areas. Core course requirements include 32 credits covering the history and theory of planning and urban design, urban form, communication methods, quantitative methods, processes and methods of land use planning, planning law, research methods, and a planning studio. Also required are 17 credits of restricted electives, including a course in advanced methods and a second studio; both may be in an area of specialization. In addition, a course in land-use planning, in urban development economics, and in history/theory of planning is required. A 9-credit thesis or professional project is required upon completion of all other degree course work. Of the 72 minimum credits required for the degree, 14 credits may be in open electives.

The core provides a foundation in urban design and planning for all students. An internship is encouraged for those without previous professional experience. A specialization in one area of planning is required. Six major specialized areas offered in the department include land-use planning and growth management, community development and real estate, urban design, preservation planning, environmental planning, and transportation planning.

Students are admitted to the M.U.P. program primarily in autumn quarter and all application material should be received by the department no later than the preceding February 1 (November 1 for international applicants). Graduate Record Examination general test scores, three letters of recommendation, transcripts of previous degree programs and any additional academic study, and a statement of purpose are required. TOEFL is required for international applicants.

Doctor of Philosophy

Some of the departmental faculty are part of an interdisciplinary faculty group which offers doctoral study in urban design and planning. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of the catalog.

Course Descriptions

See page 267.

College of Arts and Sciences

Dean

David C. Hodge
50 Communications

Divisional Deans

Gary D. Christian -- Natural Sciences
Michael R. Halleran -- Arts and Humanities
Susan Jeffords -- Social Sciences
Julie K. Stein -- Computing, Facilities, and Research

The departments and schools of the College of Arts and Sciences offer nearly 100 curricula leading to the degrees of Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science, as well as graduate study leading to master's and doctoral degrees.

Undergraduate Study

Graduation Requirements

A liberal arts education entails mastery of certain basic skills, exposure to a broad range of academic disciplines, and concentration in a particular field of knowledge. To be awarded a baccalaureate degree a student in the College must fulfill requirements in the following areas: Language Skills, Reasoning and Writing in Context, Areas of Knowledge, and a Major (see table below). All required courses must be taken for a numerical grade. In addition, the student must present at least 90 credits outside the major department and must meet minimum GPA requirements as specified below. Detailed information on graduation requirements is provided in the Bachelor's Degree Planbook, available from the Undergraduate Advising Center, 171 Mary Gates Hall.

Requirement*	Credits	
Language Skills	5-20	* English composition (5 credits) * Foreign language (0-15 credits, depending on placement)
Reasoning and Writing in Context	15	* Quantitative and Symbolic Reasoning (5 credits) * Additional writing courses (10 credits)
Areas of Knowledge	75	General-education courses to include at least 20 credits in each of the following areas: * Visual, Literary, and Performing Arts (VLPA) * Individuals and Societies (I&S) * Natural World (NW)
Major	50-90	An area of specialization, usually in a single department
Minor (optional)	25-35	An additional area of specialization
Electives	varies	Free choice; as many credits as necessary to bring total to 180

*Requirements of colleges other than Arts and Sciences are based on these, but may differ. Students who have not chosen a major are advised to follow the College of Arts and Sciences requirements.

Language Skills

To receive a degree from the College of Arts and Sciences, students whose first enrollment in college (whether at the UW or elsewhere) was in autumn quarter 1985 or later are required to complete 5 credits of English composition with a minimum grade of 2.0. They must also complete course work through the end of the first-year college sequence in a foreign language, with at least a 2.0 in the third-quarter course, or demonstrate equivalent proficiency by passing an examination or by receiving a passing grade in a qualifying course beyond the first-year level. Credits used for these two requirements (including the entire first year of foreign language, if taken) cannot also be applied to the Areas of Knowledge requirements described below.

Reasoning and Writing in Context

Students who first entered college autumn quarter 1985 or later must complete a minimum of 5 credits in Quantitative or Symbolic Reasoning (Q/SR) and 10 credits of additional composition courses or courses that emphasize the development of writing skills in the context of an academic discipline (W courses). Q/SR and writing courses, if they apply, can also be counted toward Areas of Knowledge or major requirements. The writing requirement is in addition to the English composition requirement mentioned in the preceding paragraph.

Areas of Knowledge

The Areas of Knowledge requirement is the means by which the student develops a breadth of knowledge. Undergraduate courses are currently divided broadly into three categories: Visual, Literary, & Performing Arts; Individuals & Societies; and the Natural World. Each student must select at least 20 credits in courses from each of the three fields and an additional 15 credits from any courses in the three fields. Of the 75 total credits required, 15 may be from courses in the student's major department.

Course Designators

The following symbols, included in course descriptions in this catalog, indicate which, if any, of the above requirements are fulfilled by certain courses:

- * VLPA -- Visual, Literary, and Performing Arts (Area of Knowledge requirement)
- * I&S -- Individuals and Societies (Area of Knowledge requirement)
 - * NW -- The Natural World (Area of Knowledge requirement)
 - * QSR -- Quantitative and Symbolic Reasoning

Courses that meet the foreign-language requirement and the additional-writing requirement are not marked. The third-quarter (or second-semester) course in any language meets the language requirement, so long as the entire first-year sequence totals at least 12 credits (regardless of whether the student earned credit for the earlier parts of the sequence). Consult the quarterly Time Schedule for writing-intensive courses that meet the additional-writing requirement.

Major

In fulfilling the requirements for a major, the student engages in thorough study of a discipline or subject, aimed at developing knowledge in depth. This part of the student's program is determined by the department, school, or faculty committee with which the major study is pursued. Measured in academic credits, the "major" required of each student consists of 50 or more prescribed credits in a department of the College or a closely related group of departments. Descriptions of major programs are printed below.

Minor

Completion of a minor, available through many departments, is optional. Requirements are shown under individual department undergraduate programs, below, or in a minors handout available in the Undergraduate Advising Center, 171 Mary Gates Hall. Minors granted by the College of Arts and Sciences are not necessarily or even usually the same as the minors approved by the College of Education for teaching at the secondary level.

Credits Required Outside Major Department

So that the student will not overspecialize, the College limits to 90 the number of credits from a single department that the student may elect to count in the 180 credits required for the baccalaureate degree. A department itself can require no more than 70 credits from courses within the department, and no more than 90 credits from within the department and related fields combined, as constituting its major program for the baccalaureate degree. Exceptions to these restrictions may be granted by the Dean.

GPA Required for Graduation

To be eligible to receive the baccalaureate degree, the student must achieve at least a 2.00 cumulative GPA in the major (some departments prescribe a higher minimum GPA for the major), as well as a 2.00 cumulative GPA for all work done in residence at the University.

Applying for Graduation

Students should apply for the baccalaureate degree no later than the first quarter of their final year. Seniors who apply by announced quarterly deadlines will receive Graduating Senior Registration Priority (GSP), allowing them to register first for the following quarter. GSP status is limited to two quarters.

All students may graduate under the College requirements published in this catalog. Students may use the department requirements in effect at the time they are admitted to the major, if they graduate within 10 years of that time. Otherwise, the department may insist on more recent major requirements. Students wishing to fulfill a previous set of requirements should see an adviser for details and options. All responsibility for fulfilling graduation requirements rests with the student concerned.

Limits on Physical Education and ROTC Courses Allowed Toward Graduation

A student graduating from the College of Arts and Sciences may count a maximum of three credits of 100-level physical-education activity courses taken at the University of Washington, or their equivalents at other collegiate institutions, as elective credits toward graduation. At present, physical-education courses are not offered at the University. Up to 18 credits in upper-division ROTC courses also may be counted as elective credits toward graduation, but no lower-division ROTC credits may be counted.

Graduate Study

Students who intend to work toward advanced degrees must apply for admission to the Graduate School and must meet the general requirements outlined in the graduate and professional volume of the General Catalog, as well as the requirements established by the graduate faculty in the department or unit offering the degree program. Graduate students must satisfy the requirements for an advanced degree that are in force at the time the degree is to be awarded.

American Ethnic Studies

B510 Padelford

American Ethnic Studies exposes students to key content, methodologies, and theories in the comparative and interdisciplinary study of African Americans, Asian/Pacific Americans, and Chicanos in the United States.

Undergraduate Program

Adviser
B509 Padelford, Box 354380
206-543-5403

The Department of American Ethnic Studies offers the following undergraduate program:

- * The Bachelor of Arts degree with a major in American ethnic studies
- * A minor in diversity

Bachelor of Arts

Suggested First- and Second-Year College Courses: United States history, literature, drama, arts, sociology, political science, ethnic studies.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

60 credits as follows:

1. *Core courses (35 credits):*
 - * 15 credits of AES 150, AES 151, AES 212
 - * 10 credits (two courses) from AFRAM 101, AIS 201 or AIS 203, AAS 101, CHSTU 101, to include one in the concentration and one outside the concentration; (for Comparative American Ethnic Studies concentration, choose any two)
 - * 10 credits (5 credits each) of AES 495 and AES 496
2. *Concentration:* 25 credits in one of the following: African American Studies, Asian/Pacific American Studies, Chicano Studies, Comparative American Ethnic Studies. See department for list of concentration courses.

Minor

Diversity minor requirements: 25 credits to include the following:

- * One foundation course (5 credits) chosen from the following: AES 151, ANTH 330, HSTAA 105, LSJ/CHID 332, PSYCH 250, WOMEN 200
- * A minimum of four additional courses, with at least one each from four of the five following categories (20 credits): arts/cultural; historical; global; contemporary/institutional; applications. A list of courses by category is available at <http://depts.washington.edu/divminor/>.
- * Minimum 15 credits must be completed in residence at the UW. Maximum 10 credits from one department and maximum 10 credits from the student's major department may be applied toward the minor.

Diversity minor students are strongly encouraged to complete an internship, volunteer project, research project, study abroad program, intergroup dialogue course, or some applied learning opportunity that promotes the goals of the minor.

Contact information for the minor is as follows: Address: B505 Padelford, Box 354380; Phone: 206-616-5789; Email: divminor@u.washington.edu. Program director is Professor Rick Bonus at rbonus@u.washington.edu.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The American Ethnic Studies curriculum prepares undergraduate students to understand the breadth, key content, methodologies, and theories in the field of ethnic students as well as comparative interdisciplinary knowledge of African American, Asian/Pacific American, and Chicano issues. The major is designed to help students acquire the skills to think and write critically about race, class, and ethnicity in social and historical contexts and multiple categories of social diversity.
- * *Instructional and Research Facilities:* Writing Center
- * *Honors Options Available:* None
- * *Research, Internships, and Service Learning:* Students have the opportunity to become actively engaged in personalized research and discovery through independent study and research courses in each program concentration.
- * *Department Scholarships:* None
- * *Student Organizations/Associations:* Ethnic Studies Student Association

Course Descriptions

See page 271.

American Indian Studies

C514 Padelford

American Indian studies surveys Indian cultural developments in art, music, history, medicine, media and film, language, and literature and offers performance and studio experience.

Undergraduate Program

Adviser
C514 Padelford, Box 354305
206-543-9082

The American Indian Studies Center offers the following undergraduate programs:

- * Bachelor of Arts through the General Studies program
- * A minor in American Indian studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: AIS 201, AIS 202, AIS 203

Department Admission Requirements

See General Studies adviser for details.

Major Requirements

A major emphasizing American Indian Studies is available through the General Studies program. All AIS courses may count toward that major. No more than 6 credits of any combination of AIS 253 and AIS 350 may be counted toward the major.

Minor

Minor Requirements: Minimum 30 credits to include:

- * 10 credits of introductory coursework in American Indian studies, chosen from AIS 102, AIS 201, AIS 202, AIS 203. Other courses may be allowed with the approval of the American Indian Studies program chair.
- * 20 credits of AIS electives, chosen from AIS courses or from a select list of courses in other departments (see program adviser or program website for complete list).

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* American Indian studies graduates possess a broad knowledge of historical and contemporary American Indian cultures, have the ability to develop both written and oral arguments, possess knowledge of American Indian philosophy and world view, and possess an understanding of Native Nation sovereign status and treaty status.
- * *Instructional and Research Facilities:* None
- * *Honors Options Available:* None offered
- * *Research, Internships, and Service Learning:* None offered
- * *Department Scholarships:* None offered
- * *Student Organizations/Associations:*
 - o American Indians in Science and Engineering Society (AISES), UW Chapter Office: Ethnic Cultural Center and 207 Loew Hall (MSEP), 206-543-5536 or 685-8688
 - o First Nations at the UW, Office: Ethnic Cultural Center, American Indian Room, 206-543-4635, ext. 12
 - o Medicine Wheel Society, Office: Ethnic Cultural Center and School of Medicine

Course Descriptions

See page 274.

Anthropology

M32 Denny

Anthropology is the study of human beings in all their cultural diversity. It includes the study of human evolution, the archaeological record, language and culture, the relationship between humans and their environment, and cultural modes of being as these differ in time and space. In studying anthropology, students can better understand how to find ways to live together in today's world, respecting cultural diversity while building upon common human values.

The study of anthropology at the University of Washington is comprised of three sub-disciplines:

- * Archaeology is the study of the human past through investigation of material remains (artifacts, food remains, features, structures, etc.) and their relationships in space and time.
- * Biocultural anthropology focuses on understanding human variation through the study of the ecological, demographic, genetic, developmental, and epidemiological dimensions of modern human adaptation and its evolutionary basis.
- * Sociocultural anthropology is the study of human societies from the perspective of culture as a comparative frame.

Undergraduate Program

Adviser

243 Denny, Box 353100

206-543-7772 The Department of Anthropology offers the following undergraduate programs:

- * The Bachelor of Arts degree with a major in anthropology
- * A minor in anthropology

Bachelor of Arts

Suggested First- and Second-Year College Courses: Any two of the following: ANTH 202, ANTH 203, ANTH 204, ANTH 206, ANTH 207, ANTH 208, ANTH 209, ANTH 210, or ANTH 228; ARCHY 205; BIO A 201; at least one from STAT 220, STAT 311, or Q SCI 381.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

55 credits as follows:

1. Core courses (20 credits): ARCHY 205, BIO A 201; any 200-level ANTH course; and one of the following: SOC 220, STAT 220, STAT 311, Q SCI 381
2. 35 additional ANTH, ARCHY, and BIO A credits distributed across the subfields or concentrated as suits the interests of the student. 20 of these credits must be in upper-division (300- or 400-level) courses. Students may count one 100-level ANTH, ARCHY, or BIO A course toward the major, but are not required to do so.
 - * The following AIS courses may apply toward this requirement: AIS 201, AIS 202, AIS 203, AIS 240, AIS 311, AIS 312, AIS 316, AIS 317, AIS 330, AIS 335, AIS 340, AIS 443.
 - * Maximum 12 credits from ANTH 499, ARCHY 499, and BIO A 499 combined can be counted toward the major.
3. Additional major requirements:
 - * Courses with a grade of 1.9 or lower do not count toward the major.
 - * At least 25 credits in the major must be completed with a minimum grade of 3.0.
 - * Transfer students must complete a minimum of 15 upper-division credits in anthropology at the UW.

Minor

Minor Requirements: 30 credits (at least 15 credits at upper-division level) from courses with the following prefixes: ANTH, ARCHY, BIO A. ANTH 100 may be applied to the minor but is not required. (Certain AIS courses may apply toward this requirement. See departmental adviser for list.) Minimum grade of 2.0 required in each course.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The study of anthropology develops skills in critical thinking, research, and writing, as well as technical skills specific to the different subfields (ethnographic field techniques, interpretation of data, statistical analysis, archaeological methods of data collection and interpretation). An undergraduate degree prepares students for many positions that involve working with people, as well as for academic studies in a variety of fields. Careers in anthropology can be developed through employment with government agencies, museums, teaching and research, private consulting firms, and nongovernmental organizations.
- * *Instructional and Research Facilities:* Undergraduate students have access to the following facilities for classroom training in laboratory methods and for research experiences subject to faculty approval and supervision: the Burke Museum (ethnological, archaeological, natural history, and archival collection), Quaternary Research Center, Biodemography Lab, Luminescence Dating Laboratory, Electron Microscope Laboratory Cooperative, Geoarchaeology Lab, Digital Imaging and Microscopy Lab, Geographical Information System (GIS) Computer Lab. In addition, the department co-sponsors with the Department of Geography a writing center offering undergraduate writing support for anthropology classes.
- * *Honors Options Available:* With College Honors. With Departmental Distinction. See adviser for details.

* *Research, Internships, and Service Learning:* The Department of Anthropology supports students who undertake community-based internships under faculty supervision.

* *Department Scholarships:*

- o The Brett E Baldwin Scholarship, for approximately \$800, is awarded to an outstanding graduate or undergraduate majoring in anthropology.
- o The Wienker Prize for Best Undergraduate Essay. Four awards are given each year, one in each subdiscipline for the best essay in an undergraduate anthropology class, and one for the best senior honors thesis.

* *Student Organizations/Associations:* The Anthropology Club is run by and for students in the department.

Of Special Note:

ANTH 100, BIO A 100, and ARCHY 105 count as Areas of Knowledge and not as part of the anthropology major.

Graduate Program

Graduate Program Coordinator
M31 Denny Hall, Box 353100
206-685-1562

The department recognizes four principal subfields of anthropology within its faculty, programs, and curriculum: archaeology, biocultural anthropology, environmental anthropology, and sociocultural anthropology (including anthropological linguistics). The department offers four distinct Ph.D. programs within the subdisciplines. A Ph.D. program in sociocultural anthropology with emphasis in ethnomusicology is offered in cooperation with the School of Music. The M.A. degree may be earned within the Ph.D. programs. Graduate students are admitted to, and specialize in, their chosen subfields from the beginning of their graduate studies.

Admission Requirements

Applicants are admitted to begin study only during autumn quarter and are advised to have their application materials completed by the beginning of the prior January. A complete application file includes the Graduate School Application, official transcripts, the Supplementary Information Form, three recommendations, a statement of purpose, and scores from the Graduate Record Examination (GRE). International students are required to take the TOEFL exam as well as the GRE.

Program Requirements

For each of the respective graduate programs, completion of the core requirements and a reading knowledge of one foreign language are required. Under the guidance of a supervisory committee selected from the appropriate subfield, the student shapes an individual program. The major areas emphasized in the faculty and curriculum are the United States, Mexico, Africa, South Asia, Southeast Asia, China, Oceania, and the post-Soviet states. The M.A. degree usually requires two years of graduate study; the Ph.D. programs usually require at least three years beyond the master's level, including a year of independent field research and a year to organize field materials and write a doctoral dissertation.

Financial Aid

Two to four three-year fellowships are awarded to outstanding entering students. A limited number of teaching and research assistantships and hourly positions are offered primarily to advanced students. Some students may be qualified for a few Foreign Language Area Studies Fellowships. Work-study positions may also be available for eligible graduate students.

Course Descriptions

See page 275.

Applied and Computational Mathematical Sciences

C36 Padelford

Mathematics is the common language of modern science, engineering, and business. Techniques of mathematical modeling and data analysis are key instruments in the tool kit of modern practitioners and researchers in a wide array of disciplines. ACMS is an interdisciplinary program in the mathematical sciences that provides a sound training in mathematical modeling, scientific computation, mathematical reasoning, and statistical analysis. The program is jointly administered by the Departments of Applied Mathematics, Computer Science and Engineering, Mathematics, and Statistics, offering students access to their combined resources. An ACMS major is an excellent stepping stone to a career in engineering and the physical, life, and management sciences.

Undergraduate Program

Adviser
C36 Padelford, Box 354350
206-543-6830
advising@math.washington.edu

The ACMS program offers a Bachelor of Science degree that builds on the strengths of the four mathematical sciences departments as well the many quantitatively oriented departments across campus. All students complete a core set of courses developing basic skills in modeling, computation, mathematics, and statistics. Students choose one of the eight option areas listed below for further training and specialization.

- * *Biological and Life Sciences* focuses on basic techniques of mathematical modeling and computing that are employed in the life sciences.
- * *Discrete Mathematics and Algorithms* gives students a broad background in mathematics and computation with special emphasis on discrete mathematics and its application to optimization and algorithm design.
- * *Engineering and Physical Sciences:* This option is an excellent choice for students with an interest in the physical world and classical areas of applied mathematics.
- * *Mathematical Economics:* Students in this option obtain a firm foundation in applied and computational mathematics as well as a basic grounding in economic theory.
- * *Operations Research* provides a firm foundation in the mathematical tools of operations research, particularly optimization and stochastic modeling.
- * *Scientific Computing and Numerical Algorithms* focuses on the design, mathematical analysis, and efficient implementation of numerical algorithms for such problems.
- * *Social and Behavioral Sciences* provides a foundation in commonly used statistical and computational techniques followed by flexibility in pursuing different sets of advanced courses.
- * *Statistics:* This option is designed to introduce students to theory, methodology, and applications of statistics.

Bachelor of Science

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, PHYS 121, PHYS 122, PHYS 123, CSE 142, CSE 143

Department Admission Requirements

Admission is competitive. A GPA of at least 2.50 in the following courses, with a minimum grade of 2.0 in each course: CSE 142, 143; MATH 124, MATH 125, MATH 126; MATH 307 or AMATH 351; MATH 308 or MATH 318; PHYS 121, PHYS 122, PHYS 123. MATH 134, MATH 135, MATH 136 may be substituted for MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308. Certain options allow the substitution of other courses in place of the PHYS requirements. See adviser for details.

Major Requirements

90 credits as follows:

1. A minimum GPA of 2.50 for all courses counted toward the major; minimum grade of 2.0 in each course taken toward the major.
2. Core: 58 credits to include MATH 124, MATH 125, MATH 126; MATH 308 or MATH 318; MATH 307 or MATH 351; MATH/STAT 390; CSE 142, CSE

- 143; AMATH 352; AMATH/MATH 381, AMATH 383; PHYS 121, PHYS 122, PHYS 123. Certain options allow the substitution of other courses in place of the PHYS requirements. See an adviser for details.
3. Completion of one of the following options:
- Biological and Life Sciences Option.** 32 credits to include option core (12 credits): MATH 324, AMATH 353, AMATH 422, AMATH 423; and option electives (20 credits): outside area (12 credits or double major/double degree; see adviser for options) and 8 credits of approved courses at the 300 level or above, chosen from the four participating departments.
 - Discrete Mathematics and Algorithms Option.** 32 credits to include option core and electives. Option core: 18 credits for non-Computer Science and Engineering majors-MATH 310, MATH/STAT 394, CSE 373, CSE 410, CSE 417 and one of CSE 413, CSE 415; 9 credits for Computer Science/Computer Science and Engineering double major/double degree-MATH/STAT 394, CSE 421, CSE 431. Option electives: 14 credits for non-Computer Science and Engineering majors, 23 credits for Computer Science/Computer Science and Engineering double majors, to include 9 credits from MATH 407, MATH 408, MATH 409, MATH 461, MATH 462, and remaining credits from approved courses at the 300 level or above from the four participating departments.
 - Engineering and Physical Sciences Option.** 32 credits to include option core (15 credits): MATH 324, AMATH 401, AMATH 402, AMATH 403; and option electives (17 credits): outside area (11 credits or double major/double degree; see adviser for options) and 6 credits of approved courses at the 300 level or above, chosen from the four participating departments.
 - Mathematical Economics Option.** 32 credits to include option core and electives. Option core (12 credits): MATH 310, MATH 327, MATH 407; and at least one of the following: MATH 408, STAT 423. Option electives: Either (1) or (2), below. (1) 20 credits including at least 15 credits from ECON 301, ECON 400, ECON 401, ECON 404, ECON 421, ECON 422, ECON 454, ECON 472, ECON 482, ECON 483, ECON 485; at least 8 additional credits at the 300 level or above from the four participating departments or from the department of Economics (taken from ECON courses listed above). (2) Complete a double major with a Bachelor of Science in Economics.
 - Operations Research Option.** 32 credits to include option core and electives. Option core (15 credits): MATH 310, MATH/STAT 394, MATH/STAT 395; and at least two of the following: MATH 407, MATH 408, MATH 409. Option electives: Either (1) or (2), below. (1) 17 credits, including at least 6 credits from MATH/STAT 491, MATH/STAT 492, STAT 421, 423; at least 8 credits from OPMGT 301, OPMGT 402, OPMGT 443, OPMGT 450, OPMGT 490, QMETH 450, QMETH 490, IND E 237, IND E 324, IND E 325, IND E 326, IND E 421, IND E 424, IND E 426, IND E 430, IND E 433, (with at least one course at the 400 level); at least 3 additional credits at the 300 level or above from the four participating departments or from the departments of Management Science and Industrial Engineering (taken from IND E courses listed above). (2) Complete a double degree in Management Science in the School of Business Administration or in Industrial Engineering in the College of Engineering.
 - Scientific Computing and Numerical Algorithms Option.** 32 credits to include option core (15 credits): MATH 310, MATH 327, MATH 464, MATH 465, MATH 466; and option electives (17 credits), to include 11 credits from the following: AMATH 301; AMATH 353 or MATH 309; CSE 373 or CSE 326; CSE 410; AMATH 401, AMATH 402, AMATH 403; MATH 407, MATH 408, MATH 409; MATH 427, MATH 428, MATH 429; MATH 438, MATH 439; MATH 435, MATH 436; remaining credits from approved courses at the 300 level or above from the four participating departments.
 - Social and Behavioral Sciences Option.** 32 credits to include option core (10 credits): MATH/STAT 394, MATH/STAT 395, STAT 423; and option electives (22 credits): outside area (12 credits or double major/double degree; see adviser for options) and 10 credits of approved courses at the 300 level or above, chosen from the four participating departments.
 - Statistics Option.** 32 credits to include program core (22 credits): MATH/STAT 394, MATH/STAT 395, STAT 341, STAT 342, STAT 421, STAT 423; option electives (10 credits): approved courses at the 300 level or above, chosen from the four participating departments.

See adviser for additional information on program options, for possible substitutions, and for approval of elective choices noted above.

Student Outcomes and Opportunities

- * **Learning Objectives and Expected Outcomes:** The ACMS degree emphasizes the development of advanced skills in discrete and contiguous mathematical modeling, computing and scientific computa-

tion, mathematical reasoning and analytic skills, and statistical reasoning and analytic skills. Students develop an expertise at an advanced level in an applications area. This set of skills provides the basis for careers in a wide array of quantitative disciplines including engineering; the physical, life, and social sciences; as well as business and management sciences. In addition, the ACMS program has developed partnerships with a number of departments on campus to facilitate the pursuit of double majors.

- * **Instructional and Research Facilities:** The program has access to the combined instructional and research facilities of the four participating departments, as well as the Mathematical Sciences Computing Center (MSCC), the Mathematics and Statistics library, and the Math Study Center.
- * **Honors Options Available:** With College Honors. With Departmental Distinction. See adviser for details.
- * **Research, Internships, and Service Learning:** The program is provided with internship opportunities periodically, which are then passed on to students.
- * **Department Scholarships:** None offered.
- * **Student Organizations/Associations:** MAA Student Chapter, Actuarial Club, SIAM

Applied Mathematics

408 Guggenheim

Applied mathematics is concerned with mathematical modeling and analysis of problems from the physical, biological, and social sciences, and from engineering.

Undergraduate Program

Adviser
412 Guggenheim, Box 352420
206-543-5493

The Department of Applied Mathematics offers the following undergraduate programs:

- * The Bachelor of Science degree in Applied and Computational Mathematics, offered in cooperation with departments of Computer Science and Engineering, Mathematics, and Statistics. See Applied and Computational Mathematical Sciences for specific degree information.
- * A minor in applied mathematics.

Minor

Minor Requirements: 27-28 credits as follows:

1. MATH 124, MATH 125, MATH 126 (5, 5, 5) or equivalent
2. AMATH 351, AMATH 352, AMATH 353 (3, 3, 3)
3. One of the following courses: AMATH 301 (4), AMATH 383 (3), AMATH 401 (4), AMATH 402 (4), AMATH 403 (4), AMATH 422 (3), AMATH 423 (3), or AMATH 441 (3)
4. Minimum grade of 2.0 required in each course

Graduate Program

Graduate Program Coordinator
408L Guggenheim, Box 352420
206-543-5077

The Department of Applied Mathematics offers graduate programs of study leading to the degrees of Master of Science and Doctor of Philosophy. These programs involve (1) broad training in those mathematical methods and techniques that have been found useful in applications, (2) in-depth study in at least one field of application, and (3) opportunities to explore various specialized aspects of applied mathematics.

Master of Science

Admission Requirements

Prospective students for the Master of Science program should hold an undergraduate degree either in mathematics with a strong background in applications such as the physical, engineering, biological, or social sciences with a strong background in applications-oriented mathematics. The student's record should be a strong one with an average grade of B (3.00 grade point) or better. Graduate Record Examination scores should be sent to the Graduate School. In addition to the other requirements for all applicants, a minimum score of 500 on the Test of English as a Foreign Language (TOEFL) must be presented by applicants who are not citizens of the United States unless they meet one of the following exceptions: citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or applicants holding bachelor's or advanced degrees from accredited institutions in the U.S. or in one of the countries listed above.

Degree Requirements

36-45 credits, as follows:

- * *Basic Course List:* AMATH 506 (4), AMATH 507 (5), AMATH 567 (5), AMATH 568 (5), AMATH 569 (5), AMATH 584 (5). Alternative program elements may be substituted, subject to the approval of the Applied Mathematics Graduate Committee.
- * *Field of Application:* This requirement is satisfied with a coherent sequence of two graduate (500-level) graded courses in a given field. Other alternatives may be appropriate. The following courses offered by the Applied Mathematics department are also designated as applications courses: AMATH 503 (3), AMATH 504 (3), AMATH 505 (4), AMATH 521 (5). The courses selected in the field of application must be approved by the student's advisor and the Graduate Committee.
- Traditional fields of application include all branches of engineering, the physical sciences, biological sciences, computer science, economics and management science, and certain areas of medical science. Other fields may be approved by the Graduate Committee where appropriate. Mathematics and statistics are not fields of application.
- * *Applied Mathematics Seminar/Clinic:* All students must register for two quarters of AMATH 501 (1, max. 6) and two quarters of AMATH 502 (1, max. 6).
- * *Final Examination for Master's Degree:* The Graduate School requirement for the Final Examination is satisfied by an oral presentation by the candidate in the presence of his or her Graduate Committee on a current topic of interest from the literature or the results of original research. At least two members of the committee must sign the Master's Application (warrant) after they are satisfied that the various requirements for the degree are met and that the presentation is of high quality.
- * *Program Plan:* The student is assigned a faculty advisor. In order that studies progress satisfactorily and the degree requirements are met, a Program Plan must be filled out by the student, signed by the advisor, and approved by the Graduate Committee. For full-time students, a Program Plan must be on file no later than the end of the third quarter of registration. Part-time students should file their Program Plan prior to the end of their first three quarters of registration.
- * *Satisfactory Progress:* The student is expected to maintain a minimum 3.20 GPA. In addition, full-time students (whether self-supporting or under full scholarship or assistantship support) are normally expected to complete the requirements for an M.S. degree in one year and should not exceed two years. Exceptions will be granted only by petition to the Graduate Committee.

Doctor of Philosophy

Admission Requirements

- * Evidence of completion of course work equivalent to that described for the master's degree, with a minimum 3.40 GPA, and indication of the ability or potential to perform independent research.
- * Graduate Record Examination
- * Three letters of recommendation are required in support of each application and should be sent directly to the department.
- * In addition to the other requirements for all applicants, a minimum score of 500 on the Test of English as a Foreign Language (TOEFL) must be

presented by applicants who are not citizens of the United States unless they meet one of the following exceptions: citizens of Australia, Canada, Ireland, New Zealand, or the United Kingdom; or applicants holding bachelor's or advanced degrees from accredited institutions in the U.S. or in one of the countries listed above.

- * A graduate student is considered for admission to the Ph.D. program by the Graduate Committee after completing AMATH 567 (5), AMATH 568 (5), AMATH 584 (5), and AMATH 585 (5) with a grade of 3.4 or better in each course, as well as passing the Preliminary Examination.

Degree Requirements

Minimum 90 credits, as follows:

- * *Course Requirements:* AMATH 567 (5), AMATH 568 (5), AMATH 569 (5); AMATH 584 (5), AMATH 585 (5), AMATH 586 (5); three of AMATH 570 (5), AMATH 571 (5), AMATH 572 (5), AMATH 573 (5), AMATH 574 (5), AMATH 575 (5); either AMATH 507 (5) or AMATH 515 (5); AMATH 506 (4); two applications courses; 2 credits of departmental seminars; 2 credits of departmental clinics.
- * *Preliminary Exam:* Three written two-hour exams, covering a core of undergraduate material necessary for successful completion of the Ph.D. program. These core areas are differential equations, linear algebra, and advanced calculus.
- * *Supervisory Committee:* As soon as possible, and no later than the end of the spring quarter of the first year, a student should form a supervisory committee.
- * *Candidacy Requirements:* The student in the Ph.D. program attains the status of Candidate for the Doctor of Philosophy degree upon forming a supervisory committee, selecting two specialization areas, satisfying course requirements, and designing a doctoral research plan.
- * *General Examination:* The General Examination is administered after the student has passed the Preliminary Examination and sometime before the end of the student's second year.
- * *Final Examination:* The Final Examination consists of an oral presentation of the completed research in a seminar open to the public.

Financial Aid

Both research and teaching assistantships are available to full-time students who qualify. In addition, fellowship funds for the study of applied mathematics are available and awarded on a competitive basis. Research Facilities

Students in applied mathematics have access to a departmental computing lab equipped with a DEC Alpha server, Alpha/AXP workstations, and X-terminals, with centralized file storage. Software for scientific visualization, numerical analysis, symbolic mathematics, programming, and document preparation is available. The lab is connected to the campus network and the Internet, providing access to supercomputing facilities and other resources.

Course Descriptions

See page 284.

Art

104 Art

The School of Art serves a dual role within the educational structure of the University of Washington. It is both a professional school and an academic department. As a professional school it trains students for active careers in the visual arts; as a school of the College of Arts and Sciences it offers studio and lecture courses. All of its course offerings and its curriculum requirements are based on the underlying philosophy that an awareness and understanding of the visual arts are necessary to a liberal education, and that a liberal education is necessary to the training of a professional artist.

Undergraduate Program

Adviser
104 Art, Box 353440
206-543-0646
uaskart@u.washington.edu

The School of Art offers the following undergraduate programs:

- * The Bachelor of Arts degree with a major in art history, design studies (incorporates elements of the Bachelor of Fine Arts industrial design and visual communications design programs), interdisciplinary visual arts, or painting and drawing.
- * The Bachelor of Fine Arts degree with a major in ceramics, fibers, industrial design, metals, painting and drawing, photography, printmaking, sculpture, or visual communication design

Bachelor of Arts

Design Studies, Interdisciplinary Visual Arts (IVA), Painting and Drawing (Students may earn a Bachelor of Arts or a Bachelor of Fine Arts in Painting and Drawing, but not both.)

Department Admission Requirements

The minimum GPA for application to the School of Art is 2.50.

Admission to the Design Studies Major for Entering Freshmen, Currently Enrolled Students, or Transfer Students: Students must complete ART 166 (or equivalent), then apply to the major using the appropriate application process. See Program Guides on department homepage for specific information: <http://art.washington.edu/undergrad/programguides/index.html>.

Admission to the Interdisciplinary Visual Arts Major for Entering Freshmen or Currently Enrolled Students: After completing 5 credits of introductory level art (100/200 level), students meet with an Art adviser to declare the major.

Admission to the Interdisciplinary Visual Arts Major for Transfer Students: Students complete the equivalent of 5 credits of introductory art (100/200 level) prior to transferring. Once admitted to the UW, they meet with an Art adviser to declare the major. Prior to transfer, students may address questions to uaskart@u.washington.edu.

Admission to the Painting and Drawing Major for Entering Freshmen and Currently Enrolled Students: After completing ART 190, students meet with an Art adviser to declare the major.

Admission to the Painting and Drawing Major for Transfer Students: Once admitted to the UW, students meet with an Art adviser to enroll in ART 190. Students who transfer with college credits in painting and drawing may wish to present a portfolio for advanced placement in the program. Prior to transfer, students may address questions to uaskart@u.washington.edu.

Major Requirements

Design Studies (80 credits)

1. 5 credits prerequisite: ART 166
2. Successful completion of Design Admission Selection Process
3. 30 credits: ART 207, ART 208, ART 209, ART 210, ART 211, ART 212
4. 20 credits: ART 381, ART 481, ART 482 (repeated to 10 credits)
5. 15 credits electives from the following: ART 366, ART 368, ART 376, ART 377, ART 378, ART 467, ART 383, ART 483, ART 316, ART 317, ART 322, ART 446.
6. 10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337.

Interdisciplinary Visual Arts (63 credits)

1. 20 credits of introductory art selected from ART 120, ART 124, ART 126, ART 131, ART 133, ART 140, ART 166, ART 190, ART 201, ART 202, ART 226, ART 227, ART 234, ART 245, ART 246, ART 258, ART 272, ART 273, ART 290, ART 292.
2. 25 upper division credits in art selected from ART 328, ART 329, ART 330, ART 332, ART 333, ART 334, ART 335, ART 338, ART 339, ART 342, ART 345, ART 350, ART 353, ART 354, ART 357, ART 358, ART 390, ART 392, ART 428, ART 436, ART 450, ART 457, ART 458, ART

485, ART 490, ART 492, ART 496, ART 498, ART 499, ART H 498, ART H 499.

3. 18 credits in art history, with a minimum 8 upper division credits, to include one from ART H 203, ART H 380, ART H 381, or ART H 384; one non-western course from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337.

Painting and Drawing (65 credits)

1. 5 credits: ART 190
2. 20 credits drawing classes: 5 credits ART 290; 10 credits ART 390; 5 credits ART 490
3. 25 credits painting classes: 10 credits ART 292; 10 credits ART 392; 5 credits ART 492
4. 15 credits art history (with a minimum 5 upper division) to include one from ART H 203, ART H 380, ART H 381, or ART H 384; one non-western from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337.

Bachelor of Fine Arts

Ceramics, Fibers, Industrial Design, Metals, Painting & Drawing (Students may earn a Bachelor of Fine Arts or a Bachelor of Arts in Painting & Drawing, but not both), Photography, Printmaking, Sculpture, Visual Communication Design

Department Admission Requirements

The minimum GPA for admission to School of Art BFA programs is 3.00.

Note: The Printmaking program will not admit new majors during the 2005/2006 academic year.

For entering freshmen or currently enrolled students

Admission to Ceramics, Fibers, Metals, Painting & Drawing, and Sculpture: Students complete the prerequisite art course unique to each major (ART 201 for ceramics; ART 226 or ART 227 for fibers; ART 258 for metals; ART 190 for painting & drawing; ART 272 or ART 273 for sculpture), then meet with an Art adviser to declare the major.

Admission to Industrial Design, Photography, and Visual Communication Design: Students must complete prerequisite courses unique to each major (see Major Requirements, below). Students then apply to the major using the appropriate application process. Each major has its own unique application process; see Program Guides on department homepage for specific information: <http://art.washington.edu/undergrad/programguides/index.html>.

For transfer students

Admission to Ceramics, Fibers, Metals, Painting & Drawing, and Sculpture: Once admitted to the UW, students meet with an Art adviser to enroll in the appropriate art course (ART 201 for ceramics; ART 226 or ART 227 for fibers; ART 258 for metals; ART 190 for painting & drawing; ART 272 or ART 273 for sculpture). Students who transfer with college credits in the proposed area of study may wish to present a portfolio for advanced placement in the program. Prior to transfer, students may address questions to uaskart@u.washington.edu.

Admission to Industrial Design, Photography, and Visual Communication Design: Students must complete prerequisite courses unique to each major (see Major Requirements, below). Students then apply to the major using the appropriate application process and submitting a portfolio. Each major has its own unique application process; see Program Guides on department homepage for specific information: <http://art.washington.edu/undergrad/programguides/index.html>.

Admission Policy for Postbaccalaureate Applicants: Postbaccalaureate study in studio art is limited; admission requirements vary within each major. See information concerning specific postbaccalaureate admission online at <http://art.washington.edu>.

Major Requirements

Ceramics (85 credits)

1. 10 credits ART 201, ART 202
2. 15 credits ART 353.
3. 20 credits ART 485
4. 25 credits art or related electives to include ART 120
5. 15 credits art history (with a minimum 5 upper division) to include one from ART H 203, ART H 380, ART H 384, or ART H 381; one non-western from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337.

Fibers (85 credits)

1. 10 credits ART 226, ART 227
2. 25 credits ART 330, ART 328, ART 329
3. 15 credits ART 428
4. 20 credits art or related electives to include ART 120
5. 15 credits art history (with a minimum 5 upper division) to include one from ART H 203, ART H 380, ART H 384, or ART H 381; one non-western from ART H 204, ART H 205, ART H 206, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337.

Industrial Design (90 credits)

1. 5 credits prerequisite: ART 166
2. Successful completion of Design Admission Selection Process
3. 30 credits: ART 207, ART 208, ART 209, ART 210, ART 211, ART 212
4. 30 credits: ART 316, ART 317, ART 318, ART 322, ART 422, ART 321
5. 15 credits: ART 445, ART 446, ART 447.
6. 10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337.

Metals (85 credits)

1. 5 credits ART 258
2. 25 credits selected from ART 357, ART 358, ART 354
3. 15 credits ART 460
4. 25 credits art or related electives to include ART 120 and ART 190 or transfer equivalents
5. 15 credits art history (with a minimum 5 upper division) to include one from ART H 203 ART H 380, ART H 384, or ART H 381; one non-western from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337

Painting & Drawing (110 credits)

1. 5 credits, ART 190.
2. 20 credits drawing classes: 5 credits ART 290; 10 credits ART 390; 5 credits ART 490.
3. 45 credits painting classes: 10 credits ART 292; 10 credits ART 392; 10 credits ART 492; 15 credits ART 494.
4. 25 credits studio art or related electives.
5. 15 credits of art history with a minimum 5 upper division to include one from ART H 203, ART H 380, ART H 384, or ART H 381; one non-western art history from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, ART H 337.

Photography (85 credits total)

1. 15 credits prerequisites: 5 credits from ART 140; 5 credits from ART 124, ART 126, ART 166, or ART 190; 5 credits from ART H 232.
2. Successful completion of Photography Portfolio Review.
3. 5 credits ART 241 (autumn quarter only).
4. 25 credits: 5 credits ART 340; 5 credits ART 341; 5 credits ART 342; 10 credits ART 343.
5. 15 credits ART 440 (spring, autumn, winter quarters).
6. 15 credits studio art or related electives.
7. 10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337.

Printmaking (85 credits)

Not available academic year 2005-2006.

Sculpture (85 credits)

1. 10 credits ART 272, ART 273
2. 25 credits ART 332, ART 333, ART 334, ART 335
3. 10 credits ART 436.
4. 25 credits art or related electives, to include ART 120.
5. 15 credits art history (with a minimum 5 upper division) to include one from ART H 203, ART H 380, ART H 384, or ART H 381; one non-western from ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 312, ART H 313, ART H 315, ART H 318, ART H 321, ART H 330, ART H 331, or ART H 337

Visual Communication Design (100 credits)

1. 5 credits prerequisite: ART 166.
2. Successful completion of Design Admission Selection Process.
3. 30 credits: ART 207, ART 208, ART 209, ART 210, ART 211, ART 212
4. 30 credits: ART 366, ART 376, ART 367, ART 377, ART 368, ART 378
5. 25 credits: ART 466, ART 478, ART 467, ART 479, ART 480
6. 10 credits of art history including ART H 203 and any non-western art history: ART H 204, ART H 205, ART H 206, ART H 230, ART H 311, ART H 315, ART H 318, ART H 330, ART H 337.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* Students receiving an undergraduate degree in art can expect to develop strong writing, analytical, critical-thinking, and problem-solving skills. Students learn to recognize the power of the visual image and understand its importance in a world increasingly dependent on the aesthetic and technical skill of trained artists and designers to create images that communicate information and ideas across cultures and generations.

In addition to becoming practicing artists, art graduates find careers in fields such as gallery and museum management, arts education, arts administration, photojournalism, film making, graphic and product design, interior design, teaching, advertising, art therapy, and visual and digital technology.

* *Instructional and Research Facilities:* None.

* *Honors Options Available:* None.

* *Research, Internships, and Service Learning:* The School of Art has several programs that help students develop professional practices and expand their knowledge outside the UW: internships for credit, Artist in Residence programs, K-12 Educational Partnerships, Art on Loan, and the Studio Art Rome program.

* *Department Scholarships:* None.

* *Student Organizations/Associations:* Students majoring in the studio arts have the opportunity to participate in several student associations: Hephestium (metals), Zeeware (ceramics), Broadclothes (fiber), Printmakers Association (printmaking), a photo guild, and the Inter Arts Council. These organizations raise funds through the sale of members' work to support visiting artists and lectures and to sponsor student involvement in regional arts events.

Graduate Program

Graduate Program Coordinator
104 Art Building, Box 353440
206-543-0646
gradart@u.washington.edu

The Master of Fine Arts program offers an intense, two-year studio and seminar/classroom experience leading to an advanced degree in visual art. The program builds on prior, significant academic experience and studio work. Admission is on a competitive basis to any one of the following seven programs: Ceramics, Fibers, Metals, Painting, Photography, Sculpture, and Visual Communication Design.

The master's degree program in Art History at the University of Washington affirms that the M.A. degree is an independent degree useful in its own

right. Successful applicants to the program normally have a broad undergraduate background in art history.

The Ph.D. program in the Division of Art History prepares graduates for university-level teaching, curator positions at major museums, and independent research in the field. Before beginning work for the Ph.D., students should have completed a Master of Arts degree in the history of art.

Master of Fine Arts

Admission Requirements

Applicants for admission to the Master of Fine Arts program are required to have a Bachelor of Fine Arts degree or equivalent (determined by the quality of the applicant's work and equivalent experience, based upon the UW B.F.A. requirements) with a minimum GPA of 3.00 in the undergraduate art major.

The Graduate Record Examination is not required. Admission is on a competitive basis. Annual deadline for applications is February 1, for consideration for admission the following autumn quarter.

Degree Requirements

For each program, 90 credits are required, as follows:

Ceramics

- * *Ceramics studio*: 20 credits of ART 553
- * *Interdisciplinary seminar*: 25 credits of ART 590
- * *Art history, theory, and criticism*: 10 credits of approved courses
- * *Studio electives*: 15 credits of approved electives
- * *Thesis*: 20 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Ceramic grads exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery along with a one person show at the Ceramics Gallery.

Fibers

- * *Fibers studio*: 20 credits of ART 540
- * *Interdisciplinary seminar*: 25 credits of ART 590
- * *Art history, theory, and criticism*: 10 credits of approved courses
- * *Studio electives*: 20 credits of approved electives
- * *Thesis*: 15 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Fibers grads exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Metals

- * *Metals studio*: 20 credits of ART 558
- * *Interdisciplinary seminar*: 25 credits of ART 590
- * *Art history, theory, and criticism*: 15 credits of approved courses
- * *Studio electives*: 20 credits of approved electives
- * *Thesis*: 15 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Metals grads exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Painting and Drawing

- * *Drawing studio*: 6 credits of ART 591
- * *Painting studio*: 25 credits of ART 592
- * *Graduate seminar*: 30 credits of ART 594
- * *Art history, theory, and criticism*: 10 credits of approved courses
- * *Studio electives*: 9 credits of approved electives
- * *Thesis*: 10 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Painting and Drawing grads exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Photography

- * *Photography studio*: 20 credits of ART 515
- * *Interdisciplinary seminar*: 25 credits of ART 590
- * *Art history, theory, and criticism*: 15 credits of approved courses
- * *Studio electives*: 15 credits of approved electives

- * *Thesis*: 15 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Photography grads exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Sculpture

- * *Sculpture studio*: 20 credits of ART 552
- * *Interdisciplinary seminar*: 25 credits of ART 590
- * *Art history, theory, and criticism*: 10 credits of approved courses
- * *Studio electives*: 15 credits of approved electives
- * *Thesis*: 20 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Sculpture grads exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Visual Communication Design

- * *Design studio*: 25 credits of ART 580/ART 582
- * *Design seminar*: 20 credits of ART 581
- * *Art history, theory, and criticism*: 15 credits of approved courses
- * *Studio electives*: 20 credits of approved electives
- * *Thesis*: 10 credits of ART 700. The thesis is a natural outgrowth of the student's work. It can consist of one major work or a body of work that involves one central theme. Design grads exhibit their thesis work in the annual MFA exhibition at the Henry Art Gallery.

Master of Arts

Admission Requirements

- * B.A. degree with art history major or equivalent course work with a minimum GPA of 3.00 or B average in art history courses; students in other majors may apply if they have a strong background in art history.
- * Official GRE General Test scores.

Degree Requirements

The M.A. program offers both thesis and non-thesis tracks in Art History. The thesis track requires a minimum of 55, and the non-thesis (practicum) track 65, graduate-level credits, to include:

- * A minimum of 5 numerically graded credits in four of the five major areas: 1) African and Native American; 2) East Asian; 3) Ancient, Classical, and Medieval; 4) Italian and Northern Renaissance, Baroque, and Rococo; 5) Western, late 19th c. to the present.
- * A minimum of 15 credits in 500-level seminars, including at least one seminar each in a Western and a non-Western area; also, two methodology seminars to be taken in the first year
- * For students in the thesis track, at least 10 credits of ART H 700 (Master's Thesis); for the non-thesis track, at least 10 credits of ART H 598 (Master's Practicum)
- * All degree candidates are required to demonstrate a knowledge of either French, German or Italian, or Chinese or Japanese where appropriate. Degree candidates specializing in Native American art may substitute Spanish for French or German. Students in the thesis track are required additionally to demonstrate knowledge in a second language appropriate to the student's area of study. Petitions for exemption from the second language requirement will be considered as warranted by the needs of different fields or projects.
- * The thesis may be an extension of a seminar paper and must demonstrate the student's ability to conduct rigorous research, indicate familiarity with bibliographical and reference materials, and show a capacity for the synthesis and critical evaluation of the material under consideration.
- * The practicum must evidence the student's practical or theoretical knowledge of some aspects of art in historical or contemporary situations, and may take any of a variety of forms, either within or outside the academic offerings of the University, e.g., an internship in a public art museum or the publication of critical, educational or other writings. These requirements are minimum M.A. requirements for the Division of Art History. To be eligible for a degree in the Graduate School, a minimum grade point average of 3.00 in numerically graded courses numbered 400 and above is required.

Doctor of Philosophy

Admission Requirements

- * M.A. degree in art history or a closely related field with a minimum 3.00 or B average in art history courses.
- * Official GRE General Test scores.

Degree Requirements

The Ph.D. program requires a minimum of 90 credits, as follows:

- * A minimum of 60 credits in art history in numerically graded courses numbered 400 and above, beyond the M.A. Of these 60, at least 30 credits must be in 500-level art history or approved non-art history seminars
- * A maximum of 20 credits in related fields (in numerically graded courses numbered 300 and above) may be approved for credit in place of art history courses
- * A minimum of 10 credits must be taken in an area other than areas to be tested by the General Examination.
- * All doctoral students are required to demonstrate a knowledge of either French, German or Italian, or of Chinese or Japanese where appropriate; to demonstrate a research capability in a second language appropriate to the student's area of study as determined by the faculty; and to demonstrate a knowledge of any further languages judged necessary by the faculty
- * A minimum of 30 dissertation credits
- * A General Examination, written and oral, will be taken when in the opinion of the student's supervisory committee the student's background is sufficient to justify its undertaking. The fields to be covered will be determined in accordance with the student's interests and the faculty's supervisory capabilities.
- * These requirements are minimum Ph.D. requirements for the Division of Art History. To be eligible for a degree in the Graduate School, a grade point average of 3.0 in numerically graded courses numbered 400 and above is required.

Scholarships and Teaching Assistantships

School of Art scholarships are awarded annually to new and returning students, based on merit. Applicants admitted to the M.F.A. program may be offered School of Art scholarships for the coming year on an individual merit basis. Further application is not required.

The School of Art offers a limited number of teaching assistantships to incoming graduate students on an individual merit basis, as determined by each program. Enrolled graduate students may apply for a limited number of additional, competitive teaching assistantships.

Course Descriptions

See page 286.

Art History

209 Art

Art history is the study of the creation, style, and meaning of works of art in relation to the artists and societies that created them. The history of art involves the interaction of styles, techniques, concepts, individual personalities, and social values from many places over long periods of time. This discipline is comparative in nature and requires many different skills, derived from the study of history and culture, foreign languages and literature, iconography, stylistic analysis, and connoisseurship.

Undergraduate Program

Adviser
104 Art, Box 353440
206-543-0646
uaskart@u.washington.edu

The Division of Art History offers the following undergraduate programs:

- * The Bachelor of Arts degree with a major in art history
- * A minor in art history

Bachelor of Arts

Suggested First- and Second-Year College Courses: ART H 201, ART H 202, ART H 203, ART H 204, ART H 205, ART H 206. Courses to enhance writing skills, and courses in history, literature, anthropology, classics, and foreign languages.

Department Admission Requirements

Entering freshmen and transfer students may declare an Art History major by scheduling an appointment with the Art History adviser on or after their orientation/registration date. Currently enrolled University students who wish to declare an Art History major must have a minimum 2.50 GPA and meet with the adviser anytime during the quarter except the first week.

Admission Policy for Postbaccalaureate Applicants: Postbaccalaureate study in Art History is limited. Acceptance is competitive, based upon transcripts of prior college work and a School of Art Supplemental Information Form.

Major Requirements

55 credits in art history, including one course from each of the following four groups plus three 400-level art history courses:

1. ART H 201, ART H 202, ART H 290, ART H 340, ART H 341, ART H 342, ART H 343, ART H 351, ART H 352, ART H 361, or ART H 373
2. ART H 204, ART H 306, ART H 311, ART H 315, ART H 316, or ART H 321
3. ART H 205, ART H 206, ART H 230, ART H 330, ART H 331, or ART H 337
4. ART H 203, ART H 232, ART H 380, ART H 381, ART H 382, or ART H 384.

Minor

Minor Requirements: 30 credits of art history courses, of which 15 must be upper-division courses. Minimum grade of 2.0 required in each course applied to the minor. At least 15 credits must be completed at the UW.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Students studying in the field of art history can expect to develop strong writing, research, analytical, critical thinking, and problem-solving skills. Course work is designed to allow students to comprehend the social, historical, ethical, and aesthetic significance of the visual realm that is our present environment and the heritage of many cultures. Art history graduates pursue careers in fields such as gallery and museum management, visual technology, teaching, arts administration, arts education, research, curating and restoration, interior design, and art and antique connoisseurship.

- * *Instructional and Research Facilities:* None

- * *Honors Options Available:* With College Honors. With Departmental Distinction. See adviser for details.

- * *Research, Internships, and Service Learning:* The Art History Program is based in the School of Art where majors work side by side with students studying in the studio arts. They have direct access to the Art Library, Media Center, Writing Center, a state of the art Computer Center, and three active art galleries. Classes are taught in rooms equipped with the technology needed to address all the issues and complexities of a visual culture. Many art history classes are conducted at local galleries and museums where students receive first-hand knowledge of the visual arts. Enrichments outside the classroom include one quarter study abroad in

Rome, opportunities to work one on one with faculty in research projects, and workshops and presentations by visiting artists and scholars.

- * *Department Scholarships:* Art history majors compete each year for several major scholarships in the School of Art: Austin Award (\$3,000), Marsh Scholarship (\$3,000), and Milnor Roberts Award (\$4,000). They are also eligible for smaller awards of excellence that range from \$500 to \$1,000. Applications are made in early April and scholarship winners are announced at the annual School of Art Open House in late April.

In addition to these awards, students are also encouraged to apply for the Nordstrom Research and Recognition Awards that support special projects, research, and professional development.

The \$2,000 Lockitch Graduating with Excellence Award is presented each year at the School of Art Graduation Celebration to the top undergraduate in Art History.

- * *Student Organizations/Associations:* Art history majors have opportunities to serve on School of Art committees which include: Open House, Gallery, Graduation Celebration, Curriculum, Space, and Career Week.

Of Special Note: Art history majors anticipating graduate study should acquire a reading knowledge of French, German, Chinese, Italian, or Japanese.

Graduate Program

Graduate Program Coordinator
209 Art, Box 353440
206-543-4876
uwah@u.washington.edu

Master of Arts

Admission Requirements

1. Bachelor of Arts degree with major in the history of art, or equivalent course work
2. One copy of all academic transcripts (international applicants must submit two copies)
3. Three letters of recommendation
4. Statement of professional objectives in the field
5. Samples of the applicant's written work
6. Taking the Graduate Record Examination is required.

Degree Requirements

1. 55 credits in the thesis track or 65 credits in the non-thesis track. Of these credits, a minimum of 45 credits in the thesis track or 55 credits in the non-thesis track must be numerically graded art history courses numbered 400 and above, exclusive of thesis or practicum credits. A maximum of 10 credits in related fields, in numerically graded courses numbered 300 and above, may be approved for credit in place of art history courses. No more than 12 credits of ART H 600 may be counted toward the minimum credit requirement for the Master of Arts degree.
2. A minimum of 5 numerically graded credits must be taken in four of five major areas: African or Native American; East Asian; Ancient, Classical, and Medieval; Italian and Northern Renaissance, Baroque, and Rococo; or late eighteenth- to twentieth-first-century Western.
3. A minimum of 15 credits must be taken in 500-level seminars, in addition to ART H 500, Methods of Art History, and ART H 504, Methodology II, both of which must be taken within the first year of residence. At least one seminar each in a Western and a non-Western area is required.
4. A knowledge of either French, German, or Italian, or of Chinese or Japanese if appropriate. Degree candidates specializing in Native American art may substitute Spanish for French, German, or Italian. Candidates in the thesis track are required, in addition, to demonstrate knowledge in a second language appropriate to the student's area of study as determined by the faculty. Petitions to the Faculty Graduate Committee for exemption from the second language requirement will be considered as warranted by the needs of different fields or projects. Language requirements may be satisfied by passing graduate proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of the second year of French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the University of Washington with a minimum grade of 3.0.

Students are expected to satisfy at least one of the language requirements no later than the first quarter of residence in the program.

5. Students in the thesis track must take 10 thesis credits in ART H 700 in preparation for the written presentation and oral defense of a thesis that demonstrates the ability to conduct rigorous research, familiarity with relevant sources, and a capacity for synthesis and critical evaluation; students in the non-thesis track must take 10 practicum credits in ART H 598, a practical or theoretical program designed in conjunction with the faculty and defended by means of a final written report and oral examination.

Doctor of Philosophy

Admission Requirements

1. Prior sound preparation in art history at a general level, which usually means having acquired the Master of Arts degree in the history of art
2. One copy of all academic transcripts (international applicants must submit two copies)
3. Three letters of recommendation
4. Statement of professional objectives in the discipline
5. Samples of written research work in art history. Taking the Graduate Record Examination is required.

Degree Requirements

Minimum of 90 credits, which include:

1. 60 credits in numerically graded art history courses numbered 400 and above, beyond the Master of Arts degree or equivalent, and exclusive of dissertation credits; a maximum of 20 credits in related fields in numerically graded courses numbered 300 and above may be approved for credit in place of art history courses; a minimum of 10 credits must be in areas other than those tested by the General Examination; at least 30 credits must be in 500-level seminars.
2. Knowledge of German, French, or Italian, or of Chinese or Japanese if appropriate; a research capability in a second language adjudged appropriate to the student's area of study; a knowledge of any other languages considered necessary by the faculty. Language requirements may be satisfied by passing graduate-proficiency examinations (available in French, German, Italian, and Spanish), or by completing the third quarter of second-year French, German, Italian, Chinese, Japanese, or other appropriate language as a graduate student at the University with a minimum grade of 3.0.
3. A General Examination, written and oral, taken prior to enrollment for dissertation credits; this examination covers three specific fields of art history chosen from the following general areas: African, Native American, Chinese, Japanese, Ancient, Medieval, Renaissance, Baroque and eighteenth century, Modern, and Contemporary; no more than two fields may be selected from the same area.
4. 30 dissertation credits in ART H 800 taken after the General Examination in preparation and defense of the dissertation. These credits must be distributed over a minimum of three quarters.
5. A dissertation demonstrating original and independent investigation and achievement.

Financial Aid

The Art History division offers certain scholarship funds, as well as teaching assistantships, for art history graduate students. A small number of grants are awarded to outstanding entering students, but it is otherwise a policy to award financial aid and assistantships only to students who have completed at least one year of graduate study.

Course Descriptions

See page 289.

Asian Languages and Literature

225 Gowen

The Department of Asian Languages and Literature offers instruction in the principal languages and literatures of Asia, including East, Southeast, Central, and South Asia. Emphasis is placed on the roles of these languages within the cultures they serve as well as on linguistic, textual, and literary analysis. Courses on Asian literature in English are offered for majors and nonmajors alike.

Undergraduate Program

Adviser
223A Gowen, Box 353521
206-543-4996

The Department of Asian Languages and Literature offers the following undergraduate programs:

- * The Bachelor of Arts degree with majors in Chinese, Japanese (with either a linguistic or literature concentration), Korean, and South Asian languages
- * Minors in Chinese, Hindi, Japanese, and Sanskrit

Bachelor of Arts

Suggested First- and Second-Year College Courses: First and second years of the target foreign language(s): Chinese, Japanese, Korean, or South Asian (Hindi or Sanskrit). Any courses relating to the area or discipline of major study.

Department Admission Requirements

1. Completion of at least 20 credits of college course work (or department-approved equivalent) in the intended primary language of concentration. The most recent course completed in the intended primary language of concentration must be a course taken at the UW, and the final grade in the most recent course in that language must be 2.5 or higher.
2. Completion of one writing course (W-prefix) taught in English with a minimum grade of 2.0.
3. The department prefers that prospective majors present a cumulative GPA of 2.50 or higher. Applicants may submit materials in addition to transcripts clarifying any aspect of past course work. Denied applicants may appeal.
4. Transfer students must be enrolled at the UW before applying to the major.

Note: A student entering the junior year without two years of the appropriate foreign language will not be able to complete the degree requirements in two years unless he or she takes accelerated courses such as Chinese or Japanese at the UW during summer quarter.

Major Requirements

Chinese

75 credits, as follows:

1. *Language courses:* 30 credits required, including a minimum of 20 beyond the third-year level. Must include CHIN 451, plus other courses drawn from CHIN 411, CHIN 412, CHIN 413, CHIN 421, CHIN 422, CHIN 423, CHIN 452, CHIN 453, CHIN 470, and CHIN 482.
2. *Linguistics courses:* 5 credits required (CHIN 342); an additional 5 credits optional (CHIN 443).
3. *Literature courses:* 15 credits required (10 if the optional 5 linguistics credits are taken). Courses may be drawn from ASIAN 201, ASIAN 204, ASIAN 211, ASIAN 263, CHIN 373, CHIN 374, CHIN 380, CHIN 381, CHIN 385, CHIN 461, CHIN 462, CHIN 463, and Chinese literature courses offered in the Department of Comparative Literature.
4. *China-related humanities and social science courses:* 25 credits required. Must include HSTAS 211, plus other courses explicitly related to China from such departments as Anthropology, Art, History, International Studies, Linguistics, and Sociology.

Japanese

75 credits as follows:

45 credits in language, including 30 credits beyond the second year, selected according to the student's choice of literature or linguistics concentration; 20 credits of a literature or linguistics sequence; and 10 credits of area-related humanities and social sciences, as follows:

1. Literature Concentration

- a. Language: 45 credits, with a minimum of 30 credits beyond the second year. (Second year: JAPAN 211, JAPAN 212, JAPAN 213; third year: JAPAN 311, JAPAN 312, JAPAN 313; fourth year: 15 credits from JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473.)

Students who, upon the determination of the faculty in Japanese, are permitted to begin their study of Japanese at the University at a level higher than JAPAN 211, substitute, in consultation with the undergraduate adviser, an equivalent number of credits in additional courses drawn from JAPAN 431, 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, JAPAN 473, and with prior approval, other Japan-related humanities or social science courses.

- b. Literature sequence: 20 credits, including JAPAN 321, JAPAN 322, JAPAN 323, and 5 credits from JAPAN 395, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 460, JAPAN 471, JAPAN 472, and JAPAN 473, if not used to satisfy the language requirement.

- c. Area-related humanities or social science courses: 10 credits at the 300 level or above, at least 5 of which must be from outside the Department of Asian Languages and Literature; may be taken from JAPAN 342, JAPAN 343, JAPAN 395, JAPAN 440, JAPAN 442, JAPAN 443, and JAPAN 460; other Japanese literature courses not used to meet the literature requirement; and related courses from other departments.

2. Linguistics Concentration

- a. Language: 45 credits, with a minimum of 30 credits beyond the second year. (Second year: JAPAN 211, JAPAN 212, JAPAN 213; third year: JAPAN 311, JAPAN 312, JAPAN 313; fourth year: 15 credits from JAPAN 421, JAPAN 422, JAPAN 423, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, and JAPAN 473)

Students who, upon the determination of the faculty in Japanese, are permitted to begin their study of Japanese at the University at a level higher than JAPAN 211, substitute, in consultation with the undergraduate adviser, an equivalent number of credits in additional courses drawn from JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 445, JAPAN 471, JAPAN 472, JAPAN 473, and with prior approval, other Japan-related humanities or social science courses.

- b. Linguistics sequence: 20 credits, including at least 15 credits from JAPAN 342, JAPAN 343, JAPAN 395, JAPAN 440, JAPAN 442, JAPAN 443; 5 of the 20 credits may come from JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 460, JAPAN 471, JAPAN 472, JAPAN 473, LING 400, or related courses from other departments.

- c. Area-related humanities or social science courses: 10 credits at the 300 level or above, at least 5 of which must be from outside the Department of Asian Languages and Literature; may be taken from LING 400, JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 395, JAPAN 460, JAPAN 471, JAPAN 472, and JAPAN 473; or related courses from other departments.

Korean

75 credits as follows:

1. 45 credits in the Korean language, 15 beyond second-year level
2. 30 credits in literature and area-related humanities or social science courses

South Asian Languages

75 credits as follows:

1. 60 credits in languages, of which 45 are in the major language, 15 in the minor language
2. 15 credits in area-related humanities or social science courses to be chosen in consultation with adviser and to include HSTAS 201 and ASIAN 401

Minor

Minor Requirements

Chinese: 30 credits as follows:

1. *Language courses:* 15 credits at or above the third-year level. Must include CHIN 451, plus other courses drawn from among CHIN 301, CHIN 302, CHIN 303, CHIN 411, CHIN 412, CHIN 413, CHIN 421, CHIN 422, CHIN 423, CHIN 452, CHIN 453, CHIN 470, and CHIN 482.
2. *China-related humanities courses:* 15 credits drawn from among the following: ASIAN 201, ASIAN 204, ASIAN 211, ASIAN 263 (when China is the topic), CHIN 342 (or CHIN 442), CHIN 373, CHIN 374, CHIN 380, CHIN 381, CHIN 385, CHIN 443, and CHIN 461, CHIN 462, CHIN 463.

Hindi: 30 credits as follows:

1. 15 language credits at the second-year level (HINDI 321, HINDI 322, HINDI 323) or above
2. 15 credits in area-related humanities courses to include either ASIAN 203 or ASIAN 206 and any of the following: ART H 306; HSTAS 201, HSTAS 202, HSTAS 401, HSTAS 402, HSTAS 403, HSTAS 404; PHIL 386, PHIL 412; RELIG 352, RELIG 354

Japanese: 30 credits as follows:

1. 15 language credits at the third-year level (JAPAN 311, JAPAN 312, JAPAN 313) or above
2. 15 credits in additional language or literature/culture courses. Acceptable courses include, but are not limited to: JAPAN 321, JAPAN 322, JAPAN 323, JAPAN 342, JAPAN 343, JAPAN 431, JAPAN 432, JAPAN 433, JAPAN 440, JAPAN 442, JAPAN 443, JAPAN 460, JAPAN 471, JAPAN 472, JAPAN 473; ART H 316, ART H 317; ART 321; ECON 494; GEOG 313; HSTAS 422, HSTAS 423; MUSIC 495; POL S 435. Acceptable language courses include those offered by the Technical Japanese program, the Jackson School of International Studies, the School of Law, and the School of Business Administration

Sanskrit: 30 credits as follows:

1. 15 language credits at the second-year level (SNKRT 401, SNKRT 402, SNKRT 403) or above
2. 15 credits in area-related humanities courses to include either ASIAN 203 or ASIAN 206 and any of the following: ART H 306; HSTAS 201, HSTAS 202, HSTAS 401, HSTAS 402, HSTAS 403, HSTAS 404; PHIL 386, PHIL 412; RELIG 352, RELIG 354

At least half of the credits for the minor must be taken at the UW.

Student Outcomes and Opportunities

- * *Instructional and Research Facilities:* None
- * *Honors Program:* With College Honors. With Departmental Distinction. See adviser for details.
- * *Research, Internships, and Service Learning:* None offered
- * *Department Scholarships:* None offered
- * *Student Organizations/Associations:* None

Graduate Program

Graduate Program Coordinator
225 Gowen, Box 353521
206-543-4996

The Department of Asian Languages and Literature offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees with specializations in (1) the languages and literatures of China; (2) the language and literature of Japan; (3) the languages and literatures of South Asia, subsuming Sanskrit and Hindi; (4) the language and literature of Korea. All graduate students in the department must affiliate themselves with one of these programs. The department does not offer degrees or specializations in language pedagogy.

Master of Arts, Buddhist Studies

Admission Requirements

- * An undergraduate major in the language and literature of specialization (four years of language training for admission to the Chinese and Japanese programs; fewer years of language acquisition may be acceptable in South Asian languages), or the background and training equivalent to such a major. Students without such a background may be qualified for admission, but will need to acquire the program prerequisites during the earliest stages of their graduate study.
- * A statement of academic goals
- * Three letters of recommendation addressed to the Graduate Program Coordinator.

Degree Requirements

45-54 credits plus language requirements, as follows:

- * **Coursework requirement:**
 - o *Non-thesis program:* 45 course credits, 18 of which must be at the 500 level and above. Buddhist Studies seminars and text reading courses offered within the department must be included. Students are also required to complete language study through the fourth-year level in their major language and through the second-year level in a second Asian language.
 - o *Thesis program:* 45 course credits plus 9 thesis credits. At least 18 of the 45 credits must be taken at the 500 level or above. Buddhist Studies seminars and text reading courses offered within the department must be included. The language requirements in this program are the same as in the non-thesis program. In addition, the student must write an acceptable M.A. thesis according to the rules and policies of the Department of Asian Languages and Literature and pass an oral examination.
- * **Foreign language requirements:** Students must demonstrate competence in their major language, and must complete the course requirements in their second Asian language as outlined above. These two languages may include one classical language and one relevant modern language, or two classical languages. In either case, one of the languages must be Sanskrit. In addition, students must demonstrate through a written examination reading knowledge of one foreign language relevant to their area of specialization, which must be other than English and the student's native language. It may be the student's second Asian language or a European or Asian research language.

Master of Arts, Chinese

Admission Requirements

- * A minimum undergraduate GPA of 3.00 in the junior and senior years
- * Three letters of recommendation and a statement of purpose.
- * Strong undergraduate preparation in one of the following: Chinese language and literature, another foreign language and literature, Asian regional studies, comparative literature, linguistics, English, philosophy, or history. Applicants are also expected to have completed four years of modern Chinese and one year of classical Chinese, each with a minimum GPA of 3.00.
- * Students lacking such preparation may be admitted to the M.A. program provisionally, and will be required to make up the deficiencies during their first year of residence.

Degree Requirements

38-40 credits, as follows:

Degree requirements: Two options are available to the student in the M.A. degree program: (1) a thesis program, and (2) a non-thesis program which requires two seminar or research papers in lieu of a thesis, and two 500-level departmental courses in addition to the requirements specified below.

- * **Coursework requirements:**
 - o *Second-Year Classical Chinese, 15 credits:* CHIN 551, CHIN 552, CHIN 553 (5, 5, 5)
 - o *Methods and Materials, 5 credits:* CHIN 559 (5)
 - o *History of Chinese Literature, 5 credits:* Any one course of the following three-quarter sequence: CHIN 461, CHIN 462, CHIN 463 (5, 5, 5)
 - o *The Chinese Language, 5 credits:* CHIN 442 (5)
 - o At least one course from each of the following two groups, 8-10 credits:

- * Group I -- Literature: CHIN 461, CHIN 462, CHIN 463 (5, 5, 5); CHIN 482 (5); CHIN 554, CHIN 555, CHIN 556 (5, 5, 5); CHIN 561, CHIN 562, CHIN 563 (5, 5, 5); CHIN 573 (5, max. 15); CHIN 575 (5, max. 15); CHIN 580 (5, max. 15); CHIN 582 (5, max. 15); CHIN 583 (5); CHIN 590 (5); CHIN 591, CHIN 592, CHIN 593 (5, 5, 5)
- * Group II -- Linguistics and Philology: CHIN 443 (5); CHIN 531, CHIN 532, CHIN 533 (3, 3, 3); CHIN 540 (3, max. 9); CHIN 541 (3, max. 9); CHIN 542 (3); CHIN 544 (3, max. 9); CHIN 557 (5); CHIN 558 (3)
- * *Foreign language requirement:* For the M.A. in Chinese, the additional language requirement must be fulfilled through a graduate reading examination. The additional language may be another Asian language or a European language, but may not be the student's native language, and must be relevant to the student's program of study.
- * *M.A. Examination:* Examination in Chinese will cover Chinese literature, and the second part will focus on language (linguistics and philology) and texts. The examination should normally be taken no later than autumn quarter of the third year.

Master of Arts, Japanese Language and Literature

Admission Requirements

- * A minimum undergraduate GPA of 3.00 in the junior and senior years
- * Three letters of recommendation and a statement of purpose
- * Strong undergraduate preparation in any of the following: Japanese language and literature, with the equivalent of at least four years' work in the language; another language and literature, Asian regional studies, comparative literature, linguistics, art history, English, philosophy, or history.
- * While a student lacking such preparation may be admitted, the student will be expected to concentrate initially on compensating for deficiencies in background by taking course work chosen in consultation with the academic adviser. In the case of inadequate training in Japanese, intensive courses in the language are available.

Degree Requirements

45-75 credits, as follows:

- * *Coursework:* The M.A. program requires a minimum of 45 credits above the 300 level which are to be earned through a combination of course work and research. At least 18 credits of coursework must be completed in numerically graded courses at the 400 and 500 level, and 18 credits at the 500 level and above.

The following courses normally constitute a minimal level of training: JAPAN 321, JAPAN 322, JAPAN 323 (5, 5, 5, no graduate credit); JAPAN 411, JAPAN 412, JAPAN 413 (5, 5, 5); JAPAN 431, JAPAN 422, JAPAN 423 (5, 5, 5); JAPAN 471, JAPAN 472, JAPAN 473 (5, 5, 5). Students whose undergraduate training has provided them with a background comparable to this may enter more advanced courses. Less well prepared students may require a program considerably in excess of the minimum 45 credits.

The student may present research in either of two ways: (1) by submitting a thesis, in which case the student takes at least 36 course credits and 9 thesis credits, or (2) by submitting two research papers that have been written either independently or for courses or seminars, in which case all 45 minimum credits will be in course credits.

- * *Foreign language requirement:* The student must fulfill one additional language requirement in addition to the language of specialization. The language can be either European or an Asian one; however, it should not be English. The language chosen must be relevant to the student's program of study, which is to say that the knowledge of it will provide him access to a body of critical literature on his field (as in the case of French or German) or will improve his grasp of the structure or etymological sources of Japanese (as in the case of Chinese or Korean). It may not be the student's native language.
- * *M.A. General Examination:* Near the end of study, the student takes two written examinations, each of two hours' duration, one in pre-modern (pre-Meiji) literature, and the other modern. These are intended to examine the student's general mastery of the respective areas.

Master of Arts, Japanese Language and Linguistics

Admission Requirements

- * A minimum undergraduate GPA of 3.00 in the junior and senior years
- * Three letters of recommendation and a statement of purpose
- * Strong undergraduate preparation in any of the following: Japanese language and literature, with the equivalent of at least four years' work in the language; another language and literature, Asian regional studies, comparative literature, linguistics, art history, English, philosophy, or history.
- * While a student lacking such preparation may be admitted, the student will be expected to concentrate initially on compensating for deficiencies in background by taking course work chosen in consultation with the academic adviser. In the case of inadequate training in Japanese, intensive courses in the language are available.

Degree Requirements

45-75 credits, as follows:

- * *Coursework:* The M.A. program requires a minimum of 45 credits above the 300 level which are to be earned through a combination of course work and research. At least 18 credits of course work must be completed in numerically graded courses at the 400 and 500 level, and 18 credits at the 500 level and above.

The following courses normally constitute a minimal level of training: JAPAN 421, JAPAN 422, JAPAN 423 (5, 5, 5, if language training is necessary); JAPAN 342 (5, no graduate credit); JAPAN 343 (5, no graduate credit); JAPAN 440 (5); JAPAN 442 (5); JAPAN 443 (5). Students whose undergraduate training has provided them with a background comparable to this may enter more advanced courses. Less well prepared students may require a program considerably in excess of the minimum of 45 credits.

The student may present research in either of two ways: 1) by submitting a thesis, in which case the student takes at least 36 course credits and 9 thesis credits (ASIAN 700), or 2) by submitting two research papers that have been written either independently or for courses or seminars, in which case all 45 minimum credits will be in course credits.

- * *Foreign language requirement:* The student must fulfill one additional language requirement in addition to the language specialization. The language can be either European or an Asian one; however, it should not be English. The language must be relevant to the student's program of study, which is to say that knowledge of it will provide him access to a body of critical literature on the student's field (as in the case of French or German) or will improve the student's grasp of the structure or etymological sources of Japanese (as in the case of Chinese or Korean). It may not be the student's native language.
- * *Linguistics:* Near the end of the course of study, each student takes two written examinations in Japanese linguistics, whether in descriptive linguistics, theoretical linguistics, applied linguistics, or sociolinguistics. These are intended to examine the student's general mastery of the respective areas.

Master of Arts, Korean

Admission Requirements

- * A minimum undergraduate GPA of 3.00 in the junior and senior years
- * Three letters of recommendation and a statement of purpose
- * Strong undergraduate preparation in any of the following: Korean language and literature, another language and literature, Asian regional studies, comparative literature, linguistics, English, philosophy, history or an approved area in the humanities or social sciences
- * Three years of Korean language training. Students lacking such preparation are required to take the necessary courses during their first year of residence.

Degree Requirements

39 credits, as follows:

- * *Coursework:* KOREAN 415, KOREAN 416, KOREAN 417 (5, 5, 5); ASIAN 498 (5) or KOREAN 462 (5); KOREAN 531 (5); KOREAN 532 (5);

ASIAN 700 (9). The student must also either 1) submit a thesis, or 2) submit two research papers in lieu of a thesis.

- * *Foreign language requirement:* The student must fulfill one additional language requirement in addition to the language of specialization. The language can be either European or an Asian one; however, it should not be English. The language chosen must be relevant to the student's program of study. It may not be the student's native language.
- * *M.A. examination:* The student must take a written examination in two parts, each part to be two hours in length. One part is in pre-modern Korean literature, the other modern. The student should take the M.A. examination no later than autumn quarter of the third year.

Master of Arts, South Asian Languages and Literature

Admission Requirements

- * Minimum undergraduate GPA of 3.00 in the last 90 quarter or 60 semester credit hours
- * Three letters of recommendation and a statement of purpose
- * Preference is given to students with prior preparation in a South Asian language and literature, in South Asian regional studies, or in a humanistic discipline pertinent to the study of South Asian civilization. Students lacking such preparation may be admitted to the M.A. program; however, they must remedy any deficiencies by adding, as early as possible, such courses as the academic adviser considers necessary. South Asian languages in which specializations are offered at the University are Sanskrit and Hindi.

Degree Requirements

45-75 credits, as follows:

- * Coursework:
 - o Non-thesis program: 45 course credits, 18 of which must be at the 500 level and above. Language study through the fourth-year level in the student's major language and through the second-year level in a second South Asian language. In addition, the student must present two seminar papers which are approved by the student's adviser and at least one other faculty member in the department.
 - o Thesis program: 45 course credits plus 9 thesis credits. At least 18 of the 45 credits must be taken at the 500 level or above. The language requirements in this program are the same as in the non-thesis program. In addition, the student must write an acceptable M.A. thesis according to the rules and policies of the Department of Asian Languages and Literature and pass an oral examination.
- * Foreign language requirements: Students must demonstrate competence in their major South Asian language, and must complete the course requirements in their second South Asian language as outlined above. In addition, students must demonstrate through a written examination reading knowledge of one foreign language relevant to their research, which must be other than English and the student's native language. At the M.A. level, this language may be the student's second South Asian language or a European language.

Doctor of Philosophy, Buddhist Studies

Admission Requirements

M.A. degree in Asian Languages and Literature at the University of Washington and a satisfactory evaluation by South Asian Language Program faculty. Students with sufficient background, usually the successful completion of a relevant M.A. degree at another institution, may be considered for admission into the Ph.D. program.

Degree Requirements

90 credits, as follows:

For the Ph.D., students are expected to demonstrate the ability to do original research utilizing primary languages of Buddhist traditions in accordance with their chosen areas of concentration. Students are required to demonstrate competence in their major Asian languages and pass written examinations in two research languages other than English and the student's native language (that is, one written examination in addition to the examination completed at the M.A. level). Where appropriate, students are strongly encouraged to acquire competence in a modern research language

in order to pursue research in the field: for example, in India, Nepal, Sri Lanka, Tibet, China, or Japan.

Students are also required to pass four written field examinations selected in accordance with the student's interests. Generally, at least two of these examinations are directly related to some aspect of Buddhist studies and a third falls within the general purview of South Asian languages and literature. A fourth field examination can have as its subject an adjacent field or discipline. Once these field examinations have been satisfactorily completed, the student is eligible to take a two-hour comprehensive oral examination, administered by the student's supervisory committee. When that has been passed, students are accorded candidate's status and are ready to submit a dissertation proposal. The Ph.D. is conferred once the completed dissertation has been defended successfully before the student's supervisory committee.

Doctor of Philosophy, Chinese

Admission Requirements

After successful completion of 45 credits (a minimum of three quarters) of graduate study in the department, a student wishing to enter the Ph.D. program with specialization in Chinese language and literature submits a formal petition to the Department stating post-M.A. academic plans and goals.

Ideally, the prospective candidate will have completed an M.A. degree in the field of Chinese language and literature prior to entering the Ph.D. program. If the student has an M.A. in another pertinent field, for example, in Linguistics, comparative literature, philosophy, history, or Asian regional studies, it is not necessary to take an additional M.A. in Chinese language and literature. The student, however, is required to satisfy all course and examination requirements for the M.A. program in this department. Upon admission to the program, the student should be prepared to take courses in modern Chinese at the 500 level, and should have at least two years of Classical Chinese.

A student who intends to go directly from the B.A. to the Ph.D. program must present an exceptionally strong background preparation in the disciplines of literary study or linguistics. The student is expected in the course of his or her work to satisfy all curriculum requirements for the M.A., and must petition the department for special permission to bypass the M.A.

Degree Requirements

90 credits, as follows:

- * *Course requirements:* Students in the Ph.D. program must complete the course requirements for the M.A. in Chinese. Equivalent courses from other programs may be substituted subject to written approval by the regular instructor of the course in question. In addition, whichever quarters of the sequence CHIN 461, CHIN 462, CHIN 463 were not taken for the M.A. must be taken for the Ph.D. The student's post-M.A. course work should be designed, in consultation with the adviser, to fill in gaps or strengthen weaknesses in the student's background, and to establish and develop four fields of special study that the student pursues in some depth in preparation for the general examination.
- * *Field requirements:* The student is expected to familiarize himself or herself with both the original texts and the secondary scholarship of the field, and to show some potential for carrying out original research in the area or field in question. Each student must pursue four such fields of special study, and is examined separately by an appropriate faculty member prior to the general oral examination. The field examinations must be written.

The four fields that a student elects to study must, in the aggregate, reflect both of the primary components of the department's graduate-level offerings, i.e., language (linguistics and philology) and literature. Students are encouraged in connection with at least one field to incorporate to a significant extent some aspect of Chinese history and culture, exclusive of strictly literary or linguistic facets thereof. With permission of his or her adviser a student may offer one field from outside the Department, for example, in general linguistics, literary criticism, a non-Chinese literature, Chinese philosophy or religion, or a particular period of Chinese history. Such a field must be demonstrably related in a significant way to the student's overall course of study.

- * *Examinations:* The student is examined in each of the four fields separately by an appropriate faculty member. Prior to the General

Examination the student must demonstrate a reading knowledge of an additional Asian language and a pertinent European language. (The student may apply the foreign language reading examination required for the M.A. to this requirement.)

Doctor of Philosophy, Japanese

Admission Requirements

Aside from having to complete at least two quarters of graduate study in the department, the student petitioning for admission to pre-candidacy status in the Ph.D. program must either hold the M.A. degree in Japanese language and literature or must have completed a minimum of 45 course credits and have satisfied the language requirement for the M.A. The student should also be taking at least 500-level courses in modern Japanese and should have studied classical Japanese for a minimum of one year. Any insufficiencies in background (e.g., in the case of a student holding an M.A. in an area other than Japanese language and literature) should be made up before the student petitions for admission to pre-candidacy. The petition indicates that the student feels he or she is prepared to take a written examination on the student's general knowledge of the field and an additional oral diagnostic examination on his or her background and plans for future study. The petition should only be submitted after consultation with the academic adviser.

Degree Requirements

95 credits, as follows:

- * *Course requirements:* In addition to the minimum of 45 credits or its equivalent required for the master's program, the student must take at least 50 credits of course work on the graduate level. The following courses and dissertation credits are required: JAPAN 501 (5); JAPAN 505, JAPAN 506, JAPAN 507 (5, 5, 5); JAPAN 531, JAPAN 532, JAPAN 533 (5, 5, 5); JAPAN 571, JAPAN 572, JAPAN 573 (5, 5, 5); JAPAN 590 (15); ASIAN 800 (27)

Additional course work in related fields may be required to meet the needs of each program. In order to acquire the widest possible background, students are encouraged to take related courses in history, linguistics, religion, and the social sciences. Familiarity with Chinese literature and allied fields as well as with comparative literature is strongly recommended. Each student develops an individualized program of studies in consultation with the academic adviser.

- * *Language examinations:* In addition to a second language (usually European) required for the M.A., the student must demonstrate proficiency in a third language, usually Asian (Chinese is the usual choice for an Asian language, but the student should discuss other possibilities with the adviser). Proficiency must be demonstrated in the third language before the student may proceed to the General Examination.
- * *Field examination:* Upon becoming a precandidate, the student has completed a generalized study of the area of Japanese language and literature, and should choose four specialized fields to study for the next one or two years under the guidance of the Supervisory Committee. The four fields must be sufficiently diverse, and at least one of them must be in language. As the supervisor for each field becomes satisfied that the student has attained sufficient mastery, the supervisor and the student decide on a time for the student to take a written examination.
- * *General examination:* When the four field examinations and the third language requirement have been satisfied, the academic adviser arranges with the Graduate School for the student to take the oral General Examination for admission to candidacy for the doctoral degree.
- * *Dissertation and final examination:* After achieving candidate status, the student engages in research and the writing of the dissertation. When the Reading Committee has accepted the dissertation, the Dean of the Graduate School authorizes the Supervisory Committee to hold the Final Examination in defense of the dissertation, which completes the degree requirements for this program.

Doctor of Philosophy, Korean

Admission Requirements

A student shall petition for admission to the Ph.D. program with specialization in Korean literature after successful completion of at least two quarters

of graduate study in the Department of Asian Languages and Literature. The student should either have the M.A. degree in Korean literature or the equivalent, or have satisfactorily completed all coursework required for the M.A. in Korean literature. The student should be prepared to take 500-level courses in Korean. The petition should be submitted after consultation with the student's academic advisor.

Degree Requirements

90 credits, as follows:

- * *Coursework:*
 - o *Korean language and literature:* In addition to the course requirement and examination for the M.A. in Korean literature, students in the Ph.D. program must complete the following courses: KOREAN 531 (5), KOREAN 532 (5), ASIAN 800 (27)
 - o *Chinese language and literature:* Students interested in pre-modern Korean literature are required to take two years of Chinese, at least one year of classical Chinese, and a survey course on pre-modern Chinese literature. Students interested in modern Korean literature are required to take either: (1) three years of Chinese and a survey course in Chinese literature, or (2) three years of Japanese and a survey course in modern Japanese literature.
 - o *Linguistics:* Students are encouraged to take linguistics courses that help the student prepare for the field exam in a language-related area. Courses to choose from include the following: ASIAN 401 (5), JAPAN 440 Linguistics (5).
 - o *Interdepartmental:* Students are encouraged to take Korea-related courses in other disciplines such as history and anthropology. Familiarity with other literatures and cultures, and course work in other departments such as Comparative Literature or other language and literature programs is also recommended.
- * *Field examinations:* With the guidance of an adviser, students develop a plan of study that concentrates on four areas of study, or "fields". A student may offer no more than one Korea-related field from outside the department; three of the fields must be prepared with department faculty. One of the fields may be in another Asian language or literature, depending on the student's interests. At least one of the fields shall be related to language.
- * *Language examinations:* Prior to the General Examination, students must demonstrate proficiency of an additional Asian language and a European language. (The student may apply the foreign language required for the M.A. to this requirement.)
- * *General examination, dissertation, final examination:* When the four field examinations have been successfully passed, and the second language requirement met, the academic adviser arranges with the Graduate School for the student to take the oral General Examination for admission to candidacy for the Doctoral degree. This is usually a two-hour long oral examination, and covers principally, but not exclusively, the four fields that the student has prepared. Passing this examination, the student then writes a dissertation, under the direction of a dissertation adviser. An oral Final Examination in defense of the finished dissertation completes the degree requirements for this program.

Doctor of Philosophy, South Asian Languages and Literature

Admission Requirements

Normally, entry into the program is contingent upon successful completion of the M.A. degree in Asian Languages and Literature at the University of Washington and a satisfactory evaluation by South Asian Language Program faculty. Students with sufficient background, usually the successful completion of a relevant M.A. degree at another institution, may be considered for admission into the Ph.D. program.

Degree Requirements

90 credits, as follows:

For the Ph.D., students are required to demonstrate competence in their major South Asian language and pass written examinations in two research languages other than English and the student's native language (that is, one written examination in addition to the examination completed at the M.A. level). One of these two research languages must be a European language.

Students are also required to pass four written field examinations, at least three of which must fall within the general purview of South Asian languages and literature. A fourth can have as its subject an adjacent field or discipline, of the candidate so chooses--an aspect of South Asian history or art history, for example. Once these field examinations have been satisfactorily completed, the student is eligible to take a two hour comprehensive oral examination, administered by his or her supervisory committee. When that has been passed, students are accorded candidate's status and are ready to submit a dissertation proposal. The Ph.D. is conferred once the completed dissertation has been defended before the student's supervisory committee.

Financial Aid

Financial aid for graduate students newly entering the department is very limited and is awarded on a competitive basis. National Resource Fellowships are awarded for the study of Chinese, Japanese, and Korean. The department offers incoming graduate students limited opportunities for teaching assistant positions in Chinese, Japanese, and Korean. Since some financial aid is wholly or partially determined by need, all prospective students are urged to submit the Free Application for Federal Student Aid (FAFSA) with the College Scholarship Service in New Jersey, and to apply for other forms of aid mentioned in the department's cover letter to prospective students.

Course Descriptions

See page 293.

Astronomy

C319 Physics-Astronomy Building

Modern research in astronomy and astrophysics encompasses a large number of disciplines and specialties. Research areas include planetary astronomy, stellar structure and evolution, interstellar matter, x-ray sources, galactic structure, extragalactic astronomy, galactic dynamics, quasars and galactic nuclei, and theoretical and observational cosmology.

Undergraduate Program

Adviser
C311 Physics-Astronomy, Box 351580
206-543-1988
office@astro.washington.edu

The Department of Astronomy offers the following undergraduate programs:

- * The Bachelor of Science degree with a major in astronomy

Bachelor of Science

Suggested First-Year Courses: MATH 124, MATH 125, MATH 126; MATH 308, MATH 324; PHYS 121, PHYS 122, PHYS 123. At community colleges it is better to take courses in physics, chemistry, mathematics, and computer science than the usual introductory astronomy courses.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

89 credits as follows:

1. ASTR 321, ASTR 322, ASTR 323
2. 9 credits of astronomy 400-level courses (with at least 3 credits in 480 or 499)
3. PHYS 121, PHYS 122, PHYS 123; PHYS 224, PHYS 225, PHYS 227, PHYS 228; PHYS 321, PHYS 322, PHYS 334
4. MATH 124, MATH 125, MATH 126; MATH 308, MATH 324
5. 12 additional credits in courses at the 300 level or above in physics (chosen from PHYS 315, PHYS 323, PHYS 324, PHYS 328, PHYS 331, PHYS 335, PHYS 421, PHYS 422, PHYS 423, PHYS 424, PHYS 425, PHYS 426, PHYS 431, PHYS 432, PHYS 433, PHYS 434) or engineering as approved by adviser. Data analysis (ASTR 480) and senior-year

research (ASTR 499) are highly recommended, especially for students planning graduate work.

6. No grade lower than 2.0 is acceptable in courses fulfilling the above requirements.
7. Undergraduates interested in advanced work in astronomy are advised to take a double major in astronomy and physics. Undergraduates interested in immediate employment at an observatory or other scientific institution should include computing and electronics courses as part of their program.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* With this degree, students obtain a knowledge of the components of the universe, an understanding of the physics of its structure, and the technical skills to obtain and analyze data from telescopes. Graduates go on to graduate school or work at observatories or in industrial applications (lasers, x-ray, optical imaging) or in teaching applications.

* *Instructional and Research Facilities:* The department operates a 30-inch telescope with modern instrumentation at the Manastash Ridge Observatory near Ellensburg primarily for students. The department is also part of a consortium of universities that operate a 3.5-meter optical/infrared telescope located on Sacramento Peak, New Mexico, and is a partner in the innovative Sloan Digital Sky Survey. Students also have access to a variety of national facilities, such as the Kitt Peak and Cerro Tololo observatories and the Very Large Array. A variety of research is conducted with satellite instruments such as the Hubble Space Telescope. Data analysis and theoretical research are conducted on the department's cluster of computers, and on a variety of UW and national supercomputer facilities. Undergraduate majors often assist faculty members in acquisition, reduction, and interpretation of data.

* *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

* *Research, Internships, and Service Learning:* Space Grant

* *Department Scholarships:* Baer Prize. See adviser for details.

* *Student Organizations/Associations:* The Society of Physics Students. Undergraduate Astronomy Institute. See adviser for details.

Of Special Note: The first required astronomy course, ASTR 321, must be preceded by at least one year of college physics and mathematics. Any lower-division astronomy courses count as electives and not as part of the major. To finish in four years, the student must have completed PHYS 123 before autumn quarter of the junior year.

Graduate Program

Graduate Program Coordinator
C304 Physics-Astronomy, Box 351580
206-685-2392
office@astro.washington.edu

A series of graduate courses in solar system, stellar, galactic, and extragalactic astrophysics is offered. The heart of the graduate program is the collaboration of students and faculty members in research at the frontiers of astronomy. Students work collaboratively with members of the faculty to develop the techniques and insight necessary for successful research, and, subsequently, to define a thesis topic. The student's thesis research may be purely theoretical or use observational material (obtained through the facilities of either the University of Washington or one of the national observatories) or a combination. Active research programs are being carried out in the areas of stellar interiors, stellar atmospheres, planetary atmospheres and surfaces, x-ray sources, interplanetary dust, interacting binary stars, extragalactic astronomy, gravitation, interstellar matter, dark matter, cosmology, relativistic astrophysics, and computational astrophysics.

Doctor of Philosophy

Admission Requirements

Most, though not all, entering students have a bachelor's degree in physics. Entering students are not required to have a background in astronomy, although some knowledge of general astronomy is expected of those to whom a teaching assistantship is to be offered. Undergraduates interested in a graduate program in astronomy are urged to concentrate on prepara-

tion in physics and mathematics before entering.

- * Application for Graduate Admission (AGA) form of the UW Graduate School
- * Application fee
- * A copy of the AGA to the Astronomy Department
- * "Statement of Goals and Achievements." This one-page, typed essay must address the reasons why the applicant wishes to pursue a graduate program in astronomy.
- * Transcripts from all previous colleges and academic programs
- * Graduate Record Examination (GRE) scores, both general and in the physics subject test, sent from the testing service
- * Three letters of recommendation on the appropriate forms and sent directly to the department before the application deadline by the recommender.
- * For international applicants:
 - o A second set of transcripts from all previous colleges and academic programs
 - o A paper copy of the AGA mailed to the Graduate School;
 - o TOEFL score report
 - o UW Statement of Financial Ability
 - o Test of Spoken English (TSE) scores, sent by the testing service

Degree Requirements

90 credits minimum, as follows:

Typically, students take courses during their first two to three years at the UW while at the same time sampling research projects with various faculty. The department offers a full set of graduate astronomy courses covering every major research area in astrophysics. The areas covered include planetary astronomy, stellar interiors and atmospheres, interstellar medium, galaxies, dynamics, cosmology, physical processes, observational astronomy, and a variety of special topics. Right from their first year students are encouraged to embark on faculty-supervised research programs so that they will make informed decisions about a thesis topic and a professional research career.

Core Curriculum: Students may take either core courses with an emphasis in stellar astronomy or core courses with an emphasis in galactic and intergalactic astronomy. Either emphasis should be completed in the first two or three years of study:

- * *Stellar astronomy emphasis:* ASTR 507 (3), ASTR 519 (3), ASTR 521 (3), ASTR 522 (3), ASTR 531 (4), ASTR 532 (3), ASTR 557 (3), ASTR 561 (3)
- * *Galactic and intergalactic astronomy emphasis:* ASTR 508 (3), ASTR 509 (3), ASTR 511 (3), ASTR 512 (3), ASTR 513 (3), ASTR 541 (3)

Students must pass two examinations, the Qualifying Exam and the General Exam, before being admitted to Ph.D. candidacy. The Qualifying Exam, which is a written exam covering general knowledge, must be passed by the end of the third year of matriculation. The General Exam is a 40-minute oral exam on a topic related to a student's proposed Ph.D. research topic. Students embark on their Ph.D. research program after passing the General Exam, typically in their third or fourth year at U.W. Most students complete their PhD thesis two to three years later.

A Master of Science degree is offered. The requirements for a master's degree are either (1) adequate performance on the Qualifying Exam or (2) an approved and supervised master's thesis. Students must present a minimum of 36 credits for the Master of Science degree

Assistantships

Normally all students making satisfactory academic progress receive financial support. More than three-quarters of the department's graduate students hold fellowships or research assistantships. A number of teaching assistantships are available, primarily in the elementary astronomy courses.

Course Descriptions

See page 301.

Atmospheric Sciences

402 Atmospheric Sciences-Geophysics Building

Atmospheric Sciences is a wide-ranging discipline that includes topics as diverse as weather forecasting, global warming, air quality, Pacific Northwest weather and climate, mountain weather, marine weather, El Nino, the ozone hole, ice ages, and the weather of Mars. It considers problems that are both scientifically challenging and critical for the welfare of modern society. These problems are addressed with theory, measurements, and computer simulations.

Undergraduate Program

Adviser
402 Atmospheric Sciences-Geophysics Building, Box 351640
206-543-4576
advise@atmos.washington.edu

The Department of Atmospheric Sciences offers the following programs of study:

- * The Bachelor of Science degree with a major in atmospheric sciences
- * A minor in atmospheric sciences

Bachelor of Science

Suggested First- and Second-Year Courses: CHEM 142; CSE/ENGR 142

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

74 credits as follows:

1. *Core requirements:* MATH 124, MATH 125, MATH 126; MATH 324; PHYS 121, PHYS 122, PHYS 123; AMATH 301, AMATH 351, AMATH 353; CSE 142; ATM S 301, ATM S 321, ATM S 340, ATM S 358, ATM S 370, ATM S 431, ATM S 441
2. *Area of specialization:* 19 credits of additional coursework at the 200 level or above, selected in consultation with the faculty adviser. Suggested options include meteorology, atmosphere and environment, atmosphere and ocean, and teacher education.
3. A grade of 2.0 or better in each of the required courses and an overall GPA in these courses of 2.50.

Pregraduate Program for Physical Science, Mathematics, and Engineering Majors

The following elective course sequence is suitable preparation for students interested in pursuing graduate study in atmospheric sciences: ATM S 301, ATM S 340, ATM S 441.

Minor

Minor Requirements: 25 credits to include ATM S 301 plus other approved courses. The minor may include a maximum of 6 independent study credits. Prerequisites include MATH 126 or MATH 136, and PHYS 123. Some courses may require further math or chemistry experience.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The degree program qualifies students for professional employment in weather forecasting, air-quality control and monitoring, and other areas of atmospheric sciences and related fields. The baccalaureate degree also is appropriate preparation for graduate study in atmospheric sciences.
- * *Instructional and Research Facilities:* Extensive computer resources are available in the Departmental Computer Laboratory. The Department also maintains a map room for viewing weather data in either print or electronic format. A study area is provided for undergraduates. An instrument laboratory is maintained with a wide range of observing and data collection systems. Students also have access to a machine shop, several electronic laboratories and an extensive weather data archive.

* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

* *Research, Internships, and Service Learning:* Internships are available either within the department or with outside organizations, providing a valuable opportunity to test a student's interests in various meteorological career paths and to extend the student's knowledge. A limited number of departmental scholarships are available each year, based on academic excellence or financial need. Employment opportunities are often available in one of the many departmental research groups, and some internships are paid.

Students majoring in atmospheric sciences may take advantage of a variety of opportunities to enhance their education. Undergraduate students are welcome at the department's many seminars and colloquia and are encouraged to join in the annual forecast contest. They may work on independent research projects under the guidance of a faculty member, or be an active participant in a field program.

* *Department Scholarships:* The Bruce Caldwell Memorial Scholarship and the Anonymous Donor Atmospheric Sciences Scholarship, which are both awarded annually, based on both academic excellence and financial need.

* *Student Organizations/Associations:* Student Chapter of American Meteorological Society, Puget Sound American Meteorological Society Chapter, Weekly Weather Discussion for all majors.

Of Special Note: The first required atmospheric sciences course is ATM S 301, which is offered autumn quarter only. Any lower-division atmospheric sciences courses will count as electives and not as part of the major.

Graduate Program

Graduate Program Coordinator
402 Atmospheric Sciences-Geophysics, Box 351640
206-543-4576
advise@atmos.washington.edu

Rapid growth of research in atmospheric sciences began in the late 1940s in response to needs and opportunities in weather forecasting. Extensive research is now underway to extend the time scale over which useful forecasts can be made and to increase the amount of regional and temporal detail in short-range forecasts. In addition, the atmospheric sciences now address a broad range of other problems of fundamental interest and importance. Examples include changes in climate that could result from increases in atmospheric CO₂ and other greenhouse gases, and the application of remote-sensing techniques to the monitoring and understanding of weather and climate.

Graduate students in the atmospheric sciences come from a variety of disciplines: physics, chemistry, engineering, atmospheric, or geophysical sciences, and applied mathematics. Opportunities are broad enough that each of these backgrounds is valuable for specific subfields within the atmospheric sciences. However, students of atmospheric sciences should have in common a sound background in the fundamentals of physics and applied mathematics and an interest in complex natural phenomena. Research projects and graduate courses in the Department of Atmospheric Sciences are closely related, and the well-prepared graduate student may expect to begin research work rather quickly.

Master of Science

Admission Requirements

- * Complete Graduate School application (a copy must be sent to the department)
- * Official copy of transcripts
- * Assistantship and Fellowship Application
- * Statement of interests, a one-page, typed essay must address the reasons why the student wishes to pursue a graduate program in Atmospheric Sciences.
- * GRE General Examination scores sent from the Educational Testing Service
- * Three letters of recommendation on the appropriate forms sent directly to the department by the evaluators
- * For international applicants: TOEFL scores, sent by the testing service
- * *Deadline:* January 15. Autumn quarter is the only quarter for which the department accepts applications.

Degree Requirements

Core classes (25-28 credits): ATM S 501 (5), ATM S 502 (3), ATM S 535 (3), ATM S 532 (3), ATM S 558 (3). One of the following sequences: ATM S 505 (4), ATM S 509 (4), ATM S 542 (3); or ATM S 503 (3), ATM S 504 (5)

The two-course dynamics sequence (ATM S 503, ATM S 504) is intended for those whose research specialty will be well outside the realm of dynamic meteorology. Most students are encouraged to take the three-course sequence in dynamics (ATM S 505, ATM S 509, ATM S 542).

Master's students need 36 credits to graduate (excluding seminars and colloquia). 27 of the credits presented must be from the core classes with 24 of those credits in Atmospheric Sciences courses. The remaining 9 credits should be in the form of ATM S 700, Master's Thesis. However, those students intending to pursue a Ph.D should take all of the courses required above.

Doctor of Philosophy

Admission Requirements

All students admitted into the Atmospheric Sciences graduate program are admitted initially to the M.S. track of study. Students in the M.S. track who seek entry into the Ph.D. program will be evaluated by the departmental Committee on Graduate Studies.

A student who wishes to be considered by the committee must first write a letter to the Academic Counselor and also to the student's M.S. committee, requesting admission into the Ph.D. program, and choosing one of the three following evaluation options:

- * A student entering the department, having already earned an M.S. degree in the atmospheric sciences or a closely related discipline, may submit his or her M.S. thesis for evaluation in the first week of the autumn quarter of the student's second academic year in the department.
- * A student may submit a draft of his or her University of Washington Department of Atmospheric Sciences M.S. thesis approved by the M.S. supervisory committee for evaluation.
- * A student may submit for evaluation the manuscript of a peer-reviewed journal article on which the student is lead author.

Degree Requirements

- * Coursework:
 - o ATM S 501 (5), ATM S 502 (3)
 - o ATM S 505 (4), ATM S 509 (4) (Students whose anticipated research has minimal connection with atmospheric dynamics, such as those involved in laboratory or field work in atmospheric chemistry or cloud microphysics, may take ATM S 503 and 504 in place of ATM S 505 and 509. Please see the Graduate Program Coordinator before enrolling in ATM S 503.)
 - o Either ATM S 532 (3) or ATM S 558 (3)
 - o ATM S 535 (3), ATM S 542 (3)
 - o One of the following must be taken each quarter that coursework is taken: ATM S 520 (1), either ATM S 521 (1) or ATM S 524 (1), or ATM S 600 (up to 10 credits each quarter)
 - o Electives: Students should take an appropriate number of elective courses in their areas of interest, as determined in consultation with adviser
 - o Applied math: either AMATH 401 (4) or AMATH 567 (5); either AMATH 402 (4) or AMATH 568 (5)
 - o ATM S 700 (10 credits each quarter, beginning the second year of the program)
- * General Examination
- * Dissertation
- * Final Examination

Assistantships

Nearly all graduate students are supported by either research assistantships or fellowships. Students are usually a teaching assistant during at least one quarter, in the second year of study. Students are supported full-time during the summer.

Course Descriptions

See page 302.

Biochemistry

109 Bagley

Biochemistry is the study of the living organism at the molecular level. It draws on the techniques of analytical, organic, inorganic, and physical chemistry in determining the molecular basis of vital processes.

Undergraduate Program

Adviser

109 Bagley, Box 351700
206-616-9880, 206-543-9343
advisers@chem.washington.edu

The Biochemistry Program offers the following programs of study:

- * The Bachelor of Science degree with a major in biochemistry

Bachelor of Science

Suggested First and Second-Year Courses: BIOL 180, BIOL 200 (or BIOL 201, BIOL 202); CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 with one physics lab course strongly recommended).

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

106 credits as follows:

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
2. PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116), with the PHYS 121 sequence recommended
3. CHEM 142, CHEM 152, CHEM 162, (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); CHEM 452, CHEM 453 (or CHEM 455, CHEM 456, CHEM 457 or CHEM 475, CHEM 476, CHEM 477)
4. BIOL 180, BIOL 200 (or BIOL 201, BIOL 202)
5. GENOME 371
6. BIOC 426, BIOC 440, BIOC 441, BIOC 442
7. 11 credits chosen from a current department list (available in 109 Bagley) of upper-division science classes including math, biology, microbiology, chemistry, genome sciences, zoology. Up to 9 credits of approved advanced-level undergraduate research may also be applied to this requirement.
8. A minimum 2.80 GPA is required for all chemistry, biology, and biochemistry courses counted toward the major; a minimum 2.0 grade is required for all chemistry, biology, and biochemistry courses counted toward the major. A minimum 2.50 GPA is required for the BIOC 440, BIOC 441, and BIOC 442 sequence.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* At the conclusion of their studies, graduating biochemistry majors should possess a general working knowledge of the basic areas of biochemistry; be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of biochemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to biochemistry majors.

Students planning a career in biomedical research, the health professions, or biotechnology find the biochemistry degree to be an excellent choice. The degree is also good preparation for graduate school in any aspect of biochemical or biomedical research.

- * *Instructional and Research Facilities:* Research facilities for the department are housed in the Biochemistry-Genetics Building, which provides approximately 52,000 square feet of research space, conference rooms, and a departmental library. In the immediate vicinity are the departments of Immunology, Genome Sciences, Microbiology, and Pharmacology, as well as programs in biomolecular structure, molecular medicine, neurobiology and molecular and cellular biology, with which the department has common research interests. The laboratories are equipped with modern research equipment and are supported by external, centralized research facilities. An emphasis on biomedical research is facilitated by the location of the department within the School of Medicine.

- * *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

- * *Research, Internships, and Service Learning:* No formal internship program. Students are encouraged to pursue national and regional internships. See advisers for more information.

- * *Department Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department advisers for more information.

- * *Student Organizations/Associations:*
 - o Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
 - o Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
 - o The Free Radicals: a general undergraduate club for chemistry and biochemistry majors.

Of Special Note:

- * This degree requires a minimum of 196 credits.
- * Students are strongly encouraged to participate in undergraduate research.

Course Descriptions

See page 548.

Biology

106 Kincaid

Biology is the broadly based study of living organisms and has become an increasingly dynamic and wide-ranging discipline. It may be approached by focus on cell and molecular processes, development, organismal physiology and morphology, natural history, evolution, conservation, or ecology. The aim is to elucidate general principles applicable to many different sorts of organisms rather than to concentrate on any particular taxonomic group. Biology is often interdisciplinary in nature and may involve aspects of biochemistry, botany, genetics, microbiology, zoology, and many other natural sciences.

Undergraduate Program

Adviser

318 Hitchcock, Box 355320
206-543-9120
bioladv@u.washington.edu

The Department of Biology offers the following programs of study:

- * The Bachelor of Arts degree with a major in biology.
- * The Bachelor of Science degree with a major in biology. Students choose one of the following options: ecology and evolution; environmental and conservation; general; molecular, cellular, and development; physiology; and plant.

Designed for students desiring breadth of training, the Bachelor of Arts program does not require physics. Students do not select an emphasis, and hence have greater flexibility in upper division biology electives. An ideal degree for students wishing to double major in arts or humanities and in biology or who wish to design their own degree program.

The Bachelor of Science options are as follows:

1. *Ecology and Evolution.* Emphasizes ecological and evolutionary processes and relationships of those processes to systematics and biogeography of organisms. For students who wish to pursue graduate studies or seek employment in the fields of theoretical and applied ecology, evolution, systematics and biogeography, and mathematical biology.
2. *Environmental and Conservation.* Addresses conservation and restoration aspects of species, populations, and ecosystems, as well as related areas of law and environmental policy. While this is the most interdisciplinary program, it does require the same supporting and foundation courses in science as the other options.
3. *General.* Emphasizes breadth of training in biology. This is the most flexible program and offers a greater variety of advanced electives than other options. Attractive to students desiring K-12 teaching credentials or who otherwise wish to tailor their degree to their needs.
4. *Molecular, Cellular, and Development.* Designed for students who wish to pursue graduate studies in genetics, biochemistry, microbiology, cell biology, or developmental biology, as well as for candidates for professional schools such as medicine and dentistry.
5. *Physiology.* Emphasizes physiological processes from the cellular to the organismal levels, and across all groups of organisms. An attractive option for students interested in graduate and professional fields in animal and human physiology, medicine, and veterinary sciences.
6. *Plant.* Offers students both breadth and depth of training in the field of botany. Ideal for students desiring to enter graduate programs in botany or for those wishing to pursue careers in the plant biology or horticultural fields in state and federal agencies.

Each of the above bachelor's degree programs in the biological sciences can be combined with Washington State requirements to prepare students to teach biology in public schools at the secondary level. See the Biology Teaching Program adviser for specific requirements.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Same as for the Bachelor of Science degree as described below, except no physics is required.

Department Admission Requirements

Same as for the Bachelor of Science degree as described below.

Major Requirements

90 credits as follows:

1. Introductory biology, three to six quarters of chemistry, and mathematics are the same as required by the B.S., listed below. However, physics is not required and the remaining 36 upper division elective credits may be chosen from any biology course or any courses on the electives lists from the six options for the BS degree.
2. Additional Degree Requirements.
 - a. A minimum of 15 credits of 400-level biology electives must be taken at the UW.
 - b. Minimum GPA requirements are the same as for a B.S.

Bachelor of Science

Suggested First- and Second-Year Courses: Students should concentrate on general chemistry and mathematics the first year, biology and organic chemistry the second year (see major requirements for specific courses). Transfer students: complete an entire sequence at one school if possible. It is not necessary, or even desirable, to complete the Areas of Knowledge requirement during the first two years.

Department Admission Requirements

BIOL 180 or BIOL 201 with a minimum grade of 2.5; or BIOL 180, BIOL 200, BIOL 220 (or BIOL 201, BIOL 202, BIOL 203) with a cumulative GPA of 2.00 for the three courses. CHEM 142, CHEM 152, or equivalent. A minimum cumulative GPA of 2.00 is required for all courses which would apply toward major requirements (this includes all applicable chemistry, physics,

mathematics, quantitative science, and introductory biological science courses).

Major Requirements

90 credits as follows:

1. For all options the following basic coursework is required:
 - a. A one year sequence of introductory biology for majors (BIOL 180, BIOL 200, BIOL 220)
 - b. Three to six quarters of chemistry, covering general and organic chemistry: CHEM 120, CHEM 220, and CHEM 221; or CHEM 142, CHEM 152, CHEM 223, and CHEM 224; or CHEM 142, CHEM 152, CHEM 162* and CHEM 237, CHEM 238, and CHEM 239
 - c. Two quarters of mathematics (calculus or statistics): MATH 124 and MATH 125, or MATH 144 and MATH 145, or Q SCI 291 and Q SCI 292, or Q SCI 381 (or STAT 311) and Q SCI 482
 - d. Two quarters of physics: PHYS 114 and PHYS 115, or PHYS 121 and PHYS 122
 - e. GENOME 371
 - f. Natural history/biodiversity: one course selected from approved list (3 credits)
 - g. Option requirement: 300- and 400-level courses selected from lists specific to each option. See department web site for additional information. (34 credits)

*CHEM 162 is not required for this degree; however, CHEM 237, CHEM 238, and CHEM 239 are required by many professional programs and graduate schools, and the sequence does require CHEM 162.

2. Additional Degree Requirements:
 - a. A minimum GPA of 2.00 for all UW courses applied toward major requirements, including required supporting courses, introductory biology, and upper division coursework. (A grade of 2.0 is not required in individual courses.)
 - b. A minimum of 15 credits of 400-level biology electives must be taken at the UW.
 - c. Two 300- or 400-level laboratory courses

Because of the differing specific requirements and choices for each option, it is extremely important for students to work closely with the Biology departmental advisers to insure completion of these 22-25 credits.

Student Outcomes and Opportunities

* **Learning Objectives and Expected Outcomes:** The department graduates between 350 and 400 students each year. Biology degrees are applicable to many different fields, depending upon student interests. Students in the program gain analytical and laboratory skills that prepare them for entry-level positions in a variety of biologically related areas, including, but not limited to, biotechnology, laboratory and/or field research support, health science support, wildlife biology, and ecology and conservation work with a variety of agencies, consulting firms, and research organizations in the northwest. Students may enter graduate programs that focus on some aspect of biological science (such as genetics, microbiology, immunology, ecology, environmental health, or cell and molecular biology), or enter a variety of professional programs, such as veterinary medicine, medicine, dentistry, pharmacy, laboratory medicine, nursing, and others.

* **Instructional and Research Facilities:** The Department of Biology occupies 128,000 square feet in Hitchcock, Johnson, and Kincaid Halls. Extensive research laboratories, teaching laboratories, computer workstations, and support services are found throughout the department.

Specialized facilities include more than 16,000 square feet of greenhouse, seawater facilities, growth rooms, electron microscopes, and other specialized equipment. Undergraduates have access to most of these facilities, especially those engaged in undergraduate research.

Off campus, the internationally recognized Marine Research Station, Friday Harbor Laboratories, provides many opportunities for undergraduates, from courses to research apprenticeships.

* **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

* **Research, Internships, and Service Learning:** Biology faculty welcome undergraduates into their research programs, often working closely with them. Approximately 40% of the 900 undergraduate Biology majors finish with undergraduate research experience.

UW proximity to such Seattle area organizations as the Fred Hutchinson Cancer Research Center, Swedish Hospital, numerous biotech companies, NOAA, National Marine Fisheries Research Center, the Seattle Aquarium, and the Woodland Park Zoo, as well as the close ties of Biology faculty to Friday Harbor Laboratories, the faculty in the College of Forest Resources, and the College of Ocean and Fishery Sciences provide opportunities for biology majors to develop internships within these organizations. See adviser for ways to get credit for such experiences.

- * Department Scholarships: Several scholarships are available, in a few cases to biology majors only. Most of these support students wishing to pursue an undergraduate research experience. They are competitive, sometimes highly so. They include:
 - o Howard Hughes Undergraduate Research Internship: approximately 20 per year for freshmen and 20 per year for juniors and seniors.
 - o Friday Harbor Laboratory (FHL) Apprenticeships: \$3,000 for one quarter, spring or autumn.
 - o Mary Gates Scholarships: very competitive, across all science disciplines.
 - o Herschel and Caryl Roman Scholarship: \$2,500-5,000 annually to one or two students who have an interest in genetics research.
 - o Porath/Johnson Endowed Scholarship: one-year, \$5,000 scholarship to an outstanding biology major.
 - o For qualifications, deadlines, and other details, see adviser or consult the Department of Biology Web site.
- * Student Organizations/Associations: Beta Beta Beta Biology Honor Society, tribeta@u.washington.edu; Pre Med Society (Alpha Epsilon Delta), aed@u.washington.edu.

Course Descriptions

See page 304.

Chemistry

109 Bagley

Chemistry is a branch of natural science that deals principally with the properties of molecules, the chemical reactions that occur between them, and the natural laws that describe molecular interactions. Chemistry is a central science, having strong interactions with biology, medicine, earth and environmental sciences, physics, and mathematics.

Undergraduate Program

Adviser
109 Bagley, Box 351700
206-616-9880, 206-543-9343
advisers@chem.washington.edu

The Department of Chemistry offers the following programs of study:

- * The Bachelor of Arts degree with a major in chemistry
- * The Bachelor of Science degree with a major in chemistry - ACS certified
- * The Bachelor of Science degree with a major in chemistry
- * A minor in chemistry

The Bachelor of Science degree is designed primarily for those who wish to pursue a career in chemistry or a career in which chemistry plays a central role.

The department offers two Bachelor of Science degrees. The Bachelor of Science with a major in chemistry (ACS certified) meets guidelines established by the American Chemical Society (ACS). It provides an extensive education in all branches of chemistry and also emphasizes laboratory training. The non-certified major does not emphasize laboratory work as strongly, offers more options among chemistry courses, and allows more flexibility in incorporating coursework outside of chemistry.

The Bachelor of Arts in chemistry fills the needs of students whose chosen career requires a strong background in chemistry with additional expertise in other disciplines.

Bachelor of Science

Suggested First- and Second-Year Courses: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course. PHYS 121 sequence recommended); courses in linear algebra and differential equations.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Chemistry (ACS-Certified)

94 credits as follows:

1. Core Courses:
 - a. General Chemistry: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165)
 - b. Organic Chemistry: CHEM 237, CHEM 238, CHEM 239, CHEM 241, and CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346 and CHEM 347)
 - c. Inorganic Chemistry: CHEM 312, CHEM 317, CHEM 321, and CHEM 416 (students completing CHEM 165 are exempt from CHEM 312)
 - d. Analytical Chemistry: CHEM 321, CHEM 426
 - e. Physical Chemistry: CHEM 455, CHEM 456, and CHEM 457 (or CHEM 475, CHEM 476, and CHEM 477); CHEM 461
 - f. Biochemistry: BIOC 405 (students should contact adviser regarding alternative prerequisites for BIOC 405)
 - g. 5 credits of numerically graded CHEM or BIOC 400-level courses (not previously listed) which must include CHEM 426 and CHEM 461 and one more course with laboratory (currently CHEM 462, CHEM 463, CHEM 464, and CHEM 465)
 - h. Strongly recommended, research credits in CHEM 399 and CHEM 499.
2. MATH 124, MATH 125, MATH 126 and two additional math courses above 300 (recommended MATH 307 and MATH 308, or AMATH 351 and AMATH 352); (alternative math requirement: MATH 134, MATH 135, MATH 136)
3. PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.
4. Minimum grade of 2.0 is required in each chemistry course; a minimum GPA of 2.80 is required for courses used to satisfy the major degree requirements; a minimum overall cumulative GPA of 2.80 and minimum 184 credits required for graduation.

Chemistry

91 credits as follows:

1. Core Courses:
 - a. CHEM 142, CHEM 152, CHEM 162, and CHEM 312 (or CHEM 145, CHEM 155, CHEM 165, and CHEM 416)
 - b. CHEM 237, CHEM 238, CHEM 239, and CHEM 241 (or CHEM 335, CHEM 336, CHEM 337, and CHEM 346)
 - c. CHEM 455, CHEM 456, and CHEM 457 (or CHEM 475, CHEM 476, and CHEM 477)
 - d. Two of the following three: CHEM 317, CHEM 321, or CHEM 461 (CHEM 461 for 4 credits only)
 - e. 5 additional lab credits chosen from the following: CHEM 242, CHEM 317, CHEM 321, CHEM 347, CHEM 426, CHEM 461, CHEM 462, CHEM 463, CHEM 464, CHEM 465, and BIOC 426
 - f. 11 credits chosen from CHEM 242, CHEM 317, CHEM 321, CHEM 347, any 400-level numerically graded chemistry or biochemistry courses, or MATH 307 (or AMATH 351). Students with chemistry GPA of 3.30 or higher may apply up to 6 credits of CHEM 399, CHEM 496, or CHEM 499 of approved research (but CHEM 498 may not be used to satisfy this requirement).
2. MATH 124, MATH 125, MATH 126 and one course above 300 (recommended: MATH 308 or AMATH 352); alternative MATH requirement: MATH 134, MATH 135, MATH 136.
3. PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course). PHYS 121 sequence recommended.
4. Minimum grade of 2.0 is required in each chemistry course; minimum GPA of 2.80 is required for all CHEM, MATH, and PHYS courses used to satisfy major requirements.

5. For graduation, a minimum of 181 credits is required with an overall cumulative GPA of 2.80.

Bachelor of Arts

Suggested First- and Second-Year Courses: CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165) CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347); MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); PHYS 121, PHYS 122, PHYS 123 (or PHYS 114, PHYS 115, PHYS 116 plus one physics lab course; PHYS 121 sequence recommended).

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

84 credits as follows:

1. Core Courses:
 - a. CHEM 142, CHEM 152, CHEM 162, CHEM 312 (or CHEM 145, CHEM 155, CHEM 165)
 - b. CHEM 321
 - c. CHEM 237, CHEM 238, CHEM 239, CHEM 241, CHEM 242 (or CHEM 335, CHEM 336, CHEM 337, CHEM 346, CHEM 347)
 - d. Either CHEM 317 or CHEM 461
 - e. 11 credits of numerically graded CHEM 400-level courses to include either CHEM 455, CHEM 456, CHEM 457 series, or CHEM 452, CHEM 453 series
2. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136)
3. One year of physics including at least 1 credit of laboratory (PHYS 114, PHYS 115, and PHYS 116 and at least one of PHYS 117, PHYS 118, or PHYS 119; or PHYS 121, PHYS 122, and PHYS 123; PHYS 121 sequence recommended).
4. Minimum GPA of 2.0 in chemistry courses counted toward major; and a minimum grade of 1.7 in all required chemistry courses.

Minor

Minor Requirements: 35-44 credits as follows:

1. One of the following two sequences
 - a. CHEM 142, CHEM 152, CHEM 162 and one of CHEM 223, CHEM 237 or CHEM 335
 - b. CHEM 145, CHEM 155, CHEM 165, and one of CHEM 223, CHEM 237, or CHEM 335
2. MATH 124 (or Q SCI 291 and Q SCI 292)
3. PHYS 114 or PHYS 121
4. Three of the following four groups:
 - a. CHEM 312 (or CHEM 165)
 - b. CHEM 321
 - c. One of CHEM 355, CHEM 452, CHEM 455, CHEM 456
 - d. One of CHEM 224, CHEM 238, CHEM 336
5. Minimum GPA of 2.00 for the minor and a minimum grade of 1.7 in each course presented for the minor.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* At the conclusion of their studies, graduating chemistry majors should have a general knowledge of the basic areas of chemistry with a working knowledge of at least one area: be proficient in basic laboratory skills; have the ability to carry out strategies for solving scientific problems; have an understanding of the principles and applications of modern instrumentation, computation, experimental design, and data analysis; have had the opportunity to gain experience with a research project; have the ability to communicate scientific information clearly and precisely; have the ability to read, understand, and use scientific literature; have an awareness of the broader implications of chemical processes; have had the opportunity to work as part of a team to solve scientific problems; and have had an introduction to opportunities in, and requirements for, the careers available to chemistry majors.

Teaching high school chemistry, environmental or patent law practice, or working in the chemical industry in sales or management positions are career choices for which the B.A. in chemistry is generally useful.

* *Instructional and Research Facilities:*

- o Departmental facilities include a spectroscopic and analytical instrumentation laboratory (NMR, GC-MS, X-Ray, IR), Chemistry Library, Center for Process and Analytical Chemistry (CPAC), Materials and Devices for Information Technology Research (MDITR), Center for Nanotechnology, and extensive computing capabilities.
- o The department's local area network (LAN) is extended through a fiber optic cable to the university-wide network that is connected to Internet, HEPNET, SPAN, and other national and international computer networks.
- o The Chemistry Study Center offers assistance to students in 100 level chemistry courses and has 40 Pentium computers available to undergraduates taking chemistry courses.

- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- * *Research, Internships, and Service Learning:* No formal internship program. Students are encouraged to pursue national and regional internships. See advisers for information.

- * *Department Scholarships:* Resident tuition scholarships and book prizes are awarded annually by the Department of Chemistry to eligible chemistry and biochemistry majors. Applications are available during the month of March for the following academic year. See department advisers for more information.

* *Student Organizations/Associations:*

- o Alpha Chi Sigma: the UW affiliate of the national chemistry-related science organization for chemistry and biochemistry majors
- o Phi Lambda Upsilon: the UW affiliate of the national chemistry honorary society
- o The Free Radicals: a general undergraduate club for chemistry and biochemistry majors

Of Special Note:

- * The B.S. degree in chemistry requires a minimum of 181 credits to graduate.
- * The B.S. degree in Chemistry, ACS-Certified Option, requires a minimum of 184 credits to graduate.
- * The B.A. degree in Chemistry requires a minimum of 180 credits to graduate.
- * Students are strongly encouraged to participate in undergraduate research.
- * The maximum number of credits that may be earned combining CHEM 199 and CHEM 299 is 12; the maximum number of credits that may be earned combining CHEM 399 and CHEM 499 is 24.

Graduate Program

Graduate Program Coordinator
109D Bagley, Box 351700
206-543-4787
graduate@chem.washington.edu

The Master of Science and Doctor of Philosophy programs are designed to lead to positions of leadership and independent investigation in research institutes, industrial laboratories, and government agencies, and as teachers, researchers, or administrators in colleges and universities in chemistry or allied fields.

Students can pursue research in the following areas of chemistry: analytical, bioanalytical, bioinorganic, bioorganic, biophysical, environmental, inorganic, medicinal, nuclear, organic, organometallic, physical, polymer, process analytical, and theoretical.

Thesis research for the Master of Science degree and dissertation research for the Doctor of Philosophy degree will constitute an original contribution of knowledge worthy of report in the scientific literature.

Master of Science

The Department of Chemistry offers primarily the Ph.D. degree. The Master of Science program is not open to master's-only students, except under specific conditions.

Graduation Requirements: With Thesis -- 36 approved credits with 18 in courses at the 500 level or above; 21 credits in courses at the 400 or 500

level taken for numerical grade; 9 credits in thesis research. Without Thesis -- Same as with thesis, except that additional course work may be substituted for the required research. Minimum GPA of 3.00 required.

Doctor of Philosophy

Admission Requirements

- * Baccalaureate degree with major in chemistry or allied sciences
- * Graduate Record Examination scores
- * TOEFL score of 237 and TSE score of 50 if international student

Degree Requirements

90 credits, as follows:

- * *Required coursework:* 18-27 credits of coursework to support the student's individualized program of study, approved by the Graduate Program Coordinator, at the 400 or 500 level, with a minimum 3.00 GPA
- * *Seminars:* Participation in departmental seminars
- * *Dissertation:* minimum 27 credits of dissertation (CHEM 800) work
- * Candidacy examinations covering area of specialization

Course Descriptions

See page 311.

Classics

218 Denny

The discipline of classics concerns itself with the cultures of ancient Greece and Rome from prehistoric times to the Middle Ages. The department is concerned with the Greek and Latin languages and their literatures, including poetry, drama, history, philosophy, rhetoric, and political theory, as well as with classical art and archaeology. The ancient cultures of Greece and Rome hold an extraordinary place in the American past and present, thanks to their central role in forming the basic conceptual categories that shape our intellectual, professional, and civic lives. The vast temporal and geographic gulf that divides these ancient cultures from modernity brings students and scholars of classics face to face with the otherness of antiquity and forces a critical examination of our own cultural roots.

Undergraduate Program

Adviser
218 Denny, Box 353110
206-543-2266
clasdept@u.washington.edu

The Department of Classics offers the following programs of study:

- * The Bachelor of arts degree with majors in classics, Greek, Latin, and classical studies.
- * Minors in classical studies, Greek, Latin, and classics and ancient history.

The majors in classics, Greek, and Latin emphasize the development of expertise in Greek and Latin and can include coursework in the history, literature, philosophy, science, and the art and archaeology of these two contrasting but related cultures. Students who intend to continue their studies to the Ph.D. degree are advised to take the B. A. in classics or, alternatively, the B.A. in Latin or Greek with as many courses in the second language as possible.

A fourth major, the Bachelor of Arts in Classical Studies, is especially suited to students wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity primarily through English translations. The classical studies major demands less study of the classical languages of Greece and Rome than is required for the other majors. Students with no previous exposure to Greek or Latin can complete the classical studies major in two years. Students have often combined this major with another major such as English, history, or art history, and even with a non-humanities major such as computer science, biochemistry, or economics.

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Latin and/or classical Greek, classics in translation, ancient history, classical art and archaeology, ancient philosophy.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

66 credits in each of the majors, as follows:

- * *Greek:* 27 approved credits in Greek at the 400 level plus 9 credits chosen with department approval from courses in Latin, Greek at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. The major must include a minimum of 2 credits of CLAS 495.
- * *Latin:* 27 approved credits in Latin at the 400 level plus 9 credits chosen with department approval from courses in Greek, Latin at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. The major must include a minimum of 2 credits of CLAS 495.
- * *Classics:* 15 approved credits in Greek at the 400 level and 15 approved credits in Latin at the 400 level; 6 additional credits (including 2 credits of CLAS 495) chosen from the following courses: Greek and Latin at the 400 level, classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science.
- * *Classical Studies:* Greek or Latin through 307 or the equivalent; 36 additional credits chosen with department approval from the following courses: Greek and Latin at 400 level (including a minimum of 2 credits of CLAS 495), classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science. Classical studies is especially suited to students not preparing for graduate study in classics but wishing to explore the literature, history, art, archaeology, and philosophy of classical antiquity primarily through English translations.

Minor

Minor Requirements: 25 credits as follows for each of the minors:

- * *Classical Studies:* 25 approved credits from classics in English, classical art and archaeology, ancient history, the history of ancient philosophy, and the history of ancient science.
- * *Greek:* Minimum 25 credits in Greek, including at least 6 credits at the 400 level (excluding 490).
- * *Latin:* Minimum 25 credits in Latin, including at least 6 credits at the 400 level (excluding 490).
- * *Classics and Ancient History:* 30 credits from the following list, including at least 20 upper-division credits (15 of which must be taken at the UW). 100-level credit is not accepted. Minimum 10 credits from each department (Classics and History). A minimum grade of 2.0 is required in each course. Not available to students pursuing majors or other minors in classics.

Courses: CLAS 210, CLAS 320, CLAS 322, CLAS 324, CLAS 326, CLAS 328, CLAS 330, CLAS 424, CLAS 427, CLAS 428, CLAS 430, CLAS 432, CLAS 435, CLAS 445, CLAS 496 (except when topic is medieval); CL AR 340, CL AR 341, CL AR 342, CL AR 343, CL AR 442, CL AR 443, CL AR 444, CL AR 446, CL AR 447, CL AR 448; GREEK (all upper-division courses except GREEK 300 and GREEK 301); LATIN (all upper-division courses except LATIN 300, LATIN 301, LATIN 401, and LATIN 402); HSTAM 205, HSTAM 301, HSTAM 302, HSTAM 312, HSTAM 313, HSTAM 314, HSTAM 330, HSTAM 401, HSTAM 402, HSTAM 403, HIST 490 (when topic is ancient), HIST 498 (when topic is ancient).

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The undergraduate study of classics emphasizes critical analysis of language and culture and clear

and effective writing. The B.A. with a major in classics is a respected terminal degree in itself. Like other degree programs in the humanities, it emphasizes the acquisition of those analytic and communications skills which are indispensable for careers in government, journalism, law, industry, medicine, and business. The Classics major (especially in its more language intensive forms) is often a mark of distinction when a graduate applies for admission to professional school.

Many who take the bachelor's degree in classics go on to pursue graduate work in the subject at leading Ph.D. programs. Graduates include winners of prestigious national awards such as Mellon Fellowships for graduate study and the Rhodes Scholarship.

- * *Instructional and Research Facilities:* The departmental office provides access to several computers for research and coursework. The Classics Department sponsors numerous lectures by distinguished speakers visiting from universities in this country and abroad; undergraduates are always welcome to attend.
- * *Honors Options Available:* With College Honors. With Distinction. See adviser for details.
- * *Research, Internships, and Service Learning:* None offered.
- * *Department Scholarships:*
 - o Jim Greenfield Undergraduate Scholarship is intended for undergraduate majors in Classics. The object of the Jim Greenfield scholarship is to enable exceptionally well-qualified students to devote the maximum time and energy to their study of the Classics at the University of Washington. While the first criterion is academic promise, an applicant's current means of support will also be taken into consideration; therefore, the amount of the award may vary from partial tuition to full tuition and some expenses. Successful candidates may reapply for the following year.
 - o Jim Greenfield Undergraduate Travel Bursaries: Awards for the calendar year 2005 (including summer 2005) are made on the basis of a competition to be held in autumn quarter 2004, with an application deadline of October 15, 2004. Jim Greenfield Undergraduate Travel Bursaries may be used for the department's Rome Program, for travel associated with participation in archaeological excavations, for independent travel to areas of classical interest, or for other kinds of study-related travel for which the applicant can make a cogent case. In some cases an award might allow a student to remain overseas for study travel in the wake of the department's Rome Program. Further information about applying for a Jim Greenfield Undergraduate Travel Bursary is available in the department office.
- * *Student Organizations/Associations:* None

Of Special Note:

- * CLAS 101, CLAS 102, CLAS 205, and HIST 111 may not be taken in fulfillment of major requirements for baccalaureate degrees in the Department of Classics.
- * *Classical Seminar in Rome:* During spring quarter, the department offers instruction in classics for advanced undergraduate majors and graduate students at the University of Washington Rome Center, located in the Palazzo Pio on the Campo de' Fiori.

Graduate Program

Graduate Program Coordinator
218 Denny, Box 353110
206-543-2266
clasdept@u.washington.edu

The Department of Classics offers programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The M.A. degree may be in Greek, Latin, or Classics (a combination of Greek and Latin). The Ph.D. degree requires both Greek and Latin.

The program of formal instruction ensures comprehensive and thorough training in the basic disciplines needed for teaching and research. The department offers courses in the major writers and periods of literature, philosophy, and history, in classical art and archaeology, and in Greek and Latin linguistics. The courses in Greek and Latin literature include many works on the Ph.D.-degree reading list. Seminars introduce research techniques through the study of more specialized topics, which vary from quarter to quarter. Students may include in their programs courses and

seminars given by other departments in such subjects as ancient philosophy, ancient and medieval history, comparative literature, and linguistics.

Master of Arts

Admission Requirements

Strong preparation in Latin and Greek, preferably a full undergraduate major. Although the M.A. may be attained with work in only one of the languages, students who plan to work toward the Ph.D. must be prepared to do graduate work in both Latin and Greek.

Degree Requirements

36 credits, as follows:

- * 27 credits in courses and seminars approved by the department as applicable toward an advanced degree and either a) 9 additional credits and a research paper or b) a thesis (9 credits). At least 18 of the total 36 credits must be at the 500 level or above.
- * Competence in reading German, French, or Italian, demonstrated by passing a departmental examination.

Doctor of Philosophy

Admission Requirements

Strong preparation in Latin and Greek, preferably a full undergraduate major. Admission to the Ph.D. program is granted after completion of the M.A. degree.

Degree Requirements

90 credits, as follows:

- * Minimum three academic years of graduate study, of which at least two must be at the UW, and one in full-time residence at the University for three out of four consecutive quarters.
- * 90 credits in courses approved by the department. At least half (which include dissertation credits) must be at the 500 level or above.
- * Competence in reading German and French, or German and Italian, demonstrated by passing departmental examinations.
- * Graduate courses (or the equivalent) in Greek and Latin composition.
- * The Classics proseminar (or equivalent).
- * Written preliminary examinations:
 - o Translation exams on Greek and Latin literature. Reading lists in each language guide the student's preparation for these exams.
 - o A written examination on a special field of Classical studies, e.g. a period of Greek or Roman history, Greek or Latin epigraphy, Athenian or Roman topography, Greek or Roman religion, Classical linguistics, metrics, or palaeography, an area of intellectual history, a literary theme or cultural institution. This examination must be taken before the doctoral orals but is preferably taken earlier in the student's graduate program.
 - o Written examinations on two special authors, one Greek and one Latin, which assume a deep familiarity with the text, a knowledge of the textual history, and the important secondary works and trends in scholarship. A special author examination may be taken only after the translation examination in that language has been passed.
- * An oral general examination on Greek and Roman history, literature, philosophy, and related subjects.
- * A dissertation approved by the student's Supervisory Committee, and an oral examination on the dissertation.
- * Graduate students are expected to have teaching experience before completing their terminal degrees.

Research Facilities

The Suzzallo Library has an extensive classics collection. The department's seminar room in Denny Hall, which is available to graduate students for their study and research, contains an excellent noncirculating library with such reference works as Pauly-Wissowa, L'Année Philologique, the Thesaurus Linguae Latinae, the Müller Handbuch series, the Teubner and Oxford texts, commentaries on the classical authors, standard collections of inscriptions and fragments, and a number of important serials. The department also possesses an Ibycus scholarly computer and a license for the Thesaurus Linguae Graecae, Thesaurus Linguae Latinae, Perseus, and other databases.

Teaching Assistantships

A number of teaching assistantships as well as the Jim Greenfield Graduate Fellowship are available. Assistants teach sections of elementary Latin and Greek, a course in Latin and Greek derivatives, hold discussion sections in classical literature in translation, or assist faculty members with other courses. The teaching load is four to six hours a week throughout the academic year.

Course Descriptions

See page 314.

Communication

102 Communications

Communication is a process that creates and reveals meanings, relationships, and cultural patterns.

Undergraduate Program

Adviser
118 Communications, Box 353740
206-543-8860

The Department of Communication offers the following programs of study:

- * The Bachelor of Arts degree with a major in communication
- * The Bachelor of Arts degree with a major in communication: journalism

Bachelor of Arts

Suggested First- and Second-Year College Courses: COM 201, COM 202.

Department Admission Requirements

1. Admission is competitive, based on information in the application packet, cumulative GPA, and grades in COM 201 and/or COM 202. Minimum cumulative 2.50 GPA ensures consideration, but not acceptance.
2. Students are admitted quarterly -- autumn, winter, and spring. Applications are due Monday, the third week of autumn, winter, and spring quarters. Applications and additional information are available on the Web and in 118 Communications. Students are notified of acceptance by the end of the fifth week of the quarter. If accepted, they can register for the next quarter as majors.
3. Applications are available from the department Web site on the first day of the quarter. Applications should include application form, copies of transcripts and grade reports, and an essay explaining what led applicants to apply to the major.
4. Minimum 45 quarter credits completed (transfer students must complete at least 10 graded credits at UW). For the standard Communication program, credits must include completion of COM 201 and COM 202 or completion of one of these and current enrollment in the other. For the Journalism option, credits must include completion of either COM 201 or 202.

Major Requirements

Communication: 50 credits, to include the following:

1. *Introductory courses (10 credits):* COM 201 and COM 202.
2. *Methods in inquiry (5 credits):* Examples of courses that apply include COM 382, COM 405, and COM 485. For full list, see department adviser or Web.
3. *Area concentration (15 credits) in one of the following:* communication and culture, communication technology and society, international communication, political communication, rhetoric and critical studies, or social interaction. See advising office or Web for description of each area and lists of qualifying courses.
4. *Electives (20 credits)* from the Department of Communication and from selected courses outside the department. See advising office or Web for electives list.

Of the 50 required credits specified above, at least 20 must be Communication courses at the 300 level or above, and of those 20, at least 10 must be Communication courses at the 400 level (excluding COM 498/499).

Journalism Option: A minimum of 61 credits, including the following:

1. *Introductory courses (5 credits):* Either COM 201 or COM 202.
2. *Skills/Competencies core (13 credits):* COM 360, COM 361, COM 362.
3. *Law and Ethics core (10 credits):* COM 440, COM 468.
4. *Emphasis/Specialization (10 credits) in one of the following areas:* communication and culture, communication technology and society, international communication, political communication, rhetoric and critical studies, or social interaction. See advising office or Web for description of each area and lists of qualifying courses.
5. *Advanced Skills/Competencies (8 credits minimum) selected from the following:* COM 301, COM 460, COM 461, COM 463, COM 465, COM 466.
6. *Other requirements (15 credits):* 5 credits each in economics, political science, and history. See advising office for list of acceptable courses.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* The Department of Communication prepares students for the challenges of a society that is informed, entertained, persuaded, and shaped by communication. The department seeks out and appeals to students from a variety of backgrounds and perspectives. It nurtures socially responsible, literate citizens who can interpret and evaluate images and messages they create and receive. It teaches students to think critically, respect diversity, communicate effectively, and develop the skills needed for the life-long learning that is central to successful careers and rewarding lives. Undergraduate study in communication has four pedagogical emphases: communication literacy, communication inquiry, theory and concepts, and community engagement.

* *Instructional and Research Facilities:* The Department of Communication has the following labs: Media Lab. News Lab. Observation Labs. It also has an Instructional Resources Center and video-editing facilities. Additionally, the department manages the following centers: The Dart Center, the Center for Communication and Civic Engagement, and the Resource Center for Cyberculture Studies. See the department Web site for further information.

* *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

* *Research, Internships, and Service Learning:* See adviser for details.

* *Department Scholarships:* None offered

* *Student Organizations/Associations:*

- o Society of Professional Journalists
- o Public Relations Student Society of America

Graduate Program

Graduate Program Coordinator
221 Communications, Box 353740
206-543-7269
cominfo@u.washington.edu

Graduate study in communication engages students in the complexity of modern communication and its centrality to society and, in doing so, prepares them to become thoughtful scholars, teachers, practitioners, and leaders related to this field. The Department of Communication offers graduate programs leading to the degrees of Master of Arts, Doctor of Philosophy, and Master of Communication (M.C.).

Graduate study in the Department of Communication is guided by four related principles: intellectual and cultural pluralism, interdisciplinary theorizing, collaboration, and public scholarship. Coursework brings together humanistic and social scientific intellectual traditions through a unified core curriculum and a wide selection of graduate seminars. Research and teaching in the department focus on six interrelated areas: communication and culture, communication technology and society, international communication, social interaction, political communication, and rhetoric and critical studies.

The M.A. degree program provides training in research and scholarship and can be either preparation for doctoral study or a terminal degree. The M.A. degree requires a minimum of 45 credits of approved coursework and a research thesis. The Ph.D. degree program develops conceptual and methodological capabilities in a substantive area of communication. The Ph.D. degree requires completion of a minimum of 45 post-master credits,

general examinations, and a dissertation demonstrating an original scholarly contribution to the field.

The Department of Communication also offers three M.C. degrees, each of which has specific requirements tailored to that degree. The general M.C. degree is targeted for mid-career communication professionals who seek to develop an understanding of communication theory related to a special area of interest. The M.C. in digital media is a professional degree focused on digital media content creation, management, and policy. Native Voices is an M.C. degree offered in conjunction with American Indian Studies. It is designed for documentary filmmakers who focus their work on subjects relevant to the Native American Community.

Master of Arts

Admission Requirements

- * Minimum 3.00 or B GPA over the two most recent years guarantees consideration. However, average GPAs for the students admitted have been higher.
- * M.A. applicants must show proof of completion of a bachelor's degree prior to starting the program, though it is common for applicants to be in their senior year of college when they apply to the M.A. program.
- * Full-time status is strongly encouraged, but domestic U.S. residents who do not receive assistantships can enroll half-time.
- * Note to U.S. permanent residents/immigrants (green card holders): Applicants who are not native speakers of English must submit TOEFL scores taken within the past two years. Only the following applicants are exempt from the TOEFL requirement: citizens of the United States, Australia, Canada, Ireland, New Zealand or the United Kingdom and non-United States citizens who have received a bachelor's degree or higher from a U.S. institution or from institutions in the countries listed here. Applicants who are not U.S. citizens must also submit a TSE score to be considered for departmental funding. Permanent residency/immigrant status or a degree from the U.S. does not exempt one from this TSE requirement.

Degree Requirements

45 credits minimum, as follows:

- * Three core courses (COM 500, COM 501, COM 502) during the first year of study.
- * One additional methods course beyond COM 501
- * Up to 5 credits of COM 594 in five different topics may count toward total, although COM 594 credits are not required for master's students.
- * Up to 3 credits of COM 596 may count toward total. These credits are required for students with assistantships and optional for all others.
- * Completion of the thesis (minimum 10 credits in COM 700) and oral defense.
- * Specific courses should be selected in consultation with the supervisory committee.

Master of Communication

Admission Requirements

Admission requirements are the same as for the Master of Arts program (above).

Degree Requirements

45 credits minimum, as follows:

- * At least 12 credits in Communication courses at the 400 and 500 level.
- * At least 15 credits outside the Department of Communication in a coherent substantive area of specialization.
- * 10 credits in COM 600 to produce a professional project in an area of specialization for broadcast or publication.
- * Passage of an oral defense of the project.
- * The remaining credits necessary to meet the 45 credits for the degree should be selected in consultation with the supervisory committee.
- * At least 21 credits must be at the 500- or 600-level.
- * Up to 5 credits of COM 594 may count toward total, although COM 594 credits are not required for M.C. students.
- * Up to 3 credits of COM 596 may count toward total. These credits are required for students with assistantships and optional for all others.

Digital Media

The Master of Communication (M.C.) in Digital Media is a professional degree focused in three concentrations: digital media content creation, management, and policy. 45 credits minimum as follows:

- * *Three core courses:* COM 529 (5), COM 546 (5), and COM 558 (5).
- * Students may choose either to complete 45 credits of course work or to complete 40 credits of course work (including three core courses) and a final project worth 5 credits. Specific courses should be selected in consultation with the supervisory committee.

Native Voices

45 credits, as follows:

- * 20 credits in the Department of Communication:
 - o 10 credits of 500-level communication courses. This is typically two 500-level seminars.
 - o COM 600: 10 credits in Documentary Research and Production. To be taken for the completion of the final project.
- * 25 credits in American Indian Studies/Native Voices: WOMEN 443 (5), AIS 501 (5), AIS 502 (5), AIS 503 (5), AIS 504 (5)

Research Facilities

In addition to the University's research facilities available to all students, the Department of Communication houses a collection of specialized research laboratories, including the Digital Media Lab, Graduate Computer Lab, Observational Research Facility, Instructional Resources Center, and Video Editing Lab.

Course Descriptions

See page 317.

Comparative History of Ideas

B102 Padelford

Comparative History of Ideas is an interdisciplinary program that draws on a wide variety of disciplines within the College of Arts and Sciences to examine the interplay of ideas and their cultural, historical, and political contexts.

Undergraduate Program

Adviser
B102D Padelford, Box 354300
206-543-2097
chid@u.washington.edu

The Comparative History of Ideas program offers the following programs of study:

- * The Bachelor of Arts degree with a major in comparative history of ideas
- * A minor in comparative history of ideas

Bachelor of Arts

Suggested First- and Second-Year College Courses: Course work in the history of relevant periods, areas, and themes. Introductory courses in philosophy, English, comparative literature, ethnic and gender studies, and other areas of the humanities and social sciences. CHID 110.

Department Admission Requirements

Students in good academic standing may declare this major after meeting with an adviser.

Major Requirements

55 credits as follows:

1. 10 credits in Group A: Introduction to the History of Ideas
2. 10 credits in Group B: History of Intellectual Cultures (5 credits in each subgroup)

3. 10 credits in Group C: History of Particular Ideas or Themes
4. CHID 390: The Colloquium in the History of Ideas
5. A 5-credit senior project (CHID 491)
6. The remaining 15 credits should be chosen from among approved electives.
7. At least half of the credits presented for the major must be at the upper-division level.
8. A minimum GPA of 2.50 in the classes presented for the major.
9. Students may expand the senior project to 10 or 15 credits if they choose (CHID 492/493). The 5 to 10 optional senior project credits are in addition to the 55 credits required of all CHID majors.

Please see the program adviser for current lists of Group A, B, and C courses.

Minor

Minor Requirements: 30 credits as follows:

1. 5 credits in Group A: Introduction to the History of Ideas
2. 10 credits in Group B: History of Intellectual Cultures (5 credits in each subgroup)
3. 5 credits in Group C: History of Particular Ideas or Themes
4. CHID 390: The Colloquium in the History of Ideas
5. A 5-credit CHID 498: Special Colloquia.

Please see the program adviser for current lists of Group A, B, and C courses.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The program encourages students to adopt nuanced perspectives on their position relative to texts, cultures, societies, and historical periods. Program graduates have gone on to postgraduate studies in the humanities and social sciences, as well as professional training and careers in a wide variety of fields including law, administration and public policy, medicine, education, journalism, new media, and film.
- * *Instructional and Research Facilities:* The program provides computer workstations for students in Padelford B102.
- * *Honors Options Available:* With College Honors. With Distinction. See adviser for details.
- * *Research, Internships, and Service Learning:* CHID undergraduates participate in a variety of educational experiences outside the classroom. For example, many of the study abroad programs incorporate an "engaged community learning" project, which provides an opportunity for students to apply their analytical skills and understanding of the historical and cultural context to a close participation in the work of local organizations. The diversity of these community efforts allows students to engage their particular interests through participation in social welfare organizations, grassroots community groups, after-school programs, health clinics, theater and other performing arts groups, as well as video and other visual arts projects.
- * *Department Scholarships:* None offered.
- * *Student Organizations/Associations:* CHID students spear-headed the formation and development of the DIALOGUE Project, a group open to all UW students interested in international issues. The project serves to facilitate greater international and intercultural dialogue within our own community centered around topics germane to each student's own educational goals. Many students work directly to develop and help coordinate international clubs in high schools across the state.

Of Special Note: CHID also sponsors *interSections*, a student journal published annually by the Comparative History of Ideas program. *interSections* is organized and edited by undergraduate volunteers from the CHID program.

Course Descriptions

See page 322.

Comparative Literature

B-531 Padelford

Comparative literature works across national and regional boundaries to explore the relationships among multiple literary traditions. Comparative literature also focuses on the relationship of literature to the other arts and to fields of knowledge such as philosophy, anthropology, history, and media or cultural studies.

Undergraduate Program

Adviser
B-534 Padelford, Box 354338
206-685-1642
kholl@u.washington.edu

Comparative Literature offers the following programs of study:

- * Bachelor of Arts with a major in comparative literature
- * Bachelor of Arts with a major in comparative literature (cinema studies)
- * Minor in comparative literature (literature minor only)

The literature option includes core course requirements in literary analysis (C LIT 300), literary theory (C LIT 400) and regional literatures (C LIT 320, C LIT 322, C LIT 323).

The cinema studies option is structured around two series of required core courses devoted to film theory and film history.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses in foreign languages, classics, history, philosophy, literature, and writing. Sufficient preparation in a foreign language (completion of second year or higher) to enable the student to take a 300- or 400-level literature or national film course by the senior year.

Department Admission Requirements

Minimum 2.00 overall GPA; completion of one course fulfilling either College of Arts and Science English composition requirement or the W (writing) requirement (5 credits).

Cinema Studies: Same as above, plus completion of C LIT 270 or the equivalent.

Major Requirements

Literary Studies Option (50 credits):

- * C LIT 300, C LIT 400 (10 credits).
- * Two differently-numbered courses from among C LIT 320, C LIT 321, C LIT 322, C LIT 323 (10 credits).
- * Two additional courses in comparative literature at the 300 or 400 level (10 credits).
- * At least one foreign literature course, studied in the original language (3/5 credits). The minimum foreign language prerequisite to meet this requirement is completion of a second year (often higher) of the foreign language, e.g., GERMAN 203 for GERMAN 311; FRENCH 302 for FRENCH 304.
- * Remaining (17/15 credits) to be earned, with few exceptions, in 300- and 400- level literature courses from among the offerings of Comparative Literature and the following participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Studies, and Slavic Languages and Literatures.

Cinema Studies Option (50 credits):

- * 15 credits from cinema studies core courses, with at least one course in film theory and one course in film history (C LIT 301, C LIT 302, C LIT 303, C LIT 310, C LIT 311, C LIT 312).
- * 10 credits from C LIT core requirements (choice of either C LIT 300 or 400, and one course from C LIT 320, C LIT 321, C LIT 322, C LIT 323).
- * One national cinema course (3/5 credits).
- * Minimum two years of foreign language study (e.g., through GERMAN 203, or equivalent).
- * Remaining credits to be earned in recommended 300- and 400-level

cinema elective courses offered by Comparative Literature or any UW department.

Minor

Minor Requirements: 30 credits to include C LIT 300, C LIT 400, and two differently numbered courses from among C LIT 320, C LIT 321, C LIT 322, and C LIT 323; at least one course in a literature, studied in the original language, other than English; and the remaining credits in upper-division literature courses offered through Comparative Literature and the following participating departments: Asian Languages and Literature, Classics, English, Germanics, Near Eastern Languages and Civilization, Romance Languages and Literature, Scandinavian Studies, and Slavic Languages and Literatures.

A minor is not available for the Cinema Studies option.

Student Outcomes and Opportunities

- * **Learning Objectives and Expected Outcomes:** The study of comparative literature provides training in the analysis and critique of varied kinds of social texts and discourses. It stresses the centrality of historical and cross-cultural awareness for effective interpretation of both verbal and visual texts. Students earning the degree in comparative literature may pursue advanced work at the M.A. and Ph.D. level in language and literature programs, or allied curricula in film studies, philosophy, intellectual history, and cultural studies. They may aim for degrees in education, specializing in language arts, foreign language teaching, or both. Comparative literature majors may also find jobs in fields where liberal arts skills, such as strong writing ability and fluency in foreign languages, are valued. Cinema studies majors often seek positions associated with film production and distribution.
- * **Honors Options Available:** Departmental honors by invitation. See adviser.
- * **Undergraduate Research, Internships, and Service Learning:** See adviser for internship information.
- * **Department Scholarships:** Some financial support available for student film projects.
- * **Student Organizations/Associations:**
 - o Film Club, film@u.washington.edu
 - o UW Film Colloquium, filmcol@u.washington.edu

Of Special Note: A maximum of 5 credits of internship (C LIT 491) may be applied toward the Cinema Studies major.

Graduate Program

Graduate Program Coordinator
B531 Padelford, Box 354338
206-543-7542
clitgrad@u.washington.edu

The Department of Comparative Literature offers a program of study with faculty members from the following participating departments: Asian Languages and Literature, English, French and Italian Studies, Germanics, Near Eastern Languages and Civilization, Scandinavian Studies, Slavic Languages and Literatures, Spanish and Portuguese Studies, and Women Studies. Study leads to a Master of Arts or Doctor of Philosophy degree. Students concentrate on graduate courses in comparative literature and specialize in two or more national literatures of major interest to them, studied in the original language. With permission, a Ph.D. aspirant may choose as a third area of study a field outside of literature (e.g., philosophy, religion, art, political thought). On receiving the advanced degree, the student is qualified for teaching and research in comparative and general literature, as well as the language and literature of specialization.

Master of Arts

Admission Requirements

Bachelor of Arts degree in Comparative Literature, English, or any other literature, or equivalent background; advanced reading knowledge in one language other than English.

Degree Requirements

45 credits, as follows:

- * **Coursework:** Minimum 45 quarter credits at the 400 and 500 level, of which at least 25 must be at the 500 level. Three courses must be taken in comparative literature. Remaining credits must include study in two or more literatures with at least three courses in each of two literatures.
- * **Language Requirements:** Advanced reading knowledge in at least one language other than English and a basic reading knowledge of a second, demonstrated before starting to write the M.A. essay. Language competence is attested either by exams or by completion of satisfactory coursework in the language.
- * **Essay:** Prepared after completion of coursework, under supervision of two faculty members.
- * **Study Abroad:** Students are encouraged to study abroad by participating in exchange programs offered through the individual language and literature departments or through the UW's Office of International Programs and Exchanges.

Doctor of Philosophy

Admission Requirements

Master of Arts degree in Comparative Literature, English, or any other literature, or equivalent background; advanced reading knowledge in two languages other than English.

Degree Requirements

90 credits, as follows:

- * **Coursework:** Minimum 90 postbaccalaureate degree credits at the 400 and 500 level of which at least half in each section of the program must be at the 500 level. Credits must include: 1) at least 30 credits in comparative literature courses; 2) 30 credits in the literature of major interest to the student; 3) 20 credits in the student's minor field (or, if more than one minor field is chosen, at least 15 credits in each); 4) 10 elective credits chosen from any area of the student's choice. One of two minor fields may be extra-literary.
- * **Language Requirements:** Advanced reading knowledge in two languages other than English and a basic reading knowledge of a third, demonstrated before Ph.D. examinations are administered. Language competence is attested either by exams or by completion of satisfactory coursework in the language.
- * **General Examination:** The General Examination requires one quarter and is taken after completion of the 90 credit course requirement and language requirements. The examination, taken within three quarters of completion of coursework, consists of the following two sections: 1) eight-hour written examinations in each of the following three areas: a) a period exam in the student's primary national literature; b) comparative literature exam; and c) comparative theory exam; 2) an oral comprehensive examination evaluating the student's overall preparation for dissertation work.
- * **Dissertation:** Dissertation topics are chosen from a broad range of areas including: 1) the comparative study of authors or themes in different languages; 2) issues in the fields of theory of literature and history of criticism; 3) the study of literary authors or themes whose significance transcends national or linguistic boundaries; 4) the study of such phenomena as transmission, reception, and influence.
- * **Final Examination:** Candidates must pass an oral examination devoted to the dissertation and to fields covered by their written exams.
- * **Study Abroad:** Students are encouraged to study abroad by participating in exchange programs offered through the individual language and literature departments or through the UW's Office of International Programs and Exchanges.

Financial Aid

The department awards teaching assistantships annually to qualified students and provides up to five years of support toward the Ph.D. to students who enter with a B.A. Teaching assistantships can be assigned in Comparative Literature, Cinema Studies, or in any of the national literature departments affiliated with Comparative Literature.

Course Descriptions

See page 323.

Computer Science

AC101 Paul G. Allen Center for Computer Science and Engineering

Computer science is the study of information and algorithms within the context of real and abstract computing devices. Computer scientists are interested in such topics as the representation and storage of information; algorithms to access, display, edit, and transform information; programming languages to express algorithms; and hardware and software processors to execute algorithms. These concerns lead to practical developments in computer systems software, such as operating systems and compilers; in application areas, such as artificial intelligence, computer graphics, and computational biology; and also lead to theoretical investigations of computers, algorithms, and data.

Undergraduate Program

Adviser

101 Paul G. Allen Center for Computer Science and Engineering, Box 352350

206-543-1695

ugrad-advisor@cs.washington.edu

The Department of Computer Science and Engineering offers the following programs of study:

- * The Bachelor of Science degree with a major in computer science
- * The Bachelor of Science degree with a major in computer engineering (see Computer Engineering section)

The core requirements of the two undergraduate majors are identical. The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program, who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the theory, design, and implementation of software systems and applications (for example, the techniques of modern compilers or the algorithms behind computer graphics and animation).

The computer engineering major may be more appropriate for students who are interested in creating and building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints. The program includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole.

Bachelor of Science

Department Admission Requirements

Applicants are considered in two groups -- Direct Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

1. **Direct Admission Group:** Computer Science and Engineering enrolls up to 20 percent of its incoming class directly out of high school, prior to the completion of university-level prerequisites. Freshman applicants to the University listing Computer Science or Computer Engineering as their intended major are automatically considered. Competitive applicants will have taken calculus and at least one year of laboratory science (preferably physics) upon entering the University. Admission is for autumn quarter only.
2. **Upper-Division Admission Group:** Students must have completed MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); at least five credits of Natural World, including one of the following: PHYS 121 or CHEM 142/145 (or any approved science course that requires PHYS 121 or CHEM 142/145 as a prerequisite); CSE 142, CSE 143; and at least 5 credits of English composition. Regardless of AP credit, at least one calculus or post-calculus mathematics course and one approved Natural World course must be completed prior to applying to the department. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.

Major Requirements

84-87 credits as follows:

1. **Science (10 credits):** 10 credits from the list of approved natural science courses in the CS&E Handbook. Courses that meet the department's science requirement include PHYS 121, CHEM 142/145, and any course in biology, chemistry, physics, earth and space sciences, astronomy, and atmospheric sciences that requires PHYS 121 or CHEM 142/145 as a prerequisite.
2. **Mathematics (19-22 credits):** MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken); MATH/STAT 390 or MATH/STAT 391.
3. **Required Courses (35 credits):** CSE 142, CSE 143, CSE 303, CSE 321, CSE 322, CSE 326, CSE 341, CSE 370, CSE 378.
4. **Senior Electives (minimum of 20 credits):** At least 20 credits from the senior electives courses listed in the CS&E Handbook, including at least four of the following courses: CSE 401, CSE 403, CSE 421, CSE 431, CSE 444, CSE 451, CSE 455, CSE 457, CSE 461, CSE 466, CSE 471, CSE 473.
5. The minimum acceptable grade for any required or elective CSE course is 2.0. A student's overall GPA must not fall below 2.00. Transfer students must earn a minimum of 24 graded credits toward the major at the UW.

Student Outcomes and Opportunities

* **Learning Objectives and Expected Outcomes:** The computer science field has a broad base of private- and public-sector jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, applications programmer, technical sales and marketing, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers. The field is also highly valued for practicing entrepreneurship.

* **Instructional and Research Facilities:** In autumn 2003 the department moved to the new state-of-the-art Paul G. Allen Center for Computer Science and Engineering. The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

* **Honors Options Available:** With Departmental Honors. See adviser for requirements.

* **Research, Internships, and Service Learning:** Internships and co-op opportunities are available for computer science undergraduates. See <http://www.engr.washington.edu/coop> and <http://depts.washington.edu/careers> for information.

* **Departmental Scholarships:** CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at www.cs.washington.edu/education/ugradscholars/scholarships.html

* **Student Organizations/Associations:** A student chapter of the Association for Computing Machinery (ACM) operates within CSE.

Course Descriptions

See page 502.

Dance

258 Meany

Dance is part of a liberal arts curriculum and provides students with a foundation for future advanced work in performance or movement-related work. Faculty work closely with students to guide them on the educational track that best serves their career goals.

Undergraduate Program

Adviser
261 Meany, Box 351150
206-543-0550
uwdance@u.washington.edu

The Dance Program offers the following programs of study:

- * The Bachelor of Arts degree with a major in dance.
- * A minor in dance.

Bachelor of Arts

Program Admission Requirements

Application deadline (transcript and essay) is March 1. Acceptance is during spring quarter for autumn quarter admission and coursework planning.

1. Unofficial transcript
2. Two-page (maximum) essay. Applicants write on one of four topics. Details regarding essay topics and format are available from the Dance Program Web site, or at the Dance Program Office.
3. Two-hour technique assessment class prior to the beginning of spring quarter (date and time are posted on the program Web site). Prospective applicants unable to attend this assessment class should contact the Dance Program adviser to make alternate arrangement.

For additional information regarding application procedure and time/date/ location of the spring-quarter assessment class, contact the Dance Program adviser or visit the Dance Program Web site.

Major Requirements

Minimum 65 credits in dance as follows:

1. *Core Curriculum Courses:* DANCE 166 (5 credits), DANCE 242 (3), DANCE 250 (3), DANCE 270 (2 credits, 1 crew minimum), DANCE 344 or DANCE 345 (5), DANCE 390 (5), DANCE 480 (3), DANCE 493 (5). (31 credits)
2. *28 credits from the following (12 credit minimum at the 200-level or above; 6 credits minimum in both ballet and modern dance):* DANCE 102, DANCE 103, DANCE 104, DANCE 105, DANCE 106, DANCE 107, DANCE 108, DANCE 109, DANCE 110, DANCE 111, DANCE 112, DANCE 201, DANCE 202, DANCE 203, DANCE 204, DANCE 205, DANCE 206, DANCE 210, DANCE 211, DANCE 212, DANCE 230, DANCE 301, DANCE 302, DANCE 303, DANCE 304, DANCE 305, DANCE 306, DANCE 310, DANCE 311, DANCE 312, DANCE 401, DANCE 402, DANCE 403, DANCE 404, DANCE 405, DANCE 406.
3. *Minimum of two courses from the following dance electives:* DANCE 234, DANCE 266, DANCE 366, DANCE 371, DANCE 420, DANCE 490. Up to 4 additional credits of DANCE 270 may be taken as electives and count toward completion of the dance major (minimum 6 credits).

Minor

Minor Requirements: Minimum 25 credits to include 10 credits from DANCE 166, DANCE 234, DANCE 250, DANCE 270, DANCE 344, DANCE 345, DANCE 390, DANCE 420, DANCE 490, DANCE 493; and 15 credits from DANCE 102, DANCE 103, DANCE 104, DANCE 105, DANCE 106, DANCE 107, DANCE 108, DANCE 109, DANCE 110, DANCE 111, DANCE 112, DANCE 201, DANCE 202, DANCE 203, DANCE 204, DANCE 205, DANCE 206, DANCE 210, DANCE 211, DANCE 212, DANCE 230, DANCE 301, DANCE 302, DANCE 303, DANCE 304, DANCE 305, DANCE 306, DANCE 310, DANCE 311, DANCE 312, DANCE 401, DANCE 402, DANCE 403, DANCE 404, DANCE 405, DANCE 406.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The Dance Program curriculum provides a balance between academic rigor and artistic development and serves as a basis for a broad range of career choices. Majors are encouraged to supplement their dance studies with coursework in other disciplines that provide a foundation for later specialization in dance ethnology, dance history and criticism, performance art, education, movement therapy, or movement science.
- * *Instructional and Research Facilities:* Three spacious and well equipped dance studios in Meany Hall. Use of Meany Hall and the Meany Studio Theatre for Dance Program performances.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* See adviser.
- * *Department Scholarships:* See adviser.
- * *Student Organizations/Associations:* Dance Student Association, University Ballet Company

Graduate Program

Graduate Program Coordinator
258 Meany, Box 351150
206-543-5594
uwdance@u.washington.edu

The dance program offers graduate study leading to a Master of Fine Arts degree. This program is designed specifically for professional dance performers who wish to prepare for a transition into college teaching careers. All graduate students will comprise the Chamber Dance Company and will hold teaching assistantships.

Master of Fine Arts

Admission Requirements

1. A letter of application and resume.
2. An undergraduate degree.
3. A minimum of eight years of professional performing experience.
4. The ability to demonstrate movement skills at a professional level in at least one idiom, and an in-person audition or performance video tape.
5. Three letters of reference verifying success and responsibility in the professional dance arena. Neither a foreign language nor the Graduate Record Examination is required. Application deadline is January 15.

Degree Requirements

During the two-year program, a student will be expected to enroll full-time (minimum of 10 credits/quarter) for three quarters each year (summer quarter excluded). A student must complete at least 72 credits in order to earn the degree, 31 of which are in required courses.

- * *Required Coursework:* Either PHIL 445 (5) or PHIL 446 (5); DANCE 510 (3), DANCE 515 (3), DANCE 520 (3), DANCE 521 (3), DANCE 530 (2), DANCE 531 (3), DANCE 595 (3)
- * *Coursework or Competency:* Students must have taken the following courses as an undergraduate, or have mastered the content of the following courses through practical experience, or complete these courses during their two years in the program: DANCE 420 (3), DANCE 493 (3-5), DANCE 544 (3-5), DANCE 545 (3-5), DANCE 590 (3-5)

Financial Aid

All graduate students will receive tuition waivers and teaching assistant stipends.

Course Descriptions

See page 325.

Digital Arts and Experimental Media

207 Raitt

The processes of inquiry encompassing imagination, exploration, discovery, and reflection are universal among artists, scholars, scientists, and engineers. All seek to uncover new knowledge through innovations that will improve our lives and communicate new ways of understanding ourselves and the universe. The Center for Digital Arts and Experimental Media (DXARTS) is a creative research convergence zone for intrepid artists and scholars who are pioneers of an unfolding new era in the arts.

The DXARTS program embraces an expansive range of arts practice, theory, and research across multiple disciplines. The center is home to its own undergraduate and graduate degree programs, but welcomes into its facilities and courses many who are not directly affiliated with one of these programs. Faculty and students at DXARTS may focus their work in a particular area of experimental arts (digital video, digital media art, computer music and sound art, computer animation, design computing, mechatronics, and so on), or they may pursue areas of creative research that have no media allegiance overlapping with and drawing from several or many different areas. Whatever the case, artists and scholars working at DXARTS engage in teaching, learning, and research within the synergistic, multidisciplinary setting of the center's labs, studios, and classrooms.

A common thread running through all of the work at DXARTS is the implicit maxim that to discover new knowledge we must challenge all assumptions. DXARTS is a place where the ideas and outcomes of creative arts research are in an ongoing state of becoming.

Undergraduate Program

Adviser
207 Raitt Hall, Box 353414
206-543-4218
dxarts@u.washington.edu

The DXARTS program offers the following program of study:

- * The Bachelor of Fine Arts degree with a major in digital arts and experimental media

Bachelor of Fine Arts

Program Admission Requirements

Admission is once a year. Application, normally during the sophomore year, is made during winter quarter for admission in spring. Admission is competitive. A minimum 2.50 GPA guarantees consideration, but the GPA of accepted applicants is normally considerably higher.

All applicants, regardless of background and proposed course of study, will be expected to show a significant level of computing skill and general technology literacy.

Students must enroll in DXARTS 200 autumn quarter. Based on performance in DXARTS 200, students are selected to continue in DXARTS 201 winter quarter. Students enrolled in DXARTS 201 are eligible to submit an application and supplemental materials to be considered for admission spring quarter. Supplemental materials include an electronic portfolio, a statement of interest in the program, and a proposed course-of-study plan. For details, see the program's Web page. Students must complete the following prior to application:

1. CSE 142
2. PHYS 114 or PHYS 121
3. MUSIC 120
4. ART H 203
5. Mathematics proficiency through the pre-calculus level. Proficiency may be demonstrated by completion of MATH 120 or equivalent, a minimum score of 68% on the UW Advanced Mathematics placement test, a minimum score of 2 on the mathematics AP exam, or completion of a college-level calculus course.

Major Requirements

In addition to the courses required for admission as described above, major requirements include the following:

1. 64-74 credits of DXARTS courses, as follows:
 - a. DXARTS 202 (5 credits)
 - b. Three quarters of DXARTS 400 (6 credits total)
 - c. DXARTS 412 (3 credits)
 - d. Completion of two of the following four DXARTS core sequences (30 credits): DXARTS 441, DXARTS 442, DXARTS 443 (3D Motion and Graphics); DXARTS 451, DXARTS 452, DXARTS 453 (Video); DXARTS 461, DXARTS 462, DXARTS 463 (Sound); DXARTS 471, DXARTS 472, DXARTS 473 (Mechatronics).
 - e. Completion of a third core sequence as listed above or one of the following fundamentals courses dealing with a third content area (5 to 15 credits): DXARTS 440, DXARTS 450, DXARTS 460, or DXARTS 470.
 - f. Senior thesis in the form of 15 credits of DXARTS 491, DXARTS 492, and DXARTS 493, including the completion and exhibition of a BFA thesis project that is a significant and original contribution both aesthetically and technically.
2. 20-30 credits in additional DXARTS courses, or courses from a list of approved electives in other areas, to bring total major credits to 94. See department website or advising office for a list of approved electives.
3. A minimum 2.0 grade in all DXARTS courses counted toward the major. A cumulative GPA of 2.50 in all DXARTS courses and approved electives.
4. For complete information about the BFA program visit the program's Web page.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The program goal is to create opportunities for entering artists to discover and document new knowledge and expertise. Unlike other BFA degrees, which offer initial professional studio art education, this BFA is primarily a pre-graduate, research-oriented degree, signifying that an individual is professionally qualified to investigate fundamental problems in the nature and practice of digital arts and experimental media. Graduates are prepared to pursue original creative and technical research in the field and contribute to the development of knowledge and its consequences in society and culture.
- * *Instructional and Research Facilities:* DXARTS houses extensive laboratories and advanced research studios with state-of-the-art computing, imaging, sound, networking, mechatronics, and electronics equipment to support a wide range of experimental art.
- * *Honors Options Available:* None.
- * *Research, Internships, and Service Learning:* Some areas of research and professional opportunities within DXARTS include digital video art, computer music composition, Web site design and programming, 3D animation, motion graphics design, user interface design, sound design, interactive media production, multimedia art, electronic stage and set design, authoring of electronic online publications, special effects design, virtual environment design, sound art, and installations art (in galleries, public, and virtual spaces).
- * *Department Scholarships:* Limited in number with competitive application processes. Please see adviser for details.
- * *Student Organizations/Associations:* None.

Graduate Program

Graduate Program Coordinator
207 Raitt Hall, Box 353414
206-543-4218
dxarts@u.washington.edu

Doctor of Philosophy

The goal of doctoral education in Digital Arts and Experimental Media is to create opportunities for artists to discover and document new knowledge and expertise at the most advanced levels higher education can offer. While creating new art is at the center of all activities in the program, the DXARTS Ph.D. is a research-oriented degree requiring a substantial commitment to graduate-level study and reflection. The Ph.D. degree prepares artists to

pursue original creative and technical research in digital arts and experimental media and pioneer lasting innovations on which future artists and scholars can build.

Admission Requirements

- * Master's degree or equivalent in a discipline or field related to the proposed doctoral work.
- * Portfolio of artistic work.
- * Statement of purpose
- * Competence in computing, general technology literacy, and skill and imagination in the applicant's areas of interest.
- * One copy of the Graduate School's Application Form
- * One sealed official transcript from each collegiate institution attended.
- * A digitally based portfolio of artistic work including any other documentation that can help the admissions committee make its evaluations. The portfolio should be thoughtfully organized in a digital format (CDROM, DVD, URL, etc.) that best represents the applicant's work. Non-digital supplemental materials should be included in the index on the digital portfolio.
- * A complete curriculum vitae and narrative biography
- * Three letters of recommendation from instructors or professors familiar with the applicant's academic qualifications
- * International applicants must submit TOEFL and TSE scores

Degree Requirements

90 credits, as follows:

- * Prior to the General Examination which concludes Phase Two of the program, six quarters of full-time study (minimum of 10 credits per quarter). DXARTS 500 is required every quarter.
- * 60 credits of DXARTS approved courses (not including DXARTS 800 credits). At least 30 of the credits earned must be at the 500 level. At least 30 must be in graded 400- and 500-level courses.
- * Minimum 3.00 GPA in DXARTS courses.
- * General Examination
- * Final Project - a substantial and original contribution in both artistic and technical domains. At least 27 credits of DXARTS 800 over a period of at least three quarters before taking the Final Doctoral Exam.
- * Two-part Final Exam. Registration as a doctoral student is required during the quarter the exam is taken.

Course Descriptions

See page 327.

Drama

101 Hutchinson

Drama as an art form is a far-reaching discipline providing a humanistic approach to today's societal problems and issues. Drama wrestles with the most compelling issues of our time, to derive new understanding for the advancement of the human condition. It also fosters curiosity, invention, bravery, and humor, promoting practical innovation and personal revelation as lifelong habits of the artist.

Through mastery of skills and techniques, people in drama nurture imagination, seek inspiration and fluent, authentic, original storytelling that reflects the complexity of the human spirit.

Undergraduate Program

Adviser
129 Hutchinson Hall, Box 353950
206-543-4204
uwdrama@u.washington.edu

The School of Drama offers the following program of study:

- * The Bachelor of Arts degree with a major in drama

Bachelor of Arts

Suggested First- and Second-Year College Courses: See department admission requirements below.

Department Admission Requirements

DRAMA 251 and DRAMA 302; two of the following: DRAMA 210, DRAMA 211, DRAMA 212; one of the following: DRAMA 290, DRAMA 291, DRAMA 292; and a minimum GPA of 2.50 for the five courses.

No audition is required to enter the program.

Major Requirements

62 credits as follows:

1. DRAMA 251, DRAMA 252, DRAMA 253: Beginning Acting Series (12 credits)
2. DRAMA 210: Scenic Design and Construction (4 credits)
3. DRAMA 211: Costume Design and Construction (4 credits)
4. DRAMA 212: Stage Lighting (4 credits)
5. DRAMA 290, DRAMA 291, DRAMA 292: Mainstage Crew, (1-3 credits each)
6. DRAMA 302: Analysis of the Theatre (5 credits)
7. One course from the following: DRAMA 374, DRAMA 377, DRAMA 378, DRAMA 471, DRAMA 472 (5 credits)
8. One course from the following: DRAMA 473, DRAMA 475, DRAMA 476 (5 credits)
9. One course from the following: DRAMA 371, DRAMA 373, DRAMA 416, DRAMA 494 (5 credits)
10. One additional course from the above three groups (5 credits)
11. 300- and 400-level drama electives (10 credits)
12. 1 credit of DRAMA 401

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The faculty of the School of Drama considers the optimum preparation for the theatre artist to be comprised of a liberal arts undergraduate major in drama and a graduate conservatory education.

Learning objectives include enriched artistic expression, a foundation for further study, and cultivation of essential life skills: teamwork, communication, critical thinking, and imagination.

Students earning the Bachelor of Arts in drama are prepared to seek employment in the theatre industry, apply for advanced degrees in a specific area of theatre (e.g., MFA in acting or design) or transfer the skills gained through the program to broader career opportunities. Recent graduates have pursued careers in acting, design, directing, technical direction, stage management, dramaturgy, playwriting, literary management, teaching, and in such non-theatre occupations as real estate agent, fund-raiser, public relations staff, politician, librarian, academic counselor, lawyer, nurse, translator of foreign films, admissions counselor, trade show/convention production assistant, talent agent, casting director, music promoter, special events coordinator, tour guide, human resources coordinator, wedding coordinator, aerobics instructor, music promoter.

- * *Instructional and Research Facilities:* Rehearsal and performance spaces include the Glenn Hughes Penthouse Theatre (the first theatre-in-the-round built in the United States), the thrust-stage Playhouse Theatre, the end-stage Meany Studio Theatre, and the proscenium in Meany Hall. Other spaces include the Cabaret, Studio 201, and Hutchinson 218. School of Drama facilities include a Design Studio, Costume Shop, Scene Shop, and computer labs.

The Drama Library houses reserve books, plays, sound effects, dialect tapes, local audition and job notices, and a special collection of acting editions. Also available are specialized indexes and theatre databases. The librarian assists in the use of reference materials and indexes, bibliographic searches of on-line databases, and offers reference service and bibliographic instruction sessions for groups and individuals.

- * *Honors Options Available:* Ad hoc honors only. See adviser for details.
- * *Research, Internships and Service Learning:* Student participation in all aspects of dramatic art is provided through student productions, and faculty- and student-directed plays drawn from the full range of world dramatic literature and produced throughout the year. The School also produces operas in association with the School of Music

To enhance employability and gain hands-on experience, students are encouraged to participate in internships with regional theatres, and related organizations or businesses. Academic credit may be earned for

internships under the course number GEN ST 350. Internship credits count toward non-major elective credits to graduate. A resource guide to drama-related internships is available at the drama undergraduate advising homepage.

Drama students are also encouraged to apply for undergraduate research, leadership and/or fellowship grants available through the Mary Gates Endowment.

- * *Department Scholarships:* School of Drama scholarships are awarded annually every spring for the following academic year to students who have demonstrated academic merit and contributed significantly to the School of Drama. Applications are available from the advising office mid-January.
- * *Student Organizations/Associations:* The Undergraduate Theatrical Society (UTS) is a student organization that produces undergraduate theatre works in the Cabaret performance space. Any UW student may audition for UTS productions. UTS members also participate in annual New Student Orientation and other school events on a volunteer basis.

A volunteer elected group of drama students, the BA Council, meets regularly with the Executive Director of the School of Drama to discuss issues relative to the undergraduate program.

Of Special Note:

Continuation Policy: Drama majors who fall below a 2.00 GPA in drama courses will be placed on academic probation for one quarter. Students who fail to raise their GPA to 2.00 in that time are dropped from the major and returned to premajor status. Students may petition the School of Drama for readmission.

Graduate Program

Graduate Program Coordinator
101 Hutchinson, Box 353950
206-543-5140
uwdrama@u.washington.edu

The School of Drama offers professional training and scholarly programs leading to the Master of Fine Arts (M.F.A.) and Doctor of Philosophy (Ph.D.) degrees. Areas of study for the M.F.A. degree are acting, stage direction, scene design, lighting design, and costume design. Most students should expect to spend three intensive years completing the requirements for the M.F.A. degree.

The Ph.D. program provides students with training for scholarly research in theatre history, dramatic literature, theory, and criticism. Students are also encouraged to do interdisciplinary work with such allied programs as the Ph.D. program in critical theory.

Master of Fine Arts -- Acting

Admission Requirements

Admission is based on a private fifteen minute audition and interview with the head of the Professional Actor Training Program (PATP).

Applicants should prepare the following:

- * A two-minute monologue from a modern prose play.
- * A two-minute Shakespearean verse monologue.
- * Approximately 16 bars of a song, a cappella or with auditioner-provided accompaniment.
- * Auditioners should also be ready to detail their previous training.

Students who hold (or will hold by the time they enroll) a baccalaureate degree from an accredited institution may apply. Most applicants have undergraduate degrees in theatre, but it is not essential. All applicants must demonstrate outstanding talent to be admitted. The GRE is not required. International applicants must meet the minimum TOEFL and TSE scores and other requirements listed on the PEP.

Applicants must submit the following to Graduate Programs, School of Drama, University of Washington, Box 353950, Seattle, WA 98195-3950:

- * The School of Drama PATP application form (available for download from the School's web site) with the preferred audition date indicated.
- * A \$40.00 (non-refundable) audition fee, payable by check or money order

to the School of Drama. Applications postmarked after the deadline must include a late application fee of \$10.00 (\$50.00 total). Please note, this is a separate fee from the one due to the Office of Graduate Admissions.

- * A photograph.
- * A current résumé of training and experience in the applicant's field.
- * One set of official transcripts.
- * A statement of purpose including educational and professional goals.
- * Three letters of recommendation.
- * A copy of the Application for Admission to the Graduate School.

Degree Requirements

A group of ten students enrolls each autumn quarter for the three-year program. In addition to performing in studio productions, first-year students join the acting pool in the winter quarter and, together with second and third-year students, perform in the School of Drama mainstage subscription season, directed by faculty, guest professionals supervised M.F.A. students in the directing program.

The studio classes include extensive work on Stanislavski based process, Suzuki training, voice (Linklater based), singing, speech (Skinner-based), stage combat (for certification), dance, trapeze and audition work. The Alexander technique is both taught as a class and is woven throughout most studio classes and productions.

Throughout the year PATP students have opportunities to audition for summer theatre festivals from around the region and country. We also maintain productive relationships with professional theatres in Seattle and the region such as the Seattle Repertory Theatre, Intiman, Empty Space, ACT, Seattle Children's Theatre, The Guthrie Theatre and the Oregon Shakespeare Festival.

In their third year, PATP students take an in depth class on "the business of acting" as well as an intensive course in acting for the camera. They rehearse and perform in a third year ensemble show with an outside professional director, create a twenty-minute solo performance of their own design and with the faculty develop a professional showcase that plays in Seattle, Los Angeles and New York.

All PATP students are evaluated by the acting faculty at the end of each quarter. Students are admitted with the expectation that all will graduate, although dismissal is possible given two unsatisfactory critiques.

Required coursework is 90 credits as follows:

- * 36 credits of DRAMA 557 (12, max. 36)
- * 36 credits of DRAMA 558 (12, max. 36)
- * DRAMA 551 (1-3, max. 3)
- * DRAMA 552 (1-3, max. 3)
- * DRAMA 553 (1-3, max. 3)
- * 6 credits of DRAMA 559 (6, max. 18)
- * 9 credits of DRAMA 700 (1, max. 9)

Master of Fine Arts -- Directing

Admission Requirements

This program accepts only two MFA candidates every other year. While there is always room for the exceptional applicant, it is extremely difficult to gain admission directly out of a B.A. program with no other credentials. The program tends to choose candidates who show evidence of enterprising energy and accomplishment "out in the world," who may have successfully assisted seasoned directors, who have at least the beginning of a professional and artistic record.

1. All Applicants
 - a. Applicants submit the following to Graduate Programs, School of Drama, Box 353950, Seattle WA 98195-3950:
 - i. The separate Directing application form (available for download from the School's Web site and \$35 fee, made payable to the School of Drama. This fee is separate from that due to the Office of Graduate Admissions (see B below).
 - ii. A current résumé of training and experience in your field.
 - iii. A statement of purpose including educational and professional goals.
 - iv. Three letters of recommendation.
 - v. A copy of the Application for Admission to the Graduate School.
 - vi. One set of official transcripts.
 - vii. A directorial analysis of a play or opera chosen from a preselected list (current list will be in packet).

The résumé of theatre activity, statement of purpose and letters of recommendation are all important. The three letters of recommendation should not come from the same source (e.g., the student's B.A. program's faculty). Students may include a video (not required). If you want the video returned, please include a self-addressed stamped envelope for that purpose.

- b. All applicants for graduate study at the UW must also apply to the Office of Graduate Admissions. The GRE is not required for any applicant. International applicants must meet minimum TOEFL and TSE scores and other requirements as listed on the PEP, <http://www.grad.washington.edu/admissions/intl/intlmain.htm> and should apply by November 1.

2. Second step for selected applicants

A short list of candidates (12-16) will be invited to continue the application process and interview. Candidates are normally given a minimum three weeks' notice and should be prepared to cover travel costs and one to two nights' lodging.

- a. Candidates will interview for 30 minutes with the head of the program and another faculty member of the program.
- b. Candidates will present a two-minute monologue as a way of revealing, not acting talent but the candidate's knowledge of what it is to speak dialogue, transmit thoughts and physically relate to space.
- c. Candidates will be asked to respond to a two-page questionnaire provided by the School of Drama.

3. Third step for final short listed applicants

A small group of four to eight candidates will be invited to Seattle where they will be interviewed in person by a group of faculty. As part of this interview each candidate will conduct a rehearsal of one of three pre-selected scenes with actors provided by the School of Drama. These actors will be familiar with the material and ready to be on their feet. Candidates will receive the scene options and any additional information when they are notified of their selection to this short list.

Degree Requirements

Coursework:

90 credits, to include the following:

- * 14 credits of DRAMA 563 (2, max. 18)
- * 18 credits of DRAMA 567 (1-3, max. 12)
- * Electives chosen from DRAMA 419 (3, max. 9), DRAMA 510 (3, max. 18), DRAMA 560 (2), DRAMA 561 (2-3, max. 12), DRAMA 562 (1-3, max. 12), and DRAMA 569 (3)
- * 9 credits of DRAMA 700

Additional Coursework: After discussions with each student the faculty may advise additional coursework in such areas as Alexander technique, dialects, lighting design, combat, literature, or history of styles and costume.

All students are evaluated by all of the contact faculty each quarter.

Internships: One quarter of the program is devoted to a professional internship experience. MFA directors may intern either locally, nationally or internationally during winter or spring quarter of the third year.

Master of Arts -- Design

Admission Requirements

Applicants to the Design program must submit a portfolio representative of their work and interview with Design faculty. They may mail the portfolio to the School of Drama and interview with a faculty member on the phone. It is always preferable for the applicant to bring it with them when they visit Seattle to interview with Design Faculty and sit in on graduate design classes. Other required application materials and fees are detailed below.

The program generally accepts two students in each area every year. While there is always room for the exceptional applicant, it is extremely difficult to gain admission directly out of a BA/BFA program with no other credentials.

Interviews: A personal interview is highly recommended, preferably in Seattle. Interviews are held in Seattle from mid-January to the beginning of March, with a limited number scheduled each week. Interviews are held when possible on Wednesday afternoons and applicants are invited to visit

classes Wednesday morning. Please fill out the MFA Design application form completely and indicate how and when you plan to both submit your portfolio and interview with faculty.

Portfolios: Portfolio materials need not be matted nor in a presentation case. The portfolio may include hand drafting, renderings, photographs of realized work or of models, costume sketches and other graphic work or high quality photocopies of same, blue lines and/or duplicate slides. Work should be presented in chronological order and should demonstrate strong graphic skills (including accurate rendering of the human figure) and the ability to devise effective design solutions to the problems posed by a script. It is particularly desirable for the portfolio to include examples of drawing or painting not intended as theatre design projects: figure drawing, landscape, architectural sketching or lighting, lighting installations, etc. Again, high quality photocopies are acceptable.

For lighting design applicants, the portfolio should include examples of hand or computer drafting, two or more complete projects including a one-page statement of conceptual approach, hook-up, plot and cue ideas. It should also include samples of set sketches and life drawing.

Application Procedures: Applicants submit material to both the Office of Graduate Admissions and the School of Drama. If you have any questions about the application procedure, please contact the School of Drama's graduate program assistant at (206)543-0714 or email uwdrama@u.washington.edu.

The GRE is not required for any applicant. International applicants must meet minimum TOEFL and TSE scores and other requirements as listed on the PEP.

1. Submit the following to Graduate Programs, School of Drama, Box 353950, Seattle WA 98195-3950:
 - a. Your portfolio (you can bring this with you if you interview in Seattle).
 - b. The separate Design application form (available for download from the School's web site) and \$35 fee. Please note, this fee is separate from the one due to the Office of Graduate Admissions (B below).
 - c. A current résumé of training and experience in your field.
 - d. Three letters of recommendation.
 - e. A statement of purpose including educational and professional goals.
 - f. A copy of the Application for Admission to the Graduate School.
 - g. One set of official transcripts.
2. All applicants for graduate study at the UW must also apply to the Office of Graduate Admissions.

Degree Requirements

The MFA program is three years in length, requiring 90 credits of course work. The first two years are devoted to class and studio work and production projects. In the third year, students complete an internship with a professional theatre before returning to the School of Drama for one quarter for a final thesis project. The program of study is intended to give the student the basic skills needed to work productively in his/her area of interest and to help the student develop his/her own individual artistic vision. The core of the program is a group of classes and seminars that bring designers and directors together to discuss the creation of works for the stage. Other studio and skills courses develop proficiency. Specific courses vary depending on design emphasis. Professionals working in Seattle are regularly invited to attend classes and offer critiques or discuss their work. Students regularly assist faculty on outside projects.

Scenic Design: Students in scenic design are expected to acquire acceptable proficiency in drawing and painting, drafting, model building, scene painting and scene and property construction through a rigorous succession of studio assignments and actual production work.

Costume Design: This course of study emphasizes the aesthetic as well as intellectual analysis of theatrical or operatic texts and how one turns these impulses into three dimensional, unified designs. Students will have intensive exposure to this process as they are mentored through the production of their designs as well as through classes, which encompass design, construction, graphic skills, and history.

Lighting Design: The lighting design program emphasizes communication with the director and other designers and a complete understanding of the lighting design process. In advanced studio courses, students work in a light lab, in the School's various theatres, as well as site-specific venues encountering specific lighting challenges. Designing and assisting for UW and off-campus productions is an important part of the program. Lighting students study set and costume design in studio class as well.

Doctor of Philosophy

Admission Requirements

Preference is given to applicants with M.A./M.F.A. degrees and theatre experience but those who hold a baccalaureate degree from an accredited college or university are eligible to apply.

- * An essay or thesis chapter representative of the applicant's best scholarly work.
- * Graduate Record Examination (GRE) test scores.
- * A current résumé of training and experience in your field.
- * A statement of purpose including educational and professional goals.
- * Three letters of recommendation. Each recommendation must state whether the letter is or is not available for review by the applicant. Forms for this purpose are available for download from the School's web site (<http://depts.washington.edu/uwdrama>). These letters of recommendation should evaluate the applicant's skills and accomplishments as a theatre artist and his or her potential for graduate study in theatre history, dramatic theory and criticism.
- * A copy of the Application for Admission to the Graduate School.
- * One set of official transcripts.
- * All applicants for graduate study at the UW must also apply to the Office of Graduate Admissions.

International applications must meet minimum TOEFL and TSE scores and other requirements as listed on the PEP.

Degree Requirements

Coursework within the School consists of three years of study, 99 credits of coursework, including a sequence of 18 seminars (nine in history and nine in theory) and annual examinations. These linked courses provide complete preparation in the major issues of historical study and contemporary critical practice. Students also enroll in a minimum of three courses outside the School of Drama and must complete an upper level reading course in a foreign language. Specific course work includes DRAMA 571, DRAMA 572, DRAMA 573, DRAMA 575, DRAMA 576, DRAMA 577, DRAMA 581, DRAMA 582, DRAMA 583, DRAMA 585, DRAMA 586, and DRAMA 587, as well as 30 credits of DRAMA 800.

The sequence of drama seminars reflects the changing needs of students, the developing research of the faculty and the conditions of contemporary scholarship. Special topics in the history sequence have included Restoration theatre, drama in the Industrial Age, communism and capitalism, and ancient theatre history. Seminars in criticism have included reading, interpretation and performance; mimesis and theatrical representation; the semiotics of theatre; and drama and Marxist theatre theory. Students are encouraged to develop original research in these seminars and to present their work at professional meetings or publish it in academic journals.

The fourth year of the program is devoted to writing a dissertation under the guidance of a faculty advisor. Recent doctoral dissertations have explored semiotics, feminism, American theatre history, contemporary English and German drama, ethnicity and performance theory.

Course Descriptions

See page 328.

Earth and Space Sciences

310 Condon Hall

Earth and space sciences seeks to further the understanding of the Earth, the solar system, and their histories. The scope extends from the center of Earth to the rim of the solar system, and activities cut across traditional disciplines of physics, chemistry, biology, geology, and mathematics. The discipline examines Earth's interior structure, chemistry, motion, and dynamics; geologic hazards; processes affecting the surface environment and climate; the surrounding space environment; planetary processes; and geobiology.

Undergraduate Program

Adviser

310 Condon Hall, Box 351310

206-616-8511

advising@ess.washington.edu

The Department of Earth and Space Sciences offers the following programs of study:

- * The Bachelor of Science degree with a major in earth and space sciences, with options in biology and physics
- * The Bachelor of Arts degree with a major in earth and space sciences
- * A minor in earth and space sciences

The Bachelor of Science degree is designed for students interested in geology and geophysics, and a career path in graduate studies or in the private sector, where field and technology experiences and problem-solving skills are an important asset. The Biology Option enables B.S. students interested in paleontology and paleobiology to emphasize biology courses. The Physics Option allows for an emphasis in physics and geophysics. The Bachelor of Arts degree is designed for students who wish to obtain a broad understanding of earth sciences as a background for careers such as science journalism, environmental law, K-12 teaching, or environmental policy.

Bachelor of Science

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123 or PHYS 114/PHYS 117, PHYS 115/PHYS 118, PHYS 116/PHYS 119; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

90 credits as follows:

1. Science Core (35 Credits):
 - a. Basic Supporting Science (20 credits): MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121; CHEM 142. (Students wishing to pursue the ESS Physics Option must take PHYS 121.)
 - b. ESS Required Core Courses (15 credits): ESS 211, ESS 212, ESS 213. (Students in the ESS Physics Option may substitute ESS 205 for one of these.)
2. ESS Options (55 Credits):
 - a. Standard Option.
 - i. Supporting science (13-15 credits): MATH 126 or equivalent; PHYS 115/PHYS 118 or PHYS 122; and one of PHYS 116/PHYS 119 or PHYS 123, CHEM 152, MATH 307, MATH 308, STAT 311.
 - ii. ESS required (22 credits): Two of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400.
 - iii. ESS electives (18-20 credits): ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered 490 through 499.)
 - b. Biology Option.
 - i. Supporting science (21 credits): CHEM 152, CHEM 162 or equivalent; BIOL 180, BIOL 200 (or two from BIOL 201, BIOL 202, BIOL 203); MATH 126 recommended but not required.
 - ii. ESS required (22 credits): Two of ESS 311, ESS 312, ESS 313, ESS 314; ESS 400 or equivalent field/experiential component.
 - iii. ESS electives (12 credits): ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered 490 through 499.)
 - c. Environmental Earth Sciences Option
 - i. Supporting science (10 credits): STAT 311 or Q SCI 381; CHEM 152 or CHEM 220.
 - ii. ESS required (35 to 37 credits): ESS 201; one of ESS 311, ESS 312, ESS 313, ESS 314, ESS 326; two from ESS 315, ESS 421, ESS 426, ESS 427, ESS 455, ESS 456, ESS 459; ESS 400 or equivalent field/experiential component.
 - iii. Electives (10 credits): Additional courses chosen from any ESS 311-series course not taken as a required course above, from ESS 400-level courses (may not include independent study or seminar courses numbered 490 through 499), or from an approved list of courses outside ESS.

d. Physics Option

- i. Supporting science (32-35 credits): MATH 126, MATH 308, MATH 324 or MATH 136, MATH 324; PHYS 122, PHYS 123, PHYS 227, PHYS 228, PHYS 321, PHYS 322.
- ii. ESS required (5 credits): One of ESS 311, ESS 312, ESS 313, ESS 314.
- iii. ESS electives (15-18 credits): ESS 400-level courses or any ESS 311-series course not taken as a required course, above. (May not include independent study or seminar courses numbered 490 through 499.)

All courses counted toward the major must be completed with a minimum grade of 2.0.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Q SCI 291, Q 292 or MATH 124, MATH 125; PHYS 114/PHYS 117 or PHYS 121; CHEM 142.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

90 credits as follows:

1. Supporting Science (35 Credits):
 - a. Basic Supporting Science (20 credits): CHEM 142; Q SCI 291, Q SCI 292 or MATH 124, MATH 125 or equivalent; PHYS 114/PHYS 117 or PHYS 121.
 - b. Additional courses: 15 credits from department's approved list of courses in science and mathematics. See adviser for current list.
2. ESS Courses (55 Credits):
 - a. Required courses (15 credits): Two of ESS 211, ESS 212, ESS 213. One of ESS 311, ESS 312, ESS 313, ESS 314.
 - b. Elective Courses: 40 upper division credits (300- and 400-level) with at least 10 credits at the 400-level. (May not include independent study or seminar courses numbered 490 through 499.)
3. All courses must be completed with a minimum grade of 2.0

Minor

Minor Requirements: 30 ESS credits with at least 15 at the upper division level (300- or 400-level) of which at least 3 credits must be at the 400-level. (May not include independent study or seminar courses numbered 490 through 499.) All courses must be completed with a minimum grade of 2.0.

Student Outcomes and Opportunities

- * *Instructional and Research Facilities:* See below.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser or department Web site for requirements.
- * *Research, Internships, and Service Learning:* Job and internship possibilities are posted in the department and forwarded by email to all undergraduate students.
- * *Department Scholarships:* There are a limited number of departmental scholarships available. Scholarship applications are invited from all undergraduate students in the major during spring quarter. The awards are applicable to the following academic year.
- * *Student Organizations/Associations:* Geo Club organizes field trips and social gatherings. Information about meetings and events is forwarded to undergraduate majors by email.

Graduate Program

Graduate Program Coordinator
310 Condon Hall, Box 351310
206-543-1190
advising@ess.washington.edu

The Department of Earth and Space Sciences offers graduate programs leading to the Master of Science (M.S.) degree and the Doctor of Philosophy (Ph.D.) degree in both Geological Sciences and in Geophysics. The programs emphasize a rigorous quantitative approach in conjunction with detailed in-situ and/or laboratory observations to address significant problems that will lead to a better understanding of the Earth and its environment.

Major areas of interest are the internal and surface structures and materials of the Earth and planets, dynamic processes within the earth, oceans, atmosphere, and space environments, their history and the interaction of life with these environments. The required curriculum is flexible to facilitate interdisciplinary research approaches. The department is also one of the core departments (with the Departments of Atmospheric Sciences and Oceanography) in the interdisciplinary graduate Program on Climate Change and a participant in the Astrobiology program.

Master of Science

Admission Requirements

- * Copy of UW Graduate School Application Form. After applying online, print it out on paper, and send a copy signed and dated in ink.
- * Official test scores for the Graduate Record Exam (GRE) Note: TSE scores are not required.
- * Official TOEFL scores for international applicants
- * One copy of official transcripts of all colleges and universities attended, in sealed envelopes, if possible. International transcripts must be in the original language and accompanied by a certified English translation.
- * Three letters of recommendation on the department's Recommendation Form.
- * Departmental application form
- * Personal resume and personal statement (see instructions in departmental application)

Degree Requirements

36-45 credits, as follows:

As the Department of Earth and Space Sciences encourages interdisciplinary courses of study tailored to each student, there are few formal requirements for the M.S. or Ph.D. degrees beyond those specified by the Graduate School.

In addition, departmental requirements for graduate students in both geological sciences and geophysics include the following:

- * Courses determined in consultation with the student's advisory committee to insure both depth and breadth
- * ESS 594, each quarter of the first year
- * ESS 599, every quarter (except summer)
- * Prelim Exam (see below)

With Thesis: 36 credits, of which 18 must be in courses at the 400 level or above and up to 9 may be for thesis (ESS 700). Final examination consists of oral presentation and defense of thesis.

Without Thesis: 45 credits, of which 18 must be in courses at the 400 level or above, which includes a 5-credit research paper (ESS 600). Final examination is oral and is administered by a supervisory committee.

Prelim Exam: The Prelim Exam is a requirement of ESS for every graduate student in its program. It is only one component of the information the Department uses to evaluate admission to the Ph.D. program early in the second year of a student's graduate program. Along with the first-year research seminar sequence, the Prelim Exam is used to encourage students to learn how to develop and present a research project, and get an early, structured start on graduate research.

For the Prelim Exam a graduate student must demonstrate the ability to think critically, logically and creatively and to communicate effectively; and knowledge of the disciplines that underlie the student's general area of interest (e.g., geology, geophysics, physics, math, chemistry, biology, etc.)

All entering graduate students (both M.S. and Ph.D.) must present and defend a Research Proposal before a Student Evaluation Committee (SEC) at the end of their first year or at the beginning of their second year in the Department of Earth and Space Sciences.

Doctor of Philosophy

Admission Requirements

- * Copy of UW Graduate School Application Form. After applying online, print it out on paper, and send a copy signed and dated in ink.
- * Official test scores for the Graduate Record Exam (GRE) Note: TSE scores are not required.
- * Official TOEFL scores for international applicants

- * One copy of official transcripts of all colleges and universities attended, in sealed envelopes, if possible. International transcripts must be in the original language and accompanied by a certified English translation.
- * Three letters of recommendation on the department's Recommendation Form.
- * Departmental application form
- * Personal resume and personal statement (see instructions in departmental application)

Degree Requirements

90 credits, as follows:

As the Department of Earth and Space Sciences encourages interdisciplinary courses of study tailored to each student, there are few formal requirements for the M.S. or Ph.D. degrees beyond those specified by the Graduate School.

In addition, departmental requirements for graduate students in both geological sciences and geophysics include the following:

- * Courses determined in consultation with the student's advisory committee to insure both depth and breadth

Along with the first-year research seminar sequence, the Prelim Exam is used to encourage students to learn how to develop and present a research project, and get an early, structured start on graduate research.

For the Prelim Exam a graduate student must demonstrate the ability to think critically, logically and creatively and to communicate effectively; and knowledge of the disciplines that underlie the student's general area of interest (e.g., geology, geophysics, physics, math, chemistry, biology, etc.)

All entering graduate students (both M.S. and Ph.D.) must present and defend a Research Proposal before a Student Evaluation Committee (SEC) at the end of their first year or at the beginning of their second year in the Department of Earth and Space Sciences.

Research Facilities

Extensive laboratory facilities are available for a wide range of experimental/field work. These include a wet chemistry laboratory, a JEOL 733 Superprobe with EDS/WDS and a high resolution laser Raman spectrometer for mineral analysis, a thermal-ionization mass spectrometer, a multi-collector inductively-coupled-plasma mass spectrometer and associated clean laboratories for analysis of stable and radiogenic isotopes, a computer laboratory, a remote-sensing laboratory with an image-processing system with LANDSAT tape library and spectral reflectance equipment, and high temperature controlled atmosphere furnaces. There is also field equipment for electromagnetic induction studies; a high-pressure/temperature laboratory, including a laser-induced phonon spectrometer and diamond anvil cells for studying such rock and mineral properties as compression, sound velocities, and thermal conductivity; a permanent, regional seismic network; a portable telemetered seismic network for studying volcanoes and active faults in western North America; geodetic-quality global-positioning-system receivers; a cold laboratory for studying problems in snow-cover geophysics, glaciology, and sea-ice research; a geophysical-fluids laboratory; two cloud microphysics laboratories; a space physics and aeronomy laboratory for preparing ground-based, balloon, rocket, and satellite experiments; and a laboratory for the study of advanced plasma propulsion concepts. Additional facilities are provided by the Quaternary Research Center (which houses state-of-the-art cosmogenic isotope and stable-isotope research laboratories, palynology, snow and ice research, and a periglacial laboratory) and the Burke Memorial Washington State Museum (which houses paleontological laboratories and extensive reference collections of invertebrate, vertebrate, and plant fossils, and minerals).

Financial Aid

Most graduate students receive support in the form of teaching or research assistantships, and endowed fellowships and scholarships.

Course Descriptions

See page 331.

Economics

302 Savery

Economics concerns the wealth of nations. As a social science, it studies the institutions and arrangements that societies use to create and allocate productive resources in order to increase the well being of their members. It advances understanding of the choices and behavior of individuals, households, firms, and other organizations.

Undergraduate Program

Advisers

304 Savery, Box 353330
206-543-5794
econadv@u.washington.edu

The Department of Economics offers the following programs of study:

- * The Bachelor of Arts degree with a major in economics
- * The Bachelor of Science degree with a major in economics

The Bachelor of Arts degree is designed to provide a general background in economics, and is the choice of the vast majority of departmental majors.

The Bachelor of Science degree requires more mathematics for admission, and its graduation requirements have a more pronounced quantitative emphasis.

Applied fields of study available include money and banking, industrial organization, natural resource economics, labor economics, public finance, economic history, comparative systems and development, international trade, and econometrics.

Bachelor of Arts

Suggested First- and Second-Year College Courses: ECON 200, ECON 201 and MATH 120, MATH 124 or MATH 111, MATH 112. Courses that develop strong analytical and quantitative-reasoning skills.

Department Admission Requirements

1. A minimum of 45 quarter credits completed, including ECON 200, ECON 201; STAT 311; MATH 112, MATH 124, MATH 134, or MATH 145;
2. A minimum cumulative GPA for all prior college work of 2.80;
3. GPA for five courses required for entrance must be at least 2.80 with a minimum of 2.0 in each course;
4. Transfer students must be enrolled at the UW before applying to the major;
5. Application deadline is the second Friday of each quarter (including summer). All applicants who meet the minimum admission requirements are admitted in time to register as economics majors for the following quarter.

Major Requirements

55 credits as follows:

1. Admission to the major.
2. A minimum of 50 credits in economics, including ECON 200, ECON 201, ECON 300, ECON 301, STAT 311, and at least five other upper-division courses in economics at the 400 level, excluding ECON 496, ECON 497, and ECON 499.
3. Grades of 2.0 or better in ECON 300 and 301.
4. One calculus course (MATH 112, MATH 124, MATH 134, MATH 145, or equivalent).
5. Transfer students are required to complete a minimum of 25 upper-division economics credits in residence at the UW.

Bachelor of Science

Suggested First- and Second-Year College Courses: ECON 200, ECON 201 and MATH 120, MATH 124 and STAT 311. Additional calculus

preparation during the first year is strongly recommended. Courses that develop strong analytical and quantitative-reasoning skills.

Department Admission Requirements

1. A minimum of 45 quarter credits completed, including ECON 200, ECON 201; STAT 311, STAT 341, or STAT 390; MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); and one 5-credit course in English composition.
2. A minimum cumulative GPA for all prior college work of 2.80;
3. GPA for five of the seven courses required for entrance must be at least 2.80 with a minimum grade of 2.0 for each course (highest math grade used in GPA calculation);
4. Transfer students must be enrolled at the UW before they may apply;
5. Application deadline is the second Friday of each quarter (including summer). All applicants who meet the minimum admission requirements are admitted in time to register as economics majors for the following quarter.

Major Requirements

65 credits as follows:

1. Admission to the major.
2. 15 credits in MATH 124, MATH 125, MATH 126 or equivalent.
3. A minimum of 50 credits in economics, including ECON 200, ECON 201; ECON 300, ECON 301; ECON 400 (or equivalent) or ECON 401; at least 10 additional credits chosen from the following courses: ECON 400 (or equivalent) or ECON 401, ECON 424, ECON 435, ECON 473, ECON 481 (or equivalent), ECON 482, ECON 483, ECON 485, ECON 486; at least 15 additional credits at the 400 level, excluding ECON 496, ECON 497, and ECON 499.
4. Grades of 2.0 or better in ECON 200, ECON 201, ECON 300, and ECON 301.
5. Transfer students are required to complete a minimum of 25 upper-division economics credits in residence at the UW.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* For undergraduates, the role of the Department of Economics is to train students in a rigorous, analytical discipline that advances their problem-solving abilities and their understanding of important public issues.

The Bachelor of Arts program provides the flexibility and social science training to prepare students for employment in a variety of areas. Also, it is excellent preparation for many masters-level graduate programs in other disciplines and for professional schools such as law, business and medicine.

The Bachelor of Science program is designed to provide undergraduates a rigorous background in economic analysis. This degree is designed for students who plan to do graduate study in economics or who plan to enter certain technically oriented professions, such as actuarial science, demography, financial analysis, or environmental consulting.

- * *Instructional and Research Facilities:* The department currently has a Resources Room (Savery 310), staffed during tutoring hours, which are posted in Savery 304 or at <http://depts.washington.edu/ecnboard/tutor.html>.

- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- * *Internships, Research and Service Learning:* Course credit available for internships and research.

- * *Department Scholarships:* Scholarship opportunities are available for application during spring quarter. See departmental advisers for details. Note: Students must have filed a FAFSA with the University of Washington's Financial Aid Office to be eligible.

- * *Student Organizations/Associations:*
 - o Society for Economic Undergraduate Students (SEUS) promotes a cohesive economics community among students by organizing social outreach gatherings, community service, and internship and other opportunities. For more information, visit <http://students.washington.edu/seus>.
 - o The Economics Undergraduate Board (EUB) serves as a liaison between Economics students, faculty and alumni, and also provide services to the general Economics Undergraduate student body. The

EUB provides free tutoring for ECON 200, ECON 201, ECON 300, and ECON 301; holds career seminars and faculty lectures, and publishes the quarterly newsletter "The Economizer." For more information on these services, as well as others provided by the EUB, visit <http://depts.washington.edu/ecnboard/>.

Of Special Note:

- * Courses accepted in transfer as ECON 1XX or ECON 2XX cannot be applied to the major requirements unless courses equivalent to ECON 200 and ECON 201 were required as prerequisites. ECON X courses not having these prerequisites may be applied to electives for the degree, but not to the 50-credit economics-course requirement.
- * Internship and independent study ECON credits do not count towards the required ECON credits for the BA or BS degree.

Graduate Program

Graduate Program Coordinator
304A Savery, Box 353330
206-685-1384
econadv@u.washington.edu

The department offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. The academic programs in economics are designed to develop trained economists for careers in teaching, private industry, government, and international agencies. Frequent seminars led by U.S. and foreign visitors as well as by faculty and students are conducted as an integral element of the department's graduate program.

Special Requirements

Applicants should have completed undergraduate training that includes courses in at least intermediate-level microeconomic and macroeconomic theory. In addition, applicants must have had at least one year of calculus, one term of linear algebra, and one term of statistics. A course in differential equations is strongly recommended. Additional work in calculus, matrix algebra, and probability and statistics is also strongly recommended. An undergraduate major in economics is not required for admission to the graduate program provided that the above prerequisites have been met. All applicants are required to take the General Test of the Graduate Record Examination (GRE).

Graduate requirements for the M.A. degree include ECON 500, 501, 502, 503, 508, 580, 581, and 582. In addition to this core program, M.A. students must take at least seven elective courses in economics at the graduate level. At least three of these courses must be in applied areas, and at least two must be in the same area (the field of specialization). M.A. students also must complete 6 credits of a supervised internship. Well-prepared students should be able to complete the M.A. program in two years.

Graduate requirements for the Ph.D. degree include ECON 500, 501, 502, 503, 508, 509, 580, 581, and 582. Ph.D. students are required to pass core examinations in microeconomics and macroeconomics. In addition to this core program, Ph.D. students must take eight other elective field courses in economics at the graduate level. Each Ph.D. student must satisfy the requirements for two fields of specialization. The fields of specialization include advanced macroeconomic theory, advanced microeconomic theory, comparative systems and development, econometrics, finance, health economics, industrial organization, international economics, labor economics, natural resource economics, and public finance.

The doctoral dissertation is the final major requirement for the Ph.D. degree. Each Ph.D. student chooses a dissertation topic and a doctoral supervisory committee is appointed. After the dissertation topic has been developed, Ph.D. students take the General Examination, an oral defense of the dissertation proposal. When the dissertation is completed, Ph.D. students take the Final Examination, an oral defense of the completed dissertation. A foreign language is not required. The doctoral program is designed to be completed in four years, although most students take slightly longer.

Financial Aid

The principal form of financial aid available to graduate students in economics is a teaching assistantship. A number of such assistantships are available to entering graduate students with promising academic records. Research and Computing Resources

The Institute for Economic Research houses a computer laboratory that provides hardware and software for economic modeling, economic estimation, word processing, and other faculty and graduate student research functions. Access is restricted to economics graduate students and faculty. In addition, the Center for Social Science Computation and Research (CSSCR) maintains an extensive library of computer software and data, and offers free consulting services to aid faculty and students with computing problems.

Course Descriptions

See page 336.

English

A101 Padelford

The Department of English offers courses in English, American, and related literatures. Courses in literature emphasize techniques of literary analysis; theoretical problems in the interpretation of texts; the social, historical, and political context of literary production and reception; and the pleasures of reading. Most require significant written work and stress critical thinking skills. Courses in language study examine the structural, historical, social, and aesthetic dimensions of English. The Creative Writing Program offers workshops in verse, short story, novel, and expository writing. English majors are exposed to many critical perspectives, and pursue interests in literary history, critical theory, language studies, and creative writing.

Undergraduate Education

Adviser
A2B Padelford, Box 354330
206-543-2634
engladv@u.washington.edu

The Department of English offers the following program of study:

- * The Bachelor of Arts degree with a major in English. A creative writing option is also available.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Foreign languages, classics, English history, American history, and philosophy.

Department Admission Requirements

1. Completion of 10 credits in any English literature courses. Completion of ENGL 202 and the attached writing link, ENGL 197, may also fulfill this requirement.
2. Minimum cumulative GPA of 2.00.
3. Minimum cumulative English GPA of 2.50.
4. Students apply to the English Advising Office, A2B Padelford, during the first two weeks of autumn, winter, and spring quarters. Transfer students must be enrolled at the UW before applying.
5. Admission is competitive. Completion of the above requirements does not guarantee admission.

Additional requirements for admission to the creative writing option:

1. Admission to the English major.
2. Completion of ENGL 283 and ENGL 284 or transfer equivalents.
3. Submission of an unofficial transcript and a writing sample of 3-5 poems and 5-10 pages of fiction (preferably a complete story).
4. Students interested in the creative writing option should apply to the Creative Writing Office, B-25 Padelford, during the first three weeks of autumn and spring quarters.
5. Admission is competitive. Completion of the above requirements does not guarantee admission.

Major Requirements

A minimum of 55 credits as follows:

1. ENGL 202 and writing link ENGL 197 (10 credits). It is recommended these courses be completed by the first quarter of admission to the major and no later than the second quarter after admission.

2. ENGL 302 (5 credits)
3. English core (25 credits): At least 5 credits from each of the following categories: (1) Theories and Methodologies of Language and Literature; (2) Forms and Genres of Language and Literature; (3) Histories of Language and Literature. A list of approved courses is available from the department advising office or department website: <http://depts.washington.edu/engl/>.
4. English electives (10 credits): Must be 200-level or above.
5. At least 15 credits must be in courses focused on pre-1900 literature.
6. Senior capstone course (5 credits) chosen from ENGL 407, ENGL 440, ENGL 442, ENGL 443, ENGL 444, ENGL 473, or ENGL 498.
7. A maximum of 20 credits of 200-level courses and a maximum of 5 credits of creative writing may be applied towards the major.
8. A minimum of 25 credits of English at the 200-level or above must be completed in residence at the UW.

The department strongly recommends, but does not require, 5 credits in one of the following English language courses: ENGL 370, ENGL 371, ENGL 373, ENGL 374, ENGL 478, ENGL 479, or LING 200.

Creative Writing Option

A minimum of 60 credits as follows:

1. ENGL 202 and writing link ENGL 297 (10 credits)
2. ENGL 283 and ENGL 284 (10 credits)
3. English core (20 credits) - At least 5 credits from each of the following categories: (1) Theories and Methodologies of Language and Literature; (2) Histories of Language and Literature. A list of approved courses is available from the department advising office or department website: <http://depts.washington.edu/engl/>.
4. At least 15 credits must be in courses focused on pre-1900 literature.
5. ENGL 383 and ENGL 384 (10 credits)
6. 10 credits of approved 400-level creative writing courses.
7. A maximum of 20 credits of 200-level courses may be applied towards the major.
8. A minimum of 25 credits of English at the 200-level or above must be completed in residence at the UW.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Good writing, analytical ability, research skills, and broadened perspectives are among the practical accomplishments majors acquire, all of which can be applied to a range of careers, including, but not limited to advertising, business and marketing, law, library science, the media, public administration, publishing, the social services, and teaching.

The undergraduate program of study in English concentrates on developing students' critical and interpretive abilities with regard to literatures written in English. Students become familiar with the critical developments in the study of language and literary forms, including especially understanding the cultural and historical contexts of various forms of literature. Students are, accordingly, asked to cultivate a habit of self-conscious and careful reading of written texts. Honing a successful habit of reading depends on acquiring an early awareness of the broad range of critical and interpretive methods available to readers of literature, as well as comprehending the basic purpose and effects at stake in different reading methods. Finally, students develop the ability to compose effective and persuasive written analyses of texts in a manner that demonstrates comprehension of the complexities or nuances of language, literature, and culture.

- * *Instructional and Research Facilities:* Computer labs in Mary Gates Hall for computer-integrated sections.

- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

- * *Research, Internships, and Service Learning:* The English Internship Program maintains an active list of over 200 local employers, including publishers, arts organizations, the media, advertising agencies, social service groups, schools, and businesses. Credit is available to declared English majors (ENGL 491).

- * *Department Scholarships:*
 - o English Department scholarships are available to declared English majors enrolled at the UW for at least two quarters with a UW GPA of 3.50 and a UW English GPA of 3.70. Scholarship recipients must enroll for at least two quarters and carry at least 6 credits each quarter during the term of the scholarship. Applications, due in early

March, are available in A11 and A2B Padelford.

- o Additional scholarships and prizes in creative writing are open to UW English majors only. Applications, due in early March, are available in B25 and A2B Padelford.
- * *Student Organizations/Associations:* Bricolage is a student literary arts annual published entirely by UW undergraduates and features the works of University students, faculty, staff, and alumni. Students from all majors welcome. Contact: brico@u.washington.edu for details.

Of Special Note:

- * Students considering teaching English at the secondary level should consult an English adviser regarding coursework for the English Language Arts endorsement required for entry into the Secondary Teacher Education Program (TEP).
- * The Department of English offers study abroad opportunities in London and Rome. Students from all majors welcome. See department web site for more information.

Graduate Program

Graduate Program Coordinator
A105 Padelford, Box 354330
206-543-6077
englgrad@u.washington.edu

The Department of English offers a complete program of graduate courses and seminars designed to provide aspirants for the Master of Arts and Doctor of Philosophy degrees with a knowledge of English literature and language and the necessary scholarship for training in literary criticism and theory, literary history, and English-language study, including rhetoric and composition. It is possible to pursue a literature- or language-study emphasis. The Master of Fine Arts program in creative writing emphasizes projects in imaginative writing in fiction and poetry, supported by courses in criticism and literary periods and types. A special degree program, the Master of Arts for Teachers, is offered for English teachers in secondary schools and community colleges and a Master of Arts for Teachers (of English to speakers of other languages) for those interested in teaching English to speakers of other languages. The graduate program permits completion of master's degree requirements in four to six quarters and doctoral degree requirements in five years (including the master's degree). In a typical five-year Ph.D. program, a student is encouraged to complete course requirements (75 credits) during the first three years, the General Examination for the doctorate in the fourth year, and the dissertation in the fifth year. Those admitted with a master's degree from another university can complete the doctorate in four years: two years of course work, exam year, and dissertation year.

Financial Aid

The department annually awards 10 or more new teaching assistantships. To be considered for the following autumn, applicants must submit an assistantship application and supporting materials for admission to the graduate program by January 15. A statement of purpose, three recommendations, the GRE general test, and a critical-writing sample are required [except M.A.T. (E.S.O. L.)]. Teaching assistantship applicants who are not native speakers of English must submit as part of their application a score of 290 or better on the Test of Spoken English (TSE) or UW-administered SPEAK test.

Master of Arts

Admission Requirements

Bachelor of Arts degree: Major in English equivalent to that awarded by the UW preferred. Graduate Record Examination general test [GRE (literature in English) subject test recommended]. Three letters of recommendation, statement of purpose, and a critical writing sample.

Degree Requirements

Intermediate-level proficiency in a language other than English. 40 credits, including 30 credits in graduate English seminars. For students continuing to the doctoral program, a 10-credit master's essay. For a terminal master's degree, students may substitute 10 additional credits in graduate English seminars for the master's essay. A maximum of 5 credits may be transferred from an accredited graduate program elsewhere.

Master of Fine Arts

Admission Requirements

Bachelor of Arts degree, Graduate Record Examination general test, three letters of recommendation, statement of purpose, a critical-writing sample, and a creative-writing sample.

Degree Requirements

55 credits, including 20 credits in creative writing, 15 credits in graduate English seminars (5 credits must be from an approved course in criticism), 5 elective credits, 15 thesis credits (including a creative thesis, an MFA essay, and a final oral examination); demonstration of proficiency in a language other than English.

Master of Arts for Teachers

Admission Requirements

Same as for the Master of Arts degree, but usually including prior teaching experience.

Degree Requirements

45 credits, of which 25 must be in courses numbered 500 or above; including at least one course each in English language or linguistics, rhetoric and/or composition, literary criticism or critical theory, and literature; three courses must have a stated orientation on teaching English; and 5 credits of M.A.T. essay. In addition to the 45 credits, a student with no regular or formal teaching experience is required to complete at least 6 credits of ENGL 601 (Internship). 15 of these may be taken outside the department in courses related to the teaching of English, subject to approval.

Master of Arts for Teachers (of English to Speakers of Other Languages)

Admission Requirements

Bachelor of Arts degree, Graduate Record Examination general test, statement of purpose, three letters of recommendation. Students without training in linguistic method and theory must take LING 400 as a prerequisite for 400-level linguistics courses.

Degree Requirements

45-54 credits, including ENGL 571, 572, 574, 576; LING 446 or 450, ENGL 575 or LING 461; three courses from ENGL 471, 478, 479, 560, 561, 562, 563, 564, 567, 569, 575, LING 433/ANTH 464, LING 457/PSYCH 457, LING 451, 462; one elective course; 3-6 credits of ENGL 570. Intermediate-level proficiency in a language other than English.

Doctor of Philosophy

Admission Requirements

By petition to the Graduate Studies Committee upon completion of the M.A. degree option in literature. Students with recent master's degrees from other institutions are admitted at the post-master's level following the guidelines for admission to the M.A. option and must complete two quarters before petitioning the Graduate Studies Committee for admission to the doctoral program. Students transferring with a master's degree from other institutions may be required to submit an equivalent to the master's essay. Students with M.F.A., M.A.T., or M.A.T. (E.S.L.) degrees from this University must complete course-work and language requirements for the M.A. degree option and submit an equivalent to the master's essay.

Degree Requirements

75 graded credits of electives in graduate English seminars. Students with a recent master's degree from another university may count up to 30 credits from their master's program, upon approval of the Director of Graduate Studies. Students with a master's degree from the UW may count up to 40 credits in courses taken before admission to the doctoral program. Fluency in at least one language other than English, plus whatever additional language study the supervisory committee advises. Written examinations for literature emphasis: (1) historical period, (2) specialized field of study, (3)

second period, genre, or topic; written examinations for language emphasis: (1) major approach to English-language study, (2) second approach to language study, (3) textual focus (can be literary period); an oral General Examination; 27 credits of ENGL 800 (Dissertation) and a Final Examination based on the dissertation.

Course Descriptions

See page 340.

General Studies

171 Mary Gates Hall

General Studies is an interdisciplinary, individually designed major option for students who wish to create a program of study by combining selected courses from two or more departments. Students are required to identify a central organizing theme for their major and design it under the guidance and supervision of at least two faculty members and a General Studies adviser.

Undergraduate Program

Adviser
171 Mary Gates Hall, Box 352805
206-543-2550
genstudy@u.washington.edu

The General Studies program offers the following programs of study:

- * Bachelor of Arts
- * Bachelor of Science
- * Degree depends on the theme and curriculum of the approved major.
- * Ethnomusicology, technical writing, and public health are three faculty-designed major options also available through General Studies. Ethnomusicology (B.A.) focuses on the study of world cultures through their musical expression. Technical writing (B.A. or B.S.) offers the study of writing and other modes of communication in a variety of technical environments. Public health (B.A. or B.S.) involves the study of historical and contemporary issues in public health, including social and behavioral determinants of health, the geography of health and illness, the etiology of chronic and infectious diseases, the relationship between environmental factors and health, and access to health care and modes of delivery of health services.

Bachelor of Arts, Bachelor of Science

Suggested First- and Second-Year College Courses: Varies, depending on student's intended major.

Program Admission Requirements

Before developing a General Studies major, students should read Designing a General Studies Major, or obtain a copy from the Undergraduate Advising Center, 171 Mary Gates Hall. Particular attention should be paid to the sections defining restrictions on themes and restricted access to courses. General Studies majors are not possible in a number of subjects because the UW does not offer sufficient course work. Upper-division courses in departments with competitive admission are generally not available to students not in that major and ordinarily cannot be included in General Studies proposals.

After reading the guidelines, the student must go through the following steps to design a major:

1. Identify the unifying interdisciplinary theme of your program.
2. Make a list of courses you have taken or plan to take toward this goal. This list should comprise between 50 and 70 quarter credits, all of which are related to your area of concentration. These courses must come from at least two departments, but may come from any number of areas, so long as interrelationships are discernible. Most of the courses must be 300- and 400-level courses. At least half of the 50-70 credits selected for the major must come from courses taught within the College of Arts and Sciences.
3. Draft a statement that describes your proposed major and discusses the interrelationships among the courses you have chosen. Propose a brief, descriptive title for your major.

4. Submit your proposal to the General Studies Committee for initial approval. Prospective majors should submit proposals to the General Studies Committee for review at least three quarters prior to graduation.
5. Identify at least two faculty sponsors for the major. The faculty sponsors attest to the intellectual soundness of your proposal and agree to provide whatever guidance you may jointly decide you need. They may also suggest changes in your previously approved written proposal or list of courses.
6. Obtain final approval from a General Studies adviser.
7. Transfer students must be enrolled at the UW before applying to the major.
8. Admission requirements for the three faculty-designed major options vary. See an adviser for more details.

Major Requirements

55 to 70 credits, including completion of the approved curriculum and a 5-credit required senior study (minimum grade of 2.7 required for senior study). Awarding of the Bachelor of Arts or Bachelor of Science degree depends on the content of each student's program.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Varies, depending on student's theme.
- * *Instructional and Research Facilities:* None
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* None
- * *Department Scholarships:* None offered
- * *Student Organizations/Associations:* None

Geography

408A Smith

Geography is a far-reaching discipline providing a distinctive spatial approach to many of today's societal problems and issues: regional inequality; growth of service activities; residential and educational segregation; health-care delivery; urban growth management; transportation efficiency; environmental and pollution problems; economic impacts of major investments or technological changes; spatial efficiency of industrial production; spatial inequality in the distribution of goods, services, and resources; and the activities of international corporations and political states. Geography is the study of how individuals, groups, and societies interact with their environments. The discipline offers sufficient skills training to enable graduates to be competitive in many job markets.

Geography seeks to understand the complex processes that result in the patterns, trends and impacts of urbanization, migration, trade, and development. Geographers use interviews, written material, observation, and secondary data to construct models, maps, and other tools for understanding.

Undergraduate Program

Adviser
415B Smith, Box 353550
206-543-3246
geog@u.washington.edu

The Department of Geography offers the following programs of study:

- * Bachelor of Arts degree with a major in geography
- * A minor in geography

Individual undergraduate programs are built around five program concentrations. Students are encouraged to develop a specific, individualized focus of study within their chosen concentration.

1. *Urban, Social, and Political Processes and Patterns.* Human population distribution, migration, settlement systems, and organization. Geographic facets of ethnicity, race, sexuality, and gender; wealth and poverty; and health and disease. Cultural landscapes; politics, nationalism, and identity formation; geopolitics. Location of urban services, including health-care systems, urban transportation, housing, neighborhood development and land use, as well as issues raised by questions of law and social control. Urban spatial policies. Courses include: GEOG 230,

GEOG 277, GEOG 280, GEOG 308, GEOG 330, GEOG 342, GEOG 350, GEOG 371, GEOG 375, GEOG 377, GEOG 378, GEOG 380, GEOG 401, GEOG 430, GEOG 431, GEOG 432, GEOG 440, GEOG 442, GEOG 443, GEOG 445, GEOG 461, GEOG 474, GEOG 477, GEOG 478.

2. *Economic Geography.* Key questions in this concentration include the following: Why do some cities and regions grow while others decline? What local characteristics attract businesses and employment? What determines the flows of goods, services, ideas, people, and capital that bind together the world economy and the regions within it? How are all these relationships being affected by, and in turn influencing, technological change? What can governments and non-governmental organizations do to affect these characteristics and flows? What personal, organizational, and institutional attributes tend to influence spatial behaviors? What are the relevant economic analysis tools to apply to questions of environmental regulation and land use? What effects do global corporations have on the economies of regions and nation-states? To what extent is international development driven by questions of political economy? Courses include: GEOG 207, GEOG 208, GEOG 230, GEOG 302, GEOG 330, GEOG 336, GEOG 349, GEOG 366, GEOG 367, GEOG 370, GEOG 371, GEOG 430, GEOG 433, GEOG 435, GEOG 440, GEOG 443, GEOG 447, GEOG 448, GEOG 449, and GEOG 478.
3. *Regional Geography and International Development Studies.* Continental and global patterns of international relations and development. Political economy of development; development theory and practice; globalization. Analysis of geographic concepts in the regional context, especially on such topics as population growth and migration; development history, theory, and practice; hunger, resources, and poverty; and interconnections in the global economy. Special emphasis on East Asia, Russia and the former Soviet republics, Africa, Latin America, Canada, and the United States. Courses include: GEOG 230, GEOG 271, GEOG 302, GEOG 308, GEOG 330, GEOG 335, GEOG 336, GEOG 349, GEOG 371, GEOG 375, GEOG 404, GEOG 430, GEOG 431.
4. *Geographic Information Systems (GIS).* Role, design, and use of geographic information systems for research, planning, management, and decision making. Use of computers in the collection, manipulation, analysis, and presentation of geographical data. Courses include: GEOG 360, GEOG 370, GEOG 443, GEOG 458, GEOG 460, GEOG 461, GEOG 463, GEOG 465, GEOG 471.
5. *Society and Environment.* Examines the key debates on the causes and outcomes of environmental change and degradation and the paths to sustainable development; the use of data in the formulation of human-environment interaction models; perceptions of nature; nature-culture relationships; and historical and contemporary societal responses to environmental degradation, health problems, and resource consumption. Courses include: GEOG 270, GEOG 360, GEOG 370, GEOG 371, GEOG 372, GEOG 431, GEOG 432, GEOG 460, GEOG 461, GEOG 463, GEOG 471, GEOG 472, GEOG 480, GEOG 490.

Bachelor of Arts

Suggested First- and Second-Year College Courses: GEOG 100, GEOG 205, GEOG 207, GEOG 230, GEOG 277. Courses that develop strong writing, analytical, and qualitative- and quantitative-reasoning skills. Geography is inherently interdisciplinary, so exposure to many social science fields of study in the first two years is ideal.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

60 credits as follows:

1. *Foundations (40 credits)*
 - a. *Societies, Cities, & Economies (10 credits):* Eligible courses include GEOG 100, GEOG 123, GEOG 200, GEOG 207, GEOG 208, GEOG 230, GEOG 236, GEOG 245, GEOG 277, GEOG 280.
 - b. *Environment & Society (10 credits):* GEOG 205, plus one of the following: GEOG 270, GEOG 271, GEOG 370, GEOG 371, GEOG 372, or GEOG 380.
 - c. *Research Methods (20 credits):* GEOG 315, GEOG 326, GEOG 360, plus one additional methods course from the following: GEOG 425, GEOG 426, GEOG 440, GEOG 458, GEOG 460, GEOG 461, GEOG

465, GEOG 471, GEOG 480 Concentration (15 credits): Three upper-division GEOG courses, including two 400-level courses.

2. *Concentration (15 credits):* Students may choose from among five concentrations (GIS; economic geography; urban/social/political geography; development studies; society and environment), or customize their own hybrid focus along more thematic or issue-driven lines, such as migration studies, globalization, geography and health, sustainability, inequality, race/class/gender studies, etc. See advisers for details. Three upper-division (300- and 400-level) geography courses are required for this concentration, at least two of which must be at the 400 level.
3. *Electives (5 credits):* 5 credits of GEOG electives at the 200 level or above; 300- and 400-level courses preferred
4. *Additional Degree Conditions and Program Features*
 - a. Transfer students must complete a minimum of 25 upper-division credits (300 and 400 level) in Geography in residence at the University of Washington.
 - b. Individual geography course grades must be 2.0 or above to count toward major requirements; overall 2.50 GPA in geography courses counted toward the major required;
 - c. 5 credits of internship (GEOG 496) or independent study (GEOG 499) may apply toward the required 60 credits.

Minor

Minor Requirements: 30 credits in geography, including 15 upper-division geography credits with at least 5 credits at the 400 level. No more than 5 credits applied to the minor may be from 100-level classes. Independent learning and internship credits (GEOG 494, GEOG 496, GEOG 497, GEOG 499) may not be counted as part of the 30 credits. A minimum grade of 2.0 for each course counted toward the minor. At least 15 credits of upper-division geography courses must be taken at the UW.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The study of geography emphasizes both technical and critical thinking skills. Geographers' skill sets include the ability to use Geographic Information Systems (GIS) software to produce maps; advanced technical skills in statistical analysis; the ability to use census and other demographic data; sophistication in locating data and interpreting it to help make an argument; sophistication in visual techniques for displaying data, including maps, charts, and graphs; advanced use of such software as spreadsheets, relational data bases, and Web page design; and the ability to present multiple models of land-use patterns for analysis in environmental and economic decision making. Graduates have pursued careers as urban planners, environmental planners and land-use analysts, GIS analysts, economic analysts (marketing, location, geo-demographics), public health researchers, NGO specialists in developing nations, airline route analysts, import-export/international-trade specialists, real estate valuation specialists, economic development specialists, social studies teachers, and college professors.
- * *Instructional and Research Facilities:* A map center in Suzzallo Library houses atlases, sheet maps, and aerial photographs. Departmental facilities include the Edward L. Ullman Geography Collaboratory and the John C. Sherman Laboratory, which houses a variety of computer workstations connected to the campus computer network. The Ullman Collaboratory in 415 Smith provides a unique collaborative classroom with networked computer work stations. The Geography Commons also provides computer work stations for students. The Department of Geography is a member of the Center for Social Science Computation and Research, which maintains an extensive data archive and offers many statistical and software consulting services.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* More than 125 geography students participate each year in internships. For lists of these opportunities, see the department's career site.
- * *Department Scholarships:* None offered.
- * *Student Organizations/Associations:* The Undergraduate Geography Association (UGA) organizes field trips, alumni career panels, public-service projects, and social gatherings.

Of Special Note: Students planning to study economic, transportation, or urban geography are advised to take ECON 200, 201 as early as possible.

For those interested in international or area studies, foreign-language competence (i.e., at a level sufficient to be useful for elective, course-related reading and research) is highly desirable (Russian, Chinese, or Spanish). A working knowledge of a region's or nation's history, landscapes (including physical, urban, and cultural), and current role in world economics and politics will also be of great benefit. Students interested in GIS are encouraged to learn a high-level programming language such as C, C++, or Visual Basic.

Graduate Program

Graduate Program Coordinator
415B Smith, Box 353550
206-543-3246

The Department of Geography has flexible programs of graduate study leading to the Master of Arts and Doctor of Philosophy degrees. The aspirant to the master's degree is expected to complete all work for the degree in four to six quarters. The aspirant to the doctoral degree is expected to undertake two years of post-master's study and must take a departmental diagnostic examination upon entry, pass the General Examination, attain an appropriate level of competence in a foreign language or cognate field, and successfully complete a dissertation. Normally, doctoral program students complete all degree requirements in three to four years.

Master of Arts

Admission Requirements

Admission to the graduate program normally requires a minimum GPA of 3.00 (on a 4.00 scale), or "B." Students holding a master's degree must meet this minimum scholastic requirement, but also should have achieved a GPA higher than 3.00 for graduate studies completed. All applicants must take the Graduate Record Examination. Specific information regarding application procedures may be obtained by writing to the graduate program adviser.

Degree Requirements

45 credits, as follows:

- * GEOG 512 (5)
- * One of the following 400-level courses in analytical methods: GEOG 425 (5), GEOG 426 (5), GEOG 440 (5), GEOG 460 (5), GEOG 461 (5), or GEOG 471 (5).
- * At least three quarters of GEOG 598 (1, max. 3), the departmental colloquium, usually taken during the first year in the program
- * GEOG 597 (2). At the conclusion of GEOG 597, the student must write a revised statement of academic objectives.
- * The completion of at least two departmental research seminars numbered 500 and above, but not including GEOG 502, GEOG 512, GEOG 513, GEOG 515 or other nonspecialized seminars.
- * Remaining credits to be determined in consultation with adviser

Doctor of Philosophy

Admission Requirements

Admission to the graduate program normally requires a minimum GPA of 3.00 (on a 4.00 scale), or "B." Students holding a master's degree must meet this minimum scholastic requirement, but also should have achieved a GPA higher than 3.00 for graduate studies completed. All applicants must take the Graduate Record Examination. Specific information regarding application procedures may be obtained by writing to the graduate program adviser.

Degree Requirements

90 credits, as follows:

- * *Core requirements:*
 - o GEOG 515 (5). Post-master's students who have not previously completed a course on the history of geographic thought (GEOG 512) must complete such a course before taking GEOG 515.
 - o At least three quarters of GEOG 598 (1, max. 3), the departmental colloquium, usually taken during the first year in the program
 - o GEOG 597. At the conclusion of GEOG 597, the student must write a revised statement of academic objectives.

- o Two of the following 400-level courses in analytical methods: GEOG 425 (5), GEOG 426 (5), GEOG 440 (5), GEOG 460 (5), GEOG 461 (5), or GEOG 471 (5).
- o Entering post-master's students who have already completed one of these courses or their equivalents need complete only one additional analytical methods courses, subject to the approval of the Graduate Program Coordinator.
- o The completion of at least two departmental research seminars numbered 500 and above, but not including GEOG 502, GEOG 512, GEOG 513, GEOG 515 or other nonspecialized seminars. This requirement may be satisfied if the two seminars were taken while earning an MA degree in this program.
- o Submission of a scholarly article to a professionally-reviewed academic journal; or successful application for research support from external agencies such as the National Science Foundation, the Social Science Research Council, the Ford Foundation, the Fulbright Commission, etc. Additional writing credits may be earned by registering for GEOG 599. The publication may be jointly authored with a faculty member or other graduate student.
- * A minimum grade of 3.0 must be earned in all Geography courses, and a grade of 2.7 or higher must be obtained in all courses in related fields used to satisfy the doctoral degree credit requirement.
- * Evidence of reading competence in one foreign language, or a sound level of competence in one cognate field of concentration as determined by the student's Supervisory Committee.
- * A departmental written and oral Preliminary Examination, normally by the end of the third quarter in residence. Post-master's students seeking entry into the Ph.D. program must take the Departmental Preliminary Examination during their first year of enrollment. The Preliminary Examination, or designated parts, may be retaken once.
- * Successful completion of a Graduate School General Examination, normally held at the end of two years (six quarters) of study. The Supervisory Committee will examine the student's qualifications and competency to undertake dissertation research, and will evaluate the student's general training in geography and in the field of specialization. Normally, the oral examination will be preceded by a written examination.
- * Preparation and acceptance by the Dean of the Graduate School of a dissertation. The candidate is expected to register for a minimum of 27 credits of dissertation (GEOG 800) over a period of at least three quarters.

Financial Aid

The department usually awards approximately 15 to 20 teaching assistantships for the academic year. Most of the assistantships are for teaching quiz sections for a larger lecture class. A few of the more advanced doctoral candidates may teach a class. Normally, several research assistantships are also available. In recent years, approximately 85 percent of the department's graduate students have been funded by internal or external sources.

Course Descriptions

See page 345.

Germanics

340C Denny

The Department of Germanics focuses on the language, literature, and civilization of the German-speaking countries; on the role of their history, literature, and philosophy in Western civilization; and on linguistic analysis, especially historic, of the Germanic languages.

Undergraduate Program

Adviser
331 Denny, Box 353130
206-543-4580
uwgerman@u.washington.edu

The Department of Germanics offers the following programs of study:

- * The Bachelor of Arts degree with a major in Germanics with options in German language and literature, and German cultural studies
- * A minor in Germanics with options in cultural studies, language and literature, and linguistics.

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year German or equivalent. Courses in Central European history, literature and culture, GERMAN 150 and 250 (conversational German through film). Courses on broad cultural topics offered by Germanics.

Department Admission Requirements

Admission to major status requires the completion of first- and second-year German or equivalent.

Major Requirements

German Language and Literature: 53 credits as follows:

1. 15 credits to include: GERMAN 311, GERMAN 312, and either GERMAN 322 or GERMAN 323
2. 15 credits from the following: GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, or GERMAN 495
3. One of the following (for 5 credits): GERMAN 333, GERMAN 334, GERMAN 401, or GERMAN 403
4. 18 credits in any upper division Germanics courses not taken for requirements 1, 2, or 3, above. These may include no more than 4 credits from GERMAN 395 and GERMAN 396 combined, and no more than 5 credits each from GERMAN 446 and GERMAN 447. Up to two of the following lower division courses may also be counted toward this requirement: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, GERMAN 295.
5. *Specialization in Linguistics:* Students desiring this specialization must take GERMAN 451 and GERMAN 452 as part of the 18 elective credits shown in item 4, above, and may, with the adviser's permission, count relevant courses in linguistics outside Germanics as well.

German Cultural Studies: 50 credits as follows:

1. 15 credits as follows: GERMAN 322, GERMAN 323, and either GERMAN 311 or GERMAN 312
2. 15 credits from the following: GERMAN 411, GERMAN 412, GERMAN 421, GERMAN 422, GERMAN 423, or GERMAN 495
3. 20 credits in any upper division Germanics courses not taken for requirements 1 and 2, above. These may include no more than 4 credits from GERMAN 395 and GERMAN 396 combined, and no more than 5 credits each from GERMAN 446 and GERMAN 447. Up to two of the following lower division courses may also be counted toward this requirement: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295. With the permission of the adviser, the student may also count toward this requirement courses relevant to German culture offered by other departments, such as history, political science, art history, music history, comparative literature, international studies, or comparative history of ideas.

For both options above, a grade of at least 2.0 must be earned in every upper-division German course; an overall GPA of 2.50 is required for all courses counted toward the major.

Minor

Minor Requirements:

Minimum 30 credits from one of the following three options:

- * *Language and Literature:*
 1. 15 credits as follows: GERMAN 311, GERMAN 312; either GERMAN 322 or GERMAN 323
 2. At least one upper-division language course beyond 302
 3. 10 credits in upper-division Germanics which may include (a) no more than 4 credits total of GERMAN 395 and GERMAN 396; (b) no more than 5 credits of GERMAN 446; and (c) no more than 5 credits of GERMAN 447. Credits from any two of the following may be included: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295.
- * *Linguistics:*
 1. 10 credits of GERMAN 451 and GERMAN 452
 2. One 300- or 400-level language course (5 credits) beyond 302
 3. One course from GERMAN 311, GERMAN 312, GERMAN 322, or GERMAN 323
 4. 10 upper division elective credits in Germanics or other departments offering linguistics.

- * *Cultural Studies:*
 1. 15 credits of GERMAN 322, GERMAN 323; and either GERMAN 311 or GERMAN 312
 2. 5 upper-division credits in Germanics offered in English
 3. 10 credits in upper-division Germanics which may include (a) no more than 4 total credits of GERMAN 395 and GERMAN 396; (b) no more than 5 credits of GERMAN 446; and (c) no more than 5 credits of GERMAN 447. Credits from any two of the following may be included: GERMAN 210, GERMAN 220, GERMAN 243, GERMAN 293, and GERMAN 295.

A minimum grade of 2.0 is required for each course counted toward the minor.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The department's objective is the dissemination of the intellectual and artistic traditions of the German-speaking countries. Toward this goal the department offers courses conducted not only in German but also in English on aspects of German culture and history for general humanistic education.

The major in German language and literature offers training in verbal interpretation and analysis useful for any career that involves formulating and solving problems, especially for those with some special interest in Europe and Germany. It provides excellent preparation for students planning to do graduate work in German literature or linguistics, and also for those who wish to teach German in K-12 settings. Stress is placed on the critical analysis of texts, both in English and in German, and the development of high proficiency in language fluency, grammar, and style.

The major in German cultural studies also offers training in interpretation and analysis useful for any career that involves formulating and solving problems. It is designed for students who wish to study the German-speaking countries and their culture in the broadest context and encourages students to develop critical skills to analyze various aspects of culture and society, such as literature, film, art, architecture, and political and social institutions.

- * *Instructional and Research Facilities:* None

- * *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

- * *Research, Internships, and Service Learning:* Undergraduates may count 5 credits of internship (conducted either here or in a German-speaking country) toward their major or minor in German. Students must sign up in GERMAN 446. A list of internships is available on the departmental Web page. They include local businesses and training sites, as well as internship options abroad. The Office of International Programs and Exchanges offers a number of different study abroad options for Austria and Germany. Students can consult their Web site at depts.washington.edu/ipe. The Department of Germanics offers a "Spring in Vienna" program. Students can consult the departmental Web site for more information, or pick up a brochure in the main office.

- * *Department Scholarships:* The department's German Express program consists of a series of intensive courses able to take a student from no knowledge of German to fluency in one year. The best five students are awarded stipends of \$1,000 each to be applied toward study during spring quarter at a German university.

- * *Student Organizations/Associations:* German Club.

Of Special Note: Qualified students are invited to take part in the department's Spring in Vienna program. Every spring quarter the department sends a group of approximately 20 students to Vienna to participate in a program of studies in German language and Austrian culture for which students are able to earn 16 credits. Program costs are commensurate with in-state tuition at the University of Washington.

Graduate Program

Graduate Program Coordinator
345 Denny, Box 353130
206-543-6025
uwgerman@u.washington.edu

The graduate program in Germanics offers a broad, flexible, yet integrated curriculum that allows students to organize studies according to their

inclinations and professional needs. Although based upon objectives common to all aspects of study (such as the acquisition of a body of learning, training in technical skills, and development of critical judgment), the program offers a background for different professional pursuits: careers as scholars and teachers in literature, cultural studies, the humanities, linguistics and philology on the university level; the teaching of German language and civilization on the college and secondary school level; and professional writing, editing, and publishing. The master's curriculum requires a minimum of 40 credits, a critical M.A. paper, a textual analysis, and a final comprehensive examination. Study period of the doctoral program is two years (minimum number of post-master's course credits is 60). Completion of necessary coursework is followed by general written and oral examinations. A third doctoral year is reserved for writing the dissertation.

The M.A. and Ph.D. programs concentrate on German literature, civilization, cultural history, and philosophical traditions, with an option to include Germanic linguistics and courses outside the department.

Master of Arts

Admission Requirements

An undergraduate major in German, or equivalent. Superior German language skills.

Degree Requirements

- * 40 hours of coursework as determined in consultation with adviser
- * One critical M.A. paper
- * Text analysis in one of the M.A. areas of expertise (see below)
- * Written comprehensive examination in one of the M.A. areas

Areas of expertise for the MA in Germanics are literary history; intellectual history; cultural studies; and linguistics/philology.

Students must demonstrate foundational competency in three of the four areas of expertise. Evaluation of this expertise is based on three procedures: one comprehensive examination (based on the M.A. reading list); one text analysis (text selected by the M.A. committee from the M.A. reading list); one critical M.A. paper (based on work in a graduate seminar). Students choose the way these three evaluation procedures are distributed across their selected areas of expertise.

Doctor of Philosophy

Admission Requirements

Undergraduate major in German, or equivalent. Superior German language skills. Reading knowledge of a second foreign language (in addition to German) is required before the student is admitted to the Ph.D. General Examination. Languages chosen are subject to approval by the department. Degree Requirements
90 credits, as follows:

Candidates for the Ph.D. complete 60 credit hours at the 500 level or higher (GERMAN 411, GERMAN 451, GERMAN 452, GERMAN 497, GERMAN 498, GERMAN 499 may be counted toward this requirement if not already counted toward the M.A.); complete the foreign language requirement; submit two Ph.D. papers and a dissertation prospectus (or three Ph.D. papers); write three doctoral examinations; pass an oral examination; and complete a dissertation.

- * The 60 hours of coursework are selected at the student's discretion with an eye toward developing distinct areas of specialization, though students are encouraged to define their areas broadly.
- * Ph.D. papers: Students have the option of submitting either two doctoral papers and a dissertation prospectus (all to be submitted before the written examinations); or three doctoral papers with the prospectus submitted one quarter after the examinations. Any material submitted before the examinations must be in the candidate's file by the time the written examinations are scheduled. Doctoral papers should be in different areas. The first doctoral paper must be submitted by the beginning of the student's second doctoral year.
- * *Reading lists:* Guided by the Ph.D. reading list, students prepare their own reading lists for each of the three doctoral examination areas in consultation with the members of the Ph.D. supervisory committee.
- * Knowledge of a foreign language other than German, by completion of a literature course – with readings in the language and a grade of 3.0 or

higher – or by standard examinations in the target language approved by the Graduate Program Coordinator, must be demonstrated.

- * After students have completed the required 60 hours of coursework, met the language requirement, and had the dissertation prospectus approved they may register for 800-level coursework.
- * Students write three four-hour examinations organized in consultation with the supervisory committee according to one of the following patterns: one period exam, one genre exam, one special topic exam; two period exams, one genre exam; two period exams, one special topic exam; one period exam, two special topic exams (for students specializing in linguistics).

Financial Aid

A limited number of teaching assistantships and fellowships are available. The teaching load consists of a five-hour course on the first- or second-year level. The teaching assistants are supervised by experienced faculty members.

Course Descriptions

See page 350.

History

315 Smith

History undertakes the study of human affairs in a manner that seeks to understand change and development rather than the state of things at a given moment, taking into account societies in diverse parts of the world from the earliest times for which written records exist to the present.

Undergraduate Program

Adviser
318 Smith, Box 353560
206-543-5691
histadv@u.washington.edu

The Department of History offers the following programs of study:

- * The Bachelor of Arts degree with a major in history
- * The Bachelor of Arts degree with a major in the history and philosophy of science, offered jointly with the Department of Philosophy
- * Minors in history and history of science

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that develop writing skills.

Department Admission Requirements

1. Minimum University GPA of 2.00.
2. Completion of 10 credits of college history with a minimum cumulative GPA of 2.50.
3. Completion of 10 credits of composition/writing courses with a minimum grade of 2.0 for each course. The requirement may be met by a freshman English composition course or a "W" course.
4. Students may apply to the major at any time in the quarter. Transfer students must be enrolled at the UW before applying.

Major Requirements

60 credits as follows:

1. At least one 5-credit "broad" course (as designated by the department) in each of the following fields: European, United States, and non-Western history (any area outside Europe, the United States, and Canada)
2. At least 10 credits in pre-modern history and 10 credits in modern history (as designated by the department)
3. At least 30 upper-division credits completed in residence at the UW
4. 5 credits of HIST 388, to be completed no later than within two quarters of declaring the major
5. 5 credits of undergraduate senior seminar (as designated by the department)

6. Beyond the required subjects, the student may or may not specialize, depending upon personal interests and career plans
7. A minimum GPA of 2.25 for all history courses and minimum grade of 2.0 in all history courses taken to fulfill requirements for the major.

Minor

Minor Requirements:

History: 30 credits of history, of which 20 must be upper-division, with a minimum grade of 2.0 in each course applied toward the minor. A minimum of 15 of the 20 upper-division credits must be completed in residence at the UW.

History of Science: 25 credits, including HIST 311, 312, 390, and 490; plus one course from HIST 215, 310, 313, 315, 316, 317, 318, 412, 498 (when topic is relevant), MHE 401, 422, 424. A minimum grade of 2.0 is required in each course.

Student Outcomes and Opportunities

- * **Learning Objectives and Expected Outcomes:** The study of history enhances critical thinking and writing skills. It is a creative process in which students learn to use arguments and evidence to communicate a sound historical thesis. It is a liberal arts degree that encourages students to become well rounded, educated people. Graduates are prepared for a variety of careers in many professions and businesses. In addition to teaching, research, and museum and archives work, recent graduates have pursued careers as political lobbyists, journalists, and law enforcement officers. Many history majors pursue, and are well prepared for, further education and professional programs such as medicine, law, library science, and museum curatorship.
- * **Instructional and Research Facilities:** The department funds a writing center for students enrolled in history courses. The department also has a small computer lab available for history majors.
- * **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * **Research, Internships, and Service Learning:** The department encourages students to participate in internships that include historical elements. Students work with a sponsoring organization and a history faculty member. See adviser for details.
- * **Department Scholarships:**
 - o The Faye Wilson Scholarship is awarded to students emphasizing U.S. history and the Schwartz Fellowship to students pursuing historical study of a non-western civilization.
 - o History majors may compete for two paper prizes: The Thomas Power Prize for papers written in a history course of the last year, and the York/Mason Award for history papers written on African Americans in the West.
 - o In addition, the department allows students to nominate their high school history teacher for the Pressly Prize, which honors excellence in education.
 - o Scholarship and prize competitions run in February and March of each year. See adviser for details.
- * **Student Organizations/Associations:** Phi Alpha Theta, a history honors society. See adviser for details.

Graduate Program

Graduate Program Coordinator
206C Smith, Box 353560
206-543-8291
histgrad@u.washington.edu

The Department of History offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in a large number of fields within the discipline. Students in the programs prepare for careers as college teachers who combine teaching with scholarship and professional writing. A few graduates enter government service, college administration, or publishing. The M.A. program is normally completed in five or six full-time academic quarters or their equivalent.

Master of Arts

Admission Requirements

- * Completion of a strong undergraduate program in history, ordinarily as a history major.
- * Usually a minimum GPA of 3.50 (A-), particularly in history and related subjects, and especially in the final two years of work, and in graduate work if any graduate studies have been completed prior to application.
- * Ordinarily a score in the 80th percentile or higher on the verbal portion of the General Aptitude Test of the Graduate Record Examination (GRE).
- * Evidence of genuine intellectual ability and interest beyond the routine performance of academic tasks.
- * Reading knowledge of at least one language in addition to English is required for all graduate degrees. It is not a requirement for admission to the graduate program, but qualified applicants with knowledge of at least one foreign language may be favored over those who lack such knowledge. Moreover, and applicant who proposes to work for a degree in Greek, Roman, European, Russian, Medieval, Modern European, Latin American, Middle Eastern, or Asian history is expected to have begun to acquire a working knowledge in the foreign languages essential to research in the field.

Degree Requirements

In addition to Graduate School requirements, 36 credits minimum, as follows:

- * Submission of the Proposed Course of Study: Two Field MA form or Proposed Course of Study: Divisional MA form, as appropriate. This requirement must be met no later than the end of the second quarter of graduate study.
- * Official establishment of the MA Committee and submission of the Request for Establishing a Masters Supervisory Committee form. This requirement must be met no later than the end of the third quarter of graduate study.
- * Successful completion of all language requirements. This requirement must be satisfied no later than the quarter immediately preceding the quarter in which the student expects to complete the Master's degree.
- * Demonstrate by written examination mastery of a substantial body of historical knowledge. Students will be expected to construct their fields of study in consultation with their supervising faculty.
- * Satisfactory completion of a graduate seminar which entails the preparation of a research seminar paper; or the satisfactory completion of an M.A. thesis. Most seminars are two- or three-quarter classes.
- * Official submission of an application for the degree.

Doctor of Philosophy

Admission Requirements

- * Completion of a strong masters program in history, or a closely related field.
- * Usually a minimum GPA of 3.50 (A-), particularly in history and related subjects.
- * Ordinarily a score in the 80th percentile or higher on the verbal portion of the General Aptitude Test of the Graduate Record Examination (GRE).
- * Evidence of genuine intellectual ability and interest beyond the routine performance of academic tasks.
- * Reading knowledge of at least one language in addition to English is required for all graduate degrees. It is not a requirement for admission to the graduate program, but qualified applicants with knowledge of at least one foreign language may be favored over those who lack such knowledge. Moreover, and applicant who proposes to work for a degree in Greek, Roman, European, Russian, Medieval, Modern European, Latin American, Middle Eastern, or Asian history is expected to have begun to acquire a working knowledge in the foreign languages essential to research in the field.

Degree Requirements

In addition to Graduate School Requirements, 90 credits minimum, as follows:

- * Submission of the Proposed Course of Study form. This requirement should be met no later than the end of the second quarter after entrance to the PhD program. For students promoting into the PhD program from the MA program, this form must be completed no later than the end of the first quarter of doctoral study.
- * Official establishment of the Doctoral Supervisory Committee and

submission of the Request for Establishing a Doctoral Supervisory Committee form. This requirement must be met no later than the end of the third quarter after entrance to the PhD program. For students promoting into the PhD program from the MA program, this form must be completed no later than the end of the first quarter of doctoral study.

- * Language requirements must be satisfied no later than the quarter immediately preceding the quarter in which the student expects to the the Ph.D. General Examination.
- ** Satisfactory performance in the Ph.D. General Examination, which consists of four written examinations in four fields and an oral examination. Fields must be distributed among at least two divisions, such that at least one of these four fields lies clearly outside the student's primary division of concentration. Students will be expected to construct their fields of study in consultation with their supervising faculty. Ph.D. students concentrating in the U.S. history division will be required to offer at least one of the following three chronological fields: Early America, 19th Century, 20th Century. A grade of "honors" or "high pass" in a departmental field examination for the M.A. degree may exempt the student from the Ph.D. examination in that field at the discretion of the faculty member administering the Ph.D. examination.
- * Satisfactory completion of a seminar paper while enrolled as a Ph.D. student. This paper must be completed before the student takes the Ph.D. General Examination. Students who have not completed a graduate seminar in this department for their M.A. will ordinarily be expected to enroll in such a seminar as part of their course work for the Ph.D., and to write their research paper in the context of this seminar.
- * Official establishment of the Doctoral Reading Committee.
- * Preparation of an acceptable doctoral dissertation.
- * Satisfactory performance in a final oral examination in defense of the dissertation.

Financial Aid

Entering graduate students are considered for any departmental fellowships and other funding for which they are eligible. Students with, or who expect to receive, the M.A. degree by the time they begin their studies may apply for teaching assistantships and may, with continued satisfactory scholarly progress, hold a T.A. appointment for a total of nine quarters, provided adequate funds are available.

Course Descriptions

See page 353.

Honors

211 Mary Gates Hall

uwhonors@u.washington.edu

The honors program offers outstanding undergraduate students a special curriculum featuring small classes, challenging instruction, and close contact with faculty and other honors students. An emphasis on writing is incorporated into the honors core curriculum and honors seminars. Directed and independent study are particularly encouraged for upper-division students, commonly leading to a senior honors thesis or project. For a description of honors program requirements, see the Honors Web site.

Human Rights

The issue of human rights has attracted increased attention around the world. The tri-campus Human Rights minor at the University of Washington provides students the opportunity to learn about the political, philosophical, economic, cultural, and legal aspects of this complex subject.

Undergraduate Program

Adviser
42 Gowen, Box 353530
206-543-2396
lsjadv@u.washington.edu

111 Thomson, Box 353650
206-543-6001
jsisadv@u.washington.edu

The Human Rights minor is offered at all three University campuses, allowing students to take advantage of the expertise available on the campuses where they are not regularly in residence, although the minor can be completed on any one campus.

Minor

Minor Requirements: 25 credits, to include the following:

1. 10 credits from an approved list of courses* concerned with human rights as a core concept.
2. 5 credits from an approved list of courses* concerned with human rights in a broad context.
3. 10 additional credits drawn from the above approved lists of courses concerned with human rights.*
4. At least 3 credits of the required 25 credits must be in a human-rights-related internship, practicum, international study abroad, or demonstrated equivalent. Courses that satisfy this requirement include BIS 403, BIS 480; LSJ 310, LSJ 499, POL S 496, SIS 399, and similar practicum and study-abroad courses in other programs (on the Seattle campus); and TIAS 496. See adviser for faculty-approved alternatives. Courses used to satisfy this requirement must be approved/supervised by the faculty offering courses appropriate to the minor. Credits for the minor may be completed across the three UW campuses, or on any single campus. If the minor is completed by a Seattle-major student, no more than 10 credits applied to the minor may be in the student's major department.

*The list of core courses and context courses is maintained by the Human Rights Advisory Committee. For the current list of such courses, see depts.washington.edu/hrights/hrminor.html. Note: From time to time, the Advisory Committee adds, subtracts, or reclassifies courses on the approved list. Students who have planned their studies on the basis of an earlier list may fulfill the requirements of the minor as specified in that earlier list.

Humanities (Evening Degree)

103 Lewis Hall

This multidisciplinary major includes upper-division humanities courses selected by faculty of the College of Arts and Sciences. Students explore diverse perspectives in thematically related courses from classics, literature, intellectual history, comparative religion, communications, and art history. Focus is on the ways human beings from different cultures understand their world through communication, literature, and the arts. Students discuss literary and artistic works from a variety of perspectives and approaches, as well as theories of interpretation and practical communication. Analytical, research, and communication skills which can enhance a person's career opportunities are emphasized. Coursework encourages greater understanding of issues, ideas, and themes in history and the contemporary world.

Undergraduate Program

Adviser
103 Lewis Hall, Box 353921
206-543-6160
advisers@extn.washington.edu

Humanities offers the following program of study:

- * The Bachelor of Arts degree with a major in humanities

Bachelor of Arts

Suggested First- and Second- Year College Courses: English composition and additional writing. Introductory courses in Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S). First-year foreign language study.

Program Admission Requirements

1. Admission to the Evening Degree program (separate from admission to the UW day program).
2. Minimum 75 college quarter credits completed. Most students admitted have completed two years of lower-division college work.
3. See adviser for evaluation of applicable courses and credits.

Major Requirements

60 credits from the approved list of humanities courses, as follows:

1. Not more than 15 credits in 200-level courses (some or all of which may have been completed prior to admission to the major).
2. At least 45 credits of 300- and 400-level courses, of which a minimum 15 credits must be at the 400 level.
3. Minimum 2.25 GPA for all courses counted toward the major.
4. For list of applicable courses, consult the adviser or go to www.evedegree.washington.edu/edp/majors/humanities_courses.asp.

Additional Degree Requirements

1. English composition and additional writing (15 credits)
2. Quantitative and Symbolic Reasoning (Q/SR) (4-5 credits)
3. Foreign language – through the third quarter of a single foreign language (0 to 15 credits, depending on placement)
4. Areas of Knowledge
 - a. Visual, Literary, & Performing Arts (VLP) (20 credits)
 - b. Individuals & Societies (I&S) (20 credits)
 - c. Natural World (NW) (20 credits)
 - d. Some credits in VLP and/or I&S may count also toward the major
5. Additional work to complete a minimum 180 credits overall.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Students gain knowledge about the social, historical, ethical, and aesthetic significance of the visual, literary, and philosophical influences that constitute our present environment and heritage of many cultures. They become familiar with critical developments in the study of literary forms, especially the understanding of cultural and historical contexts. Students develop the ability to compose effective and persuasive written analyses of texts in a manner that demonstrates comprehension of the complexities and nuances of language, literature, and culture. Majors gain an appreciation for the complexity of human communication. They then are able to demonstrate an understanding of various written and spoken communication forms, processes, and perspectives within a cultural context.

Specific skills acquired include writing, critical thinking, research, analytical thinking, integrative cognitive abilities, and effective public speaking.

Humanities majors pursue widely varied careers, including education, editing, private enterprise, public administration, creative writing, management, arts administration, museology, and events planning.

- * *Instructional and Research Facilities:* Students use all university library resources and facilities corresponding with their individual research needs. In addition, each of the contributing humanities academic departments offers individual resources to majors. Check with advisers for options.
- * *Honors Options Available:* None offered.
- * *Research, Internships, and Service Learning:* The program works collaboratively with students interested in pursuing independent study and research opportunities through academic departments that contribute to the major. Opportunities for work with the Carlson Center, Office of International Exchanges, and service learning are possible for all students.
- * *Department Scholarships:* The Evening Degree program awards need-based financial aid assistance each year to students from a general fund. Two additional scholarship resources are the Rodney I. Straub Endowed Scholarship and the Nicole Snyder Dettmar Endowed Scholarship.
- * *Student Organizations/Associations:* None at present.

International Studies

401 Thomson

The Henry M. Jackson School of International Studies organizes and supports interdisciplinary teaching and research in international affairs. The school consists of a group of interdisciplinary area-studies programs on major world regions, as well as topical and comparative programs of study that transcend national and regional boundaries.

Undergraduate Program

Adviser

111 Thomson, Box 353650

206-543-6001

jsisadv@u.washington.edu

The School of International Studies offers the following programs of study:

- * The Bachelor of Arts degree with a major in international studies with options in Asian studies, Canadian studies, comparative religion, European studies, international studies, Jewish studies, and Latin American studies
- * Minors in African studies, Canadian studies, China studies, comparative Islamic studies, comparative religion, European studies, international forestry, international studies, Japan studies, Jewish studies, Korea studies, Latin America studies, South Asian studies, and Southeast Asian studies.

African Studies

Lynn M. Thomas, Chair

Adviser

302D Thomson, Box 353650

206-616-0998

africa1@u.washington.edu

African Studies involves a cross-campus, interdisciplinary group of faculty, staff, and students who share an interest in interdisciplinary questions relating to Africa and the African diaspora. Africa-focused courses are taught in a variety of scholarly disciplines and programs, including art, music, anthropology, forestry and fisheries, geography, history, international health, and American ethnic studies. The Program on Africa coordinates and disseminates information on African Studies activities; administers a minor for undergraduates; and facilitates research, internships, and study abroad opportunities.

Minor

Minor Requirements:

1. 30 credits chosen from at least three departments whose courses are listed below, including at least 10 credits at the 100, 200, or 300 level and at least 20 credits at the 400 level.
2. Students are encouraged to study relevant languages such as Arabic, Swahili, Portuguese, or French.
3. Courses may be chosen from the following: AFRAM 150, AFRAM 201, AFRAM 306 through AFRAM 309, AFRAM 401, AFRAM 402, AFRAM 403; ANTH 313, ANTH 318, ANTH 401, ANTH 402, ANTH 423, ANTH 471, ARCHY 303, ARCHY 312, ARCHY 401, BIO A 388, BIO A 389; ARAB 401, ARAB 411 through ARAB 416, ARAB 421, ARAB 422, ARAB 423; ARCH 251; ART H 205, ART H 230, ART H 330, ART H 337, ART H 350, ART H 436, ART H 437, ART H 438; GEOG 230, GEOG 371, GEOG/SIS 335; HIST 151, HIST 152, HIST 260, HIST 425, HIST 451, HIST 452; MUSIC 317, MUSIC 319; NEAR E/SISME 210; POL S 331, POL S 449; SIS 456/POL S 450, SISAF 444, SISAF 499; SOC/AES 462; WOMEN/SIS/ANTH 345.
4. Minimum grade of 2.0 in each course applied toward the minor.

Asian Studies

The undergraduate program in Asian Studies is directed by a committee consisting of the chairs of China Studies, Korea Studies, Japan Studies, South Asian Studies, and Southeast Asian Studies (see below under Minors), and a designated faculty coordinator.

The Asian Studies major combines language training with interdisciplinary study of an Asian region or single country. The program emphasizes social science approaches to the study of history, culture, and society, with provision for study of literature and the arts as well. Students may focus on China, Japan, Korea, South Asia (Bangladesh, India, Nepal, Pakistan, Sri Lanka, Tibet), Southeast Asia (Brunei, Burma (Myanmar), Cambodia, East Timor, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, Vietnam), or Asia as a whole. Five interdisciplinary minors on individual countries or regions also are offered.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Either SISA 209 or 210, and two introductory Asian civilization course (see major requirements,

below). Progress toward two years of a relevant Asian language. Courses that develop writing skills, especially in the social sciences.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

30 credits or second-year equivalent language training in a language appropriate to student's concentration, plus 50 credits as follows:

1. Either SISA 209 or SISA 210 (5 credits)
2. SIS 201 (5 credits)
3. An Asian civilization course in student's concentration chosen from SISEA/HSTAS 212, SISEA/HSTAS 241, HSTAS 201, HSTAS 202, HSTAS 211, SISSA 200, SISSE/HSTAS 221 (5 credits)
4. 35 credits of approved coursework from one regional or country concentration, or from the general Asia concentration
5. Approved research paper required in one of the upper division concentration courses
6. Minimum grade of 2.0 in all courses counted toward the major (except first- and second-year language courses, where grades must average 2.00)
7. 30 of the 35 credits required for the concentration requirement must be taken in residence at the UW.

Minor

Minor Requirements:

The following are the approved Asian civilization courses for the minors: SISA 209, SISA 210; SISEA/HSTAS 212 (Korea); SISEA/HSTAS 241 (Japan); SISSE/HSTAS 221 (Southeast Asia); HSTAS 201 (India), HSTAS 202 (India); HSTAS 211 (China).

China Studies

R. Kent Guy, Chair

Minor Requirements: 30 credits, to include the following:

1. HSTAS 211 and either RELIG 202 or one additional Asian civilization course from approved list above (10 credits)
2. 15 credits of electives taken at the UW, chosen from SISEA 370, SISEA 444, SISEA 445, SISEA 449, SISEA 454, SISEA 468 (or their joint-listed equivalents), ECON 466, GEOG 336, GEOG 435, HSTAS 453, HSTAS 457/WOMEN 457, HSTAS 459/WOMEN 459
3. A maximum of 5 credits chosen from CHIN 373, CHIN 374, CHIN 380, CHIN 381, ART H 311, ART H 410 through ART H 418, ART H 430 also may be included
4. 5 additional credits chosen from the elective list above, or in Chinese language beyond second-year level, or in upper-division transfer courses on China
5. Minimum grade of 2.0 required in each course applied toward the minor.

Japan Studies

Marie C. Anchordoguy, Chair

Minor Requirements: 30 credits, to include the following:

1. SISEA/HSTAS 241 and one additional Asian civilization course from approved list above (10 credits)
2. 15 credits of electives taken at the UW, chosen from SISEA 242, SISEA 422, SISEA 423, SISEA 435, SISEA 440, SISEA 441, SISEA 442, SISEA 447, SISEA 474, SISEA 475, SISEA 482, SISEA 486, SISEA 487, SISEA 494 (or their joint-listed equivalents). (A maximum of 5 credits chosen from JAPAN 321, JAPAN 322, JAPAN 323, ART H 204, ART H 321, ART H 420 through ART H 427, ART H 429 also may be included in the 15 credits.)
3. 5 additional credits in Japanese language beyond second-year level, or in upper-division transfer courses on Japan, or in additional electives chosen from electives listed above.
4. Minimum grade of 2.0 required in each course applied toward the minor

Korea Studies

Clark W. Sorensen, Chair

Minor Requirements: 30 credits, to include the following:

1. SISEA/HSTAS 212 and one additional Asian civilization course from approved list above (10 credits)
2. 15 credits of electives taken at the UW, chosen from SISEA/ANTH 448, HSTAS 481, HSTAS 482, SIS/ANTH 449
3. A maximum of 5 credits chosen from other upper-division SISEA-prefix courses on China, Japan, or East Asia also may be included
4. 5 additional credits in Korean language beyond second-year level, or in upper-division transfer courses on Korea, or in additional electives chosen from list above.
5. Minimum grade of 2.0 required in each course applied toward the minor

South Asian Studies

K. Sivaramakrishnan, Chair

Minor Requirements: 30 credits, to include the following:

1. HSTAS 202 or SISSA 200 and one additional Asian civilization course from approved list above (10 credits)
2. 15 credits of electives taken at the UW, chosen from the following: any SISSA-prefix course or its joint-listed equivalent; ANTH 437, ANTH 471; ANTH/ENVIR 371, ANTH/ENVIR 451; ANTH/RELIG 321, ANTH 352/RELIG 350; ART H 204, ASIAN 203, ASIAN 206, ASIA 263, ASIAN 411; HSTAS 401 through HSTAS 404, HSTAS 431; HUM 101; MUSIC 316, MUSIC 428, MUSIC 447; PHIL 412, PHIL 418; RELIG 202, RELIG 352, RELIG 354, RELIG 452; SIS/POL S 337, SIS/POL S 436; WOMEN/SIS 333, WOMEN/SIS 345
3. 5 additional credits in a South Asian language beyond second-year level, or in upper-division transfer courses on South Asia, or in additional electives chosen from list above.
4. Minimum grade of 2.0 required in each course applied toward the minor.

Southeast Asian Studies

Marjorie A. Muecke, Chair

Minor Requirements: 30 credits, to include the following:

1. SISSE/HSTAS 221 and one additional Asian civilization course from approved list above (10 credits)
2. 15 credits of electives taken at the UW, chosen from any SISSE-prefix course or its joint-listed equivalent, ANTH 357, 471, ANTH/NURS 492, ART H 204, HSTAS 462, HSTAS 463, HIST 335, RELIG 202, RELIG 354, RELIG 350/ANTH 352, MUSIC 316, MUSIC 439
3. 5 additional credits in a Southeast Asian language beyond second-year level, or in upper-division transfer courses on Southeast Asia, or in additional electives chosen from list above.
4. Minimum grade of 2.0 required in each course applied toward the minor.

Canadian Studies

Kim England, Chair

Canadian Studies offers a program that provides a broad understanding of Canadian society, culture and communications, historical development, and contemporary problems.

Bachelor of Arts

Suggested First- and Second-Year College Courses: ECON 200, ECON 201. Progress toward two years of French language. Canadian history courses. Courses that develop writing skills.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

30 credits or second-year-equivalent French language training, plus 53 credits as follows:

1. SIS 200, SIS 201, SIS 202; ECON 200, ECON 201; SISC 356, SISC 498
2. Minimum 18 credits from approved Canadian Studies elective course list.

Minor

Minor Requirements: 25 credits as follows:

1. SISC 356 and SISC 498 (10 credits)
2. 15 credits of electives. Recommended electives: SISC 308, SISC 341, SISC 377, SISC 424, SISC 430, SISC 441, or joint-listed equivalents. Other approved electives: AAS 372, ANTH 310, COM 420/ SIS 419/POL S 468, ENGL 359/AIS 377
3. Minimum grade of 2.0 required in each course applied to the minor
4. Minimum of 15 credits to be completed at the UW

Comparative Islamic Studies

Comparative Islamic Studies offers a program that provides a broad understanding of Islamic society, culture and communications, historical development, and contemporary problems.

Minor

Minor Requirements: 30 credits as follows:

1. NEAR E/SISME 210 (5)
2. NEAR E/RELIG 211 or NEAR E/RELIG 212 (5)
3. 10 credits in Islamic religious traditions and texts, chosen from NEAR E 402, NEAR E 423, NEAR E 442, NEAR E/RELIG 430, NEAR E/RELIG 432, NEAR E/RELIG 433, ARAB 451 through ARAB 456, ARAB 459, ARAB 460, ARAB 462, ARAB 470, PRSAN 452 through PRSAN 456, TKIC 454 through TKIC 456, TKISH 451, TKISH 452
4. 10 credits in history, society and culture of Islam, chosen from ANTH/ SISSE 314, ANTH 318, ANTH 401, HIST 161, HIST 260, HIST 370, HIST 461, HIST 462, HIST 463, HSTAS/SISSE 221, HSTAS 402, HSTAS 403, HSTAS 462, HSTAS 463, HSTEU 453, MUSIC 316, MUSIC 439, MUSIC 444, NEAR E 242, NEAR E 250, NEAR E 440, POL S 331, POL S 431, POL S 433, POL S/SISSA 340, POL S/SISSA 434, POL S/SISSE 343, SIS 406/POL S 432, SISME 430, SISME/NEAR E 495, SIS 377/NEAR E 375, SISRE/NEAR E 450, SISRE 410
5. Minimum grade of 2.0 required in each course counted toward the minor.

Comparative Religion

Martin S. Jaffee, Chair

The Comparative Religion major introduces students to broad theoretical issues in the academic study of religion, and encourages them to explore these issues through mastering details of the textual canons, historical traditions, social contexts, and cultural forms of religion.

Bachelor of Arts

Suggested First- and Second-Year College Courses: RELIG 201, RELIG 202. Courses that develop writing proficiency. Courses in particular religious traditions such as Christianity, Judaism, Islam, Hinduism, and Buddhism. Courses in the history of civilizations such as Chinese, South Asian, and Western.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

55 credits as follows:

1. RELIG 201, RELIG 202; RELIG/CHID 380; SIS 201
2. 35 additional credits in RELIG or non-RELIG prefix courses, of which at least 15 must be at the 300 level or above, selected from the three rubrics of textual canons, historical traditions, and social contexts and cultural forms. The distribution must include at least 5 credits and no more than 20 credits in any particular rubric.

Minor

Minor Requirements: 30 credits as follows:

1. RELIG 201, RELIG 202
2. 15 additional credits in RELIG-prefix courses or joint-listed equivalents
3. 5 additional credits chosen from RELIG courses or from ANTH/SISSE 315, ANTH 447/SISSE 445, ANTH 321, ANTH 421, HIST/SISJE 250, HIST 209, HIST 310, HSTAS 201, HSTAS 211, HSTAS/SISEA 212, NEAR E/SISME 210, PHIL 267, SISEA/HSTAS 241, SOC 457.

European Studies

Carol G. Thomas, Chair

The curriculum in European Studies prepares students to pursue careers requiring an understanding of all the forces, both material and cultural, contemporary and historical, that are shaping Europe today (north, south, east, and west), taking into account transitions involved in the post-Soviet era and the movement toward greater political, economic, and cultural integration among the various nations involved. Students also may concentrate, within the major, on Hellenic studies, European Union studies, or Russian, East European, and Central Asian studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Progress toward two years of a modern European language. A survey course on modern Europe.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

60 credits as follows:

1. 10 credits of a foreign language at the third-year level or beyond
2. 15 credits of core courses, including EURO 301 (5 credits), SIS 201 (5), and a survey course on modern Europe (5)
3. One quarter (10 credits minimum) of foreign study
4. 15 credits from approved list of electives
5. EURO 494-EURO 495, Senior Research Seminar (10 credits)
6. See adviser for specific course options.

Minor

Minor Requirements: 25 credits as follows:

1. Foreign language through the sixth quarter
2. 15 credits of core courses including EURO 301 (5 credits), SIS 201 (5), and a survey course on modern Europe (5)
3. 10 credits from approved list of electives.

International Studies

Mary P. Callahan, Chair

The general program in International Studies gives students a comprehensive and interdisciplinary perspective on world problems and an ability to analyze the subtle interactions of politics, economics, and culture within the global system.

Bachelor of Arts

Suggested First- and Second-Year College Courses: 30 credits of a single foreign language. ECON 200, ECON 201.

Department Admission Requirements

1. Admission is competitive, based on overall GPA, grades in the social sciences, a written statement of goals, language background, and any international experience. Before applying, students must complete either ECON 200 or 201, and either SIS 200 or 201. Grades in these courses will be given special consideration.
2. Application deadline is the third Friday of each quarter; students are notified by the sixth Friday of the quarter in which they apply. Transfer students must be enrolled at the UW before applying to the major.

Major Requirements

Foreign-language competency through the second-year college level, plus 70 credits as follows:

1. ECON 200, ECON 201; SIS 200, SIS 201, SIS 202, SIS 401, SIS 495, SIS 498
2. Three or four upper-division courses in an approved option
3. Three upper-division interdisciplinary courses in international studies from an approved core list
4. A research paper of approximately 25 pages to be completed in one of the courses in the student's approved option or in one of the approved interdisciplinary courses
5. Majors are required to maintain a GPA of at least 2.50, both overall and in the program, and to earn a minimum grade of 2.0 in all required SIS-prefixed courses.

Minor

Minor Requirements:

International Studies: 30 credits as follows:

1. 10 credits chosen from SIS 200, SIS 201, SIS 202
2. 15 credits in SIS-prefix courses numbered 200 or above (courses with other JSIS prefixes are not eligible). These 15 credits must include at least 5 credits at 400 level (SIS 401 is recommended).
3. 5 additional credits chosen from SIS-prefix courses or from undergraduate courses having any of the following prefixes: SISA, SISAF, SISEA, SISEA, SISJE, SISLA, SISME, SISRE, SISSA, SISSE, EURO, RELIG
4. Minimum grade of 2.0 is required in each course applied toward the minor.

International Forestry: 30 credits as follows:

- * Core courses (18 credits) -- I BUS 300 or SIS 330; GEOG/SIS 335, F M 423, and F M 492
- * Upper-division electives (12 credits) --
 - o For students majoring in forest management, wildland conservation, forest engineering, wildlife sciences, or environmental horticulture and urban forestry: SIS 401, 430, GEOG/SIS 375, GEOG/SISA 372, and GEOG/SISCA 308, or any I BUS, SIS, SISEA, SISLA, SISRE, SISSA, or SISSE course.
 - o For students majoring in other programs: ESC 322, ESC 410, F E 368, F M 320, F M 360, F M 371, F M 470, or any F M, ESC, or F E course. See faculty adviser for other options.
- * Minimum grade of 2.0 required in each course.

Jewish Studies

Paul Burstein, Chair

Jewish Studies takes an interdisciplinary approach to the global study of Jews, exploring the rich diversity of their cultures, their philosophies, their religious practices, their histories, their roles in politics, and other areas of contemporary life.

Areas of concentration include ancient cultures and sacred texts, modern literature and culture, Jewish languages, American Jewish studies, Sephardic studies, European Jewish studies, and Israel and Middle East studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: RELIG 210, SISJE/HIST 250. Courses that develop writing skills. Courses in international studies and world history -- ancient, medieval, and modern. Modern European languages, e.g., French, German, Italian, Spanish. Progress toward two years of Hebrew.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

52 credits as follows:

1. *Introductory courses (15 credits):* RELIG 210, SISJE/HIST 250, SIS 201
2. *Jewish Studies Track (20 credits):* Approved courses in either The Judaic Cultural Tradition or The Jewish People in the Modern World

3. *Jewish Languages and Texts (15 credits).* A minimum of 15 credits selected from an approved list of courses. Students must be proficient in the Hebrew language through second year level. Students in the Cultural Tradition track may study ancient or modern Hebrew. Modern Hebrew is required for students in the Modern World track. Under certain circumstances substitution of coursework in an appropriate Jewish lingua franca other than Hebrew may be approved by petition.
4. *Senior paper or project (2 credits):* SIS 494

The lists of Jewish Studies courses are maintained by the Jewish Studies Program as part of its Web site. For the current list of such courses, see <http://jsis.artsci.washington.edu/advise/catalog/Jewish-b.html>

Minor

Minor Requirements: 30 credits as follows:

1. RELIG 210 (5 credits), SISJE/HIST 250 (5)
2. 20 additional credits chosen from any upper-division SISJE-prefix courses (except 499) or their joint-listed equivalents, or from ENGL 311, ENGL 312, GERMAN 295, HEBR-prefix courses numbered 451 or higher, HEBR/ARAB 470, HEBR/ARAB 472, NEAR E 251, NEAR E 325, NEAR E/RELIG 240, RELIG 400, RELIG 410, RELIG 415, RELIG 460, RELIG 491. One course chosen from HEBR 413, HEBR 421, HEBR 422, HEBR 423, HEBR 426, HEBR 427, HEBR 428 may also be included.
3. 15 credits of the minor must be taken in residence at the UW.

Latin American Studies

Jonathan Warren, Chair

The Latin American Studies major combines language study in Spanish and Portuguese with work in history, the humanities, and the social sciences. It provides a comprehensive, interdisciplinary understanding of this major world region, emphasizing themes such as economic development, popular movements, cultural analysis, and hemispheric relations. At the same time, it gives students the option to develop their own particular disciplinary and thematic interests.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Substantial progress toward completing two years of Spanish and one year of Portuguese, or two years of Portuguese and one year of Spanish. Courses in any of the following disciplines that deal with Latin America: history, literature, economics, geography, sociology, political science.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

52 credits plus language training, as follows:

1. Training in two foreign languages of Latin America, to include the sixth quarter (or equivalent) of one language chosen from Spanish, Portuguese, or French, and the third quarter (or equivalent) of a second of these languages.
2. SIS 201 (5 credits)
3. *Latin American History (10 credits):* Courses to be selected from an approved list.
4. *Contemporary Latin America (15 credits):* Courses drawn from a range of disciplines including anthropology, comparative literature, geography, international studies, and Spanish. See program Web site for a complete list of courses.
5. *Electives (15 credits):* Courses on Latin America and international studies selected from an approved list.
6. *Interdisciplinary seminar (5 credits):* SISLA 485, SISLA 486, SISLA 492, or another course chosen from an approved list of research seminars.
7. *Senior paper or project (2 credits):* SIS 494

Lists of Latin American Studies courses are maintained by the Latin American Studies Program as part of its Web site. For the current list of such courses, see <http://jsis.artsci.washington.edu/advise/catalog/Latamba.html>

Minor

Minor Requirements: 30 credits as follows, plus foreign language:

1. One year of Spanish or Portuguese, or equivalent proficiency
2. At least 5 credits chosen from HSTAA 185, HSTAA 381, HSTAA 382, HSTAA 383, and HSTAA 384
3. At least 5 credits chosen from CHSTU 101, CHSTU 200, CHSTU 330, HSTAA 285, MUSIC 433, PORT 310, PORT 335, SISLA/SPAN 485, SISLA/SPAN 486, SISLA/SPAN 489, SPAN 307, SPAN 320, SPAN 321, SPAN 322, SPAN 332, SPAN 339, SPAN 376, SPAN 439, SPAN 473, SPAN 474, SPAN 475, SPAN 476, SPAN 483, SPAN 484
4. At least 5 credits chosen from ANTH 404, ANTH 418, CHSTU 255, CHSTU 352, CHSTU 354, GEOG 330, GEOG 430, POL S 405; SISLA 322, SISLA 342, SISLA 355, SISLA 451, SISLA 480, or their joint-listed equivalents; SPAN/WOMEN 468
5. At least 15 additional credits chosen from the lists above or from the following: ANTH 458, ARCHY 304, ARCHY 476, CHSTU 256, CHSTU 405, CHSTU 491, CHSTU 498, GEOG 230, GEOG 371, GEOG 431, GEOG/SIS 335, HSTAA 284, HSTAA 482, HSTAA 483, HSTAA 485, HSTAA 486, HSTAA 487, HSTAA 488, HSTAA 283/CHSTU 180, HSTEU 361, HSTEU 462, MUSIC 300, MUSIC 317, MUSIC 319, SIS 201, SIS 401, SIS 455, SIS 480, SIS/ANTH/WOMEN 345, SISAF 444, SISLA 470 (max. 5 credits), SISLA 490, SISLA 492, SPAN 331, SPAN 461, SPAN 464, SPAN 465, SPAN 466, SPAN 478.
6. At least 20 of the 30 credits must be completed at the University of Washington (UW Foreign Study programs included).
7. Minimum grade of 2.0 required in each course applied toward the minor.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* The majors offered in the School of International Studies emphasize development of critical thinking and provide a challenging framework for research and writing. Graduates attain competency in foreign language and an understanding of the political, economic and cultural underpinnings of the global system and specific world regions. This background lays a foundation for advanced study in professional and academic disciplines, and for careers in the evolving global community. Graduates work in a wide range of jobs, depending on their interests and skills, including: Foreign Service officers, international trade specialists, political analysts, human rights associates, research assistants, social studies and language teachers, international student advisers, foreign study coordinators, program officers/managers for international non-profits and NGOs, foreign exchange specialists, international sales representatives/managers, import/export brokers, marketing analysts, associate editors/publicists, international news writers/journalists.

* *Instructional and Research Facilities:* More than 1.5 million volumes in the University library system are related to international studies. The library receives more than 265 newspapers, 160 of which are foreign. Specialized facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. The University's library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

The University of Washington is also a major center for research on Eastern Europe, Russia, and the independent states of the former Soviet Union, notably the Baltics and the countries of Central Asia. In addition to extensive holdings in Russian, East European, and Baltic language materials, the library has one of the best Central Asian language collections in the country and the largest collection of Latvian books outside Latvia. The strengths of the program are complemented by strong programs in East Asian and Middle Eastern Studies.

Jackson School undergraduates can draw upon an extensive roster of UW study-abroad programs to enrich their studies, including nearly 40 programs in Asia, over 80 in Europe, and another 40-45 programs in Latin America, the Middle East, and other regions of the world.

* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

* *Research, Internships, and Service Learning:* The School's Office of Career Services provides resources for students exploring job and

internship opportunities. The Jackson School sponsors the Asia Internship Program, through which students with language proficiency have served for three to nine months with organizations such as an international law firm in Seoul, a bank in Nagasaki, and large electronics companies in both Tokyo and Taipei. The School has limited funds available for students who serve as unpaid interns in nonprofit and governmental agencies. The Leslieanne Shedd Memorial Internship Fund honors a Jackson School alumna killed while serving with the State Department. The Dorothy Fosdick Internship Fund is sponsored by the Henry M. Jackson Foundation in memory of the senator's foreign policy adviser. The George E. Taylor Internship Endowment supports students engaged in community-based internships.

* *Department Scholarships:* George M. Beckmann Memorial Scholarship (undergraduate-Japan); Neal and Helen Fosseen Scholarship (undergraduate); Vincent H. Gowen Scholarship (China-undergraduate); Japan-America Student Conference Scholarship; Mitsui (USA) Foundation Scholarship; Ayako Betty Murakami Scholarship (Japan); Lorraine Sandler and Maurice Shurman Scholarships (undergraduate-Jewish Studies); Eugene and Marilyn D. Webb Scholarships (Comparative Religion); Kozo Yamamura Scholarship (Japan). See also the funding opportunities described under Internships.

* *Student Organizations/Associations:* Jackson School Student Association

Graduate Program

Graduate Program Information
111 Thomson, Box 353650
206-543-6001
jsinfo@u.washington.edu

The Jackson School offers six area-studies programs that lead to a Master of Arts in International Studies degree. These include China Studies; Japan Studies; Korea Studies; Middle East Studies; Russian, East European, and Central Asian Studies; and South Asian Studies. Specific requirements vary from one program to another, but all stress interdisciplinary study within the context of the historical cultures, contemporary situations, and languages of the world areas. In addition, the Jackson School offers a program in Comparative Religion for the Master of Arts in International Studies.

The Jackson School also offers a general program in International Studies that concentrates on the interaction of international economic, political, and cultural processes with states and societies around the world. This program was developed in conjunction with several professional schools and is designed as a concurrent degree program.

Admission Requirements

Applicants must meet the requirements of the Graduate School: a 3.00 GPA in the last 90 quarter (60 semester) graded credits and a baccalaureate degree from an accredited university. Submission of the scores of the general Graduate Record Examination is required. Applicants must also meet the requirements of the specific Jackson School program to which they are applying. Most of them require or strongly recommend previous study of an appropriate foreign language.

Degree Requirements

Students must meet Graduate School requirements for the Master of Arts, as well as individual Jackson School program requirements. Programs are designed to be completed in two years.

Financial Aid

Financial support is available in the form of Title VI Foreign Language and Area Studies Fellowships. Some Jackson School programs have additional fellowships available for specific areas of study. Graduate students are also eligible for a limited number of teaching or research assistantships and readerships.

Research Facilities (East Asia)

Research and training facilities include the East Asia Library, with a comprehensive collection of manuscripts, books, and serials on China, Japan, and Korea. In addition, the University is affiliated with the Inter-University Program for Chinese Language Studies in Beijing, language programs in Japan and the People's Republic of China sponsored by the Council on International Educational Exchange, the Inter-University Center

for Japanese Language Studies in Yokohama, and other programs which provide intensive language training for advanced undergraduate and graduate students. The School has ongoing projects on China, Japan, and Korea in which advanced graduate students and recognized scholars from the United States and foreign institutions regularly participate.

See also descriptions of research facilities on Russia, East Europe, and Central Asia as well as South Asia under the appropriate headings below.

China Studies

R. Kent Guy, Chair

The China Studies program provides a broad understanding of the Chinese people and their culture, historical development, and contemporary problems. The curriculum emphasizes the attainment of facility in Chinese language, a grounding in history, and a familiarity with the approaches of the social sciences to China studies. The cultural aspects of China are covered through offerings of several departments, with special strengths in art history and literature. The breadth of offerings allows students to select courses to meet career goals in business, government, or other professions, or to prepare for further graduate study in an academic discipline.

Admission Requirements

See above under Graduate Program. While not required for admission, some previous study of Chinese language is highly recommended.

Degree Requirements

Chinese language training through the third year; two seminars: SISEA 521-522 (5 credits each) plus 26 credits in discipline study related to China from at least two different disciplines; two seminar papers or a thesis; comprehensive oral examination.

Comparative Religion

Martin S. Jaffee, Chair

The Comparative Religion program leading to the Master of Arts in International Studies offers an interdisciplinary curriculum in the study of religion, with several choices for areas of concentration. The required core seminars focus on methodology and comparative perspective in the study of religion. For the remaining course requirements, primary and secondary curricular concentrations are available in Buddhism, Hinduism, Judaism, Islam, Christianity, Biblical and ancient Near Eastern religion, and religion and culture; further secondary curricular concentrations are available in Greco-Roman religions, East Asian indigenous traditions, and African religious traditions.

Admission Requirements

See above under Graduate Program. The Comparative Religion faculty reserve the right to determine in each case whether an applicant has sufficient language preparation and background in the study of religion for acceptance into the program.

Degree Requirements

Completion of the third year in a language of the primary sources in the chosen concentration, and first-year reading proficiency in a secondary foreign language necessary for reading published research (e.g., German, French, Italian, Dutch, Spanish); certification of basic competency in the history of world religions; RELIG 501-502; one course focused on historical relations between religious traditions; at least four courses in a major concentration and two in a minor; one or two final research paper(s); and a comprehensive examination including both oral and written segments.

International Studies

Mary P. Callahan, Chair

The general program in International Studies provides students with broad knowledge and skills in analyzing international affairs. Designed for students entering many different professional fields, the program trains them in international and comparative studies in a multidisciplinary setting. Students are prepared to undertake sophisticated analyses of international affairs and typically will hold positions after graduation with the international divisions of federal and state governments, international divisions of banks,

trading companies, policy-study institutes, corporations with international operations, and international development and educational organizations. More than half of all students are enrolled in a concurrent graduate professional-degree program. This adds approximately one year to the student's course of study.

Admission Requirements

See above under Graduate Program. Those applying concurrently to a professional program (Business Administration, Public Affairs, Marine Affairs, Forest Resources, Law, or Public Health and Community Medicine) must first be accepted by the professional school. For non-concurrent applicants, preference is given to those who have a professional interest, or previous professional experience or education. Prior study of a foreign language and preparation in intermediate-level microeconomics and macroeconomics are highly recommended.

Degree Requirements

Japanese or Chinese language through the third year or any other modern foreign language through the second year; SIS 500, 501, 502, 511, 512, and 522 (3 credits each); courses in two of the following three fields: a regional studies field, a professional field, or a special topics field (minimum three classes -- 9 credits -- for each field); two seminar papers; and an oral examination. Students in concurrent graduate-degree programs also must meet Graduate School requirements for the second degree.

Japan Studies

Marie C. Anchordoguy, Chair

The graduate program in Japan Studies gives students in-depth knowledge of many facets of Japan, including its history, political economy, society, and language. Course work helps prepare students for careers in business, government, journalism, secondary-school teaching, and a wide variety of other professional fields. The program is specifically designed (1) for students with bachelor's degrees in a discipline who need language and interdisciplinary training on Japan to pursue their career goals, and (2) as preparation for doctoral work in an academic discipline involving Japan for students who have had little or no training on Japan or in the language. A concurrent degree program with the Business School (MAIS/MBA) is offered and other combinations (e.g., with Law) can be arranged.

Admission Requirements

See above under Graduate Program. At least one year of prior training in Japanese language is strongly recommended.

Degree Requirements

Japanese language training through the third year (15 credits minimum training at the UW); SISEA 555 (5 credits) and SISEA 559 (5); 26 credits in discipline study of Japan to include at least one history course and one social science course; essay of distinction; and an oral examination.

Korea Studies

Clark W. Sorensen, Chair

The graduate program in Korea Studies offers courses in Korean language, history, and society. Regular offerings are supplemented by visiting faculty from political science, economics and economic development, folklore, and literature. The program emphasizes the study of Korea in the context of East Asian civilization and the modern world economy, not simply as a single country in isolation from its neighbors. The objective of the program is to provide students with a broad background which will be of use for further graduate study, or in a variety of professions such as teaching, business, and government.

Admission Requirements

See above under Graduate Program. Previous language training is recommended.

Degree Requirements

Korean language through the third year of instruction (through the second year of instruction if the student is admitted with no previous language training); HSTAS 481-482, SISEA 584 (5 credits each), and SISEA 585 (6

credits); 15 credits in discipline study of East Asia or international studies; two seminar papers or an essay of distinction; comprehensive oral examination.

Middle Eastern Studies

Ellis Goldberg, Chair

The Middle East program is designed for students who wish to study the region within an interdisciplinary framework, focusing especially on the social, political, economic, and legal systems of the Middle East and/or Islamic Central Asia. To provide a thorough grounding in this region, students take courses in the social sciences, humanities, and a Middle Eastern or Central Asian language.

Admission Requirements

See above under Graduate Program. Although knowledge of a Middle Eastern or Central Asian language is not a prerequisite for admission, applicants are generally expected to have had at least the equivalent of one year's study of the language in which they plan to concentrate. Students accepted with no language training may wish to begin their language study in an intensive summer program.

Degree Requirements

Three 3-credit or two 5-credit Middle Eastern language courses beyond the second-year (native speakers as well as non-native speakers); 20 credits on the modern Middle East from at least two social science or humanities disciplines; one approved Jackson School course; two courses in one social science discipline or in one professional school other than courses taken for preceding requirements; either a thesis and an oral examination, or two seminar papers and a four-hour written examination.

Russian, East European, and Central Asian Studies

Stephen E. Hanson, Chair

Designed primarily for students with bachelor's degrees in a discipline, the program offers a background for professional pursuits in government and nongovernmental organizations, journalism, business, or teaching, or for advanced graduate study leading to the Ph.D. degree in a discipline. The program includes language training, a concentration of study in a chosen discipline, and a combination of courses in other disciplines that deal with aspects of the area. Students usually focus on one region (Russia, East Europe, the Baltics, or Central Asia), although the program provides flexibility to take courses on another region.

Admission Requirements

See above under Graduate Program. A prerequisite for all applicants is two years of college-level language courses or the equivalent. For those focusing on Russia the language must be Russian; for other regions of the former Soviet Union and East Europe, two years of a language of the region, or another relevant language.

Degree Requirements

Including the two years required for entry, four years of a language of the region being studied or two years each of two relevant languages (four years of Russian required for Russian focus); SISRE 501 and 502 (3 credits each); 30 credits in disciplines other than language, with 15-20 credits in a discipline of concentration and 10-15 credits in at least two additional disciplines; a thesis (9 credits of SISRE 700); a written examination in the discipline of concentration and an oral interdisciplinary examination.

Research Facilities

The University of Washington is a major center for research on Eastern Europe, Russia, and the independent states of the former Soviet Union, notably the Baltics and the countries of Central Asia. In addition to extensive holdings in Russian, East European, and Baltic language materials, the library has one of the best Central Asian language collections in the country and the largest collection of Latvian books outside Latvia. The strengths of the program are complemented by strong programs in East Asian and

South Asian Studies

K. Sivaramakrishnan, Chair

The South Asian Studies program has been designed for students whose career objectives involve teaching and research in a traditional discipline with geographical interests within South Asia (i.e., India, Pakistan, Bangladesh, Sri Lanka, Tibet, and Nepal); those planning to enter professional-training programs (e.g., education, business administration, journalism, law, or public affairs); or students planning a career in government service (e.g., the foreign service) who wish to acquire a special understanding of the South Asia area.

Admission Requirements

See above under Graduate Program.

Degree Requirements

Completion of the third year of a South Asian language to include at least 7 credits at the 400 level or above; SISSA 510 and 511 (5 credits each); 26 credits in coursework from at least two different departments, focused primarily on South Asia or in courses taught by South Asia faculty on topics relevant to the student's specializations (students may take a maximum of 10 credits not focused on South Asia, nor taught by South Asia faculty, to help fulfill disciplinary or professional objectives); two seminar papers; and a comprehensive oral examination.

Research Facilities

The University of Washington library holds an extensive collection of books and serials relating to South Asia. The library participates in the U.S. Library of Congress Public Law 480 program, which supplies current publications from India, Pakistan, and Sri Lanka; and is a member of the South Asian Microfilm Program of the Center for Research Libraries, providing access to a large collection of microfilm newspapers, journals, and documents on South Asia.

Course Descriptions

See page 364.

Labor Studies

Adviser
101 Smith, Box 353560
206-543-7946
pcls@u.washington.edu

Minor

The Labor Studies minor brings together a series of courses on labor in core social-science departments. It provides students with an interdisciplinary program of study focusing on the importance of labor to the economic, social, political, and cultural evolution of modern societies.

Minor Requirements: 30 credits, including HIST 249/POL S 249/SOC 266 (5 credits). Additional 25 credits (no more than 10 from any one department) from the following: HIST 449, HSTAA 450, HSTAA 480, POL S 405, POL S 447, SOC 447, SOC 466, AES 361, CHSTU 354, ECON 443, ECON 444, HRMOB 420. A minimum grade of 2.0 is required for each course applied toward the minor.

Law, Societies, and Justice

42 Gowen

The program in Law, Societies, and Justice provides an interdisciplinary liberal arts education focusing on the unique forms of social control, institutionalized disputing, and justice that we identify with law or legality. Courses inquire into the historically embedded principles and institutional practices associated with diverse legal domains -- constitutional, criminal, administrative, and civil law as well as fundamental human rights -- in the United States and throughout much of the world. The program encourages complex assessments of the workings and implications of law in society

according to standards that are both internal and external to the rule of law itself.

Undergraduate Program

Adviser
42 Gowen, Box 353530
206-543-2396
lsjadv@u.washington.edu

Law, Societies, and Justice offers the following programs of study:

- * The Bachelor of Arts degree with a major in law, societies, and justice.
- * A minor in law, societies, and justice
- * A minor in human rights involving courses at the three UW campuses
- * A minor in disability studies

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that emphasize development of reading, writing, and especially analytical skills. Also, classes that provide background knowledge of modern world history, politics, institutions, and political theory.

Department Admission Requirements

1. Admission is competitive, based on the following: GPA, with emphasis on grades received in courses required for admission (applicants accepted normally present cumulative GPAs considerably above 2.50); personal statement representing the student's interest in and commitment to becoming a Law, Societies, and Justice major; other evidence of a commitment to the study of society, justice, and law. Junior standing preferred.
2. Completion of one of the following courses: LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ 363/POL S 363 or LSJ/SIS 362; LSJ 375 or SOC 372.
3. Completion of one research methods or statistics class. See the program's Web site or advising office for a list of approved courses.
4. Completion of one English composition course. (Further evidence of writing skills in the social sciences is encouraged.)
5. A minimum cumulative GPA of 2.00 at the University of Washington.
6. . Students may apply in autumn, winter, or spring quarters. Applications for admission are due no later than the second Friday of each quarter. Students are notified of admissions decisions by the fifth week of the quarter in which they apply.

Major Requirements

58 credits as follows:

1. Completion of the four LSJ core courses: LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ/POL S 363 or LSJ/SIS 362; LSJ/POL S 367; LSJ 375 or SOC 372 (20 credits)
2. One research methods or statistics course from approved list (4-5 credits)
3. Three courses from one of the three designated subfields of study (crime, social control, and justice; comparative legal institutions and politics; rights, resistance, and reconstructions in law) and two courses from one of the other two subfields. See the program's Web site or adviser for list of approved courses. (23 to 25 credits)
4. One LSJ senior seminar; and one field experience/internship, LSJ 401. Senior seminar cannot also count as an LSJ subfield course. (10 credits)
5. Students may use only one 3- or 4-credit course toward completion of the major.

Minor

Minor Requirements: 30 credits as follows:

1. Two courses from LSJ 320/POL S 368 or LSJ 321/ANTH 323; LSJ 363/POL S 363 or LSJ 362; LSJ 367/POL S 367; LSJ 375 or SOC 372 (10 credits).
2. Two courses from a single Law, Societies, and Justice major subfield. The major subfield areas are crime, social control, & justice; comparative legal institutions & politics; and rights, resistance, & reconstruction in law. Classes fulfilling the subfield requirement are outlined on the departmental web pages and handouts (6-10 credits).

3. One course from a second major subfield or from the Law, Societies, and Justice research methods list. The research methods list is outlined in departmental web pages and handouts (3-5 credits).
4. Elective courses from the list of LSJ core courses or LSJ major subfields. Only one course from the research methods list can be used to reach the total of 30 credits.

Disability Studies

Minor Requirements: 30 credits

1. *Core courses:* LSJ 332, LSJ 433, LSJ 434 (15 credits).
2. *Internship or independent study:* LSJ 332 (prerequisite course to completing an internship or independent study) (5 credits)
3. *Disability studies electives:* See LSJ adviser or Disability Studies program homepage for list of allowable classes (10 credits).

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The Law, Societies, and Justice curriculum emphasizes the development of a range of analytic and communicative skills. Courses challenge students to develop the capacities to: read and interpret texts, including theoretical, empirical and legal documents; comprehend and contrast arguments; develop and defend arguments; contrast theoretical arguments with empirical realities; assess contemporary practices of justice delivery against contemporary conceptions of justice. Students are required to express these skills in both verbal and written forms, through active class discussions and well-constructed writing assignments. The development of these skills assists students in a range of possible future endeavors, including a wide array of careers in law and justice.
 - * *Instructional and Research Facilities:* Students have access to the Political Science computer lab and writing center for most classes. Research opportunities are available on an individual and group basis with many professors.
 - * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
 - * *Research, Internships, and Service Learning:* LSJ was the first program in the social sciences to require an internship as part of its major. The internship aims: (1) to provide students with insights into the workings of law in practice; (2) to scrutinize and 'test' some of the theories and concepts found in the literature against 'real world' practice; (3) to advance career development and goals, and (4) to provide 100 hours of local community service. Students work with a variety of governmental and non-governmental agencies and organizations, including private law firms, federal law enforcement agencies, and social service organizations (see the Internship Listings for complete information). It is the student's responsibility to find an internship, although the LSJ adviser can help you find a suitable one. Students are required to write two papers according to specific guidelines for internship course credit.
- Many of the LSJ faculty regularly invite majors to assist them in the development and execution of research endeavors. These provide students an unparalleled opportunity to understand the challenges and mechanics of high-level research.
- * *Department Scholarships:* None available, although the program does provide several awards with modest cash stipends to graduating seniors.
 - * *Student Organizations/Associations:* Law, Societies, and Justice is a founding member of the National Consortium of Law and Society Programs. The program is presently reassessing the status of student associations and organizations.

Of Special Note: The required senior seminar emphasizes close reading of texts, active class discussions, and well-reasoned analytic writing, providing an unmatched opportunity to establish a close connection to faculty and other students, and to hone the analytic and communicative skills.

Course Descriptions

See page 415.

Linguistics

A210 Padelford

Linguistics is the scientific study of language, which is one of the most characteristic human attributes. In contrast to other language-related disciplines, linguistics is concerned with describing the rule-governed structures of languages, determining the extent to which these structures are universal or language-particular, positing constraints on possible linguistic structures, and explaining why there is only a fairly narrow range of possible human languages.

Undergraduate Program

Adviser
A215 Padelford, Box 354340
206-685-4846
lingadv@u.washington.edu

The Department of Linguistics offers the following programs of study:

- * The Bachelor of Arts degree with options in general linguistics and Romance linguistics
- * A minor in linguistics

Bachelor of Arts

General Linguistics

Suggested First- and Second-Year College Courses: LING 400 or other introductory course in linguistics. One year of a foreign language that belongs to a different family from the student's native language.

Department Admission Requirements

1. Completion of at least the third quarter, or equivalent, of a foreign language.
2. Completion of at least one writing (W) course and two quantitative and symbolic reasoning (Q/SR) courses, with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses.
3. The department accepts students who meet the minimum requirements stated above, but recognizes that a GPA of 2.50 or higher is indicative of the motivation and academic skills needed for a reasonable probability of success in the program.

Major Requirements

1. LING 400 or other introductory course in linguistics
2. LING 450, LING 451, LING 461, LING 462
3. At least one of LING 432, LING 442, or LING 481
4. At least one year of each of two languages, one of which must belong to a different language family than the student's native language
5. 20 additional credits of departmentally approved courses in linguistics.

Romance Linguistics

Suggested First- and Second-Year Courses: Two college years of study in a Romance language; LING 400 or other introductory course in linguistics.

Department Admission Requirements

1. Completion of at least one year of college work in a single Romance language.
2. Completion of at least one writing (W) course and two quantitative and symbolic reasoning (QSR) courses, with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses.
3. The department accepts students who meet the minimum requirements stated above, but recognizes that a GPA of 2.50 or higher is indicative of the motivation and academic skills needed for the reasonable probability of success in the program.

Major Requirements

1. LING 400 or another introductory course in linguistics
2. LING 450, LING 451, LING 461, and LING 462
3. ROLING 402
4. 15 credits at the 300 level or higher of one Romance language; ROLING 490; 20 additional credits of departmentally approved courses in linguistics.

Minor

Minor Requirements: 32 credits to include LING 400 or another introductory course in linguistics; three courses from LING 432, LING 442, LING 450, LING 451, LING 461, LING 462, or LING 481; 12 additional credits from a list of departmentally approved courses in linguistics, 6 of which must be upper-division courses.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* The study of linguistics emphasizes formal reasoning and critical thinking skills. Linguists' skill sets include the ability to analyze sound, word, and sentence structures of individual languages; the ability to understand and account for how languages change in certain patterns; the ability to understand how social factors can affect language, how people learn their first or second languages; and the ability to find out and appreciate how apparently vastly different languages can be governed by the same set of rules. Linguistics is a valuable component of liberal education and vocationally can have applications wherever language itself becomes a matter of practical concern. Graduates have a good foundation for pursuing further training and careers in teaching languages, in areas of rehabilitative medicine such as audiology or speech therapy, in special education, in work with native peoples or with immigrant groups, in lexicographic work, in interpretation and translation, in work in computer science and artificial intelligence, or in academic disciplines such as psychology, philosophy, literature and language studies, where the contribution of linguistics is recognized. An undergraduate degree in linguistics from the UW also serves as preparation for graduate work in linguistics or language-related fields such as speech and hearing science or language teaching.

* *Instructional and Research Facilities:* The Language Learning Center located in Denny Hall provides audio and video services facilitating language learning. It also has a computer lab providing instructional software for linguistics and varieties of languages. Departmental facilities include a phonetics lab for students conducting phonetic experiments and doing digital acoustic analyses, a linguistics library that supplements the linguistics collection of the UW libraries and provides a quiet study place, and a computer lab for research in computational linguistics.

* *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

* *Research, Internships, and Service Learning:* None offered

* *Department Scholarships:* None offered

* *Student Organizations/Associations:* The Linguistics Undergraduate Association (LingUA)

Graduate Program

Graduate Program Coordinator
A210B Padelford, Box 354340
206-543-2046
phoneme@u.washington.edu

The Department of Linguistics offers a program of study for graduate students leading to the degrees of Master of Arts and Doctor of Philosophy. The program is administered by the departmental faculty. The major interest of the core faculty lies in syntax, semantics, phonetics, phonology, sociolinguistics, computational linguistics, and in theoretical aspects of second-language acquisition. Students may specialize in general or in romance linguistics.

Some course work is also available in various cooperating departments. Among those fields represented outside the department are psycholinguistics, philosophy of language, speech synthesis, and the structure and history of a number of individual languages and language families.

Admission Requirements

At least one previous course in linguistics is highly recommended, as is proficiency in one language other than the student's native language. For a specialization in Romance, substantial upper-division coursework in a Romance language or equivalent is required. Two to three letters of recommendation (M.A.) or three letters of recommendation (Ph.D.) and Graduate Record Examination scores are required for all applicants.

Doctoral degree applicants should send the department a copy of their master's thesis or a paper of high quality, or both.

Master of Arts

1. *General Linguistics Option:*
 - a. Two courses each in syntax and phonetics/phonology.
 - b. One course in semantics.
 - c. Three courses not in categories (1) and (2) above.
 - d. Three courses at the 400 or 500 level. At least two of these must be 500-level courses for which papers or projects are required. (LING 504, 505, 506, 507, 508, and 509 do not qualify for this requirement. Also note the University requirement for 9 credits at the 500 to 600 level.)
2. *Romance Linguistics Option:*
 - a. Three courses in syntax and phonetics/phonology.
 - b. ROLING 402, ROLING 551, LATIN 300
 - c. Six additional linguistics-related courses at the 400 or 500 level. One of these must be a 400-level FRLING or SPLING class and at least two of these must be 500-level classes for which papers or projects are required.
3. No course fulfilling any of the above requirements can be taken for the 2-credit (no paper) option.
4. Demonstrated ability to read the linguistic literature in a language other than English. (For the Romance option, the demonstrated ability must be in a Romance language.) This can be satisfied at any time during the program by arrangement with the Graduate Program Coordinator.
5. An M.A. exam in any areas in which the grade point average for the required course work in that area is below 3.30.
6. Formation of a supervisory committee after the second quarter.
7. A short M.A. thesis (30 to 50 pages), which will typically be an expansion of a term paper. Students must register for 9 credits of LING 700.
8. All requirements must be completed within the equivalent of seven full-time quarters.

Doctor of Philosophy

Direct admission to the Ph.D. program will be considered on an individual basis for applicants holding a degree from a comparable M.A. thesis program in linguistics or a closely related field. Some such applicants may be granted admission directly into the Ph.D. program, with the stipulation that they make up one or more M.A.-level deficiencies.

Requirements for the Ph.D. degree are an M.A. degree plus the following:

1. 35 additional credits of course work. At least 18 credits at the 500 level and above must be completed before the General Exam, 9 credits of which must follow the M.A. A minimum cumulative GPA of 3.00 is required for graduate course work.
2. During the course of the entire M.A.-Ph.D. program, the student must have completed at least three courses each in syntax and phonetics/phonology and at least two courses in semantics, and have taken a total of five 500-level classes for which papers or projects are required. (LING 504, 505, 506, 507, 508, and 509 do not qualify for this requirement.) There is also a major, minor, and breadth requirement as follows: Major-six courses in the student's primary area of specialization; Minor-four courses in a second area (the major and minor together should form a coherent research area); Breadth-eight courses in other areas of the field. The student's supervisory committee will be the final judge of what courses might qualify to meet these requirements. However, it is worth noting that (a) courses fulfilling these requirements do not necessarily have to be offered from within the Department of Linguistics; (b) non-language instruction courses in a language area can fulfill the major or minor requirement; and (c) no course fulfilling any of the above requirements can be taken for the 2-credit (no paper) option.
3. 27 credits of LING 800.
4. *Language Requirement:*
 - a. General Linguistics option: An exotic language requirement as follows: (a) for native speakers of an Indo-European language, a year of a non-Indo-European language; (b) for native speakers of a non-Indo-European language, a year of a language that is not English or in the same sub-family as their language. The student has the right to petition the supervisory committee to allow a language excluded in (a) or (b) above.
 - b. Romance Linguistics option: The completion of LATIN 301, as well as the demonstrated ability to read the linguistic literature in a Romance language.
5. Two linguistic papers delivered at a colloquium or conference. Each will be evaluated by a member of the student's Ph.D. committee with expertise in the area of the paper. The evaluation may be either of the

oral presentation or of the paper in written form. The student should request evaluation by a faculty member for any paper to be considered for this requirement.

6. By the end of the first quarter after admission to the Ph.D. program, the student will constitute a Ph.D. committee, in accord with Graduate School requirements. As part of this process, the student will work out with the committee members (by email or in person) a strategy for degree completion. The student's Ph.D. committee will administer a General Examination, which involves 2 parts:
 - a. Two general papers in different areas. At least one of the papers must be in some area of grammatical theory and one must be in the projected dissertation area. (One of the two papers, of course, can fulfill both the grammatical theory and the dissertation area requirements). At least one of the student's Ph.D. committee members must have expertise in each of the chosen areas.
 - b. An oral examination, in which the candidate is questioned on the two papers. The oral examination may not be scheduled until the committee has read the two papers and approved them as passing. The oral examination must be completed within the equivalent of 12 full-time quarters (excluding summer) after entrance into the M.A. program.
7. Within six months of the oral examination, the student will present a formal dissertation proposal to the subset of Ph.D. committee members who constitute the Reading Committee along with a proposed calendar for completion of the dissertation.
8. A Final Exam on the dissertation attended by the candidate's Supervisory Committee and open to others interested.

Course Descriptions

See page 376.

Mathematics

C138 Padelford

Mathematics is both a science and an art. Like any great art, mathematics has an intrinsic beauty and coherence that has attracted practitioners for centuries. Yet, unlike other arts, mathematics is a surprisingly effective tool for describing the natural world. Indeed, mathematics has come to serve as the foundation of modern science, through its language and results. Some mathematical results were initially developed in order to solve internally generated mathematical problems and only later found application in other disciplines; other mathematical results were inspired by the needs of these other disciplines. The two facets of mathematics -- tool of science and subject of inquiry for its own sake -- have come to be interwoven into a complex fabric.

Undergraduate Program

Adviser
C36 Padelford, Box 354350
206-543-6830
advising@math.washington.edu

The Department of Mathematics offers the following programs of study:

- * The Bachelor of Arts degree with a major in mathematics - standard program
- * The Bachelor of Arts degree with a major in mathematics - philosophy option
- * The Bachelor of Arts degree with a major in mathematics with an option designed specifically for students who plan to pursue secondary teaching careers.
- * The Bachelor of Science degree with a major in mathematics - standard program
- * The Bachelor of Science degree with a major in mathematics - comprehensive option
- * The Bachelor of Science degree with a major in applied and computational mathematical sciences (ACMS). The Department of Mathematics cooperates with the departments of Applied Mathematics, Computer Science and Engineering, and Statistics in offering this major. (See ACMS for requirements.)
- * A minor in mathematics

Bachelor of Arts

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136.

Department Admission Requirements

Admission Requirements for Standard Option and Philosophy Option:

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), and at least one 200- or 300-level mathematics course required for the degree, preferably MATH 307.
2. A minimum grade of 2.0 in each course to be offered as part of the major; a minimum overall GPA of 2.00 for all mathematics courses.
3. Application to the program should be made at the end of the sophomore year. Transfer students must be enrolled at the UW before applying to the major.

Admission Requirements for Teacher Preparation Option:

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136) and at least one 200- or 300-level mathematics course required for the degree, preferably MATH 307.
2. A minimum grade of 2.5 in each course to be offered as part of the major; a minimum overall GPA of 2.50 for all mathematics courses.
3. Application to the program should be made at the end of the sophomore year. Transfer students must be enrolled at the UW before applying to the major.

Major Requirements

Standard Option (50 credits):

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 307; MATH 205, MATH 308, or MATH 318; MATH 324; and 26 additional credits at the 300 level and above.
2. A minimum grade of 2.0 must be obtained in all mathematics courses presented to satisfy the mathematics requirement and in required related courses. A GPA of 2.00 or higher must be obtained in all mathematics courses taken at the UW.
3. At least 18 credits of graded mathematics courses numbered 300 or higher must be taken in residence at the UW.

Philosophy Option (58 credits):

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 300, MATH 318, MATH 327, MATH 328; five additional mathematics courses at the 300 or 400 level, including at least one two-quarter sequence at the 400 level other than MATH 407, MATH 408, MATH 409, or MATH 421, MATH 422.
2. PHIL 120 or an upper-level course in logic; PHIL 100, PHIL 160, or PHIL 240; one philosophy course at the 300 level; one philosophy course at the 400 level.

Teacher Preparation Option (58 credits):

1. MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136); MATH 307; MATH 308, MATH 318, or MATH 205; MATH 394, MATH 411, MATH 412, MATH 444, MATH 445, MATH 487; either MATH 354 and MATH 355 or PHYS 407, PHYS 408, PHYS 409; either STAT 311, MATH/STAT 390, or Q SCI 381; 6 credits of electives at the 300-level in MATH, AMATH, or STAT.
2. A minimum grade of 2.5 in all courses presented to satisfy the program requirements, with the exception of PHYS 407, PHYS 408, and PHYS 409, which require a grade of 3.0. At least 18 credits of graded mathematics courses numbered 300 or higher taken in residence at the UW.

Bachelor of Science

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, or MATH 134, MATH 135, MATH 136.

Department Admission Requirements

A minimum grade of 2.0 in the following courses: MATH 124, MATH 125, MATH 126; any 300-level mathematics course. (See departmental adviser for information on Advanced Placement exemption.) A student can substitute the following courses, with a minimum grade of 2.0: MATH 134, MATH 135, MATH 136.

Major Requirements

Standard Option (66 credits):

1. A minimum grade of 2.0 in all courses applied toward the major.
2. A minimum GPA of 2.00 in all mathematics courses taken at the University. At least 18 credits from courses at the 300-level or higher, taken in residence at the University.
3. *Elementary Mathematics Core (21 credits):* MATH 124, MATH 125, MATH 126 (5, 5, 5); MATH 300 (3); MATH 324 (3). (MATH 134, MATH 135, MATH 136 may be substituted for MATH 124, MATH 125, MATH 126, MATH 307, and MATH 318.)
4. *Intermediate Mathematics Core (12 credits):* MATH 308 (3) or MATH 318 (3); MATH 326, MATH 327, MATH 328 (3, 3, 3). (MATH 334, MATH 335, MATH 336 may be substituted for MATH 300, MATH 309, MATH 324, MATH 326, MATH 327, and MATH 328.)
5. *Advanced Mathematics Core (21 credits):* At least seven courses from the following, from at least three different areas, and including at least two two-quarter sequences:
 - * *Algebra:* MATH 402, MATH 403, MATH 404 (3, 3, 3).
 - * *Analysis:* MATH 424, MATH 425, MATH 426 (3, 3, 3).
 - * *Geometry:* MATH 441, MATH 442, MATH 443 (3, 3, 3).
 - * *Other Analysis:* MATH 307, MATH 309 (3, 3); MATH 427, MATH 428, MATH 429 (3, 3, 3); MATH 435, MATH 436 (3, 3); MATH 438, MATH 439 (3, 3).
 - * *Probability:* MATH 394, MATH 395, MATH 396 (3, 3, 3); MATH 491, MATH 492 (3, 3).
 - * *Other Mathematics:* MATH 381 (3); MATH 407, MATH 408, MATH 409 (3, 3, 3); MATH 461, MATH 462 (3, 3); MATH 464, MATH 465, MATH 466 (3, 3, 3).
6. *Electives (12 credits):* Four additional mathematics courses, including a two-quarter sequence at the 300- or 400-level (teacher-preparation courses not allowed). Two of the four courses may be chosen from an approved list of courses offered by the departments of Applied Mathematics, Statistics, and Computer Science, or from certain other departments. The list is updated each year by the Undergraduate Program Coordinator; students may petition for approval of courses not on the list. Courses from the additional mathematics core sequences not used to fulfill core requirements can be used to fulfill the elective requirement.

Comprehensive Option (69 credits):

Emphasizes the fundamental subjects of algebra, analysis, and geometry and is designed to provide a deep understanding of these basic areas of modern mathematics. It lays a good foundation for more advanced study. For this option, the grade, elementary core, and elective requirements remain unchanged, with the same substitutions permitted from the accelerated/honors sequences. (Items 1, 2, 3, and 6 shown for the standard option, above.) MATH 318 is required in the intermediate core and the advanced mathematics core becomes the following:

5. *Advanced Mathematics Core, Comprehensive Option (24 credits):* At least eight courses from the following, including at least two in each of the first three areas. If only six courses are chosen from the first three areas, then the two courses chosen from the fourth area must form a two-quarter sequence:
 - * *Algebra:* MATH 402, 403, 404 (3, 3, 3).
 - * *Analysis:* MATH 424, 425, 426 (3, 3, 3).
 - * *Geometry:* MATH 441, 442, 443 (3, 3, 3).
 - * *Other Analysis:* MATH 307, 309 (3, 3); 427, 428, 429 (3, 3, 3); 435, 436 (3, 3); 438, 439 (3, 3).

Minor

Minor Requirements (33 credits):

1. *Core (21-25 credits):* MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308 (or MATH 318) (21 credits) or MATH 134, MATH 135, MATH 136 (25 credits, including 10 advanced-placement credits)
2. *Electives (8-12 credits):* mathematics courses numbered 300 or higher.
3. At least 9 credits of courses numbered 300 or higher taken in residence at the UW. Minimum grade of 2.0 required for each course offered as part of the minor.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The study of mathematics emphasizes exposure to the core foundational areas of analysis, modern algebra, and geometry. A mathematician's skill set includes the technical

tools specific to each area as well as the development of critical thinking skills necessary for logical reasoning. Graduates have pursued careers in teaching, finance, science, engineering, and professional fields such as law and medicine.

- * *Instructional and Research Facilities:* Mathematical Research Library and Math Sciences Computing Center
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* When available, internship opportunities are passed on to students.
- * *Department Scholarships:* None offered.
- * *Student Organizations/Associations:* MAA Student Chapter, Actuarial Club.

Graduate Program

Graduate Program Coordinator
C36 Padelford, Box 354350
206-543-6830
grads@math.washington.edu

The degrees of Master of Arts, Master of Science, and Doctor of Philosophy are offered. Opportunities are available within the department for study of abstract and applied mathematics for each of these degree programs. The Master of Arts degree is appropriate for students who need a broad background in advanced mathematics and who expect to continue working with mathematics of approximately the same level in their careers. The Master of Science degree is appropriate for students who expect to be working with more specialized mathematics of increasing order of complexity in their careers. The Doctor of Philosophy degree is the highest professional degree in mathematics. It is appropriate for students who plan on a career of research and/or teaching of mathematics at the highest levels.

Of the master's degrees, the M.S. non-thesis program has the most demanding course requirements and most closely matches the early stages of the Ph.D. program. Most students who enroll in the department begin their studies with the Ph.D. or M.S. non-thesis program in mind. The M.S. programs with options in numerical analysis or optimization provide more focused training in these directions, which can be useful for students seeking employment in certain industries; however, students intending to do research in these areas would normally follow the requirements of the Ph.D. program. Note that the department does not offer a master's degree in mathematics education.

Master of Arts

Admission Requirements

Bachelor of Arts degree with major in mathematics or equivalent background (minimum of 45 quarter credits or 30 semester credits of mathematics beyond college algebra).

Degree Requirements

Non-Thesis: A minimum of twelve approved one-quarter courses at the 400 or 500 level, including two courses in each of algebra, analysis, and one other field. The course total must include six courses chosen from the designated core graduate courses or, with prior approval of the graduate program coordinator, from other 500-level sequences. The six courses at the 500 level should be distributed over no more than three sequences.

Written examination in an area agreed upon by the student and the chair of the examining committee. Oral examination may be substituted with prior approval of the graduate program coordinator.

Master of Science

Admission Requirement

Bachelor of Science degree with major in mathematics, Bachelor of Arts degree with strong major in mathematics or equivalent background. In particular, at least one senior-level course in abstract algebra or real analysis is expected.

Degree Requirements

Thesis: A total of twelve numerically graded one-quarter courses from MATH 402, MATH 403, MATH 404; MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 441, MATH 442, MATH 443; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586; plus 9 thesis credits (700). Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include at least two quarters from each of two designated core graduate courses and one other 500-level sequence. Transfer credits are not accepted at the 400 level; other transfer credits and substitutions are at the discretion of the graduate program coordinator.

The thesis, which is defended in an oral examination, should demonstrate the ability to do independent research.

Non-Thesis: A total of fifteen numerically graded one-quarter courses from MATH 402, MATH 403, MATH 404; MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 441, MATH 442, MATH 443; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586. Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include at least two quarters from each of three designated core graduate courses, and in addition one three-quarter sequence of 500-level mathematics courses in an area of specialization approved by the graduate program coordinator and the chair of the student's examining committee.

Oral examination in the area of specialization on a topic agreed upon by the student and the chair of the examining committee, or the General Examination for the Ph.D. degree.

Numerical Analysis and Optimization Options, Non-thesis: A total of fifteen one-quarter courses, at least six of which are at the 500 level, chosen from MATH 424, MATH 425, MATH 426; MATH 427, MATH 428, MATH 429; MATH 438, MATH 439; MATH 441, MATH 442, MATH 443; MATH 461, MATH 462; MATH 491, MATH 492; any 500-level mathematics course; AMATH 507; AMATH 584, AMATH 585, AMATH 586. Other courses may be included in the total with prior approval of the graduate program coordinator. Courses to include four from AMATH 584-586 and MATH 594-596.

Oral examination in a special topic agreed upon by the student and the chair of the student's examining committee.

Doctor of Philosophy

Admission Requirements

Mathematical training equivalent to a bachelor's degree with strong major in mathematics, including rigorous course work in real analysis and abstract algebra.

Degree Requirements

90 credits minimum, as follows:

- * *Courses:* six three-quarter sequences numbered 500 or above or equivalent, including three sequences from the department's list of core graduate courses. The list of core courses includes MATH 504, MATH 505, MATH 506 (5,5,5); MATH 524, MATH 525, MATH 526 (5,5,5); MATH 534, MATH 535, MATH 536 (5,5,5); MATH 544, MATH 545, MATH 546 (5,5,5); MATH 554, MATH 555, MATH 556 (5,5,5). At least two sequences from this list must be satisfactorily completed during year one, and the third must be satisfactorily completed by the end of year two. A student may substitute a passing performance in a preliminary exam for satisfactory completion of the corresponding designated core course.
- * *Preliminary Examinations:* Pass three preliminary exams by September of the beginning of the third year.
- * *Foreign Language/Computer Requirement:* Pass either two foreign language exams or one foreign language exam and a computer programming exam. A PhD student is expected to pass one language or computer exam by the end of summer quarter after the second year, and the second by the end of summer quarter after the third year.
- * *General Examination:* An oral examination on a special area of intended research, given by a committee after the student has passed the preliminary exams and the language exams. This exam can be given only after two years of graduate study. Normally, it should be taken by the middle of the student's fourth year. Thesis: An original contribution to knowledge. 27 credits of MATH 800 required.
- * *Final Examination:* An oral exam given by a committee headed by the thesis supervisor.

Financial Support

Most graduate students in mathematics are supported by fellowships, research assistantships, and teaching assistantships. The workload of teaching assistants allows ample time for graduate courses and thesis work.

Course Descriptions

See page 380.

Microbiology

G315 Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

Undergraduate Program

Adviser

G315 Health Sciences, Box 357242

206-543-2572

advmicro@u.washington.edu

The Department of Microbiology offers the following programs of study:

- * The Bachelor of Science degree with a major in microbiology
- * A minor in microbiology

Bachelor of Science

Suggested First- and Second-Year Courses: PHYS 114, PHYS 115, PHYS 116, or PHYS 121, PHYS 122, PHYS 123; one of the following: MATH 112, MATH 124, MATH 144, Q SCI 381, or STAT 311.

MICROM 410, the first microbiology course for majors, is taken after completion of BIOL 200 and organic chemistry (CHEM 223 or CHEM 237). To graduate in four years, a student must complete introductory biology and organic chemistry before autumn quarter of the junior year.

MICROM 101, MICROM 301, and MICROM 302, offered to non-majors, serve as introductory courses, but cannot be used to fulfill graduation requirements for a major in microbiology. MICROM 301 is a prerequisite for students applying to nursing, physical therapy, or dental school.

Department Admission Requirements

1. A minimum of 75 credits applicable to graduation, with a minimum cumulative GPA of 2.25 in prerequisite chemistry and biology courses.
2. Completion of the following prerequisite courses: BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224, or CHEM 237, CHEM 238, CHEM 239.

Major Requirements

Minimum 94 credits (including microbiology courses) in the biological, physical, and mathematical sciences, as follows:

1. BIOL 180, BIOL 200, BIOL 220, or equivalent (15 credits/one year)
2. *Inorganic:* CHEM 142, CHEM 152, CHEM 162 (16 credits) (or CHEM 145, CHEM 155); *Organic:* CHEM 223, CHEM 224 (8 credits) (or CHEM 237, CHEM 238, CHEM 239; or CHEM 335, CHEM 336, CHEM 337)
3. MICROM 402, MICROM 410, MICROM 411, MICROM 412, MICROM 431, MICROM 441, MICROM 442, MICROM 443, MICROM 496, and MICROM 445 or MICROM 450 (31 or 32 credits)
4. Approved microbiology electives (5 credits, not to include MICROM 101, MICROM 301, MICROM 302)
5. PHYS 114, PHYS 115 (8 credits) (or PHYS 121, PHYS 122) (PHYS 116 or PHYS 123 recommended)
6. Either MATH 112, MATH 124, MATH 127, MATH 144, Q SCI 381, or STAT 311 (5 credits)
7. BIOC 405, BIOC 406 (6 credits) (or BIOC 440, BIOC 441, BIOC 442)

8. For all required and elective microbiology courses used toward graduation, a minimum 2.25 cumulative GPA and a minimum grade of 1.8 in each course.
9. Transfer students must complete at least 20 of the required and elective microbiology credits at the UW.

Minor

Minor Requirements: 30 credits as follows:

1. 15 credits in biology and chemistry (BIOL 200 or BIOL 161-BIOL 162 or equivalent; CHEM 237 or CHEM 220, CHEM 221, or equivalent)
2. 15 credits in 400-level, graded microbiology courses, including at least one lab course (MICROM 402 or MICROM 431 or MICROM 443; MICROM 302 also acceptable), and both MICROM 410 and MICROM 496.
3. Minimum cumulative 2.00 GPA for all courses used toward the minor.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The department's objective is to provide a major with the best instruction possible in broad areas of microbiology so students qualify for a wide variety of positions with a terminal B.S. degree or qualify to pursue advanced degrees in graduate or professional schools.

Microbiology offers students an excellent education in the biology of microorganisms, namely bacteria, fungi, protozoa, and viruses. Through learning about the biology of these microorganisms and viruses, students more fully understand the pivotal position they occupy in establishing and maintaining our biosphere, their effects on human, animal, and plant life, and how the biological properties of certain microbes are exploited for certain purposes. Microorganisms are important in drinking water, wastewater and sewage treatment, production and spoilage of foods, production of antibiotics, bioremediation of toxic compounds, and genetic engineering of organisms having unique characteristics. Students gain insight into strategies used by microorganisms and viruses to cause disease and the mechanisms used by their host to defend themselves.

Graduates have found research positions in biotechnology and pharmaceutical companies, as well as in state and government positions hiring microbiologists. Students interested in a health profession or graduate program benefit from this program.

- * *Instructional and Research Facilities:* Microbiology courses are taught using state-of-the-art facilities in the teaching wing of the Health Sciences building. Research labs are located in the Health Sciences, Fred Hutchinson Cancer Research Center, NW Regional Primate Research Center, and UW Rosen building.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* MICROM 499, undergraduate laboratory research, is offered for credit. See adviser for details.
- * *Department Scholarships:* The department offers four awards each year. More information is available at the department's Web site.
- * *Student Organizations/Associations:* The Microphiles Club is open to all students. The club sponsors field trips to local biotech companies, speakers on topic such as research and career opportunities, graduate school, and peer teaching.

Graduate Program

For a description of the graduate program in microbiology, see the School of Medicine section.

Course Descriptions

See page 564.

Music

102 Music

The foremost goal of the School of Music is the discovery, preservation, and transmission of the practice and knowledge of music, as well as the role of music in culture and history. The school expands the frontiers of artistic enterprise and cultural knowledge through research, scholarship, and creative production, in its publications, performances, and teaching.

Through its instructional offerings, the School of Music provides opportunities for all students of the University of Washington to explore the role of music in the cultural nature of the world, past, present, and future. The school teaches students to think creatively and critically. The faculty provides professional training to musical performers as well as to academic scholars. The ultimate goal of the school is to instill the standards and ideals of excellence in both the artistic and scholarly endeavor of its students.

The School of Music is committed to furthering and transmitting technological advances through its research and instruction.

Because of its prominence in public performance, the School of Music has a unique external visibility, playing a vital role in the cultural life of the University, region, and beyond through the performance, creation, and study of music and culture. To that end, the school maintains strong links with professional arts organizations regionally as well as nationally.

Undergraduate Program

Adviser
116 Music, Box 353450
206-543-1239
musicadv@u.washington.edu

The School of Music offers the following programs of study:

- * The Bachelor of Arts degree with a major in music (music theory-history track; vocal track; instrumental track)
- * The Bachelor of Music degree with a major in composition, piano, string instruments, voice, organ, orchestral instruments, guitar, jazz studies, music education, and music history
- * The Bachelor of Arts degree with a major in general studies (ethnomusicology) (See general studies adviser in 171 Mary Gates Hall for requirements.)
- * A minor in music

Information Applicable to All Music Majors

Department Admission Requirements

All students must participate in an entrance audition and qualify at the MUSAP 320 level or better in their principal performance areas to be admitted as music majors and to receive private instruction. Entrance auditions are held in late September, late January, and as needed throughout the year. (See department web site for more information.) Major status in performance areas is accorded when, after admission to the College of Arts and Sciences is acknowledged and the required School of Music audition is successfully completed, the student commences applied-music study in a performance medium (e.g., voice) with an approved faculty member of the School of Music. In music history, music education, and composition, additional entrance requirements apply.

All music programs require instruction on an instrument. Auditions into freshman-level applied-music instruction (private lessons) are based on the assumption that a student's background includes four to eight years of private study on an instrument. Completion of a further two years of college-level private instruction does not automatically guarantee entry at the junior level of private instruction; placement is determined by an audition.

Most degree programs in the School of Music require one to two years of basic piano, to be completed during the course of study at the University.

Pre-Core Preparation

In preparation for beginning the music core course work, all students must be evaluated by placement test to determine their levels in music theory and music history. Students who have minimal background in these areas may

be required to take MUSIC 113/MUSIC 119 and MUSIC 120 before beginning the music core.

Transfer students who have had at least two quarters of music theory or music history are evaluated by a faculty member the quarter they are admitted to their program.

Music Core Requirements

The music core (36 credits), required in each of the undergraduate program tracks, is as follows: MUSIC 201/MUSIC 204, MUSIC 202/MUSIC 205, MUSIC 203/MUSIC 206; MUSIC 301/MUSIC 304, MUSIC 302/MUSIC 305, MUSIC 303/MUSIC 306; MUHST 210, MUHST 211, MUHST 212; at least 3 credits from among MUSIC 250, MUSIC 316, MUSIC 317, or any 400-level ethnomusicology course.

Grade Requirements

Undergraduate music majors are required to earn a minimum grade of 2.0 in each course (core and elective) counted toward music major requirements. An overall minimum GPA in music course work required for graduation is 2.50.

Bachelor of Arts

General Requirements

A minimum of 180 credits, of which 90 must be taken in departments other than the School of Music. Piano proficiency at MUSAP 135 level. All College of Arts and Sciences graduation requirements must be met. Cumulative GPA of 2.50 for all music courses and a minimum grade of 2.0 for each music course counted toward the major.

Major Requirements

Music Theory-History Track (63 credits): Music core, plus 12 credits of approved upper-level MUSIC or MUHST electives, 10 credits of MUSAP vocal or instrumental private applied instruction, 5 credits of MUSEN (ensembles).

Instrumental Track (69 credits): Music core, plus 6 credits of approved upper-level MUSIC or MUHST electives, 18 credits of MUSAP instrumental private applied instruction, and 9 credits in ensembles.

Vocal Track (75 credits): Music core, plus 6 credits of approved upper-level MUSIC or MUHST electives, 18 credits of MUSAP vocal private applied instruction, 6 credits of vocal diction, and 9 credits in ensembles. The vocal track also requires proficiency through the third quarter college level in two languages from French, German, and Italian.

Bachelor of Music

Admission Requirements

All students must participate in an entrance audition as described above. Students admitted into the BA program have the option to jury into the BM program at the end of the freshman and sophomore years. The Composition and Music Education programs have additional application requirements as described in the listings below.

General Requirements

A minimum of 180 credits, of which at least 60 must be taken in departments other than the School of Music. All College of Arts and Sciences degree requirements must be met (including Language Skills and Reasoning and Writing in Context), except that students need take only 60 credits in Areas of Knowledge, to include at least 20 credits each in two of the following three areas: Visual, Literary, & Performing Arts; Individuals & Societies; and the Natural World. Piano proficiency at MUSAP 235 level, a minimum grade of 2.0 in each music course counted toward the major, and a GPA of 2.50 in music courses is required for graduation.

Major Requirements (and Additional Admission Requirements, as noted)

Composition (114-120 credits)

Additional Admission Requirements: To be considered for admission to the Composition major, students must complete MUSIC 302 and MUSIC 305; MUHST 212; and MUSIC 216, MUSIC 217, MUSIC 218. Prospective

students must also submit a portfolio of recent compositions. Please see the adviser for more information on the application process.

Major Requirements: Music core (36 credits) plus MUSIC 216, MUSIC 217, MUSIC 218; PHYS 207; 18 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 380, MUSIC 381, MUSIC 382; MUSIC 400 or MUSIC 401; MUSIC 471 or MUSIC 472; MUSIC 490; 18 credits of private instruction in composition (MUSIC 391/MUSIC 491); 12-18 credits of MUSAP applied instruction; 6 credits of MUSEN ensembles; and one 400-level course in ethnomusicology. See the Music undergraduate adviser for more specific information on these requirements.

Guitar (120 credits)

Music core (36 credits) plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487 or MUSIC 438; 36 credits of MUSAP applied instruction; 7 credits of electives; 2 credits of recitals; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 380, MUSIC 381, MUSIC 382; and 12 credits of MUSEN ensembles. See the Music undergraduate advisers for more specific information on these requirements.

Jazz Studies (120 credits)

Music core (36 credits) plus 9 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 319 or MUSIC 331; MUHST 425; MUSIC 336 and MUSIC 436; MUSIC 467, MUSIC 468, MUSIC 469; MUSIC 379, MUSIC 479; 6 credits of MUSIC 464; 10 credits of music electives; 30 credits of MUSAP applied instruction; 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Music Education (115-119 credits)

Additional Admission Requirements: To be considered for admission to the Music Education major, students must complete a separate Music Education audition and interview. Please see the adviser for more information on the application process.

Major Requirements: Music core (36 credits) plus MUSIC 300, MUSIC 350, MUSIC 351, MUSIC 352 (or MUSIC 380, MUSIC 381, MUSIC 382); MUSED 301; MUSED 304, MUSED 305, MUSED 306; MUSED 340; MUSED 403; MUSED 405 (or MUSEN 303); MUSED 440; MUSED 442 (or MUSED 443); MUSED 452; MUSED 465; 18 credits of MUSAP applied instruction; 6-7 credits of MUSEN ensembles; 12-14 credits of techniques courses; 3 credits of approved jazz coursework; EDC&I 494; and 3 credits of education electives. See the Music undergraduate adviser for more specific information on these requirements.

Orchestral Instruments (116 credits)

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSAP applied instruction; 18 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Organ (120 credits)

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSAP applied instruction; MUSIC 454; MUSIC 473 and MUSIC 474; MUSIC 458 and MUSIC 459; MUSIC 350, MUSIC 351, MUSIC 352; 1 credit of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Piano (120 credits)

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 487; 36 credits of MUSAP applied instruction; MUSIC 434, 435, 436; MUSIC 326, MUSIC 327, MUSIC 328; 7 credits of electives; 2 credits of recitals; and 12 credits of MUSEN ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Strings (117 credits)

Music core (36 credits) plus 15 credits of division-approved upper-level MUSIC or MUHST electives; 36 credits of MUSAP applied instruction; 6 credits of MUSIC 429; MUSIC 434, MUSIC 435, MUSIC 436; MUSIC 380; 3 credits of electives; 2 credits of recitals; and 12 credits of MUSEN

ensembles. See the Music undergraduate adviser for more specific information on these requirements.

Voice (119 credits)

Music core (36 credits) plus 12 credits of division-approved upper-level MUSIC or MUHST electives; MUSIC 307, MUSIC 308, MUSIC 309; MUSIC 326, MUSIC 327, MUSIC 328; MUSIC 434; MUSIC 460, MUSIC 461, and MUSIC 462; MUSIC 379 and MUSIC 479; 36 credits of MUSAP applied instruction; 10 credits of MUSEN ensembles; and 3 credits of music electives. Voice majors must be proficient through the third quarter college level in two languages from French, German, and Italian. See the Music undergraduate adviser for more specific information on these requirements.

Academic Options

Music History

Admission Requirements: In addition to the admission requirements for all music majors, shown above, formal application to the Music History division, to include verified completion of music core, 3.00 GPA in music core courses, 3.00 overall GPA, and a writing sample. Completion of minimum entrance requirements does not guarantee admission. The program of study and preparation of the senior thesis is developed in consultation with a Music History faculty adviser. Students who intend to pursue graduate studies are strongly advised to establish proficiency in German or French and to acquire some acquaintance with one or two additional foreign languages.

Major Requirements: 135 credits as follows: Music core (36 credits) plus 6 credits of 300-level MUHST electives; 36 credits of 400-level MUSIC or MUHST (minimum 12 courses); a 3-credit 400-level course in ethnomusicology; 3 credits of MUSIC 498; 18 credits of MUSAP applied instruction (3 years); 9 credits of MUSEN ensembles; and 24 credits of music electives.

Minor

Minor Requirements: A minimum of 25 credits of music courses (MUSIC, MUHST, MUSEN, MUSAP, or MUSED prefixes). Maximum 10 credits at the 100 level, minimum 15 credits at the 200 level or above including:

1. At least 4 credits from courses dealing with the elements of music (chosen from MUSIC 116, MUSIC 117, MUSIC 118, MUSIC 113/MUSIC 119, or MUSIC 120).
2. 5 credits from courses for nonmajors that focus on a particular music area (MUSIC 121, MUSIC 122, MUSIC 160, MUSIC 162, MUSIC 316, MUSIC 317, MUSIC 318, MUSIC 319, MUSIC 331).
3. Maximum 10 transfer credits (including maximum 5 transfer credits in performance lessons and ensembles) may count toward the minor.

Student Outcomes and Opportunities

* **Instructional and Research Facilities:** None.

* **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

* **Research, Internships, and Service Learning:** None.

* **Department Scholarships:** None.

* **Student Organizations/Associations:**

- o Music Student Association (MSA): A group of undergraduate and graduate students from various divisions of the School of Music, working to foster a stronger sense of professional community, serve the larger cultural community, and build practical tools for encouraging and promoting student musicians' endeavors. For more information, contact sonare@u.washington.edu.
- o Ethnomusicology Student Association: A student association which deals with the concerns of the ethnomusicology division, as well as meeting socially. For further information, contact the division at 206-543-0949 or 64 Music Building.
- o Music Educators National Conference (MENC): A local chapter of this national scholarly organization of music educators is directly involved in annual state and regional meetings and events. Contact Professor Patricia Campbell (pcamp@u.washington.edu) for further details.

Of Special Note: Continuation of Major Status

Performance studies should begin after audition and acceptance, and continue each subsequent quarter of registration until the minimum program requirements for applied-music lessons have been met. Applied-music study should continue as long as the student is registered and in residence until the final approved recital is given. In order to retain major standing, the student must make and demonstrate consistent and acceptable progress at the annual required jury. Concurrent enrollment or participation in at least one School of Music ensemble is required during each quarter in which a student receives "MUSAP" applied-music instruction, at the 300 level and above, except for MUSAP 389/589. Also, basic piano proficiency is required for all majors. Non-keyboard majors must enroll in the MUSAP 133/235 series until appropriate proficiency is attained. Any departure from the above requirements must have the recommendation of the appropriate divisional chair and the written consent of the Director of the School of Music.

Graduate Program

Graduate Program Coordinator
116 Music, Box 353450
206-543-2726
musicadv@u.washington.edu

Graduate programs in the School of Music take into consideration the dual nature of music's subject matter. First, it is one of the creative arts, requiring constant renewal through the efforts of composers, performers, and teachers. Second, it is a branch of the humanities, subject to scholarly study and interpretation of its theoretical concepts and historical development. Each degree focuses on one of these areas.

Master of Music or Doctor of Musical Arts

- * Choral Conducting
- * Composition
- * Instrumental Conducting
- * Opera Production
- * Performance piano, organ, harpsichord, voice, strings, brass, woodwinds, percussion, harp

Master of Arts or Doctor of Philosophy

- * Ethnomusicology
- * Music Education
- * Music History
- * Music Theory

Master of Arts

Admission Requirements

- * A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a Bachelor's degree in music or the equivalent experience and training in the field.
- * Minimum GPA of 3.00 or B average in the most recent two years of study.
- * Applicants are required to submit scores from the Graduate Record Exam (GRE) except if applying to a Master of Music or Doctor of Musical Arts degree program in any area besides composition, or if the applicant holds an earned doctorate from an accredited institution.

International Applicants

- * International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process.
- * International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores are 580 for the paper test and 237 for the computer test.

Degree Requirements

45 credits minimum, as follows:

- * All students must complete a minimum of 45 credits as specified for their particular degree program; of these credits, 18 credits must be numerically graded and 18 credits must be at the 500-level
- * Demonstrate proficiency in a foreign language as required by the degree program

- * Prepare a thesis and pass an oral thesis defense or pass an examination based on approximately 10 topics
- * Complete all work for the master's degree within six years. This includes applicable work transferred from other institutions (max. 6 credits transferable) and time spent on leave.

Master of Music

Admission Requirements

- * A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a Bachelor's degree in music or the equivalent experience and training in the field.
- * A minimum GPA of 3.00 or B average in the most recent two years of study.
- * Applicants are required to submit scores from the Graduate Record Exam (GRE) except if applying to a Master of Music or Doctor of Musical Arts degree program in any area besides composition, or if the applicant holds an earned doctorate from an accredited institution.

International Applicants

- * International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process.
- * International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores are 580 for the paper test and 237 for the computer test.

Entrance Auditions: Before acceptance into a performance-based School of Music graduate program, applicants need to pass an entrance audition in their major performance area.

Degree Requirements

All students in the performance degree programs (MM, DMA) are expected to enroll in music applied lessons (MUSAP courses at the 500-level) until all recital requirements are met. The School of Music requires that all students registered for music applied lessons must also be enrolled in an ensemble (MUSEN 5XX).

All students working toward a master's degree must meet the following requirements:

- * Complete a minimum of 45 credits as specified for their particular degree program; of these credits, 18 credits must be numerically graded and 18 credits must be at the 500-level
- * Demonstrate proficiency in a foreign language as required by the degree program
- * Prepare a thesis and pass an oral thesis defense or pass an examination based on approximately ten topics
- * Complete all work for the master's degree within six years. This includes applicable work transferred from other institutions (max. 6 credits transferable) and time spent on leave.

Doctor of Music Arts

Admission Requirements

- * A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a Bachelor's degree in music or the equivalent experience and training in the field.
- * A minimum GPA of 3.00 or B average in the most recent two years of study.
- * Applicants are required to submit scores from the Graduate Record Exam (GRE) except if applying to a Master of Music or Doctor of Musical Arts degree program in any area besides composition, or if the applicant holds an earned doctorate from an accredited institution.

International Applicants

- * International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process.
- * International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores are 580 for the paper test and 237 for the computer test.

Entrance Auditions: Before acceptance into a performance-based School of Music graduate program, applicants need to pass an entrance audition in their major performance area.

Degree Requirements

All students in the performance degree programs (MM, DMA) are expected to enroll in music applied lessons (MUSAP courses at the 500-level) until all recital requirements are met. The School of Music requires that all students registered for music applied lessons must also be enrolled in an ensemble (MUSEN 5XX).

Specific degree requirements are as follows:

- * A minimum of 90 credits of resident study with at least 60 registered credits from the UW
- * Demonstration of a reading knowledge of one or more foreign languages as required by the particular degree program
- * Complete performance requirements required for the specific degree
- * Pass the General Examination for admission to candidacy; may consist of written and oral examinations based on approximately twenty topics (depending on degree program)
- * Prepare a dissertation which is a significant contribution to knowledge in a specific field and which clearly indicates training and research
- * Pass a Final Examination devoted to the dissertation in the field with which it is concerned
- * Complete all work for the doctoral degree within ten years. Applicable work from the master's degree and work transferred from the other institutions must fall within the ten-year period, including time spent on leave and away from the program. Up to thirty credits from an approved master's degree may be counted toward the 90 credits required for the degree. (Master's degree credits are applied toward the general elective requirements of the degree plan.)

Doctor of Philosophy

Admission Requirements

- * A baccalaureate degree from an accredited U.S. institution or its equivalent from a foreign institution. Performance programs expect that applicants have a Bachelor's degree in music or the equivalent experience and training in the field.
- * A minimum GPA of 3.00 or B average in the most recent two years of study.
- * Applicants are required to submit scores from the Graduate Record Exam (GRE) except if applying to a Master of Music or Doctor of Musical Arts degree program in any area besides composition, or if the applicant holds an earned doctorate from an accredited institution.

International Applicants

- * International applicants must consult the online Preliminary Evaluation Process before proceeding with the application process.
- * International applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOEFL). Scores must be less than two years old. Minimum scores are 580 for the paper test and 237 for the computer test.

Degree Requirements

- * Present a minimum of 90 credits of resident study with at least 60 registered credits from the UW
- * Demonstrate a reading knowledge of one or more foreign languages as required by the particular degree program
- * Complete performance requirements required for the specific degree
- * Pass the General Examination for admission to candidacy; may consist of written and oral examinations based on approximately twenty topics (depending on degree program) Prepare a dissertation which is a significant contribution to knowledge in a specific field and which clearly indicates training and research
- * Pass a Final Examination devoted to the dissertation in the field with which it is concerned
- * Complete all work for the doctoral degree within ten years. Applicable work from the master's degree and work transferred from the other institutions must fall within the ten-year period, including time spent on leave and away from the program. Up to thirty credits from an approved master's degree may be counted toward the 90 credits required for the degree. (Master's degree credits are applied toward the general elective requirements of the degree plan.)

Financial Aid

A limited number of teaching and staff assistantships (including accompanying) are available. Competitive auditions for performance scholarships for new and returning students are held each year. See the School's Web site (above) for more information about applications and audition dates. Research Facilities

The Music Building contains the music library, an electronic composition laboratory, a listening center, and the ethnomusicology archives, as well as the studio, practice, and classroom facilities of a modern music department.

Ensembles available for student participation include University Symphony Orchestra, University Chorale, Opera Chorus, Contemporary Group, and Baroque Ensemble, as well as non-Western ensembles with visiting artists from around the globe.

Course Descriptions

See page 385.

Near Eastern Languages and Civilization

229 Denny

Near Eastern languages and civilization focuses on the languages and civilizations of the Near East with an emphasis on the ancient and medieval roots of these civilizations as well as more recent cultural developments. Each language offered represents a major literary tradition. Arabic, Persian, Turkish, and Central Asian Turkic are the languages of the most significant literary manifestations of Islamic civilization. Hebrew and Aramaic are the languages of the Bible and are central to Judaism and Jewish culture. Egyptian languages (Coptic, Hieroglyphic) and other Mesopotamian and Mediterranean languages (Akkadian, Ugaritic, Phoenician) are important to the ancient and Christian cultures of the Near East. These languages are taught in conjunction with courses on the social, cultural, and religious history of the Near East, providing students with a broad understanding and solid foundation for more advanced studies or professional career development.

Undergraduate Program

Adviser
244 Denny, Box 353120
206-685-3743
nelcua@u.washington.edu

The department offers the following programs of study:

- * The Bachelor of Arts degree with a major in Near Eastern languages and civilization with options in Near Eastern languages and civilization, Near Eastern culture and civilization, comparative Islamic studies, and Biblical and ancient studies
- * A minor in Near Eastern languages and civilization

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses in any discipline that deals with the Near East, e.g., history, political science, economics. Courses in writing, literature, French, German, and Russian are also recommended.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Near Eastern Studies -- Languages and Civilization

69 credits as follows:

1. Two years of one Near Eastern language, or its equivalent as evidenced by examination
2. At least 9 credits in advanced literature or text courses in that language

3. NEAR E 210
4. One of the following: NEAR E 211, NEAR E 240, or RELIG 210
5. An approved program of 20 further credits in courses offered by the department or courses on the Near East offered by other departments, or both

Near Eastern Studies -- Culture and Civilization

73 credits as follows:

1. Two years of one Near Eastern language or its equivalent as evidenced by examination
2. NEAR E 210 or (with approval of adviser) NEAR E 220
3. One of the following: NEAR E 211, NEAR E 240, or RELIG 210
4. An approved program of 20 further credits in Near Eastern courses including at least one course from each of the following areas: Near Eastern civilization, Near Eastern religion, Near Eastern literature in translation
5. 8 credits in non-language, upper-division courses related to the Near East in the department or in other departments
6. A senior essay on a topic of Near Eastern civilization (5 credits).

Near Eastern Studies -- Comparative Islamic Studies

70 credits as follows:

1. Two years of one of the following languages or its equivalent as evidenced by examination: Arabic, Persian, Turkish, Uzbek, Kazakh, or other appropriate languages with approval of adviser
2. NEAR E 210
3. NEAR E 212 or 240
4. An approved program of 10 credits in courses in Islamic religious traditions and texts, and 15 credits in history, society and culture of Islam
5. A senior essay on a topic in comparative Islamic studies (5 credits).

Near Eastern Studies -- Biblical and Ancient

73 credits as follows:

1. Two years of Biblical Hebrew or its equivalent as evidenced by examination (alternatively, a student may satisfy this language requirement by combining a minimum of four quarters of Biblical Hebrew with two quarters of other ancient Near Eastern languages, including Aramaic, hieroglyphic Egyptian, Coptic, Akkadian, second-year Greek, or other appropriate languages as approved by adviser)
2. NEAR E 220 and NEAR E 240
3. An approved program of 20 credits in courses in ancient Near Eastern history, society and culture, and ancient Near Eastern literature in translation
4. 8 credits in non-language, upper-division Near Eastern courses related to the ancient Near East
5. A senior essay on a topic in biblical and ancient Near Eastern studies (5 credits).

Minor

Minor Requirements: 25 credits as follows:

1. NEAR E 210 or NEAR E 220
2. One course from NEAR E 211, NEAR E 240, RELIG 210
3. Additional credits from Near Eastern civilization or language courses (may not include language courses at the beginning or intermediate level).

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The NELC undergraduate degree offers a liberal arts education with a particular focus on the study of cultures and languages of the Near East and Central Asia. Educational outcomes from this degree serve a broad spectrum of undergraduates, ranging from those intending to begin the acquisition of specific linguistic and cultural proficiencies for the purpose of pursuing some career, academic or otherwise, related to these regions, to students for whom the Near East and/or Central Asia are regions with histories and cultures that are of special intellectual or personal interest. Students often combine Near Eastern Studies as a double major with some other degree program that may be in a quite different discipline. For these students the NELC undergraduate major offers the important opportunity, as a core element in a broader liberal arts education, for expanding their cultural vision and understanding in ways made possible only through

serious study of a language and literature other than one's own. Graduates from the B.A. degree have followed a wide range of post-baccalaureate paths, including further graduate study in the humanities or social sciences, professional degree programs in law or medicine, and employment with government or non-governmental organizations.

- * *Instructional and Research Facilities:* The department draws on collections of books, serials, and other resources in the UW libraries that are unusually rich in the quantity and quality of items relating to Near Eastern and Central Asian languages and cultures. Students in the department's language classes make use of the University's well-equipped Language Learning Center.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* None offered
- * *Department Scholarships:* See departmental website for most current information.
- * *Student Organizations/Associations:* There are no formal student organizations in the department, but the department frequently sponsors educational and cultural events organized by students and faculty involved in interest groups such as the Central Asian Circle or the Persian Circle.

Graduate Program

Graduate Program Coordinator
M29A Denny, Box 353120
206-685-3800
neareast@u.washington.edu

Master of Arts

The Department of Near Eastern Languages and Civilization offers a graduate program of studies leading to the Master of Arts degree. The program is designed to provide students with advanced training in at least one Near Eastern language and in a specific field of specialization. Students may concentrate in Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic and may choose as their field of specialization a civilization or literature related to their language of concentration. The program is intended not only for those students who wish to continue their studies at the doctoral level but also for students who wish to pursue careers in government or business.

Admission Requirements

- * Statement of purpose
- * Sample of written academic work
- * Three letters of recommendation, of which at least two must attest to scholarly ability
- * Official transcripts from all collegiate institutions attended
- * Although knowledge of a Near Eastern language is not a prerequisite for admission, applicants are generally expected to have had the equivalent of two years' study of the language in which they plan to concentrate.
- * A bachelor's degree from an accredited institution
- * A minimum GPA of 3.00 or B for last 90 quarter (60 semester) credits
- * GRE scores
- * TOEFL scores for International Students

Degree Requirements

36 credits, as follows:

- * Reading knowledge of French or German; or, with the prior approval of the student's M.A. Committee, any other language pertinent to the research in the student's field of study. Normally, to satisfy this requirement, the student must pass a reading exam before beginning the second year of study towards the M.A.
- * A seminar paper representing the student's best work
- * Coursework determined in consultation with adviser to prepare for written examinations.
- * A written examination consisting of four parts: (1) general culture of the Near East, (2) student's field of specialization, (3) student's language of concentration, (4) second Near Eastern language related to the language of concentration.

Doctor of Philosophy

Some of the department faculty are part of an interdisciplinary faculty group which offers doctoral study in Near and Middle Eastern Studies. The program is located administratively within the Graduate School. For a description of the program, see the Interdisciplinary Graduate Degree Programs section of this catalog.

Summer Programs

The department offers Summer Intensive Language programs in Arabic, Hebrew, and Central Asian languages (Uzbek, Kazakh, Tajik, and others). Research Facilities

The University of Washington Libraries holds an extensive collection of books and materials in the languages of the Near East, the Turkic regions of Central Asia, and in European languages on Near Eastern and Central Asian Turkic subjects. Candidates for the master's degree as well as doctoral students will find in the collection adequate resources for their research. The library participated in the Library of Congress Middle East Cooperative program for the acquisition of Arabic serials, and the Library of Congress Cooperative program for Pakistan for the purchase of Persian books and serials. The library staff includes Near East and Central Asia specialists responsible for acquiring and cataloging the collection. The library maintains book exchanges with the Central Asian republics, some of these beginning as early as 1961. They are handled through the Near East and Slavic Sections of the University's Suzzallo Library. Among its staff are an exchange librarian and a specialist trained in Central Asian Turkic languages. A book exchange with Xinjiang is administered through the East Asia Library.

Financial Aid

A limited number of teaching assistantships are available for graduate students in the department who are fluent in speaking and writing a Near Eastern language. A limited number of graduate fellowships are also available.

Exchange Agreements

The department participates actively in exchange programs involving institutions abroad, sending students for language and cultural study and research to a variety of locations, and training many students from institutions overseas. Students take advantage of existing formal UW exchange agreements with several universities in North Africa and the Middle East, such as American University in Cairo; Al-Akhawayn University in Ifrane, Morocco; Yarmouk University and Mu'tah University in Jordan; American University in Beirut; Hebrew University in Jerusalem; and Bogazici University in Istanbul. There have also been departmental-level exchange agreements with Xinjiang University in Urumchi, China (for Uighur, Kazakh, Kirghiz), or institutions in Central Asia such as Tashkent State University, the Humanities University of Bishkek, Kyrgyzstan, or Kyrgyz State National University, Bishkek. NELC students also study at other institutions in which there are not currently formal exchanges, such as the University of Damascus (for the study of Arabic and related subjects).

Course Descriptions

See page 395.

Neurobiology

318 Hitchcock

Neurobiology offers students an intense introduction to the study of nervous systems. Faculty in both the College of Arts and Sciences and the School of Medicine teach courses in the major. Students study the cellular and molecular properties of single nerve cells and the connections among them and learn how these properties determine animal behavior and human disease.

Undergraduate Program

Adviser
318 Hitchcock, Box 355320
206-616-3982

The Neurobiology Program offers the following program of study:

* The Bachelor of Science degree with a major in neurobiology

Bachelor of Science

Department Admission Requirements

1. BIOL 180, BIOL 200, BIOL 220, with minimum 2.0 grade in each
2. Completion of most supporting course work in physics, math, and chemistry recommended (see specific course lists, below), with minimum 2.50 GPA in any such work completed at time of application
3. Admission is competitive; meeting minimum standards guarantees consideration but not acceptance. Early application is encouraged and may increase chances for acceptance. Since the program uses rolling admission, there is no specific deadline for applying. See adviser for details about applying.

Major Requirements

Minimum 86 credits, as follows:

1. *Supporting course work (minimum 48 credits):*
 - a. *Chemistry:* Pathway 1 -- CHEM 120, CHEM 220, CHEM 221; Pathway 2 (recommended) -- CHEM 142, CHEM 152, CHEM 162 (or CHEM 145, CHEM 155, CHEM 165); and CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239) (or CHEM 335, CHEM 336, CHEM 337) (labs not required) (15 - 27 credits)
 - b. *Physics:* Pathway 1 -- PHYS 114, PHYS 115; Pathway 2 (recommended) -- PHYS 121, PHYS 122. (8 to 10 credits)
 - c. *Mathematics:* Two quarters of calculus (MATH 124, MATH 125, or MATH 144, MATH 145, or Q SCI 291, Q SCI 292)
 - d. *Introductory Biology (minimum 15 credits):* BIOL 180, BIOL 200, BIOL 220
2. *Introduction to Neurobiology (10 credits):* NBIO 301, NBIO 302.
3. *Advanced courses in neurobiology (12 credits):* NBIO 401, NBIO 402, NBIO 403, NBIO 404.
4. *Electives:* Minimum 16 credits from a wide variety of 400-level courses in the biological sciences. See adviser for list of courses. Courses not listed may be allowed with permission of program director. Students may apply up to 7 credits of undergraduate research toward the 16 elective credits.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Throughout the core sequence of neurobiology, students gain a deep understanding of the basic concepts of nervous system function and learn many of the basic techniques used to study nerve cells. Students also learn how to analyze neurophysiological data, and compose and present results. Graduates pursue careers in medicine, public health, education, pharmaceutical sales, computing, and graduate study.
- * *Instructional and Research Facilities:* Labs are required with introductory courses. NBIO 301 and NBIO 302. The program offers state-of-the-art facilities and equipment for each course.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* Most neurobiology students participate in undergraduate research with faculty from both the College of Arts and Sciences and the School of Medicine.
- * *Department Scholarships:* None offered.
- * *Student Organizations/Associations:* Beta Beta Beta, the honor society for biological study; Alpha Epsilon Delta, the national premedical honorary society.

Course Descriptions

See page 401.

Philosophy

345 Savery

Philosophy is the study of the most fundamental issues concerning reality, knowledge, and value, and of the basic concepts, principles, and arguments of the major intellectual disciplines. Its fields include metaphysics, epistemology, logic, ethics, history of philosophy, political philosophy, aesthetics, philosophy of science, philosophy of mind, philosophy of language, philosophy of law, and philosophy of religion.

Undergraduate Program

Adviser
345 Savery, Box 353350
206-616-1488
philinfo@u.washington.edu

The Department of Philosophy offers the following programs of study:

- * The Bachelor of Arts degree with a major in philosophy
- * The Bachelor of Arts degree with a major in history and philosophy of science, offered jointly with the Department of History
- * A minor in philosophy

Bachelor of Arts

Philosophy

Suggested First- and Second-Year College Courses: Introductory courses in symbolic logic, social philosophy, major problems of philosophy, and history of philosophy. Courses to develop writing skills, as well as language courses, especially Greek, French, or German. Mathematics courses through calculus.

Department Admission Requirements

2.00 cumulative GPA and completion of 10 credits of philosophy course work.

Major Requirements

50 credits, to include:

1. PHIL 120 or an upper-division course in logic
2. One course from PHIL 320, PHIL 330, PHIL 335, or PHIL 340 (undergraduate adviser must approve substitutions)
3. One course from PHIL 322, PHIL 332, PHIL 342, or 400-level courses in the same areas (undergraduate adviser must approve substitutions)
4. At least four UW philosophy courses at the 400 level, excluding PHIL 484
5. At least 25 credits at the UW
6. Minimum cumulative GPA of 2.00 for all philosophy courses taken.

History and Philosophy of Science

Suggested First- and Second-Year College Courses: PHIL 120, PHIL 160. Courses that develop writing skills. Introductory science courses and mathematics courses through calculus.

Department Admission Requirements

1. HIST 311, HIST 312; PHIL 160 or PHIL 460; PHIL 120, each with a minimum grade of 2.0.
2. Completion of 10 credits toward the Natural World (science) requirement (see below), each course with a minimum grade of 2.0.
3. Minimum UW GPA of 2.00.
4. Completion of 10 credits of composition/writing courses with a minimum grade of 2.0 for each course. This requirement may be met by a freshman English composition course, a "W" course, or any course in which the student has written a graded paper (to be reviewed by HPS faculty) of at least 10 pages.

Major Requirements

85 credits as follows:

1. *Core Courses:* HIST 311, HIST 312, HIST 390; PHIL 160 or PHIL 460; PHIL 120 (25 credits). A minimum grade of 2.0 in each course and an overall minimum GPA of 2.50.

2. *Electives:* 25 credits from the following, of which at least 10 must be PHIL courses and at least 5 must be HIST courses (or others upon petition): ESS 404, HIST 211, HIST 215, HIST 310, HIST 313 (or ASTR 313), HIST 314, HIST 315, HIST 316, HIST 317 (also MHE 422), HIST 318 (also MHE 424), HIST 412; PHIL 112, PHIL 350, PHIL 360, PHIL 406, PHIL 450, PHIL 460 (if PHIL 160 has been taken), PHIL 464, PHIL 466, PHIL 473, PHIL 481, PHIL 482, PHIL 483. A minimum grade of 2.0 in each class.
3. *Capstone:* Completion of HPS 400, with a minimum grade of 2.0 (5 credits).
4. *Science Component:* 30 credits of Natural World (NW) courses from anthropology, astronomy, atmospheric sciences, biology, chemistry, computer science, earth and space sciences, economics, environmental studies, mathematics, physics, psychology, and sociology, with a minimum GPA of 2.50 in these courses and a minimum grade of 2.0 in each course. At least 15 of the credits must be outside mathematics.

Minor

Minor Requirements: 30 credits, to include:

1. PHIL 115 or PHIL 120, or an upper-division course in logic
2. At least 15 UW philosophy credits at the 300 level or above, excluding PHIL 484.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Graduates of the Department of Philosophy acquire considerable skills in abstract thinking, analysis, and critical writing (constructing and critiquing arguments). Because of these skills, philosophical training is invaluable in almost any area of life. Recent graduates have been successful in software development, financial planning, journalism, teaching, and aviation. A few go on to graduate school and become professional philosophers.

Students' work is subjected to careful critical scrutiny. As a result, students benefit from philosophy courses with an increased competence in expository clarity, logical rigor, and analytical skill.

Philosophy is an excellent undergraduate major for pre-professional students. It is perhaps ideal for those who aspire to work in the legal profession. The History and Philosophy of Science major is of particular interest to those planning careers in the sciences. Courses in ethics offer students in any field the opportunity to think clearly about the normative dimensions of their career choices. Because the skills of philosophical analysis can be applied widely, philosophy is always a good complementary second degree for any major, whether it is in the physical sciences, social sciences, arts, or humanities.

- * *Instructional and Research Facilities:* The Philosophy Writing Center provides a free tutoring service to any student writing a philosophical paper. The Philosophy Commons includes a computer lab for students and a small conference room that can be reserved for study groups.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* The department offers internship credits for students leading its new majors seminar. Students may also arrange for internship credit with individual faculty. See adviser for details.
- * *Department Scholarships:* None offered.
- * *Student Organizations/Associations:* The Society for Undergraduate Philosophy Students (SUPS) is dedicated to the informal discussion of philosophical issues. Women in Philosophy encourages members of traditionally under represented groups to participate in the field.

Of Special Note: The department offers a new majors seminar for those wishing to explore the major.

Graduate Program

Graduate Program Coordinator
345 Savery, Box 353350
206-543-5855
philinfo@u.washington.edu

The Department of Philosophy offers programs of study leading to the Master of Arts and Doctor of Philosophy degrees, the M.A. program serving as the initial stage of the Ph.D. program.

The Master of Arts program option is a two-year non-thesis program which may be extended to three years depending on the outcome of the spring research papers. The student must take twelve courses in philosophy, satisfy a logic requirement, and at the end of the second year, submit three research papers for evaluation by the graduate faculty of the department. The courses and the papers must satisfy a distribution requirement. The departmental evaluation of the student's papers and course work determines whether an M.A. degree is awarded and also whether admission to the Ph.D. program is granted. The M.A. portion of the program serves as the initial stage of the Ph.D. program.

The Ph.D. program, which normally requires at least two years of study beyond the M.A., has three general requirements: (1) General Examination, (2) dissertation, and (3) Final Examination.

Master of Arts

Admission Requirements

In evaluating applications, the Department of Philosophy takes the following factors into account: the philosophical potential displayed in a sample of the applicant's written work, letters of recommendation, undergraduate record, and GRE scores.

1. Three letters of recommendation written on the recommender's departmental letterhead and addressed to the Graduate Admissions Committee (address below). Recommenders may send their letters directly to the department, or the applicant may include the letters in sealed envelopes with the other application materials.
2. A sample of the applicant's written philosophical work, normally an essay or paper (approximately 8-15 pages) written for a course in philosophy. Applicants are allowed one writing sample only.
3. Official GRE scores (verbal, quantitative, and analytic).
4. A 200-300 word statement of the applicant's reasons for doing graduate work in philosophy and his/her professional objectives.
5. A complete set of official college transcripts.

International Applicants

- * **TOEFL.** A minimum official TOEFL score of 600 (TOEFLC score: 250) is required unless the applicant is a citizen of Australia, Canada, Ireland, New Zealand, or the United Kingdom, or has earned a bachelor's degree or higher in the U.S. or one of the countries listed above.
- * **TSE.** An official TSE score of 55 is required to receive departmental assistantships involving classroom duties unless the applicant is a citizen of one of the countries listed above. A degree from the U.S. or one of those countries does not exempt the applicant from this requirement.
- * **Degree Requirements.** The equivalent of a four-year U.S. bachelor's degree. This is based on the following criteria: the country's national system of education, type of institution attended, field of study, and level of studies completed. Policies at other institutions may differ.
- * **Financial Responsibility.** The University of Washington requires official certification of adequate financial support from each international applicant. The total annual cost (12 months) of study is \$47,076 in U.S. funds. (This cost is subject to change without notice.) Even if a graduate program is able to offer some funding, the applicant may need to provide a portion of these funds personally.
- * **ESL Requirements.** Policy for students for whom English is a second language: All such students must meet the Graduate School requirements for the admission of international students.
- * **Additional Requirements.** In addition, the Philosophy Department has the following admission requirements:
 - o An 8-15 page paper in English.
 - o A letter of recommendation addressing the applicant's ability to speak and write English. (This letter may count as one of the three required by all applicants.)
 - o Some students may be required to spend up to three additional quarters improving their English writing and speaking skills. Students who do not have adequate preparation in Western Philosophy may be

required to take Ancient Philosophy (PHIL 320), Modern Philosophy (PHIL 322), Contemporary Philosophy (PHIL 326), and Introduction to Symbolic Logic (PHIL 120). Graduate credit will not normally be given for these remedial courses.

Special Requirements

An undergraduate major in philosophy is recommended, although not required, for admission to the M.A. program. An applicant's philosophical potential is assessed primarily on the basis of a sample of his or her written work in philosophy and secondarily on the basis of his or her undergraduate record, Graduate Record Examination scores, and letters of recommendation.

Degree Requirements

Please Note: The Philosophy Department at the University of Washington does not offer a terminal M.A. degree.

This is a non-thesis program. There is no language requirement for the M.A. degree.

The following requirements supplement the general requirements set forth by the UW Graduate School in the General Catalog (see the Graduate School Admissions page for further information). All students, whether or not they have earned an M.A. at another institution, must complete the M.A. requirements before entering the Ph.D. program.

36 credits minimum, as follows:

- * **Logic Requirement:** As a condition for the M.A. degree, the department requires that each student receive either a grade of 3.0 or better in one of the graduate-level logic courses or a passing score on the departmental logic examination. The department offers the departmental logic exam once annually upon request. Part-time students must satisfy this requirement by the time they submit master's papers.
- * **Distribution Requirement:** Graduate courses are divided into three areas. Students must take at least three courses in each of the following three areas:
 1. Area One:
 - o Greek Philosophy -- PHIL 430 (3), PHIL 431 (3), PHIL 433 (3), PHIL 520 (5)
 - o Medieval Philosophy -- PHIL 421 (3), PHIL 434 (3), PHIL 521 (5)
 - o Modern Philosophy -- PHIL 422 (3), PHIL 436 (3), PHIL 437 (3), PHIL 438 (5), PHIL 522 (5), PHIL 525 (5)
 - o Recent Philosophy -- PHIL 425 (3), PHIL 426 (5), PHIL 439 (3), PHIL 458 (5), PHIL 469 (3), PHIL 526 (5)
 - o Indian Philosophy -- PHIL 412 (5), PHIL 413 (3), PHIL 418 (3), PHIL 586 (5), SNKRT 560 (3)
 2. Area Two:
 - o Logic and Philosophy of Mathematics -- PHIL 470 (5), PHIL 471 (5), PHIL 472 (5), PHIL 473 (5), PHIL 474 (5), PHIL 570 (5)
 - o Philosophy of Science -- PHIL 459 (5), PHIL 460 (5), PHIL 466 (5), PHIL 481 (5), PHIL 482 (5), PHIL 560 (5), PHIL 566 (5)
 - o Philosophy of Mind -- PHIL 463 (5), PHIL 464 (5), PHIL 563 (5)
 - o Philosophy of Language -- PHIL 443 (3), PHIL 444 (3), PHIL 453 (5), PHIL 479 (3), PHIL 553 (5)
 - o Epistemology -- PHIL 450 (5), PHIL 490 (5), PHIL 550 (5)
 - o Metaphysics -- PHIL 456 (5), PHIL 556, PHIL 587 (5)
 3. Area Three:
 - o Ethics -- PHIL 440 (5), PHIL 540 (5)
 - o Philosophy of Art -- PHIL 445 (5), PHIL 446 (5), PHIL 447 (3), PHIL 545 (5)
 - o Philosophy of History -- PHIL 465 (3), PHIL 565 (5)
 - o Social and Political Philosophy -- PHIL 406 (5), PHIL 410 (5), PHIL 411 (5), PHIL 414 (3), PHIL 461 (5), PHIL 510 (5), PHIL 514 (5)
 - o Philosophy of Religion -- PHIL 467 (5), PHIL 567 (5)
- * **12-Course Requirement:** Students must complete twelve graduate courses in philosophy, with a minimum grade of 3.0 in each course. At least four of these twelve courses must be seminars.
- * **Master's Papers:** At the end of their second year, in lieu of a master's thesis, students submit three papers, one in each distribution area. (Part-time students will submit their papers for evaluation upon completion of twelve courses in philosophy. A change of status from full-time to part-time student requires departmental approval.)
- * **Evaluation:** The graduate faculty of the department evaluates the students' progress on the basis of coursework in philosophy and the papers submitted. The graduate faculty then decides whether the students are (a) awarded an M.A. and admitted to the Ph.D. program; (b) awarded an M.A. and invited to submit papers a second time; (c) awarded a terminal M.A.; or (d) dropped from the program without a

degree. Students resubmitting papers must submit completely new ones that satisfy the distribution requirements. A completely new paper is one that has not been submitted before and is not a revised version of one that has been submitted before. These papers are due the following year.

- * *Satisfactory Progress:* Students not yet admitted to the Ph.D. program must have at least two courses (10 credits) per quarter with a grade of 3.0 or better in order to be in good standing. Please be aware that an excessive number of incompletes may jeopardize a student's good standing. If a student does not make satisfactory progress in a given quarter, the director of graduate studies will recommend to the dean of the Graduate School that the student be placed on probation.
- * *Other Courses:* Students may use three courses outside philosophy in determining whether they are making satisfactory progress. The courses must be approved by the director of graduate studies as part of a program of specialization. Courses in areas other than philosophy do not normally satisfy the twelve-course requirement.

Doctor of Philosophy

Admission Requirements

Admission to the Ph.D. program is based on the level of performance with the M.A. requirements. (See above.)

Degree Requirements

60 credits minimum beyond the master's degree, as follows:

- * *General Requirements:* There are four general requirements for the completion of the doctoral degree:
 1. General written examination
 2. General oral examination
 3. Dissertation
 4. Final examination
 The master's papers constitute the written portion of the general examination. The general oral examination is normally a presentation and defense of the student's dissertation proposal.
- * *Course Requirement:* The only departmental course requirement is that the student must complete a total of at least six seminars with a grade of 3.0 or better in each before being awarded the Ph.D. (seminars taken to fulfill the M.A. requirements may count toward this total). A student's supervisory committee may, however, require additional courses.
- * *Language Requirement:* There is no departmental language requirement. However, in writing a dissertation a student must be able to deal with primary sources in the original language of the source. All language requirements are determined by the student's supervisory committee. A student should develop the needed language skills as early as possible in his/her career. The student should consult with the director of graduate studies during the first and second year in the M.A. program to insure that he/she is developing any needed language skills.
- * *Satisfactory Progress:* A student's supervisory committee determines whether a student in the Ph.D. program is making satisfactory progress. Satisfactory progress for the Ph.D. program includes steady and substantial progress toward the completion of the dissertation. Sanctions for failure to make satisfactory progress are the same as described for the master's requirements.

Financial Aid

The department has some teaching assistantships available to incoming students and the Graduate School offers some non-teaching assistantships.

Course Descriptions

See page 402.

Physics

C121 Physics-Astronomy Building

Physics is the study of the fundamental structure of matter and the interaction of its constituents, with the goal of providing a quantitative description of nature based on a limited number of physical principles.

Undergraduate Program

Adviser
C139A Physics-Astronomy, Box 351560
206-543-2772

The Department of Physics offers the following programs of study:

- * The Bachelor of Science degree with a major in physics
- * A minor in physics

Bachelor of Science

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126 (or MATH 144, MATH 145, MATH 146), MATH 308, MATH 324; PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227, PHYS 228. (Note: MATH 134, MATH 135, and MATH 136 can be used in place of MATH 124, MATH 125, MATH 126, and MATH 308.)

These physics and mathematics courses are required prerequisites for junior-level work in physics not only at the UW but also at most colleges and universities in the United States. Students who do not complete them during the first two years in college will either need to take more than four years to earn a degree or will be limited to a minimal course of study for graduation in four years.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Minimum 86 credits as follows:

1. *Core courses (38 credits):* PHYS 121, PHYS 122, PHYS 123, PHYS 224, PHYS 225, PHYS 227, PHYS 228, PHYS 321, PHYS 322, PHYS 334.
2. *Upper-division lecture courses in modern physics (3-4 credits):* Either PHYS 315 or PHYS 324.
3. *Upper-division physics laboratory courses (6 credits):* Two courses from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434.
4. *Research and seminars (3 credits):* Choices include PHYS 401, PHYS 402, PHYS 403; or PHYS 485, PHYS 486, PHYS 487; or PHYS 491, PHYS 492, PHYS 493; or PHYS 494, PHYS 495, PHYS 496; or ASTR 480. 1-3 credits of independent research that has significant physics content in a cognate subject (astronomy, chemistry, etc.) may be substituted for 1-3 credits of the above choices with approval of the adviser.
5. *Upper-division lecture courses (6-7 credits):* Two courses from an approved list of upper-division lecture courses in physics or cognate subjects.
6. *Mathematics (21 credits):* MATH 124, MATH 125, MATH 126, MATH 324, and one from MATH 308, MATH 318, or AMATH 352.
7. *Related sciences (9 credits):* Selected from physical or biological sciences other than physics, mathematics, or computer science, or from the history or philosophy of science, in addition to any courses in these fields taken to satisfy requirement 5, above.
8. At least 12 credits of the physics courses presented to satisfy requirements 1 through 5, above, shall be in physics courses numbered 300 or above taken at the UW.
9. A minimum grade of 2.0 is required in all courses presented in fulfillment of requirements 1 through 5, above.
10. Students who plan graduate study in physics are strongly advised to complete PHYS 323, PHYS 324, PHYS 325, PHYS 328, as well as several of the following: PHYS 231, PHYS 232, PHYS 331, PHYS 421, PHYS 422, PHYS 423, PHYS 424, PHYS 425, PHYS 426, PHYS 431, PHYS 432, PHYS 433, and AMATH 401, AMATH 402, AMATH 403.

Minor

Minor Requirements: 30-36 physics credits as follows:

1. *Core courses:* PHYS 121, PHYS 122, PHYS 123, PHYS 224, and PHYS 225
2. One of the following options:
 - a. *Physics Education:* PHYS 407, PHYS 408, PHYS 409 (total 36 physics credits) Experimental Physics: PHYS 231, PHYS 334 and one course from PHYS 331, PHYS 335, PHYS 431, PHYS 432, PHYS 433, or PHYS 434 (total 30 physics credits)

- b. *Mathematical Physics*: PHYS 227, PHYS 228 (MATH 308 required), and one course from PHYS 321 or PHYS 324 (MATH 324 required) (total 30 physics credits)
3. Minimum grade of 2.0 required for each physics course counted toward the minor.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes*: The program is one of the largest in the nation, with approximately 70 majors graduating every year. Graduates may join the work force in a variety of technical occupations where analytical, computational, and problem-solving skills are highly valued, both in government and the private sector. They may also continue to further studies in physics, further studies in other fields (such as astronomy, medicine, law, business, biology, or engineering).
- * *Instructional and Research Facilities*: The Physics and Astronomy departments share a modern building with excellent instructional and research facilities. Undergraduate students are strongly encouraged to participate in ongoing research in the department.
- * *Honors Options Available*: With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning*: Most undergraduate physics majors participate in a research experience, either on campus or off. Research internships in physics and related departments are available for both pay and course credit. Many students participate in national programs, typically the summer after their junior year. The department also maintains an exchange program with Universitat Leibig in Geissen, Germany.
- * *Department Scholarships*: None available
- * *Student Organizations/Associations*: Society of Physics Students, www.phys.washington.edu/~sps/; Career Development Organization for Physicists and Astronomers, <http://students.washington.edu/cdophysics/CAREER/>

Of Special Note:

- * One year of high school physics is strongly recommended before taking PHYS 121.
- * *Progress Requirement*: In each academic year, every undergraduate physics major who either has completed the required 200-level courses in physics or has begun physics courses beyond the 200 level must (1) complete at least 15 credits of course work acceptable in fulfillment of the departmental major requirements, exclusive of credits earned by repeating courses in which acceptable credit has been earned previously, or (2) satisfactorily complete an approved part-time program of study. Students who do not satisfy the above requirement will be dropped as physics majors unless exempted explicitly by the Physics Undergraduate Majors Committee. Students dropped for this reason may petition the committee for readmission to the major.

Graduate Program

Graduate Program Coordinator
C139 B Physics-Astronomy, Box 351560
206-543-2488

The Department of Physics offers studies leading to the degrees of Master of Science and Doctor of Philosophy. The department has a permanent faculty of 46 members, about 14 research faculty, and about 56 adjunct, affiliate, and emeritus faculty. An average of twenty Ph.D. and thirty M.S. degrees in physics have been awarded annually in recent years.

Research Facilities

The department is well equipped, both in staff and facilities, for instruction and research in a discipline that emphasizes fundamental problems in the understanding of the physical universe. Areas of research available to the Ph.D. student within the department include atomic physics, astrophysics, condensed-matter physics, elementary-particle physics, nuclear physics, and physics education. In addition, students may do research in physics with adjunct faculty members whose primary appointment is in another department such as Aeronautics and Astronautics, Astronomy, Biochemistry, Bioengineering, Chemistry, Earth and Space Sciences, Materials Science and Engineering, or Physiology and Biophysics.

Experimental work in atomic physics is concentrated on the measurement of fundamental physical properties through laser, ion trap, and radiofrequency techniques. The emphasis on fundamental measurements is continued in experiments on the gravitational force, carried out by faculty and students in atomic physics, nuclear physics, and astrophysics. Condensed-matter experiment includes research on surfaces, interfaces, nanotubes, lower-dimensional and bulk matter, with materials as diverse as high-temperature superconductors and low-temperature hydrogen monolayers. Facilities used range from synchrotron radiation and neutron sources in the U.S. and abroad to on-campus laboratories with low-temperature, high-pressure, scanning-probe microscopy, x-ray and light scattering, and surface-physics equipment.

Members of the high-energy and particle astrophysics experimental groups are heavily engaged in experiments at the European Center for Nuclear Research in Geneva, Kamiokande, KEK in Japan, and Fermilab in Illinois. Faculty and students of the nuclear physics group are involved in a broad spectrum of research including studies of neutrino properties, relativistic heavy ions, fundamental symmetries and nuclear astrophysics. Researchers use the on-campus accelerators of the Center for Experimental Physics and Astrophysics (CENPA), as well as major facilities in the U.S., Canada, and Europe.

Theorists in the department are concerned with problems in: the theories of elementary particles and quantum fields, string theory, nuclear and high-energy reactions from the very lowest to the very highest energies, phase transitions and statistical mechanics, condensed-matter physics from localization in disordered systems to electron transport in mesoscopic systems, atomic physics, general relativity, and astrophysics. The Institute for Nuclear Theory, a national facility closely associated with the department, offers a unique opportunity for students to pursue research with distinguished permanent and visiting staff. Students in physics have the opportunity to obtain a physics degree in a number of interdisciplinary and applied physics areas through research with faculty members in other departments.

Department facilities are housed in the Physics-Astronomy Building and the Center for Experimental Physics and Astrophysics (CENPA).

Master of Science (Applications of Physics)

Admission Requirements

This option is designed for students who are currently employed and whose background is in physical science, engineering, mathematics, or computer science. Admission is based on course grades in physics and related fields, adequacy of preparation in physics, and interest in areas of instruction offered in the physics department. Entering students are expected to have an undergraduate background equivalent to a B.S. degree in physical science, engineering, mathematics, or computer science. This program is a part-time program with classes offered evenings.

Degree Requirements

As part of the standard Graduate School requirements, students are expected to complete the sequence of core courses PHYS 441, 541, and 543, and to select appropriate elective courses. In addition, students must complete an independent-study project in consultation with a faculty member. This project may be carried out at the University or at the student's place of employment. A written report as well as an oral presentation of the project are required. Students must take at least 3 credits of PHYS 600 while completing the project. Students must complete a total of 36 credits of work at the 400 level or above, with at least 18 of those credits at the 500 level or above. Of the 36 credits, at least 18 credits must be from numerically graded courses. No thesis is required.

Master of Science, Doctor of Philosophy

Admission Requirements

Undergraduate preparation should include upper-division courses in mechanics; electricity and magnetism; statistical physics and thermodynamics; modern physics, including an introduction to quantum mechanics; and advanced laboratory work. Preparation in mathematics should include vector analysis, complex variables, ordinary differential equations, Fourier analysis, boundary-value problems, and special functions. Admission is determined by: the applicant's undergraduate program, undergraduate grades, Graduate Record Examination aptitude and advanced physics scores, letters of recommendation, and a statement of educational and professional objectives.

Master of Science

Degree Requirements

Students must take at least 3 credits of PHYS 600 while completing the project. Students must complete a total of 36 credits of work at the 400 level or above, with at least 18 of those credits at the 500 level or above. Of the 36 credits, at least 18 credits must be from numerically graded courses. A qualifying examination is required. No thesis is required.

Doctor of Philosophy

Degree Requirements

The student is expected to obtain here, or elsewhere with a master's degree, a background in physics equivalent to that contained in the following basic graduate courses: PHYS 505, 506, 511, 513, 514, 515, 517, 518, 519, 520, and 524; in specialized courses appropriate to each student's interests; and two advanced elective courses outside the student's area of research. The student is required to pass, successively, a written qualifying examination (typically at the beginning of the second year), an oral General Examination for admission to candidacy, and an oral Final Examination. In order to take the General Examination, the student must have been accepted by a graduate faculty member as a research student and have completed the graduate studies outlined above. This examination concentrates on the area in which the dissertation research is planned. Teaching experience is required of all candidates. Courses in teaching techniques in physics, PHYS 501-503, are required of students holding teaching assistantships.

Financial Aid

Most graduate students are supported by fellowships and assistantships. Applications for the Ph.D. program are automatically considered for these fellowships and assistantships.

Course Descriptions

See page 404.

Political Science

101 Gowen

Political science, broadly conceived, is the study of governments and other political actors, including their origins and foundations, interactions with groups and individuals, and interactions with nations. Within this larger framework political scientists study power, authority, conflict, economic relationships, culture, laws, policy, values, ethics, justice, equality, rights, legitimacy, and representation, to list only a few. Using these and other concepts, they analyze the political impacts of social issues such as war, peace, poverty, crime, education, the environment, race, gender, and globalization. Modes of inquiry are highly interdisciplinary.

Undergraduate Program

Adviser
215 Smith, Box 353530
206-543-1824
polsadvc@u.washington.edu

The Department of Political Science offers the following programs of study:

- * The Bachelor of Arts degree with a major in political science with options in political economy and political communication
- * A minor in political science

Coursework in the discipline covers four major fields of political science: American politics, comparative politics, international relations, and political theory. Students may pursue faculty-supervised independent study projects and an optional senior thesis.

Bachelor of Arts

Suggested First- and Second-Year College Courses: Courses that develop writing skills and breadth of knowledge. Introductory statistics.

Department Admission Requirements

1. Sophomore standing (completion of 45 college credits).
2. Minimum 2.00 cumulative GPA.
3. Three introductory political science courses (15 credits) with a grade of at least 2.0 in each from the following: POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205.
4. Students are admitted all quarters and there are no quarterly deadlines. Applications and additional information available from advisers in 215 Smith.

Major Requirements

50 credits in political science as follows:

1. *Introductory Requirement (15 credits):* Three courses from POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, POL S 205
2. *Field Requirement (15 credits):* Three upper-division courses with a grade of at least 2.0 in each, in three different fields of political science: political theory, comparative politics, international relations, American politics, and research methods. UW political science courses that count for upper-division credit are numbered POL S 212 and above.
3. *Electives (20 credits):* 20 credits of upper-division political science course work with a grade of at least 2.0 in each
4. *GPA Requirement:* Minimum cumulative GPA of 2.25 in political science courses at graduation and a minimum grade of 2.0 in each political science course taken to fulfill requirements for the major.
5. Transfer and postbaccalaureate students must meet all the above requirements and complete a minimum of 10 upper-division political science credits at the UW.

Political Economy and Political Communication: The department also offers political economy and political communication options, specialized programs of study that combine political science and economics or political science and communications. Students who wish to pursue these interdisciplinary options should consult with a political science adviser. A list of recommended course work is available.

Minor

Minor Requirements: 30 political science credits as follows:

One introductory course (POL S 101, POL S 201, POL S 202, POL S 203, POL S 204, or POL S 205), 20 upper-division elective credits (UW political science courses that count for upper-division credit are numbered POL S 212 and above), and 5 credits at the 400-level.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The study of political science arms students with substantive knowledge of the discipline, including its concepts and theories. It also prepares them to be knowledgeable and active citizens. Through their study, students develop critical thinking, analytical, research, writing, interpersonal, and communication skills.

Graduates of political science pursue careers in many fields, including government (federal, state, and local), business, trade, public service (including non-governmental and international organizations), law, journalism, and teaching.

- * *Instructional and Research Facilities:*
 - o Political Science Collaboratory: This facility has 25 computer stations. It functions as a computer classroom and also as a general lab, primarily for political science majors and students enrolled in political science classes.
 - o Political Science Writing Center: The Writing Center is operated in conjunction with the Jackson School of International Studies and the Law, Societies, and Justice Program. The center is staffed with peer tutors who provide drop-in help for students. The Writing Center director works with instructors to design workshops to help students with assignments.
 - o The Department of Political Science is affiliated with a number of research centers:
 - o The Center for American Politics and Public Policy is a focal point for the study of politics and policy processes in the United States. Research relates to public policy processes, including issues of agenda setting, decision making, implementation, quantitative and qualitative measures of policy change, and the role of ideas and dialogue in policy change. Policy arenas include education reform,

health care, environmental regulation, and building code enforcement.

- o The Center for Communication and Civic Engagement investigates how innovative communication can improve the quality of civic life. The center's primary focus is to understand how new information technologies can supplement more traditional forms of communication to facilitate civic engagement.
- o Harry Bridges Center for Labor Studies promotes the study of labor as a central concern in higher education and focuses on labor's contribution to society -- locally, nationally, and worldwide. The center supports research, teaching, and community outreach.
- o European Union Center promotes the study of the European Union and trans-Atlantic relations.
- o Center for Social Science Computation and Research maintains an extensive data archive and offers many statistical and software consulting services.

* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

* *Research, Internships, and Service Learning:* The department offers three internship programs that range from part-time, 5-credit assignments to full-time, 15-credit programs. Students may work in local agencies (POL S 496), in the state legislature (POL S 497), and in Washington, D.C. (POL S 498).

Listings of local internships and applications are available in 215 Smith.

The Washington State Legislative Internship Program is a winter-quarter program in Olympia and is open to students from all majors. Students earn 15 credits for the internship and attend a class taught by a political science faculty member. Applications are available from departmental advisers in 215 Smith and are due by the end of October.

Students in all majors may apply for the Washington Center, a comprehensive program that places students in Washington, D.C. Students earn 15 credits for the internship. Additional information is available from departmental advisers in 215 Smith.

* *Department Scholarships:*

- o Hugh Bone Scholarship: The endowed Hugh A. Bone Scholarship was established by the Department of Political Science in 1986 to recognize Professor Bone, a former department chair, and to continue his commitment to a "participative citizenry." Professor Bone founded the Washington State Legislative Internship Program and many of the students who studied with him continue active political lives due to his stewardship and interest. The scholarship was established in his name to help students with financial need to study and intern away from the UW-Seattle campus.
- o Agnes C. Nelson Memorial Scholarship: The departments of Political Science and Economics make annual full-tuition awards to students who demonstrate interest in the interrelationship of politics and economics and who meet financial eligibility requirements. To apply for the scholarship, students must have completed a minimum of 25 credits in political science and economics with at least 10 credits in each discipline. Deadlines are posted early in spring quarter.

* *Student Organizations/Associations:* Pi Sigma Alpha (Political Science Honor Society), Phi Alpha Delta (pre-law fraternity). See adviser for details

Of Special Note: Department Awards

- * The Robert A. Dahl Award: The Department of Political Science recognizes an outstanding graduating senior with the Robert A. Dahl Award. To be eligible for consideration, a student must demonstrate scholarship excellence as well as high interest in political science as a discipline.
- * Daniel C. Lev Award: The Department of Political Science created this award to recognize the contribution of Professor Dan Lev to the department's honors program. The award recognizes an exceptional Senior Honors Thesis.
- * Sharon S. Redeker Award for Public Service: The Department of Political Science created this award in honor of Sharon Redeker, who served for many years as the department's Director of Academic Services. This award recognizes the exceptional public service of a political science senior while at the University of Washington.

Graduate Program

Graduate Program Coordinator
215 Smith, Box 353530
206-543-1898
polsgrad@u.washington.edu

Graduate study in political science integrates traditional education in political science's primary fields with other fields in the social sciences, allowing an eclectic, interdisciplinary approach.

The department has an outstanding reputation in comparative politics, international relations, American politics, political theory, international relations, political economy, public policy, public law, political communication, and methodology. Graduate students can incorporate study in other campus units, such as the School of Marine Affairs, the Daniel J. Evans School of Public Affairs, the Henry M. Jackson School of International Studies, and the Department of Communication.

Graduate work in political science is primarily for preparation for the Doctor of Philosophy degree. The Master of Arts program serves as the initial stage of the Ph.D. program; the department does not offer a terminal Master of Arts degree.

Master of Arts

Admission Requirements

- * Statement of Purpose containing academic background, including any research experience and methodological skills; plans and goals for study, including intellectual interests and areas of specialization; and reasons for interest in studying at the University of Washington.
- * *Writing sample:* A relatively short paper (not to exceed 20 pages) or excerpts from a larger work (e.g., honors thesis) demonstrating ability to write critically and analytically.
- * Resume
- * Letters of recommendation
- * Transcripts
- * *Test scores:* GRE General Test scores sent directly by the Educational Testing Service (ETS). TOEFL score of 580 (237 for the computer-based TOEFL) for international students, sent directly by the Educational Testing Service (ETS)-

Degree Requirements

The department recognizes four "general fields" in political science: American politics, comparative politics, international relations, and political theory. The department requires each student to select one general field, in which the student must become familiar with the main body of literature, major intellectual issues and develop competence in that field's mode of analysis. To meet this requirement, students must take the core course in the designated field. All students are required to take at least one additional core course in another general field.

For the master's degree, a student must also prepare in a second general field or in one of the specialized fields: area study (i.e., Southeast Asian or Western European politics), public law, political economy, public policy processes, and political culture. Specialized fields are periodically redefined given faculty/student interests.

All graduate students are required to achieve a minimum level of competence in political research methods. During their first year, M.A. students complete POL S 490-491. Students who intend to pursue the Ph.D. are expected to continue this series during the second year of their program, with a third course to be taken in political science or another field of the social sciences from a recommended list provided by the department. Demonstration of competence in a foreign language is not required for either the M.A. or Ph.D. Should the student select a field(s) where the supervisory committee believes that competence in a language would be beneficial, (s)he will be so advised.

Students entering the master's program are expected to complete the degree (46 credits minimum) within two years. The M.A. student will complete an Essay of Distinction and a final oral examination, to demonstrate substantive field knowledge and the ability to synthesize and apply that knowledge to new problems.

Doctor of Philosophy

Admission Requirements

- * Statement of Purpose containing academic background, including any research experience and methodological skills; plans and goals for study, including intellectual interests and areas of specialization; and reasons for interest in studying at the University of Washington.
- * *Writing sample:* A relatively short paper (not to exceed 20 pages) or excerpts from a larger work (e.g., honors thesis) demonstrating ability to write critically and analytically.
- * Resume
- * Letters of recommendation
- * Transcripts
- * *Test scores:* GRE General Test scores sent directly by the Educational Testing Service (ETS). TOEFL score of 580 (237 for the computer-based TOEFL) for international students, sent directly by the Educational Testing Service (ETS)-

Degree Requirements

The department recognizes four "general fields" in political science: American politics, comparative politics, international relations, and political theory. The department requires each student to select one general field, in which the student must become familiar with the main body of literature, major intellectual issues and develop competence in that field's mode of analysis. To meet this requirement, students must take the core course in the designated field. All students are required to take at least one additional core course in another general field.

The doctoral student must prepare in a total of three fields--a second general field and/or one or more of the specialized fields (area study (i.e., Southeast Asian or Western European politics), public law, political economy, public policy processes, and political culture), and/or at most one non-designated field. A non-designated field is constructed from another academic discipline such as anthropology or sociology, or individually defined by the student. Political methodology, international law, public administration, urban politics, political psychology, ethnicity and nationality, philosophy of social science, and language policy are examples of recent non-designated fields.

All graduate students are required to achieve a minimum level of competence in political research methods. During their first year, both M.A. and Ph.D. students complete POL S 490-491. Ph.D. are expected to continue this series during the second year of their program, with a third course to be taken in political science or another field of the social sciences from a recommended list provided by the department. Demonstration of competence in a foreign language is not required for the Ph.D. Should the student select a field(s) where the supervisory committee believes that competence in a language would be beneficial, (s)he will be so advised.

The doctorate usually takes an additional three years beyond the M.A. (124 credits minimum, including at least 27 credits for the dissertation). Students must pass comprehensive written and oral examinations in each of the three fields, called the General Examination, and complete the Ph.C. Essay of Distinction. Successful completion of the General Examination constitutes advancement to candidacy for the doctoral student. A candidate then prepares a dissertation proposal for faculty review; approval leads to the research and writing of the dissertation. A final oral examination and committee approval of the doctoral dissertation complete the degree requirements.

Research Facilities

Access to computing facilities and extensive data holdings is available through the Center for Social Science Computation and Research and the Political Science Collaboratory. The Department of Political Science is also affiliated with several research centers, including the Center for American Politics and Public Policy, the Center for Communication and Civic Engagement, the Center for Statistics and the Social Sciences, the Comparative Law and Society Studies Center, the Harry Bridges Labor Studies Center, and the Center for Comparative and Historical Analysis of Organizations and States. The University is also a member of the Inter-University Consortium for Political and Social Research.

Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of

study. Provided they make satisfactory progress, students are eligible for departmental financial assistance for five consecutive years.

Course Descriptions

See page 408.

Psychology

119 Guthrie

Psychology involves the scientific study of behavior and its causes and the understanding of human and animal behavior in a variety of settings. Psychology is studied both as a natural science, which stresses physical and biological causes of behavior, and as a social science, which stresses the effects of the social setting on human and animal behavior. Major areas of emphasis are human cognition and perception, animal behavior, behavioral neuroscience, developmental, social and personality, and clinical psychology.

Undergraduate Program

Adviser
119 Guthrie, Box 351525
206-543-2698
psyadvise@u.washington.edu

The Department of Psychology offers the following programs of study:

- * The Bachelor of Science degree with a major in psychology
- * The Bachelor of Arts degree with a major in psychology

The Bachelor of Science program prepares students for doctoral programs in psychology, leading to careers in teaching, research, or clinical psychology. The program emphasizes laboratory/research experience and statistics.

The Bachelor of Arts program provides a general background in psychology for students preparing for master's-level graduate programs or professional schools, seeking employment at the baccalaureate level, or wanting to apply the principles of psychology in other disciplines.

The department does not have formal programs in educational, school, or counseling psychology; engineering psychology; or industrial psychology.

Bachelor of Science

Suggested First-Year College Courses: MATH 120 and MATH 124, or MATH 120 and MATH 144. (MATH 120 and MATH 144 is the recommended sequence.) PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

Suggested Second-Year College Courses: PSYCH 202 and 209 should be completed as soon as possible during this year; BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology Department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

Department Admission Requirements

Students apply to the Department of Psychology under the same admission requirements, regardless of the degree they will pursue.

1. Minimum cumulative UW GPA of 2.00.
2. Completion of one of the following math courses with a minimum grade of 2.0: MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. (Students may fulfill this requirement with test scores that place them in MATH 112 or MATH 124 or higher.)
3. Completion of the following psychology courses with a minimum grade of 2.0 in each course and a cumulative GPA of 2.50 in the three courses: PSYCH 101, PSYCH 202, and PSYCH 209.
4. Admission is competitive based on the following criteria:

- Preparation for a major in psychology as indicated by the grades earned in courses required for admission
 - GPA, with an emphasis on grades earned in psychology courses
 - Other evidence of a commitment to becoming a psychology major
 - Personal statement reflecting an interest in and commitment to becoming a psychology major
 - Copies of unofficial transcripts from all schools attended (UW and transfer).
- Meeting the above criteria does not guarantee admission to the department.
- The application deadline is the first Friday of autumn, winter, and spring quarters; no applications are accepted summer quarter. Applications and additional information are available in 119A Guthrie.

Major Requirements

84-86 credits as follows:

- PSYCH 101, PSYCH 202, PSYCH 209 (with a grade of 2.5 or higher), PSYCH 317 and PSYCH 318
- One lab course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
- One course from PSYCH 300, PSYCH 333, or PSYCH 355
- One course from PSYCH 303, PSYCH 305, PSYCH 306, or PSYCH 345
- One additional course from PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355
- Three additional graded upper-division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
- PSYCH 499 (3 credits)
- PSYCH 496, PSYCH 497, or PSYCH 498 (3 credits) or 3 additional credits of PSYCH 499
- Up to 6 credits in 200- to 400-level electives to make a minimum total of 66 psychology credits
- Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.
- Courses in related fields:
 - One of the following MATH sequences: MATH 120 and 124, or MATH 120 and MATH 144 (MATH 120 and MATH 144 preferred). Students may satisfy this requirement by testing out of MATH 124 or MATH 144
 - One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
 - One of the following philosophy courses: PHIL 120, PHIL 160
 - One social science course (3 to 5 credits) from anthropology or sociology
- Cumulative minimum GPA of 2.50 in all PSYCH courses applied toward the degree (UW and transfer), with a minimum grade of 2.0 in each course presented for the major. Note that a grade of 2.5 or higher is required in PSYCH 209 in order for students to progress to the PSYCH 317/PSYCH 318 statistics series.
- Transfer students must meet all of the above requirements and are required to complete at least 15 graded credits in psychology at the 300 and 400 level at the UW.

Bachelor of Arts

Suggested First-Year College Courses: MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. PSYCH 101. Any sociology or anthropology course. Students are encouraged to begin completion of general education requirements.

Suggested Second-Year College Courses: PSYCH 202 and 209 should be completed as soon as possible during this year. BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220. Students intending to take animal behavior courses in the Psychology department should plan to fulfill the biology requirement with either BIOL 161-BIOL 162, BIOL 180, or BIOL 200. Continue working toward completion of general education requirements, including foreign language. The foreign language requirement should, ideally, be completed within the first two years of college.

Major Requirements

66 to 68 credits as follows:

- PSYCH 101, PSYCH 202, PSYCH 209, PSYCH 315 (or PSYCH 317 and PSYCH 318)

- One lab course from PSYCH 330, PSYCH 331, PSYCH 332, PSYCH 361, PSYCH 417, PSYCH 418, or PSYCH 419
- One course from PSYCH 300, PSYCH 333, or PSYCH 355
- One course from PSYCH 303, PSYCH 305, PSYCH 306, or PSYCH 345
- One additional course from PSYCH 300, PSYCH 303, PSYCH 305, PSYCH 306, PSYCH 333, PSYCH 345, or PSYCH 355
- Two additional graded upper division classes with at least one at the 400 level (cannot include PSYCH 491 through PSYCH 499)
- 3 credits from the following list: PSYCH 494, PSYCH 496, PSYCH 497, PSYCH 498, PSYCH 499; or credit from an approved study abroad program
- Up to 4 credits of PSYCH 200- to 400-level electives to make a minimum total of 53 psychology credits
- Students may not use PSYCH 200 as an elective if PSYCH 300 is used to fulfill major requirements; or use PSYCH 203 as an elective if PSYCH 303 is used to fulfill major requirements; or use PSYCH 206 as an elective if PSYCH 306 is used to fulfill major requirements; or use PSYCH 245 as an elective if PSYCH 345 is used to fulfill major requirements.
- Courses in related fields:
 - One MATH course from MATH 111, MATH 112, MATH 120, MATH 124, or MATH 144. Students may satisfy this requirement by testing out of any of the specified classes.
 - One biological science course from BIOL 118, BIOL 161-BIOL 162, BIOL 180, BIOL 200, or BIOL 220
 - One social science course (3 to 5 credits) from anthropology or sociology
- Cumulative minimum GPA of 2.50 in all psychology courses applied toward the degree (UW and transfer), with a minimum grade of 2.0 in each course presented for the major
- Transfer students must meet all the above requirements and must to complete at least 15 graded credits in psychology at the 300 and 400 level at the UW.

Student Outcomes and Opportunities

- Learning Objectives and Expected Outcomes:* Students understand and apply scientific methods and principles, receive an excellent preparation in the theoretical explanations of human and animal behavior, and understand the introductory concepts underlying the biological basis of behavior.
- Instructional and Research Facilities:* The psychology faculty have extensive research facilities and research laboratories on the UW campus and nearby buildings.
- Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- Research, Internships, and Service Learning:* The Department of Psychology offers academic credit for approved field work experience. The advising office maintains internship listings which are updated regularly.
- Department Scholarships:* None offered.
- Student Organizations/Associations:* Psi Chi (national honors society for undergraduate psychology students).

Of Special Note: A student may earn either a Bachelor of Science or a Bachelor of Arts degree in psychology, but not both.

Graduate Program

Graduate Program Coordinator
306 Guthrie, Box 351525
206-543-2563
psygrad@u.washington.edu

Graduate work in psychology is organized primarily as preparation for the Doctor of Philosophy degree. The optional Master of Science degree is taken by some doctoral students in the course of their work toward the doctorate.

For graduate instruction, the department is organized into six major areas of study: animal behavior, adult and child clinical, cognition and perception, developmental, physiological, and social psychology and personality. Specialization groups also exist in the sub-areas of diversity and self-regulation, and in community, sport, and quantitative psychology.

The program in clinical psychology is accredited by the American Psychological Association and provides scientific and professional training.

Master of Science (Optional)

A master's-degree-only program is not available. Doctoral students have the option of obtaining a master's degree while working toward the Ph.D.

Degree Requirements

Completion of first-year graduate program (see Doctor of Philosophy degree requirements below) and an appropriate research program, including a research thesis.

Doctor of Philosophy

Admission Requirements

An undergraduate degree in psychology is desirable, but not required. Some preparation in biological, social, or quantitative sciences is strongly advised. Applicants are judged on a number of criteria, including academic and research backgrounds, Graduate Record Examination scores, and written evaluations submitted by former professors or supervisors. Admission of new students occurs in autumn quarter. The deadline for receipt of admissions material is December 15.

Degree Requirements

Minimum 90 credits, as follows:

- * *Coursework:*
 - o Orientation Week: PSYCH 500 (1)
 - o Psychology Colloquium: PSYCH 500 (1)
 - o Statistics and General Methodology: During the first year, students must complete each of the following with a minimum grade of 2.7: PSYCH 522 (2), PSYCH 523 (2), PSYCH 524 (4), PSYCH 525 (4).
 - o Area Course Requirements: All students are required to take a set of six or more courses as required by the individual areas (see below)
 - o Seminars and Advanced Seminars: All students are strongly encouraged to attend a seminar as specified by their area (see below), and to attend the departmental colloquium (PSYCH 550).
 - o Substitutions: Potential substitutions should be discussed with the student's adviser and Area Head or Area Representative.
- * *Area Requirements:*
 - o Animal Behavior:
 - + Core courses: PSYCH 502 (3), PSYCH 503 (4), PSYCH 562 (3)
 - + Three additional courses chosen in consultation with adviser. The following courses may be particularly appropriate for Animal Behavior students: PSYCH 504 (3), PSYCH 505 (4), PSYCH 513 (4)
 - + All Animal Behavior students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.
 - o Adult Clinical Area:
 - + Core courses: PSYCH 517 (3), PSYCH 518 (5), PSYCH 519 (5), PSYCH 511 (3) (PSYCH 594 (5) may be substituted), PSYCH 515 (4) (PSYCH 571 (5) or PSYCH 572 (4) may be substituted)
 - + Six additional out-of-area courses. These six courses must meet the APA curriculum guidelines for "breadth of scientific psychology," covering biological, affective-cognitive, and social aspects of behavior as determined by mutual agreement between the student and adviser. Courses should be selected toward developing cohesive themes of subspecialty expertise pertinent to the student's future research and clinical endeavors.
 - + One course each in social, affective/cognitive, and biological psychology is required. Core concepts courses that can be used to meet the APA breadth requirements are as follows: Affective-Cognitive Breadth: PSYCH 507 (3); Social Breadth: PSYCH 510 (4); Biological Breadth: PSYCH 502 (3), PSYCH 503 (4), PSYCH 504 (3), PSYCH 506 (3)
 - + NOTE: PSYCH 594, PSYCH 571 and PSYCH 572 cannot be used as out-of-area courses.
 - + One course in community psychology of minority mental health: PSYCH 574 (4), PSYCH 580 (3), or other approved courses.
 - + Three courses in clinical issues and methods: PSYCH 591 (1, max. 3), PSYCH 587 (2), PSYCH 588 (2)
 - + Two courses in assessment: PSYCH 586 (3); one of the following three courses: PSYCH 576 with PSYCH 590 practicum (5/2), PSYCH 578 with PSYCH 590 (4/2), PSYCH 579 (4)
 - + Clinical practica on a continuing basis: PSYCH 589 (4), PSYCH 593 (1-6, max. 24), PSYCH 597 (1-5, max. 36)
 - o Behavioral Neuroscience:
 - + Core courses: PSYCH 421 (5), PSYCH 504 (3), NEUBEH 502 (4); two of the following three courses: NEUBEH 501 (3), NEUBEH 503 (4), CONJ 531/CONJ 532 (1.5/1.5)
 - + Three additional psychology courses: PSYCH 565 (3); not more than one of the following: PSYCH 423 (5), PSYCH 424 (5), PSYCH 426 (4), PSYCH 427 (5), PSYCH 430 (4); one or more of the following: PSYCH 502 (3), PSYCH 503 (4), PSYCH 506 (3), PSYCH 513 (4)
 - + Seminars and advanced seminars: All BNS students are required to take at least three quarters of PSYCH 522 (2). In addition, all BNS students are required to take at least one advanced seminar (usually PSYCH 542), chosen in consultation with the student's adviser.
 - + All Behavioral Neuroscience students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their area, throughout their graduate careers.
 - o Child Clinical Area:
 - + Research methods: PSYCH 529 (5), PSYCH 531 (4)
 - + Four courses in child clinical psychology: PSYCH 571 (5), PSYCH 572 (4), PSYCH 576 with PSYCH 590 practicum (5/2), PSYCH 573 (5)
 - + Four core concepts courses: PSYCH 513 (4), PSYCH 514 (4), PSYCH 515 (4), PSYCH 517 (3)
 - + One course in minority mental health: PSYCH 580 (3)
 - + Three courses in clinical issues and methods: PSYCH 591 (1, max. 3), PSYCH 587 (2), PSYCH 588 (2)
 - + Clinical practica on a continuing basis: PSYCH 589 (4), PSYCH 593 (1-6, max. 24), PSYCH 597 (1-5, max. 36)
 - + One treatment seminar: PSYCH 543 (3-5, max. 30), PSYCH 553 (1-2, max. 30), PSYCH 550 (1-2, max. 30)
 - + All Child Clinical students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.
 - + Other requirements for Child Clinical students: A one-year predoctoral internship
 - o Cognition and Perception:
 - + Core courses: PSYCH 506 (3), PSYCH 507 (3), PSYCH 508 (3)
 - + Three additional courses, selected to broaden and deepen the student's understanding of his/her research specialty. These courses should be chosen in consultation with the adviser. They can be additional core concepts courses in any area, or other courses chosen from anywhere on campus, within or outside the Psychology Department.
 - + The following out-of-area core concepts courses may be particularly appropriate for cognition: PSYCH 504 (3), PSYCH 510 (4), PSYCH 514 (4), PSYCH 515 (4)
 - + Seminars and advanced seminars: PSYCH 555 (1-2, max. 30)
 - + All Cognition/Perception students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.
 - o Developmental Psychology:
 - + Research Methods: PSYCH 529 (5)
 - + Area course requirements. PSYCH 513 (4), PSYCH 514 (4), PSYCH 515 (4)
 - + Three additional courses, selected to broaden and deepen the student's understanding of his/her research specialty. These courses should be chosen in consultation with the adviser. They can be additional core concepts courses in any area, or other courses chosen from anywhere on campus, within or outside the Psychology Department.
 - + The following out-of-area core concepts courses may be particularly appropriate for Developmental students, depending on the student's research specialty: PSYCH 503 (4), PSYCH 504 (3), PSYCH 507 (3), PSYCH 510 (4), PSYCH 511 (3)
 - + In lieu of a core concepts course in Child Clinical Psychology, PSYCH 553, Seminar in Child Clinical Psychology, is also recommended for Developmental graduate students.
 - + Seminars and advanced seminars: PSYCH 556 (1-2, max. 30)
 - + All Developmental students are strongly encouraged to participate in additional seminars and advanced seminars, both within and

outside their Area, throughout their graduate careers.

- o Social Psychology and Personality:
 - + In addition to the four statistical courses required by the department, Social/Personality students are required to take one additional quantitative course, within or outside the department.
 - + Core courses: PSYCH 510 (4), PSYCH 511 (3)
 - + Four additional courses, selected to broaden and deepen the student's understanding of his/her research specialty. These courses should be chosen in consultation with the adviser. They can be additional core concepts courses in any Area, or other courses chosen from anywhere on campus, within or outside the Psychology Department.
 - + Seminars and advanced seminars: PSYCH 557 (1-2, max. 30), one additional departmental seminar (PSYCH 550 through PSYCH 558) every quarter throughout the student's graduate career
 - + All Social/Personality students are strongly encouraged to participate in additional seminars and advanced seminars, both within and outside their Area, throughout their graduate careers.

Assistantships, Fellowships, or Traineeship Opportunities

Research and teaching assistantships are generally available. Traineeships and fellowships are also available.

Course Descriptions

See page 417.

Romance Languages and Literature

C104 Padelford

The department consists of two divisions: French and Italian Studies and Spanish and Portuguese Studies. The divisions offer programs designed to develop competence in the reading, speaking, and writing of the languages and in the study of the literatures and cultures.

French and Italian Studies

C254 Padelford

Undergraduate Program

Adviser
C252 Padelford, Box 354361
206-616-5366

The Division of French and Italian Studies offers the following programs of study:

- * The Bachelor of Arts degree with a major in French or Italian
- * Minors in French and Italian

Bachelor of Arts

Suggested First- and Second-Year College Courses: Community college students should take as many lower-division language courses as possible before transferring to the UW.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

French: 60 credits beyond FRENCH 203, to include FRENCH 301, FRENCH 302, FRENCH 303, FRENCH 304, FRENCH 305, FRENCH 306, FRENCH 378. Three 400-level courses and two 300- or 400-level courses chosen to satisfy the requirements for an emphasis on literature/culture. Transfer credits at the 400 level are accepted only by petition to the Faculty Studies Committee.

Italian: 60 credits in courses at the 300 and 400 levels, including ITAL 301, ITAL 302, ITAL 303; two from ITAL 341, ITAL 342, ITAL 351, ITAL 352; ITAL 401 (or ITAL 470); ITAL 402 (or ITAL 403); and ITAL 404 (or ITAL 405); 20 additional credits in literature/culture/film courses at the 300 or 400 level, with at least 10 of these credits at the 400 level. Prerequisite for all 300-level courses is ITAL 203 or approved equivalent. A minimum 2.0 grade is required in any course applied toward the major.

Minor

Minor Requirements: French -- 30 credits including FRENCH 301, FRENCH 302, FRENCH 303, FRENCH 304 (or FRENCH 305), FRENCH 306 (or a 400-level course, with permission of instructor), FRENCH 378. Up to five credits taken abroad may be counted toward the minor.
Minor Requirements: Italian -- 30 credits in courses at the 300 and 400 levels, including ITAL 301, ITAL 302, ITAL 303, ITAL 401, ITAL 402 (or ITAL 403), and ITAL 404 (or ITAL 405), (or equivalent 400-level courses).

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* Employment related to foreign languages is sometimes in specialized fields, but in general could be in many areas. The combination of studies in foreign languages and international affairs is ideal for students seeking job opportunities in government (foreign service and diplomatic fields, intelligence agencies, immigration and customs, Department of Labor, law enforcement, armed forces, legal agencies, public aid, social and community work, and international agencies, such as the United Nations and UNICEF), business (airlines, marketing, banking/finance, multi-national corporations, shipping industry, travel and hotel industries, import/export firms, publishing houses, and consulting) and related fields (journalism, radio and television, fashion enterprises, teaching/counseling, translation, bilingual office work, library/museum work, nursing, phone companies, art and cultural affairs, and film and theatrical industries).

Students with substantial foreign language fluency who combine their language skills with a solid foundation in liberal education and adequate job preparation and internships find fulfilling occupations. The department's commitment is to impart to our students a genuine desire to learn throughout their lives, a flexibility that lends itself to changes, and a seriousness of purpose to apply to whatever they undertake in life.

* *Instructional and Research Facilities:* UW Rome Center in Rome, Italy.

* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

* *Research, Internships, and Service Learning:* Rome Center offers one intern position per year, providing room and board and a modest stipend. Interns work in the administrative Rome/UW office and are required to follow an independent course of language and literature study or other proposed course of study.

* *Department Scholarships:* None available.

* *Student Organizations/Associations:* Italian Club.

Of Special Note: The department sponsors study-abroad programs in France and Italy. See adviser for details.

Graduate Program

Graduate Program Coordinator
C259 Padelford, Box 354360
206-616-5366

The Division of French and Italian Studies offers programs of graduate study leading to the degrees of Master of Arts in French or Italian and Doctor of Philosophy in French. Students who wish to complete their doctoral studies in Italian may do so through the Department of Comparative Literature.

Master of Arts in French Studies

Admission Requirements

Applicants for a Master of Arts in French should present an undergraduate major or its equivalent in French literature and culture. Preparation should be equivalent to the requirements for the Bachelor of Arts degree in French

at the University of Washington. All applicants must prove proficiency in the speaking and writing of the French language.

Before their enrollment in French Studies, all incoming M.A. students must complete a list of period and critical readings.

Degree Requirements

55 credits, as follows:

A total of 45 applicable credits (400-level and above) are required in course work, and an additional 10 credits in French 600 are given for exam preparation. 15 credits of the coursework must be taken at the 500 level (courses limited to graduate students). 5 coursework credits are given for the required pedagogy methods seminar for first-time TAs. In order to remain in good standing the student must maintain a cumulative grade-point average of 3.60. The minimum acceptable grade for any given course is 2.7.

Students must fulfill four of the department's seven period distributions. In addition, they must take one class in the History of Criticism / Critical Theory rubric.

Students are encouraged to take courses (up to 15 credits) in disciplines other than their major field of study. These credits must be approved by the Graduate Program Coordinator at the time of registration. Credits in such supporting or related fields are allowed only for courses numbered 400 or above.

The M.A. examinations (written and oral) are to be taken in the sixth quarter of study.

Master of Arts in Italian Studies

Admission Requirements

Applicants for a Master of Arts in Italian should present an undergraduate major or its equivalent in Italian literature and culture. Preparation should be equivalent to the requirements for the Bachelor of Arts degree in Italian at the University of Washington. All applicants must prove proficiency in the speaking and writing of Italian language.

- * Application for Graduate Admission, along with supporting documents
- * Three letters of recommendation
- * Autobiographical statement
- * CD or audio cassette recording of the applicant reading the autobiographical statement mentioned above, together with any other informal comments the applicant wishes to make.
- * Writing sample
- * Graduate Record Examination (GRE) scores.
- * Foreign students should note that the Graduate School requires proof of proficiency in the English language in the form of the TOEFL (Test of English as a Foreign Language) or its computerized version (TOEFLC) or the Michigan Test and also the TSE (Test of Spoken English). A TOEFL score of 500 (or a TOEFLC score of 173) is required for admission, and a score of 580 (or 237 on the computerized form) is required for Teaching Assistant eligibility. Alternatively a Michigan Test score of 80 is required for admission and 90 for Teaching Assistantship eligibility. A minimum score of 55 is required on the TSE.

Degree Requirements

A total of 50 applicable credits (400-level and above) are required in coursework, 30 of which must be taken at the 500 level (courses limited to graduate students). An additional 10 credits in ITAL 600 is required for exam preparation. To remain in good standing the student must maintain a cumulative grade-point average of 3.60. The minimum acceptable grade for any given course is 2.7.

Students are encouraged to take up to 10 credits in disciplines other than their major field of study. Credits in such supporting or related fields are allowed only for courses numbered 400 or above.

M.A. candidates must pass a foreign language reading ability examination in a language other than the major or their native language. Students stipulate their choice at the time of first enrollment, after consultation with the Graduate Adviser.

The Graduate Program Coordinator, in consultation with the student and appropriate faculty members, appoints a committee of three Italian and

Italian adjunct faculty members. The supervisory committee should be formed no later than the first week of the quarter prior to the examination.

The M.A. examinations (written and oral) are to be taken in the final quarter of study.

Doctor of Philosophy in French Studies

Admission Requirements

Applicants for the doctorate in French studies are normally required to present the M.A. degree in French or to demonstrate its equivalent for admission into the Ph.D. program. Students with a background in comparative literature or with a specialization in French within another national literature and language program will be admitted to the Ph.D. program on a case-by-case basis. All incoming doctoral students must have demonstrable, broad knowledge in French literature and culture as well as a general background in critical theory (i.e. course work in critical theory and/or course work that incorporates a strong component of critical theory).

Degree Requirements

The program demands a total of 77 credits (beyond the 45 required for the French Studies' M.A.), of which 25 should be taken in applicable 500-level courses (graduate seminars both inside and outside the division) and 27 as dissertation credits (FRENCH 800). The other 25 credits of 400-level and above courses should be chosen in collaboration with the Graduate Program Coordinator. 10 of these credits can be 600-level independent studies. Doctoral students work closely with the Graduate Program Coordinator in the selection of graduate seminars within French studies and of courses outside French studies that correspond to the students' cross-disciplinary interests. The doctoral coursework should normally be completed in six full-time academic quarters, after which the doctoral student advances to Ph.D. candidate status and completes the minimum 27 hours of dissertation credits. Upon completion of the requisite course credits and the other departmental requirements, the student proceeds, with the approval of the Doctoral Supervisory Committee, to the written general examinations and then to the oral general examinations.

Financial Aid

The department awards annually a number of teaching assistantships. Research assistantships are available on a limited and competitive basis. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the 10 weeks of the quarter.

Course Descriptions

See page 423.

Spanish and Portuguese Studies

C104 Padelford

The educational philosophy of Spanish and Portuguese studies is that knowledge and understanding of other cultures is fundamental in an increasingly global world, and that competence in the languages of those cultures is an indispensable gateway to them. Spanish studies provides students with the four basic language skills (listening, speaking, reading, and writing) in increasing levels of sophistication so that they may read and analyze works of literature written in Spanish as well as understand complex cultural structures and artifacts from Spain, Latin America, and the Latino populations of the U.S. The UW offers beginning and intermediate Portuguese and all levels of Spanish.

Undergraduate Program

Adviser
C104F Padelford, Box 354360
206-543-2075
spanport@u.washington.edu

The Division of Spanish and Portuguese Studies offers the following programs of study:

- * The Bachelor of Arts degree in with a major in Spanish
- * A minor in Spanish

Bachelor of Arts

Suggested First- and Second-Year College Courses: SPAN 101, SPAN 102, SPAN 103, or SPAN 121, SPAN 122, SPAN 123, or SPAN 134; SPAN 201, SPAN 202, SPAN 203. Spanish, Latin American, and Chicano literature. Courses related to history and culture. Courses in English literature and comparative literature.

Department Admission Requirements

1. Completion of SPAN 203, with a minimum cumulative GPA of 2.70 for all Spanish course work completed and a minimum grade of 2.5 in each Spanish course.
2. Completion of at least 10 credits of English composition with a minimum grade of 2.5 in each course. The student may apply while concurrently enrolled in the second English composition course.
3. Admission is competitive, based on the following minimum qualifications:
 - a. Preparation for the major as indicated by a student's grades in courses required for application
 - b. Overall scholastic record
 - c. Personal statement, in Spanish, of interest in and commitment to the major. Other evidence reflecting the student's interest may be appended.
 - d. Completion of the above requirements does not guarantee admission.
4. Application deadline is the first Friday of autumn, winter, and spring quarters, for admission in the fifth week of the same quarter. Applicants denied admission may submit written petitions requesting reconsideration. Applications are available in C104F Padelford.

Major Requirements

59 credits beyond SPAN 203 as follows:

1. SPAN301, SPAN 302, SPAN 303, SPAN 321, SPAN 322, SPAN 323
2. Three 300-level elective courses (maximum of two from film series)
3. Four 400-level courses (one from SPAN 400 through SPAN 409).
4. Other than SPAN 400 through SPAN 409, only one course whose instructional materials are primarily in English may apply toward the major.

Minor

Minor Requirements: Minimum 32 credits above the 203 level as follows:

1. SPAN 301, SPAN 302, SPAN 303
2. Five courses numbered SPAN 304 to SPAN 495, including at least 5 credits from SPAN 400 to SPAN 409.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The study of Spanish and Portuguese is both skills- and content-based, i.e., it has practical and cognitive elements. Students learn to communicate in Spanish or Portuguese, refining their language skills as they acquire a body of knowledge about the literary and cultural history of Spain, Latin America, and the Spanish-speaking populations of the United States. Graduates have found these skills extremely useful as they pursue careers in teaching, business, NGOs and human rights organizations, law, and politics.
- * *Instructional and Research Facilities:* Departmental facilities include a Writing Center for students registered in third-year Spanish. The Center for Spanish Studies, housed in the department, is a joint initiative of the University of Washington, the Education Office of the Embassy of Spain, and the Office of Superintendent of Public Instruction. This center provides services that include workshops for K-12 teachers of Spanish, sponsorship of cultural events, and a lending library of books as well as audio and visual materials.

The department directs two study abroad programs, in Mexico (Oaxaca) and Spain (Cadiz). These programs are "living laboratories." Approximately 75 students participate each year.

- * *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

- * *Research, Internships, and Service Learning:* Internship opportunities are posted on the department Web site as they become available. Also, students may participate in service learning, in which they combine study with service to the community. Students must volunteer two to five hours per week (a minimum of 20 hours per quarter) in organizations that provide services primarily, although not exclusively, to Spanish speakers. Alternatively, they may volunteer in public schools as tutors of different academic themes. Some of the organizations and schools involved include CASA Latina, The Mexican Consulate, El Centro de la Raza, Our Lady of Mt. Carmel, Northwest Immigrant Rights Project, Cascade People's Center, Center for Spanish Studies, John Stanford International School, Bryant Elementary School, John Hay Elementary School, Hamilton Middle School, Nathan Hale High School, the Pipeline Project, and the East Side Literacy program. Students apply and increase their knowledge of the Spanish language in a real context. They are exposed to Hispanic multiculturalism and become active agents of social change in the community. Approximately 18 students participate each year.

- * *Department Scholarships:* An annual scholarship, the Susan B. Johnson Memorial Endowment Fund, is awarded to a student of Spanish for foreign study in Spain.

- * *Student Organizations/Associations:* None.

Of Special Note: 100- and 200-level Spanish courses do not count toward major/minor requirements.

Graduate Program

Graduate Program Coordinator
C104 Padelford, Box 354360
206-543-2075
spanport@u.washington.edu

The Division of Spanish and Portuguese Studies offers programs of graduate study leading to the Master of Arts degree.

The Master of Arts degree program in Hispanic Literary and Cultural Studies was reformed and updated in 2001 to foster study of Hispanic culture, literature, and language together. The program calls attention to the rich diversity of Hispanic cultural texts and to their interdisciplinary study while also promoting broad understanding of Spanish and Latin American literature. The program gives careful attention to acquainting students with the traditions of scholarship in the field as well as a range of current textual theory, criticism, and research methods. Study of Portuguese and other Romance literatures and cultures, comparative literature, Romance and Spanish linguistics, and other related disciplines may be included in the Master's degree program. The degree is earned normally in six academic quarters.

Students who wish to pursue advanced study in Spanish and Portuguese in a post-Master's degree program may do so by entering the doctoral studies programs of Comparative Literature or other departments of the University.

Master of Arts

Admission Requirements

- * Application for admission to the Graduate School
- * Three letters of recommendation
- * A Waiver Form, on which the applicant waives the right to have access to the letters of recommendation.
- * Academic autobiographical statement composed by the applicant in Spanish
- * A cassette recording (no micro-cassettes) of the applicant reading the autobiographical statement mentioned in above, together with any other informal comments the applicant wishes to make.
- * A sample of the applicant's written work in Spanish in some area of Hispanic literature and culture. This may be a copy of a paper written for a course in the area of the applicant's major.
- * Graduate Record Examination (GRE) scores
- * Foreign students should note that the Graduate School requires proof of proficiency in the English language in the form of the TOEFL (Test of English as a Foreign Language) or its computerized version (TOEFLC) or the Michigan Test and also the TSE (Test of Spoken English). A TOEFL score of 500 (or a TOEFLC score of 173) is required for admission, and a score of 580 (or 237 on the computerized form) is required for Teaching Assistant eligibility. Alternatively a Michigan Test score of 80 is required for admission and 90 for Teaching Assistantship eligibility. A minimum score of 55 is required on the TSE.

Degree Requirements

- * A total of 60 applicable credits (400 level and above), 25 of which must be at the 500 level. To remain in good standing the student must maintain a cumulative grade point average of 3.00. The minimum acceptable grade for any given course is 2.7.
- * SPAN 577 (5). Note: SPAN 510 (3) is required of all teaching assistants and is to be taken during or before a student's first quarter of teaching.
- * Distribution requirement: A minimum of 5 credits (normally one course) must be earned in each of the following areas: medieval and "Golden Age" Spain; Spain of the eighteenth and nineteenth centuries; twentieth-century Spain; colonial and nineteenth-century Latin America; and twentieth-century Latin America.
- * M.A. candidates must pass an auxiliary language reading ability examination in a language other than English and Spanish. Normally this language will be selected from among the Romance Languages and German. Students stipulate their choice at the time of first enrollment, after consultation with the Graduate Program Coordinator, and is examined no later than the fourth quarter of enrollment. The student consults first with the division's academic adviser and then completes arrangements with the language department administering the examination or with the Educational Assessment Center.
- * The M.A. examination: The M.A. examination is written in the sixth quarter of study, ordinarily in Spring quarter.
- * Thesis or essay: Students may elect to include in the required 60 applicable credits 10 credits of M.A. thesis (SPAN 700) or 5 credits of M.A. essay (SPAN 590). Neither the thesis nor the essay is a degree requirement. The M.A. thesis (minimum 40 pages of text) and M.A. Essay (minimum 20 pages) are directed by a graduate faculty member and submitted to the Graduate Studies Committee for its approval.

Financial Aid

The department awards annually a number of teaching assistantships. The assistant normally participates in teaching three classes during the academic year. Each class is limited to approximately 25 students and meets five hours a week for the ten weeks of the quarter.

Course Descriptions

See page 428.

Scandinavian Studies

318 Raitt

Scandinavian studies is concerned with the study of languages, literature, history, politics, and cultures of Denmark, Finland, Iceland, Norway, Sweden, and the Baltic States of Estonia, Latvia, and Lithuania. Emphasis is placed both on contemporary literature and culture and on historical development. Although most courses designed for majors are taught in the original languages, a broad spectrum of courses designed primarily for nonmajors is offered in English.

Undergraduate Program

Adviser
305Z Raitt, Box 353420
206-543-6099

The Department of Scandinavian Studies offers the following programs of study:

- * The Bachelor of Arts degree with a major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies.
- * Minors in Danish, Finnish, Norwegian, Swedish, Baltic studies, and Scandinavian area studies.

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Danish, Estonian, Finnish, Latvian, Lithuanian, Norwegian, or Swedish.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Danish, Finnish, Norwegian, or Swedish: 65 credits, of which 35 are in upper-division courses. The 65 credits include 30 credits in first- and second-year language training, 15 credits in literature courses in the chosen language, one course in Scandinavian area studies, a course in the history of Scandinavian languages or Finnish cultural studies, a course in Scandinavian literature in translation, and a senior essay (SCAND 498).

Scandinavian Area Studies: 65 credits, of which 30 are in upper-division courses. The 65 credits include 30 credits in the chosen Scandinavian or Baltic language (normally first and second year), a minimum of one course from each of four area-studies fields (Scandinavian folklore and film; literature in translation; history and mythology; society and politics), and a senior essay (SCAND 498).

Minor

Minor Requirements:

Baltic Studies: 35 credits as follows:

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 20 credits of upper division Scandinavian coursework, including at least one Baltic studies course from the following: SCAND 344, 345 454, 455
3. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper division language courses and must earn a minimum total of 25 credits in relevant coursework

Danish, Finnish, Norwegian, or Swedish: 35 credits as follows:

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 15 credits of second year Danish, Finnish, Norwegian, or Swedish
3. 5 credits of upper division Scandinavian coursework or 5 credits of an upper division language course
4. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper division language courses and must earn a minimum total of 25 credits in relevant coursework.

Estonian, Latvian, Lithuanian: 35 credits as follows:

1. 15 credits of first year Estonian, Latvian, or Lithuanian
2. 15 credits of second year Estonian, Latvian, or Lithuanian
3. 5 credits of Baltic studies coursework (SCAND 344, SCAND 345, SCAND 454, or SCAND 455), or 5 credits of an upper division language course.
4. Students entering the UW with language proficiency in Estonian, Latvian, or Lithuanian beyond the first year of language training must take an additional 10 credits of upper division language courses and must earn a minimum total of 25 credits in relevant coursework.

Scandinavian Area Studies: 35 credits as follows:

1. 15 credits of first year Danish, Finnish, Norwegian, or Swedish
2. 20 credits of upper division Scandinavian coursework
3. Students entering the UW with language proficiency in Danish, Finnish, Norwegian, or Swedish beyond the first year of language training must take an additional 10 credits of upper division language courses and must earn a minimum total of 25 credits in relevant coursework.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Graduates of the Department of Scandinavian Studies have an advanced level of proficiency in a Scandinavian, Fenno-Ugric, or Baltic language. They can talk about a wide range of concrete topics in a sustained conversation and have the ability to interpret and write about literary texts, non-fiction, and other media. Graduates also have knowledge of major figures, ideas, and institutions in Baltic or Nordic culture, history, literature, and politics that enriches a global perspective. They have the ability to research and synthesize source material in the target language and can produce a scholarly essay in English on a topic within their area of concentration.

Graduates of the Scandinavian studies program have the qualifications to embark on careers that require skills in the interpretation of information in various media, critical analysis, and effective communication and to continue in graduate programs and professional schools that value an international perspective.

* *Instructional and Research Facilities:* None

* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

* *Research, Internships, and Service Learning:* Internships at museums or with Scandinavian businesses are possible. Exchange program opportunities with Aarhus, Copenhagen, Linköping, Stockholm, Uppsala, Bergen, Oslo, Åbo/Turku, and Helsinki also exist.

* *Department Scholarships:* The department offers several scholarships for students of Danish, Finnish, Norwegian, and Swedish.

* *Student Organizations/Associations:* The Danish Club, the Norwegian Club, the Swedish Club, and the Finnish Club.

Graduate Program

Graduate Program Coordinator
318 Raitt, Box 353420
206-543-0645
uws cand@u.washington.edu

The Department of Scandinavian Studies offers graduate programs of study leading to the Master of Arts and Doctor of Philosophy degrees. For the M.A. degree, the emphasis may be placed on Old Icelandic (Old Norse), Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies. Ph.D. degree aspirants must complete one quarter's study of Old Icelandic and concentrate their studies primarily within one of five areas: Danish language and literature, Finnish language and literature, Norwegian language and literature, Swedish language and literature, or Scandinavian area studies.

For the graduate student, the programs in Scandinavian languages and literature open several areas of study: medieval, particularly Old Icelandic; modern, including the eighteenth century; Romanticism; the Modern Breakthrough; and the twentieth century. Attention is paid to the history of the Scandinavian languages, prose, drama, and poetry. Opportunities for supervised study and specialization also exist in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies. There are also opportunities for comparative-literature study.

Master of Arts

For the M.A. degree, two options are available, each allowing the student to emphasize a target language while pursuing courses in Scandinavian languages, literature, or area studies.

1. An emphasis on Scandinavian languages and literature includes acquisition of a working knowledge of literary history, critical theory and text analysis, plus study of one secondary area.
2. An emphasis on Scandinavian area studies includes the study of Scandinavian folklore, mythology, history, politics, society, and Baltic studies, with an emphasis in one of these areas.

Admission Requirement

Bachelor of Arts degree with major in Danish, Finnish, Norwegian, Swedish, or Scandinavian area studies, or equivalent background, including advanced language proficiency in one Nordic language.

Degree Requirements

Minimum of 40 credits in courses or seminars in Scandinavian and related subjects approved by the department, of which at least 20 credits must be in courses numbered 500 and above; reading knowledge of French or German (another non-Scandinavian language may be substituted with faculty approval); written and oral examination; option between thesis and non-thesis program. Candidates in Scandinavian languages and literature must satisfy the departmental requirement in Old Icelandic.

Doctor of Philosophy

For the Ph.D. degree, the student concentrates primarily on one of two areas: Scandinavian languages and literature, or Scandinavian area studies, with an emphasis on the student's chosen target language. Major attention is given to the history of the Scandinavian languages, literary history and theory, and genre study. Opportunities for graduate work also exist in such areas as Scandinavian history, politics, mythology, folklore, and Baltic studies.

Admission Requirements

Master of Arts degree with major in Scandinavian languages and literature or equivalent background.

Degree Requirements

40 credits beyond the master's degree in courses or seminars in Scandinavian languages and literature and related subjects approved by the department, one quarter's study of Old Icelandic, a reading knowledge of French and German (other non-Scandinavian languages may be substituted with faculty approval), General Examination for admission to candidacy, 27 credits of SCAND 800 (dissertation) taken over at least three quarters, and a Final Examination on the dissertation.

Financial Aid

Teaching assistantships in Danish, Finnish, Norwegian, Swedish, and Scandinavian Area Studies are usually available, as well as occasional research assistantships. If funding allows, a Baltic-language teaching assistantship may be available.

Course Descriptions

See page 431.

Slavic Languages and Literatures

M253 Smith

Slavic languages and literatures include the principal East European languages and literatures and Slavic linguistics. Languages include Bulgarian, Czech, Polish, Romanian, Russian, Croatian/Serbian, and Ukrainian.

Undergraduate Program

Adviser
M253A Smith, Box 353580
206-543-6848
slavicll@u.washington.edu

The Department of Slavic Languages and Literatures offers the following programs of study

- * The Bachelor of Arts degree with a major in Slavic languages and literatures with options in Russian and East European languages and culture
- * Minors in Russian language, Russian literature/Slavic literatures, and Slavic languages.

Bachelor of Arts

Suggested First- and Second-Year College Courses: First- and second-year Russian. Courses that develop writing skills.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Both options must be completed with a minimum cumulative GPA of 2.50 in all RUSS and SLAV courses completed (UW and transfer), with a minimum grade of 2.0 in each course presented for the major. Transfer students are required to complete at least 15 graded credits in Slavic department courses at the UW.

Russian Option (60 credits beyond second year):

1. RUSS 301, RUSS 302, RUSS 303, or the equivalent
2. RUSS 401, RUSS 402, RUSS 403, or the equivalent
3. RUSS 321, RUSS 322, RUSS 323, RUSS 451
4. 10 credits from the following: RUSS 324, RUSS 351, RUSS 352, RUSS 420, RUSS 421, RUSS 422, RUSS 423, RUSS 424, RUSS 425, RUSS 430, RUSS 461, RUSS 490, SLAV 351, SLAV 420, SLAV 423, SLAV 425, SLAV 426, SLAV 490; HSTEU 444, HSTEU 445.

East European Languages and Culture Option (55 credits):

1. Two years of a principal East European language, or the equivalent
2. SLAV 351
3. 20 credits of literature, culture, linguistics, and history, as appropriate.

Minor

Minor Requirements:

Transfer students are required to complete at least 15 graded credits in Slavic department courses at the UW.

Russian Language: 25 credits to include RUSS 301, RUSS 302, RUSS 303 and 10 credits from RUSS 351, RUSS 352, RUSS 401, RUSS 402, RUSS 403, RUSS 451, SLAV 351, SLAV 425.

Russian Literature/Slavic Literatures: 25 credits to include RUSS 321, RUSS 322, RUSS 323 and 10 credits from RUSS 420, RUSS 421, RUSS 422, RUSS 430, RUSS 461, RUSS 490 (Russian-literature option), or 10 credits from CR SB 420, CZECH 420, POLSH 420, SLAV 420, SLAV 423, SLAV 490 (Slavic-literatures option).

Slavic Languages: 25 credits to include language courses in a Slavic language (other than Russian) numbered 404, 405, 406; SLAV 351; and 5 credits from CR SB 420, CZECH 420, POLSH 420, SLAV 423, SLAV 490.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Graduating majors in Slavic languages and literatures have a solid command of a Slavic language with speaking, listening, reading and writing, and translation skills at the intermediate high or advanced level. They have a broad knowledge of the history of the relevant country, and of its modern culture. Students in the literature and culture option have a general knowledge of major periods and detailed knowledge of two or three particular authors or genres. Students in the linguistics option have a good understanding of Slavic languages in general and the language of their specialization in particular, as well as knowledge of major issues in contemporary phonology, morphology, and syntax. All students develop good general analytical skills and the ability to explore and understand another culture through mastery of its language.
- * *Instructional and Research Facilities:* None.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* None.
- * *Department Scholarships:* Vadim Pahn Scholarship for continued study of Russian in an intensive summer language program.
- * *Student Organizations/Associations:* Rodnoi Ugolok, the Russian student society

Graduate Program

Graduate Program Coordinator
M268 Smith, Box 353580
206-543-6848

The Department of Slavic Languages and Literatures offers a complete program of courses and seminars leading to the Master of Arts and Doctor of Philosophy degrees in Russian and East European languages, literatures, and cultures. Languages taught in the department include Czech, Old Church Slavonic, Polish, Russian, and Croatian/Serbian.

The graduate program is organized to permit completion of the master's degree in four to six quarters and the doctoral degree in three additional years. The duration of each program, however, will depend on the extent of the student's preparation upon entrance into the program.

Master of Arts

Admission Requirements

A student seeking admission to the M.A. program should have a bachelor's degree in Russian or Slavic Studies which includes four years of Slavic

language study. Applicants with equivalent experience and basic coursework in Slavic literatures, cultures and history will be considered. A student not meeting these requirements may be given conditional admission but will be expected to make up any deficiencies. Consideration will be given to those with three years of language who enroll in 4th-year Summer Intensive Russian the quarter before entry into the program.

All students entering the program will take a diagnostic language test to establish their level of proficiency and determine what further instruction may be necessary.

Degree Requirements

40 credits minimum, as follows:

- * Required Slavic core courses, 8 credits: RUSS 501 (2), RUSS 502 (3), SLAV 501 (2)
- * Required Slavic core course, one of the following (2-3 credits): SLAV 518 (2), SLAV 519 (3)
- * Required Slavic linguistics courses, 10 credits from the following: SLAV 550 (5), SLAV 551 (5), SLAV 570 (3-5, max. 15)
- * Required Slavic literature courses, 10 credits from the following: RUSS 521 (5), RUSS 522 (5), RUSS 523 (5), SLAV 520 (5)
- * Elective courses, 10 credits from above or from the following: BCS 403 (5), BCS 420 (5), CZECH 403 (5), CZECH 420 (5), POLSH 403 (5), POLSH 420 (5), RUSS 520 (5, max. 20), RUSS 526 (5, max. 15), RUSS 542 (5, max. 20), RUSS 543 (5), RUSS 570 (5), RUSS 577 (5), SLAV 420 (5, max. 15), SLAV 423 (5), SLAV 425 (5), SLAV 426 (5), SLAV 490 (3-5, max. 15), SLAV 565 (4), SLAV 566 (4)

Examinations

- * *Russian Language:* This examination is based on texts given to the student on the day before the exam. For the exam itself, clean copies of the texts are supplied and the student has three hours to translate specified passages and write an essay. After the exam, the student will discuss (in Russian) the content and language of the texts with two examiners. The exam is graded High Pass, Pass, and Fail. Students failing the exam must repeat RUSS 501 and/or RUSS 502 before taking the exam again. A High Pass is normally required for admission to the Doctoral Program.
- * *Other Slavic Languages:* Students whose program is centered around a Slavic language other than Russian will make special arrangements for further study and eventual testing in their target language.
- * *M.A. Comprehensive Exams:* The M.A. Examinations are normally in three fields and taken within a period of two weeks. They are four hours long taken in situ. With the permission of the advisor, students may request three-day take-home essays (usually from Friday morning to Monday morning).

Doctor of Philosophy

Admission Requirements

Applicants to the doctoral program in Slavic Languages and Literatures are expected to possess an M.A. or equivalent degree. They are admitted by vote of the graduate faculty on the basis of their language skills (Slavic and English), general background in Slavic cultures, and a comprehensive statement of purpose.

Degree Requirements

- * *Coursework:* At least 90 credits, including graduate course credits taken toward the M.A. Degree, and at least one full year of residence at the University of Washington.
- * *Readings:* The size of the department's doctoral program dictates that many of the post-M.A. credits will be satisfied with individually arranged Readings Courses. The courses should be mutually agreed upon by the student and the Committee Chair and they should be organized with an eye to the comprehensive examinations. Those with an emphasis on Slavic linguistics will be expected to include a third Slavic language as a field.
- * *Comprehensive Examinations:* As a prerequisite for scheduling the General Examination, the candidate must demonstrate reading ability in a language appropriate for research purposes. This requirement may be fulfilled either by taking a standardized examination in the appropriate language or by an in-house examination given by a member of the Graduate Faculty of the Slavic Department. The two-hour exam will

consist of a journal article (5-7 pages), which the student will summarize and a portion of which s/he will translate. The particular language may be negotiated by the student with his or her advisor on the basis of the research interests of the student.

The student takes four Written Field Examinations, which will be followed two weeks later by the General (Oral Comprehensive) Examination. One of the Field examinations may be in a third Slavic language or in a field from another department at the university. At the discretion of the examiner, the examinations may be either four-hour examinations in situ or three-day take-home essays. A student may be excused from one field examination if the Committee accepts a paper published in a reviewed journal in lieu of that examination.

The student will discuss each potential examination with the examiner for that field, presenting, where required, a personal reading list for the field.

Upon completion of the Written Examinations, the exams and the comments prepared by each examiner will be made available to all members of the Committee as well as to the student. The examinations will be kept in the student's permanent file in the departmental office.

The General (Oral Comprehensive) Examination must be set up with the Graduate School at least three weeks before the examination is scheduled. The procedure is described in the Graduate Student Services' how-to instructions on the web.

Part of the Oral Comprehensive Examination is usually a presentation of the dissertation proposal.

- * *Dissertation and Defense:* After the successful completion of the General Examination, the candidate submits a detailed dissertation prospectus to be approved by the Supervisory Committee. The candidate must register for a minimum of three quarters of Slavic 800 at a maximum of 10 credits per quarter before submitting a dissertation for defense. With the approval of the Dissertation Reading Committee (usually a subset of the Supervisory Committee), the candidate will defend the dissertation in a Final Examination open to the graduate faculty of the university and invited guests.

Research Facilities

The Suzzallo Library holdings include some 400,000 titles in Slavic languages and in other languages on Slavic subjects. It subscribes to all important periodicals and newspapers in Russian and other languages and has exceptionally strong holdings in rare and antiquarian Slavic titles on microfilm and microfiche.

Assistantship Opportunities

The department regularly offers a number of teaching assistantships. In conjunction with the Henry M. Jackson School of International Studies, students in the department are eligible for several other types of fellowships.

Course Descriptions

See page 435.

Social Science (Evening Degree)

103 Lewis Hall

This multidisciplinary major includes upper-division social science courses selected by faculty of the College of Arts and Sciences. Students explore diverse political, social, environmental, gender, ethnic, and cultural perspectives in pursuit of their degrees. Coursework encourages greater understanding of issues, ideas, and themes in history and in the contemporary world. Analytical, research, and communication skills which can enhance a person's career opportunities are emphasized.

The coursework in social science is organized into three tracks:

- * Social and Environmental Issues
- * Law, Politics, and the Economy
- * Gender, Ethnicity, and Culture

Social and Environmental Issues addresses key ecological, environmental, and social issues of tribal, peasant, industrial, and post-industrial societies

from around the world. This track includes assessments of how technological, ecological, environmental, economic, cultural, and sociopolitical factors interact to affect the form and function of social, cultural, and political systems and institutions. It also features courses which explain classical and contemporary theories of anthropology, economics, geography, history, political science, and sociology bearing on these issues.

Law, Politics, and the Economy deals with the role and function of government, legal institutions, and economic and political processes, focusing on the complex interaction of political and economic forces which shape social life. Important areas of study include the character of political power and inequality, law and other sources of state legitimacy, international relations and the economic interdependence of nation-states, and the role of the state in maintaining social order and ameliorating conflict within and between societies.

Gender, Ethnicity, and Culture studies the cultural, geographic, historical, political, psychological, and social factors which define, shape, and change the various peoples of the United States. Racism, age and sex discrimination, the status and role of women, the treatment of immigrants, the emergence of classes and sociocultural interest groups, and aspects of religious movements and religious conflict are core topics. Courses assessing theories that examine and explain these issues are also essential.

Undergraduate Program

Adviser
103 Lewis Hall, Box 353921
206-543-6160
advisers@extrn.washington.edu

Social Science offers the following program of study:

- * The Bachelor of Arts degree with a major in social science

Bachelor of Arts

Suggested First- and Second-Year College Courses: English composition and additional writing. Introductory courses in Individuals & Societies (I&S); Visual, Literary, & Performing Arts (VLPA); and Natural World (NW). First-year foreign language study.

Program Admission Requirements

1. Admission to the Evening Degree program (separate from admission to the UW day program).
2. 75 college quarter credits. Most students admitted have completed two years of lower-division college work.
3. See adviser for evaluation of applicable courses and credits.

Major Requirements

60 credits from the approved list of social science survey and track courses, as follows:

1. Survey courses (15 credits maximum). Normally at the 200 level.
2. Primary track (25-35 credits from one track).
3. Track electives (10-20 credits). From courses in other than the primary track.
4. Of the 60 credits, not more than 15 in 200-level courses, at least 45 in 300- and 400-level courses, and at least 15 in 400-level courses.
5. For list of applicable courses, consult the adviser or go to http://www.evedegree.washington.edu/edp/majors/social_courses.asp

Additional Degree Requirements

1. English composition and additional writing (15 credits)
2. Quantitative and Symbolic Reasoning (Q/SR) (4-5 credits)
3. Foreign language – through the third quarter of a single foreign language (0 to 15 credits, depending on placement)
4. Areas of Knowledge
 - a. Visual, Literary, & Performing Arts (VLPA) (20 credits)
 - b. Individuals & Societies (I&S) (20 credits)
 - c. Natural World (NW) (20 credits)
 - d. Some credits in I&S and/or VLPA may count also toward the major
5. Additional work to complete a minimum 180 credits overall.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* Social science graduates are prepared to think critically and communicate effectively about the interplay among political, demographic, cultural, and social dynamics in considering domestic and international legal, media, environmental, gender, and ethnicity issues. They are able to examine complex issues in a contemporary and historical context. Majors develop the ability to analyze and evaluate issues from varied disciplinary perspectives. A greater respect for diversity and the ability to integrate knowledge when applying learning to the challenges of living in a complex global society results.

Specific skills acquired include writing, critical thinking, research, analytical thinking, integrative cognitive abilities, and effective public speaking.

Social science majors pursue widely varied careers, including labor relations, human resources, law, social work, broadcast journalism, corporate training, private enterprise, education, public administration, mental health, marketing, and non-profit management.

* *Instructional and Research Facilities:* Students use all university library resources and facilities corresponding with their individual research needs. In addition, each of the contributing social science academic departments offers individual resources to majors. Check with advisers for options.

* *Honors Options Available:* None offered.

* *Research, Internships, and Service Learning:* The program works collaboratively with students interested in pursuing independent study and research opportunities through academic departments that contribute to the major. Opportunities for work with the Carlson Center, Office for International Exchanges, and service learning are possible for all students.

* *Department Scholarships:* The Evening Degree program awards need-based financial aid assistance each year to students from a general fund. Two additional scholarship resources are the Rodney I. Straub Endowed Scholarship and the Nicole Snyder Dettmar Endowed Scholarship.

* *Student Organizations/Associations:* None

Sociology

202 Savery

The Department of Sociology has a strong commitment to research, publication, and training and is dedicated to providing a rich undergraduate program, both for students majoring in sociology and for others who wish to learn about human society and social relations.

Undergraduate Program

Adviser
117 Savery, Box 353340
206-543-5396
asksoc@u.washington.edu

The Department of Sociology offers the following program of study

* The Bachelor of Arts degree with a major in sociology

Bachelor of Arts

Suggested First- and Second-Year College Courses: SOC 110, SOC 212, SOC 240, SOC 270, SOC 271, or any 200-level sociology courses. General coursework developing critical thinking or analytical skills.

Department Admission Requirements

1. Any two of the following: SOC 110 or SOC 111, SOC 212, SOC 240, SOC 270, SOC 271.
2. Minimum cumulative GPA of 2.50 for all courses applied to major requirements at the time of application. Special circumstances will be reviewed on a case-by-case basis.
3. Minimum grade of 2.0 in each course applied to major requirements.

4. Minimum cumulative GPA of 2.00 for all prior college work.
5. A one- to two-page personal statement.
6. Application deadlines are the second Friday of each quarter. All applicants who meet the qualifications stated above will be admitted in time to register as Sociology majors for the following quarter.

Major Requirements

50 credits as follows:

1. Introductory courses (10 credits): Two courses from SOC 110 or SOC 111, SOC 212, SOC 240, SOC 270, and SOC 271.
2. Sociological methods and theory (10 credits): SOC 220 (5) and SOC 316 (5).
3. Upper division sociology electives (20 credits): Chosen from any 300-level or 400-level sociology courses, excluding SOC 316, SOC 395, and independent study courses (SOC 399, SOC 499).
4. Sociology electives (10 credits): Chosen from any other sociology courses. A maximum of five credits of independent study (SOC 399, SOC 499) can be counted.
5. Minimum grade of 2.0 in any course applied to major requirements. Minimum cumulative GPA of 2.50 for courses applied to major requirements. 25 of 50 required sociology credits completed in residence at UW.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* The Department of Sociology's undergraduate degree is oriented toward a traditional liberal arts education, with the aim of educating majors to think in a systematic way about the relationships among individuals, groups, organizations, and societies. Sociology majors engage in current research in areas including political sociology, social stratification, race and ethnicity, deviance and social control, and demography. Sociology majors also develop quantitative and analytical skills in research methods and social theory courses.

* *Instructional and Research Facilities:* The department is a member of the Center for Social Science Computing and Research (CSSCR). CSSCR maintains an extensive data archive, and offers consulting support and computer lab access to students in Sociology courses. Sociology is also affiliated with the Center for Studies in Demography and Ecology (CSDE) and the Center for Statistics and the Social Sciences (CSSS), providing interdisciplinary courses, seminars, and research opportunities for Sociology students.

* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.

* *Research, Internships, and Service Learning:* Sociology majors participate in a variety of internships each quarter. Students can receive academic credit under the supervision of a Sociology faculty member. See adviser for details.

* *Department Scholarships:* None offered.

* *Student Organizations/Associations:* A chapter of the Alpha Kappa Delta International Sociology Honor Society organizes events involving undergraduates with faculty and graduate students.

Graduate Program

Graduate Program Coordinator
117 Savery, Box 353340
206-543-5396
asksoc@u.washington.edu

Sociology seeks to explain social structure, social institutions, and social interaction. There are three emphases in the graduate training program at the University of Washington: understanding and critically evaluating social theory and empirical research; doing theoretically guided research that explores, assesses, and further develops explanatory theories; and developing communication skills (with emphasis on teaching and scholarly writing) that will be useful in transmitting sociological knowledge. The department has graduate program specialization in demography and ecology, deviance and social control, race and ethnic relations, family systems, gender studies, institutional analysis, quantitative research methodology, social psychology, sociological theory, and stratification.

Emphasis is on empirical research aimed at developing explanatory theories. Students are trained in problem formulation, research design, data gathering and analysis, and bringing data to bear on significant questions. Instruction is offered in various methods: statistical, survey, demographic and ecological, field research, and historical. Students learn social research by participating in faculty projects or developing their own studies. Also available is a program training students to teach.

Master of Arts

Admission Requirements

- * Applicants for admission to the Master of Arts program are evaluated on undergraduate performance, Graduate Record Examination scores, statement of educational plans, recommendations, and samples of written work.
- * *Application Deadlines:* Admission offers are made for autumn quarter only and the annual departmental application deadline is January 15. Because of new immigration policies and visa regulations, the UW Graduate Admissions Office strongly recommends that international applicants submit the required application materials to their office by November 1
- * *Application Materials:* All information about the University of Washington Department of Sociology graduate program and the application materials are online. The Department of Sociology no longer sends out printed information or application materials. All applicants are expected to use the web-based application. Applying to the sociology graduate program involves application to both the University of Washington Graduate School and the Department of Sociology. See departmental Web site for more information.

Degree Requirements

The master's program is designed primarily as preparation for Ph.D. work; it is not a terminal degree, although it may serve as good training for non-academic research. The M.A. program consists of three elements:

- * Substantive training: coursework in substantive areas and social theory.
- * Methodological training: work in social statistics, general social science methodologies, and a data analysis practicum.
- * The master's thesis: independent empirical research conducted under the supervision of the M.A. Committee.

Students working toward an M.A. degree must complete 45 graduate credits or more with a minimum cumulative GPA of 3.30:

- * Sociological Theory -- SOC 510 (3)
- * Statistics -- SOC 504, SOC 505, SOC 506 (3, 3, 3)
- * Logic of Social Inquiry -- SOC 508 (3)
- * Proseminar -- SOC 501 (1, 1, 1)
- * M.A. Thesis -- SOC 700 (9)
- * Electives -- 18 credits.

A minimum of 12 graded elective credits must be in courses offered by the sociology department. All courses should be at the 500 level or above, although a student may petition for inclusion of a 400-level course. No more than 3 elective credits may be assigned a letter grade (e.g., S or CR) in place of a numerical grade. Minimum GPA of 3.30.

Doctor of Philosophy

Admission Requirements

For admission to the Ph.D. program, students are expected to have completed an M.A. degree in sociology in this department or elsewhere. Occasionally, M.A. degrees in other fields are accepted as a basis for admission to the Ph.D. program. The department encourages applications from minority students.

See above under Master of Arts section for admission requirements.

Degree Requirements

45 credits beyond the Master of Arts requirements (above) as follows:

- * 3 graded credits in theory
- * 6 graded credits in approved methods
- * 9 elective credits
- * 27 dissertation credits

Additionally, students must maintain a GPA of 3.30, pass a minor area exam, pass a major area exam, pass the General Exam (prospectus defense), pass the Final Exam, and submit approved dissertation to the Graduate School.

Financial Aid

Fellowships, research assistantships, and teaching assistantships are available to qualified graduate students including those in their first year of training.

Course Descriptions

See page 438.

Speech and Hearing Sciences

210 Eagleson

Speech and hearing sciences concern the processes and disorders of human communication. This includes the study of normal hearing, speech, and language development, speech acoustics, speech physiology and perception, hearing, the nature of language, speech and hearing disorders in children and adults, social and cultural aspects of communication disorders, and the clinical processes involved in identification, prevention, and remediation of those disorders.

Undergraduate Program

Adviser
210 Eagleson, Box 354875
206-685-7403
sphscadv@u.washington.edu

The Department of Speech and Hearing Sciences offers the following program of study:

- * The Bachelor of Science degree with a major in speech and hearing sciences

Bachelor of Science

Suggested First- and Second-Year College Courses: PSYCH 101, BIOL 118, LING 200, introductory math and statistics courses.

Department Admission Requirements

Admission is competitive. The admissions committee reviews all applicants based on the following criteria: GPA (minimum 2.50 overall GPA guarantees consideration but not admission), personal statement reflecting an interest in and commitment to speech and hearing sciences; other evidence of a commitment to becoming a speech and hearing sciences major. Students may apply any time after they have earned 60 credits. The application deadline for current UW students is Monday of the third week of the quarter for admission the next quarter; transfer students may apply to the department and the University concurrently. Admission is for autumn, winter, or spring quarter. Only students admitted to the UW are eligible for admission to the major. Applicants will be notified of the department's decision within four weeks. Applications and additional information are available outside 210 Eagleson and on the department's Web site.

Students who meet admission requirements are eligible for one of two options: Option 1, General Academic, is intended to provide broad perspectives of the discipline, but not to prepare students specifically for careers in clinical speech pathology and audiology. It is appropriate for students with interests in education, health care, and communication. Option 2, Speech and Hearing Sciences and Disorders, is intended for students interested in graduate study in speech and hearing sciences and clinical speech-language pathology and audiology. (Note that graduate study is required for the professions of speech language pathologist and audiologist.)

Major Requirements

Core Requirements for Both Options: 32 credits in the following courses: SPHSC 250, SPHSC 261, SPHSC 302, SPHSC 303, SPHSC 304, SPHSC

320, SPHSC 371, SPHSC 461. A cumulative GPA of 3.00 is required in core courses for students following Option 2.

Option 1, General Academic: 71-73 credits as follows:

1. Core requirements listed above (32 credits)
2. 22 credits from the following: SPHSC 305, SPHSC 308, SPHSC 405, SPHSC 406, SPHSC 425, SPHSC 445, SPHSC 462, SPHSC 499 (6 credits maximum)
3. BIOL 118 (5 credits)
4. A 3-5 credit college-level mathematics course (not including MATH 098, MATH 100, MATH 102, MATH 103, or other remedial, historical, or methodology math course) or statistics course (not including STAT 111)
5. Minimum 9 credits at the 200 level or above in psychology, educational psychology, or special education, or 300 level or above in linguistics.

Option II, Speech and Hearing Sciences and Disorders: 81-83 credits as follows:

1. Core requirements listed above (32 credits)
2. SPHSC 305, SPHSC 308, SPHSC 405, SPHSC 406, SPHSC 425, SPHSC 445, SPHSC 471, SPHSC 481 (32 credits)
3. BIOL 118 (5 credits)
4. A 3-5 credit college-level mathematics (not including MATH 098, MATH 100, MATH 102, MATH 103, or other remedial, historical, or methodology math course) or statistics course (not including STAT 111)
5. Minimum 9 credits at the 200 level or above in psychology, educational psychology, or special education, or 300 level or above in linguistics.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The graduate will (1) have knowledge of the following: mechanisms involved in speech, language, and hearing; societal implications of language differences and of disorders of speech, language, and hearing; opportunities in, and requirements for, careers available to those in the speech and hearing sciences. (2) understand the following: normal acquisition of speech and language; the etiology and nature of communication disorders across the lifespan; principles and procedures for diagnosis and treatment of speech, language, and hearing disorders; the manner in which context (specifically, situation, social/interpersonal, and culture context) influences communication and disorders; social-cultural aspects of communication development and disorders. (3) have the following abilities: to analyze language in terms of its auditory, phonetic, phonological, morphological, and syntactic properties; to utilize strategies for solving scientific problems; to read and understand relevant literature; (4) have experience with a research project
- * *Instructional and Research Facilities:* Research labs, computer lab, and clinic located in the department.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* None offered
- * *Department Scholarships:* None offered
- * *Student Organizations/Associations:* The National Student Speech Language Hearing Association (NSSLHA) UW chapter, 153 Eagleson.

Graduate Program

Graduate Program Coordinator
205 Eagleson, Box 354875
206-685-7402
sphscadv@u.washington.edu

The Department of Speech and Hearing Sciences offers the Master of Science, Doctor of Audiology, and Doctor of Philosophy degrees. The program consists of a wide range of course work and seminars providing opportunities for the development of scholarly and professional competence in various areas of specialization: speech and language acquisition, phonetics, speech production, hearing, hearing development, psychoacoustics, physiological acoustics, speech perception, and human communication disorders related to language, speech, and hearing. At the Doctor of Audiology (Aud) and speech-language pathology master's (SLP MS) level, the specific focus is on the clinical procedures involved in the identification, prevention, and remediation of communication disorders. To complement departmental curricula in various specialization areas, close interdisciplinary

relationships are maintained with other University departments and off-campus centers. Advanced degrees in the speech and hearing sciences equip the student to do research, to teach at the college and university level, and to provide clinical services to the communicatively impaired.

Master of Science

Admission Requirements

- * GRE scores
- * A minimum GPA of 3.00 during the last 90 quarter credit hours of study (60 semester)
- * Bachelor's degree with a major in Speech-Language Pathology (Speech and Hearing Science, Communication Disorders, or a similarly named major) or other major with postbaccalaureate certification in Speech-language Pathology.
- * Entrance to the program is during summer and autumn quarters only. Deadline is February 1st.

Degree Requirements

113 credits, as follows:

- * Basic Science Coursework (40.5 credits):
 - o 18 credits with 9 credits minimum in the biological or physical sciences and math or statistics with at least one course in biological or physical science and one course in math or statistics; and 9 credits minimum in the behavioral and/or social sciences
 - o 22.5 credits in basic human communication processes (normal development and use of speech, language and hearing) with at least one course in anatomic and physiological bases, at least one course in physical and psychophysical bases, and at least one course in linguistic and psycholinguistic aspects
- * Professional Coursework (54 credits):
 - o Speech-Language Pathology Certification: 54 credits must concern the nature, prevention, evaluation, and treatment of speech, language, and hearing disorders. 45 credits must be in speech-language pathology. 45 credits (not necessarily the same 45 as above) of the 54 credits must be at the graduate level. (A maximum of 9 credits from practicum and 9 credits from thesis may count towards the total 54 credits and the 45 credits SLP, but not applied to the following subcategories.) 31.5 credits of the 45 credits in SLP must be at the graduate level, 9 credits of which must be in speech disorders and 9 credits of which must be in language disorders.
 - o Audiology: 9 credits of the 54 credits must be in audiology courses. 4.5 credits must be in hearing disorders and evaluation. 4.5 credits must be in habilitative/rehabilitative procedures with individuals who have hearing impairment.
- * Additional SPHSC credit hours (18 credits): 18 additional credits in speech, language, and hearing coursework distributed between the Basic Science Coursework and the Professional Coursework.
- * Additional program requirements: Minimum of 36 quarter credits of non-practicum graduate work at the 400 level or above. Minimum of 18 of the 36 quarter credits in courses numbered 500 and above. No more than 9 credits of courses 500 level and above can be thesis credits. Satisfactory completion of all didactic and practicum requirements detailed above. Satisfactory completion of written thesis and oral defense of the thesis. Minimum of 9 quarter credits of thesis (SPHSC 700) for students taking thesis option. Students completing the thesis must take a course in statistics at the 400 level or above.
- * Students will also satisfactorily complete requirements for the Certificate of Clinical Competence of the American Speech-Language-Hearing Association by registering for the required coursework and practica, pre-internship and internship credits.

Doctor of Philosophy

Admission Requirement

Students who wish to work toward the Ph.D. degree must have completed a bachelor's or master's degree depending upon area of interest. Since the doctoral program does not lead to clinical or professional certification, students who wish to satisfy minimum standards of clinical competence in speech-language pathology or audiology typically complete the majority of this preparation before entering the doctoral program.

Degree Requirements

The academic programs for students in the Ph.D program are planned on an individual basis in consultation with the student's faculty committee.

Concentration can occur in basic and applied research. Courses, seminars, laboratory experiences, and assistantships are selected to provide preparation for careers in research and university or college teaching. Opportunities for additional clinical work in the area of communication disorders are provided to those having such interests.

Doctor of Audiology

Admission Requirements

- * Graduate School application
- * Departmental application
- * Transcripts for all colleges and universities attended
- * Personal statement
- * Three recommendation forms

Degree Requirements

203 credits as follows:

- * *Year 1 (62 credits):* SPHSC 509 (3), SPHSC 521 (4), SPHSC 523 (4), SPHSC 570 (4), SPHSC 571 (4), 572 (3), 574 (4), SPHSC 575 (3) or SPHSC 503 (3), SPHSC 577 (3), SPHSC 582 (4), SPHSC 583 (4), SPHSC 588 (3), SPHSC 591 (4) each quarter, 592 (3)
- * *Year 2 (56 credits):* SPHSC 462 (3) or SPHSC 580 (3), SPHSC 490 (3), SPHSC 504 (3), SPHSC 542 (3), SPHSC 575 (3) or SPHSC 503 (3), SPHSC 576 (2), SPHSC 578 (2), SPHSC 581 (2), SPHSC 585 (2), SPHSC 588 (1, 1, 1) for three quarters, SPHSC 591 (4, 4, 4, 4) for four quarters, SPHSC 593 (3), SPHSC 594 (2), SPHSC 595 (2), SPHSC 600 (3), electives (4).
- * *Year 3 (55 credits):* SPHSC 462 (3) or SPHSC 580 (3), 522 (2), SPHSC 579 (2), SPHSC 584 (3), SPHSC 587 (2), SPHSC 588 (1, 1, 1) for three quarters, 590 (1), SPHSC 591 (4, 4, 4, 4) for three quarters, plus 10 credits for summer quarter, SPHSC 600 (3, 3, 3) for three quarters, electives (8).
- * *Year 4 (30 credits):* Full-time clinic (SPHSC 591) for three quarters.

Financial Aid

A number of teaching and research assistantships are available for qualified graduate students. In addition, the department has traineeships/fellowships supported by the National Institutes of Health.

Research Facilities

The department's research laboratories, as well as those of the Virginia Merrill Bloedel Hearing Research Center, contain sophisticated equipment for the collection and analysis of data related to the study of human communication and its disorders. The University Speech and Hearing Clinic and the Center on Human Development and Disability also provide laboratories to support basic and applied research in speech, language and hearing development and disorders, across the life span.

Course Descriptions

See page 444.

Statistics

B313 Padelford

Probability provides the conceptual foundation and mathematical language for the logic of uncertainty and induction. Statistics is concerned with procedures for the acquisition, management, exploration, and use of information in order to learn from experience in situations of uncertainty and to make decisions under risk. Statistical practice includes design of experiments and of sampling surveys; exploration, summarization, and display of observational data; drawing inferences, and assessing their uncertainty; and building mathematical models for systems with stochastic components.

Instruction is enriched through academic contacts with the School of Business Administration; the College of Engineering; the departments of Applied Mathematics, Atmospheric Sciences, Biology, Cardiology, Computer

Science, Earth and Space Sciences, Economics, Genetics, Mathematics, Psychology, Radiology, and Sociology; the Quantitative Ecology and Resource Management program; the Center for Statistics and the Social Sciences; the Applied Physics Laboratory; the Applied Statistics Division of the Boeing Company; Microsoft Research; and Insightful Corporation. The department has an especially close relationship with the Department of Biostatistics; for example, the two departments are jointly developing new curricula in statistical genetics.

Undergraduate Program

Adviser
B309 Padelford, Box 354322
206-543-8296

The Department of Statistics offers the following programs of study:

- * The Bachelor of Science degree with a major in statistics
- * In conjunction with the departments of Applied Mathematics, Computer Science and Engineering, and Mathematics, the Bachelor of Science degree with a major in applied and computational mathematical sciences.
- * A minor in statistics

Bachelor of Science

Suggested First-and Second-Year College Courses: CSE 142; CSE 143; MATH 307, MATH 308, MATH 309, MATH 327, MATH 328. Additional courses in the sciences and quantitative methods. It is recommended that the student declare the major only after completion of STAT 341.

Department Admission Requirements

1. Completion of 45 credits, including MATH 124, MATH 125, MATH 126; a minimum 8 credits from one of the following groups of courses: ASTR 101, ASTR 102, ASTR 190, ASTR 201, ASTR 301; CHEM 120, CHEM 142, CHEM 145, CHEM 152, CHEM 155; GENOME 351, GENOME 372, GENOME 453, GENOME 455; PHYS 114, PHYS 115, PHYS 116, PHYS 117, PHYS 118, PHYS 119, PHYS 121, PHYS 122, PHYS 123, PHYS 210, PHYS 211, PHYS 212; and one course from STAT 220, STAT 311, STAT 390, or an approved substitute. The 8 credits must be from within the same group (e.g., CHEM 142, CHEM 152).
2. Minimum grade of 2.0 in each of the above listed prerequisites and a cumulative GPA of 2.80 for these courses.
3. Students wishing to declare a statistics major must apply by contacting the adviser after prerequisites are completed and graded.

Major Requirements

Minimum 71 credits, as follows:

1. MATH 124, MATH 125, MATH 126; MATH 307, MATH 308, MATH 309; MATH 327, MATH 328 (the honors sequences in calculus may replace the corresponding regular sequences)
2. CSE 142, CSE 143
3. One course from STAT 220, STAT 311, STAT 390, or approved substitute (STAT 311 is recommended)
4. STAT 394, STAT 395, followed by STAT 341, STAT 342, STAT 421, STAT 423.
5. Electives (at least 9 credits): one upper-division course in statistics, mathematics, or computer science, plus two upper-division courses in any discipline (including but not limited to statistics, mathematics, and computer science), all subject to prior approval by the Statistics adviser. The first elective defines the flavor of the major within these interrelated mathematical fields, and the other two give a chance to broaden the basis of the major into a special-interest area, chosen from the full range of upper-division courses offered at the University. However, three Department of Statistics courses is the most common choice. Any other choice must fit into an approved coherent plan.
6. A minimum grade of 2.0 in all courses used to satisfy major requirements.
7. A minimum cumulative GPA of 2.50 for all courses used to satisfy major requirements.

Minor

Minor Requirements: 38 credits, as follows:

1. MATH 124, MATH 125, MATH 126

2. STAT 311 or approved substitute
3. STAT 394, followed by STAT 341, STAT 342, STAT 421 (or STAT 423)
4. One elective from the following choices: STAT 395 (strongly recommended), STAT 396, STAT 403, STAT 423, STAT 427, STAT 428, CSE 142, MATH 307, MATH 308, AMATH 351, AMATH 353.
5. A minimum grade of 2.0 in each course used to satisfy minor requirements.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Statistics emphasizes decision making in the face of uncertainty. Tools developed by the major include probability theory, mathematical statistics, experience with data analysis, and use of statistical tools via the computer. Graduates have pursued careers in actuarial science, financial planning, drug development, statistical consulting, teaching, public health, military science, aerospace, computer technology, and forest resources.
- * *Instructional and Research Facilities:* Computer workstations are available on a drop-in basis through the Mathematical Sciences Computing Center. Tutoring in a set of introductory statistics courses is currently available at the Statistics Tutor and Study Center.
- * *Honors Options Available:* None offered.
- * *Research, Internships, and Service Learning:* Some students receive limited support and the opportunity to participate in the VIGRE program which, funded by the National Science Foundation, encourages undergraduates to participate in research; sometimes students function in teams with faculty and graduate students. A special seminar series for undergraduates is offered in conjunction with the ACMS program.
- * *Department Scholarships:* None offered.
- * *Student Organizations/Associations:* The Actuary Club at the University of Washington, <http://students.washington.edu/actuary>

Graduate Programs

Graduate Program Coordinator
B309 Padelford, Box 354322
206-543-8296

The graduate programs emphasize both the theory and application of statistics, including probability theory, mathematical statistics, data analysis, statistical computing, and scientific applications. Computing facilities in the Department of Statistics rank among the best of any statistics programs in the country and reflect the department's expertise in the field of statistical computing. An ongoing statistical consulting program provides the students with practical experience in using statistics and in communicating with clients. Under faculty supervision, participants in the program assist members of the University community in applying statistical methodology. The department offers Master of Science and Doctor of Philosophy degrees.

Admission Requirements

Background in mathematics, statistics, or a quantitative field, with 30 or more quarter credits in mathematics and statistics, to include a year of advanced (second-year) calculus, one course in linear algebra, and one course in probability theory; Graduate Record Examination scores (the Advanced Mathematics subject test is encouraged but not required); and three letters of recommendation from appropriate former or current faculty.

Master of Science

Degree Requirements

In addition to Graduate School requirements, at least twelve approved courses numbered 400 or above with a value of 36 credits or more; of these, at least six courses must be numbered in the 500 series (exclusive of STAT 512, 513) with a value of 18 credits or more, and with a coherent theme. Approved proficiency in statistical computing. Satisfactory participation in statistical consulting and the departmental seminar. Passage of an appropriate final master's examination or successful completion of a master's thesis which can count as up to three courses worth 9 credits but cannot replace any of the six courses in the 500 series mentioned above. All programs must be approved in advance by the departmental graduate

program coordinator.

Doctor of Philosophy

Degree Requirements

In addition to Graduate School requirements, appropriate training in statistics and related sciences. Appropriate General Examinations of basic graduate-level knowledge in statistics and probability (including two preliminary examinations). Satisfactory performance in MATH 574, 575, 576. Satisfactory performance in three approved core-course sequences chosen from STAT 570, 571, 572; 581, 582, 583; 521, 522, 523; 534, 535, 538; and 516, 517, 518. (In some circumstances, other graduate-level mathematical science courses may be used as a substitute.) Approved performance in statistical consulting (typically STAT 598 and 599). Demonstration of proficiency in computing. 1 credit of STAT 590 per quarter. Final Examination.

The graduation requirements for the Ph.D. tracks in statistical genetics and statistics in the social sciences may replace or be in addition to some of the requirements listed above.

Financial Aid

The department annually awards a limited number of teaching and research assistantships and fellowships for the support of new and continuing graduate students on the basis of academic promise.

Course Descriptions

See page 446.

Women Studies

B110 Padelford

Women studies is an interdisciplinary discipline that offers students a cohesive framework for the study of women's and men's lives within historical and contemporary contexts, and from multi-disciplinary, multi-cultural, and international perspectives. As a field of inquiry, women studies challenges traditional scholarship about human societies and fosters the construction of new theoretical and methodological approaches to understanding diverse experiences and realities.

Undergraduate Program

Adviser
B110C Padelford, Box 354345
206-543-6902
wsadvise@u.washington.edu

The Department of Women Studies offers the following programs of study:

- * The Bachelor of Arts degree with a major in women studies
- * A minor

Bachelor of Arts

Suggested First- and Second-Year College Courses: WOMEN 200, and any of the following: WOMEN 206, WOMEN 257, WOMEN 283, WOMEN 290.

Department Admission Requirements

Any student with a cumulative GPA of at least 2.00 can declare this major at any time.

Major Requirements

Minimum 62 credits, as follows:

1. WOMEN 200 or equivalent, two credits of WOMEN 299, and one course from WOMEN 206, WOMEN 257, WOMEN 283, WOMEN 290, or transfer equivalent
2. WOMEN 322 or WOMEN 456 (may overlap with option or upper-division requirement); WOMEN 357 (may overlap with option requirement)
3. One course in feminist theory (WOMEN 455 is recommended for those

planning to pursue graduate study. See department adviser for a complete list of acceptable courses.)

4. The senior thesis sequence of WOMEN 491, WOMEN 492, and WOMEN 493.
5. A minimum of 3 credits of WOMEN 497 fieldwork
6. 10 additional upper-division credits within the major
7. Completion of a 25-credit interdisciplinary concentration. Concentrations can include up to 15 credits of upper-division courses from other departments. Students may select pre-approved concentrations or design a concentration specific to their academic interest in consultation with adviser.

Minor

Minor Requirements: 30 credits as follows:

1. WOMEN 200
2. One of the following: WOMEN 206, WOMEN 257, WOMEN 283, WOMEN 290, or transfer equivalent
3. WOMEN 322 or WOMEN 456
4. 15 additional upper-division credits in women studies (excludes independent-study courses)

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* A Bachelor of Arts in Women Studies helps students prepare for careers in human, health, legal, or civil service, as well as in the private sector. Some women studies graduates develop careers that focus directly or indirectly on women and women's issues. Many others move into careers that entail understanding the dynamics of gender, race, class, and sexuality. Such positions exist in politics, business, education, government, medicine, and the arts. Recent graduates of women studies have found employment in public agencies, community services, health services, private businesses, and legal firms.
- * *Instructional and Research Facilities:* The Women Studies Technology Center (WSTC)
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* Students intern in local agencies or businesses to develop skills in an area of specialization appropriate to their area of interest. For lists of these opportunities, see adviser.
- * *Department Scholarships:* None offered.
- * *Student Organizations/Associations:* Students can join the National Women's Studies Association (NWSA), as well as a local student group, Feminism on Campus (FOC).

Graduate Program

Graduate Program Coordinator
B110 Padelford, Box 354345
206-543-6900
womenst@u.washington.edu

The Department of Women Studies offers graduate training leading to the Master of Arts and Doctor of Philosophy degrees in interdisciplinary women studies as well as in a chosen discipline. The core faculty represent the following disciplines: anthropology, American Indian studies, economics and development, history, international studies, English, sociology, and psychology. Although students are required to work primarily with a core faculty member in Women Studies, they have the opportunity to study with more than 60 faculty members from a wide range of disciplines who are adjunct faculty to Women Studies. M.A. students must complete a thesis or practicum. Ph.D. students must complete a dissertation.

Admission Requirements

Applicants are admitted to begin study during autumn quarter only and are required to have their application materials completed by the beginning of the prior January. A complete application file includes the Graduate School application, one copy of official transcripts, three recommendations, a statement of purpose, and scores from the Graduate Record Examination (GRE).

Program Requirements

All students are required to complete 15 credits of the core seminars: History of Feminism (WOMEN 501), Problems in Feminist Theory (WOMEN 502), and Feminist Research and Methods of Inquiry (WOMEN 503). Under the guidance of a core faculty mentor and advisory committee, the student shapes an individual program of study. The master's program usually requires two years of graduate study; the doctoral program usually requires three years of study beyond the master's level, including independent field research and preparation of a dissertation. Ph.D. students must exhibit proficiency in a language relevant to their theoretical and regional areas of specialization. Students are urged to establish foreign language competency as undergraduates before entering the graduate program or as early as possible in their graduate careers.

Financial Aid

A limited number of teaching and research assistantships are offered to Ph.D. students.

Course Descriptions

See page 449.

Business School

Dean

Jim Jiambalvo
114 Mackenzie

Associate Dean for Academic Affairs

Thomas Lee

116 Mackenzie

busadmin@u.washington.edu

Men and women embarking on business careers have the opportunity to influence many of the social, political, and economic forces in today's world. The Business School prepares students for professional careers in management and related disciplines in both the private and public sectors.

The Business School offers an undergraduate program leading to the degree of Bachelor of Arts in Business Administration (BABA) and graduate programs leading to the degrees of Master of Business Administration (MBA), Executive Master of Business Administration (EMBA), Technology Management Master of Business Administration (TMMBA), Master of Professional Accounting (MPAcc), and Doctor of Philosophy (PhD). An evening MBA program is also offered. Additionally, the Business School offers a Master of Science degree in Information Systems (MSIS).

Business Administration became an independent unit within the University system in 1917. It has been accredited by the American Assembly of Collegiate Schools of Business (now known as the International Association for Management Education) since 1921.

Facilities and Services

Most Business School classes and activities are in four buildings. Balmer Hall, named for Thomas Balmer, former president of the University Board of Regents, contains classrooms and computer labs. There are four computer labs in Balmer Hall that are available to Business School students. Mackenzie Hall, named in memory of Prof. Donald Mackenzie, Chair of the Department of Accounting from 1949 to 1955, contains the Dean's Office, the Undergraduate Program Office, the Graduate Program Office, the PhD Program Office, Business Administration Computer Services (BACS), Office of Development and External Relations, faculty offices, five department offices, and other business administration program offices. Nearby Lewis Hall contains the Business Connections Center and other faculty and administrative offices. A fourth building, on the north side of Balmer, has three distinct components: the Bank of America Executive Education Center (which includes the James B. Douglas Executive Forum), the Boeing Auditorium, and the Albert O. and Evelyn Foster Business Library.

To serve the continuing education needs of middle- and senior-level managers, the Business School offers a number of certificate programs, either University-initiated or co-sponsored with various community and industry organizations. The Management Program, a nine-month, one night per week program, strengthens understanding and skills in all areas of management and provides an opportunity for successful managers to learn from a distinguished faculty and each other. Short courses and seminars are offered throughout the year, focusing on topics such as leadership, finance and accounting for non-financial executives, and negotiation skills. In addition, the School develops and runs custom programs under contract with individual companies and organizations. Information on continuing education programs may be obtained from the Office of Executive Programs, (206) 543-8560, fax (206) 685-9236, uwexp@u.washington.edu. International Business Programs

International business programs are coordinated and developed by the School's Global Business Center. These activities include special graduate and undergraduate certificate programs, the Global Business Program, seminars, internships, business foreign-language programs, special guest-speaker programs, and study tours. Although the Marketing and International Business Department offers a general curriculum in international business, each of the five academic departments within the School maintains faculty with special international teaching and research expertise. Internationally oriented courses are offered by each department.

At the undergraduate level, the School offers the Certificate of International Studies in Business (CISB) Program. Students in the program complete the same demanding business curriculum as other students and enhance this training with foreign language study, area studies, and an international experience. The program requires that students have a solid foundation in

one of six language tracks: Chinese, French, German, Japanese, Russian, and Spanish; a seventh custom track for other languages is also an option.

At the MBA level, the Business School offers the Global Business Program (GBP) that provides opportunities for MBA students to build on the international business foundation that every MBA develops through the first year of the program. In addition to international business electives, the GBP includes overseas travel through study tours, quarter-long exchange programs, and international internships. GBP students also participate in the weekly Global Business Forum, which brings top international business leaders to campus to discuss important issues facing their companies and industries.

Questions regarding these programs may be directed to the Program Assistant, CIBER, 303 Lewis, (206) 685-3432, fax (206) 685-4079, uwciber@u.washington.edu.

Entrepreneurship Programs

The focus of the Business School's entrepreneurship programs is on nurturing skills that generate creative ideas, innovative processes, and new business growth. These skills are developed through special academic certificate programs, a high-tech entrepreneurship speaker series, internships, a business plan competition, club activities, and consulting opportunities with area businesses.

The Center for Technology Entrepreneurship (CTE) is open to both undergraduate and graduate students from the Business School as well as other schools and colleges of the University. Undergraduates who wish to complete the option must be admitted to the Business School. Graduate students who wish to complete this specialization must participate in the CTE consulting club, attend the High-Tech Entrepreneurship Speaker Series, complete several CTE core classes, and participate in the Business Plan Competition. Contact CTE for more information at 206-685-9868, cte@u.washington.edu.

The Business and Economic Development Program (BEDP) matches undergraduate and graduate student consulting teams with small-business owners in Seattle's inner city to implement business development projects. Through courses, independent study options, summer internships, and hands-on projects with inner-city entrepreneurs, students explore the challenges faced by central city businesses, while also providing valuable assistance. Questions about the Business and Economic Development Program can be directed to the program office at (206) 543-9327.

The University of Washington Retail Management Program (RMP) prepares interested students for first-line management careers in the retail industry. This interactive program includes visiting speakers, executives-in-residence, and store visits. Participating students complete a series of courses and a summer internship. The various facets of the program are designed to provide students with a comprehensive background in retail management. Questions about the Retail Management Program can be directed to the program office at (206) 685-2755.

Business Career Center

The Business Connections Center coordinates all MBA and MPAcc career services. These include career counseling and career management workshops, the administration of special career events such as career fairs, company presentations, on-campus MBA and MPAcc recruitment, and a job-listing service. The Business Connections Center also administers alumni and executive mentoring programs. Questions regarding these programs and services may be directed to the center's office, 202 Lewis, (206) 685-2410.

Undergraduate business-career counseling and on-campus recruitment is provided by the UW Center for Career Services, 134 Mary Gates Hall, (206) 543-0535.

Instructional Resources Office

The Instructional Resources Office promotes excellence in teaching by providing resources in current practice and research in teaching and learning. The office serves faculty and teaching assistants with individual consultations, coordinates a teaching preparation program for doctoral students, and offers assistance with instructional innovations. Questions can be directed to the Instructional Resources Office, 317 Lewis, (206) 685-9608.

The Business Writing Center

The mission of the Business Writing Center is to help undergraduates develop the writing skills essential to professional success. The center offers one-on-one tutoring, workshops and peer feedback for special class projects, and opportunities for advanced students to be peer tutors. Questions can be directed to the center's office, 337 Lewis, bwrite@u.washington.edu.

Honor Societies

Beta Gamma Sigma is the national scholastic honor society in the field of business. Election to membership is available to both undergraduate and graduate students in business. Selection is based on outstanding scholastic achievement.

Beta Alpha Psi is the accounting honor society. Membership is based primarily on scholastic achievement, but some community service is also required. Beta Alpha Psi provides a mechanism for students, professionals, and educators to meet on both formal and informal bases.

The goals and interests of graduate students are served by the MBA Association, Business Consulting Network, Challenge for Charity, Entrepreneurship and Innovation Club, Graduate Consulting Club, MBA Finance Club, Global Business Association, Graduate and Professional Student Senate, MBA Marketing Club, Net Impact, High-Tech Club, MBA Speakeasy, Women in Business, and the Doctoral Association.

Undergraduate Program

Roland E. "Pete" Dukes

Director

Vikki Haag Day

Associate Director

Elaine G. Solomon

Adviser

137 Mackenzie, Box 353200

(206) 685-3400

bizinfo@u.washington.edu

The Business School offers the following programs of study:

- * The Bachelor of Arts in Business Administration degree with options in accounting, entrepreneurship, finance, human resources management, information systems, and marketing.

Bachelor of Arts in Business Administration

Suggested First- and Second-Year College Courses: English composition, calculus, ECON 200, ECON 201. In addition, classes to fulfill general education requirements which develop strong writing and analytic skills. ACCTG 215, ACCTG 225, MGMT 200, and Q METH 201 are suggested second-year college work.

Department Admission Requirements

The Business School offers admission to upper division applicants for autumn and winter quarters. Those UW students who are prepared, as freshmen, to apply for early admission, may do so only for autumn quarter. Students admitted for autumn may elect to take classes during the prior summer quarter.

Applicants are considered in three admission groups, the Freshman Admission Program (FRAP), the Early Admission Group (EAG), and the Upper-Division Admission Group (UAG), described below. The following requirements apply to the Early Admission Group, and the Upper-Division Admission Group:

1. A minimum cumulative GPA of 2.50 for all college course work.
2. A minimum cumulative GPA of 2.50 for all required business courses.
3. A student who has previously attended the UW also must have GPAs of at least 2.50, both UW cumulative and in UW business courses.

4. Since eligible applicants exceed the space available, acceptance is competitive. Admission will be based on evaluation of five factors:
 - a. for Early Admission Group, pre-college test scores from SAT or ACT
 - b. overall scholastic record
 - c. grades in pre-application courses, described below
 - d. written communication skills
 - e. evidence of leadership skills, community activities, and the promise of achievement in a business or professional career.

Consideration is also given to such factors as economic and educational disadvantage, significantly higher recent grades, and exceptional extracurricular activities or work experience.

Admission for UAG is offered twice a year, for autumn and winter quarters. Admission for FRAP and EAG is offered once a year, for autumn quarter only. A Business School application, together with all supporting materials, must be on file by April 5 for autumn quarter admission or October 5 for winter quarter admission. Records of all course work completed by the deadline must be submitted at the time of application, regardless of admission group.

Freshman Admission Program (FRAP)

The Business School enrolls a small number of students each year directly out of high school, prior to necessary completion of any university-level prerequisites. Freshmen applicants to the University listing Business Administration as their intended major are automatically considered. Admission is offered to students with exceptionally competitive academic records, including but not limited to high school GPA and SAT or ACT scores.

Early Admission Group (EAG)

This admission path is open to students who began their studies at the UW as freshmen, have been enrolled no more than three quarters, and have completed 30 numerically graded credits at the UW. Courses completed prior to applying must include ECON 200; MATH 112, MATH 124, MATH 134, or MATH 145; an approved English composition course chosen from C LIT 240, ENGL 104-ENGL 105, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281; and pre-college test scores (ACT or SAT). General education or elective courses can be taken to complete the minimum of 30 graded credits.

Upper-Division Admission Group (UAG)

Students must present a minimum of 60 academic credits at the time of application including the following graded credits: ACCTG 215; ECON 200 or ECON 201; MATH 112, MATH 124, MATH 134, or MATH 145; an approved English composition course, chosen from C LIT 240, ENGL 104-ENGL 105, ENGL 111, ENGL 121, ENGL 131, ENGL 197, ENGL 198, ENGL 199, or ENGL 281. In addition, the following courses must be completed prior to admission in autumn quarter: ACCTG 225; ECON 200 and ECON 201; MGMT 200; QMETH 201. Applicants should take general education or elective courses to complete the minimum of 60 graded credits.

Students admitted to the UW as freshmen are expected to take ACCTG 215, ACCTG 225; MGMT 200; and QMETH 201 in residence.

Qualified applicants with at least 45 credits and a minimum 2.85 GPA who meet University admission requirements, but not Business School requirements, are eligible to be placed in the College of Arts and Sciences as pre-business majors.

The University of Washington provides equal opportunity in education without regard to race, color, creed, religion, national origin, sex, sexual orientation, age, marital status, disability, or status as a disabled veteran or Vietnam veteran in accordance with University of Washington policy and applicable federal and state statutes and regulations.

Graduation Requirements

180 credits as follows:

General Education Requirements: The following must be selected from the University Areas of Knowledge courses: 20 credits in Visual, Literary, & Performing Arts; 20 credits in Individuals & Societies, including 10 credits in microeconomics and macroeconomics (ECON 200 and ECON 201); 20 credits in the Natural World, including 5 credits in calculus (MATH 112, MATH 124, MATH 134, or MATH 145); most students need precalculus

before taking college calculus (some precalculus courses qualify for the Natural World requirement); 5 credits in English composition.

Students from community colleges in Washington should check the Transfer Guide or consult with their community college adviser for equivalent courses. Students from other four-year schools should see an adviser at their school. Students entering the Business School under the terms of the Associate Degree Agreement may apply courses selected from the community college's breadth list toward the general education requirements.

Business School Requirements: ACCTG 215, ACCTG 225; QMETH 201; MGMT 200; B ECON 300; MKTG 301; I S 300; I BUS 300; OPMGT 301; FIN 350; MGMT 300; MGMT 320; MGMT 430; and 300- or 400-level business electives (or area of concentration) to bring the total number of business credits to 72; two writing-intensive courses, one from B CMU 301, B CMU 302, B CMU 410, ENGL 281, ENGL 381; one from English composition, or from the remaining three courses listed immediately above, or from any W course. No more than 6 lower-division business elective credits; a minimum of 90 non-business credits, which may include up to 14 credits economics and up to 9 credits of statistics but not GEN ST 350; a cumulative GPA of at least 2.50 in all business credits earned at the UW; and a cumulative GPA of 2.50 for all UW credits. No more than 8 credits of business independent research coursework may be applied to the degree and no more than 4 credits of business independent research coursework may be applied to upper-division business electives. No more than 8 credits of internship coursework is applicable to the degree. Business internship credit may not apply to the upper-division business elective requirement. Students must complete six of the nine upper-division core courses, including MGMT 430, and 40 of the 53 required upper-division business credits at the UW. Students who have taken more than three of the nine upper-division core business courses at another school should consult an academic adviser in the Business School Undergraduate Program Office prior to applying.

Accounting Option: The notation "Accounting" is indicated on the permanent record, or transcript, of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: ACCTG 301, ACCTG 302, ACCTG 303, ACCTG 311, ACCTG 320, ACCTG 411, ACCTG 421, ACCTG 440, and at least one 400-level accounting elective, excluding ACCTG 401, ACCTG 490, ACCTG 495, and ACCTG 499. Students who have completed ACCTG 505 may not apply to the Accounting Option.

Finance Option: The notation "Finance" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: one course from FIN 450, FIN 453, FIN 454, or FIN 457; either FIN 460 or FIN 461; four additional courses chosen from the 400-level FIN courses, B ECON 301 or ECON 301, or the 400-level B ECON courses, excluding FIN 490, FIN 495, FIN 499, B ECON 490, and B ECON 499.

Human Resources Management Option: The notation "Human Resources Management" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: MGMT 311, MGMT 411, MGMT 412, and two of the following courses: MGMT 323, MGMT 401, MGMT 402, MGMT 403, MGMT 404, or MGMT 413.

Information Systems Option: The notation "Information Systems" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who complete the following courses with a minimum cumulative GPA of 2.50: I S 310, I S 320, I S 410, I S 445, and I S 460.

Marketing Option: The notation "Marketing" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes the following courses with a minimum cumulative GPA of 2.50: MKTG 450, MKTG 460, and three additional MKTG electives, excluding MKTG 490, MKTG 495, and MKTG 499. It is recommended that students take MKTG 450 and MKTG 460 before they take the other electives.

Center for Technology Entrepreneurship (CTE): The notation "Entrepreneurship" is indicated on the transcript of a student who graduates with a degree of Bachelor of Arts in Business Administration and who completes one of two pathways with a minimum cumulative GPA of 2.50.

All students are required to complete ENTRE 370 and two of the following three courses: MKTG 455, FIN 457, or MKTG 335. Entrepreneurship students must take MGMT 430 to complete one of the core requirements for the Business School.

Students in the Business Creation pathway must complete ENTRE 472 and ENTRE 473. Students in the Business Growth pathway must complete ENTRE 475 and ENTRE 476.

Admission to the options: Students can apply to one option at the same time they apply to the Business School. Continuing Business School students can apply during publicized application periods. If demand for the option exceeds the number of spaces available, students will be considered based on the factors identified for admission to the Business School and on their grade-point average in all previous option-specific courses.

Student Outcomes and Opportunities

- * **Learning Objectives and Expected Outcomes:** A business education develops important communication and interpersonal skills. The ability to express an idea, negotiate a settlement, motivate others, manage time, and build collaborative networks distinguishes the most successful business people. UW Business School students learn to recognize and define problems, examine data, and persuasively communicate their ideas to achieve results in organizations and people's lives. Regardless of post-graduation path -- be it climbing up the corporate ladder, starting a company, joining the Peace Corps, entering law school, or becoming a doctor -- a business education will help immeasurably.
- * **Instructional and Research Facilities:** The Foster Business Library houses an extensive collection of books, reference tools, and journals necessary to the study of business. Balmer Hall has wireless capabilities for faculty and student use and houses three computer labs with 120 workstations. The virtual NASDAQ trading room equipped with trading and analytical software allows students to simulate stock transactions using real-time market data and stock quotes so they can study diversification, hedging, and other investment strategies. The New Venture Creation Lab represents a new paradigm for integrating entrepreneurial education with technology development and hands-on experience. The lab features computer workstations, proprietary software, online technology and market assessment tools and data to assist student entrepreneurial efforts. The Business Writing Center provides free consultations on business class writing assignments, cover letters, and resumes.
- * **Honors Options Available:** Honors students benefit from a sense of community generated by honors seminars, as well as from the academic challenge associated with more rigorous study. The program requirements are flexible, challenging students to explore business topics in greater depth. Students entering the Honors program become candidates for the degree "With College Honors" or "With Distinction."
- * **Research, Internships, and Service Learning:** The Business School encourages student participation in internships to supplement in-class learning experiences. For more information about internship guidelines and a list of undergraduate internship opportunities, visit depts.washington.edu/bschool/internships/.
- * **Department Scholarships:** The Business School awards approximately 90 undergraduate scholarships. Some are general scholarships while others are specific to options or areas of concentration. Only students admitted to both the UW and the Business School are eligible to receive awards. Applicants are considered for all scholarships for which they meet the minimum qualifications and specific criteria. Although financial need is not a requirement for all business scholarships, most are awarded on the basis of need. (The FAFSA must be filed with the Office of Student Financial Aid.) The Business School scholarship application is due April 5.
- * **Student Organizations/Associations:** Chapters of Alpha Kappa Psi, Association of Black Business Students, Undergraduate Entrepreneurship Club, International Association of Students in Economics and Business (AIESEC), American Marketing Association, Business Information Technology Society, Dow Dawgs Investment Club, Hispanic Business Association, Society for Human Resources Management, Business and Economic Development Program Leadership Team, Undergraduate Finance Club, Undergraduate Management Consulting Association, University Sales Club, and Undergraduate Leadership Forum provide opportunities for undergraduate students to meet informally and to participate in a variety of projects and events.

Of Special Note:

Double Baccalaureate and Second Baccalaureate

Students who wish to earn more than one baccalaureate degree should consult an academic adviser in the Business School Undergraduate Program Office, either during or before their junior year. Persons seeking a second baccalaureate should apply at the University's Office of Undergraduate Admissions. To be considered, applicants must complete by quarter of entry the same prerequisites for admission as applicants for the first baccalaureate degree. Since the number of eligible applicants exceeds that for which space is available, acceptance will be competitive, based on the criteria listed above for selection of first baccalaureate degree applicants. The Business School will use the GPA for the last 90 credits earned.

Undergraduate Business Educational Opportunity Program

Director, Jai-Anna Elliott

Recruitment, admissions counseling, advising, and support services are available for minority students underrepresented at the University, and students from educationally and economically disadvantaged backgrounds. Special scholarships are also available for underrepresented minority students. Academic advisers have information on the Business Educational Opportunity Program.

Graduate Programs

Associate Dean for Masters Programs

David Burgstahler

Admission

Qualified students who are graduates of the University of Washington or other accredited colleges or universities may be admitted to graduate degree programs. GPA, Graduate Management Admission Test score, work experience, educational and professional objectives, and other factors are considered in the admission process. Inquiries concerning the details of admission should be made to the specific degree program of interest, University of Washington, Graduate School of Business Administration, Mackenzie Hall, Box 353200, Seattle, WA 98195.

Application Procedure

Applications to the MBA, EMBA, and PhD programs are considered for entry in autumn quarter only. Applications to the Technology Management MBA and Master of Science in Information Systems program are considered for entry in winter quarter only. The formal deadlines for application are February 1 for the PhD program; December 1, January 1, February 1, and March 1 for domestic applicants for the MBA; February 1 for international applicants for the MBA; April 1 for Evening MBA; and April 15 for the Executive MBA and MPAcc programs. Students are encouraged to apply as early as possible for the programs.

The Graduate School of Business Administration offers programs of study leading to the advanced degrees of Master of Business Administration, Master of Professional Accounting, Master of Science in Information Systems, and Doctor of Philosophy. Four programs can lead to an MBA degree: the full-time program, the evening program, the Technology Management (TMMBA) program, and the Executive MBA program.

Master of Business Administration

Executive Director

Dan Poston
110 Mackenzie Hall, Box 353200
206-543-4661
mba@u.washington.edu

The full-time Master of Business Administration degree program has been designed for students who are preparing for a professional career in management. A period of two academic years, or 96 academic credits, is required for most students to complete the MBA program. The first year of the program consists of 48 credits of required courses: BA 500 (16), BA 501 (16), BA 502 (10); three of the following bridge elective options: EBIZ 509 (2) (required for EBIZ certificate), ENTRE 509 (2) (required for CIE certificate), FIN 509 (2) (prerequisite for most finance electives), I BUS 509 (2), MGMT 579 (2-4, max. 12), or MKTG 509 (2). The second year of the

program is 48 credits of elective courses. The student may take no more than 24 credits in any one elective area.

The evening MBA program is targeted toward fully employed college graduates who seek a management degree that can be earned outside their regular working hours. Instruction takes place two evenings per week and students typically take two courses per quarter. The program consists of 80 academic credits, with normal completion of degree requirements in ten quarters. The course requirements are as follows: ACCTG 500 (4), ACCTG 501 (4), B ECON 500 (4), B ECON 501 (4), FIN 502 (4), I S 504 (4), MGMT 500 (4), MGMT 502 (4), MGMT 505 (2), MKTG 501 (4), OPMGT 502 (4), QMETH 500 (2), QMETH 501 (2), 34 credits of electives

Special Programs

Within the MBA program, there are options for special study: Global Business Program; E-Business Program, and the Program in Entrepreneurship and Innovation. The following concurrent degree programs are also available: MBA/JD with the School of Law, MBA/MAIS with the Henry M. Jackson School of International Studies, MBA/MSE with the College of Engineering's Program in Engineering and Manufacturing Management, and MBA/MHA with the School of Public Health and Community Medicine.

Executive Master of Business Administration

Director

Louise Kapustka
206-685-1333
emba@u.washington.edu

Since the autumn of 1983, the Executive MBA Program has provided an additional pathway to the Master of Business Administration degree. The EMBA program provides an intensive executive-development experience to a select group of midcareer managers who continue to work full-time while pursuing the MBA degree. Candidates for this two-year program should have seven or more years of increasingly successful work experience including three to four years in management, and currently hold mid- or top-level management positions. They are typically sponsored by their organizations and have been identified as employees with high potential to advance as general managers. Students are selected to ensure diversity of industry, functional areas and organizational size.

The Executive MBA degree program is offered in two scheduling options. Both run for two academic years, September through June. (1) The Regional Program meets on campus for a full day once a week, on alternating Fridays and Saturdays. In addition, students attend spring and fall residence sessions each year. (2) The North America Program meets on campus once a month, generally for three consecutive days, Thursday through Saturday. Between monthly sessions, students continue to interact with faculty and classmates online via the Internet and interactive groupware. This format is designed for individuals from the greater Northwest as well as those from the Puget Sound area whose schedules preclude weekly attendance.

While the scope of the curriculum is comparable to that of the regular MBA program, the pace is more intense and the perspective is that of a general manager. There are 21 required courses and no electives.

Admission Requirements

- * Letter of Endorsement: Candidates must be sponsored by their employing organizations and endorsed by senior management as potential general managers. In sponsoring EMBA candidates, organizations agree to release them on class days and, in some cases, to cover the program fee. Individuals who are not sponsored by a company, will need to submit an additional letter of recommendation in place of the Letter of Endorsement.
- * Three letters of recommendation
- * Graduate Management Admission Test (GMAT) scores
- * Two sealed copies of official transcripts from all degree-granting institutions attended

Applications are accepted throughout the year, with an application deadline of April 15 for the class beginning each autumn. Late applications are handled on a space-available basis.

Degree Requirements

The 21-month, 68-credit curriculum builds a solid foundation of business fundamentals. Case studies and group projects link theory with current

business practice. Themes based on current trends in business, including the impact of technology and globalization, are threaded through the entire curriculum.

Students frequently use their own organizations as laboratories, applying lessons learned in the classroom and then bringing the results back to the class for further discussion.

The following are the required courses: EMBA 502 (2), EMBA 503 (2), EMBA 504 (4), EMBA 505 (5), EMBA 506 (3), EMBA 510 (3), EMBA 511 (1), EMBA 512 (4), EMBA 520 (5), EMBA 521 (4), EMBA 529 (2, 2), EMBA 530 (3), EMBA 531 (5), EMBA 532 (5), EMBA 533 (4), EMBA 534 (2), EMBA 540 (2), EMBA 551 (4), EMBA 552 (2), EMBA 558 (4).

Technology Management Master of Business Administration

Director

206-221-6995
tmmba@u.washington.edu

The Technology Management MBA Program is designed for professionals who are employed in technology companies or who work in technology jobs in more traditional businesses. The curriculum combines the essential components of management education with a specialized focus on high-tech industries. It is structured for individuals who want to play a broader role in management and are seeking the necessary management skills and business knowledge. The program is focused on real-world projects and analyses, collaborative learning in study groups and extensive participant interaction in the classroom. Candidates for this 18 month program have technology experience and upward career progression.

The Technology Management MBA Program provides an intensive educational experience to professionals who will continue to work full-time while pursuing their MBA degree. The TMMBA Program runs six consecutive quarters of instruction beginning every January and ending the next year in June. Three-hour sessions are held once a week on a mid-week evening and six-hour sessions are scheduled two Saturdays per month. There are 68 required credits of which 6 are electives. Additionally, two residential sessions are offered one at the beginning of the program and one at the end. Candidates may be sponsored by their organizations or apply on their own.

Admission Requirements

- * Applicants should hold a professional position and have a minimum of five years of work experience. Applicants must demonstrate a career trend of increased responsibilities or promotions. Supervisory or management experience is not required, but applicants should demonstrate leadership potential. Candidates' work accomplishments and letters of recommendation should provide evidence of their potential for senior management.
- * Applicants must hold a baccalaureate degree from an accredited college or university.
- * Personal statement
- * Three letters of recommendation and evaluations
- * Resume
- * Interview
- * GMAT scores
- * Two sealed copies of official transcripts
- * Additional requirement for permanent residents: Proof of English language proficiency (if applicable)
- * Additional requirements for international applicants: International Graduate Admissions Application, Proof of Financial Ability form, photocopy of current visa (if applicable), notice of action (if applicable), proof of English language proficiency (if applicable)

Each year approximately 50 students are accepted into the TMMBA Program. Applications are accepted throughout the year. Please contact the TMMBA office to find out the applications deadlines for the upcoming class.

Degree Requirements

TMMBA 500 (1, 1), TMMBA 501 (5), TMMBA 502 (4), TMMBA 503 (2, 2), TMMBA 505 (4), TMMBA 507 (4), TMMBA 510 (4), TMMBA 512 (4), TMMBA 515 (4), TMMBA 516 (4), TMMBA 517 (4), TMMBA 520 (4), TMMBA 521 (2), TMMBA 522 (4), TMMBA 528 (2, 2), TMMBA 530 (1), TMMBA 551 (4), 6 credits of electives

Master of Professional Accounting

Managing Director

Francine Shafer
231 Mackenzie
206-616-4964

The Master of Professional Accounting (MPAcc) prepares students for high-level careers with major accounting and consulting firms, governmental agencies, and industry. Students with undergraduate degrees in accounting may complete the program in three quarters. Students with no prior business background must take an expanded version of the program. Enrollment is limited to 25 to 30 students in each of two tracks—Accounting and Assurance (A&A) and Taxation. MBA students with a strong interest in accounting and taxation may earn a joint MBA/MPAcc degree.

Admission Requirements

- * Satisfactory completion of prerequisite courses (see Web site for list of prerequisite courses)
- * Scores from the GMAT exam
- * International TOEFL scores
- * Well written essays
- * Work experience
- * Volunteer and student activities

Degree Requirements, Auditing and Assurance Pathway

48 credits, as follows:

- * ACCTG 521 (4), ACCTG 523 (4), ACCTG 527 (4), ACCTG 576 (2), ACCTG 566 (4), ACCTG 577 (4), ACCTG 579 (4, 4, 4)
- * *Internship*: ACCTG 575 (14). If no internship, complete four approved elective classes: ACCTG 420 (3), ACCTG 524 (3), ACCTG 525 (4), ACCTG 562 (4) ACCTG 564 (4)

Degree Requirements, Taxation Pathway

48 credits, as follows: ACCTG 530 (4), ACCTG 531 (3), ACCTG 533 (3), ACCTG 534 (3), ACCTG 535 (3), ACCTG 536 (3), ACCTG 537 (3), ACCTG 538 (3), ACCTG 539 (4), ACCTG 541 (4), ACCTG 541 (4), ACCTG 543 (3), ACCTG 547 (3)

Doctor of Philosophy

Program Coordinator

Jaime Banaag
102 Mackenzie
206-543-4111
baphd@u.washington.edu

The Ph.D. program in business administration is a research-based program designed to train scholars interested in academic careers, although this training is also useful for individuals seeking research positions in business and government, as well as in consulting firms.

With the guidance of faculty members who have similar interests, Ph.D. students complete a program of formal coursework (a minimum of 18 courses) and participate in doctoral seminars, independent study, and research. A faculty supervisory committee is appointed early in the program to assist each student in constructing a course of study that fits that individual's background and interests. Students select one major area of specialization and complete requirements in two or three additional minor areas that support their major area of specialization (including areas outside the Business School, such as economics, psychology, and mathematics). Throughout the program, doctoral students receive support and training that hone their skills as teachers and course developers.

Major areas of concentration include accounting, finance, human resource management and organizational behavior, marketing, information systems, operations management, operations research, and strategic management. All doctoral students are required to have research methods as one of their minor areas.

Doctoral study is full-time and year-round, and students are admitted autumn quarter only. Most candidates will require four to five years to complete the program. The School's goal is to make financial aid available, in the form of research and teaching assistantships, to all of its doctoral students. In addition to service appointments, fellowships are available on a

competitive basis to support students engaged in their dissertation research during the final part of their programs.

Special Requirements

Applicants to graduate business programs are required to submit scores on the Graduate Management Admission Test. Those admitted to the MBA program must demonstrate understanding of the fundamental concepts of calculus.

Course Descriptions

See page 453.

Business School Departments

Accounting

Accounting involves development and communication of financial and operational information for business and nonprofit economic entities. The curriculum includes understanding accounting information systems, using accounting information in managerial decision making, preparing and auditing financial statements under generally accepted accounting and auditing standards, and understanding the fundamental aspects of personal and corporate taxation. Elective courses provide in-depth instruction in managerial and financial accounting, not-for-profit accounting, and taxation. Courses provide a foundation for careers in accounting (public, industrial, private, or governmental), for a general business career, or for other professions such as law.

Finance and Business Economics

Finance and Business Economics address the financial and economic aspects of business decision making. The Finance curriculum focuses on financial management and the financial markets within which firms and individual investors operate. Business Economics courses concern the economic behavior of firms, including factors that determine costs and prices, and real and monetary forces (such as government policies) that affect the national and international economic environment.

Management and Organization

Management and Organization provides an understanding of the processes and structures of organizations through three distinct programs. The Human Resource Management and Organizational Behavior (HRMOB) courses address personnel and industrial-relations topics such as selection, performance appraisal, compensation, and negotiations, as well as behavioral topics such as leadership, motivation, and group dynamics. They

prepare students for managing an organization's human resources effectively. The Organization and Environment (O E) courses examine organization theory, organization design, and management of technology and innovation, as well as the social, political, legal, and ethical environments in which organizations operate. They give students the knowledge, perspective, and analytical tools to deal effectively with organization-environment interactions. The Business Policy (B POL) courses focus on organizational effectiveness from the viewpoint of top management. Emphasis is placed on an integrated view through strategic management and control, planning, decision making, and entrepreneurship.

Management Science

The Department of Management Science consists of three subareas: Information Systems (I S), Operations Management (OPMGT), and Quantitative Methods (QMETH). The Information Systems area focuses on the management of computer-based information systems. The IS curriculum is designed to give students a basic understanding of IS technology and its impact on all phases of an organization. Specific areas of study include telecommunications and network design, systems analysis and design, database management, expert systems, and applications programming. The Operations Management (OPMGT) area of study refers to the functional area of management which produces goods or services in an organization. Specifically, the OPMGT curriculum focuses on the many changes which have occurred in the past ten years in the way that managers think, plan, and operate manufacturing and service facilities. The area includes courses in logistics, quality, inventory and supply-chain management, project management, and waiting lines, among others. The Quantitative Methods (QMETH) area focuses on the theory and application of mathematical and statistical tools in the modeling and analysis of business problems. The QMETH curriculum includes courses in statistics and data analysis as well as courses in operations research (e.g., linear programming, forecasting, using spread-sheets to construct decision support models).

Marketing and International Business

Marketing (MKTG) provides knowledge of concepts and relationships in the areas of consumer behavior, channels of distribution, measurement and analysis of markets, pricing, physical movement of goods, product development, promotion, and sales administration. Marketing careers may involve specialization in Internet marketing, product or brand management, advertising, selling, sales management, marketing research, retailing, wholesaling, and international marketing for a wide spectrum of firms and industries. International Business (I BUS) includes trade, payments, and multinational corporate systems and activities. The area prepares students for international responsibilities in domestic business firms, governmental agencies, and overseas business. Courses in Business Communications (B CMU) stress writing in organizations to accomplish goals, oral reporting, business plan presentation, and the use of computer graphics in communication.

School of Dentistry

Dean

Martha Somerman
D322 Health Sciences

Established in 1945, the University of Washington School of Dentistry offers courses leading to a Doctor of Dental Surgery (D.D.S.) degree, and advanced education leading to a Master of Science in Dentistry degree and/or a certificate of proficiency in endodontics, oral medicine, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Residency training is available in oral and maxillofacial surgery and general practice. The Department of Oral Biology offers a Master of Science (M.S.), an M.S. non-thesis degree for dental hygiene educators, and a doctoral degree (Ph.D.). Postdoctoral study is available in various disciplines. The School also offers a baccalaureate degree completion program in dental hygiene.

Opportunities to earn other degrees concurrently (M.S. or Ph.D. in the School of Dentistry's Department of Oral Biology and other schools) may be arranged on an individual basis.

These educational programs are enriched by the School's strong commitment to research and the presence of a Regional Clinical Dental Research Center, a Comprehensive Center for Oral Health Research, a Dentist-Scientist program, and a fellowship research training programs for predoctoral and postdoctoral students. The mission of the Regional Clinical Dental Research Center is to foster clinically relevant research that will advance dentistry's knowledge base, improve patient care, and promote oral health. The Comprehensive Center for Oral Health Research is focused on children's dental health and is one of only six such programs to be funded nationally by the National Institute of Dental and Craniofacial Research. State-of-the-art clinical research facilities are available for faculty and student use.

School of Dentistry Mission Statement: "The School of Dentistry shares the University's overall mission to generate, disseminate, and preserve knowledge and serve the community. The School is an integral part of the Health Sciences Center and is an oral health-care center of excellence serving the people of the state of Washington and the Pacific Northwest. Our primary mission, through educational, research, and service programs, is to prepare students to be competent oral health-care professionals. The School's research programs contribute to the fundamental understanding of biologic processes and to the behavioral, biomedical, and clinical aspects of oral health. The service mission is to improve the health and well-being of the people of the community and the region through outreach programs that are especially attentive to minority and underserved populations. The School values diversity in its students, staff, faculty, and patient populations. It seeks to foster an environment of mutual respect where objectivity, imaginative inquiry, and the free exchange of ideas can flourish to facilitate personal development, professionalism, and a strong sense of self-worth." (August 2002)

The following departments participate in the curriculum for the School's programs:

- * Dental Public Health Sciences is concerned with the social, legal, political, economic, and psychological aspects of dental health-care delivery as well as the epidemiology of oral diseases and the application of biostatistical methods in studying them.
- * Endodontics offers training in the diagnosis and treatment of diseases and injuries of the tooth pulp and periradicular tissues.
- * Oral and Maxillofacial Surgery trains students in the procedures used for all types of operations in the oral cavity and all phases of dental pain control.
- * Oral Biology encompasses the study of basic biological mechanisms in normal and diseased oral tissues and structures.
- * Oral Medicine provides training in diagnostic techniques and nonsurgical treatments of oral disease.
- * Orthodontics provides training in the prevention and correction of malocclusion of the teeth.
- * Pediatric Dentistry provides students with a broad understanding of prevention, diagnosis, and treatment of most dental needs from infancy through adolescence with emphasis on the psychological and educational requirements of the patient and parent.
- * Periodontics offers training relative to the periodontium and dental implants, with emphasis placed on diagnosis, prevention, treatment, and maintenance.
- * Prosthodontics provides instruction in the fabrication and maintenance of removable, complete, and partial dentures, and dental implants.

- * Restorative Dentistry offers training in the restoration or replacement of tooth structure and study of the form and function of the masticatory structures.

Undergraduate Program

Dental hygiene seeks to understand why some people get preventable oral diseases and why others do not. Risk factors, such as poverty, ethnicity, and education, as well as environment, contribute to perpetuation of these diseases. The dental hygienist observes and defines dental diseases, assesses potential outcomes of interventions, and manages conditions that compromise oral health. As an applied discipline, dental hygiene links its theoretical foundation to behavioral and natural sciences. Using evidence-based science, the discipline seeks to facilitate holistic assessments of individuals and communities and to find solutions to oral health problems. Students in the discipline learn to transfer learning from clinical to community contexts as a means of improving the oral health status among people.

dhyg@u.washington.edu

The Dental Hygiene Degree Completion Program offers the following program of study:

- * Bachelor of Science degree with a major in dental hygiene.

The UW has no prelicensure program in dental hygiene.

Please note: The dental hygiene program is currently undergoing a major revision. Please contact the program for further details.

Bachelor of Science

Suggested First- and Second-Year Courses: Students desiring entry into the dental hygiene profession may take their first year general studies courses in chemistry, psychology, sociology, public speaking, English language composition, mathematics, nutrition, microbiology, and liberal studies at the UW, or another community, technical, or four-year institution. Having successfully completed a pre-licensure dental hygiene program and obtained a license to practice dental hygiene, students are eligible to return to the UW to complete the Bachelor of Science degree with a major in dental hygiene.

Department Admission Requirements

The dental hygiene program is currently undergoing a major revision and is not accepting new applicants. Please contact the program for further information.

Major Requirements

Students must complete University requirements as well as dental hygiene major requirements. University requirements include a 45-credit senior residency; English, writing, and quantitative reasoning proficiencies; and Areas of Knowledge. The dental hygiene major requirements include a sequence of three dental-hygiene core courses and a minimum of one path.

Completion of the required major and University requirements takes one to two years. Students planning to graduate in one year must have a faculty-approved plan of study within the first quarter of enrollment. Students planning a two-year program must have a faculty-approved plan of study within the first two quarters of enrollment. All students must meet with a program adviser yearly and are encouraged to meet with a program adviser quarterly.

Core Requirement

Students complete a year-long core requirement founded on significant oral health problems and probable solutions within the context of specific communities. Behavioral change, community development, health education models, and scientific literature provide a theoretical foundation for study in the core courses. The core curriculum focuses on real problems in real places. Using a people-places-problems approach, students use Internet and library resources to research, analyze, discuss, and make evidence-

based decisions relevant to oral health promotion and dental disease prevention. Further, they explore core values, ethics, laws, and issues related to care access, health promotion/disease prevention approaches, and healthcare delivery models. Included are field activities linked to education, government, business, and health resources. Additionally, dental hygiene majors complete requirements in at least one path and may take electives of their choice to complete the senior residency requirement. All students must complete the three core courses, D HYG 465, D HYG 492, and D HYG 493 (3 credits each, total 9) in the prescribed order.

Path Requirement

Students must select at least one of two pathways to fulfill the path requirement. The options are:

Dental Hygiene Care. This path is for dental hygienists who desire to work as clinicians in hospitals, clinics, long-term care facilities or other healthcare services that require advanced clinical and management skills. Students take courses in interdisciplinary health sciences, along with courses that focus on dental hygiene care and management of persons with physical, mental, developmental, and complex medical disabilities. Required courses in oral medicine augment this path. Major requirements include a minimum of 11 or 12 credits beyond the core: 10 credits in ORALM 460, or approved alternatives that focus on care of special clients; 3 credits of approved interdisciplinary health science courses; and 2 credits of approved research.

Oral Health Promotion. This path is for dental hygienists who desire to work in multicultural and multidisciplinary settings at the local, state, national, or international levels and who require skills beyond clinical expertise. Students learn about the framework within which societies organize and manage their healthcare services and learn to link health with the environment, people's beliefs, ways of life, and kinship. They learn about differences between Western, Eastern and Shamanistic philosophies of health as prerequisites to developing educational strategies for oral health promotion and dental disease prevention. As students build skills essential for working with health agencies, they participate in community health projects as educators, advocates, or researchers. Activities focus on the health of children and families in rural and remote areas of Washington state. Major requirements for this path include a minimum of 15 credits beyond the core, to include 3 credits in approved interdisciplinary health sciences courses, 3 credits in healthcare delivery systems, D HYG 402 or substitute; 3 credits in health promotion strategies (D HYG 403) or approved substitute; and a minimum of 4 credits in at least 2 sections of D HYG 404 or approved substitutes.

Academic Standards

The School of Dentistry requires that a minimum numerical grade of 2.5 be earned in dental hygiene courses counted toward satisfaction of graduation requirements with a dental hygiene major. Graduation with a dental hygiene major also requires a minimum cumulative GPA of 2.00 for all work done in residence at the University. A student whose cumulative GPA falls below 2.00 in any quarter will be placed on academic probation. While on probation, the student must attain at least a 2.50 GPA for each succeeding quarter's work until the cumulative GPA is raised to 2.00.

Student Outcomes and Opportunities

* **Learning Objectives and Expected Outcomes:** The UW Dental Hygiene Completion Program emphasizes the health of populations rather than of individuals. Dental hygienists conduct community assessments; develop networks that engage community partners; set priorities; obtain baseline measures; set targets; and measure progress toward solutions to community oral health problems. Dental hygiene core skills include the ability to search and retrieve information from the Internet; use census, geographic, and demographic data; critically assess scientific literature; analyze and interpret data; and apply new scientific knowledge to solutions of health problems. In addition to the core knowledge set, dental hygienists select from two paths of study: care of special populations and oral health promotion. Depending upon area of interest, graduates pursue careers as business managers, marketing specialists, clinic administrators, hospital and nursing home dental hygienists, public health planners, program managers, research assistants, and teachers of dental hygiene.

* **Honors Options Available:** None.

* **Research, Internships, and Service Learning:** Students in the undergraduate program take off-campus service-learning courses related to their path of study. Generally, sites are located in rural and underserved health provider shortage areas of Washington state, but may include

regional, national, or international locations.

Students are eligible for international programs and exchanges following completion of their core course requirements. An applicant who is a dental hygienist from an affiliated international institution may be eligible for a tuition waiver during one or more quarters of the regular academic year (autumn, winter, spring). Students interested in these opportunities need to contact the program's academic adviser at least six months in advance.

Majors may be eligible, following the completion of prerequisite courses, to participate in study-abroad programs that focus on health care delivery, oral health promotion, or dental disease prevention. The University and its affiliated sites provide the settings for fieldwork, service, and research activities, and interdisciplinary learning experiences.

* **Department Scholarships:** Students may apply for scholarships offered by the Dental Hygiene Education fund.

* **Student Organizations/Associations:** The Washington Rural Health Organization, Washington State Public Health Association, Washington State Dental Hygienists' Association, American Dental Education Association, and International Association of Dental Research are among many from which to select.

Of Special Note: The 90-credit community college transfer limit does not apply to students admitted to this program. The last 45 credits for the degree must be earned in residence at the UW.

Graduate Programs

Through their respective departments, the graduate faculty members of the School offer programs leading to the degrees of Master of Science in Dentistry, Master of Science, and Doctor of Philosophy, as well as postgraduate certificate programs.

Master of Science in Dentistry/Postgraduate Certificates

Fields of study for the M.S.D. programs include endodontics, oral pathology, oral medicine and orofacial pain, orthodontics, pediatric dentistry, periodontics, and prosthodontics. Although students may enroll in a graduate certificate program only, students may elect to pursue an M.S.D. The programs are planned to prepare students to think independently, to evaluate their own services and the literature of the programs, and to develop their clinical skills to a level to permit successful clinical practice, teaching, or research in their chosen specialty. Emphasis is placed on the basic principles of diagnosis and treatment. The purpose of the programs is not only to train students in their respective specialties but also to encourage preparation for academic careers or for research. Research may be undertaken in basic or applied science. Opportunities for collaborative research are available with the cooperation of other colleges, schools, or departments of the University.

Postgraduate certificate programs are not administered by the Graduate School, and no thesis is required. The course content may vary somewhat from the M.S.D. program, although the same academic standards are applied in both programs. Tuition and fees are assessed at the graduate level for both programs.

Master of Science in Dentistry

Admission Requirements

- * Either a baccalaureate or a professional degree from a dental or medical school.
- * Completed application and application fee of \$50
- * Three letters of recommendation
- * 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals
- Optional - in addition, a personal statement that addresses the relationship between personal background and aspirations
- * A brief biographical sketch in a resume/CV format
- * Official transcripts, sent directly to the Department of Oral Biology
- * GRE General Test scores
- * TOEFL required for international students. The minimum TOEFL score required for acceptance is 237 computer, 580 paper.

Degree Requirements

- * 50 credits as follows: Required courses: ORALB 564 (1-3, max. 10), ORALB 565 (1-3, max. 10), ORALB 566 (2-4, max. 16), ORALB 569 (2), PERIO 575 (1-3, max. 10), ORALB 570 (1-3, max. 9), ORAL 575 (1-3, max. 10), ORALB 579 (2); either ORALB 591 (1-2, max. 2), ORALB 592 (1-2, max. 2), or DPHS 568 (3); for foreign-trained dentists and non-dentists: ORALB 572 (3), PATH 444 (2/3, max. 5)
- * Recommended electives: DPHS 569 (2), MEBI 520 (2), ORALB 562 (1-5, max. 10), ORALB 574 (3), ORALM 663 (2), PATH 501 (1, max. 9), PATH 535 (*, max. 20), PATH 552 (2-5, max. 30)
- * Research: Fulfilled by either a report on experimentation carried out by the student in one of the laboratories, or a case report with review of the literature. Students interested in a more research-intensive experience should consider enrolling in the M. S. in Oral Biology (thesis) program.
- * Teaching: Students are encouraged to take elective courses offered through the Department of Medical Education and Graduate School.
- * Note: At present, this program is not certified by the American Board of Oral Pathology.

Master of Science, Oral Biology

Admission Requirements

- * Either a baccalaureate or a professional degree from a dental or medical school
- * Completed application and application fee of \$50
- * Three letters of recommendation
- * 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional – a personal statement that addresses the relationship between the student's personal background and aspirations
- * Brief biographical sketch in a resume/CV format
- * Official transcripts, sent directly to the Department of Oral Biology
- * GRE General Test
- * TOEFL required for international students. The minimum TOEFL score required for acceptance is 237 computer, 580 paper.

Degree Requirements

- * Minimum 70 credit hours (including at least nine credits of thesis), of which at least 7 credits must be from science courses outside the Department of Oral Biology. Students who have adequate backgrounds in required courses may, on presentation of appropriate documentation, be excused from required courses; up to six hours of transfer credit may be granted at the discretion of the Graduate School.
- * Required core courses: ORALB 569 (2), ORALB 575 (1-3, max. 10), ORAL 576 (1/2), ORALB 578 (2-4, max. 15), ORALB 579 (2), ORALB 581 (1-3, max. 3), ORALB 591 (1-2, max. 2), ORALB 592 (1-2, max. 2), ORALB 600, ORALB 700, DPHS 568 (3)
- * Electives: 7 credits from science courses outside oral biology
- * Recommended: One class on educational methods
- * Thesis research: A research thesis is required. During the first year, each student is encouraged to spend time in several laboratories to gain familiarity with research in progress and to help identify an area of special interest. Then, a preceptor and thesis advisory committee is appointed and the student begins thesis work. The Final Examination is concerned with the subject matter of the thesis and is conducted as an open seminar followed by examination by the advisory committee.
- * Teaching: Students are encouraged to take elective courses offered through the Department of Medical Education and Graduate School.

Master of Science, Dental Hygiene

Admission Requirements

- * Either a baccalaureate or a professional degree from a dental or medical school
- * Completed application and application fee of \$50
- * Three letters of recommendation
- * 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional – a personal statement that addresses the relationship between the student's personal background and aspirations
- * Brief biographical sketch in a resume/CV format
- * Official transcripts, sent directly to the Department of Oral Biology
- * GRE General Test
- * TOEFL required for international students. The minimum TOEFL score required for acceptance is 237 computer, 580 paper.

Degree Requirements

70 credits, as follows:

- * Coursework: 48 credits, as follows: CONJ 401 (4), CONJ 402 (4), CONJ 403 (4), PATH 444 (2-3, max. 5), PERIO 575 (2), ORALB 520 (3), ORALB 561 (3, max. 6), ORALB 572 (3, max. 6), ORALB 575 (1-3, max. 10); at least one of the following: PERIO 517 (2), DPHS 568 (3), DPHS 569 (2), or O S 532 (2); at least two of the following: ORALM 663 (2), MEBI 520 (2), MEBI 521 (3), GRDSCH 630 (2, max. 6), DHYG 595 (*, max. 12)
- * Electives: 22 credits of electives. Recommended electives: ORALB 569 (2), ORALB 574 (3), ORALB 578 (2-4, max. 15), ORALB 579 (2), ORALB 600 (*), DENT 534 (1, max. 2), DPHS 550 (*, max. 6), DPHS 569 (2), ORTHO 580 (3), O S 520 (2), PHCOL 434 (2), PHCOL 435 (2), ORALM 520 (2)
- * Clinical opportunities may be available in the DECOD (Dental Education in Care of Persons with Disabilities) and the Dental Fears Clinics.

Doctor of Philosophy

Admission Requirements

- * Either a baccalaureate or a professional degree from a dental or medical school
- * Completed application and application fee of \$50
- * Three letters of recommendation
- * 200-300 word statement of educational and professional objectives which includes a general area of research interest and academic goals. Optional – a personal statement that addresses the relationship between the student's personal background and aspirations
- * Brief biographical sketch in a resume/CV format
- * Official transcripts, sent directly to the Department of Oral Biology
- * GRE General Test
- * TOEFL required for international students. The minimum TOEFL score required for acceptance is 237 computer, 580 paper.

Degree Requirements

Minimum 90 credits (including at least 27 credits of thesis). Through coursework, students are expected to gain proficiency in one or more basic biologic sciences and to master modern biological approaches in addition to gaining expertise in the subject area of oral and craniofacial sciences. At least 15 credit hours must come from science courses in departments other than oral biology. These include courses offered through the molecular and cell biology program and courses selected to match the basic science interests of the student. Cross-disciplinary training in bioengineering is also available. All graduate students attend and participate in departmental seminars (ORALB 575).

- * Required core courses: ORALB 569 (2), ORALB 575 (2-4, max. 15), ORALB 576 (1-2), ORALB 578 (2-4, max. 15), ORALB 579 (2), ORALB 581 (1-3, max. 3), ORALB 591 (1-2, max. 2), ORALB 592 (1-2, max. 2), ORALB 600, ORALB 800, DPHS 568 (3)
- * At least 6 credits from the molecular and cell biology program: CONJ 524, CONJ 551 (1.5, 1.5) or PABIO 536 (3).
- * Strongly recommended: at least one class on educational methods

Residency Training

Residency training programs are available in oral and maxillofacial surgery and the general practice of dentistry. Both programs provide for rotation through several of the University-affiliated hospitals. Each is a fully accredited program that grants a certificate upon successful completion of the training. Stipends are provided.

The Oral and Maxillofacial Surgery Program is four years in duration and provides broad exposure to all aspects of the practice of oral and maxillofacial surgery. Application, selection, and administration of this training program is provided through the Department of Oral and Maxillofacial Surgery. Applicants to the program must be graduates of an accredited U.S. or Canadian Dental School, demonstrate proficiency in the English language, submit National Dental Board Examination scores for Part 1, and register and participate in the Postdoctoral Dental Matching Program. Further information can be obtained by contacting the Residency Program Coordinator, Department of Oral and Maxillofacial Surgery, Box 357134, University of Washington, Seattle, WA 98195-7134, 206-543-7722.

The General Practice Residency (GPR) is a one-year training program that emphasizes the general dentist's role in a hospital and the management of

medically, physically, and mentally compromised patients. Application, selection, and administration of the General Practice Residency is provided through the Department of Restorative Dentistry. Further information can be obtained by contacting Dr. Barton S. Johnson, Division of Hospital Dentistry, Department of Restorative Dentistry, Box 357456, School of Dentistry, University of Washington, Seattle, WA 98195-7456; (206) 543-7496; or visit the General Practice Residency Web site.

Postdoctoral Fellowships

Postdoctoral training fellowships are available in behavioral or public-health research in dentistry in addition to those in oral biology. Programs vary in duration and many accommodate degree-seeking or research fellows pursuing an academic career. NIH-sponsored partial tuition and a stipend for up to three years are provided for U.S. citizens, noncitizen nationals, and those foreign nationals with permanent-residency status in the United States. Members of ethnic minorities and women are especially invited to apply. Application, selection, and administration of the program are provided through the Departments of Dental Public Health Sciences and Oral Biology.

Graduate Training in Dental Public Health

Opportunities exist for pursuing graduate degrees in public health which emphasize applications to research in dentistry. Master of Public Health (M.P.H.) programs in the Departments of Epidemiology and Health Services of the School of Public Health and Community Medicine can be pursued in conjunction with postdoctoral training in the School of Dentistry's Department of Dental Public Health Sciences. Didactic course work is taken in the School of Public Health and Community Medicine, augmented with independent study and thesis research on selected topics in the School of Dentistry. Similar opportunities exist for pursuing the Ph.D. in epidemiology or biostatistics with an emphasis on research in dentistry. Further information may be obtained from the Office of Academic Affairs, Box 357480, School of Dentistry, University of Washington, Seattle, WA 98195-7480, (206) 221-6887.

The Office of Continuing Dental Education, School of Dentistry, offers programs and courses throughout the year to provide dentists, auxiliary personnel, and others involved in health care with current scientific knowledge and methodology of patient treatment. Utilizing local, national, and international experts, these programs provide a broad spectrum of information relevant to the needs of dental-health professionals. The instructional program consists of lectures, clinical courses, study clubs, extended clinical training, correspondence, and participation courses, some of which are offered in the new simulated-patient laboratory. Various programs are presented throughout the year in the Pacific Northwest, Alaska, and Hawaii.

A list of courses offered may be obtained from the Office of Continuing Dental Education, Box 357137, University of Washington, School of Dentistry, Seattle, WA 98195-7137, 206-543-5444, www.uwde.org.

Professional Programs

Doctor of Dental Surgery

The Doctor of Dental Surgery (D.D.S.) curriculum provides students with opportunities to learn the fundamental principles significant to the entire body of oral health. Students (approximately 54-56 per class) learn the basic health sciences, attain proficiency in clinical skills, develop an understanding of professional and ethical principles, and develop reasoning and critical decision-making skills that enable implementation of the dental knowledge base. The first year is divided among lecture, laboratory, and preclinical activities in basic sciences, dental anatomy, occlusion, and dental materials. There are also early clinical experiences in preventive dentistry and periodontics. In the second year of the curriculum, students develop additional preclinical skills, learn how basic science principles are applied to the clinical setting, and begin clinical patient treatment in the school's clinics. In the third and fourth years, students primarily concentrate on providing clinical treatment and attend lectures that refine diagnostic and technical skills. Additionally, students are required to participate in elective clinical and didactic courses. Students choose elective courses that are offered by all departments, including opportunities in independent study, research, seminars on various topics, and specialty clinical topics.

The D.D. S. curriculum extends for 42 months or 14 quarters, including two summer quarters. Twelve of the academic year quarters are ten weeks of instruction and one week of examination, while the two required summer

quarters following years two and three are each nine weeks long. If needed, students may be allowed additional time to complete required course work beyond 42 months.

Admission

To be considered for admission to the predoctoral program, a student will need to have completed the required courses listed below, have taken the Dental Admission Test, and have attended a personal interview. The School does not select or give preference to a particular undergraduate major field. The Admissions Committee encourages diversity in majors. Courses in the social sciences and the humanities are also important and are reviewed by the Committee.

The School of Dentistry is a state supported institution and participates in the student exchange program provided by the Western Interstate Commission for Higher Education (WICHE) which supports students from western states without dental schools. Although all applications are carefully reviewed, preference in admission is given to residents of Washington and WICHE states, followed by residents of other states. Required courses are: general chemistry — 2 quarters or 1 semester; organic chemistry — 2 quarters or 1 semester; general biochemistry — 2 quarters or 1 semester, general physics — 3 quarters or 2 semesters; general biology or zoology — 3 quarters or 2 semesters; general microbiology — 2 quarters or 1 semester. The School enrolls a first-year class of 50-55 students.

Transfer Applicants: The School rarely, and only under exceptional circumstances, admits transfer students from other dental schools.

Foreign Applicants: The School does not provide a special program for foreign-trained dentists.

Health Sciences Minority Student Programs: To increase diversity of students, the School participates in and provides funding for the Health Sciences Minority Student Program. In addition to advising and career counseling, this office works with Health Sciences schools to provide student development and support programs, networking opportunities, and summer research programs. The HSMSP Office activities include participation on several Health Sciences and campus-wide committees for purposes of collaborating and exchanging strategies on effective methods for recruiting and retaining a diverse student body, as well as promoting and celebrating diversity.

The School belongs to the American Association of Dental Schools Application Service (AADSAS), the national application service used by most U.S. dental schools. The School has established November 1 as its AADSAS priority filing deadline. This means that only those applications received in the AADSAS Washington, D.C. office by the priority filing date will be forwarded to the University of Washington for consideration by the Admissions Committee. There are no exceptions. AADSAS applications are available online at www.adea.org. Information regarding the Dental Admission Test may be found at <http://www.ada.org/prac/careers/dat-01.html>.

For information on admission to the University of Washington School of Dentistry contact either Kathleen Craig, Office of Student Admissions, School of Dentistry, University of Washington, Box 356365, Seattle, WA 98195-6365, 206-543-5840, fax 206-616-2612, askuwsod@u.washington.edu, www.dental.washington.edu, or Jason Boyd, Predental Advising Office, University of Washington, 171 Mary Gates Hall, Box 353760, Seattle, WA 98195-3760.

Once the AADSAS application has been received, a preliminary screening determines if an applicant meets the Admissions Committee's criteria to receive a supplemental application and request for the following materials:

- * A supplementary application which includes a short personal statement
- * A non-refundable application fee of \$35.
- * Three letters of recommendation. Letters of recommendation must include one from a science instructor who can evaluate the applicant's academic and intellectual qualifications, a second from a dentist who is familiar with the applicant's knowledge of and motivation toward the dental profession, and the third (character reference) from someone who can indicate the applicant's contribution to fellow man, community, etc. If a predental committee exists on the applicant's campus, a combined recommendation from that committee may be used to replace all three recommendations. The School of Dentistry will accept letters of recommendation processed by AADSAS, or directly from recommenders.
- * Dental Admission Test scores. **Test must be taken by October 31 of the year prior to entry.**
- * Transcripts from all higher education institutions attended.
- * A list of current and future courses.

- * Acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Dental Education at the University of Washington School of Dentistry (to be sent with the supplemental application form).
- * Conviction/criminal history information. Washington state law requires that all faculty, students, and staff disclose background information concerning crimes and offenses against vulnerable populations. A complete copy of the law is available from the School's Office of Student Services and will be forwarded upon request. Applications will not be considered until completed disclosure forms have been returned to Student Admissions.

The application will be considered complete once all materials noted above (1-8) are returned. Upon receipt of the completed application, invitations for an interview are sent to applicants based on a preliminary screening of grades, DAT scores, and noncognitive factors. The interview is an opportunity for an open and friendly discussion of the applicant's interests, background, and reasons for selecting dentistry as a profession. The interview allows the applicant to ask questions about the School, faculty, and student life, and is conducted by members of the Admissions Committee. In addition to the interview, the applicant will have an opportunity to hear information about financial aid, meet and have lunch with enrolled students, take a tour of the School, and meet one of the School's deans.

Following the interview, the Admissions Committee, which is composed of faculty and community dentists, will make a decision concerning admission status. The following seven areas are considered in their deliberations:

1. Grades. Overall grade-point average (GPA) and GPA of pre dental required science courses are reviewed. College grades are an important indicator of dental school performance and success. The Committee members review these grades for a strong, consistent GPA without withdrawals, incompletes, repeated courses, or non-graded options. Grade trends are reviewed.
2. DAT (Dental Admission Test). The test, sponsored by the American Dental Association, covers several areas: quantitative reasoning, survey of natural sciences (including biology, general, and organic chemistry), and perceptual ability (including form development, apertures, angles, cubes, and orthographic projections). At the University of Washington the scores are reviewed to identify an applicant's areas of strength. The test must be taken no later than October 31, one year prior to admission.
3. Level of Pre-professional Education. The majority of applicants will have a baccalaureate degree by the time of entry. Admission may be offered to applicants without a baccalaureate degree, but only to those applicants who have completed all pre dental requirements and have an extremely competitive academic record. A minimum of three years' full-time coursework is required.
4. Dental Knowledge. Knowledge of the field of dentistry through experience in a dental setting (dentist's office, clinic, etc.), introductory dental coursework, and exploration of the dental literature are considered as admission factors. A qualified applicant will have a clear understanding of the profession and a demonstrated interest in the field.
5. Contribution to Diversity. Diversity in the student body contributes to the development of oral health care professionals prepared to address the needs of society.
6. Unique Life Experiences. Research and teaching efforts, travel, and work experience are some of the life experiences that are considered important. Such experiences demonstrate the breadth and level of maturity of a candidate.
7. Personal Attributes. In addition to motivation, the applicant's poise and communication skills are examined by the Admissions Committee. Personal attributes such as integrity, responsibility, leadership, initiative, community service, perseverance, and diversity of interests are important.

Although interviews begin in October, the earliest the Admissions Committee will notify applicants of its decision is December 1. The School uses a "rolling admission" format, so interviews and committee decisions will continue to be made between December and March. The Admissions Committee will make one of three decisions regarding all applications:

- * Offer of Acceptance. Admission application has been accepted. The applicant will have a specified time to reply to reserve enrollment in the entering first-year class. In addition, enrollment will be contingent on

timely submission of the following requirements: required registration deposit, transcripts showing completion of all required pre dental courses, registration for autumn quarter of the upcoming academic year, and completion of required immunizations.

- * Alternate Status. Applicant is offered a position on the Alternate List. The applicant will have a specified time to reserve a position on this list which is maintained until the beginning of the school year.
- * Denial of Admission. The Committee has considered the application but cannot offer a position or alternate status.

Accepted applicants will receive follow-up letters and information. Letters detailing registration procedures and providing financial aid information will be sent in early summer. In late summer, new students receive a packet of materials welcoming them to the School and describing the orientation program, also called Prep Weeks. Attendance is mandatory and will provide an opportunity for the newly enrolled student to learn about the upcoming curriculum, student rights and responsibilities, financial aid information, student organizations, and to begin course work. Prep Weeks begin approximately ten days prior to the start of the School of Dentistry's autumn quarter. New students attend an off-campus student retreat to meet classmates and relax in an informal setting.

Western Interstate Commission for Higher Education (WICHE): The School participates in the program administered by WICHE for students who reside in Western states not served by a dental school (Alaska, Arizona, Hawaii, Montana, Nevada, New Mexico, North Dakota, and Wyoming). Such students should seek requests for certification from the WICHE commission office in their state of residence. Students who enroll in the School under the WICHE program pay in-state tuition, the nonresident portion being paid by the member state that sponsors the student.

Information on loans and scholarships may be obtained from the Director of Financial Aid, D322 Health Sciences, Box 356365. Information relating to student life, including the Academic Regulations Manual and Professional Ethics Code may be obtained from the Associate Dean for Student Services, D322 Health Sciences, Box 356365.

Degree Requirements

285-333 credits minimum, as follows:

- * *Year 1 (68 credits, plus electives):* B STR 431 (2), B STR 530 (13), B STR 541 (4); DENT 610 (2); DPHS 510 (2); ORALB 510 (3, 3), ORALB 520 (3); ORALM 513, ORALM 514, ORALM 515 (1, 1, 1); ORALM 516, ORALM 517 (1, 2); P BIO 405; P BIO 406 (4, 4); PATH 444 (2, 3); PERIO 517 (2); RES D 510 (1, 2), RES D 511 (3), RES D 515 (3), RES D 516 (3), RES D 517 (3), RES D 519 (1)
- * *Year 2 (87 credits, plus electives):* DENT 520 (1); DENT 521, DENT 522 (3, 3); DENT 523 (1); ENDO 521 (4); O S 520 (2); ORALB 521 (2); ORALM 520 (2, 2, 2), ORALM 525 (1), ORALM 526 (2), ORALM 527 (1), ORALM 528 (1), ORALM 529 (4); ORTHO 520 (2), ORTHO 521 (3), ORTHO 522 (2); PEDO 520 (4), PEDO 525 (1); PERIO 525, PERIO 526 (2, 2); PERIO 620 (1); PHCOL 434 (2), PHCOL 435 (2); PROS 520 (3), PROS 521 (1), PROS 523 (2), PROS 525 (4), PROS 620 (3, 1); RES D 520, RES D 521, RES D 522 (3, 3, 3); RES D 525, RES D 526, RES D 527 (3, 3, 3); RES D 620 (3)
- * *Year 3 (74 credits, plus electives):* DENT 533 (2), DENT 534 (1, 1), DENT 537 (1), DENT 543 (1); DENT 551, DENT 552, DENT 553, DENT 554 (1, 1, 1, 1); DPHS 535 (1), ENDO 534 (1), ENDO 535 (1), ENDO 630 (1, 1, 1, 1); O S 530 (1, 1, 1), O S 532 (2), O S 630 (2, 2); ORALM 531, ORALM 532, ORALM 533 (1, 1, 2); ORALM 630 (1, 1, 1, 2); ORTHO 630 (1); ORTHO 631 (1); PEDO 630 (1, 1, 1, 1); PERIO 530, PERIO 531 (2, 2); PERIO 630, PERIO 631, PERIO 632 (1, 1, 1); PERIO 639 (1); PROS 630 (1, 1, 1, 2); RES D 530, RES D 531, RES D 532 (2, 2, 2); RES D 535 (3), RES D 630 (2, 3, 3), RES D 635 (3)
- * *Year 4 (54 credits, plus electives):* DENT 547, DENT 548, DENT 549 (2, 2, 2); DENT 555, DENT 556, DENT 557 (1, 1, 1); DENT 640 (2), DENT 645 (2); DPHS 541 (1), DPHS 640 (1); ENDO 630 (1, 1, 1); O S 630 (2); ORALB 540 (2); ORALM 540 (2, 2), ORALM 545 (1, 1), ORALM 640 (1, 1, 1); PEDO 630 (1, 1, 1); PERIO 540 (1); PERIO 640, PERIO 641, PERIO 642 (1, 1, 1); PROS 640 (1, 1, 1); RES D 540 (2), RES D 541 (2), RES D 542 (1), RES D 640 (3, 3, 3)
- * *Electives:* A minimum of two elective courses must be taken during the course of the program. Elective credits may not exceed a total of 50 credits.

Facilities

School clinics, teaching laboratories, and lecture halls are up-to-date, well maintained, and periodically renovated. Clinical modules are assigned to students for use in patient treatment. The D-1 Simulation is a state-of-the-art teaching facility used for preclinical and laboratory courses.

School Accreditation and Licensure

The School is fully accredited by the Commission on Dental Accreditation, the recognized accrediting body for dentistry and the related dental fields. For information, write to the Commission on Dental Accreditation, 211 East Chicago Ave., Chicago, IL 60611-2678. Admission to the practice of dentistry in any state is conditional upon meeting the requirements of the individual state dental licensure requirement. In order to practice in the State of Washington, the candidate for licensure must have a dental degree from a U.S. or Canadian dental school, and have successfully completed the American Dental Association National Board Examinations and the Western Regional Examining Board Examination. Additional information

about licensure requirements should be requested from the Washington State Department of Health, Dental Quality Assurance Commission, PO Box 1099, Olympia WA 98504-1099, 360- 586-6898.

Health Care and Immunization Policy

Enrolled students at the University of Washington School of Dentistry are entitled to limited outpatient basic health care at the Hall Health Primary Care Center. There are additional fees associated with this care. This care does not cover spouses and dependants. In addition, the University has arranged for an Accident and Sickness Insurance Plan specifically designed for students, their dependants, and their domestic partners.

Course Descriptions

College of Education

Dean

Patricia Wasley
222 Miller

Associate Deans

Stephen T. Kerr
Deborah E. McCutchen

The College of Education is a graduate and professional school dedicated to equity and excellence in education through the preparation and on-going renewal of education professionals, the promotion of social justice, the advancement of knowledge through research, and the connection of research to inform policy and improve practice. The College has four broad curricular areas: Curriculum and Instruction, Educational Leadership and Policy Studies, Educational Psychology, and Special Education. Degrees conferred are M.Ed., Ph.D., Ed.D., and M.I.T. Certificates can be earned in teaching (elementary, secondary, and special education), school administration (principals, program administrators, and superintendents), and school psychology.

The College of Education at the University of Washington believes that an effective public education system for a diverse citizenry is the cornerstone of a democratic society. To that end, the College dedicates its resources to helping make an excellent education an everyday reality for every student in every community across the state and country. As part of a major university located in a metropolitan area, the College is able to work in collaboration with a number of school districts in the area to provide teaching, research, and field experiences for its students.

Special Offices and Services

The College of Education maintains a number of specialized offices to assist in the fulfillment of its goals. Among these are the Office of Teacher Education, the Office of Admissions and Academic Support, and the Office of Minority Recruitment and Retention. In addition, the College of Education maintains formal relationships with a number of school districts in the area to provide research and field experience opportunities for students in the various programs. Individuals interested in teacher certification or in graduate degree programs may visit the College's Web site at www.educ.washington.edu or email edinfo@u.washington.edu.

Undergraduate Study

Undergraduate students can choose from courses offered to help them explore the field of education and prepare for graduate study. Students should visit the College Web site and contact the Office of Admissions and Academic Support to discuss their goals with a program-design specialist. Courses that provide field work in local schools or social service agencies give students the opportunities to make informed career and academic choices. Students may complete prerequisites for graduate programs through undergraduate work. In cooperation with academic departments, requirements to meet endorsement (subject) guidelines for secondary teaching may be completed as an undergraduate. Students should plan their coursework as early as possible during their undergraduate study.

Professional Certification

The College of Education is authorized by the State Board of Education to offer professional certificate programs in education for administrators, educational staff associates, and teachers. Program-design specialists are available to help with pre-program counseling, long-range planning, applications, registration, referrals to other campus resources, general program advising, and continuing/professional certificate requirements.

Administrator Certificates

Administrator Certificate preparation programs for superintendents, principals, and program administrators are offered through the College of Education. The following Web sites contain specific information about admissions, curriculum, faculty, and general advising:

For principals and program administrators, the Danforth Educational Leadership Program, depts.washington.edu/k12admin/principal.html.

For superintendents, the Leadership for Learning Program, depts.washington.edu/k12admin/superintendent.html.

Educational Staff Associate Certificates

Educational Staff Associate Certificate preparation programs are offered for the school psychologist and school social worker. Information concerning requirements and admission may be obtained as follows: school psychologist -- Area of Educational Psychology, 312 Miller, Box 353600, University of Washington, Seattle, Washington 98195-3600; school social worker -- School of Social Work, Box 354900, University of Washington, Seattle, Washington 98195-4900.

The College of Education is authorized by the State Board of Education to prepare and recommend individuals for Residency and Professional Teaching Certificates. The Teacher Education Program is accredited by the National Council for Accreditation of Teacher Education. Graduates are qualified for certification in all states party to the Interstate Certification Compact and in other states as well. Title II of the Higher Education Act requires institutions of higher education and states that approve such programs to develop and publish an annual report on their teacher preparation programs. The University of Washington report may be viewed on the Web at www.educ.washington.edu/COEWebSite/pdf/Title2.pdf, or requested via email from edinfo@u.washington.edu.

Residency Teaching Certification Program

The College of Education offers residency teaching certification for individuals desiring careers as elementary or middle/secondary school teachers, or as special education teachers working with students with severe disabilities or emotional and behavioral disorders, and with infants, toddlers, and preschool children with disabilities. Candidates may also select a teacher education/special education option which provides initial certification in elementary education with course work in special education. All programs are offered at the master's level. For additional information, email edinfo@u.washington.edu, or visit the College's Web site at www.educ.washington.edu.

An undergraduate or postbaccalaureate program leading to certification in music education, grades K-12, is offered through the School of Music. For additional information contact the School of Music Advising Office, 116 Music, Box 353450, University of Washington, Seattle, WA 98195-3450.

Professional Teaching Certificates

For information on the OSPI guidelines and where programs exist, contact any Educational Service District or the Office of Professional Licensing and Certification, OSPI, Box 47200, Old Capitol Building, Olympia, Washington 98504, or visit www.k12.wa.us/cert/. For information about Professional Teacher Certificate programs at the University, contact Center Connect at 206-543-7834.

Endorsements on Teaching Certificates

Teachers holding an initial/residency or continuing/ professional teaching certificate may add endorsements to their certificates which will qualify them to teach additional subjects. Information on endorsement requirements is available on the Web at www.educ.washington.edu/COEWebSite/research/profdev/endorse.htm, or contact the Office of Admissions and Academic Support, 211 Miller, Seattle, WA 98195-3600, or email edinfo@u.washington.edu.

Graduate Degree Programs

Graduate Program Coordinator
206 Miller, Box 353600
206-543-7833
edinfo@u.washington.edu

The College of Education currently offers four advanced degrees: Master in Teaching, Master of Education, Doctor of Education, and Doctor of Philosophy. The M.I.T. degree will be awarded to elementary and secondary certification students at the completion of their program. Graduate students working toward other degrees may specialize their degree studies in curriculum and instruction, educational psychology (including cognitive studies), educational leadership and policy studies, or special education. A focus on higher education leadership and policy leading to Master of Education or Doctor of Education degrees is offered through Educational Leadership and Policy Studies. Questions regarding graduate study in

education should be directed via email to edinfo@u.washington.edu, or visit the College's Web site at www.educ.washington.edu.

Master in Teaching

The Master in Teaching (M.I.T.) degree program results in a Washington residency teaching certificate for elementary or secondary (specific subjects) school teaching. The program is an integrated sequence of full-time, daytime course work and field experiences spanning five quarters. One quarter is devoted to full-time placement in a school. Field experiences are in schools in the Seattle/Puget Sound area chosen to provide a variety of situations in regard to level, school population, and location.

Admission Requirements

- * A baccalaureate degree from an accredited institution with at least a 3.0 GPA for the last 90 quarter (60 semester) credits.
- * Goal statement
- * Gain 60 or more hours in a classroom that most closely matches the subject and age level the applicant wishes to teach. Have supervisor complete the Evaluation of Educational Experience form.
- * Two letters of recommendation from faculty or professional references.
- * Send passing scores from all three sections of the West-B exam scores to UW.
- * Complete and gain a passing score of the Praxis II exam in applicant's specific content area. Refer to Web or brochure for specific information.
- * Official transcripts from all community colleges and universities attended.
- * Secondary applicants must contact the appropriate department advisor to get their coursework evaluated using the Endorsement Evaluation form. Please refer to the Endorsement sheet in the MIT packet for department information and locations. Social Studies applicants may drop off unofficial transcripts and course descriptions to 206 Miller for evaluation.
- * Elementary applicants must have coursework evaluated by a Program Design Specialist in 206 Miller. This is done by submitting transcripts (and course descriptions from schools other than UW) along with the Prerequisite Evaluation form to 206 Miller. The evaluation will be completed within 2 weeks and mailed to the applicant.

Degree Requirements

60-101 credits, as follows:

- * *Elementary Education Focus:*
 - o Courses: EDC&I 324 (2); EDC&I 494 (1); EDC&I 586 (1, 1, 1); EDLPS 496 (3); EDSPE 526 (3); EDTEP 501, EDTEP 502, EDTEP 503 (2, 3, 4); EDTEP 505 (2); EDTEP 511 (3); EDTEP 521, EDTEP 522 (3, 3); EDTEP 523 (3); EDTEP 531, EDTEP 532, EDTEP 533 (3, 3, 3); EDTEP 541 (4); EDTEP 542 (3); EDTEP 543 (3); EDTEP 551 (3); EDTEP 552 (3); EDTEP 601 (10); UCONJ 510 (4).
 - o Note: The current Washington state endorsement for elementary teachers is "elementary education." Graduates of this program may be hired to teach specific or multiple subjects in middle or junior high school through grade 8. Those interested in teaching in the middle schools are encouraged to discuss this option with advisers in the Office of Student Services.
- * *Elementary Special Education Focus:* EDC&I 324 (2); EDC&I 494 (1); EDC&I 586 (1, 1, 1); EDLPS 496 (3); EDSPE 404 (3); EDSPE 414 (3); EDSPE 496 (3); EDSPE 496 (3); EDSPE 500 (3); EDSPE 513 (3); EDSPE 514 (3); EDSPE 526 (3); EDSPE 545 (3); EDSPE 601 (3); EDTEP 501, EDTEP 502, EDTEP 503 (2, 3, 4); EDTEP 505 (2); EDTEP 511 (3); EDTEP 521, EDTEP 522 (3, 3); EDTEP 523 (3); EDTEP 531, EDTEP 532, EDTEP 533 (3, 3, 3); EDTEP 541 (4); EDTEP 542 (3); EDTEP 543 (3); EDTEP 551 (3); EDTEP 552 (3); EDTEP 601 (10); UCONJ 510 (4).
- * *Secondary Education Focus:* EDC&I 494 (1); EDC&I 586 (1); EDTEP 551 (3); EDTEP 561 (5); EDTEP 562, EDTEP 563 (3, 3); EDTEP 564 (3); EDTEP 565 (3); EDTEP 571 (3); EDTEP 573 (3); either EDTEP 580, EDTEP 582, EDTEP 584, EDTEP 586, or EDTEP 588 (5); either EDTEP 581, EDTEP 583, EDTEP 585, EDTEP 587, EDTEP 589 (3); EDTEP 591 (3); EDTEP 592 (3); EDTEP 593 (3); EDTEP 595 (3); EDTEP 601 (10); elective outside Education (2)

Master of Education

The Master of Education (M.Ed.) degree requires a minimum of 45 credits, including at least 15 credits in a specialized area of study in education; 9 credits related to, but outside of, the specialization, some course work outside education; 9 thesis credits or, for the non-thesis option, 9 credits in a field study or other approved project; and a final examination.

Admission Requirements

- * A baccalaureate degree from an accredited institution with at least a 3.0 GPA for the last 90-quarter (60 semester) credits.
- * GRE Scores
- * Goal statement
- * Prerequisites stipulated by the area of specialization within the College

Degree Requirements, Curriculum and Instruction Pathway

45 credits, as follows:

- * Common Area requirements
 - o Foundations of Education (9 credits): Students should gain an understanding of the complex issues that influence teaching and learning. Students work with advisors to select from courses such as: history of education, education as a moral endeavor, human learning, curriculum design, special topics in curriculum and instruction..
 - o Thesis, non-thesis, or project option (9 credits): The non-thesis option may be satisfied by a 9 credit culminating project or 9 credits at the 500 level or above related to the student's teaching and research interests.
 - o Colloquium Presentation: At the end of the program, students are required to present their work at the Curriculum and Instruction colloquium. For this, students prepare a visual representation of their work (usually a poster). During the colloquium, students are expected to talk to faculty and students about and answer questions about their thesis, project, or other work conducted during the program. In addition, students are required to attend one other colloquium prior to presenting.
- * *Educational Communication and Technology Study Option:*
 - o Required courses (9 credits minimum): EDC&I 510 (3), EDC&I 511 (3); either EDC&I 551 (3), EDC&I 552 (3), or EDC&I 553 (3)
 - o Related courses (6 credits minimum): Courses on the design, development, and use of instructional systems, materials, and approaches in a variety of educational settings, chosen in consultation with adviser.
 - o Courses outside Curriculum and Instruction (3-12 credits): These courses are to be selected with the student's adviser. They may include courses from any other Area in the College and from departments across the University. At least 3 credits must be taken outside the College.
 - o Additional foundations courses (3-6 credits): Students may take additional Foundations courses, to be chosen from the following categories with the approval of the adviser: psychological foundations, educational policy studies, research foundations, or curriculum foundations.
- * *Language, Literacy, and Culture Study Option:*
 - o Core studies (9 credits): 9 credits from the following: EDC&I 453 (3), EDC&I 455 (3), EDC&I 457 (3), EDC&I 460 (3), EDC&I 462 (3)
 - o Assessment and inquiry (3 credits): All students must, in consultation with their adviser, select one course that focuses on issues of assessment and inquiry
 - o Concentrations (15 credits): Literacy specialists, in consultation with their advisers select a minimum of three courses in the Literacy strand and a minimum of one course in each of the other strands. ESL specialists, in consultation with their advisers select a minimum of three courses in ESL and a minimum of one course in each of the other strand.
- * *Mathematics Education Study Option:*
 - o At least 27 credits in Mathematics and Mathematics Education. Courses should be selected in consultation with the student's advisor and be appropriate for future career goals. Of the 27 credits, 9 credits should be chosen from Mathematics Education courses (below).
 - o Mathematics Education Courses: EDC&I 475 (3), EDC&I 476 (5), EDC&I 477 (5), EDC&I 478 (2-9), EDC&I 479 (1-6), EDC&I 575 (3), EDC&I 576 (3), EDC&I 577 (1-6).
- * *Multicultural Education Study Option:*
 - o Ethnic Diversity Outside the College of Education (15 credits): 15 credit hours in ethnic diversity subject matter fields outside of the College of Education. Courses can be taken from those offered by various departments in the College of Arts and Sciences. All course choices are to be negotiated with advisers.
 - o Multicultural Education (15 credits): EDC&I 424 (3), EDC&I 569 (4); remainder of courses to be chosen from the following: EDC&I 456 (1-6); EDC&I 464 (3); EDC&I 469 (3); EDC&I 474 (3); EDPSY 536 (3); EDLPS 566 (3); EDC&I 573 (3); EDC&I 574 (3).

- * *Science Education Study Option:* The student selects, with the approval of the faculty supervisor, at least 21 credits in fields such as, biology, chemistry, physics, earth science, oceanography, or other science-related courses.
- * *Social Studies Education Study Option:* 12-15 credits of core social studies courses, to be negotiated with adviser. 15-21 credits of history/social science courses related to teaching interests, or additional educational courses.
- * *Teaching and Curriculum Study Option:* 27 credits, including 9-18 credits of required study in teaching and curriculum, to be chosen in consultation with adviser.

Degree Requirements, Educational Psychology

50 credits, as follows:

- * *General Requirements:*
 - o Completion of an approved program of a minimum of 50 quarter credits, exclusive of prerequisites.
 - o Written or oral examination upon completion of coursework.
 - o Research: two options are available, thesis, or non-thesis. The thesis option requires the design and accomplishment of an empirical study. The non-thesis option requires the preparation of a scholarly paper of publishable quality. (9 credits minimum)
- * *Foundations of Education courses (12 credits):* either EDLPS 521 (3), EDLPS (3), EDLPS 540 (3), or EDPSY 580 (3); either EDPSY 501 (3) or EDPSY 510 (3); EDPSY 490 (3); EDPSY 591 (3)
- * *Measurement, Statistics, and Research Design Study Option:*
 - o Required courses: One or more courses from each of the following content fields with course options to consist of courses listed below or alternative courses (including courses outside of Education) approved by the faculty adviser.
 - + Measurement and Evaluation: EDPSY 495 (3), EDPSY 512 (3), EDPSY 584 (3), EDPSY 592 (3), EDPSY 595 (3), EDPSY 596 (3), EDPSY 597 (3)
 - + Human Development: EDPSY 502 (3), EDPSY 531 (3), EDPSY 532 (3), EDPSY 582 (3)
 - + Cognition and Learning: EDPSY 510 (3), EDPSY 524 (3), EDPSY 525 (3), EDPSY 583 (3), PSYCH 414 (5)
 - + Language Processes: EDPSY 520 (3), EDPSY 521 (3)
 - o Research (9 credits): Thesis option: The M.Ed. thesis is a report of a research investigation that requires the student to design and execute an empirical study. Non-thesis option: The non-thesis option requires preparation of a scholarly review of the research literature and should be of publishable quality.
- * *Human Development and Cognition Design Study Option:*
 - o Required courses: One or more courses from each of the following content fields with course options to consist of courses listed below or alternative courses (including courses outside of the College) approved by the faculty adviser:
 - + Human Development: EDPSY 502 (3), EDPSY 509 (5), EDPSY 531 (3), EDPSY 532 (3), EDPSY 533 (3), EDPSY 534 (3), EDPSY 582 (3)
 - + Cognition and Learning: EDPSY 510 (3), EDPSY 524 (3), EDPSY 525 (3), EDPSY 583 (3), PSYCH 414 (5)
 - + Reading and Language Processes: EDPSY 425 (3), EDPSY 507 (5), EDPSY 520 (3), EDPSY 521 (3), EDC&I 532 (3), PSYCH 447/LING 447 (4), PSYCH 457/LING 457 (5), ENGL 472 (5)
 - + Measurement and Evaluation: EDPSY 495 (3), EDPSY 512 (3), EDPSY 513 (3), EDPSY 584 (3), EDPSY 592 (3), EDPSY 595 (3), EDPSY 596 (3), EDPSY 597 (3)
 - o Research (9 credits): Thesis option: The M.Ed. thesis is a report of a research investigation that requires the student to design and execute an empirical study. Non-thesis option: The non-thesis option requires preparation of a scholarly review of the research literature and should be of publishable quality.
- * *School Psychology Specialization:*
 - o Statistics and Research (6 credits): EDPSY 490 (3), EDPSY 591 (3)
 - o Cognition and Learning (3 credits minimum): EDPSY 501 (3); if the student does not possess a teaching certificate, EDPSY 500 (3) is required
 - o Social and Developmental Bases of Behavior (6 credits minimum): EDPSY 502 (3), EDPSY 531 (3), EDPSY 532 (3)
 - o Exceptionality (6 credits minimum): EDPSY 515 (3), EDSPE 520 (3), EDSPE 526 (3), PSYCH 410 (5)

- o Biologic Bases of Behavior (5 credits): EDPSY 577 (5)
- o Specialization Seminars (7 credits minimum): EDPSY 549 (3), EDPSY 568 (3), EDPSY 570 (2), EDPSY 568 (3), EDPSY 549 (3)
- o Individual Differences and Personality (5 credits minimum): EDPSY 548 (5), PSYCH 405 (5)
- o Assessment (16 credits minimum): EDPSY 507 (5), EDPSY 564 (5), EDPSY 540 (5), EDPSY 572 (3), EDPSY 573 (3)
- o Intervention (12 credits minimum): EDPSY 544 (5), EDPSY 546 (5), EDPSY 550 (3), EDPSY 551 (3)

- * *Note:* At least one course relevant to the student's field of study must be taken from a unit other than the College.
- * *Certification:* The Washington State approved internship program at the University of Washington is open only to graduate students who have successfully completed the masters program in School Psychology at the University of Washington and are currently matriculated as full time students at the post-masters or doctoral levels. Washington State Certification is awarded by successfully passing the Praxis Exam and by successfully completing a 9-month internship of 1200 hours or more (half of which must be in a school setting) and 6 credit hours of university case study supervision and 30 hours of internship credit. Students who successfully complete the internship may also apply for National Certification as a school psychologist.

Degree Requirements, Education Leadership and Policy Studies

48 credits, as follows:

- * Common area and distribution requirements (18 credits minimum): A minimum of 18 credits of coursework in EDLPS. Of these 18 credits, 12 credits are distributed as follows:
 - o Social and Cultural Foundations, 6 credits minimum
 - o Organizations and Policy, 6 credits
- * Specialization requirement (9 credits minimum): In conjunction with the adviser, students develop an area of specialization.
- * Breadth requirement (6 credits minimum):
 - o At least 3 credits in one or more other areas in the College of Education (EDC&I, EDPSY and/or EDSPE)
 - o At least 3 credits outside the College of Education.
- * Research/inquiry requirement (6 credits minimum):
 - o At least 3 credits in basic statistics (EDPSY 490 or the equivalent).
 - o At least 3 credits in research/inquiry methods (e.g., EDPSY 588, EDPSY 591, EDLPS 524, EDLPS 535, EDLPS 543, EDLPS 568, or the equivalent)
- * Completion of thesis or non-thesis option (9 credits minimum)
- * Specific courses are determined in consultation with the adviser

Degree Requirements, Special Education

48 credits, as follows:

- * Foundations of Education (6 credits): A minimum of 6 credits in courses in or out of the College of Education, or the equivalent as determined in consultation with the adviser.
- * Special Education Major Field (21 credits): The specific sequence of courses is determined by the adviser, depending on the student's background, educational goals, and type of disabled individual that the student wishes to teach.
- * Assessment and Research Methodology (9 credits): In order to develop competency in assessment of learners with disabilities and to become familiar with research tools, a minimum of 9 credits, selected from coursework in assessment and/or research methodology are determined in consultation with the adviser.
- * Special Assignments in Special Education (12 credits minimum): A minimum of 12 credits divided among at least two of the following options: EDSPE 500 (1-6, max. 6), EDSPE 600, EDSPE 601 (3-9, max. 9), EDSPE 700 (max. 9). Students entering an Ed.D or Ph.D. program should select a thesis option.

Doctor of Education

The Doctor of Education (Ed.D.) degree is designed to prepare professionals whose primary interest is to deal directly with problems of educational practice. The program of study leading to the Ed.D., as a professional degree, focuses on the utilization of research and practitioners' knowledge, rather than on the production of research knowledge.

This professional degree requires at least two years of resident study, a program of specialized study with credit in education and related fields,

sufficient preparation in research methodology to interpret research findings for use in practice, an internship and leadership training, a General Examination, a dissertation on a problem of educational practice, and a Final Examination.

Admission Requirements

- * Graduate Record Exam (GRE) scores
- * Master's degree or equivalent from an accredited institution
- * Minimum grade point average of 3.00 from the most recent 90 (60 semester) credits
- * Transcripts (sealed) from each college or university attended.
- * Goal statement
- * Three letters of recommendation
- * Resume/curriculum vita
- * Writing sample(s)
- * Interviews
- * Specific programs may have additional admission requirements. Please visit the Web site or contact the program for further information.

Degree Requirements

102 credits, as follows:

- * Educational Specialization (24 credits):
 - o Courses in one specialty within the area of specialization designed to provide student with knowledge of the field: 9 credits
 - o Courses in the General Area or in the student's special interests within the Area of Specialization other than those selected to fulfill the 9 credits above: 15 credits
- * Related Field(s) (24 credits): Courses selected from within education (minimum of 12 credits) or outside of education which complement the student's educational specialization and include multidisciplinary learning experiences.
- * Research/Evaluation Preparation (9 credits): Courses selected to enhance a student's ability to conduct field-based research/evaluation studies.
- * Leadership Training (9 credits): EDLPS 520 (3), EDLPS 550 (3), EDLPS 560 (3)
- * Supervised Internships and Field Experiences (9 credits): The internships and field experiences are designed to work in education and the related field(s), and to conduct field-based research and evaluation studies.
- * Dissertation (27 credits)

Doctor of Philosophy

The Doctor of Philosophy (Ph.D.) in education is a research degree. It offers preparation for a career of research on issues fundamental to education -- issues that range from fairly narrow questions about human learning to macroquestions regarding the form of societies' educational institutions. The scope of the Ph.D. degree in education is broad. It is possible to pursue a degree organized around traditional study areas such as educational psychology, curriculum and instruction, special education, or educational leadership and policy. A student may develop a course of study that integrates various elements of more than one study area (e.g., multiethnic education and literacy). One of the study options in the Ph.D. program is school psychology, which prepares students for the professional practice of psychology with school-age children, as well as for research.

Admission Requirements

- * Graduate Record Exam (GRE) scores
- * Master's degree or equivalent from an accredited institution
- * Minimum grade point average of 3.00 from the most recent 90 (60 semester) credits
- * Transcripts (sealed) from each college or university attended.
- * Goal statement
- * Three letters of recommendation
- * Resume/curriculum vita
- * Writing sample(s)
- * Interviews

Degree Requirements

The course of study consists of six academic areas and the dissertation. The Ph.D. is specialized and highly individualized. Especially in a broad field like education, it is impossible to specify a single group of courses that should be taken by all Ph.D. students. Although the department has a limited number of required courses for the Ph.D., it does require that

students demonstrate in-depth knowledge of education and selected related fields. For most students, this means studying in a broad area, a specialization within that area, two cognates and a specialization outside of the department.

Degree requirements include a minimum of two years of resident study, a program of specialized study with credits both in education and in other academic units, preparation in research methodology adequate to design and assess research in the field of specialization, sufficient study in cognate fields inside and outside of education to ensure that the candidate can place the specialized research in a broader context, a General Examination, a research dissertation, and a Final Examination.

Accreditation

Within the College of Education, a number of degree programs have formal accreditation. The School Psychology Ph.D. program is accredited by the American Psychological Association (APA) and approved by the National Association of School Psychologists (NASP). The School Psychology M.Ed. program is also accredited by NASP and the Washington State Board of Education for Initial Residency and Continuing/Professional teaching Certificates and Initial/Residency certification. Graduates qualify for certification in all states party to the Interstate Certification Compact.

Financial Aid

The College of Education offers a limited number of awards with varying stipends for graduate students in education. Primary consideration is given to doctoral students with a background of successful teaching or administrative experience. Specific information on the various types of remunerative appointments for graduate students in education, amounts of stipends, and application procedures may be obtained via email at edinfo@u.washington.edu or via the College's Web page at www.educ.washington.edu. The annual application deadline is March 1.

Special Research and Service Facilities

Within the College of Education opportunities exist for students to gain research and service experience.

The Center for Multicultural Education focuses on research projects and activities designed to improve practices related to equity issues, intergroup relations, and the achievement of students of color. Visit the center's Web page at depts.washington.edu/centerme/home.htm.

The Clinical Training Laboratory, operating under the aegis of Educational Psychology, offers observation rooms equipped with video recorders where counseling and psychology trainees and clients can be observed and taped through one-way mirrors.

The world-renowned Experimental Education Unit offers an interdisciplinary approach to research, training, and service, providing integrated classes for 150-200 young children, toddlers, and infants with disabilities and their typically developing peers, and services for their families. Learn more about the EEU by visiting depts.washington.edu/eeuweb/.

The Multidisciplinary Learning Disabilities Center conducts research on preventing and treating reading and writing disabilities and on the biological basis of learning disabilities. The center disseminates its findings to teachers through workshops and presentations at regional, national, and international meetings, and at a unique teacher mentoring program during the summer program for students with dyslexia and dysgraphia.

The Write Stuff investigates interventions for preventing and treating writing disabilities.

The National Center for the Study of Teaching and Policy, a consortium of five universities headed by the University of Washington, conducts a wide range of studies aimed at local, state, and national policy strategies to promote teacher excellence. For more information, visit the center's Web page at www.ctpweb.edu, or email ctpmail@u.washington.edu. For more information, visit the center's Web page at www.ctpweb.edu, or email ctpmail@u.washington.edu.

The Institute for the Study of Educational Policy promotes interdisciplinary studies that bring together research and practice for the benefit of children and youth, educators, policy makers, and the larger community. The institute includes (a) The Center for Educational Renewal, which responds to a growing nationwide interest in the renewal of schools and teacher education by creating partnerships, promoting innovative programs and

policies for the education of educators, and reforming leadership and governance structures; (b) The Center for Effective Schools, which is committed to engaging in research and service activities designed to promote instructionally effective schools through collaboration and self-evaluation; (c) The Center for the Study and Teaching of At-Risk Students, which was established to foster interprofessional projects to encourage students to stay in school; and (d) The School Law Division, which deals with the improvement of professional practices of school administrators, including superintendents, principals, and program directors. Additionally,

the institute conducts policy research pursuant to grants and contracts with school districts, state and federal agencies, and other educational organizations.

Course Descriptions

See page 478.

College of Engineering

Dean

Matthew O'Donnell
371 Loew

Associate Deans

Mary E. Lidstrom, New Initiatives
Chen-Ching Liu, Organizational Infrastructure

Engineering is the science and art of applying scientific and mathematical principles, experience, judgment, and common sense to design devices and systems that benefit society. Engineers are fascinated by questions of how and why things work. They use their training in mathematics, physics, and chemistry to understand the physical world and develop creative solutions to society's complex needs. Engineers may be designers, planners, managers, analysts, researchers, consultants, sales specialists, and more. Engineering graduates have many career possibilities open to them.

The primary goal of the College of Engineering educational programs is to prepare students for a professional career in engineering by providing the technical foundation required for success in industry, government, or academia. Other goals of the College are to instill within its students the highest ethical standards, the capability for lifelong learning, and a curiosity about the world. Excellence in undergraduate and graduate academic programs remains the College's highest priority.

For undergraduates, the College of Engineering offers a flexible curriculum that not only accommodates varied student needs, both in established departmental programs and interdisciplinary studies, but also culminates in a major and meaningful design experience. (See Interdisciplinary Engineering Studies Program for interdisciplinary undergraduate and graduate programs.)

For graduate students, the College of Engineering offers Master's and Doctoral programs in aeronautics and astronautics, bioengineering, chemical, civil and environmental, computer, electrical, industrial, materials science, mechanical, and technical communication.

The College offers active educational and research programs, both departmental and interdisciplinary, at the graduate levels. (See Interdisciplinary Engineering Studies Program for interdisciplinary undergraduate and graduate programs.)

The College of Engineering has been a major unit of the University since 1899. The first engineering degrees were authorized in mining engineering and metallurgical engineering in 1898. Degrees were added for civil engineering (1901), electrical engineering (1902), mechanical engineering (1906), chemical engineering (1907), ceramic engineering (1919), aeronautical engineering (1929), bioengineering (1983), industrial engineering (1986), and computer engineering (1987). A degree program in technical communication was implemented in 1991. In 2003, 1,669 upper-division undergraduate majors and 1,306 graduate students were enrolled in engineering programs taught by a faculty of 191 members.

College Facilities

Teaching and research activities of the College are conducted in thirteen major campus buildings (and portions of others), which contain the College's offices, classrooms, and research and teaching laboratories. The Engineering Library, a branch of the University Libraries, provides outstanding collections of books, periodicals, technical reports, and patents of interest to engineers. Computers and terminals are available in all departments and through the Student Access and Computing Group (SACG).

Student Organizations and Activities

All of the major professional engineering societies have student chapters on campus, and all engineering students are encouraged to join the chapter that represents their field of interest. The College also has student chapters of the Society of Women Engineers, American Indian Science and Engineering Society, National Society of Black Engineers, the Society of Hispanic Professional Engineers, and the Phi Sigma Rho engineering sorority. Students are encouraged to join the university-wide Science and Engineering Business Association (SEBA).

The honor society open to engineering students is Tau Beta Pi.

Students serve with faculty members on engineering policy committees which make recommendations concerning instructor evaluation, curriculum revisions, advising, grading systems, and other matters of interest to students and faculty.

Undergraduate Program

Engineering Adviser
301 Loew, Box 352180
206-543-1770
engradv@engr.washington.edu

The College of Engineering provides curricula that offer a variety of educational experiences to its students. The curricula also facilitate transfer from community colleges and from other four-year colleges and universities.

Engineering Advising and Student Center

301 Loew

Students are encouraged to contact the Engineering Advising and Student Center for program, course, or career information and discussion. The center assists any student interested in planning the initial portion of an engineering degree program, and distributes information about prerequisites for application to all the departments in the College. A student interested in engineering should identify engineering as the intended major while still in the College of Arts and Sciences and seek advice in the center.

For more information, visit the Engineering Advising and Student Center Web site.

Financial Aid

The College offers financial assistance to undergraduates through industrial scholarships and loan funds. Scholarship information is available at the College of Engineering Advising and Student Center (301 Loew), and at the Office of Student Financial Aid, 105 Schmitz. Most scholarships are given after a year or more in residence by the student.

Honors Program

301 Loew

The College of Engineering Honors Program offers students of outstanding performance and achievement a course of study designed to provide intellectual challenge in a stimulating learning atmosphere which draws on the resources of a large, diversified university. Students entering the Honors Program become candidates for the degree "With College Honors" or "With Distinction."

The College Honors Degree

Students who complete this program receive a degree "With College Honors."

The College honors degree requires that students participate in the University Honors Program while taking engineering prerequisites in the College of Arts and Sciences. When these students are admitted to engineering departments, they may be nominated to enroll in the Engineering Honors Program. Completion of the College Honors degree involves both an honors general-education component and advanced honors work completed after students have been admitted to the College of Engineering.

Admission Requirements: Minimum cumulative GPA of 3.30, minimum departmental GPA, and participation in the University Honors Program as a pre-engineer.

Graduation Requirements: The College honors curriculum consists of two parts: a general-education component and a component in the student's major department. The general-education component is completed while the student is in the College of Arts and Sciences prior to application to the College of Engineering. Students select three sequences, each three quarters long, from honors A&S courses, the Natural World, and Mathematics (selecting at least one from each).

The second component begins when a student is admitted to an engineering department. Students then select a total of 9 credits of College honors courses with a minimum of 3 credits of departmental 499H Special Projects (or ENGR 499H). The additional honors credits can be fulfilled with either special projects or ad hoc courses.

The Departmental Honors Degree

Students who complete this program receive a degree "With Distinction."

Admission Requirements: Minimum cumulative GPA of 3.30, minimum departmental GPA (varies from department to department).

Graduation Requirements: Students are nominated for the Departmental Honors Program when they have been in their department for a minimum of one quarter. Students select a total of 9 credits of college honors courses with a minimum of 3 credits of departmental 499H Special Projects (or ENGR 499H). The additional honors credits can be fulfilled with either special projects or ad hoc courses.

Departmental honors degrees are offered in the following degree programs: Aeronautics and Astronautics, Bioengineering, Chemical Engineering, Civil and Environmental Engineering, Computer Engineering, Electrical Engineering, Industrial Engineering, Materials Science and Engineering, Mechanical Engineering, Technical Communication, and Paper Science and Engineering. The paper science and engineering major is offered in the College of Forest Resources and is a joint program with the College of Forest Resources and the College of Engineering.

International Study

Given the increased likelihood that engineering students will have overseas work experiences or will do business with international clients and competitors, the College encourages students to study foreign languages in addition to their engineering course work and to take advantage of opportunities for study at foreign universities either at the undergraduate or graduate level. The College has active exchange agreements with approximately thirty-six universities in eighteen countries. Foreign-language courses at the third-quarter level or above (e.g., GERMAN 103) may be applied toward the VLPAs general education requirement. Students may contact the Engineering Advising and Student Center, 301 Loew, for information about opportunities for international study. Engineering students can also participate in the Global Engineering Education Program (through the Women in Science and Engineering Program) for opportunities to study abroad, located in 101 Wilson Annex.

Recommended High School Preparation

Substantial high school preparation in mathematics, physical science, and communication is essential for entrance to engineering studies. Required and recommended courses may be determined from the Engineering Advising and Student Center (301 Loew).

Admission

Students who indicate an interest in engineering on their University admission application are assigned pre-engineering status. Students without pre-engineering status who wish to pursue an engineering degree may have their coding changed to pre-engineering upon request at the Engineering Advising and Student Center (301 Loew) or the Undergraduate Advising Gateway Center (171 Mary Gates Hall). As a pre-engineering major, a student takes courses in mathematics, chemistry, physics, English composition, engineering fundamentals, and all other prerequisite courses for admission to the desired engineering departmental program. In addition, courses in Visual, Literary, & Performing Arts and Individuals & Societies are taken.

Admission requirements vary for departments or programs within the College of Engineering. Some departments or programs offer early admission, either at the point of freshman admission (Early Decision), or after the freshman year is complete and certain minimum course requirements have been met. Early Admission is for Autumn quarter only. For specific, up-to-date information regarding the admission requirements for a department or program, the applicant should contact the Engineering Advising and Student Center (301 Loew) or the undergraduate adviser for the specific department or program of interest. In addition, all departments and programs within the College provide up-to-date course and admission information on the World Wide Web.

For general upper-division admission, students must apply to the engineering department or program after completion of the prerequisite courses for the program. In general, prerequisite courses include one year of calculus, one or two quarters of general chemistry, two to three quarters of physics, English composition, and several engineering fundamentals. The Engineering Advising and Student Center or the individual department or program has a list of specific entrance requirements.

Types of Programs

The College offers three basic programs leading to Bachelor of Science degrees:

Departmental Major: This program leads to a Bachelor of Science degree in a designated field of engineering (e.g., Bachelor of Science in Civil Engineering). It is designed for students who intend to practice as professional engineers in a standard branch of engineering or who plan to undertake graduate study in that field. The curricula for these degrees are accredited by the Accreditation Board for Engineering and Technology (ABET), the principal engineering accrediting agency in the United States. Accreditation requirements stipulate certain course-distribution requirements for the undergraduate degree. A description of how each of the accredited baccalaureate programs meets the ABET requirements is available from the department office and from the College office. Accredited four-year curricula leading to baccalaureate degrees are offered in aeronautics and astronautics, chemical, civil and environmental, computer, electrical, industrial, mechanical, materials science, and paper science and engineering. (The paper science and engineering major is offered in the College of Forest Resources and is a joint program with the College of Forest Resources and the College of Engineering.)

Curricula leading to baccalaureate degrees are offered in bioengineering and technical communication. The bioengineering program is planning to apply for accreditation in 2007.

Application to a department or program at the upper-division level is made at the time lower-division requirements are satisfied. Currently, enrollment limits imposed by faculty size and available laboratory/classroom space are such that entry into a specific department or program may be competitive. In general, a student applicant must demonstrate scholastic aptitude, as evidenced by the attainment of grades averaging a minimum 2.50 or above (depending upon the program) in mathematics, the Natural World, English composition, and other courses. A 2.50 GPA is a minimum only. In reality, the GPA of those offered admission is higher. The student is urged to plan ahead by learning the intended department or program requirements and particularly noting which requirements must be fulfilled by the time application is made.

Nondepartmental Professional Program: This program leads to a Bachelor of Science in Engineering degree and is designed for students who have well-defined, special educational objectives that departmental programs do not satisfy. Graduates can practice as professional engineers in newly developing fields, or they may embark on graduate study in these or allied fields (see Interdisciplinary Engineering Studies Program).

Nonprofessional Program: Leading to a Bachelor of Science degree, this program is intended for students who wish to have significant exposure to science and engineering courses, but do not plan to engage in professional engineering practice (see Interdisciplinary Engineering Studies Program).

Graduation Requirements

To graduate, students must meet or exceed the requirements of the University, the College, and their particular program or department. College requirements are listed in this section, and program or departmental requirements are given in the specific section that describes that program or department.

All departments of the College have continuation policies that specify a minimum rate of progress as well as minimum academic-performance levels. These policies may be more restrictive than those generally applied by the University and may change with time. Information on current policy is available at the departmental offices.

Selecting courses that fulfill graduation requirements is the responsibility of each student. Students are urged to check carefully the course and credit requirements of the program in which they are enrolled.

Continuation Policy

While the University has general regulations governing scholastic eligibility for continuance, departments and programs in the College of Engineering have adopted additional requirements in order to make the best use of the limited facilities and resources available and to provide reasonable assurance of academic success. The following criteria and procedures are applied to all undergraduate students for determining continuance in the major program.

1. Full-time students are expected to complete 12 or more credit hours per academic quarter applicable toward the degree program. (An average of 15-16 hours per quarter is required to complete the graduation requirements in 12 quarters.)
2. Part-time attendance may be allowed. Refer to written departmental guidelines for criteria. Written permission must be obtained from a departmental undergraduate adviser for a student to attend on a part-time basis. Students who have received permission to attend part time must complete at least one course each quarter applicable toward their degree. Application for part-time students should be made prior to the first day of the quarter in which the student wishes to attend part time.
3. A student who withdraws from the University without prior written approval or is dropped for non-payment of fees must obtain approval of the departmental admissions committee before registering or maintaining pre-registration for the following academic quarter. In such cases the department registration may be disallowed or canceled if the student's academic record is not competitive with the admission requirements prevailing at the time.
4. All undergraduate students who have exceeded the graduation requirements of the degree program for which they have been accepted by more than 10 credits are transferred by their department to the College of Arts and Sciences.
5. Students are required to maintain a grade point average of 2.00 in all departmental and professional program courses. The grade point average is computed by considering all engineering college departmental courses of 300 level or higher, including repeated courses, but excluding Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) distribution requirements. If the grade point average in these courses does fall below 2.00, a student is placed on departmental probation and must achieve a quarterly average grade point higher than 2.00 the following quarter or be dropped from the department and transferred to the College of Arts and Sciences.
6. The minimum acceptable grade for any course required for each major is set by the individual department. If a grade received is less than the minimum, a student may repeat the course without loss of course entry priority. Otherwise, the decision to admit a student to a course depends upon space available.
7. The progress of each student is reviewed each quarter. If a student's performance fails to meet the standards outlined above, the student is placed on probation the following quarter. The student is notified in writing of the reason for probation and is told what must be done for removal from probation. If the student does not show progress toward removing the deficiencies in the following quarter, the student is notified in writing, dropped from the department, and transferred to the College of Arts and Sciences.

The College recognizes that inequities can result from any continuation policy. If students are placed on probation or dismissed and believe that their record has been misunderstood, they may request reconsideration of the probation or dismissal by writing a letter to the department chairman. The letter should include any additional supporting or relevant material. The letter and the supporting material is transmitted to the department faculty committee. The faculty committee reviews carefully all available information and then decides whether or not academic probation shall be continued for another quarter or whether the dismissal was appropriate and valid. The student appeal must be made within 30 days of the notification of placement on probation or dismissal. The committee responds to the student appeal within 30 days.

General Education Requirements: 85 Credits

The College requires a minimum number of credits within certain areas of study and some specific courses within certain areas. All programs require the following:

- * *Areas of Knowledge:* 49 Credits
 - o Visual, Literary, & Performing Arts and Individuals & Societies: 24 credits minimum. Some programs within the College require 30-35 credits. Visual, Literary, & Performing Arts (VLPA) includes courses in literature, art, music, and drama which stress the essential qualities of

individual forms of expression. First- and second-quarter language courses may not be counted toward the VLPA requirement. Individuals & Societies includes courses in history, economics, psychology, and sociology which stress the social nature of mankind, and the development and analysis of societies and social institutions. Courses that count toward these requirements are identified as VLPA or I&S in the Course Descriptions and in the quarterly Time Schedule. A minimum of 10 credits is required in each area.

- o Natural World: 20-25 credits. Most departments within the College require chemistry (10 credits): CHEM 142, CHEM 152 (some departments do not require CHEM 152); and physics (15 credits): PHYS 121, PHYS 122, PHYS 123. Please consult an adviser in the Engineering Advising and Student Center (301 Loew) or the departmental adviser.
- * *Mathematics:* 18 Credits. Specifically required are MATH 124, MATH 125, MATH 126, and MATH 308. Additional credits may be specified or recommended by the department or program.
- * *Written and Oral Communication:* 12 Credits. One 5-credit English composition course from the approved University list. T C 231, Introduction to Technical Writing (3 credits), and T C 333, Advanced Technical Writing and Oral Presentations (4 credits, or department-approved alternative).
- * *Engineering Departmental Course of Study:* 95 Credits. Major departments or specific programs require at least 95 credits in their curricula. These course sequences were developed to culminate in a major, meaningful design experience.

Special Programs

Engineering Co-op Program (three to six month internships)

Program Coordinator, Dawn Wiggin
301 Loew, Box 352180
coop@engr.washington.edu

The Co-op Program provides an opportunity for pre-engineering and engineering students to combine practical, full-time, on-the-job engineering experience with full-time academic study. Students typically take a break from their studies for six months to work full-time and return to full-time academic status upon completion of the co-op assignment. In addition, students receive academic credit for the co-op experience. Advantages to participation include assistance in deciding which field of engineering to follow, additional income to help defray college expenses, relevance and motivation for study based on real engineering work, and work experience and employment contacts that may result in regular employment after graduation.

Information may be obtained from the Co-op Program Office, College of Engineering, Box 352180 (301 Loew), or by visiting the Co-op Program Web site.

Educational Outreach

Fulfilling a commitment to lifelong learning, the College of Engineering offers courses, workshops, and conferences to respond to the professional development needs of practicing engineers and related technical professionals worldwide. Through Engineering Professional Programs (EPP) and Education at a Distance for Growth and Excellence (EDGE) thousands of practicing engineers update their technical knowledge or pursue advanced degrees each year. For more information, contact Engineering Professional Programs at 206-543-5539, or Education at a Distance for Growth and Excellence at 206-685-2242.

For more information, see the Engineering Professional Programs and Education at a Distance for Growth and Excellence Web sites.

Special Facilities

Office of Engineering Research

Coordinator, Mary Heusner
372 Loew, Box 352180

The Office of Engineering Research promotes, stimulates, and coordinates research in all fields of engineering. Its primary role is to coordinate interdisciplinary research programs and national research initiatives. The Office of Research also reviews grant and contract proposals, tracks awards, and provides information on funding opportunities. This office allocates limited matching funds to College units to increase the quality of research in the College of Engineering.

The College currently has the following research programs or centers: NSF ADVANCE, Center for Engineering Learning and Teaching (CELT), Center for the Advancement of Engineering Education (CAEE), UW Engineered Biomaterials Research Center (UWEB), Microscale Life Sciences Center (GenOM Project), Center for Nanotechnology, Washington State Transportation Center (TRAC), and the FAA Center of Excellence for Advanced Composite Materials.

For more information, see the Office of Engineering Research Web page.

Interdisciplinary Engineering Studies Program

301 Loew

The College of Engineering directly administers nondepartmental undergraduate and graduate degree programs. Some engineering fundamentals and writing courses required for admission to the departments are managed by specific engineering departments.

Undergraduate Programs

301 Loew

The Interdisciplinary Engineering Studies (IES) Program is intended for students whose desired course of study does not fall within one of the traditional engineering departments. An interdisciplinary program combines course work from at least one engineering department as well as other department(s) on campus (Engineering or other) to allow students to create a program of study not available through the existing undergraduate degree programs. Although course work may involve departments outside the College of Engineering, the major thrust must be in engineering.

The IES Program offers a nonprofessional degree program leading to the Bachelor of Science (B.S.) and a professional degree program for the Bachelor of Science in Engineering (B.S.E.).

Due to the uniqueness of each interdisciplinary student's program of studies, the B.S. and B.S.E. degrees are not accredited by the Accreditation Board for Engineering and Technology (ABET). The experience requirement to obtain a professional engineering license is two years longer for a B.S.E. graduate, except in surveying, than for a graduate of an accredited program. A B.S. graduate is not eligible for a professional engineering license.

Interdisciplinary students develop personal programs of study approved by a faculty adviser with similar interests. Programs are reviewed and approved by the Interdisciplinary Committee, which oversees all undergraduate interdisciplinary-study programs. Contact the Engineering Advising and Student Center, 206-543-1770, for information on established procedures and applications for entry into the B.S.E. and B.S. programs. Entrance requirements and the continuation policy for participation in these programs are consistent with those of other departments in the College.

Bachelor of Science in Engineering

Admission to this program (usually after completion of 90 credits) is competitive with a minimum GPA of 2.80 in technical courses required for entry. A minimum of 75 credits must be completed after entering the program before a B.S.E. degree is awarded. Detailed information regarding the B.S.E. degree can be obtained from an adviser in the Engineering Advising and Student Center (301 Loew).

Bachelor of Science

The nonprofessional Bachelor of Science degree provides greater flexibility than does the Bachelor of Science in Engineering degree. It can be an excellent base for subsequent professional studies in law, medicine, or business. It may also be the primary educational objective in such fields as technical writing, engineering sales, or environmental studies. Detailed requirements are available from the adviser in the Engineering Advising and Student Center (301 Loew).

Graduate Programs

Master of Science in Engineering/Master of Science

The College also offers graduate programs leading to the Master of Science in Engineering and Master of Science degrees, without designation of a

specific major. For graduate degrees within specific majors, see the individual departmental listings.

Approved programs lead to the M.S.E. degree in civil, mechanical, electrical, chemical, and interengineering, and approved programs lead to the M.S. degree in civil engineering, interengineering, and materials science and engineering.

The Interengineering Master of Science in Engineering (M.S.E.) and Master of Science (M.S.) program is intended for students whose desired course of study includes two or more engineering departments and may also include study in departments outside the College of Engineering. Applications and files of students entering the M.S./M.S.E. option are handled by the designated department. Admission to the interengineering option requires a statement describing the applicant's objectives. This statement should state why the student wants to enter the M.S./M.S.E. program rather than one of the traditional engineering graduate programs. Applicants to the M.S./M.S.E. program must have well-defined educational objectives which cannot be satisfied by established engineering programs.

Admission Requirements

M.S.E./M.S. applicants are required to have a bachelor's degree in engineering, mathematics, or science with a minimum GPA of 3.00 in courses taken in the junior and senior years. Students entering without an accredited engineering undergraduate degree and seeking an MSE degree must satisfy the minimum general requirements of the College of Engineering baccalaureate degree. Students are expected to complete the degree within two years. Situations requiring longer than this must be approved by the student's faculty advisor.

Development of the Plan of Study: When applying to the M.S.E./M.S. program, the applicant must submit a plan of study that sets out the intended 400- and 500-level course work and proposed thesis topic. Before applying to the M.S.E. program, the student must consult with a faculty member from each department in which the student intends to work, and identify at least one to serve as the student's faculty adviser. The other faculty members can serve on the student's supervisory committee if the student is admitted. Working with the faculty adviser(s), each student must develop a plan of study and research that meets the general degree requirements (below) and satisfies the student's own program objectives. The program of studies must include in-depth coursework from two or more departments and be approved by the faculty adviser(s). The proposed program is then set out on the student's Application to the Interengineering M.S.E./M.S. Program.

Development of the Statement of Objectives: Students must submit a one-page statement of study, degree, and career objectives for seeking the Interengineering M.S.E./M.S. degree. This statement should explain why the student wants to enter the M.S.E./M.S. program rather than one of the traditional engineering graduate programs. Also, students should include in this statement any additional information to be considered as part of the application. This information may include work experience, outside interests, and unusual circumstances that may contribute to a better understanding of the student's record. Applicants to the M.S.E./M.S. program must have well-defined educational objectives that cannot be satisfied by established engineering programs.

Degree Requirements

Students develop their own plan of study for the M.S. or M.S.E. degree in consultation with faculty adviser(s) as a requirement for admission to the program. The plan of study must contain at least 39 credits of coursework, with no more than 9 credits of engineering courses at the 400 level and at least 21 credits of engineering courses at the 500 level. The plan of study must also include at least 9 credits of thesis study/preparation.

Aeronautics and Astronautics

310 Condon Hall

Aeronautics and astronautics deals with the design and analysis of air and space vehicles and a broad spectrum of related engineering science, such as aerodynamics, structural mechanics, automatic controls, flight mechanics, space dynamics, propulsion, plasma dynamics, and related topics.

Undergraduate Program

Adviser

328 Condon Hall, Box 352400
206-616-1115
ugadvising@aa.washington.edu

The department offers the following programs of study:

- * The Bachelor of Science in Aeronautical and Astronautical Engineering degree

Bachelor of Science in Aeronautical and Astronautical Engineering

Suggested First- and Second-Year College Courses: During the first-year, students should take the required calculus, chemistry, English composition, and computer programming. If possible, begin taking the physics sequence. It is recommended that some VLPA and I&S courses be taken to balance the course load.

Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper-Division Admission. Admission is competitive. Thus, completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1.

Early Admission (Limited number of students admitted through this process)

1. Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical science courses plus accompanying laboratory at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142 or above; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
2. Applicants must be currently enrolled at the UW and must have a minimum of 15 credits taken in residence at the UW.
3. Early admission students may start the autumn-quarter, junior-year program after meeting the requirements and standards for upper-division admission.

Upper-Division Admission

1. Course requirements: MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, PHYS 121, PHYS 122, PHYS 123, CHEM 142, CSE 142, A A 210, M E 230, CHEM E 260, and 5 credits of English composition. Of the following three courses required for admission, one may be completed the autumn quarter of admission: CEE 220, T C 231, MATH 324.
2. At least 75 credits must be completed, with a minimum overall GPA of 2.50 and a minimum grade of 2.0 in each course required for admission.

Graduation Requirements

180 credits as follows:

1. General Education Requirements (85 credits)
 - a. Areas of Knowledge: 49 credits as follows: Visual, Literary, and Performing Arts (VLPA), and Individuals & Societies (I&S): 24 credits. Natural World: 25 credits, to include CHEM 142 (5) and PHYS 121, PHYS 122, PHYS 123 (15 credits). An additional 5 credits of natural-world courses are required. See department for a list of approved courses.
 - b. Mathematics: 24 credits to include MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 324 (which must be completed no later than autumn quarter of admission to the department).
 - c. Written and Oral Communications: 12 credits, to include one 5-credit English composition course from the University list; T C 231, which

must be completed no later than the autumn quarter of admission to the department; and T C 333 (or department-approved alternative).

2. Major Requirements (95 credits)
 - a. Engineering Fundamentals: 20 credits, to include CSE 142, A A 210, M E 230, and CHEM E 260, all of which must be completed prior to admission; CEE 220, which must be completed no later than the autumn quarter of admission to the department (if MATH 324 has been taken prior to autumn quarter).
 - b. Professional Courses: 74 credits. The department program begins in the autumn quarter of the junior year. Junior-year professional program courses are all required. The senior year consists of A A 409, A A 410-A A 411 or A A 420-A A 421, A A 450, A A 498, and 15 credits of senior technical electives. With approval, 3 credits of the latter may be chosen from another area of engineering.
 - c. Electives: 1 credit of free electives, which may be used to meet the 180 credits required for graduation.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The goals and objectives of the undergraduate program are to provide a challenging and comprehensive education, to develop necessary functional skills and an understanding of the societal context in which engineering is practiced, to provide a solid foundation in the engineering sciences related to aerospace engineering, to provide a strong systems perspective, to develop engineering creativity through design experience, and to prepare graduates to succeed in engineering careers and lifelong learning.

Graduates of aeronautics and astronautics are skilled in engineering fundamentals, engineering design, laboratory skills, synthesis of various engineering disciplines, and working in a team environment. Graduates are highly regarded by employers in aeronautics, astronautics, energy systems, and related fields. They develop interpersonal skills and a desire for life-long learning that helps them succeed in their chosen careers. Graduates have been successful and valued at local, national, and international industries, as well as at government organizations and institutions of higher learning.

- * *Instructional and Research Facilities:* Visit the department Web page to view current research activities. Undergraduates are encouraged to participate in research activities.
- * *Honors Options Available:* With College Honors. With Distinction. See adviser for details.
- * *Research, Internships, and Service Learning:* Internships are arranged individually. See adviser for details.
- * *Department Scholarships:* Scholarships are limited and are usually reserved for students who have junior and senior standing in the department. Deadline for scholarship applications is April 1.
- * *Student Organizations/Associations:* American Institute of Aeronautics and Astronautics (AIAA) student chapter. Sigma Gamma Tau

Graduate Program

Graduate Program Coordinator
328 Condon Hall, Box 352400
206-616-1113
gradadvising@aa.washington.edu

The Department of Aeronautics and Astronautics offers programs that provide a foundation in the aerospace engineering sciences and expertise in various specialized application areas. Three graduate degree options are offered: Master of Science in Aeronautics and Astronautics, Master of Aerospace Engineering, and Doctor of Philosophy.

Master of Science in Aeronautics and Astronautics (M.S.A.A.)

Admission Requirements

- * *Grade Point Average:* The Graduate School requires that applicants hold a GPA of at least 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate course work to be considered for admission. Applicants admitted by the department normally have a minimum GPA of 3.30. Applicants with less than a 3.30 GPA may still be considered for

admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.

- * *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
- * *GRE General Test:* The department requires applicants to take the general portion of the Graduate Record Examination. Although the department does not have minimum GRE scores, the typical successful applicant to the program has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 5.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15th.
- * *Two Letters of Recommendation:* The confidential letters of recommendation should be placed in sealed envelopes and included with the application materials, or sent directly to the department by the recommenders.
- * *Statement of Objectives:* A statement of objectives should be written providing the department with information about the applicant not found in the transcripts and other official documents.
- * *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam are required for foreign students whose native language is not English.
- * *Prior Degrees:* Prospective students should hold an undergraduate degree in aerospace or mechanical engineering. Applicants with strong grades (3.5 and above) in related disciplines (physics, other engineering disciplines) will be considered.

Degree Requirements

39-45 credits, as follows:

- * All M.S.A.A. degree candidates must have a program of study plan approved by the Graduate Committee of the Department of Aeronautics and Astronautics.
- * Before completing 12 credits of graduate course work, file a program of study plan which has been prepared with the assistance of the adviser or with the Graduate Program Adviser. This program will be submitted to the Graduate Committee for approval.
- * The minimum M.S.A.A. program may consist of either ten courses plus 9 thesis credits, or 13 courses. No more than three of the courses may be at the 400 level (though not in a student's depth area). In addition, each student must enroll in the graduate seminar (A A 520) during each quarter of full-time studies, and attend an average of five times per quarter.

The student's program of study is tailored to the needs and interests of the student. However, each program must include depth in a field of specialization, breadth to include at least one course in each of two different subject areas outside the field of specialization, and analytical strength to include three mathematical courses. Senior sequences in engineering, science, or other appropriate professional fields may be used to make up part of the individualized graduate program. However, only three undergraduate courses will be counted toward the minimum requirements (and none in the student's depth area).

- * The thesis, if that degree option is chosen, is approved by the student's adviser and second reviewer and submitted to the Graduate School. After submitting one copy of the thesis to the department, two signed, unbound copies of the thesis and receipt for binding fee must be submitted to the Graduate School by the last day of the quarter.

It usually takes one and a half to two years of full-time study to complete the requirements for an M.S.A.A. degree. The Graduate School imposes a time limit of six years for any master's degree.

Master of Aerospace Engineering (M.A.E.)

The M.A.E. program is intended for recent graduates or engineers who wish to expand their knowledge in multidisciplinary areas while also learning other aspects of aerospace engineering, such as business, management, manufacturing, or technical communication.

Admission Requirements

- * *Grade Point Average:* The Graduate School requires that applicants hold a GPA of at least 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate course work to be considered for admission.

Applicants admitted by the department normally have a minimum GPA of 3.30. Applicants with less than a 3.30 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.

- * *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
- * *GRE General Test:* The department requires applicants to take the general portion of the Graduate Record Examination. Although the department does not have minimum GRE scores, the typical successful applicant to the program has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 5.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15th.
- * *Two Letters of Recommendation:* The confidential letters of recommendation should be placed in sealed envelopes and included with the application materials, or sent directly to the department by the recommenders.
- * *Statement of Objectives:* A statement of objectives should be written providing the department with information about the applicant not found in the transcripts and other official documents.
- * *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam are required for foreign students whose native language is not English.
- * *Prior Degrees:* Prospective students should hold an undergraduate degree in aerospace or mechanical engineering. Applicants with strong grades (3.5 and above) in related disciplines (physics, other engineering disciplines) will be considered.

Degree Requirements

45-54 credits.

Students create their own programs of study based on departmental distribution requirements and subject to departmental approval, to include courses in a specialty area, technical and non-technical electives, analytical courses, and a group or independent project. The M.A.E. program includes twelve courses plus 8 credits for the project, or ten courses and one of three business certificate programs.

Doctor of Philosophy (Ph.D.)

The doctoral program consists of lectures, seminars, discussions, and independent study, enabling the student to master and to make original contributions to a particular field.

Admission Requirements

- * *Grade Point Average:* The Graduate School requires that applicants hold a GPA of at least 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate course work to be considered for admission. Applicants admitted by the department normally have a minimum GPA of 3.30. Applicants with less than a 3.30 GPA may still be considered for admission if they have other strong credentials, such as graduation from an outstanding undergraduate program and excellent GRE scores.
- * *Quality and Difficulty of Courses Taken and Universities and Colleges Attended:* Each transcript is individually reviewed. The department recognizes that some academic institutions are more competitive and high grades are more difficult to obtain.
- * *GRE General Test:* The department requires applicants to take the general portion of the Graduate Record Examination. Although the department does not have minimum GRE scores, the typical successful applicant to the program has scores in excess of 450 Verbal, 700 Quantitative, 650 Analytical, or 5.0 Analytical Writing. If the applicant wishes to be considered for a graduate assistantship or fellowship, the scores should be received before February 15th.
- * *Two Letters of Recommendation:* The confidential letters of recommendation should be placed in sealed envelopes and included with the application materials, or sent directly to the department by the recommenders.
- * *Statement of Objectives:* A statement of objectives should be written providing the department with information about the applicant not found in the transcripts and other official documents.
- * *English Requirements for Foreign Students:* Minimum TOEFL scores of 580 on the paper-based exam or 237 on the computerized exam are required for foreign students whose native language is not English.
- * *Prior Degrees:* Prospective students should hold undergraduate and graduate degrees in aerospace or mechanical engineering with a minimum GPA of 3.40. Applicants with strong grades (3.4 and above) in

related disciplines (physics, other engineering disciplines) will be considered.

Degree Requirements

In addition to the formal steps for obtaining the degree listed below, the student must complete an approved program of study consisting of 30 credits of course work beyond that required for the Master of Science in Aeronautics and Astronautics, for a total of 90 credits for the Ph.D.

- * *The Departmental Qualifying Examination:* To take the department qualifying examination, a student must have a 3.40 GPA in technical course work at the graduate level.

A student judged to have passed the qualifying exam can continue with the Ph.D. program. If a student does not pass, at the discretion of the examining committee, the student may be allowed to retake it a second time. If a student chooses to retake the exam and fails a second time, he or she will be dropped from the Aeronautics and Astronautics degree programs.
- * *The General Examination:* Upon successful completion of the qualifying examination, a Ph.D. supervisory committee chaired by the student's major adviser will be appointed. The general exam is expected to be taken within one year after the qualifying exam, but no sooner than two years after the beginning of graduate study.
- * *The Completion of Course Work:* The department requires at least 30 credits of course work in addition to that for the M.S.A.A. degree. A form listing the courses to be taken must be approved by the student's adviser and placed in the student's file.
- * *The Preparation of the Dissertation:* The dissertation requires a substantial effort, generally equivalent to at least one year of full-time study, and must demonstrate original and independent research and achievement.
- * *The Final Examination:* When the dissertation is completed to the satisfaction of the chair of the Supervisory Committee, a reading committee of three is appointed from the student's committee. If the reading committee agrees that the dissertation is satisfactory, then the final examination is scheduled. That examination is generally devoted to a presentation and defense of the dissertation.

Research Activities

Research facilities include the Kirsten 8 x 12-foot low-speed wind tunnel, a 3 x 3-foot low speed wind tunnel, two water tunnels, a small supersonic draw-down tunnel, a hypervelocity projectile accelerator (ram accelerator), material and structural test machines, a composite-material laboratory, an unmanned aerial vehicle (UAV) laboratory, an underwater vehicle laboratory, a guidance and controls laboratory, a distributed space systems laboratory, various plasma and fusion-research and engineering physics laboratories, a combustion laboratory and a Mars environmental simulation facility. A variety of computer facilities is available, including a 17-computer parallel cluster for computational fluid dynamics research. The Aerospace and Energetics Research Program, which conducts interdisciplinary research in the Aerospace and Engineering Research Building, is also part of the Department of Aeronautics and Astronautics.

Externally funded research is carried out by faculty members and students on such topics as buoyant flows, flow separation control, combustor mixing, shear layers, computational fluid dynamics, internal flows, reacting flows, ram accelerators, space energy systems, space system design, control system design and engineering, robust and optimal control, wing optimization, impact mechanics, composite material structure and fracture, plasma dynamics, space propulsion, and fusion research.

Special Facilities/Programs

Aerospace and Energetics Research Program (AERP)

120 Aerospace and Engineering Research Building

The Aerospace and Energetics Research Program is directed toward high-technology engineering research and teaching through research. The program anticipates and tries to outpace the nation's critical technology needs. It therefore emphasizes those engineering skills that both match the requirements of the present and future, and develop in students a broad understanding of the impact of technology on society. Suitable programs are

designed to develop the student's imagination and a willingness to respond to the complex and rapidly changing future of engineering. This directs the faculty's efforts and creates within the principal investigators, research faculty, and students the concept of engineering as an adventure.

The program covers many fields, usually centered on energy or aerospace systems. Currently the program is active in plasma engineering related to fusion power and space propulsion, ram accelerators for direct space launch, and research on new terrestrial energy conversion and vehicle propulsion technologies.

University of Washington Aeronautical Laboratory (UWAL)

Kirsten Aeronautical Laboratory

The primary facility that UWAL operates is the Kirsten Wind Tunnel, a subsonic, closed-circuit, double-return tunnel with an 8x12-foot test section. Undergraduate students, usually from the Department of Aeronautics and Astronautics, are employed at UWAL to run tests for University research, commercial customers, and for instructional uses, such as student projects. UWAL provides departmental support for research projects such as the unmanned aerial vehicle (UAV) project.

Additional Information

Most students are financially supported by the department as teaching or research assistants, or by their employers. For further information on this or other aspects of department programs, contact the Graduate Program Coordinator, 328 Condon Hall, Box 352400, or visit the department's Web site.

Course Descriptions

See page 491.

Bioengineering

309 Harris Hydraulics Laboratory

Bioengineering encompasses a wide range of activities in which the disciplines of engineering and biological or medical science intersect. Such multidisciplinary endeavors are yielding new discoveries and major advances that are revolutionizing the health care system. The Department of Bioengineering, housed jointly in the School of Medicine and the College of Engineering, provides a comprehensive, multidisciplinary program of education and research and is recognized as one of the finest bioengineering programs in the world. Major areas of research and education include distributed diagnosis and home healthcare (d2h2), molecular bioengineering and nanotechnology, engineered biomaterials and tissue engineering, medical imaging and image-guided therapy, and computational bioengineering.

Undergraduate Program

Adviser
309B Harris Hydraulics Lab, Box 357962
206-685-2000
bioeng@u.washington.edu

The Bioengineering Program offers the following programs of study:

- * The Bachelor of Science in Bioengineering degree

The Bachelor of Science in Bioengineering bridges the gap between the engineering and biological sciences. Advanced interdisciplinary coursework builds upon a solid foundation of mathematics, computing, engineering, and physical and biological sciences. Students learn to apply engineering synthesis and analysis to biological problems and to glean design principles from nature to solve medical problems and create biomedical devices and materials. A key piece of the degree program is the senior capstone research and design project, through which students develop their knowledge and skills by joining in the department's cutting-edge research. Bioengineering graduates are prepared to enter graduate school, medical school, or the growing biomedical industry. The department's goal is to prepare students to be leaders and innovators in improving human health and health care.

Bachelor of Science in Bioengineering

Suggested First- and Second-Year College Courses: CHEM 142, CHEM 152, CHEM 162, CSE 142, English Composition, MATH 124, MATH 125, MATH 126, PHYS 121.

Department Admission Requirements

Because resources are limited, students must apply for admission to the Bioengineering program. Students may be admitted at three different points. Please consult the department's Web page for more information.

1. *Direct Admission.* The department enrolls up to 25 percent of its incoming class directly from high school. Students who are accepted to the University and who indicate Bioengineering as their preferred major on their freshman application are considered for admission. Strong applicants will have completed chemistry, biology, and calculus in high school. Admission is for Autumn quarter only.
2. *Early Admission.* Students who are enrolled at the University are eligible to apply at the end of the freshman year if they have completed and earned at least a 2.50 GPA in the following courses: MATH 124, MATH 125, MATH 126, CHEM 142, CHEM 152, CHEM 162, and 5 credits of English composition. A 2.50 GPA guarantees consideration but does not guarantee admission. The application deadline is July 1 for autumn quarter admission.
3. *Upper Admission.* Upper admission requires 60 credits of coursework with at least a 2.50 GPA: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; PHYS 121, PHYS 122; BIOL 180, BIOL 200; CSE 142; and 5 credits of English composition. A 2.50 GPA guarantees consideration but does not guarantee admission. Application deadlines for upper admission are February 1 for spring quarter and July 1 for autumn quarter. Consult the department's Web page or academic counselor for more details.

Graduation Requirements

Graduation requirements are subject to change. Current requirements are found on the departmental Web page. Students follow the requirements that are in effect at time of entry into the department. 180 credits as follows:

General Education Requirements (105 credits):

1. Areas of Knowledge: 24 total credits in Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S), with at least 10 credits in each area.
2. Written and Oral Communication (8 credits): 5 credits of English composition, from the approved University list; T C 231. Additional writing credits are built into the major core courses.
3. Mathematics (25 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; STAT 390.
4. Natural Science (48 credits): CHEM 142, CHEM 152, CHEM 162, and CHEM 223 or CHEM 237; PHYS 121, PHYS 122, PHYS 123; BIOL 180, BIOL 200; BIOC 405.

Major Requirements (75 credits):

1. Engineering Fundamentals (17 credits): CHEM E 260; CSE 142, CSE 143; E E 215.
2. Bioengineering Core (38 credits): BIOEN 201, BIOEN 301, BIOEN 302, BIOEN 303, BIOEN 304, BIOEN 305, BIOEN 357; 12 credits of BIOEN 480.
3. Bioengineering Senior Electives (15 credits): Fifteen credits chosen from BIOEN 420, BIOEN 436, BIOEN 440, BIOEN 455, BIOEN 457, BIOEN 467, BIOEN 470, BIOEN 485, BIOEN 490, BIOEN 491, BIOEN 492.
4. Approved Electives (5 credits): Five additional credits chosen from an approved list of math, science, and engineering courses (see the department's Web page for further information), or from the Bioengineering senior elective list.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Bioengineering graduates have the ability to apply knowledge of mathematics, science, and engineering; the ability to design and conduct experiments, as well as to analyze and interpret data; the ability to design a system, component, or process to meet desired needs; the ability to function on multi-disciplinary teams; the ability to identify, formulate, and solve engineering problems; an understanding of professional and ethical responsibility; the ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal

context; a recognition of the need for, and an ability to engage in, life-long learning; knowledge of contemporary issues; the ability to use the techniques, skills, and modern engineering tools necessary for engineering practice; an understanding of biology and physiology; the capability to apply advanced mathematics (including differential equations and statistics), science, and engineering to solve the problems at the interface of engineering and biology; the ability to make measurements on and interpret data from living systems, addressing the problems associated with the interactions between living and non-living materials and systems.

- * *Instructional and Research Facilities:* The department maintains a general computing lab for bioengineering student use as well as an advanced computing lab for class instruction and student use. Offices and laboratories are located in the College of Engineering and the School of Medicine. Construction is underway on a new bioengineering building, which will offer expanded instructional laboratories, a student workroom, a seminar room, and other amenities. The Department of Bioengineering houses UWEB (University of Washington Engineered Biomaterials), participates in the Center for Nanotechnology, and sponsors many other research centers relating to our five thrust areas in Computational Bioengineering, Distributed Diagnosis and Home Healthcare, Engineered Biomaterials, Medical Imaging and Image-guided Therapy, and Molecular Bioengineering and Nanotechnology.
- * *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* Many undergraduate bioengineers are involved in internships. The department participates in the College of Engineering Co-op Program and maintains an internship website for majors. Most summers the department sponsors one or more internships available to the general campus community.
- * *Department Scholarships:* Several scholarships are available for majors.
- * *Student Organizations/Associations:* The Undergraduate BioEngineering Society (UBES) organizes social events as well as events that support student interest in medical school, graduate school, and industry.

Of Special Note: Courses on technology commercialization are available to seniors.

Graduate Program

Graduate Program Coordinator
Box 357962
206-685-2000
bioeng@u.washington.edu

The Department of Bioengineering offers programs of study which lead to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees.

Master of Science

The Master of Science degree program provides breadth of knowledge of engineering, biology, and medicine, and depth of knowledge in a particular research area. The degree prepares students for careers in academic, industrial, or hospital environments.

Admission Requirements

All application materials must be received in the appropriate office by the deadline. International applications are due by December 1; domestic applications are due by January 15. No exceptions. Late and/or incomplete applications will not be reviewed.

- * Signed copy of the Graduate School Application
- * Department of Bioengineering Admissions Form
- * Potential Areas of Specialization form
- * Three letters of recommendation
- * One set of official transcripts

The departmental forms are all online. Please note that any materials sent in addition to those listed above are considered non-essential and do not enhance the application.

Applicants are expected to have the following courses as part of their undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical

engineering and physics, chemistry, materials science, rate processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the M.S. program.

Degree Requirements

Course Requirements for the M.S. in Bioengineering are detailed below. All core and elective courses must be taken for a numerical grade. Students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty adviser.

Note: A single course may not count for two separate requirements.

36 credits as follows:

- * Molecular Bioengineering: BIOEN 501 (4)
- * Cellular Bioengineering: BIOEN 502 (4)
- * Systems Bioengineering: BIOEN 503 (4)
- * Biostatistics (4 credits)
- * Bioengineering seminar: BIOEN 510 (1)
- * Bioengineering elective courses, chosen in consultation with faculty advisor: 10 credits
- * Master's thesis: BIOEN 700 (9 credits)

Doctor of Philosophy

The objective of the Ph.D. program is to train individuals for careers in bioengineering research and teaching. The program has three major objectives: (1) breadth of knowledge about engineering, biology, medicine, and the interdisciplinary interface between these different fields; (2) depth of knowledge and expertise in a particular scientific specialty; (3) demonstrated independence as a bioengineering researcher. These objectives are fulfilled through a combination of educational and research experiences. The program is rigorous but maintains flexibility to accommodate qualified students from diverse academic backgrounds. Entrance to the Ph.D. program does not require prior completion of the M.S. degree and may be made directly after the B.S. An optional dual Ph.D. degree in bioengineering and nanotechnology is available. See www.nano.washington.edu for more information.

Admission Requirements

See the application process detailed in the M.S. section.

While it is not required to complete an MS degree before beginning the Ph.D., every graduate student is expected to have the following courses as part of their undergraduate education: ordinary differential equations, linear algebra, signal analysis, probability theory and statistics, programming, electrical engineering and physics, chemistry, materials science, processes and mathematics, and cell and molecular biology. Admitted students must be knowledgeable of these topics prior to entrance to the Ph.D. program.

Degree Requirements

The Ph.D. program consists of a rigorous set of core courses, elective courses, and a focused research project. Three major milestones punctuate that work: the Qualifying Examination, the General Examination, and the Final Examination (dissertation defense). Additionally, students must complete a one-quarter teaching assistantship. The timing of the teaching assistantship is decided in consultation with the department and the faculty advisor.

All core and thrust courses must be taken for a numerical grade. A single course may not count for two separate requirements. 60 credits beyond the M.S., as follows:

- * Molecular Bioengineering: BIOEN 501 (4)
- * Cellular Bioengineering: BIOEN 502 (4)
- * Systems Bioengineering: BIOEN 503 (4)
- * Biostatistics (4)
- * Bioengineering seminar: BIOEN 510 (1)
- * 16 credits of bioengineering elective courses, chosen in consultation with faculty advisor
- * 27 credits of dissertation writing (BIOEN 800)

Ordinarily, a student progressing well and on schedule will achieve the following:

- * *First Year:* complete several lab rotations and select a thesis advisor no later than the end of spring quarter.
- * *Second Year:* pass the Qualifying Exam and form a Supervisory Committee by the end of the second year.
- * *Third Year:* pass the General Exam.
- * *Fourth Year (and subsequent years):* make an annual progress report to and receive feedback from the Supervisory Committee.
- * *Fifth Year:* defend the dissertation.

Medical Scientist Program

A Medical Scientist Training Program exists for the support of individuals interested in coordinated graduate school/medical school study leading to both the M.D. and Ph.D. degrees. Students entering this highly competitive program are given an opportunity to pursue a flexible, combined course of study and research. Early inquiry is essential for this option. Contact the MSTP office at 206-685-0762.

Research Facilities

Offices and laboratories are located in the College of Engineering and the School of Medicine. Students have access to the University of Washington Medical Center, Vivarium, Primate Center, Computer Center, and libraries, as well as to all engineering and health-sciences departments and facilities. A wide range of technologies and virtually all aspects of biomedical science are available.

Financial Aid

Financial aid is available to qualified graduate students in the form of traineeships, fellowships, and teaching and research assistantships. Funding is derived from federal research and training programs, the Graduate School Fund for Excellence and Innovation, and programs sponsored by private agencies. Questions regarding financial support may be directed to the Academic Counselor.

Course Descriptions

See page 538.

Chemical Engineering

105 Benson

Chemical engineering is concerned with processes for transforming raw materials into energy and into a great variety of consumer products, such as gasoline, electronic materials, pulp and paper, fertilizers, rubber, polymers and composites, and pharmaceuticals. Chemical engineers work on research and development of these materials and on the processes for making them, as well as on the design and operation of chemical plants and equipment by which production is achieved. This must be done with efficiency, economy, and concern for society and the environment.

Undergraduate Program

Adviser
105 Benson, Box 351750
206-543-2252
advising@cheme.washington.edu

The Department of Chemical Engineering offers the following program of study:

- * The Bachelor of Science in Chemical Engineering degree. This degree program is accredited by the Accreditation Board for Engineering and Technology (ABET).

Bachelor of Science in Chemical Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126, MATH 307, CHEM 142, CHEM 152, CHEM 162, CHEM 237, PHYS 121, PHYS 122, PHYS 123, ENGL 131 (or equivalent), CSE 142, CHEM E 260.

Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper-Division Admission. Admission is competitive. Thus, completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1. The application is available at www.engr.washington.edu/uappl.

1. Early Admission
 - a. Course requirements: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152, CHEM 162; PHYS 121; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.
 - b. Applicants must be completing their freshman year at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
 - c. Grade requirements: A minimum grade of 2.0 in each prerequisite course and a minimum GPA of 2.50.
2. Upper-Division Admission
 - a. Course requirements: MATH 124, MATH 125, MATH 126, MATH 307 (18 credits); CHEM 142, CHEM 152, CHEM 162, CHEM 223 or CHEM 237 (20); PHYS 121, PHYS 122, PHYS 123 (15), CSE 142, CHEM E 260 (8); and one 5-credit English composition course. In addition, it is strongly recommended that students complete CHEM 224 or CHEM 238.
 - b. 75 credits completed by July 1 application deadline, with a minimum overall 2.50 GPA and minimum 2.0 in all courses required for admission.
 - c. Students with a GPA lower than 2.50 for these specified courses or an overall GPA lower than 2.50 for all courses applicable to the B.S.Ch.E. degree seldom succeed in the department. Historically, a GPA of 2.80 or higher in these categories is required for admission to and success in the department.
 - d. Factors included in the admissions decision include the course record as indicated above and qualitative considerations such as difficulty of completed courses, frequency of incomplete or withdrawal grades, number of repeated courses, applicable work experience and maturity of attitude, record of honors, a demonstrated ability to take at least 12 credits per quarter, and special circumstances disclosed by the applicant.

Graduation Requirements

180 credits, as follows:

General Education Requirements (114 credits)

1. Written and Oral Communications (12 credits): one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
2. Visual, Literary, & Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits): A minimum of 10 credits required in each area.
3. Natural World (78 credits)
 - a. Physics (15 credits): PHYS 121, PHYS 122, PHYS 123Ph
 - b. Mathematics (24 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308, and MATH 309 (or MATH 390 or IND E 315)
 - c. Chemistry (39 credits): CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238, CHEM 455, CHEM 457, CHEM 461, and 6 credits of chemistry electives

Major Requirements (61 credits)

1. Engineering Fundamentals (8 credits): CHEM E 260; CSE 142
2. Chemical Engineering Core Courses (43 credits): CHEM E 310, CHEM E 326, CHEM E 330, CHEM E 340, CHEM E 435, CHEM E 436, CHEM E 437, CHEM E 465, CHEM E 480, CHEM E 485, CHEM E 486
3. Engineering Elective Courses (10 credits)

Unspecified Electives (5 credits)

A minimum GPA of 2.00 in chemical engineering courses, based on the first time each course is taken, is required for graduation.

Many engineers design new equipment and processes or design modifications to them. The design experience is integrated throughout the curriculum, with open-ended problems (sometimes involving economic constraints) in several courses: design of heat exchangers (CHEM E 340) and distillation towers (CHEM E 435), design of piping and pumping systems (CHEM E 330), design of chemical reactors (CHEM E 465). The design experience culminates in two capstone design courses (CHEM E

485 and 486 or 497) which involve the design of an integrated chemical system. An optional 9-credit specialty area allows each student to develop special competence in a selected subject by taking a minimum of three courses in that area. Engineering and free electives may be used for this purpose. The areas are biotechnology; fuel cells and energy; polymers, composites, colloids, and interfaces; computers applied to chemical engineering; electronic materials; environmental engineering; and nuclear engineering.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Chemical engineering graduates possess knowledge (including safety and environmental aspects) of material and energy balances applied to chemical processes; thermodynamics of physical and chemical equilibria; heat, mass, and momentum transfer; chemical reaction engineering; continuous and stage-wise separation operations; process dynamics and control; and process design. They also gain ability to apply knowledge of mathematics, science, and engineering; ability to design and conduct experiments, as well as to analyze and interpret data; ability to design a system, component, or process to meet desired needs; ability to function on multidisciplinary teams; and ability to identify, formulate, and solve engineering problems. They also possess an understanding of professional and ethical responsibility; an ability to communicate effectively; the broad education necessary to understand the impact of engineering solutions in a global and societal context; a recognition of the need for, and an ability to engage in, life-long learning; a knowledge of contemporary issues; and an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.
- * *Instructional and Research Facilities:* The chemical engineering building, Benson Hall, contains classrooms, offices, stockrooms, computer rooms, machine and electronics shops, and laboratories. The Unit Operations Lab holds a variety of experiments designed to give undergraduate students the experience of using real chemical process equipment and to deepen their understanding of chemical engineering fundamentals of fluid flow, heat transfer, separation processes, and reactor behavior. Departmental computer facilities include a network of PCs located in a keyed room for the exclusive use of chemical engineering students. Ten of these machines have hardware for computer data acquisition (to collect experimental data and support experiments on process automation). All have fast connections to the Internet and to larger UW computers.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* Students are encouraged to participate in internships, which are generally facilitated through the Engineering Co-op Office.
- * *Department Scholarships:* The department awards 25-30 full-tuition scholarships per year. Application deadline is April 1.
- * *Student Organizations/Associations:* The undergraduates in the department run a dynamic chapter of the American Institute of Chemical Engineers.

Of Special Note: Entrance into most chemical engineering courses is ordinarily limited to majors in chemical engineering, paper science, and the B.S.E. program. Other students who wish to take departmental courses must meet the prerequisites and obtain instructor approval (except for CHEM E 485 and CHEM E 486, which are open to majors only).

Graduate Program

Graduate Program Coordinator
105 Benson, Box 351750
206-543-2250
grad.admissions@cheme.washington.edu

The department offers studies leading to the degrees of Doctor of Philosophy, Master of Science in Chemical Engineering, and Master of Science in Engineering. The doctoral degree is centered on the dissertation with a foundation in course work; it is generally completed in four to five years beyond the baccalaureate degree. In the master's program primary emphasis is placed on course work, and the degree generally requires 21 months of study. Thesis and non-thesis options are available.

The program of study includes basic subjects of importance to all chemical engineers, such as thermodynamics, transport phenomena, kinetics, and applied mathematics. In addition, students are invited to take more-specialized courses in chemical engineering or in other departments. Students usually take three courses during their first quarter. In subsequent quarters, less time is spent on course work, and more on research and independent study.

The department has about seventy full-time graduate students, most of whom are working toward a doctorate. They study and collaborate with faculty members in an atmosphere that is informal, friendly, and intellectually vigorous. Faculty interests are broad, so students become familiar with a variety of areas while receiving individual guidance in a specialty.

Master of Science in Chemical Engineering

Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements. To be competitive, applicants must be:

- * Highly ranked (top 5%) in a respected chemical engineering program.
- * Score at least 750 on the quantitative portion of the GRE.
- * Score at least 600 (paper-based) or 250 (computer-based) on the TOEFL, if an International applicant.

Degree Requirements

Thesis Option

39 credits as follows:

- * 30 credits of course work. Of these, 18 credits must be in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Numerical grades must be received for at least 18 credits of course work. These must be 500-599 or approved 400-level courses. They must include five courses from at least four of the following five categories:
 - o Math/Computer/Statistics: CHEM E 475 (3), CHEM E 481 (3), CHEM E 482 (3), CHEM E 510 (4), CHEM E 512 (3), CHEM E 575 (3), CHEM E 582 (3), CHEM 526 (3, max. 9), STAT 421 (4)
 - o Thermodynamics: CHEM E 455 (1/3, max. 3), CHEM E 525 (4), CHEM E 526 (3), CHEM 552 (3)
 - o Transport Phenomena: CHEM E 530 (4), CHEM E 531 (3), CHEM E 532 (3), CHEM E 533 (3), M E 533 (3), M E 534 (3)
 - o Reaction Phenomena: CHEM E 461 (3), CHEM E 560 (3), CHEM E 564 (3), CHEM E 565 (3)
 - o Materials and Biotech: CHEM E 450 (3), CHEM E 467 (3), CHEM E 477, CHEM E 554 (3), CHEM E 555 (4), CHEM E 556 (3/4), CHEM E 558 (3), CHEM E 559 (3), CHEM E 570 (3, max. 6), CHEM E 571 (3), CHEM E 572 (3), CHEM E 590 (3)
- * Approved 400-level courses presented for the 18-graded credits include 400-level CHEM E courses not required for the B.S. degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.
- * 12 credits of electives (at least 3 credits must be graded).
- * A minimum cumulative GPA of 3.00 in the graduate program.
- * At least 30 credits must be taken at the UW.
- * Submit a thesis describing original research. At least 9 credits of thesis credits are required (CHEM E 700).
- * Pass a Final Exam consisting of an oral presentation of the thesis.
- * Serve as TA for at least one quarter.

Non-Thesis Option

The non-thesis allows a student to receive graduate-level training with the primary focus on course work. The degree requirements can be completed in four quarters (completion in three is possible).

39 credits, as follows:

- * 18 credits must be in courses numbered 500-599, of which at most 3 may be seminar credits, such as CHEM E 523. Numerical grades must be received for at least 18 credits of course work. These must be 500-

599 or approved 400-level courses. They must include five courses from at least four of the following five categories:

- o Math/Computer/Statistics: CHEM E 475 (3), CHEM E 481 (3), CHEM E 482 (3), CHEM E 510 (4), CHEM E 512 (3), CHEM E 575 (3), CHEM E 582 (3), CHEM 526 (3, max. 9), STAT 421 (4)
- o Thermodynamics: CHEM E 455 (1/3, max. 3), CHEM E 525 (4), CHEM E 526 (3), CHEM 552 (3)
- o Transport Phenomena: CHEM E 530 (4), CHEM E 531 (3), CHEM E 532 (3), CHEM E 533 (3), M E 533 (3), M E 534 (3)
- o Reaction Phenomena: CHEM E 461 (3), CHEM E 560 (3), CHEM E 564 (3), CHEM E 565 (3)
- o Materials and Biotech: CHEM E 450 (3), CHEM E 467 (3), CHEM E 477, CHEM E 554 (3), CHEM E 555 (4), CHEM E 556 (3/4), CHEM E 558 (3), CHEM E 559 (3), CHEM E 570 (3, max. 6), CHEM E 571 (3), CHEM E 572 (3), CHEM E 590 (3)
- * Approved 400-level courses presented for the 18-graded credits include 400-level CHEM E courses not required for the B.S. degree and 400-level non-CHEM E courses approved by the Graduate Program Coordinator.
- * 12 credits of electives (at least 3 credits must be graded).
- * Satisfactory completion of 6-9 CHEM E 600 credits (i.e., with a numerical grade of 2.7 or above, or an S grade). A member of the Chem E graduate faculty must supervise and grade the work. A written report is required. Thesis research (i.e., CHEM E 700 or 800) cannot count toward the 39 credits.
- * A minimum cumulative GPA of 3.00 in the graduate program.
- * At least 30 credits must be taken at the UW.
- * Pass a Final Exam consisting of an oral presentation of the CHEM E 600 project

Master of Science in Engineering

Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

To be competitive, applicants must be:

- * Highly ranked (top 5%) in a respected chemical engineering program.
- * Score at least 750 on the quantitative portion of the GRE.
- * Score at least 600 (paper-based) or 250 (computer-based) on the TOEFL, if an International applicant.

Degree Requirements

Minimum 72 credits of coursework. The minimum requirements are the same as for the MS Ch E thesis option, except that the research advisor considers the student's background and research objectives and tailors the course requirements accordingly (subject to GPC approval). As the degree title would suggest, there is usually less emphasis on traditional chemical engineering, more on engineering science and related subjects.

Doctor of Philosophy

Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

To be competitive, applicants must be:

- * Highly ranked (top 5%) in a respected chemical engineering program.
- * Score at least 750 on the quantitative portion of the GRE.
- * Score at least 600 (paper-based) or 250 (computer-based) on the TOEFL, if an International applicant.

Degree Requirements

90-108 credits, as follows:

- * Minimum Graduate School Requirements: You must satisfy the Graduate School minimum requirements, summarized below. NOTE: Graduate School policy requires you to satisfy the requirements in force at the time of graduation (not when you entered the degree program). Check their web site periodically to make sure you're current on the requirements.
 - o Complete at least 18 credits of courses numbered 500-600 at the University of Washington.
 - o Complete at least 18 numerically graded credits of 400- and 500-level UW courses prior to the General Examination. These 400-level courses must have departmental approval.
 - o Complete a minimum of 90 credits, at least 60 of which are UW credits.
 - o Compile a minimum of 27 dissertation credits (CHEM E 800) over a period of at least three quarters. With the exception of summer, students may take a maximum of 10 dissertation credits per quarter.
 - o Maintain a minimum cumulative GPA of 3.00.
 - o Pass the General Examination.
 - o Pass the Final Examination (includes approval of the dissertation by your supervisory committee).
 - o Maintain full- or part-time graduate student registration at the UW for the quarter in which the above examinations are completed and the degree is conferred.
 - o Complete all work for the doctoral degree within ten years.
- * Students having a chemical engineering undergraduate degree: In addition to the minimum Graduate School requirements listed above, doctoral students must:
 - o Serve as a TA for at least three quarters. Students should plan on one quarter per year in years 2-4.
 - o Complete at least six graded courses numbered 500-599 or approved 400-level courses to satisfy the following:
 - + Five courses from at least four of the following five categories:
 - # Math/Computer/Statistics: CHEM E 475 (3), CHEM E 481 (3), CHEM E 482 (3), CHEM E 510 (4), CHEM E 512 (3), CHEM E 575 (3), CHEM E 582 (3), CHEM 526 (3, max. 9), STAT 421 (4)
 - # Thermodynamics: CHEM E 455 (1/3, max. 3), CHEM E 525 (4), CHEM E 526 (3), CHEM 552 (3)
 - # Transport Phenomena: CHEM E 530 (4), CHEM E 531 (3), CHEM E 532 (3), CHEM E 533 (3), M E 533 (3), M E 534 (3)
 - # Reaction Phenomena: CHEM E 461 (3), CHEM E 560 (3), CHEM E 564 (3), CHEM E 565 (3)
 - # Materials and Biotech: CHEM E 450 (3), CHEM E 467 (3), CHEM E 477, CHEM E 554 (3), CHEM E 555 (4), CHEM E 556 (3/4), CHEM E 558 (3), CHEM E 559 (3), CHEM E 570 (3, max. 6), CHEM E 571 (3), CHEM E 572 (3), CHEM E 590 (3)
 - + One CHEM E course in a topic outside the student's main research area.
- * Non-Chemical Engineering undergraduates: Students whose undergraduate degree is in engineering or science (e.g., B.S. in Chemistry or Materials Science) but not Chemical Engineering must pass the following courses in addition to the requirements listed in the previous section: CHEM E 330 (4), CHEM E 340 (4), CHEM E 435 (4), CHEM E 465 (4), CHEM E 485 (4). Students lacking a strong background in thermodynamics are advised (but not required) to take CHEM E 326 (4) prior to attempting CHEM E 525 (4). It is possible to take some graduate courses while completing the required undergraduate courses.

Research Facilities

The department is fortunate to have outstanding facilities. Benson Hall contains classrooms, offices, stockrooms, a machine shop, laboratories, and a variety of specialized research equipment. Each graduate student is provided desk space in a small laboratory or office as well as access to larger laboratories in the building. Students also may use the services of the Academic Computer Center, instrument-making shops, research centers (e.g., biomaterials, nanotechnology, chemical analysis), and the Chemistry and Engineering Libraries.

Admission Requirements

A student is accepted for admission to the Graduate School as a chemical engineering major by joint action of the Graduate School and the department after consideration of a formal application. Most students applying for graduate admission have a Bachelor of Science degree in chemical engineering. If a student has an undergraduate degree in chemistry, physics, mathematics, or another branch of engineering, he or she may obtain a graduate degree in chemical engineering by meeting certain additional requirements.

Financial Aid

The department has various sources of support for qualified graduate students. Those interested in applying for admission and support should visit the department's Web site at depts.washington.edu/chemeng/. The completed forms and reference letters should be received in the department office by January 15. Offers of admission with financial support are usually made in January through March.

Course Descriptions

See page 494.

Civil and Environmental Engineering

201 More

Civil and environmental engineering is a profession which interfaces closely with society in the planning, design, construction, and management of facilities serving the needs of people. These activities include all transportation modes: highways, aerospace, rivers, and harbors; water resources, hydraulics, and coastal engineering; structures, mechanics, and geotechnical engineering; surveying, mapping, and photogrammetry; urban planning and development; water supply, wastewater treatment, and water-quality management; solid- and hazardous-waste disposal; and quality control and management of the air resources.

A civil engineer may specialize in one or several of these activities and may further specialize in a particular function, such as design or management. The work frequently provides close associations with the legal profession, urban and regional planners, economists, public officials, biologists, chemists, financial consultants, architects, and system analysts. Education and practice require a consideration not only of the technological-science aspects of a particular problem but also of its relationship to social, economic, political, and environmental constraints.

To accommodate these wide interests, the department is organized into six academic areas: construction management; transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and water resources, hydrology, and hydraulic systems.

Undergraduate Program

Adviser
201 More, Box 352700
206-543-5092
ceadvice@u.washington.edu

The Department of Civil and Environmental Engineering offers the following program of study:

* The Bachelor of Science in Civil Engineering degree

Bachelor of Science in Civil Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121; CSE 142; English composition.

Department Admission Requirements

1. Admission to the department is usually at the junior level. Admission is competitive. Thus, completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1. See department office for admission application.
2. The primary admission criterion is probable success in the engineering degree program as evidenced by academic performance, work experience, and other factors.
3. Completion of the following courses with a minimum grade of 2.0 in each course and a minimum cumulative GPA of 2.50: MATH 124, MATH 125, MATH 126, MATH 308; CHEM 142; PHYS 121, PHYS 122; CSE/ENGR 142; A A 210; CEE 220; M E 230; and 5 credits of English composition.

4. Prospective students should read the information on prerequisite courses and application procedures on the department Web site. Applications are accepted through the College of Engineering online application form.

Graduation Requirements

180 credits as follows:

1. General Education Requirements (85-87 credits)
 - a. Written and Oral Communications (8 credits): English composition (5); TC 231 (3)
 - b. Visual, Literary, and Performing Arts (VLPA) and Individuals & Societies (I&S) (24 credits): A minimum of 10 credits in VLPA and a minimum of 10 credits of I&S plus 4 additional credits in either area.
 - c. Economics (4-5 credits): ECON 200 or IND E 250. ECON 200 may also be applied toward the I&S requirement. IND E 250 may also be applied toward the requirement for an additional Engineering Fundamentals course.
 - d. Natural World (49-50 credits)
 - i. Mathematics (21 credits): MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352)
 - ii. Statistics (3-4 credits): IND 315 (preferred) or STAT 390
 - iii. Science (25 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123
2. Major Requirements (94 credits)
 - a. Engineering Fundamentals (19 credits): CSE 142, A A 210, CEE 220, and ME 230. Students who complete STAT 390 must complete an additional Engineering Fundamentals course from CHEM E 260, IND E 250, IND E 280, M E 123, or MSE 170. Students who complete IND E 315 must complete either an additional Engineering Fundamentals course from the above list, or an additional 300-level math course other than statistics.
 - b. Civil Engineering Core (45 credits): CEE 306, CEE 316, CEE 320, CEE 342, CEE 345, CEE 350, CEE 363, CEE 366, CEE 379, CEE 380, CEE 390, CEE 391, CEE 392
 - c. Comprehensive Design (6 credits): CEE 440 and one course from CEE 441, CEE 442, CEE 443, CEE 444, or CEE 445
 - d. Civil Engineering Technical Electives (15 credits): A minimum of 12 credits of CEE 400-level coursework selected from an approved list, with at least one core course from four separate areas of concentration within Civil Engineering. Plus any additional CEE 400-level course (except CEE 423 and courses taken to fulfill requirement c, above).
 - e. Upper Division Engineering and Science (9 credits): Choice of additional CEE 400-level courses or courses from an approved list from outside the department.
 - f. Grade Requirements: Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Upon completion of the undergraduate program, students can demonstrate proficiency in applying fundamental mathematical, statistical, scientific, and engineering principles in formulating and solving civil engineering problems; demonstrate sufficient mastery of core civil engineering topics suitable for entry into the profession and for graduate study; gain significant experience in designing systems and components in civil and environmental applications in both individual and team contexts; possess up-to-date skills for analysis, data collection, modeling, project management, professional development, communication, and presentation; and develop an understanding of professional and social issues suitable for participation and leadership in their communities.
- * *Instructional and Research Facilities:* The department has a large and modern computer laboratory as well as substantial research laboratory facilities. The environmental science and hazardous waste research laboratory facilities include more than 7,000 sq. ft. of lab space, well equipped with sophisticated research instruments. The lake-stream laboratory is equipped with limnological equipment, as well as an autoanalyzer, bench-top incubators, and research microscopes. The structural research laboratory contains an earthquake simulator, a modern MTS testing system, and a 2.4 million lb. capacity Baldwin universal hydraulic testing machine. The geotechnical engineering laboratory contains soil testing equipment, including triaxial testing devices, a microcomputer-controlled GDS pressure control system, a Bishop-Wesley cell, a recently developed cuboidal shear device, a CKC cyclic triaxial device, and a SBEL (Stokoe) resonant column.
- * *Honors Options Available:* With College Honors. With Departmental Honors. See adviser for details.

* *Research, Internships, and Service Learning:* Students typically work at internships in private companies and government agencies in the summer after their junior year, with some part-time internships continuing during the academic year. Many companies advertise internship and job openings through the department and meet with students for on-campus recruiting sessions.

* *Department Scholarships:* The department offers twenty or more scholarships a year. Scholarship applications are available on the College of Engineering Web site and are accepted once a year on April 1. Sophomores may apply for a scholarship before being formally admitted. In addition to departmental scholarships, several companies and private agencies advertise scholarships throughout the year.

* *Student Organizations/Associations:* American Society of Civil Engineers. Chi Epsilon, national honor society for civil engineering undergraduate and graduate students. See adviser for details.

Graduate Program

Graduate Program Coordinator
201 More, Box 352700
206-543-2574

The Department of Civil and Environmental Engineering offers courses leading to the degrees of Master of Science in Civil Engineering and Doctor of Philosophy. The department also provides authorized options leading to the College-wide Master of Science and Master of Science in Engineering degrees.

The three master's programs are intended to accommodate the needs of three categories of students: the M.S.C.E. degree is for those who have completed an undergraduate degree in civil engineering and plan to continue with their professional training; the College-wide M.S.E. degree is for other engineering graduates who wish to do graduate work in civil and environmental engineering; and the College-wide M.S. degree is for those whose Bachelor of Science degrees are not in engineering, but who desire to apply their training in science to the solution of problems in some specific sector related to civil and environmental engineering. The non-engineer may be required to take additional course work to obtain an M.S.E. degree.

Graduate work is offered in most fields of civil and environmental engineering, including transportation engineering; geotechnical engineering; structural engineering and mechanics; environmental engineering; and water resources, hydrology, and hydraulic systems.

Master of Science in Civil Engineering

Admission Requirements

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance; usually, at least a "B" or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

Degree Requirements

42 credits, as follows:

Three options are available -- thesis, non-thesis, and internship. All three options allow for strong flexibility in coursework so that the student may individualize the coursework to an area of research, determined in conjunction with the faculty adviser.

- * Thesis option:
 - o 30 credits of coursework with at least 15 credits at the 500 level
 - o 3 credits (maximum) of CEE 500
 - o 9 credits of master's thesis, CEE 700
- * Non-thesis option:
 - o 36 credits of coursework with at least 18 credits at the 500 level
 - o 3 credits (maximum) of CEE 500
 - o 3 credits (maximum) of CEE 600 with a minimum grade of 3.0
- * Internship option:
 - o 30 credits of coursework with at least 15 credits at the 500 level
 - o 3 credits (maximum) of CEE 500
 - o 3 credits (maximum) of CEE 600 with a minimum grade of 3.0
 - o 6 credits of internship, CEE 601

Doctor of Philosophy

Admission Requirements

Priority for admission is based on an applicant's apparent ability to progress satisfactorily in a graduate degree program. The applicant's scholastic record is of major importance; usually, at least a "B" or 3.00 GPA in the junior and senior years is required. Consideration is also given to Graduate Record Examination scores and other information.

Degree Requirements

90 credits, as follows:

- * Students with Master's degree from outside U.W. or from outside CEE department or Ph.D. topic area:
 - o Master's degree credit waiver (30 credits)
 - o Numerically graded credits (30 credits)
 - o Dissertation (27 credits)
 - o CEE seminar (3 credits)
- * Students with UW CEE Master's degree in Ph.D. topic area:
 - o Numerically graded credits from Master's degree plus Ph.D. graded credits (63 credits)
 - o Dissertation (27 credits)

With the approval of the department, an appropriate master's degree from an accredited institution may be applied towards 30 of the 90 quarter credits.

Because the degree is a research-based degree, course requirements are individualized depending on student's background and Ph.D. topic area.

Financial Aid

Research and teaching assistantships are available on a competitive basis. The number of positions depends upon the current level of funding. Additionally, there are a limited number of fellowships, scholarships, and traineeships.

Research Facilities

More Hall has structural, concrete, bituminous materials, soil mechanics, computer, water-quality, solid-wastes, and air-quality laboratories as well as an air-monitoring station and equipment for fieldwork in the construction, water, air, and solid-waste programs. Facilities for experimental studies in hydraulics and coastal engineering and in fluid mechanics are located in the Harris Hydraulics Laboratory.

Course Descriptions

See page 496.

Computer Science and Engineering

AC101 Paul G. Allen Center for Computer Science and Engineering

Computer science is the study of information and algorithms within the context of real and abstract computing devices. Computer scientists are interested in such topics as the representation and storage of information; algorithms to access, display, edit, and transform information; programming languages to express algorithms; and hardware and software processors to execute algorithms. These concerns lead to practical developments in computer systems software, such as operating systems and compilers; in application areas, such as artificial intelligence, computer graphics, and computational biology; and also to theoretical investigations of computers, algorithms, and data.

Computer engineering is a closely related field concerned with the design and practical application of computer hardware and software systems to the solution of technological, economic, and societal problems. The computer engineer analyzes a problem and selects from a variety of tools and technologies those most appropriate for its solution. A computer engineer can expect to be involved in hardware design, software creation, and systems integration.

Undergraduate Program

Adviser

101 Paul G. Allen Center for Computer Science and Engineering, Box 352350
206-543-1695
ugrad-advisor@cs.washington.edu

The Department of Computer Science and Engineering offers the following programs of study:

- * The Bachelor of Science in Computer Engineering degree
- * The Bachelor of Science degree with a major in computer science (see Computer Science section)

The core requirements of the two undergraduate majors are identical. The computer engineering major may be more appropriate for students who are interested in creating and building systems that include both hardware and software components and that must be engineered to meet a variety of cost and performance constraints. The program includes a general foundation in engineering fundamentals to enable interdisciplinary work with other departments in the College of Engineering and the University as a whole.

The computer science major may be more appropriate for students who want to earn a double major with another College of Arts and Sciences program (for example, mathematics or economics), who want the additional flexibility of the computer science requirements (the computer engineering major has more required courses and fewer electives), or who may be more interested in the theory, design, and implementation of software systems and applications (for example, the techniques of modern compilers or the algorithms behind computer graphics and animation).

Bachelor of Science in Computer Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CSE 142, CSE 143; English composition.

Department Admission Requirements

Applicants are considered in two groups -- Direct Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission.

1. *Direct Admission:* Computer Science and Engineering enrolls up to 20 percent of its incoming class directly out of high school, prior to completion of university-level prerequisites. Freshman applicants to the University listing Computer Science or Computer Engineering as their intended major are automatically considered. Competitive applicants will have taken calculus and at least one year of laboratory science (preferably physics) upon entering the University. Admission is for autumn quarter only.
2. *Upper-Division Admission*
 - a. Course requirements: MATH 124, MATH 125, MATH 126 (or MATH 134, MATH 135, MATH 136), PHYS 121, PHYS 122, CSE 142, CSE 143, and at least 5 credits of English composition.
 - b. Admission is for autumn or spring quarter. Application deadlines are July 1 for autumn quarter and February 1 for spring quarter.

Graduation Requirements

180 Credits as follows:

General Education Requirements (81-84 credits)

1. Written and Oral Communication (12 credits): 5-credit course in English composition from the University-approved list; T C 231; T C 333, or department-approved alternative.
2. Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S) (30 credits): A minimum of 10 credits in each required area.
3. Natural World (39-42 credits):
 - a. Mathematics (19-22 credits): MATH 124, MATH 125, MATH 126, (or MATH 134, MATH 135, MATH 136); MATH 308 or MATH 318 (waived if MATH 136 taken); MATH/STAT 390 or STAT 391.
 - b. Science (20 credits): PHYS 121, PHYS 122, and 10 additional credits from the list of approved natural science courses in the CS&E Handbook. Courses that meet the department's science requirement

include any course in biology, chemistry, physics, earth and space sciences, astronomy, or atmospheric sciences that requires PHYS 121 or CHEM 142/CHEM 145 as a prerequisite.

Major Requirements (96-98 credits)

1. Required Courses (44 credits): CSE 142, CSE 143, CSE 321, CSE 322, CSE 326, CSE 341, CSE 370, CSE 378, CSE 451, CSE 461; E E 215
2. Hardware Specialization (27 credits): E E 233; CSE 466, CSE 467; and 9 credits from courses on the approved senior elective course list in the CS&E Handbook.
3. Software Specialization (25-27 credits): CSE 403; two from CSE 401, CSE 421, CSE 444, CSE 471; and 10 credits from courses on the approved senior elective course list in the CS&E Handbook.
4. Transfer students must earn a minimum of 24 graded credits toward the major at the UW.

Student Outcomes and Opportunities

- * **Learning Objectives and Expected Outcomes:** The program provides an in-depth education in computer engineering while retaining strong foundations in traditional electrical engineering and computer science. The computer engineering program involves digital hardware, software, and architecture. Mathematics, engineering design, laboratory work, and communication-skills development are emphasized. A capstone design course applies the knowledge and skills collected during the program to a major team project

The computer science field has a broad base of private- and public-sector jobs suitable for the Bachelor of Science graduate: systems analyst, systems programmer, applications programmer, technical sales and marketing, and hardware or software engineering specialist. In addition, there are jobs for which graduate education may be appropriate: producers and developers of computer systems, and teachers and researchers. The field is also highly valued for practicing entrepreneurship and is considered one of the most vibrant in the sciences.

- * **Instructional and Research Facilities:** In autumn 2003 the department moved to the new state-of-the-art Paul G. Allen Center for Computer Science and Engineering. The Allen Center includes more than 20,000 square feet of laboratories, nearly 1,000 computer systems, and more than 50 terabytes of storage. Gigabit connectivity is provided to every desktop by more than 60 miles of data cabling, and wireless access is available throughout the building.

CSE general-purpose laboratories support the diverse set of hardware and software platforms required for a cutting-edge education in the field. CSE special-purpose laboratories provide tailored support for activities such as mobile robotics, computer graphics, digital design, motion capture, embedded systems, laser scanning, educational technology, networking, and artificial intelligence.

The Allen Center is one of the finest computer science and computer engineering facilities in the nation. All of its capabilities are available to all CSE students.

- * **Honors Options Available:** With College Honors. With Distinction. See adviser for details.
- * **Research, Internships, and Service Learning:** Internships and co-op opportunities are available for computer science undergraduates. See <http://www.engr.washington.edu/coop> and <http://depts.washington.edu/careers> for information.
- * **Departmental Scholarships:** CSE has a limited number of scholarships available to current CSE majors. Scholarship information is listed at www.cs.washington.edu/education/ugradscholars/scholarships.html.
- * **Student Organizations/Associations:** A student chapter of the Association for Computing Machinery (ACM) operates within CSE. The ACM helps to coordinate new student orientations, research nights, technical talks, and various tutorials.

Graduate Program

Graduate Program Coordinator
AC101 Paul G. Allen Center for Computer Science and Engineering, Box 352350
206-543-1695
grad-admissions@cs.washington.edu

The Department of Computer Science and Engineering offers programs of study leading to the degrees of Master of Science and Doctor of Philosophy. Students can pursue full-time graduate study leading to a Ph.D. with an integrated M.S. Students can also pursue part-time graduate study in the evening, leading to an M.S. Programs are designed to provide considerable breadth of knowledge, as well as depth in an area of specialization.

The department has 40 faculty and is authorized to grow over the next few years. In addition, there are nearly 40 adjunct, affiliate and emeritus faculty members. The faculty is currently conducting research in the following areas: embedded systems and reconfigurable computing; computer architecture; networking; operating systems and distributed systems; programming systems; information retrieval, database systems, and intelligent Internet systems; software engineering; computer graphics, vision, and animation; human interface to computing; artificial intelligence; theory of computation; and computing and biology.

Master of Science

Degree Requirements

40 credits, as follows:

Non-Thesis Option:

- * Of the 40 credits required, 20 credits must be in courses numbered 500 or above, 30 credits must be in CSE courses, and 10 credits may be in one or more supporting fields.
- * Satisfactorily passing an M.S. Qualifying Evaluation. The faculty as a whole assesses whether the student has satisfactorily completed a breadth requirement and an independent project requirement as described below.
- * A breadth requirement must be satisfied through coursework. The required course list may change from time to time to reflect changes in the curriculum and faculty research interests. Students may choose to meet the requirements in place when they were admitted. Students are required to take the following six courses (18 credits) for graded credit (a waiver is possible for graduate courses taken elsewhere):
 - o Either CSE 521 (3) or CSE 531 (3)
 - o Either CSE 548 (3), CSE 551 (3), CSE 561 (3), or CSE 567 (3)
 - o Either CSE 501 (3), CSE 503 (3), or CSE 505 (3)
 - o Either CSE 510 (3), CSE 544 (3), CSE 546 (3), CSE 557 (3), CSE 573 (3), or CSE 576 (3)
 - o Two additional courses from two of the groups above
- * An independent project must be completed under the supervision of a primary and a secondary faculty advisor. A written summary and an oral presentation are required.

Thesis option:

- * 9 credits CSE 700, Master's Thesis
- * Of the 31 remaining credits,
 - o At least 16 credits must be in courses numbered 500 or above
 - o 24 credits must be CSE courses
 - o 7 credits may be in one or more supporting fields such as: engineering, mathematics, natural sciences, business administration, linguistics, philosophy, psychology, or medicine.
- * Thesis: Preparation of a written thesis acceptable to a CSE Supervisory Committee and satisfactorily passing an oral examination on the thesis work.

Professional Masters Program

Degree Requirements

To satisfy the requirements of the Professional Master's Program, students must successfully complete eight 4-credit PMP courses (determined in consultation with an adviser) and other courses providing 8 additional credits. The additional credits may be earned through participation in the department's colloquium series, which features leading-edge researchers and developers in computer science from around the world. This series airs throughout the Puget Sound region on UWTV and is available live and

archived on the Internet. Students who take one course per quarter, plus 1 credit of colloquium, complete the program in two-and-a-half years.

Doctor of Philosophy

90 credits, as follows:

- * Satisfactorily passing a Ph.D. Qualifying Evaluation. The faculty as a whole assesses whether the student has satisfactorily completed a breadth requirement and an independent project requirement as described below.
 - o A breadth requirement will be satisfied through coursework. The required course list may change from time to time to reflect changes in the curriculum and faculty research interests. Students may choose to meet the requirements in place when they were admitted. Students are required to take the following eight courses (24 credits) for graded credit (a waiver is possible for graduate courses taken elsewhere):
 - + Either CSE 521 (3) or CSE 531 (3)
 - + Either CSE 548 (3), CSE 551 (3), CSE 561 (3), or CSE 567 (3)
 - + Either CSE 501 (3), CSE 503 (3), or CSE 505 (3)
 - + Either CSE 510 (3), CSE 544 (3), CSE 546 (3), CSE 557 (3), CSE 573 (3), or CSE 576 (3)
 - + Two additional courses from two of the groups above
 - + No more than three courses from any one of the groups above.
 - o An independent project must be completed under the supervision of two faculty advisers. A written summary and an oral presentation are required.
- * Satisfactorily passing the General Examination. In this examination, the applicant must demonstrate depth of knowledge in a principal area acceptable to the Ph.D. Supervisory Committee.
- * Completion of at least 90 credits of course work, at least 40 of which are to be in courses numbered 500 or above. 45 credits should be in courses chosen from the Computer Science course list. At least two CSE courses numbered 500 or above (or approved courses in related disciplines) must be taken for graded credit in addition to those courses taken to satisfy the breadth component of the qualifying evaluation. Coursework taken toward the M.S. degree is applicable toward the Ph.D. degree.
- * Completion of two quarters of teaching assistantship within the department.
- * Preparation of a dissertation that must be acceptable to the Supervisory Committee. Students must register for at least 27 credits of CSE 800 (Dissertation).
- * Satisfactorily passing an oral examination on the dissertation work.

Application Requirements

Most entering graduate students are expected to have a solid background in computer science, including programming, machine organization, data structures, discrete mathematics, automata theory, and programming systems (i.e., the equivalent of CSE 378, 326, 321, 322, and either 401 or 451). Some exceptions to these requirements are made for otherwise-promising students. Graduate Record Examination scores are required; a GRE subject-test score (not necessarily in computer science) is recommended. Scores should be earned within the preceding five years. The Computer Science and Engineering Graduate Program Brochure gives full details of application procedures.

Complete applications must be received by December 15 for both U.S. and international students for autumn-quarter admission.

Assistantships

Research and teaching assistantships are available and are allocated on the basis of scholastic excellence and potential. All students accepted to the program are awarded three years of funding. Students who are applying for assistantships to start in autumn quarter should have all applications to the Graduate School and the department completed by December 15.

The application packet contains all the necessary forms for applying to the Graduate School and to the graduate program in Computer Science and Engineering and for consideration for assistantships.

Course Descriptions

See page 502.

Electrical Engineering

AE100R Paul Allen Center

Electrical engineering is concerned with the understanding and utilization of electricity and with providing society useful, efficient, and economic products and services. It encompasses everything from batteries and power supplies to crystal fabrication, autonomous robots, and devices that can recognize human speech. Electrical engineers design, produce, study, and operate all manner of devices and systems that use electric and electromagnetic energy. They also work on systems at the macro scale of electric power grids and at the micro scale of nanotechnology.

Contemporary society is in the midst of an information revolution, created in large part from the fruits of electrical engineering. Rapid improvements in communication technologies, computer visualization, and information access continue to have a significant impact on manufacturing, medicine, transportation, and environmental monitoring. Dramatic advances in personal communication services, digital imaging, and network hardware and software are changing the texture of everyday life for an increasing portion of the world's population.

Undergraduate Program

Adviser
AE 100R Paul Allen Center 206-543-2142
undergrad@ee.washington.edu

The Department of Electrical Engineering offers the following program of study

- * The Bachelor of Science in Electrical Engineering degree

Bachelor of Science in Electrical Engineering

Suggested First- and Second-Year Courses: MATH 124, MATH 125, MATH 126; CHEM 142; English composition; PHYS 121 (and beyond if possible). Students should start in math courses right away and follow with physics, chemistry, computer programming, etc. as soon as possible. The department publishes a sample four-year plan of study for fulfilling all degree requirements, including those to be taken during the first year, online at www.engr.washington.edu/score/EEPlan.pdf.

Department Admission Requirements

Because resources are limited, students must apply for admission to the electrical engineering program. Application forms and a comprehensive booklet, *The Electrical Engineering Handbook for Undergraduates*, can be obtained from the undergraduate adviser for electrical engineering. The department classifies applicants by admission group; the specific requirements for each are described below. Admission to the department is competitive and completion of the requirements does not guarantee admission. All applicants have the right to petition and appeal the admissions decision of the department. Please see the undergraduate adviser for more information.

Applicants are considered in three groups -- Early Decision, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision.

Early Decision

The Department of Electrical Engineering enrolls up to 10 percent of its incoming class directly out of high school, prior to the completion of University-level prerequisites. Freshman applicants to the University of Washington who list Electrical Engineering as their intended major are automatically considered. Competitive applicants will have taken or be taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

Early Admission

1. Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical science plus accompanying laboratory at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or equivalent; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline.

2. Applicants must be currently enrolled at the UW and must have completed a minimum of 16 credits taken in residence at the UW. Early Admission is available autumn quarter only. Application deadline is July 1.
3. Grade requirements: Minimum 2.50 GPA in courses required for admission, and minimum 2.50 overall GPA.

Upper-Division Admission

1. Course requirements: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122; CHEM 142; 5 credits of English composition.
2. 64 credits completed by application deadline (July 1 for autumn admission; February 1 for spring admission).
3. Grade requirements: Minimum overall 2.50 GPA and minimum 2.50 GPA in courses required for admission.

Graduation Requirements

General Education Requirements (81 credits)

1. Written and Oral Communications: 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
2. Visual, Literary, and Performing Arts (VLPA), and Individuals & Societies (I&S) (25 credits): A minimum of 10 credits is required in each area.
3. Natural World (44 credits):
 - a. Mathematics (24 credits): MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), and MATH 324.
 - b. Science (20 credits): CHEM 142; PHYS 121, PHYS 122, PHYS 123

Major Requirements (80-81 credits)

1. Computer Programming (9 credits): CSE 142, CSE 143
2. Electrical Engineering Core (13 credits): E E 215, E E 233, E E 235
3. Electrical Engineering Electives (45 credits): See adviser for list of acceptable courses.
4. Engineering Electives (10 credits): See adviser for list of acceptable courses.
5. Statistics (3-4 credits): STAT/MATH 390 or IND E 315
6. Grade Requirements: Minimum 2.00 GPA in all E E courses with no grade below 1.0 in any of these courses.

Electives (18-19 credits)

1. Approved Non-Electrical Engineering Electives (10 credits): Selected from courses listed in the departmental handbook.
2. Free Electives (8-9 credits)

Student Outcomes and Opportunities

- * **Learning Objectives and Expected Outcomes:** Graduates with a degree in electrical engineering find employment in industries such as aerospace, communications, computer manufacturing, power distribution, consumer electronics, and biomedical engineering. Positions can be found focusing on the research, design, and testing of new products; in technical sales and marketing; business consulting; and even growing areas such as intellectual property. Students who pursue graduate studies are quite successful in highly competitive national and international programs.

The BSEE program is accredited by the Accrediting Board for Engineering and Technology (ABET) and the department has adopted the following student outcomes:

1. ability to apply knowledge of mathematics, science, and engineering
2. ability to apply knowledge of probability and statistics, including applications appropriate to the program name and objectives
3. ability to apply knowledge of mathematics through differential and integral calculus, basic science, and engineering sciences necessary to analyze and design complex electrical and electronic devices, software, and systems containing hardware and software components
4. ability to apply knowledge of advanced mathematics, typically involving differential equations, linear algebra, complex variables, and discrete mathematics
5. ability to design and conduct experiments, as well as to analyze and interpret data
6. ability to design a system, component, or process to meet desired needs
7. ability to function on multi-disciplinary teams
8. ability to identify, formulate, and solve engineering problems

9. understanding of professional and ethical responsibility
10. ability to communicate effectively
11. the broad education necessary to understand the impact of engineering solutions in a global and societal context
12. recognition of the need for, and an ability to engage in, life-long learning
13. knowledge of contemporary issues
14. ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

- * **Instructional and Research Facilities:** The department maintains a number of instructional and research labs to support courses and independent study activities. There are three general-purpose computing labs. Instructional labs include a large instrumentation lab supporting numerous electronics courses; individual labs for digital design courses; a power lab to support the power/energy systems classes; and labs that support capstone design classes. Students participating in undergraduate research and independent study generally have access to the research labs of their supervising faculty member.

- * **Honors Options Available:** With College Honors. With Distinction. See adviser for details.

- * **Research, Internships, and Service Learning:** Many electrical engineering students participate every year in internship and co-op (cooperative education) programs. The Engineering Co-op Office is one source for companies recruiting for internship and co-op students. The Center for Career Services also lists a variety of internship opportunities.

- * **Department Scholarships:** Many scholarships specifically for electrical engineering majors and based on merit and financial need are awarded each year. Students interested in applying for these and other College of Engineering scholarships may obtain information from the Department of Electrical Engineering Scholarship Award Committee Chair.

- * **Student Organizations/Associations:** The Institute of Electrical and Electronics Engineers (IEEE), UW student chapter organizes social activities, workshops, field trips and other professional development opportunities. Eta Kappa Nu (HKN) is an invitation-only honor society for electrical engineering students. HKN organizes tutoring services, tutorial workshops, social activities, and community services projects.

Of Special Note: The departmental policy on continuation is consistent with the continuation policy of the College but also includes supplementary requirements specific to the department. Details may be obtained from the department advising office.

Graduate Program

Graduate Program Coordinator
AE100R Paul Allen Center, Box 352500
206-543-2142
grad@ee.washington.edu

The Department of Electrical Engineering offers graduate programs leading to the degrees of Master of Science in Electrical Engineering (M.S.E.E.) and Doctor of Philosophy (Ph.D.). Graduate courses and research programs are offered in biosystems, circuits and network theory, computational intelligence, computer networks and distributed systems, computer architecture, digital systems, software engineering, operating systems, microprocessors, VLSI design, control systems, electromagnetics (including optics and radio science), electronic materials (including devices and micro-electronics), energy systems (including power electronics and electric drives), signal and image processing, telecommunications, and virtual reality. Numerous interdisciplinary research opportunities exist, including projects relating to bioengineering, computer engineering, and marine acoustics. The department does extensive research in coordination with the University of Washington's Applied Physics Laboratory and Washington Technology Center.

The M.S.E.E. degree may be earned in three ways, each of which requires the accumulation of 45 credits. A student may perform research and write a thesis; a student may pursue a one-quarter project as part of their studies; or a student may simply accumulate a suitable distribution of 45 credits of course work. Course work for each of the options is developed with the advice of faculty advisers as well as through the department advising staff.

For the Ph.D. degree, students must pass the departmental qualifying examination, pass an advanced General Examination, pursue an original research problem, and report the results of that research in a dissertation

that must be a contribution to knowledge. At least one year of course work beyond the M.S.E.E. degree is usually desirable.

Master of Science in Electrical Engineering

Admissions Requirements

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required of all students. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following some additional preparation. Such applicants are strongly encouraged to contact the department for further information.

For more information on admissions qualifications, visit the department's Web site at www.ee.washington.edu/graduate/admitcriteria.html.

Degree Requirements

Masters students have the option of choosing between three different pathways for pursuing their degree:

- * *Thesis option:* The thesis option is best intended for students who wish to pursue an in-depth research experience with intended preparation for pursuing a Ph.D.
- * *Project option:* Students who wish to combine the written work of a thesis with a more hands-on approach to individual problems may choose the project option.
- * *Coursework option:* A student whose main goal is to work in industry immediately upon graduation may find the coursework option more suitable to their needs.

These three options have several related requirements:

- * Students must complete a plan of study by their second quarter of study.
- * Students must complete a minimum of 45 credits.
- * Students must be registered full time (10 credits) per quarter (less in summer)
- * Students may apply no more than 3 credits of E E 500. 1 credit is required.
- * Students may apply no more than 5 credits of E E 599 to the degree.
- * Students are required to take 1 credit of E E 592, offered autumn quarter.

Thesis Option

45 credits, as follows:

- * 9-12 credits of E E 700
- * At least 20 credits in E E courses numbered 500 and above
- * No more than 12 credits in E E 400-level courses
- * No more than 9 credits from non-E E courses

The thesis option is an opportunity to pursue an individual problem in depth and in close collaboration with a faculty member. Typical problems involve basic research or application of classroom principles to a professional problem beyond the routine practice of electrical engineering. Students who choose the thesis option must complete a written thesis and oral examination based upon the thesis material before their degree is granted.

Project Option

45 credits, as follows:

- * A minimum of 4 credits E E 600
- * At least 25 credits in E E courses numbered 500 and above
- * No more than 12 credits in E E 400-level courses
- * No more than 9 credits from non-E E courses

The required 4 credits of E E 600 must be completed in one quarter and receive a minimum grade of 3.0. Students must complete a written report and an oral presentation to faculty. A student's supervisory committee may permit the student to conduct a second project, allowing a total of 8 credits of E E 600 credits. However, students may not continue project work from one quarter to another.

Coursework Option

45 credits, as follows:

- * At least 25 credits in E E courses numbered 500 and above
- * No more than 12 credits in E E 400-level courses
- * No more than 9 credits from non-E E courses

The coursework option allows students to pursue the M.S.E.E. by taking a prearranged course load specific to each of the seven curriculum areas. A generic coursework option is also available. The curriculum group chair and the Graduate Program Coordinator must approve deviation from these prearranged plans.

Doctor of Philosophy

Admissions Requirements

In addition to meeting Graduate School admission requirements, the Graduate Record Examination (GRE) general test is required of all students. Official test scores must be submitted, along with a formal application, a statement of purpose, and a minimum of two reference letters.

Although most applicants have baccalaureate degrees in electrical engineering, applicants with degrees in other branches of engineering, the physical sciences, computer science, or mathematics often are able to pursue graduate study in electrical engineering following some additional preparation. Such applicants are strongly encouraged to contact the department for further information.

For more information on admissions qualifications, visit the department's Web site at www.ee.washington.edu/graduate/admitcriteria.html.

Degree Requirements

The Ph.D. is awarded based on general proficiency and distinctive attainments in Electrical Engineering, particularly on the demonstrated ability of independent investigation. As evidence of ability, the student must produce a doctoral dissertation embodying original research yielding a new contribution to knowledge and presented with a satisfactory degree of literary skill. The majority of Ph.D. students hold master's degrees within the same field, although students with degrees in the physical sciences and other engineering fields are also admitted. To earn a Ph.D., students must:

- * Pass the department Qualifying Examination
- * Complete an individualized course of study approved by the student's Ph.D. Supervisory Committee
- * Pass the University General Examination
- * Prepare and defend a satisfactory dissertation based on original research
- * Complete at least 90 credits of course work, independent study, and dissertation (60 of which must be completed at the UW), 18 of which must be graded credits
- * Maintain a cumulative minimum GPA of 3.00.
- * Complete 30 credits of dissertation credits (E E 800)

Research Groups

Facilities in the Department of Electrical Engineering include research laboratories for advanced digital systems, advanced power technology, applied electromagnetics, optics, remote sensing, applied signal and image processing, mechatronics and intelligent control, modern sensors, and semiconductor technology

Financial Aid

Research assistantships, teaching assistantships, scholarships, and graduate fellowships are available to qualified graduate students in all areas of electrical engineering. Most awards include a monthly stipend plus payment of tuition and fees.

Course Descriptions

See page 506.

Industrial Engineering

G-7 Mechanical Engineering Building

Industrial engineering (IE) prepares students for careers in an increasingly diverse, dynamic and technological world. Industrial engineers focus on the integration of humans, machines, materials and information to achieve optimum performance of operating systems. This focus on the "big picture" makes industrial engineering one of the most people-oriented and customer-focused of the engineering disciplines.

Industrial engineering involves the study of engineering design, system integration, optimization, quality and reliability, supply chain management, virtual reality, and manufacturing.

Other engineering disciplines apply skills to very specific areas. Industrial engineers have the opportunity to work in many different kinds of businesses and nonprofit organizations. The most distinctive aspect of industrial engineering is the flexibility it offers. Many industrial engineers eventually move into supervisory or management positions where they continue to draw on their technical background. Demand for industrial engineers has grown dramatically over the past two decades.

Undergraduate Program

Adviser

G7 Mechanical Engineering, Box 352650
206-543-5041
leadvise@u.washington.edu

The Industrial Engineering program offers the following program of study:

- * The Bachelor of Science in Industrial Engineering degree

Bachelor of Science in Industrial Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; English composition; courses to fulfill VLPA and I&S requirements.

Department Admission Requirements

Applicants are considered in three groups -- Early Decision, Early Admission, and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision.

Early Decision

The UW Industrial Engineering program enrolls up to 10 percent of its incoming class directly out of high school, prior to the completion of university-level prerequisites. Freshman applicants to the University of Washington who have listed Industrial Engineering as their intended major will be automatically considered. Competitive applicants will have taken or be taking calculus and at least one year of laboratory science (preferably physics). Admission is for autumn quarter only.

Early Admission

1. Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical-science courses plus accompanying laboratory, at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152; and 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. Admission is for autumn quarter only.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
3. Grade requirements: Minimum grade of 2.0 in each prerequisite course and a minimum overall GPA of 2.50.

Upper-Division Admission

1. Course requirements: MATH 124, MATH 125, MATH 126.; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; and at least 5 credits of English composition.
2. 45 credits completed by application deadline, which is July 1 for autumn admission and February 1 for spring admission.

Graduation Requirements

180 credits as follows:

General Education Requirements (91 credits)

1. Written and Oral Communications (12 credits): 5-credits in English composition from the University-approved list; T C 231; T C 333 (or department-approved alternative).
2. Visual, Literary, and Performing Arts (VLPA) and Individuals and Societies (I&S) (30 credits): A minimum of 10 credits is required in each area.
3. Natural World (49 credits)
 - a. Mathematics (24 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308; IND E 315
 - b. Science (25 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (89 credits)

1. Engineering Fundamentals (28 credits): CSE 142, MSE 170, A A 210, E E 215, CEE 220, M E 230, IND E 250
2. Industrial Engineering Core (24 credits): IND E 310, IND E 311, IND E 316, IND E 337, IND E 494, IND E 495
3. Technical Electives (37 credits): At least one class from approved courses in each of the following areas: operations research, statistics, production/operations, design, and general engineering. See adviser for list of approved technical electives.
4. Grade Requirements: Minimum 2.00 GPA in all engineering courses with no grade below 1.0 in these courses.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Industrial engineering graduates are proficient in mathematics, sciences, engineering fundamentals, and the use of computers; use a broad knowledge of industrial engineering methods and tools associated with operations research, quality engineering, and human factors; apply engineering design methods and tools to represent, integrate and solve problems, including the ability to recognize problem context and integrate knowledge and skills from allied disciplines; communicate effectively; and possess the professional characteristics of leadership, ethics, and the ability to motivate and work with others.

IE prepares students to serve as the efficiency experts of organizational change. Students are encouraged to take a systems view when solving problems, recognize the organizational and societal impact of technical decisions, develop good oral and written communication skills, participate in teams, and take initiative. Industrial engineers draw upon specialized knowledge and skills in math, the physical sciences, and social sciences together with the principles and methods of engineering analysis and design.

- * *Instructional and Research Facilities:* Industrial Engineering provides designated computing facilities for undergraduate students. Research facilities include the Human Interface Technology Laboratory, the Production Systems Laboratory, the Manufacturing Laboratory, and The Center for Engineering Learning and Teaching.
- * *Honors Options Available:* With College Honors. With Distinction (Departmental Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* Students have the opportunity to pursue cooperative and internship programs at the College level through the College's Engineering Co-op Program (www.engr.washington.edu/coop/).
- * *Department Scholarships:* IE offers scholarships to outstanding undergraduate students. All applicants to the BSIE program are considered for these scholarships. Awards are made based on both merit and financial need.
- * *Student Organizations/Associations:* Students are actively involved in the UW student chapter of the Institute of Industrial Engineers (IIE); the IE National Honor Society, Alpha Pi Mu; and the IE Student Advisory Board.

Graduate Program

Graduate Program Coordinator
G7 Mechanical Engineering, Box 352650
206-543-5041
ieadvise@u.washington.edu

Industrial Engineering offers graduate programs leading to the Master of Science in Industrial Engineering (M.S.I.E.) and Doctor of Philosophy (Ph.D.). Graduate courses and research programs are offered in manufacturing, operations research, large-scale assembly, experimental statistics, production planning, quality control, reliability engineering, computer-integrated manufacturing, simulation, supply chain, human factors, virtual reality, and human interface technology.

Master of Science in Industrial Engineering

Admission Requirements

To be eligible for consideration to the M.S.I.E. degree, applicants are expected to have a bachelor's degree in engineering, mathematics, or science, with a minimum GPA of 3.00.

Degree Requirements

41 credits, as follows:

- * Coursework Only Program:
 - o 21 graded course credits in industrial engineering (500 level or above) courses
 - o 17 graded course credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
 - o 3 credits of Industrial Engineering seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)
- * Thesis Program:
 - o 18 graded course credits in industrial engineering (500 level or above) courses
 - o 11 graded course credits in technical electives (a maximum of 9 technical elective credits may be taken at the 400 level)
 - o 9 credits of master's thesis (IND E 700)
 - o 3 credits of Industrial Engineering seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)

Doctor of Philosophy

Admission Requirements

To be eligible for consideration to the Ph.D. in Industrial Engineering degree, applicants should have, or be close to completing, their Master's degree in any discipline of engineering when applying, with a minimum GPA of 3.00.

Degree Requirements

90 credits, as follows:

- * 3 credits of Industrial Engineering graduate seminar: IND E 591, IND E 592, IND E 593 (1, 1, 1)
- * 60 credits of coursework, with at least 18 credit hours of 500-level courses. A master's degree from the UW or another institution may be used as a substitute for 30 of these 60 credits.
- * General examination
- * Dissertation: 27 credits of dissertation (IND E 800) over a period of at least three quarters.
- * Final examination

Course Descriptions

See page 511.

Materials Science and Engineering

302 Roberts

Materials science and engineering is an interdisciplinary field that addresses the structure, processing, and property relationships in materials for engineering applications. Basic principles of chemistry and physics are applied to provide an understanding of the structure of materials and the manner in which the structure determines the properties. Scientific processing methods are then applied to yield the necessary properties, which then can be integrated with, and designed to accommodate the needs of, modern technology.

Advances in materials enable technological progress in many fields. Historically, this connection between materials and technology has been so intimate that major periods in civilization have been named after the dominant material used in that era (e.g., Bronze Age, Iron Age). In the past few decades, at the core of the progress in such diverse fields as transportation, communication, electronics, energy and environment are significant advances in materials. Materials science and engineering is a broad and growing discipline.

Materials Science and Engineering at the University of Washington has recently experienced rapid expansion into new research areas, including polymers, hybrids, biomaterials, biomimetics, nanomaterials, photonic and magnetic materials. These areas have applications in current and emerging industries, and complement existing strength in ceramics, metals, electronic materials, and composites.

Undergraduate Program

Adviser
302A Roberts, Box 352120
206-543-2600
mse@u.washington.edu

The Department of Materials Science and Engineering offers the following programs of study:

- * The Bachelor of Science in Materials Science and Engineering degree
- * A minor in materials science and engineering

Bachelor of Science in Materials Science and Engineering

Suggested First- and Second-Year College Courses: MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; CHEM 142, CHEM 152; English composition; CSE 142; MSE 170; AA 210; CEE 220; T C 231.

Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to appeal the department's admission decision. Application information is available from the department adviser.

Early Admission

1. Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or above; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. (T C 231 and M E 123 must be taken no later than the academic year of admission.)
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Applications are accepted for autumn quarter only. Application deadline is July 1.
3. Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Upper-Division Admission

1. Course requirements: MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122; CHEM 142, CHEM 152; CSE 142; MSE 170; 5 credits of English composition.

- 64 credits completed by application deadline. Applications are accepted for autumn quarter (July 1 deadline) and spring quarter (February 1 deadline).
- Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Graduation Requirements

180 credits as follows:

General Education Requirements (85 credits)

- Written and Oral Communications: 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
- Visual, Literary, and Performing Arts (VLPA), and Individuals & Societies (I&S) (24 credits): A minimum of 10 credits is required in each area.
- Natural World (55-60 credits):
 - Mathematics (24-25 credits): MATH 124, MATH 125, MATH 126, MATH 307, MATH 308 (or MATH 318); one from MATH 309, MATH 324, IND E 315, or STAT 390
 - Science (31-35 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; two of the following: PHYS 224, PHYS 225, CHEM 162, CHEM 223, CHEM 224, CHEM 237, CHEM 238, CHEM 455, CHEM 457

Major Requirements (89-90 credits)

- Engineering Fundamentals (24 credits): CSE 142, MSE 170, A A 210, CEE 220; two of the following: E E 215, M E 123, CHEM E 260, IND E 250.
- Materials Science and Engineering Core (49-50 credits): 310, MSE 311, MSE 312, MSE 313, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362, MSE 431, MSE 442, MSE 491, MSE 492, MSE 499
- Technical Electives (16 credits): See department advising office for list of acceptable courses.
- Grade Requirement: Minimum 2.00 departmental cumulative GPA.

Minor

Minor Requirements: 30 credits as follows: MSE 170, MSE 321, MSE 322, MSE 331, MSE 333, MSE 342, MSE 351, MSE 352, MSE 362. A minimum grade of 2.0 is required for each course.

The following courses serve as prerequisites for the departmental courses in the minor: MATH 124, MATH 125, MATH 126, MATH 307, and MATH 308 or MATH 318; CHEM 142 or CHEM 145, CHEM 152 or CHEM 155; PHYS 121, PHYS 122, PHYS 123; MSE 170; English composition. Students should take these courses before beginning the minor program.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* Undergraduate students are offered both broad core and in-depth courses. The broad core provides the needed background and understanding of all types of engineering materials, including metals, ceramics, polymers, electronic materials, and composites. The curriculum provides an opportunity to use basic knowledge in science and engineering fundamentals to synthesize and design materials for engineering applications. The undergraduate curriculum emphasizes hands on experience, oral and written communication, and team-work, and encourages participation in research. Graduates with a degree in materials science and engineering find employment in a broad range of industries including aerospace, biomedical, electronic manufacturing, materials processing, and transportation.

The degree program in materials science and engineering has the following outcomes for graduates:

- Provides that graduates have fundamental knowledge of mathematics and science, and are able to apply them to engineering problems and to a variety of materials systems
- Develops graduates who are skilled in engineering fundamentals
- Ensures that graduates are knowledgeable about all classes of materials and their properties, structure, processing and applications
- Provides specific knowledge related to structure, properties, processing, and performance specific to materials science and engineering
- Applies advanced science (such as chemistry and physics) and

- engineering principles to engineering systems
- Describes and applies the scientific and engineering principles underlying the four major elements of the field: structure, properties, processing, and performance related to material systems
- Solves materials selection and design problems by integrating knowledge from each of the four elements of the field
- Utilizes experimental, statistical, and computational methods for analysis and design problems
- Uses hands-on laboratory experience to solve real engineering problems
- Has the needed background for effective practice in industry and government
- Has a sound, well-balanced education that prepares them to understand their professional responsibilities and the basis for a thoughtful and responsible life
- Has experience in integrating engineering and materials design concepts with societal issues, including economics, ethics, quality, and human values
- Is prepared to enter graduate programs, as appropriate to the student and the area of interest
- Has the ability to communicate effectively, orally and in writing, the concepts and results of engineering investigations to both technical and non-technical audiences

* *Instructional and Research Facilities:* Facilities include equipment for electron and optical microscopy, x-ray diffraction, high-temperature heat treatment and mechanical testing, specialized processing equipment, including hot and cold isostatic presses, nitrogen reaction furnaces, and automated TGA, DTA analysis systems. Equipment for analyses of particle size, surface areas, and pore size is also available. Students have liberal access to University computing facilities.

* *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

* *Research, Internships, and Service Learning:* Materials Science and Engineering students interested in paid internship experiences should contact the Engineering Co-op Program, 301 Loew Hall, Box 352180, 206-543-8711, coop@enr.washington.edu.

* *Department Scholarships:* In addition to need-based aid provided through the University's Office of Student Financial Aid, companies and individuals with interest in developing materials science and engineering students have provided scholarships for students admitted to the program. Specific information and application forms are available from the academic counselor in 302 Roberts.

* *Student Organizations/Associations:* Keramos (materials honor society); American Ceramic Society (ACerS); ASM/TMS (the joint student chapter of ASM International and TMS); Society for the Advancement of Materials and Process Engineering (SAMPE).

Of Special Note:

Combined B.S./M.S. Degree Program

The goal of the combined B.S./M.S. program in Materials Science and Engineering is to provide a more direct route to the master's degree for well-qualified undergraduate students who wish for more in-depth graduate-level work in preparation for work in industry or for a Ph.D. program. It creates a more efficient and continuous academic program that leads directly to the Master of Science degree. Students earn both the B.S. and M.S. degrees in five years. This program is available to students after they are admitted to the department. Information is available below.

Graduate Program

Graduate Program Coordinator
302 Roberts, Box 352120
206-543-2600
mse@u.washington.edu

The Department of Materials Science and Engineering offers programs of study leading to the Master of Science in Materials Science and Engineering (M.S.M.S.E.) and the Doctor of Philosophy in either Materials Science and Engineering and Materials Science and Engineering/Nanotechnology.

In addition, the degree of Master of Science (without designation) is offered through the College of Engineering. This degree is intended to accommodate students with undergraduate majors outside physical science or

engineering who desire a special graduate program to encompass a broad range of materials science studies.

The primary goals of the master's and doctoral programs are to prepare students for industrial employment and research/development careers and to generate new knowledge. The specific objectives are:

- * Deepen knowledge and capabilities broadly and in a chosen specialty area: A student's knowledge, attained through coursework and scholarly investigation of literature relevant to thesis project, should be commensurate with leading researchers in the field.
- * Master and develop state-of-the-art research techniques appropriate to specialty: Analytical, computational, and experimental tools are learned via instruction by advisor(s) and peers in conjunction with maintaining currency with literature.
- * Contribute new knowledge of lasting value to the field by creative and independent research: A student's thesis research must demonstrate originality and high quality, as judged by faculty committee
- * Broaden candidate's knowledge of field and societal issues: Through coursework, department and group seminars, and attendance at professional meetings, a student learns to appreciate context of specialty within materials science and engineering and gain ability to apply knowledge and methods to a spectrum of engineering and scientific challenges.
- * Learn to work effectively with colleagues and contribute to professional community: Attained by cooperation in team research projects, presentation of research and professional meetings.

Combined Bachelor of Science/Master of Science

Admission Requirements

Students may apply to enter the combined BS/MS program any time after they are accepted into the MSE department as an undergraduate major. Requirements for application include:

- * Overall minimum GPA of 3.20 in the last 90 credits before application.
- * At least 15 credits of MSE courses completed with a minimum GPA of 3.40.
- * Statement of interest and goals for the M.S. degree.
- * Interview with admissions committee

Students accepted into the combined BS/MS program by the department will then apply to the Graduate School in December of their senior year. These students will normally enroll in the Materials Science option for the M.S. degree.

Degree Requirements

216 credits.

Requirements are the same as for the current BS and MS programs. However, up to 7 credits of 400- or 500-level courses taken as an undergraduate over and above the BS requirement may be counted towards the MS degree. These credits would be transferred to the graduate program when the student enters as a graduate student, subject to the approval of the MSE Graduate Program Committee. The graduate school will waive the restrictions on transfer credits for this purpose.

Students admitted into the BS/MS program will combine their BS senior project requirement (MSE 499) with the MS thesis requirement (MSE 700) and will begin the research starting summer or autumn quarter of their senior year. The student will receive 4 credits of MSE 499 for the undergraduate portion of the research program, and then register for 9 or more credits of MSE 700 for the thesis. Written and oral reports are required to complete the 499 credits, to be submitted before the end of the senior year. The thesis is required for the completion of the MS degree.

Master of Science in Materials Science and Engineering

Admission Requirements

The applicant must have a minimum undergraduate grade point average of 3.00 in the last 90 graded quarter hours or the last 60 graded semester hours. Graduate Record Examination (GRE) results are also required for the general test.

Students with backgrounds in engineering and the physical sciences are admitted into the M.S.M.S.E. program. After admission, students with a minimum of three years' industrial experience in an engineering position may apply for the Engineering Materials (practice-oriented, non-thesis) option.

Specific program pre-requisites, which may be satisfied after entry into the program, are:

- * Knowledge of fundamentals of Materials Science and Engineering equivalent to MSE 170
- * Knowledge of crystallography equivalent to MSE 331
- * Background in materials properties equivalent to MSE 362 and MSE 351
- * Knowledge of kinetics equivalent to MSE 322
- * Understanding of thermodynamics equivalent to the level of MSE 421

Degree Requirements

36 credits, as follows:

At least 27 credits must be for course work, including 3 credits of MSE 520 seminar (see below). Of these 27 credits, 18 must be in courses numbered in the 500 series (these 18 may include the 3 seminar credits). Numerical grades from approved 400 level and all 500 level courses must be received for at least 18 quarter credits of course work taken at the University of Washington. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University. Required courses may not be taken on a S/NS option. The S/NS option in other courses must have the approval of the student's faculty advisor.

Thesis Option

- * Three required core courses (9 credits): MSE 510 (3), MSE 525 (3), MSE 541 (3)
- * Three optional core courses
- * 3 credits of seminar (MSE 520)
- * 9 credits of thesis work (MSE 700)
- * 6 credits of electives (400- or 500-level physical science or engineering courses) to meet the 36 credit requirement.

Non-Thesis Option

- * Three required core courses (9 credits): MSE 510 (3), MSE 525 (3), MSE 541 (3)
- * Four practice-oriented materials or related engineering courses, 12 credits minimum, chosen to complement the student's program.
- * Materials Engineering Project, MSE 598, 4 credits. This is taken during the last quarter of the master's program.
- * Electives to meet the 36 credit requirement.
- * Of the above credits, all must be at the 400 or 500 level, with a minimum of 18 at the 500 level, and other graduate school requirements must be met. Numerical grades are also required for at least 18 credits of 400- or 500-level coursework.

Doctor of Philosophy

Admission Requirements

The applicant must have a minimum grade point average of 3.00 in the last 90 graded quarter hours or the last 60 graded semester hours. Graduate Record Examination (GRE) results are also required for the general test.

In general, entering graduate students with only the B.S. degree will be required to enroll as M.S. students.

Prerequisite:

- * Knowledge of fundamentals of Materials Science and Engineering equivalent to MSE 170
- * Knowledge of crystallography equivalent to MSE 331
- * Background in materials properties equivalent to MSE 362 and MSE 351
- * Knowledge of kinetics equivalent to MSE 322

The department also requires that all entering graduate students have an understanding of thermodynamics equivalent to the level of MSE 421. If the student does not have two undergraduate thermodynamics courses upon entry to the graduate program, then MSE 421 is required for the Ph.D. degree.

Students interested in the Materials Science and Engineering with the Nanotechnology option must make formal application to the UW's Center for Nanotechnology after being admitted to the MSE graduate program.

Degree Requirements

90 credits as follows:

- * 30 credits from M.S.M.S.E. degree or equivalent
- * Three required core courses (9 credits): MSE 510 (3), MSE 525 (3), MSE 541 (3)
- * 6 credits of seminar (MSE 520)
- * 9 credits of elective MSE courses
- * 36 credits of MSE 800
- * Qualifying Exam
- * General Exams
- * Portfolio Review
- * Dissertation
- * Final Exam

Advising and Progress to Degree

The graduate coursework is designed to provide a higher level expertise than a BS in both core topics and specialty areas chosen by the student. This is accomplished by requiring all the students to take three required core courses (MSE 510, MSE 525, and MSE 541) and a series of elective courses. Students are also required to enroll for the department seminar series.

Graduate students are advised by their supervisory/thesis committee chair, members of the supervisory/thesis committee, and the academic counselor, each with a specific advising role. The department also maintains a Graduate Study Program book, given to each graduate student upon entry. Graduate students work closely with their committee chairs. Through this interaction, students develop a professional identity including learning how to do research, defining research problems, research supervision, data analysis and synthesis, presentation and participation in professional meetings, writing papers and reports, writing research proposals, information and advise regarding career options and help with placement.

Financial Support

Graduate students are eligible for a variety of competitive financial awards while they pursue their MSE degrees. Awards include teaching and research assistantships and a broad spectrum of internal and external fellowships. Almost all graduate students receive some financial support. Further details are on the departmental website and in the Graduate Study Program book.

Engineering Materials Option for the Master of Science

The Engineering Materials option for an M.S. in Materials Science and Engineering is a non-thesis program designed for students with substantive industrial experience who want a master's degree to further their career goals or to meet work requirements. Students selecting this degree option should be practicing materials engineers with a Bachelor of Science degree. This program contains practice-oriented courses in addition to the usual graduate core courses. In place of a research-oriented thesis, students carry out a complete analysis and develop recommended solutions to an engineering materials problem. This project is industrially oriented, undertaken at an industrial site and supervised by an experienced engineer in industry and an MSE faculty member. Written and oral final project reports are required. The Engineering Materials option is designed to be completed in one year (four quarters) for on-campus students; it is also available for part-time students through the Education at a Distance for Growth and Excellence (EDGE) program.

Course Descriptions

See page 513.

Mechanical Engineering

143 Mechanical Engineering Building

Mechanical engineering is one of the broadest and oldest of the engineering disciplines and therefore provides some of the strongest interdisciplinary opportunities in the engineering profession. Power utilization (and power generation) is often used to describe the focus of mechanical engineering. Within this focus are such diverse topics as thermodynamics, heat transfer, fluid mechanics, machine design, mechanics of materials, manufacturing, stress analysis, system dynamics, numerical modeling, vibrations, turbomachinery, combustion, heating, ventilating, and air conditioning. Degrees in mechanical engineering open doors to careers not only in the engineering profession but also in business, law, medicine, finance, and other non technical professions.

meadvise@u.washington.edu

The Department of Mechanical Engineering offers the following program of study:

- * The Bachelor of Science in Mechanical Engineering (B.S.M.E.) degree

Bachelor of Science in Mechanical Engineering

Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Regular Admission. Admission is competitive. Completion of minimum requirements described below does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision. Applications are accepted for autumn quarter only; application deadline is July 1.

Early Admission

1. Course requirements: MATH 124, MATH 125, MATH 126; 10 credits of physical science at the level of PHYS 121, PHYS 122, PHYS 123, or CHEM 142, CHEM 152, or higher; 5 credits of English composition. All courses must be completed prior to the July 1 application deadline. (T C 231 and M E 123 must be taken no later than the academic year of admission.)
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW.
3. Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Regular Admission

1. Course requirements: MATH 124, MATH 125, MATH 126, MATH 307; PHYS 121, PHYS 122; CHEM 142, CHEM 152; CSE 142; AA 210; CEE 220; M E 230; T C 231; 5 credits of English composition.
2. 65 credits completed by July 1 application deadline
3. Grade requirements: Minimum 2.0 grade in each course required for admission and minimum 2.50 cumulative GPA for all courses required for admission.

Graduation Requirements

180 credits as follows:

General Education Requirements (85 credits)

1. Written and Oral Communications: 12 credits, to include one 5-credit English composition course from the University list; T C 231; T C 333 (or department-approved alternative).
2. Visual, Literary, and Performing Arts (VLPA), and Individuals & Society (I&S) (24 credits): A minimum of 10 credits is required in each area.
3. Natural World (49 credits):
 - a. Mathematics (24 credits): MATH 124, MATH 125, MATH 126, MATH 307 (or AMATH 351), MATH 308 (or AMATH 352), MATH 309 (or AMATH 353)
 - b. Science (25 credits): CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123

Major Requirements (95 credits)

1. Engineering Fundamentals (31 credits): A A 210; CEE 220; CSE 142; E E 215; IND E 315 (or MATH 390); M E 123; M E 230; MSE 170
2. Mechanical Engineering Core Courses (45 credits): M E 323, M E 331, M E 333, M E 354, M E 355, M E 356, M E 373, M E 374, M E 395, M E 495
3. Mechanical Engineering Option Courses (19 credits)

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:*

1. Preparation for the profession. At the end of their undergraduate education, students should possess a tool chest of skills and knowledge that positions them for success as (1) entry-level engineers in existing firms, or (2) graduate students in any program in the country. This does not preclude other activities, such as volunteering, self-employment, or academic study in another discipline. Students succeed in this goal using fundamental science and engineering analysis to solve engineering problems; executing engineering designs; using project management tools; and performing effectively in teams through oral, written, and graphical communication.
2. Contribution to society. Students succeed in this goal by being able to think critically, in the sense of broadly educated individuals; perform independent, informed analysis on issues inside and outside of technology; and continue lifelong learning.

Each student's success is measured by demonstration of the following learning outcomes:

1. (a) Background in mathematics, science and engineering principles. (b) Ability to apply this knowledge to the formulation and solution of mechanical engineering problems
2. (a) Ability to design thermal and mechanical components to achieve a desired goal. (b) Ability to develop, conduct, and analyze experiments or tests that may aid in this design process.
3. Understanding of the necessary professional abilities of a practicing engineer including ethical conduct, teamwork in the pursuit of a goal, and effective communication.
4. Ability to conduct computer-based design and analysis in engineering applications.
5. Exposure to a general educational program that aids in the understanding of and increases the appreciation for the "non-technical" world
6. Realization of the business environment in which engineering is practiced
7. Awareness and necessity of continuing education, graduate study and other life long learning experiences.

Interest groups within the faculty provide instruction in four areas: design; energy and fluids; mechanics, materials and manufacturing; and systems and dynamics. Departmental thrust areas for graduate and undergraduate research include: environment; health care; information technology; and manufacturing. Several on-going senior capstone design projects provide both undergraduate and graduate students with hands-on, interdisciplinary, team-driven opportunities that encompass such diverse topics as Formula SAE car; human-powered submarine, mechatronics, and fuel cell technology.

- * *Instructional and Research Facilities:* The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department website to view faculty research areas.

- * *Honors Options Available:* With College Honors, With Distinction. See department advisers for more information.

- * *Research, Internships, and Service Learning:* The department participates in the College of Engineering Co-op Program. The Center for Career Services also lists internship opportunities.

- * *Department Scholarships:* The department offers twenty-five or more scholarships each year. Scholarship applications are available on the College of Engineering website. The deadline for scholarship applications is April 1. Sophomores may apply for scholarship consideration before being admitted to the department.

- * *Student Organizations/Associations:*
 - o American Society of Heating, Refrigerating and Air Conditioning Engineers (ASHRAE)
 - o American Society of Mechanical Engineers (ASME)
 - o Pi Tau Sigma - Mechanical Engineering Honor Society (PTS)
 - o Society of Automotive Engineers (SAE)
 - o Society of Manufacturing Engineers (SME)
 - o Society of Naval Architects and Marine Engineers (SNAME)
 - o Society of Women Engineers (SWE)

Graduate Program

Graduate Program Coordinator
143 Mechanical Engineering Bldg, Box 352600
206-543-5090
megrad@u.washington.edu

The Department of Mechanical Engineering offers graduate programs leading to the degrees of Master of Science in Mechanical Engineering (M.S.M.E.) and Doctor of Philosophy (Ph.D.). The department also provides authorized options leading to the College-wide Master of Science in Engineering (M.S.E.) degree. These degrees provide balanced combinations of formal instruction and independent research or design experience. Although there are thesis and non-thesis options for the M.S.M.E., completion of a thesis is highly recommended.

Individual projects may be drawn from a wide spectrum of topics, which include mechanical and energy conservation systems, heat transfer, combustion, fluid mechanics, applied mechanics, computational mechanics, computer-aided design and manufacturing, production systems, materials behavior, robotics, controls, vibrations, and applications of mechanical engineering science to a variety of such interdisciplinary fields as bioengineering, ocean engineering, environmental engineering, nanotechnology, micro electro-mechanical systems, and acoustics. Flexible requirements for course work provide opportunities both for a broad scientific and professional background and for specialty training.

Master of Science in Mechanical Engineering

Admission Requirements

- * *Grade Point Average:* The Graduate School requires applicants hold a GPA of at least 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework to receive consideration for admission. The Department of Mechanical Engineering prefers an overall undergraduate GPA of at least 3.20. In addition, the department prefers that Ph.D. applicants have M.S. grade point averages of 3.50 or better.
- * *Quality and difficulty of courses taken and universities and colleges attended*
- * *GRE General Test:* The Department of Mechanical Engineering requires the following minimum GRE scores: 450 Verbal (350 if English is not a native language), 650 Quantitative, and 575 Analytical. The minimum for the new Analytical Writing test is 4.0.
- * *Three letters of recommendation*
- * *Statement of purpose*
- * *Official transcripts from all colleges/universities attended*
- * *Professional experience, if applicable*
- * *English requirements for foreign nationals:* The Department of Mechanical Engineering requires TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper exam and 237 for the computer-based exam.

Degree Requirements

42 credits, as follows:

- * *Thesis option students must register for 12 credits of thesis research and 30 credits of related numerically graded coursework. Non-thesis option students must take all 42 credits in numerically graded courses.*
- * *Course grades must be 2.7 or above*
- * *At least 12 credits for the thesis option and 18 credits for the non-thesis option must be taken in 500-level mechanical engineering courses. These must include 6 credits of mathematical and engineering analysis requirements: M E 564 and M E 565.*

- * At least 3 credits of computational or numerical analysis must be taken from the following list of approved courses (or from an approved plan of individual study conducted as part of thesis research): M E 535, AA 509, A A 540, CESM 504, E E 517, AMATH 584
- * The remaining credits (18 for thesis-option students and 24 for non-thesis option students) may be from other departments, and may include a maximum of 9 credits at the 400 course level (excluding M E 498 and M E 499). Courses from other departments should be closely related to the student's overall plan, and should be drawn from the following departments: engineering departments, mathematical and computational sciences departments, physical sciences departments, or approved biological sciences departments.
- * Non-thesis option students may substitute up to 6 credits of M E 599 Special Projects (not to be confused with the class M E 599) for 6 credits of classroom courses. Permission forms for project proposals can be obtained from the Mechanical Engineering Student Services Office. The student must write a research paper under the supervision of a faculty member and the credits must be taken for a numerical grade.

Please note: For thesis-option students, special projects course like M E 599 and M E 600 do not count toward the 42-credit total unless the project is recommended by the student's faculty supervisor and pre-approved by the Graduate Program Coordinator. Seminar Requirement: All full-time students must register for a seminar course every quarter while in the Master's Program. Quarterly registration for seminars is necessary for satisfactory progress in the program, but does not count toward the 42 credits of numerically-graded coursework and thesis research required for graduation.

Doctor of Philosophy

Admission Requirements

- * Grade Point Average: The Graduate School requires applicants have a minimum GPA of 3.00 for the last 90 quarter hours or 60 semester hours of graded undergraduate coursework to receive consideration for admission. The Department of Mechanical Engineering prefers an overall minimum undergraduate GPA of 3.20. In addition, the department prefers that Ph.D. applicants have a minimum M.S. grade point averages of 3.50.
- * Quality and difficulty of courses taken and universities and colleges attended
- * GRE General Test: The Department of Mechanical Engineering requires the following minimum GRE scores: 450 Verbal (350 if English is not a native language), 650 Quantitative, and 575 Analytical. The minimum for the new Analytical Writing test is 4.0.
- * Three letters of recommendation
- * Statement of purpose
- * Official transcripts from all colleges/universities attended
- * Professional experience, if applicable
- * English requirements for foreign nationals: The Department of Mechanical Engineering requires TOEFL scores for foreign nationals whose native language is not English, with a minimum score of 580 for the paper exam and 237 for the computer-based exam.

Degree Requirements

90 credits, as follows:

- * Advisory Committee: During the first year of post-master's study, the student should select a two- to three-person Advisory Committee from the Mechanical Engineering department.
- * Coursework: All new post-master's students must successfully complete two to three graduate courses per quarter in their first year of study, as approved by the Advisory Committee. Normally this includes a sequence in advanced applied mathematics.
- * Seminar Requirement: Post-master's students register for the Mechanical Engineering seminar (M E 520), in the autumn quarter of their matriculation year. Otherwise, students are encouraged to register for engineering seminar courses offered by other UW engineering programs, i.e. M E 518, M E 523, M E 591, AMATH 501, IND E 591/IND E 592/IND E 593, MSE 520. Seminar must be taken on a quarterly basis throughout the entire Ph.D. program.
- * Research: Post-Master's students must conduct initial research in their first year of study under the direction of the Advisory Committee. This requirement applies even if the student holds a teaching assistantship.
- * Qualifying Exam: Every full-time student in the Department's Ph.D. program is required to take the examination within one calendar after entry into the program.

- * Supervisory Committee: A graduate student is not considered a doctoral student until a Supervisory Committee has been appointed by the Dean of the Graduate School. Students need to provide the name of the committee chair, Graduate School Representative (GSR), and at least two mechanical engineering faculty for approval to the Graduate Program Coordinator (GPC). This committee must be established before the end of the second year of Ph.D. study and no less than four months prior to scheduling the General Examination. This committee replaces the first-year Advisory Committee.
- * Dissertation Proposal: A dissertation proposal is prepared after the student has conducted one or two quarters of in-depth research, during which time the student should meet frequently with the Committee Chair. Submit copies of the proposal to all members of the supervisory committee prior to the exam. The proposal must be approved by the Committee Chair before being able to schedule the General Exam.
- * Dissertation Research: Registration for a minimum of 27 credits of dissertation research is required over a period of at least three quarters - and at least two quarters after the General Exam.
- * Reading Committee: The Reading Committee consists of three members drawn from the Supervisory Committee.
- * Final Exam
- * Dissertation Defense

Research Facilities

The department has well-equipped laboratories for pursuing research in various disciplinary fields in mechanical engineering and for fabricating specialized research equipment. These include experimental stress analysis; materials testing/characterization; synthesis and simulation of electromechanical control systems; foundry, welding, and other metal fabrication operations; computer facilities for CAD/CAM/CIM and CFD research; wind tunnels for boundary-layer and high-speed flow analysis; combustion systems performance, exhaust emissions control, and combustion engines; acoustics, vibration, and dynamic testing and measurements and modal analysis; radiation, conduction, and convection (including multiphase) heat-transfer analysis, and a bioengineering flow facility. Visit the department website to view faculty research areas.

Financial Aid

Financial aid is offered to full-time graduate students as funds permit. Funds, however, are limited and the assignment of assistantships and fellowships is highly competitive. This aid may be in the form of a research assistantship for sponsored programs, a fellowship provided by the University or industry, or a teaching assistantship.

Course Descriptions

See page 515.

Technical Communication

14 Loew

Technical communicators use their language, visual, and analytical skills, as well as training and research in electronic and other media, to create and enhance communication in scientific and technical environments. Technical communication prepares students to design, create, edit, and evaluate technical and scientific discourse. The department provides coursework in the development of online help systems and in the design of general-audience content for delivery by means of advanced communication technologies such as the Web.

The complexities of modern life have greatly increased the number of people who need to communicate about technical and other specialized topics. Scientific journal articles, manuals, proposals, and other genres are important for a vast array of readers. With the Information Age, gaining and sharing technological understanding and capability has become a crucial human activity. We communicate in more genres, address broader (often global) audiences, and face more complex rhetorical problems than ever before.

To achieve success in their communication activities, progressive organizations are employing sophisticated planning and development methods, including user-centered design and evaluation, content management, and systems-based analyses. In addition, they undertake research projects and apply existing research to their own needs. Contemporary research in technical communication ranges from controlled

empirical research on the processing of text, graphics, and multimedia content to observational research on how meaning is created and negotiated in business environments and virtual communities.

Other major interests include the human-computer interface, hypermedia, communications technology, the rhetoric of technical discourse, international communication, visual communication, publications and communications management, policy analysis of technological systems, and research and testing.

Undergraduate Program

Adviser
211 Engineering Annex, Box 352195
206-543-1798 or 206-616-0797
tcadvise@u.washington.edu

The Department of Technical Communication offers the following programs of study:

- * The Bachelor of Science in Technical Communication degree
- * A minor in technical Japanese

Bachelor of Science in Technical Communication

Suggested First-Year College Courses: T C 231, approved math or statistics (see list on T C Web site), approved science (see list on T C Web site)

Department Admission Requirements

Applicants are considered in two groups -- Early Admission and Upper-Division Admission. Admission is competitive. Completion of minimum requirements does not guarantee admission. All applicants have the right to petition and appeal the department's admission decision.

Early Admission

1. Course requirements: 38 credits to include 10 credits of approved mathematics or statistics; 15 credits of approved natural science; and 13 credits of approved written and oral communication (including T C 231). All courses must be completed prior to the July 1 application deadline.
2. Applicants must be currently enrolled at the UW and must have completed a minimum of 15 credits taken in residence at the UW. Application deadline is July 1 for autumn quarter only.
3. Grade requirements: Minimum 3.00 GPA in written and oral communications courses and minimum 2.00 cumulative GPA.

Upper-Division Admission

1. Course requirements: 10 credits of approved mathematics or statistics; 15 credits of approved natural science; and 13 credits of approved written and oral communication (including T C 231). All courses must be completed prior to the July 1 application deadline.
2. 60 credits completed by application deadline, which is July 1 for autumn quarter and February 1 for spring quarter.
3. Students applying in the senior year must spend a minimum of four quarters in the program.
4. Grade requirements: Minimum 3.00 GPA in written and oral communications courses and minimum 2.00 cumulative GPA.

Graduation Requirements

180 credits as follows:

General Education Requirements (93 credits)

1. Written and Oral Communications (13 credits): 5 credits of English composition from the University list; T C 231; 5 credits of oral/written communication from T C list (see adviser).
2. Visual, Literary, & Performing Arts (VLPA), and Individuals & Societies (I&S) (30 credits): A minimum of 10 credits is required in each area.
3. Math and Natural Science (50 credits):
 - a. Mathematics (minimum 15 credits; see list of qualifying courses on T C Web site)
 - b. Science (minimum 15 credits; see list of qualifying courses on T C Web site)

Major Requirements (82 credits)

1. Technical Communication Core (51 credits): T C 310, T C 400, T C 401, T C 402, T C 403, T C 407, T C 411, T C 412, T C 437, T C 493, T C 495
2. Technical/Analytical (12 credits): Must include either CSE 142 or PHIL 120.
3. Approved Electives (19 credits): Must demonstrate a coherent and relevant area of specialization.

Free Electives (5 credits)

Minor

Minor Requirements: Technical Japanese: Minimum of 25 credits to include T C 461 (5), T C 462 (5), T C 463 (5), plus 10 credits from the approved list of elective courses. For more information, contact the Technical Japanese Office, 13 Engineering Library.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The department has identified several areas of competency for students. By achieving mastery in all these areas, upon graduation TC students are well prepared to advance to careers in technical communication, apply to top graduate programs, and conduct research in the field.

Graduates are able to:

- o Understand the TC field
- o Write and edit at a professional level
- o Analyze communication situations and problems in scientific and technical settings
- o Identify and work with the major genres of technical communication
- o Use appropriate tools and technologies to develop communication solutions
- o Understand and use principles for effective display of information
- o Understand and practice effective content development
- o Manage TC projects effectively
- o Work effectively on teams
- o Be sensitive to relevant larger contexts and environments

The Department of Technical Communication prepares students to assume positions of intellectual leadership in industry, government, and non-profit organizations. Students also specialize in science writing or Web site design. The Technical Japanese program provides a unique opportunity to develop cross-cultural experience and expertise.

Whatever their professional direction, technical communication students learn the newest communication technologies and practices, the most effective information-design strategies, and the research skills appropriate to their interests. They also learn the enduring theory and principles that enable them to understand the constant changes they will encounter throughout their careers. Finally, their coursework takes place in the context of social and political issues and human needs.

- * *Instructional and Research Facilities:* Department facilities include the T C Computer Lab, Technical Japanese Computer Lab, Laboratory for Usability Testing and Evaluation (LUTE), and the Engineering/iSchool Writing Center (EiWC).

- * *Honors Options Available:* With College Honors. With Distinction. See adviser for details.

- * *Research, Internships, and Service Learning:* All Technical Communication undergraduates are required to complete at least one 3-credit internship. The supervised internship in a publications organization must be approved by the faculty adviser. As an internship substitution, students may elect to take part in a six-month co-op, sponsored by the Engineering Co-op program. Additionally, undergraduates are invited to work in research groups with TC grad students and faculty.

- * *Department Scholarships:* Annually, T C selects one recipient of a College of Engineering Scholarship. The criteria for this scholarship are the applicant's prior academic history and likelihood for success in the technical communication field. Additionally, the Society for Technical Communication (STC) offers annual scholarships open to all students enrolled in a T C-related program.

- * *Student Organizations/Associations:* Students in the Technical Communication degree program often participate in the Student Chapter of the Society for Technical Communication (STC), the Minority Science

and Engineering Program (MSEP), and Women in Science and Engineering (WISE).

Of Special Note: The T C department is a small, academic community. Students generally call their professors by their first name and have the opportunity to work individually on projects and research supervised by T C faculty. Undergraduate students are encouraged to work in research groups and to attend conferences and professional meetings.

Graduate Programs

Graduate Program Coordinator
14 Loew, Box 352195
206-543-2567
tcadvise@u.washington.edu

Master of Science in Technical Communication

Technical Communication offers a Master of Science in Technical Communication (M.S.T.C.). (An evening program is offered through UW Educational Outreach.) A total of 41 credits is required for the M.S.T.C. degree, which includes 29 credits of required T C graduate courses and 11 credits of approved electives. M.S.T.C. students may elect to pursue a master's thesis or project report with the approval of their supervisory committee.

Admission Requirements

In making recommendations for admission, the faculty consider the following from an applicant's record: (1) undergraduate GPA; (2) undergraduate degree program and work experience; (3) the Graduate Record Examination (GRE) Verbal score; (4) the Test of English as a Foreign Language (TOEFL) score (if applicable); (5) letters of recommendation; and (6) Statement of Goals and Career Objectives. A limited number of prerequisite undergraduate courses may be required.

Degree Requirements

41 credits, as follows:

The course of study must include:

- * Two courses in Theory (min. 8 cr)
- * Two courses in Research Methods (min. 8 cr)
- * Coursework in Society and Systems (min. 4 cr)
- * Coursework in New Media Design and Applications (min. 8 cr)
- * Electives (no minimum)
- * One seminar (min. 1 cr)

Students must complete the M.S.T.C. program within three years of admission; most finish within one to two years. Students who wish to propose a master's thesis (T C 700) or internship with report (T C 601) should consult with the adviser.

The required T C graduate courses include the following: T C 501 (4); T C 502 (4); T C 510 (4); either T C 516 (4) or T C 517 (4); either T C 505 (4), T C 512 (4), or T C 520 (4); T C 521 (1-2, max. 3).

Other courses that fulfill requirements in the four categories (Theory, Research Methods, Society and Systems, and New Media Design and Applications) must be approved by the student's supervisory committee chair. Courses may include coursework not only in engineering, but also in fields such as computer science, cognitive science, psychology, linguistics, behavioral science, as well as other disciplines at the UW.

Inter-Engineering Master's in Technical Japanese

The Inter-Engineering Master's in Technical Japanese is a two year inter-engineering master's degree program that combines the study of engineering and technical Japanese in a high-tech learning environment. It is the only program of its kind in the country.

Students take classes in an engineering specialty and in advanced Japanese. They spend summer quarter after their first year in Japan doing a required internship in a Japanese company or research lab. Some internships are longer. Students graduate with an Inter-Engineering M.S.E. or M.S. degree.

Applicants who do not have an engineering or other high-tech background can follow the technical communication track and graduate with the inter-engineering M.S. degree.

Admission Requirements

To be admitted, students should have at least three years of college-level Japanese language study or the equivalent. The Japanese Proficiency Test is required for all applicants and should be taken no later than two weeks before the application deadline. If applicants are unable to make arrangements to take the test before the application deadline, they need to contact the program coordinator.

Degree Requirements

54 credits, as follows:

- * *Engineering Fields:* Students must select an engineering field (usually the same as your undergraduate area of concentration) from among the following:
 - o Aeronautics and Astronautics
 - o Bioengineering
 - o Chemical Engineering
 - o Civil and Environmental Engineering
 - o Computer Science and Engineering
 - o Electrical Engineering
 - o Materials Science
 - o Mechanical Engineering
 - o Technical Communication
- * *Credit Requirements:*
 - o Distribution: 24 credits in one engineering specialty, 27 credits of coursework in Technical Japanese, and 3 credits of summer internship in Japan. Note: 3 credits of internship may be substituted for 3 credits of coursework.
 - o Technical Japanese coursework:
 - + Oral Communication in Technical and Business Settings: T C 471 (3), T C 472 (3), T C 473 (3)
 - + Reading Techniques in Technical Japanese: T C 461 (3), T C 462 (3), T C 463 (3)
 - + Advanced Japanese for Technical and Business Professionals: T C 561 (3), T C 562 (3), T C 563 (3)

Doctor of Philosophy

The goals and objectives of the T C Ph.D. program are as follows:

- * To prepare individuals for a career as researchers, teachers, and intellectual leaders in the discipline of technical communication
- * To foster the development and dissemination of new knowledge in technical communication
- * To foster the development of an international, multi-cultural perspective and a diverse, inclusive student body and workforce in technical communication
- * To invent new technical and strategic solutions to technical communication problems

By completion of the course of study, technical communication doctoral students are able to:

- * Analyze a communication situation in its full complexity
- * Select or develop an appropriate theoretical framework to motivate an understanding of the situation
- * Select an investigative method from a broad range of methods and effectively use it for conducting an inquiry.
- * Confront specific communication problems and create solutions for them that can be defended theoretically
- * Translate theory and research findings into technical or strategic inventions for solving communication design problems

Admission Requirements

Students may be admitted to the T C Ph.D. program after completing either an undergraduate degree or a master's degree in T C or a relevant field (up to 30 credits of master's work may be applied toward the 105-credit requirement). Because T C is a relatively new discipline, applicants can be expected to represent a wide range of backgrounds.

Applicants must submit the following:

- * UWTC Ph.D. admission forms
- * Official transcripts of all academic study
- * Evidence of a minimum GPA of 3.00
- * Three letters of recommendation
- * A curriculum vitae
- * A personal statement of objectives and research area of interest.

International students will also be required to submit a TOEFL test score of at least 600, obtained within the last two years.

Degree Requirements

105 credits, as follows:

- * After having completed 30 credits of coursework, pass a Preliminary Exam. (Those who do not pass the preliminary exam for Ph.D. study may proceed to finish a terminal master's degree.)
- * Select Committee Chair within two quarters of passing Preliminary Exam.
- * Successfully complete all course distribution and credit-hour requirements.
- * Successfully complete the requirements for directed research.
- * After having completed 60 credits, pass a General Examination to attain formal candidacy for the Ph.D. program (Candidate's Certificate).
- * Successfully defend a dissertation proposal before a Supervisory Committee.
- * Successfully defend the dissertation itself before a Reading Committee (Final Exam).

Students are encouraged but not required to teach; if they do teach, they are required to take the teaching seminar, T C597.

Course Distribution

The coursework exposes students to the literature and multidisciplinary perspectives of the field; the coursework requirements are distributed across four main thematic areas: theory, research methods, media design and applications, and society and systems. In their coursework, students encounter the main themes and intellectual diversity of the field and learn to reason about the claims of the main perspectives. Students use elective credits to broaden their perspectives or gain more depth in disciplines closely related to TC. The specific required core courses and other coursework requirements in the four thematic areas that all TC Ph.D. students are expected to take include the following:

- * *Theory*: Four courses that are 3 or more credits, as follows: T C 501 (4), T C 502 (4), additional approved theory courses
- * *Research Methods*: Three courses that are 3 or more credits, as follows: T C 516 (4) or T C 517 (4); additional approved research methods courses

- * *Media Design and Applications*: Three courses that are 3 or more credits, as follows: T C 510 (4), T C 511 (5), additional approved media design courses
- * *Society and Systems*: Three courses that are 3 or more credits, from the following: T C 505 (4), T C 512 (4), T C 520 (4), other approved society and systems courses

The following tables present a summary of the credit-hour requirements for the TC Ph.D., a list of courses that meet the coursework category requirements, and a sample full-time and part-time pathway.

Credit-Hour Requirements

- * 46 credits minimum of core distribution requirements
- * 12 credits of directed research (T C 596)
- * 20 credits minimum approved electives (30 credits max.)
- * 27 credits minimum dissertation

A student entering with a master's degree in Technical Communication may use up to 30 credits from that degree towards the Ph.D. requirements. These 30 credits may be applied toward the core distribution requirements or toward the elective credits, as appropriate and as approved by the graduate adviser.

Research Facilities

The Department of Technical Communication has a well-equipped computer laboratory that effectively supports its courses and research projects. In addition, there are two specialized departmental research laboratories: the Technical Japanese Lab and the Laboratory for Usability Testing and Evaluation (LUTE). An award-winning magazine, Northwest Science and Technology, is produced in the department and serves as a laboratory for science-writing students. Finally, technical communication graduate students can utilize significant College of Engineering and University-level research facilities.

Financial Aid

A limited number of teaching and research assistantships and scholarships are available for the financial support of graduate students in technical communication. More information and application forms can be obtained by contacting the department.

Course Descriptions

See page 519.

College of Forest Resources

Dean

B. Bruce Bare
107 Anderson

Associate Dean for Academic Affairs

Stephen West
123 Anderson

The College of Forest Resources, through teaching, research, and outreach, generates and disseminates knowledge for the stewardship of natural and managed environments and the sustainable use of their products and services. Its vision is to provide internationally recognized knowledge and leadership for environmental and natural resource issues.

Founded in 1907, when forestry education was in its infancy, the College holds a position of national and international leadership in both instruction and research. Its location in one of the world's largest forest regions provides students access to a unique urban-to-wild world-class laboratory in which to study the multiple dimensions of natural resource science and management. Approximately 250 undergraduate and 175 graduate students are enrolled, taught by more than 50 faculty members. Students enjoy small classes and close association with faculty, as well as the diversity and superior facilities of a large research university.

The College's programs focus on the sustainability and functionality of complex natural resource and environmental systems using an integrated, interdisciplinary approach across multiple scales involving the urban-to-wildland gradient. Its programs serve society generally, and natural resource professions in particular, with graduates well equipped to contribute to discussions and solutions to resource problems facing the region and the world. Interdisciplinary research and outreach centers and cooperatives include the Center for International Trade in Forest Products (CINTRAFOR), the Center for Water and Watershed Studies (CWWS), the Center for Urban Horticulture (CUH), the Olympic National Resources Center (ONRC), the Rural Technology Initiative (RTI), Stand Management Cooperative (SMC), Precision Forestry Cooperative, and Urban Ecology Interdisciplinary graduate program. For current information on all these centers and cooperatives, please visit www.cfr.washington.edu/research/index.html.

Facilities

The College occupies three central Seattle campus buildings: Alfred H. Anderson Hall, the Hugo Winkenwerder Forest Sciences Laboratory, and Julius H. Bloedel Hall. In addition, the Center for Urban Horticulture is located near the Union Bay natural area.

The Center for Urban Horticulture maintains a library that serves students, faculty, landscape professionals, and the public. The Center's herbarium supports fieldwork in urban horticulture, restoration ecology, and dendrology. Containing representative plant material from all parts of the United States, the collection includes dried, mounted specimens of shrubs, hardwood trees, and conifers. Another herbarium, complete in plants native to the Pacific Northwest and maintained by the Department of Biology, is available for use by the College's students.

The College's laboratory facilities represent an extensive array of modern equipment for research, including optical equipment, electronic instrumentation for a wide variety of uses, gas chromatographs, spectrophotometers, and physical-test equipment. Specific laboratories are designed to study soil chemistry and soil physics, hydrology, polymer chemistry, tree physiology, genetics, wood and extractives chemistry, physics of fibrous composites, applied mechanics, wood process technology, silviculture, ecology, paleoecology, pathology, entomology, wildlife, landscape management systems, horticultural physiology, and horticultural plant materials.

The College computing facilities include computer systems dedicated to specific research areas, a computer student laboratory, a geographical information systems (GIS) laboratory, and a local-area network with several servers offering access to the Internet and printers.

Office of Student and Academic Services

Director, Student and Academic Services
Michelle M. Trudeau
116 Anderson
cfradv@u.washington.edu

The Office of Student and Academic Services in the College of Forest Resources assists prospective students with admission to the College and advises current students, including interpretation of College and University requirements and assistance in course planning. Faculty advisers assist students in choosing elective courses to help build an appropriate academic background for their chosen specialty.

The office keeps job listings and employer resources to help students obtain summer employment and internships while in school and permanent employment upon graduation. The office also sponsors a career fair every January. Although field experience is not required for graduation, students are strongly urged to seek summer employment or field experience relevant to their career goals.

Research Programs

Areas of research are closely tied to the College's graduate programs. These include forest policy analysis; stand management; streamside and riparian zone management; forest ecosystem analysis; international trade in forest products; business, economics, and quantitative management; forest biotechnology; wildlife science; forest soils; urban and environmental horticulture; forest engineering; hydrology; and paper science and engineering.

Outreach Programs

The College, through its interdisciplinary centers and through collaboration with Cooperative Extension of Washington State University, undertakes and promotes continuing public and professional education for citizens of the state.

Field Facilities

College field facilities include two major forested areas covering more than 4,000 acres, an arboretum, a natural area, and several cooperative research centers and stations. These lands offer a wide variety of terrestrial and aquatic characteristics favorable to a full range of scientific investigations. They also provide a natural-science laboratory for the many disciplines in the College concerned with the research and teaching of natural resources science and management.

The 4,200-acre Charles Lathrop Pack Experimental Forest is located 65 miles south of the University, near Eatonville, Washington. Broad forest and soil diversity in this area has led to extensive biological, management, and engineering research. A full-time resident staff manages this facility, harmonizing its public-education objectives with academic and research objectives. Rustic but comfortable facilities which provide housing and support to research programs are also used extensively for conferences both within and outside the University. The College is establishing a new Center for Sustainable Forestry at Pack Forest to be charged with discovering, teaching, and demonstrating the concepts of sustainable forestry, with special emphasis on the College's strategic themes of sustainable forest enterprise and sustainable land and ecosystem management in an urbanizing world.

The Olympic Natural Resources Center (ONRC) is a 19,000-square-foot research and education facility located on the west side of the Olympic Peninsula. The mission of the center is to conduct research and education on natural-resources management practices which integrate ecological and economic values. Innovative management methods that integrate environmental and economic interests into pragmatic management of forest and ocean resources are demonstrated. A forest management program as well as a marine program are in place to study the relationship between the terrestrial and marine environment.

The Wind River Canopy Crane is a 250-foot research crane set in old-growth forest canopy in southwestern Washington state. It is the largest canopy crane in the world and the first in a temperate forest. A research partnership between the College of Forest Resources and the U.S. Forest Service, it provides graduate students and faculty opportunities for on-site research and field trip opportunities for undergraduates.

The Lee Memorial Forest, approximately 160 acres, is located about 22 miles northeast of the University, near Maltby. This forested property provides valuable academic and research opportunities near the campus. Characterized by forest types and soils common to western Washington lowlands, Lee Forest is used extensively for short field trips and for long-

term research and demonstration projects especially related to changing land uses.

The Allan E. Thompson Research Center and the Joe E. Monahan Findley Lake Reserve and Research Area in the Cedar River watershed are utilized by the College in cooperation with Seattle Public Utilities for studies in forest physiology and mineral cycling in the forest ecosystem.

The Center for Urban Horticulture has offices, laboratories, public-education resources, and field sites for teaching and experimentation along the shore of Union Bay. Its 10-acre Union Bay Gardens emphasize unusual ornamental and native woody landscape plants. The 60-acre Union Bay Natural Area, a former dumpsite now a naturalized habitat, is used by University classes and the public to study principles and practices of restoration ecology. The Douglas Research Conservatory is a modern plant-growing facility with greenhouses, growth chambers, nursery, and classrooms. The Otis Douglas Hyde Hortorium is an herbarium dedicated to plants of urban horticultural significance. The Miller Seed Vault stores seeds of Washington's rare and endangered native plants in support of restoration and research projects. The Elisabeth C. Miller Horticultural Library is the Northwest's foremost public horticultural library, with books, journals, and other materials available to the gardening public, students, and professional horticulturists. The Center also conducts courses, lectures, and special events for the public and professionals as part of the College's outreach program. Cooperative programs are in place with Washington State University/King County Cooperative Extension, whose horticulture program is housed at the Center.

The Center for Urban Horticulture's largest facility is the Washington Park Arboretum, a 230-acre collection of trees and shrubs in a naturalistic setting on the south shore of Lake Washington. Managed in cooperation with the City of Seattle Department of Parks and Recreation, the arboretum contains some 5,200 different kinds of woody plants that are available for research and academic study, making it the third most diverse arboretum in the United States. Displays and programs educate students and visitors about woody plants' diversity, natural ecology, and urban landscape use, as well as conserving endangered natural and cultivated plants. Classes in botany, dendrology, horticulture, wildlife, and landscape architecture make use of the collections, while the grounds are used for studies in soil science, ecology, and various research projects, including many independent student projects. The arboretum, established in 1934, also serves as an important public-service area to the University, offering numerous formal and informal classes for the general public and, in addition, serving the community as a public park and open space.

Undergraduate Program

Adviser
116 Anderson
206-543-3077
cfradv@u.washington.edu

The College of Forest Resources offers the following programs of study:

- * The Bachelor of Science in Forest Resources degree with a major in environmental science and resource management.
- * The Bachelor of Science in Forest Resources degree with a major in paper science and engineering. Paper science and engineering has ABET accreditation which is recognized by the Council on Postsecondary Accreditation and the U.S. Department of Education as the accrediting agency for engineering in the United States.
- * Minors in environmental science and resource management; and streamside studies.

Bachelor of Science in Forest Resources

Suggested First- and Second-Year College Courses:

- * *Environmental Science and Resource Management:* T C 231, ENGL 131 (or other 5-credit English composition course); COM 220; BIOL 161-BIOL 162; CHEM 120, CHEM 220; any 5-credit VLPA course; MATH 120 or Q SCI 291; ESRM 210.
- * *Paper Science and Engineering:* CHEM 142, CHEM 152, CHEM 162, CHEM 237, CHEM 238; ECON 200; ENGL 131 (or other 5-credit English composition course); CHEM E 260; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123; Q SCI 381; PSE 201, PSE 202, and PSE 450.

Department Admission Requirements

- * *Environmental Science and Resource Management:* Students in good academic standing may declare this major at any time.
- * *Paper Science and Engineering:* Students may apply for freshman admission or upper-division admission. Applications are available in Student and Academic Services, 116 Anderson, or through the College of Engineering, 356 Loew, or by visiting the College Web site. Departmental deadlines are July 1 for autumn quarter, October 15 for winter quarter, and January 15 for spring quarter. Admission is competitive; completion of requirements does not guarantee admission.

Graduation Requirements

Environmental Science and Resource Management

180 credits as follows:

1. General Education Requirements (65-66 credits)
 - a. Written Communication (12 credits): 5 credits English composition (ENGL 131 preferred); minimum 7 additional credits of writing-intensive coursework to include T C 231; and T C 333 (or equivalent).
 - b. Quantitative and Symbolic Reasoning (20 credits): Q SCI 291, Q SCI 292, Q SCI 381; ESRM 250.
 - c. Natural World (23-24 credits): BIOL 161 and BIOL 162, or BIOL 180 and BIOL 200; CHEM 120 and CHEM 220, or CHEM 142 and CHEM 152; ESC 210 or ESC 311.
 - d. Visual, Literary, & Performing Arts (VLPA) (10 credits): COM 220; 5 additional credits from the University VLPA list.
 - e. Individuals & Societies (I&S): 10 credits required, all of which are satisfied by core courses shown below.
2. Major Requirements (55 credits)
 - a. Core Courses (20 credits): ESRM 301, ESRM 302, ESRM 303, ESRM 304.
 - b. Restricted Electives (35 credits): 300- or 400-level courses from within the College of Forest Resources. 15 of the 35 credits must be at the 400 level. See College Web site for possible pathways.
 - c. Free electives: As needed to bring minimum total to 180 credits.

Paper Science and Engineering

1. General Education Requirements (91 credits)
 - a. Written Communication (8 credits): 5 credits English composition (ENGL 131 preferred); T C 231 (3 credits). (Additional 5 credits satisfied by PSE courses shown below.)
 - b. Mathematics and Statistics (23 credits): MATH 124, MATH 125, MATH 126, MATH 307; Q SCI 381 or STAT 311.
 - c. Supporting Sciences: (43 credits): CHEM 142, CHEM 152, CHEM 162; CHEM 237, CHEM 238; CHEM E 260; PHYS 121, PHYS 122, PHYS 123.
 - d. Visual, Literary, & Performing Arts (VLPA) (10 credits): Chosen from the University VLPA list.
 - e. Individuals & Societies (7 credits): ECON 200; 2 credits from the University I&S list; (3 additional credits satisfied by required PSE courses.)
2. Major Requirements (64-65 credits)
 - a. Chemistry and Chemical Engineering (18 credits): CHEM 455; CHEM E 310, CHEM E 330, CHEM E 340, CHEM E 436.
 - b. Paper Science Courses (46-47 credits): PSE 201, PSE 202, PSE 248, PSE 402, PSE 404, PSE 406, PSE 450, PSE 476, PSE 477, PSE 478, PSE 479, PSE 480, PSE 481, PSE 482, PSE 487, PSE 497. All required PSE courses must be completed with at least a 2.0 grade.
 - c. Electives
 - i. Technical Electives or Business Option (12 credits minimum).
 - ii. Free electives to bring minimum total to 180 credits.

Minors

Environmental Science and Resource Management

Minor Requirements: Minimum 25 ESRM credits, 20 of which must be upper division. A maximum of 5 credits from PSE courses allowed.

Streamside Studies

Minor Requirements: Minimum 28 credits with a grade of at least 2.0 in each course:

1. Core courses: ESS 101, ESS 210, ESS 230, ESS 326 or ESS 401; ESRM 303 or BIOL 356; F E 425 or CEE 476; and FISH 312 or FISH 450

2. 3 credits of ESRM/FISH 429
3. 10 credits from one of the following thematic areas:
 - a. Physical Processes: ATM S 301, ATM S 321, CEE 350, CEE 366, CEE 462, CEE 474, CEE 485, ENVIR 313/ESS 315, ESC 210, ESC 311, and ESS 426.
 - b. Ecological Processes: BIOL 472, BIOL 473, BIOL 474, CEE 461, ESC/BIOL 333, ESC 441, ESC 450, FISH 454, F M/FISH 328, FISH 311, FISH 312, FISH 323, FISH 428, FISH 430, FISH 450, FISH/Q SCI 456, FISH/BIOL 438, EHUF 473, EHUF 475, and F M 425.
 - c. Social Processes: ANTH 457, ESRM 400, ECON 435, F M 271, F M 464, ESRM 470, GEOG 370, and ENVIR 418.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Forest resources emphasizes interactions between biotic and human systems at landscape to regional scales. It also provides a knowledge base to answer critical questions about how individual organisms and biotic systems respond to perturbations and stresses imposed by human activities, as well as how the environment affects human behavior and institutions. This knowledge enables the design of methods for the conservation, restoration, and sustainable use of biotic systems, and is critical for environmental decision making.

The goal of the paper science and engineering curriculum is to provide students with the training, tools, and experiences needed to be successful professionals in the pulp, paper, and allied industries. At the same time, it provides a comprehensive education so graduates can effectively work and live in the world's complex society.

The goal of the environmental science and resource management curriculum is to present fundamental knowledge and problem-solving experiences that enable students to understand the interdisciplinary dimensions of natural resource and environmental sciences and management. The structure of this curriculum provides great flexibility for students to pursue specialized fields such as wildlife conservation, wildlife ecology, urban ecology, sustainable forest management, wildland ecosystem conservation and management, restoration ecology, and environmental horticulture, or to construct a broader educational package to fit their educational goals.

Career opportunities abound in the area of environmental science and resource management in both private and public sectors. One example is the projected need in the U.S. Forest Service, where it is estimated that one-third of the workforce will be retiring within the next five years.

- * *Instructional and Research Facilities:* See the main College page for details.
- * *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See adviser for requirements, or link to www.cfr.washington.edu/acad/undergrad/honors.htm

Research, Internships, and Service Learning: The Office of Student and Academic Services regularly receives internship announcements, which are forwarded on to all CFR students via email and placed in the office's Career Corner. Students are strongly encouraged to pursue these opportunities, which include work experience with federal, state, and private organizations in environmental science, forestry, engineering, conservation, wildlife, horticulture, and other related fields.

Undergraduate research opportunities are available to students. Please contact faculty members in your area of interest. There are also foreign study and field opportunities within the College. Some are formal study with faculty members, others are through other agencies. Contact the Office of Student and Academic Services for more information.

- * *Department Scholarships:* The College of Forest Resources has a strong scholarship program for majors which provides in-state tuition to students, based on merit or need. Application information can be found at www.cfr.washington.edu/Acad/Scholarship.htm.

The Washington Pulp and Paper Foundation provides scholarships for students enrolled in the Paper Science and Engineering curriculum. For information about these scholarships, contact Professor William McKean, 318 Bloedel.

- * *Student Organizations/Associations:* The College has student organizations which organize student symposia, field trips, parties, slide shows and talks, public service projects, and other social activities. Current CFR

student organizations can be found at www.cfr.washington.edu/Acad/clubs.htm.

Of Special Note: Some college classes include field trips or require laboratory supplies or material duplication at student expense.

Graduate Programs

Graduate Program Coordinator
116 Anderson, Box 352100
206-543-7081
cfradv@u.washington.edu

Graduate programs in forest resources are designed to accommodate a wide range of education and career objectives. A student may concentrate on development of advanced professional skills and knowledge or on exploration of forest-related science.

Graduate programs offered in forest resources lead to the degrees of Master of Forestry, Master of Environmental Horticulture, Master of Science, and Doctor of Philosophy. Graduate students may center their graduate study in one of the special fields of study within the College divisions.

Master of Environmental Horticulture

Admission Requirements

- * Evidence of academic readiness for the program.
 - o Minimum GPA of 3.00 in last 60 semester or last 90 quarter hours.
 - o Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
 - o Scores on the GRE (550-Verbal, 600-Quantitative, 5.0 Writing recommended).
 - o International applicants only: Minimum TOEFL score of 580 (237 for computer based test).
- * Evidence of knowledge of the intended area of study.
 - o Clearly-written statement of objectives in pursuing further education.
 - o Work or field experience in the planned area of study.
 - o Publications written by the student related to the planned area of study.
- * Supporting evidence from reference persons.
 - o Recommendation from references familiar with applicant's academic ability and potential.
 - o Letters of recommendation from employers in field related to applicant's educational goals.

Degree Requirements

45 credits, as follows:

- * CFR 500 (1), CFR 503 (6), CFR 549 (2), CFR 561 (2), ESRM 411 (3), ESRM 451 (5), ESRM 480 (5), ESRM 481 (2); one course in policy, planning or administration (3 credits)
- * Internship/independent research: A formal public presentation and written professional paper are required. A member of the EHUF faculty will advise the student on his/her project, which will be completed as CFR 601 (9 credits minimum)
- * Electives (14 credits)

Master of Forestry

Admission Requirements

- * Evidence of academic readiness for the program.
 - o Minimum GPA of 3.00 in last 60 semester or last 90 quarter hours.
 - o Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
 - o Scores on the GRE (550-Verbal, 600-Quantitative, 5.0 Writing recommended).
 - o International applicants only: Minimum TOEFL score of 580 (237 for computer based test).
- * Evidence of knowledge of the intended area of study.
 - o Clearly-written statement of objectives in pursuing further education.
 - o Work or field experience in the planned area of study.

- o Publications written by the student related to the planned area of study.
- * Supporting evidence from reference persons.
 - o Recommendation from references familiar with applicant's academic ability and potential.
 - o Letters of recommendation from employers in field related to applicant's educational goals.

Degree Requirements

45 credits, as follows:

- * CFR 500 (1), CFR 509 (3), CFR 526 (3)
- * Directed electives: 24 credits distributed among the following four areas, with at least two classes required in each area: Forest biology/ecology, forest management, forest measurements, forest policy and administration. See adviser for list of approved courses for each area.
- * Unrestricted electives: 12 credits
- * Capstone project: CFR 600 (5) or CFR 601 (5)

Master of Science

Admission Requirements

- * Evidence of academic readiness for the program.
 - o Minimum GPA of 3.00 in last 60 semester or last 90 quarter hours.
 - o Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
 - o Scores on the GRE (550-Verbal, 600-Quantitative, 5.0 Writing recommended).
 - o International applicants only: Minimum TOEFL score of 580 (237 for computer based test).
- * Evidence of knowledge of the intended area of study.
 - o Clearly-written statement of objectives in pursuing further education.
 - o Work or field experience in the planned area of study.
 - o Publications written by the student related to the planned area of study.
- * Supporting evidence from reference persons.
 - o Recommendation from references familiar with applicant's academic ability and potential.
 - o Letters of recommendation from employers in field related to applicant's educational goals.

Degree Requirements

45 credits, as follows:

- * Orientation: CFR 500 (1)
- * Social and Natural Sciences Applied to Natural Resource and Environmental Issues: CFR 509 (3)
- * Disciplinary Knowledge: minimum 10 credits from list of approved courses according to interest area
- * Research Design and Quantitative Analysis: minimum 8 credits from list of approved courses according to interest area
- * Current Topics: 2 credits (500 level), topics vary from year to year
- * Thesis Research: CFR 700 (9 credits minimum)

Current interest groups are:

- * Environmental Horticulture and Urban Forestry
- * Forest Ecology
- * Forest Soils
- * Forest Systems and Bioenergy

- * Paper Science and Engineering
- * Restoration Ecology
- * Social Sciences
- * Sustainable Resource Management
- * Wildlife Science.

Doctor of Philosophy

Admission Requirements

- * Evidence of academic readiness for the program.
 - o Minimum GPA of 3.00 in last 60 semester or last 90 quarter hours.
 - o Type and level of courses completed (generally, students are not admitted if their academic performance has been below average or they do not have sufficient course background in their intended program of study).
 - o Scores on the GRE (550-Verbal, 600-Quantitative, 5.0 Writing recommended).
 - o International applicants only: Minimum TOEFL score of 580 (237 for computer based test).
- * Evidence of knowledge of the intended area of study.
 - o Clearly-written statement of objectives in pursuing further education.
 - o Work or field experience in the planned area of study.
 - o Publications written by the student related to the planned area of study.
- * Supporting evidence from reference persons.
 - o Recommendation from references familiar with applicant's academic ability and potential.
 - o Letters of recommendation from employers in field related to applicant's educational goals.

Degree Requirements

90 credits, as follows:

- * Same as for Master of Science degree (above) with one additional course in each of the categories:
 - o Disciplinary Knowledge
 - o Research Design and Quantitative Analysis
 - o Current Topics
- * Qualifying examination
- * General examination
- * Dissertation research: CFR 800 (27 credits minimum)
- * Final examination

Financial Assistance

The College has a limited number of appointments for teaching and research assistantships that provide a stipend, tuition waiver, and benefits. Teaching and research responsibilities are half-time, allowing time to pursue a full academic load. Students may contact faculty about research assistantships.

Fellowships without teaching or research obligations are also available. Requests for consideration must be submitted by January 15 for the following academic year. Applications are in the College's admissions packet which may be requested from the Office of Student and Academic Services.

Course Descriptions

See page 522.

The Information School

370 Mary Gates Hall
Box 352840

Dean
Harry Bruce

Associate Dean
Harry Bruce
Joseph Janes

The Information School is dedicated to preparing individuals for professional careers and leadership roles in the information professions. The School embraces a wide range of academic interests reflected in its main academic degree areas: information science, library science, information management, and informatics. Graduates of the School assume a variety of professional roles in the public and private sectors, with positions that span from information architects to children's librarians, from Web developers to information technology (IT) managers.

The signature of the School is its "human-centered" approach to information studies and technology. This focus holds the human perspective as a critical and integral component in the study of information and technology; it encourages increasing understanding of human involvement with information and its social and technological ramifications.

Through its specific goals and objectives in instruction, research, service, and outreach, the School creates and continues to foster a dynamic learning environment dedicated to preparing its students for emerging opportunities and challenges of the twenty-first century.

The School offers four degree programs leading to the Bachelor of Science in Informatics, the Master of Library and Information Science (MLIS), the Master of Science in Information Management (MSIM), and the Doctor of Philosophy in Information Science. The School also provides certificate programs, continuing education opportunities for professionals as well as service courses for undergraduates in information fluency, research strategies, and technology.

History

Originally established in 1911, the Information School has the oldest library and information program west of the Mississippi, and continues to offer the most extensive American Library Association-accredited library and information science degree in the Northwest region of the United States.

In 1998, the University set out to transform the School by charging it with a new mission, to become what it is today: a broad-based information school that meets the challenges and opportunities of the information age. With the addition of three new degree programs, a new dean, an esteemed faculty, and state of the art facilities, the Information School became the University's sixteenth independently organized school/college in 2001.

The School seeks to explore the theoretical and applied cutting edges of the information field and to nurture the best of both worlds: traditional library values and ever-changing information frontiers.

The vision statement adopted by the School is "People and Knowledge: Building Information Connections. The faculty, staff, students and alumni of the Information School believe that connecting people with knowledge is of fundamental individual and societal importance; further, we believe access to information is a basic human right. We commit ourselves to sustain this vision."

Undergraduate Program

Informatics refers to the study of information systems and technology from a human perspective. It features the Information School's emphasis on a human-centered approach to systems design.

Informatics students study a range of information constructs, from simple systems that support personal information management to complex systems that involve vast databases of distributed information manipulated in real-time by high-speed computer technologies. They analyze national and global information policy, the management of formal information systems in organizations, and the subtleties of everyday information behavior. Also, they invent methods for representing, classifying, and retrieving information and design new information systems responsive to people's needs and values.

Adviser
470 Mary Gates Hall
Box 352840
206-543-1794
informatics@ischool.washington.edu

Bachelor of Science

Suggested First- and Second-Year College Courses: INFO 100, an English composition course (selected from the University list), CSE 142, CSE 143, and STAT 311, courses that develop strong analytical, qualitative and quantitative reasoning, and written and oral communication skills as well as courses that provide exposure to a variety of social science fields.

Program Admission Requirements

Regular Admission

1. INFO 100 (5 credits), CSE 142 (4) and CSE 143 (5), STAT 311 (5); one English composition course selected from the University list (5), with a minimum grade of 2.0 in each course. Departmentally approved transfer equivalents may be used to substitute for prerequisite courses. (Students may not receive credit for INFO 100 taken after CSE 142. Therefore, INFO 100 will be waived for students who have already completed CSE 142 or equivalent. If INFO 100 is waived, students make up the 5 credits by taking additional elective credits in the major.)
2. Minimum 2.00 cumulative college GPA.
3. Admission is competitive, based on the following criteria:
 - a. Overall academic performance
 - b. Grades in courses required for admission to the major
 - c. Personal statement reflecting an interest in and commitment to becoming a major in this field
 - d. Other evidence of interest and commitment to the field (e.g., work experience, internships).
4. Application deadline is April 15. Students apply online at www.ischool.washington.edu between February 1 and April 15. Admission is for autumn quarter only.
5. Transfer students should contact the Information School as soon as they become interested in the informatics major. The School will consider courses equivalent to CSE 143 and may allow a student to be admitted provisionally on the condition that the student completes CSE 143 or equivalent with a minimum grade of 2.0 during the summer before matriculating in the program.

Meeting the above criteria does not guarantee admission.

Freshman Direct Admission Program (FDAP)

1. Designed to recruit top high school students to the program and to the UW. Students who indicate an interest in the Informatics program are automatically considered for FDAP participation upon application to the UW. They are evaluated based on careful review of qualitative and quantitative factors, including high school GPA, SAT scores, personal statement, and any additional information provided in their application file. Students selected for FDAP are involved in the academic and social life of the Information School, participating in courses, activities, and research opportunities as appropriate during their freshman and sophomore years.
2. The number of early admission (FDAP) students will not exceed 10% of the number of majors admitted each year.

Major Requirements

92 credits as follows:

1. Courses required for admission to the program (24 credits, as shown above)
2. Human Centered Strand (20 credits): INFO 310, INFO 311, INFO 320, and INFO 380
3. Technical Strand (13 credits): CSE 373, INFO 340, and INFO 341
4. Integrated Strand (23 credits): INFO 300, INFO 370, INFO 440, and INFO 490 or INFO 491
5. Major Electives (12 credits minimum) selected from upper-division electives from the Information School and approved courses from outside departments.

General Education: Beyond the 92 credits required for the major, students must also satisfy the following:

- * English composition (5 credits)
- * Quantitative/Symbolic Reasoning (5 credits)
- * Writing courses (10 credits)
- * Natural World (20 credits)
- * Individuals & Societies (20 credits)
- * Visual, Literary, & Performing Arts (20 credits)

With courses required for the major, students automatically satisfy requirements for English composition (pre-admission English composition requirement), Quantitative/Symbolic Reasoning (STAT 311), Writing (INFO 310, INFO 311, and INFO 320), and Natural World (CSE 142, CSE 143, and INFO 340, INFO 341, and INFO 440). In addition, students satisfy a good portion of the requirements for Individuals & Societies (INFO 310, INFO 311, and possible electives). They satisfy requirements for Visual, Literary, and Performing Arts by taking courses outside the major. (INFO 424, an elective in the major, also counts towards the VLPA requirement.) Students must earn a minimum 180 credits to graduate.

Continuation Policy

Students are expected to make satisfactory progress towards attainment of the Bachelor of Science in Informatics degree. Under normal circumstances, an informatics major attending full-time would make satisfactory progress by completing the major requirements in approximately two years after admission to the major, or within three years for students admitted to the major as sophomores. Lack of academic progress may be evidenced by low scholarship as well as excessive course repeats, course drops, or University withdrawals and cancellations. For more details, see adviser.

Student Outcomes

- * **Learning Objectives and Expected Outcomes:** The Informatics program prepares students for a wide range of endeavors in the information field including information management and technology, research and information services, interactive system design, human-computer interaction, and information science.

Graduates of the Informatics program are qualified for jobs in the information and technology industry and in business, public service, and other various professions. Possible job titles include security and performance analyst, web developer, information management specialist, network administrator, product developer, business analyst, usability engineers, and many others.

The program also provides strong preparation for graduate studies. Graduates are successfully placed in prestigious graduate schools and pursue a variety of programs, including information and management science, information science, biomedical informatics, business and accounting, and information technology.

Informatics student learning outcomes include the ability to assess people's information needs and behavior; ability to design information systems to meet people's information needs; ability to work with information technologies (e.g., database, networks, Internet-based, interface design); ability to evaluate the impact of information technologies on people; ability to communicate effectively in writing and speaking; ability to work effectively individually and as part of a team; and ability to understand the research process and its implication for information systems design and use. All Informatics courses are designed to produce these outcomes through a rigorous experiential learning approach that emphasizes group work, research, writing, oral presentations, and technology.

- * **Instructional and Research Facilities:** Located on the third and fourth floors of Mary Gates Hall, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, web page creation, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services. The TE Lab is a unique facility that includes twenty-four student stations and thirty-two servers on a "server wall." The lab is designed to promote exploration of a variety of technologies. Students can install alternative operating systems, set up their own file, Web, or database server, and become the system administrator of their machines.

To promote strong academic and professional writing skills, the School hosts the Engineering iSchool Writing Center (EiWC) in collaboration with the College of Engineering.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 10,000 square feet of offices, workstations, research labs, and meeting spaces.

- * **Honors Options Available:** With College Honors; With Distinction (Departmental Honors). See adviser for requirements.
- * **Research, Internships, and Service Learning:** Internships are encouraged, but not required. Students participate in a variety of internships, paid and non-paid. A significant number of students also work part-time in Informatics or technology-related positions, and participate in public service.
- Informatics students are extensively engaged in faculty research and internships. Over half of all informatics students participate in the University's Undergraduate Research Symposium each year. Students have co-authored publications with faculty, had their research accepted for presentation at national conference poster sessions, and been recognized with various awards, including the Mary Gates Research Training Endowment for three consecutive years (2001-03).
- * **Departmental Scholarships:** The Henry Scholarships, in the amount of approximately \$1500 each, are awarded to three second-year majors in recognition for academic achievement, leadership, and service to the School and in professional/student activities. Students to be considered for the award are nominated by the Information School faculty and Undergraduate Program Committee members. The merit-based awards, named after the founder of the school and first director, William Henry, are intended to recognize and honor student achievement.

- * **Student Organizations/Associations:** Undergraduates participate in a number of the School's many student organizations, including the UW Informatics Undergraduate Association (IUGA) and the student chapter of the American Society of Information Scientists and Technology (ASIST).

Of Special Note:

Capstone Projects: Students often use their capstone projects to identify interest areas, develop skills, and prepare for future pursuits. The capstone projects, with titles such as "Making Environmental Policy: Human Centered Analysis of Knowledge Sharing Between Cross-Functional Groups" and "Project Management in an Open Source Developing Community," encompass a wide range of topics. Through capstone projects, students demonstrate the skills, understandings, and competencies they can successfully use to prepare for employment and graduate studies.

Information Sessions: Prospective students are encouraged to attend an Informatics information session. For a schedule of information sessions, visit the Web at www.ischool.washington.edu/informatics/infosessions.htm.

Graduate Programs

Graduate Program Coordinator
370 Mary Gates Hall, Box 352840
206-543-1794
info@ischool.washington.edu

The School offers graduate programs leading to the Master of Library and Information Science (M.L.I.S.), the Master of Science in Information Management (M.S.I.M.), and the Doctor of Philosophy in Information Science.

Master of Library and Information Science

Admission Requirements

Note that the MLIS program is offered in two delivery modes: residential (on-campus, 2 year program) and distance (online with quarterly residencies, 3 year program). When applying applicants must indicate for which program they are applying.

- * Work experience related to the library and information professions, including employer, position title, and dates of employment. List other types of employment experience

- * Involvement with volunteer, community, and/or diversity-related activities, including the organization, position title, and dates of service
- * Relevant honors, awards, publications, and presentations
- * Three letters of recommendation
- * Personal statement of educational and professional goals (500-750 words)
- * Official transcript from each relevant institution attended
- * GRE Scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE scores.
- * TOEFL score (for international students)
- * Signed paper copy of UW Graduate School application

Degree Requirements

63 credits, as follows:

- * Core curriculum (34 credits): LIS 500 The Life Cycle of Information (2), LIS 510 (4), LIS 520 (4), LIS 530 (4), LIS 540 (5), LIS 550 (4), LIS 560 (3), LIS 570 (4), LIS 580 (4)
- * Electives (29 credits)
- * Portfolio or Thesis Option: MLIS students must complete either a portfolio or thesis in order to graduate.
- * Directed Fieldwork: LIS 590 (2-4, max. 8) is an elective course designed to provide students with an opportunity to work in an information environment under the supervision of an experienced professional mentor.

Master of Library and Information Science, Law Librarianship

The Law M.L.I.S. program is designed to prepare lawyers with an existing JD degree to serve as law librarians in courts, federal and state units of government, law schools, corporations, and law firms.

Admission Requirements

- * Work experience related to the library and information professions, including employer, position title, and dates of employment. List other types of employment experience
- * Involvement with volunteer, community, and/or diversity-related activities, including the organization, position title, and dates of service
- * Relevant honors, awards, publications, and presentations
- * Three letters of recommendation
- * Personal statement of educational and professional goals (500-750 words)
- * Official transcript from each relevant institution attended
- * GRE Scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE scores.
- * TOEFL score (for international students)
- * Signed paper copy of UW Graduate School application

Degree Requirements

44 credits, as follows:

- * Core curriculum (23 credits): LIS 500 (2), LIS 510 (4), LIS 520 (4), LIS 530 (4), LIS 540 (5), LIS 550 (4)
- * Law librarianship courses (17 credits): LIS 591 (3), LIS 592 (3), LIS 593 (3), LIS 594 (4), LIS 595 (4)
- * Directed fieldwork: LIS 590 (4)

Master of Science in Information Management

Admission Requirements

- * Work experience related to the library and information professions, including employer, position title, and dates of employment. List other types of employment experience
- * Involvement with volunteer, community, and/or diversity-related activities, including the organization, position title, and dates of service
- * Relevant honors, awards, publications, and presentations
- * Three letters of recommendation
- * Personal statement of educational and professional goals (500-750 words)
- * Official transcript from each relevant institution attended
- * GRE Scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE scores.
- * TOEFL score (for international students)
- * Signed paper copy of UW Graduate School application

Degree Requirements, Day Option

65-71 credits, as follows:

- * Core curriculum:
 - o Foundational core courses: IMT 480 (4), IMT 440 (1-5, max. 5), IMT 500 (1)
 - o Technology core courses: IMT 540 (4), IMT 541 (5), IMT 542 (3)
 - o Management core courses: IMT 580 (4), IMT 581 (3), IMT 582 (4)
 - o Integrating core courses: IMT 598 (3), IMT 595 (3-5)
- * Electives (24 credits): Beyond the required core courses, students have the option of crafting a program of study, in collaboration with their faculty adviser, specific to their interests and career goals. MSIM course electives include, among others, principles of information retrieval systems, strategic planning and evaluation, and marketing foundations for information professionals.
- * Internship: MSIM internships are structured around a course (IMT 590) and are designed to provide students with an opportunity to work in an information environment under the supervision of an experienced professional mentor. During the internship placement (lasting a minimum of two academic quarters), the student works to meet meaningful learning objectives that have been mutually defined by student and internship supervisor.

Degree Requirements, Executive Option

47-53 credits, as follows:

- * Core curriculum:
 - o Foundational core courses: IMT 480 (4), IMT 440 (1-5, max. 5), IMT 500 (1)
 - o Technology core courses: IMT 540 (4), IMT 541 (5), IMT 542 (3)
 - o Management core courses: IMT 580 (4), IMT 581 (3), IMT 582 (4)
 - o Integrating core courses: IMT 598 (3), IMT 595 (3-5)
- * Electives: Students complete a minimum of 11 credits of electives, which includes advanced M.S.I.M. courses, relevant upper level coursework in other academic disciplines, or an Independent Study (IMT 600).

Doctor of Philosophy in Information Science

Professor Wanda Pratt
370 Mary Gates Hall
206-543-1794
phd@i.school.washington.edu

Admission Requirements

- * Work experience related to the library and information professions, including employer, position title, and dates of employment. List other types of employment experience
- * Involvement with volunteer, community, and/or diversity-related activities, including the organization, position title, and dates of service
- * Relevant honors, awards, publications, and presentations
- * Three letters of recommendation
- * Personal statement of educational and professional goals (500-750 words)
- * Official transcript from each relevant institution attended
- * GRE Scores. Applicants with an earned doctorate (Ph.D., M.D., J.D.) are not required to submit GRE scores.
- * TOEFL score (for international students)
- * Signed paper copy of UW Graduate School application

Degree Requirements

90 credits minimum, as follows:

- * Required courses: INSC 501 (3), INSC 570 (4), INSC 572 (5), INSC 500 (2); two research practica; two teaching practica; at least one of the following quantitative methods courses: BIOST 502 (4), BIOST 517 (4), COM 520 (5), CS&SS 507 (3), PSYCH 524 (4)
- * Additional elective coursework selected in consultation with the faculty advisers
- * 18 graded credits in courses at the 500 level and above (taken prior to General Exam)
- * 60 credits taken prior to General Exam
- * 27 dissertation credits (INSC 800)
- * Preliminary Review determined by a School-based Advisory Committee at the end of the required first-year of full-time study

- * General Examination upon completion of coursework and practica components to attain formal candidacy for the Ph.D. program (Candidate's Certificate)
- * Successfully defend a dissertation before a Supervisory Committee (Final Examination)

Financial Aid

The University of Washington Financial Aid Office administers a variety of government and University funded financial aid programs for which applicants must submit the Free Application for Federal Aid form (FAFSA). For more information, contact the UW Financial Aid Office, 105 Schmitz Hall. Information on the FAFSA is also available online.

Graduate Assistantships and Scholarships

Financial aid options for full-time students may include graduate assistantships and scholarships. Graduate assistants generally work 220 hours per quarter, and receive a tuition waiver as well as a monthly salary and medical benefits. To apply for a M.L.I.S. Graduate Assistantship, prospective students should complete the application form at www.ischool.washington.edu/resources/finaid/mlis.aspx and submit the form with their resume to the Assistant to the Associate Dean for Academics by February 1. Ph.D. students are automatically considered for graduate student service appointments.

M.L.I.S. scholarships are awarded on a basis of financial need, based on information from the Free Application for Federal Student Aid (FAFSA), and academic merit.

Information regarding additional sources of financial aid, from sources outside the Information School, is available at the Information School Financial Aid Resources Web page.

Special Research Facilities

Located on the third and fourth floors of Mary Gates Hall, one of the University's flagship high-technology buildings, the School offers an extensive software collection, a state-of-the-art computer classroom, an innovative Technology Exploration (TE) Lab, and excellent network connectivity. Students have access to software applications including titles for database and text management, programming, graphics, Web page

creation, Internet exploration and collaboration, and office productivity. Students also have access to a large number of bibliographic databases and commercial information services.

The TE Lab is a unique facility that includes twenty-four student stations and thirty-two servers on a "server wall." The lab is designed to promote exploration of a variety of technologies. Students can install alternative operating systems such as Linux, setup their own file, Web, or database server, and become the system administrator of their machines. Each machine includes a removable hard drive so that students can use either a "production setup" with all software previously installed and configured, or an "experimental setup" where students are free largely to do as they desire.

To promote strong academic and professional writing skills, the School hosts the Engineering iSchool Writing Center (EiWC) in collaboration with the College of Engineering, as a resource for students.

The School also has a dedicated information science research facility at the Roosevelt Commons Building. The research space comprises 10,000 square feet of offices, workstations, research labs, and meeting spaces.

For more information, please visit the School's Web site at www.ischool.washington.edu/technology/.

Continuing and Professional Education

The Information School works with University of Washington Educational Outreach to offer classes, workshops, and certificate programs for continuing education and professional development. Current certificate programs include Web Technology Essentials, Data Resource Management, Electronic Information and Records Management; Web Administration, and Small Business Web Master. Those interested in continuing education or certificate programs should contact UW Educational Outreach, 4311 11th Avenue NE, Box 354978, University of Washington, Seattle, WA 98105. Phone: 206-543-2320 or see www.extension.washington.edu/ext/.

Course Descriptions

See page 528.

Interdisciplinary Graduate Degree Programs

Astrobiology

C319 Physics-Astronomy Building

Astrobiology -- the study of life in the universe -- investigates the wide range of multidisciplinary factors that may influence the origin and evolution of life on Earth and beyond.

This investigation demands an intense interdisciplinarity, and the Astrobiology Program at the University of Washington is creating a new community of scholars, investigators, and educators. This community is skilled in multidisciplinary methods and thinking and pushes the boundaries beyond the commonplace with intellectual vigor, creativity, and rigorous method.

Astrobiology at the University of Washington builds on the strengths of traditional academic structure to transcend the limits of specialization through the synergy of multidisciplinary cooperation in both research and education.

The internationally recognized graduate certificate program offers a rigorous, interdisciplinary curriculum in cooperation with the Ph.D. programs of the participating departments. The program's unique features that bond students and faculty from widely disparate departments. Participating graduate students gain the personal and professional skills necessary to successfully engage in multidisciplinary collaborations.

The emerging field of astrobiology benefits from and is shaped by the perspectives of multiple disciplines directed at a common problem. So, too, does the astrobiology community of scholars and researchers at the University of Washington benefit from the breadth of perspective offered by diversity in culture and race among the program's participants.

Graduate Program

Graduate Program Coordinator
C304 Physics-Astronomy, Box 351580
206-685-2392
office@astro.washington.edu

Graduate Certificate Program

Admission Requirements

The University of Washington academic departments participating in the Graduate Certificate Program in Astrobiology provide expertise in all the primary disciplines collaborating in the study of Astrobiology:

- * Aeronautics and Astronautics
- * Astronomy
- * Atmospheric Sciences
- * Biochemistry
- * Biology
- * Genome Sciences
- * Earth and Space Sciences
- * History (of Science)
- * Microbiology
- * Oceanography

Students wishing to participate in the Astrobiology Graduate Certificate Program must be accepted for admission in the usual way by the Ph.D. program of one of these departments.

Please contact the participating departments of your choice for Ph.D. program application requirements and deadlines.

Certificate Requirements

15 credits minimum, as follows:

- * ASTBIO 501 (4)
- * ASTBIO 502 (4)
- * Three astrobiology-only seminar series (1 cr)
- * One cognate course approved by the student's advisory committee to ensure sufficient breadth (see program Web site for current list of cognate courses)

- * One quarter of a research rotation in an area outside the student's home discipline (3 to 10 credits)
- * Participation in a minimum of three workshops comprising the capstone experience (non-credit)
- * Astrobiology ethics seminar (variable credits)

A minimum of 15 credits are required. Additional credits may be earned through:

- * Other approved cognate courses
- * Astrobiology public lecture series (1 credit)

Successful completion of the program requires a minimum cumulative GPA of 3.00 for all courses required for the certificate and a grade of 2.7 or higher for each elective course counted toward the certificate.

Course Descriptions

See page 301.

Biomedical Structure and Design

J405 Health Sciences

Graduate Program

Graduate Program Coordinator
G514 Health Sciences, Box 357420
206-543-5474

The department's graduate program is directed toward the education of doctoral students who anticipate careers that will involve teaching or research in the biomedical sciences. Graduates from the program have a broad knowledge of biological structure at all levels, from the molecular to the human anatomical, with a major emphasis on the cellular level.

Graduate students select research and teaching options in their program. The research options are designed to provide training for a student in one or two of the following areas: cell and developmental biology, neurobiology, quantitative biology, cellular immunology, molecular biology, and macromolecular structure. Teaching options prepare the student to teach in one of the anatomical subdisciplines: human anatomy, neuroanatomy/neurobiology, histology, embryology/developmental biology, cell biology, and macromolecular structure.

Master of Science

Admission Requirements

- * A minimum GPA of 3.00
- * A bachelor's degree in one of the following or a related area: chemistry, biology, physics, biochemistry, or biophysics.
- * GRE and advanced GRE in either Chemistry, Biochemistry, Biology or Physics.
- * The minimal course requirements for successful applicants are:
 - o Chemistry: general, organic, and physical
 - o Physics: one year
 - o Mathematics: one year of calculus; multivariable calculus and/or linear algebra are strongly recommended
 - o Biology and/or Biochemistry: one year general biology plus one advanced course in biology or biochemistry
- * Undergraduate research experience is strongly recommended.
- * International students must have a minimum TOEFL score of 600.
- * International students hoping to study with BMSD faculty in the Chemistry Department must have a minimum TSE score of 55.

Degree Requirements

36 credits, as follows:

- * Required courses: BIOC 530 (3); BMSD 540, BMSD 541, BMSD 542 (2, 2, 2); BMSD 520 (0.5) to be taken every quarter
- * 12 graded credits of elective courses covering at least three of the four BMSD categories of topics: Biomolecular Structure, Techniques in

- Biomolecular Structure, Molecular and Cellular Biology, and Chemistry
- * At least one sequence of Biomedical Research Integrity workshops in the first or second year of the program. The Biomedical Research Integrity (BRI) Series is a sequence of lectures and workshops offered during summer quarter each year.
- * Teaching: In order to gain practical teaching experience, students in the program will serve as teaching assistants for two quarters.
- * Research: Students rotate through a minimum of two and a maximum of three participating laboratories during their first year. The opportunity exists for students to do an early rotation during summer quarter.

Course Descriptions

See page 534.

Biology Teaching

Graduate Program Coordinator
222 Hitchcock, Box 355320
206-543-1689

The Graduate School Biology Teaching Group offers an interdisciplinary program that leads to the degree of Master of Science in biology for teachers. Although designed specifically for biology teachers in K-12 schools and community colleges, other life science educators, such as those in environmental learning centers, may find the program especially worthwhile. The program emphasizes broadening the student's understanding of the various fields of biological science, with the improvement of the student's effectiveness as a teacher as the primary goal. Opportunities for course work within the departments of the University in biological science and science education are provided. Each student is asked to perform an in-depth study of a biological science problem in the context of its relevance to the teaching of biological science. Facilities and guidance are provided by a sponsoring professor and advisory committee drawn from the Biology Teaching Group and the several biological science departments of the University.

Master of Science

Admission Requirements

- * Secondary teaching certificate. (Uncertified teachers employed in private schools, community colleges, or other educational facilities must provide evidence of professional involvement in teaching.)
- * Bachelor's degree in biology or closely related field. Students in related fields must have adequate preparation in science.
- * Minimum GPA of 3.00 in the most recent 90 graded quarter credits (60 semester credits)
- * Graduate Record Examination Test scores Two or three letters of recommendation.
- * Statement of professional experience and objectives.

Degree Requirements

- * 36 credits, 18 of which must be graduate level and 18 must be graded. These categories are not mutually exclusive.
- * All coursework must be at or above the 400 level.
- * Each student plans a program to meet his or her own educational objectives, selecting at least one course from each of the following areas: botany, genetics, microbiology, zoology, and from the College of Education. One course in biochemistry is also required unless already completed in prior academic work. Courses in biomedical history, fisheries, forest resources, environmental studies, etc. may be appropriate for the student's interests. The Graduate Program Coordinator assists the student in this planning.

Environmental Management

274 Mary Gates Hall

The graduate certificate in environmental management (EM) is an interdisciplinary program designed to prepare students to contribute to sustainable utilization and enhancement of the natural and human environment. Through coursework, seminars, and a capstone consulting project, students acquire the tools to solve real-world environmental problems via the three avenues of science, policy, and business. The

program provides an excellent education and training opportunity for a diverse array of graduate students preparing for careers in the broad field of environmental affairs.

Key benefits of the program are:

- * Students participate in a community of faculty and students from a multitude of departments who share the common goal of environmental stewardship and sustainability.
- * Students explore environmental problems, and develop solutions, in a multidisciplinary environment, incorporating a wide range of perspectives and priorities.
- * Students receive a printed certificate and record in their transcript from the Graduate School to document completion of the interdisciplinary program in Environmental Management.

The flexible curriculum is suitable for students from many backgrounds, such as engineering, physical and natural sciences, public policy, economics, geography, public health, and political science, to name a few.

There is no other such interdisciplinary educational experience available to graduate students at the University of Washington at this time.

Eligibility

All students enrolled in graduate and professional degree programs in any school of the University of Washington are eligible to apply.

Prior to admission, students must have completed a one-quarter upper-level or graduate-level course in applied quantitative methods (e.g., microeconomics, numerical modeling, applied statistical methods) or pure quantitative methods (e.g., mathematics or statistics); and social or natural science.

Facility with written argument and communication is a prerequisite. This requirement is demonstrated in the letter of application.

Steering Committee

The program is governed by the Steering Committee for Environmental Management.

Graduate Program

Graduate Program Coordinator
274 Mary Gates Hall
Box 352802
206-221-6129
envirmgt@u.washington.edu

The certificate's courses and projects have been chosen to prepare students to contribute legal, scientific, social science, and technical expertise to environmental decision making at the local, national, and international scales. Students are required to broaden their knowledge and skills base beyond their home discipline; to read material from other fields with critical facility; to understand and appreciate the goals and analysis methods common to other fields; and, perhaps most importantly, to appreciate, communicate with, and collaborate with experts from other fields, who have different perspectives and priorities.

Certificate Requirements

21 credits, as follows:

- * Three core courses (10 total credits, actual courses vary by year)
- * Completion of a team-based keystone project (ENVIR 491, 8 credits)
- * participation in the Henry Luce Environmental Management speaker series (included with keystone credits)
- * 3 credits of electives selected in consultation with the Graduate Program Coordinator and approved by the EM Admissions Committee

Global Trade, Transportation, and Logistics Studies

313 Loew

The aim of the graduate certificate program in Global Trade, Transportation, and Logistics (GTTL) is to enable graduate students to augment their degree programs in preparation for careers that demand the combined knowledge of trade, transportation, and logistics. Particular attention is directed to the study of activities involved in the flow of goods from point of origin to point of consumption on a global scale. The wide range of issues addressed include the management of the intermodal connections among maritime, aviation, and overland modes of transport; environmental and energy concerns; advancements in telecommunications; and the legal, regulatory, and technological infrastructures that facilitate global commerce and transportation.

The GTTL graduate certificate program is responsive to the needs of government and industry for trained university graduates. The program is overseen by the Interdisciplinary Committee on Global Trade, Transportation, and Logistics. Members come from the University and the private and public sectors. GTTL works with leaders in business and government organizations to develop internships and jobs, in addition to offering a number of scholarship opportunities for graduate students. The GTTL certificate is based on a set of course requirements to be fulfilled in conjunction with the student's existing graduate degree program. Interdisciplinary Committee

The Interdisciplinary Committee periodically reviews the content of the core courses, recommends instructors, maintains the list of eligible electives, and coordinates with course instructors regarding scheduling and prerequisites. The committee is assisted in these tasks by the lead core-course instructor, the program director, the program assistant director, and the Graduate School staff, as appropriate. The committee also oversees the policy on admission to the graduate certificate program.

Graduate Program

Graduate Program Coordinator
313 Loew, Box 352193
206-616-5778
gttl@u.washington.edu

Students associated with GTTL receive the Graduate Certificate upon completing the program's requirements and obtain their degrees through cooperating academic units. Students admitted into graduate degree programs in the following units are eligible for the GTTL graduate certificate: Aeronautics and Astronautics, Business Administration, Civil and Environmental Engineering, Communications, Economics, Education, Forest Resources, Geography, International Studies, Law, Marine Affairs, Political Science, Public Affairs, Technical Communication, and Urban Design and Planning. Graduate students from other departments may be admitted on an ad hoc basis. GTTL prepares students for careers in international trade, transportation, and logistics by offering a comprehensive program encompassing selected courses from the aforementioned separate disciplines. Those students completing the graduate certificate receive an appropriate notation on their transcript and a Letter of Achievement, signed by the head of the student's academic unit and the Dean of the Graduate School.

Certificate Requirements

The requirements consist of a minimum of 20 credits: two core courses (8 credits) and four elective courses (at least 12 credits).

The core courses -- GTTL 501 and 502 -- provide a basic overview of the academic theories, political-economic structures, industrial dynamics, public policies, and strategic issues concerning the study, business, and regulation of global trade, transportation, and logistics.

Students select electives from a continually updated list. Most electives (and core courses) may also satisfy a student's home department requirements. At least one elective must come from outside the home department to reinforce the interdisciplinary objective of the certificate program. A substitution policy developed by the committee assures that an appropriate mix of electives can be found for each student. GTTL 600 (Independent Study) and GTTL 601 (Internship) provide an alternative means to gain elective credits.

Course Descriptions

See page 534.

Health Services Administration

Graduate Program Coordinator -- In-Residence and Executive Programs
H660 Health Sciences, Box 357660
206-543-8778
mhap@u.washington.edu

The Health Services Administration Group offers two programs of study leading to the Master of Health Administration (M.H.A.) degree: an in-residence program and an executive program. The M.H.A. degree is fully accredited by the Accrediting Commission for Education in Health Services Administration. It provides the educational foundation for careers in management, planning, consulting and policy-making in ambulatory care organizations, hospitals, long-term care facilities, mental health care organizations, government agencies, planning agencies, and other organizational settings in the health field. The curriculum is designed to be interdisciplinary with a faculty drawn from the Graduate Schools of Public Health and Community Medicine, Business Administration, Public Affairs, Nursing, Medicine, and Law. Concentrations of study may vary according to the student's academic interests and career objectives. In addition to academic work, in-residence M.H.A. students are strongly encouraged to participate in an internship experience in a health facility or agency typically under the preceptorship of the administrator or director of that organization.

Concurrent degree programs combining health administration with business administration, medicine, nursing, or public administration are also offered. These curricula (with the exception of the M.H.A./M.D.) typically require three years of intensive academic study and culminate in joint degrees (M.H.A./M.B.A., M.H.A./M.D., M.H.A./M.N., M.H.A./M.P.A.).

The Executive Master of Health Administration program, launched in January 1998, is designed primarily for mid-career physicians and other clinical practitioners, as well as experienced health services managers, who have demonstrated interest or competency in administration or management. It offers advanced curriculum in planning, organizing, and implementing programs that improve the cost-effectiveness and quality of patient care. Courses meet once each month for three-day sessions (typically Thursday through Saturday) for 24 months (October to September). This program structure allows practicing professionals to continue their careers while gaining a graduate degree.

Course listings may be found under the School of Public Health and Community Medicine, Department of Health Services section of this catalog.

Special Requirements

Applicants to the in-residence program must submit, in addition to Graduate School admission requirements, a narrative statement of objectives, a resume, three letters of recommendation, and scores from either the GRE or the GMAT. Informational interviews with members of the program faculty may be requested but are not part of the formal admission review process. Relevant health services experience is preferred. Applicants are accepted only for autumn quarter of each year. The application deadline is January 15. Applications received after this date (U.S. and Canadian only) will be considered on a space-available basis.

Applicants to the executive program must submit, in addition to Graduate School admission requirements, a narrative statement of objectives, a resume, three letters of recommendation, and either GRE or GMAT scores (excluding applicants with doctoral-level degrees from U.S.-accredited institutions). Priority of admission is given to applicants with medical/clinical training and professional experience. Applicants are accepted only for autumn quarter of each year. Applications are reviewed following the preferred deadline of April 30. Applications received after this date (U.S. and Canadian only) are reviewed on a space-available basis.

Applicants can expect to hear about the status of their application within four to six weeks of submission. Those interested in applying should contact the program office as soon as possible to inquire about availability and the application process.

Earlier application deadlines and additional documentation are required for international applicants.

Financial Aid

Financial support for current M.H.A. students may be available from several areas: loans, work study positions, internships, possible outside fellowships, and possible teaching or research assistantships outside the program. For more information on financial aid, contact the UW Office of Student Financial Aid (105 Schmitz Hall, Box 355880, 206-543-6101, osfa@u.washington.edu) or the M.H.A. program office. Research Facilities

In addition to its University facilities, the program makes extensive use of community health facilities and agencies for research and training.

Molecular and Cellular Biology

Graduate Program

Graduate Program Coordinator
T466 Health Sciences, Box 357275
206-543-0253
mcb@u.washington.edu

The Molecular and Cellular Biology Program (MCB) is a leader in applying the techniques of molecular and cellular biology to advance the understanding of basic biological sciences. The goal of the doctoral program is to broadly train students to think about science in a rigorous and critical manner. Since scientific methods, equipment, and knowledge are changing rapidly, students learn to focus on important issues in an evolving research environment. This program is appropriate for students interested in future careers in research and teaching in academia as well as biotechnology and pharmaceutical companies.

Thirteen departments across three schools have faculty members actively pursuing research in molecular and cellular biology. The departments participating in the program include Biochemistry, Bioengineering, Biological Structure, Biology, Environmental Health, Genome Sciences, Immunology, Microbiology, Pathobiology, Pathology, Pharmacology, and Physiology and Biophysics.

At the Fred Hutchinson Cancer Research Center (FHCRC), the divisions of Basic Sciences and Molecular Medicine participate in the joint Molecular and Cellular Biology graduate program. Shared FHCRC facilities are available for electron microscopy, flow cytometry, tissue culture, and image analysis. A biotechnology center for DNA and protein synthesis and sequencing, animal facilities, a biological production facility that focuses on monoclonal antibody production, extensive libraries, and a biocomputing center provide further support for the research effort.

Faculty Interests

Over 160 faculty members from the UW and FHCRC are researching molecular and cellular biology and are skilled in the training of graduate students. Faculty research interests encompass both prokaryotic and eukaryotic cells in the following general areas: genetics, cell biology, neurobiology, immunology, virology, molecular structure, developmental biology, cancer biology, plant biology, genomics/proteomics, and microbiology.

Doctor of Philosophy

Admission Requirements

- * Applicants must have completed a baccalaureate or advanced degree by the time of matriculation; degrees emphasizing biology, physical or natural sciences, and mathematics are preferred.
- * GRE scores. General Test. A Subject Test (e.g., Biology, Biochemistry, Chemistry) is not required but highly recommended.
- * Letters of recommendation
- * Statement of purpose

Degree Requirements

90 credits, as follows:

- * *Credit Requirements:* MCB students complete 21 graded credits of coursework with 9 credits of the CONJ series and 12 credits of graded elective courses. M.S.T.P. students receiving a Ph.D. through the MCB

Program are required to have 18 graded credits, and should petition the MCB directors to accept medical school courses in lieu of the remaining 3 credits.

- * *First Year:* Students complete most of their formal course requirements, select a permanent adviser, and establish a Doctoral Supervisory Committee. A typical first-year class schedule includes six five-week modules of the MCB conjoint series, three lab rotations, three quarters of literature review and one or more graded elective classes. Following the third rotation, students generally choose a permanent adviser in whose lab they will pursue research for the rest of their educational career, generally three to four years. During the summer, students complete the Biomedical Research Integrity Lecture Series.
- * *Second Year:* Students form their Doctoral Supervisory Committee by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for two quarters, and hold their committee meeting. Students form their doctoral Supervisory Committees by the end of December, define their doctoral projects, take additional elective courses, participate as teaching assistants for two quarters, and hold their committee meetings.
- * *Third Year and Beyond:* By the end of spring quarter of the third year, the student completes the General Examination and is conferred official Ph.D. Candidacy by the Graduate School. The student then focuses on the dissertation research and continues to meet with the Supervisory Committee each spring quarter to report on research progress and plans for the coming year. When the Supervisory Committee agrees that a student is ready, the Final Examination is scheduled. Upon successful completion of the Final Examination and acceptance of the completed dissertation by the Graduate School, a student is conferred the degree of Doctor of Philosophy.

Financial Aid

The MCB Program provides a stipend plus tuition for the first year of study. At the end of the first year of study, students choose a doctoral committee, and subsequent years of support are provided by the department of the committee chair. Students maintaining satisfactory academic progress receive funding for the duration of their graduate training.

Course Descriptions

See page 534.

Museology

Graduate Program Coordinator
Burke Museum, Box 353010
206-543-9680

The Museology Program is designed to provide the generalized training, knowledge, and skills necessary to pursue a professional career in museum work. The program is directed toward the training of a broad range of museum professionals interested in curation and management of collections in anthropology, art, botany, geology, history, and zoology as well as in interpretive programs and museum administration.

Courses include required core museology subjects as well as a range of classes offering students the chance to specialize in interest areas. Course work is divided between the theoretical and practical aspects of museum operations. Classes take the form of lecture courses, seminars, special lectures by guest speakers, field trips, laboratory and collection management courses, practicums and internships. Since admission to the program is highly selective, classes are small and students have close contact with faculty.

Practical experience, an essential component of the program, is provided by several museological institutions at the University of Washington, including the Thomas Burke Memorial Washington State Museum, the Henry Art Gallery, the Herbarium, the Arboretum, the Fish Collection, and the University Libraries. The Burke Museum acts as the coordinating unit of the program. Located on the campus of the University of Washington, the Burke Museum is Washington state's natural-history and anthropology museum, and is the oldest and largest natural-history museum in the Northwest. It has nationally and internationally ranked collections focusing on the anthropology, geology, and zoology of the Pacific region and Pacific Rim.

Program Requirements

The graduate program in museology is designed to take two years to complete, consisting of six quarters of academic study and research. During the first year, students carry on average between 10 and 15 credits each quarter; during the second year, the number of credits may vary depending on research, practicum, and internship work. Students may enroll for part-time study, but this is discouraged during the first year.

Requirements for successful completion of the Master of Arts degree include:

1. Completion of a minimum of 36 quarter credits, including 27 course credits and 9 thesis or thesis-project credits, with at least 18 credits of course work numbered 500 or above, including a thesis or thesis project.
2. A minimum of three quarters of full-time residence credit or part-time equivalent.
3. Demonstration of reading competence in one foreign language, if required by the student's supervisory committee due to the student's area of specialization.
4. Completion of an internship in an off-campus museum or related agency approved by the supervisory committee prior to submission of the student's thesis or thesis project.
5. Presentation of a thesis proposal by the beginning of the fourth quarter of study.
6. Successful completion of an oral examination, covering both the thesis topic and the field of museology in general, following submission of the thesis or thesis project.
7. Completion of all degree requirements within six years.

The following courses are required of all students unless exempted by petition to the Program Coordinating Committee or credited for relevant course work completed at other universities: MUSEUM 480, 481 or 490 or 491, 482, 483, 498, 590, 591, 592, 593 or 594, 595, 600, 700 or 710. In addition, two or more courses are required in an academic discipline relevant to the area of specialization.

The Museology Program also offers a Graduate Certificate in Museum Studies as an option for graduate students in other degree programs at the University. To qualify, students must take a specified minimum set of four key courses in areas that emphasize either collection research and management, or museum administration and interpretation, and that include hands-on work experience. Information and application materials for the certificate can be obtained from the Museology Program office.

Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications completed and postmarked on or before this date will be reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

Course Descriptions

See page 535.

Near and Middle Eastern Studies

Graduate Program Coordinator
311 Loew Hall, Box 352192
206-543-6398

The interdisciplinary Ph.D. program in Near and Middle Eastern Studies is designed for students who wish to pursue research with a comparative perspective in Near Eastern languages and literature: Arabic, Hebrew, Persian (or Dari or Tajik), Turkish and Central Asian Turkic languages; Near Eastern linguistics; Islamic topics, namely, Islamic law, history, institutions, theology, and mysticism; comparative religion: Judaism, Christianity, and Islam; and interdisciplinary investigations of modern topics using the social sciences. The program is administered by an interdisciplinary Graduate School faculty group. The program of studies includes courses offered in the Department of Near Eastern Languages and Civilization, the Jackson School of International Studies, and other departments on campus. Students in the program must take courses in both the humanities and social sciences.

Degree Requirements and Satisfactory Progress

Specific course work and areas of concentration will be determined by the student's interests within the framework of the degree and satisfactory progress requirements listed below.

1. Within 18 months of admission, demonstration of a general knowledge of history and culture in one of the following general fields: Islamic civilization; Arabic, Hebrew, Persian, Turkish, or Central Asian Turkic languages and literature; the modern Middle East; or comparative religion either through previous degree work or through examination administered by the program.
2. Within three years of admission, completion of two advanced courses in the humanities, one of which must be in the Department of Near Eastern Languages and Civilization (NELC), and two advanced courses in the social sciences, one of which must be in the Department of History. These courses are in addition to work the student may have done at the B.A. and M.A. level.
3. Within three years of admission, completion of a graduate seminar. Two graduate seminars are required if none was taken at the M.A. level.
4. A student will be expected to have studied three languages, two of which must be regional languages and one of which must be a "Western" European language other than English, such as French, German, Italian, Russian, or Spanish. The student's Supervisory Committee will decide whether a fourth language will be required and whether the fourth required language will be European or regional. Students pursuing language-related work may anticipate a fourth required language, whereas those pursuing social-science-related studies may not. Before the General Exam listed below may be taken, the student must complete the language requirements including the second-year level in a regional language different from the two languages offered at the time of admission if both were not regional languages.
5. *Disciplinary Method and Theory Requirements.* For all students conducting field work or working with documents, whether social science or humanities focused, and for all social science-oriented students, the following courses are strongly encouraged: (a) ANTH 550, Field Techniques of Anthropology, and (b) POL S 491, Political Research Design and Analysis; or (c) their equivalents in appropriate disciplines.

For those students doing both humanities-oriented research and not conducting field work, two method and theory courses in the appropriate discipline or disciplines (e.g., comparative literature, philosophy) are required.
6. *Disciplinary Core Courses.* Each student is required to take two disciplinary core courses in the appropriate fields. Core courses (or field courses) survey the literature, methods, and theoretical issues involved in a broad field of inquiry, as opposed to elective topical courses, which cover a much smaller area. Core courses should be chosen according to the anticipated research interests and fields for preliminary examination of each student. For example, these core disciplinary courses might focus on comparative politics, comparative religion, feminist theory, ethnicity and nationalism, analysis of linguistic structures, seminar in cognitive anthropology, comparative legal institutions, or international political economy. Courses on a narrow field of inquiry (such as Arab-Israeli conflict) do not constitute field or core courses, though they may contribute to a student's general field.

Annual Review

A subcommittee of the Near and Middle Eastern Studies program faculty will meet each spring to review the progress of all students in the Ph.D. program. Either the chair of the student's committee, the program's graduate adviser, or the program's director will inform students of the results of this annual review.

Ph.D. Examinations and Dissertation

The student will be expected to take the following examinations: (1) preliminary exams consisting of an area of specialization exam and a theory and discipline exam; (2) a General Examination, consisting of a take-home part and an oral part; and (3) a Final Examination, which is the Ph.D. thesis defense.

Students must meet the general University requirements concerning admission to candidacy for the doctoral degree, the dissertation, and final examinations, including an oral examination.

A student's Ph.D. supervisory committee shall consist of no less than three members of the University of Washington's Graduate School faculty as well as a representative of the Graduate School (GSR). The chair of the committee must be an active member of the Graduate School faculty. At least two members of the committee must be members of the Near and Middle Eastern Studies faculty group. Additional members may be asked to join the committee.

Students will write a dissertation as the final requirement for the Ph.D. degree. The topic of the dissertation will be set in consultation with the Ph.D. candidate's supervisory committee.

Admission Deadline

The application deadline for autumn quarter admission is February 1. Applications which are completed and postmarked on or before this date will be reviewed by the appropriate admission committee. Late applications may be submitted until April 15, although consideration is not guaranteed if enrollment targets have been met.

Neurobiology and Behavior

Graduate Program

Graduate Program Coordinator
T471Health Sciences, Box 357270
206-685-1647
neubehav@u.washington.edu

Understanding the brain represents both a major scientific challenge and a wonderful research opportunity. Investigations into the mechanisms of neural function require an interdisciplinary approach using the knowledge base and techniques of anatomy, biochemistry, molecular biology, physiology, pharmacology, and the behavioral sciences. Neuroscientists and their students must use these different approaches in their research and training if they are to make inroads to solving the major questions in neuroscience.

The University of Washington has met this challenge by establishing the interdisciplinary graduate program in Neurobiology and Behavior. The laboratories of more than 90 faculty members in 15 departments have combined efforts to form the doctoral training program, continuing a long history of collaborative efforts that cross both departmental and University boundaries.

The program is designed to allow students to obtain both broad training in the neurosciences and more intensive course work in specific areas of interest. The program emphasizes flexibility and encourages students to take responsibility in the design of their own curriculum. Students have the opportunity to work with faculty whose interests span the breadth of neuroscience research. Graduates of the program are well prepared for a variety of careers involving academic, research, industrial, and public policy positions.

Key aspects of the graduate program that are common to all students include (1) a year-long course which provides a core of knowledge in the neurosciences, (2) quarterly first-year laboratory rotations and rotation talks attended by all students in the program, (3) a biweekly seminar series featuring both visiting and local scientists, (4) a biweekly journal club designed to provide students with an introduction to the subsequent week's seminar, and (5) a program-wide retreat, combined with a campus-wide poster session where students and postdoctoral candidates can present their Society for Neuroscience Annual Meeting posters. Thus, the program exposes students throughout their graduate career to the most exciting and current research and concepts covering all areas of neuroscience.

Application Process

Students who have emphasized either biological or physical sciences in their undergraduate careers are invited to apply. Applicants are requested to send a copy of their academic record; GRE scores, including, if possible, scores on a subject test such as chemistry, physics, molecular and cellular biology, psychology, or biology; and three letters of recommendation from the persons who can best evaluate their potential for success in graduate study. New students enter the graduate program September 15. Applications received on or before the deadline are given full consideration. Applications received after the deadline are considered at the discretion of the directors.

Research Facilities

Participating departments are located in the Health Sciences Center and in the College of Arts and Sciences. Extensive research facilities in all areas of neurosciences are available to the student. The University maintains two major natural and health-sciences libraries in addition to individual departmental libraries. Facilities in the participating departments include electronics and machine shops, instrumentation for synthesis and sequence determination of nucleic acids and proteins, calcium imaging, confocal microscopy, and computer facilities. Equipment for ultrastructural studies is readily available. The resources of the Regional Primate Research Center, the W. M. Keck Center for Advanced Studies in Neural Signaling, and the Friday Harbor Laboratories are also available to the student.

Financial Aid

The program offers full stipend and tuition support to students through traineeships derived from NIH training grants and private foundation support and through research assistantships supported by the University or research grant funds. Students with satisfactory academic progress can anticipate that funding will continue for the duration of their program.

Course Description

See page 535.

Nutritional Sciences

Graduate Program Coordinator
305 Raitt, Box 353410
206-543-1730
nutr@u.washington.edu

The Interdisciplinary Graduate Program in Nutritional Sciences offers programs of study leading to Master of Science (M.S.), Doctor of Philosophy (Ph.D.), and Master of Public Health Nutrition (M.P.H.) degrees. The graduate program is designed for the needs of students with a strong science background who wish to pursue (1) advanced training in nutritional science or clinical research, (2) advanced training in nutritional epidemiology and diet-disease interactions, or (3) training in public health nutrition practice. Additional training in clinical and community nutrition is provided to those students who wish to satisfy the didactic and internship requirements of the American Dietetic Association, prior to obtaining Registered Dietitian (R.D.) status.

The principal areas of study are biochemical and molecular nutrition, clinical nutrition, and community or public health nutrition. Members of the core faculty represent the School of Public Health and Community Medicine, the Fred Hutchinson Cancer Research Center, and the University of Washington Medical Center. The program also draws on a larger group of interdisciplinary faculty from the College of Arts and Sciences, Schools of Medicine and Nursing, other units on campus, and from affiliated institutions in the Seattle area.

Each program of study is designed by the student in consultation with, and with the approval of, a supervisory committee. All students begin working on a research project under the supervision of an appropriate faculty member in the early stages of their graduate experience. Public health field placements, which follow the first year of required coursework, are an integral part of the M.P.H. curriculum.

The research environment at the University of Washington is exceptional. Research facilities in Raitt Hall include modern laboratories, computer facilities, and a vivarium. Students also have access to faculty mentors and research facilities through the Medical Center, the Fred Hutchinson CRC, the Clinical Research Center, and the Clinical Nutrition Research Unit. Additional clinical facilities include Harborview Medical Center, Northwest Kidney Center, Children's Hospital and Regional Medical Center, Pacific Medical Center, the Cancer Care Alliance, and the Center for Human Development and Disabilities.

Students may enter the graduate degree program after completing a bachelor's or a master's degree. Previous coursework in chemistry, biochemistry, and human physiology is required. Students who wish to supplement their degree program with ADA-approved training leading to R.D. status must complete all didactic requirements before applying to the supervised dietetic internship.

The internship specialty areas are clinical and community nutrition. Applicants should contact the Dietetic Internship Director for detailed admission requirements.

Course Descriptions

See page 536.

Quantitative Ecology and Resource Management

Graduate Program Coordinator
304 Loew Hall, Box 352182
206-616-9571
qerm@u.washington.edu

The Interdisciplinary Graduate Program in Quantitative Ecology and Resource Management (QERM) provides a unique opportunity for students to study the application of statistical, mathematical, and decision sciences to a broad array of terrestrial and marine ecology, natural resource management, biometrical, and mathematical biology problems. It is designed to attract mathematically trained students interested in working on contemporary ecological or resource management problems from a quantitative perspective. QERM offers programs of study leading to Master of Science and Doctor of Philosophy degrees.

Faculty associated with the QERM program come from several campus units, including Statistics, Applied Mathematics, Forest Resources, Aquatic and Fishery Sciences, Marine Affairs, Biology, Biostatistics, Genetics, Economics and Public Affairs. This pool of faculty talent is available to enrich the academic experience of all QERM students.

Admission Requirements

Applicants are expected to possess an awareness and keen interest in applying quantitative methods to natural resource management, marine or terrestrial ecology, or mathematical biology problems. Minimum requirements for admission to the graduate program include a baccalaureate degree from an accredited institution, a GPA of 3.00 in the last two years of college work, and approval of the program and the Graduate School. Applicants should have either a strong mathematical or biological (ecological) background and must perform well on the quantitative and analytical sections of the Graduate Record Examination.

Applicants to the program must submit a completed QERM program application, UW Graduate Admissions application (and required fee), transcripts of all previous college course work, Graduate Record Examination scores (general test only is required), TOEFL score (only for applicants who are non-native English speakers), three letters of recommendation, a brief narrative statement of objectives and curriculum vitae. Admission is also dependent upon program resources and fit between student and program. Admissions are limited to autumn quarter. The application deadline is January 15.

Program Requirements

The core course work for the Master of Science degree reflects the expectation that the student has a fundamental understanding of the principles of statistical inference and ecological modeling. Course electives should further this understanding in an area of emphasis selected by the student from among biometry, mathematical modeling, and resource management. Additional elective coursework in basic biology and ecology is expected to give students greater insight into the environmental systems in which they expect to apply their quantitative training.

Requirements for successful completion of the Master of Science and degree include:

1. Completion of a minimum of 36 quarter credits, including 27 course credits and 9 thesis credits, with at least 18 credits of course work numbered 500 or above, including a thesis.
2. Numerical grades must be received in at least 18 quarter credits of course work taken at the University of Washington.
3. Successful completion of qualifying examinations in statistical theory and applied methods at the completion of the first year of study.
4. A seminar on results of the research and oral defense of the thesis are required for graduation.

Each student also must meet the general University requirements for graduation.

The following courses are required of all students unless exempted by petition to the Graduate Program Coordinator: STAT 512 and STAT 513 (statistical inference), QERM 550 (ecological modeling), AMATH 422 (mathematical biology), QERM 514 (analysis of ecological and environmental data), QERM 597 (seminar) and QERM 700 (master's thesis credits, minimum of 9 credits).

Students entering the program with little or no statistical background are advised to take one or more of the following courses in their first year for preparation in this area: STAT 421 (applied statistics and experimental design), STAT 394 and STAT 395 (probability I and II) and possibly STAT 341-342 (introduction to probability and statistical inference) or STAT 481 (introduction to mathematical statistics). These students then take STAT 512 and STAT 513 (statistical inference) in the following academic year and the statistics theory qualifying examination given that year. These students will take the applied methods qualifying examination at the end of their first year of study.

For students pursuing the Doctor of Philosophy degree, both the applied methods and statistical theory qualifying examinations must be passed at the doctoral level. Students are allowed two attempts to successfully pass each component at the doctoral level.

Students must complete at least three years of graduate study (90 credits) and complete a dissertation to earn the Doctor of Philosophy degree. Completion of a master's degree program may be applied toward one year of the doctoral program. The core QERM courses must be taken if the student has obtained a master's degree from another program. Preparation for a Ph.D. dissertation requires registration for 27 credits of QERM 800 (dissertation research). Each student also must meet the general University requirements for graduation.

Financial Aid

Fellowships, teaching assistantships, and research assistantships are available each year. This assistance is from either the Graduate School or one of the campus units contributing faculty to the QERM program. They generally cover the nine-month academic year, although provisions may be made for summer support. Tuition is normally included as part of the financial package. Funding decisions are made yearly; attempts are made to continue support for students making satisfactory progress.

Course Descriptions

See page 537.

Quaternary Research Center

19 Johnson

Quaternary studies focus on the processes that presently shape the natural environment and have operated over approximately the past two and a half million years (Quaternary period). A knowledge of Quaternary events facilitates an understanding of earth history in relation to the modern environment and has predictive value with regard to present-day and future environmental changes.

Quaternary research is typically interdisciplinary, and thus it commonly involves related interests of two or more academic units. The Quaternary Research Center was established in 1967 to foster such interdisciplinary studies on a cooperative basis.

The center has the following goals:

1. To understand environments and climate changes of the past two and a half million years in the context of modern surface processes, which include historical changes, prehistoric postglacial environments, and Ice Age events.
2. To serve as a catalyst in fostering interdisciplinary studies in the fields of atmospheric sciences, archaeology/anthropology, botany, engineering, fisheries, forestry, geology, geophysics, oceanography, pedology, and zoology.
3. To provide a scientific perspective on the scale of modern and man-made environmental changes, including climate changes, in the context of recent earth history.

4. To conduct a curriculum jointly with other disciplines in the training of graduate students in Quaternary-oriented studies.
5. To seek applications of Quaternary studies to modern environmental problems that will help predict consequences of policy decisions.

Graduate Program

Students associated with the center obtain their degrees through cooperating departments. Students interested in graduate work at the center should apply to the department of their choice but plan to do their research in a Quaternary-related subject.

Research Facilities

The research laboratories of the center provide an array of modern facilities for investigation of Quaternary problems.

QRC Resource Center. This specialized collection, dealing with a wide range of Quaternary topics, is among the most extensive in North America. It includes books, monographs, theses, journals, and maps, and houses a large, diverse reprint collection. Searches for library material can be conducted via the QRC Web page.

Cosmogenic Nuclide Laboratory

John Stone, Director

The UW Cosmogenic Nuclide Laboratory analyses rare radionuclides produced by cosmic ray bombardment of the Earth's surface. These nuclides are useful for surface exposure dating and the study of geomorphic rates and processes. Current projects include work on quaternary glaciations of Antarctica, Europe, and North America; dating of landslides and volcanic eruptions; and studies of erosion in both tectonically active and ancient, stable landscapes. The laboratory has sample preparation facilities and clean labs for extraction of Al-26, Be-10, and Cl-36. For additional information, visit the laboratory's Web site.

Geochemistry Library

Ronald S. Sletten, director

The Geochemistry Library conducts analyses of natural waters, soil, and sediment. Instrumentation includes ICP-OES, ICP-MS, laser diffraction particle size analyzer, and total organic/inorganic carbon analyzer for water samples. The library also conducts C-13 CP-MAS-NMR for natural organic and pulsed field gradient PFG-NMR for diffusion studies of water in porous media. The primary research foci are weathering, elemental cycling, and studies of permafrost soils. Current projects include investigation of biocomplexity of carbon cycling in Arctic soils in Greenland and physico-chemical soil processes in Antarctica and Alaska.

Periglacial Laboratory

Bernard Hallet, Director

Research in the Periglacial Laboratory focuses on diverse processes at the interface between glaciology and geomorphology that are fundamental to understanding landscapes and soils in alpine and polar regions. Founded by Link Washburn, the laboratory has a long history of experimental research on periglacial processes with special attention given to the complex phenomena associated with freezing soils and rocks. Recently the lab has also served as a base of support for extensive field work involving electronic instrumentation to monitor surface processes in the Arctic, Antarctica, the Himalayas, southeast Tibet, and other regions across the globe.

Stable Isotope Laboratory

Eric J. Steig, Director

The Stable Isotope Laboratory is the main center for stable isotope studies for the QRC. The current emphasis in the laboratory is the development of high-resolution climate records covering the last ten millennia, from ice cores in the Canadian Arctic, Greenland, and Antarctica. Facilities in the laboratory (now undergoing renovation) include off-line and online preparation systems for D/H and $^{18}\text{O}/^{16}\text{O}$ on water $^{13}\text{C}/^{12}\text{C}$ on carbonates and organic materials, and $^{15}\text{N}/^{14}\text{N}$ on nitrate and organics. Additional information, data, and other resources are available via the laboratory's Web site.

Course Descriptions

See page 537.

Urban Design and Planning

Graduate Program Coordinator
311 Loew, Box 352192
206-543-6398

The Ph.D. in Urban Design and Planning at the University of Washington is one of 39 Ph.D. programs in urban and regional planning in North America, and one of the oldest, founded in 1967. This program brings together faculty from disciplines ranging from Architecture to Sociology to focus on the interdisciplinary study of urban problems and interventions. Covering scales from neighborhoods to metropolitan areas, the program addresses interrelationships between the physical environment, the built environment, and the social, economic, and political institutions and processes that shape urban areas. The breadth of this program permits students to pursue doctoral studies in the various aspects of urban design and planning as well as in a number of related social science, natural resource, and engineering areas.

The Program seeks to prepare scholars who can advance the state of research, practice, and education related to the built environment and its relationship to society and nature in metropolitan regions throughout the world. The program provides a strong interdisciplinary educational experience that draws on the resources of the entire University, and on the laboratory provided by the Seattle metropolitan region and the Pacific Northwest. The program emphasizes the educational values of interdisciplinarity, intellectual leadership and integrity, and the social values of equity, democracy and sustainability. It seeks to promote deeper understanding of the ways in which public decisions shape and are shaped by the urban physical, social, economic, and natural environment. The program envisions its graduates becoming leaders in the international community of researchers, practitioners and educators who focus on improving the quality of life and environment in metropolitan regions.

Doctor of Philosophy

Admission Requirements

Admission to the Ph.D. program is based on evidence of promise of high scholarly achievement and research orientation. The applicant's statement of purpose, Graduate Record Examination (GRE) test results, letters of recommendation, and examples of past work constitute the basis for the admissions evaluation.

Applicants typically have a Masters degree in fields ranging from planning and public affairs to natural and social sciences. Students interested in a professional degree in urban design and planning should apply to the master's program in urban design and planning.

Application Deadline: All application materials are due by Feb. 1. International applicants are encouraged to submit the Graduate School on-line application form by Nov. 1.

For more information, see the program's Web site.

Degree Requirements

The Ph.D. in Urban Design and Planning requires 90 credits and is divided into three main phases.

Phase I: The Core Curriculum

The core curriculum defines the intellectual foundation of the program. While the program retains considerable flexibility in defining a research agenda within the broad umbrella of urban and environmental planning and policy, it provides a common foundation for all students to build upon. The following are the core curriculum requirements. Students enter the program with a master's degree, in fields ranging from planning and public affairs to natural and social sciences. Depending on the academic preparation of the student prior to matriculation, the core requirements can be met within one to two years.

Required Courses: Phase I requirements involve five courses, and should be completed during the first year, unless schedule conflicts make this

infeasible. Courses from Phase II requirements may also be taken in the first year, to accelerate completion of the curriculum requirements.

- * Core Sequence: URBDP 591, URBDP 592, URBDP 593
- * Restricted Electives (before completion of Phase I):
 - o Qualitative Research Methods - One of the following: URBDP 598, GEOG 425, HIST 598, HSERV 526, POL S 493.
 - o Quantitative Research Methods - One of the following: CS&SS 594, CS&SS 504, CEE 584

Phase II: Area of Study

Students admitted to Phase II form a supervisory committee to oversee their progress through the rest of their academic program. Students develop with their supervisory committee a description of their proposed areas of study. These will define areas of scholarship that must demonstrate an interdisciplinary research approach to an application within urban and environmental planning and policy. The description should develop a curriculum proposal approved by the supervisory committee that addresses the following advanced study requirements:

Phase II Curriculum Requirements: Phase II requirements involve seven courses and a teaching seminar, in addition to advanced courses directly related to the area of study selected by the student. Some of these courses may be taken in the first year.

- * Urban Processes and Patterns: Three of the following: URBDP 479, URBDP 498, URBDP 561, URBDP 598, URBDP 598, GEOG 440, GEOG 448, GEOG 450, GEOG 466, GEOG 477, GEOG 478, GEOG 479, GEOG 578, SOC 490, POL S 481.
- * Research Design and Methods: Two of the following: CS&SS 536, CS&SS 560, CS&SS 567, CS&SS 594, CS&SS 529, CS&SS 544, CS&SS 566, URBDP 422, URBDP 525, URBDP 530, URBDP 571, GEOG 460, GEOG 461, PB AF 526, SOC 526, SOC 529

- * Urban and Environmental Design and Planning: Two of the following: URBDP 465, PB AF 513, PB AF 517, PB AF 518, URBDP 598, URBDP 598, POL S 574, CFR 592, ARCH 561, PB AF 565.
- * Teaching Methods: One teaching seminar and experience as a TA for at least one quarter, before completion of phase III. The following courses or a suitable alternative satisfy this requirement: GEOG 599, GRDSCH 630

General Examination: A critical review of the literature in the area of study must be developed by the student, which integrates interdisciplinary research on the area of study selected by the student, and identifies areas of potential research opportunity that may subsequently form the basis for a dissertation proposal. The review should demonstrate broad familiarity with relevant research in the chosen area, and with the range of theory and methods applied within the reviewed literature.

Phase III: Dissertation

Once the student passes the General Examination, he/she is advanced to the level of doctoral candidate, and is expected to build on the critical review of the literature to develop a dissertation proposal. The dissertation proposal should demonstrate the characteristics of interdisciplinarity, relevance to urban and environmental planning and policy, and potential for contribution to scholarship.

Financial Aid

The Interdisciplinary Ph.D. Program in Urban Design and Planning attempts to provide funding for doctoral program applicants in a way that makes the program attractive to the strongest potential applicants, ensures their effective mentoring while in the program, and actively engages and energizes faculty to improve the program and to bring research funding to support students.

Interdisciplinary Undergraduate Programs

Program on the Environment

274 Mary Gates Hall, Box 352802

The Program on the Environment (PoE) fosters and promotes interdisciplinary environmental education at the UW. As an interdisciplinary program merging multiple fields of study, PoE draws faculty from a wide array of disciplines, providing a unique opportunity for students and faculty to explore complex environmental issues from multiple perspectives.

Undergraduate Program

Adviser

274 Mary Gates Hall, Box 352802

206-616-1208 or 206-616-2461

poeadv@u.washington.edu

The program on the Environment offers the following programs of study:

- * The Bachelor of Arts degree with a major in environmental studies
- * A minor in environmental studies

Bachelor of Arts

Suggested First and Second-Year College Courses: Major requirements 1-5 as listed below.

Department Admission Requirements

Students in good academic standing can declare this major at any time.

General Education Requirements

All majors must satisfy the College of Arts and Sciences general education requirements.

Major Requirements

85-90 credits as follows:

1. One course (5 credits) from MATH 112, MATH 124, MATH 145, Q SCI 110, or Q SCI 291.
2. One course (5 credits) from STAT 220, STAT 301, STAT 311, QMETH 201, or Q SCI 381.
3. One course (5 credits) from CHEM 120 or CHEM 142.
4. One of the following (5 to 10 credits): BIOL 116, or BIOL 161 and BIOL 162, or BIOL 180 and BIOL 200 (or BIOL 201 and BIOL 203).
5. Core Courses (15 credits): ENVIR 201, ENVIR 202, ENVIR 203.
6. Matrix Courses (40 credits): Choose all courses from one of five options: ecology and conservation, population and health, resources, international perspectives, or an approved individualized curriculum. (The international perspectives option requires a one-quarter, 12-credit minimum, pre-approved study abroad component, which can count towards the matrix and/or the capstone requirements.) A list of approved courses is available on the program web site or from the advising office. In addition to the courses on the approved list, a maximum of 10 credits (of the 40 credits required) may be taken at the 100 and 200 level if pre-approved by the adviser.
7. Capstone Experience (10 credits, to include at least 5 credits of ENVIR 491): ENVIR 490, ENVIR 491, ENVIR 492.

Completion of requirements 1-5 above during freshman or sophomore years (or pre-transfer) is highly recommended.

Minor

Minor Requirements: 30 credits, including 15 credits from ENVIR 201, 202, 203; an additional 15 credits drawn from a list of program "matrix" courses and/or the capstone experience. 10 credits of the additional 15 credits may overlap with the student's major. A minimum of 5 credits must be taken from the program "matrix" outside the general discipline of the student's major. See adviser for list of matrix courses.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* The Environmental Studies major offers an interdisciplinary approach to environmental problems and develops the following broad skill sets: taking an integrated approach to environmental issues; recognizing that dealing with the scientific aspect of environmental issues requires grappling with the cumulative nature of scientific disciplines; appreciating that some of the most profound differences in perspective are related to cultural and economic setting; understanding the difference between stating a viewpoint and marshalling evidence to make a compelling argument; being able to find relevant data and evaluate its quality; being able to distinguish between data and interpretation and being able to handle data in a quantitatively appropriate way; being able to present one's viewpoint and/or findings both in writing and orally in a public setting.

Because the degree culminates with a senior capstone experience that requires 210 hours of fieldwork or independent research, all PoE undergraduates develop professional skills specific to their capstone project, and many prepare for the experience by taking suites of courses to develop specific areas of expertise.

Graduates have pursued careers or graduate studies in policy, law, environmental planning, community organizing, environmental health, nonprofit administration, and environmental education.

* *Instructional and Research Facilities:* The Program on the Environment Multipurpose Room, centrally located in 258 Mary Gates Hall, houses a small library of environmental resources, contains computer workstations for students, and serves as a meeting and study space. Because PoE is an interdisciplinary program, its students access resources, laboratories, and field stations across a range of UW departments, colleges, and schools.

* *Honors Options Available:* Departmental Honors. See adviser for details.

* *Research, Internships, and Service Learning:* All environmental studies majors complete a senior capstone experience, which includes an internship with a community-based organization or government agency, an undergraduate research project, and/or international fieldwork or study abroad. Program on the Environment students receive a weekly email listing of internship and career opportunities. For information on identifying internship, research, and career opportunities, see the "Undergraduate Resources" section of the department's Web page.

* *Department Scholarships:* None offered.

* *Student Organizations/Associations:* The UW Earth Club organizes the annual UW Earth Week events and year-round activities such as public-service projects, panel discussions, and social gatherings.

Of Special Note: Many students majoring in environmental studies also pursue a complementary Bachelor of Arts degree in humanities or social science or a complementary Bachelor of Science degree in physical or natural sciences, engineering, forestry, or fisheries. Students electing to pursue either a double major or a double degree are limited to 15 credits of overlap between the two major/degree programs.

Course Descriptions

See page 256.

Quantitative Science

Adviser

171 Mary Gates Hall, Box 352803

206-543-2550

cqs@u.washington.edu

The Center for Quantitative Science is an interdisciplinary program administered by the Office of Undergraduate Education. It provides high-quality instruction in mathematical and applied statistical methods for undergraduate students who major in the biological and ecological sciences, renewable resources management, and environmental studies. The center provides instruction in an atmosphere that emphasizes the use

of quantitative methods to better understand a variety of scientific phenomena. Faculty represent various applied scientific disciplines within the College of Forest Resources and the School of Aquatic and Fishery Sciences.

Students in environmental, biological, ecological, and resource management majors may wish to complete a minor in quantitative science to document their understanding of the mathematical and statistical methods used in these competitive and increasingly quantitative fields.

Minor

Minor Requirements: A 26-30 credits, as follows:

1. Core courses (20 credits): Q SCI 291, Q SCI 292 (or MATH 124, MATH 125); Q SCI 381, Q SCI 482
2. Electives (6-10 credits): Two Q SCI courses at the 300 or 400 level to include one course from Q SCI 480, Q SCI 483, Q SCI 486
3. A minimum grade of 2.0 is required in each course taken as part of the minor

School of Law

Dean

W.H. (Joe) Knight, Jr.

Associate Deans

Penny A. Hazelton
Patricia C. Kuszler

Assistant Deans

Dexter Bailey
Mary A. Hotchkiss
Sandra E. Madrid

Established in 1889, the School of Law is a member of the Association of American Law Schools and is on the American Bar Association's list of approved law schools. Graduates of the School are prepared to practice law anywhere in the United States. Additional information about the School is contained in the current School of Law catalog.

Facilities and Services

The School of Law is housed in the new William Gates Hall. It is equipped with classroom, library, lounge, and office facilities.

The Marian Gould Gallagher Law Library is one of the finest law libraries in the country. Its collection, among the largest university law collections on the West Coast, currently contains more than 450,000 bound volumes and volume equivalents of microform. In addition to the extensive main collection, it houses important materials that support the Asian, marine, sustainable international development, and tax law graduate programs and serves as a federal depository for selected United States government documents. An experienced audiovisual staff directs the use of video equipment in the trial advocacy and moot court programs. The library is equipped with the latest in microreaders and printers in order to make full use of the growing microform collection. The library is a subscriber to LEXIS, WESTLAW, the Western Library Network, and other research databases.

Juris Doctor Program

The Juris Doctor degree is conferred upon a student who has met the residence requirements, consisting of nine quarters of at least 12 credits each, and has earned at least 135 credits satisfactory to the School of Law.

As with most law schools in the United States, the first-year courses are required and are designed to introduce students to basic legal skills, foundational subject matter, and the variety of public and private processes with which the profession is concerned. Those courses deal with contracts, torts, property, civil procedure, criminal law, constitutional law, and basic legal skills.

Except for a required course in professional responsibility, the public service requirement, and an advanced writing project requirement, courses in the second and third years are elective. Therefore, a student may choose a program designed to suit his or her interests and needs. J.D. candidates are required to perform 60 hours of public-service legal work during the second or third year.

Admission

New students may enter the School of Law only in autumn quarter. Instruction begins for first-year students a few days earlier than the time set for upper-class students. Beginning students must have received a baccalaureate degree from an accredited college or university prior to commencing the study of law.

All applicants are required to take the Law School Admission Test (LSAT) and to register for the Law School Data Assembly Service (LSDAS). Registration packets and test information are available at most law schools and from Law School Admission Council, Box 2000, 661 Penn Street, Newtown, PA 18940-0998. Email: lsacinfo@lsac.org.

No specific prelaw course is required or recommended, and the School of Law subscribes to the remarks set forth on prelaw preparation in The Official Guide to U.S. Law Schools (2000 Edition). Applications for admission to the next entering class must be postmarked no later than January 15. To be assured of consideration for admission, an applicant must have complete credentials, including the LSDAS report, filed in the

School of Law by February 1. An application fee (at this writing, \$50) also is required.

Transfer Applicants

Students who have completed at least one year at a member school of the Association of American Law Schools may apply to this school for admission with advanced standing with credit for no more than one year of such work. A student who has completed or expects to complete at least two years of work at a member school of the Association of American Law Schools and who expects to graduate from that member school may apply to this school for admission as a non-degree candidate.

Applicants should request application forms and instructions from the admissions office in time to permit filing of all application materials by July 7.

Applications are considered only if vacancies exist. Selection of the applicants is based on evidence either (1) that the candidate can produce above-average work at this law school, or (2) that the candidate will contribute to the diversity of the student body.

Students working on law degrees to be conferred by the University have priority over non-degree candidates in the selection of courses. This policy is in accordance with the general University policy on the registration of nonmatriculated students.

Financial Aid

Students in need of financial assistance may receive University aid, School of Law aid, federal loans, or aid from all of these sources. To be considered for aid, applicants must submit the Free Application for Federal Student Aid (FAFSA) by February 28. FAFSAs are available in December at most college financial aid offices, or may be obtained by writing or calling the Office of Student Financial Aid, 105 Schmitz Hall, Box 355880, University of Washington, Seattle, WA 98195, 206-543-6101, offa@u.washington.edu. Applicants for admission should not wait until they have been admitted before applying for financial aid.

School of Law grants are awarded primarily on the basis of financial need, although scholarship, or other factors may be considered with regard to certain awards. Inquiries concerning School of Law aid should be addressed to Financial Aid Coordinator, School of Law, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-3020; uwlawaid@u.washington.edu.

Inquiries

A more detailed statement on admission policy and application procedure is available in the School of Law. Requests for application materials and the University law school bulletin should be addressed to Law School Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195-4617; admissions@law.washington.edu; 206-543-4078.

Graduate Program

Graduate Program Coordinator
William Gates Hall, Box 353020
206-543-4937
gradlaw@u.washington.edu

In addition to the professional law program leading to the Juris Doctor degree, the law faculty offers graduate programs leading to the Master of Laws (LL.M.) in Asian and comparative law, the law of sustainable international development, intellectual property law and policy, and taxation. The School of Law offers the Doctor of Philosophy (Ph.D.) degree in Asian and comparative law only.

Master of Laws

Admission Requirements

- * Minimum GPA of 3.00 or B grade-point-average in the most recent two years of study.
- * U.S. applicants must have completed their first degree in law (J.D. or equivalent) at a school accredited by the American Bar Association.

- * International students must have a first degree in law (LL.B., B.Law) or equivalent and a minimum TOEFL score of 580.

Degree Requirements, Asian and Comparative Law

36 credits, as follows:

- * Required courses: LAW B 551 (6), LAW 600 (6), LAW B 550 (3-4); two courses in Asian and comparative law
- * Elective courses: Additional courses, chosen in consultation with adviser, to bring total credits to 36.

Degree Requirements, Intellectual Property Law and Policy

40 credits, as follows:

- * Required core courses: LAW P 501 (8), LAW E 589 (6)
- * Additional requirement for students not trained in the common law system: LAW B 550 (3)
- * At least 16 additional credits drawn from a list of approved elective courses.
- * Research project and thesis

Degree Requirements, Law of Sustainable International Development

40 credits, as follows:

- * 15 credits must be earned in Law School classes. The remaining 25 credits may be earned in any other departments of the University. Sustainable International Development students are required to take courses in at least three departments other than the Law School.
- * Writing and Research Requirement: Completion of a research paper is required and is generally satisfied by LAW B 578 (6).
- * LAW A 545 (4)

Degree Requirements, Taxation

36 credits, as follows:

- * Required courses: LAW T 501 (3), LAW T 502 (3), LAW T 503 (2/3), LAW T 504 (3), LAW T 510 (3), LAW T 511 (1-4)
- * Core electives: Two of the following courses: LAW T 515 (3), LAW T 516 (3), LAW T 521 (3), LAW T 530 (3)
- * Electives: Additional courses, chosen in consultation with adviser, to reach 36 credits for degree

Doctor of Philosophy

Admission Requirements

Admission to the Ph.D. program is limited to exceptional scholar-lawyers who are fluent in English and in another language. Prospective Ph.D. students must normally complete the LL.M. program before being accepted as Ph.D. students. The School does, however, welcome applications from candidates with equivalent academic standing and a demonstrated capacity for advanced research and writing.

Degree Requirements

90 credits, as follows:

- * An LL.M. degree is counted toward the credit necessary for the Ph.D. program.
- * Doctoral thesis seminar (4 credits)
- * Other coursework (26-29 credits): Coursework varies according to student's research interest areas and is determined in consultation with supervising committee
- * Doctoral dissertation (27-30 credits)

Financial Aid

Scholarship funds for graduate students in law are quite limited. Inquiries should be made to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; gradlaw@u.washington.edu; 206-543-4937. Inquiries

Requests for applications and program brochures for all School of Law LL.M. programs except the LL.M. in taxation, as well as information regarding application procedures, should be addressed to Law School Graduate Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195, U.S.A.; gradlaw@u.washington.edu.

Requests for applications and program brochures for the LL.M. in taxation should be addressed to Gloria Strickland, Law School Graduate Tax Admissions, William Gates Hall, Box 353020, University of Washington, Seattle, WA 98195; gradlaw@u.washington.edu.

Course Descriptions

See page 542.

School of Medicine

Dean

Paul G. Ramsey
C314 Health Sciences

Associate Deans

Scott Barnhart
Albert J. Berger
John B. Coombs
D. Daniel Hunt
Eric B. Larson
Richard A. Molteni
Thomas E. Norris
Gordon A. Starkebaum
Andrew A. Ziskind

Assistant Deans

Carol F. MacLaren
Susan G. Marshall
Werner E. Samson

WWAMI Coordinators/Assistant Deans

Dennis Valenzano, University of Alaska (interim)
James R. Blackman, Boise, Idaho
Philip D. Cleveland, Spokane, Washington
Andrew Turner, University of Idaho and Washington State University
Sylvia J. Moore, University of Wyoming
Dwight E. Phillips, Montana State University (interim)

Established in 1946, the School of Medicine is the only medical school directly serving the states of Washington, Wyoming, Alaska, Montana, and Idaho (WWAMI). Located in the Warren G. Magnuson Health Sciences Center, the School operates a decentralized program of medical education (WWAMI) via a regional network of teaching affiliates.

The School's basic-science departments provide educational opportunities for students from all schools and colleges within the University. Clinical teaching programs are conducted at the University of Washington Medical Center, Harborview Medical Center, Children's Hospital and Regional Medical Center, and the Veterans Affairs Puget Sound Health Care System, as well as at other clinical affiliates in Seattle and throughout the WWAMI states.

The School admits 178 medical students to its first-year class and has a total enrollment of about 750 students pursuing the Doctor of Medicine degree. The full-time faculty numbers approximately 1,700 members. The affiliated University residency-training network enrolls approximately 900 house officers. Enrollment in the graduate programs in the basic sciences exceeds 500 students, and approximately 800 postdoctoral fellows are enrolled in various advanced training programs. The School has baccalaureate and graduate programs in occupational therapy, physical therapy, prosthetics and orthotics, and medical technology. The School participates in training a broad spectrum of other allied health professionals. The School is also home for the Physician Assistant Training Program known as MEDEX.

Academic Programs

Doctor of Medicine

Upon completion of the curriculum of the School of Medicine, the M.D. degree is awarded to those candidates who (1) have given evidence of good moral character, (2) have satisfactorily completed the requirements of the curriculum, (3) have fulfilled all special requirements, and (4) have discharged all indebtedness to the University.

Bachelor of Clinical Health Services

Candidates for the Bachelor of Clinical Health Services degree are admitted to the University of Washington at the junior-year level. They pursue an eight-quarter sequence of prescribed studies in the MEDEX Northwest Physician Assistant Training Program. Admission to the professional training program is competitive, administered by MEDEX Northwest within the School of Medicine. Because of the program's emphasis on prior medical experience, the great majority of applicants are working adults who have completed their pre-professional undergraduate course work at other colleges and universities.

Matriculation in the Bachelor of Clinical Health Services degree option is dependent upon both admission to the University and acceptance by MEDEX Northwest. Students who are accepted by MEDEX Northwest but who are not admissible to the University are classified as nonmatriculated students. They earn official University credits and receive a certificate upon completion of the program. For additional information, contact MEDEX Northwest Physician Assistant Program, Box 354725, 206-598-2600.

Bachelor of Science

A program leading to a baccalaureate degree with a major in microbiology is offered through the College of Arts and Sciences.

Bachelor of Science in Medical Technology

A curriculum in medical technology is offered by the Department of Laboratory Medicine. This program provides study in basic laboratory science that includes clinical laboratory training and is designed to prepare knowledgeable and skilled laboratory scientists for a variety of employment opportunities. Information concerning admission to the medical technology program appears under Laboratory Medicine in this catalog.

Bachelor of Science in Prosthetics and Orthotics

The Department of Rehabilitation Medicine offers a Bachelor of Science degree in prosthetics and orthotics. The curriculum provides professional training in the basic sciences and the clinical application, design, and fabrication of prostheses and orthoses. Information concerning admission to the curriculum in prosthetics and orthotics may be found under Rehabilitation Medicine in this catalog.

MEDEX Northwest Certificate Program

MEDEX Northwest is a program designed to train physician assistants. It provides primary-care, midlevel practitioners by training medical personnel with prior clinical experience. The program is accredited by ARC-PA, the Accreditation Review Commission on Education for the Physician Assistant. MEDEX Northwest places 70 to 75 students annually in a variety of sites in Alaska, Idaho, Montana, Nevada, Oregon, Washington, and Wyoming. Successful completion of the program culminates in the award of a Bachelor of Clinical Health Services degree and in a certificate.

MEDEX Northwest is an eight-quarter program. The first four quarters consist of intense clinical and didactic instruction at one of three training locations: Seattle, Spokane, or Yakima. The final four quarters are spent in clinical experiences throughout the WWAMI region. The first five months are spent in a variety of inpatient and outpatient clinical rotations and the last five months are spent in a family-practice preceptorship. The preceptorship is an on-the-job experience tailored to the practice of individual primary-care physicians and emphasizes diagnosis and treatment. At the completion of the program, students are eligible to sit for the national certifying examination for physician assistants.

Special Requirements

Applicants must have a minimum of two years of recent, full-time, hands-on experience in the direct delivery of medical care to patients, or current professional credentials and at least two years of recent experience in an allied health field. Applicants must have completed two college-level English courses (at least one must be in composition), human anatomy and physiology course work totaling at least 10 quarter-credit hours, and at least one science course in a discipline relevant to medicine, such as biology or chemistry. English prerequisite courses must have been taken in a college or university in the United States, Canada, the United Kingdom, Australia, New Zealand, or Ireland. All academic prerequisites must have been awarded with college-level credit with grades of 2.7 (B-) or better.

For additional information, contact MEDEX Northwest Physician Assistant Program, Box 354725; 206-598-2600. Web site: www.washington.edu/medical/som/depts/medex/. Email: medex@u.washington.edu.

Master of Occupational Therapy

The Department of Rehabilitation Medicine offers graduate degrees in occupational therapy. The curriculum provides professional training in the health sciences and in the theory and practice of occupational therapy as it

impacts occupational performance across the life span and in the various arenas of practice. Occupational therapy addresses daily living skills including self-care, work, and leisure/play. Information concerning admission to the occupational therapy program appears under Rehabilitation Medicine in this catalog.

Master of Physical Therapy

The Department of Rehabilitation Medicine offers graduate degrees in physical therapy. The curriculum provides professional education in the basic sciences and in the clinical use of physical therapy evaluation and management strategies in the treatment or prevention of neuromusculoskeletal dysfunction. Information concerning admission to the physical therapy program appears under Rehabilitation Medicine in this catalog.

Master of Science and Doctor of Philosophy

Work leading to master's and doctoral degrees is offered, in accordance with the requirements of the Graduate School, in the departments of Biochemistry, Bioengineering, Biological Structure, Immunology, Microbiology, Pathology, Pharmacology, and Physiology and Biophysics. Master's degree programs are offered by the departments of Laboratory Medicine, Medical History and Ethics, and Rehabilitation Medicine. Students may work toward these degrees concurrently with the M.D. degree, taking additional years beyond the typical four-year medical curriculum.

Concurrent degrees are possible in many other departments and colleges of the University. Recent graduates have pursued concurrent degrees in the basic sciences of medicine and the School of Public Health and Community Medicine. A student who intends to work toward a graduate degree should confer with the chairperson of the department in which graduate study is to be pursued and with the Associate Dean for Academic Affairs of the School of Medicine. Specific requirements for admission to work for advanced degrees appear in the Graduate School section of this catalog. Permission to pursue advanced degrees is granted to medical students only if they are progressing normally in the medical curriculum and show evidence of being able to take on this additional work load.

Doctor of Medicine

Admissions

(These procedures and policies described are subject to change. Information regarding changes is available from the School of Medicine Admissions Office.)

Selection Factors

Candidates for admission to the University of Washington School of Medicine are considered comparatively on the basis of academic performance, motivation, maturity, personal integrity, and demonstrated humanitarian qualities. A knowledge of, and exposure to, the needs of individuals and society and an awareness of health-care delivery issues are desired. Extenuating circumstances in an applicant's background are evaluated as they relate to these selection factors.

Applicants must submit scores from the Medical College Admission Test (MCAT). This exam must be taken no later than autumn of the year before matriculation and cannot be more than three years old at the time of matriculation. MCAT registration blanks are available through premedical advisers or through the Office of Admissions. Under exceptional circumstances, to be determined by the Admissions Committee, the GRE may be considered during the admissions process; however, if accepted, the applicant will be required to take the MCAT prior to matriculation.

The following science course requirements must be completed before matriculation but preferably should be completed by the time of application: A total of 32 semester hours or 48 quarter hours of undergraduate courses divided into (a) Chemistry, 12 semester/18 quarter hours, which can be satisfied by taking any combination of inorganic or organic chemistry, biochemistry, or molecular biology courses; (b) Physics, 4 semester/6 quarter hours; (c) Biology, 8 semester/12 quarter hours; and (d) Other ("open") science subjects, 8 semester/12 quarter hours, which can be met by taking other courses in any of the three categories above.

Although a biochemistry course is not absolutely required for admission to the medical school, it is very strongly suggested for entering students. The biochemistry course for the first-year medical students focuses on molecular mechanisms central to human health and disease and it is taught

with the presumption that participants have already mastered the fundamentals of biochemistry, including molecular genetics, structure and activity of proteins, and metabolism. A comprehensive undergraduate biochemistry course is the most expedient way to gain this knowledge.

Under exceptional circumstances certain course requirements may be waived for individuals who present unusual achievements and academic promise. All candidates must demonstrate substantial academic ability in their major field as well as in the required courses. Candidates should be proficient in the use of the English language and basic mathematics and are expected to have a basic understanding of personal computing and information technologies.

Those students who entered in the fall of 2003 had a mean GPA of 3.69 and the following mean MCAT scores: Verbal, 10.0; Physical Science, 10.3; Biological Science, 10.8; and a median Writing Sample of P.

Completion of three years of course work at an accredited college or university is the minimum required before possible matriculation; however, all entrants in recent years have earned bachelor's degrees. No specific major is advised. A broad background in the humanities and liberal arts is encouraged, indeed expected.

Application Procedure

The University of Washington participates in the American Medical College Application Service (AMCAS). The deadline for submitting an application to AMCAS is November 1 and no waivers are granted. After receiving the application from AMCAS, the School of Medicine will ask qualified individuals to submit a \$35 application fee and supplemental application materials. Every attempt will be made to notify applicants of the final action by the end of March of the year of matriculation.

Residents of the states of Washington, Wyoming, Alaska, Montana, or Idaho are eligible to apply. Individuals with a demonstrated interest in research may apply for the M.D./Ph.D. program (MSTP) regardless of residency. Applicants from outside this five-state region who come from disadvantaged backgrounds or who have demonstrated a commitment to serving underserved populations will be considered. Foreign applicants, in addition to the above requirements, must also have a permanent-resident visa. Applications will not be considered from persons who have failed to meet minimum standards at another medical or dental school.

The deadline for submitting the additional application materials is January 15. These supplemental materials include:

1. A supplemental application form. This will be sent to qualified applicants after the School of Medicine has received the AMCAS application.
2. A 300-word autobiographical statement in which the candidate describes the origin and development of his or her motivation to be a physician and any other issues of importance to the candidate. The applicant may request that the Personal Comments section of the AMCAS application be used to fulfill this requirement.
3. A concise statement, not exceeding 200 words, as to why the candidate wants to attend the University of Washington School of Medicine.
4. A premedical-committee letter of recommendation or three letters from instructors from whom the candidate has taken courses. These letters should be critical evaluations of the candidate's academic ability, strengths and weaknesses, the difficulty of course work undertaken, motivation for medicine, personal maturity, and special attributes and assets.
5. A \$35 fee. This will automatically be waived for those who have qualified for AMCAS fee waivers. Others seeking a waiver of this fee should submit their requests directly to the School of Medicine Admissions Office.
6. Acknowledgment of having read, understood, and of being able to meet, with or without reasonable accommodation, the Essential Requirements of Medical Education at the University of Washington School of Medicine: Admission, Retention and Graduation Standards to be sent with the supplemental application form.
7. Conviction/Criminal History Information Form. Washington state law requires that all individuals who have access to children under 16 years of age, developmentally disabled people, and other vulnerable persons, disclose background information concerning crimes and offenses against these populations.

Candidates from Wyoming, Alaska, Montana, and Idaho will be required to submit residency certifications from their respective state certifying officers. Proof of legal residence for Washington residents also may be requested. Determination of state of legal residence is not made by the School of Medicine; specific instructions regarding this requirement are furnished at

the time of application. Those who enter as residents of Wyoming, Alaska, Montana, and Idaho are expected to spend their first year at the university site in their particular state. Twenty Washington students begin their medical education by spending the first year at Washington State University in Pullman. Offers of acceptance, therefore, are conditional upon agreement to participate in the WWAMI Program.

Inquiries, address changes, or other information regarding the application should be transmitted in writing and directed to the Committee on Admissions, Office of Admissions, Box 356340, School of Medicine, University of Washington, Seattle, Washington 98195-6340; or email askuwsom@u.washington.edu.

Office of Multicultural Affairs

The Office of Multicultural Affairs assists students from disadvantaged backgrounds who are pursuing M.D. or M.D.-Ph.D. degrees. The program nurtures interests in medical careers by providing a variety of support services and enrichment activities in the areas of recruitment, education, admission, retention, and professional development. The School considers applicants from disadvantaged backgrounds or those who have a demonstrated commitment to work with underserved populations. Students should contact the Office of Multicultural Affairs for assistance during the application process. The program offers counseling and advocacy, referrals to University and community resources, tutoring, financial-aid information, and numerous opportunities to interact with other minority health-care professionals within the community. Various student organizations also provide minority medical students a means to interact socially and pursue shared interests, to offer peer support, and to assist with community-outreach activities.

U-DOC is a high-school summer-enrichment program offered by the Office of Multicultural Affairs. It is a six-week program for students who have completed their junior year in high school. U-DOC's goal is to foster, affirm, and encourage high school students' interest in the medical profession by allowing them to further explore medical careers and to obtain a valuable introduction to college life. U-DOC is offered in each of the five WWAMI states.

The Western Consortium Summer Medical Education Program (SMEP) offers undergraduate and some qualified postbaccalaureate students a six-week summer academic-enrichment program that includes biology, chemistry, physics, communications, study skills, and MCAT preparation. Structured clinical and research activities are also offered. Housing, stipends, and travel assistance are available.

A Prematriculation Program for entering minority or disadvantaged medical students is offered for six weeks during the summer. The program is designed to facilitate students' entry into medical school by providing instruction in histology as well as enrichment activities in areas such as study skills, stress management, test-taking skills, research, clinical practice, and community health. Stipends and travel assistance are available to students who qualify.

During the regular school year, the Office of Multicultural Affairs serves as a support network for both the academic and nonacademic needs of students, and facilitates students' access to the multiple resources in the School of Medicine, the WWAMI region, and the community.

The Native American Center of Excellence was established in 1992 as part of the Office of Multicultural Affairs to encourage Native American students to pursue medicine as a career, to promote research on Native American health issues, and to foster the preparation of Native American students for faculty roles in academic medicine. The Center of Excellence provides educational experiences that integrate western medicine with the Native American way of life, offers a variety of support services to promote the academic development of students, and sponsors a variety of educational opportunities within the Native American community.

Inquiries and requests for additional information may be obtained from the Office of Multicultural Affairs, Box 357430, School of Medicine, University of Washington, Seattle, Washington 98195-7430; 206-685-2489.

Medical Scientist Training (M.D.-Ph.D.) Program

A limited number of highly qualified candidates who wish to pursue both the M.D. and Ph.D. degrees are considered annually. M.D./Ph.D. students are permitted a wide choice of research specializations from among numerous disciplines and interdisciplinary areas of biomedical sciences. The program emphasizes continuity of both clinical and basic sciences exposure. Among participating graduate departments and interdepartmental disciplines are

biochemistry, bioengineering, chemistry, environmental health, epidemiology, genetics, immunology, microbiology, molecular biotechnology, pathology, pharmacology, physiology and biophysics, and zoology. The participating interdepartmental and affiliate programs are neurobiology and behavior, molecular and cellular biology. Students can also conduct their research at the Fred Hutchinson Cancer Research Center.

Applicants who wish to be considered for the M.D./Ph.D. program must submit the Medical Scientist Training Program application as soon as possible. Both the application and any supplemental material requested must be completed by January 15. Serious consideration is rarely given to applicants with minimal research experience and/or a cumulative GPA of less than 3.50 or MCAT scores of less than 10 in each category.

Applicants should correspond directly with the administrator of the Medical Scientist Training Program: MSTP
University of Washington
Health Sciences Building, Room I264
Box 357470
Seattle WA 98195-7470
206-685-0762
mstp@pathology.washington.edu
www.pathology.washington.edu/mstp/

Financial Information

Fees and Other Charges

All fees and extra service charges are payable in U.S. dollars and due at the time specified for such fees and charges. The University reserves the right to change any of its fees and charges without notice. Resident tuition for 2003-2004 is \$4,149 per quarter; nonresident tuition is \$9,796 per quarter.

Financial Assistance

Financial aid awards are based on the demonstrated need of the students. All applicants for aid must submit the Free Application for Federal Student Aid (FAFSA). This requires disclosure of financial information from the student and the student's parents. The Federal Direct Stafford Loan (subsidized and unsubsidized), Perkins Loan, and the Primary Care Loan are the primary sources of aid. Institutional loans are also available from the School of Medicine. Limited amounts of grant funds are available to Washington state residents who meet specific funding criteria. Parental information is not required for grant funds, the Stafford Loan, or the Perkins Loan.

Scholarships are available through the School of Medicine scholarship fund. These awards vary in amount and require financial information from the student and the student's parents. There is a separate application for the School of Medicine scholarship, which has a May 31 due date.

Financial aid information is distributed to all accepted applicants. The FAFSA form may be obtained at www.fafsa.ed.gov or from the UW Office of Student Financial Aid or the School of Medicine Financial Aid Office. The deadline for receipt of the financial-aid application by the processor is February 28. Applicants must meet this deadline to be considered for all available aid sources regardless of the status of their admission file. Late applicants are awarded only Stafford and Unsubsidized Stafford loans.

Outside employment is discouraged while the student is enrolled in medical-school course work.

Medical Curriculum

Basic Science Curriculum (148 Credits)

The first two years of the medical-student curriculum is identified as the Basic Science Curriculum. It consists of three phases, or groups, of courses in the human biology series: courses in the sciences basic to medicine, organ systems courses taught by basic and clinical disciplines, and introduction to clinical medicine. The first phase is designed to provide the background in basic disciplines required for the organ-system courses. In the second phase, emphasis is placed upon learning the normal and pathophysiologic properties of several human organ systems, and upon correlating these properties with clinical methods of data collection and problem formulation. Students pursue the Introduction to Clinical Medicine course throughout the first two years, learning to interview patients, obtain a medical history, and perform the physical examination.

Students pursue the Basic Science Curriculum during their first two years in the School of Medicine. The academic demands of the Basic Science Curriculum are scaled so that most students also will be able to take elective courses that will broaden the student's background.

First-Year Required Courses

- Microscopic Anatomy (Histology)
- Gross Anatomy and Embryology (including trunk and head and neck anatomy)
- Mechanisms in Cell Physiology
- Biochemistry
- Systems of Human Behavior I
- Cell and Tissue Response to Injury (Pathology)
- Microbiology and Infectious Disease
- Introduction to Immunology
- Nervous System
- Critical Reading and Evaluation of Medical Literature
- Introduction to Clinical Medicine

Second-Year Required Courses

- Cardiovascular System
- Respiratory System
- Principles of Pharmacology I
- Endocrine System
- Systemic Pathology
- Genetics
- Skin System
- Gastrointestinal System
- Epidemiology
- Hematology
- Musculoskeletal System
- Medicine, Health, and Society
- Urinary System
- Systems of Human Behavior II
- Principles of Pharmacology II
- Reproduction
- Nutrition for Physicians
- Introduction to Clinical Medicine

Clinical Curriculum (148 Credits)

The clinical curriculum is pursued in the third and fourth years of medical school. It includes prescribed clerkships to be completed by all students (84 credits or 42 weeks) in family medicine, internal medicine, obstetrics and gynecology, pediatrics, psychiatry, and surgery, plus clinical electives (32 credits or 16 weeks) in four clinical areas including clerkships in rehabilitation medicine/chronic care, emergency care/trauma, neurology, and surgery electives. Additional clinical or non-clinical selectives (a minimum of 32 credits or 16 weeks) are also required.

During the clinical curriculum, students gain clinical knowledge and gradually increase their clinical problem-solving abilities while working as junior members of the medical-care team. Each team is headed by a faculty clinician working in one of the medical school-affiliated hospitals, clinics, or practices.

Independent Investigative Inquiry

In addition to the basic and clinical curricula, each student must complete 8 credits in independent study and investigation in one or more of the biological, behavioral, sociocultural, or epidemiological sciences basic to medicine, culminating in a scholarly product or written paper. The purpose of this requirement is for the student to gain an understanding of the philosophy and methods of scientific investigation.

WWAMI Program

The WWAMI Program was initiated in 1971 as an effort to decentralize medical education to provide a broader range of educational opportunities for students, and to address the need for primary-care physicians oriented toward rural practice. It is an integral part of the undergraduate medical curriculum and is a fully accredited program of the School of Medicine. The WWAMI Program is named for the five states (Washington, Wyoming, Alaska, Montana, and Idaho) that share resources and responsibilities in the regional educational program. Funds appropriated to the WWAMI Program by the Wyoming, Alaska, Montana, and Idaho legislatures assure each state of positions for its students in the entering medical class each year.

First-Year Training

In the first year of the WWAMI Program, approximately 40 percent of the students admitted to the University's School of Medicine receive the first year of medical school training at Washington State University, the University of Wyoming, the University of Alaska, Montana State University, or the University of Idaho. Washington State University positions not filled by volunteers are assigned by lottery. Every Washington-resident applicant should recognize the opportunity of assignment to Washington State University during the first year. Students from Wyoming, Alaska, Montana, and Idaho attend their home-state institutions. While at these institutions, they enroll in prescribed one-year medical school basic-science courses taught by on-site science faculty and are provided supplemental resources from the University of Washington's School of Medicine faculty. These students join their classmates at the University of Washington's campus in Seattle for their second year of medical studies.

Third- and Fourth-Year Training

At the conclusion of the second year, students enter the portion of the curriculum that is predominantly clinical. Required, selective, and elective clerkships are described above. As part of the clinical training, students complete clerkships at the University of Washington, at its affiliated hospitals, or at community clinical units located in the five-state region. During the third and fourth year clerkships, School of Medicine full-time and clinical faculty members provide supervised clinical training in required as well as elective clerkships throughout the WWAMI region.

Enrichment Opportunities

Students may enhance their medical education through a variety of sponsored activities that offer students an opportunity to explore areas of special interest, such as working in rural or urban clinics that serve medically underserved communities, undertaking medical research projects, or participating in an international exchange program with a developing country. Brief descriptions of three of the more formally structured programs follow.

Rural/Underserved Opportunities Program (RUOP)

This program exposes students to rural medicine and utilizes clinical training sites in all five states. For one month during the summer between the first and second years, students work with physicians in small communities, offering a chance to better understand the challenges and opportunities in these settings. Students receive a stipend supported by the Family Health Foundation, the Academy of Family Physicians, Area Health Education Centers, and the School of Medicine.

Medical Student Research Training Program

Summer research opportunities are offered to UW medical students interested in gaining valuable experience from training in medical research. This research is planned and carried out under the supervision of a faculty sponsor and is undertaken during the summer between the first and second years. Student trainees in the program receive a stipend supported largely by gifts given by donors specifically to fund student research. The project is ten weeks, full-time, on a working schedule of forty hours per week, and the student may not be enrolled in courses for credit during this time. At the conclusion of the summer, the students prepare posters that are presented as part of the Medical Student Research Forum.

Student Evaluation and Promotion

The awarding of the Doctor of Medicine degree is contingent upon satisfactory completion of academic and noncognitive requirements. The latter includes the acquisition of behavioral patterns and attitudes consistent with the School's professional standards and the oath that all students take at the time of graduation. As such, student evaluation is based upon observations by the faculty and others involved in teaching of the student's behavior and conduct as well as papers and examinations. Every student is required to pass Steps 1 and 2 of the United States Medical Licensing Examination, all University of Washington examinations, and complete an approved Independent Investigative Inquiry project before receiving the Doctor of Medicine degree. Periodic reviews of student performance are conducted by the School's Student Progress Committee. Students are informed of their deficiencies and the remedial requirements, if any, for these deficiencies. Dismissal from the School may occur if the student fails to maintain an acceptable academic record, fails to follow academic directives provided by the School's committees, or fails to develop attitudes and behavioral patterns appropriate to a career in medicine.

The Faculty Council on Academic Affairs reviews the Student Progress Committee's actions, and the Dean of the School of Medicine has final approval of the committee's and council's recommendations. A review mechanism is available within this process. Once dismissal or withdrawal from the School has occurred, the student may petition for reinstatement through the Faculty Council on Academic Affairs. Reinstatement will not be considered without substantial evidence that the problems causing the dismissal or withdrawal have been resolved. Only one reinstatement petition through the Faculty Council on Academic Affairs is allowed. If more than one year elapses after the withdrawal or dismissal, the individual may be required to apply for readmission through the admissions process. If a reinstatement petition is denied by the Faculty Council, the decision is final with no further avenue for review. Subsequent requests for admission must be directed through the standard admissions procedures.

Honor Society

Alpha Omega Alpha (AOA) is a national honor medical society. A charter as Alpha of Washington was granted to the School of Medicine in 1950 by Alpha Omega Alpha. Members are elected by the membership of Alpha Omega Alpha on the basis of high scholarship and good moral character. The purpose of AOA is to recognize and perpetuate excellence in the medical profession. Its goals are to promote scholarship and research in medical school, to encourage high standards and conduct, and to recognize high attainment in medical science, practice, and related fields. Its motto is "Worthy to serve the suffering."

Grading System

For students entering in 2002 and subsequent years, the grades awarded in each course in the M.D. curriculum are Pass or Fail in the first-year basic-science curriculum; Honors, Pass, or Fail in the applied-science curriculum; and Honors, High Pass, Pass, or Fail in the clinical curriculum. The School's goal is to provide a curriculum that defines the competencies to be achieved by the student at each level. However, a pattern of documented evaluator concerns about a student's performance may indicate unsatisfactory performance when the record is viewed as a whole, even though passing grades have been assigned. Honors may be awarded in a course on predetermined criteria that may involve additional work in the subject as selected by the student. The grading system precludes the ranking of students and no class standing is assigned.

The School of Medicine reserves the right to revise or modify the curriculum, system of evaluation, or graduation requirements.

Graduation with Honors

A degree of Doctor of Medicine with Honors may be awarded to students with high achievement who, in addition, have demonstrated initiative and success in clinical and scholarly pursuits related to medicine. Candidates for graduation with honors are nominated by the departments each year and are selected on the basis of a review of their academic records by the Honors and Awards Committee.

Graduate Medical Education and Postdoctoral Training

The University of Washington School of Medicine offers a broad array of residency and fellowship programs. Training occurs at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Puget Sound Health Care System, Children's Hospital and Regional Medical Center, and other affiliated training sites in Seattle and throughout the WWAMI region. Postdoctoral research fellowship opportunities in the basic sciences are also offered.

Continuing Medical Education

The Office of Continuing Medical Education, School of Medicine, offers a wide variety of courses for physicians and health-care professionals in the Pacific Northwest and throughout the nation.

Offerings include short courses of one to three days, one- to two-week board-review courses, visiting professorships, preceptorships, and mini-residencies. Other offerings include lecture series at hospitals, video-tape presentations, self-directed instructional materials, and other specific courses requested by members of the medical community throughout the WWAMI region. Information on offerings is available from its Web site at www.uwcmce.org.

All physicians also are invited to participate in continuing medical education programs offered by clinical departments, such as grand rounds and regular conference series.

The University of Washington School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to sponsor continuing medical education for physicians. All programs sponsored by the Office of Continuing Medical Education are applicable to physician relicensure requirements of the Washington Board of Medical Examiners and for Category I credit of the Physician's Recognition Award of the American Medical Association. Prescribed credit for the American Academy of Family Physicians and other types of credit are included in the program offerings when appropriate.

Brochures and calendars for courses are available for more detailed information. For information concerning Continuing Medical Education programs, contact:

University of Washington School of Medicine
Office of Continuing Medical Education
Box 358220
1325 4th Avenue, Suite 2000
Seattle, Washington 98101-8220
Telephone: 206-543-1050 or 1-800-869-2633
Email: cme@u.washington.edu
Web site: www.uwcmce.org

Anesthesiology

BB1459 Health Sciences

The Department of Anesthesiology maintains an active program of teaching and research for both the specialist and nonspecialist. Medical students are introduced to the principles of anesthetic management and the effects of anesthetic agents on circulatory and respiratory physiology. The clinical-clerkship program provides basic training in airway management and care of the unconscious patient. A three-year residency program is available for physicians who desire specialty training in anesthesiology. In addition, advanced clinical and research training is offered in several major subspecialty areas (cardiac anesthesia, neuroanesthesia, pediatric anesthesia, obstetrical anesthesia, pain management, and regional anesthesia). Opportunities for collaborative research are available to undergraduate and graduate students. The department conducts a regular series of clinical conferences, didactic lectures, and research seminars. Questions regarding medical student clerkships may be directed to Dr. John Bramhall at 206-231-2847 or bramhall@u.washington.edu. Other training questions may be directed to the Residency Coordinator at 206-543-2773 or lfg@u.washington.edu.

Course Descriptions

See page 548.

Biological Structure

G514 Health Sciences

The department promotes an understanding of biological processes through the study and analysis of structure-function relationships. The research problems that interest members of the faculty are diverse, including cellular differentiation and development explored in a variety of biological systems, neuroscience, molecular biophysics, biomolecular structure, and quantitative biology with an emphasis on computer-graphic representations of biological structures. This diversity creates a lively atmosphere in the department that provides a stimulating environment for the training of scientists with a variety of backgrounds.

The Department of Biological Structure recruits students through interdisciplinary Ph.D. programs at the University of Washington. Faculty of the Department of Biological Structure are affiliated with one or more of these programs that provide high quality training in a wide range of scientific research areas. These multidisciplinary programs include faculty from the departments of Biochemistry, Bioengineering, Biological Structure, Botany, Environmental Health, Genetics, Immunology, Microbiology, Molecular Biotechnology, Oceanography, Pathobiology, Pathology, Pharmacology, Physiology and Biophysics, Zoology as well as research groups in the Fred Hutchinson Cancer Research Center.

Course Descriptions

See page 550.

Comparative Medicine

T142 Health Sciences

The Department of Comparative Medicine provides education and research opportunities in the use of animals in biomedical research, testing, and education. In addition, training is provided for veterinarians in the diagnosis, treatment, and prevention of the diseases of laboratory animals. Current educational programs include scheduled courses in the principles and techniques of animal experimentation (C MED 407) for biomedical graduate students, zoonotic diseases, and training in laboratory-animal medicine for veterinary medical students and veterinarians, combined with a Master of Science degree program in comparative medicine. Areas of current research interests include enteric disease, lymphocyte biology, biology of aging, mouse genomics, generation and characterization of transgenic animal models, somatic cell gene transfer, and animal models of gene therapy.

Graduate Program Coordinator
T136 Health Sciences, Box 351790
206-685-3261

Postdoctoral Program

Postdoctoral training in the areas of laboratory animal medicine and comparative pathology is offered to persons with a D.V.M. or equivalent degree. Training consists of a combination of course work, clinical residency rotations, and research leading to a Master of Science degree in comparative medicine. The program also prepares participants for specialty certification by the American College of Laboratory Animal Medicine. Financial assistance is normally provided.

A detailed description of the postdoctoral program is available on the department's Web site at depts.washington.edu/compmed/department/.

Master of Science

The Master of Science degree in comparative medicine provides advanced training in comparative medicine to veterinarians. Admission to the degree program requires acceptance into the department's Postdoctoral Training Program. The degree option involves additional elective courses, the completion of a more-involved research project, and a thesis.

Predoctoral Program

This program is designed to acquaint veterinary medical students with laboratory-animal medicine as a veterinary specialty. Specific areas covered include control/treatment of the principal diseases of common laboratory animals and their role in biomedical research. Blocks of four to eight weeks are available for fourth-year students year-round. Stipend support is normally provided.

Course Descriptions

See page 551.

Family Medicine

C408 Health Sciences

Family medicine is the discipline concerned with the continuing and comprehensive care of individuals and their families. The prime instructional goal of the department is the education and training of physicians who will apply the knowledge and skills of this and other medical disciplines in family practice. Implicit in this goal is the necessity for continual development of new knowledge and its application in the clinical activities of the department.

The Department of Family Medicine was founded in 1971 and is involved with instruction of medical students in several ways. These include presentations in the basic curriculum of the first two years, clinical

clerkships as part of the clinical core curriculum, and other elective courses open to all medical students. A graduate residency program in family medicine provides clinical training meeting the standards of the American Board of Family Practice and the Council on Graduate Medical Education of the American Medical Association. Active affiliations are maintained throughout the WWAMI region in predoctoral, residency, fellowship, and continuing medical education in clinical care, teaching, and research.

Course Descriptions

See page 553.

Genome Sciences

K328B Health Sciences Building

The Department of Genome Sciences was created in 2001 with the merge of the Department of Genetics and the Department of Molecular Biotechnology.

Graduate Program

Graduate Program Coordinator
K336 Health Sciences, Box 357730
206-616-7297
gensci@u.washington.edu

The Department of Genome Sciences offers a graduate program leading to the degrees of Master of Science and Doctor of Philosophy. Students are admitted only to the doctoral program and may be granted the Master of Science in lieu of the Ph.D.

The faculty and students of the Department of Genome Sciences study a broad range of topics, including the genetics of *E. coli*, yeast, *C. elegans*, *Drosophila*, and mouse; human and medical genetics; mathematical, statistical and computer methods for analyzing genomes and theoretical and evolutionary genetics; and genome-wide studies by such approaches as sequencing, transcriptional and translational analysis, polymorphism detection, and identification of protein interactions. Successful completion of the graduate program, generally over a period of five years, leads to the Ph.D. in Genome Sciences.

The department's goal is to address leading edge questions in biology and medicine by developing and applying genetic, genomic and computational approaches that take advantage of genomic information now available for humans, model organisms and a host of other species.

Doctor of Philosophy

Admission Requirements

- * Baccalaureate or advanced degree, either in a science such as biology, biochemistry, or related field, or in a computational area such as computer science or mathematics. The ideal candidate has experience in both areas. The most competitive applicants have excellent GRE scores as well as extensive laboratory research experience.
- * Personal statement describing the applicant's academic and scientific background, research goals, and motivation for applying
- * Curriculum vitae
- * Unofficial copies of transcripts.
- * Unofficial copies of GRE scores (and TOEFL scores, for international applicants). Applicants who have provided official scores to the UW Graduate School need not send additional copies.
- * Three letters of reference from professors or others who are able to provide insight on the applicant's qualifications. Reference letters may be submitted online or by hard copy.
- * Applicants still in school and who will be taking additional courses not yet listed on the transcript should send a list of additional courses to be taken before graduation.

Degree Requirements

90 credits, as follows:

- * *First year:* Core courses, covering such topics as gene regulation, genomics, genetic analysis, genomic informatics, computational biology, proteomics, and population genetics, as well as literature review.

Students rotate through a minimum of three laboratories before selecting a thesis lab at the end of the first year. Actual courses are determined in consultation with adviser.

Electives focused on specific areas of interest. Students have the option of selecting mentors from core faculty members in the Department of Genome Sciences as well as from adjunct and affiliate faculty members from several UW departments and the Fred Hutchinson Cancer Research Center.

- * *Second year:* Thesis research and additional electives. At the end of the second year, the student takes the General Exam for Ph.D. candidacy.
- * *Third year:* Students serve as teaching assistants for two undergraduate courses.
- * *Final year:* Most students complete their research and defend their dissertation during their fifth year.
- * During all years, students participate in the departmental Journal Club and Research Reports functions, and attend presentations of well-known researchers via the departmental seminar series.

Financial Aid

Genome Sciences provides full funding, including a competitive twelve-month salary, tuition waiver, and health insurance. Support is contingent upon satisfactory academic progress.

Research Facilities

The department is currently housed primarily within the J & K Wings of the Health Sciences Complex but will move in spring 2006 to the new Genome Sciences/Bioengineering building currently under construction. Students in the department are assigned space in the laboratories of faculty members with whom they do their rotations or dissertation research. State-of-the-art research facilities are available in the department for cellular, protein, and DNA analysis. Extensive computer and library resources are available to students.

Course Descriptions

See page 554.

Immunology

H564 Health Sciences

For those contemplating careers in biomedical research, immunology provides challenging and exciting intellectual opportunities. Progress in the discipline in the past decade has been extraordinary, a fact that is nowhere more visible than at the University of Washington. The Department of Immunology, launched in 1989, now boasts more than 200 scientists, students, and technicians, all engaged in elucidating mechanisms underlying immune recognition and responsiveness. Current members of the department have distinguished records in the area of lymphocyte signaling, T and B cell development, macrophage function, antigen processing, immuno-tolerance, and the structure of antigen receptors.

Consider for a moment the fundamental processes that underlie immune function. First, millions of potentially injurious macromolecules must somehow be recognized. Second, recognition of these macromolecules, generally structures associated with potential pathogens, must trigger powerful effector mechanisms that permit elimination of the offending microorganisms. Finally, these recognition and effector systems must somehow distinguish the universe of potentially harmful molecules from an equally diverse repertoire of structurally similar 'self' components. How is such exquisitely specific molecular recognition achieved? How do the cells responsible for mediating host defense develop, and what signaling systems direct their responses? These questions can now be productively addressed using biochemical, genetic, and cell biological techniques.

Graduate Program

Graduate Program Coordinator
H564 Health Sciences, Box 357650
206-685-3955, fax 206-543-1013

The Department of Immunology continues to grow and includes more than 25,000 square feet of laboratory space housed on three floors of the H and I wings of the Health Sciences Center. Joint faculty members (those holding primary appointments in other departments) have laboratory facilities in adjacent buildings. Individual laboratories are well equipped for modern biomedical research, and there are central departmental facilities for fluorescence-activated cell sorting, confocal microscopy, and the production of transgenic animals. Students have access to all the instruments and to state-of-the-art microcomputer-based data manipulation. The departmental library maintains recent copies of all major immunology journals and many more are available online or in the nearby University of Washington Health Sciences Library, which is one of the premier scientific libraries in the United States, providing access to scientific literature in all relevant disciplines.

Students are admitted for autumn quarter; the application deadline is January 1 for U.S. citizens, and November 1 for international applicants. The requirements for admission are flexible; however, most successful applicants will have completed survey courses in biology, chemistry, and physics, one year of organic chemistry, and mathematics through integral calculus. Prior exposure to immunology through formal course work or laboratory research is desirable. All immunology graduate students are assured of financial support for the term of their studies.

Master of Science

Students are not admitted to the department specifically as candidates for a master's degree. A terminal master's degree can be awarded if the faculty deems the student has made some progress in the program but not enough to be consistent with earning the Ph.D.

Doctor of Philosophy

Admission Requirements

Requirements for admission are flexible. However, most successful applicants have completed survey courses in biology, chemistry, and physics; one year of organic chemistry; and mathematics through integral calculus. Prior exposure to immunology through formal coursework, or especially through laboratory research, is desirable. A bachelor's degree is required, as is evidence of superior scholarship and above average performance on the GRE General Test. A GRE subject test is not required.

International students must take the Test of English as a Foreign Language (TOEFL); 250 is the minimum acceptable score on computer test.

Degree Requirements

90 credits, as follows:

- * 18 graded credits in the first two years of study, First-year coursework consists of consecutive 5-week long courses taken autumn through spring quarters - two per quarter; in winter quarter, all first year students also take Immunology 532 (4 graded credits), for a total of 13 or 13.5 graded credits the first year, depending on course choices (see below). In the second year, 4.5 or 5 additional graded credits are required, earned by taking electives during winter and/or spring quarters. As part of their first- and second-year coursework, students take two 5-week courses that specifically focus on cancer immunology.
- * In autumn quarter of the first year, students may take an elective and attend selected lectures of the undergraduate immunology course, IMMUN 441. Students are required to attend the departmental seminar series, Journal Club, and research -in-progress talks beginning the first quarter and continuing throughout enrollment in the program.
- * All elective courses must be relevant to biomedical research, and be rigorous enough to include either a final exam or required written paper for a grade. Elective classes must be at the 500 level, and receive a numerical grade.
- * Each graduate student takes the Qualifying Exam during July immediately following his or her second year of classes. (M.S.T.P. students take their Qualifying Exams following their first year of graduate classes.) The qualifying exam itself is two parts - written and oral.
- * Students who pass the Qualifying Exam then begin preparing for the General Exam, which must be taken within 15 months of the Qualifying Exam.
- * The dissertation must meet all format requirements before being accepted by the Graduate School.

Course Descriptions

See page 557.

Laboratory Medicine

NW 120, UW Medical Center

Medical technology, offered by the Department of Laboratory Medicine, is a profession of highly knowledgeable and skilled individuals who perform clinical laboratory tests on patient samples. This is a critical part of health care, as the results obtained by these laboratory tests are a vital tool for physicians in their diagnosis, treatment, and prevention of disease.

Undergraduate Program

206-598-6131
medtech@u.washington.edu

The Department of Laboratory Medicine offers the following program of study:

- * Bachelor of Science degree in Medical Technology

Bachelor of Science

1. Pre-professional Phase. During the first two years, students enroll as pre-majors in the College of Arts and Sciences, satisfying general education requirements as well as completing prerequisite courses.
2. Professional Phase. The professional phase begins autumn quarter of the third year and continues for seven consecutive quarters at the UW School of Medicine. Courses in the first year of the professional phase provide students an appropriate theoretical background and basic technical skills that enable them to function effectively in the clinical laboratory.

The final year is offered in the clinical laboratories of the UW Medical Center and its principal affiliates. Students in the core clinical laboratories receive on-the-bench training in chemistry, hematology, immunohematology, and microbiology.

Suggested First- and Second-Year College Work: Completion of University writing, reasoning, and general education requirements. Electives, not required for admission or graduation, may include: CHEM 321, MICROM 301, GENET 351, 371, B STR 301, PHIL 115, PHIL 241, CLAS 101, CLAS 205, PATH 410, UCONJ 420. Begin taking admission requirements, shown below.

Department Admission Requirements

BIOL 180, BIOL 200 and BIOL 220; CHEM 142, CHEM 152 and CHEM 162; CHEM 223 and CHEM 224 (or CHEM 237, CHEM 238 and CHEM 239); MATH 124 or MATH 144 or STAT 220. BIOL 118 is recommended, but not required.

Complete all general education requirements including 10 credits of Individuals & Societies, and 10 credits of Visual, Literary, & Performing Arts, as well as all required English and writing courses.

Students admitted to the Medical Technology program must be exempt from or have successfully completed any required English as a Second Language (ESL) courses no later than August 31 of the application year or admission will be cancelled.

Application Procedure: See program adviser for application form. Application deadline is February 15, to begin the following autumn quarter.

Major requirements

142-146 credits as follows:

1. Courses Required for Admission (44-47 credits): See list above.
2. Didactic Courses (52-53 credits): BIOC 405, BIOC 406; MICROM 440, MICROM 441, MICROM 442, MICROM 443, MICROM 444, MICROM

445; LAB M 321, LAB M 322, LAB M 418, LAB M 419, LAB M 420, LAB M 421.

3. Clinical Rotations (46 credits): LAB M 423, LAB M 424, LAB M 425, LAB M 426, LAB M 427.
4. A minimum grade of 2.0 in all LAB M courses and a minimum GPA of 2.00, both cumulative and in required courses, are required for graduation.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* Graduates of the Medical Technology Program are expected to have in-depth knowledge of the relationships between laboratory data and pathologic processes, and how laboratory data relate to clinical medicine. They have experience with the performance and quality control of routine and specialized medical laboratory testing procedures and an understanding of the theoretical basis of these procedures. In addition, they have experience trouble-shooting and resolving typical problems in the clinical laboratory and are familiar with laboratory quality assurance, safety, governmental regulations, information systems, management, research design and practice, educational methodology, continuing education, communication, ethics, professionalism, and concepts and principles of laboratory operations.

Successful medical technologists enjoy studying the biological, chemical, and physical sciences and find personal satisfaction and intellectual reward in applying scientific methods in the diagnosis and evaluation of disease. A medical technologist may practice as a generalist, using knowledge in several of the scientific areas, or may specialize in one scientific area in larger hospitals. Medical technologists may work in a variety of settings, including clinical laboratories in large medical centers, hospitals, and clinics. Others carry out research in industrial, public health, and medical laboratories, or teach in hospitals, colleges, and universities.

- * *Instructional and Research Facilities:* The major training sites are the University of Washington Medical Center and Harborview Medical Center. Affiliate hospitals include Children's Hospital and Regional Medical Center, Dynacare Northwest, Group Health Cooperative, MultiCare Health System, Northwest Hospital, Providence Everett Medical Center, Providence St. Peter Hospital, Veterans' Affairs Puget Sound Health Care System, and Virginia Mason Medical Center. The Puget Sound Blood Center is also affiliated with the University of Washington. These laboratories support patient care, and provide training and research in the major clinical divisions of chemistry, hematology, immunohematology (blood banking), and microbiology, including multiple subspecialties in these divisions. In addition, students can either receive training in a variety of clinical laboratory rotations designed to enrich their core clinical experiences or participate in research in collaborative projects supervised by faculty members in the Department of Laboratory Medicine. Enrichment rotations include subspecialty sections in chemistry, hematology, and/or microbiology; molecular diagnostics laboratories; and laboratories where multi-tasking skills are utilized.

- * *Honors Options Available:* None offered

- * *Internship Opportunities:* One or two internships per year in Japan available to graduates of the Medical Technology Program.

- * *Department Scholarships:* None offered.

- * *Student Organizations/Associations:* None currently active.

Of Special Note: The Medical Technology Program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 8410 W. Bryn Mawr Avenue, #670, Chicago, Illinois 60631-3415, (312) 714-8880. Graduates are eligible for certification by the Board of Registry of the American Society for Clinical Pathology and by the National Credentialing Agency for Laboratory Personnel, Inc.

Course Descriptions

See page 558.

Medical Education and Biomedical Informatics

E312 Health Sciences

The Department of Medical Education and Biomedical Informatics (MEBI) is comprised of three units: the Division of General Medical Education, the Division of Biomedical and Health Informatics, and MEDEX Northwest-the Division of Physician Assistant Studies. The Division of General Medical Education serves the medical school and health sciences community through program support, evaluation, and research in the field of medical education (www.mebi.washington.edu). The Division of Biomedical and Health Informatics consists of a research and training program that emphasizes both basic and applied aspects of informatics with a view toward making a difference in people's lives through interdisciplinary collaboration between faculty and students (www.bhi.washington.edu). MEDEX Northwest is a regional program that selects experienced health care providers for training as physician assistants and is dedicated to improving access to medical care and emphasizes delivery of health care services to medically underserved populations in the Northwest (www.medex.washington.edu).

The Department of Medical Education and Biomedical Informatics offers courses in the theory and application of medical education and biomedical and health informatics. Courses are designed for faculty, graduate and undergraduate students, postgraduates and fellows in the health sciences who desire further training in the methods, issues, research, and technology of medical education and biomedical informatics. MEBI offers masters and doctoral degrees, as well as certificates and fellowship training, in biomedical and health informatics. MEDEX Northwest offers a program of study leading to a certificate with an optional degree available (a Bachelor of Clinical Health Services). MEDEX also offers an optional masters degree pathway link with the Extended Degree Program in Public Health. MEDEX provides full-time training in three sites (Seattle, Spokane, and Yakima) and offers part-time training in Seattle and Spokane.

Graduate Program

Graduate Program Coordinator
E312 Health Sciences, Box 357240
(206) 221-6859

Master of Science

Admission Requirements

- * Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.
- * A minimum undergraduate grade point average of 3.00, for the last 90 graded quarter credits or 60 graded semester credits.
- * Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
- * GRE scores are required unless the applicant holds an earned doctorate (such as Ph.D., D.D.S., M.D., Ed.D., J.D.) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.
- * GRE scores are required for all international applicants, including holders of foreign doctorates (such as Ph.D., D.D.S., M.D., Ed.D., J.D.).
- * A test of English language proficiency (usually the TOEFL) is also required for most all international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

Degree Requirements

60 credits, as follows:

- * Foundational courses: MEBI 530 (3), MEBI 550 (3), MEBI 552 (3); either LIS 510 (4) or LIS 544 (3); two of the following courses: MEBI 534 (3), MEBI 535 (3), HSERV 503/EPI 503 (3);*a graduate-level statistics class
- * Elective courses: In addition to the foundational courses, all M.S. students must take four additional courses to establish depth of knowledge in their chosen area of specialization. These must be approved by the student's academic advisor.

- * Research seminars: At least 3 credits of MEBI 591 and at least 3 credits of MEBI 590
- * Thesis and final exam: All students must complete an M.S. thesis and pass a final exam for the Master's degree.

Doctor of Philosophy

Admission Requirements

- * Possession of a baccalaureate degree from an institution within the United States or an equivalent degree from a recognized college or university from outside the United States.
- * A minimum undergraduate grade point average of 3.00, for the last 90 graded quarter credits or 60 graded semester credits.
- * Prior formal college-level coursework, verified by official transcripts, in mathematics (including statistics), computer programming (at least two quarters), and biology (or zoology), as evidenced by official transcripts.
- * GRE scores are required unless the applicant holds an earned doctorate (such as Ph.D., D.D.S., M.D., Ed.D., J.D.) from an accredited U.S. institution. The GRE scores must be from testing within the past five years.
- * GRE scores are required for all international applicants, including holders of foreign doctorates (such as Ph.D., D.D.S., M.D., Ed.D., J.D.).
- * A test of English language proficiency (usually the TOEFL) is also required for most all international applicants, unless they have an earned undergraduate or graduate degree from an accredited U.S. institution. For the TOEFL a minimum score of 600 (paper-based) or 250 (computerized) is required, and the scores must be from a test taken within the past two years.

Degree Requirements

90 credits, as follows:

- * Foundational courses: MEBI 520 (2), MEBI 530 (3), MEBI 550 (3), MEBI 552 (3); either LIS 510 (4) or LIS 544 (3); two of the following: MEBI 534 (3), MEBI 535 (3), HSERV 503/EPI 503 (3); a graduate level statistics class
- * Courses for depth of knowledge: In addition to the foundational courses, all Ph.D. students must take five additional courses to establish the necessary depth of knowledge in their chosen area of specialization. These must be approved by the student's academic advisor.
- * Research seminars: 12 credits of research seminars that must include at least 6 credits of MEBI 591 and at least 3 credits of MEBI 590
- * Oral presentations: All students must satisfactorily present material in an oral format. Students should present at least once per year. This requirement is expected to be fulfilled by journal club and research seminar (MEBI 590 and MEBI 591) presentations.
- * Formal exams:
 - o The Qualifying Exam: All students must pass a qualifying exam (oral and written) that covers breadth of knowledge prior to formally creating a Ph.D. supervisory committee and proceeding with their dissertation research.
 - o The General Exam: The general exam includes an oral and written part. The oral portion is a public presentation of the student's area of research, and includes an oral exam covering the student's in-depth knowledge of their area.
 - o Final Exam (dissertation defense): A candidate for the Ph.D. must present a dissertation demonstrating original and independent investigation and significant achievement in the field of Biomedical and Health Informatics.

Course Descriptions

See page 560.

Medical History and Ethics

A204 Health Sciences Building

Undergraduate Program

Adviser
A204 Health Sciences Building, Box 357120
206-543-5145
mheinfo@u.washington.edu

The Department of Medical History and Ethics offers the following programs of study:

- * A minor in medical history and ethics

Minor

Minor Requirements: 25 credits of medical history and ethics and related courses, including MHE 401 or MHE 417; one of MHE 411, MHE 474, PHIL 240, or PHIL 242; plus an additional 14 credits selected from MHE 402/PHIL 342, MHE 413, MHE 422, MHE 424, MHE 440/PHIL 459, MHE 474/PHIL 411, MHE 481, MHE 483, MHE 485, MHE 497, MHE 498, MHE 499, ANTH 322/RELIG 320, ANTH 375, ANTH/HSERV 475, ANTH 476, 477, ENGL 364, GEOG 280, HIST 311, HIST 312, PHIL 102, PHIL 160, PHIL 345, PHIL 410, and PHIL 440. Minimum grade of 2.0 required in each course presented for the minor. See the department's Web site for periodic updates of acceptable electives.

Course Descriptions

See page 561.

Medicine

RR512 University of Washington Medical Center

domchair@u.washington.edu

Active programs in teaching, research, and patient care are carried on at the University of Washington Medical Center, Veteran's Administration Puget Sound Health Care System (VAPSHCS), Harborview Medical Center, Pacific Medical Center, the Puget Sound Blood Center, the Northwest Kidney Center, and the Fred Hutchinson Cancer Research Center. Major affiliations for clinical teaching also exist with Providence Medical Center and Swedish Hospital Medical Center. There are many additional affiliations with community hospitals in Seattle, the state of Washington, and the WWAMI region. Medical students, interns, medical residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

Course Descriptions

See page 562.

Microbiology

G315 Health Sciences

Microbiology is a natural science that deals with microorganisms such as bacteria, fungi, protozoa, algae, and viruses. It is concerned with the nature and properties of these organisms, their effects on humans and the environment, and how they can be exploited to provide useful products.

Undergraduate Program

The Bachelor of Science in microbiology is granted by the College of Arts and Sciences. For a description of the undergraduate program in microbiology, see College of Arts and Sciences section.

Graduate Program

Graduate Program Coordinator
G315 Health Sciences, Box 357242
206-543-2572
advmicro@u.washington.edu

The Department of Microbiology offers a graduate program leading to the Doctor of Philosophy degree. Students interested in graduate work should obtain the necessary application forms from the department.

Admission Requirements

Students can be admitted to the Ph.D. program with a background in any biological science discipline. Selection is based on the evaluation of a

student's undergraduate record for indications of the ability to excel in independent, creative research. The department strongly recommends that undergraduate preparation include courses in biochemistry, physics, general and organic chemistry, microbiology, molecular biology and cell biology. To be competitive with the applicant pool, prospective students are also strongly advised to seek opportunities to carry out undergraduate research.

Required background courses (generally satisfied prior to entry into the graduate program):

- * A one year course in biochemistry (equivalent to BIOC 440, 441, and 442)
- * A course in classical and molecular genetics (equivalent to GENOME 371 or 372)
- * A course in general microbiology (equivalent to MICROM 410)
- * A course in medical microbiology and basic immunology is recommended for those considering research in the area of medical microbiology or virology

Degree Requirements

90 credits minimum, as follows:

- * Conjoint courses (6 credits): 6 credits from the following conjoint courses: CONJ 524, CONJ 531, CONJ 532, CONJ 533, CONJ 534, CONJ 535, CONJ 537, CONJ 538, CONJ 539, CONJ 541, CONJ 543, CONJ 544, CONJ 545, CONJ 546, CONJ 547, CONJ 548, CONJ 549 (1.5 credits each). It is recommended that students take additional conjoint courses or choose one or more of the Genome Sciences modules: GENOME 551, GENOME 552, GENOME 553, GENOME 554, GENOME 555, GENOME 556, GENOME 559 (1.5 credits each).
- * Virology and Bacteriology courses (6-7 credits): Three of the following courses; one virology and one bacteriology course must be among those selected: MCB 532 (3), MCB 542 (3), MICROM 441 (4), MICROM 450 (3), MICROM 510 (3), MICROM 530 (3), MICROM 553 (3)
- * Faculty Research Presentations for first-year students: MICROM 599 (2)
- * Lab Rotation: MICROM 500, minimum of three quarters
- * Journal Club: MICROM 522, continuous enrollment
- * Seminar: Microbiology 520 seminar series or attendance at Fred Hutchinson seminars. Students at Fred Hutchinson are also encouraged to attend the Microbiology seminars. To be taken every quarter unless a conflict with teaching exists.
- * Research Discussion Groups: To be taken every quarter. Students should register for the appropriate course number for credit.
- * Additional requirements:
 - o Teaching assistantship in at least two lab courses for undergraduates (usually satisfied in the first and/or second year).
 - o Give at least two formal lectures in an undergraduate course (third or fourth year).
 - o Be first author on multiple papers related to thesis research which are published or accepted for publication in refereed journals. Under some circumstances, one first-author publication would satisfy this requirement.
- * General exam, dissertation, final exam

Course Descriptions

See page 564.

Neurological Surgery

700 9th Avenue, Harborview Medical Center

askuwns@u.washington.edu

The Department of Neurological Surgery is dedicated to teaching and research in the entire spectrum of diseases of the central and peripheral nervous system. Instruction in this area is provided for medical students and postgraduate physicians.

The department's medical-student instruction includes participation in the human-biology curriculum as well as in elective basic-science and clinical experiences. These are available at Harborview Medical Center, University of Washington Medical Center, Veterans Affairs Puget Sound Health Care Center, and Children's Hospital and Regional Medical Center. The department also has several course offerings correlating research and clinical problems of the nervous system, including the research seminars in

neuro-oncology, molecular imaging, stem cell biology, and clinical and basic-science correlates of the epilepsies.

Selected medical students also may elect research experience within the Department of Neurological Surgery. The department research facilities are housed in the Medical Research Tower of the University of Washington Medical Center, at Harborview Research and Training Building, and at Veterans Affairs Puget Sound Health Care System. Investigations are under way at these institutions in many areas of molecular biology, stem cell biology, neurophysiology, brain function and epilepsy research, neuroanatomy, nanotechnology, molecular imaging, behavioral research, outcomes research (cranial and spine), trauma research, and neuro-oncology.

In addition to undergraduate instruction, a fully certified residency program in neurological surgery is available for selected postgraduate physicians. The eight-year program emphasizes preparation for a career in academic neurosurgery.

Course Descriptions

See page 566.

Neurology

RR650 University of Washington Medical Center
neurolog@u.washington.edu

Neurology, previously a division of the Department of Medicine, became an independent department at the University of Washington School of Medicine in autumn of 1995. The four-year residency program (including an internship) offers superb training in all facets of neurology in a setting of great institutional strength in fundamental neuroscience research. In addition, the Department of Neurology offers exceptional training programs in the Divisions of Neurogenetics and Pediatric Neurology and in the Epilepsy Center. A clinical-clerkship program provides basic training in neurology patient care. The Neurology Department is active in teaching, research, and patient care at the University of Washington Medical Center, Seattle Veterans Affairs Medical Center, Harborview Medical Center, Children's Hospital and Medical Center, and the Fred Hutchinson Cancer Research Center. Medical students, interns, neurology residents, and postdoctoral research fellows rotate through these various hospitals and participate in the learning experiences offered at each.

Course Descriptions

See page 566.

Obstetrics and Gynecology

BB617 Health Sciences Building

The Department of Obstetrics and Gynecology is involved with teaching, patient care, and research in the areas of normal and abnormal human reproduction: growth and development of the fetus, normal and complicated obstetrics, and surgical and medical diseases of the female reproductive system, including endocrinology, oncology, infectious disease, urogynecology, psychosocial problems, primary and preventive health care, and ethics.

Course Descriptions

See page 566.

Ophthalmology

RR801 University of Washington Medical Center

The Department of Ophthalmology is responsible for the instructional and research programs in diseases of the eye and visual system and its adnexae.

Medical-student instruction is provided, including multiple electives in the clinical years. Graduate physicians are provided with three years of residency training at the affiliated hospitals. An optional internship is available in ophthalmology. A two-year ophthalmic plastics and orbit fellowship, and a two-year surgical retina fellowship are offered. Patient care is provided under the supervision of full- and part-time faculty physicians at the University of Washington Medical Center, Harborview Medical Center, Veterans Affairs Medical Center, and Children's Hospital and Regional Medical Center.

Clinical research programs relate to eye diseases. Laboratory research encompasses neurophysiology of vision, morphology of the retina and visual system, corneal wound healing, biochemistry of ocular tissues, and anatomy/physiology of the orbit. Postdoctoral training is offered in all these disciplines.

For more information on residencies and fellowships, contact Ingrid Noe at ingrid@u.washington.edu. For more information on medical student clerkships, contact Dorrie Quirante at dorrieq@u.washington.edu.

Course Descriptions

See page 567.

Orthopaedics

BB1043 University of Washington Medical Center

The Department of Orthopaedics is actively involved in quality patient care, teaching, and research concerning bone and joint problems. Special areas of expertise include foot and ankle, hand and microvascular, hip and knee, arthritis, sports medicine, pediatric orthopaedics, shoulder and elbow, spine, trauma, and tumors.

In addition to providing instruction for medical students, the department provides education at the graduate, residency, and post-residency levels. Selected medical students may elect research experience in the department. A fully approved residency offers opportunities to carry out fundamental and clinical research. Residents may work toward the Master of Science degree by meeting the requirements of the Graduate School and the academic unit offering the degree program.

Course Descriptions

See page 568.

Otolaryngology -- Head and Neck Surgery

BB1165 University of Washington Medical Center

The Department of Otolaryngology -- Head and Neck Surgery provides clinical care for patients with a broad spectrum of disorders affecting the head and neck region, including the ears, nose, and throat. A major portion of departmental effort is directed toward basic research in the areas of sensorineural hearing disorders, physiology of the larynx, and cancer treatment and rehabilitation. The department supports a number of research fellows and advanced degree candidates, and is responsible for a four-year residency program and for the training of medical students in subjects relevant to the specialty.

Course Descriptions

See page 568.

Pathology

C516 Health Sciences

Pathology is the study of disease; its causes, mechanisms, and effects on the body. Pathology is both a basic biological science and a specialty of medicine. As a medical specialty, practiced by M.D.s, it includes the

laboratory evaluation of organs, tissues and fluids to assist other physicians in reaching a diagnosis. As a basic science, practiced by Ph.D.s, pathology focuses on the experimental investigation of the molecular processes of disease, using techniques of cell and organ culture, biochemistry, molecular biology, and genetics.

Graduate Program

Graduate Program Coordinator
C516 Health Sciences, Box 357470
206-616-7551

The Department of Pathology offers graduate training in experimental pathology, with an emphasis on the cellular and molecular biological basis of disease, leading to the Doctor of Philosophy degree in cellular and molecular pathology. The primary goal of the graduate program is to train individuals for careers as practicing scientists in biomedical research, investigating basic disease mechanisms. The emphasis of the program is on development of skills in hypothesis generation and testing, including the design, accomplishment and critical interpretation of experiments. Experimental pathology uses the full range of biomedical research techniques (including biochemistry, molecular biology, cell biology, animal modeling) to attempt to elucidate the mechanisms underlying human disease. Graduates of the program usually continue research careers at biotechnology companies or universities/research institutes.

Doctor of Philosophy

Admission Requirements

- * Copy of the Graduate School Application
- * Official transcripts
- * Official GRE scores. The department also recommend that applicants take the Subject Test in Biology or related area.
- * Statement of purpose and research interests
- * Three or more letters of recommendation
- * Personal statement that addresses the relationship between personal background and aspirations

Special Requirements

Prospective candidates should have taken undergraduate courses in the sciences, and have acceptable scores on the Graduate Record Examination, including advanced biology or chemistry. Some experience in a research laboratory is strongly recommended. Those wishing to matriculate toward both the M.D. and Ph.D. degrees must gain admission to both the Graduate School and the School of Medicine.

Degree Requirements

90 credits as follows:

- * Required coursework: PATH 500 (3), PATH 501 (1), PATH 507 (2), PATH 512 (1.5), PATH 513 (1.5), PATH 515 (1.5), PATH 516 (3), PATH 520 (1), PATH 551 (2-5); BIOT 511 (4); CONJ 538 (1/1.5), CONJ 539 (1.5)
- * Research before the General Exam: PATH 600
- * Research after the General Exam: PATH 800
- * Recommended courses: CONJ 531 (1.5), CONJ 532 (1.5)
- * General Examination
- * Dissertation
- * Final Examination

Financial Aid

Funding for students is provided from departmental and University funds, training grants, a variety of institutional fellowships, and research grants of individual faculty members.

Research Facilities

The department emphasizes the cellular and molecular approach to the investigation of the pathogenesis of disease in mammalian species. Special facilities exist for training in electron microscopy; cell, tissue, and organ culture; recombinant DNA techniques; histochemistry and cytochemistry; analytical biochemistry; immunology; and molecular and cell biology. Residency Training Program

The department supervises a residency-training program in anatomic pathology and, jointly with the Department of Laboratory Medicine, in clinical pathology for qualified medical doctors. Subspecialty training is also

available through clinical fellowships. Persons who complete the residency program are eligible for certification by the American Board of Pathology. For additional information, contact the Resident Program Director, Department of Pathology, Box 356100 or visit the Residency Program Web site.

Course Descriptions

See page 569.

Pediatrics

RR314 Health Sciences

Pediatrics involves the study of physical and behavioral development of humans, in health and disease, from conception to adulthood.

Instruction is provided through conjoint courses, lectures, conferences, clerkships, and electives. Faculty members participate in teaching the basic curriculum and offer 24 electives, including the general pediatrics clerkship at multiple WWAMI sites. A residency program is offered with a wide variety of electives in addition to traditional hospital-inpatient and clinic experience. Postdoctoral fellowship training is available in many subspecialty areas of pediatrics. The major teaching hospitals in Seattle are Children's Hospital and Regional Medical Center, University of Washington Medical Center, and Harborview Medical Center.

Course Descriptions

See page 571.

Pharmacology

E401 Health Sciences

Pharmacology is the science that deals with the nature of interactions between drugs and biological systems, and with the applications of such interactions to the treatment of disease. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

Graduate Program

Graduate Program Coordinator
E-417 Health Sciences, Box 357280
206-543-9280
phcoladm@u.washington.edu

The Department of Pharmacology offers the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirement

A baccalaureate degree with a major in any of the sciences, such as biochemistry, chemistry, pharmacy, physics, physiology, psychology, or zoology. Students are selected from the applicant pool based on several criteria, including academic records, recommendations, and previous research experience.

Degree Requirements

PHCOL 510, PHCOL 511, PHCOL 512, and PHCOL 513 (2 credits each) with a grade of 2.7 or above for each class. Enrollment in PHCOL 507 throughout graduate school. PHCOL 514 in the first, second, and third years of graduate study.

PHCOL 519 (laboratory rotations) for autumn, winter, and spring quarters of the first year with the purpose of acquainting the student with various areas of pharmacology and research under investigation within the department. During each quarter, the student carries out a research project in the laboratory of a faculty member. At the end of the quarter, the student gives a presentation on the rotation research project that is evaluated by the faculty, using the criteria of scientific content, delivery, knowledge of the subject, and organization of material. The student receives a grade and academic credit for PHCOL 519. Students entering into the Ph.D. program

with an M.S. degree or equivalent may petition to be allowed to enroll in only one quarter of PHCOL 519 before selecting a lab. Rotations may occur outside the department by special permission only.

Four advanced 2-3 credit graded elective courses in pharmacology in addition to the 510-513 series are required. Nine graded credits (non-seminar) in graduate-level courses in physiology, biochemistry, molecular biology, immunology, cell biology, or other relevant areas are required. The courses should strengthen the foundation of the student's thesis proposal.

Creditable passage of a comprehensive written exam on general pharmacology, to be taken during the summer quarter of the second year, is required. During the first quarter of the third year of study, students take the oral General Exam. This examination is given by the Supervisory Committee. The examination is based in part on an evaluation of the student's proposed research for the dissertation and on his or her knowledge of the major disciplines important to the research. As a result of the examination, the Committee may recommend termination, further work and subsequent reexamination, or approval of the student's performance and candidacy for the Ph.D. degree.

After successful completion of the General Exam, the student devotes most of his or her time to thesis research in the third and subsequent years of study.

The research project for the Ph.D. dissertation is chosen by the candidate and faculty sponsor and approved by the candidate's Supervisory Committee. The research must represent a worthy and fundamental contribution showing originality in concept and implementation.

When the candidate has concluded the research project and prepared a complete copy of the dissertation, the sponsor will obtain approval of the Graduate School and set a date for the Final Examination. The Final Examination is concerned principally with the subject matter of the dissertation, but may include the background and origins of the dissertation problem as well as its practical applications and extrapolations.

Financial Aid

Financial support is offered to students who maintain satisfactory academic progress. Tuition and stipends are provided by National Institutes of Health training grants, University of Washington teaching assistantships, individual research grants, and fellowships from private sources.

Course Descriptions

See page 572.

Physiology and Biophysics

G424 Health Sciences

Physiology deals with the processes, activities, and phenomena incidental to, and characteristic of, life and living organisms. Based upon physics, chemistry, and mathematics, physiology interlocks closely with the other basic medical sciences—anatomy, molecular biology, immunology, biochemistry, pharmacology, and pathology—and with psychology. Research in physiology is accomplished by analyzing the molecular, cellular, and integrative properties of the system under study. For this reason, physiology appeals to students with diverse backgrounds and goals. Courses in this field are given for medical, dental, pharmacy, nursing, and graduate students.

206-685-0519
pbio@u.washington.edu

The Department of Physiology and Biophysics offers advanced instruction and training leading to both the Master of Science and Doctor of Philosophy degrees. Students aspiring only to the M.S. degree are rarely accepted. Students pursuing a Ph.D. degree in physiology and biophysics may emphasize molecular and cellular physiology, biophysics, neurobiology, respiratory physiology, or endocrinology. Studies leading to the doctoral degree require five to six years to complete. The first year is spent acquiring a broad knowledge of physiology via a sequence of courses and laboratory

rotations. After selection of a special area of study, the second year is spent taking advanced seminars in the area of specialization and developing a thesis proposal. After admission to candidacy, the latter years are spent pursuing the area in depth and completing an original-research project.

Individuals with graduate degrees in physiology and biophysics often pursue careers in teaching and research in colleges and universities and in biotech industries. With additional training, graduates have been successful in medicine, law, creative writing, and high-level computer programming.

The department participates in interdisciplinary Ph.D. degree programs in Neurobiology and Behavior, and in Molecular and Cellular Biology.

Master of Science

The Master of Science degree is normally granted as part of the path of study leading to the Doctor of Philosophy degree. Students are normally admitted only to the Doctor of Philosophy degree.

Doctor of Philosophy

Admission Requirements

To apply for admission, a student must provide academic transcripts, Graduate Record Examination (GRE) scores, four letters of recommendation, and a statement of purpose. Because of the broad scope and interdisciplinary nature of our graduate program, we have no specific prerequisites for admission. However, most of our students have backgrounds in the physical and/or biological sciences. These include majors in biology, physics, mathematics, engineering, computer science, chemistry, and psychology. The most important requirement is a strong motivation and excitement about doing science.

Degree Requirements

90 credits minimum, as follows:

Due to the broad nature of the research interests in the department and the diversity of backgrounds of our graduate students, formal course requirements are kept to a minimum and are completed in the first year. Students are encouraged to shape their own graduate education, as they choose the majority of their coursework and the scientific direction for their research. The courses available include those offered by other departments, both in the Medical School and elsewhere on campus. Electives may be chosen from a list of mini-courses whose topics reflect the current interests of faculty and students. Students are required to take at least 6 mini courses; 15 mini courses are currently offered with additional courses being added each quarter.

Required Courses:

- * CONJ 531 (1.5)
- * CONJ 532 (1.5)
- * P BIO 532 (2)
- * NEUBEH 501, NEUBEH 502 (3, 3)
- * P BIO 508 (2-5, max. 5, must be taken three times)
- * P BIO 519 (1)
- * Six departmental mini-courses to be completed prior to the General Exam, taken from the following: P BIO 509 (3), P BIO 545 (3), P BIO 550 (1), P BIO 551 (1), P BIO 552 (1), P BIO 553 (2), P BIO 554 (1), P BIO 555 (1), P BIO 556 (1), P BIO 557 (1), P BIO 559 (3)
- * P BIO 513 (4)
- * P BIO 600 (before General Exam)
- * P BIO 800 (after General Exam)
- * Note: P BIO 503 (4) is highly recommended, but not required

General Exam

The General Exam must be taken by the last day of autumn quarter of the third year. After passing the General Exam the student is advanced to candidacy for the doctoral degree. The student then registers for P BIO 800 and continue working on thesis research.

Final Exam

The culmination of the program is the submission of a written doctoral thesis and the presentation of this work in a public lecture attended by members of the department and the University.

Research Facilities

The department is well equipped to provide instruction and research training in cellular and molecular physiology, neurobiology, membrane biophysics, respiratory physiology, muscle biophysics, endocrinology, reproduction, and physiological psychology. The facilities of the Regional Primate Research Center, adjacent to the department, are available to qualified trainees who need to use primates in their research.

Course Descriptions

See page 573.

Psychiatry and Behavioral Sciences

BB1644 Health Sciences

pbsci@u.washington.edu

The department offers course work, clinical training, and research opportunities for undergraduate students, medical students, graduate physicians, and graduate students in allied health programs such as psychology, social work, and psychiatric nursing.

A biobehavioral approach is emphasized, which incorporates intrapersonal, interpersonal, and sociocultural factors. Intrapersonal factors include emotion, perception, cognition, psychodynamics, neurochemistry, neuroanatomy, neurophysiology, genetics, and the developmental and aging processes. Interpersonal factors focus upon dyadic, familial, and group interactions. Sociocultural factors include the cultural, social, institutional, and community systems as well as the environment and epidemiology of health and disease.

Graduate Program

The medical school curriculum is divided into a core (basic) curriculum and an elective curriculum. Within its core curriculum the Department of Psychiatry and Behavioral Sciences offers material covering learning theory, cognition, memory, perception, neuropharmacology, social growth and development, epidemiology of health and disease, psychopathology, psychotherapy, and neuropsychiatry and behavioral medicine, as well as training in interviewing skills and assessment techniques. Its elective program includes a variety of clinical experiences and advanced didactics and seminars designed to further the knowledge and skills developed within the basic curriculum. In addition, the department encourages research and other scholarly pursuits by students in areas of interest to them. Stipends are available for research studies.

Residency Training in Psychiatry

Contact: Deborah Cowley

A four-year residency for medical school graduates and a three-year post-internship residency prepares physicians for Specialty Board Certification in Psychiatry. Clinical rotations on inpatient, outpatient, emergency, and consultation/liaison services are augmented by individual supervision and didactic lectures. With the program's integrative orientation, residents become proficient in psychotherapy, psychopharmacology, and community liaison with patients of all ages. Fellowships in child, geriatric, addiction, community, forensic and consultation-liaison psychiatry, and psychiatric neuroscience are available.

Clinical Psychology Internship Program

Contact: Joan Romano

The one-year internship in clinical psychology, accredited by the American Psychological Association, offers advanced clinical training to candidates for the doctorate in clinical psychology from graduate programs accredited by the American Psychological Association. Training tracks with the internship in general adult, general child, rehabilitation and health psychology, and public behavioral health and justice policy (adult and child). Advanced research skills training is also available as part of an INH-funded training grant for selected internship participants.

Postdoctoral Fellowship Training

Contact: Richard Veith

Postdoctoral fellowships for advanced clinical and research training in behavioral medicine, broadly construed, are also offered.

Course Descriptions

See page 575.

Radiation Oncology

NN106 University of Washington Medical Center

Radiation oncology is the branch of clinical medicine that utilizes high-energy radiation to treat disease, usually cancer. The department consists of three divisions: clinical radiation oncology, medical radiation physics, and experimental cancer biology. Training programs are offered in all three divisions. Research programs in the Department of Radiation Oncology are aimed at the physical and biological mechanisms of interactions between ionizing radiations, and normal and malignant tissues, with particular emphasis on high linear energy transfer (LET) radiation effects. The department is actively involved in radiation treatment planning work particularly in regard to intensity modulated radiation therapy (IMRT). Other programs involve the application of positron emission tomography (PET) to elucidate differences between cancers and normal tissues, and the development of specialized radiopharmaceuticals.

Course Descriptions

See page 576.

Radiology

RR215 University of Washington Medical Center

Diagnostic radiology is that branch of clinical medicine that specializes in the interpretation of various imaging modalities in order to detect, to characterize, and (with increasing frequency) to treat a wide variety of diseases. Historically, x-rays were the first energy source utilized for these purposes, and they continue to be a mainstay of this discipline. More recently, the armamentarium has grown to include ultrasound, computed tomography, magnetic resonance, and positron-emission tomography. In nuclear medicine, one of radiology's major subspecialties, radionuclides are employed for both diagnostic and therapeutic purposes. Another subspecialty is interventional radiology, wherein aspirations and biopsies, as well as therapeutic procedures such as abscess drainage, tumor embolization, and vascular stents are performed percutaneously.

The Department of Radiology consists of two clinical divisions: diagnostic radiology and nuclear medicine. Both divisions are ably supported by technologists and faculty members in the field of radiation physics. Instruction in radiology is provided for medical students, residents, and fellows as well as for other physicians. The faculty and its teaching and research activities are represented in each of the hospitals affiliated with the University.

Course Descriptoins

See page 576.

Rehabilitation Medicine

BB919 Health Sciences

The Department of Rehabilitation Medicine provides education for medical students, interns, residents, and allied health students in occupational therapy, physical therapy, and prosthetics and orthotics in a comprehensive approach to rehabilitation problems. This includes special diagnostic and evaluative procedures; methods and rationale in the application of principles of occupational therapy, physical therapy, prosthetics and orthotics, and other health professions; and advanced investigation of special problems

encountered in the field. In addition, the department conducts a residency training program for the specialty of physical medicine and rehabilitation.

The department offers curricula leading to the following degrees: Master of Occupational Therapy, Doctor of Physical Therapy, and a Bachelor of Science in the field of prosthetics and orthotics. The department also offers a Master of Science degree in rehabilitation medicine with options for occupational therapists, physical therapists, and residents in physical medicine and rehabilitation who wish to pursue academic or research careers.

Occupational Therapy

Head

Elizabeth M. Kanny

Occupational therapists provide services related to occupational performance in everyday life in the areas of self-care, work and productive activities, and play/leisure. Occupational therapists work with people who have physical illness or injury, social or emotional difficulties, congenital or developmental problems, or who are in need of preventive strategies that promote well being. They work with people in all age groups from diverse cultural and ethnic groups and socioeconomic levels.

Occupational therapists help people with impairments or limitations to live as productive a life as possible. They work with people to increase independent function in life activities, enhance development, and to minimize or prevent disability. They use a variety of therapeutic methods including training in self-care activities; design, fabrication, and application of splints; sensorimotor activities; therapeutic group activities; selection and use of adaptive equipment; adaptation of physical environments in the home, school, work, or community; activities to enhance functional performance in everyday life; and work evaluation, work hardening, and workplace adaptations.

Today's occupational therapists work in clinical and community practice, administration, education, and research. Work settings include rehabilitation centers and hospitals; public and private schools; home health agencies; mental health centers and psychiatric hospitals; private practice; vocational rehabilitation centers and industrial clinics; private industry, wellness and prevention programs; and hospices.

The curriculum is designed to link theoretical and technical knowledge in occupational therapy with professional values, attitudes, and skills. The education of each student is based on the philosophy that "occupational performance" (including self-care, work, and leisure/play) is central and provides a purpose and meaning to one's life. Professional standards of practice, ethics, and continued professional growth are emphasized throughout the program. Program requirements include seven quarters of professional course work and six months of full-time fieldwork training. Fieldwork training must be completed within 24 months after completion of professional course work. Completion of all program requirements leads to a Master of Occupational Therapy degree awarded by the School of Medicine, Department of Rehabilitation Medicine.

The Occupational Therapy program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220, phone 301-652-2682. Graduates of the program are eligible to sit for the national certification examination for the occupational therapist. The National Board for Certification in Occupational Therapy (NBCOT) is the certifying agency responsible for the development and implementation of this exam. Most states, including Washington, require state licensure in order to practice.

Master of Occupational Therapy

Admission Requirements

Applicants must have completed a bachelor's degree in any major and taken the Graduate Record Exam (GRE) within the past five years. In addition, there are eight prerequisite courses that must be completed prior to being admitted to the program. The admission process occurs once a year for entry to the program in autumn quarter of each year; applications are evaluated starting January 15 of each year.

Specific prerequisite courses at the UW include the following. For students who have attended schools outside of the UW, comparable courses must be taken:

- * *Natural Sciences:* Survey of Physiology (ZOOL 118), 5 credits; General Anatomy (B STR 301), 4 credits; Introduction to General Chemistry, (CHEM 120), 5 credits; General Physics (PHYS 114), 4 credits; General Physics Laboratory (PHYS 117), 1 credit; Basic Educational Statistics (EDPSY 490), 3 credits.
- * *Social Sciences:* Abnormal Psychology (PSYCH 305), 5 credits; Developmental Psychology (PSYCH 306), 5 credits; Survey of Sociology (SOC 110), 5 credits or Principles of Sociocultural Anthropology (ANTH 202), 5 credits.

To apply, students must have completed five of the prerequisite courses, with three courses in the natural sciences. They must have earned a minimum GPA of 3.0 in the prerequisite courses with no single course graded less than 2.0; and have a GPA of 3.0 on the most recent 60 semester or 90 quarter credits. Admission is based on academic ability, communication skills, and understanding and experience in occupational therapy. Detailed program requirements and selection process information may be obtained by calling 206-598-5392, from the program's Web page), or by sending an email to ot@u.washington.edu.

Degree Requirements

The following courses must be completed satisfactorily in the schedule sequence, beginning autumn quarter only, at the UW: REHAB 400, REHAB 401, REHAB 403, REHAB 414, REHAB 442, REHAB 444, REHAB 445, REHAB 448, REHAB 451, REHAB 452, REHAB 570, REHAB 571, REHAB 572, REHAB 574, REHAB 575, REHAB 576, REHAB 577, REHAB 578, REHAB 579, REHAB 580, REHAB 581, REHAB 582, REHAB 584, REHAB 585, REHAB 587, REHAB 591, REHAB 594, CONJ 480, and HUBIO 563.

Student Evaluation: The University grade-point system is used in student evaluation. A student must maintain a cumulative GPA of 3.0 in all required professional course work to maintain satisfactory standing and to graduate. Detailed scholastic requirements are available on the program's Web page.

If at any point the OT curriculum cumulative GPA falls below 3.0, the student is placed on academic probation and the student must raise it to 3.0 by the end of two subsequent quarters. If a student is unable to remove his/her probation status, he/she is subject to dismissal from the program.

The student must satisfactorily complete all academic course work before taking the two required Level II Fieldwork placements (REHAB 594). Both of the two required Level II Fieldwork placements must be satisfactorily completed within two years after the completion of the academic portion of the program in order to graduate from the program.

For more information on the Master of Occupational Therapy program, visit the department's Web site.

Physical Therapy

Head

Mark Guthrie

Physical therapy is a direct form of professional patient care that can be applied in most disciplines of medicine. The principal objective in physical therapy is to restore or improve motor function in individuals with musculoskeletal or neuromuscular problems.

Management of problems related to motor function is only part of the work of physical therapy. Equally important is a rebuilding of self-confidence and the creation of a desire to return to a normal, active life. Other primary objectives of physical therapy are prevention of disability and pain, and training in mobility skills for those who must adapt to permanent disability.

As a consequence of the scope of the profession, physical therapists function in a variety of settings, the most familiar being the hospital. Physical therapists also plan, provide, evaluate, and direct patient care in outpatient clinics, rehabilitation centers, health maintenance organizations, developmental centers, home-health agencies, schools, extended-care facilities, voluntary health programs, industry, and private practices. The physical therapist may be found anywhere quality health care is needed. Increasingly, physical therapists are becoming involved in basic and clinical research, such as the academic community, either as full-time faculty members or as supervisors of clinical education, and as consultants in local, state, and federal health-planning activities.

Physical therapists function in compliance with the licensing laws and ethical principles that govern the practice of physical therapy. The steps to licensure as a physical therapist vary slightly from state to state, but all

physical therapists graduate from an accredited curriculum of physical therapy that includes a specific period of clinical training. As physical therapy relates to the majority of medical specialties, the education program is broad in scope, including an emphasis on physical and social sciences. The physical therapist evaluates the patient's problem by testing such factors as range of joint motion, muscle strength, posture and gait, pulmonary function, sensation and sensory perception, orthotic and prosthetic fit, reflexes and muscle tone, and functional skills. Some of the procedures used may include ultrasound, superficial heat and cold, electrical stimulation, massage, traction, joint mobilization, biofeedback, therapeutic exercise, and training in the use of orthotic, prosthetic, and other assistive devices, such as crutches, canes, and wheelchairs.

As with all professionals in health fields, physical therapists are responsible for subscribing to a program of continuing education. Some therapists also develop the knowledge and skills of a specialist via continuing education and concentrated practice in one area, such as sports or pediatric therapy. A formalized mechanism for certifying specialists is implemented by the national professional association, the American Physical Therapy Association.

The University of Washington program in physical therapy is accredited by the American Physical Therapy Association Commission on Accreditation in Physical Therapy Education.

Doctor of Physical Therapy

Admission Requirements

Enrollment is limited to 30 students each year and admission is competitive.

Application is restricted to those who are U.S. citizens or U.S. permanent residents by the autumn program entrance date.

Applicants are required to submit scores from the General Test portion of the Graduate Record Examinations (GRE).

Prior to the application deadline of December 15, the student must have met the following minimum academic requirements:

- * Minimum 3.00 GPA on all college-level courses
- * Minimum 3.00 GPA on PT prerequisite courses
- * Minimum 2.0 (C) grade on each PT prerequisite course
- * 22 quarter credits (or 50%) of PT prerequisite courses completed. For PT prerequisite courses, see Web site at http://depts.washington.edu/rehab/pt/dpt_apply.html

Minimum requirements above must be maintained until program entrance and all prerequisite courses must be finished at that time. Applicants must complete a bachelor's degree before they start the program.

Most clinical internship placement sites require potential trainees to undergo a Washington State Patrol criminal history background check for crimes against vulnerable populations. To ensure that all students offered positions in the PT program have no such history and therefore will be able to finish the clinical portion of the curriculum, the completion of a criminal background check release form is required of applicants offered admission.

Degree Requirements

149 credits, as follows:

Year One

- * *Autumn Quarter:* MEDEX 452 (6), REHAB 403 (2), REHAB 444 (4), REHAB 451 (1), REHAB 504 (3), REHAB 517 (2)
- * *Winter Quarter:* CONJ 480 (5), REHAB 400 (4), REHAB 445 (4), REHAB 452 (1), REHAB 506 (2), REHAB 517 (2)
- * *Spring Quarter:* REHAB 401 (4), REHAB 442 (4), REHAB 448 (1), REHAB 507 (3), REHAB 517 (2), REHAB 536 (2), REHAB 566 (1)
- * *Summer Quarter:* REHAB 500 (2), REHAB 508 (4), REHAB 517 (2), REHAB 537 (3), REHAB 538 (2)

Year Two

- * *Autumn Quarter:* REHAB 414 (2), REHAB 501 (4), REHAB 511 (5), REHAB 566 (1)
- * *Winter Quarter:* REHAB 502 (3), REHAB 512 (5), REHAB 523 (3), REHAB 529 (2)
- * *Spring Quarter:* REHAB 502 (2), REHAB 503 (3), REHAB 513 (3), REHAB 527 (3), REHAB 566 (1)
- * *Summer Quarter:* REHAB 416 (2), REHAB 476 (2), REHAB 505 (2), REHAB 514 (3), REHAB 591 (1)

Year Three

- * *Autumn Quarter:* REHAB 591 (2), REHAB 595 (10)
- * *Winter Quarter:* REHAB 591 (2), REHAB 595 (10)
- * *Spring Quarter:* REHAB 591 (2), REHAB 595 (10)

Prosthetics and Orthotics

Head

John Ferguson

The prosthetist-orthotist is a member of the rehabilitation health care team, which also includes physicians, surgeons, physical and occupational therapists, psychologists, vocational rehabilitation counselors, and other appropriate specialists. Team members work together with physically challenged individuals to enhance their daily life and increase their functional abilities.

The two groups of prosthetic-orthotic devices which can potentially enter into the rehabilitation of an individual are (1) prosthetic devices, which replace or substitute for a missing limb or part of a limb, and (2) orthotic devices, which help with the control of motion and the support of a weakened body segment.

Practitioners provide direct patient care and management. Practitioners work in conjunction with physicians, surgeons, and therapists to evaluate the prosthetic or orthotic needs of the patient. They design the appropriate device, supervise technicians who fabricate them, and evaluate the fit and functional use for each patient. To evaluate function, the prosthetist-orthotist must have a detailed knowledge of anatomy and kinesiology, joint range of motion, muscle strength and human locomotion.

Before designing a prosthesis or orthosis, the prosthetist-orthotist examines a patient to find any conditions that will affect the future success of the orthosis or prosthesis. Following the evaluation, the prosthetist-orthotist will obtain an impression of the affected segment along with the appropriate measurements. A technician fabricates the prosthesis or orthosis, and the prosthetist-orthotist fits the patient and makes changes as necessary.

Adviser

BB919 Health Sciences Center
206-616-8586

The prosthetics and orthotics division offers the following programs of study:

- * The Bachelor of Science degree with a major in prosthetics and orthotics

Bachelor of Science

Suggested First- and Second-Year Courses: Courses fulfilling the general education requirements including proficiency and areas of knowledge (20 VLPA, 20 I & S) should be completed during the first two years prior to entry into the program. Prerequisite coursework (general biology, general physics, human anatomy and physiology, general chemistry, psychology) is also completed during this time. Suggested courses include: statistics (STAT 220), interpersonal communication (COM 103), introduction to public speaking (COM 220), personality and individual differences (PSYCH 205), and developmental psychology (PSYCH 306).

Department Admission Requirements

1. Minimum 2.70 cumulative GPA
2. Prior to admission to the program, students must complete the following prerequisites with a minimum combined GPA of 2.70: general biology (BIOL 161, BIOL 162) or microbiology (MICROM 301, MICROM 302), general physics (PHYS 114, PHYS 117, PHYS 115, PHYS 118), general psychology (PSYCH 101), general chemistry (CHEM 120), human anatomy (B STR 301), physiology (BIOL 118).
3. Completion of the University writing and reasoning requirements (5 credits of English composition and 5 credits of quantitative and symbolic reasoning with a minimum grade of 2.0; two additional writing courses totaling a minimum of 10 credits with a minimum grade of 0.7; and the College of Arts and Sciences Areas of Knowledge requirements (20 credits in Visual, Literary & Performing Arts, 20 credits in Individuals and Societies, and 20 credits in the Natural World). Courses listed above may apply to Areas of Knowledge requirements.

Postbaccalaureate (fifth-year) students are exempt from the writing and reasoning requirements but not from the Areas of Knowledge requirements.

4. Admission to the program is competitive based on scholastic achievement, written skills, references and involvement in activities or work related to the health professions.
5. Departmental Application Deadline: February 15 for entry Autumn quarter.

Major Requirements

90 credits as follows:

1. *Courses:* The following courses must be taken in the scheduled sequence beginning autumn quarter only at the University of Washington: REHAB 340, REHAB 341, REHAB 342, REHAB 343, REHAB 400, REHAB 401, REHAB 402, REHAB 403, REHAB 414, REHAB 420, REHAB 421, REHAB 423, REHAB 424, REHAB 427, REHAB 428, REHAB 430, REHAB 442, REHAB 444, REHAB 445, REHAB 451, REHAB 452, REHAB 448, REHAB 499; CONJ 480.
2. *Grade Requirements:* A student must maintain a minimum cumulative program GPA of 2.50, and "credit" grades in all courses that are graded credit/no credit, to maintain good standing in the program and be eligible for graduation. A minimum grade of 2.0 is required in each course. A grade below 2.0 in a required course must be repeated at the next offering with a minimum grade of 2.0 received in the repeated course.
3. *Continuation Policy:* If at any point the cumulative grade point in the curriculum courses falls below 2.50, the student is placed on academic probation. In order to be taken off probation, the student must achieve a curriculum grade point average of 2.50 by the end of two consecutive quarters, or within a time frame designated by the Advisory and Evaluation Committee. If a student is unable to remove his/her probation status, he/she is subject to dismissal from the program.

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The prosthetics-orthotics degree is recognized as a broad, undifferentiated degree requiring the acquisition of general knowledge and basic skills in applicable domains of medicine. The educational process of a prosthetist-orthotist includes the assimilation of knowledge, acquisition of technical skills, and development of judgment through patient care experiences in preparation for independent analysis and problem solving required in clinical practice. Prosthetists and orthotists are employed in private practices and hospitals. There are also a limited number of opportunities in research positions throughout the country.

Upon successful completion of the prosthetics and orthotics program, the student will have learned the skills necessary to function as an entry-level resident in prosthetics-orthotics, and is awarded a Bachelor of Science degree by the University of Washington School of Medicine. The practitioner program is accredited through the Commission on Accreditation of Allied Health Education Programs (CAAHEP).

The degree in prosthetics-orthotics gives the student eligibility to enter a one-year clinical residency for each discipline at a National Commission on Orthotics and Prosthetics Education (NCOPE) approved site. This residency requirement must be completed for eligibility to apply for the National Certification Boards administered by the American Board for Certification in Orthotics and Prosthetics, Inc.

- * *Instructional and Research Facilities:* Much of the didactic and patient clinical instruction occurs in the ninth-floor classroom areas in the "BB" wing of the Health Sciences Building. A student fabrication laboratory on the eighth floor of the Health Sciences Building accommodates the technical laboratory components of the curriculum.

Students are placed throughout the curriculum in eighteen facilities in the surrounding Seattle area for their required 500 hours of clinical experience.

- * *Honors Options Available:* None
- * *Research, Internships, and Service Learning:* None available
- * *Department Scholarships:* None offered
- * *Student Organizations/Associations:* None

Post-Professional Programs

The Master of Science in Rehabilitation Medicine has three primary pathways: occupational therapy, physical therapy, and rehabilitation medicine. This program is designed for rehabilitation practitioners who want to pursue a program of coursework and research to enhance their professional growth. Additional information may be found at the program's Web site (depts.washington.edu/rehab/education).

Master of Science, Rehabilitation Medicine (Occupational Therapy Pathway)

This degree program is designed to prepare occupational therapists to discuss rehabilitation science, models of disability, and/or theory and frames of reference relating to occupational therapy; to design and conduct research; to provide instruction, and to administer occupational therapy services or provide a higher level of clinical service. Independent-study options and electives offer flexibility, allowing the student to meet individual objectives. Completion of a data-based thesis is required. Full-time students generally complete the course work in four quarters. The additional time to complete the thesis requirement varies.

Admission Requirements

- * Baccalaureate degree from an accredited institution of higher learning. Minimum overall 3.00 GPA or minimum 3.25 GPA for the most recent 60-semester or 90-quarter credits.
- * Professional Certification. National Certification, Occupational Therapist Registered.
- * Graduate Record Exam (GRE) scores
- * English Language Competence. For applicants whose native language is not English, a minimum TOEFL score of either 580 (written exam) or 237 (computer-based exam) is required.
- * Professional Experience. One year of occupational therapy practice preferred.

Degree Requirements

36 credits, as follows:

- * Core courses: REHAB 520 (1-5, max. 5), REHAB 581 (3); either EDPSY 490 (3) or BIOST 511 (4); either EDPSY 591 (3) or EDSPE 511 (3); MEDED 520 (2)
- * Thesis: 9 credits of REHAB 700
- * Elective Courses: Selected from the following list or from departments throughout the University such as Business Administration, Special Education, Health Services, Nursing, Psychology, Physiology, or Social Work: EDPSY 590 (3), MHE 523 (3), HSERV 511 (3/4), REHAB 522 (2), REHAB 546 (1-3, max. 3), REHAB 567 (1-12, max. 24), REHAB 600 (*)

Course Descriptions

See page 577.

Surgery

BB487 University of Washington Medical Center

The Department of Surgery carries out instruction during all four years of School of Medicine attendance. The third-year six-week clerkship constitutes the core of student exposure to general surgery and is required of all students. The fourth-year emergency-room clerkship is also a required part of the curriculum. The department offers a variety of fourth-year elective clerkships in a number of the specialty aspects of the department's clinical activities, including but not limited to trauma, cardiothoracic surgery, plastic surgery, vascular surgery, transplantation, surgical critical care, pediatric surgery, and the management of burn patients.

Course Descriptions

See page 580.

Urology

BB1115 Health Sciences

Urology is the surgical discipline concerned with diseases of the urinary tract in males and females, and the genital system in the male. The science is broadly based: major areas of practical and investigative concern include congenital defects, cancer, renal diseases, reproductive biology, neuropathology, renal stone formation, and transplantation.

Clinically, the field encompasses a large variety of technical skills including real-time imaging and manipulation, endoscopy, laparoscopy and robotics,

and open surgery. Medical diagnosis and treatment are a large part of the discipline.

The department is actively involved in patient care, instruction, and research concerning the problems of urology. Training for medical students starts in the second year and continues through the third and fourth years. Training is also provided for residents, fellows, nurses and applied specialists. The department is responsible for a fully approved urology residency program. Contact the Urology Clerkship Coordinator at 206-731-3205 for further information.

Course Descriptions

School of Nursing

T310 Health Sciences

Dean

Nancy F. Woods
T318 Health Sciences

Associate Deans

Ruth F. Craven, Educational Outreach
Pamela H. Mitchell, Research
Susan L. Woods, Academic Services

Nurse professionals are members of interdisciplinary teams in clinics, hospitals, and community settings, and work with people of all ages, cultural backgrounds, and lifestyles to help them achieve the highest level of wellness possible. Nurse practitioners fill critical health care needs in both urban and rural settings, often for portions of the population who have not received adequate health care. Nurse scientists conduct important research about a variety of health problems and how best to promote health, prevent disease, and care for people who are ill. Nurses also teach in colleges and universities throughout the world.

Undergraduate Program

Adviser

T310 Health Sciences, Box 357260
206-543-8736
sonas@u.washington.edu

The School of Nursing offers the following programs of study:

- * Bachelor of Science in Nursing degree with eligibility to take the licensure examination to become a registered nurse.
- * A four-quarter modification of the basic curriculum is available for the registered nurse who is able to validate selected nursing courses through written examination and who intends to complete a master's degree program. This B.S.N. completion program is available at UW Bothell and UW Tacoma.

Bachelor of Science in Nursing

Suggested First- and Second-Year College Courses: See below, under Admission Requirements.

Admission Requirements

Admission to the nursing major occurs once a year, for autumn quarter, with an application deadline of January 15. Selection is competitive.

Application

1. To be considered for admission, applicants must satisfy one of the following requirements at time of application.
 - a. Three out of six prerequisite science courses completed with a minimum GPA in these three courses of 3.00
 - b. Four out of six prerequisite science courses with a minimum GPA in these four courses of 2.80. These six prerequisite courses are CHEM 120, CHEM 220, BIOL 118/BIOL 119, B STR 301, MICROM 301, and NUTR 300.
2. Together with the application and college transcript(s), applicants submit a personal statement; a resume outlining volunteer/paid health-care experience, community service, and cultural awareness; and a recommendation from a health care provider (employer or volunteer coordinator).
3. Applicants are expected to have 100 hours of health care experience in a paid or volunteer position in one setting for three months or more. The majority of applicants present health care experiences of several hundred hours for nine months or more.
4. After an initial review of all applications, some applicants are asked to attend a proctored essay session. The proctored essay dates are published in the admissions publication. Eligible applicants are invited via email.

Entrance Requirements: Prior to beginning the nursing program in the autumn, students must meet the following requirements:

1. A minimum of 90 credits to include the following courses:
 - a. Written communication (10 credits): English composition and W-courses.
 - b. Problem-solving (8 credits): one QSR course, chosen from MATH 107, MATH 111, MATH 112, MATH 120, MATH 124, MATH 134, MATH 144, PHIL 115, PHIL 120, PHIL 470, or Q SCI 291. One statistics course, such as STAT 220, STAT 311, Q SCI 381, QMETH 201, or EDPSY 490.
 - c. Visual, Literary, & Performing Arts (VLPA) (15 credits).
 - d. Individuals & Societies (I&S) (15 credits): to include NURS 201 or equivalent.
 - e. Natural World (NW) (26 credits): to include CHEM 120, CHEM 220, BIOL 118, BIOL 119, B STR 301, MICROM 301, NUTR 300.
 - f. Electives to complete 90 credits.
2. A minimum 2.00 cumulative GPA is required, and a minimum grade of 2.0 for each prerequisite course. Because admission is competitive, the GPA for admission is usually significantly higher.

For additional information on admission criteria, specific prerequisites, and deadlines, as well as application forms, contact the Office of Academic Services, School of Nursing, (206) 543-8736 or 1-800-759-NURS. Monthly information sessions are offered in the School of Nursing, Health Sciences Building T310, on the first Tuesday of each month from noon to 1 p.m. as well as evening sessions from 5:30 to 6:30p.m. on the first Tuesday of January, May, September, and November.

Major Requirements

Students need a minimum of 180 credits to graduate with a bachelor's degree from the University of Washington. The required credits in the nursing curriculum total 89; thus 91 credits must be earned through general education, nursing prerequisite, and elective courses.

Year One of Program

- * *Quarter 1 -- Autumn:* NCLIN 302 (3), NCLIN 306 (4), NURS 304 (3), NURS 301 (3), NURS 309 (2)
- * *Quarter 2 -- Winter:* NURS 401 (4), NCLIN 402 (4), NURS 308 (3), NURS 310 (2), NURS 313 (1)
- * *Quarter 3 -- Spring:* NURS 405 (5), NCLIN 406 (4), NURS 303 (3), NURS 407 (3)

Year Two of Program

- * *Quarter 4/5* -- Autumn:* NURS 415 (5), NCLIN 416 (4), NMETH 403 (3), NURS 410 (3),
- * *Quarter 4/5* -- Winter:* NURS 417 (5), NCLIN 418 (4), NCLIN 409 (6)

*Half of senior class completes courses listed above in Quarter 4, followed by those in Quarter 5; the other half of the class completes courses listed under Quarter 5, followed by those listed in Quarter 4.

- * *Quarter 6 -- Spring:* NCLIN 411 (12), NURS 412 (3)

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The School of Nursing prepares its graduates to function as generalists in professional nursing practice and to collaborate with other health-care providers. The six-quarter undergraduate curriculum emphasizes theory and clinical practice to ensure critical thinking, human caring, and clinical expertise. Clinical experiences are provided in institutional and community settings for preventive and acute care. The ten goals of the BSN program are online at http://www.son.washington.edu/eo/bsn_description_goals.asp.
- * *Instructional and Research Facilities:* Learning Laboratory
- * *Honors Options Available:* With College Honors; With Distinction (Program Honors). See adviser for requirements.
- * *Research Internships and Service Learning:* Students complete eight clinical courses during the B.S.N. program beginning with the first quarter of the program. Each student experiences placements in medical-surgical nursing, pediatric, family nursing, psychosocial mental health, and community-based nursing. Clinical hours per course range from six hours/week during the first quarter to 24 hours/week during the final quarter.

- * *Department Scholarships:* Limited scholarships based on student need established by FAFSA. Students are invited to apply after they have been admitted to the program by completing the School of Nursing Financial Aid application.
- * *Student Organizations/Associations:* Students may join the Professional Organization of Nursing Students (PONS) after admission to the program. PONS' involvement spans all aspects of the undergraduate program: recruitment, orientation, education, fund raising, and social events.

Graduate Program

Graduate Program Coordinator
T310 Health Sciences, Box 357260
206-543-8736
sonas@u.washington.edu

The School of Nursing offers graduate study leading to the degrees of Master of Nursing, Master of Science, and Doctor of Philosophy in nursing science. At the master's level, programs are designed to meet the many needs of a diverse student body by providing opportunities for advanced study, practice, and research in nursing.

The Masters Entry Program in Nursing (M.E.P.N.) is a Master of Nursing (M.N.) option for students without previous nursing preparation who have a baccalaureate degree in a non-nursing field, and who wish to earn a Master of Nursing degree. It is a two part program. The first five quarters of M.E.P.N. are full time, provide a generalist foundation in nursing, and qualify the student to take the state RN licensure (NCLEX) examination. Once students have completed the first five quarters of M.E.P.N., they begin regular graduate course work in one of 18 M.N. focal areas (see below).

The Master of Nursing program develops increased competence in selected areas of advanced practice nursing. The following focus areas are available: adult acute-care nurse practitioner (cardiovascular/AIDS/oncology), adult/older adult nurse practitioner, advanced practice community-health systems nursing (cross-cultural nursing/occupational health nursing/healthy aging/communities for youth, rural health), advanced practice in care systems management, advanced practice forensic nurse specialist, adult nurse practitioner and home care, advanced practice genetics nursing, advanced practice options in bio-behavioral nursing, family-centered pediatric nursing, infectious disease nurse practitioner, nurse midwifery, perinatal nursing/neonatal nurse practitioner, psychiatric-mental health nurse practitioner, family nurse practitioner, pediatric nurse practitioner, adult and women's health nurse practitioner, rural adult nurse practitioner, and an independent M.N. Research is an integral part of all programs. A thesis is required in the Master of Science program. The Master of Nursing program provides the option of a thesis or non-thesis project.

Part-time study is available in most focus areas of the M.N. program. Course work may be started prior to formal admission to a program as a graduate nonmatriculated student (GNM). GNM status allows the student to earn up to 12 graduate-level credits which may be applied to a graduate program if the student is later admitted. Time limits for acceptance of courses taken as a GNM student are six years for a master's degree and ten years for a doctoral degree from the first course to completion of the degree.

The Doctor of Philosophy in Nursing Science program prepares scientists capable of advancing nursing practice and education through research and scholarly activity. The program provides for rigorous research training designed for individuals interested in careers in academia or for other types of leadership positions in health-service agencies in which the ability to design, plan, and implement research in nursing is a significant expectation.

Master Entry Program in Nursing

Admission Requirements

M.E.P.N. applicants apply to a specific Master of Nursing focal area at time of application, and have the option of specifying a first and second choice of Master of Nursing focal area.

- * Baccalaureate degree from a regionally accredited institution of higher learning with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits by date of enrollment.
- * Minimum 3.00 GPA for all college level work.

- * Completion of required prerequisite courses, including:
 - o Chemistry (three-quarter CHEM 120, CHEM 220, CHEM 221 for all UW students; two-quarter sequence – one general chemistry and one organic - for non-UW applicants), anatomy, physiology, nutrition, and microbiology, with a minimum grade of 3.0 in each. Three of the six or seven courses must be completed at the time of the application. A fourth course must be completed by the end of autumn quarter (i.e., students applying for summer 2007 admission must complete the fourth course by the end of fall quarter 2006), and all six or seven courses before enrollment, with at least a 3.0 grade in each.
 - o A 5-credit course in life span growth and development with a grade of at least 3.0, to be completed before enrollment.
 - o A 3-credit basic course in descriptive and inferential statistics with a grade of at least 3.0.
- * GRE (General Exam) scores
- * International applicants, as well as immigrants to the United States and U.S. permanent residents, whose native language is not English, and who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand, or the United Kingdom, must submit both TOEFL and TSE scores.
- * Resume and background summary.
- * Three letters of reference consisting of one health care reference, one academic reference, and one character reference (cannot be completed by a family member). School of Nursing forms for each of these reference letters must be used and are provided with the online application form.
- * Goal statement relevant to the M.E.P.N. program and to the Master of Nursing focal area selected. Students who choose a first and second choice of master's focal areas must submit a separate goal statement for each one. M.E.P.N. applicants may apply to any of the Master of Nursing focal areas, with the exception of adult and women's health care nurse practitioner and neonatal nurse practitioner.
- * Criminal history/background check clearances: From Washington State and, for students who have lived outside Washington during the past three years, a background check from each state in which they resided.
- * One official transcript from each collegiate institution attended.
- * School of Nursing interview(s). Applicants considered competitive for M.E.P.N. after an initial review are invited for group interviews to determine if the applicant (1) is a potential match for the profession of nursing; (2) is a match for the Master of Nursing focal area(s) applied to; (3) demonstrates breadth of understanding; (4) is an effective and sensitive communicator; and (5) demonstrates emotional maturity, insight, sound judgment, and critical thinking skills. Group interview invitations are sent out no later than December 15; interviews are scheduled the first week in January. Several focal areas require individual interviews in addition to the M.E.P.N. committee group interviews; selected applicants to those areas are contacted directly to arrange the additional interview.

Degree Requirements

117-120 credits, as follows:

- * *Pre-licensure coursework:* NCLIN 302 (1-5, max. 5), NCLIN 306 (4), NCLIN 402 (4), NCLIN 406 (1-10, max. 10), NCLIN 409 (6), NCLIN 411 (12-20, max 20), NCLIN 416 (4), NCLIN 418 (4), NURS 303 (2/3), NURS 304 (3), NURS 308 (3), NURS 309 (2), NURS 310 (2/3), NURS 401 (5), NURS 405 (5), either NURS 407 (3) or NURS 579 (3), NURS 412 (3), NURS 415 (5), NURS 417 (3), NURS 522 (3)
- * *M.N. Portion:* Students who have made satisfactory progress in the first five quarters of M.E.P.N., i.e., earning a minimum 2.0 in all graded classes and "Credit" in non-graded classes; earning a minimum 3.00 cumulative GPA; meeting essential qualifications; and who have taken the NCLEX, may begin regular graduate coursework in one of 18 M.N. focal areas. Time required to complete the M.N. portion of M.E.P.N. varies between four and seven quarters of full time study. Focal areas within the M.N. program must comply with the following minimum requirements: nursing science and professional foundations (15 credits); clinical practice (6 credits); scholarly inquiry (11 credits with scholarly project or 14 credits with thesis); related coursework (6 credits). Many focal area requirements exceed this minimum. Part-time study is available for some programs.

Master of Nursing

Admission Requirements

- * Baccalaureate degree from a nationally accredited nursing program with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits, or

- * Associate of arts degree or diploma from a nationally accredited RN program, in combination with a baccalaureate degree in a field other than nursing, acceptable to the UW. In addition, RN's with non-nursing baccalaureate degrees are required to demonstrate competencies in community health and professional leadership equivalent to those of baccalaureate degree nursing graduates, and are required to submit nursing equivalency essays.
- * A 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0.
- * Official Graduate Record Examination (GRE) General Test Scores.
- * International applicants, as well as immigrants to the U. S. and U. S. permanent residents, whose native language is not English, and who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand or the United Kingdom, must submit TOEFL and TSE scores. A minimum official TOEFL score of 580 (or a TOEFLC score of 237) and a minimum TSE score of 55 are required. Test scores must be less than two years old from the test date. No waivers are allowed.
- * Resume and background summary.
- * Three letters of recommendation, one academic, one clinical, and one other.
- * Admission essay relevant to the program objectives. (If applying to another focal area as a second choice, a second goal statement must be submitted.)
- * Criminal history/background check clearances: Forms required to perform a background check in Washington State, and a check against the federal register of persons excluded from participation in federally funded health programs, are included in the application packet and must be completed and submitted with the application. In addition, students who have resided outside Washington State over the past three years are asked to submit an official criminal history background check from each state in which they have resided.
- * Resume describing relevant work, professional, and volunteer experiences.
- * Applications to both the School of Nursing and to the UW Graduate Admissions Office. The School of Nursing application must be accompanied by one official transcript from each collegiate institution attended.
- * All applicants to the Master of Nursing program must have an active, unrestricted U.S. RN license at the time of application. If the applicant does not have such a Washington State license, he/she must obtain one prior to beginning the UW Master of Nursing program, should the applicant be admitted.

Degree Requirements

38-41 credits, as follows:

Nursing science and professional foundations (15 credits); clinical practice (6 credits); scholarly inquiry (11 credits with scholarly project or 14 credits with thesis); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

Master of Science

Admission Requirements

- * A baccalaureate degree in any discipline from a regionally accredited institution of higher learning with a minimum GPA of 3.00 on a 4.00 scale for the last 90 graded quarter credits by date of enrollment. Applicants to the Master of Science need not have a previous degree in nursing.
- * A 3-credit basic course in descriptive and inferential statistics with a grade of at least 2.0. Click here for a list of Approved Statistics Courses.
- * Official Graduate Record Examination (GRE) General Test Scores.
- * International applicants, as well as immigrants to the U.S. and U.S. permanent residents, whose native language is not English, and who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand or the United Kingdom, must submit official TOEFL scores. Test of Spoken English (TSE) scores for international Master of Science applicants are not required. More information for international applicants is found under International Applicants.
- * Three letters of recommendation, two from persons qualified to comment on the applicant's academic abilities and one from a person who can provide work-related (practice) information.
- * Admission essay relevant to the program objectives. (If applying to another focal area as a second choice, a second goal statement must be submitted. The application is reviewed for the second choice after a decision has been made on the application to the first choice and after the application deadline.)

- * Criminal history/background check clearances: Forms required for a background check in Washington State, and a check against the federal register of persons excluded from participation in federally funded health programs, are included in the application packet. Students who have resided outside Washington State over the past three years submit an official criminal history background check from each state in which they have resided.
- * Resume describing relevant work, professional, and volunteer experiences.

For students planning to take clinical nursing courses as part of their program of study, an active, unrestricted Washington RN license. Other applicants to the Master of Science program are not required to have an active RN license or to have a previous degree in nursing.

Degree Requirements

49 credits, as follows:

Nursing science (15 credits); professional foundations (3 credits); theory development (5 credits); modes of inquiry (11 credits); thesis (9 credits); related coursework (6 credits). Specific courses determined in consultation with adviser according to the student's specific background and needs.

Master of Nursing/Master of Public Health Concurrent Degree Program

Admission Requirements

See admission requirements for M.N. and M.P.H. individual degrees. Students must apply separately to, and be accepted by, each school. Students already enrolled in one school may apply for admission to the other and to the concurrent degree track. Students are encouraged to complete up to one year of studies in one school before entering the other.

Degree Requirements

See M.N. and M.P.H. individual degree requirements; differences are as follows:

At least 18 quarter credits for the master's degree in each program must be numbered 500 and above. Numerical grades must be received in at least 18 quarter credits of coursework for each degree and all required courses must be taken graded. Up to 12 credits taken in one school can be counted toward the other school's total credit requirements, if approved by both programs. Electives for each department can be fulfilled by taking the required courses of the other department.

One thesis is required. The nine required thesis credits can be taken in either school, which then becomes the home school and the source of the thesis committee chair as well as the program authorized to approve the thesis. Each school agrees to accept the other school's thesis as meeting its thesis requirement. Faculty from each school should be involved in development of the thesis and sit on the thesis committee.

Doctor of Philosophy

Admission Requirements

- * A baccalaureate degree from a college or university of recognized rank. Though a master's degree in nursing is the background of the majority of applicants, neither a nursing background nor RN licensure is required.
- * Official Graduate Record Examination (GRE) General Test Scores.
- * International applicants, as well as immigrants to the U.S. and U. S. permanent residents whose native language is not English, and who have not received a bachelor's degree or higher in the U.S., Australia, Canada, Ireland, New Zealand, or the United Kingdom, must submit official TOEFL scores. More information for international applicants is found under International Applicants.
- * An example of applicant's scholarly writing (25 pages or less). Examples are a published or unpublished manuscript illustrative of concept analysis, an in-depth literature review in a focused area, or a research report. Theses are not accepted. The paper is reviewed for clarity and thoroughness, its articulation with relevant published literature, and the degree to which it raises important issues for the development of nursing science. (International students whose original scholarly writing is not in English should submit a copy of the writing translated into English);
- * Letters of recommendation from three persons knowledgeable about the individual's potential for a research career in nursing;

- * Personal statement in response to specific questions listed on the application related to the pursuit of doctoral studies. The statement is used to evaluate the applicant's ability in written self-expression and the congruency of goals and research interests with the program objectives.

Criminal history/background check clearances: Forms required for a background check in Washington State, and a check against the federal register of persons excluded from participation in federally funded health programs, are included in the application packet and must be completed. In addition, applicants who have resided outside Washington State over the past three years are asked to submit an official criminal history background check from each state in which they resided.

Degree Requirements

93 credits minimum, as follows:

Theory and Domain of Knowledge (minimum 43 credits): Courses include: NURS 588 (3); NURS 589 (3); NURS 590 (5); NURS 592 (4); NURS 591 (3); NURS 595 (3); NURS 587 (2, 2); graduate nursing courses (6 credits); related fields (12 credits).

Scholarly Inquiry (minimum 50 credits): Courses deal with the means of developing knowledge. There is exposure to a variety of approaches with encouragement to develop advanced skills in at least one methodology. Courses in this category are grouped into four required sub-categories:

- * Methodological Perspectives in Nursing Science: NMETH 580 (5 credits)
- * Design/Methods/Analysis Sequence: 18 credits
- * Advanced Methods: 8 credits minimum, from the following: NMETH 581 (2-6); NMETH 582, NMETH 583 (4, 4); NMETH 591 (4); NMETH 592 (2-4); NMETH 593 (4); NMETH 584 (4); NMETH 586 (4); NMETH 587 (4)
- * Statistics: 10 credits minimum, from the following: BIOST 511, BIOST 512, BIOST 513 (4, 4, 4); EDPSY 593 (5), EDPSY 594 (5), PSYCH 513 (4), PSYCH 514 (4), PSYCH 515 (4); SOC 424, SOC 425 (3, 3); NMETH 590 (2). Optional advanced statistics courses include BIOST 524 (3), BIOST 574 (3), SOC 526 (3), SOC 529 (3)
- * Dissertation: 27 credits of NMETH 800
- * Optional Elective Colloquium: NURS 596 (2-6 credits)

Financial Aid

A limited number of nurse traineeships are available for premaster's study. Other financial aid is available on a limited basis. Teaching assistantships and research assistantships are available to a limited number of students. Priority for these appointments is given to predoctoral students.

Contact the Academic Services Office, School of Nursing, for current information.

Course Descriptions

See page 582.

College of Ocean and Fishery Sciences

Dean

Arthur R.M. Nowell
207 Ocean Sciences

Associate Dean

Ken Chew

The marine environment has been a dominant factor in the history of the Pacific Northwest from the time of the first Native American settlements to the modern days of aquaculture, container ships, and waterfront condominiums. It is not surprising, therefore, that the University of Washington has a long tradition of commitment to teaching, research, and public service in subjects related to marine and freshwater activities.

The College of Ocean and Fishery Sciences comprises five major units of the University in the marine and freshwater sciences: the Applied Physics Laboratory; the Schools of Aquatic and Fishery Sciences, Marine Affairs, and Oceanography; and the Office of Marine Environmental and Resource Programs, which includes the Washington Sea Grant Program. Each of the units of the College focuses on a different aspect of the aquatic environment, but there is much overlap of interests.

The College offers both undergraduate and graduate instructional programs in fisheries and oceanography, and graduate programs in marine affairs. Undergraduates may pursue complementary joint undergraduate degrees with departments such as Biology, Chemistry, and Earth and Space Sciences in the College of Arts and Sciences. College faculty, staff, and students carry out research in oceans, estuaries, and freshwater lakes and rivers all over the world. Facilities for research and teaching range from ocean-going vessels to well-equipped laboratories and classrooms.

The College also supports career-oriented resources for students to complement traditional course work and research. An annual Career Fair, held each February, brings more than 30 potential employers to campus to meet with students and discuss career possibilities and employment opportunities. A well-equipped Career Center is available for students, providing information about career planning and job opportunities in the marine and freshwater sciences. Northwest WaterWork, a publication of current employment opportunities and internships available in water-related areas, is published by the College as a service to students. Internships are encouraged as a way to help students bridge the transition from the classroom to employment after graduation. The College also supports educational outreach activities and innovative learning technologies.

In 2003, the College had 200 undergraduate and 250 graduate students enrolled, a faculty of 198 members, and a total budget of \$60 million, making it one of the largest institutions of its kind in the nation.

The School of Aquatic and Fishery Sciences provides nationally recognized learning experiences in applied aquatic sciences, with an emphasis on fisheries management and conservation. Faculty, staff, and students have access to the region's wealth of aquatic habitats and living resources as well as synergistic partnerships with other academic programs throughout the nation and the world. Critical program areas in aquatic sciences include aquaculture, physiology and genetics, habitat and species ecology, and quantitative fisheries analyses, management, conservation, and restoration.

The School of Oceanography was established in 1930 for teaching and research focused on coastal and blue-water oceanography. Faculty, staff, and students explore ocean-climate interactions, biological, chemical, and geophysical aspects of deep-sea hydrothermal systems, the oceanography of coastal ecosystems, and other interdisciplinary topics. The School offers graduate degrees and is the only leading oceanography program to offer a bachelor's degree, with approximately 100 undergraduate majors currently enrolled.

The School of Marine Affairs fosters comprehensive, long-term, and anticipatory approaches to marine policy and ocean and coastal management. An interdisciplinary curriculum and interactions with public and private organizations, environmental groups, and regulatory agencies enrich student understanding of contemporary issues in ocean and coastal management. The school provides guidance to all levels of government in the U.S. and abroad; to non-governmental organizations that promote resolution of ocean and coastal issues; and to the marine trades, shipping, and transportation industries.

The Applied Physics Laboratory (APL) is a self-sustaining research center within the College established in 1943 at the request of the U.S. govern-

ment to address urgent wartime problems. Today, as one of only four Navy University Affiliated Research Centers in the country, it is a premier center for research, development, and advanced education in science and engineering. About half of APL's programs are devoted to developing innovative solutions to complex technical problems, primarily related to naval operations. The remaining programs are committed to fundamental research in ocean physics, ocean acoustics, polar science, remote sensing, and medical and industrial ultrasound.

The Washington Sea Grant Program (WSGP) supports a broad range of research, education, outreach, and technology transfer activities on coastal and marine issues, placing particular emphasis on those situations where resources, the environment, and people interact. It works extensively with university and external partners to identify needs and opportunities in the marine environment and to develop projects and partnership programs that address them. WSGP is nationally recognized for its quality, innovation, and positive impact.

Aquatic and Fishery Sciences

116 Fishery Sciences

The School of Aquatic and Fishery Sciences (SAFS) encompasses multidisciplinary programs at the interface between the traditional fields of biology, oceanography, and natural resource management. Primary focus is on aquatic ecology and natural history, conservation, and management of fishery resources and habitats. The scope of aquatic systems ranges from watersheds, rivers and lakes, to estuarine and near-shore shelf systems and biotic communities therein. Core sciences in disease, physiology and genetics have application to fish and invertebrate culture and production. Faculty and student research draws heavily on physical system processes, mathematical and statistical models, species life histories, and community ecology, with frequent relevance and application to critical issues of policy and management. The School's diverse research activities include field programs in behavior, ecology, and conservation, an internationally recognized quantitative science program, and traditional wet-lab sciences including aquatic microbiology, diseases, genetics, reproduction, and endocrinology. SAFS is a vibrant academic program presently composed of 28 faculty, 120 graduate and 115 undergraduate majors, and skilled support staff. The School is at the center of many societal controversies related to aquatic systems and resources linked inter alia to the Endangered Species Act, to requirements for protecting essential fish habitat, and to statutes in the Magnuson-Stevens Fishery Conservation and Management Act. The faculty serve on numerous national and international committees and panels in influential roles that shape and guide decisions affecting most aspects of aquatic sciences.

Undergraduate Program

Adviser
116 Fishery Sciences, Box 355020
206-543-7457
safs@u.washington.edu

The School of Aquatic and Fishery Sciences (SAFS) offers the following programs of study:

- * The Bachelor of Science in Aquatic and Fishery Sciences
- * A minor in aquatic and fishery sciences

The School's undergraduate program has been substantially modified in recent years to reflect student and faculty interests in ecology and conservation biology, as well as more traditional fields such as stock assessment and fishery management. Faculty dedication to teaching, substantial benefit gained in close faculty contact within a relatively small program, and significant experiential training and research have made SAFS an appealing major that has doubled in recent years. The Bachelor of Science degree provides an underpinning in sciences such as biology, chemistry and math/stats, then adds a core curriculum within aquatic sciences. Students study within areas of individual interest, grouped in three primary areas: aquatic ecology, conservation and management of aquatic resources, and biology and culture of aquatic animals.

Bachelor of Science

Suggested First- and Second-Year College Courses: Calculus and either the chemistry or biology series the first year, followed by the other series immediately following. English composition, public speaking, and FISH 250 or FISH 101.

Department Admission Requirements

Students in good academic standing may declare this major at any time, including on their application for admission to the UW. After notification of admission and before registration, new students should visit or email the Student Services Office for help in planning their programs.

Graduation Requirements

180 credits, to include 44 credits in FISH-prefix courses; 44 credits of Natural World; 15 credits of mathematics; 10 credits each of Individuals & Societies and Visual, Literary, & Performing Arts; 12 credits of Writing; and 45 credits of free electives.

The Natural World

Minimum of 44 credits, to include:

Biological Sciences: BIOL 180, BIOL 200, BIOL 220 (5, 5, 5); or BIOL 201, BIOL 202, BIOL 203 (5,5,5); or BIOL 101-BIOL 102 or BIOL 161-BIOL 162 and GENOME 371 or FISH 340/BIOL 340 (5-5, 5). One of BIOL 356 (3), FISH 447 (3), or BIOL 473 and BIOL 474 (3,2).

Physical Sciences: PHYS 114, PHYS 115 (4,4), OCEAN 210 (3). Option A: CHEM 142, CHEM 152, CHEM 162 (5,5,6), and CHEM 220 (5) or CHEM 223 and CHEM 224 (4, 4); Option B: CHEM 120, CHEM 220, CHEM 221 (5, 5, 5).

Mathematics and Statistics

Minimum of 15 credits beyond MATH 120, to include Q SCI 291, Q SCI 292 (5, 5) or MATH 124, MATH 125 (5, 5) or MATH 144, MATH 145 (5,5). Q SCI 381 (5).

General Education

Individuals & Societies (I&S): Minimum of 10 credits to include one course (3 credits minimum) in economics and one course (3 credits minimum) in law, policy, or ethics. See adviser for list of acceptable courses.

Visual, Literary, & Performing Arts (VLPA): Minimum of 10 credits.

Writing Proficiency: Minimum of 12 credits, to include 5 credits of English composition drawn from the University list, and at least 7 additional credits of writing-intensive (W) courses.

Major Requirements

Minimum of 44 credits to include FISH 210, FISH 310, and FISH 311 (5,5,5); one from FISH 312 (5), FISH 323 (5), or FISH 324 (5); 18 additional credits of upper-division FISH courses, including 12 credits in the student's chosen focus area; FISH 494 and FISH 495 (3-9,3).

Minor

Minor Requirements: Minimum of 28 credits to include FISH 210 (5); two from FISH 310 (5), FISH 311 (5), FISH 312 (5), FISH 323 (5) and FISH 324 (5); Q SCI 381 (5) or Q SCI 482 (5); minimum of two upper-division FISH courses totaling at least 8 credits.

Student Outcomes and Opportunities

* *Learning Objectives and Expected Outcomes:* The study of aquatic and fishery sciences emphasizes a variety of analytical, quantitative, communication, and technical skills. Coursework provides rigorous undergraduate training and experience in both laboratory and field sciences. The School emphasizes skills in the scientific method of inquiry, data analysis, and written/oral presentation of scientific results. Many students are involved in research projects while enrolled, and all students must complete a research-based capstone project under faculty supervision as a degree requirement. The capstone process leads to synthesis of the student's scientific results and other knowledge as

experience is gained in data analysis and writing. Results from the capstone research are presented by students in a public forum, such as the UW Undergraduate Research Symposium or the SAFS Undergraduate Research Symposium. Each year, some undergraduates have their capstone projects published. SAFS graduates pursue careers in the private sector (environmental consulting firms, private companies), the public sector (state and federal agencies, non-profit organizations, non-governmental agencies, education), and many continue into graduate programs either in research or policy. The undergraduate degree prepares students for either direct employment in a number of fields within public and private sectors, or ensures they are competitive for entry into applicable graduate programs worldwide.

* *Instructional and Research Facilities:* The School of Aquatic and Fishery Sciences is housed in several buildings on the University of Washington campus. In addition, the School maintains various facilities off campus, including field research stations in Washington State and Alaska.

o Buildings: The Fishery Sciences Building, housing most of the School's faculty, staff, and graduate students, was completed in autumn 2000, and contains numerous laboratories, offices, and classrooms. Teaching facilities include a large auditorium, several classrooms with state-of-the-art audiovisual equipment, extensive laboratories, and two computer classrooms/labs. The PC Lab is open for general student use when not being used as a classroom. The GIS Lab is mostly used for mathematical/statistical applications and Geographic Information Systems.

The Marine Studies Building is home to the Marine Molecular Biotechnology Laboratory, containing extensive facilities for molecular genetic research.

The Fisheries Teaching and Research building is connected by walkways to the adjacent Marine Studies Building, and houses faculty, staff, and graduate students in laboratory-based disciplines. The Pacific Northwest Regional Fish Collection and its affiliated ichthyological faculty, staff, and students are also housed in the building. Facilities include several new classrooms and teaching laboratories, environmental chambers, and research laboratories.

o Other Facilities:

+ Marine Molecular Biotechnology Laboratory (MMBL): Located in the Marine Studies Building, the MMBL was established in 1993 as a joint facility of the School of Aquatic and Fishery Sciences and the School of Oceanography. It is directed by four faculty who carrying out research projects in conservation genetics, molecular ecology, environmental genomics, and phytoplankton ecology. The MMBL is equipped for most types of research in molecular biology, including DNA sequencing and other types of nucleic acid and protein analysis, molecular cloning, and tissue culture. Laboratory facilities include two computerized, laser-based fluorescent imaging systems for DNA sequencing and other forms of genetic analysis, a fluorescence microscope, thermal cyclers, and protein purification equipment.

+ Research and Teaching Hatchery: A salmon return pond and large outdoor raceways are located just south of the Fisheries Center. In the late fall, adult Chinook and Coho salmon return to the pond to complete their life cycle and replenish the natural living resource. The School also maintains a field station at Big Beef Creek on Hood Canal. This station has a native salmon stream plus abundant well water, pristine tidelands, and access to seawater in Hood Canal. Laboratory and housing facilities are available to researchers.

+ University of Washington Fish Collection: The School's Fish Collection, constituting one of five major permanent facilities on the West Coast, includes an extensive array of preserved fishes. Presently, the collection contains more than 230,000 juvenile and adult specimens, and well over 3.3 million eggs and larvae, representing about 3,778 species in 1,419 genera and 310 families. About 25% of the material consists of freshwater species, primarily from Washington, Oregon, and Alaska. The remainder are marine fishes and invertebrates collected mainly in the eastern North Pacific Ocean, from the Aleutian Islands to Baja California, and in the western tropical Pacific, from Christmas Island to Guam and the Philippines. Curators of the collection make specimens available upon request to researchers within and outside SAFS, and provide ichthyological information to the public.

+ Alaska Field Stations: The School maintains six field stations in the Bristol Bay region of Alaska. Two field camps are located at Lake Iliamna (Iliamna, Porcupine Island), one at Chignik Lake, and three

on the Wood River Lakes (Aleknagik, Nerka, Kulik). Each field station features cabins, boats, laboratory space, and equipment to support research activities. The stations are occupied primarily during summer months in support of various types of studies on salmon. The quality of the habitats surrounding the stations ranges from excellent to nearly pristine, and the sites are either within or adjacent to state or national parks. Unlike nearly all salmon populations and most aquatic habitats in the lower 48 states, the fish communities have not been influenced by species introductions, the genetic composition of the populations has not been affected by hatcheries or transplants, and the habitats have experienced no logging or agriculture. The field stations are therefore a unique opportunity to carry out research on relatively undisturbed populations. The School offers a course at these field stations, with the goal to provide a small number of students with direct, hands-on training in the theories and techniques of research in aquatic ecology.

- + Vessels: The School uses various small vessels for instructional and research work, including tow netting, purse seining, and trawling. Training cruises introduce students to shipboard operations.

* *Honors Options Available:* With College Honors; With Distinction (Departmental Honors). See www.cofs.washington.edu/people/honors.html for requirements.

* *Research, Internships, and Service Learning:* SAFS scientists work closely with employers in both the public and private sectors, leading to opportunities for undergraduates to receive both internship and research experience. Scientists from area agencies come to the School to attend weekly SAFS departmental seminars. Undergraduates are encouraged to attend. Recently these connections have resulted in research and internship opportunities for SAFS undergraduates at NOAA, National Marine Fisheries, Alaska Fisheries Sciences Center, National Marine Mammal Lab, the U.S. Forest Service, the Student Conservation Association, and the Seattle Aquarium. The College of Ocean and Fishery Sciences is second only to the UW Medical School in federal research dollars brought to the UW campus, providing many paid hourly student positions within the department.

* *Department Scholarships:* Scholarships are awarded on the basis of academic merit and other factors. The annual application process for continuing students begins in spring; check with the Office of Student Services for applications and deadlines.

* *Student Organizations/Associations:* SURF (Society for Undergraduate Resources in Fisheries) organizes social, career, and educational activities for undergraduates in Aquatic and Fishery Sciences. SURF also prints t-shirts, welcomes new students to the program, represents the program at events, and collaborates with student groups in other related departments on events.

Of Special Note:

- * The College of Ocean and Fishery Sciences has its own career coordinator who organizes quarterly workshops, an annual career fair, an email list of openings related to the aquatic sciences, and who meets individually with both current students and alumni.
- * Since 1999, the School of Aquatic and Fishery Sciences has sent six students and three faculty members to two Alaska Salmon Field Stations for a six-week course in aquatic ecology. These students receive education in ecology, limnology, population modeling, field techniques, scientific writing, and presentation skills.

Graduate Program

Graduate Program Coordinator
116 Fishery Sciences, Box 355020
206-616-5893
safs@u.washington.edu

The School of Aquatic and Fishery Sciences, established in 1919, offers courses and conducts research on the conservation, management, and effective use of fish and shellfish resources. Education and research in the School include studies of aquatic ecology; ichthyology; population dynamics; management of free-ranging stocks; restoration ecology; aquaculture; seafood quality and safety; and effects of human activities on freshwater and marine ecosystems.

Students may apply for admission into programs leading to the Master of Science or Doctor of Philosophy. Students who apply for the Ph.D. program

must hold a master's degree prior to beginning their doctoral studies. All students who receive a master's degree from the School and wish to pursue a Ph.D. will be reviewed by the Recruitment, Admissions, and Scholarship Committee before being accepted into the Ph.D. program.

Master of Science

Admission Requirements

Minimum requirements for admission to the graduate program in the School are

- * A bachelor's degree from an institution of recognized standing with a minimum GPA of 3.00 in the last two years of college work.
- * Typically at least a 500 on both the verbal and quantitative portions of the GRE and a 5 on the analytic portion (a 500 if taken before October 2002).
- * If an International Student, a minimum TOEFL score of 580 on written exam or 237 on computerized exam.

Degree Requirements

45 credits as follows:

- * School of Aquatic & Fishery Sciences Core Courses:
 - o Q SCI 482 (5)
 - o At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514
 - o FISH 521 (4)
 - o FISH 522 (2)
 - o 18 credits of thesis research: FISH 700
- * Additional Course Requirements: At least 12 credits of coursework at the 400 or 500 level are required in addition to the SAFS Core Courses listed above. 4 of the 12 credits must be in 500-level courses. At least 9 of the additional 12 credits must be numerically graded.

Doctor of Philosophy

Admission Requirements

- * Minimum GPA of 3.00 for last two years of graded college work
- * GRE scores of 500 on the verbal and quantitative sections and 5 on the analytical section (500 if before October 2002)
- * For international students not from an English-speaking country, TOEFL scores of 580+ written, 237+ computerized

Admission to the Ph.D. Program After Receiving a M.S. Degree from the School of Aquatic and Fishery Sciences

Students who wish to continue study toward the doctoral degree after receiving a master's from the School must apply to the Graduate Program Coordinator by way of the Student Services Office; the application will be considered by the RASC and a recommendation will then be sent to the director for concurrence or denial. Applications must be submitted by the fifth week of the quarter in which the master's degree is conferred and must consist of the following documentation (students intending to defend in summer quarter should submit their request during the preceding spring quarter, with approval contingent upon degree conference):

- * Three letters of recommendation, including one from the chairperson of the proposed Doctoral Supervisory Committee that, in addition to recommending continued study, guarantees space and financial support for the student for at least the first academic year of study
- * A statement of research intentions from the student
- * Evidence of professional competence and achievement, such as published papers, chapters from the master's thesis, etc.

Bypassing the Master's Degree

Students admitted to the School at the pre-master's level may, under exceptional circumstances, proceed directly to post-master's study. Application should be made to the Graduate Program Coordinator via the Student Services Office for consideration by the RASC. Applications must include the following documentation:

- * A statement from the student that all coursework for the MS Degree has been completed
- * A current transcript
- * A letter from the student's M.S. Supervisory Committee indicating approval to bypass the MS Degree

- * A doctoral dissertation research proposal which has been approved by the chairperson of the proposed Doctoral Supervisory Committee;
- * Evidence that the student has reached a master's level of competence in written completion of research, such as a paper accepted for publication in a peer-reviewed journal

Students who bypass the master's degree must complete all Ph.D. requirements within ten years of beginning graduate study, including M.S. coursework if used to fulfill any Ph.D. requirements.

Degree Requirements

Minimum 90 credits, as follows:

- * SAFS Core Courses: The following core courses are required of all Ph.D. students. They are the same as those required of M.S. students and must be taken as part of the doctoral program if they or their equivalents have not been taken during an M.S. program.
 - o Q SCI 482 (5)
 - o At least two of the following, for 2 credits each: FISH 510, FISH 511, FISH 512, FISH 513, FISH 514
 - o FISH 521 (4)
 - o FISH 522 (2)
 - o 27 credits of doctoral dissertation: FISH 800 (a maximum of 10 dissertation credits may be taken in any one academic quarter)
- * Additional Course Requirements: At least 48 credits of coursework at the 400 level or above, including dissertation credits, are required in addition to the required core courses listed above. Of those, at least 9 credits must be numerically graded.

Financial Aid

General information on graduate student support is available from the Office of Student Financial Aid, 105 Schmitz. The majority of first-year graduate students are offered research assistantships by appropriate faculty members, depending on the availability of research funding. The School of Aquatic and Fishery Sciences also has a limited number of fellowship opportunities for outstanding entering students. Other students may have their studies supported by the agency for which they work or they may be international students with scholarships from their home countries.

Graduate applicants are urged to discuss their financial needs with professors in their potential major fields during the early stages of the graduate application process. The graduate applicant will automatically be considered for any fellowships, research assistantships, or teaching assistantships available from the School of Aquatic and Fishery Sciences when the admissions application is submitted.

Course Descriptions

Marine Affairs

3707 Brooklyn Avenue Northeast

Graduate Program

Graduate Program Coordinator
3707 Brooklyn NE, Box 355685
206-543-4326, 206-543-7004
uwsma@u.washington.edu

The School of Marine Affairs offers an interdisciplinary program of study leading to the Master of Marine Affairs degree. Marine affairs concerns management and policy questions on the uses of the coastal and offshore regions of the ocean and their resources. The core curriculum includes courses from marine affairs, economics, law, marine sciences, and public affairs.

Master of Marine Affairs

The School of Marine Affairs offers an internationally recognized master's degree program for launching careers in marine policy and administration. Students learn creative approaches to resolving marine problems and conflicts, charting rational use of living and non-living marine resources, and

managing human activities on the coasts, at sea, and in estuaries, wetlands, and large inland bodies of water.

A major program objective is to prepare students for professional careers in policy making, management, teaching, and research. Breadth of study is emphasized, and all students are expected to gain familiarity with relevant aspects of the social, technological, and environmental sciences. In addition, each student is expected to develop a professional and scholarly proficiency in a particular aspect of marine affairs.

Completion of the M.M.A. program normally requires two academic years for students who have received a baccalaureate degree. During the first year, students develop a comprehensive understanding of the marine affairs field and acquire analytic skills. During the second year, a special competence is developed in a topical area of interest (e.g., ocean and coastal management, ports and marine transportation, marine environmental protection, marine resources management, ocean and coastal tourism and recreation), and a thesis is prepared and presented under the guidance of a faculty supervisory committee. Individual courses of study may be adjusted to accommodate prior experience and academic background. Mid-career and other qualifying students can apply to follow a non-thesis track emphasizing additional coursework and a degree project.

Admission Requirements

Admission to the School of Marine Affairs is based on evaluation of required application materials in competition with other applicants. Required materials include Graduate Record Examination general-test scores, completed departmental supplementary information form, three letters of recommendation, official academic transcripts, and a statement of career objectives. Applicants must apply directly to, and be accepted by, the University's Graduate School. Course sequences begin each autumn quarter, and new students normally are admitted only at that time.

Degree Requirements

59 credits as follows:

- * The Core Curriculum (29 credits minimum)
 - o Introduction to Marine Affairs: SMA 500 (5), SMA 501 (3)
 - o Economics: SMA 536 (3). (Students may be waived by the Graduate Program Coordinator from SMA 536 due to adequate undergraduate training, but are required to take at least one economics course at the 400 or 500 level. The following courses are suggested: SMA 537 (3), SMA 538 (3), ECON 435 (5), ECON 436 (5).)
 - o Marine Law: SMA 506/LAW 561 (3) or SMA 515/LAW 565(3)
 - o Policy Analysis: SMA 519 (3) or PB AF 513 (3)
 - o Policy Processes: one of the following: SMA 507 (3), SMA 508 (3), SMA 521 (3), SMA 523 (3), PB AF 590/CFR 592 (3) (when course content appropriate; check with Graduate Program Coordinator); PB AF 592/FM 571 (5)
 - o Marine Science: SMA 591 (3). (Students may be waived by the Graduate Program Coordinator from SMA 591, but are required to take at least one 400- or 500-level science course. The following courses are suggested: SMA 510 (3); FISH 450 (4); FISH 454 (3); BIOL 472 (5); or BIOL 473 (3).)
 - o Quantitative Skills: one of the following: The required skill level is equivalent to intermediate statistics, including an understanding of point estimates, confidence intervals and regression equations. Students not meeting this requirement through undergraduate classes or experience should take one appropriate course while at SMA. Recommended courses include: Q SCI 381 (5), STAT 301 (5), or STAT 311 (5). (Note: Although 300-level courses do not qualify for graduation credits, the School will waive 3 credits of the 59-credit SMA graduation requirement for students completing one of these courses.)
 - o Social Science Data Collection and Analysis: one of the following: SMA 476 (3), SMA 512 (3), PB AF 507 (3), GEOG 425 (5), or CRF 400 (3)
 - o Marine Affairs Seminar: SMA 550 (3)
- * Electives (20 credits minimum – or 10 additional elective credits for non-thesis track): Elective credits must qualify as graduate credit (typically 400- or 500-level courses) offered in any UW department or school. Students should consult with their advisor or Thesis Committee Chair in choosing a set of elective courses. At least 6 credits, and two courses must come from the following list of SMA courses: SMA 433 (5), SMA 480 (3), SMA 485 (3), SMA 499 (var.) (when subject is African Population, Development and Marine Environment), SMA 509 (3), SMA 510 (3), SMA 514 (3), SMA 516 (3), SMA 517 (3), SMA 540 (3), SMA 555 (3), SMA 581 (3), SMA 550 (1-3) (cannot simultaneously be used to meet core requirements).

- * The Thesis and Thesis Presentation (10 credits minimum – for thesis track students): SMA 700 (minimum 9 credits); SMA 570 (1).
- * Career Skills (non-credit requirement): First year: One career counseling appointment during fall quarter. One resume review session during winter quarter. Second year: One career counseling appointment during fall quarter. One resume review session during winter quarter.

Financial Aid

The School of Marine Affairs has a limited number of positions for graduate student appointments as research assistants. Applicants in need of support are urged to investigate outside sources of funding.

Course Descriptions

See page 593.

Oceanography

108 Oceanography Teaching Building

Oceanography is the study of the marine environment and its interactions with the earth, the biosphere, and the atmosphere. The study is prompted both by the intellectual desire to understand how the oceans move and how life develops in a salty, cold environment, and the need to use wisely the ocean's resources for the benefit of humanity. It is an interdisciplinary science integrating the basic principles of biology, chemistry, geology, physics, geophysics, mathematics, botany, zoology, meteorology, and geography. Applications of high technology to oceanographic instrumentation and vessels, increasingly sophisticated computers, satellite remote sensing, and innovative methodologies are rapidly opening new possibilities for exploration and study. Oceanography is divided into four areas of emphasis:

Biological Oceanography examines the processes governing the distribution, abundances, and production of plants, animals, and nutrients in the oceanic ecosystem. Emphasis is on investigations of bacteria, phytoplankton, zooplankton, and benthic organisms.

Chemical Oceanography investigates the complex chemistry, distribution and cycling of dissolved substances, nutrients, and gases in seawater, the mechanisms controlling them and their origins and fates.

Marine Geology and Geophysics studies marine sediments (their formation, transport, and deposition); ocean basin formation (plate tectonics); processes governing shoreline formation; and the origin, structure, and history of the oceanic crust and upper mantle.

Physical Oceanography endeavors to understand and predict motions in the sea from millimeters through tidal and current scales to the great ocean gyres, the distribution of physical properties (temperature, salinity, sea ice), and air-sea interaction and its implications for climate.

Undergraduate Program

Adviser
108 Oceanography Teaching Building, Box 357940
206-543-5039
student@ocean.washington.edu

The School of Oceanography offers the following programs of study:

- * The Bachelor of Science degree with a major in oceanography
- * The Bachelor of Arts degree with a major in oceanography
- * Specializations include biological, chemical, or physical oceanography, or marine geology and geophysics
- * A minor in oceanography

Bachelor of Arts

Suggested Pre-College Courses: A high school student considering oceanography as a career should be guided by an interest in natural sciences and a good record in high school science courses, particularly mathematics. One year each of biology, chemistry, and physics recommended.

Suggested First- and Second-Year College Courses: BIOL 161- BIOL 162 or BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152; ESS 101 or ESS 210; MATH 124, MATH 125, MATH 126; PHYS 121, PHYS 122, PHYS 123. Students should complete the calculus, general chemistry, and either the biology or physics sequences before autumn quarter of the junior year.

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Major Requirements

Same as for the Bachelor of Science degree (see below), except only 10 credits of upper-division science, mathematics, or engineering courses are required.

Bachelor of Science

Suggested Pre-College and First- and Second-Year College Courses: Same as for Bachelor of Arts degree (shown above).

Department Admission Requirements

Students in good academic standing may declare this major at any time.

Graduation Requirements

Minimum 180 credits, to include the following:

1. MATH 124, MATH 125, MATH 126; CHEM 142, CHEM 152; PHYS 121, PHYS 122, PHYS 123; ESS 101 or 210; and BIOL 161-BIOL 162 or BIOL 180, BIOL 200, BIOL 220 (55-60 credits)
2. OCEAN 200, OCEAN 210, OCEAN 220 (taken for writing credit), OCEAN 400, OCEAN 410, OCEAN 420, OCEAN 430, OCEAN 442, OCEAN 443, OCEAN 444 (taken for writing credit), and one from the following: OCEAN 401, OCEAN 411, OCEAN 421, OCEAN 431 (39 credits)
3. 20 credits of upper-division science, mathematics, or engineering to be selected in the student's area of specialization in consultation with a faculty adviser (20 credits)
4. 20 credits of Visual, Literary, & Performing Arts and 20 credits of Individuals & Societies from the University Areas of Knowledge lists (40 credits)
5. 5 credits of English composition and 10 credits of W (writing) courses. 8 of the 10 credits of University-approved W (writing) courses are included within the curriculum. (7 credits)
6. Free electives to bring credit total to minimum 180.

Minor

Minor Requirements: 25 credits as follows:

1. OCEAN 200, OCEAN 210, OCEAN 220
2. One of the following: OCEAN 400, OCEAN 410, OCEAN 420, or OCEAN 430
3. OCEAN 442
4. 9 credits of OCEAN electives, chosen from 300- and 400-level oceanography courses

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The degree offers students a solid foundation in biological, chemical, geological, and physical oceanography, together with more specialized expertise in one of those options. Expertise is gained through team-based field and laboratory research during the sophomore and junior years, then by independent research on a thesis topic during the senior year. Emphasis is on building skills with the tools and techniques of shipboard oceanographic research and data analysis and interpretation. Students engage in field work and data collection, learn to analyze and interpret that data, and prepare scientific reports. Additionally, students acquire familiarity with the specialized instruments of oceanographic research.

The program is designed to prepare students to enter the profession directly or to pursue graduate studies. Oceanographers seek to produce a new understanding of an ocean system and to explore the potential consequences to the marine environment of human activities. They collect samples and data, analyze and interpret them, and prepare and disseminate the results. They work at sea, on land, in laboratories, and

with computers. Most are employed in education and research institutions and federal, state and local government agencies. Other employers include environmental consulting firms and private companies extracting and harvesting marine products. A degree can also serve as a background for a career in teaching, administration, marine affairs, computing, or environmental studies.

- * *Instructional and Research Facilities:* The School has extensive laboratory facilities equipped with highly specialized instruments and computers for teaching and research. The School operates two research vessels: the 274 foot R/V Thomas G. Thompson, used chiefly for open ocean research throughout the world, and the 65 foot R/V Clifford A. Barnes, used for research in coastal waters and estuaries of Washington. Undergraduate students have ample opportunities to gain research experience in the laboratories of faculty and to do oceanographic research in Puget Sound.
- * *Honors Options Available:* With College Honors; With Distinction (School Honors). See adviser for requirements.
- * *Research, Internships, and Service Learning:* Special opportunities for Oceanography majors are provided by the School's large research program by involving students in undergraduate research projects and part-time employment.
- * *Department Scholarships:* See adviser for availability.
- * *Student Organizations/Associations:* The Student Oceanographic Society (SOS) provides peer advice, organizes field trips, sponsors alumni career panels, and holds social gatherings.

Of Special Note: OCEAN 101 and other transferable lower-division oceanography courses will count as electives and not as part of the major.

Graduate Program

Graduate Student Services
108 Ocean Teaching, Box 357940
206-543-5039
student@ocean.washington.edu

The School of Oceanography provides excellent instruction and research opportunities at the graduate level in all areas: biological, chemical, and physical oceanography, and marine geology and geophysics. The program of study emphasizes independent research in conjunction with basic and specialized courses. Interdisciplinary research is encouraged, and students enjoy the opportunity to work across the usual scientific boundaries. Course work during the first two years is required in each option; specialized course work is structured to fit the student's background and objectives. Foreign-language proficiency is required only when deemed crucial to scholarly research.

Master of Science

The program of study includes course work in the student's area of interest and the other oceanography options, and the completion of an approved research project and oral presentation of the results. Thesis and non-thesis programs are offered; most students select the non-thesis option.

Admission Requirements

- * One official copy of transcript(s) from all colleges or universities attended.
- * Minimum GPA of 3.00 or B for last 90 quarter (60 semester) credits
- * GRE scores
- * TOEFL scores for international students.
- * Statement of goals and objectives, which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of especial interest, ultimate goals, extracurricular activities and interests.
- * Three letters of recommendation on School of Oceanography forms (downloadable or available upon request). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Include the letters in sealed envelopes (signed on the seal) with other application materials. In unusual circumstances, applicant may have the letter(s) sent separately to the School. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

Degree Requirements

36-45 credits, as follows:

- * Under the thesis program a minimum of 36 or more quarter credits (27 course credits and a minimum of 9 credits of thesis) must be presented. Under the nonthesis program, a minimum of 36 or more quarter credits of course work is required.
- * At least 18 of the minimum 36 quarter credits for the master's degree must be for work numbered 500 and above. (In a thesis program, 9 of the 18 credits must be course credits and 9 may be OCEAN 700, Masters thesis.)
- * Numerical grades must be received in at least 18 quarter credits of course work taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
- * A minimum of three full-time quarters of residence credit must be earned. Part-time quarters may be accumulated to meet this requirement.
- * In the thesis degree program, a thesis, approved by the supervisory committee, must be submitted to the Graduate School. A student must register for a minimum of 10 credits of thesis (OCEAN 700). With the exception of summer quarter, students are limited to a maximum of 10 credits per quarter of thesis (OCEAN 700).
- * A final Master's Examination, either oral or written, as determined by the student's supervisory committee, must be passed.
- * Biological Oceanography option: The core curriculum consists of the following courses: OCEAN 530 (3), OCEAN 531 (3), OCEAN 532 (3), OCEAN 533 (3). Master's level students are required to take a minimum of 3 credits of advance biological oceanography courses.
- * Chemical Oceanography option: The core curriculum consists of the following courses: OCEAN 520 (3). Master's level students are required to take a minimum of three advanced chemical oceanography courses.
- * Marine Geology and Geophysics option: The core curriculum consists of the following courses: OCEAN 540 (3), OCEAN 541 (3), OCEAN 545 (3).
- * Physical Oceanography option: The core curriculum consists of the following courses: OCEAN 500 (1), OCEAN 510 (3), OCEAN 511 (3), OCEAN 512 (3), OCEAN 513 (3), OCEAN 514 (3), OCEAN 515 (3), OCEAN 517 (2). Physical Oceanography students are also expected to take a sequence of three courses in Applied Mathematics.
- * Out-of-Option Requirement: A minimum of 12 credits of numerically graded, 500-level courses, 6 credits of which must be taken as 3-credit courses in two options outside a student's option. The remaining 6 out-of-option credits may be in courses in oceanography (outside a student's option) or in a related science selected at the discretion of the student and supervisory committee. These courses must be completed with the first two years of study. A grade of less than a 3.0 in any course will necessitate repeating the course or taking another course in that area as recommended by the student's committee.

Doctor of Philosophy

The degree program places a strong emphasis on research following completion of course requirements and General Examination. Upon successful completion of the General Examination, the student undertakes an original research investigation, which is described in the dissertation and defended during the Final Examination.

Admission Requirements

- * One official copy of transcript(s) from all colleges or universities attended.
- * Minimum GPA of 3.00 or B for last 90 quarter (60 semester) credits
- * GRE scores
- * TOEFL scores for international students.
- * Statement of goals and objectives, which may include any or all of the following: How or why applicant became interested in oceanography, significant accomplishments, summary of research experience, research area(s) of especial interest, ultimate goals, extracurricular activities and interests.

- * Three letters of recommendation on School of Oceanography forms (downloadable or available upon request). Recommendations should be from faculty or scientists familiar with the applicant's academic achievements and research experience. Include the letters in sealed envelopes (signed on the seal) with other application materials. In unusual circumstances, applicant may have the letter(s) sent separately to the School. Applicants who have been out of school for some time may include recommendations from employer(s), but all efforts should be made to include at least one letter from academic faculty.

Degree Requirements

Minimum 90 credits, as follows:

- * Completion of a program of study and research as planned by the graduate program coordinator in the student's major department or college and the Supervisory Committee. Half of the total program, including dissertation credits, must be in courses numbered 500 and above. At least 18 credits of course work at the 500 level and above must be completed prior to scheduling the General Examination.
- * Presentation of a minimum three years (nine full-time quarters) of resident study, two of them being at the UW with at least one year in continuous full-time residence. The year of full-time residence may be satisfied by completing any three full-time quarters (not necessarily continuous) at the University of Washington and must be completed prior to the General Examination. Residence requirement for the doctoral degree cannot be met solely by part-time study. A minimum of two academic years of resident study must be completed prior to scheduling the General Examination.

With the approval of the degree-granting unit, an appropriate master's degree from an accredited institution may be applied toward one year of resident study at the UW.
- * Numerical grades must be received in at least 18 quarter credits of course work taken at the UW. The Graduate School accepts numerical grades (a) in approved 400-level courses accepted as part of the major, and (b) in all 500-level courses. A minimum cumulative GPA of 3.00 is required for a graduate degree at the University.
- * Creditable passage of the General Examination. Registration as a graduate student is required the quarter the examination is taken and candidacy is conferred.
- * Preparation and acceptance by the Dean of the Graduate School of a dissertation that is a significant contribution to knowledge and clearly indicates training in research. Credit for the dissertation ordinarily should be at least one-third of the total credit. The candidate must register for a minimum of 27 credits of dissertation over a period of at least three quarters. At least one quarter must come after the student passes the General Examination. With the exception of summer quarter, students

are limited to a maximum of 10 credits per quarter of dissertation (OCEAN 800).

- * Creditable passage of a Final Examination, which is usually devoted to the defense of the dissertation and the field with which it is concerned. The General and Final Examinations cannot be scheduled during the same quarter. Registration as a graduate student is required the quarter the examination is taken and the degree is conferred.
- * Completion of all work for the doctoral degree within ten years. This includes quarters spent on leave or out of status as well as applicable work from the master's degree from the UW or a masters degree from another institution, if applied toward one year of resident study.
- * Biological Oceanography option: The core curriculum consists of the following courses: OCEAN 530 (3), OCEAN 531 (3), OCEAN 532 (3), OCEAN 533 (3). Doctor's level students are required to take a minimum of 9 credits of advance biological oceanography courses.
- * Chemical Oceanography option: The core curriculum consists of the following courses: OCEAN 520 (3). Doctor's level students are required to take a minimum of six advanced chemical oceanography courses.
- * Marine Geology and Geophysics option: The core curriculum consists of the following courses: OCEAN 540 (3), OCEAN 541 (3), OCEAN 545 (3).
- * Physical Oceanography option: The core curriculum consists of the following courses: OCEAN 500 (1), OCEAN 510 (3), OCEAN 511 (3), OCEAN 512 (3), OCEAN 513 (3), OCEAN 514 (3), OCEAN 515 (3), OCEAN 517 (2). Physical Oceanography students are also expected to take a sequence of three courses in Applied Mathematics.
- * Out-of-Option Requirement: A minimum of 12 credits of numerically graded, 500-level courses, 6 credits of which must be taken as 3-credit courses in two options outside a student's option. The remaining 6 out-of-option credits may be in courses in oceanography (outside a student's option) or in a related science selected at the discretion of the student and supervisory committee. These courses must be completed with the first two years of study. A grade of less than a 3.0 in any course will necessitate repeating the course or taking another course in that area as recommended by the student's committee.

Financial Aid

Normally all students pursuing a graduate degree are supported by research or teaching assistantships, or by fellowships and scholarships from national or private sources. Most appointments continue through the summer when students are engaged in research.

Course Descriptions

See page 594.

School of Pharmacy

Dean

Sidney D. Nelson

Associate Deans

Nanci L. Murphy
Kenneth E. Thummel
Stanley S. Weber

Established in 1894, the University of Washington School of Pharmacy is proud of its strong commitment to excellence and the recognition given to its faculty and graduates for their outstanding educational, research, and service activities. The School's Dean's Office and three departments -- Medicinal Chemistry, Pharmaceutics, and Pharmacy -- are located in the H-Wing of the Health Sciences Building.

The School of Pharmacy offers a four-year professional program leading to the Doctor of Pharmacy (Pharm.D.) degree. The curriculum is designed to provide students with the scientific background and clinical skills necessary to render pharmaceutical care in a changing health care system. Instructional methods strive to enhance the critical-thinking and problem-solving skills necessary to provide rational drug therapy, promote healthy lifestyles and disease prevention, enhance patient compliance, reduce medication-related problems, and improve health outcomes. The School aspires to foster a commitment to life-long learning and provide an environment where students develop the knowledge, attitudes, and skills consistent with the profession's high standards.

Students have the opportunity to pursue elective choices to design a program compatible with individual areas of interest. Dual degree options include the Pharm.D./Ph.D. programs in Pharmaceutics and Medicinal Chemistry, the Pharm.D./M.S. program in Pharmaceutical Outcomes Research and Policy, and the Pharm.D./Physician Assistant program. Students also have the option of earning the Geriatric Certificate in Pharmacy Practice, the Pharmacy Management Certificate, and the Biomedical Regulatory Affairs Certificate concurrently with their degree. In the final year of the program students complete experiential training at a variety of practice settings. The School of Pharmacy is a member of the American Association of the Colleges of Pharmacy and its programs are accredited by the American Council on Pharmaceutical Education (www.acpe-accredit.org).

Consideration for admission to the professional program requires a minimum of two years of prepharmacy training. An applicant who is admissible to the University is not assured admission to the School of Pharmacy. Admission is competitive and based on a number of factors. Academic preparedness, motivation, oral and written communication skills, critical-thinking ability, and decision-making skills are among the criteria used to determine a candidate's aptitude for the pharmacy program. Following a preliminary assessment of the applicant pool, the most-qualified applicants are selected for an interview in Seattle. A writing assessment is also conducted at that time. Further details on admission requirements, application procedures, and program content may be obtained from the School's Office of Academic and Student Programs or its Web site.

The School also seeks to promote the life-long learning of pharmacists by offering opportunities for post-graduate education and continuing-education seminars. An external Pharm.D. program is available for those pharmacists who would like to pursue an advanced degree beyond the baccalaureate degree. Continuing-education programs are provided throughout the year to meet the needs of the community.

To foster the interests of students who seek to engage in creative discovery and research, the School also offers graduate education leading to the M.S. and/or Ph.D. degrees in medicinal chemistry, pharmaceutics, or pharmaceutical outcomes research and policy.

Medicinal Chemistry

Graduate Program

Graduate Program Coordinator
H164 Health Sciences, Box 357610
206-543-2224
medchem@u.washington.edu

The Department of Medicinal Chemistry offers programs of graduate study leading to the degrees of Master of Science and Doctor of Philosophy. The primary mission of the program is to train versatile scientists for careers in the pharmaceutical and medical sciences. To this end, graduates of the program acquire a broad knowledge base in medicinal chemistry, pharmacology, and biochemistry, which is important in the rapidly evolving, multidisciplinary biomedical arena. The department further offers diverse opportunities for research at the interface between biology and chemistry, with emphasis on issues of biomedical importance.

Graduates of the program acquire the skills necessary to develop quantitative and qualitative methodologies necessary for the study of biochemical processes that occur at the cellular and subcellular levels. These include the elucidation of biochemical transformations and interactions using techniques such as protein engineering, molecular modeling and dynamics as well as a broad array of supportive spectroscopic techniques including mass spectrometry and NMR.

One major area of research interest is the role of biotransformation processes in the toxification and detoxification of drugs and environmental contaminants. A second area of interest is the determination of protein and small ligand structure and function using computational methods, NMR, mass spectroscopy, and other biophysical techniques. Issues of biomedical importance include elucidation of mechanisms of drug-induced cell toxicity, drug-drug and drug-herbal interactions, identification of enzyme attributes that dictate substrate specificity and catalytic mechanism, pharmacogenetics, structural immunology in vaccine design, biotherapeutics, proteomics, and protein folding in disease states.

Most students proceed directly to the doctoral degree program. Successful completion of a series of cumulative examinations and at least two quarters of teaching experience are among the requirements for completion of the doctoral program.

Admission Requirements

Students who intend to work toward the Doctor of Philosophy degree must apply for admission to the Graduate School and meet the requirements outlined in the Graduate Study section of this catalog. Graduate students must satisfy the requirements for an advanced degree in force at the time the degree is to be awarded. Graduate study requires approval of the Graduate School and the Department of Medicinal Chemistry.

Special Requirements

Students with undergraduate degrees in pharmacy or in the biological or physical sciences are accepted for graduate study in medicinal chemistry. Undergraduates who plan to pursue graduate study are encouraged to expedite their programs by selection of pertinent electives. Although the choice of electives varies with the student's ultimate goals, graduate study in medicinal chemistry requires an adequate background in biological and physical sciences.

Master of Science

A student in the master's degree program must present at least 27 credits of course work, inclusive of thesis and non-thesis research. The student also must complete a research project, prepare an acceptable thesis, and pass a final examination.

Doctor of Philosophy

90 credits minimum, as follows:

Coursework requires graduate students to achieve a level of proficiency in organic, medicinal and physical chemistry, pharmacology, biochemistry, and molecular biology. Most course work is completed in the first two to two and a half years of the graduate program. The program is flexible and easily adaptable to meet individual interests and needs.

In the first year of the program, students rotate through the laboratories of at least two faculty members. At the end of the first year, the student chooses a faculty sponsor and a dissertation research project.

* *First year:* CHEM 530, CHEM 531, CHEM 532 (3, 3, 3); MEDCH 501, MEDCH 502, MEDCH 503 (4, 4, 4); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600

- * *Second year:* BIOC 530 (3); BIOST 511 (4); MEDCH 450, MEDCH 451 (3, 3); MEDCH 525 (3); either MEDCH 527 (3) or MEDCH 528 (3); MEDCH 541 (3); PHCOL 402, PHCOL 403 (4, 4); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600
- * *Third year:* PCEUT 406 (4); MEDCH 520 (1 credit each quarter); MEDCH 582 (1 credit each quarter); MEDCH 600 (7 credits each quarter)
- * *Fourth year:* MEDCH 700 or MEDCH 800

Financial Aid

Financial support in the form of research assistantships and fellowships may be available to students in good standing throughout their graduate careers. Availability of financial support varies from year to year, and prospective applicants should contact the graduate program coordinator for additional information.

Course Descriptions

See page 598.

Pharmaceutics

Graduate Program

Graduate Program Coordinator
H272 Health Sciences, Box 357610
206-543-9434
pceut@u.washington.edu

The Department of Pharmaceutics offers programs of graduate study leading to the Doctor of Philosophy degree.

Program Description

The program provides research training in the fundamental aspects of drug disposition, drug delivery, and drug action in animals and man. Drug disposition includes the phenomena of absorption, distribution, and elimination. Pharmacokinetics is the study of the time course of these processes and the time course of pharmacological effects. Drug delivery includes targeting of drugs to tissues or specific cells to improve their therapeutic effect. These areas of research have a wide range of applications, particularly in the pharmacological characterization of new drug molecules in pharmaceutical development. Graduates of this program possess expertise in a variety of analytical techniques and the elaboration of mathematical models to describe drug disposition and pharmacological processes.

The department's research program includes seven NIH-funded laboratories addressing a variety of fundamental and clinical problems pertaining to drug transport, metabolism, and toxicity associated with several diseases (AIDS, cystic fibrosis, leukemia, epilepsy), as well as pain management and transplantation. Most projects involve collaborative arrangements with investigators from other departments in the University or at the Fred Hutchinson Cancer Research Center. The collaborative relationship of the faculty of the Departments of Pharmaceutics and Medicinal Chemistry in the field of drug metabolism has received worldwide recognition.

Thesis research can involve experimental animal work, in vitro studies, clinical investigation, or a combination of approaches. Graduate students are given the opportunity to participate in interdisciplinary research, providing an added dimension to their training.

A wide range of career paths are available to graduates of this program. Opportunities include research in the pharmaceutical industry; research in hospitals, institutes, and foundations; teaching and research in academic institutions; and positions with government regulatory agencies.

Doctor of Philosophy

Admission Requirements

- * One copy of official transcripts in a sealed envelope from each college attended
- * Official GRE score report
- * All foreign students must take the TOEFL and TSE test and send in the official score report

- * Statement of personal goals describing your background, academic interests, and career objectives
- * A résumé or curriculum vitae listing educational and employment history
- * Three letters of recommendation from persons who are in a position to evaluate your potential for graduate school.

Degree Requirements

The degree program requires a minimum of 90 credits of coursework. The following include a combination of pertinent Graduate School and Department requirements for the Ph.D. degree in Pharmaceutics:

- * **Credits and Scholarship:** A minimum of 41 credits of course work, exclusive of thesis and non-thesis research, must be satisfied. An average grade point average of 3.00 in all numerically graded courses numbered 300, 400, and 500 is required. A minimum passing grade in any given course is 2.7, except required pharmaceutics courses (PCEUT 506, PCEUT 501, PCEUT 503, PCEUT 504, PCEUT 505) in which a passing grade is 3.0. Credits earned for a master's degree may apply towards the doctoral degree.
- * **Teaching experience:** A minimum of two quarters of teaching-assistantship experience is a required component of the training for the Ph.D. degree.
- * **Examinations and Progress Evaluation:** All graduate students must participate in the departmental examination program. A series of cumulative examinations and a general (oral) examination is required for advancement to Ph.D. candidacy, and a final examination (defense of the thesis) is required for the degree.
- * **Master Degree Bypass:** Students who qualified for continuation to the Ph.D. degree may be allowed to bypass the MS degree.
- * **Seminars:** All graduate students must present a minimum of four seminars while in residence (PCEUT 520). In addition, presentation of papers from current literature is required twice a year starting at the beginning of the second year until defense of the thesis (PCEUT 583).
- * **Didactic Training:** The program of course work is divided into four components: (1) prerequisites which define the level of entry into the program; (2) a core program which is analogous to the major; (3) several elective pathways, one of which is required and is analogous to the minor; (4) seminars and literature review.

1. Prerequisites:

- o Differential calculus -- MATH 124 (5)
- o Pharmacology -- PHCOL 401, PHCOL 402, PHCOL 403 (3, 3, 3) or medicinal chemistry -- MEDCH 440, MEDCH 441, MEDCH 442 (3, 3, 3). Waived for pharmacists.
- o Biochemistry/microbiology -- MICROM 301, MICROM 302 (3, 2).

Most students with a B.S. in pharmacy or Pharm.D. should have fulfilled these requirements prior to entering the program. Applications from students who do not have a pharmacy background are strongly encouraged. However, these candidates are accepted into the program on the condition that their deficiencies in course requirements be rectified by the end of the first academic year.

2. Core Program: This graduate core consists of the following disciplines and specific courses: PCEUT 506 (2), PCEUT 501 (5), PCEUT 502 (4), PCEUT 503 (4), BIOST 511 (4), BIOST 512 (4), T C 509 (3), PCEUT 600, PCEUT 700, PCEUT 800 (variable credits).

The above core courses are considered essential for all students in the program. It is unlikely that any of these courses would be waived, except for students entering with previous graduate-level course work in the required areas. In addition, all students must attend the following training sessions, preferably in the first academic year: Radiation Safety, Chemical Safety, Biological Safety, Animal Care and Bio-ethic training.

3. Directed Electives: The purpose of this group of courses is to provide students with an in-depth exposure in an area of specialization or a minor. Elective courses should be chosen to suit individual interests. Students can select one of the following four pathways and must take the equivalent of 12 cr for each elective pathway. A listing of courses that the student plans to take as an elective pathway must be presented with a justification (course descriptions, etc.) to the department chair before the end of the autumn quarter of the second year in the program.

4. Seminars and Literature:

- o Review PCEUT 520: Seminar (1 cr/quarter; 3 qtr/year until graduation). Beginning the second year, students are to make one presentation each year until graduation with a maximum of four presentations. A general topic seminar is presented in the second year and at least one research seminar when the advisor recommends; a final thesis presentation prior to graduation.
- o PCEUT 583: Journal club(1 cr/quarter; 3 qtr/year until graduation). Students are to make two presentations each year until graduation. Journal club presentations are to begin at the second academic year, except for the quarter that the student is scheduled to present a PCEUT 520 seminar series.
- o PCEUT 507: Drug therapy topics (1 cr./qtr, 3 qtr/for first 2 years).

5. Research: PCEUT 600, PCEUT 700, PCEUT 800 (variable credits). Students must choose thesis advisor by the end of spring quarter in their first academic year. Students must begin their laboratory research by the summer quarter of their first academic year in the lab of their advisor. Due to the course work and research demands, most students may find the after class and off hours to be the best and most productive time for their laboratory research.
6. Cumulative Examination: Students are to begin taking cum exams in the autumn quarter of their second academic year and are to continue taking them at every offering until completion of pass requirements or until they take the maximum of twelve exams. Two exams will be offered each autumn, winter and spring quarter. For each exam, there will be three questions offered and two are to be answered. Students must pass five of twelve exams to complete cum requirements (fifth exam waived if student passes the first 4 exams) to continue their pursuit of the Ph.D. degree. The students that do not achieve this goal is required to complete requirements for a terminal master degree.

Financial Aid

All students in the program receive financial support in the form of research assistantships, Public Health Service predoctoral training fellowships and other fellowships such as the William E. Bradley Graduate Fellowship and those from the American Foundation for Pharmaceutical Education and from several pharmaceutical companies.

Course Descriptions

See page 599.

Pharmacy

Graduate Program

Graduate Program Coordinator
H375 Health Sciences, Box 357630
206-616-1383

The Department of Pharmacy offers graduate training leading to either the Master of Science or Doctor of Philosophy degree.

The graduate program in pharmaceutical outcomes research in the Department of Pharmacy provides M.S.- and Ph.D.-level training with a focus on economic evaluation of pharmaceuticals, pharmacoepidemiology, and drug-policy evaluation. Pharmaceutical outcomes research is the study of the health and cost consequences of pharmaceuticals and pharmaceutical-related policies on individuals and populations. Graduates of this program are trained to assess the use, outcomes, and cost of pharmaceuticals and pharmaceutical policies and practices. Students are prepared for careers in (1) teaching and research in colleges and universities; (2) pre- and post-marketing efficacy and safety; (3) policy analysis for industry, health insurance, and governmental agencies; and (4) drug-use management and evaluation within managed health-care organizations.

Doctor of Philosophy

Admission Requirements

- * One copy of official transcripts from each college attended outside the United States. Transcripts from U.S. institutions are required by the department only.

- * Official GRE Scores.
- * For international students for whom English is not the native language, TOEFL and TSE scores.
- * Statement of personal goals describing the student's background, academic interests, and career objectives
- * A resume or curriculum vitae listing educational and employment history.
- * Three letters of recommendation from persons in a position to evaluate the applicant's potential for graduate school. At least one recommendation must be from a person at the last school attended for full-time study, unless the applicant has been out of school for five years or longer. Referees should return their recommendations directly to the Department of Pharmacy in sealed envelopes with signatures over the seals.

Degree Requirements

90 credits, as follows:

- * Core courses: Epidemiology – EPI 512 (4), EPI 513 (4), BIOST 511 (4), BIOST 512 (4), BIOST 513 (4), PHARM 532 (4), PHARM 533 (3), PHARM 534 (3), PHARM 535 (3)
- * Electives: A sufficient number of electives to meet program credit requirements, determined in consultation with adviser to meet the student's interests and focus
- * General Exam
- * Dissertation and Final Exam

Doctor of Pharmacy

A four-year professional program leading to the Doctor of Pharmacy (Pharm.D.) degree, the curriculum is designed to provide students with the scientific background and clinical skills necessary to render pharmaceutical care in various health care setting. Students must pass a state licensure examination to qualify for practice as a pharmacist.

Admission Requirements

- * Two years of undergraduate coursework at any accredited college or university, to include the following: general biology with labs (15 credits); microbiology with lab (5); general chemistry with labs (15); organic chemistry with labs (17); English composition (10); calculus (5); statistics (4-5); humanities (10); social sciences (10).
- * Minimum 3.00 prerequisite-course GPA and cumulative 3.00 GPA for all college courses.
- * Pharmacy experience is highly recommended, either as volunteer or work experience. Students unable to gain pharmacy experience should consult with several pharmacists regarding the profession (e.g., what it involves, career opportunities, current issues and challenges).
- * Pharmacy College Admission Test (PCAT) must be taken within two years of application. Applicants must request that PCAT scores be sent directly to PharmCAS, not to the UW School of Pharmacy. Sending scores to UW will cause an application to be considered incomplete. The UW School of Pharmacy accepts no other admission test (e.g., MCAT, GRE) in place of the PCAT.
- * Non U.S. Citizens: Applicants who hold permanent resident visa status are eligible to apply. TOEFL scores are not required.
- * International Transcripts: All transcripts for coursework completed at foreign colleges or universities must be translated and evaluated course-by-course by one of the following certified agencies: the Education Credential Evaluators, World Education Services, Inc, or Educational-Perspectives.
- * Foreign Pharmacy Graduates: International students who hold a five-year undergraduate pharmacy degree conferred by a recognized school of pharmacy outside the 50 United States, the District of Columbia, and Puerto Rico may consider taking the Foreign Pharmacy Graduate Equivalency Examination in lieu of pursuing the Pharm.D. degree program. Refer to the NABP website (www.nabp.net) for more information.
- * The Foreign Pharmacy Graduate Examination Committee (FPGEC), which operates under auspices of the National Associate of Boards of Pharmacy (NABP), provides the FPGEC Certification Program as a means of documenting the educational equivalent of a candidate's foreign pharmacy education, as well as the license and/or registration. Candidates are required to pass the FPGEC, the Test of English as a Foreign Language (TOEFL), and the Test of Spoken English (TSE). The FPGEC Certificate allows foreign graduates partially to fulfill eligibility requirements for licensure in the states that consider such certification.

Degree Requirements

192 credits, as follows:

- * Theory and methods (109 credits): CONJ 401 (4), CONJ 402 (4), CONJ 403 (4), MEDCH 401 (4), MEDCH 402 (3), MEDCH 403 (3), MEDCH 404 (3), MEDCH 450 (3), MEDCH 451 (3), PCEUT 331 (4), PCEUT 405 (5), PCEUT 406 (3), PHARM 304 (3), PHARM 309 (3), PHARM 334 (3), PHARM 335 (4), PHARM 403 (2), PHARM 412 (3), PHARM 439 (2), PHARM 440 (3), PHARM 479 (4), PHARM 509 (2), PHARM 541 (3), PHARM 543 (4), PHARM 560 (10), PHARM 561 (9), PHARM 562 (9), PHARM 574 (1), PHCOL 401(3), PHCOL 402 (3)
- * Electives (38 credits): Refer to the School of Pharmacy's website for a list of professional electives
- * Practicum (45 credits): To be completed in the last year of the program

Financial Aid

Financial support in the form of research assistantships, teaching assistantships, and fellowships may be available to prospective and continuing students. Availability of financial aid is limited, typically to the first and second academic year. Prospective students should contact the graduate program coordinator for more information on financial support.

Course Descriptions

See page 600.

Daniel J. Evans School of Public Affairs

Dean

Sandra O. Archibald
208E Parrington Hall

Associate Dean

William M. Zumeta
231 Parrington Hall

The Daniel J. Evans School of Public Affairs is a graduate professional school providing education and research for the public service. The school confers the Master of Public Administration (M.P.A.) degree with day, Peace Corps Master's International, and evening program options. The Evans School's program of study is designed to train highly skilled managerial leaders and policy analysts for a wide range of careers in the public and nonprofit sectors. The academic and professional orientation of the degree program gives Evans School students the knowledge and skills necessary to make significant contributions to regional, national and international policy.

Graduates hold leadership positions such as mayors and city managers; local and regional government administrators; foreign service officers; senior military and public safety positions; assistants to elected officials; analysts with budget offices, legislative staff units, and city councils; directors of social service agencies; leaders and staff of nonprofit organizations and administrators of arts organizations. In addition, a number of alumni are employed in private sector positions involving substantial contact with public agencies.

Graduate Program

Graduate Program Coordinator
109 Parrington Hall, Box 353055
206-543-4900
evansuw@u.washington.edu

Master of Public Administration

Day Program

The M.P.A. program is designed for present and future leaders of the public and nonprofit sectors. The program emphasizes broad-based public policy analysis and management knowledge, while students pursue one or more specialized policy fields known as Gateways. The core devotes considerable time to mastering the basic analytic and managerial skills needed by good analysts and managers. The curriculum draws upon the wide range of academic disciplines throughout the University of Washington.

Full-time day students complete 60 credit hours of course work, encompassing the core requirements, an internship and a degree project. They generally take two academic years (six quarters) to complete the degree program. Part-time and Evening Degree students typically take three or more academic years to complete the M.P.A.

The M.P.A. program has five major components:

- * the Required Core Curriculum;
- * concentrated study in the three curricular areas of study: Economics, Analysis, and Values;
- * specialized plan of study chosen from one or more of the following gateways: Education and Social Policy, Environmental Policy, International Affairs, Nonprofit Management, or Urban and Regional Affairs;
- * a final degree project; and
- * an internship.

Peace Corps Master's International

Peace Corps Master's International (PCMI) students undertake a concentrated 51-credit curriculum, including a full tour of Peace Corps service. The required course work can be completed in a total of four or five quarters. One year of course work must be completed prior to leaving for Peace Corps service. While on assignment overseas, students remain in touch with their faculty adviser and a returned volunteer from the Evans School. PCMI participants return to the Evans School for one term at the end of their international service to complete their course work and final project report.

Mid-career Evening Degree Program

Facing immense social and economic challenges, public and nonprofit leaders must reinvent the meaning of public service. Midcareer professionals with a commitment to public service and seven to 10 years of progressively responsible work experience in the public, nonprofit, or private sectors are offered the MPA degree through the Midcareer Degree Program. This program enables these students, who are typically midlevel managers, to work full time while developing the leadership and analytic tools needed to attain higher leadership positions within their organization or field. Students work through the Midcareer Degree Program with a cohort of their peers. The program blends academic and professional perspectives to engender a practical orientation to the theories, values, and analytical and managerial skills critical to success in public life.

Mid-career students must successfully complete 54 credits of graduate coursework to receive the M.P.A. degree. Degree requirements are divided between the integrated core sequence, electives, and leadership seminars. Students usually take two evening courses each quarter and graduate in three years. Mid-career students do not have an internship or degree project requirement. Although summer attendance is not required, some students take electives during the summer quarter to reduce academic year course loads.

Degree Requirements

54 credits, as follows:

- * Core Sequence (24 credits): PB AF 511 (3), PB AF 512 (3), PB AF 516 (3), PB AF 522 (3), PB AF 523 (3), PB AF 527 (3), PB AF 528 (3), PB AF 596 (3)
- * Electives (23 credits): Mid-career students have great flexibility in designing a course of study that best suits their professional needs and interests. Students may mix their elective courses in substantive policy areas such as environmental or social welfare policy with more practice-based management courses. Students may choose their elective courses from any department within the University in consultation with their advisor. One elective must be a course on ethics or values.
- * Leadership Seminar (7 credits): PB AF 543 (3), PB AF 544 (1-3, max. 3), PB AF 545 (3)

Concurrent Degree Programs

In addition to the day M.P.A. program, the Evans School offers five concurrent M.P.A. degree programs: Master of Arts in International Studies (M.A.I.S.), Master of Urban Planning (M.U.P.), Master of Science in Forest Resources (M.S.), Juris Doctor (J.D.), and Master of Public Health (M.P.H.).

Master of Public Affairs and Master of Urban Planning Concurrent Degree Program

Modern urban problems include community development, environmental quality, transportation, and growth management. These issues are at the intersection of policy, planning, and management and require leaders with skills beyond traditional disciplinary boundaries. This concurrent degree melds together the curricula of two areas critical to effective community leadership in both planning and policy work.

The Evans School of Public Affairs and the Department of Urban Design & Planning of the College of Architecture and Urban Planning offer this concurrent degree that enables students to earn both the MPA and MUP in approximately three years, rather than the four it would take to earn them separately. By combining the strengths of each school, the concurrent program creates:

- * an integrated curriculum with knowledge and skills-based training in organizational management, policy analysis, urban planning, and community development,
- * a collaborative, interdisciplinary program where graduate students from different backgrounds contribute to each other's educational experiences, and
- * practical experience and detailed analysis through a thesis, whereby students demonstrate competency in both areas of the concurrent degree.

Degree Requirements

All students in the program are required to take the courses listed in the Joint Core, Urban Planning Core and Public Affairs Core. Students also must choose one course from a list in each Restricted Electives area. 70 credits minimum, as follows:

- * The Joint Core
 - o Public Affairs Gateway Base Course
 - o Urban Design and Planning Specialization or Certificate Course
- * Urban Planning Core: URBDP 479 (3), URBDP 500 (4), URBDP 503 (3), URBDP 507 (4), URBDP 512 (3), URBDP 580 (3)
- * Public Affairs Core: PB AF 511 (3), PB AF 512 (3), PB AF 513 (3), PB AF 516 (3), PB AF 522 (3), PB AF 527 (3)
- * Restricted Electives (one course each area): Land Use/Growth Management, Specialized Planning Studio, Analysis, Values, Economics, Conflict Resolution
- * Internship: Students complete a graduate-level internship equivalent to three months of full-time work.
- * M.U.P. Thesis Requirement: Students in the concurrent M.P.A./M.U.P. program complete a combined urban planning thesis/professional project and public affairs degree project.

Master of Public Affairs and Master of Arts in International Studies Concurrent Degree Program

Degree Requirements

60 credits minimum, as follows:

- * International Studies Requirements
 - o Language: Proficiency equivalent to two years of college level work in a modern foreign language (three years for Chinese and Japanese).
 - o Required Core: Colloquia in International Studies (three quarters); SIS 500 (3), SIS 501 (3), SIS 502 (3), SIS 511 (3), intermediate economics (option to waive)
 - o Electives: Two fields of study: the professional field must be completed by courses relevant to both programs; the second field can be either a regional studies field or a special topics field.
 - o Final Papers and Oral Exam: Students present two research papers to a faculty examining committee.
- * Public Affairs Requirements
 - o Core Curriculum: PB AF 511 (3), PB AF 512 (3), PB AF 513 (3), PB AF 516 (3), PB AF 522 (3), PB AF 527 (3), PB AF 528 (3)
 - o Restricted Electives (9 credits): economics (3 credits), analysis (3 credits), values (3 credits)
 - o Plan of Study: 15 credits generally from one or a combination of the following gateway courses: International Affairs, Environmental Policy and Natural Resources Management, Urban and Regional Affairs, Education and Social Policy, Nonprofit Management
 - o Internship: Students complete a graduate-level internship equivalent to three months of full-time work.
 - o Degree Project: Students produce a degree project which can be used as one of the two final papers required by the International Studies program if it has an international focus.

Master of Public Affairs and Master of Science in Public Health Concurrent Degree Program

Degree Requirements

90 credits, as follows:

- * Public Affairs Requirements
 - o Core courses: PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3)
 - o Restricted electives: ENV H 577 (3); either HSERV 585 (3), HSERV 587 (3), or HSMGMT 514 (3); one approved class in values (3)
- * Public Health Requirements
 - o Core courses: ENV H 580 (3), ENV H 581 (1), ENV H 583 (1); ENV H 700 (9); either BIOST 511, BIOST 512 (4, 4) or BIOST 517, BIOST 518 (4, 4); EPI 511 (4)
 - o Degree Pathway Requirements: Students must choose one of the following pathways:
 - + Environmental Health:
 - # Core courses: ENV H 405 (3); ENV H 453 (3); ENV H 541 (3); either ENV H 543 (3) or ENV H 577 (3/4); ENV H 552 (3); ENV H 594 (1, max. 2); courses from two of the following three areas:

- * Waste management: either ENV H 445 (3) or ENV H 446 (3)
- * Air pollution: ENV H 490 (3)
- * Water and wastewater: ENV H 545 (3)
- # Representative electives: 9 credits from the approved list of classes.
- + Toxicology:
 - # Core courses: ENV H 514, ENV H 515, ENV H 516 (4, 4, 4); ENV H 552 (3); ENV H 577 (3/4); either BIOC 405, BIOC 406 (3, 3) or BIOC 440, BIOC 441, BIOC 442 (4, 4, 4); one course in industrial hygiene or occupational medicine
 - # Electives: 9 additional credits of electives from approved list. (If student took the three-quarter biochemistry sequence above, only 3 credits of electives are required.)
- + Industrial Hygiene:
 - # Core courses: ENV H 405 (3), ENV H 553 (3), ENV H 555 (3), ENV H 557 (4), ENV H 560 (4), ENV H 564 (4); either BIOST 512 (4) or BIOST 518 (4); either ENV H 552 (3) or ENV H 570 (3)
 - # Electives: Minimum 12 credits from approved list (available from adviser) of elective courses.
- o Additional electives: Sufficient number of electives to reach a total of 90 credits

Master of Public Affairs and Master of Public Health in Environmental and Occupational Health Concurrent Degree Program

Degree Requirements

90 credits, as follows:

- * Public Affairs Requirements
 - o Core courses: PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3)
 - o Restricted electives: ENV H 577 (3); either HSERV 585 (3), HSERV 587 (3), or HSMGMT 514 (3); one approved class in values (3)
- * Public Health Requirements
 - o Public health core courses: either EPI 511 (4) or EPI 512, EPI 513 (3, 3); either BIOST 511 (4) or BIOST 517 (4); HSERV 510 (3); HSERV 511 (3/4)
 - o Environmental and occupational health required courses: either ENV H 405 (3) or ENV H 514, ENV H 515, ENV H 516 (3, 3, 3); either ENV H 453 (3), ENV H 553 (3), or ENV H 564 (3); ENV H 570 (3); either ENV H 472 (3), ENV H 543 (3), or ENV H 577 (3/4); ENV H 580 (1 credit for three quarters); ENV H 581 (1); either ENV H 583 (1) or HSERV 522 (3/4); either ENV H 446 (3), ENV H 490 (3), ENV H 541 (3), ENV H 545 (3), or ENV H 552 (3); ENV H 599 (3); ENV H 700 (9)
- * Additional electives: Sufficient number of electives to reach a total of 90 credits

Master of Public Affairs and Master of Health Administration Concurrent Degree Program

Degree Requirements

90 credits, as follows:

The following is a sample of the M.H.A. portion of the curriculum/schedule covering nine academic quarters with one summer internship. Students should work closely with their academic advisers while progressing through the programs. The required M.H.A. course load as represented below is approximately 62 credits. This includes the M.H.A. Capstone Project credits and M.H.A. credits typically substituted by M.P.A. credits (see footnotes for additional explanation). The required M.P.A. core credit load is 22, with additional elective credits (approximately 12) and degree project credits (6) also required. The total concurrent credit load is approximately 90 with up to 12 shared credits.

Due to ongoing changes in the MHA core curriculum, the schedule of courses below is expected to evolve. If you are considering this concurrent degree or have questions, please contact the program office.

Course requirements:

- * Health administration core: ACCTG 503 (4); HSERV 511 (4), either HSERV 522 (4) or HSERV 552 (3), HSERV 551 (2), HSERV 587 (3); HSMGMT 501 (3), HSMGMT 502 (3), HSMGMT 513 (4), HSMGMT 523 (3), HSMGMT 545 (4), HSMGMT 560 (4), HSMGMT 562 (4), HSMGMT

- 571 (3), HSMGMT 590 (2, 2, 2, 4), HSMGMT 592 (2, 2); one class in values/ethics (3)
- * Public affairs core: PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3)
- * Internship: Students are encouraged to work with faculty advisors to coordinate a single internship if possible or desirable.
- * Degree projects: Students are encouraged to work with faculty advisors and instructors of the M.H.A. Capstone Project (HSMGMT 545) and M.P.A. Degree Project (PB AF 605) to attempt collaboration of a single project. A total of 10 project credits are still required.
- * Additional electives: Sufficient number of electives to reach a total of 90 credits

Master of Public Affairs and Master of Science in Forest Resources Concurrent Degree Program

Degree Requirements

90 credits, as follows:

- * Mini-core: PB AF 591/CFR 591 (1 credit each year); PB AF 590/CFR 592 (3/4); PB AF 592/CFR 571 (5)
- * Opportunity to specialize: Focused on training public, private and nonprofit leaders to synthesize the worlds of science, management and policy, this program allows students to develop management and policy skills while focusing on Forest and Economic Policy, Social Systems and Natural Resources Policy or Wildlife Conservation Policy.
 - o Forest Economics and Policy:
 - + Core classes: CFR 500 (1); PB AF 510 (1); PB AF 511, PBAF 512 (3, 3); PBAF 513 (3); PBAF 522 (3); PBAF 527, PBAF 528 (3, 3); ECON 500, ECON 502 (4, 4); either CFR 504 (4) or QERM 521 (4); applied professional field (6 credits approved by graduation committee); topics seminar or independent study in forest economics (2); forest biology, ecology, hydrology or forest products (3-5 credits, 500-level)
 - + Restricted Electives: economics (3-5 credits); analysis (3-5 credits); values (PB AF 569 or approved values course, 3 credits)
 - + Electives: Electives include additional courses, skills workshops or independent study.
 - + Thesis: CFR 600/700 (6-9 credits)
 - o Social Systems and Natural Resource Policy:
 - + Core Classes: CFR 500 (1); PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3); PB AF 527, PB AF 528 (3, 3); CFR 501 (5) or approved 500-level resource-related natural science course (3-5 credits); CFR 573 (3) or CFR 570 (3); approved seminar on natural resources (3 credits)
 - + Restricted Electives: economics (3-5 credits); analysis (3-5 credits); values (PB AF 596 or approved values course, 3 credits)
 - + Electives: at least 12 credits must be taken from CFR courses
 - + Thesis: CFR 600/700 (6-9 credits)
 - o Wildlife Conservation Policy:
 - + Core Classes: CFR 500 (1); PB AF 510 (1); PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3); PB AF 527, PB AF 528 (3, 3); ESRM 450 (5); ESRM 458 (5); CFR 554 (1-2); CFR 521; two of the following: ESRM 424 (3), ESRM 441 (5), CFR 501 (5), CFR 528 (3), Q SCI 477 (5)
 - + Restricted Electives: economics (3-5 credits); analysis (3-5 credits); values (PB AF 596 or approved values course, 3 credits)
 - + Electives: electives include additional courses, skills workshops or independent study.
 - + Thesis: CFR 700 (9 credits)
- * Additional electives: Sufficient number of electives to reach a total of 90 credits

Master of Public Affairs and Juris Doctor Concurrent Degree Program

Degree Requirements

90 credits minimum, as follows:

- * Law requirements:
 - o First year: LAW A 501 (2-8), LAW A 502 (2-6), LAW A 503 (2-8), LAW A 504 (2-8), LAW A 507 (4), LAW A 505 (2-5), LAW A 506 (1-6, three quarters)
 - o Second and third years: Students have great flexibility in constructing their own programs of study. The only prescribed courses are LAW B 510 (2-4) and LAW E 500 (1-3). Students should be mindful to prepare for the subjects on the state bar exam that they intend to take. Students are encouraged to undertake independent work under the supervision of a faculty member.

- o Public service requirement: Students must perform 60 hours of public service legal work during the second or third year of law school. This requirement may be satisfied by successfully completing any approved Clinical Program course, a public service externship that carries at least two credits or the Street Law course.
- * Public affairs requirements:
 - o Core curriculum: PB AF 511, PB AF 512 (3, 3); PB AF 513 (3); PB AF 516 (3); PB AF 522 (3); PB AF 527, PB AF 528 (3, 3)
 - o Restricted electives: economics (3 credits), analysis (3 credits), values (3 credits)
 - o Plan of study: 15 credits generally from one or a combination of the following Gateways: International Affairs, Environmental Policy and Natural Resources Management, Urban and Regional Affairs, Education and Social Policy, Nonprofit Management
 - o Internship: Students complete a graduate-level internship equivalent to three months of full-time work.
 - o Degree project: Every student is expected to complete a substantial piece of independent research. While not a thesis, the degree project enables students to work closely with UW faculty members on a topic of serious interest.

Admission Requirements

The Daniel J. Evans School of Public Affairs admits students on an annual basis, for summer or autumn quarter only. The application deadline for either quarter is February 1.

The prospective student must hold a baccalaureate degree from an accredited college or university in the United States, or its equivalent from a foreign institution. The student's academic record should be a strong one, with a minimum GPA of 3.00 on the last 90 (quarter) or 60 (semester) credits of undergraduate work. Scores on the Graduate Record Examination (GRE) general test are also required for admission. GRE and TOEFL scores are required for international students only.

The primary criterion for admission to the school is the applicant's demonstrated ability to complete the graduate program while sustaining a high level of achievement. The Evans School's admissions committee considers grades and test scores, and gives considerable weight to professional experience, volunteer work, letters of recommendation and the applicant's writing skills as demonstrated in a personal essay.

Applicants for the Evening Degree Program must demonstrate seven to ten years of progressively responsible administrative experience. If prospective students have spent most of their careers in the private sector, they will need to demonstrate an active interest in, and contact with, public issues.

Concurrent degree applicants must apply through and be accepted into both respective programs.

Although the Evans School requires no specific prerequisite courses for admission, the school's core courses in economics and quantitative methods assume that entering students have been exposed to these subjects at the undergraduate level. Ideally new students will possess an academic or professional background in governmental processes, excellent writing skills and academic preparation in microeconomics and statistics. Students lacking sufficient preparation in these areas may be required to demonstrate aptitude prior to admission, or may be asked to take preparatory course work in addition to the basic M.P.A. degree requirements.

Financial Aid

Evans School Scholarships

The Evans School offers several scholarships to entering students each year from the school's endowed fellowship funds. These typically consist of \$4000-\$5000 stipends awarded primarily on the basis of academic achievement and/or excellence in public service.

The Daniel J. and Nancy Evans Fellowship honors former U.S. Senator, Washington State Governor, and current University Regent Daniel J. Evans and his wife Nancy. The fellowship supports students who aspire to excellence in public service.

The Henry M. Jackson Fellowship, given in honor of the late U.S. Senator Henry M. "Scoop" Jackson, supports students pursuing careers in environmental policy and natural resources management.

The Brewster C. Denny Fellowship, named for former Dean Brewster Denny, supports students who are committed to excellence in public service.

The Robert J. Lavoie Fellowship provides funds to outstanding students who are preparing to work in public service. Mr. Lavoie served as a Deputy Mayor of Seattle.

The Hubert G. Locke Fellowship, established in honor of former Dean Hubert Locke, provides support for students pursuing internships in nonprofit organizations devoted to social justice issues.

The William Shelton Fellowship is funded by the Scottish Rite Foundation of Washington and supports students with a demonstrated commitment to the values of public service.

The George A. Shipman Fellowship offers support to outstanding students pursuing careers in public service. Professor George Shipman was the founder of public administration education at the University of Washington.

Applicants interested in departmental scholarships must submit the Evans School Financial Aid Form with their Evans School application.

Assistantships

The Evans School offers approximately 20 to 30 research, teaching, and staff assistantship positions each year. These positions are typically 10 to 20 hours per week and may include tuition waivers. Hiring for assistantships is a competitive process. Announcements are posted as the positions become available.

Research assistantships are open to first and second year students. First year students are eligible upon their arrival at the school. Students typically work on grant-funded studies, special conferences, and public policy colloquia series sponsored by the school's research centers. Research assistants are exposed to a wide range of policy issues, including regional growth management, international trade, state and federal entitlement programs, health-and-human-services delivery and environmental protection. In addition, up to four research fellowships are offered each year to highly qualified applicants during the admissions process. These fellowships guarantee a paid research assistantship for the first year of study and tuition support.

Teaching and staff assistantships are reserved for second year students only. Teaching assistants are hired for the Evans School's core courses and computer lab. Staff assistantships include such positions as Hubert Humphrey Fellows Coordinator, Peer Advisor, Evening Degree Program Recruitment Coordinator and Internship Coordinator.

Work-Study Status

When hiring research assistants, preference is often given to students possessing work-study status. Work-study status is one of several forms of aid granted by the University of Washington Financial Aid Office based on information provided in a student's FAFSA. Financial aid applicants should highlight any financial change expected on the FAFSA.

Research Facilities

The culture of the Evans School promotes the integration of extensive applied research into the academic program. Students participate in independent research work related to their degree projects. In addition to supporting the independent research of its faculty members, the school houses the Forum at the Evans School and several research and policy centers.

The Forum at the Evans School

The Forum was established in the fall of 1998 under a three-year grant from the Henry M. Jackson Foundation. As the outreach arm of the Evans School, the Forum brings combined strength in its capacity for civic engagement and the depth and breadth of policy research at the school and throughout the University.

The Forum draws on the expertise of faculty, research staff, and students, focusing on three program areas: Leadership and the New Governance, Engaged Citizens and Engaged Communities, and Meeting the Challenges of Growth and Change.

Guests of the Forum address the process of change, the role of institutions

in influencing change, and the importance of targeting policies and programs. In each of these areas, the Forum promotes diverse, credible, and reasoned discussions between and among citizens and leaders from the public, private, and nonprofit sectors. Through partnerships with print and broadcast media organizations, the Forum seeks to expand resources for broad public discussion of critical policy issues.

Cascade Center for Public Service

The Cascade Center for Public Service is the executive education arm of the Evans School. Established in 1984, the center offers two-, three-, and five-day courses as well as two-week advanced programs for leaders and managers in the public and nonprofit sectors. Cascade courses are held in Everett, Leavenworth, Olympia, Seattle, the Tri-Cities, Vancouver, and Wenatchee, and can count as credit toward an M.P.A. degree.

Electronic Hallway

The Electronic Hallway, www.hallway.org, is an internationally recognized resource for public affairs teaching and curriculum development. It supports the Evans School teaching mission and distributes cases and skill exercises to educators in public policy and management worldwide.

Human Services Policy Center

The mission of the Human Services Policy Center (HSPC) is to foster effective, integrated services to children and families, based upon the collaborative efforts of faculty in professional schools of the University of Washington. Achieving this mission entails supporting communication among policy analysts (academic, public, and private), policymakers, practitioners, community/civic leaders, and the media. Combining interdisciplinary applied research with effective communication allows HSPC to help focus and add depth to consideration of critical policy issues in the state of Washington. The center conducts most of its applied research in partnership with organizations engaged in direct services, governance, or policy advocacy in order to achieve direct applicability of research efforts. HSPC's current areas of focus are financing early childhood care and education, communications and public policy, comprehensive community initiatives, statistical monitoring of child and family well-being, and program evaluation and outcomes-based planning.

Center on Reinventing Public Education

The Center on Reinventing Public Education seeks to develop and evaluate methods of public oversight that can allow schools to be focused, effective and accountable. The center, established in 1993, pursues a national program of research and development on proposals such as charter schools, school contracting choice and school system decentralization. It also conducts research into reform initiatives in Washington and the Seattle public schools. The center seeks to inform community leaders, policy makers, school and school system leaders, and the research community.

Northwest Policy Center

The Northwest Policy Center (NPC) is dedicated to enhancing opportunities for people in need, fostering community well-being, improving the vitality of key sectors in a changing economy, and advancing equitable budget policies. NPC conducts research on the regional economy; works with policy makers and practitioners to develop and implement innovative economic, workforce, and community development strategies; and evaluates and shares lessons learned.

Urban Health Initiative

The purpose of the Urban Health Initiative (UHI) is to work closely for a period of up to ten years with five U.S. cities-Baltimore, Detroit, Oakland, Philadelphia and Richmond-to improve the health and safety of children living in these areas. Because each city is encouraged to try innovative approaches, a major responsibility of UHI is to document and share strategies that work over time, as well as those that prove less fruitful. UHI's National Program Office is a joint program of the Evans School and the School of Public Health and Community Medicine (SPHCM). UHI's National Program Director, Charles Royer, is the former mayor of Seattle (1978-1990). Mr. Royer and Deputy Director Cynthia Curreri have taught and lectured in both the Evans School and SPHCM.

Course Descriptions

See page 603.

School of Public Health and Community Medicine

Dean

Patricia W. Wahl

F350 Health Sciences

The School of Public Health and Community Medicine (SPHCM) is composed of five departments: Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Health Services, and Pathobiology.

Undergraduate Program

A Bachelor of Science degree and an undergraduate minor are offered in the Department of Environmental and Occupational Health Sciences. The Department of Health Services offers a Bachelor of Science degree in health information administration through the UW Evening Degree Program. Students may pursue a general studies bachelor's degree with an emphasis in public health by working with faculty in SPHCM and the College of Arts and Sciences, UW General Studies Office, 171 Mary Gates Hall. The SPHCM also offers a school-wide public health minor, requirements for which are described in the Health Services section.

Graduate Program

The SPHCM offers graduate programs leading to the degrees of Master of Public Health (M.P.H.), Master of Health Administration (M.H.A.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). Admission requirements vary by degree and field and are described in the sections of each department.

Master of Public Health Degree: The M.P.H. is a professional degree that provides broad training in public health. Each track or program provides additional training in a particular area. Graduates pursue careers in public health practice settings, academia, or research. The M.P.H. degree is offered in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, and Health Services. Students earning the M.P.H. may choose from several areas including biostatistics, community oriented public health practice, environmental and occupational health, epidemiology, health and policy research, international health (in Epidemiology or Health Services), maternal and child health (in Epidemiology or Health Services), occupational and environmental medicine, public health genetics, public health nutrition, or social and behavioral sciences. The M.P.H. degree in public health nutrition is offered through the Nutritional Sciences Interdisciplinary Graduate Program and the M.P.H. in public health genetics is a multidisciplinary program that involves faculty from throughout the University. The Extended M.P.H. Program is a three-year, part-time program that allows mid-career public health professionals to pursue the M.P.H. degree in community practice, health education, maternal and child health, or oral health while continuing their employment.

Master of Health Administration Degree: The M.H.A. degree is offered by the interdisciplinary Health Services Administration Group in the Department of Health Services under the auspices of the Graduate School. The program prepares students for careers in management, planning, and policy analysis in a variety of settings in the health care field. The purpose of the M.H.A. curriculum is to integrate the knowledge, skills, and experience that encompass health services management, planning, and policy analysis. Students develop knowledge and skills that enable them to better understand and manage change, analyze information and make decisions, and manage organizations and the people in them. The Executive M.H.A. Program is a part-time program designed for mid-career health services professionals, including physicians and other experienced clinicians, who wish to continue their employment while pursuing the M.H.A. degree. The program provides a balance of theory and practical management skills.

Master of Science and Doctor of Philosophy Degrees: The M.S. and Ph.D. programs in the departments of Biostatistics, Environmental and Occupational Health Sciences, Epidemiology, Health Services, and Pathobiology prepare students for academic or research careers. The M.S. and Ph.D. programs in the Nutritional Sciences program, and the Ph.D. program in the Institute for Public Health Genetics are administered in SPHCM, although the degrees are awarded through the Graduate School's interdisciplinary group structure.

The M.S. programs in biostatistics, environmental health, epidemiology, genetic epidemiology, health and policy research, industrial hygiene and safety, nutritional sciences, pathobiology, statistical genetics, and toxicology offer focused research training in specific disciplines. Graduates of these

programs often assume positions as senior technical staff in laboratories or other organizations and as research project coordinators, or pursue further graduate training. The M.S. program differs from the Ph.D. program in that more of the courses emphasize the concepts underlying methodological approaches rather than the ability to independently design a major research program.

The Ph.D. programs in biostatistics, environmental and occupational hygiene, epidemiology, health services, pathobiology, statistical genetics, toxicology, and the interdisciplinary Ph.D. programs in nutritional sciences and public health genetics, train future academicians as highly qualified independent investigators and teachers, and as well-trained practitioners. The doctoral programs are distinct from the M.S. programs by the addition of advanced coursework and the nature and scope of the dissertation research project.

Concurrent Degree Programs: The SPHCM has concurrent degree programs with the School of Business Administration, the Daniel J. Evans School of Public Affairs, and the School of Nursing that lead to concurrent M.H.A.-M.B.A., M.H.A.-M.P.A., and M.H.A.-M.N. degrees, respectively. The SPHCM and the schools of Business Administration and Public Affairs offer these degree programs during both day and evening times. The SPHCM has concurrent degree programs with the Henry M. Jackson School of International Studies, the School of Social Work, the School of Nursing, and the School of Public Affairs that lead to the M.P.H.-M.A.I.S., M.P.H.-M.S.W., M.P.H.-M.N., and MPH-MPA and MS-MPA degrees, respectively. The M.P.H.-M.N. concurrent degree program provides students opportunities to study the areas of community health care nursing and child nursing. The School of Medicine and SPHCM have a concurrent degree programs that lead to the M.P.H.-M.D., M.H.A.-M.D. and Ph.D.-MD degrees. In the autumn of 2003 the concurrent degree program with the School of Dentistry that leads to the M.P.H.-M.S.D. degrees was approved, and the concurrent M.P.H.-J.D. degree program with the School of Law is expected to be approved during the 2004-2005 year.

Residency Programs: The SPHCM offers a residency in occupational and environmental medicine. Physicians are also welcome to apply to any of the School's graduate programs.

Certificate and Graduate Certificate Programs: The SPHCM offers several graduate certificate programs including a joint program with the School of Medicine in Biomedical and Health Informatics. The Department of Biostatistics offers a graduate certificate program in statistical genetics; the Department of Health Services in health behavior and health promotion, health policy, international health, and maternal and child health; the Extended Degree Program in public health; and the Institute of Public Health Genetics in public health genetics. The Department of Health Services also offers certificate programs in health information administration (HIA) and medical management.

bioadmit@u.washington.edu

The Department of Biostatistics offers Master of Science, Master of Public Health, and Doctor of Philosophy degrees in quantitative methods applied to the medical and biological sciences. Biology, medicine, and health services are undergoing major changes in their development as quantitative sciences. As technological advances find expression in new research tools, new theoretical concepts are being employed in the analysis of quantitative data. The techniques and viewpoints of mathematics and statistics, traditionally peripheral to biology and medicine, are now woven into the fabric of the life sciences, thereby providing exciting new opportunities in research and teaching.

Many universities have instituted programs relating mathematics or statistics to one particular biological field. The goal of the biostatistics graduate program is to equip students to develop and apply the quantitative techniques of mathematics, statistics, and computing appropriate to medicine, biology, and health services.

Because of the quality of the faculty and their involvement in a diversity of statistical applications, as well as the quality of the students, students receive an excellent education. Students are recruited from undergraduate programs in mathematics, statistics, and biology and are selected on the basis of outstanding quantitative ability.

Master of Public Health

Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

To be considered for admission to the Biostatistics MPH pathway, a candidate must hold a doctoral-level degree in another field (e.g., M.D., Ph.D., J.D.) or be currently working on such a doctoral degree. Candidates who have not yet been awarded a doctoral degree will not be awarded the Biostatistics-pathway M.P.H. until they are awarded their doctoral degree. All other prerequisites and required materials are the same for M.S., M.P.H., and Ph.D. applicants.

Degree Requirements

In addition to meeting the minimum Graduate School requirements, students must also obtain a minimum grade point average of 3.00 in each of the biostatistics core courses (BIOST 514, BIOST 515, BIOST 524, BIOST 536, BIOST 537), a minimum cumulative GPA of 3.00 in non-biostatistics core courses (EPI 512, EPI 513, HSERV 511, ENV H 511, P BIO 511, and HSERV 510), and earn a minimum GPA of 2.70 in each non-biostatistics core course

63 credits, as follows:

- * Biostatistics core courses: BIOST 514, BIOST 515 (8); BIOST 524 (3); BIOST 536, BIOST 537 (8); BIOST 580 (3); BIOST 590 (3); BIOST 700 (9). (Note: BIOST 514, BIOST 515, BIOST 524, BIOST 536, and BIOST 537 must be taken for a numerical grade.)
- * Non-biostatistics core courses: EPI 512, EPI 513 (8); HSERV 511 (3); HSERV 510 (3-4); ENV H 511 (3); P BIO 511 (3). All non-biostatistics core courses must be taken for a numerical grade.
- * Biostatistics elective courses: 6 credits of any approved biostatistics M.S. elective, or STAT 512 or STAT 513
- * Biostatistics M.P.H. practicum: MPH students must also complete a practicum experience for 3 credits in an organization or agency that provides planning or services relevant to public health.

Master of Science

Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential M.S. students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

Degree Requirements

73 credits minimum, as follows:

- * Required courses: BIOST 514 (4), BIOST 515 (4), BIOST 536 (4), BIOST 537 (4), BIOST 580 (*, max. 9), STAT 512 (4), STAT 513 (4)
- * Elective credits: 12 required elective credits must be taken, with at least 6 credits of elective courses with a methodology emphasis, and 6 credits of elective with a biology or public health emphasis (list provided).
- * Biostatistical consulting: BIOST 590 (*). Students must take BIOST 598 before or during the quarter in which they take BIOST 590.
- * Master's Thesis: 18 credits of BIOST 700

- * Computer Proficiency: The department requires a basic level of computing proficiency from all graduates, but encourages them to take the opportunity to gain greater expertise with a variety of computing tools. The computing proficiency requirement is met when a student writes and documents a computer program sophisticated enough to demonstrate the necessary basic competence in programming, or completes an approved programming course. The student's faculty advisor can approve the proficiency requirement or refer the matter to an ad hoc faculty committee for approval. Approved courses include STAT/BIOST 534, STAT/BIOST 535; CSE 142; and MEDED 531.

Doctor of Philosophy

Admission Requirements

Applicants to Biostatistics graduate programs are formally applying to the Graduate School of the University of Washington. Although all acceptance decisions are made within the Biostatistics Department, the Graduate School imposes certain minimum admission requirements. Applicants must therefore submit both a general application directly to the Graduate School and a specific application to the Biostatistics Department.

Potential Ph.D. students may enter the graduate program in biostatistics from an undergraduate major in mathematics, statistics, or a biological field. Students are occasionally admitted with backgrounds in other fields; however, all applicants must have 30 or more quarter credits in mathematics and statistics to include two years of calculus (to include multivariate calculus), one course in linear algebra, and one course in probability theory.

Degree Requirements

Minimum 100 credits, as follows:

- * Required courses: BIOST 514 (4); BIOST 515 (4); BIOST 533 (3); BIOST 570 (3); BIOST 571 (3); BIOST 580 (*, max. 9); MATH 574, MATH 575, MATH 576 (3, 3, 3) or equivalent.; STAT 512, STAT 513 (4, 4); STAT 581, STAT 582, STAT 583 (3, 3, 3).
- * Students must earn a minimum 3.0 grade in each of the required courses. At the faculty's discretion, qualifying exam performance may outweigh a course grade below the minimum. (Note: The minimum grade requirement for elective courses is 2.7.)
- * Elective credits: 15 elective credits must be taken, consisting of at least 6 credits of elective courses with a methodology emphasis and 9 credits of elective with a biology or public health emphasis (list provided).
- * In addition to the above courses, students in the Ph.D. program must complete 36 credits of BIOST 800, write a dissertation, complete a consulting class, and demonstrate proficiency in a computer language.
- * If a Ph.D. student enrolls in STAT 512 and STAT 513, he or she must take the M.S. Theory Exam in the following June for advisory purposes. Ph.D. students must also take the Ph.D. Statistical Theory exam during the summer following enrollment in STAT 581, STAT 582, STAT 533 and the Ph.D. applied exam during the summer following enrollment in BIOST 571 and BIOST 572, or in BIOST 570 and BIOST 571, or if both STAT 581, STAT 582, STAT 583 and BIOST 570 and BIOST 571 are taken in the same year the student may elect to delay the Ph.D. applied exam by one year. If either exam is failed, it must be passed the following year.
- * Students in the Ph.D. program must also complete a biology project, and pass the General and Final Examinations.
- * Computer Proficiency: The department requires a basic level of computing proficiency from all graduates, but encourages them to take the opportunity to gain greater expertise with a variety of computing tools. The computing proficiency requirement is met when a student writes and documents a computer program sophisticated enough to demonstrate the necessary basic competence in programming, or completes an approved programming course. Approved courses include: STAT/BIOST 534, STAT/BIOST 535; and CSE 142.

Course Descriptions

See page 606.

Environmental and Occupational Health Sciences

F461 Health Sciences Environmental health focuses on identifying, evaluating, and controlling environmental conditions that may have an adverse impact on human health. Examples of problem areas requiring environmental health expertise are assuring adequate quality and quantity of food and drinking water, safe treatment and disposal of domestic and industrial waste materials, limiting or reducing air and noise pollution, limiting occupational exposure to hazardous substances and unsafe conditions, assuring safe and healthful housing, controlling the spread of insect- and rodent-borne illness, proper selection and use of pesticides, and understanding the effects of global changes in climate and the atmosphere on human health.

Undergraduate Program

Adviser
F461D Health Sciences, Box 357234
206-543-4207
ehug@u.washington.edu

The Department of Environmental and Occupational Health Sciences offers the following programs of study:

- * The Bachelor of Science degree with a major in environmental health
- * A minor in environmental health

Bachelor of Science

Suggested First- and Second-Year College Courses: ECON 200; POL S 202; COM 220; STAT 220 or STAT 311.

Department Admission Requirements

1. 90 credits with a minimum cumulative GPA of 2.50.
2. Completion of the following courses: 5 credits in English composition; BIOL 180, BIOL 200, BIOL 220; CHEM 142, CHEM 152, CHEM 162; CHEM 223, CHEM 224 (or CHEM 237, CHEM 238, CHEM 239); MATH 124 or MATH 144 or Q SCI 291.
3. Applications are accepted for each quarter. Application deadlines are April 15 for autumn quarter, November 15 for winter quarter, and February 15 for spring quarter. After the deadline has passed, applications are accepted on a space-available basis. Applicants are considered for admission when they are within one quarter of completing the admission requirements.
4. Additional Information: Students are encouraged to apply to the program during their sophomore year so they may begin the upper-division courses in their junior year.

Major Requirements

1. General Education and Basic Skills: Completion of 10 credits in VLPA-designated courses and 10 credits in I&S-designated courses (of which 6 credits are specified under requirement 3), plus 7 credits in W-designated courses (of which 4 credits are specified under requirement 4).
2. PHYS 114, PHYS 115, PHYS 117, PHYS 118. Completion of these courses prior to entering the program is recommended. Physics is a prerequisite for some upper-division ENV H courses.
3. ENV H 311, ENV H 405, ENV H 431, ENV H 432, ENV H 433, ENV H 472, ENV H 482, and two of the following: ENV H 440, ENV H 441, ENV H 445 (or ENV H 446), ENV H 490.
4. EPI 420, STAT 311 (or STAT 220 or Q SCI 381), T C 333, MICROM 301, MICROM 302.
5. 30 additional credits of approved electives.
6. Sufficient elective credits to reach a total of 180 credits.

Minor

Minor Requirements: 29 credits as follows:

1. Core Courses: 14 credits of the following: ENV H 311, ENV H 405, EPI 420; STAT 200 or STAT 311.
2. Approved Electives: 15 credits of electives from the approved departmental list. See Web page or adviser for details.

Student Outcomes and Opportunities

- * *Instructional and Research Facilities:* The department houses thirteen centers and institutes and twenty labs.
- * *Honors Options Available:* None offered.
- * *Research, Internships, and Service Learning:* The department operates an internship program in cooperation with government agencies and private employers throughout the state. Each student intern works under the supervision of an experienced employee, with guidance from a faculty member. Internship placements are available throughout the year for variable amounts of academic credit.
- * *Department Scholarships:* None offered.
- * *Student Organizations/Associations:* UW Student Environmental Health Association

Graduate Program

Graduate Program Coordinator
F461 Health Sciences, Box 357234
206-543-3199

The Department of Environmental & Occupational Health Sciences offers three graduate degrees: Master of Science, Master of Public Health, and Doctor of Philosophy. The areas of emphasis are environmental and occupational hygiene (Ph.D.) industrial hygiene and safety (M.S.), toxicology (Ph.D./M.S.), environmental health (M.S.), and occupational and environmental medicine or environmental and occupational health (M.P.H.).

The Ph.D. in Environmental and Occupational Hygiene option focuses on the assessment of exposures, health effects, and control strategies in community and work environments. The program emphasizes expertise in exposure assessment to evaluate human health risks from chemical, physical, and biological agents. Research opportunities include: laboratory and field investigations of environmental exposures and health outcomes; air, soil and water pollution monitoring; ambient, indoor, and personal exposure modeling; evaluation of biomechanical stress factors and organization of the work environment; development of new instruments, biomarkers, and novel methods for assessing human exposures; and evaluation of effective control strategies for the prevention or reduction of illness and injury.

The M.P.H. in Environmental and Occupational Health provides an opportunity for students to focus on the recognition, assessment, and control of environmental and occupational hazards, the impact of these hazards on health and society, and approaches to regulations, enforcement, and policy development. It emphasizes development of skills essential to science-based public health practice. In addition to coursework, students complete a field practicum and research in any of the department's research facilities or in a field setting.

The M.P.H. in Occupational and Environmental Medicine is for individuals with an earned doctorate. The goal of the program is to provide training in the public health sciences with a focus on occupational and environmental health. The program provides didactic instruction and participation in field studies. Research efforts focus on understanding, preventing, and managing environmental and occupational disease, injury, and disability. Physicians also have the option of applying for a concurrent fellowship or residency in occupational and environmental medicine.

The concurrent M.P.H./M.P.A. or M.S./M.P.A. degree programs with the Daniel J. Evans School of Public Affairs seek to educate students who will bring substantive public health knowledge and a strong policy and management orientation to their professional careers. With several courses that satisfy degree requirements in both programs, students are able to earn the two degrees in a shorter period of time than if the degrees were taken separately. Applicants must apply to both programs.

Admission Requirements

Prerequisites for admission to the M.S. industrial hygiene and safety, toxicology, and environmental health programs and the M.P.H. environmental and occupational health program include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. Applicants with non-science majors will be considered if the prerequisite courses have been completed. Competitive applicants typically have strong grades and Graduate Record Examination scores, a statement of personal goals consistent with the program, and supportive letters of reference.

Prerequisites for admission to the M.P.H. Occupational and Environmental Medicine program include a doctoral degree (M.D., D.O. or equivalent) with prior coursework in physics, chemistry, calculus, and biology. Concurrent residency applicants must satisfy additional prerequisites including graduation from a Class A medical school (U.S., Canada, or equivalent) and completion of one year of approved internship. Three years in primary care specialty is also encouraged.

Prerequisites for admission to the Ph.D. environmental and occupational hygiene and toxicology programs include a bachelor's degree in science or engineering with coursework in biology, chemistry, calculus, and physics. A master's degree in a related field is recommended for Ph.D. environmental and occupational hygiene applicants. Selection of an applicant will also be based upon an honors-level GPA, a statement of personal goals consistent with the program, supportive letters of reference, and high scores on the Graduate Record Examination. International applicants are also required to submit official scores for the Test of English as a Foreign Language (TOEFL). TOEFL scores of 580 (237 computer) or higher are required for admission to the M.S., M.P.H., and Ph.D. programs.

Master of Public Health

Degree Requirements

63 credits, as follows:

- * Core Requirements: EPI 511 (or EPI 512, EPI 513), BIOST 511 (or BIOST 517). M.P.H./M.P.A. students are also required to take BIOST 512 (or BIOST 518), HSERV 511, and HSERV 510.
- * Required Courses: ENV H 405 (or ENV H 514, ENV H 515, and ENV H 516), ENV H 453 (or ENV H 553 or ENV H 564), ENV H 570, ENV H 577 (or ENV H 472 or ENV H 543), ENV H 446 (or ENV H 490, or ENV H 541, or ENV H 545, or ENV H 552). Courses in environmental health not chosen can be taken as electives.
- * Electives
 - o Thesis Track: At least two additional 400- or 500-level departmental courses (minimum 6 credits).
 - o Project Track: At least four additional 400- or 500-level departmental courses (minimum 9 credits).
- * Practicum: ENV H 599
- * Degree Project:
 - o Thesis Track: ENV H 700
 - o Project Track: ENV H 598

Master of Science, Environmental Health

Degree Requirements

64 credits, as follows:

- * Core Courses: ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517 or higher), EPI 511
- * Required Courses: ENV H 405, ENV H 453, ENV H 541, ENV H 543 (or ENV H 577), ENV H 552, ENV H 594, ENV H 445 (or ENV H 446), ENV H 490, ENV H 545
- * Representative Electives: 9 graded elective credits, approved by the student's academic adviser.

Master of Science, Industrial Hygiene

Degree Requirements

62 credits, as follows:

- * Core Courses: ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511. Higher level biostatistics and epidemiology courses can be substituted for BIOST 511 or BIOST 517, and for EPI 511.
- * Required Courses: ENV H 405, ENV H 553, ENV H 555, ENV H 557, ENV H 560, ENV H 564, BIOST 512 (or BIOST 518, or higher level), ENV H 552 (or ENV H 570). If both ENV H 557 and ENV H 570 are taken, one can be used toward the 12 elective credits (see below).
- * Electives: 12 or more credits from the list below, in consultation with the program director or adviser. If both ENV H 552 and ENV H 570 (above) are taken, one may count toward required elective credits. Courses include ENV H 417, ENV H 446, ENV H 457, ENV H 556, ENV H 559, ENV H 562, ENV H 566, ENV H 584, ENV H 596 (taken winter quarter).

Master of Science, Safety and Ergonomics

Degree Requirements

62 credits, as follows:

- * Core Courses: ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511. (Higher level biostatistics and epidemiology courses can be substituted for BIOST 511 or BIOST 517, and for EPI 511.)
- * Required Courses: ENV H 405, ENV H 553, ENV H 560, ENV H 562, ENV H 564, ENV H 566, ENV H 596, BIOST 512 (or BIOST 518). (Higher level biostatistics courses can be substituted for BIOST 512 or BIOST 518). IND E/ENV H 537, MGMT 300.
- * Representative Electives: ENV H 457, ENV H 512, ENV H 555, ENV H 557, ENV H 559, ENV H 569, ENV H 570, ENV H 572, ENV H 584, T C 517, UCONJ 420.

Master of Science, Toxicology

Degree Requirements

63 credits, as follows:

- * Core Courses: ENV H 580, ENV H 581, ENV H 583, ENV H 700, BIOST 511 (or BIOST 517, or higher), EPI 511.
- * Required Courses: ENV H 514, ENV H 515, ENV H 516, ENV H 552, ENV H 577, BIOC 405, BIOC 406 (or BIOC 440, BIOC 441, BIOC 442), ENV H course in industrial hygiene or occupational medicine).
- * Representative Electives: Toxicology students who take the two-quarter biochemistry series (BIOC 405, BIOC 406) must have an additional 9 graded elective credits. Students who choose the three-quarter biochemistry series (BIOC 440, BIOC 441, BIOC 442) must have an additional 3 graded elective credits. Electives must be approved by the student's academic adviser. Electives may include ENV H 511, ENV H 512, ENV H 531, ENV H 532, ENV H 533, ENV H 535, ENV H 550, ENV H 553, ENV H 555, ENV H 567, ENV H 570, ENV H 582, ENV H 584, ENV H 591, BIOL 403, BIOL 411, BIOST 521, C MED 407, MICROM 441, MICROM 442, MICROM 518, PATH 444, PATH 555, P BIO 500-level courses, P BIO 405, P BIO 406, P BIO 507, PEDS 512, PHCOL 401, PHCOL 402, PHCOL 403, PHCOL 527.

Doctor of Philosophy, Environmental and Occupational Hygiene

Degree Requirements

90 credits minimum, as follows:

- * Core Sciences (11-12 credits): Sequence of three courses in one area, to be approved by adviser.
- * Biostatistics (3 credits): BIOST 512 (or BIOST518 or higher)
- * Epidemiology (4 credits): EPI 511 (or higher)
- * Environmental and Occupational Health Seminar (6 credits): ENV H 580
- * Dissertation (27 credits): ENV H 800
- * Lab Rotations (6-9 credits): ENV H 595
- * Required courses:
 - o Industrial Hygiene (6 credits): ENV H 553 and ENV H 555
 - o Toxicology (3 credits): ENV H 405 (or more advanced)
 - o Environmental Chemistry (3 credits): ENV H 552
 - o Occupational and Environmental Epidemiology (3 credits): ENV H 570
 - o Electives (20 credits): 10 elective credits are unspecified and 10 must be in courses taught by Industrial Hygiene or Environmental Health program faculty.

Doctor of Philosophy, Toxicology

Degree Requirements

90 credits minimum, as follows:

- * Core Sciences (11-12 credits): Sequence of three courses in one area, to be approved by adviser.
- * Biostatistics (3 credits): BIOST 512 (or BIOST518 or higher)
- * Epidemiology (4 credits): EPI 511 (or higher)
- * Environmental and Occupational Health Seminar (6 credits): ENV H 580
- * Dissertation (27 credits): ENV H 800
- * Lab Rotations (6-9 credits): ENV H 595

- * Required courses:
 - o Toxicology (9 credits): ENV H 514,515,516
 - o Toxicology Seminar (9 credits): Of the 9 credits (minimum) of current topics courses, at least six credits must be in ENV H 591. The other credits can be chosen among other current topics courses offered by the Department of Environmental Health or other departments, with approval of student's advisory committee.
 - o Advanced Toxicology: 6 credits from approved list
 - o Physiology: 3 credits from approved list
 - o Electives (20 credits): 10 elective credits are unspecified and 10 must be in courses taught by Industrial Hygiene or Environmental Health program faculty.

Financial Aid

Support is available for many students in the form of traineeships or research assistantships, which include tuition. This support comes from federal and private sources awarded to the department or School. Research Facilities

Specialized laboratories exist for research in industrial hygiene chemistry, optical remote sensing of chemicals, industrial ventilation, ergonomics, trace organics and heavy metals, environmental microbiology, electron microscopy, controlled exposure to environmental agents, and toxicology (including toxicogenomics and analytical cytology). Field research is facilitated through an extensive consultation-service program conducted by this department for labor and industry in Washington state.

Course Descriptions

See page 608.

Epidemiology

Graduate Program

Graduate Program Coordinator
F262 Health Sciences, Box 357236
206-685-1762 or 206-543-8226
epi@u.washington.edu

The Department of Epidemiology offers three graduate degrees in the field of epidemiology for individuals intending to become academicians, highly qualified research specialists, or well-trained public health practitioners.

The Master of Public Health degree requires coursework in health services and environmental health, in addition to epidemiology and biostatistics, as well as a thesis and a practicum. Three tracks are available: the General Track, which is selected by most students; the Maternal and Child Health Track (MCH); and the International Health Track (IHP). The MCH and IHP tracks require course work in the respective specialty areas in addition to the requirements of the General Track.

The following degrees are available concurrent with an M.P.H. (Epidemiology): Doctor of Medicine (M.D.), Master of Arts in International Studies, and Master of Public Affairs.

The Master of Science degree requires concentration on courses and research in epidemiology and biostatistics as preparation for a research specialization or as a prelude to the Doctor of Philosophy program.

The Ph.D. course requirements differ from the M.S. program requirements primarily in the scope and complexity of research for the dissertation. Course work includes a basic series in epidemiology and biostatistics and electives in substantive areas such as cancer, cardiovascular disease, environmental exposures, genetics, infectious diseases, injury, and nutrition, and research methods.

The Department also offers several graduate certificate programs, which are open to any qualified graduate student at the University. They offer specialization in the following specific interdisciplinary areas:

- * International Health: <http://depts.washington.edu/ihprog/admissions/cert.htm>
- * Maternal and Child Health: <http://depts.washington.edu/mchprog/certificate.htm>
- * Public Health Genetics: <http://depts.washington.edu/phgen/certificateprogram>

- * AIDS and Sexually Transmitted Diseases: http://depts.washington.edu/cfas/training/grad_cert

Master of Public Health

Admission Requirements

Admission to all graduate programs is highly competitive and is based on the following evaluation of the applicant:

- * Background in epidemiology or other health-related fields (such as medicine, health or biological sciences, or mathematics), including prior areas of study and work experience
- * Undergraduate and graduate grades
- * GRE scores (except for master's degree applicants with a prior doctorate from a U.S. university and M.D./Ph.D. applicants funded by MSTP)
- * TOEFL or IELTS score for international applicants
- * Letters of reference
- * Applicant's goal statement

Degree Requirements

Minimum 63 credits, as follows:

- * 27 course credits of which 18 must be numerically graded (1-credit courses, EPI 101, EPI 405, EPI 420, EPI 497, EPI 499, EPI 505, EPI 510, EPI 511, EPI 593, EPI 595, EPI 600, EPI 700, EPI 800, courses taken for a completed degree program of another department or university, or courses for which waivers were granted do not count as course credits).
- * A minimum of 3 credits (120 hours) in a field-based practicum (EPI 595)
- * 9 to 18 thesis (EPI 700) credits.
- * Core Courses: 21 credits, as follows: EPI 512 (4), EPI 513 (4), BIOST 511 (4), HSERV 510 (3), HSERV 511 (3)
- * One of the following environmental health courses must also be taken for a grade: ENV H 511 (3), ENV H 517 (3), ENV H 577 (3/4), ENV H 584 (3)
- * Electives: 6 credits of EPI course electives (EPI 514 recommended; 1 credit courses, EPI 101, EPI 420, EPI 405, EPI 497, EPI 499, EPI 505, EPI 510, EPI 511, EPI 534, EPI 540, EPI 549, EPI 588, EPI 593, EPI 595, EPI 600, EPI 700, or EPI 800 may not be counted as electives)
- * Students may also enroll in additional elective courses in epidemiology and other relevant departments and for independent study (EPI 600) for a total of 63 credits. Relevant 400-level course work may count toward the total. Course work unrelated to health and at the 300-level or below will not count toward the total.

M.P.H. Specialized Program Options: The M.P.H. degree has specialized options in Maternal and Child Health, and International health, both of which have additional course requirements. Students enrolled in a specialized program should contact the appropriate program office.

Master of Science

Admission Requirements

Admission to all graduate programs is highly competitive and is based on the following evaluation of the applicant:

- * Background in epidemiology or other health-related fields (such as medicine, health or biological sciences, or mathematics), including prior areas of study and work experience
- * Undergraduate and graduate grades
- * GRE scores (except for master's degree applicants with a prior doctorate from a U.S. university and M.D./Ph.D. applicants funded by MSTP)
- * TOEFL or IELTS score for international applicants
- * Letters of reference
- * Applicant's goal statement

Degree Requirements

60 credits, as follows:

- * 27 course credits, of which 18 must be graded (1-credit courses, EPI 101, EPI 405, EPI 420, EPI 497, EPI 499, EPI 505, EPI 510, EPI 511, EPI 593, EPI 595, EPI 600, EPI 700, EPI 800, courses taken for a completed degree program of another department or university, or courses for which waivers were granted do not count as course credits)
- * 9 to 18 thesis credits (EPI 700)

- * Core Courses: The following core courses must be taken for a grade: EPI 512 (4), EPI 513 (4), BIOST 511 (4), BIOST 512 (4), BIOST 513 (4).
- * Electives: Two EPI courses of at least 2 credits each
- * School Electives: Two additional courses (2 or more credits each) in any department of the School of Public Health (including Epidemiology) or other University of Washington courses related to the biological, physical or social/behavioral factors which affect health.
- * Elective courses may not include EPI 101, EPI 405, EPI 420, EPI 497, EPI 499, EPI 505, EPI 510, EPI 511, EPI 593, EPI 595, EPI 600, EPI 700, EPI 800, or BIOST 502, BIOST 503. The epidemiology electives may not include EPI 534, EPI 540, EPI 549 or EPI 588 (these courses may be counted as SPHCM electives).
- * Students may also enroll in additional elective courses in epidemiology, independent study (EPI 600) and in other departments for a total of 60 credits. Relevant 400-level coursework may count toward the total. Coursework unrelated to health and at the 300-level or below will not count.

Concurrent Molecular and Cellular Biology (MCB) PhD/ Epidemiology MS Program: Information on this program is available on the Epidemiology Department website at http://depts.washington.edu/epidem/mcb_epi.htm.

Doctor of Philosophy

Admission Requirements

Admission to all graduate programs is highly competitive and is based on the following evaluation of the applicant:

- * Public health or other health-related field (such as medicine, health or biological sciences, or mathematics), including his/her prior areas of study and work experience
- * Undergraduate and graduate grades
- * GRE scores (except for MD/PhD applicants funded by MSTP)
- * TOEFL or IELTS score for international applicants
- * Letters of reference
- * The applicant's goal statement.
- * Applicants do not need to locate faculty mentors in advance in order to be admitted.

Degree Requirements

Minimum of 90 total credits, as follows:

- * 18 credits of core courses must be taken for a numerical grade: EPI 512 (4), EPI 513 (4), EPI 536 (4) EPI 537 (4), BIOST 517 (4), BIOST 518 (4)
- * Electives (minimum required): One course (minimum 2 credits) in infectious disease epidemiology (EPI 520, EPI 526, EPI 529, EPI 532, EPI 568, EPI 590 when topic is vaccines); two courses (minimum 2 credits each) in epidemiologic methods or non-infectious disease epidemiology (EPI 516, EPI 517, EPI 519, EPI 521, EPI 522, EPI 524, EPI 528, EPI 531, EPI 533, EPI 538, EPI 539, EPI 542, EPI 544, EPI 546, EPI 548, EPI 570, EPI 571, EPI 573, EPI 590 when topic is injury). Three additional courses (minimum 2 credits each) in any department of the School of Public Health and Community Medicine (including Epidemiology) or other University courses related to the biological, physical or social/behavioral factors which affect health. This requirement may not be met by EPI 101, EPI 405, EPI 420, EPI 497, EPI 499, EPI 505, EPI 510, EPI 511, EPI 593, EPI 595, EPI 600, EPI 700, EPI 800, or BIOST 502, BIOST 503. EPI 534, 540, 549, 588 and EPI 590 (when topic is laboratory methods) may count as SPHCM electives, but will not fulfill the epidemiologic methods/non-infectious disease course requirement.

Additional courses in infectious disease epidemiology, chronic disease epidemiology, as well as courses offered by other departments or schools, may be taken depending on the student's area of interest and prior academic background. After the first year, doctoral students are encouraged to continue attending Epidemiology Seminar (EPI 583), and to attend Current Literature in Epidemiology (EPI 591). Students may also enroll in additional EPI 800 or EPI 600 to reach the total credits required.

- * Three quarters of EPI 584 (1, max. 3)
- * Dissertation: 27 credits of EPI 800
- * The student's Supervisory Committee may require additional courses to ensure that the student has adequate training in the area of epidemiology that the student is pursuing.

- * Students with a prior relevant master's need only complete 60 credits of coursework.

Financial Aid

Research training stipends with partial tuition support are available on a limited basis. Opportunities for work on various research projects may provide a stipend and support for the majority of tuition.

Research Facilities

University facilities include well-equipped laboratories, an excellent library system, and access to computers. Various opportunities for field research are provided in Seattle and elsewhere in the state, including the Fred Hutchinson Cancer Research Center, Group Health Cooperative's Center for Health Studies, the Harborview Injury Prevention and Research Center, Public Health: Seattle-King County, and several other local health institutions.

Course Descriptions

See page 611.

Health Services

H668 Health Sciences

Health information management professionals serve the healthcare industry and the public by managing, analyzing, and utilizing data vital for patient care. From paper and electronic health records to health informatics, maintaining access, quality, and privacy of patients' test results, diagnoses, prescriptions, and treatments is core to this discipline. Information management standards and policies also assure data is accessible for accurate patient billing and reimbursement, optimal health services utilization, public health reporting, and research.

Undergraduate Program

Adviser
1107 NE 45th Street, Suite 355, Box 354800
206-543-8810
hsinfo@u.washington.edu

The program in Health Information Administration offers both a postbaccalaureate certificate and a Bachelor of Science degree (Evening Degree Program).

Health Information Administration Postbaccalaureate Certificate

The program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education, in cooperation with the American Health Information Management Association (AHIMA).

Special Requirements

Applicants for the certificate need a baccalaureate degree from an accredited college or university with a minimum GPA of 2.50. They must also have taken courses in, or have the requisite knowledge and skills pertaining to, the following: human anatomy and physiology (laboratory course); patho-physiology; introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; principles of management; statistics (any discipline); and medical terminology.

For more information, please visit the Health Information Administration Web page

Bachelor of Science

Health Information Administration Major

Suggested First- and Second-Year College Courses: Human anatomy and physiology (laboratory course); patho-physiology; introduction to basic computer applications such as spreadsheets, data bases, or word processing, or introductory programming; principles of management; statistics (any discipline); English composition; and medical terminology.

Department Admission Requirements

1. Admission to UW Day or Evening Degree Program for autumn quarter of planned entry to Health Information Administration (HIA)
2. Minimum 90 transferable credits.
3. Completion of the following prerequisites (With the exception of medical terminology, prerequisite courses may be taken at the UW or elsewhere):
 - a. Statistics (one of the following): STAT 220, STAT 311, QMETH 201, PSYCH 315, EDPSY 490, or equivalent. (4-5 credits)
 - b. Anatomy and physiology with laboratory: BIOL 118 and BIOL 119, or equivalent (6 credits)
 - c. Management: MGMT 300, or equivalent (4 credits)
 - d. Computer applications and information technology: CSE 100, INFO 100, or equivalent (5 credits)
 - e. Medical terminology: Not offered at UW. Available at various community colleges (3-5 credits)
4. Grades: Minimum cumulative GPA of 2.50. Minimum cumulative GPA of 2.50 in prerequisite coursework. Minimum 2.0 grade in each prerequisite course.
5. Prerequisites must be completed prior to admission, with the following exceptions:
 - a. Students with prerequisites in progress are considered for conditional admission. Offer will be withdrawn if prerequisites are not completed prior to beginning of program or if prerequisites are not met. Conditional admission cases are reviewed before registration for fall quarter.
 - b. Students who cannot complete prerequisites prior to admission may petition to complete them later. If the petition is granted and the student fails to complete the necessary courses in the time specified, the student will be transferred out of HIA into premajor status. Students transferred to premajor may reapply to HIA when all prerequisites are completed.
6. Admission is once a year, for autumn quarter. Admission is also competitive. Completion of admission requirements guarantees consideration but not acceptance.

Program Requirements

1. General Education Requirements
 - a. English Composition and Additional Writing (15 credits): English composition (5 credits); additional writing (W courses) (10 credits)
 - b. Quantitative & Symbolic Reasoning (4-5 credits): Depending on course taken, may be satisfied by the statistics prerequisite requirement.
 - c. Areas of Knowledge (60 credits): Minimum 20 credits each in Visual, Literary, & Performing Arts (VLPA), Individuals & Societies (I&S), and Natural World (NW). (BIOL 118 and BIOL 119 may count toward both the prerequisite and NW requirements.)
2. Program Requirements (57 credits)
 - a. Disease concepts (4 credits): HIA 409
 - b. Information systems (16 credits): HIA 410, HIA 420, HIA 421
 - c. Coding and vocabulary (5 credits): HIA 412
 - d. Management (24 credits): HIA 450, HIA 454, HIA 455, HIA 456, HIA 470, HIA 480
 - e. Internships and projects (8 credits): HIA 460, HIA 462, HIA 499
3. Additional electives to complete minimum of 180 credits required for a degree.

General Studies Major

The general studies major allows undergraduate students to create an interdisciplinary, individually designed program of study in public health. The student identifies public health as a central organizing theme and designs the course of study under the guidance and supervision of at least two faculty members and a general studies adviser. The general studies major usually requires 50-70 credits, many of which come from the courses required for the public health minor. A complete description of the general studies major can be found in the Arts and Sciences section of this catalog.

Minor

The public health minor includes the study of historical and contemporary issues in public health including social and behavioral determinants of health, the geography of health and illness, the etiology of infectious and chronic diseases, the relationship between environmental factors and health, and access to health care and modes of delivery of health services.

Minor Requirements: 30 credits, including 20 credits of required courses and 10 credits of electives. Required courses include: BOST 111 (1); ENVH 311 (3); EPI 420 (3); GEOG 280 (5); HSERV 480A (3); MHE 417 (3);

PABIO 201 (2). Electives may be taken from the following courses or an approved substitute: ANTH 375 (3); ANTH 475 (5); ANTH 476 (5); ANTH 477 (3); GEOG 380 (4); HSERV 480B (1-3, max. 6); HSERV 480C (1-3, max. 6); MHE 474/PHIL 411 (5); MHE 481 (3); NUTR 300 (3); PSYCH 451 (5); SOC 212 (5); SOC 331 (5); STAT 311 (5); UCONJ 490 (3); UCONJ 497 (3).

Program contact is Jeremy Sappington at jerem@u.washington.edu. Phone: 206-616-2941.

Student Outcomes and Opportunities

- * **Learning Objectives and Expected Outcomes:** The bachelor's degree program is designed to prepare individuals for careers in the management and use of health care information, and prepares students for the Registered Health Information Administrator (R.H.I.A.) national certifying examination of the American Health Information Management Association. The program gives students the tools to work in a wide variety of health care positions upon graduation, including health information management, health informatics with emphasis on electronic health records, health care quality improvement, decision support analysis, research, health insurance, and consulting. Graduates pass a national credential examination, with a majority working within the health information management field.
- * **Instructional and Research Facilities:** None.
- * **Honors Options Available:** None.
- * **Research, Internships, and Service Learning:** Students complete two internships, one of which is the capstone project.
- * **Department Scholarships:** None.
- * **Student Organizations/Associations:** Students are invited to join the health information management professional association at reduced rates.

Graduate Program

Graduate Program Coordinator
H660 Health Sciences, Box 357660
206-616-2926
hsinfo@u.washington.edu

The Department of Health Services offers a two-year graduate program in health services leading to the Master of Public Health or Master of Science degree. The M.P.H. degree prepares future health practitioners, managers, and researchers to conduct the unfinished work of improving the well-being of communities in the United States and throughout the world. Graduates take jobs in health system management, health program design and evaluation, health promotion, public health practice, and policy analysis. Beginning autumn 2002, the department will offer an M.P.H. in community-oriented public health practice. This new degree program will use problem-based learning methods, and will integrate classroom instruction and experiential fieldwork to prepare students to work in community and public health practice settings. Students may also pursue any of the M.P.H. specialty options. The department also offers a three-year extended degree program in community-health management, leading to the M.P.H. degree for employed professionals working full-time.

The department also maintains primary responsibility for the graduate program in Health Services Administration (an interdisciplinary degree-granting program of the Graduate School described in the Interdisciplinary Graduate Degree Programs section of this catalog). In addition, an executive version of the traditional M.H.A. degree, designed for mid-career health care professionals, was established in winter 1998. The M.H.A. degree provides full academic preparation for careers in management and policy positions in health systems, hospitals, medical groups, health plans and other types of health care organizations.

The department offers a Ph.D. in health services and participates in the training of doctoral students from other departments on campus by offering a specialization in health services under the Doctoral Studies Program.

Master of Public Health

Admission Requirements

- * One set of official transcripts from all institutions of higher learning attended
- * Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree (e.g. MD, PhD, JD) from a U.S. institution of higher learning)
- * Test of English as a Foreign Language (TOEFL) scores. For departmental purposes, a score of 580 or higher is usually required to be competitive. Applicants admitted to the program who score between 500 and 580 are required to take prescribed English classes.
- * Departmental admissions application
- * Applicant's statement, including a description of the applicant's professional background, career goals, and the educational objectives which the applicant expects to meet while completing the program
- * Three recent letters of recommendation, preferably from former supervisors and teachers.
- * An in-person or telephone interview with a Health and Policy Research faculty person is highly recommended, but not required

Degree Requirements, Health Policy and Research Option

63 credits, as follows:

- * At least 30 credits be from graduate-level courses
- * At least 18 credits from graduate-level Health Services courses
- * Coursework:
 - o Either BHOST 511 (4) or BHOST 517 (4)
 - o One of the following: ENV H 511 (1-3, max. 3), ENV H 517 (3), ENV H 570 (3), ENV H 577 (3-4), or ENV H 584 (3)
 - o Either EPI 511 (3-4) or EPI 512/EPI 513 (4/4)
 - o HSERV 511 (3-4) or HSERV 531 (4) (for international health students only)
 - o HSMGMT 560 (1-4, max. 4), HSERV 510 (3)
 - o HSERV 592 (1-6, max. 6) for each quarter in residence
 - o 3 credits of practicum: HSERV 595 (1-12, max. 12)
 - o 9 credits of thesis: HSERV 700
 - o Remaining credits as electives

Degree Requirements, International Health Option

The program is an elective track within the MPH degree programs in both the Departments of Health Services and Epidemiology. Students are required to complete core MPH courses, departmental requirements, a public health practicum, 12 credits of international health coursework, and a thesis on a topic relating to health in Developing Countries. The program usually requires six academic quarters to complete.

Degree Requirements, Maternal and Child Health Option

69 credits, as follows:

- * HSERV 510 (3), HSERV 511 (3/4), HSERV 541 (3), HSERV 542 (3/4), HSERV 543 (3)
- * Either HSERV 527 (4), HSERV 581 (4), or EPI 514 (4)
- * HSMGMT 560 (1-4, max. 4)
- * One of the following environmental health classes: ENV H 511 (1-3, max. 3), ENV H 517 (3), ENV H 570 (3), ENV H 577 (3/4), or ENV H 584 (3)
- * One of the following epidemiology courses: EPI 511 (3/4), EPI 512 (4), or EPI 513 (4)
- * Either BHOST 511 (4) or BHOST 517 (4); either BHOST 512 (4) or BHOST 518 (4)
- * HSERV 592 (1 credit for each of six quarters)
- * Practicum: HSERV 595 (1-12, max. 12)
- * Thesis: HSERV 700

Degree Requirements, Social and Behavioral Sciences Option

63 credits, as follows:

- * The MPH in Health Services SBS track requires the following specific courses:
 - o HSERV 511 (4), HSMGMT 560 (1-4, max. 4), BHOST 511 (4)
 - o One of the following: ENV H 511 (1-3, max. 3), ENV H 517 (3), ENV H 570 (3), ENV H 577 (3/4), or ENV H 584 (3)
 - o One of the following: EPI 511 (3/4), EPI 512/EPI 513 (4, 4) (recommended)
 - o HSERV 510 (3)

- o HSERV 592 (1-6, max. 6; six quarters total required)
- o BHOST 512 (4) (may be replaced with BHOST 517 by advanced students with the permission of their adviser)
- o Qualitative methods course: All SBS students are required to take one Qualitative Methods course. HSERV 526 or HSERV 590 when the topic is qualitative methods
- o One of the following: HSERV 507 (3), HSERV 513 (3), HSERV 580 (3), HSERV 581 (4), HSERV 582 (3/4), HSERV 586 (3), HSERV 588 (3), or HSMGMT 514 (3/4)
- * At least 18 credit hours in 500-level Health Services classroom courses. HSERV and HSMGMT courses listed above count toward this requirement, but independent study does not. SBS Seminar does count towards this requirement.
- * At least 30 credits in graduate-level classroom courses in the School of Public Health and Community Medicine, or in other schools at the University if approved by the student's advisor.
- * At least 3 credits of HSERV 595, practicum
- * 9 credits of HSERV 700, master's thesis

Master of Health Administration

Admission Requirements

- * A baccalaureate degree from an accredited university
- * Minimum GPA of 3.00 in the last 90 graded credits
- * GRE scores

Degree Requirements

77 credits, as follows:

- * Year One Required Courses: ACCTG 503 (4); HSERV 511 (4); either HSERV 587 (3) or HSMGMT 514 (4), HSMGMT 501 (3); HSMGMT 513 (4); HSMGMT 523 (3); HSMGMT 560 (3); HSMGMT 571 (4); 12 credits of HSMGMT 590 (1-6, max. 12); 4 credits of HSMGMT 592 (2, 2)
- * Year Two Required Courses: HSERV 523 (3), HSERV 551 (2), HSERV 552 (3), HSMGMT 500 (3), HSMGMT 502 (3), HSMGMT 545 (4), HSMGMT 562 (4), HSMGMT 590 (2), HSMGMT 590 (4), MHE 523 (3), electives (2-4 credits)

Master of Science, Health Policy and Research

Admission Requirements

- * One set of official transcripts from all institutions of higher learning attended
- * Official scores from the general Graduate Record Examination (GRE) (required for applicants who have not already earned a doctoral-level degree (e.g. MD, PhD, JD) from a U.S. institution of higher learning)
- * Test of English as a Foreign Language (TOEFL) scores. For departmental purposes, a score of 580 or higher is usually required to be competitive. Applicants admitted to the program who score between 500 and 580 are required to take prescribed English classes.
- * Departmental admissions application
- * Applicant's statement, including a description of the applicant's professional background, career goals, and the educational objectives which the applicant expects to meet while completing the program
- * Three recent letters of recommendation, preferably from former supervisors and teachers.
- * An in-person or telephone interview with a Health and Policy Research faculty person is highly recommended, but not required

Degree Requirements

63 credits, as follows:

- * Either HSERV 511 (3/4) or HSERV 512 (3)
- * Either HSERV 587 (3), HSMGMT 513 (4), or HSMGMT 514 (3)
- * EPI 512 (4), EPI 513 (4)
- * Either BHOST 511, BHOST 512, BHOST 513 (4, 4, 4), or BHOST 517, BHOST 518 (4, 4)
- * Two of the following: HSERV 522 (4), HSERV 523 (4), HSERV 524 (4), HSERV 525 (4), HSERV 526 (4), HSERV 527 (4), HSERV 539 (3/4), HSERV 583 (3), HSERV 584 (3), or HSERV 586 (3)
- * Three quarters of HSERV 592 (1-6, max. 6)
- * 9 credits of HSERV 700

Doctor of Philosophy

Admission Requirements

Admission priority is given to applicants who have graduated from a master program with high academic standing. Students with only a bachelor's degree with health services research experience are occasionally admitted. Generally these students are admitted to the Master of Science Program and then to the Doctoral Program.

Applicants who have a bachelor, master, or professional degree in a field related to health services are given preference over applicants who do not have such experience.

Applicants with research experience and publications are typically rated more highly.

Students admitted to the program generally have GRE scores in or above the 80th percentile.

International applicants must submit the results of the Test of English as a Foreign Language (TOEFL), unless they are a citizen of Australia, Canada, Ireland, New Zealand or the United Kingdom OR have earned a bachelor's or higher degree from the U.S. or one of the countries listed above. A minimum score of 580 (paper based) or 237 (computer based) on the TOEFL is required to be considered for admission to the UW.

Degree Requirements

100 credits minimum, as follows:

- * Required core competencies (35 credits): HSERV 512 (3), HSERV 513 (3), HSERV 514 (3); one of the following: HSMGMT 514 (3), HSERV 587 (3), or ECON 500 (3); HSERV 522 (3); BIOST 517 (4), BIOST 518 (4) (or BIOST 511, BIOST 512, BIOST 513 (4, 4, 4) or BIOST 514, BIOST 515 (4, 4)); EPI 512 (4), EPI 513 (4)
- * Area of emphasis: Five courses or 15 credits in an area of emphasis. Suggested areas of emphasis are as follows:
 - o Economics or Finance
 - o Health Behavior and Health Promotion
 - o Occupational Health
 - o Cancer Prevention and Control
 - o Evaluation Sciences
 - o Population Health and Social Determinants
 - o Global Health
 - o Maternal and Child Health
 - o Customized area of emphasis: The specific courses to be taken are selected by the student and the adviser based on the student's past coursework, experience, proposed dissertation topic, and future career goals.
- * Doctoral courses in advanced theory and methods in health services (50 credits including a minimum of 30 dissertation credits)
- * Written preliminary examination
- * Written and oral general examinations
- * Dissertation
- * Dissertation defense (final examination)

Financial Aid

Every attempt is made to ensure that students admitted are not prevented from pursuing graduate studies due to inadequate finances. Some fellowships, assistantships, scholarships, and loans are available each year. However, students should be prepared to use their own resources to finance their graduate education.

Research Facilities

In addition to using University facilities, the program has extensive links with community health-care delivery systems and agencies for research and training.

Extended M.P.H.

Graduate Program Coordinator
H685 Health Sciences, Box 357660
206-685-7580

The Extended M.P.H. Degree Program is a part-time, partial distance learning program delivered through a combination of intensive four-week

summer sessions on the University campus, directed independent study, and four intensive weekend seminars during the academic year. The program is designed for mid-career public and community health professionals with three or more years of experience related to public health. The program provides knowledge and skills required at mid- and upper-level practice and management positions for health professionals. In addition to the core courses in health services, epidemiology, biostatistics, and environmental health, the prescribed course work includes a broad exposure to the health-care system plus specific management training in budgets, finance, personnel management, economics, organization theory, and program planning and evaluation. Pathways are available in health education, maternal and child health, public health practice, and oral health.

The Extended M.P.H. Degree Program provides training in developing skills in the scientific base of public health, analytic methods, management and communication, and policy and advocacy, as well as training in cross-cutting issues. Graduates apply their skills directly to their careers.

Admission Requirements

- * Current employment in a public health related agency preferred
- * Minimum of three years experience in community, public, or environmental health-related field
- * Baccalaureate degree from an accredited college or university
- * Minimum 3.00 GPA in the last graded 90 quarter/60 semester hours
- * Graduate Record Examination (GRE) scores, taken within 6 years. (Applicants with M.D., D.O., or Ph.D. degrees from an accredited U.S. college or university may waive the GRE requirement.)

Degree Requirements

63 credits minimum, as follows:

- * Year 1 Required Courses: BIOST 502 (4), EPI 511 (3/4), HSERV 501 (3), HSERV 516 (4), HSERV 520 (1-3, max. 3), HSMGMT 560 (1-4, max. 4)
- * Year 2 Required Courses: BIOST 503 (4), ENV H 511 (1-3, max. 3), HSERV 504 (1-3, max. 3), HSERV 522 (1-4, max. 4), HSMGMT 514 (3/4), HSMGMT 563 (3)
- * Year 3 Required Courses: HSMGMT 566 (3), HSMGMT 572 (3)
- * Thesis or Project Option: HSERV 700 (master's thesis) or HSERV 598 (project); EPI 600/ENV H 600
- * Practicum (required): focus based on pathway choice
- * Elective or Pathway Credits (required): pathway courses may be spread out over two years. Electives may be taken at any time.

Course Descriptions

See page 614.

Pathobiology

Graduate Program

Graduate Program Coordinator
F161F Health Sciences, Box 357238
206-543-4338
pathobio@u.washington.edu

The Pathobiology graduate program offers graduate training in the application of basic biomedical research to diseases of public health interest. The program of study involves core courses to develop a fundamental understanding of basic cellular and molecular processes and techniques important in the application of basic biomedical research to diseases; laboratory experience to learn how to collect, analyze, interpret, and use data for solving problems; and opportunities to develop skills in communicating research findings through oral and written presentations.

Master of Science

The master's program is designed for students to develop an understanding of the applications of molecular biology to public health, epidemiology, and cellular or antigenic analysis, and microbiology or immunology. The focus in this two-year program is developing basic research skills and understanding the scientific method. Students are expected to fulfill their course requirements during the first year. Under the guidance of a faculty research mentor, students propose and complete a thesis that includes an original research project.

Admission Requirements

- * Personal Statement: The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of your background and readiness for graduate studies in pathobiology.
- * One official set of transcripts from all collegiate institutions attended.
- * Three letters of recommendation.
- * Curriculum vitae
- * Official Graduate Record Examination (GRE) scores
- * International applicants are ALSO required to submit official Test of English as a Foreign Language (TOEFL) Scores. The Department of Pathobiology will not admit international applicants that have less than a TOEFL score of 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

Degree Requirements

A minimum of 60 credits as follows:

- * 21.5 credits of required courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1)
- * Research Credits: Sufficient credits of PABIO 600 and PABIO 700 to complete a research project.
- * Electives: Additional courses in Pathobiology or the biomedical sciences may be taken to fulfill the graded course requirement, to encompass the interests of the student, or to fulfill any additional requirements set forth by the student's committee.
- * M.S. Thesis Research Proposal: The M.S. thesis research proposal should be done by the end of the fourth quarter of the first year. The proposal should contain the following, in this order:
 - o A brief synopsis of background relevant to the project.
 - o A summary of preliminary experiments.
 - o A description of experiments planned for the next year.
- * M.S. Thesis: The thesis must be provided to the M.S. advisory committee two weeks prior to the oral presentation. Corrections should be made following their review before submission of the document to the Graduate School.
- * M.S. Oral Presentation and Defense: All students are required to give a formal seminar prior to the completion of Master's program.

Doctor of Philosophy

The doctoral program lasts four to five years and is designed for students to become capable of conducting independent research leading to the expansion of knowledge by developing skills to approach unfamiliar experimental systems and identify and explore important questions concerning pathogenesis and infection. Students develop familiarity with the paradigms for control, prevention, and treatment; develop an understanding of epidemiology and disease processes; learn basic methodologies used in this research including relevant areas of molecular biology, bacteriology, cell biology, virology, epidemiology, and biostatistics; and develop familiarity with the major classes of pathogens.

Admission Requirements

- * Personal Statement: The personal statement is a series of six short-answer questions. This statement plays an important role in admissions by providing the reviewers with a representation of your background and readiness for graduate studies in pathobiology.
- * One official set of transcripts from all collegiate institutions attended.
- * Three letters of recommendation.
- * Curriculum vitae
- * Official Graduate Record Examination (GRE) scores
- * International applicants are ALSO required to submit official Test of English as a Foreign Language (TOEFL) Scores. The Department of Pathobiology will not admit international applicants that have less than a TOEFL score of 600 on the paper-based test or 250 on the computerized test. The department must receive an official score report from the Educational Testing Service. TOEFL scores cannot be more than two years old.

Degree Requirements

90 credits minimum, as follows:

- * Required Courses: PABIO 550 (3), PABIO 551 (4), PABIO 552 (4), PABIO 553 (2), EPI 511 (4), PABIO 580 (1), PABIO 581 (1), PABIO 582 (1.5), PABIO 590 (1), PABIO 598 (2), PABIO 500 (variable), PABIO 600 (variable), PABIO 800 (27); either IMMUN 441 (4) or IMMUN 532 (3).
- * Students are required to attend Seminar (PABIO 580) and Journal Club (PABIO 581) every quarter of the academic year while enrolled. Students may be excused for up to two quarters while writing the dissertation. Students will give research presentations in the Graduate Research Symposium annually after the first year. 3 credits each of Seminar and Journal Club may each be counted towards the degree.
- * Electives: The following are recommended tracks for elective credits:
 - o Eukaryotic Pathogens: PABIO 536, PABIO 548, CONJ 531 through CONJ 544, EPI 532, MICROM 444
 - o Bacterial Pathogens: PABIO 540, PABIO 568, EPI 520, EPI 529, MICROM 552, MICROM 555. (Students without a background in bacteriology are required to take MICROM 442 or an equivalent course as a prerequisite for entry into the Bacterial Pathogens track.)
 - o Viral Pathogens: Two or more of the following are strongly recommended: CONJ 531-544, EPI 520, EPI 524, EPI 530, IMMUN 532, MICROM 540

Research Facilities

Research facilities are geographically dispersed and located in the Health Science Center of the School of Medicine, Fred Hutchinson Cancer Research Center, and Seattle Biomedical Research Institute. External support includes computer facilities and the Health Sciences Library with access to more than 345,000 volumes, 4,000 periodicals, and online bibliographic services for all national libraries of medicine and most commercial databases.

The Fred Hutchinson Cancer Research Center is a world-renowned research institution. Its mission for more than 20 years has been to eliminate cancer. Shared facilities are available, including electron microscopy, flow cytometry, tissue culture, image analysis, biotechnology center for DNA and protein synthesis and sequencing, animal facilities, biological production facility focused on monoclonal antibody production, extensive libraries, and a biocomputing center.

The Seattle Biomedical Research Institute is an independent nonprofit organization studying causes and interventions to infectious diseases of worldwide impact, including targeted research producing leading edge findings and applied research creating diagnostic tests and treatments.

Financial Aid

The department offers a twelve-month competitive salary, as well as paying tuition and health insurance, which includes medical, dental, and vision benefits. Students with satisfactory academic progress can anticipate funding for the duration of their studies.

Course Descriptions

See page 619.

Public Health Genetics

F363 Health Sciences Building

Public health genetics is an emerging field that applies advances in human genetics, genomics, and molecular biotechnology to improve public health and prevent disease.

Founded in 1997, the University of Washington's Institute for Public Health Genetics (IPHG) is a leader in the emerging field of public health genetics. Alone among U.S. universities, the U.W., through IPHG, offers graduate degrees at both the master's and Ph.D. levels.

The mission of the institute is to provide broad, interdisciplinary training for future public health professionals, to facilitate research in public health genetics, and to serve as a resource for continuing professional education.

Graduate Program

Graduate Program Coordinator
F363 Health Sciences Building, Box 357236
206-616-9286
phgen@u.washington.edu

Master of Science, Genetic Epidemiology

Admission Requirements

- * Completed program application form.
- * Statement of purpose
- * Official sealed transcripts, including courses, grades, and degrees from all institutions attended after secondary school.
- * Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE.).
- * International applicants: Copy of TOEFL scores
- * Three letters of recommendation from professors, supervisors, or others who know the student's work reasonably well
- * Printed copy of completed Graduate School web application, sent along with the Public Health Genetics program application
- * Recent copy of the student's resume or curriculum vitae

Degree Requirements

68 credits minimum, as follows:

- * Required Courses: PHG 511/EPI 517 (3), PHG 518/EPI 518 (2/4), PHG 519/BIOST 516/EPI 516 (3), EPI 573/ENV H 573 (3), PHG 512/LAW E 562/MHE 514 (3); EPI 512 (4), EPI 513 (4); either BIOST 511, BIOST 512, BIOST 513 (4, 4, 4), or BIOST 517, BIOST 518 (4, 4); MEDED 536/PABIO 536 (3), GENOME 552 (1.5), GENOME 553 (1.5)
- * Elective Courses: At least two courses, other than independent study and thesis credits. Courses must be in epidemiology, biostatistics, genetics, public health genetics, or be related to the biological, physical, or social/behavioral factors which affect health, in particular ethical, legal and social issues related to genetic epidemiology.
- * Thesis: PHG 700 (9 credits minimum)

Master of Public Health, Public Health Genetics

Admission Requirements

- * Completed appropriate program application form.
- * Statement of purpose.
- * Official sealed transcripts, including courses, grades and degrees from all institutions attended after secondary school.
- * Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE.).
- * International applicants: Copy of TOEFL scores.
- * Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well.
- * A printed copy of the applicant's completed Graduate School web application.
- * A recent copy of the applicant's resume or curriculum vitae.

Degree Requirements

63 credits, as follows:

- * Required Courses: 52 credits as follows: EPI 511 (3/4), BIOST 511 (4), HSERV 511 (3/4), ENV H 511 (1-3), HSERV 510 (3); PHG 511 (3), PHG 512 (3), PHG 513 (3), PHG 521 (3), PHG 522 (2), PHG 523 (2), PHG 581 (1); PHG 580 (3); PHG 595 (3); at least 9 credits of PHG 700
- * Electives: Remaining 11 credits may combine approved elective courses, PHG 600 credits, and PHG 700 credits.

Doctor of Philosophy

Admission Requirements

- * Completed appropriate program application form.
- * Statement of purpose.
- * Official sealed transcripts, including courses, grades and degrees from all institutions attended after secondary school.
- * Official Graduate Record Examination (GRE) scores. Required for all applicants, except those who hold a U.S. doctorate (neither the MCAT nor ECFMG are acceptable substitutes for the GRE.).
- * International applicants: Copy of TOEFL scores.
- * Three letters of recommendation from professors, supervisors, or others who know the applicant's work reasonably well.
- * A printed copy of the applicant's completed Graduate School web application.
- * A recent copy of the applicant's resume or curriculum vitae.

Degree Requirements

90 credits minimum, as follows:

- * For students who require additional training in written communication for a multidisciplinary audience, TC 509 may be required.
- * Human Genetics: Required -- GENOME 565 (4); Highly recommended -- GENOME 552 (1.5), PABIO 536 (3)
- * Public Health: Required -- EPI 511 (3/4); BIOST 511 (4) or BIOST 517 (4); ENV H 511 (1-3); HSERV 511 (3-4)
- * Core Knowledge Areas
 - o Genomics in Public Health: PHG 511 (3), PHG 513 (3), PHG 542 (3), PHG 580 (1)
 - o Implications of Genetics for Society: PHG 521 (3), PHG 522 (2), PHG 523 (2), PHG 541 (3), PHG 543 (3)
- * PHG 580 is required each quarter for all Ph.D. students till they pass the preliminary examination.
- * Preliminary Examination: Following completion of two years of study.
- * Selective Courses for Core Knowledge Areas and Development of Dissertation Topic:
 - o All students: PHG 518 (2-4), PHG 519 (3), EPI 573 (3)
 - o Genomics in public health: EPI 512 (4), EPI 513 (4), ENV H 514 (3), ENV H 515 (3), ENV H 516 (3), ENV H 567 (2), ENV H 577 (3/4), MEDCH 527 (4), PCEUT 502 (4)
 - o Implications of genetics for society: PHG 537 (2), PHG 590 (1-6), MHE 402 (5), MHE 474 (5), LAW A 596 (1-4), HSERV 551 (2), HSERV 510 (3), ANTH 475 (5), HSERV 552 (3), HSERV 583 (3), HSERV 584 (3), HSERV 587 (3)

Course Descriptoins

See page 613.

Reserve Officer Training Corps Programs

Aerospace Studies

204 Clark

The Air Force Reserve Officer Training Corps program (AFROTC) is designed to motivate, educate, and commission highly qualified students for active duty as officers in the U.S. Air Force. The curriculum provides the opportunity for students in any major to gain military knowledge and to become effective Air Force officers and leaders in the aerospace environment.

Adviser
204 Clark, Box 353830
206-543-2360
afrotc@u.washington.edu

General Program Requirements

All aerospace studies courses are open to all University students. Additionally, any student may join the AFROTC program as a cadet and enroll in the 100- and 200-level general military courses. Entry into the professional officer courses (300- and 400-level courses) as a cadet seeking a commission in the Air Force is on a controlled, selective basis.

Commissioning Requirements

Students who successfully complete the AFROTC program and receive an academic degree from the University are offered commissions as second lieutenants in the Air Force.

General Military Courses

The 100- and 200-level courses for AFROTC cadets consist of one classroom hour, one-and-a-half hours of leadership laboratory, and two hours of physical fitness per week during the freshman and sophomore years. Uniforms and textbooks are provided. Students may enter the freshman class at the start of autumn, winter, or spring quarter. Sophomore students may enter at the start of autumn or winter quarter and take the freshman- and sophomore-level courses concurrently. A four-week field-training course, taken during the summer between the sophomore and junior years, is required for entry into the professional officer courses. Students receive pay and travel costs for field training.

Except for sophomore cadets on AFROTC scholarship, students incur no active-duty service commitment by taking general military courses and may drop the courses at any time within the limits of University course-drop policies. Non-ROTC students take the AS classes without any additional requirements for leadership laboratory or physical fitness.

Professional Officer Courses

Cadets selected for enrollment in professional officer courses are enlisted in the Air Force Reserve and receive a tax-free monthly subsistence stipend. They are furnished texts and uniforms. Junior- and senior-level classes consist of three hours of academic classes, three hours of leadership-laboratory and two hours of physical fitness per week. Non-ROTC students take the AS classes without any additional requirements to attend leadership laboratory or physical fitness. Non-ROTC students earn academic credits for 300- and 400-level courses, but do not earn an Air Force commission.

Financial Assistance

The Air Force offers one-, two-, and three-year scholarships to college students. AFROTC scholarships pay tuition, certain fees, and textbook reimbursement. In addition, scholarship winners receive a monthly subsistence allowance. To apply for one of these scholarships, students should contact the Unit Admissions Officer in the Department of Aerospace Studies (AFROTC), 206-543-2360 or at afrotc@u.washington.edu.

Two-Year Program

To provide for those students wishing to join AFROTC but unable to take the general military courses, a two-year professional officer course is available on a competitive basis. This program is open to graduate students and full-

time undergraduate students in select majors who will complete a bachelor's degree in two years.

Students in this program are required to attend a six-week field-training course at an Air Force base during the summer preceding program entry. The student is paid during the six-week period. Upon return to the campus, students enter the professional officer course. Uniform, texts, and a monthly subsistence are provided. Students interested in this program should contact the AFROTC department by February prior to the autumn quarter they desire to enter, at 206-543-2360 or at afrotc@u.washington.edu.

Course Descriptions

See page 620.

Military Science

104 Clark Hall

The ROTC program provides students an opportunity to learn and practice the art of leading people. Recognizing that there is a great difference between cognition and volition, the program is structured in such a way as to give the student practical experience in leading and managing resources.

The Army ROTC (AROTC) program enables the student to learn about the military profession and the role it plays in our democratic system of government. The courses enable such knowledge to be acquired on the campus without serving in the military forces.

The Army ROTC electives enrich the student's course of study. Taking these courses also opens up an additional career option, enabling the student to earn a commission and to serve in the Army as an officer, or in the Reserves or National Guard while pursuing a civilian career. Officers serve in a wide variety of career paths, including infantry, human resources, aviation, intelligence, automation, and hospital administration.

Army ROTC provides the student membership in a close-knit fraternal organization.

ROTC programs on college campuses are the nation's way of ensuring that the influences of higher education are transferred into the military services—a mandatory requirement in a democracy.

Enrollment and Scholarship Officer
105 Clark, Box 353820
206-543-9010

Traditional Four-Year Program

Open to freshman and sophomore men and women. Academic studies include courses in military history, principles of leadership, techniques of instruction, management and staff procedures, logistics, physical conditioning, and military law. Extracurricular activities include such options as Ranger Company, color guard, training exercises, field trips, and related activities. A non-scholarship student incurs no obligation of any kind during the first two years of the four-year AROTC program.

Placement credit toward completion of AROTC courses may be given for prior ROTC or military training. Veterans routinely receive full credit for the first two years of AROTC and may enter the advanced course when they are academic juniors. All military textbooks and uniform items are furnished without charge. Students in the advanced course receive tax-free monthly subsistence of \$350 per month as an academic junior and \$400 per month as an academic senior. In the advanced course, cadets are required to participate in the leadership-development program, which is a practicum of skills and principles taught during the previous two years. Between their junior and senior years, cadets attend a five-week summer camp during which they receive varied and challenging training and for which they are paid both for the time at camp and for travel expenses to and from the camp location. Upon entering the advanced course, students agree to complete the course, accept a commission upon graduation, and serve a minimum of four years if scholarship (three years if non-scholarship) and be on active-duty commitment. If the cadet chooses to go in the Reserves or National Guard, then he or she will serve a minimum of eight years.

Four-Year Scholarship Program

Application to this program should be made while the student is still in high school. Selection of students is made on a nationwide competitive basis. This program may lead to a commission in the Active Army, the Army Reserve, or the Army National Guard. All tuition, a flat rate for books and laboratory expenses, and uniform items, plus monthly tax-free stipends, is provided by the Army. The program requires four years of academic study on campus, as well as a five-week advanced camp training period between the junior and senior years, for which the cadet is paid for both time and travel expense to and from the camp location. Academic studies are identical to those of the traditional four-year program. The student must sign a contract wherein the student agrees to complete this program, along with a chosen academic program, to accept a commission, and to serve on active duty or in the reserve forces after commissioning.

Three-Year Scholarship Program

This program is open to qualified students on campus. The scholarship provides financial assistance during the remaining years of the student's enrollment. Each scholarship pays for tuition and a flat rate for books and laboratory expenses and provides tax-free monthly stipends of \$350 for academic juniors and \$400 for academic seniors. All other advantages and obligations are the same as those of the four-year scholarship program.

Two-Year or Lateral Entry Program

This program is open to qualified undergraduate and graduate students who have at least two years remaining in school and who have completed 81 credits. Students may qualify for entrance into the advanced course under this program in two ways.

First, they may participate as qualified veterans who receive placement credit for the first two years of AROTC. Veterans are also eligible to compete for two- and three-year scholarships while receiving their educational benefits. Members of the Reserves and National Guard may also be eligible to participate in AROTC and receive their commission upon graduation.

The second alternative under this program requires attendance at the Leader's Trainers Course for five weeks at Fort Knox, Kentucky. Completion of this training also qualifies students for direct entry into the advanced course. While at camp, students receive pay plus travel expenses to and from the camp location, and they may compete for two-year scholarships, provided scholarships are available.

Course Descriptions

See page 620.

Naval Science

305 Clark

The Department of Naval Science offers University students an opportunity to engage in study that leads to a commission in the U.S. Navy or Marine Corps while working toward a baccalaureate degree. The Naval Reserve Officer Training Corps (NROTC) Unit functions in conjunction with the Department of Naval Science. An NROTC student may select an academic major within certain limitations (e.g., some programs that normally lead to immediate graduate education, such as architecture, are not consistent with the mission of the NROTC program).

In addition to their University curricula, NROTC students take naval science courses in history and customs, naval engineering/weapons systems, navigation, naval operations, and leadership/management. In addition, each student must attend one naval science laboratory session and one physical training session per week. During the summer, students may have a four-to-six-week training cruise to put into practice their earlier classroom training.

Any University student may take a naval science course without enrolling in the NROTC Program. Two programs are offered.

Adviser
305 Clark, Box 353840
206-543-0170
nrotc@u.washington.edu

Navy-Marine Scholarship Program

Each year students are accepted for scholarship status in the four-year, three-year alternate, and two-year NROTC scholarship programs. Eligibility for the three- and four-year programs is based upon nationwide competition and selection by a central selection committee. Application must be made by December 1 of the academic year preceding appointment as midshipman. Those selected are provided educational benefits, including subsidy by the Navy of all tuition, fees, and uniforms. In addition, there is a textbook stipend each quarter and a monthly subsistence pay which ranges between \$250 and \$400.

For the two-year scholarship program, applications from current sophomores, or juniors enrolled in five-year programs of study, must be received by March. Those chosen by a central selection committee attend a six-week course of instruction at the Naval Science Institute (NSI) at Newport, Rhode Island, during the summer prior to their junior year. Successful completion of NSI instruction qualifies these students for enrollment in the advanced courses in the NROTC program. All scholarship students are appointed as midshipmen, USNR-R, and upon graduation are commissioned as officers in the Navy or Marine Corps Reserve, after which they serve on active duty for a minimum of four years.

Navy-Marine College Program

Each year, men and women are accepted for four- and two-year nonscholarship college programs. Applications for the two-year program are accepted from current sophomores in community colleges or four-year colleges and must be received prior to March of their sophomore year (or third year, if in a five-year program).

Those students selected for the two-year program attend a six-week course of instruction at NSI during the summer prior to their junior year. Successful completion of NSI instruction qualifies students for enrollment in the advanced course in the NROTC program. Students in the NROTC college program pay their own college expenses but receive monthly subsistence pay during their junior and senior years. The Navy furnishes all uniforms and textbooks used in naval science courses.

All college-program students are eligible for a scholarship after completing one academic term, with scholarship awards based on academic grades and participation within the midshipman battalion. The two-year college-program students also may win a scholarship for superior performance at NSI. Upon graduation, college-program students are commissioned in the Navy Reserve or Marine Corps Reserve and serve on active duty for three years.

Course Descriptions

See page 621.

School of Social Work

Dean

Dorothy Van Soest

210 Social Work/Speech and Hearing Sciences

The School of Social Work offers two professional programs, one at the undergraduate level and one at the graduate level, as well as a Ph.D. program. The undergraduate program prepares students for entry-level generalist practice; students earn the Bachelor of Arts in Social Welfare degree. The graduate professional program prepares students for advanced practice within a field of concentration; students earn a Master of Social Work degree. Both professional programs are accredited by the Council on Social Work Education. The School also offers a Doctor of Philosophy degree in social welfare that prepares students for careers in research and education. For the three programs, no credit is granted on the basis of life experience or previous employment. All three programs are housed in the Social Work/Speech and Hearing Sciences Building, 4101 Fifteenth Avenue Northeast, Seattle, WA 98105-6299.

In addition, the School offers a concurrent degree program with the School of Public Health and Community Medicine leading to the M.S.W. and M.P.H. degrees.

Undergraduate Program

Adviser

23D Social Work, Box 354900
206-543-8617
sswstsr@u.washington.edu

The School of Social Work offers the following program of study

- * The Bachelor of Arts with a major in Social Welfare

The program includes upper-division courses in social welfare, with prerequisites in human biology, economics, psychology, statistics, and sociology. Students enter the major at the start of their junior year after completing most of the liberal arts requirements established by the College of Arts and Sciences. Social welfare courses during a student's junior and senior years include content on social welfare history, policy and services, human behavior and the social environment, social welfare practice, social welfare research, and cultural diversity. These academic courses prepare students for the senior year's three-quarter practicum experience, which involves a total of 400 hours of direct social services under the supervision of a practicum instructor approved by the School.

Bachelor of Arts

Suggested First- and Second-Year College Courses:

SOC WF 101, SOC WF 200; PSYCH 101; SOC 110; BIOL 100 or BIOL 118; ECON 200 or ECON 201; also courses in American ethnic studies, sociology, psychology, and women studies.

Department Admission Requirements

Approximately 60 juniors are admitted to the social welfare major each academic year. Admission, which is for autumn quarter only, is competitive and completion of the requirements listed below does not guarantee acceptance. May 1 is the application deadline. To be considered for admission to the program applicants must meet the following criteria by the time of application:

1. Completion of a minimum of 65 credits.
2. Completion of the following courses: PSYCH 101 (or PSYCH 102); introductory sociology; ECON 100, ECON 200, or ECON 201; and BIOL 100 or BIOL 118, with a minimum grade of 2.0 in each course.
3. A minimum 2.00 cumulative GPA.
4. Have some paid or volunteer social service experience.
5. Applicants must submit a completed application, admissions essay, résumé, and provide copies of their college transcripts.

Application forms and a detailed description of the social welfare major are available at the School's admissions office, 23C Social Work/Speech and Hearing Sciences (SWS), or will be mailed upon request, 206-543-5676. A student may discuss the program in person by contacting the Director of Admissions, 206-543-5676, sswadmis@u.washington.edu. Students

accepted to the major complete a change-of-college form and transfer their academic file to the School's Student Services Office. Students not accepted may contact the Director of Admissions to discuss alternatives to the social welfare major, or the appeal process.

Major Requirements

66 credits as follows:

- * Junior year (34 credits) -- SOC WF 200 (5); SOC WF 310 (3); SOC WF 315 (2, 2, 2); SOC WF 320 (5); SOC WF 402 (5); SOC WF 403 (5); and SOC WF 404 (5).
- * Senior year (32 credits) -- SOC WF 311 (3); SOC WF 312 (3); SOC WF 390 (5); SOC WF 405 (9); SOC WF 415 (12).

Student Outcomes and Opportunities

- * *Learning Objectives and Expected Outcomes:* The undergraduate program produces beginning-level social work practitioners and is accredited by the Council on Social Works Education. Students become generalist social work professionals able to work with individuals, families, groups, communities, and organizations in enhancing the health, well being, and empowerment of disadvantaged communities across the lifespan. Graduates may pursue social work practice jobs, or graduate education in social work, or a range of other fields (e.g., law, medicine, public policy, international development). Students receive an interdisciplinary liberal arts education, drawing on a range of social science courses which prepare them to promote human welfare and deal with complex social problems. Students are involved in both academic coursework (gaining intellectual knowledge and critical thinking skills) and a field placement experience ("lived" or "on the ground" experience). The program assists students in integrating scholarship, research, service, and experience to promote human welfare, engaged citizenship, and multiculturalism.

The following outcomes define the BASW program:

1. Preparation of entry-level baccalaureate social workers for generalist practice in a multicultural context.
 2. Education and training of generalist social workers who are informed, engaged, and responsive practitioners, able to understand and take action in enhancing human welfare and in promoting social and economic justice.
 3. Education of students within the context of an interdisciplinary liberal arts education, to foster a comparative and critical examination of social welfare and social work through the study of its history, policies, research, and practice interventions.
 4. Preparation for graduate education.
- * *Instructional and Research Facilities:* The Social Work Computer Lab provides equipment and services for Web site creation and incorporating technology into teaching and learning. The Media Lab provides equipment and services related to the production of online streaming audio and video as well as still digital images and the incorporation of digital media into Web sites and paper formats. The Social Work Library, a branch of the Health Sciences Libraries, is located on the second floor of the Social Work/Speech and Hearing Sciences Building. The library's collection contains more than 200 current periodicals, 37,000 bound volumes, and a host of electronic resources covering the various areas of social work and social welfare, specifically aging, children and youth, crime, ethnicity, families, health care, housing, mental health, poverty, social policy, and welfare.

In addition, the School of Social Work houses a number of centers and projects. For more information on these research activities, visit depts.washington.edu/sswweb/centers_proj.html.

- * *Honors Options Available:* None offered.

- * *Research, Internships, and Service Learning:* Community service learning experiences are available for first- and second-year B.A.S.W. students. In the second (senior) year of the major, students enroll in SOC WF 415 practicum (12 credits, 4 per quarter). The practicum requires 400 hours in an agency selected by the School and with qualified supervision. Please contact the adviser for more information.

* *Department Scholarships:* A limited number of financial-aid opportunities are available to students. Applicants are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.

* *Student Organizations/Associations:* Organization of Student Social Workers (OSSW)

Graduate Program

Graduate Program Coordinator
Box 354900
206-543-8617
sswstsr@u.washington.edu

Master of Social Work

The School of Social Work offers a Master of Social Work degree with four options for completion: a two-year full-time program; a one-year Advanced Standing program for qualified students with a degree in social work/social welfare from an accredited undergraduate program; a three-year Evening Degree program; and a three-year MSW Outreach program.

All program options prepare students for advanced professional practice with a culturally diverse range of at-risk populations in publicly funded social services. The curriculum encompasses two distinct but interconnected areas: the beginning content or professional foundation, and opportunities for advanced content in areas of policy, services, and methods.

The professional foundation provides instruction in the basic knowledge and skills required for effective, generalist social work practice, as well as socialization to the profession, its value orientation, ethics, and history.

The advanced curriculum provides in-depth knowledge and skills needed for advanced practice in the social work profession. At the time of publication, the advanced curriculum is being revised. Please check the School's Web page (depts.washington.edu/sswweb/) for the most current information.

Students in the Evening Degree and Outreach options may also select from courses in advanced policy services and methods. Elective offerings are determined by a vote of students in the cohort.

Admission Requirements

Admission to the M.S.W. program requires formal admission to the Graduate School as well as to the School of Social Work. Applicants are required to have a bachelor's degree, a strong academic background, and social-service experience. Applicants must submit official transcripts from all colleges and universities attended, references, application forms, Graduate Record Examination scores, résumé, and an admission essay to be considered for autumn-quarter entry. January 15 is the closing date for receipt of applications and materials. Admission is competitive and selection is based on a review of the applicant's submitted materials. Current application materials can be obtained from the School's Admissions Office, 23 Social Work/Speech and Hearing Sciences Building, or by calling 206-543-5676 in Seattle or 1-800-558-8703.

Degree Requirements

Minimum 46 credits (Advanced Standing program); 75 credits (Day and Extended Degree programs), as follows:

- * M.S.W. program requirements include completion of required professional foundation and advanced curriculum credits and demonstrated competence in both academic and field practicum work.
- * Human Biology Requirements: BIOL 100, BIOL 101-, BIOL 118, BIOL 161, NUTR 300, or GENOME 261 (or equivalent), taken within ten years before or during the M.S.W. program. Course must be completed before beginning the advanced year (including practicum). Credit may not be applied to the M.S.W. degree. Courses in nutrition, psychobiology of women, and biology of aging also fulfill this requirement.
- * Basic Statistics Requirement: An introductory course in statistics (any discipline) is a prerequisite for SOC W 505, taken in the second quarter of the foundation year for day students and fall term of the second year for extended degree students.

* Professional Foundation Courses Required for the Day and Extended Degree Program: SOC W 500 (3), SOC W 501 (3), SOC W 504 (1-3), SOC W 505 (3), SOC W 506 (3), SOC W 510 (3), SOC W 511 (3), SOC W 512 (3), SOC W 513 (3), SOC W 514 (3), SOC W 523 (1), SOC W 524 (1-8), SOC W 525 (1-10). All foundation courses must be completed before beginning the advanced curriculum.

* Advanced Curriculum for the M.S.W. Day Program: Specialization in an advanced methods area in combination with a particular population or problem focus. Areas of concentration might include policy practice in health care, clinical practice in transnational communities, administration in mental health settings, or clinical and contextual practice with a focus on low-income children and families. Students enter the second year with an individualized learning plan (developed by winter quarter of their foundation year) that sets out a coherent program of advanced study. Identified in the learning plan is a policy/services course, an advanced methods area, an advanced field practicum, and proposed choices for methods and elective courses that support the student's overall area of concentration.

A minimum program of study includes:

- o One policy/services course (3 credits), consistent with the student's second year specialization
- o Two advanced methods (6 credits) in the student's primary method area or across methods with the approval of the faculty adviser and practicum coordinator
- o Elective course offerings (9 credits) to include courses related to the policy/services areas, and advanced HBSE and theory courses, with the primary focus on development of knowledge and skills in intervention. Students are encouraged to take one elective course from outside the school. Elective courses range from 1 to 3 credits.
- o Advanced practicum (18 credits) aligns with the student's policy/services course and with the student's primary intervention method area.

* Advanced Curriculum for the M.S.W. Extended Degree Program: Consists of an advanced generalist policy/services course, a two-quarter advanced generalist practice sequence, three electives, and a 720 hour advanced generalist practicum. Students consult with their adviser and practicum coordinator to determine electives and a practicum appropriate to the student's career goals. Students graduate with theory, knowledge, and skills to assess, intervene, and evaluate across levels of social work practice -- from micro to mezzo to macro -- and across client populations and practice settings.

* M.S.W. Electives: Courses may be selected from curriculum offerings related to particular fields of practice, intervention theories, intervention modalities, social problems, populations, and research methods. Students may take advanced methods courses in areas other than the student's primary methods area and relevant courses in other graduate programs and professional schools of the University. Three credits of external coursework may be included.

Financial Aid

A limited number of financial-aid opportunities are available to students. Applicants to the M.S.W. program are urged to apply for assistance through the Office of Student Financial Aid by February 15. Completion of the Free Application for Federal Student Aid (FAFSA) is required for consideration for any departmental funding. Departmental funding is limited. Inquiries may be directed to the Chair of the Scholarship Committee, School of Social Work.

Doctor of Philosophy in Social Welfare

The Ph.D. program in social welfare prepares students to contribute to the advancement of knowledge and practice in the field of social welfare and the profession of social work for the promotion of social justice. The program builds on the premise that social welfare scholarship must be scientifically based, responsive to service and practice needs, and informed of developments in related fields and disciplines.

After the first year of required courses, each student's program of study is individually designed and focuses on well-defined substantive and interventive areas of research relevant to the field of social welfare. In the basic core of required courses, which include teaching and research practice, students have an opportunity to pursue their particular interests with faculty members in the School of Social Work and in other schools and departments.

During the first two years, students are expected to define and develop the specialized areas that will be the focus of their General Examination and, typically, their subsequent dissertation research. The selected areas must have clear significance for the development of practice, programs, or policies in social work and social welfare.

The General Examination for advancement to candidacy generally occurs at the end of the second year or early in the third year. After advancement to candidacy, students devote themselves full time to completion of their dissertation research. The last step before award of the degree is the Final Examination, which serves as the defense of the dissertation. Students are strongly encouraged to remain in residence at the University until the dissertation is accepted. The Ph.D. program is designed to take approximately four years, although academic excellence in learning and performance is always the first criterion for degree progress.

Admission Requirements

Admission is highly selective and students are admitted for autumn-quarter entry only. Applicants should have a master's degree in social work or comparable preparation in a closely related field.

The Council on Social Work Education requires that faculty who teach practice courses in accredited programs have two years of supervised practice experience. Thus, obtaining such experience is highly important for those who seek academic positions following graduation.

Applicants selected for admission are those whose scholastic achievements, previous experience, and aptitude for social welfare research, scholarship, and teaching indicate the greatest promise for achieving the objectives of the program. In addition, an effort is made to maintain a balanced student group reflecting the range of concerns in social welfare and of faculty resources. The deadline for receipt of admission material is January 2. For more information, call 206-685-1680, or email phdmhpr@u.washington.edu.

Degree Requirements

90 credits minimum, as follows:

- * Required Courses: All required Ph.D. courses must include content on diverse populations, including the disadvantaged and oppressed. This includes content on people of color, women, gay men and lesbians, and persons with disabilities. The specific type or nature of the content (e.g., readings, exemplars, exercises) and how it is introduced and integrated will likely differ across courses. In all cases, content on diversity must be in accord with course objectives and be visibly present in the course syllabus.

All required coursework (with the exception of the 800 tutorials) must be completed before or during the quarter in which the oral section of the General Examination takes place.

The following courses are required of all students in the program and must be taken on a graded basis unless only offered as Credit/No Credit Only (i.e., they cannot be taken on a Satisfactory/Non Satisfactory basis).

- o Introduction to Advanced Research Methods and Design. Two quarters during first year.
- o Fundamentals of Social Work Statistics. Two quarters during the first year.
- o Research Issues and Priorities in Social Welfare. Two quarters during the first year.
- o Social Welfare Policy. Three quarters during the first year (analytical perspectives on policy, international and global policy, and contemporary policy).
- o Research Practicum. Two quarters; to be completed by the end of the second year. (Credit/No Credit Only.)

- o Teaching Practicum. One quarter; to be taken after successful completion of first year. (Credit/No Credit Only)
- o Doctoral Seminars. One-credit seminars in the first year (Credit/No Credit Only). These focus on professional development issues and skills with emphasis on academic and research careers.
- o Teaching Preparation. One quarter in the second year.
- o A minimum of two (3+ credit) courses in advanced graduate research methods (typically 500 level courses offered in other departments) relevant to the student's anticipated research in a substantive or interventive area. Coursework beyond the minimum is encouraged.
- o A minimum of two (3+ credit) graduate social science theory courses (500 level or above), designed to provide strong theoretical foundations. Students often use them to develop a "minor" in one of the social sciences. These courses are in the College of Arts and Sciences or in one of the professional schools and are related to the substantive or interventive content of the student's program. Coursework beyond the minimum is encouraged for greater depth of interdisciplinary theoretical training.
- o Dissertation Tutorials (SOC WL 800). Taken after the student has successfully completed the Oral General Examination and has been advanced to candidacy for the Ph.D. Students must complete a total of 27 credit hours over at least 3 quarters to satisfy the Graduate School requirement

- * Elective Courses in the School of Social Work
 - o Qualitative Methods in Social Work Research. One or two quarters offered every other year.
 - o Advanced Topics in Data Analysis. One quarter offered annually, covering advanced quantitative methods.
 - o Social Movements and Participatory Action Research Methods. One quarter.
 - o Interdisciplinary Prevention Science. Three-credit course
- * Additional Course Expectations: In addition to required courses, students may also take tutorials (SOC WL 600) with faculty members while completing advanced coursework and writing the integrative paper (prior to the oral General Examination). These tutorials should include one or more written products.

Students are also encouraged to take additional courses that bear on their substantive areas of interest. Courses may be taken in any department or school of the University but should ordinarily be at the 500 level or above.

- * Prevention Research Training Program Courses: (Trainee requirements in addition to all Ph.D. program courses)
 - o Seminar in Prevention Science. One-credit seminars taken autumn, winter, and spring quarters each year of the traineeship. Credit/No Credit Only.
 - o Introduction to Prevention Science. Three-credit course taken spring of first year in the training program.
 - o Two additional graduate level (500+) courses, one social science theory and one research methods, related to the prevention research area of study.

Financial Aid

Stipends, scholarships, teaching and research assistantships, and tuition waivers are available. Every effort is made to provide aid to each student who requires it, and research and teaching assistant positions are provided to all Ph.D. students for at least the first three years. The financial assistance provided is not usually adequate to cover all educational and living expenses. Financial-aid forms required for financial assistance must be submitted by February 15 by completing the Free Application for Federal Student Aid (FAFSA).

Course Descriptions

See page 622.

Course Descriptions

Undergraduate Interdisciplinary Programs

Program on the Environment

ENVR 100 Environmental Studies: Interdisciplinary Foundations (5) I&S/NW *Whitlow* Introduces the interdisciplinary approach to environmental studies. Examines the ethical, political, social and scientific dimensions of current and historical environmental issues, at the local and global scale. First in a three course sequence required of Environmental Studies majors. Offered: A.

ENVR 101 The Living Aquatic World (5) I&S/NW Freshwater and marine biodiversity, population, biology, ecosystem structure and function, evolution, conservation genetics, physiology, aquaculture, environmental effects of human activities, role of law, government, and human communities in resource conflicts management. Three case studies. Suitable for non-majors. Offered: jointly with FISH 101.

ENVR 103 Society and the Oceans (5) I&S/NW Explores the social and policy dimensions of the ocean environment and ocean management policy. Attention to how human values, institutions, culture, and history shape environmental issues and policy responses. Examines case studies and influential frameworks, such as the ocean as "tragedy of the commons". Offered: jointly with SIS/SMA 103.

ENVR 110 Introduction to Environmental Science (5) I&S/NW *Harrison* Covers the importance of the environment in society with particular emphasis on worldwide distribution and uses of resources, the role of natural and man-made environments, and causes of environmental degradation. Introduces ethics of conservation and recycling. Offered: jointly with ESRM 100; AWSpS.

ENVR 150 Orientation to Environmental Studies (2) Broad overview of environmental studies. Faculty members and professionals from outside the University identify opportunities for study and work in the field and offer suggestions for optimal academic preparation. Strong emphasis on class participation and experiential learning.

ENVR 200 Environmental Studies: Research and Communication (5) I&S Builds interdisciplinary analytical skills needed to study complex environmental problems. Develops proficiency using electronic databases, scholarly journals, and Internet as research tools. Hones students' ability to write and speak effectively about multifaceted environmental issues. Second in three course series required of Environmental Studies majors. Prerequisite: ENVR 100. Offered: W.

ENVR 201 Environmental Case Studies: Ecology and Conservation (5, max. 10) I&S/NW Exploration of ecology and conservation case studies from natural science, historical, socioeconomic, legal, political, and ethical perspectives. Involves gathering information, analyzing data, applying mathematical and

statistical reasoning and decision-making schemes, evaluating conflicting views based on cultural and philosophical frames of reference, and developing communications and research skills.

ENVR 202 Environmental Case Studies: Population and Health (5, max. 10) I&S/NW Exploration of population and health issues or case studies from natural science, historical, socioeconomic, legal, political, and ethical cultural perspectives. Involves gathering information, analyzing data, applying mathematical and statistical reasoning and decision-making schemes, evaluating conflicting views based on cultural and philosophical frames of reference, and developing communications and research skills.

ENVR 203 Environmental Case Studies: Resources (5, max. 10) I&S/NW Exploration of resource environmental issues from natural science, historical, socioeconomic, legal, political, and ethical perspectives. Involves gathering information, analyzing data, applying mathematical and statistical reasoning and decision-making schemes, evaluating conflicting views based on cultural and philosophical frames of reference, and developing communications and research skills.

ENVR 220 Urban Ecology (5) I&S/NW Examines nature-society interactions in urban settings. Drivers, patterns, processes, impacts and consequences of urban and urbanizing ecosystems. Presents the state of our knowledge of urban ecology in its interdisciplinary format. Offered: W.

ENVR 215 Earth, Air, Water: The Human Context (5) NW *Rhines* Lab-based introduction to Earth's environment, primarily for non-scientists: energy, atmosphere, ocean, and biosphere stability. Beginning from basic science, growing toward impacts and applications; e.g., study of the sun's energy spectrum and greenhouse effect, construction of solar box cookers, study of energy profiles of developing countries. Offered: Sp.

ENVR 235 Introduction to Environmental Economics (5) I&S/NW Introduces non-economics majors to environmental and natural resource economics. Discussion of fundamental economic concepts, including markets and private property. Students learn basic tools used in the economic assessment of environmental problems and apply these methods to key environmental issues. Offered: jointly with ECON 235.

ENVR 243 Environmental Ethics (5) I&S *Clatterbaugh, Coburn, Woody* Focuses on some of the philosophical questions that arise in connection with environmental studies. Topics to be considered include: the ideological roots of current issues, values and the natural world, public policy and risk assessment, intergenerational justice, and social change. Offered: jointly with PHIL 243.

ENVR 260 The Puget Sound Ecosystem (3/5) I&S/NW Examines historical human impacts on

the land/water ecosystem of the Puget Sound, roles of regional governance and citizen action, and prospects for ecological restoration. Computer labs and field trips for additional credit. Offered: jointly with OCEAN 260.

ENVR 296 Study Abroad – Environmental Studies (1-15, max. 15) Environmental studies course taken through an approved study abroad program, for which there are no direct UW equivalents. Credit does not apply to major requirements without approval.

ENVR 300 Environmental Studies: Synthesis and Application (5) I&S/NW Multi-scale case studies of socially and scientifically complex environmental problems, including how the Earth works as a biogeochemical system, ecological principles, human health, energy, and global change. Emphasizes quantitative environmental analysis. Third in a required three course series of Environmental Studies majors. Prerequisite: ENVR 200; recommended: ENVR major foundational courses. Offered: Sp.

ENVR 313 Environmental Earth Science (5) NW *Swanson* Analysis of geologic constraints upon human activity and the environmental consequences of such activity. Topics include hillslope processes, fluvial and groundwater processes, earthquake and volcanic hazards, and environmental aspects of deforestation and atmospheric pollution. Prerequisite: either ESS 101, ESS 210, ESS 211, GEOL 101, GEOL 201, or GEOL 205. Offered: jointly with ESS 315; A.

ENVR 341 Energy and Environment (3) NW *Malte* Energy use. Fossil energy conversion. Oil, gas, coal resources. Air impacts. Nuclear energy principles, reactors, fuel cycle. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 114, or PHYS 121. Offered: jointly with M E 341/CHEM E 341; A.

ENVR 350 Independent Fieldwork (1-3, max. 5) Fieldwork, coursework, or other learning experience conducted off-campus, but supervised by UW faculty. 1 academic credit for 30 hours of environment-related work per quarter. Credit/no credit only.

ENVR 360 Environmental Norms in International Politics (5) I&S *Ingebritsen* Surveys development of international environmental consciousness from 1960s to present. Models of "green development"; ways in which norms for resource use have entered global politics. Patterns of state compliance with international environmental agreements, and why states fall short of meeting their international obligations. Offered: jointly with SCAND 350/SIS 350.

ENVR 362 Introduction to Restoration Ecology (5) I&S/NW *Gold* An introduction to ecological restoration of damaged ecosystems. Examines the philosophical base of restoration as well as the social, biological and political forces that impact the success of any restoration project. Includes lectures, readings, case studies and field trips. Offered: jointly with ESRM 362; A.

ENVR 371 Anthropology of Development (5) I&S *Sivaramakrishnan* Development refers to social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ANTH 371.

ENVR 379 Environmental Sociology (5) I&S/NW *Lee* Social processes by which environmental conditions are transformed into environmental problems; scientific claims, popularization of science, issue-framing, problem-amplification, economic opportunism, and institutional sponsorship. Examination of social constructs such as ecosystem, community, and free-market economy. Use of human ecology to assess whether the current framing of environmental problems promotes ecological adaptability. Offered: jointly with ESRM 371/SOC 379; WS.

ENVR 380 Study Abroad: Comparative International Perspectives on Cities and the Environment (15) I&S/NW Interdisciplinary approach to integrating urban and environmental issues in two or more world cities. Includes site visits and interactions with foreign scholars and practitioners. Topics may include coastal development, transportation, parks, marine conservation, indigenous cultures, environmental planning, gentrification, urban governance, and watershed management. Offered: jointly with TEST/T URB 380.

ENVR 384 Global Environmental Politics (5) I&S Examines the globalization of environmental problems, including climate change, ozone depletion, and loss of biodiversity, as well as the globalization of political responses to these problems within the framework of globalization as set of interlinked economic, technological, cultural and political processes. Offered: jointly with POL S 384.

ENVR 415 Sustainability and Design for Environment (3) Cooper Analysis and design of technology systems within the context of the environment, economy, and society. Applies the concepts of resource conservation, pollution prevention, life cycle assessment, and extended product responsibility. Examines the practice, opportunities, and role of engineering, management, and public policy. Offered: jointly with CEE 495/M E 415; S.

ENVR 416 Ethics and Climate Change (5) I&S *Gardiner* Critical examination of the ethical issues surrounding climate change. Prerequisite: either one philosophy or one environmental studies course. Offered: jointly with PHIL 416.

ENVR 418 Communications and the Environment (5) I&S Examines the role of mass media in the resolution of environmental problems. Topics include strengths and weaknesses of media coverage, use of media by environmental groups and government agencies, media effects on public opinion, and mass communication and social movements. Offered: jointly with COM 418.

ENVR 433 Environmental Degradation in the Tropics (5) I&S/NW Considers theories and controversies of environmental degradation in the tropics, ecological and social case studies of Central American rain forests and Southeast

Asian coral reefs, and implications of environmental management techniques. Offered: jointly with SIS 433/SMA 433.

ENVR 439 Attaining a Sustainable Society (1/3, max. 3) I&S/NW *Karr* Discusses diverse environmental issues, the importance of all areas of scholarship to evaluating environmental challenges, and the connections between the past and the future, to reveal integrative approaches to protect the long-term interests of human society. Offered: jointly with FISH 439; A.

ENVR 442 Renewable Energy (4) NW *Malte* Introduction to renewable energy. Principles and practices: solar, wind, water, and biomass energy conversion. Prerequisite: either MATH 112, MATH 124, or Q SCI 291; either CHEM 120, CHEM 142, PHYS 115, or PHYS 122. Offered: jointly with CHEM E 442/M E 442; W.

ENVR 450 Special Topics in Environmental Studies (1-5, max. 15) Format may range from seminar/discussion to formal lectures to laboratory or modeling work.

ENVR 451 Comparative Historical and Social Ecology of the Tropics (5) I&S *Sivaramakrishnan* Historical and social aspects of tropical environmental change. Comparative analysis of resource management, conservation, and environmental regulation issues in Asia, Africa, and Latin America from cultural and political economic perspectives. Special focus on issues of state policy, expert knowledge, social conflict, and international politics. Prerequisite: ANTH 210. Offered: jointly with ANTH 451.

ENVR 459 Culture, Ecology and Politics (5) I&S *Pena* Critical studies of class, gender and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecosocialism, environmental justice, and social ecology. Offered: jointly with ANTH 459.

ENVR 460 Institutionalizing Sustainable Ecological Practices. (5) I&S/NW *Lee* Introduction to how sustainability and conservation are possible. Case studies of successful institutionalization of sustainable ecological functions, including curbside and biosolids recycling, ecological restoration, bioremediation, sustainable wood production, and product certification. Emphasis on individual student projects. Offered: jointly with ESC 460; Sp.

ENVR 462 Restoration Ecology Capstone: Introduction (2) NW First of a three-course capstone sequence in restoration ecology. Students review and assess project plans and installations. Class meets with members of previous capstone classes to review their projects. Offered: jointly with ESRM/TESC/BES 462.

ENVIRO 463 Restoration Ecology Capstone: Proposal and Plan (3) NW Student teams prepare proposals in response to requests for proposals (RFPs) from actual clients. Clients may be governments, non-profit organizations, and others. Upon acceptance of the proposal, teams prepare restoration plans. Prerequisite: ENVIRO 462. Offered: jointly with ESRM/TESC/BES 463.

ENVIRO 464 Restoration Ecology Capstone: Field Site Restoration (5) NW Teams take a restoration plan developed in ESRM 463 and complete the installation. Team participation may

include supervision of volunteers. Teams prepare management guidelines for the client and conduct a training class for their use. Prerequisite: ENVIRO 463. Offered: jointly with ESRM/TESC/BES 464.

ENVR 474 Problem Analysis in Urban Ecology (5) I&S/NW *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with GEOG 486/CFR 474; A.

ENVR 475 Environmental Impacts of Small Scale Societies (5) I&S/NW *Grayson, Smith* Examines the environmental impacts (positive and negative) among prehistoric and historic/ethnographic small-scale (hunter-gatherer and horticultural) societies worldwide, and debates these impacts, within a theoretical framework provided by evolutionary ecology and biogeography. Offered: jointly with BIO A 475.

ENVR 476 Introduction to Environmental Law and Process (3) I&S *Bryant, Hershman* Use and application of key statutes in marine living resources management. Overview of administrative law and process. Basic legal research, reading, and briefing selected judicial opinions. Participatory case study component. Designed for non-law graduate and advanced undergraduate students. Offered: jointly with SMA 476; A.

ENVR 477 Marine Conservation (3) NW *Parrish* Terrestrially based concepts of conservation biology applied to marine systems: human activities affecting the marine environment including fishing and pollution, influence of legal and cultural frameworks, and ecosystem management. Prerequisite: either BIOL 102, BIOL 162, BIOL 180, or BIOL 203. Offered: jointly with BIOL 477; W.

ENVR 478 Topics in Sustainable Fisheries (3, max. 9) Parrish Seminar series featuring local, national and internationally known speakers in fisheries management and conservation. Case studies. Conservation/restoration in practice. Pre-seminar discussion section focusing on select readings. Final paper. Topics may include harvest management, whaling, by-catch, salmon, marine protected areas, introduced species, citizen action, co-management, and marine ethics. Offered: jointly with FISH 478/BIOL 478; odd years; W.

ENVR 480 Marine Resource Conservation and Management (3) I&S/NW *Gallucci, Miller* Techniques and philosophy for conservation, management and development of harvested marine populations. Emphasis on integration of ecological, sociological, and economic dimensions of institutional decision making for policy formation in uncertain environments. Offered: jointly with FISH 480/SMA 480.

ENVR 486 Problem Analysis in Urban Ecology (5) NW *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly

with ESRM 474/GEOG 486/URBDP 443; A.

ENVIR 487 Applied Theory and Methods in Urban Ecology (5) I&S/NW *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: either ENVIR 486, CFR 474, or GEOG 486. Offered: jointly with CFR 475/GEOG 487; W.

ENVIR 488 Research in Urban Ecology (5) I&S/NW *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present results section. Prerequisite: either ENVIR 486, CFR 475, or GEOG 487. Offered: jointly with CFR 476/GEOG 488; Sp.

ENVIR 490 Pre-Capstone Seminar (2) Critique readings on environmental education and applied environmental work. Define a capstone experience based on personal interests and skills and complete a learning contract and a contextual bibliography for ENVIR 491. Recommended: 15 credits of ENVIR 201/202/203. Offered: ASp.

ENVIR 491 Capstone Experience (2-8, max. 8) Capstone experiences, arranged during ENVIR 490, may include internships and other applied

environmental work, directed research on environmental topics, or team efforts. Credit/no credit only. Prerequisite: ENVIR 490. Offered: AWSpS.

ENVIR 492 Post-Capstone Seminar (3) Build writing skills around course readings and discussion. Complete three final products: a capstone analysis paper summarizing and contextualizing work in ENVIR 491; an integrative essay reflecting on personal education; and a formal capstone presentation. Prerequisite: ENVIR 491. Offered: ASP.

ENVIR 498 Independent Study (1-3, max. 5) Independent reading and/or research. Limited to majors and minors in Environmental Studies.

ENVIR 500 Graduate Seminar in Environmental Studies (1-5, max. 15) Exploration of multidisciplinary themes in environmental studies. Topics vary.

ENVIR 501 Graduate Seminar in Environmental Management (1-5, max. 15) Addresses a contemporary interdisciplinary issue in environmental management by integrating the perspectives and theories of science/technology, public policy, and business. Format emphasizes interactive, hands-on approaches to problem solving, with visiting lectures by academic and/or external practitioners.

ENVIR 521 Business Strategy and the Natural Environment (4) Applies economic and business principles (marketing, accounting, operations) to understand interactions between business and

the natural environment and how environmental issues influence business strategy. Theory and case studies explore strategies that both respond to and seek competitive advantage from firms' interactions with the environment.

ENVIR 535 Foresight in Science and Technology: Choices and Consequences (3) Examination of the foresight (or lack of it) with which we practice science and use technology. Contrasts potential risks of various choices with potential benefits. Credit/no credit only. Offered: jointly with PHYS 535/PHIL 501/ZOOL 523.

ENVIR 550 Global Commercialization of Environmental Technologies (4) Students work on faculty-supervised interdisciplinary teams (with students from business, sciences/engineering, and public policy) developing business plans for commercializing environmentally friendly technologies around the world. The projects involve collaborating with the EPA's Environmental Technology Commercialization Center, with Battelle Labs, and with Puget Sound businesses. Offered: jointly with B BUS 550.

ENVIR 585 Climate Impacts on the Pacific Northwest (4) *Mantua, Snover* Knowledge of past/future patterns of climate to improve Pacific Northwest resource management. Topics include: the predictability of natural/human-caused climate changes; past societal reactions to climate impacts on water, fish, forest, and coastal resources; how climate and public policies interact to affect ecosystems and society. Offered: jointly with ATM S/ESS/SMA 585; Sp.

College of Architecture and Urban Planning

Architecture

ARCH 100 Introduction to Architecture Study (8) VLPA Introduces design studio instruction to students contemplating architecture as a field of study of career. Studio projects, informed by workshops, lectures, readings, field trips, and in-studio critiques introduce the history, theory and practice of architecture. Includes instruction in basic design drawing and model making. Offered: S.

ARCH 150 Appreciation of Architecture I (2/3) VLPA Historical survey of the architecture of Western civilization. For nonmajors.

ARCH 151 Appreciation of Architecture II (2/3) VLPA Historical survey of the architecture of Western civilization. For nonmajors.

ARCH 200 Introduction to Environmental Design and Planning (3) I&S/VLPA Lectures, demonstrations introducing basic curricular elements. Development of basic skills in methods and graphic expression of design and planning process-analysis, synthesis, evaluation in building technology; simulation, modeling; person-environment relations; history; theory; policy; professional roles.

ARCH 210 Design Drawing I (4) VLPA *Ching* Projects, lectures, demonstrations, and exercises to develop skill in freehand drawing and an understanding of drawing as a vital means to see, analyze, and represent essential aspects of the visual environment.

ARCH 211 Design Drawing II (4) VLPA *Ching* Projects, lectures, demonstrations, and exercises

to introduce the language of architectural drawing, with emphasis on freehand drawing as the primary means to imagine, explore, and develop design ideas. Prerequisite: ARCH 210.

ARCH 220 Introduction to Architectural Structures (2) Onouye Introduces basic structural behavior and concepts of structural systems. Uses lectures, demonstrations, and testing of student-built projects to examine structural concepts of systems, subsystems, and components in a non-numerical manner. Prerequisite: ARCH 210.

ARCH 251 World Architecture: Non-Western Cultures (3) I&S/VLPA *Prakash* Introduction to historical and contemporary built environments of non-Judeo-Christian civilizations, primarily Hindu, Buddhist, Islamic, and Meso-American, as manifestations of cultural history and as responses to environmental determinants. Offered: Sp.

ARCH 300 Introduction to Architectural Design I (6) Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form.

ARCH 301 Introduction to Architectural Design II (6) Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 300.

ARCH 302 Introduction to Architectural Design III (6) Studio problems to develop awareness, knowledge, and basic skills needed in the synthesis of building form. Prerequisite: ARCH 301.

ARCH 303 Introduction to Design Studio I (6) Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

ARCH 304 Introduction to Design Studio II (6) Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

ARCH 305 Introduction to Design Studio III (6) Studio problems to develop initial awareness, knowledge, and basic skills needed in synthesis of building form and integrative aspects of architectural design with emphasis on the dwelling place. Limited to students entering the graduate program in architecture with baccalaureate degrees in other fields.

ARCH 310 Architectural Design Drawing I (3) Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 303 studio to integrate drawing in all phases of the design process.

ARCH 311 Architectural Design Drawing II (3) Lectures, demonstrations, and exercises to

develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 304 studio to integrate drawing in all phases of the design process.

ARCH 312 Architectural Design Drawing III (3) Lectures, demonstrations, and exercises to develop skill in graphic visualization and representation as used in architecture. Concepts, conventions, and techniques of both freehand and technical drawing are used as a vital means to imagine, develop, and represent design ideas. Course material coordinated with 305 studio to integrate drawing in all phases of the design process.

ARCH 314 Introduction to Architectural Drawing (2) Skill development in conceptualization of forms and their relationships through observation and recording in freehand graphic manner. Proportion, scales, light effect, value, texture, and various perspective techniques.

ARCH 315 Design Drawing III (2) Projects, lectures, demonstrations, and exercises coordinated with studio projects to integrate drawing in all phases of the design process. Lessons in diagramming of design concepts and planning and presenting design solutions. Prerequisite: ARCH 211; corequisite: ARCH 300.

ARCH 316 Design Drawing IV (3) *Zuberbuhler* Lectures, demonstrations, and exercises to develop drawing skills and techniques applicable to architectural design problems. Topics include advanced perspective construction, shade and shadow calculations, descriptive geometry, topographical manipulation, and additional appropriate topics at the request of the class. Prerequisite: ARCH 315.

ARCH 320 Introduction to Structures I (3) Statics — Force analysis; the study of external forces and force systems and their analytical solutions as applied to bodies at rest (equilibrium). Topic areas include beams, trusses, determinate frames, and load tracing.

ARCH 321 Introduction to Structures II (3) Strength of Materials; the study of the properties of materials and cross-sectional shapes of structural elements with respect to their effectiveness in resisting stresses. Topic areas include stress and strain, section properties, analysis and design of beams and columns. Prerequisite: ARCH 320.

ARCH 322 Introduction to Structures III (3) Elementary Structural Design; synthesis of the previous structures coursework with applications to design of determinate timber and steel structures. Examination of forces on buildings; snow, live loads, wind, and earthquake. An introduction to concept of continuity. Prerequisite: ARCH 321.

ARCH 331 Environmental Control Systems (3) *NW Heerwagen, Loveland* Description of thermal comfort needs and the means by which buildings can be designed to satisfy those needs. Consideration of how climate determines building forms, site analysis and planning *vis-a-vis* the local climate, basic heat transfer mechanisms, and design strategies for overcoming heat loss through the building envelope.

ARCH 332 Construction Materials and Assemblies I (3) Lectures and readings pertaining to a survey of residential and light-commercial construction materials, assemblies, and techniques of assembly.

ARCH 350 Architecture of the Ancient World (3) *VLPA* Architectural history in the Western world from beginnings to AD 550.

ARCH 351 Romanesque, Gothic, and Renaissance Architecture (3) *VLPA* Architectural history in the Western world from AD 550 to 1750. Recommended: ARCH 350.

ARCH 352 History of Modern Architecture (3) *VLPA Ochsnr* Architectural history in the Western world from 1750 to the present. Recommended: ARCH 351.

ARCH 360 Introduction to Architectural Theory (3) *I&S/VLPA* Function of architectural theory in comprehending and ordering various human purposes in architecture, types of architectural purpose, and types of theories. Current concerns.

ARCH 380 Computers in Architecture (3) Laboratories, lecture, and demonstrations to introduce computing in environmental design and planning. Offered: ASP.

ARCH 400 Architectural Design IV (6) Offers studio problems in non-residential building design to advance student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 302.

ARCH 401 Architectural Design V (6) Offers studio problems in non-residential building design to advance student's understanding of the ideas and technologies of architecture. Prerequisite: ARCH 400.

ARCH 402 Design/Build Studio (6) Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program requirements specified in case studies. Offered: jointly with CM 402; W.

ARCH 403 Architectural Problems (6)

ARCH 410 Introduction to Architectural Photography (3/5) *VLPA Stamets* Basic elements and processes of architectural photography to include camera controls, exposure technique, photo processing, and fundamental principles of photographing architecture. Student must provide own 35 mm (or larger) camera with manual operating controls. Offered: AWS.

ARCH 412 Architectural Illustration and Presentation (3) Issues, conventions, and techniques used in architectural renderings, including line drawings, shaded drawings, use of color, composition, organization, advanced perspective, scale figures, entourage, reflections, and media. Prerequisite: ARCH 315.

ARCH 413 Architectural Photography Projects (3) Students develop in-depth photo essays relating to architecture, the urban movement, or landscape design following the principles introduced in ARCH 313. Lectures, seminar, and discussion. Prerequisite: ARCH 313.

ARCH 415 Architectural Sketching (3) Exercises in freehand representational drawing

using charcoal, graphite, and conte crayon with emphasis on line, proportion, values, and composition. Studies progress from geometric to nongeometric forms. Recommended: either ARCH 210 or ART 104.

ARCH 416 Freehand Drawing and the Digital Realm (3) *VLPA Stevens* Explores the potential role of freehand drawing in digital media. Students use stylus and tablet to draw in print and photo-imaging programs, combining the flexibility of digital tools with the rich traditions of freehand drawing. Focus alternates between Internet as context for image making and printed output. Offered: AW.

ARCH 417 Advanced Topics in Digital Drawing (3) *VLPA Stevens* Provides a context for developing an individual project exploring drawing or painting in digital media. Explores advanced issues in digital image creation and production through a book, film, or Web project. Each student completes and publishes a project during the quarter. Prerequisite: ARCH 416. Offered: Sp.

ARCH 418 Watercolor Drawing (3) Introduction to the principles and practice of using transparent watercolor for the naturalistic representation of objects, people, and interior and exterior space. Recommended: either ARCH 210 or ART 104.

ARCH 420 Structural Design I (4) NW Reinforced concrete fundamentals; establishes basics of reinforced concrete behavior and introduces methods of design used in current engineering practice. Basic mechanics of structural concrete introduced in examining bending, shear, and axial forces. Topic areas include beams, slabs systems, columns, foundations, retaining walls, and an introduction to prestressed concrete. Prerequisite: ARCH 322.

ARCH 421 Structural Design II (4) Design of steel structures.

ARCH 422 Structural Design III (4) Design of reinforced concrete structures.

ARCH 426 Structural Unit Masonry (3) *Lebert* Structural behavior and design of reinforced brick, tile, and unit masonry structures. Prerequisite: CEE 381. Offered: jointly with CEE 455.

ARCH 430 Materials and Processes (3) *Vanags* Lectures, field trips, and laboratory sessions directed toward the nature, potentials, and limitations of a variety of materials (wood, metal, plastics, inorganic cementing materials, minerals, rocks, and clay) and the processes involved with their production, fabrication, and system compatibility.

ARCH 431 Environmental Control Principles (3) *Heerwagen* Daylighting of buildings, reducing noise and enhancing sound for communication, and regulating heat transfer for occupant thermal comfort; description of passive means for environmental control, including presentation of scientific explanations and design guidelines for utilizing these means; design guidelines are intended for use in the preliminary schematic design phase. Offered: AW.

ARCH 432 Construction Materials and Assemblies II (3) Lectures and readings pertaining to a survey of materials, assemblies, and techniques of assembly of concrete and

steel frame, commercial exterior envelope, and interior partitioning building constructions systems. Prerequisite: either ARCH 400 or CM 313.

ARCH 433 Active Control Systems for Building Operation (3) NW Heerwagen Electrical, mechanical (HVAC), plumbing, and fire safety systems for buildings. Descriptions of what these systems do, where they are used, how they are integrated into the overall building design; rules of thumb, design strategies, and short cuts for anticipating system design and use. Prerequisite: either ARCH 331 or ARCH 431.

ARCH 434 Color and Light (3) Lectures, demonstrations, exercises, and projects focusing on the use of color applied to the three-dimensional architectural context. Color theory is explored with the multiple effects of changing light.

ARCH 435 Principles and Practices of Environmental Lighting (3) Millet Perception-based approach to principles of natural and artificial lighting. Practical considerations of lighting involving environmental evaluations, calculations and the use of lamps and fixtures. Sketch and model studies for applications. Impact of lighting design on energy conservation. Relation of lighting design process to architectural design concepts. Prerequisite: either ARCH 331 or ARCH 431.

ARCH 436 Building Acoustics (3) NW Heerwagen Description of principles and practices for manipulating and enhancing sound in buildings. Information about sound behavior and the organization of architectural elements (deployment of design features, including various geometries and materials) for the control of sound in enclosed spaces and between adjacent spaces.

ARCH 437 Passive Thermal Controls (3) NW Heerwagen Devices for achieving energy-efficient buildings, analytic methods for evaluating likely thermal performances of buildings and building envelopes, resistance and capacitance of building materials, air flow through and around buildings, energy codes and industry standards, and strategies for integrating analytic techniques and guidelines into the architectural design process. Prerequisite: either ARCH 331 or ARCH 431.

ARCH 439 Light Frame Building Assemblies (3) Vanags Fundamentals of light-frame construction from soils examination, foundation systems to framing systems, and the integration of electrical, plumbing, and heating/cooling into the structure. Prerequisite: either ARCH 332 or CM 313.

ARCH 442 Africa and Middle East Seminar (3) VLPA McLaren Advanced introduction to colonial and postcolonial architecture in Africa and the Middle East, beginning with the initial European colonization in the mid-19th century. Provides a historical understanding of the formation of distinctive regional and/or national identities in the architecture of these regions. Offered: Sp.

ARCH 443 Iberoamerican Architecture I: Meso-America (3) VLPA Advanced introduction to precolombian, colonial, and postcolonial architecture and urbanism of Mexico and Meso-America. Using methodologies drawn from culture studies, covers approximately four distinct periods spanning from Teotihuacan to the late twentieth century.

ARCH 444 Iberoamerican Architecture II (3) VLPA Advanced introduction to postcolonial and modern architecture and urbanism of the Iberian peninsula and Latin America. Using methodologies drawn from culture studies, covers the cultures of Spain, Portugal, and Latin America after the period of colonialization and the nature of their continued relationship.

ARCH 445 South Asian Architecture I (3) VLPA Prakash Advanced introduction to precolonial architecture and urbanism of South Asia. Using methodologies of culture studies, examines select Hindu, Buddhist, and Islamic case studies on a comparative genealogy.

ARCH 446 South Asian Architecture II (3) VLPA Prakash Advanced introduction to colonial and postcolonial architecture and urbanism of South Asia. Using methodologies of culture studies, covers 1800 to present, emphasizing the past 50 years since India's independence in 1947.

ARCH 447 Universal Design (3) I&S Addresses implications of recent social trends and legislation (e.g., American with Disabilities Act, extended lifespan, elimination of mandatory retirement, changing workforce) on design; emphasizes importance of integrating accessibility design concepts, including related laws and codes, into diverse design projects, in order to make environment usable by broad cross-section of people. Offered: A.

ARCH 450 Modern Architecture and the Decorative Arts (3) VLPA Anderson History/theory seminar investigates parallel and interactive developments in European architecture and the decorative arts from 1870 to 1930. Examines the production of designers as well as the economic, political, and cultural circumstances that affected their work.

ARCH 451 Traditional Chinese Architecture and Gardens (3) I&S/VLPA Introduction to Chinese architecture (palaces, homes, temples, tombs), urban planning, and gardens; each area examined in terms of techniques of production, visual styles, historical development, and relationship to traditional Chinese cultural values. Recommended: some background in Chinese art, history, language, or literature.

ARCH 452 History of Architecture in Seattle and Environs (3) I&S Ochsner Historical development of architectural in Seattle and surrounding areas from the nineteenth century to the present, also touching on issues of urban design and historic preservation.

ARCH 453 Japanese Architecture (3) VLPA Survey of Japanese architecture from its origins to modern times. Although Shinto architecture, tea houses, gardens, and modern developments are discussed, the primary focus is on the development of Japanese Buddhist architecture. Offered: jointly with ART H 419.

ARCH 454 Greek Architecture (3) VLPA Detailed study of Greek architecture from its beginnings, with special emphasis on the Periclean building program in fifth-century Athens. Offered: jointly with ART H 446/CL AR 446.

ARCH 455 Special Studies in Gothic Art and Architecture (3) VLPA Detailed study of Gothic architecture and its accompanying sculpture and stained glass, with special emphasis on the twelfth and thirteenth centuries in France and

England. Offered: jointly with ART H 455.

ARCH 456 Nineteenth-Century Architecture (3) VLPA Clausen From late eighteenth-century French rationalists, Neoclassicists, to *fin de siècle* Vienna and Paris. Includes theorists such as Ruskin, Viollet-le-Duc, and Semper; major movements, such as the Arts and Crafts, and the French Ecole des Beaux-Arts method of design. Offered: jointly with ART H 490.

ARCH 457 Twentieth-Century Architecture (3) VLPA Clausen Architecture in the twentieth century, mainly in Europe and the United States. Traces roots of Modernism in Europe in the 1920s, its demise (largely in the United States) in the 1960s and recent trends such as Post-Modernism and Deconstructivism. Offered: jointly with ART H 491.

ARCH 459 Architecture Since 1945 (3) VLPA Clausen Theories and forms in architecture from the end of World War II to present. Includes new wave Japanese architects, recent Native-American developments, and non-Western as well as Western trends. Offered: jointly with ART H 493.

ARCH 460 Design Theory and Analysis (3) I&S/VLPA Dee, Seligmann Problematical nature of philosophies of architecture; interaction of philosophical concepts and architectural form and expression. Fundamentals of architectural criticism.

ARCH 461 Recent Developments in Architectural Theory (3) I&S/VLPA Concentrates particularly on developments that spring from recent work in the epistemology of science and in philosophy.

ARCH 462 Spatial Composition in Architecture (3) Advanced introduction to compositional strategies in architecture. Drawing on a historical survey of the development of Western Architecture, the seminar investigates different compositional strategies and their relationship to cultural values and systems of meaning. Intended as complement to the design studio.

ARCH 463 Theories of Representation (3) Anderson Seminar focusing on the development of representational techniques in western architecture from antiquity to the present which seeks to discover how these techniques have affected the realization and interpretation of architecture. Prerequisite: ARCH 350; ARCH 351; ARCH 352.

ARCH 475 Residential Architectural Practice (3) Lectures and exercises focused on the operation of a professional architectural practice specializing in residential and smaller-scale projects. Topics include: clients and program development, design strategies and space planning, site considerations, regulatory constraints, consultants, contractors, specialized construction methodology, and issues, ethics, and liability specific to residential project delivery.

ARCH 476 Design and the Uniform Building Code (3) Lectures, case studies, and exercises to provide a detailed review of non-structural sections of the Uniform Building Code (UBC) including designer responsibility, code background, purpose, and requirements based on occupancy, construction type, and building design features. Prerequisite: either ARCH 302 or CM 313.

ARCH 478 CAD and Working Drawings (4)

Intensive introduction to computer-aided design systems for developing construction documentation (working drawings). Lectures and exercises focus on learning the methodology for using CAD to efficiently prepare working drawings, as well as discussions regarding industry recognized standards and current technology used in the preparation of documentation. Prerequisite: ARCH 380; CM 313. Offered: ASpS.

ARCH 481 3D Modeling and Rendering (3)

Johnson Lectures and weekly exercises focus on understanding and applying the underlying principles of 3D computer graphics and rendering software. Topics include user-interface, data creation and modeling, lighting models, smoothing, texture mapping, ray tracing, radiosity, animation, and solid modeling. Prerequisite: ARCH 380. Offered: ASp.

ARCH 482 Web Weaving (3) *Gross, B. Johnson*

Examines the function, limitations, and uses of primary World Wide Web technologies and fundamental Web site design and implementation. Participants develop hands-on design/build expertise for Web site design, implementation, and maintenance using readily available tools and techniques. Looks beyond today and explores emerging Internet technologies. Offered: A.

ARCH 483 Design of Virtual Environments (3)

Explores through a blend of technical exercises constructing computational artifacts, readings, and discussions of relevant literature, the possibilities of online virtual environments. Incorporates a term project or paper based on exercises and readings. Offered: W.

ARCH 484 Design Computing Seminar (3)

Weekly colloquium and discussion forum. Discusses design computing research and report on ongoing project progress, with demonstrations and guest speakers. Explores design computing, design thinking and design process, and inventing new computer aided tools for design. Offered: W.

ARCH 485 Digital Craft Workshop: Advanced Projects in CAD (3) Advanced topics for students who have completed one or more design computing courses and wish to develop a project further. Offered: W.

ARCH 486 Computer Graphics Programming for Design (3)

Introduction to fundamental concepts of computer programming for design applications with an emphasis on interactive graphics. Basic control and data structures for interactive graphics programming; weekly exercises with term project. Significant lab time required. Offered: ASp.

ARCH 488 American Architecture (3) VLPA

Clausen American architecture from indigenous native American traditions to the present. Offered: jointly with ART H 488.

ARCH 493 Rome Preparation Seminar (2)

Seminar dealing with history, culture, topography, and customs of Rome, Italy. Required for students enrolling in ARCH 495, ARCH 496, or ARCH 497.

ARCH 495 Architectural Studies Abroad (9)

Urban history and development of the city of Rome through first-hand studies of its topography and morphology. City's more recent quarters become subject of group research relative to problems and potentials of growth and future

development. Students may be registered concurrently in an appropriate studio section. Prerequisite: ARCH 493.

ARCH 496 Architectural Studies Abroad (9)

Studio-oriented projects and application of experience gained during preceding program. Seminars held in collaboration with Italian students, professionals, and educators. Prerequisite: ARCH 495.

ARCH 497 Italian Hilltowns (9) I&S/VLPA

Introduction to origins and development of built forms prevalent in the hilltowns of central Italy, a comparative analysis of domestic architecture in the agricultural context of the confluence zone of Tuscany, Umbria, and Latium and a historical survey of fortresses, castles, palaces, villas, and gardens of upper Latium. Prerequisite: ARCH 493.

ARCH 498 Special Projects (1-12, max. 12)

Instructor-initiated and department-approved systematic study and offering of specialized subject matter. Topics vary and are announced in preceding quarter.

ARCH 499 Undergraduate Research (1-6, max. 6) .**ARCH 500 Architectural Design Studio I(6)**

Architectural design, with emphasis on development of professional skills in design synthesis; specifically the design of institutional buildings in response to a context that is significant for historical and urban characteristics. Analysis includes programming, typology, site and place, and influence of regulatory measures on building form. Concurrent with ARCH 590. Offered: A.

ARCH 501 Architectural Design Studio II(6)

Architectural design, with emphasis on development of professional skills in design synthesis, specifically, the unique qualities of materials, construction technology, and assembly details in the expression of architectural ideas. Analysis includes the influence of regulatory measures on building form. Concurrent with ARCH 570. Offered: W.

ARCH 502 Architectural Design Studio III (6)

Architectural design, with emphasis on development of professional skills in design synthesis, specifically the comprehensive integration of building systems within an ordered design concept. Analysis includes the planning and integration of structural systems, building service systems, and building envelope design as an appropriate architectural expression. Concurrent with ARCH 530. Offered: Sp.

ARCH 503 Architectural Design Studio Options (6)

Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

ARCH 504 Architectural Design Studio Options (6)

Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants, and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

ARCH 505 Architectural Design Studio Options (6)

Advanced architectural studios in general architectural design, in special projects examining particular architectural determinants,

and in architectural research. Focus and format vary with instructor. Prerequisite: ARCH 502.

ARCH 506 Advanced Architectural Studies (6)

Advanced experimental studies dealing with significant architectural relationships that involve scholarly investigation, development, and presentation of results.

ARCH 520 Advanced Wood Structures Design (3)

Design methods related to wood structures. Nature of wood as a building material, plywood, glued laminated wood structures, timber piles and pile foundations, pole buildings, and conventional wood building framing.

ARCH 529 Seminar in American Architecture (5)

Clausen Topics vary. Offered: jointly with ART H 592.

ARCH 530 Integrated Building Systems (3)

Miller Discusses strategies for ordering separate and discreet building systems into integrated architectural schemes. Focuses on systems that affect architectural expression and resolution in buildings including: structural, environmental control, materials, and assembly with an emphasis on sustainable building design. Concurrent with ARCH 502. Offered: SP.

ARCH 535 Graduate Seminar: Study Topics in Environmental Lighting (3) Focus on individual student projects involving research and design for lighting.

ARCH 540 Evolution and Aesthetics (3)

Exploration of new views toward the theory and philosophy of architectural aesthetics in which responses are seen as driven, in part, by predilections contributive to biological survival and evolution.

ARCH 551 Scandinavian Architecture of the Nineteenth and Twentieth Centuries (3)

Introduction to the contribution of Scandinavian architecture to early functionalism with emphasis on its relationship to neoclassicism and vernacular architecture.

ARCH 553 Special Studies in Architecture in the Ancient World (3) Study and critical analysis of a selected topic from classical or preclassical periods. Prerequisite: ARCH 350.

ARCH 554 Special Studies in Modern Architecture (3)

Study and critical analysis of a selected number of distinguished professionals (architects, planners, educators, critics) and their contributions to the evolution of modern and contemporary architectural practice and thought.

ARCH 556 The Arts & Crafts Movement and American Architecture (3)

Ochsner Historical development of the arts and crafts movement focusing primarily on its influence on American architecture from 1870 to the present.

ARCH 557 Neoclassicism and Romanticism in Europe and America (3)

Study and critical investigation of European and American architecture and urban design from 1750 to 1850.

ARCH 558 Seminar in Twentieth-Century Architecture (3/5)

Clausen Specific focus changes from quarter to quarter. Prerequisite: graduate standing with background in architecture, architectural history, or permission of instructor. Offered: jointly with ART H 591.

ARCH 559 American Utilitarian Architecture (3) Significant American environmental design efforts arising from utilitarian needs, e.g., factories, bridges, skyscrapers, and associated technical building innovations.

ARCH 560 Graduate Seminar on Architectural Theories (3) *Dee, Seligmann* Recent developments in architectural theory, urban design theory, criticism, and the methodology of criticism.

ARCH 561 Urban Design Theory (3) Study of development of nineteenth- and twentieth-century urban design theories and parallel developments in architecture and urban planning. Theoretical premises are related to current practices of urban design in various sociopolitical contexts, European as well as American. Evolutionary nature of theory emphasized. Prerequisite: URBDP 479 or permission of instructor.

ARCH 562 Regionalism (3) Exploration of design ideas that address the cultivation of regional character by acknowledging the commonplace, including both the landscape and its buildings. The many disruptive forces that threaten the possibilities of local culture are also considered from a political, social, and economic point of view.

ARCH 563 Graduate Seminar in Architecture and Cultural Theory (3) Study of contemporary cultural studies and postcolonial writings in terms of their impact on architectural theory and practice. Topical seminar based on reading and individual research. Offered: W.

ARCH 570 Design Development (3) *Miller* Lectures and case studies emphasizing the design development phase of architectural practice.

ARCH 571 Project Feasibility (3) Social, political, and economic factors affecting the location, design, financing, construction, and marketing of buildings.

ARCH 572 Specifications and Contracts (3) Detailed organization and composition of contracts, specifications, and related contract documents.

ARCH 573 Professional Practice (3) *Rees* Operation of an architectural office and professional practice.

ARCH 574 Design and Construction Law (3) Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington state law. Offered: jointly with CM 500.

ARCH 576 Community Leadership Practices (4) *Sutton* Examines how to facilitate community design processes. Explores theories and methods of participation and applies them to creating community visioning tools. These tools are put to use during the spring charrette when city officials, neighborhood residents, K-12 students, and others create a shared vision for their community. Offered: W.

ARCH 577 Ethical Practice (3) *Sutton* Helps students develop ethical reasoning skills. Examines the sociology of professional practice

leading to and understanding of the dilemmas associated with serving a diverse society. Reviews exemplary case studies in ethical practice. Communication skills developed through writing and dialogue, and creation of an exhibit exploring an ethical issue. Offered: W.

ARCH 578 Case Studies in Contemporary Architectural Practice (3) Presentations and discussions by local architectural firms examining the issues that influence building design and project delivery in contemporary architectural practice. Focuses on understanding the issues as opportunities rather than impediments to good design. Class visits a different architectural firm each week for an in-depth review of current projects.

ARCH 581 Historic Preservation of Architecture, USA (3) American achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

ARCH 582 Technical Issues in Preservation Design (3) Issues, practices, and procedures involved in preservation and reuse of old and historic buildings. Technical and esthetic means by which practicing professionals approach the analysis, interpretation, and resolution of problems such work raises. Emphasis on recent and local projects and related experiences.

ARCH 583 History of Historic Preservation in Europe (3) European achievements in historic preservation and restoration of architecture. Prerequisite: specialization in preservation design or permission of instructor.

ARCH 587 Theory of Design Computing (3) Examines the relationship between theory of design and computational tools for practice. Explores how the emergence of computers as a mainstream tool in design has already changed architectural practice. Discusses how, as with other technologies that revolutionized the practice of architecture, information technologies carry hidden implications about design process and products. Offered: A.

ARCH 588 Research Practice (3) Provides the opportunity for a guided preliminary exploration and refinement of a research topic, prior to thesis proposal. Weekly seminar meetings focus on student work with regular presentations and discussions. Offered: W.

ARCH 590 Urban and Preservation Issues in Design (3) Introduction to recent theory and practice in the fields of urban design and historic preservation primarily in North American urban contexts, including examples of recent projects presented by practicing professionals.

ARCH 591 Architecture in the Landscape (3) Advanced introduction to the relationships between buildings and places in the landscape with an emphasis on western concepts of nature. A taxonomy of place as nature is developed. Ways in which the architect can design places that landscape taxonomy are explored.

ARCH 593 Residential Design: Methods and Practices (3) Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods, and practices. Offered: jointly with URBDP 574.

ARCH 595 Master's Thesis Studio and Pre-Design (3) Preparation of master's design thesis pre-design document within a structured, faculty supervised setting. Student product covers programming; site analysis; land use, building, and accessibility code compliance; building systems selection (material, structural, and mechanical); cost implications; conceptual approach and schematic design exploration. Required for admission to the master's thesis design studio. Offered: AW.

ARCH 596 Fieldwork in Professional Practice (*, max. 9) On-location study under the supervision of a practicing professional involved in an aspect of environmental design.

ARCH 598 Special Topics for Graduate Students (1-6, max. 6) Systematic study and offering of specialized subject matter. Topics vary and are announced in the preceding quarter. May be repeated for credit.

ARCH 599 Thesis Preparation (3) Explores development of a proposal for thesis-level research. Participants identify a research area, find relevant literature and prepare an annotated bibliography, articulate a specific question within the research area, and write, present, and defend a proposal. Participants may use this course to develop a thesis proposal. Offered: Sp.

ARCH 600 Independent Study or Research (*) Credit/no credit only.

ARCH 700 Master's Thesis (*) Credit/no credit only.

Built Environment

B E 550 Colloquium-Practicum on Research-Practice and Teaching-Learning (1, max. 6) A synthetic and interdisciplinary forum for the presentation and peer critique of faculty and student research and practice projects, and a venue for pedagogical issues and skills for effective teaching and learning.

B E 551 The Contemporary Built Environment (3) Covers major or landmark cases of complex built environment projects, emphasizing the multiple dimensions involved and their interconnections.

B E 552 Theories of Knowledge and the Built Environment (3) Systematic examination of alternative epistemological frameworks applicable to studying the built environment; examinations of their differences and similarities and of the possibility of a comprehensive, pluralistic approach.

B E 553 Ethics in Practice, Research, and Teaching (3) Preparation for ethical challenges facing professional practice, research, and teaching in the built environment. Coverage of general and professional ethics, and examination of principles and rules and application through case studies.

B E 598 Special Topics (1-6, max. 15) Systematic study of specialized subject matter. Topics vary depending on current interest and needs, and are announced in the preceding quarter.

B E 800 Doctoral Dissertation (*, max. 30) Credit/no credit only. Offered: AWSpS.

College of Architecture and Urban Planning

CAUP 496 Practical Experience (3-6, max. 6)
Credit/no credit only.

CAUP 498 Special Projects (1-12, max. 12) .

Community and Environmental Planning

CEP 200 Introduction to Community and Environmental Planning (5) I&S *Purcell*
Introduction to central themes of major.

Opportunities to engage in community action and planning process, while developing ecological literacy. Lectures, discussions, and critical writing exercises combine to increase knowledge and interest in these fields. Emphasis on developing community of learners in and out of classroom setting. Offered: A/SpS.

CEP 220 Field Studies in Community and Environmental Planning (5) I&S/VLPA *Ryan*
Field studies building on theories and practices introduced in CEP 120. Emphasis on collaborative practice of research and design in public realm with complex and often conflicting objectives, positions, and meanings. Regional inquiry of cultural landscape and design. Tools for understanding place and shaping future change. Offered: A.

CEP 301 The Idea of Community (5) I&S
Theories of community and communal rights and responsibilities. Experience building a learning community within major. Explores struggles for community in every sector of life. Witness essentials of community through service and field experiences, students construct individual curriculum and learning plans for major, selecting cross-disciplinary work. Credit/no credit only. Offered: A.

CEP 302 Environmental Response (5) I&S/NW
Explores issues of environmental crisis and societal responses. Readings and reflective analysis from broad selection of authoritative sources to develop grounded perspective in ecological literacy and consciousness. Concurrently, experiential education in challenges and practical responses to building sustainable society through participation in community-based environmental effort. Credit/no credit only. Offered: W.

CEP 303 Social Structures and Processes (5) I&S
Investigates use of formal and informal social structures and processes within context of community and environment. Looks culturally at patterns and institutions of social organization and relationships among different sectors. Issues of interrelatedness, citizenship, knowledge, and communication. Participation in local community service organization. Credit/no credit only. Offered: Sp.

CEP 446 Internship (5, max. 10) Connects core and individual courses with field work. Group and individual readings develop understanding of how students' internships and field placements constitute particular element of community and environmental planning. Explores how what we do for a living is part of our lives as citizens and public service. Credit/no credit only. Offered: A/WSp.

CEP 460 Planning in Context (5) I&S Examines theory against backdrop of practice for broad,

historical understanding of social, political, environmental planning. Critique from viewpoints, e.g., planning history, ethics, ecofeminism, environmental justice, class and capitalism, planning and global economy. Develop personalized history reflecting individual experience, professional experience, and philosophical heritage of planning profession. Credit/no credit only. Offered: A.

CEP 461 Ethics and Identity (5) I&S Examination of personal, societal, vocational, environmental, planning ethics. Readings and discourse on ethical foundations for public life. Individual and group readings on values, human potential. Develops understanding of ecological context, moral responsibility, self-awareness. Constructs positive, diverse view of humanity, environment regardless of race, gender, ethnicity, beliefs. Credit/no credit only. Offered: W.

CEP 462 Community and Environment (5) I&S
Capstone quarter merges core seminars, disciplinary courses in major, community field experiences for mastery of personal knowledge and skills. Reflection and synthesis of themes in major; engagement with contemporary issues. Compares theoretical definitions of community and environment with individual philosophies and knowledge within thoughtful, applied context. Credit/no credit only. Offered: Sp.

CEP 479 Planning and Development in the Puget Sound Region (3-12, max. 12) I&S *Coiffey, Dierwechter, Ryan*
A field-based course focusing on the Seattle-Tacoma urban region. Examines the problems and prospects associated with rapid growth through site visits and discussions with public officials, planners, and developers. Topics/sites vary and include such issues as growth management, sprawl, transportation, sustainable development, land use, and environmental protection. Offered: jointly with T URB 479;A/WS/SpS.

CEP 498 Special Topics (1-9, max. 15) I&S
Systematic study of specialized subject matter.

CEP 499 Undergraduate Independent Study or Research (1-5, max. 10) Individual reading, research, fieldwork, other special project approved and supervised by faculty adviser most appropriate for the project proposed. Report on the purposes, procedures, and results of study is required. Credit/no credit only. Offered: A/WS/SpS.

Construction Management

CM 250 Construction and Culture (3) I&S *Rolfe*
Study of the evolution of modern building construction with emphasis on the relationship between the projects that have been built over time and the people who built them. Focuses on the development of building technology, equipment, and materials used by Western civilizations. Offered: Sp.

CM 310 Introduction to the Construction Industry (3) *Schaeffelberger*
Introduction to the construction process, including general overview of organization, relationships, practices, terminology, project types, procurement methods, industry standards, contract documents, and career opportunities. Offered: A.

CM 311 Construction Documents (2)
Introduction to construction plans and specifications with emphasis on reading and interpreting them. Focuses on architectural/engineering drawings and associated specifications used in

building construction. Prerequisite: CM 310; CM 313, which may be taken concurrently. Offered: A.

CM 312 Construction Accounting (3) *Goldblatt*
Introduction to accounting for the contractor, placing emphasis on the analysis and use of financial statements and a job cost accounting system. Open to nonmajors on space-available basis. Offered: A.

CM 313 Construction Methods and Materials I (4)
Introduction to basic building materials, with emphasis on techniques for assembly and utilization in residential and light construction, including materials such as concrete, brick, and wood. Offered: AS.

CM 320 Construction Contract Documents (3)
Introduction to working drawings, specifications, and other documents designed to enable the student to read and interpret complete set of contract documents for residential and light commercial projects. Emphasis on the organization and uses of architectural/engineering drawings and specifications in the construction process. Offered: WS.

CM 321 Mechanical Systems in Buildings (3)
Introduction to building heating, cooling, plumbing, and fire protection systems including aspects of design, construction, estimating, and problem solving. Offered: W.

CM 322 Electrical Systems in Buildings (3)
Introduction to electrical construction including electrical distribution from generation to consumption, terminology, equipment and applications, electrical contract documents and estimating, and electrical project management theory and practice. Offered: W.

CM 323 Construction Methods and Materials II (5)
Analysis of building methods for structural, non-structural, and design and use of temporary structures including method selection, sequencing, and coordination of specialty trades in commercial and industrial construction. Offered: W.

CM 331 Construction Estimating I (4) *Abdel-Aziz*
Introduction to the principles and techniques of estimating construction costs, with emphasis on quantity take-off and pricing elements of work. Offered: Sp.

CM 332 Construction Equipment Management (3) *Schaeffelberger*
Study of the basic principles, practices, and techniques used in the construction industry for selecting and managing construction equipment. Focuses on understanding the time value of money, estimating equipment ownership and operating costs, selecting the proper equipment for specific construction tasks, and estimating equipment production. Offered: Sp.

CM 333 Construction Safety (3)
Explanation of requirements of the Occupational Safety and Health Act and other related federal and state legislation as applied to the building construction industry. Standards for accident prevention, hazard identification, and responsibility for compliance emphasized. Offered: A.

CM 334 Construction Surveying (2) *Jacobson*
Introduction to construction surveying including layout of construction features, distance and elevation measurement, and use and care of surveying equipment. Offered: Sp.

CM 350 History of Building (3) *Rolfe* Historical survey of building techniques and materials as conditioned by environment, technical, economic, and social influences. Open to nonmajors. Offered: Sp.

CM 402 Design/Build Studio (6) Study of the design/build process with emphasis on the synthesis of design and construction considerations. Focuses on developing design and construction concepts to meet program requirements specified in case studies. Offered: jointly with ARCH 402; W.

CM 410 Construction Estimating II (5) *Rojas* Principles and techniques for estimating commercial construction projects including a mock bid day exercise on a commercial construction project. Offered: A.

CM 411 Project Planning and Control (3) *Pace* Introduction to the basic principles, techniques, and practices used as tools by contractors to plan, schedule, and control costs on building construction projects. Offered: A.

CM 412 Construction Practice (3) *Rojas* Introduction to challenges of managing a construction organization. Focuses on ethical behavior, organizational behavior, human resources management, marketing, financial management, and risk management. Offered: Sp.

CM 413 Competitive Business Presentations (1) *Schaufelberger* Study and development of skills needed to develop and deliver professional construction management presentations. Includes a series of workshops and practical exercises in construction presentation skills, teamwork, and leadership. Offered: A.

CM 415 Heavy Construction Practices (3) *Schaufelberger* Introduction to heavy construction with emphasis on highway and bridge construction. Topics include: contract analysis, work breakdown, equipment selection, unit-price cost estimating, site logistics planning, and project scheduling. Offered: A.

CM 420 Temporary Structures (3) *Nemati* Study of temporary structures used to support construction operations such as concrete formwork, scaffolding systems, shoring systems, cofferdams, underpinning, slurry walls, and construction dewatering systems. Offered: Sp.

CM 421 Project Management I (3) Introduction to the organization, management, and administrative functions on construction projects including a hands-on and extensive case study of a commercial construction project, cost control, and introduction to the concepts of Value Engineering, partnering, and Total Quality Management. Offered: W.

CM 422 Computer Applications in Construction (2) Introduction to the use of automated programs for planning, scheduling, and controlling construction projects. Focuses on the use of Primavera Project Planner software. Offered: A.

CM 423 Construction Law (3) *Goldblatt* Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Washington state law is emphasized. Entry code

required. Open to nonmajors on space-available basis. Offered: Sp.

CM 425 Concrete Technology (3) *Nemati* Introduction to the properties and behavior of concrete. Focuses on uses of concrete as a building material and new techniques for concrete construction. Offered: W.

CM 431 Project Management II (5) Capstone project using case studies to apply skills, knowledge, techniques, and concepts developed in prior courses. Emphasis on the concept of integrated project management, including cost estimating and bidding, scheduling, cost control, safety, project organization, and documentation. Offered: Sp.

CM 432 Soils and Foundations (3) *Daniali* Origin, classification, and physical properties of soil as used in engineering and construction applications, together with loads and stresses of soil on, and from, the more common types of engineering structures. Offered: AS.

CM 433 Construction Labor Relations (3) *Goldblatt* Introduction to construction labor topics, including labor-management organization, legislation, and regulation, collective bargaining, and job site administration. Offered: W.

CM 454 Real Estate Finance (4) *Rolfe* Introduction to financing and appraisal of real estate projects, including a survey of capital markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Offered: W.

CM 455 Real Estate Development (5) *Rolfe* Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Offered: A.

CM 456 Real Estate Investments (5) *Rolfe* Analysis of private and public real estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in 453, 454, and 455. Prerequisite: either CM 454 or CM 455. Offered: Sp.

CM 481 Facility Life Cycle 1: Planning (3) Introduction to facility management. First in sequence of three built around the principle of the facility life cycle. Defines key terms. Examines topics such as ethics, business context, budgets, cost analysis, and strategic planning. Students work in online teams to develop a course-final project.

CM 482 Facility Life Cycle 2: Design and Construction (5) Second in sequence of three built around the principle of the facility life cycle. Covers design basics, cost estimates, building materials, project management, and construction administration. Students establish a mentor relationship with a professional facility manager and interview three guest speakers, experts in their fields.

CM 483 Facility Life Cycle 3: Relocation and Operational Issues (4) Final in sequence of three built around the principle of the facility life cycle. Provides an overview of issues related to facility operations and maintenance, including occupancy and start up, inventory and staff management, relocation, disaster planning, emergency preparedness, and security.

CM 485 Facility Management Studio (6) Applies skills learned through the three facility life cycle courses to the completion of a project that demonstrates the ability to identify and resolve facility management issues. Students are matched with a client in their region.

CM 498 Special Topics (1-10, max. 20) .

CM 499 Undergraduate Research (*, max. 12) Individual or small-group studies in which students may select topics with approval of faculty sponsor and department.

CM 500 Design and Construction Law (3) *Goldblatt* Legal issues arising from design and construction services, focusing on risk management and liability awareness. Topical areas include basic legal doctrines, the design professional/client relationship, contractor selection, the construction process, and professional practice problems. Emphasis on Washington state law. Offered: jointly with ARCH 574. Offered: Sp.

CM 505 Advanced Integrated Computer Applications (3) *Rojas* Study of management information systems used in the construction industry. Emphasis on the utilization of current state-of-the-art integration of Computer Aided Design (CAD), scheduling (including advanced concepts such as resource leveling, schedule compression, and cash flow projections), and estimating programs. Offered: S.

CM 510 Advanced Construction Techniques (3) *Nemati* Study of techniques and practices used in complex construction projects, including industrial and high-rise structures, building renovation, and tenant improvements. Offered: A.

CM 515 Innovative Project Management Concepts (3) *Abdel-Aziz* Study of the process for delivery of public-private infrastructure projects and risk analysis techniques used in economic/financial project studies. Focuses on understanding public-private project delivery systems, feasibility studies, project financial and economic modeling, and quantitative risk analysis techniques. Offered: W.

CM 520 Construction Procurement Systems (3) *Schaufelberger* Study of the different methods used in the procurement and delivery of projects in the construction industry including lump sum, unit price, cost-plus, design-build, and construction management contracts. Offered: A.

CM 525 Cost Analysis and Management (3) *Pace* Study of cost management procedures applicable to the building process from the conceptual phase through owner operations, including conceptual estimating, project cost analysis and control, and value engineering and life-cycle costing. Offered: W.

CM 545 Real Estate Development (3) *Leahy* A study of the technical issues involved in developing real-estate projects. Tracks project development from initial conception through closing of the sale. Emphasizes the steps and processes involved in pursuing, analyzing, and closing a real-estate purchase. Offered: A.

CM 550 Residential Project Development (3) *Leahy* Study of the financial, technical, and management activities and environmental impact regulations and studies associated with the development of residential projects, including business and construction practices and

marketing strategies for continued profitable operation of a residential construction firm. Offered: Sp.

CM 555 Construction Firm Management I (3) *Schaufelberger* Management of construction company including organization, corporate structure, operation procedures, marketing, and human resources management. Emphasis on safety and loss prevention management, insurance and risk management, financing, accounting, marketing construction services, and bonding requirements for construction company. Other topics include individual and corporate planning and process of strategic planning. Offered: W.

CM 560 Construction Firm Management II (3) *Huppert* Examination of the business practices, including market feasibility studies, related to use of Management Information Systems (MIS) in a construction company. Offered: Sp.

CM 565 Managing International Projects (3) *Schaufelberger* Study of processes involved in the selection, acquisition, and management of international construction projects. Emphasis is placed on examining common problems associated with managing construction projects outside the United States, identifying risks involved, and discussing possible solutions. Offered: Sp.

CM 570 Facilities Management (3) *Emam* Major issues involved in facilities management: facilities planning, financial planning, real estate management, interior space planning and management, facilities operation and maintenance, and emergency preparedness. Offered: A.

CM 580 Temporary Structures (3) *Nemati* Study of materials, methods, and techniques associated with temporary structures used in various construction operations, such as concrete formwork, scaffolding, underpinning, cofferdams, slurry trenches, earth-retaining structures, and dewatering systems. Offered: W.

CM 582 Heavy Construction Estimating (3) *Abdel-Aziz* Study of the principles used in developing cost estimates for heavy construction projects. Includes interpretation of contact documents, quantity take-off, pricing, and preparation of unit-price bid documents. Emphasizes developing cost estimates for highway projects. Offered: S.

CM 584 Marine Construction (3) *Daniali* Study of the materials, methods and techniques associated with construction of projects in marine environments, including the impact of site conditions on the selection of appropriate construction techniques. Emphasizes equipment and crew selection, productivity and cost estimation, and construction sequencing. Offered: A.

CM 586 Utility Systems Construction (3) *Schaufelberger* Study of the materials, methods, and techniques associated with construction of major utility systems, such as water, sewer, communications, electrical or natural gas. Includes construction of central utility plants as well as major distribution and collection systems. Offered: W.

CM 588 Construction Operations and Productivity (3) *Rojas* Study of heavy construction operations with emphasis on productivity enhancement focusing on an integrated approach to planning, modeling,

analysis, and design of construction operations, and the use of simulation models and other analytical tools. Offered: A.

CM 598 Special Topics (1-6, max. 6) Systematic study and offering of specialized subject matter. Offered: AWSpS.

CM 600 Independent Study or Research (*, max. 6) An in-depth independent investigation of some facet of construction management. Offered: AWSpS.

CM 700 Master's Thesis (*, max. 10) Offered: AWSpS.

Landscape Architecture

L ARCH 200 Landscape Architecture Field Trips (2) I&S/VLPA Five field trips introduce typical landscape architecture projects and demonstrate scope of the landscape architecture field. Visits to major projects in the Puget Sound region include city and county parks, river parks, harbors, downtown redevelopments, streetscapes, campus headquarters, and others. Open to nonmajors.

L ARCH 300 Introductory Landscape Architecture Design Studio (6) VLPA Introduction to history and environmental influences in field while developing design and graphic skills. Site analyses and drawing to convey design concepts. Relationship of visual perception to drawing, role of values in design, verbal communication, and behavioral analysis of design process. Required for admission to Bachelor of Landscape Architecture program.

L ARCH 301 Design Foundation Studio (5) Introduces site planning and design process, principles, and skills through experiential learning. Using design principles, studio develops vocabulary for site design. Activities foster skills in design process, form, language, creativity, communication, group dynamics, and organization. Methods include readings, discussion, design exercise and projects, critiques, precedent studies, site visits. Majors only.

L ARCH 302 Site Design in Urban Context (5) Explores the application of design ideas and principles to urban sites. Theory and research informing the design of human environments and lessons from urban and ecological design precedents are implemented in the design of plazas, urban parks, waterfronts, streets, campuses, commercial areas, and historical sites.

L ARCH 303 Natural Processes Studio (5) Project design studies related to natural systems. Emphasizes the innovative use of historical landscape forms to achieve more sustainable landscape performance, using both biophysical and social criteria to define sustainability. Introduces computer mapping applications.

L ARCH 310 Landscape Architecture Field Sketching (2) Introductory level sketching of landscape subjects: natural and urban sites, plants, animals, architectural elements. Emphasis on perspective. Various media, including pencil, charcoal, markers, ink wash, water color.

L ARCH 311 Introduction to Design Graphics (2) Introduction to communication techniques for various phases of the design process. Many techniques are introduced and their suitability

and appropriateness for different purposes explored.

L ARCH 322 Introduction to Planting Design (3) VLPA Traditional ways plants are used in landscape design. Composition and design characteristics of plant materials. Technical considerations for selection, climate, cultural suitability, availability, costs, and maintenance. Open to nonmajors.

L ARCH 331 Landscape Construction (4) Basic course in site engineering, correlating the design and technical aspects of site development and suitability. Grading, drainage, circulation requirements and alignment, organization concepts relative to landscape resources, site evaluation, utilization and protection, and building and site program analysis and coordination.

L ARCH 332 Landscape Construction (4) Materials and structures in landscape construction. Design criteria and construction techniques for detail elements of landscape architecture. Working drawings, specifications, cost estimates, and procedures.

L ARCH 341 Site Planning (3) Introduces urban ecological design issues for good site planning processes, principles, and methods. Linked with L ARCH 301. Addresses planning for people, natural systems in place-making, design for movement with carried land uses. Includes readings, discussions, presentations, campus walks, case studies, graphic and written assignments.

L ARCH 352 History of Landscape Architecture (3) I&S/VLPA Survey of the development of landscape architecture as an art form from Mesopotamia to the present. Relationships to physical landscape, climate, culture, religion, and other arts. Open to nonmajors.

L ARCH 353 History of Modern Landscape Architecture (3) I&S/VLPA Development of profession and art of landscape architecture in the United States, Europe, South America, and Japan in relation to prevailing social, economic, political, and cultural factors. Relationships with other professions, especially architecture and urban planning, and other arts, such as painting and sculpture. Open to nonmajors.

L ARCH 361 The Human Experience of Place (3) I&S/VLPA Interdisciplinary approaches to exploring the reciprocal relationship between people and the landscapes of everyday life. Through readings, discussion, in-class activities and mini-projects, students study place attachment, relationships to nature, environmental attitudes and perception, personal space, territoriality, urban public space, diversity, participation, and the politics of space. Open to nonmajors.

L ARCH 362 Designing Urban Landscapes: Theory and Politics (3) VLPA Introduction to the design of landscape in urban contexts. Overview of major urban design theories and examples of historic and contemporary work. Discussion of the contesting urban processes: visions of city, social and cultural factors, public and community process, and the discourses of nature, urban ecology, and ecological design.

L ARCH 363 Ecological Design and Planning (3) NW Introduction to landscape ecological theory applied to urban environments. Comparison of different vocabularies used to describe landscape structure and function, from the fields

of landscape design, urban design, and biology. Discussion of design theories that have sought to re-center landscape planning and design around the goal of achieving ecological sustainability.

L ARCH 401 Urban Recreation Design (1-6)

I&S/VLPA Special studies in metropolitan, urban, and neighborhood recreation areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARCH 402 Neighborhood Design Studio (1-6, max. 6)

Studio at neighborhood and site scales, mixed use. Incorporates urban design theory, precedents, neighborhood/project issues, and community clients. Skills in neighborhood and site analysis, programming, designs are developed in groups and individually. Methods include readings, research, critiques, field studies, and graphic, written and verbal presentations.

L ARCH 403 Cultural Landscape Studio (1-6, max. 6)

Studies of the landscape at various scales and in diversified contexts. Offers better understanding of visual components of landscapes, designer's capacity to evaluate and change these components, and resultant interaction with, and effect on, landscape user.

L ARCH 406 Individual Design Studio (6)

Senior projects in landscape architecture; projects vary according to the student's particular emphasis and needs.

L ARCH 411 Landscape Graphics (3)

Introduces fundamental hand-drawn graphic conventions, drawing techniques, and media used in environmental design. Emphasizes building drawing and media skills that support design ability development. Includes lectures, demonstrations, display of examples, drawing from slides, and in-class workshops.

L ARCH 412 Landscape Communications (2)

Development of advanced skills of visual representation to communicate students' visions for urban ecological design. Discussion of professional portfolio requirements and portfolio design issues.

L ARCH 423 Planting Design Studio (3)

Utilization of plants as design elements to manipulate space and modify the landscape for various activities and resolutions of site problems. Factors that determine the appropriate use and arrangement of plant materials in an urban context. Composition, plant selection, planting techniques, and maintenance requirements are major components of this class.

L ARCH 424 Advanced Planting Design Seminar (2)

Analyzes the complex relationship between plants, man, and environment and affords opportunity to explore methods of utilizing these relationships to plant and to design more responsive landscapes.

L ARCH 425 Advanced Planting Design Studio (1-6, max. 6)

Advanced seminar/studio in planting design. Provides opportunity to explore ecological, technical, and esthetic principles for selecting plants to meet specific site conditions. Project types include historical sites, multifamily housing projects, plazas, landfills, and reclamation sites.

L ARCH 433 Large-Scale Site Construction (4)

Includes studies of natural determinants and

restraints on large-scale construction, development affected by service and utility systems, physiographic suitability of site, cost-benefit analysis, and critical path methodology for site construction projects.

L ARCH 440 Computers in Landscape Architecture (1-3, max. 3)

Laboratory, lecture, and demonstration classes to introduce software applications specific to required landscape architecture courses. Credit/no credit only.

L ARCH 441 CAD for Landscape Architecture (3)

An introduction to computer-aided drafting for professional landscape architectural practice. Students work in a variety of scales from detail, to planting design, to master plan graphics, to gain a broad-based knowledge of current industry CAD practices and techniques. Emphasizes using CAD as an effective design tool.

L ARCH 450 History of Environmental Design in the Pacific Northwest (3) VLPA

Development of landscape architecture, architecture, and urban planning in the Pacific Northwest from nineteenth century to the present, with major emphasis on twentieth century. Open to nonmajors.

L ARCH 451 History of Environmental Design on the West Coast (3) VLPA

Development of the environmental arts of landscape architecture, architecture, and urban planning from the eighteenth century to the present, with major emphasis on the twentieth century. Open to nonmajors.

L ARCH 463 Urban Recreational Design (3)

I&S/VLPA Special recreational studies in metropolitan, urban, and neighborhood areas; the design, policies, and behavioral studies of existing parks, playgrounds, public places, and commercial areas. Design projects dealing with the play environment for all ages. Open to nonmajors.

L ARCH 470 Landscape Architecture Tutorial (2, max. 6)

Various aspects of project organization, programming, scheduling of work loads, graphic and verbal communication problems, data collection methods and interpretation, methodologies for landscape planting and design.

L ARCH 473 Professional Practice (3)

Professional practice in private office, academic institutions, and public agencies. Evolution of landscape architecture as a profession, possible scenarios for future, variety of practice types and their relationships, ethical and legal/contractual responsibilities of a professional.

L ARCH 474 Project Design (1-6, max. 6)

Detailed design studies of small-to-medium-scale projects. General focus on public landscape areas and social/psychological uses of site. Specific focus on design development and professional office presentation.

L ARCH 475 Advanced Project Design Studio (1-6, max. 6)

L ARCH 476 Professional Operations (3-6, max. 6) Practicum course for landscape architecture majors for internship and exposure to the profession with working experiences at various levels of professional endeavor. Student apprenticeship in selected private offices and public agencies. Credit/no credit only.

L ARCH 477 Landscape Architecture

Consultancy Studio (3-6, max. 6) Simulation of the professional relationship of the landscape architect as a consultant to University students in other design planning and management disciplines. Focus is on site analysis, master planning, schematic designs and detailed design, working drawings, and planting plans associated with student projects.

L ARCH 495 Landscape Architectural Studies Abroad (1-10, max. 30)

Studies conducted under faculty supervision in various locations outside the United States.

L ARCH 498 Special Projects (1-10, max. 30)

Special projects as arranged. Open to nonmajors.

L ARCH 499 Undergraduate Research (1-9, max. 9)

Individual or small-group studies pertaining to special problems, theories, or issues of landscape architecture and environmental issues.

L ARCH 501 Landscape Design and Planning I (1-6)

Enhances perceptual awareness and design sensitivity to natural and man-made landscapes. Basic skills necessary for more advanced course work required in the Master of Landscape Architecture degree program. Examination of landscape environment through problem-solving techniques that acknowledge holistic approach to the environment.

L ARCH 503 Landscape Design of Communities (1-6)

Methods and techniques for developing physical design solutions and implementation strategies in neighborhoods and small communities. Social, economic, political, and individual forces affecting community development and growth. Comparison of several communities, identifying pertinent landscape issues, potential design solutions, and methods for achieving design goals through the political process.

L ARCH 504 Regional Landscape Planning (1-6)

Application of landscape ecological theory to the design of urban environments. Focuses on the strategic design of urban infrastructure, including underground drainage systems, roads, parks, transit systems, and on understanding the cumulative performance of urban sites.

L ARCH 505 Regional Landscape Design (1-6)

Theory/techniques of regional design to analyze, evaluate, plan, design, and manage the resources of the regional landscape continuum.

L ARCH 506 Landscape Visual Resources (1-6)

Survey of existing theory/techniques and the generation of new methods to analyze, evaluate, plan, design, and manage the visual resources of the landscape.

L ARCH 507 Landscape Art (1-6)

Public art placed in, or developed for, specific landscape settings. Various aspects and benefits of public art, including materials, technologies, philosophies of landscape imagery and meaning. General planning criteria for location for maximum public benefit and identification of objectives for a specific site and artwork.

L ARCH 511 Visual Learning (3)

Seminar/laboratory to develop visual learning processes and skills for applying these processes to landscape architecture. Related visualization concepts.

L ARCH 523 Landscape Technology (1-6)

Studio on rehabilitation of stressed urban landscapes. Focus varies but often deals with an analysis of the potentials in urban watershed and the study of alternative site designs for enhancing a range of landscape functions related to water quality. Taught by an interdisciplinary team.

L ARCH 550 History and Theory of Modern Landscape Architecture (3)

Lecture/seminar on history and theory of landscape architecture from the eighteenth century to the present. Relation to theory in related environmental design disciplines such as architecture and urban planning and other disciplines such as geography.

L ARCH 561 Regional Landscape Planning and Design (2)

Discussion of theories and case studies that provide a framework for defining sustainable urban design as both a cultural and biophysical phenomenon.

L ARCH 562 Landscape Art (2)

Process of developing and placing artwork in specific landscape settings. Types of artwork and landscape settings; ways for artist and site designer to interpret, alter, and incorporate factors of landscape; viewer's perception and experience; examples of public and private support.

L ARCH 570 Scholarship and Inquiry (3)

The first of two required courses on the nature of scholarship and theory building in landscape architecture. Investigate scholarship related to the design process, design critique, research, and practice. Students begin to frame their own scholarship for their master's thesis.

L ARCH 571 Seminar on Landscape Architecture Research (3)

Introduction and exploration of problems and opportunities of several basic research methods currently employed in landscape architecture research. Emphasis on how researchers identify research topics and develop appropriate research methods. Introduce analysis and interpretation of research results.

L ARCH 590 Seminar in Landscape Architecture (1-3, max. 12)

Advanced topics in landscape architecture with focus on unpublished areas of research.

L ARCH 598 Special Topics (1-6, max. 9)

Systematic study of specialized regional landscape subject matter, including history, technology, implementation, and other topics depending on current interest/needs. Topics vary and are announced in the preceding quarter.

L ARCH 600 Independent Study or Research (*)**L ARCH 601 Internship (3-9, max. 9)**

Credit/no credit only.

L ARCH 700 Master's Thesis (*)

Strategic Planning for Critical Infrastructures

SPCI 500 Strategic Planning and Systems Analysis (4)

Introduction to two major planning and analytic processes, strategic planning and systems analysis, as applied to the public sector. Includes study of the various elements and types of systems as well as the strategic planning process for public organizations.

SPCI 501 Introduction to Comprehensive Emergency Management (3)

Introduction to emergency management and risk reduction concepts and principles. Includes emergency management tools, techniques, and resources as well as governmental programs, relationships, and the broader social context.

SPCI 502 Constitutional Issues in Homeland Security (3)

Explores the balance between individual liberties and national security. Examines the moral concepts underlying American civil rights and acts of terrorism against the United States. Discusses application of the U.S. Constitution to Homeland Security laws and other governmental actions to protect the nation at home and abroad. Credit/no credit only.

SPCI 504 Applied Geo Spatial Analysis (4)

Provides the theoretical and practical skills needed to use a Geographic Information System (GIS) for analyzing spatial phenomena on the urban and regional scale. Focuses on principles and methods of spatial analysis and their application to strategic planning, risk management, and hazard mitigation.

SPCI 505 Epidemiology of Biological and Chemical Hazards Mitigation I: Principles (3)

Introduction to epidemiology: surveillance for detection of outbreaks, outbreak investigation, and control for infectious agents, toxins, and chemicals. Case studies are drawn from actual outbreaks illustrating these essential epidemiological methods. Examines problem-solving techniques. Credit/no credit only.

SPCI 506 Strategic Planning Practicum I (3)

Uses case-based and problem-based approaches to teach the techniques of planning, decision-making, and analysis common to critical infrastructures.

SPCI 507 Epidemiology of Biological and Chemical Hazards Mitigation II: Application (3)

The second of a two-course sequence, focusing on the applications of the principles of epidemiology covered in Epidemiology of Biological and Chemical Hazards I: Principles. Study cases drawn from actual outbreaks: compare and contrast types, apply knowledge to solve, propose interventions for control, and formulate strategies for preventing outbreaks. Credit/no credit only.

SPCI 508 Risk Assessment and Management (4)

Introduction to processes and methods of risk assessment and management, focusing on how these principles can be integrated into strategic planning and decision making.

SPCI 513 Strategic Planning Practicum 3 (3)

Whittington Uses case-based and problem-based approaches to teach the techniques of planning, decision-making, and analysis common to critical infrastructures. Third in a three-course sequence. Offered: WS.

SPCI 514 Capstone A (3) *Whittington* First of two-part capstone course that provides students with the expertise to develop and teach the problem-based case. Offered: ASp.

SPCI 515 Capstone B (3) *Whittington* Second of two-part capstone course that provides students with the expertise to develop and teach the problem-based case. Offered: ASp.

SPCI 598 Special Topics (1-4, max. 12)

Systematic study of specialized subject matter. Topics vary for each quarter, depending upon

current interest and needs, and are announced in the preceding quarter.

SPCI 599 Special Projects (1-4, max. 12)

Independent/tutorial study for graduate students in the Masters in Strategic Planning for Critical Infrastructures Program. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty advisor most appropriate for the project proposed.

Urban Design and Planning

URBDP 300 Introduction to Urban Planning (5)

I&S Ludwig Principles and theories of urban structure and institutions. Concepts and logic of planning as a community process and a professional activity. Evolution of planning ideas in response to changing social, economic, and environmental conditions within the American political framework. Complementary nature of public and private responsibilities. Major procedures used by planners.

URBDP 301 Database Management Fundamentals (3)

Introduces the tasks and roles that contribute to the management of the design and security of database systems in an organizational context. Students gain a basic understanding of database management systems and administrative practices, as well as hands-on database experience. Credit/no credit only.

URBDP 370 Reading the City (5)

I&S/VLPA Ryan Comprehending cities as reflection of individual reader and social/cultural context. Skills for analyzing everyday, visible evidence of the city. Topics include self-identity with place, city, image and perception, visual design analysis and place as representation of culture. Extensive writing, multiple texts, collaborative work in groups and field work.

URBDP 407 Urban Planning Studio (5)

I&S/VLPA Synthesis of urban design and planning problems and methods in a laboratory section.

URBDP 420 Database Systems and Planning Analysis (3)

Applications of relational database management systems in urban design and planning. Emphasis on practical aspects of database design and use. Design, create, and modify databases and database applications, including spatial databases. Introduction to GIS. Use of personal computers linked to desktop mapping packages and relational database management systems.

URBDP 422 Urban and Regional Geospatial Analysis (5)

Alberti Principles of GIS applied to problems in urban design and planning, landscape architecture, and environmental and resource studies. Practical problem-solving approaches using contemporary desktop mapping packages and vector and raster GIS systems. Siting, environmental evaluation and inventories, and modeling. Prerequisite: 3.0 in URBDP 420. Offered: W.

URBDP 429 Computer-Aided Planning of Urban Systems (3)

Survey of on-line planning applications; use of various on-line systems to solve urban systems design problems; investigation of hardware/software trade-offs; human factors in man-computer systems design theory as it relates to problem-solving activity. Offered: jointly with CEE 418.

URBDP 443 Problem Analysis in Urban Ecology (5) I&S/NW *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluated how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with ESRM 474/GEOG 486/ENVIR 486; A.

URBDP 444 Applied Theory and Methods in Urban Ecology (5) I&S/NW *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objectives and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: URBDP 443. Offered: jointly with CFR 475/ GEOG 487/ENVIR 487; W.

URBDP 445 Research in Urban Ecology (5) I&S/NW *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Students write and orally present revised objectives and methods sections of their interdisciplinary project and present a draft results section. Prerequisite: URBDP 444. Offered: jointly with CFR 476/GEOG 488/ENVIR 488; Sp.

URBDP 446 Practical Experience (4, max. 8) *Rolfe* Off-campus internship under academic supervision in situations useful to the education of planners, such as public/private planning and design offices, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects.

URBDP 450 Introduction to Land Use, Growth Management, and Environmental Planning (3) *Bae* Provides an understanding of contemporary land use issues (including sprawl, smart growth, new urbanism, transit-oriented development, and Washington's Growth Management Act) and examines their environmental impact and social welfare implications. Analyzes best-practice techniques of growth management. Offered: A.

URBDP 451 Housing (3) I&S *Ludwig* Survey of housing and redevelopment problems, theories, standards, and practice. Development of public policies, finance, technological considerations, social factors, and priorities. Prerequisite: 3.0 in URBDP 300.

URBDP 452 Urban Development and Spatial Structure (3) I&S *Miller* Physical and functional structure of urban areas, with major focus on locational decision making in households, firms, and other organizations, and space demands of these urban activities. Selected land-use models illustrating use of this theoretical understanding for forecasting competition, land-use conflicts, and the land-conversion process.

URBDP 453 Introduction to Urban Economics and Development (4) I&S *Waddell* Introduction to urban economics and impacts on real estate development with emphasis on land allocation, location theory, rent/value theory, factors affecting growth and decline of cities, and the role of governmental regulation/policy/finance in controlling real estate development. Offered: jointly with CM 453.

URBDP 457 Housing in Developing Countries (3) *Ludwig* Emphasis on role of the design and planning professional in housing delivery in developing countries. Exploration of issues of culture, political environment, social context, economic circumstances, and other factors which define and limit the manner in which the professional planner and designer can and should function.

URBDP 460 History of City Development (3) I&S/VLPA *Dubrow* Analysis of city forms and designs, emphasizing their relation to the culture of each period.

URBDP 461 History of Urban Planning in the United States (3) I&S *Hancock* Seminar in origins, development, and significance of the American planning movement and the profession that emerged from it, as defined by some of its seminal innovators, theories, practices, and achievements, and as evaluated by cultural realities thereby served.

URBDP 465 Land Use (3) I&S *Westerlund* Land use as a substantive focus for urban and regional planning and growth management. Consideration of data collection, analysis, plan development, and implementation methods. Seminar and group project sections.

URBDP 466 Infrastructure and Community Facilities (4) *Blanco* Issues and methods associated with planning for parks, schools, drainage, sewerage, utilities, libraries, solid waste and transportation. Covers their relationship to comprehensive plans, project permitting and impact assessment. Financing, regulating, and relationships to social, environmental, and economic goals are discussed.

URBDP 467 Urban Planning Uses of Remote Sensing (3) *Westerlund* Using aerial photographs and satellite image data in urban planning. Urban change analysis, land-use and land cover classification, and environmental planning applications. Scale and resolution considerations. Development of proficiency through laboratory exercises and use of image-processing software.

URBDP 468 Land Use From Satellite Data (3) *Westerlund* Digital data from Landsat and other sources used to determine land-use and land-cover classification in urban and rural areas. Hands-on exercises on computer. Photo interpretation, statistics, land-use classification, and verification are incorporated.

URBDP 470 Introduction to Urban Design (3) I&S/VLPA *Rolfe* Definitions and examples of urban design; heritage of urban design; theories of city building; the role of urban design in the fields of architecture, landscape architecture, and urban planning.

URBDP 471 History of Urban Design (3) I&S/VLPA *Streatfield* Aspects of form, pattern, and space that mark efforts of individuals and groups to express their values and goals in the design of their cities. Special attention given to both historical and modern examples.

URBDP 472 Creativity and Culture in Design (3) *Kasprisin* Exploration of creativity in design from a system theory perspective. Theoretical readings in physics, biology, and behavioral science balanced with practical approaches and case studies in urban design and architecture literature. Offered: A.

URBDP 474 Site Planning: Issues and Techniques (3) *Abramson* Introduction to site planning; how it is regulated; why it is important to know; and how to carry out its key tasks, including residential subdivision and mixed-use development layout; basic topographical and hydrological analysis and manipulation; roadways, parking and hierarchies of circulation, and site design detail. Offered: Sp.

URBDP 479 The Urban Form (3) VLPA *Moudon* Elements, patterns, and evolution of urban form. The forces that shaped cities in history. Contemporary trends. Methods of urban morphological analysis as related to urban design and planning practices. Required for MUP graduate students.

URBDP 481 Metropolitan Planning and Development in Developing Countries (3) I&S *Ludwig* Examination of the nature and causes of urban planning and management problems in developing countries and exploration of alternative approaches to solve some of these problems.

URBDP 482 Politics and Planning (3) I&S Explores the need to understand the crucial role of politics in the planned development of American communities, to think critically and constructively about the relationship of politics and development and ways to make it as democratic and equitable as possible, and to strengthen analytical and writing skills.

URBDP 494 Alaska Field Study (2-5, max. 10) *Kasprisin, Westerlund* Travel to Alaskan communities for interpretation of natural systems, history, cultures, settlement patterns, and current issues of planning and economic development. Meetings with community leaders and planners. Students either select a topic for field and documentary research, or participate in intensive charrette-type projects or quarter-long projects in communities. Offered: Sp.

URBDP 498 Special Topics (1-9, max. 15) Systematic study of specialized subject matter. Topics for each quarter vary, depending upon current interest and needs, and are announced in the preceding quarter.

URBDP 499 Special Projects (1-12, max. 12) Independent/tutorial study for undergraduates. Individual reading, research, fieldwork, or other special project, outlined in advance, approved by, and under the direction of, the faculty adviser most appropriate for the project proposed. A report on the purposes, procedures, and results of the study is required.

URBDP 501 Comprehensive Planning and Implementation (3) *Born, Spangenberg, Tovar* Reviews the comprehensive planning process as a part of managing metropolitan growth. Examines federal/state statutes affecting local government comprehensive plans. Includes local government land use regulations and reviews development process. Concentrates on tools to shape land use and development patterns and their effectiveness in creating outcomes specified in comprehensive plans. Offered: W.

URBDP 503 Communication and Analysis (3) *Kasprisin* Development of communication skills understanding within the planning and design process. Presentation of communications as a design process with mental, visual, oral, written, and kinesthetic cognitive actions combined to form communications thinking. Offered: W.

URBDP 506 Planning Studio Prep (2)

Introduces plan-making process, provides time for background research, issue identification, public involvement, and preliminary analysis.

URBDP 507 General Urban Planning

Laboratory (4) Studio/field project in applied professional planning of a comprehensive nature, utilizing a local study area to examine the realities of problem solving in situations of functional and normative conflict. Integration of analysis, programming, implementation, and presentation phases of the planning process.

URBDP 508 Specialized Planning Laboratory

(5, max. 10) *Blanco, Dubrow, Kasprisin, Moudon, Rolfe, Westerlund* Studio/field project on a specialized planning problem. Several options are offered each year, such as regional-environmental planning, housing, metropolitan planning, and urban design. Prerequisite: ARCH 500 and ARCH 507. Additional prerequisite for some sections: urban planning seminar or lecture courses.

URBDP 509 Resources for Urban Planning (1)

Provides an opportunity for students to explore and discuss issues of professional practice with practicing planners in an informal context. Questions posed by the participants usually emphasize practical aspects of working as planners. Credit/no credit only.

URBDP 510 Theories and Methodologies of

Planning I (4) *Bae* Survey of the philosophy, methods, and analytical techniques used in planning public actions and policies, with emphasis on the logic and assumptions upon which these are based. Various planning surveys and methods. Open to graduate students in urban design and planning and to graduate students seeking the urban design certificate. Prerequisite: URBDP 500.

URBDP 511 Theories and Methodologies of Planning II (4) *Blanco***URBDP 512 Research Seminar (3)** *Miller*

Planning, designing, and undertaking applied research in an urban setting. Framing, critically assessing, managing, and presenting research used in urban planning and design. Conceptual modeling of causal relationships, choice among experimental and quasi-experimental designs, and ethical and political implications of research undertakings. Exercises leading to a complete research design. Offered: A.

URBDP 519 Qualitative Research Planning (3)

Qualitative research methods covering both the theoretical foundations and practical methodologies of traditional and innovative approaches, including cognitive mapping, open-ended interviews, ethnographic observation, hermeneutics, phenomenology, critical theory, communicative action, grass-roots empowerment, post-structuralism, and self organization.

URBDP 520 Quantitative Methods in Urban Design and Planning (4) *Bae*

Methods of statistical and mathematical analysis in design and planning. Emphasizes the use of computer packages for analyzing urban data. Regression, matrix methods, cohort-survival populations models with examples solved on microcomputers. Prerequisite: college mathematics and basic course in probability and statistics.

URBDP 525 Evaluation in Urban Planning (3)

Miller Methods and techniques for a priori assessment of physical improvement plans,

program designs, public policies. Includes cost effectiveness and matrix or goal achievement, as well as more conventional cost-benefit and cost-revenue forms of analysis. Emphasis on understanding the reasoning and issues in evaluation, and gaining a working competence in at least one of the methods treated.

URBDP 530 Land-Use/Transportation Models

(3) *Waddell* Review of theoretical basis of several existing models used to forecast urban growth patterns and their associated land-use, transportation, and energy requirements. Model validation studies in relation to empirical studies of urban growth and change. Environmental implications of alternative urban growth patterns. Offered: jointly with CEE 588.

URBDP 537 Open Space Land Uses (3)

Westerlund Exploration of public and private values of open space; its aesthetic, environmental, recreational, natural resource uses from development sites to metropolitan regions. Methods of open space inventory, analysis; legal and administrative tools for preserving and managing open space; development of multipurpose open space programs in local governments. Prerequisite: URBDP 500.

URBDP 543 Problem Analysis in Urban

Ecology (5) *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Investigates pressing local issues in urban ecology and develops each into a researchable project proposal. Examines and evaluates how different disciplines study environmental issues, explores criteria for conducting and evaluating quality research, develops skills in problem formulation, and sharpens proposal writing skills. Offered: jointly with CFR 574; A.

URBDP 544 Applied Theory and Methods in

Urban Ecology (5) *Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen* Discusses broad perspectives in urban ecology and how to analyze data relevant to urban ecology problems. Students write objective and methods for a selected urban ecology problem that critiques different methodological approaches and reviews/synthesizes literature. Prerequisite: URBDP 543 or permission of instructor. Offered jointly with CFR 575; W.

URBDP 545 Research in Urban Ecology (5)

Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen Teams analyze, present, and begin to interpret data that is relevant to addressing issues in urban ecology. Write and orally present revised objectives and methods sections of interdisciplinary project and present a draft results section. Prerequisite: URBDP 544. Offered: jointly with CFR 576; Sp.

URBDP 546 Practicum (4, max. 8) *Rolfe*

Off-campus experience under academic supervision in situations useful to the education of planners, such as planning offices, public bureaucracies, projects related to the environment, cross-cultural matters, and decision making. Assistance in identifying appropriate projects. Credit/no credit only. Prerequisite: permission of instructor.

URBDP 547 Professional Project (1-9, max. 9)

Independent development of client oriented project involving application of professional planning/design methods and approaches. Professional-quality report relates project to larger professional context, addresses alternative approaches/methods and includes an evaluation of the project. Master of Urban Planning students only, taken in lieu of 700. Not recommended for

those continuing into Ph.D. program. Credit/no credit only.

URBDP 548 Advanced Urban Ecology (5)

Alberti, Bradley, Hill, Marzluff, Ryan, ZumBrunnen Discussion of current and important theoretical and empirical papers in urban ecology. Students continue to research interdisciplinary urban ecology projects while developing publishable manuscripts and oral presentations. Emphasizes research ethics, diverse views, and presentation skills. Prerequisite: URBDP 543, 544, 545. Offered: jointly with CFR 580/GEOG 588; AWSp.

URBDP 549 Hazard Mitigation Planning (3) *A*

survey of the field of planning for managing risks of natural hazards—earthquakes, floods, coastal/meteorological hazards, and human-caused technological hazards/terrorism. Covers pre-event mitigation through building and land-use controls; disaster preparedness; post-event response, recovery, and mitigation of future hazards. Emphasizes hazard mitigation as a long-term strategy for achieving sustainability of communities.

URBDP 552 Real Estate Process (4) *De Lisle*

Introduction to the real estate process including concept generation, market research, design, construction, finance, and transactions. Offered: A.

URBDP 553 Real Estate Appraisal and

Feasibility (4) Introduction to real estate feasibility analysis, including an emphasis on individual property market analysis, permitting, investment, decision-making, and market behavior. Focuses on building basic research skills to determine economic viability and marketability of real estate projects. Prerequisite URBDP 552.

URBDP 554 Real Estate Finance (4) *De Lisle*

Overview of real estate finance and investment analysis, including a survey of capital markets, banking regulations, interest/discounting theories, debt instruments, and project financing. Prerequisite: URBDP 552.

URBDP 555 Real Estate Development (4) *Rolfe*

Introduction and survey of processes and people involved in developing real estate, including issues of site control, public/private approvals, feasibility analysis, project financing, design/construction, marketing, and asset management. Prerequisite: URBDP 522.

URBDP 556 Real Estate Investment (4) *Rolfe*

Analysis of private and public real-estate investment decisions using case studies of individual development projects. Focuses on application of principles introduced in URBDP 552, 553, 554 and 555. Offered: Sp.

URBDP 558 Real Estate Market Analysis (4)

Fundamentals of market analysis for commercial and residential real estate projects. Demand for real estate by property type, methods for analyzing and forecasting population, employment, and income in a regional economy; competitive supply and capture rate analysis; retail trade area analysis; and integrating market studies into financial feasibility analysis.

URBDP 560 Urban Affairs (3)

Explores national/local urban policy concerning the major problems confronting cities and metropolitan regions today. Economic globalization, income inequality, and metropolitan decentralization shape the urban agenda, the context for urban policy, and the

analytic focus of the course. A project allows the exploration of strategies for intervention. Offered: jointly with PB AF 560.

URBDP 561 Urban Economics and Public Policy (3) Examines the rationale for and consequences of public intervention in urban land, housing, and transportation markets through land use regulations such as zoning and urban growth boundaries, infrastructure investments, and fiscal policies to manage urban development and traffic. Prerequisite: PB AF 516 or equivalent. Offered: jointly with PB AF 561.

URBDP 562 Introduction to Neighborhood Planning and Community Development (3) Provides introduction to basic practices in neighborhood planning and community development, including theoretical/historical bases; developing neighborhood plans/projects; indicators and evaluation of neighborhood quality; community participation; institutional framework, ethical dilemmas, and professional roles. Addresses current issues, including Seattle's experience, NIMBYism, security, neighborhood character, housing segregation, environmental racism. Offered: jointly with PB AF 562.

URBDP 563 Seminar in Urban Planning and Policy (1) Seminar for students in the MPA/MUP concurrent degree program. Explores topics that intersect urban planning and policy, through exchange with faculty and professionals working in this arena. Focuses on developing thesis topics that explore this intersection. Offered: jointly with PB AF 563.

URBDP 564 Planning history, theory and ethics (3) Examines major historical landmarks since the Civil War (urban, suburban, and rural, physical and social-economic); theoretical alternatives (rationalism, pluralism-advocacy, critical theory, bio-regionalism, dissipative models); and ethical issues (such as distributive justice and principles of professional conduct).

URBDP 565 American Urban History (3) Intensive lecture/seminar designed to provide students the opportunity for the immersion in historical scholarship that addresses the social, economical, political, technological, and cultural forces that have shaped the development of American cities.

URBDP 567 Democracy, Citizenship, and Participation in the City (3) *Purcell* Graduate seminar on democracy in cities. Focuses on contemporary ideas, debates, and initiatives. Offered: Sp.

URBDP 570 Urban Design Process (3) *Rolle* The study of concepts, methods, and processes basic to planning, design, and effectuation. Credit/no credit only. Prerequisite: specialization in urban design or permission of instructor.

URBDP 571 Research and Analytical Methods for Urban Design (3) *Moudon* Conceptual framework for an epistemology of urban design and physical planning. Review of relevant research in related fields and disciplines. Prerequisite: specialization in urban design or permission of instructor.

URBDP 572 Case Studies in Urban Design and Development (3) *Kasprisin* Wide range of urban design and development projects recently completed. Effective urban design implementation, including design process, decision making, administration, management. Tools and techniques such as design analysis, policy making, regulation, design review, taxation, financing. Prerequisite: URBDP 510 and URBDP 580 and/or permission of instructor.

URBDP 574 Residential Design: Methods and Practices (3) *Dubrow* Review of approaches to housing people in growing metropolises and cities, nineteenth century to present. Emphasis on Western Europe, North and South America. Focus on selected contemporary issues in neighborhood and dwelling design, methods and practices. Offered: jointly with ARCH 593.

URBDP 576 Pedestrian Travel, Land Use, and Urban Form (3) *Vernez Moudon* Graduate seminar concentrating on walking as a mode of transportation in cities and city-regions, including social, cognitive, and perceptual dimensions of pedestrian movement and behavior theory. Offered: Sp.

URBDP 580 Legal and Administrative Framework for Planning (3) *Blanco* Political, legal, and administrative institutions closely related to the planning process. Issues of devolution of authority and public representation and participation. Legal basis for planning and associated regulation.

URBDP 585 Introduction to Historic Preservation Planning (3) *Dubrow* Theories, methods, and practices associated with historic preservation planning. Overview of preservation planning programs at federal, state, and local levels. Introduction to tools and methods needed to identify, document, evaluate, and plan for protection of historic properties. Provides opportunity to learn fundamentals of preservation planning through practical experience. Offered: Sp.

URBDP 586 Implementation in Preservation Planning (4) Practical experience in identifying, documenting, evaluating and developing strategies for protection of historic resources, building on introductory theories, methods, and practices. Develops skills critical to preservation planning via research, fieldwork and writing. Prerequisite: introductory course in preservation.

URBDP 587 Preservation and the Vernacular Environment (3) *Dubrow* Exploration of theoretical, methodological, and practical issues related to the preservation of vernacular architecture and cultural landscapes in the United States. Offered: W.

URBDP 591 Doctoral Seminar I (4-) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

URBDP 592 Doctoral Seminar II (4-) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

URBDP 593 Doctoral Seminar III (4-) Researchable issues and research methodology. Discussion and critique of selected pieces of recent research work. Presentation and critique of research proposed by members of the seminar. Prerequisite: master's degree or equivalent in a planning discipline.

URBDP 597 Pacific Northwest Bioregion Forum (1) *Kasprisin* Exchange between universities of Pacific Northwest to share ideas and information on planning related ecological issues within the bioregion.

URBDP 598 Special Topics (1-6, max. 15) Systematic study of specialized subject matter. Topics vary for each quarter, depending upon current interest and needs, and are announced in the preceding quarter. Prerequisite: permission of instructor.

URBDP 700 Master's Thesis (*) .

URBDP 800 Doctoral Dissertation (*) .

College of Arts and Sciences

American Ethnic Studies

Afro-American Studies

AFRAM 101 Introduction to African American Studies (5) I&S History, culture, religion, institutions, politics, economics, arts, and psychology of peoples of African descent as developed from experience in both the old and new worlds. Multidisciplinary analysis of social life from a Black perspective as illustrated in selected historical and contemporary writings.

AFRAM 150 Introduction to African-American History (5) I&S Introductory survey of topics and problems in Afro-American history with some attention to Africa as well as to America. Basic introductory course for sequence of lecture courses and seminars in Afro-American history. Offered: jointly with HSTAA 150.

AFRAM 214 Survey of Afro-American Literature (5) VLPA *Butler* A chronological survey of Afro-American literature in all genres from its beginnings to the present day. Emphasizes Afro-American writing as a literary art; the cultural and historical context of Afro-American literary expression and the aesthetic criteria of Afro-American literature. Offered: jointly with ENGL 258.

AFRAM 220 Third World Images in Film (5) I&S/VLPA .

AFRAM 246 African American Politics (5) I&S *P. Rivers* Survey of African Americans within the U.S. socio-political processes. Situates African Americans within a post-civil rights context where there is debate about race's centrality to an African American politics. Recommended: either AES 150, AFRAM 201, or POL S 202. Offered: jointly with POL S 246.

AFRAM 260 African American Family (5) I&S This course explores the structures and functioning of various types of black families. Single-parent families, two-parent families, extended families, and consensual families are explored. Their consequences for male/female relationships are linked and critiqued. Offered: jointly with SOC 260.

AFRAM 261 The African-American Experience Through Literature (5) I&S/VLPA *Scott* Instructs students in hermeneutical and sociological methods of analyses. Analyzes selected novels, essays, poems, short stories, and plays with the purpose of understanding the structures and functions of both society and personality. Offered: jointly with SOC 261.

AFRAM 270 The Jazz Age (5) I&S *Walter* Interdisciplinary study of period after World War I to Great Crash. Afro-American and Anglo-American currents and impulses that flowed together in the Roaring Twenties. Covers politics of normalcy, economics of margin, literature of indulgence and confusion, transformation of race relations, and cultural influence of jazz. Offered: jointly with HSTAA 270.

AFRAM 272 History of the South Since the Civil War (5) I&S *Walter* Reconstruction and its aftermath, the Agrarian (Populist) revolt, disfranchisement and segregation, the effects of urbanization and subsequent depression, desegregation, and the struggle for civil rights.

Examines the New South, the conflict of ideology with structural and material change, and the place of the South in contemporary America.

AFRAM 306 Basic Swahili (5) Maulana Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty.

AFRAM 307 Basic Swahili (5) Maulana Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty. Prerequisite: AFRAM 306.

AFRAM 308 Basic Swahili (5) Maulana Structure of spoken and written Swahili. Concentration on the acquisition of elemental conversational skill and an introduction to written texts of graded difficulty. Prerequisite: AFRAM 307.

AFRAM 309 Intensive Basic Swahili (15) Maulana First-year Kiswahili language. Introduces students to Kiswahili and allows them to explore and understand not only the language but also the diverse cultures and customs of the people of East Africa. Provides a basic foundation in speaking, reading, and writing. Primary emphasis on basic structure of Kiswahili and its operation. Offered: S.

AFRAM 315 Black Identities and Political Power (5) I&S *Rivers* Relates the deployment of political power within institutions to shifting racial identities. Shows how racial identities both reflect and deflect relations of domination and resistance within and between cultures in the black diaspora. Prerequisite: either AES 150, AFRAM 150, AFRAM 201, or POL S 201. Offered: jointly with POL S 315.

AFRAM 320 Black Women in Drama (5) VLPA Character types of Black women as represented in plays by Black women. Some Black male playwrights are juxtaposed with Black female writers for comparative analysis. Playwrights include Georgia Douglas Johnson, Angelina Grimke, Alice Childress, Lorraine Hansberry, Ira Aldridge, LeRoi Jones.

AFRAM 321 History of Afro-American Women and the Feminist Movement (5) I&S "Feminist Movement" from early nineteenth century to present. Treats relationship between Black and White women in their struggle for independence, at times together and at times apart. Discusses the reasons, process, and results of collaboration as well as opposition. Examines recent and contemporary attempts at cooperation. Offered: joint with WOMEN 321.

AFRAM 323 African-American Women's History (5) I&S *Yee* Survey of African-American women's experience in United States, 1600 to present. Includes: social, political, economic status of Black women in slavery, freedom, education, activism, Civil Rights, women's rights, other social movements. Explores individual and collective interactions with African-American men, white men and women, other people of color.

AFRAM 334 The Sixties in America: Conflict, Confrontation, and Concession (5) I&S *Walter* Politico-cultural movements that collided in the

sixties. Includes politics of confrontation and civil disobedience, economics of "guns and butter," literature of conflict and angst, polarization of arts, transformation of race relations, role of Rock, and influence of domestic politics on foreign relations. Recommended: AFRAM 150; AFRAM 270. Offered: jointly with HSTAA 334.

AFRAM 337 Music and Social Change in the Sixties Era (5) I&S/VLPA *Walter* Introduction of popular music and social change in 1950s and 1960s. How this interaction effects significant change. Considers political activism for civil rights and against the Vietnam War as they intersect with the development of rock and roll, R&B, acoustic and political folk music, and post-bebop jazz.

AFRAM 340 The Harlem Renaissance: A Literary Study (5) VLPA Highlights Harlem Renaissance — 1912 through mid-1930s — as establishing a role for twentieth-century African-American writer, encompassing literature, politics, and decolonization of the image of Africa, and solidifying integrationist and nationalist schools of thought. Examines images, themes, and characterizations in creating a literary aesthetic simultaneously American and African-American.

AFRAM 350 The Black Aesthetic (3) I&S/VLPA .

AFRAM 358 Literature of Black Americans (5) VLPA *Butler, Moody* Selected writings—novels, short-stories, plays, poems—by Afro-American writers. The historical and cultural context within which they evolved. Differences between Afro-American writers and writers of the European-American tradition. Emphasis varies. Offered: jointly with ENGL 358.

AFRAM 370 Afro-American Political Thought (5) I&S Political ideologies and philosophies of pivotal Afro-American historical figures and the conditions under which these ideologies are developed, rejected, and transformed. How ideologies relate to solution of Afro-American political problems.

AFRAM 401 Intermediate Swahili (5) VLPA Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: either AFRAM 308 or AFRAM 309.

AFRAM 402 Intermediate Swahili (5) VLPA Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: AFRAM 401.

AFRAM 403 Intermediate Swahili (5) VLPA Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Swahili. Review of structure. Prerequisite: AFRAM 402.

AFRAM 437 Blacks in American Law (5) I&S *Walter* Historical continuity for changing relationship between American jurisprudence and Black Americans, 1640-1986. Statutory and case law which determined role of Blacks in American society, and use of law by Blacks to gain civil and personal rights.

AFRAM 498 Special Topics in African American Studies (3-5, max. 15) I&S Topics in

which students and faculty have developed an interest as a result of work done in other classes or as a result of the need to investigate in greater depth Afro-American Studies issues. Topics vary.

AFRAM 499 Independent Study and Research (1-5, max. 10) Identification and investigation of the problems and needs of the Black community. Methods and alternatives of approaching these problems and needs. Students designate their areas of interest and subsequently pursue research and problem solving.

American Ethnic Studies

AES 150 Introductory History of American Ethnic Groups (5) I&S *Gamboa, Salas* Survey of the history of African Americans, Asian Americans, Chicanos, and American Indians in the United States.

AES 151 Introduction to the Cultures of American Ethnic Groups (5) I&S Survey of the cultures of Chicano, African-American, Asian-American, and American-Indian communities of the United States. Each group's culture is examined in its isolation and in its interaction with mainstream culture.

AES 212 Comparative American Ethnic Literature (5) I&S/VLPA *Butler* Selected texts from the African-American, American-Indian, Asian-American, Chicano/Latino, and Euro-American traditions of American literature. Examines the American Dream, identity, community, conformity, individualism, and family. Explores themes of assimilation, double consciousness, *mezitza* consciousness, and wholeness as an introduction to multiple American voices in literary expression.

AES 250 Race in the American University (5) I&S Racial integration in American institutions of higher education. Entry to, and impact on, American universities by people of color. History of ethnic studies and its relation to other disciplines. Recommended: AES 150; AES 151.

AES 310 Women of Color as Cross-Cultural Artists (5) I&S/VLPA *Habell-Pallan* Provides a historical context for artistic forms produced by racialized women. Examines the cultural production of Chicanas and Latinas in relation to that Native American, African American, East and South Asian American, and Arab American women as well as those women of mixed heritage in the U.S. Offered: jointly with WOMEN 351.

AES 322 Race and Gender: Historical Perspectives (5) I&S The intersection of race and gender in the lives of women of color in the United States from historical and contemporary perspectives. Topics include racism, sexism, activism, sexuality, and inter-racial dynamics between women of color groups. Offered: jointly with WOMEN 322.

AES 330 Beyond Civil Rights: Law, Culture, and Change (5) I&S Assessment of the contemporary politics of civil rights as shaped by an identity politics that is both significant and passe. Recommended: LSJ 363 or one course in either AES or WOMEN. Offered: jointly with LSJ 330.

AES 333 Race and Ethnicity in the U.S. Military (5) I&S *Salas* The experiences of racial minorities in the military. Topics include segregation of units, desegregation of military, career limitations and opportunities, minority

women, military families, racism and role of veterans in civil rights struggles after service.

AES 335 Sports and Social Change in the Twentieth Century (5) I&S *Walter* Development of sport in the US and its importance for US culture and society. Covers increased centrality of athletic competition as part of the new leisure time in the late-19th century, revival of the Olympic movement, racial segregation/integration, today's American notions of celebrity and social style.

AES 361 Ethnicity, Business, Unions, and Society (5) I&S *Scott* Interrelationships of ethnicity, business, unions, and the larger society. Examines financial and sociological structure of business and manufacturing sector, how this sector performs, and consequences of performance for selected ethnic groups in United States. Offered: jointly with SOC 363.

AES 404 Critical Pedagogies of Social Change (5) I&S Examines theories of critical pedagogy as developed in struggles against race, class, and gender oppression in the U.S. and transnationally. Topics include the relation between theory and practice, the position of educators in struggles for social change, and the role of the arts in movement-building. Offered: jointly with WOMEN 404.

AES 446 Music in American Cultures (3) I&S/VLPA Compares musical history and experience of selected American cultures that have fed into the American musical mainstream or had significant popularity on its periphery. Case studies may include African Americans, Latino/a Americans, Jewish Americans, Asian Americans, or European Americans. Considerations of social identity as well as musical styles. Offered: jointly with MUSIC 446.

AES 461 Comparative Ethnic Race Relations in the Americas (5) I&S Sketches the ethnoracial systems operating in American society. Studies these systems as systems and examines their institutional and interpersonal dynamics. Compares ethnoracial systems in order to arrive at empirical generalizations about race/ethnorelations in the Americas. Offered: jointly with SOC 461.

AES 462 Comparative Race and Ethnic Relations (5) I&S *Scott* Race and ethnicity are examined as factors of social differentiation in a number of Western and non-Western societies in Europe, Africa, Asia, and the Americas. Offered: jointly with SOC 462.

AES 487 Cultures and Politics of Environmental Justice (5) I&S *Pena* Comparative survey of environmental justice movements in the world with focus on critical studies of environmental racism, risk, and sustainable development. Provides theoretical knowledge and research methods incorporating the study of equity and autonomy in environmental impact and risk assessment and other aspects of environmental policy politics. Offered: jointly with ANTH 487.

AES 489 Ethnicity, Gender, and Media (5) I&S Media portrayal of women and people of color; creation of alternative media systems by women and people of color in the United States. Offered: jointly with COM 489/WOMEN 489.

AES 494 Community Practicum and Internship (3-5, max. 10) Faculty supervised practicum and internship experience in variety of settings and agencies, e.g., ethnic specific

agencies, government and civic community-based offices. Students contribute skills and knowledge to respective communities and gain experience by working with professionals and community organizers. Credit/no credit only.

AES 495 Senior Seminar (5) I&S Focus on a central comparative theme for individual research topics.

AES 496 Senior Seminar II (5) I&S Second of a two-part senior seminar sequence required of all majors. Research and writing of a senior paper under supervision of an appropriate faculty adviser. Prerequisite: AES 495. Offered: AWSpS.

AES 498 Special Topics in American Ethnic Studies (1-5, max. 15) I&S Designed to provide the student an opportunity to concentrate on one specific aspect of American Ethnic Studies through a comparative, interdisciplinary approach.

AES 499 Independent Study or Research (1-5, max. 10) Independent readings and/or research under the supervision of a faculty member.

Asian-American Studies

AAS 101 Introduction to Asian American Cultures (5) I&S Asian-American subcultures; evolution of Asian-American cultures in the United States from 1850 to 1950-immigration patterns, evolution of subcultures, evacuation, interracial relations, assimilation, and signs of social disorganization.

AAS 206 Contemporary Problems of Asian Americans (5) I&S Recent Asian-American issues from 1950 to the present. Topics include ghetto communities, civil rights, identity problems and ethnicity, social organizations, political movements, and recent immigration.

AAS 210 Asian-American Identity (5) I&S Examines the nature of Asian-American identity from a multidisciplinary approach. Explores influences and manifestations of Asian-American identity, using literature, history, and other texts. Topics to include gender issues, interracial relationships, and Amerasians. Recommended: AAS 101; AAS 206.

AAS 220 Asian-American Stereotypes in the Media (5) I&S Asian stereotypes popularized by American literature, film, radio, and television and their effects on Asian American history, psychology, and community.

AAS 300 U.S. Pacific Islander Contemporary Culture (5) I&S *McGrath* Examines U.S. Pacific Islander culture as informed by Pacific history, social and cultural organization. Emphasis on understanding contemporary experience in the U.S. and other diaspora communities. Major themes include post-colonialism, migration, family, religion, politics, gender, education, and transnational identity. Recommended: either ANTH 202 or AES 151. Offered: jointly with ANTH 307. Offered: Sp.

AAS 306 Basic Tagalog (5) Structure of spoken and written Tagalog. Concentration on the acquisition of elemental conversational skill and introduction to written texts of graded difficulty. Offered: A.

AAS 307 Basic Tagalog (5) Structure of spoken and written Tagalog. Concentration on the acquisition of elemental conversational skill and introduction to written texts of graded difficulty. Prerequisite: AAS 306. Offered: W.

AAS 308 Basic Tagalog (5) Structure of spoken and written Tagalog. Concentration on the acquisition of elemental conversational skill and introduction to written texts of graded difficulty. Prerequisite: AAS 307. Offered: Sp.

AAS 320 Hawaii's Literatures (5) VLPA *Sumida* Prose fiction, historical narratives, and poetry (including lyrics and songs) of Hawaii by Native Hawaiian and multicultural local writers and composers of the nineteenth and twentieth centuries. Analyses of colonization and its consequences frame the literary studies.

AAS 330 Asian American Theater (5) VLPA *Sumida* Explores works of Asian American plays in historical, interpretive, and artistic contexts and dimensions. Includes students' performances of dramatic readings.

AAS 350 Chinese American History and Culture (5) I&S Experience of the Chinese in America from 1850 to the present. Transformation from an immigrant to Chinese American community: immigration patterns, anti-Chinese movements, ethnic sociopolitical and economic institutions, community issues, Chinese American culture. Recommended: AAS 205.

AAS 360 Filipino-American History and Culture (5) I&S *Revilla* History and culture of the Filipino in America and the influence of an admixture of Filipino, Spanish, and American traditions on the Filipino immigrant and his or her descendants. Recommended: AAS 205.

AAS 370 Japanese-American History and Culture (5) I&S Historical roots and subsequent changes in the Japanese-American group examined through an interdisciplinary approach. Topics include historical events, culture, values, social and community structures, institutions, occupations, and future orientations. Recommended: AAS 205.

AAS 372 Internment Camps in North America: United States and Canada (5) I&S Comparative study of United States and Canadian internment camps incarcerating Japanese Americans and Japanese Canadians during World War II. Focuses on early history, dislocation and internment, effects (disorganization and adjustments), effects on the internees and society, and present situation.

AAS 380 Asian-American Communities and Social Policies (5) I&S History, culture, social organization, leadership patterns and interethnic relations of Asian-American (Chinese, Filipino, Japanese, and Korean) communities. Origins and impact of social policies relevant to Asian-American communities. Recommended: AAS 205.

AAS 385 Asian Americans: The Law and Immigration (5) I&S Traces the evolution of United States immigration law and policy from the nineteenth century to modern day, from free immigration to immigration restriction, through the elimination of race as a criterion, and culmination in the passage of the Simpson-Mezzoli bill. Recommended: AAS 205 or AAS 206.

AAS 392 Asian-American Women (5) I&S History of and contemporary issues related to Asian-American women in the United States. Recommended: AAS 205 or AAS 206. Offered: jointly with WOMEN 392.

AAS 395 Southeast-Asian Americans: History and Culture (5) I&S

AAS 401 Asian-American Literature to the 1940s (5) VLPA Asian-American literature from nineteenth-century immigrants to the 1940s. Emphasis on Chinese, Japanese, and Filipino writings detailing the experience and sensibility of first generation immigrants. Early twentieth-century writing focus on the development not only of Asian-American community, but also of second generation American-born Asian-American writers. Recommended: AAS 205 or AAS 206.

AAS 402 Contemporary Asian-American Literature (5) VLPA Asian-American literature from the 1940s to the present. Emphasis on the development of attitudes and identities in contemporary Asian-American literature, the role of the writer in a minority culture, and the relationship of literature to self and society.

AAS 403 Survey of Asian-American Poetry (5) VLPA Asian-American poetry, nineteenth century to present. Readings include poetry of the early immigrant to America, cultural imperatives transferred from old world to new world, and establishment of an Asian-American identity in poetry from 1870s through 1890s.

AAS 406 Asian American Activism (5) I&S Explores the multiple political traditions forged by Asian Americans, from the earliest challenges to racist laws and unequal wages to the latest debates over affirmative action and racial profiling. Examines Asian American communities organized to oppose and to perpetuate social inequalities. Offered: jointly with HSTAA 406.

AAS 416 Intermediate Tagalog (5) VLPA Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Tagalog. Review of structure. Prerequisite: AAS 306, 307, 308. Offered: A.

AAS 417 Intermediate Tagalog (5) VLPA Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Tagalog. Review of structure. Prerequisite: AAS 416. Offered: W.

AAS 418 Intermediate Tagalog (5) VLPA Readings from prose to traditional poetry. Emphasis on acquiring an ability to manipulate ideas in Tagalog. Review of structure. Prerequisite: AAS 417. Offered: Sp.

AAS 426 Advanced Tagalog (5) VLPA *faculty* Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. Prerequisite: AAS 418. Offered: A.

AAS 427 Advanced Tagalog (5) VLPA *faculty* Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. Prerequisite: AAS 426. Offered: W.

AAS 428 Advanced Tagalog (5) VLPA *faculty* Reading of contemporary Filipino (Tagalog) prose, poetry, and drama. Advanced conversation and composition. Prerequisite: AAS 427. Offered: Sp.

AAS 498 Special Topics (5, max. 10) I&S

AAS 499 Undergraduate Independent Study (1-5, max. 10)

Chicano Studies

CHSTU 101 Introduction to Chicano Studies (5) I&S *Gamboa, Salas* Selected themes in Chicano experience; studies in Chicano politics and Chicano socioeconomic concerns.

CHSTU 180 History of the Chicano People to 1848 (5) I&S *Gil* Historical survey of the Chicano people from pre-Hispanic times to the war between the United States and Mexico. Offered: jointly with HSTAA 283.

CHSTU 200 Latinos in the United States (5) I&S *Gamboa, Salas* Historical, social, and economic experience of Latinos in the United States. Major themes include education, labor, class, and gender identity. Analyzes rapid growth of old and newly established Latino communities, based on emigration from Latin America.

CHSTU 254 Northwest Latinos: History, Community, Culture (5) I&S *Gamboa* Traces the history, extent, and development of the Chicano/Latino presence from the early Spanish period to the present. Examines the major contemporary political, social, and economic issues affecting Northwest Chicano/Latinos in a broader national and international context.

CHSTU 255 Mexican Women: Past and Present (5) I&S *Salas* Survey of women in Mexican society from Meso-American times to the 1940s.

CHSTU 256 Chicanas: Gender and Race Issues (5) I&S *Salas* Contemporary issues in the Chicana movement since the 1940s. Issues range from feminism and Chicana political, educational, and social organizations, to work, family, health, and the arts.

CHSTU 260 Introduction to Chicano Politics (5) I&S Surveys the political position and activities of Mexican-American peoples in the United States from two perspectives: (1) Chicanos as objects of the political process of United States life, (2) contributions of the Chicano people to United States politics.

CHSTU 330 Chicano/Chicana Autobiography (5) I&S Explores the issue of Chicano, or Mexican-American, identity. Examines statements of selfhood by Chicanos, studied in order to understand the relationship between individual and society in creating identity.

CHSTU 340 Latina/Latino Theater (5) VLPA *Habell-Pallan* Explores the contextual, theoretical, thematic, and formal dimensions of U. S. Latina and Latino theater and performance art in the contemporary period. Examines performances and play scripts as a way of analyzing innovations in form, language, and content produced by Chicano/Latino teatro and performance art.

CHSTU 352 Mexican Immigration: A Comparative Analysis (5) I&S *Gamboa, Salas* Examines and compares constant Mexican immigration with that of other immigrants to the United States as one of the most important issues confronting Chicanos and other Americans in the United States.

CHSTU 356 The Chicano Family (5) I&S *Salas* The historical, psycho-social, and sociocultural role of the Chicano family from Meso-American times to the present.

CHSTU 405 Advanced Chicano Studies (5) I&S *Gamboa* Chicano culture as related to current values and health practices, Mexican labor and immigration in both historical and contemporary setting. Chicano politics 1848 to present. Recurrent problems of Chicanos in society; social movement for acceptance and for self-determination.

CHSTU 410 Latina Cultural Production (5) I&S/VLPA Explores the expressive culture of Chicana/Mexican American/Latina women in the United States. Cultural and artistic practices in home and in literary, music, film, spoken word, performing and visual arts. Focuses on how Chicana/Latina writers and artists re-envision traditional iconography. Offered: jointly with WOMEN 451.

CHSTU 416 Comparative Social Movements: Mexico and the United States (5) I&S *Pena* Historical, ethnographic, and theoretical perspectives in the study of Mexican-origin communities in social movements in Mexico and the United States with a focus on workers, immigrants, peasants, women, indigenous peoples, and students as forces of collective mobilization and social, cultural, and political change. Offered: jointly with ANTH 416.

CHSTU 498 Special Topics in Chicano Studies (3-5, max. 10) I&S *Gamboa, Olguin, Salas* Interdisciplinary course concentrating on one or more aspects of the Chicano experience.

CHSTU 499 Independent Study and Research (1-6, max. 10) Gamboa, Olguin, Salas Students work individually or in teams.

American Indian Studies

AIS 110 Musical Traditions of Native North America (3) VLPA Utilizes historical and contemporary sources to survey the music and music-related traditions of Native North America. Examines traditional music and context from the Northwest Coast, Arctic, Southwest, Great Basin, Plains, Plateau, California, and Eastern Woodlands music-style areas, as well as contemporary neo-traditional and popular genres of American Indian music.

AIS 113 American Indian Language: Navajo (5) Witherspoon Conversation, reading, and writing in Navajo. Oral literature and other aspects of Navajo culture integrated into language study.

AIS 114 American Indian Language: Navajo (5) Witherspoon Conversation, reading, and writing in Navajo. Oral literature and other aspects of Navajo culture integrated into language study. Prerequisite: AIS 113.

AIS 115 American Indian Language: Navajo (5) Witherspoon Conversation, reading, and writing in Navajo. Oral literature and other aspects of Navajo culture integrated into language study. Prerequisite: AIS 114.

AIS 151 Indian Art of Northwest Coast (3) VLPA *Oliver* Studio course on Pacific Northwest coast Indian/Eskimo art. Traditional and contemporary forms; principles of form, style, and techniques; values that influence Indian/Eskimo art styles.

AIS 170 Survey of North American Indian Art (5) VLPA Major American Indian art traditions of North America. Precontact and early-contact-era traditions and the evolution of Indian art forms in

contemporary times. Design and techniques in Indian art.

AIS 202 Introduction to Contemporary Experience in Indian America (5) I&S Survey of contemporary Native-American people, cultures, and issues. Focus on modern experiences through readings from Native-American autobiographies, contemporary narratives and literature, and reports of important topical issues, e.g., water rights, Indian gaming, treaty law.

AIS 203 Introduction: Philosophical and Aesthetic Universes (5) I&S Social constructions of reality, aesthetic as well as philosophic, as conceptualized by approximately five traditional American Indian cultures from different regions of North America.

AIS 230 Contemporary Indian Gaming and Casinos (5) I&S *Wright* Overview of the contemporary \$18.5 billion Indian Tribal gaming industry (with a focus on the Pacific Northwest), which is heavily regulated, is an economic engine for non-Indian communities, and funds economic, social and cultural revitalization of Indian Reservations, yet often generates intense political discussions. Offered: .W.

AIS 240 Native North American Women (5) I&S Indian women in the social structure; historical and contemporary roles; changes in male-female relationships; problems and opportunities of contemporary women; the feminist movement and Indian rights.

AIS 253 Wood Design (3, max. 9) VLPA *Oliver* Studio course in wood sculpture utilizing Pacific Northwest Indian hand tools. Properties of woods and their uses.

AIS 311 North American Indians: Pacific Northwest (5) I&S Traditional societies of the Pacific Northwest from southern Alaska to northern California; significant areal features, such as rank, totemic crests, guardian spirits, the potlatch, fishing, and foraging illustrated by comparisons and by selected ethnographic sketches. Continuity between past and present. Recommended: ANTH 100 or ANTH 202.

AIS 312 North American Indians: The Intermountain West (5) I&S Traditional cultures of Columbia and Fraser Plateau region and Great Basin: Interior Salish, Sahaptin and Nez Perce, Paiute, and their neighbors. Regional features of language, ecology, social life, myth, religion. Contemporary issues of reservation life, government, ethnic conflict in historical perspective. Recommended: ANTH 100 or ANTH 202.

AIS 316 North American Indians: The Southeast to 1850 (5) I&S Emphasis on prehistory, social organization, belief system, political alliances. European contact, effects of plantation slavery and slave trade on Indians, issues of ethnicity, and consequences of removal policies.

AIS 317 North American Indians: The Southwest (5) I&S *Witherspoon* Overview of history and ethnography of the Southwest with emphasis on Apacheans, Pueblos, and Pimans/Yumans. Social organization, religion, worldview, and expressive culture of such specific groups as Navajo, Hopi, Zuni, Tewa, and Tohono O'odham.

AIS 330 United States-Indian Relations (5) I&S *Harmon* History of relations between American Indians and non-Indians in the U. S. with

emphasis on national laws and policies. Examines origins and impacts of Indians' and non-Indians' strategies for dealing with each other, historical reasons for Indians' contemporary conditions and status.

AIS 331 American Indian History I: European Discovery to 1840 (5) I&S *Harmon* History of Indigenous peoples and their descendants in the area that now constitutes the United States, from the eve of European discovery of the Americas to 1840. Emphasis on relations between Indigenous peoples and immigrants. Offered jointly with HSTAA 331.

AIS 332 American Indian History II: 1840 to Present (5) I&S *Harmon* History of American Indians in the United States from 1840 to the present. Emphasis on relations between Indians and non-Indians, government policies, and Indian strategies of survival. Offered jointly with HSTAA 332.

AIS 335 American Indians and the Law (5) I&S *Harmon* History of laws governing American Indians: aboriginal law systems, U. S. laws, and contemporary tribal laws. Effects of laws and legal institutions on contemporary Indian identity and tribal status, self-government, land ownership and use, natural resources, religion, family life, cultural and spiritual practices, crimes and punishment, and federal responsibilities for Indians.

AIS 340 Indian Children and Families (5) I&S Cross-cultural survey of Indian child rearing, family structure, and related social issues. Includes historical changes in family structure, value orientation and adaptation to a bicultural environment, education, child welfare, health problems, and aging.

AIS 341 Native Women in the Americas (5) I&S Historiography, sociology, biography, autobiography, and fiction about native women in the United States and Canada. Offered: jointly with WOMEN 341. Offered: AWSpS.

AIS 350 Two-Dimensional Art of the Northwest Coast Indians (3, max. 9) VLPA *Oliver* Studio course emphasizes principles of structure and style of two-dimensional art which can be found on many old, traditional Northwest Coast pieces, such as painted storage boxes and chests, house panels, and ceremonial screens. Students apply these principles in creating a variety of graphic projects.

AIS 360 American Indians in Cinema (5) VLPA/I&S *Cote* Studies representations of American Indians in American films from 1900 to present. Examines the foundations of American Indian stereotypes and how Hollywood helped create and perpetuate those stereotypes. Activities include reading critical materials, and viewing, discussing, and writing critically about films by non-native directors. Offered: ASpS.

AIS 370 Researching Indians' History (5) I&S *Harmon* Finding and interpreting sources of information about American Indians' history. Offered: jointly with HSTAA 315:.

AIS 376 First Nations Literature (5) VLPA *Cote* Literature written by First Nations Canadian authors as a form of cultural resistance and a reasserting of identity. Offered: S.

AIS 377 Contemporary American Indian Literature (5) VLPA *Colonnese* Creative writings-novels, short stories, poems-of

contemporary Indian authors; the traditions out of which these works evolved. Differences between Indian writers and writers of the dominant European/American mainstream. Offered: jointly with ENGL 359.

AIS 378 Contemporary American Indian Literature: A Northwest Focus (5) VLPA Literature and poetry of the Pacific Northwest (Coast and Plateau) Native peoples. Contemporary literature and discussion of social and cultural issues raised by American Indian writers and writing. Offered: AW.

AIS 379 Powwow: Tradition and Innovation (5) VLPA/I&S Explores the historical and cultural roots of powwow. Discusses the ways this Indigenous Native art form has adapted since prehistoric times. Includes planning and staging of the annual UW First Nations Powwow.

AIS 425 Indians in Western Washington History (3) I&S *Harmon* Relations of Indians and non-Indians in the Puget Sound region, from the 1790s to the present, with emphasis on evolving ideas about Indian identity. Offered: jointly with HSTAA 417.

AIS 431 History of American Indian Education (5) I&S Traditional and European-introduced methods of schooling, the federal role in Indian education, and contemporary Indian education issues. Special attention to Indian concepts of learning; boarding school education; the role of the Bureau of Indian Affairs; current trends in bilingual and bicultural education for Indians.

AIS 435 Spiritual Encounters: Native Spirituality in the Contact Era (5) I&S *Wright* Explores North American Indigenous interaction with, resistance to, and syncretization with Christianity, the European colonizers' religious system. Focuses on Native revitalization movements and new forms of religious expression such as the Indian Shaker Church and the Peyote Road, as well as the legal, social, and cultural issues of Native freedom of religion. Offered: W.

AIS 440 Reading Native American Women's Lives (5, max. 10) I&S *Jacobs, Ross* Seminar based on social science writings, autobiographies, biographies, and fiction written by, with, or about indigenous women of the United States and Canada. Offered: jointly with WOMEN 440.

AIS 441 Gender in Native American Societies (5) I&S *Cote* Examines gender roles, identity, and relations in Native American pre- and post-contact societies. Analyzes how contact with European gender customs influenced and altered traditional gender practices, especially in regards to women's social position and the roles of the third/fourth genders in Native American communities.

AIS 442 Images of Natives in the Cinema and Popular Cultures (5) I&S/VLPA *Ross* Cultural examination of images of native people in cinema and popular culture based on social science writings and films by or about natives in the United States and Canada. Offered: jointly with WOMEN 442.

AIS 443 Indigenous Films, Sovereign Visions (5) VLPA/I&S *Cote, Hart, Ross* Explores fiction, documentary, experimental film, and digital media from indigenous artists from around the world. Focuses on personal, political, and cultural expression. Issues include media and sovereignty movements, political economy, language

revitalization, the politics of decolonization, and indigenous aesthetics. Offered jointly with COM 443.

AIS 450 American Indian Song and Dance Tradition: Performance (3) VLPA Performance of various American Indian social dances, songs, and games. In-depth study of various American Indian vocal styles.

AIS 451 Critical Conversations in American Indian Studies (5, max 10) Critical issues in American Indian Studies. Topics vary. Offered: Sp.

AIS 461 First Nations Government and Politics in Canada (5) I&S *Cote* Focuses on First Nations government and politics in Canada. Examines development of First Nations political governing structures with an introduction to the values, perspectives, concepts, and principles in Native political cultures. Explores federal Indian policy in context of First Nations strategies to become self-governing.

AIS 466 Producing the Documentary Short (5) VLPA *Cote, Gibbons, Hart, Ross* Explores documentary theory, methods, and aesthetics. From humanities, social science, and Indigenous studies perspectives, students critique a self-produced documentary, looking at methodology, perspective, and ethics. Students also explore pre-production, production, and post-production documentary techniques.

AIS 469 Special Studies in American Indians (3, max. 6) I&S Delineation and analysis of a specific problem or related problems in American Indian Studies. Offered occasionally by visitors or resident faculty.

AIS 475 Special Topics in Indian Studies (1-5, max. 15) I&S Current research and readings in American Indian Studies content areas.

AIS 498 Senior Project (5) Intensive research and presentation on a selected issue. For students majoring in American Indian Studies or other advanced students by permission. Offered: AWSp.

AIS 499 Independent Study (1-5, max. 15) Readings and/or research under faculty supervision.

AIS 501 Documentary Film/Video Research Methods in Native Communities (5) Seminar exploring theoretical, methodological, and aesthetic issues when research documentary film and video projects in Native American communities. Utilizes readings, screening, discussions, and a major research project to explore issues of documentary representation, ethics, and historiography. First part of a two-quarter documentary production sequence. Offered: AWSpS.

AIS 503 Documentary Theory, Form, and Practice (5) Explores documentary theory and practice, utilizing readings and documentary filmmaking exercises. Students create short documentary sequences while investigating traditional and more experimental ideas about the non-fiction form; theories of representation, subject ethics, documentary authenticity, the intersection of fiction and non-fiction forms, documentary and performance, documentary and historiography.

AIS 590 Special Topics (1-5, max. 15) Offered by visitors or resident faculty as a one-time, in-depth study of special interest.

Anthropology

Anthropology

ANTH 100 Introduction to Anthropology (5) I&S Introduction to the subfields of archaeology, biocultural anthropology, and sociocultural anthropology through the examination of selected problems in human physical, cultural, and social evolution. Not recommended for students who have had other courses in anthropology, archaeology, or biocultural anthropology. May not be counted toward the 55 credits required for the major in anthropology. Offered: AWSp.

ANTH 150 Culture and Rights: Exploring the Meaning and Practice of Human Rights (5) I&S Examines social justice issues with the aim of obtaining deeper understanding of human rights. Analyzes historical and theoretical foundations and introduces international and regional institutions designed to implement and enforce human rights. Case studies in sovereignty, war crimes, ethnic cleansing, genocide, torture, truth commissions, and forgiveness.

ANTH 202 Principles of Sociocultural Anthropology (5) I&S Comparison of lifeways of various non-Western and Western peoples. Introduction to basic theories and methods used in the field.

ANTH 203 Introduction to Anthropological Linguistics (5) I&S/VLPA Linguistic methods and theories used within anthropology. Basic structural features of language; human language and animal communication compared; evidence for the innate nature of language. Language and culture: linguistic relativism, ethnography of communication, sociolinguistics. Language and nationalism, language politics in the U.S. and elsewhere. Offered: jointly with LING 203.

ANTH 204 Reading Ethnography (5) I&S Introduction to the descriptive and analytic literature of cultural anthropology. Extended examination of representative accounts of the lifeway of peoples from selected areas of the world with an emphasis on methods of observation and analysis.

ANTH 206 The Cultural Animal (5) I&S/NW Examination of the interaction between biology and culture in shaping human social behavior. Basic principles of natural selection, gene-environment interaction, cultural transmission, learning, and cultural evolution; application of these to various topics, including gender, violence, politics, kinship, and religion.

ANTH 207 Class and Culture in America (5) I&S Anthropological view of the contemporary United States with emphasis on social class. Through ethnographic readings examines education, work, political economy, working class experience and the ideology of the middle class, and relations between class and race, gender, ethnicity, language, place, sexuality, and culture.

ANTH 208 The Culture Concept (5) I&S History of the culture concept and its use in the field of cultural anthropology. History of its emergence in European colonial expansion and contemporary debates about its place as the central concept defining the field of anthropology.

ANTH 209 Anthropology Through Visual Media (5) I&S/VLPA Theories of culture and cultural variation, as seen and understood through visual media such as films, video, and photography.

ANTH 210 Introduction to Environmental Anthropology (5) I&S Introduction to human/environment interactions from various anthropological perspectives. Intellectual history of anthropological approaches to environment, emphasizing the mutual interconnectedness of people and nature. Survey of evolutionary models; cultural ecology; systems approaches; indigenous knowledge; ethnoecology; nature and the state; political ecology; ecofeminism; and environmentalism.

ANTH 228 Identities: Race, Class, Gender, and Sexuality in Anthropology (5) I&S An introduction to the study of race, class, gender, and sexuality in anthropology. Through ethnographic and theoretical readings, students are introduced to the concept of identity as intersectional construction and social performance.

ANTH 289 Identities: Service Learning (3) I&S . Engages students in volunteer activities in order to explore the process of social change around intersections of race, class, gender, and sexuality. A service learning companion course to ANTH 228. Students must be enrolled in ANTH 228 in order to enroll in ANTH 289.

ANTH 301 Human Nature and Culture (3) I&S Comparison of various anthropological perspectives on the sources of variation in customs, values, and beliefs of human groups, including non-Western peoples and contemporary Americans.

ANTH 305 Anthropology of the Body (5) I&S Surveys classic anthropological literature examining the relationship between culture and the body. Examines Euroamerican body culture historically. Explores how the body is represented in mass media and the effects this has on everyday body ideologies.

ANTH 306 Representations of the Pacific Islands and Islanders (3) I&S/VLPA Kahn Explores written texts and visual images about the Pacific Islands and Islanders in an effort to understand the power of representation and its relationship to the construction of knowledge. Examples drawn from early explorers, artists, novelists, anthropologists, the tourist industry, and Pacific Islanders.

ANTH 307 U.S. Pacific Islander Contemporary Culture (5) I&S McGrath Examines U.S. Pacific Islander culture as informed by Pacific history, social and cultural organization. Emphasis on understanding contemporary experience in the U.S. and other diaspora communities. Major themes include post-colonialism, migration, family, religion, politics, gender, education, and transnational identity. Recommended: either ANTH 202 or AES 151. Offered: jointly with AAS 300. Offered: Sp.

ANTH 308 Anthropology of Women's Health and Reproduction (5) I&S Chapman Introduction to anthropological approaches to women's health, addressing women's health status and participation in healthcare. Topics include reproductive health, women's bodies and sexuality, social policy in relation to gender, race, ethnicity, and class. Emphasis on how the politics of gender shapes women's experiences of health care institutions in the U.S.

ANTH 310 Native North American Societies (5) I&S Smith Traditional cultures of America north of Mexico, emphasizing diversity of North American Indian and Eskimo societies. Origins of Native-American culture areas and language groupings; subsistence systems; levels of social organization; European conquest and colonialism; and description of representative cultures from the ten culture areas. Recommended: ANTH 100.

ANTH 312 Pacific Islands Literature (5) I&S/VLPA Focuses on works written by Pacific Islanders (novels, short stories, plays, and poetry) since the 1970s. Explores colonialism and its effects on indigenous peoples. Examines discourses of gender, class, and cultural identity within the Pacific Islands region.

ANTH 313 Peoples of Africa (5) I&S Survey of the many cultures of pre- and post-colonial sub-Saharan Africa. Appreciation of the adaptability, strength, and creativity of African peoples. Recommended: ANTH 100.

ANTH 314 Culture, Environment, and Identity of Island Southeast Asia (5) I&S Lowe Anthropological study of colonial and post-colonial contexts of Island Southeast Asia. Emphasis on historical legacies, influence of world religions, formation of national and collective identities, revolution and national politics, and modernities. Prerequisite: either one 200-level ANTH course, LING 203, or one SIS course. Offered: jointly with SISSE 314.

ANTH 315 Southeast Asian Civilization: Buddhist and Vietnamese (5) I&S Keyes Civilizations of Theravada Buddhist societies in Burma, Thailand, Cambodia, and Laos and in Vietnamese societies of Southeast Asia. Culture of tribal peoples who live on peripheries of these societies. Cultural transformations consequent upon the war in Indochina and resettlement of Indochinese refugees in United States. Offered: jointly with SISSE 315.

ANTH 316 Modern South Asia (5) I&S Twentieth-century history and society of Indian subcontinent. Topics include nationalism, rural and urban life, popular culture, gender, and environmental politics. Offered: jointly with SISSA 316.

ANTH 317 Anthropology of Tibetan Civilization (5) I&S Introduces the basic features of Tibetan society and culture, exploring how the global debate over Tibet's past, present, and future relates to contemporary concerns in anthropology, through the examination of Tibetan history, social and political organization, religion, and other cultural themes in both traditional and contemporary contexts.

ANTH 318 Peoples and Cultures of the Islamic Middle East (3) I&S Survey of cultures and peoples of Islamic Middle East and North Africa. First half of the course emphasizes the integration of peasant, urban, and nomadic societies in the traditional culture and economy; the second half concentrates on the transformation of the traditional life styles through the process of westernization and modernization.

ANTH 320 Game Theory, Evolution, and Behavior (4) I&S, QSR Bergstrom, Smith Introduction to the logic and basic techniques of modern game theory, and exemplary applications to understand behavioral variation and social interaction in humans and other species. Emphasizes non-mathematical representations of fundamental concepts and processes, with

considerable use of computer-based exercises and experiments. Offered: jointly with BIOL 320.

ANTH 321 Comparative Religion (3) I&S Anthropological approaches to religious experience and belief with emphasis on conceptual issues such as ritual, symbolism, identity, ecstatic experience, and revitalization movements in the context of globalization. Also addresses the diversity of religious expression in American culture and how that compares with other societies. Offered: jointly with RELIG 321.

ANTH 322 Comparative Study of Death (5) I&S Death analyzed from a cross-cultural perspective. Topics include funerary practices, concepts of the soul and afterlife, cultural variations in grief, cemeteries as folk art, and medical and ethical issues in comparative context. American death practices compared to those of other cultures. Offered: jointly with RELIG 320.

ANTH 323 Human Rights Law in Culture and Practice (5) I&S Introduces the complexities of issues surrounding human rights. Examines human rights concerns through critical analyses, taking into account legal, social, economic, and historical variables. Offered: jointly with LSJ 321.

ANTH 324 Culture and Politics of Africa (5) I&S Hoffman Introduction to African cultural responses to the slave trade, European colonialism, and globalization. Topics include an examination of Euro-American representations of Africa and how they are often at odds with African realities.

ANTH 330 Religion, Identity, and Cultural Pluralism (5) I&S The role of religion in shaping personal and communal identity in a pluralistic society. Themes include current dimensions of American pluralism, effects of ethnicity, immigration, and electronic communication on building religious communities, and issues of conflict, violence, and reconciliation. Offered: jointly with RELIG 330.

ANTH 331 Native Art of the Pacific Northwest Coast (5) I&S/VLPA Survey of the indigenous arts of the Pacific Northwest Coast from the Columbia River in the south to Southeast Alaska in the north. Overview of ancient through contemporary times, focusing on the historical and cultural contexts of the arts and the stylistic differences between tribal and individual artists' styles. Offered: jointly with ART H 331.

ANTH 339 Social Movements in Contemporary India (5) Ramamurthy, Sivaramakrishnan Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women's movements. Includes critiques of development and conflicts over forests, dams, women's rights, religious community, ethnicity, and citizenship. Offered: jointly with WOMEN 339/SISA 339.

ANTH 341 Political Violence and the Post-Colonial State in South Asia (5) I&S Examines theoretical approaches to the analysis of collective, state, and anti-state violence in post-colonial South Asia through the study of specific cases of political violence in modern India, Pakistan, Sri Lanka, and Nepal. Offered: jointly with SISSA 341.

ANTH 345 Women and International Economic Development (5) I&S Ramamurthy Questions how women are affected by economic development in Third World and celebrates redefinitions of what development means.

Theoretical perspectives and methods to interrogate gender and development policies introduced. Current processes of globalization and potential for changing gender and economic inequalities assessed. Offered: jointly with SIS 345/WOMEN 345.

ANTH 352 Buddhism and Society: The Theravada Buddhist Tradition in South and Southeast Asia (5) I&S Introduction to the religious tradition of Theravada Buddhism (as practiced in Sri Lanka, Burma, Thailand, Laos, and Cambodia) and examination of the variations in ethical orientations developed through Theravada Buddhist ideas. Recommended: RELIG 202 or one eastern religions course. Offered: jointly with RELIG 350.

ANTH 353 Anthropological Studies of Women (5) I&S Critical examination of the intersections between anthropology, research on gender issues, and feminism. Readings and class discussions examine the ways women have been represented in the field of anthropology and the repercussions of these anthropological images of women on contemporary understandings of gender. Offered: jointly with WOMEN 353.

ANTH 356 Visual Anthropology (3) I&S The place of photography and films in ethnography; their use in the documentation and interpretation of cultural and social systems.

ANTH 358 Culture and Cognition (5) I&S/NW Surveys anthropological theories and research on the relationship between language, thought, and behavior. Examines the influence of cultural inheritance on perception, classification, inference, and choice. Describes relevant cross-cultural research methods and evaluates theoretical models used by cognitive anthropologists. Prerequisite: either ANTH 203, LING 203, or PSYCH 355.

ANTH 359 Linguistic Ethnography (5) I&S Language use in cultural contexts. How language reflects world view. Language use in culturally significant settings. Analyzes sets of culturally specific terms in semantic domains. Includes projects demonstrating application of theory and method to data addressing specific problems. Workshop format.

ANTH 360 Anthropology of Popular Culture (5) I&S Bilaniuk Analysis of the forces that shape popular culture. Examination of the local meanings of global trends in music, clothing, and leisure activities through case studies around the world. Students learn ethnographic methods and conduct an original research project. Prerequisite: one 200-level ANTH course.

ANTH 362 Anthropology of Tourism (5) I&S Kahn Anthropological approaches to tourism. Debates about cultural encounters and cultural change, authenticity, economic development, social inequalities, identity, gender, ethnicity, nationality, and cultural representation. Prerequisite: one 200-level ANTH course.

ANTH 370 Han Chinese Society and Culture (5) I&S Anagnost, Harrell Themes in the society and culture of the Han Chinese people. Concepts of self; personal interaction; family, gender, and marriage; communities and the state; religion and ritual; class, social categories, and social mobility; culturalism, nationalism, and patriotism. Offered: jointly with SISEA 370.

ANTH 371 Anthropology of Development (5) I&S Sivaramakrishnan Development refers to

social, economic, cultural, political transformations viewed as progress. Studied from anthropological perspectives. Historical, social context for emergence of ideas of development. Role of development in promoting national cultures. Impact of development on individual citizenship, families, rural-urban relations, workers, business, environment. Prerequisite: one 200-level ANTH course. Offered: jointly with ENVIR 371.

ANTH 374 Narrative, Literature, and Medical Anthropology (5) I&S Taylor Introduces anthropological perspectives on the workings of narrative in illness, healing, and medicine. Considers writings in medical anthropology alongside other genres of writing about similar topics. Readings include memoirs and fiction as well as scholarly articles.

ANTH 375 Comparative Systems of Healing (3) I&S Introduction to the anthropological study of healing. Examines four healing traditions and addresses their similarities and differences. Includes anthropological theories of healing and religion.

ANTH 379 Prisons in Anthropological Perspective (5) I&S Rhodes An introduction to prisons from an anthropological point of view, with focus on prisons as total institutions. Topics include the experiences of prisoners and staff, prison history, issues of race and gender associated with incarceration, and the imprisonment of the mentally ill. Offered: jointly with LSJ 379.

ANTH 399 Junior Honors Seminar (5) I&S Teaches skills required to write senior honors thesis, including evaluation of academic and scientific writing, formulation of problem, collection of bibliographic and other resources, evaluation of research proposals, and research proposal preparation. Final product is a formal thesis prospectus.

ANTH 401 West African Societies (3) I&S Social and cultural features of coastal and interior West African societies, including the Western Sudan. Detailed study of selected societies. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 402 Societies of Eastern and Southern Africa (5) I&S Historical background and contemporary life of cultural groups in eastern and southern Africa with special study of selected cases of political and economic organization and cultural change. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 404 South America (5) I&S Survey of anthropological research among the traditional peoples of South America. Historical background and contemporary life of cultural groups of the Amazonian Basin. Transformation of traditional life-styles through the process of European conquest and the aftermath of colonialism. Detailed study of selected societies. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 406 China's Environment (5) I&S/NW Analysis of contemporary environmental problems in China, including population, food, water supply, pollution, biodiversity, and environmental activism. Combines natural science and social science perspectives. Prerequisite: either ANTH 210, ENVIR 201, SIS 200, SIS 201, or SIS 202. Offered: jointly with SISEA 406.

ANTH 412 South Asian Social Structure (5) I&S Caste class, and community in modern India. Transitions from colonial typology to analysis of social change, diversity, stability, and caste hierarchy in rural society. Current debates on class and community in Indian society, rural and urban, explored through themes of identity, structure, and mobility. Prerequisite: one 200-level ANTH course. Offered: jointly with SISSA 412.

ANTH 416 Comparative Social Movements: Mexico and the United States (5) I&S Pena Historical, ethnographic, and theoretical perspectives in the study of Mexican-origin communities in social movements in Mexico and the United States with a focus on workers, immigrants, peasants, women, indigenous peoples, and students as forces of collective mobilization and social, cultural, and political change. Offered: jointly with CHSTU 416.

ANTH 418 Indian Heritage of Mexico and Central America (5) I&S Indian civilization of Mexico and Guatemala, their origins and ecological foundations. Contemporary communities of Mexico and Guatemala, focusing on creative adaptation of pre-Columbian traditions to modern national realities. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 420 Psychoanalysis and the Study of Culture (3) I&S Spain Anthropological use of theories developed by Freud to understand culture. Reviews psychoanalytic theory as a foundation for examining the work of Roheim, LaBarre, Devereaux, Kardiner, and Spiro, among others. Topics covered include the universality of oedipality and the utility of psychoanalysis in non-Western cultures.

ANTH 421 Belief, Ritual, and the Structure of Religion (5) I&S Systematic survey of concepts, models, and theories that characterize the anthropological study of religion. Consideration of the human universal basis of religion and of diverse ways in which religions are constructed and related to social experience. Prerequisite: either ANTH 321 or RELIG 201; RELIG 202.

ANTH 423 Traffic Across Cultural Boundaries (5) I&S Focuses on the movement of cultural patterns and processes across boundaries, examining the "contact zones" in colonial encounters, moving to borrowing and blendings along ethnic and national borders. Examines border crossing of immigration and diasporas. Ethnographic examples from the Americas and Africa. Prerequisite: one 200-level ANTH course.

ANTH 424 Hunter-Gatherer Societies (4) I&S Comparative examination of human foraging societies, emphasizing ethnographic cases and socioecological analysis. Foraging and human evolution; rationality of foraging societies; population and reproductive strategies; variability in social organization and land use; power relations between the sexes; ritual and belief; contemporary status of hunter-gatherer populations. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 425 Anthropology of the Post-Soviet States (5) I&S Analysis of Soviet and post-Soviet culture and identity. Historical transformations in Soviet approaches to ethnicity and nationality; contemporary processes of nationbuilding and interethnic conflict. Examination of culture through the intersection of social ritual, government policies, language, economic practices, and daily life. Regional focus will vary. Offered: jointly with SISRE 425.

ANTH 427 Anthropology in Urban Settings (3) I&S Cross-cultural examination of theoretical issues in anthropology as studied in urban places. Focuses on ethnic identity and the formation of urban ethnic groups; migration and its rural and urban consequences; family and kinship organization as an adaptation to urban complexity; the nature of urban voluntary associations; law and politics; and the developments in anthropological method. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 428 Anthropological Perspectives on Ethnicity (5) I&S Anthropological approaches to ethnicity and ethnic group relations with reference to other models including race, caste, class, regional groupings, nations, religion, and stratification. Data drawn from precolonial, colonial, and postcolonial periods. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 429 Expressive Culture (5) VLPA Anthropological view of one expressive aspect of culture: plastic and graphic arts, myth and folktale, music, dance, humor and tragedy, or play and games. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 430 The Anthropology of Music (3) I&S/ VLPA Analysis of aspects of anthropological thought influential in ethnomusicology. Critical evaluation of dominant theoretical schools and modes of explanation, e.g., evolutionist, diffusionist, historical particularist, structuralist, functionalist, symbolist, and semiotic, through detailed examination of seminal texts. Offered: jointly with MUSIC 480; alternate years.

ANTH 432 Sociolinguistics I (5) I&S/VLPA Social variation in the phonology, morphology, syntax, lexicon of languages and dialects. Nonstandard language, diglossia, pidgins and creoles, gender differences, bi- and multilingualism, ethnography of speaking, pragmatics, and language attitudes. Prerequisite: either LING 200 or LING 400; recommended: prior or concurrent registration in ANTH 451 or LING 450. Offered: jointly with LING 432.

ANTH 433 Sociolinguistics II (3) I&S/VLPA *Wassink* Examines field methods linguists use in socially oriented studies of language variation and change. Students learn to target and design interviews appropriate for eliciting specific kinds of linguistic data. Discussion of issues related to recording, ethics, and analysis of large bodies of data. Prerequisite: LING 432. Offered: jointly with LING 434.

ANTH 435 Economic Anthropology (5) I&S Chief features of nonmonetary and simple monetary economies. Impact of central or metropolitan market economy and industrial technology as peripheral systems, especially of small-scale and limited monetary circulation. Development and application in anthropology of economic concepts, including Marxian. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 436 Comparative Family Organization (5) I&S Function and structure of family developmental processes in band, tribal, peasant, and modern societies. Illustrates inter- and intrasocietal variation and provides data for construction of formal models of process and variation in family systems. Prerequisite: either one 200-level ANTH course, LING 203, or SOC 352.

ANTH 437 Political Anthropology and Social Change (5) I&S *Sivaramakrishnan* Study of politics from different anthropological perspectives, specially processual approaches to political change. Focused examination of cultural aspects of modern state formation in local and regional contexts. Themes: colonialism and nationalism, regime and transitions, local politics and global processes, social construction of bureaucracy. Prerequisite: one 200-level ANTH course.

ANTH 438 The Analysis of Kinship Systems (5) I&S Data, theories, and analytical technique used in the study of kinship systems, including our own, from around the world. Prerequisite: one 200-level ANTH course or LING 203.

ANTH 440 Child Rearing, Culture, and Health (3) I&S Cross-cultural study of the child-rearing practices, cultural norms, and health behavior of children and adolescents in different societies. Comparative approaches, diverse theoretical postures, and empirical research findings are used. Offered: jointly with NURS 495.

ANTH 441 Psychological Anthropology (5) I&S Assessment of mutual relevance of cultural and psychological variables in anthropology. Historical development of principal topics, e.g., cognition, national character, enculturation, personality and social change, cross-cultural psychiatry, sex and temperament, deviance, and psychoanalytic studies of culture. Prerequisite: either PSYCH 101 or PSYCH 205.

ANTH 444 Politics of Representation in Modern China (5) I&S Focuses on issues of representation and power in twentieth century China. Combines substantive information on modern Chinese society and culture with recent debates in social theory and the politics of representation. Major themes include Chinese nationalism, body politics, popular culture, and everyday practice. Offered: jointly with SISEA 444.

ANTH 445 Literature and Society in Southeast Asia (5, max. 10) I&S/VLPA Focus on either Vietnam or Thailand. Provides students with opportunity to explore how those living in Southeast Asia have reflected on the radical social changes their societies have undergone through novels, short stories, and poetry. Prerequisite: one 200-level ANTH course or LING 203. Offered: jointly with SISSE 445.

ANTH 446 Class and Culture in East Asia (5) I&S Examines the nexus between culture and systems of social stratification/class in East Asia, with an emphasis on Taiwan, Korea, Japan, and China. Topics include class formation, mechanisms of social mobility and reproduction, markers of status and hierarchy, resistance, and the formation of class identity. Offered: jointly with SISEA 443.

ANTH 447 Anthropology of Chinese Religion (5) I&S Chinese religions, including folk, popular, and new religions, viewed from an anthropological perspective. Prerequisite: either ANTH 202, 204, 208, 321, 421, 370 or RELIG 202, or SISEA 370, 454.

ANTH 448 Modern Korean Society (5) I&S Social organization and values of twentieth-century Korea. Changes in family and kinship, gender relations, rural society, urban life, education, and industrial organization since 1900. Differences between North and South Korea since 1945. Recommended: HSTAS/ SISEA 212. Offered: jointly with SISEA 448.

ANTH 449 Social Transformation of Modern East Asia (5) I&S Comparative study of social change in China, Japan, Korea, and Vietnam since 1945. Concentration on small-scale social units in rural and urban areas under both communist and capitalist political systems. Recommended: two history or anthropology of East Asia courses. Offered: jointly with SIS 449.

ANTH 450 Language and Gender (5) I&S, VLPA *Bilaniuk* Survey of the theoretical trends, methods, and research findings on the relationship between language and gender. Focus on power relations in gendered language use. Extensive study of research based on conversational analysis. Prerequisite: LING 200; either LING 201, LING 203, or ANTH 203. Offered: jointly with WOMEN 450/LING 458.

ANTH 451 Comparative Historical and Social Ecology of the Tropics (5) I&S *Sivaramakrishnan* Historical and social aspects of tropical environmental change. Comparative analysis of resource management, conservation, and environmental regulation issues in Asia, Africa, and Latin America from cultural and political economic perspectives. Special focus on issues of state policy, expert knowledge, social conflict, and international politics. Prerequisite: ANTH 210. Offered: jointly with ENVIR 451.

ANTH 454 Women, Words, Music, and Change (5) I&S/VLPA Comparative analysis of use of myths, tales, music, and other forms of expressive culture to account for, reinforce, and change women's status and roles. Recommended: WOMEN 353. Offered: jointly with WOMEN 454.

ANTH 455 Areal Linguistics (3, max. 6) I&S/ VLPA Issues involved in classification of languages. Systems of classification based on structure, word order, areal features. Ways in which languages may be classified for different purposes. Borrowing vocabulary specialization, lexical change, and language death and revival. Prerequisite: either LING 200, LING 201, ANTH/ LING 203, or LING 400. Offered: jointly with LING 455.

ANTH 456 Contemporary Ethnography (5) I&S Techniques and theories of ethnographic description for the anthropological analysis of contemporary life. Materials drawn from the contemporary United States, with a focus on issues and events in the Seattle area. Includes fieldwork projects. Prerequisite: either one 200-level ANTH course or LING 203.

ANTH 457 Ecological Anthropology (5) I&S Survey of anthropological research on interaction between human societies and their environments. Logic of different subsistence systems; intensification and transformation of subsistence strategies; population regulation; ecological aspects of human nutrition, disease, spatial organization, ethnicity, social stratification, conflict, and cooperation; historical roots of current ecological crisis.

ANTH 458 Ethnobiology: Plants, Animals, and People (5) I&S *Hunn* Culturally mediated relationships between human and natural environment studied in a comparative and evolutionary framework. How do peoples in diverse cultures recognize and name plants and animals and understand their relationship with nature? How is this traditional ecological knowledge applied in people's daily lives? Prerequisite: either BIO A 201, ARCHY 205, or one 200-level ANTH course.

ANTH 459 Culture, Ecology, and Politics (5) I&S *Pena* Critical studies of class, gender and race differences in environmental politics. The political-economic dimensions of ecological change. Contemporary environmental movements including the varieties of bioregionalism, deep ecology, ecofeminism, ecosocialism, environmental justice, and social ecology. Offered: jointly with ENVIR 459.

ANTH 460 History of Anthropology (5) I&S Sources and development of leading concepts, issues, and approaches in anthropology. Findings of anthropology in relation to scientific and humanistic implications and to practical application. Main contributors to field; their work and influence. Past, present, and future perspectives, including anthropology of modern life.

ANTH 464 Language Politics and Cultural Identity (3) I&S/VLPA *Bilaniuk* Theories and case studies of the power of language as how it is manipulated. Multilingualism, diglossia. Role of language and linguistics in nationalism. Standardization, educational policy, language and ethnicity. World languages, language death and revival. Prerequisite: either LING 200, LING 201, ANTH/LING 203, or LING 400. Offered: jointly with LING 433.

ANTH 465 Critical Anthropology of Mass Culture (5) I&S Critical overview of theories of mass culture and their relationship to current anthropological practice. Analyses of the historical interconnections among capitalism and commodity fetishism, modernity and representation, and media and consumption.

ANTH 466 Anthropology Honors Thesis ([1-9]-, max. 18) I&S Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

ANTH 467 Anthropology of Education (5) I&S Uses a wide range of social theory and philosophy to investigate mechanisms which reproduce inequality and asymmetry in American education.

ANTH 469 Special Studies in Anthropology (3-5, max. 15) I&S Delineation and analysis of a specific problem or related problems in anthropology. Offered occasionally by visitors or resident faculty.

ANTH 470 Minority Peoples of China (5) I&S Interaction between China and the peoples of its periphery, including inner Asia, Tibet, northern mainland Southeast Asia, and aboriginal peoples of Taiwan. Emphasis on ethnicity, ethnic group consciousness, and role of the Chinese state. Prerequisite: one 200-level ANTH course; LING 203; either ANTH/SISEA 370 or HSTAS 454. Offered: jointly with SISEA 470.

ANTH 471 Colonialism and Culture (5) I&S Explores the cultural, political, and historical implications of the power to colonize. Readings include ethnographic, historical, and literary works on colonialism, nationalist responses, and postcolonial positions.

ANTH 473 Anthropology of Science and Technology (5) I&S/NW *Lowe, Taylor* Introduces the study of science and technology as social and cultural phenomena. Considers both theoretical and methodological questions. Readings include key texts from interdisciplinary field of science studies as well as selected

ethnographic texts. Examples taken from U.S. society and other local contexts. Prerequisite: one 200-level ANTH course.

ANTH 474 Social Difference and Medical Knowledge (5) I&S *Taylor* Explores relations between medical and social categories: how social differences become medicalized; how medical conditions become associated with stigmatized social groups; and how categories become sources of identity and bases for political action. Considers classifications (race, gender, sexuality, disability) and how each has shaped and/or been shaped by medical science/practice.

ANTH 475 Perspectives in Medical Anthropology (5) I&S Introduction to medical anthropology. Explores the relationships among culture, society, and medicine. Examples from Western medicine as well as from other medical systems, incorporating both interpretive and critical approaches. Offered: jointly with HSERV 475.

ANTH 476 Culture, Medicine, and the Body (5) I&S Explores the relationship between the body and society, with emphasis on the role of medicine as a mediator between them. Case study material, primarily from contemporary biomedicine, as well as critical, postmodern, and feminist approaches to the body introduced within a general comparative and anthropological framework.

ANTH 477 Medicine in America: Conflicts and Contradictions (3) I&S Introduction to the pragmatic and theoretical dilemmas of current biomedical practice with emphasis on social and cultural context. Case studies in technological intervention, risk management, and other health-related issues used to explore connections among patients' experiences, medical practices, and the contemporary social context.

ANTH 478 Introduction to the Anthropology of Institutions (5) I&S *Rhodes* Historical, theoretical, and ethnographic perspectives on the study of total institutions, with an emphasis on prisons and psychiatric facilities. Includes issues of subjection and subjectivity, institutional social dynamics, and social justice concerns.

ANTH 479 Advanced Topics in Medical Anthropology (3-5, max. 15) I&S *Chapman, Rhodes, Taylor* Explores theoretical and ethnographic advanced topics in medical anthropology. Prerequisite: permission of instructor.

ANTH 480 Introduction to Museology (3) I&S Museum history, philosophy, and basic operations, including organization, income, collection management, conservation, exhibition, security, education, research, and ethics. Offered: jointly with MUSEUM 480.

ANTH 484 Motherhood: Ideologies and Technologies (5) I&S *Twine* Examines how motherhood is culturally constituted, regulated, and managed within various ideological and technological milieus. Uses ethnographies from anthropology and case studies from feminist legal theory. Topics include slave mothers, surrogate mothers, lesbian mothers, transracial mothers, co-mothers, teen mothers. Prerequisite: WOMEN 200. Offered: jointly with WOMEN 458.

ANTH 485 Cultural Property: Legal and Ethical Issues (3) I&S Examines the complex history of legal and ethical issues affecting the acquisition, ownership, and disposition of cultural property, with special attention to modern

indigenous peoples' requests for repatriation of collections from museums, as well as concerns with intellectual property rights, national patrimony policies, and related trade issues.

ANTH 486 Human Family Systems: Biological and Social Aspects (5) I&S Biological bases for human mating and reproduction and an examination of the range of cross-cultural variability in human systems of kinship and marriage; comparisons among a wide range of human and nonhuman species and between Western and non-Western human societies; interplay of biological, ecological, and sociocultural factors in determining the structure and function of human family systems. Offered: jointly with SOC 486.

ANTH 487 Cultures and Politics of Environmental Justice (5) I&S *Pena* Comparative survey of environmental justice movements in the world with focus on critical studies of environmental racism, risk, and sustainable development. Provides theoretical knowledge and research methods incorporating the study of equity and autonomy in environmental impact and risk assessment and other aspects of environmental policy politics. Offered: jointly with AES 487.

ANTH 488 Agroecology (5) I&S *Pena* Cross-cultural survey of agroecological research methods, theoretical problems, policy issues, and ethical debates. Local knowledge and ethnoscientific bases of alternative agriculture. Comparative political ecology of agroecosystems with a focus on indicators of social equity and ecological sustainability.

ANTH 489 Anthropology Practicum (2-9, max. 15) Faculty-supervised internships, either on or off campus, in organizations utilizing anthropological skills in nonacademic settings. Settings may include museums, academic journals, social service or other governmental agencies, and private nonprofit service agencies.

ANTH 491 Honors Colloquium (2, max. 12) I&S Introduction to anthropological research. Students read original articles and papers and discuss them with authors. Research presenters include department faculty, visiting faculty, and advanced graduate students. Credit/no credit only.

ANTH 495 Advanced Problems in Ethnology (3-5, max. 10) I&S Current problems in ethnology. Seminar format.

ANTH 497 Domesticating International Human Rights: Perspectives on U.S. Asylum and Refugee Law (5) I&S Examines the creation, production, and proliferation of law and legal categories relating to the status of refugees and asylum-seekers in the United States. Integrates anthropological perspectives of law's ability to create meaning in the examination of deeper implications of asylum and refugee law in American society. Offered: jointly with LSJ 425.

ANTH 498 Women's Rights and Politics in Islamic Society (5) I&S Human rights theory with women's legal rights and practice within context of the Islamic state. Introduction to debates regarding universality of human rights through examination of women's rights in Muslim context. Considers journalistic notions of homogeneity among Muslims, political nature of the Islamic state, and its mobilization of human rights. Offered: jointly with LSJ 421.

ANTH 499 Undergraduate Research (*, max. 12).

ANTH 500 Preceptorial Reading (6) For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the analysis and comparison of social and cultural systems. Not open to graduate students in the sociocultural anthropology program.

ANTH 503 Preceptorial Reading in Linguistic Anthropology (6) For beginning graduate students who have not had prior training in the problems, principles, and methods involved in linguistic anthropology. See also course description for 203. Not open to graduate students in the linguistics program.

ANTH 507 Current Issues in Sociocultural Anthropology (2-) Biweekly presentations by participants and guest lecturers of current literature and ongoing research in topics pertaining to social, cultural, and linguistic anthropology. Credit/no credit only. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

ANTH 508 Current Issues in Sociocultural Anthropology (-2) Biweekly presentations by participants and guest lecturers of current literature and ongoing research in topics pertaining to social, cultural, and linguistic anthropology. Credit/no credit only. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

ANTH 509 Sociocultural Anthropology Problem Paper (4) All first-year graduate students in sociocultural anthropology select a topic for independent research, conduct that research, and prepare a paper of about 25-50 pages on the topic chosen. Prerequisite: first-year sociocultural graduate students in good standing or permission of sociocultural faculty.

ANTH 510 Seminar on North American Indians (3) Advanced comparative treatment of selected aspects of the Indian cultures and societies of North America.

ANTH 514 Regional Seminar (3-5, max. 15) Comparative treatment of selected aspects of cultures and societies of a particular region or area.

ANTH 517 Seminar on South Asia (3) Advanced analysis of selected problems in South Asian ethnology and social structure. Prerequisite: ANTH 412.

ANTH 521 Seminar on the Anthropological Study of Religion (3, max. 9) Advanced seminar in the anthropological study of religion designed for students who have a background in the theory and applications of theory developed in the anthropological study of religion. Seminar topics vary each quarter. Prerequisite: ANTH 422 and graduate standing; permission of instructor for graduate students in Comparative Religion.

ANTH 525 Seminar in Culture Processes (3, max. 6) The concept of process and its application to the study of culture.

ANTH 527 Ethnicities, Nations, and Cultural Identities (3) Exploration of how cultural differences have been represented in ethnic and national narratives and how these narratives have shaped identities and social relations.

ANTH 533 Law, Liberalism, and Modernity (5) Examines relationships between law, culture, and power through post-structuralist theories that consider subjectivity, agency, and identity. Explores connections between modern liberal law and the body, possessive individualisms, and discourses of rights. Topics include rights-talk, globalization, biopolitics, subject-making, modern nation-states, the rule of law, neo-liberalism, and legal cultures.

ANTH 535 Research Issues in Demography and Population Studies (1-2, max. 7) Interdisciplinary seminar on current research issues in demography and population studies. Critical analysis and discussion of readings drawn from anthropological, economic, geographic, and sociological approaches. Credit/no credit only. Offered: AWSp.

ANTH 536 Seminar in Visual Anthropology (3) Significance of anthropological cinema and photography placed in historical perspective. Screening of films to determine the role of the anthropologist as filmmaker, as well as the role of the filmmaker as anthropologist.

ANTH 537 Political Anthropology and Law (3, max. 6) Seminar on special topics in politics and law and their interrelationships.

ANTH 538 Politics of Representation (3) Representations of power and the powers of representation. Critical approaches to representation in colonial and postcolonial worlds. Divine kings, exemplary centers, the New World Order, voting subjects, and the possibilities of transgression.

ANTH 539 Social Movements in Contemporary India (5) *Ramamurthy, Sivaramakrishnan* Covers issues of social change, economic development, and identity politics in contemporary India studied through environmental and women's movements. Includes critiques of development and conflicts over forests, dams, women's rights, religious community, ethnicity, and citizenship. Offered: jointly with SISSA 539/WOMEN 539.

ANTH 541 Cultural Aspects of International Development (3) *Sivaramakrishnan* Emergence of development as an aspect of late colonialism and the decolonization process. Ways in which development came to visualize social change in sectoral terms like rural land use, cities, and education, while objectifying people in target groups. Relationships between development and modernity, and development and globalization.

ANTH 542 Seminar in Cognitive Anthropology (3) Examines the intellectual history of cognitive anthropology; assesses its major findings in kinship, folk biology, color classification, and decision and planning theory. Replicates key studies, using cognitive anthropological methods. Evaluates influences from linguistics, psychology, and artificial intelligence research. Practical applications and future prospects.

ANTH 550 Field Techniques in Ethnography (5) Techniques of collecting, ordering, and utilizing ethnographic data in the field. Problems of rapport, elicitation, observation, interpretation, and ethics. Credit/no credit only.

ANTH 551 Research Design (3) Principles of research design, including problem delineation and selection of appropriate methods, as applied to current issues in sociocultural anthropology. Prerequisite: permission of instructor.

ANTH 552 Practicum in Ethnographic Research (3) Techniques of data recording, analysis, and writing for the field ethnographer. Not recommended for non-anthropology graduate students. Prerequisite: ANTH 550 and ANTH 551.

ANTH 553 Analysis of Linguistic Structures (3, max. 6) Syntactic, semantic, or phonological analysis. Languages to be analyzed vary. Prerequisite: permission of instructor. Offered: jointly with LING 553.

ANTH 555 Discourses in Feminist Anthropology Seminar (5) *Jacobs* Exploration of feminist anthropological theories and the works of their critics. Ways of using feminist anthropology in preparation for and conducting fieldwork. Topics include foundations in feminist anthropology, grand theories, variation in feminist theoretical foci within the "four fields," responses to critics. Prerequisite: graduate standing. Offered: jointly with WOMEN 553.

ANTH 556 The Evolution of the Family (3) Biological evolution of species-specific behaviors and forms of sociality linked to human mating, reproduction, and parenting. Cultural evolution of human systems of kinship and marriage as fitness-maximizing adaptations to a wide range of habitats. Prerequisite: upper-division course in evolutionary theory, population genetics, behavioral ecology, primatology, or animal behavior. Offered: jointly with SOC 556.

ANTH 559 Seminar in Language and Culture (3, max. 9) Theoretical and methodological problems in language and culture.

ANTH 560 Discourse and Culture (5) Exploration of discourse and narrative as culturally constitutive activities. Critical examination of the social implications of cultural variation in discourse. Techniques of discourse analysis in anthropological research.

ANTH 561 Seminar in Methods and Theories (3, max. 9).

ANTH 562 Clinically Applied Anthropology (3) Anthropology as it relates to interdisciplinary delivery of health care. Cultural variation in illness beliefs and behavior, types of healing practice, illness prevention, and social support networks. Prerequisite: graduate standing and permission of instructor. Offered: jointly with NURS 562.

ANTH 565 Theory of Sociocultural Anthropology (5) Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: graduate standing in anthropology or permission of instructor.

ANTH 566 Theory of Sociocultural Anthropology (5) Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: ANTH 565.

ANTH 567 Theory of Sociocultural Anthropology (5) Core course sequence for the beginning graduate student in sociocultural anthropology in which the development of theory is analyzed and emphasis is placed on the relation between theory and a growing body of ethnographic data. Prerequisite: ANTH 566.

ANTH 570 Environmental Anthropology (5) Current issues in the study of human environment interaction from a cross-cultural perspective: ecological adaptation and maladaptation; ethnoecology and indigenous knowledge; anthropogenic environmental change; political ecology of "development;" interrelations of cultural and biological diversity; conflicts over indigenous land use and property rights, environmental justice, resource conservation, and sustainability.

ANTH 572 Environmental Anthropology Research Methodology Colloquium (2, max. 10) Environmental anthropology research methodology and practice. Presentations by faculty and advanced students, hands-on exercises, and extensive discussion. Students at various stages in the program learn practical details of current methods. Limited to environmental anthropology PhD students. Credit/no credit only.

ANTH 573 Current Issues in Environmental Anthropology (2, max. 10) Presentation and discussion of current research and scholarly literature in environmental anthropology and related fields. Credit/no credit only. Prerequisite: graduate standing in any field of anthropology or permission of instructor.

ANTH 574 Socio-Cultural Perspectives of Public Health Genetics (3) Examines social and cultural issues of human genome sequencing and control of genetic expression. Attitudes and behaviors toward health, illness, and disability are studied using historical, contemporary, and cross-cultural case study material. Offered: jointly with NURS 582/PHG 521.

ANTH 575 Cultural Construction of Illness: Seminar in Medical Anthropology (5) Historical and comparative examination of depression, neurasthenia, somatization, hypochondriasis, and hysteria. Anthropology of psychosomatics and psychiatry, including cultural analysis of selected biomedical, indigenous folk medical, and popular common-sense conceptualizations of illness.

ANTH 578 Special Topics in the Anthropology of Institutions (5) Explores theoretical issues.

ANTH 580 Presenting Research Effectively (2) Designed to help advanced graduate students develop the ability to present research projects effectively in a variety of formats relevant to the academic job-search process (c.v., job letter, interview, etc). Faculty and alumni speakers share information, advice, and guidance regarding the job-search and the various paths toward meaningful employment.

ANTH 581 Dissertation Writing (3) Students experiment with different styles of anthropological writing. They apply writing techniques and styles to their own material. Students peer review for one another. Credit/no credit only.

ANTH 584 Ways of Speaking (5) Theory and literature of the ethnography of communication, with special emphasis on the descriptive-comparative approach to culturally patterned styles of communicative conduct. Offered: jointly with COM 584.

ANTH 599 Effective Teaching of Anthropology (1) Class required of all graduate students who accept teaching assistantships: instruction in teaching methods and issues, e.g., professional ethics, preparing and delivering lectures, leading

discussion groups, test writing and grading, diversity in the classroom. Credit/no credit only.

ANTH 600 Independent Study or Research (*)

ANTH 700 Master's Thesis (*) Credit/no credit only.

ANTH 800 Doctoral Dissertation (*) Credit/no credit only.

Archaeology

ARCHY 105 World Prehistory (5) I&S Prehistoric human ancestors from three million years ago: their spread from Africa and Asia into the Americas, survival during ice ages, development of civilizations. Well-known archaeological finds, e.g., Olduvai Gorge; Neanderthals; Jericho; Egyptian pyramids; Mexican temples; Mesa Verde; Ozette, Washington. May not be counted toward the 55 credits required for the major in anthropology.

ARCHY 205 Principles of Archaeology (5) I&S Techniques, methods, and goals of archaeological research. Excavation and dating of archaeological materials. General problems encountered in explaining archaeological phenomena. Offered: AWPSP.

ARCHY 212 The Archaeology of Egypt (5) I&S *Wenke* A survey of ancient Egyptian culture history between about 6000 BC and AD 400, based on a synthesis of archaeological and textual evidence. Focuses on the origins and evolution of the Egyptian state and the elements of pharaonic religion, society, economy, art, architecture, and science.

ARCHY 270 Field Course in Archaeology (12) I&S Introduction to field acquisition of archaeological data through survey and excavation. Ongoing field projects; recovery and recording techniques. Offered: S.

ARCHY 272 Short Field Course in Archaeology (5) Fitzhugh, Grayson, Lape, Stein Learn how archaeologists detect human occupation on the landscape by surveying, excavating, and crating evidence of the past. Students learn from start to finish the process of archaeological field investigation. The location for this course may change from year to year. Recommended: ARCHY 205. Offered: A.

ARCHY 299 Archaeological Laboratory Techniques (1-3, max. 12) I&S Laboratory procedures geared to one specific archaeological research project. Archaeological collection, its processing and curation, how archaeological materials are processed, and how significance is determined. No more than 5 credits may be used toward an anthropology major. Prerequisite: either ARCHY 105 or ARCHY 205.

ARCHY 303 Old World Prehistory (5) I&S Old World prehistory from beginnings of human culture to rise of civilizations. First tools made by humans, spread of humans out of Africa, origins of agriculture, rise of state society. Africa, Near East, Egypt, China, India, Europe.

ARCHY 304 New World Prehistory (5) I&S History of earliest Americans, beginning with crossing of land bridge between Asia and North America and eventual spread over the Americas. Highlights prehistory and best examples of western hemisphere's civilizations. Mexico, Yucatan, Peru, southwestern and eastern United States, Washington.

ARCHY 320 Prehistory of the Northwest Coast (5) I&S Origins, development, and variation of Pacific Northwest cultures, focusing particularly on Washington. Adaptations to maritime and interior environments. Artifacts from a variety of archaeological sites. Technological, functional, and historical significance of Northwest artifacts.

ARCHY 325 Archaeology of Island Southeast Asia and the Pacific (5) I&S History of the human occupation of the South Pacific Islands, especially Indonesia, Philippines, Micronesia, Melanesia, and Polynesia. Focus on current debates about human migrations, long distance maritime trade, political structures, culture contact, and colonialism. Emphasis on the analysis of the primary archaeological and documentary data. Prerequisite: ARCHY 205.

ARCHY 371 Analysis of Archaeological Data (5) I&S Analyzing archaeological data by measuring and describing such artifacts as stone tools and ceramics. Analysis of such environmental data as bones, plant remains, and sediments. Prerequisite: ARCHY 205.

ARCHY 401 Archaeology of Human Origins (5) I&S *Close* Early part of the prehistoric archaeological record in Africa and Eurasia, from >2,000,000 years ago until the spread of modern human beings; development of stone and bone technologies; ways of making a living; cultural adaptations; intellectual and social development. Prerequisite: ARCHY 205. Offered: Sp.

ARCHY 402 Archaeology and Social Difference (5) I&S *Close* Examines case studies in prehistoric archaeological record for intersections of socially constructed differences including age, gender, and class. Contrasts past perceptions of difference with projection of modern differences backward to validate the present. Prerequisite: ARCHY 205; either ARCHY 105, ARCHY 303, or ARCHY 401.

ARCHY 403 The Archaeology of Landscapes (5) I&S/NW *Llobera* Study of landscapes in archaeology. Methods for landscape research: historic maps, diaries, aerial photographs, geophysical and satellite imagery, etc. Archaeological landscape surveys: principles and limitations. Review of various theoretical approaches. Examination of key case studies, Issues on landscape heritage and indigenous landscapes. Prerequisite: ARCH 205.

ARCHY 465 Public Archaeology (5) I&S Examines archaeology as practiced, regulated, represented, and paid for in the world outside of academia. Reviews the development of cultural resource management laws in the context of other social changes, investigates archaeology job opportunities outside of academia, and discusses how the public learns about and funds archaeology. Prerequisite: ARCHY 205.

ARCHY 466 Archaeology Honors Thesis ([1-9]-, max. 18) I&S Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

ARCHY 468 Issues in Cultural Resource Management (1) I&S Review of federal and state cultural resource management policies and the effects of these policies on the conduct of projects that may impact cultural resources on public lands. Survey of related issues in museum management. Credit/no credit only. Prerequisite: ARCHY 205; either one 200-level ANTH course or LING 203.

ARCHY 469 Special Studies in Archaeology (3-6, max. 18) I&S Consideration in detail of specific archaeological topics, either methodological or substantive in content, of current interest. Offered occasionally by resident, new, or visiting faculty. For advanced undergraduates and graduate students. Prerequisite: ARCHY 205.

ARCHY 470 The Archaeology of Extinction (5) I&S *Grayson* Uses archaeological and paleoecological data to examine the argument that prehistoric peoples caused vertebrate extinction, from the late Ice Age extinction of ground sloths and saber-toothed cats in North America to the extinction of moas in New Zealand some 500 years ago. Offered: even years; A.

ARCHY 475 Maya Prehistory (3) I&S Considers prehistoric cultural developments throughout the Central American region occupied by the prehistoric Maya. Temporal focus spans the late Preclassic, Classic, and Postclassic periods, from 300 BC to 1530 AD. Contrasts traditional and contemporary models of ancient Maya civilization. Prerequisite: ARCHY 205; ARCHY 304.

ARCHY 476 New World States and Empires (5) I&S Considers theoretical and methodological scholarship on complex societies in Meso-America and the Andes. Highlights current research on population dynamics, subsistence strategies, economic foundations, and political processes in the development of states and empires. Considers archaeological evidence and texts of native and European documents. Prerequisite: ARCHY 205; ARCHY 304.

ARCHY 477 Archaeology of the North (5) I&S *Fitzhugh* Archaeological history of the circumpolar arctic and subarctic from Pleistocene to the 19th century. Variability in human adaptation and social evolution in some of the world's most extreme environments such as Eurasian tundra, North Pacific rim, Beringia, and North American high arctic. Prerequisite: ARCHY 205. Offered: Sp.

ARCHY 478 Prehistory of the Arid West (5) I&S Archaeology of arid western North America, with particular emphasis on the earliest peoples of this region (and on the peopling of the New World in general), and on the prehistoric hunter-gathers of the Great Basin and Southwest. Prerequisite: ARCHY 205.

ARCHY 479 Prehistoric Cultures of North America: Eastern North America (5) I&S Ecological and evolutionary account of prehistoric cultural developments in North America east of the Rocky Mountains. Cultural and environmental change from appearance of people in New World to collapse of indigenous cultural systems. Prerequisite: ARCHY 304.

ARCHY 480 Advanced Archaeological Analysis: Ceramics (6) I&S Human technology in traditional societies. Ceramic tools as evidence for technological innovation, continuity, and change; and as evidence for ancient economic systems involving production, consumption, and distribution. Examines variety of approaches to the study of material culture — especially ceramics — including archaeological, ethnographic, experimental, and technical. Prerequisite: ARCHY 371.

ARCHY 481 Advanced Archaeological Analysis: Faunal Remains (6) I&S Seminar on

techniques and methods employed in analysis of faunal remains from a wide range of Pleistocene and Holocene settings, including archaeological sites, coupled with a laboratory focusing on identification of faunal remains from these settings. Prerequisite: ARCHY 205.

ARCHY 482 Advanced Archaeological Analysis: Geoarchaeology (6) I&S Identification, analysis, and interpretation of sediments and soils associated with archaeological remains. Laboratories deal with sediment description and chemical analysis; field trips and student projects focus on archaeological applications of these subjects.

ARCHY 483 Analyses of Stone Artifacts (6) I&S *Close* Current approaches to lithic analysis, including types of information obtainable (technological, functional, social, ideological) and constraints affecting the formation and analysis of lithic assemblages. Lectures interspersed with application of methods under discussion to individual artifacts and to assemblages. Prerequisite: ARCHY 371.

ARCHY 489 Archaeology Practicum (2-9, max. 15) I&S Faculty-supervised internships either on or off campus in organizations utilizing archaeological skills in academic or non-academic settings. Includes cultural resource management companies, government agencies, private non-profit organizations, tribal governments, and museums.

ARCHY 495 Quantitative Archaeological Analytic Techniques (5) I&S Introduction to quantitative approaches to archaeological problems; data screening, numeric methods of classification and identification, graphical and computer-based seriation techniques, and the analysis of spatial patterning in artifact distributions.

ARCHY 497 Archaeological Method and Theory I: Formal Theory (5) I&S Examination of theoretical constructs in the analysis of archaeological data. Terminology, typologies, and interregional comparisons. Prerequisite: ARCHY 205.

ARCHY 498 Archaeological Method and Theory II: Explanatory Theory (5) I&S Conceptual frameworks employed by archaeologists in obtaining explanation in the three major areas of culture history, cultural reconstruction, and explanatory prehistory, considering the nature of explanation as conceived in these areas, the basic assumptions employed in achieving these aims, and an introduction to the methods employed. Prerequisite: ARCHY 205; ARCHY 497.

ARCHY 499 Undergraduate Research (*, max. 12) .

ARCHY 501 Preceptorial Reading (6) For beginning graduate students who have not had adequate training in the problems, principles, and methods involved in the reconstruction of prehistory. Not open to graduate students in the archaeology program.

ARCHY 520 Principles of Archaeological Theory (5) Review of principles of archaeological theory. Student presentation of research on archaeological theory and seminar discussion or presentations. Open only to first-year graduate students in anthropology.

ARCHY 525 Archaeology of Island Southeast Asia and the Pacific (5) History of the human occupation of the South Pacific Islands, especially Indonesia, Philippines, Micronesia, Melanesia, and Polynesia. Focus on current debates about human migrations, long distance maritime trade, political structure, culture contact, and colonialism. Emphasis on the analysis of the primary archaeological and documentary data. .

ARCHY 530 Prehistory of the Northwest Coast (5) Origins, development, and variation of Pacific Northwest cultures, focusing particularly on Washington. Adaptations to maritime and interior environments. Artifacts from a variety of archaeological sites. Technological, functional, and historical significance of Northwest artifacts.

ARCHY 560 Seminar in Archaeological Methods (5, max. 20) Basis, limitations, and applications of a particular archaeological analytical method, or closely related set of methods. Prerequisite: permission of instructor.

ARCHY 561 Dating Methods in Archaeology (6) *Feathers* Theory and method of dating in archaeology. How archaeologists determine time, in both relative and absolute senses. Methodology of stratigraphy, seriation, radiocarbon dating, dendrochronology, obsidian hydration dating and other methods. Special emphasis on, and laboratory experience in, luminescence dating.

ARCHY 570 Seminar in Archaeological Theory (3-6, max. 18) Detailed consideration of a particular archaeological theory or closely related set of theories, including their methodological and epistemological bases. Prerequisite: ARCHY 497, ARCHY 498.

ARCHY 571 Field Course in Archaeology (5) Introduction to field acquisition of archaeological data through survey and excavation. Ongoing field projects; instructional emphasis on recovery and recording techniques and on management of field projects. Prerequisite: permission of department.

ARCHY 572 Seminar in North American Archaeology (3, max. 6) Selected problems in the archaeology of America north of Mexico. Prerequisite: permission of instructor.

ARCHY 574 Meta-archaeology: Philosophy and Archaeology (4) *Wylie* Examines philosophical issues raised in and by archaeology, including theories of explanation and model building, analyses of evidential reasoning and hermeneutic interpretation, debates about ideals of objectivity and about science and values. Recommended: ARCHY 570 Text Offered: jointly with PHIL 574; Sp.

ARCHY 575 Archaeological Field Research Design (6) Nature of the archaeological record, and methods and techniques of field research, to illustrate range of data sources and modern techniques of general applicability. Practical experience in mapping, map interpretation, sampling design, remote sensing, photogrammetry, and research proposal writing. Prerequisite: permission of instructor.

ARCHY 576 Designing Grant Proposals (5) Design and writing of grant proposals for archaeological research at both dissertation and senior investigator levels, with particular emphasis on National Science Foundation structure and requirements. Prerequisite: upper-level graduate standing and permission of instructor.

ARCHY 591 Advanced Field Course in Archaeology (6-9) For students with previous field experience and graduate work in archaeology. Emphasis on decision making in field and project management. Prerequisite: ARCHY 497, ARCHY 498, ARCHY 571, and ARCHY 575 or permission of instructor.

ARCHY 600 Independent Study or Research (*) Prerequisite: permission of instructor.

ARCHY 601 Internship (3-10, max. 10) Credit/no credit only.

Biocultural Anthropology

BIO A 100 Evolution and Human Behavior (3) NW Introduction to evolution by natural selection, examining the light it can throw on human biology and behavior in such areas as the nature of sex differences, sexual conflict, and conflict between parents and children. Does not fulfill major requirements. Offered: jointly with BIOL 108.

BIO A 101 Human Biological Diversity (5) NW Kramer Exploration of human biological variation, including skin color, body form, blood groups, genetics, and reproductive strategies. Introduction to the theory of evolution through natural selection. Offered: A.

BIO A 201 Principles of Biological Anthropology (5) NW Evolution and adaptation of the human species. Evidence from fossil record and living populations of monkeys, apes, and humans. Interrelationships between human physical and cultural variation and environment; role of natural selection in shaping our evolutionary past, present, and future. Offered: AWPSP.

BIO A 370 Introduction to Primates (5) NW Newell Origins, major evolutionary trends, and modern taxonomic relationships of the nonhuman primates. Their distribution and habitat in relation to behavioral and morphological adaptations and their status as endangered species. Prerequisite: BIO A 201. Offered: A.

BIO A 372 Uses and Abuses of Evolutionary Views of Human Behavior (5) I&S/NW Newell Interaction of human behavior and biology as it has been interpreted within an evolutionary framework. Discusses various challenges to Darwinian theory, particularly Lamarckism and creationism. Topics include biological determinism as exemplified by racism, myths of human origins, the clash between biological and cultural determinism, and modern genetics and behavior.

BIO A 382 Human Population Biology (3) NW Human population biology with reference to capacity for growth in population size. Interaction of human biology, population structure, and culture in promoting such growth. Effects of economic, demographic, medical, and ecological factors. Prerequisite: either BIO A 201, BIOL 101, BIOL 180, or BIOL 201.

BIO A 387 Ecological Perspectives on Environmental Stress, Adaptation, and Health (5) NW Leonetti How human populations respond to environmental stressors in biological-behavioral terms and the relationship of this adaptational process to health. Nutritional, climatic, and sociocultural stress and associated patterns of birth, disease, and death throughout human history in hunting, gathering, farming, pre-industrial, and industrial societies. Prerequisite: BIO A 201.

BIO A 388 Human Fossils and Evolution (5-) NW Eck First of a two-part series. Evolution of human anatomy and behavior as adaptations to changing environments. Human fossils: their geological context, age, ecological setting used to reconstruct the evolution of our species during the last six million years of earth history. Prerequisite: either BIO A 201, or BIOL 201 and BIOL 202 and BIOL 203, or BIOL 102, or BIOL 180 and BIOL 200. Offered: W.

BIO A 389 Human Fossils and Evolution (-5) NW Eck Second of two-part series. Evolution of human anatomy and behavior as adaptations to changing environments. Human fossils: their geological context, age, ecological setting used to reconstruct the evolution of our species during the last six million years of earth history. Prerequisite: BIO A 388. Offered: S.

BIO A 450 Biodemography Seminar (5) I&S/NW Introduction to theory, methods, and literature of biodemography. Examines biological mechanisms underlying patterns of aging, mortality, fertility, and population growth and decline. Includes readings from anthropology, sociology, demography, evolutionary biology, molecular biology, and epidemiology. Covers prehistoric, historic, and modern human populations, and non-human model systems. Offered: W.

BIO A 455 Reproductive Ecology Laboratory Seminar (5) NW Introduction to the theory and methods of laboratory-based research in reproductive ecology. Covers lab methods for reproductive hormone assays, and their application in anthropological, biodemographic, and epidemiological research. Prerequisite: BIO A 201. Offered: Sp.

BIO A 465 Nutritional Anthropology (3) I&S/NW Concerns interrelationships between biomedical, sociocultural, and ecological factors, and their influence on the ability of humans to respond to variability in nutritional resources. Topics covered include diet and human evolution, nutrition-related biobehavioral influences on human growth, development, and disease resistance. Prerequisite: BIO A 201. Offered: jointly with NUTR 465.

BIO A 466 Biocultural Anthropology Honors Thesis (1-9), max. 18) NW Individual research under the direction of a thesis advisor, culminating in a senior honors thesis. Open only to upper-class students in departmental honors program.

BIO A 469 Special Topics in Biocultural Anthropology (3-5, max. 15) NW Delineation and analysis of a specific problem or a more general area in biocultural anthropology. Offered occasionally by visiting or resident faculty.

BIO A 470 Evolution of Human Social Behavior (5) I&S,QSR Smith Key concepts, research strategies, and debates concerning the processes and outcomes of human behavioral evolution. Emphasizes the complementarity of various methods and theories for understanding human biocultural evolution, including behavioral ecology, dual transmission theory, phylogenetic analysis, and evolutionary psychology. Prerequisite: BIO A 201.

BIO A 473 Biological Adaptability of Human Populations (5) NW Shell-Duncan Mechanisms enabling humans to maintain homeostasis in extreme environments: high altitude, heat, cold, nutritional deficiency, radiation. Adaptive process

operating at levels of physiology, metabolism, and population, including the strategies of fertility and birth spacing. Prerequisite: BIO A 201.

BIO A 475 Environmental Impacts of Small Scale Societies (5) I&S/NW Grayson, Smith Examines the environmental impacts (positive and negative) among prehistoric and historic/ethnographic small-scale (hunter-gatherer and horticultural) societies worldwide, and debates these impacts, within a theoretical framework provided by evolutionary ecology and biogeography. Offered: jointly with ENVIR 475.

BIO A 476 Sociocultural Ecology and Health (3) NW Leonetti Sociocultural ecology of health/disease, focusing on humans as bioculturally integrated beings and on populations as biocultural units of adaptation. Examples of research on disease, both infectious and chronic, and patterns of morbidity and mortality, infant, maternal, old age, with particular attention to situations of sociocultural changes. Prerequisite: BIO A 201.

BIO A 477 Evolutionary Perspectives on Sex and Gender Roles (3) I&S/NW Critical examination of theories explaining the evolution of sex differences and associated gender roles. Consideration of gender differences in mate preferences, parental investment, subsistence, aggressiveness, and risk-taking. Stresses interactions between biology and culture. Prerequisite: BIO A 201.

BIO A 482 Human Population Genetics (5) NW, QSR Holman Micro-evolutionary changes in human populations. Effects of mutation, selection, inbreeding, gene flow, and genetic drift as causes of evolutionary change. Mathematics beyond high school not required. Prerequisite: BIO A 201.

BIO A 483 Human Genetics, Disease, and Culture (5) NW Considers relationships among genetic aspects of human disease, cultural behavior, and natural habitat for a wide variety of conditions. Also considers issues of biological versus environmental determinism, adaptive aspects of genetic disease, and the role of cultural selection. Prerequisite: BIO A 201.

BIO A 484 Human Life Cycle (5) NW Newell Human growth and physical/social development: fetal life to old age. Cultural, ecological, and evolutionary aspects of the life cycle. Population differences in age and sex related to morbidity and mortality. Prerequisite: BIO A 201.

BIO A 485 Research in Growth and Development (2, max. 8) NW Focus on topics relating to primate growth and development. Prerequisite: either BIO A 484, BIO A 495, or BIO A 496, any of which may be taken concurrently.

BIO A 486 Primate Socioecology (3) NW Focus on the variety of social systems exhibited by nonhuman primates and adaptive significance of these societies; social systems in terms of the present ecology and evolutionary past of the species; the function of communicatory gestures and vocalizations, tradition, kinship, and social roles in maintaining and structuring groups over generations; the relationship among mating systems, foraging strategies, ranging patterns, and ecological separation/resource partitioning and their contribution to species-typical social organization. Prerequisite: either BIO A 370 or PSYCH 418.

BIO A 487 Human and Comparative Osteology (3) NW Introduction to the vertebrate skeleton.

The skeleton is described in detail and various methods of determining age and sex, as well as osteometry and modern statistical methods for handling such data, are presented.

BIO A 488 Primate Evolution (5) NW *Eck* Major trends in nonhominid primate evolution through the Cenozoic. Discussion of the specimens, geological context, and age of the fossil taxa and their relationship to modern taxa. Practical experience in analyzing fossil material. Prerequisite: BIO A 201.

BIO A 491 Issues in Human Paleontology (5) NW *Eck* Addresses five major unanswered questions concerning human evolution as represented by the fossil record. Prerequisite: BIO A 389.

BIO A 495 Growth and Development: Infancy (5) NW *Newell* Genetic and environmental influences on growth and development from prenatal life through infancy. Includes exploration of methods for assessing development and comparisons of development in non-human primates with human development. Prerequisite: BIO A 370.

BIO A 496 Growth and Development: Adolescence and Reproductive Maturity (5) NW *Newell* Genetic and environmental influences on growth and development during adolescence. Emphasis on the interaction of biological and social factors in attainment of reproductive maturity. Compares conditions of non-human primates with human conditions. Prerequisite: BIO A 370.

BIO A 499 Undergraduate Research (*, max. 12) .

BIO A 502 Preceptorial Reading (6) For beginning graduate students who have not had adequate training in the study of primate principles and methods involved in the study of evolution, human genetics, and the evolution of modern populations. Not open to graduate students in the biocultural anthropology program. Offered: AWS.

BIO A 520 Human Behavioral Ecology (3-5) *Smith* Principles and methods of evolutionary behavioral ecology, and critical examination of their application to human behavior in such areas as resource utilization, mating, parenting, life history, cooperation, and competition.

BIO A 525 Biocultural Research Methods and Study Design (5) *Shell-Duncan* Survey of basic conceptual issues in the design of empirical research, with special attention to problems that arise during anthropological fieldwork. Topics include defining data needs, sampling strategies, problems with co-funding, proposal writing, human subjects approval, and basic ethical issues in human biocultural research.

BIO A 526 Quantitative Methods and Modeling for Biocultural Anthropology (5) Surveys the concepts, tools, and methods for developing quantitative models based on underlying biocultural processes. Introduces methods of testing models from observations collected in anthropological field studies. Oriented toward longitudinal research of fertility, mortality, disease dynamics, population genetics, and other biocultural processes.

BIO A 550 Skeletal Biology and Prehistoric Demography (5) *O'Connor* Composition and structure of calcified tissue. Analytical

techniques and their contribution to interpretation of the archaeological record.

BIO A 568 Human Reproductive Ecology (3) A consideration of the determinants of fertility variation within and among traditional human societies. Biocultural and ecological perspectives on pubertal timing, nuptiality, duration of birth intervals, and reproductive senescence.

BIO A 569 Demographic Analysis in Biological and Social Anthropology (5) *Leonetti* Demographic analysis relevant to anthropological research on small populations. Use of data collected through local surveys, genealogical methods, and from other sources. Focuses on use of demography to analyze social and biological processes with adaptive and/or cultural-historical significance. Theoretical approaches emphasized.

BIO A 584 Topics in Ecology and Adaptation (3, max. 9) Seminar dealing with various aspects of ecology and adaptation. Topics vary each quarter.

BIO A 588 Topics in Primate Evolution (3) Emphasis on fossil taxa and their importance in understanding the morphologies and distributions of members of modern taxa. Prerequisite: BIO A 488 and permission of instructor.

BIO A 590 Current Issues in Human and Non-Human Primate Evolution (2, max. 18) Biweekly presentation by participants and guest lecturers of current literature and ongoing research in topics pertaining to human and nonhuman primate evolution, biology, anatomy, genetics variation, and behavior. Credit/no credit only.

BIO A 600 Independent Study or Research (*)

Applied Mathematics

AMATH 301 Beginning Scientific Computing (3) NW Introduction to the use of computers to solve problems arising in the physical, biological and engineering sciences. Application of mathematical judgment in selecting tools to solve problems and to communicate results. Introduction to basic MATLAB routines for numerical computation. Prerequisite: either MATH 126, Q SCI 293, MATH 129, or MATH 136; recommended: either CSE 142 or ENGR 142. Offered: AWSpS.

AMATH 351 Introduction to Differential Equations and Applications (3) NW Introductory survey of ordinary differential equations. Linear and nonlinear equations. Taylor series. Laplace transforms. Emphasis on formulation, solution, and interpretation of results. Examples from physical and biological sciences and engineering. Introduction to MATLAB as a tool for solving differential equations. Prerequisite: MATH 125. Offered: AWSpS.

AMATH 352 Applied Linear Algebra and Numerical Analysis (3) NW Development and application of numerical methods and algorithms to problems in the applied sciences and engineering. Applied linear algebra and introduction to numerical methods. Emphasis on use of conceptual methods in engineering, mathematics, and science. Extensive use of MATLAB package for programming and solution techniques. Prerequisite: either MATH 126 or Q SCI 293.

AMATH 353 Fourier Analysis and Partial Differential Equations (3) NW Heat equation, wave equation, and Laplace's equation. Separation of variables. Fourier series in context of solving heat equation. Fourier sine and cosine series; complete Fourier series. Fourier and Laplace transforms. Solution of partial differential equations on infinite domains. D'Alembert's solution for wave equation. Prerequisite: either AMATH 351 or MATH 307. Offered: AWSp.

AMATH 383 Introduction to Continuous Mathematical Modeling (3) NW Introductory survey of applied mathematics with emphasis on modeling of physical and biological problems in terms of differential equations. Formulation, solution, and interpretation of the results. Prerequisite: either AMATH 351 or MATH 307. Offered: AWSpS.

AMATH 400 Mathematical Communication for Undergraduates (2) NW Techniques of effective writing and oral presentations in the mathematical sciences. Offered: jointly with MATH 400 and STAT 400. Prerequisite: at least 15 credits in MATH, STAT, AMATH, or CSE at the 300 or 400 level, including MATH 307 or AMATH 351 and MATH 308 or AMATH 352.

AMATH 401 Vector Calculus and Complex Variables (4) NW Emphasis on acquisition of solution techniques; ideas illustrated with specific example problems arising in science and engineering. Applications of vector differential calculus, complex variables. Line-surface integrals; integral theorems; Taylor and Laurent series, contour integration. Prerequisite: MATH 324. Offered: A.

AMATH 402 Methods for Ordinary Differential Equations (4) NW See 401. Applications of ordinary differential equations; review of elementary concepts for first and second order equations; power series and Frobenius solutions. Laplace transforms; systems of differential equations, eigenvalues. Prerequisite: either AMATH 351 or MATH 307. Offered: W.

AMATH 403 Methods for Partial Differential Equations (4) NW See 401. Applications of partial differential equations; linear and quasilinear first order equations, characteristics, shocks; classification of linear second order equations; basic solution techniques for parabolic, elliptic, and hyperbolic equations; Green's functions and integral transform methods. Prerequisite: AMATH 402.

AMATH 422 Introduction to Mathematical Biology (3) NW Mathematical modeling in biology and medicine. Introduction to chaos and nonlinear dynamics, population models (predator-prey and competition systems), epidemic models with applications to sexually transmitted diseases and dynamic diseases, enzyme kinetics, biological oscillators and switches. Prerequisite: either AMATH 351, MATH 136, or MATH 307. Offered: W.

AMATH 423 Mathematical Biology: Stochastic Models (3) NW Introduction to the basics of stochastic models. Applications are taken from the biomedical sciences such as random movement of cells and molecules, activation of neurons, cancer growth and spread, population dynamics, kinetics of unimolecular reactions. Prerequisite: either AMATH 351 or MATH 307, MATH/STAT 390. Offered: Sp.

AMATH 441 Introduction to Fluid Dynamics (3) NW Eulerian equations of mass and motion.

Surface forces. Vorticity and vortex dynamics. Water waves and interfacial waves; concept of phase and group velocities. Linear instability theory. Simple viscous flows; boundary layer theory, potential theory. Low Reynolds-number flows, application to biological fluid flows. Prerequisite: AMATH 353.

AMATH 490 Special Topics (1-5, max. 15)
Topics of current interest in applied mathematics not covered by other undergraduate courses.

AMATH 498 Senior Project or Thesis (1-6, max. 6) Intended for Honors students and other advanced undergraduates completing a special project or senior thesis in applied mathematics. Offered: AWSpS.

AMATH 499 Undergraduate Reading and Research (1-6, max. 6) Credit/no credit only. Offered: AWSpS.

AMATH 500 Special Studies in Applied Mathematics (*, max. 12) Lectures and discussions of topics of current interest in applied mathematics. May not be offered every quarter; content may vary from one offering to another. Prerequisite: permission of instructor.

AMATH 501 Seminar in Applied Mathematics (1, max. 6) Special topics and selected problems of current interest in applied mathematics. Credit/no credit only. Offered: AWSp.

AMATH 502 Applied Mathematics Clinic (1)
The clinic provides consulting service for problems from different academic units requiring assistance in formulation, analysis, and interpretation of mathematical models. Students learn to delineate sources of difficulties, identify or devise a method of solution, and effectively communicate it to clients. Credit/no credit only. Prerequisite: AMATH 568, AMATH 569, and AMATH 584. Offered: AWSp.

AMATH 503 Mathematical Biology I (3)
Mathematical modeling in biomedical sciences (mainly ecology, epidemiology, physiology, and zoology). Topics covered include modeling (continuous and discrete), population interactions, dynamic diseases, reaction kinetics, biological oscillators, oscillator generated wave phenomena, epidemics, and the dynamics of infectious diseases. Prerequisite: AMATH 402 or equivalent knowledge of ordinary differential equations. Offered: A.

AMATH 504 Mathematical Biology II (3)
Mathematical modeling in the biomedical sciences (mainly ecology, epidemiology, and zoology). Topics include spatial spread of populations, traveling wave phenomena in biology, reaction diffusion theory, biological pattern formation mechanisms, mechanochemical theory of morphogenesis, spatial spread of epidemics. (May be taken independently of 503.) Prerequisite: AMATH 402, AMATH 403 or equivalents; ordinary, partial differential equations. Offered: W.

AMATH 505 Introduction to Fluid Dynamics (4)
Eulerian equations for mass-motion; Navier-Stokes equation for viscous fluids, Cartesian tensors, stress-strain relations; Kelvin's theorem, vortex dynamics; potential flows, flows with high-low Reynolds numbers; boundary layers, introduction to singular perturbation techniques; water waves; linear instability theory. Prerequisite: AMATH 403 or permission of instructor. Offered: jointly with ATM S 505/OCEAN 511; A.

AMATH 506 Applied Probability Statistics (4)
Discrete and continuous random variables, independence and conditional probability, central limit theorem, elementary statistical estimation and inference, linear regression. Emphasis on physical applications. Prerequisite: some advanced calculus and linear algebra. Offered: jointly with STAT 506.

AMATH 507 Calculus of Variations (5)
Necessary and sufficient conditions for a weak and strong extremum. Legendre transformation, Hamiltonian systems. Constraints and Lagrange multipliers. Space-time problems with examples from elasticity, electromagnetics, and fluid mechanics. Sturm-Liouville problems. Approximate methods. Prerequisite: AMATH 351 or MATH 307; MATH 324, 327; recommended: AMATH 402 and AMATH 403 or MATH 428 and 429.

AMATH 509 Theory of Optimal Control (3)
Trajectories obtained from ordinary differential equations with control variables. Controllability, optimality, the maximum principle. Relaxation and the existence of solutions. Techniques of nonsmooth analysis. Prerequisite: real analysis on the level of MATH 426; background in optimization corresponding to AMATH 507 or AMATH 515. Offered: jointly with MATH 509; even years.

AMATH 510 Applications of Optimization in Engineering Design (3) *Zabinsky* Discussion of issues arising in applications of optimization to engineering design. Emphasis on formulating problems and selecting appropriate solution techniques. Random search methods for problems otherwise computationally intractable. Individual projects in engineering optimal design. Prerequisite: AMATH/MATH/IND E 515 and MATH 328 or permission of instructor. Offered: jointly with IND E 516.

AMATH 512 Methods of Engineering Analysis (3) Applications of mathematics to problems in chemical engineering; vector calculus; properties and methods of solution of first and second order partial differential equations; similarity transforms, separation of variables, Laplace and Fourier transforms. Offered: jointly with CHEM E 512; A.

AMATH 514 Networks and Combinatorial Optimization (3) Networks and directed graphs. Paths and trees. Feasible and optimal flows and potentials. Transportation problems, matching and assignment problems. Algorithms and applications. Prerequisite: MATH 308 or AMATH 352 and MATH 324. Offered: jointly with MATH 514.

AMATH 515 Fundamentals of Optimization (5)
Maximization and minimization of functions of finitely many variables subject to constraints. Basic problem types and examples of applications; linear, convex, smooth, and nonsmooth programming. Optimality conditions. Saddlepoints and dual problems. Penalties, decomposition. Overview of computational approaches. Prerequisite: linear algebra and advanced calculus. Offered: jointly with IND E 515/MATH 515.

AMATH 516 Numerical Optimization (3)
Methods of solving optimization problems in finitely many variables, with or without constraints. Steepest descent, quasi-Newton methods. Quadratic programming and complementarity. Exact penalty methods, multiplier methods. Sequential quadratic

programming. Cutting planes and nonsmooth optimization. Prerequisite: AMATH 515. Offered: jointly with MATH 516.

AMATH 517 Optimization Under Uncertainty (3) Sequential optimization problems involving random variables. Dynamic programming, stochastic programming. Control of uncertain dynamic systems in finite, discrete time. Risk, feedback, adaptivity. Problems with imperfect state information. Applications to optimal stopping, inventory control, resource management. Prerequisite: AMATH 506 (or an introduction to basic concepts of probability such as STAT 390 or 394, 395), MATH 308 and 324. Offered: jointly with MATH 517.

AMATH 520 Special Topics in Mathematical Applications (5, max. 15) In-depth study of an application topic in applied mathematics. Topics may include special studies in geophysical fluid dynamics, hydrodynamic stability, turbulence, analytic dynamics, solid mechanics, applied optimization, tensor analysis, stochastic analysis, and nonlinear optics and lasers. Offered: W.

AMATH 521 Special Topics in Mathematical Biology (5, max. 15) DNA-folding, pattern-forming systems, stochastic analysis. Prerequisite: AMATH 402 or equivalent. Offered: Sp.

AMATH 563 Methods of Partial Differential Equations II (3) Nonlinear first-order partial differential equations: characteristics, applications to geometrical optics and Hamilton-Jacobi theory. Linear and quasilinear hyperbolic equations: conservation laws, characteristics, shocks, examples from fluid dynamics. Approximate solution methods: regular, singular, and multiple-scale perturbations. Prerequisite: AMATH 569. Offered: odd years.

AMATH 564 Methods of Partial Differential Equations III (3) Nonlinear first-order partial differential equations: characteristics, applications to geometrical optics and Hamilton-Jacobi theory. Linear and quasilinear hyperbolic equations: conservation laws, characteristics, shocks, examples from fluid dynamics. Approximate solution methods: regular, singular, and multiple-scale perturbations. Prerequisite: AMATH 569. Offered: odd years.

AMATH 567 Complex Variables (5) Complex variable and associated topics. Branch cuts, series and product expansions. Contour integration, numerical implications. Harmonic functions. Complex potential (and singularities) in physical problems. Conformal mapping; applications and examples. Fourier and Laplace transforms and applications. Recommended: 401 or equivalent. Offered: A.

AMATH 568 Advanced Methods for Ordinary Differential Equations (5) Survey of practical solution techniques for ordinary differential equations. Linear systems of equations including nondiagonal case. Nonlinear systems; stability phase plane analysis. Asymptotic expansions. Regular and singular perturbations. Recommended: 402 or equivalent. Offered: W.

AMATH 569 Advanced Methods for Partial Differential Equations (5) Analytical solution techniques for linear partial differential equations. Discussion of how these arise in science and engineering. Transform and Green's function methods. Classification of second-order equations, characteristics. Conservation laws, shocks. Prerequisite: AMATH 403, AMATH 568 or MATH 428 or permission of instructor. Offered: Sp.

AMATH 570 Asymptotic and Perturbation Methods (5) Asymptotics for integrals, perturbation and multiple-scale analysis. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or permission of instructor. Offered: A.

AMATH 571 Spectral Methods (5) Analysis and application of spectral methods for the numerical solution of differential equations. Fourier methods and the FFT; collocation methods; polynomial interpolation and Chebyshev series; approximation theory and spectral accuracy; boundary conditions. Prerequisite: AMATH 584, AMATH 585, AMATH 586, or permission of instructor. Offered: W.

AMATH 572 Introduction to Applied Stochastic Analysis (5) Introduction to the theory of probability and stochastic processes based on differential equations with applications to science and engineering. Poisson processes and continuous-time Markov processes, Brownian motions and diffusion. Prerequisite: AMATH/STAT 506, AMATH 402, or equivalent knowledge of probability and ordinary differential equations. Offered: Sp.

AMATH 573 Solitons and Nonlinear Waves (5) Methods for integrable and near-integrable nonlinear partial differential equations such as the Korteweg-de Vries equation and the Nonlinear Schrödinger equation; symmetry reductions and solitons; soliton interactions; infinite-dimensional Hamiltonian systems; Lax pairs and inverse scattering; Painlevé analysis. Prerequisite: AMATH 569, or permission of instructor. Offered: A.

AMATH 574 Conservation Laws and Finite Volume Methods (5) Theory of linear and nonlinear hyperbolic conservation laws modeling wave propagation in gases, fluids, and solids. Shock and rarefaction waves. Finite volume methods for numerical approximation of solutions; Godunov's method and high-resolution TVD methods. Stability, convergence, and entropy conditions. Prerequisite: AMATH 586 or permission of instructor. Offered: W.

AMATH 575 Dynamic Systems (5) Overview of ways in which complex dynamics arise in nonlinear dynamical systems. Topics include bifurcation theory, universality, Poincaré maps, routes to chaos, horseshoe maps, Hamiltonian chaos, fractal dimensions, Liapunov exponents, and the analysis of time series. Examples from biology, mechanics, and other fields. Prerequisite: AMATH 568 or equivalent.

AMATH 577 Perturbation Theory I (3) Regular perturbations. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions. The methods of multiple scales and averaging, weakly nonlinear wave propagation problems and resonance phenomena, homogenization, nonlinear wave propagation in fluid, solid, and particle mechanics. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent. Offered: even years.

AMATH 578 Perturbation Theory II (3) Regular perturbations. Singular perturbations: matched asymptotic expansions, boundary layers, shock layers, uniformly valid solutions. The methods of multiple scales and averaging, weakly nonlinear wave propagation problems and resonance phenomena, homogenization, nonlinear wave

propagation in fluid, solid, and particle mechanics. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent. Offered: even years.

AMATH 580 Mathematical Communication for Graduates (2) Analysis and practice of mathematical writing. Oral and poster conference presentations. Academic job interview skills. Mathematics on the web. Offered: jointly with MATH 500 and STAT 500.

AMATH 581 Scientific Computing (5) Project-oriented computational approach to solving problems arising in the physical/engineering sciences, finance/economics, medical, social and biological sciences. Problems requiring use of advanced MATLAB routines and toolboxes. Covers graphical techniques for data presentation and communication of scientific results. Prerequisite: Proficiency in basic MATLAB or AMATH 301, or permission of instructor.

AMATH 584 Applied Linear Algebra and Introductory Numerical Analysis (5) Numerical methods for solving linear systems of equations, linear least squares problems, matrix eigen value problems, nonlinear systems of equations, interpolation, quadrature, and initial value ordinary differential equations. Offered: jointly with MATH 584; A.

AMATH 585 Numerical Analysis of Boundary Value Problems (5) Numerical methods for steady-state differential equations. Two-point boundary value problems and elliptic equations. Iterative methods for sparse symmetric and non-symmetric linear systems: conjugate-gradients, preconditioners. Prerequisite: AMATH 584/MATH 584 which may be taken concurrently. Offered: jointly with MATH 585; W.

AMATH 586 Numerical Analysis of Time Dependent Problems (5) Numerical methods for time-dependent differential equations, including explicit and implicit methods for hyperbolic and parabolic equations. Stability, accuracy, and convergence theory. Spectral and pseudospectral methods. Prerequisite: AMATH 581 or AMATH 584. Offered: jointly with ATM S 581/MATH 586; Sp.

AMATH 587 Asymptotics and Special Functions (3) Origin and properties of higher transcendental functions; theoretical basis and applications of Laplace, Fourier, Bessel, Mellin transforms; asymptotic analysis, including methods of steepest descent and stationary phase, WKB. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent.

AMATH 588 Green's Functions and Integral Equations (3) Review of Sturm-Liouville theory. Green's functions and integral representation of solution to PDEs. Fredholm and Volterra integral equations. Hilbert-Schmidt theory. Singular integral equations of Cauchy type. Applications to science and engineering. Prerequisite: AMATH 567, AMATH 568, AMATH 569, or equivalent.

AMATH 592 Special Topics in Stochastic Analysis and Modeling (5) Stochastic techniques and models with applications. Markov process and diffusion, stochastic differential equations, randomly perturbed dynamical systems, and statistical mechanics. Prerequisite: AMATH 572, or permission of instructor.

AMATH 594 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing,

such as iterative methods, eigenvalue computations, approximation theory, finite element methods, inverse problems, nonlinear conservation laws, computational fluid dynamics. Prerequisite: AMATH 584, 585, 586, or equivalent. Offered: jointly with MATH 594.

AMATH 595 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. Prerequisite: AMATH 584, 585, 586, or equivalent. Offered: jointly with MATH 595.

AMATH 596 Special Topics in Numerical Analysis (2-3, max. 15) Various advanced topics in numerical analysis and scientific computing. See the description for 594 for sample topics. AMATH 584, 585, 586, or equivalent. Offered: jointly with MATH 596.

AMATH 600 Independent Research or Study (*) Credit/no credit only.

AMATH 700 Master's Thesis (*) Credit/no credit only.

AMATH 800 Doctoral Dissertation (*) Credit/no credit only.

Art

ART 121 Drawing (5) VLPA Drawing studied as the means of creating a coherent visual and expressive statement. Development of ability in the fundamentals of drawing: line, tone, and gesture, theory and practice of linear and aerial perspective, and basic concepts of composition. Offered: AWSp.

ART 124 Three-Dimensional Design Fundamentals (5) VLPA Through use of a variety of materials, three-dimensional fundamentals are investigated for formal and conceptual concerns as they apply to the visual arts. Offered: AWSp.

ART 126 Topics in Studio Art (5) VLPA Studio-based class introducing students, through particular studio practice of individual instructors, to methods of visual awareness, principles of organization, and approaches to visual and conceptual observation. Relationship between art history and contemporary art practice. Artistic medium in each class varies with instructor expertise. Offered: AWSpS.

ART 131 Alternative Approaches to Art and Design (5, max. 20) VLPA Presentation of process through which artists discover and translate ideas, feelings, and concerns into images or objects. Use of a wide variety of methods and approaches, from traditional to technological, to promote visual expression. Discussion and critiques leading toward better understanding the creative process.

ART 133 Color Theory and Practice (5) VLPA Examination of color as distinct visual phenomenon with investigations of its practical, theoretical, and illusionary aspects. Various media and materials employed in exercises and compositions that demonstrate properties of color structure, symbolism, and perception and their potential applications to art and design.

ART 140 Basic Photography (5) VLPA Introduction to theory, techniques, and processes of still photography. Projects stress the visual and creative potential of the medium. (Students

must provide a camera with lens, shutter, and aperture controls.) Offered: AWSpS.

ART 150 Three-Dimensional Design Fundamentals (5) VLPA Introduction to fundamentals of three-dimensional design process. Both practical and conceptual skills explored and demonstrated through assigned project or projects.

ART 166 Design Foundations (5) VLPA The rudiments of visual structure and organization in two-dimensional design. Covers formal principles of composition with an emphasis on design processes and serves as the groundwork for subsequent design courses. Required for application to the Visual Communication Design major. Offered: A.

ART 190 Introduction to Drawing (5) VLPA Builds basic drawing skills, develops understanding of primary concepts which relate to drawing and develops an understanding of the grammar or syntax of two-dimensional language. Students move beyond their current knowledge and abilities and link new skills, concepts, and understandings to creative expressing. Offered: AWSpS.

ART 201 Ceramic Art: Handbuilding (5) VLPA Introduction to handbuilding; kiln firing and glazing processes. Examination of contemporary sculpture in clay.

ART 202 Ceramic Art: Wheel Throwing (5) VLPA Introduction to wheel throwing, glazing, and kiln firing processes. Examination of contemporary vessel form in clay.

ART 205 Introduction to Visual Communication Design (5) VLPA Continuation of the incoming student evaluation process for the visual communication design program. Presents a set of problems that further define the study and practice of visual communication design. Addresses organizational, conceptual, compositional, and typographic problems.

ART 206 Photographic Visualizations (5) VLPA Explores photography as a means of visualizing ideas in the context of visual communication design. Students complete a series of assignments that consider technical and formal issues, critical thinking, concept development, and experimentation. Offered: Sp.

ART 207 Drawing for Design Communication (5) VLPA Concentrates on developing skills used to communicate ideas that exist in the imagination. Focuses on study of design drawing history and development of basic skills necessary for ideation, exploration, communication, explanation. Prepares students to visualize and discuss ideas rapidly and professionally. For design majors only. Offered: A.

ART 208 Survey of Design History (5) VLPA Comprehensive survey of the ideas, events, and individuals that determined the design of information, objects, culture, and commerce across societies. Examines the social, political and cultural contexts that shape graphic design and the ideologies and relationships of similar movement in art and architecture. Late 19th Century - contemporary issues.

ART 209 Fundamentals of typography (5) VLPA Develops understanding of and sensibility to typographic details used to create effective communication. Focus moves from understanding letter forms that make up words to the

complexities of developing phrases, sentences, and short paragraphs with multiple levels of hierarchical meaning. Prerequisite: ART 207; ART 208. Offered: W.

ART 210 Collaboration and Improvisation (5) VLPA Introduces key factors in the theory and practice of creating and participating in collaborative projects. Focuses on creating and participating in effective teams, understanding strengths and roles within teams, working through team issues, developing techniques for interdisciplinary problem solving. Prerequisite: ART 207; ART 208.

ART 211 Image Methodology (5) VLPA Imagery as essential to visual communication. Ways that meaning and representation in images profoundly impact understanding. Focus on expanding image making, ideation skills, developing experimental visual processes to create meaning, finding engaging and imaginative solutions. Exploration of symbolism, abstraction, metaphors. Prerequisite: ART 209; ART 210. Offered: Sp.

ART 212 Human-Centered Design (5) VLPA Introduces design methodologies including ergonomics, participatory design, user research, ethnography, inclusive design, usability testing. Focuses on design methods leading to more humane technology, providing platforms for innovation, reframing problems in unique ways, explaining complex information, exploring alternatives, visualizing and communicating solutions. Prerequisite: ART 209; ART 210. Offered: .

ART 226 Introduction to Structure (5) VLPA Explores the structure of two- and three-dimensional textile forms. Students work with floor looms, computer-aided looms, as well as working directly with materials.

ART 227 Introduction to Surface (5) VLPA Basic techniques of dying, printing, and embellishing, with emphasis on their conceptual uses in art making.

ART 234 History of Public Art and Public Space (5) VLPA *Young* Survey of the melding of public art, architecture, and landscape architecture through the ages, starting with Stonehenge, the Pyramids, and Gothic cathedrals, and ending with contemporary earthworks, public art, and twenty-first century performance art. Offered: W.

ART 241 Intermediate Photography I (5) VLPA Studio projects examining the expressive and conceptual uses of alternative photographic materials and techniques. Prerequisite: ART 140. Offered: A.

ART 245 Concepts in Printmaking (5) VLPA Introduction to contemporary printing methods such as monotype, monoprint, stencil, and photocopy. Survey of historical and current approaches to the art of printmaking.
